- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.02. Results of Operations and Financial Condition

Attached as an exhibit hereto are a press release and financial tables dated April 20, 2017 issued by Verizon Communications Inc. (Verizon).

NON-GAAP MEASURES

Verizon's press release and financial tables include financial information prepared in conformity with generally accepted accounting principles (GAAP) as well as non-GAAP financial information. It is management's intent to provide non-GAAP financial information to enhance the understanding of Verizon's GAAP financial information and it should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP. Each non-GAAP financial measure is presented along with the corresponding GAAP measure so as not to imply that more emphasis should be placed on the non-GAAP measure. We believe that non-GAAP measures provide relevant and useful information, which is used by management, investors and other users of our financial information in assessing both consolidated and segment performance. The non-GAAP financial information presented may be determined or calculated differently by other companies and may not be directly comparable to that of other companies.

Consolidated Operating Revenues Excluding Divested Businesses and Acquisitions

Verizon Consolidated Operating Revenues Excluding Divested Businesses and Acquisitions is a non-GAAP financial measure that we believe is useful to management, investors and other users of our financial information in evaluating our revenue growth and trends on a comparable basis because it excludes operating revenues from the local landline businesses in California, Florida and Texas divested on April 1, 2016 (Divested Businesses) which are no longer reflected in first quarter 2017 results and it excludes operating revenues from XO Holdings' wireline business (XO) (acquired on February 1, 2017), Fleetmatics Group PLC (acquired on November 7, 2016) and Telogis, Inc. (acquired on July 29, 2016), (collectively, Acquisitions) which are not reflected in first quarter 2016 results.

Consolidated Operating Revenues Excluding Divested Businesses and Acquisitions is calculated by subtracting operating revenues from Divested Businesses and Acquisitions from consolidated operating revenues.

Operating Revenues from Media Business net of Traffic Acquisition Costs

Operating Revenues from Media Business net of Traffic Acquisition Costs (TAC) is a non-GAAP financial measure that we believe is useful to management, investors and other users of our financial information in evaluating the financial performance of our business. TAC consists of costs incurred through arrangements in which we acquire third-party online advertising inventory for resale and arrangements whereby partners direct traffic to our media business. We believe that this measure enhances the comparability of these revenues to those of our competitors. However, comparable activity may be measured differently by other companies and our revenue sources and TAC may be different than those of other companies.

Operating Revenues from Media Business net of TAC is calculated by subtracting TAC from operating revenues from our media business, which includes intersegment revenues.

IoT Revenues Excluding Acquisitions

IoT Revenues Excluding Acquisitions is a non-GAAP financial measure that we believe is useful to management, investors and other users of our financial information in evaluating our IoT revenue growth and trends on a comparable basis since it excludes operating revenues from Fleetmatics Group PLC (acquired on November 7, 2016) and Telogis, Inc. (acquired on July 29, 2016) which are not reflected in first quarter 2016 results.

IoT Revenues Excluding Acquisitions is calculated by subtracting operating revenues from Fleetmatics and Telogis from IoT revenues.

Wireline Operating Revenues Excluding Acquisition

Wireline Operating Revenues Excluding Acquisition is a non-GAAP financial measure that we believe is useful to management, investors and other users of our financial information in evaluating our Wireline revenue growth and trends on a comparable basis since operating revenues from XO (acquired on February 1, 2017) are not reflected in first quarter 2016 results.

Wireline Operating Revenues Excluding Acquisition is calculated by subtracting operating revenues from XO from Wireline operating revenues.

EBITDA and EBITDA Margin

Verizon consolidated earnings before interest, taxes, depreciation and amortization (Consolidated EBITDA), Consolidated EBITDA Margin, Segment EBITDA, and Segment EBITDA Margin are non-GAAP financial measures that we believe are useful to management, investors and other users of our financial information in evaluating operating profitability on a more variable cost basis as they exclude depreciation and amortization expense related primarily to capital expenditures and acquisitions that occurred in prior periods, as well as in evaluating operating performance in relation to Verizon's competitors.

Consolidated EBITDA is calculated by adding back interest, taxes, depreciation and amortization expense, equity in losses of unconsolidated businesses and other (income) and expense, net to net income. Consolidated EBITDA Margin is calculated by dividing Consolidated EBITDA by consolidated operating revenues.

Segment EBITDA is calculated by adding back depreciation and amortization expense to segment operating income. Segment EBITDA Margin is calculated by dividing Segment EBITDA by segment total operating revenues.

Consolidated Adjusted EBITDA

Verizon consolidated adjusted EBITDA (Consolidated Adjusted EBITDA) is a non-GAAP financial measure that we believe provides relevant and useful information to management, investors and other users of our financial information in evaluating the effectiveness of our operations and underlying business trends in a manner that is consistent with management's evaluation of business performance. We believe Consolidated Adjusted EBITDA is widely used by investors to compare a company's operating performance to its competitors by minimizing impacts caused by differences in capital structure, taxes and depreciation policies. Further, the exclusion of non-operational items and impact of Divested Businesses enable comparability to prior period performance and trend analysis. Consolidated Adjusted EBITDA is also used by rating agencies, lenders and other parties to evaluate our creditworthiness.

Consolidated Adjusted EBITDA is calculated by excluding from Consolidated EBITDA the effect of (1) non-operational items such as actuarial gains or losses arising from the re-measurements of pension and other postretirement benefits, severance costs, gain on sale of Divested Businesses and gain on spectrum license transactions; and (2) the impact of Divested Businesses. Actuarial gains or losses as a result of the re-measurements of pension and other postretirement benefits are included in our operating expenses and are measured based on projected discount rates and estimated returns on plan assets. Such estimates are updated at least annually at the end of the fiscal year to reflect actual discount rates and returns on plan assets or more frequently if significant events arise which require an interim re-measurement. We believe the exclusion of these re-measurement gains or losses enables management, investors and other users of our financial information to assess our sequential and year-over-year performance on a more comparable basis and is consistent with management's own evaluation of performance.

Net Debt and Net Debt to Consolidated Adjusted EBITDA Ratio

Net Debt and Net Debt to Consolidated Adjusted EBITDA Ratio are non-GAAP financial measures that we believe are useful to management, investors and other users of our financial information in evaluating Verizon's ability to service its debt.

Net Debt is calculated by subtracting cash and cash equivalents from the sum of debt maturing within one year and long-term debt. For purposes of Net Debt to Consolidated Adjusted EBITDA Ratio, Consolidated Adjusted EBITDA is calculated for the last twelve months.

Adjusted Earnings per Common Share

Adjusted Earnings per Common Share (Adjusted EPS) is a non-GAAP financial measure that we believe is useful to management, investors and other users of our financial information in evaluating our operating results and understanding our operating trends without the effect of non-operational items. We believe that excluding non-operational items provides more meaningful comparisons of our financial results from period to period.

Adjusted EPS is calculated by excluding the effect of non-operational items such as actuarial gains or losses arising from the re-measurement of pension and other postretirement benefits and severance costs, early debt redemption costs and gain on spectrum license transactions from the calculation of reported EPS.

See the accompanying schedules for reconciliations of non-GAAP financial measures to GAAP.

Item 9.01. Financial Statements and Exhibits

(d) Exhibits.

Exhibit Number	Description
99	Press release and financial tables, dated April 20, 2017, issued by Verizon Communications Inc.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
