## 2017 Executive Compensation Overview

Frequently Used Terms Please also read the footnotes contained throughout this Overview for additional definitions of terms we use and other important information. Reported Pay is Total Compensation reported in the Summary Compensation Table, except for years 2006 to 2008, where the grant date value of restricted stock as provided under current SEC rules is used to put all years of compensation on the same basis. Realized Pay is compensation actually received by the CEO during the year, including salary, current bonus, payouts of previously granted earnings bonus units (EBUs), net spread on stock option exercises, market value at vesting of previously granted stock-based awards, and All Other Compensation amounts realized during the year. It excludes unvested grants, change in pension value, and other amounts that will not actually be received until a future date. Amounts for compensation benchmark companies include salary, bonus, payouts of non-equity incentive plan compensation, and All Other Compensation as reported in the Summary Compensation Table, plus value realized on option exercise or stock vesting as reported in the Option Exercises and Stock Vested table. It excludes unvested grants, change in pension value, and other amounts that will not actually be received until a future date, as well as any retirement-related payouts from pension or nonqualified compensation plans. Unrealized Pay is calculated on a different basis from the grant date fair value of awards used in the Summary Compensation Table. Unrealized Pay includes the value based on each compensation benchmark company's closing stock price at fiscal year-end 2015 of unvested restricted stock awards; unvested long-term share and cash performance awards, valued at target levels; and the in the money value of unexercised stock options (both vested and unvested). If a CEO retired during the period, outstanding equity is included assuming that unvested awards, as of the retirement date, continued to vest pursuant to the original terms of the award. Compensation Benchmark Companies consist of AT&T, Boeing, Caterpillar, Chevron, Ford Motor Company, General Electric, IBM, Johnson & Johnson, Pfizer, Procter & Gamble, United Technologies, and Verizon. For consistency, CEO compensation is based on compensation as disclosed in the Summary Compensation Table of the proxy statements as of August 1, 2016. Free Cash Flow is cash flow from operations and asset sales less additions to property, plant and equipment, and additional investments and advances, plus collection of advances. For additional information, see page 45 of the Summary Annual Report included with the Corporation's 2017 Proxy Statement. Shareholder Distributions represent the cash to shareholders in the form of both dividends and share purchases. Shares are purchased both to reduce shares outstanding and to offset shares issued in conjunction with company benefit plans and programs. For purposes of calculating distributions to shareholders, the Corporation only includes the cost of those shares purchased to reduce shares outstanding. The yield represented in chart 4 is the total shareholder distributions divided by market capitalization. For additional information, see page 45 of the Summary Annual Report included with the Corporation's 2017 Proxy Statement. Return on Average Capital Employed (ROCE) for the Corporation is net income attributable to ExxonMobil excluding the after-tax cost of financing, divided by total corporate average capital employed. For this purpose, capital employed means the Corporation's net share of property, plant and equipment, and other assets less liabilities, excluding both short-term and long-term debt. For additional information, see pages 44 and 45 of the Summary Annual Report included with the Corporation's 2017 Proxy Statement. Statements regarding future events or conditions are forward-looking statements. Actual future results, including project plans, schedules, and results, as well as the impact of compensation incentives, could differ materially due to changes in oil and gas prices and other factors affecting our industry, technical or operating conditions, and other factors described in Item 1A Risk Factors in our most recent Form 10-K. References to oil-equivalent barrels and other quantities of oil and gas herein include amounts not yet classified as proved reserves under SEC rules, but which we believe will ultimately be moved into the proved category and produced. The term project can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.
