Message from the CEO

This year began with initial hints of upswing in economy. The challenge of approving the reforms required to ensure that Brazilian economy continues to improve on a sustainable basis, however, withstand. While unemployment remains high, inflation and interest rates continue to decline, and a few segments of the economy, such as automotive production, showed first signs of improvement. The outlook for grain crops is positive, benefitting exports and trade balance.

Our energy portfolio reacted to the economic upturn in the first quarter of 2017. Gasoline equivalent sales grew 1% in the country (ANP base), after a long period of consumption shrinkage, and Raízen Combustíveis outperformed again the industry average. For the second consecutive quarter, industrial natural gas consumption enjoyed a slight recovery and Comgás continue growing in residential and commercial segments, with positive effects on results. We ended the 2016/17 sugarcane crop evidencing our capacity to capture efficiencies in the production and industrial processes, which, coupled with a scenario of more favorable prices and capital allocation discipline, allowed for a significant increase in cash generation at Raízen Energia.

Rumo keeps on increasing capacity and reducing cost, delivering EBITDA growth despite 1Q16 strong basis of comparison. The atypical demand for corn transportation that boosted 1Q16 did not happen in 1Q17. Rumo EBITDA increased on the back of the implementation of the Company's Capex plan, resulting in higher market share of grain transportation to the Port of Santos (+6 p.p.). The outlook for the upcoming quarters remains positive, especially when it comes to soybean and corn crops. Soybean harvest has been confirming expectations so far, while corn planting happened under favorable conditions for crop productivity.

Finally, our business portfolio, which proved to be highly resilient to the crisis over the last two years, show its ability to capture a potential upturn in the economy, strengthening our confidence in delivering the growth embedded in our 2017 guidance.

Cosan S.A. (CSAN3):

Cosan S/A Pro forma: Adjusted EBITDA was R\$1.1 billion in 1Q17 (-4%), since favorable results of Raízen Combustíveis and Comgás were partially offset by lower accounting profit of Raízen Energia, which was affected by foreign exchange (non-cash effect). Including the effect of currency hedge on sugar exports, adjusted EBITDA would have been R\$1.2 billion (+8%). We ended the 2016/17 sugarcane crop evidencing our capacity to capture production efficiencies, which coupled with the favorable price scenario, enabled a substantial

increase of cash generation, with the currency hedge accounted as financial gain. At Raízen Combustíveis, we continued to focus on service stations network expansion and maintenance, privileging long-term relationship with our dealers and optimizing our supply and commercialization strategy. At Comgás, the beginning of 2017 recorded a small recovery in the industrial consumption, while residential and commercial segments continue growing through new connections. At Moove, we outperformed the industry average in Brazil again and increased sales volumes at international operations. With better operating results, the pro forma Cash Flow from Operating Activities (CFO) came to R\$2.2 billion (+4%), while Free Cash Flow to Equity (FCFE) totaled R\$139 million. Leverage (proforma Net Debt/EBITDA) reached 2.0 times at the end of the period, excluding Comgás regulatory current account effects.

Raízen Combustíveis: Adjusted EBITDA grew 16% to R\$682 million in 1Q17. The expansion reflects higher volume sold with a better sales mix, coupled with continued gains from the supply and commercialization strategy and cost reductions. The fuel distribution market in Brazil started 2017 with lower drop of consumption when compared to last quarters. Total volume sold fell 1% in 1Q17 (ANP data). Sales of gasoline equivalent showed signs of recovery, growing 1% in the country (ANP base). Raízen's sales outperformed the industry average, going up 1% in total, while Otto cycle sales increased 3% year-on-year (4% in gasoline equivalent). Diesel sold by Raízen was up 3% in the quarter driven by new agreements with industrial clients.

Raízen Energia: Adjusted EBITDA (excluding biological asset variation, debt hedge accounting and non-recurring effects) came to R\$751 million (-36%) in 1Q17, mainly affected by (i) lower concentration of sales in the period, (ii) higher CONSECANA and (iii) lower foreign exchange rate in the period, despite improved sugar sales average price. The 2016/17 crop year ended with total crushing of 59.4 million tons of sugarcane (-5%), affected by lower productivity compared with previous crop (TCH reduction due to lower rainfall volume, partially offset by slightly improved TRS). Sales volume in sugar equivalent dropped 4%, offset by higher sugar and ethanol sales average prices. The unit average cash cost, excluding the effects from CONSECANA, was 2% lower in the 2016/17 crop, absorbing inflation and evidencing efficiency gains in the productive and industrial processes. Adjusted EBITDA of the crop year was R\$3.1 billion (-11%). Including the effect of currency hedge on sugar exports, adjusted EBITDA would have been R\$3.7 billion versus R\$3.0 billion in previous crop year. 2016/17 CAPEX was up 18% to R\$2.1 billion, in line with guidance.

Comgás: EBITDA, normalized by regulatory current account effect, was R\$384 million (+19%) in 1Q17, reflecting volume growth (3% ex thermal) and margins correction by inflation (9.8%) in May 2016. Sales volume in the industrial segment was up 3% year-on-year, due to higher consumption of few industries and weak basis of comparison.

COSAN LIMITED

**Earnings Release
1st Quarter of the Fiscal Year of 2017**

Commercial sales volume was up 5% year-on-year, chiefly due to the addition of new clients in the last 12 months. The residential segment ended the quarter with modest 1% growth, since results from client base expansion were offset by lower unit consumption due to higher average temperature in the period. The regulatory current account recorded a R\$60 million reduction during the quarter and ended the period with a balance of R\$354 million in favor of clients.

Moove: EBITDA in 1Q17 was up 67% to R\$43 million, as a result of higher volume sold (+6%) and better sales mix. Moove outperformed Brazilian lubricant market (-1%) reporting a 1% increase compared to the same period last year (SINDICOM data).

Cosan Logística S.A. (RLOG3):

Rumo's EBITDA was up 11% to R\$493 million in 1T17 year-on-year. Even though the atypical demand for corn transportation in

1Q16 was not seen again in 1Q17, Rumo recorded EBITDA growth as a result of implementation of the Company's Capex plan.

With increased capacity, in 1Q17 the Company recorded total volume close to the volume transported in the same period last year. The higher volume of soybean transported in February and March offset the lower demand of corn in January. In addition, variable costs decreased and fixed costs added to selling, general and administrative expenses increased below inflation, besides tariff contractual adjustments. As a result, EBITDA margin climbed from 38% in 1Q16 to 41% in 1Q17.

Cosan Limited Pro Forma: Adjusted EBITDA reached R\$1.7 billion this quarter (+5%), due to better results from Raízen Combustíveis, Comgás and Rumo, partially offset by lower accounting profit from Raízen Energia, strongly affected by foreign exchange (non-cash effect). Cosan Limited closed the quarter with a R\$ 109 million net loss.

Report on Review of Interim Financial Information

To the Board of Directors and Shareholders of

Cosan Limited

Bermuda

Introduction

We have reviewed the accompanying consolidated interim financial information of Cosan Limited (Company) contained in the Quarterly Information Form - ITR for the quarter ended March 31, 2017, which comprises the statement of financial position as of March 31, 2017, and the respective statements of profit and loss and other comprehensive income, changes in equity and cash flows for the three-month period then ended, including the footnotes.

The Company s management is responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB. Our responsibility is to express a conclusion on this consolidated interim financial information based on our review.

Scope of review

We conducted our review in accordance with the Brazilian and International standards on review engagements of interim financial information (*NBC TR 2410 - Revisão de Informações Intermediárias Executada pelo Auditor da Entidade* and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for the financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the audit standards and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information included in the Quarterly Information Form - ITR referred to above has not been prepared, in all material respects, in accordance with IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB.

Cosan Limited (Cosan) was incorporated in Bermuda on April 30, 2007. Cosan's class A common shares are traded on the New York Stock Exchange (NYSE) (ticker - CZZ). The BDRs (Brazilian Depositary Receipts) representing Cosan's class A common shares are listed on the Brazilian Stock Exchange (BM&FBovespa) (ticker - CZLT33). Mr. Rubens Ometto Silveira Mello is the ultimate controlling shareholder of Cosan. Cosan controls its subsidiaries Cosan S.A. Indústria e Comércio (Cosan S.A.) and Cosan Logística S.A. (Cosan Logística) through a 62.20% and 72.39% interest, respectively. Cosan, Cosan S.A., Cosan Logística and its subsidiaries are collectively referred to as the Company .

The Company's primary activities are in the following business segments: (i) Piped natural gas distribution to part of the State of São Paulo through its subsidiary Companhia de Gás de São Paulo - COMGÁS (COMGÁS); (ii) Logistics services including transportation, port loading and storage of sugar, leasing or lending of locomotives, wagons and other railway equipment, through its indirect subsidiaries Rumo S.A. (Rumo), logistic segment (Logistic); (iii) Production and distribution of lubricants, through its indirect subsidiaries Cosan Lubrificantes e Especialidades S.A. (Moove) and Comma Oil & Chemicals Ltd. (Comma), under the Mobil licensed trademark in Brazil, Bolivia, Uruguay and Paraguay, in addition to the European and Asian market using the Comma brand and corporate activities (Lubricants); and (iv) other investments, in addition to the corporate structures of the Company (Cosan's other business).

The Company also holds interests in two joint ventures (JVs): (i) Raízen Combustíveis S.A. (Raízen Combustíveis), a fuel distribution business, and (ii) Raízen Energia S.A. (Raízen Energia), which operates in the production and marketing of sugar, ethanol and energy cogeneration, produced from sugar cane bagasse.

On March 31, 2017, Cosan Logística had a consolidated working capital of R\$607,252 and loss for the period of R\$248,826. Nevertheless, it presented a net cash generation from operations of R\$546,170 and made investments in the modernization of its fleet and improving the railway network in the amount of R\$471,883, in line with its business plan. The capital increase associated with the debt rescheduling implemented in 2016, as well as the issuance of Senior Notes 2024 in 2017 (note 16), equated the Company's operational continuity risk over a short-term horizon.

On February 23, 2017, TPG VI *Fundo de Investimento em Participações* (TPG), a shareholder of Rumo S.A (Rumo), exercised its right to exchange 11,479,987 shares issued by Rumo for shares issued by Cosan S.A in pursuant to the shareholders agreement entered into in 2010, subsequently added, between Cosan Logística, TPG VI, GIF, Cosan S.A and the Company. Cosan S.A and GIF agreed to settle financially the stock replacement obligation through of payment of R\$ 275,780 and the shares received were valued at fair value in the amount of R\$ 97,924 and recorded as capital reserve.

2 Basis of preparation

2.1 Statement of compliance

The consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting, as issued by the International Accounting Standards Board (IASB). They do not include all the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Company's financial position and performance since the last annual consolidated financial statements as at and for the year ended December 31, 2016.

The significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended December 31, 2016, except for the adoption of new standards and interpretations effective as of January 1, 2017. The Company has not early adopted any other standard, interpretation or amendment that has been issued.

All own relevant information of the interim financial statements, and only they, are being highlighted, and these correspond to those used by management in its management.

These consolidated interim financial statements were authorized for issue by the Board of Directors on May 05, 2017.

4 New standards and interpretations not yet effective

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2017 and earlier application is permitted; however, the Group has not early adopted the following new or amended standards in preparing these consolidated interim financial statements.

IFRS 15 - Revenue from contracts with customers

The significant impacts related to IFRS 15 may be in the disclosures of the notes to the financial statements and in the policies applied to the control of revenues. Material impacts on revenue recognition are not expected

IFRS 9 - Financial instruments

The application of the new standard may result in a review of the provision for doubtful accounts. The study on possible impacts has not yet been completed.

IFRS 16 Leases

The Company began an initial assessment of the potential impact on its financial statements. So far, the most significant impact identified is that the subsidiary Rumo S.A will recognize new assets and liabilities for its operating leases related to concession. In the jointly-owned subsidiary Raízen, it is expected to have significant impacts on land leases.

The Company has not yet quantified the impact of adopting IFRS 16 on its assets and liabilities. The quantitative effect of the adoption of IFRS 16 will depend specifically on the transition method chosen, the use of practical files and recognition exemptions, and any additional leases that the Company will enter into. The Company expects to disclose its transition approach and quantitative information prior to adoption.

There are no other IFRS standards or IFRIC interpretations that have not come into effect and are expected to have a material impact on the Company.

5 Changes adopted

The changes below were applied for the first time in 2016 did not result in a significant impact on the Company's annual consolidated financial statements or in the interim financial statements.

The nature and the impact of each new standard or amendment are described below:

(i) Discontinued operation

Due to the partial sale of RADAR segment s shares and as required by IFRS 5 - Non-current assets available for sale and discontinued operations - the Company is restating the presentation of its income statement for the period ended March 31, 2016.

- (i) Refers to the intangible asset for the public gas distribution service concession, which represents the right to charge users for the supply of gas, comprised of: (i) the concession rights recognized in the business combination and (ii) concession assets;
- (ii) Refers to the concession right agreement of Rumo Malha Norte, which will be amortized until the end of the concession in 2079;
- (iii) Port operating license and customer relationships of Rumo, from the business combinations.

Impairment testing of cash-generating units (CGU) goodwill

The Company tests the recoverable amounts of goodwill arising from business combination transactions annually. Property, plant and equipment and definite life intangible assets that are subject to depreciation and amortization are tested for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable.

During the period ended March 31, 2017, no impairment indicators were identified that would trigger the need for an impairment test.

The non-controlling interests of the indirect subsidiary Brado have the right to exercise a liquidity option provided for in the shareholders' agreement signed on August 5, 2013. This option would exchange all Brado shares held by such minority shareholders by shares of ALL. The exchange ratio shall take into account the economic value for both Brado and ALL shares. At the Company's exclusive discretion, an equivalent cash payment is also possible.

At 31 March 2017, 3,035 options were excluded from the diluted weighted-average number of ordinary shares calculation because their effect would have been anti-dilutive.

- (i) The cash and cash equivalents are held with bank and financial institution counterparties, which are rated AAA, AA, A and BBB.

The credit risk on cash and cash equivalents, marketable securities, other financial assets and derivative financial instruments are determined by rating instruments widely accepted by the market and are arranged as follows:

	March 31, 2017	December 31, 2016
AAA	599,801	
AA+	541,897	
AA	6,654,213	5,499,565
A	603,188	983,384
BBB		260,298
	8,399,099	6,743,247

- (ii) Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of the customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored and any shipments to major customers are generally covered by letters of credit or other forms of credit insurance.

The requirement for impairment is analyzed at each reporting date on an individual basis for major clients. Additionally, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. The calculation is based on actual incurred historical data.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets. Management considers that the credit risk is covered by the allowance for doubtful accounts

(iii) Credit risk from balances with banks and financial institutions is managed by the Company's treasury department in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed on an annual basis and may be updated throughout the year. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through potential counterparty's failure to make payments.

*(In thousands of Brazilian Reals - R\$, except earnings per share)***Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. As mentioned in Note 1, Management has been working on measures to enable the Company to honor its Commitments.

The non-derivative financial liabilities of the Company sorted by due dates (based on undiscounted cash flows contracted) are as follows:

Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

The Company uses derivatives to manage market risks. All such transactions are carried out within the guidelines set by the Risk Management Committee. Generally, the Company seeks to apply hedge accounting to manage volatility in profit or loss.

Foreign exchange exposure, net	(1,125,551)	(355,243)	495,036	151,894

Sensitivity analysis on changes in foreign exchange rates:

The probable scenario was defined based on the U.S. Dollar market rates as at March 31, 2017, which determines the fair values of the derivatives at that date. Stressed scenarios (positive and negative effects, before tax effects) were defined based on changes of a 25% and 50% to the U.S. Dollar exchange rates used in the probable scenario.

Based on the financial instruments denominated in U.S. Dollars at March 31, 2017, the Company performed a sensitivity analysis by increasing and decreasing the exchange rate for R\$/US\$ by 25% and 50%. The probable scenario considers the estimated exchange rates at the due date of the transactions for the companies with functional currency Real (positive and negative, before tax effects), as follows:

	Exchange rate sensitivity analysis (R\$/US\$)					
	Scenario					
	March 31, 2017	Probable	25%	50%	-25%	-50%
USD	3.17	3.33	4.16	5.00	2.50	1.67

*(In thousands of Brazilian Reais R\$, except earnings per share)****Financial instruments fair value***

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The cash and cash equivalents, accounts receivable, trade receivables, trade payables and other current liabilities approximate their carrying amount largely due to the short-term maturity of these instruments.

The fair values of the quoted notes and bonds are based on price quotations at the reporting date. The fair value of unquoted instruments, loans from banks and other financial liabilities, obligations under finance leases, as well as other non-current financial liabilities is estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities.

The market value of the Senior Notes are listed on the Luxembourg Stock Exchange (Note 16) is based on their quoted market price are as follows:

<u>Senior Notes Due</u>	March 31, 2017	December 31, 2016
2018	100.10%	95.68%
2023	97.51%	96.05%
2024	103.22%	
2027	104.70%	

The fair value of Perpetual Notes listed on the Luxembourg Stock Exchange (Note 16) is based on their quoted market price as March 31, 2017 of 100.57% (103.03% at December 31, 2016) of the face value of obligations at March 31, 2017.

The fair value of other loans and financing, the respective market values substantially approximate the amounts recorded due to the fact that these financial instruments are subject to variable interest rates (Note 16).

The Company and its subsidiaries enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Derivatives valued using valuation techniques with observable market data refer mainly to interest rate swaps and foreign exchange forward contracts.

The fair value of derivative financial instruments is determined using valuation techniques and observable market data. The valuation techniques applied more often include pricing models and swaps contracts, with a present value calculation. The models consider various data, including counterparty credit quality, spot exchange rates, forward curves of interest rates and curves of the commodity term rates.

(i) The fair value of the employee share options has been measured using the Black-Scholes formula. The number and weighted-average exercise prices of share options under the share option programs were as follows:

	Number of options	Weighted-average exercise price - R\$
At December 31, 2016	12,138,238	23.96
Cancellation or settlements	(4,160,238)	
Share options exercised	(610,000)	26.43
At March 31, 2017	7,368,000	33.11

(ii) Share-based compensation

On December 21, 2016, a new share-based compensation model was approved at the Assembly of the subsidiary Cosan Logística, which became effective as of the granting, which took place on January 2, 2017.

Cosan Logística issued 1,513,180 shares of the share-based compensation plan, which will be transferred in full and free of charge after 5 years, from the approval of the grant, in a quantity adjusted by the number proportional to the dividends paid in the period, conditioned to the exercise of the functions of the beneficiary in the Company, under the terms of each Share granting Program.

The Black and Scholes methodology was used to calculate the fair value of the shares granted under the terms of the share-based compensation plan, reflecting the determination of Technical Pronouncement CPC 10 - Share-based Payment. Given the characteristics of the Plan, the fair value is equivalent to the value of the share on the grant date (R\$ 6.10).
