UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
For the quarterly period ended September 30, 2017

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
For the transition period _____ to _____

Commission File Number: 0-26486

Auburn National Bancorporation, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or other jurisdiction of

63-0885779
(I.R.S. Employer

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-Q

incorporation or organization)

Identification No.)

100 N. Gay Street

Auburn, Alabama 36830

(334) 821-9200

(Address and telephone number of principal executive offices)

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes

No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes

No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of large accelerated filer, accelerated filer, smaller reporting company and emerging growth company in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company
(Do not check if a smaller reporting company)

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Notes to Consolidated Financial Statements

(Unaudited)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General

Auburn National Bancorporation, Inc. (the Company) provides a full range of banking services to individual and corporate customers in Lee County, Alabama and surrounding counties through its wholly owned subsidiary, AuburnBank (the Bank). The Company does not have any segments other than banking that are considered material.

Basis of Presentation and Use of Estimates

The unaudited consolidated financial statements in this report have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information. Accordingly, these financial statements do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. The unaudited consolidated financial statements include, in the opinion of management, all adjustments necessary to present a fair statement of the financial position and the results of operations for all periods presented. All such adjustments are of a normal recurring nature. The results of operations in the interim statements are not necessarily indicative of the results of operations that the Company and its subsidiaries may achieve for future interim periods or the entire year. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

The unaudited consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Auburn National Bancorporation Capital Trust I is an affiliate of the Company and was included in these unaudited consolidated financial statements pursuant to the equity method of accounting. Significant intercompany transactions and accounts are eliminated in consolidation.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the balance sheet date and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term include other-than-temporary impairment on investment securities, the determination of the allowance for loan losses, fair value of financial instruments, and the valuation of deferred tax assets and other real estate owned.

Subsequent Events

The Company has evaluated the effects of events and transactions through the date of this filing that have occurred subsequent to September 30, 2017. The Company does not believe there were any material subsequent events during this period that would have required further recognition or disclosure in the unaudited consolidated financial statements included in this report.

Accounting Developments

In the first nine months of 2017, the Company adopted no new accounting guidance.

Table of Contents**NOTE 2: BASIC AND DILUTED NET EARNINGS PER SHARE**

Basic net earnings per share is computed by dividing net earnings by the weighted average common shares outstanding for the respective period. Diluted net earnings per share reflect the potential dilution that could occur upon exercise of securities or other rights for, or convertible into, shares of the Company's common stock. At September 30, 2017 and 2016, respectively, the Company had no such securities or rights issued or outstanding, and therefore, no dilutive effect to consider for the diluted earnings per share calculation.

The basic and diluted net earnings per share computations for the respective periods are presented below.

<i>(In thousands, except share and per share data)</i>	Quarter ended September 30,		Nine months ended September 30,	
	2017	2016	2017	2016
Basic and diluted:				
Net earnings	\$ 2,136	\$ 1,951	\$ 6,021	\$ 6,073
Weighted average common shares outstanding	3,643,659	3,643,506	3,643,598	3,643,498
Net earnings per share	\$ 0.59	\$ 0.54	\$ 1.65	\$ 1.67

NOTE 3: VARIABLE INTEREST ENTITIES

Generally, a variable interest entity (VIE) is a corporation, partnership, trust, or other legal structure that does not have equity investors with substantive or proportional voting rights or has equity investors that do not provide sufficient financial resources for the entity to support its activities.

At September 30, 2017, the Company did not have any consolidated VIEs to disclose but did have one nonconsolidated VIE, discussed below.

Trust Preferred Securities

The Company owns the common stock of a subsidiary business trust, Auburn National Bancorporation Capital Trust I (the Trust), which issued mandatorily redeemable preferred capital securities (trust preferred securities) in the aggregate of approximately \$7.0 million at the time of issuance. The Trust meets the definition of a VIE of which the Company is not the primary beneficiary; the Trust's only assets are junior subordinated debentures issued by the Company, which were acquired by the trust using the proceeds from the issuance of the trust preferred securities and common stock.

In October 2016, the Company purchased \$4.0 million par amount of outstanding trust preferred securities issued by the Trust. These securities were sold to us by the FDIC, as receiver of a failed bank that previously held the trust preferred securities. The Company used dividends from the Bank to purchase these trust preferred securities and has deemed an equivalent amount of the related junior subordinated debentures issued by the Company as no longer outstanding. The remaining junior subordinated debentures of approximately \$3.2 million are included in long-term debt and the Company's equity interest of \$0.2 million in the Trust is included in other assets. Interest expense on the

junior subordinated debentures that remain outstanding is included in interest expense on long-term debt.

The following table summarizes VIEs that are not consolidated by the Company as of September 30, 2017.

<i>(Dollars in thousands)</i>	Maximum	Liability	Classification
	Loss Exposure	Recognized	
Type:			
Trust preferred issuances	N/A	\$3,217	Long-term debt

Table of Contents**NOTE 4: SECURITIES**

At September 30, 2017 and December 31, 2016, respectively, all securities within the scope of Accounting Standards Codification (ASC) 320, *Investments – Debt and Equity Securities*, were classified as available-for-sale. The fair value and amortized cost for securities available-for-sale by contractual maturity at September 30, 2017 and December 31, 2016, respectively, are presented below.

<i>(Dollars in thousands)</i>	1 year or less	1 to 5 years	5 to 10 years	After 10 years	Fair Value	Gross Unrealized		Amortized Cost
						Gains	Losses	
September 30, 2017								
Agency obligations (a)	\$	29,496	24,009		53,505	230	654	\$ 53,929
Agency RMBS (a)			12,028	127,778	139,806	606	1,174	140,374
State and political subdivisions		2,097	10,716	59,047	71,860	1,580	363	70,643
Total available-for-sale	\$	31,593	46,753	186,825	265,171	2,416	2,191	\$ 264,946
December 31, 2016								
Agency obligations (a)	\$	3,047	22,531	19,893	45,471	331	973	\$ 46,113
Agency RMBS (a)		972	16,171	110,644	127,787	551	1,805	129,041
State and political subdivisions		2,480	10,210	57,624	70,314	1,509	734	69,539
Total available-for-sale	\$	3,047	25,983	46,274	168,268	2,391	3,512	\$ 244,693

(a) Includes securities issued by U.S. government agencies or government sponsored entities.

Securities with aggregate fair values of \$155.5 million and \$137.2 million at September 30, 2017 and December 31, 2016, respectively, were pledged to secure public deposits, securities sold under agreements to repurchase, Federal Home Loan Bank (FHLB) advances, and for other purposes required or permitted by law.

Included in other assets are cost-method investments. The carrying amounts of cost-method investments were \$1.4 million at September 30, 2017 and December 31, 2016, respectively. Cost-method investments primarily include

non-marketable equity investments, such as FHLB of Atlanta stock and Federal Reserve Bank (FRB) stock.

Gross Unrealized Losses and Fair Value

The fair values and gross unrealized losses on securities at September 30, 2017 and December 31, 2016, respectively, segregated by those securities that have been in an unrealized loss position for less than 12 months and 12 months or longer, are presented below.

	Less than 12 Months		12 Months or Longer		Total	
	Fair	Unrealized	Fair	Unrealized	Fair	Unrealized
<i>(Dollars in thousands)</i>	Value	Losses	Value	Losses	Value	Losses
September 30, 2017:						
Agency obligations	\$ 9,871	67	15,655	587	\$ 25,526	654
Agency RMBS	46,620	375	34,051	799	80,671	1,174
State and political subdivisions	8,164	151	7,710	212	15,874	363
Total	\$ 64,655	593	57,416	1,598	\$ 122,071	2,191
December 31, 2016:						
Agency obligations	\$ 20,352	973			\$ 20,352	973
Agency RMBS	89,062	1,805			89,062	1,805
State and political subdivisions	20,444	734			20,444	734
Total	\$ 129,858	3,512			\$ 129,858	3,512

Table of Contents

For the securities in the previous table, the Company does not have the intent to sell and has determined it is not more likely than not that the Company will be required to sell the security before recovery of the amortized cost basis, which may be maturity. On a quarterly basis, the Company assesses each security for credit impairment. For debt securities, the Company evaluates, where necessary, whether credit impairment exists by comparing the present value of the expected cash flows to the securities' amortized cost basis. For cost-method investments, the Company evaluates whether an event or change in circumstances has occurred during the reporting period that may have a significant adverse effect on the fair value of the investment.

In determining whether a loss is temporary, the Company considers all relevant information including:

the length of time and the extent to which the fair value has been less than the amortized cost basis;

adverse conditions specifically related to the security, an industry, or a geographic area (for example, changes in the financial condition of the issuer of the security, or in the case of an asset-backed debt security, in the financial condition of the underlying loan obligors, including changes in technology or the discontinuance of a segment of the business that may affect the future earnings potential of the issuer or underlying loan obligors of the security or changes in the quality of the credit enhancement);

the historical and implied volatility of the fair value of the security;

the payment structure of the debt security and the likelihood of the issuer being able to make payments that increase in the future;

failure of the issuer of the security to make scheduled interest or principal payments;

any changes to the rating of the security by a rating agency; and

recoveries or additional declines in fair value subsequent to the balance sheet date.

Agency obligations

The unrealized losses associated with agency obligations were primarily driven by changes in interest rates and not due to the credit quality of the securities. These securities were issued by U.S. government agencies or government-sponsored entities and did not have any credit losses given the explicit government guarantee or other government support.

Agency RMBS

The unrealized losses associated with agency residential mortgage-backed securities (RMBS) were primarily driven by changes in interest rates and not due to the credit quality of the securities. These securities were issued by U.S. government agencies or government-sponsored entities and did not have any credit losses given the explicit

government guarantee or other government support.

Securities of U.S. states and political subdivisions

The unrealized losses associated with securities of U.S. states and political subdivisions were primarily driven by changes in interest rates and were not due to the credit quality of the securities. Some of these securities are guaranteed by a bond insurer, but management did not rely on the guarantee in making its investment decision. These securities will continue to be monitored as part of the Company's quarterly impairment analysis, but are expected to perform even if the rating agencies reduce the credit rating of the bond insurers. As a result, the Company expects to recover the entire amortized cost basis of these securities.

Cost-method investments

At September 30, 2017, cost-method investments with an aggregate cost of \$1.4 million were not evaluated for impairment because the Company had not identified any events or changes in circumstances that may have a significant adverse effect on the fair value of these cost-method investments.

Table of Contents

The carrying values of the Company's investment securities could decline in the future if the financial condition of an issuer deteriorates and the Company determines it is probable that it will not recover the entire amortized cost basis for the security. As a result, there is a risk that other-than-temporary impairment charges may occur in the future.

Other-Than-Temporarily Impaired Securities

Credit-impaired debt securities are debt securities where the Company has written down the amortized cost basis of a security for other-than-temporary impairment and the credit component of the loss is recognized in earnings. At September 30, 2017 and December 31, 2016, the Company had no credit-impaired debt securities and there were no additions or reductions in the credit loss component of credit-impaired debt securities during the nine months ended September 30, 2017 and 2016, respectively.

Realized Gains and Losses

The following table presents the gross realized gains and losses on sales of securities.

<i>(Dollars in thousands)</i>	Quarter ended September 30,		Nine months ended September 30,

Less: unearned income	(594)	(560)
Loans, net of unearned income	\$ 449,378	\$ 430,946

Loans secured by real estate were approximately 86.7% of the Company's total loan portfolio at September 30, 2017. At September 30, 2017, the Company's geographic loan distribution was concentrated primarily in Lee County, Alabama, and surrounding areas.

In accordance with ASC 310, a portfolio segment is defined as the level at which an entity develops and documents a systematic method for determining its allowance for loan losses. As part of the Company's quarterly assessment of the allowance, the loan portfolio is disaggregated into the following portfolio segments: commercial and industrial, construction and land development, commercial real estate, residential real estate, and consumer installment. Where appropriate, the Company's loan portfolio segments are further disaggregated into classes. A class is generally determined based on the initial measurement attribute, risk characteristics of the loan, and an entity's method for monitoring and determining credit risk.

Table of Contents

The following describe the risk characteristics relevant to each of the portfolio segments and classes.

Commercial and industrial (C&I) includes loans to finance business operations, equipment purchases, or other needs for small and medium-sized commercial customers. Also included in this category are loans to finance agricultural production. Generally, the primary source of repayment is the cash flow from business operations and activities of the borrower.

Construction and land development (C&D) includes both loans and credit lines for the purpose of purchasing, carrying, and developing land into commercial developments or residential subdivisions. Also included are loans and credit lines for construction of residential, multi-family, and commercial buildings. Generally, the primary source of repayment is dependent upon the sale or refinance of the real estate collateral.

Commercial real estate (CRE) includes loans disaggregated into three classes: (1) owner occupied, (2) multifamily and (3) other.

Owner occupied includes loans secured by business facilities to finance business operations, equipment and owner-occupied facilities primarily for small and medium-sized commercial customers. Generally, the primary source of repayment is the cash flow from business operations and activities of the borrower, who owns the property.

Multi-family primarily includes loans to finance income-producing multi-family properties. Loans in this class include loans for 5 or more unit residential property and apartments leased to residents. Generally, the primary source of repayment is dependent upon income generated from the real estate collateral. The underwriting of these loans takes into consideration the occupancy and rental rates, as well as the financial health of the borrower.

Other primarily includes loans to finance income-producing commercial properties that are not owner occupied. Loans in this class include loans for neighborhood retail centers, hotels, medical and professional offices, single retail stores, industrial buildings, and warehouses leased to local businesses. Generally, the primary source of repayment is dependent upon income generated from the real estate collateral. The underwriting of these loans takes into consideration the occupancy and rental rates, as well as the financial health of the borrower.

Residential real estate (RRE) includes loans disaggregated into two classes: (1) consumer mortgage and (2) investment property.

Consumer mortgage primarily includes first or second lien mortgages and home equity lines of credit to consumers that are secured by a primary residence or second home. These loans are underwritten in accordance with the Bank's general loan policies and procedures which require, among other things, proper documentation of each borrower's financial condition, satisfactory credit history, and property value.

Investment property primarily includes loans to finance income-producing 1-4 family residential properties. Generally, the primary source of repayment is dependent upon income generated from leasing the property securing the loan. The underwriting of these loans takes into consideration the rental rates and property value, as well as the financial health of the borrower.

Consumer installment includes loans to individuals both secured by personal property and unsecured. Loans include personal lines of credit, automobile loans, and other retail loans. These loans are underwritten in accordance with the Bank's general loan policies and procedures which require, among other things, proper documentation of each borrower's financial condition, satisfactory credit history, and, if applicable, property value.

Table of Contents

The following is a summary of current, accruing past due, and nonaccrual loans by portfolio segment and class as of September 30, 2017 and December 31, 2016.

Allowance for Loan Losses

The Company assesses the adequacy of its allowance for loan losses prior to the end of each calendar quarter. The level of the allowance is based upon management's evaluation of the loan portfolio, past loan loss experience, current asset quality trends, known and inherent risks in the portfolio, adverse situations that may affect a borrower's ability to repay (including the timing of future payment), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, industry and peer bank loan loss rates, and other pertinent factors, including regulatory recommendations. This evaluation is inherently subjective as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Loans are charged off, in whole or in part, when management believes that the full collectability of the loan is unlikely. A loan may be partially charged-off after a confirming event has occurred, which serves to validate that full repayment pursuant to the terms of the loan is unlikely.

The Company deems loans impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Collection of all amounts due according to the contractual terms means that both the interest and principal payments of a loan will be collected as scheduled in the loan agreement.

Table of Contents

An impairment allowance is recognized if the fair value of the loan is less than the recorded investment in the loan. The impairment is recognized through the allowance. Loans that are impaired are recorded at the present value of expected future cash flows discounted at the loan's effective interest rate, or if the loan is collateral dependent, the impairment measurement is based on the fair value of the collateral, less estimated disposal costs.

The level of allowance maintained is believed by management to be adequate to absorb probable losses inherent in the portfolio at the balance sheet date. The allowance is increased by provisions charged to expense and decreased by charge-offs, net of recoveries of amounts previously charged-off.

In assessing the adequacy of the allowance, the Company also considers the results of its ongoing internal and independent loan review processes. The Company's loan review process assists in determining whether there are loans in the portfolio whose credit quality has weakened over time and evaluating the risk characteristics of the entire loan portfolio. The Company's loan review process includes the judgment of management, the input from our independent loan reviewers, and reviews conducted by bank regulatory agencies as part of their examination process. The Company incorporates loan review results in the determination of whether or not it is probable that it will be able to collect all amounts due according to the contractual terms of a loan.

As part of the Company's quarterly assessment of the allowance, management divides the loan portfolio into five segments: commercial and industrial, construction and land development, commercial real estate, residential real estate, and consumer installment. The Company analyzes each segment and estimates an allowance allocation for each loan segment.

The allocation of the allowance for loan losses begins with a process of estimating the probable losses inherent for each loan segment. The estimates for these loans are established by category and based on the Company's internal system of credit risk ratings and historical loss data. The estimated loan loss allocation rate for the Company's internal system of credit risk grades is based on its experience with similarly graded loans. For loan segments where the Company believes it does not have sufficient historical loss data, the Company may make adjustments based, in part, on loss rates of peer bank groups. At September 30, 2017 and December 31, 2016, and for the periods then ended, the Company adjusted its historical loss rates for the commercial real estate portfolio segment based, in part, on loss rates of peer bank groups.

The estimated loan loss allocation for all five loan portfolio segments is then adjusted for management's estimate of probable losses for several qualitative and environmental factors. The allocation for qualitative and environmental factors is particularly subjective and does not lend itself to exact mathematical calculation. This amount represents estimated probable inherent credit losses which exist, but have not yet been identified, as of the balance sheet date, and are based upon quarterly trend assessments in delinquent and nonaccrual loans, credit concentration changes, prevailing economic conditions, changes in lending personnel experience, changes in lending policies or procedures, and other factors. These qualitative and environmental factors are considered for each of the five loan segments and the allowance allocation, as determined by the processes noted above, is increased or decreased based on the incremental assessment of these factors.

Table of Contents

The Company regularly re-evaluates its practices in determining the allowance for loan losses. Beginning with the quarter ended December 31, 2016, the Company implemented certain refinements to its allowance for loan losses methodology in order to better capture the effects of the most recent economic cycle on the Company's loan loss experience. First, the Company increased its look-back period for calculating average losses for all loan segments to 31 quarters. Prior to December 31, 2016, the Company calculated average losses for all loan segments using a rolling 20 quarter look-back period. For the quarter ended September 30, 2017, the Company increased its look-back period to 34 quarters to continue to include the losses incurred by the Company beginning with the first quarter of 2009. The Company will likely continue to increase its look-back period to incorporate the effects of at least one economic downturn in its loss history. The Company believes the extension of its look-back period is appropriate due to the risks inherent in the loan portfolio. Absent this extension, the early cycle periods in which the Company experienced significant losses would be excluded from the determination of the allowance for loan losses and its balance would decrease. Second, the Company increased the range of basis point adjustments allowed for qualitative and environmental factors to approximately 200 basis points, an increase of 65 basis points, or 48%, compared to the 135 basis point range used prior to December 31, 2016. After performing sensitivity testing of its calculation of the allowance for loan losses, the Company determined that it should increase the range of basis points allowed for qualitative and environmental factors in order to provide sufficient latitude in determining estimated probable credit losses during periods of economic stress. Third, the Company reduced the percentage allocation for qualitative and environmental factors on a weighted average basis to 21% of total basis points allocable at December 31, 2016, compared to 25% of total basis points allocable at September 30, 2016. The Company believes a decrease in the percentage allocation of qualitative environmental factors on a weighted average basis was appropriate due to the extension of its look-back period described above. If the Company did not make the changes described above, the Company's calculated allowance for loan loss allocation would have decreased by approximately \$0.9 million, or 0.21% of total loans, at December 31, 2016. Other than the changes discussed above, the Company has not made any material changes to its methodology that would impact the calculation of the allowance for loan losses or provision for loan losses for the periods included in the accompanying consolidated balance sheets and statements of earnings.

Table of Contents

The following table details the changes in the allowance for loan losses by portfolio segment for the respective periods.

- (1) Represents loans collectively evaluated for impairment in accordance with ASC 450-20, *Loss Contingencies* (formerly FAS 5), and pursuant to amendments by ASU 2010-20 regarding allowance for non-impaired loans.
- (2) Represents loans individually evaluated for impairment in accordance with ASC 310-30, *Receivables* (formerly FAS 114), and pursuant to amendments by ASU 2010-20 regarding allowance for impaired loans.

Credit Quality Indicators

The credit quality of the loan portfolio is summarized no less frequently than quarterly using categories similar to the standard asset classification system used by the federal banking agencies. The following table presents credit quality indicators for the loan portfolio segments and classes. These categories are utilized to develop the associated

allowance for loan losses using historical losses adjusted for qualitative and environmental factors and are defined as follows:

Pass loans which are well protected by the current net worth and paying capacity of the obligor (or guarantors, if any) or by the fair value, less cost to acquire and sell, of any underlying collateral.

Special Mention loans with potential weakness that may, if not reversed or corrected, weaken the credit or inadequately protect the Company's position at some future date. These loans are not adversely classified and do not expose an institution to sufficient risk to warrant an adverse classification.

Substandard Accruing loans that exhibit a well-defined weakness which presently jeopardizes debt repayment, even though they are currently performing. These loans are characterized by the distinct possibility that the Company may incur a loss in the future if these weaknesses are not corrected.

Nonaccrual includes loans where management has determined that full payment of principal and interest is not expected.

Impaired loans

The following tables present details related to the Company's impaired loans. Loans that have been fully charged-off are not included in the following tables. The related allowance generally represents the following components that correspond to impaired loans:

Individually evaluated impaired loans equal to or greater than \$500,000 secured by real estate (nonaccrual construction and land development, commercial real estate, and residential real estate loans).

Individually evaluated impaired loans equal to or greater than \$250,000 not secured by real estate (nonaccrual commercial and industrial and consumer installment loans).

Table of Contents

The following tables set forth certain information regarding the Company's impaired loans that were individually evaluated for impairment at September 30, 2017 and December 31, 2016.

<i>(In thousands)</i>	September 30, 2017			
	Unpaid principal balance (1)	Charge-offs and payments applied (2)	Recorded investment (3)	Related allowance

Troubled Debt Restructurings

Impaired loans also include troubled debt restructurings (TDRs). In the normal course of business, management may grant concessions to borrowers that are experiencing financial difficulty. A concession may include, but is not limited to, delays in required payments of principal and interest for a specified period, reduction of the stated interest rate of the loan, reduction of accrued interest, extension of the maturity date, or reduction of the face amount or maturity amount of the debt. A concession has been granted when, as a result of the restructuring, the Bank does not expect to collect, where due, all amounts owed, including interest at the original stated rate. A concession may have also been granted if the debtor is not able to access funds elsewhere at a market rate for debt with similar risk characteristics as the restructured debt. In making the determination of whether a loan modification is a TDR, the Company considers the individual facts and circumstances surrounding each modification. As part of the credit approval process, the restructured loans are evaluated for adequate collateral protection in determining the appropriate accrual status at the time of restructure.

Similar to other impaired loans, TDRs are measured for impairment based on the present value of expected payments using the loan's original effective interest rate as the discount rate, or the fair value of the collateral, less selling costs if the loan is collateral dependent. If the recorded investment in the loan exceeds the measure of fair value, impairment is recognized by establishing a valuation allowance as part of the allowance for loan losses or a charge-off to the allowance for loan losses. In periods subsequent to the modification, all TDRs are individually evaluated for possible impairment.

Table of Contents

The following is a summary of accruing and nonaccrual TDRs, which are included in the impaired loan totals, and the related allowance for loan losses, by portfolio segment and class as of September 30, 2017 and December 31, 2016.

<i>(In thousands)</i>	TDRs			Related Allowance
	Accruing	Nonaccrual	Total

Total				1	\$ 1,509	1,509

The majority of the loans modified in a TDR during the quarter and nine months ended September 30, 2017 and 2016, included permitting delays in required payments of principal and/or interest or where the only concession granted by the Company was that the interest rate at renewal was considered to be less than a market rate.

During the three and nine months ended September 30, 2017 and 2016, there were no loans modified in a TDR within the previous 12 months for which there was a payment default (defined as 90 days or more past due).

Table of Contents**NOTE 6: MORTGAGE SERVICING RIGHTS, NET**

Mortgage servicing rights (MSRs) are recognized based on the fair value of the servicing rights on the date the corresponding mortgage loans are sold. An estimate of the fair value of the Company's MSRs is determined using assumptions that market participants would use in estimating future net servicing income, including estimates of prepayment speeds, discount rates, default rates, costs to service, escrow account earnings, contractual servicing fee income, ancillary income, and late fees. Subsequent to the date of transfer, the Company has elected to measure its MSRs under the amortization method. Under the amortization method, MSRs are amortized in proportion to, and over the period of, estimated net servicing income.

The Company has recorded MSRs related to loans sold without recourse to Fannie Mae. The Company generally sells conforming, fixed-rate, closed-end, residential mortgages to Fannie Mae. MSRs are included in other assets on the accompanying consolidated balance sheets.

The Company evaluates MSRs for impairment on a quarterly basis. Impairment is determined by stratifying MSRs into groupings based on predominant risk characteristics, such as interest rate and loan type. If, by individual stratum, the carrying amount of the MSRs exceeds fair value, a valuation allowance is established. The valuation allowance is adjusted as the fair value changes. Changes in the valuation allowance are recognized in earnings as a component of mortgage lending income.

The following table details the changes in amortized MSRs and the related valuation allowance for the respective periods.

<i>(Dollars in thousands)</i>	Quarter ended September 30, 2017		Quarter ended September 30, 2016		Nine months ended September 30, 2017		Nine months ended September 30, 2016

NOTE 7: DERIVATIVE INSTRUMENTS

Financial derivatives are reported at fair value in other assets or other liabilities on the accompanying consolidated balance sheets. The accounting for changes in the fair value of a derivative depends on whether it has been designated and qualifies as part of a hedging relationship. For derivatives not designated as part of a hedging relationship, the gain or loss is recognized in current earnings within other noninterest income on the accompanying consolidated statements of earnings. From time to time, the Company may enter into interest rate swaps (swaps) to facilitate customer transactions and meet their financing needs. Upon entering into these swaps, the Company enters into offsetting positions in order to minimize the risk to the Company. These swaps qualify as derivatives, but are not designated as hedging instruments.

Interest rate swap agreements involve the risk of dealing with counterparties and their ability to meet contractual terms. When the fair value of a derivative instrument is positive, this generally indicates that the counterparty or customer owes the Company, and results in credit risk to the Company. When the fair value of a derivative instrument is negative, the Company owes the customer or counterparty and therefore, has no credit risk.

Table of Contents

A summary of the Company's interest rate swap agreements at September 30, 2017 and December 31, 2016 is presented below.

<i>(Dollars in thousands)</i>	Notional	Other Assets Estimated Fair Value	Other Liabilities Estimated Fair Value
September 30, 2017:			
Pay fixed / receive variable	\$ 3,704		96
Pay variable / receive fixed	3,704	96	
Total interest rate swap agreements	\$ 7,408	96	96
December 31, 2016:			
Pay fixed / receive variable	\$ 3,967		241
Pay variable / receive fixed	3,967	241	
Total interest rate swap agreements	\$ 7,934	241	241

NOTE 8: FAIR VALUE**Fair Value Hierarchy**

Fair value is defined by ASC 820, *Fair Value Measurements and Disclosures*, as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for an asset or liability at the measurement date. GAAP establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs to the valuation methodology are unobservable and reflect the Company's own assumptions about the inputs market participants would use in pricing the asset or liability.

Level changes in fair value measurements

Transfers between levels of the fair value hierarchy are generally recognized at the end of each reporting period. The Company monitors the valuation techniques utilized for each category of financial assets and liabilities to ascertain when transfers between levels have been affected. The nature of the Company's financial assets and liabilities generally is such that transfers in and out of any level are expected to be infrequent. For the nine months ended September 30, 2017, there were no transfers between levels and no changes in valuation techniques for the Company's financial assets and liabilities.

Assets and liabilities measured at fair value on a recurring basis

Securities available-for-sale

Fair values of securities available for sale were primarily measured using Level 2 inputs. For these securities, the Company obtains pricing from third party pricing services. These third party pricing services consider observable data that may include broker/dealer quotes, market spreads, cash flows, benchmark yields, reported trades for similar securities, market consensus prepayment speeds, credit information, and the securities' terms and conditions. On a quarterly basis, management reviews the pricing received from the third party pricing services for reasonableness given current market conditions. As part of its review, management may obtain non-binding third party broker quotes to validate the fair value measurements. In addition, management will periodically submit pricing provided by the third party pricing services to another independent valuation firm on a sample basis. This independent valuation firm will compare the price provided by the third party pricing service with its own price and will review the significant assumptions and valuation methodologies used with management.

Table of Contents*Interest rate swap agreements*

The carrying amount of interest rate swap agreements was included in other assets and accrued expenses and other liabilities on the accompanying consolidated balance sheets. The fair value measurements for our interest rate swap agreements were based on information obtained from a third party bank. This information is periodically tested by the Company and validated against other third party valuations. If needed, other third party market participants may be utilized to corroborate the fair value measurements for our interest rate swap agreements. The Company classified these derivative assets and liabilities within Level 2 of the valuation hierarchy. These swaps qualify as derivatives, but are not designated as hedging instruments.

The following table presents the balances of the assets and liabilities measured at fair value on a recurring basis as of September 30, 2017 and December 31, 2016, respectively, by caption, on the accompanying consolidated balance sheets by ASC 820 valuation hierarchy (as described above).

	Amount	Quoted Prices in	Significant

Table of Contents**Assets and liabilities measured at fair value on a nonrecurring basis***Loans held for sale*

Loans held for sale are carried at the lower of cost or fair value. Fair values of loans held for sale are determined using quoted market secondary market prices for similar loans. Loans held for sale are classified within Level 2 of the fair value hierarchy.

Impaired Loans

Loans considered impaired under ASC 310-10-35, *Receivables*, are loans for which, based on current information and events, it is probable that the Company will be unable to collect all principal and interest payments due in accordance with the contractual terms of the loan agreement. Impaired loans can be measured based on the present value of expected payments using the loan's original effective rate as the discount rate, the loan's observable market price, or the fair value of the collateral less selling costs if the loan is collateral dependent.

The fair value of impaired loans were primarily measured based on the value of the collateral securing these loans. Impaired loans are classified within Level 3 of the fair value hierarchy. Collateral may be real estate and/or business assets including equipment, inventory, and/or accounts receivable. The Company determines the value of the collateral based on independent appraisals performed by qualified licensed appraisers. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Appraised values are discounted for costs to sell and may be discounted further based on management's historical knowledge, changes in market conditions from the date of the most recent appraisal, and/or management's expertise and knowledge of the customer and the customer's business. Such discounts by management are subjective and are typically significant unobservable inputs for determining fair value. Impaired loans are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on the same factors discussed above.

Other real estate owned

Other real estate owned, consisting of properties obtained through foreclosure or in satisfaction of loans, are initially recorded at the lower of the loan's carrying amount or the fair value of collateral less costs to sell upon transfer of the loans to other real estate. Subsequently, other real estate is carried at the lower of carrying value or fair value less costs to sell. Fair values are generally based on third party appraisals of the property and are classified within Level 3 of the fair value hierarchy. The appraisals are sometimes further discounted based on management's historical knowledge, and/or changes in market conditions from the date of the most recent appraisal, and/or management's expertise and knowledge of the customer and the customer's business. Such discounts are typically significant unobservable inputs for determining fair value. In cases where the carrying amount exceeds the fair value, less costs to sell, a loss is recognized in noninterest expense.

Mortgage servicing rights, net

Mortgage servicing rights, net, included in other assets on the accompanying consolidated balance sheets, are carried at the lower of cost or estimated fair value. MSR's do not trade in an active market with readily observable prices. To determine the fair value of MSR's, the Company engages an independent third party. The independent third party's valuation model calculates the present value of estimated future net servicing income using assumptions that market participants would use in estimating future net servicing income, including estimates of prepayment speeds, discount rates, default rates, cost to service, escrow account earnings, contractual servicing fee income, ancillary income, and late fees. Periodically, the Company will review broker surveys and other market research to validate significant

assumptions used in the model. The significant unobservable inputs include prepayment speeds or the constant prepayment rate (CPR) and the weighted average discount rate. Because the valuation of MSR requires the use of significant unobservable inputs, all of the Company's MSRs are classified within Level 3 of the valuation hierarchy.

Table of Contents

The following table presents the balances of the assets and liabilities measured at fair value on a nonrecurring basis as of September 30, 2017 and December 31, 2016, respectively, by caption, on the accompanying consolidated balance sheets and by FASB ASC 820 valuation hierarchy (as described above):

	Carrying Amount	Quoted Prices in		
		Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
<i>(Dollars in thousands)</i>				
September 30, 2017:

Total assets at fair value	\$ 5,700		1,497	4,203

⁽¹⁾Loans considered impaired under ASC 310-10-35, *Receivables*. This amount reflects the recorded investment in impaired loans, net of any related allowance for loan losses.

⁽²⁾Represents MSRs, net, carried at lower of cost or estimated fair value.

Quantitative Disclosures for Level 3 Fair Value Measurements

At September 30, 2017, the Company had no Level 3 assets measured at fair value on a recurring basis. For Level 3 assets measured at fair value on a non-recurring basis at September 30, 2017, the significant unobservable inputs used in the fair value measurements are presented below.

Carrying	Weighted Average
-----------------	-----------------------------

(Dollars in thousands)

	Amount	Valuation Technique	Significant Unobservable Input	of Input
Nonrecurring:				
Impaired loans	\$ 2,664	Appraisal	Appraisal discounts (%)	16.9%
Other real estate owned	103	Appraisal	Appraisal discounts (%)	18.9%
Mortgage servicing rights, net	1,703	Discounted cash flow	Prepayment speed or CPR (%)	11.0%
			Discount rate (%)	10.0%

Fair Value of Financial Instruments

ASC 825, *Financial Instruments*, requires disclosure of fair value information about financial instruments, whether or not recognized on the face of the balance sheet, for which it is practicable to estimate that value. The assumptions used in the estimation of the fair value of the Company's financial instruments are explained below. Where quoted market prices are not available, fair values are based on estimates using discounted cash flow analyses. Discounted cash flows can be significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. The following fair value estimates cannot be substantiated by comparison to independent markets and should not be considered representative of the liquidation value of the Company's financial instruments, but rather are a good-faith estimate of the fair value of financial instruments held by the Company. ASC 825 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements.

Table of Contents

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

Loans, net

Fair values for loans were calculated using discounted cash flows. The discount rates reflected current rates at which similar loans would be made for the same remaining maturities. This method of estimating fair value does not incorporate the exit-price concept of fair value prescribed by ASC 820 and generally produces a higher value than an exit-price approach. Expected future cash flows were projected based on contractual cash flows, adjusted for estimated prepayments. ASU 2016-01 described under Current Accounting Developments requires public company use of exit prices when measuring the fair value of financial instruments for disclosure purposes for fiscal years beginning after December 31, 2017. The effects of ASU 2016-01 on the Company's consolidated financial statements are being evaluated.

Loans held for sale

Fair values of loans held for sale are determined using quoted secondary market prices for similar loans.

Time Deposits

Fair values for time deposits were estimated using discounted cash flows. The discount rates were based on rates currently offered for deposits with similar remaining maturities.

Long-term debt

The fair value of the Company's fixed rate long-term debt is estimated using discounted cash flows based on estimated current market rates for similar types of borrowing arrangements. The carrying amount of the Company's variable rate long-term debt approximates its fair value.

The carrying value, related estimated fair value, and placement in the fair value hierarchy of the Company's financial instruments at September 30, 2017 and December 31, 2016 are presented below. This table excludes financial instruments for which the carrying amount approximates fair value. Financial assets for which fair value approximates carrying value included cash and cash equivalents. Financial liabilities for which fair value approximates carrying value included noninterest-bearing demand deposits, interest-bearing demand deposits, and savings deposits due to these products having no stated maturity. In addition, financial liabilities for which fair value approximates carrying value included overnight borrowings such as federal funds purchased and securities sold under agreements to repurchase.

Fair Value Hierarchy

<i>(Dollars in thousands)</i>	Carrying amount	Estimated fair value	Level 1 inputs	Level 2 inputs	Level 3 Inputs

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

The following discussion and analysis is designed to provide a better understanding of various factors related to the results of operations and financial condition of the Company and the Bank. This discussion is intended to supplement and highlight information contained in the accompanying unaudited condensed consolidated financial statements and related notes for the quarters and nine months ended September 30, 2017 and 2016, as well as the information contained in our annual report on Form 10-K for the year ended December 31, 2016 and our quarterly reports on Form 10-Q for the quarters ended March 31, 2017 and June 30, 2017.

Special Notice Regarding Forward-Looking Statements

Certain of the statements made in this discussion and analysis and elsewhere, including information incorporated herein by reference to other documents, are forward-looking statements within the meaning of, and subject to, the protections of Section 27A of the Securities Act of 1933, as amended, (the Securities Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act).

Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, assumptions, estimates, intentions and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond our control, and which may cause the actual results, performance, achievements, or financial condition of the Company to be materially different from future results, performance, achievements, or financial condition expressed or implied by such forward-looking statements. You should not expect us to update any forward-looking statements.

All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as may, will, anticipate, assume, show, indicate, would, believe, contemplate, expect, estimate, continue, plan, point to, project, could, similar words and expressions of the future. These forward-looking statements may not be realized due to a variety of factors, including, without limitation:

the effects of future economic, business, and market conditions and changes, domestic and foreign, including seasonality;

governmental monetary and fiscal policies;

legislative and regulatory changes, including changes in banking, securities, and tax laws, regulations and rules and their application by our regulators, including capital and liquidity requirements, and changes in the scope and cost of FDIC insurance;

changes in accounting policies, rules, and practices;

the risks of changes in interest rates on the levels, composition, and costs of deposits, loan demand, and the values and liquidity of loan collateral, securities, and interest sensitive assets and liabilities, and the risks and uncertainty of the amounts realizable;

changes in borrower credit risks and payment behaviors;

changes in the availability and cost of credit and capital in the financial markets, and the types of instruments that may be included as capital for regulatory purposes;

changes in the prices, values, and sales volumes of residential and commercial real estate;

the effects of competition from a wide variety of local, regional, national, and other providers of financial, investment, and insurance services, including the disruptive effects of financial technology and other competitors who are not subject to the same regulations as the Company and the Bank;

the failure of assumptions and estimates underlying the establishment of allowances for possible loan and other asset impairments, losses, valuations of assets and liabilities and other estimates;

Table of Contents

the risks of mergers, acquisitions and divestitures, including, without limitation, the related time and costs of implementing such transactions, integrating operations as part of these transactions and possible failures to achieve expected gains, revenue growth and/or expense savings from such transactions;

changes in our technology or products that may be more difficult, costly, or less effective than anticipated;

the effects of war, or other conflicts, acts of terrorism, or other catastrophic events that may affect general economic conditions;

cyber attacks and data breaches that may compromise our systems or customers' information;

the failure of assumptions and estimates, as well as differences in, and changes to, economic, market, and credit conditions, including changes in borrowers' credit risks and payment behaviors from those used in our loan portfolio stress tests and other evaluations;

the risk that our deferred tax assets, if any, could be reduced if estimates of future taxable income from our operations and tax planning strategies are less than currently estimated, and sales of our capital stock could trigger a reduction in the amount of net operating loss carry-forwards, if any, that we may be able to utilize for income tax purposes; and

the other factors and information in this report and other filings that we make with the SEC under the Exchange Act, including our Annual Report on Form 10-K for the year ended December 31, 2016 and subsequent quarterly and current reports. See Part II, Item 1A. **RISK FACTORS** .

All written or oral forward-looking statements that are made by or attributable to us are expressly qualified in their entirety by this cautionary notice. We have no obligation and do not undertake to update, revise or correct any of the forward-looking statements after the date of this report, or after the respective dates on which such statements otherwise are made.

Business

The Company was incorporated in 1990 under the laws of the State of Delaware and became a bank holding company after it acquired its Alabama predecessor, which was a bank holding company established in 1984. The Bank, the Company's principal subsidiary, is an Alabama state-chartered bank that is a member of the Federal Reserve System and has operated continuously since 1907. Both the Company and the Bank are headquartered in Auburn, Alabama. The Bank conducts its business primarily in East Alabama, including Lee County and surrounding areas. The Bank operates 8 full-service branches in Auburn, Opelika, Notasulga, and Valley, Alabama. The Bank also operates a loan production office in Phenix City, Alabama.

Summary of Results of Operations

Table of Contents**Financial Summary**

The Company's net earnings were \$6.0 million for the first nine months of 2017, compared to \$6.1 million for the first nine months of 2016. Basic and diluted earnings per share were \$1.65 per share for the first nine months of 2017, compared to \$1.67 per share for the first nine months of 2016.

Net interest income (tax-equivalent) was \$19.2 million for the first nine months of 2017 compared to \$18.0 million for the first nine months of 2016. This increase was primarily due an increase in interest income from securities available-for-sale as management reduced its investment in federal funds sold and interest-bearing bank deposits and increased its investment securities as market yields improved. The Company also lowered its deposit costs and repaid higher-cost wholesale funding sources. Average loans were \$436.7 million in the first nine months of 2017, compared to \$431.2 million in the first nine months of 2016. Average deposits were \$738.3 million in the first nine months of 2017, an increase of \$4.0 million or 1%, from the first nine months of 2016.

The Company recorded a \$0.1 million provision for loan losses for the first nine months of 2017, compared to a negative provision of \$0.6 million for the first nine months of 2016. Annualized net charge-offs as a percent of average loans were 0.02% for the first nine months of 2017 compared to annualized net recoveries 0.27% for the first nine months of 2016. The Company recognized a recovery of \$1.2 million from the payoff of one nonperforming construction and land development loan during the first nine months of 2016. The provision for loan losses is based upon various factors, including the absolute level of loans, loan growth, credit quality and the amount of net charge-offs.

Noninterest income was \$2.6 for the first nine months of 2017, compared to \$2.9 million for the first nine months of 2016. The decrease was primarily due to a \$0.2 million decrease in mortgage lending income as mortgage loan production declined.

Noninterest expense was \$12.4 million for the first nine months of 2017 compared to \$12.1 million for the first nine months of 2016. This increase was primarily due to \$0.2 million in gains from the sale of OREO, which reduced noninterest expense in the first nine months of 2016. The Company had an improved efficiency ratio of 56.81% for the first nine months of 2017, compared to 58.09% in the first nine months of 2016.

Income tax expense and the effective tax rate were \$2.4 million and 28.24%, respectively, for the first nine months of 2017, compared to \$2.3 million and 27.50%, respectively, for the first nine months of 2016. The increase in the effective tax rate was primarily due to a decrease in tax preference items such as income from investments in municipal securities and bank owned life insurance.

The Company paid cash dividends of \$0.69 per share in the first nine months of 2017, an increase of 2.2% from the same period of 2016. At September 30, 2017, the Bank's regulatory capital ratios were well above the minimum amounts required to be well capitalized under current regulatory standards.

In the third quarter of 2017, net earnings were \$2.1 million, or \$0.59 per share, compared to \$2.0 million, or \$0.54 per share, for the third quarter of 2016. Net interest income (tax-equivalent) was \$6.6 million for the third quarter of 2017, compared to \$5.9 million for the third quarter of 2016. This increase was due to the same factors as described above. The Company recorded no provision for loan losses in the third quarter of 2017 and 2016. Noninterest income was \$1.0 million in the third quarter of 2017, compared to \$1.1 million in the third quarter of 2016. The decrease was due to a \$0.1 million decline in securities gains, net. Noninterest expense was \$4.2 million in the third quarter of 2017 compared to \$4.0 million in the third quarter of 2016. This increase was primarily due to \$0.2 million in gains from the sale of OREO, which reduced noninterest expense in the first nine months of 2016. Income tax expense was

\$0.9 million for the third quarter of 2017, compared to \$0.7 million in the third quarter of 2016. The Company's effective tax rate for the third quarter of 2017 was 28.89%, compared to 27.50% in the third quarter of 2016.

CRITICAL ACCOUNTING POLICIES

The accounting and financial reporting policies of the Company conform with U.S. generally accepted accounting principles and with general practices within the banking industry. In connection with the application of those principles, we have made judgments and estimates which, in the case of the determination of our allowance for loan losses, our assessment of other-than-temporary impairment, recurring and non-recurring fair value measurements, the valuation of other real estate owned, and the valuation of deferred tax assets, were critical to the determination of our financial position and results of operations. Other policies also require subjective judgment and assumptions and may accordingly impact our financial position and results of operations.

Table of Contents

Allowance for Loan Losses

The Company assesses the adequacy of its allowance for loan losses prior to the end of each calendar quarter. The level of the allowance is based upon management's evaluation of the loan portfolio, past loan loss experience, current asset quality trends, known and inherent risks in the portfolio, adverse situations that may affect a borrower's ability to repay (including the timing of future payment), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, industry and peer bank loan loss rates, and other pertinent factors, including regulatory recommendations. This evaluation is inherently subjective as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Loans are charged off, in whole or in part, when management believes that the full collectability of the loan is unlikely. A loan may be partially charged-off after a confirming event has occurred, which serves to validate that full repayment pursuant to the terms of the loan is unlikely.

The Company deems loans impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Collection of all amounts due according to the contractual terms means that both the interest and principal payments of a loan will be collected as scheduled in the loan agreement.

An impairment allowance is recognized if the fair value of the loan is less than the recorded investment in the loan. The impairment is recognized through the allowance. Loans that are impaired are recorded at the present value of expected future cash flows discounted at the loan's effective interest rate, or if the loan is collateral dependent, the impairment measurement is based on the fair value of the collateral, less estimated disposal costs.

The level of allowance maintained is believed by management to be adequate to absorb probable losses inherent in the portfolio at the balance sheet date. The allowance is increased by provisions charged to expense and decreased by charge-offs, net of recoveries of amounts previously charged-off.

In assessing the adequacy of the allowance, the Company also considers the results of its ongoing internal and independent loan review processes. The Company's loan review process assists in determining whether there are loans in the portfolio whose credit quality has weakened over time and evaluating the risk characteristics of the entire loan portfolio. The Company's loan review process includes the judgment of management, the input from our independent loan reviewers, and reviews that may have been conducted by bank regulatory agencies as part of their examination process. The Company incorporates loan review results in the determination of whether or not it is probable that it will be able to collect all amounts due according to the contractual terms of a loan.

As part of the Company's quarterly assessment of the allowance, management divides the loan portfolio into five segments: commercial and industrial, construction and land development, commercial real estate, residential real estate, and consumer installment. The Company analyzes each segment and estimates an allowance allocation for each loan segment.

The allocation of the allowance for loan losses begins with a process of estimating the probable losses inherent for each loan segment. The estimates for these loans are established by category and based on the Company's internal system of credit risk ratings and historical loss data. The estimated loan loss allocation rate for the Company's internal system of credit risk grades is based on its experience with similarly graded loans. For loan segments where the Company believes it does not have sufficient historical loss data, the Company may make adjustments based, in part, on loss rates of peer bank groups. At September 30, 2017 and December 31, 2016, and for the periods then ended, the Company adjusted its historical loss rates for the commercial real estate portfolio segment based, in part, on loss rates of peer bank groups.

The estimated loan loss allocation for all five loan portfolio segments is then adjusted for management's estimate of probable losses for several qualitative and environmental factors. The allocation for qualitative and environmental factors is particularly subjective and does not lend itself to exact mathematical calculation. This amount represents estimated probable inherent credit losses which exist, but have not yet been identified, as of the balance sheet date, and are based upon quarterly trend assessments in delinquent and nonaccrual loans, credit concentration changes, prevailing economic conditions, changes in lending personnel experience, changes in lending policies or procedures, and other influencing factors. These qualitative and environmental factors are considered for each of the five loan segments and the allowance allocation, as determined by the processes noted above, is increased or decreased based on the incremental assessment of these factors.

Table of Contents

The Company regularly re-evaluates its practices in determining the allowance for loan losses. Beginning with the quarter ended December 31, 2016, the Company implemented certain refinements to its allowance for loan losses methodology in order to better capture the effects of the most recent economic cycle on the Company's loan loss experience. First, the Company increased its look-back period for calculating average losses for all loan segments to 31 quarters. Prior to December 31, 2016, the Company calculated average losses for all loan segments using a rolling 20 quarter look-back period. For the quarter ended September 30, 2017, the Company increased its look-back period to 34 quarters to continue to include the losses incurred by the Company beginning with the first quarter of 2009. The Company will likely continue to increase its look-back period to incorporate the effects of at least one economic downturn in its loss history. The Company believes the extension of its look-back period is appropriate due to the risks inherent in the loan portfolio. Absent this extension, the early cycle periods in which the Company experienced significant losses would be excluded from the determination of the allowance for loan losses and its balance would decrease. Second, the Company increased the range of basis point adjustments allowed for qualitative and environmental factors to approximately 200 basis points, an increase of 65 basis points, or 48%, compared to the 135 basis point range used prior to December 31, 2016. After performing sensitivity testing of its calculation of the allowance for loan losses, the Company determined that it should increase the range of basis points allowed for qualitative and environmental factors in order to provide sufficient latitude in determining estimated probable credit losses during periods of economic stress. Third, the Company reduced the percentage allocation for qualitative and environmental factors on a weighted average basis to 21% of total basis points allocable at December 31, 2016, compared to 25% of total basis points allocable at September 30, 2016. The Company believes a decrease in the percentage allocation of qualitative environmental factors on a weighted average basis was appropriate due to the extension of its look-back period described above. If the Company did not make the changes described above, the Company's calculated allowance for loan loss allocation would have decreased by approximately \$0.9 million, or 0.21% of total loans, at December 31, 2016. Other than the changes discussed above, the Company has not made any material changes to its methodology that would impact the calculation of the allowance for loan losses or provision for loan losses for the periods included in the accompanying consolidated balance sheets and statements of earnings.

Assessment for Other-Than-Temporary Impairment of Securities

On a quarterly basis, management makes an assessment to determine whether there have been events or economic circumstances to indicate that a security on which there is an unrealized loss is other-than-temporarily impaired. For equity securities with an unrealized loss, the Company considers many factors including the severity and duration of the impairment; the intent and ability of the Company to hold the security for a period of time sufficient for a recovery in value; and recent events specific to the issuer or industry. Equity securities for which there is an unrealized loss that is deemed to be other-than-temporary are written down to fair value with the write-down recorded as a realized loss in securities gains (losses).

For debt securities with an unrealized loss, an other-than-temporary impairment write-down is triggered when (1) the Company has the intent to sell a debt security, (2) it is more likely than not that the Company will be required to sell the debt security before recovery of its amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the debt security. If the Company has the intent to sell a debt security or if it is more likely than not that it will be required to sell the debt security before recovery, the other-than-temporary write-down is equal to the entire difference between the debt security's amortized cost and its fair value. If the Company does not intend to sell the security or it is not more likely than not that it will be required to sell the security before recovery, the other-than-temporary impairment write-down is separated into the amount that is credit related (credit loss component) and the amount due to all other factors. The credit loss component is recognized in earnings and is the difference between the security's amortized cost basis and the present value of its expected future cash flows. The remaining difference between the security's fair value and the present value of future expected cash flows is due to factors that are not credit related and is recognized in other comprehensive income, net of applicable taxes.

Fair Value Determination

U.S. GAAP requires management to value and disclose certain of the Company's assets and liabilities at fair value, including investments classified as available-for-sale and derivatives. ASC 820, *Fair Value Measurements and Disclosures*, which defines fair value, establishes a framework for measuring fair value in accordance with U.S. GAAP and expands disclosures about fair value measurements. For more information regarding fair value measurements and disclosures, please refer to Note 8, Fair Value, of the consolidated financial statements that accompany this report.

Table of Contents

Fair values are based on active market prices of identical assets or liabilities when available. Comparable assets or liabilities or a composite of comparable assets in active markets are used when identical assets or liabilities do not have readily available active market pricing. However, some of the Company's assets or liabilities lack an available or comparable trading market characterized by frequent transactions between willing buyers and sellers. In these cases, fair value is estimated using pricing models that use discounted cash flows and other pricing techniques. Pricing models and their underlying assumptions are based upon management's best estimates for appropriate discount rates, default rates, prepayments, market volatility, and other factors, taking into account current observable market data and experience.

These assumptions may have a significant effect on the reported fair values of assets and liabilities and the related income and expense. As such, the use of different models and assumptions, as well as changes in market conditions, could result in materially different net earnings and retained earnings results.

Other Real Estate Owned

Other real estate owned (OREO), consists of properties obtained through foreclosure or in satisfaction of loans and is reported at the lower of cost or fair value of collateral, less estimated costs to sell at the date acquired, with any loss recognized as a charge-off through the allowance for loan losses. Additional OREO losses for subsequent valuation adjustments are determined on a specific property basis and are included as a component of other noninterest expense along with holding costs. Any gains or losses on disposal of OREO are also reflected in noninterest expense. Significant judgments and complex estimates are required in estimating the fair value of OREO, and the period of time within which such estimates can be considered current is significantly shortened during periods of market volatility. As a result, the net proceeds realized from sales transactions could differ significantly from appraisals, comparable sales, and other estimates used to determine the fair value of other OREO.

Deferred Tax Asset Valuation

A valuation allowance is recognized for a deferred tax asset if, based on the weight of available evidence, it is more-likely-than-not that some portion or the entire deferred tax asset will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of taxable income over the last three years and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that we will realize the benefits of these deductible differences at September 30, 2017. The amount of the deferred tax assets considered realizable, however, could be reduced if estimates of future taxable income are reduced.

Table of Contents**RESULTS OF OPERATIONS****Average Balance Sheet and Interest Rates**

	Nine months ended September 30,			
	2017		2016	
	Average	Yield/	Average	Yield/
<i>(Dollars in thousands)</i>	Balance	Rate	Balance	Rate
Loans and loans held for sale	\$ 437,707	4.70%	\$ 432,628	4.75%
Securities - taxable	198,842	2.15%	161,484	2.00%
Securities - tax-exempt	69,770	5.10%	67,701	5.57%
Total securities	268,612	2.92%	229,185	3.06%
Federal funds sold	33,430	1.00%	53,420	0.50%
Interest bearing bank deposits	45,310	1.03%	71,384	0.51%
Total interest-earning assets	785,059	3.72%	786,617	3.58%
Deposits:				
NOW	125,968	0.19%	123,049	0.31%
Savings and money market	232,076	0.37%	232,893	0.38%

Short-term borrowings	3,626	0.52%	2,872	0.51%
Long-term debt	3,217	3.87%	7,217	3.52%
Total interest-bearing liabilities	565,577	0.64%	579,690	0.72%
Net interest income and margin (tax-equivalent)	\$ 19,156	3.26%	\$ 17,957	3.05%

Net Interest Income and Margin

Net interest income (tax-equivalent) was \$19.2 million for the first nine months of 2017 compared to \$18.0 million for the first nine months of 2016. This increase was primarily due to an increase in interest income from securities available-for-sale as management reduced its investment in federal funds sold and interest bearing bank deposits and increased its investment securities as market yields improved. The Company also lowered its deposit costs and repaid higher-cost wholesale funding sources.

The tax-equivalent yield on total interest-earning assets increased by 14 basis points in the first nine months of 2017 from the first nine months of 2016. Increases in yields on short-term assets, including federal funds sold and interest bearing bank deposits, due to recent increases in the Federal Reserve's federal funds rate targets, were partially offset by declining loan yields resulting from pricing competition for quality loan opportunities in our markets and declining securities yields due to lower reinvestment rates for municipal bonds.

The cost of total interest-bearing liabilities decreased 8 basis points in the first nine months of 2017 from the first nine months of 2016 to 0.64%. The net decrease was largely a result of the continued shift in our funding mix, as we increased our lower-cost interest-bearing demand deposits (NOW accounts) and concurrently reduced our balances of higher-cost certificates of deposits and long-term debt.

The Company continues to deploy various asset liability management strategies to manage its risk to interest rate fluctuations. The Company's net interest margin could experience pressure due to declining earning asset yields during this extended period of low interest rates, increased competition for quality loan opportunities, and possible increases in our costs of funds and our variable rate assets, if the Federal Reserve continues its gradual increase in interest rates. Despite this challenging environment, we believe our net interest income should continue to increase in 2017 compared to 2016 due to shifts in our asset mix, and our belief that interest rates should, depending on competitive pressures, rise faster in our assets than our liabilities.

Table of Contents**Provision for Loan Losses**

The provision for loan losses represents a charge to earnings necessary to provide an allowance for loan losses that management believes, based on its processes and estimates, should be adequate to provide for the probable losses on outstanding loans. The Company recorded a provision for loan losses of \$0.1 million for the first nine months of 2017, compared to a negative \$0.6 million provision for loan losses for the first nine months of 2016 due to the payoff of the nonperforming loan described below. Annualized net charge-offs as a percent of average loans were 0.02% for the first nine months of 2017 compared to annualized net recoveries as a percent of average loans of 0.27% for the first nine months of 2016. The Company recognized a recovery of \$1.2 million from the payoff of one nonperforming construction and land development loan during the first nine months of 2016. The provision for loan losses is based upon various factors, including the absolute level of loans, loan growth, the credit quality, and the amount of net charge-offs or recoveries.

Based upon its assessment of the loan portfolio, management adjusts the allowance for loan losses to an amount it believes should be appropriate to adequately cover its estimate of probable losses in the loan portfolio. The Company's allowance for loan losses as a percentage of total loans was 1.04% at September 30, 2017, compared to 1.08% at December 31, 2016. While the policies and procedures used to estimate the allowance for loan losses, as well as the resulting provision for loan losses charged to operations, are considered adequate by management and are reviewed from time to time by our regulators, they are based on estimates and judgments and are therefore approximate and imprecise. Factors beyond our control (such as conditions in the local and national economy, local real estate markets, or industries) may have a material adverse effect on our asset quality and the adequacy of our allowance for loan losses resulting in significant increases in the provision for loan losses.

Noninterest Income

	Quarter ended September 30,		Nine months ended September 30,	
<i>(Dollars in thousands)</i>	2017	2016	2017	2016
Service charges on deposit accounts	\$ 191	\$ 197	\$ 563	\$ 588
Mortgage lending income	254	246	558	740
Bank-owned life insurance	112	114	329	339
Securities gains, net	49	148	51	148
Other	362	358	1,096	1,075
Total noninterest income	\$ 968	\$ 1,063	\$ 2,597	\$ 2,890

Service charges on deposit accounts decreased primarily due to a decline in insufficient funds charges, reflecting changes in customer behavior and spending patterns.

The Company's income from mortgage lending was primarily attributable to the (1) origination and sale of new mortgage loans and (2) servicing of mortgage loans. Origination income, net, is comprised of gains or losses from the sale of the mortgage loans originated, origination fees, underwriting fees, and other fees associated with the origination of loans, which are netted against the commission expense associated with these originations. The Company's normal practice is to originate mortgage loans for sale in the secondary market and to either sell or retain

the associated mortgage servicing rights (MSR) when the loan is sold.

MSRs are recognized based on the fair value of the servicing right on the date the corresponding mortgage loan is sold. Subsequent to the date of transfer, the Company has elected to measure its MSRs under the amortization method. Servicing fee income is reported net of any related amortization expense.

MSRs are also evaluated for impairment on a quarterly basis. Impairment is determined by grouping MSRs by common predominant characteristics, such as interest rate and loan type. If the aggregate carrying amount of a particular group of MSRs exceeds the group s aggregate fair value, a valuation allowance for that group is established. The valuation allowance is adjusted as the fair value changes. An increase in mortgage interest rates typically results in an increase in the fair value of the MSRs while a decrease in mortgage interest rates typically results in a decrease in the fair value of MSRs.

Table of Contents

The following table presents a breakdown of the Company's mortgage lending income.

<i>(Dollars in thousands)</i>	Quarter ended September 30,		Nine months ended September 30,	
	2017	2016	2017	2016
Origination income	\$ 190	\$ 242	\$ 366	\$ 609
Servicing fees, net	64	24	191	152
(Increase) decrease in MSR valuation allowance		(20)	1	(21)
Total mortgage lending income	\$ 254	\$ 246	\$ 558	\$ 740

Mortgage lending income decreased in the first nine months of 2017, compared to the first nine months of 2016 due to a decrease in the volume of mortgage loans originated and sold. The Company is evaluating plans to increase its production capabilities; however, until such plans have been implemented, management expects mortgage lending income and volume will decrease compared to prior periods.

Securities gains, net consists of realized gains and losses on the sale of securities. Gross realized gains were \$49,000 and \$51,000, respectively for the third quarter and first nine months of 2017, compared to \$148,000 for the third quarter and first nine months of 2016.

Noninterest Expense

<i>(Dollars in thousands)</i>	Quarter ended September 30,		Nine months ended September 30,	
	2017	2016	2017	2016
Salaries and benefits	\$ 2,516	\$ 2,471	\$ 7,289	\$ 7,322
Net occupancy and equipment	385	389	1,117	1,107
Professional fees	276	220	760	625
FDIC and other regulatory assessments	79	76	257	320
Other real estate owned, net	4	(194)	(5)	(217)
Other	965	1,018	2,940	2,953
Total noninterest expense	\$ 4,225	\$ 3,980	\$ 12,358	\$ 12,110

Salaries and benefits decreased in the first nine months of 2017, compared to the first nine months of 2016. A decrease in bonus incentive accruals was partially offset by routine annual increases in salaries and wages.

Professional fees increased in the first nine months of 2017, compared to the first nine months of 2016. The increase was primarily due to increases in professional fees associated with our mortgage lending division.

The decrease in FDIC and other regulatory assessments expense was primarily due to a decrease in the Bank's initial assessment rate during the third quarter of 2016. In addition to changes in the FDIC assessment rate formula for banks with less than \$10 billion in assets, the initial assessment rate for all banks decreased effective July 1, 2016 due to the

Deposit Insurance Fund's reserve ratio exceeding 1.15% at June 30, 2016.

The increase in other real estate owned expense was primarily due to gains realized on the sale of OREO in the third quarter and first nine months of 2016.

Income Tax Expense

Income tax expense was \$2.4 million for the first nine months of 2017 and \$2.3 million for the first nine months of 2016. The Company's income tax expense for the first nine months of 2017 and 2016 reflects an effective income tax rate of 28.24% and 27.50%, respectively. This increase in the effective tax rate is primarily due to a decrease in tax preference items such as income from investments in municipal securities and bank-owned life insurance.

Table of Contents**BALANCE SHEET ANALYSIS****Securities**

Securities available-for-sale were \$265.2 million at September 30, 2017, an increase of \$21.6 million, or 9%, compared to \$243.6 million at December 31, 2016. This increase reflects an increase in the amortized cost basis of securities available-for-sale of \$20.3 million and an increase in the fair value of securities available-for-sale of \$1.3 million. The increase in the amortized cost basis of securities available-for-sale was primarily attributable to management increasing the Company's investment securities as market yields improved in early 2017. The increase in the fair value of securities was primarily due to a decrease in long-term interest rates. The average annualized tax-equivalent yields earned on total securities were 2.92% in 2017 and 3.06% in 2016.

Loans

	2017			2016	
<i>(In thousands)</i>	Third Quarter	Second Quarter	First Quarter	Fourth Quarter	Third Quarter
Commercial and industrial	\$ 50,101	50,974	50,228	49,850	50,881
Construction and land development	47,455	46,386	45,098	41,650	44,004
Commercial real estate	232,380	220,863	218,739	220,439	211,558
Residential real estate	110,159	110,288	108,096	110,855	112,303
Consumer installment	9,877	9,409	9,032	8,712	8,996
Total loans	449,972	437,920	431,193	431,506	427,742
Less: unearned income	(594)	(633)	(640)	(560)	(539)
Loans, net of unearned income	\$ 449,378	437,287	430,553	430,946	427,203

Total loans, net of unearned income, were \$449.4 million at September 30, 2017, compared to \$430.9 million at December 31, 2016. The increase of \$18.5 million, or 4% was primarily due to growth in commercial real estate loans. Four loan categories represented the majority of the loan portfolio at September 30, 2017: commercial real estate (53%), residential real estate (25%), construction and land development (11%) and commercial and industrial (11%). Approximately 18% of the Company's commercial real estate loans were classified as owner-occupied at September 30, 2017.

Within the residential real estate portfolio segment, the Company had junior lien mortgages of approximately \$12.5 million, or 3% of total loans, at September 30, 2017, compared to \$13.7 million, or 3% of total loans, at December 31, 2016. For residential real estate mortgage loans with a consumer purpose, \$2.0 million required interest-only payments at September 30, 2017, compared to \$1.4 million at December 31, 2016. The Company's residential real estate mortgage portfolio does not include any option ARM loans, subprime loans, or any material amount of other high-risk consumer mortgage products.

The average yield earned on loans and loans held for sale was 4.70% in the first nine months of 2017 and 4.75% in the first nine months of 2016.

The specific economic and credit risks associated with our loan portfolio include, but are not limited to, the effects of current economic conditions on our borrowers' cash flows, real estate market sales volumes, valuations, availability and cost of financing properties, real estate industry concentrations, competitive pressures from a wide range of other lenders, deterioration in certain credits, interest rate fluctuations, reduced collateral values or non-existent collateral, title defects, inaccurate appraisals, financial deterioration of borrowers, fraud, and any violation of applicable laws and regulations.

The Company attempts to reduce these economic and credit risks through its loan-to-value guidelines for collateralized loans, investigating the creditworthiness of borrowers and monitoring borrowers' financial position. Also, we have established and periodically review, lending policies and procedures. Banking regulations limit a bank's credit exposure by prohibiting unsecured loan relationships that exceed 10% of its capital; or 20% of capital, if loans in excess of 10% of capital are fully secured. Under these regulations, we are prohibited from having secured loan relationships in excess of approximately \$18.6 million. Furthermore, we have an internal limit for aggregate credit exposure (loans outstanding plus unfunded commitments) to a single borrower of \$16.8 million. Our loan policy requires that the Loan Committee of the Board of Directors approve any loan relationships that exceed this internal limit. At September 30, 2017, the Bank had one loan relationship that exceeded our internal limit.

Table of Contents

We periodically analyze our commercial loan portfolio to determine if a concentration of credit risk exists in any one or more industries. We use classification systems broadly accepted by the financial services industry in order to categorize our commercial borrowers. Loan concentrations to borrowers in the following classes exceeded 25% of the Bank's total risk-based capital at September 30, 2017 (and related balances at December 31, 2016).

<i>(In thousands)</i>	September 30, 2017	December 31, 2016
Multi-family residential properties	\$ 47,794	\$ 46,998
Lessors of 1 to 4 family residential properties	47,103	45,291
Shopping centers	41,118	40,925
Office buildings	24,708	22,366
Hotel/motel	22,691	19,312

Allowance for Loan Losses

The Company maintains the allowance for loan losses at a level that management believes appropriate to adequately cover the Company's estimate of probable losses inherent in the loan portfolio. The allowance for loan losses was \$4.7 million at September 30, 2017 compared to \$4.6 million at December 31, 2016, which management believed to be adequate at each of the respective dates. The judgments and estimates associated with the determination of the allowance for loan losses are described under Critical Accounting Policies.

A summary of the changes in the allowance for loan losses and certain asset quality ratios for the third quarter of 2017 and the previous four quarters is presented below.

	2017			2016	
	Third Quarter	Second Quarter	First Quarter	Fourth Quarter	Third Quarter
<i>(Dollars in thousands)</i>					
Balance at beginning of period	\$ 4,965	4,588	4,643	4,578	4,528
Charge-offs:					
Commercial and industrial	(449)			(14)	
Residential real estate	(30)		(78)	(20)	(7)
Consumer installment	(10)	(5)	(1)	(38)	(1)
Total charge-offs	(489)	(5)	(79)	(72)	(8)
Recoveries	194	282	24	22	58
Net (charge-offs) recoveries	(295)	277	(55)	(50)	50
Provision for loan losses		100		115	

Ending balance	\$	4,670	4,965	4,588	4,643	4,578
as a % of loans		1.04 %	1.14	1.07	1.08	1.07
as a % of nonperforming loans		161 %	220	198	196	284
Net charge-offs (recoveries) as % of average loans (a)		0.27 %	(0.25)	0.05	0.05	(0.05)

(a) Net charge-offs (recoveries) are annualized.

As described under Critical Accounting Policies, management assesses the adequacy of the allowance prior to the end of each calendar quarter. The level of the allowance is based upon management's evaluation of the loan portfolios, past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payment), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, industry and peer bank loan loss rates, and other pertinent factors. This evaluation is inherently subjective as it requires various material estimates and judgments, including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. The ratio of our allowance for loan losses to total loans outstanding was 1.04% at September 30, 2017, compared to 1.08% at December 31, 2016. In the future, the allowance to total loans outstanding ratio will increase or decrease to the extent the factors that influence our quarterly allowance assessment in their entirety either improve or weaken. In addition, our regulators, as an integral part of their examination process, will periodically review the Company's allowance for loan losses, and may require the Company to make additional provisions to the allowance for loan losses based on their judgment about information available to them at the time of their examinations.

Table of Contents

Net charge-offs were \$0.1 million, or 0.02% of average loans in the first nine months of 2017, compared to net recoveries of \$0.9 million, or 0.27% of average loans in the first nine months of 2016 primarily due to a recovery of \$1.2 million from the payoff of one nonperforming construction and land development loan.

The Company's recorded investment in loans considered impaired was \$2.7 million at September 30, 2017 and \$2.1 million at December 31, 2016, respectively, with corresponding valuation allowances (included in the allowance for loan losses) of \$49 thousand and \$31 thousand at each respective date.

Nonperforming Assets

The Company had \$3.0 million in nonperforming assets at September 30, 2017, compared to \$2.5 million in nonperforming assets at December 31, 2016.

The table below provides information concerning total nonperforming assets and certain asset quality ratios for the third quarter of 2017 and the previous four quarters.

	2017			2016	
	Third	Second	First	Fourth	Third
<i>(Dollars in thousands)</i>	Quarter	Quarter	Quarter	Quarter	Quarter
Nonperforming assets:					
Nonaccrual loans	\$ 2,902	2,255	2,318	2,370	1,614
Other real estate owned	103	103	152	152	37
Total nonperforming assets	\$ 3,005	2,358	2,470	2,522	1,651
as a % of loans and other real estate owned	0.67 %	0.54	0.57	0.59	0.39
as a % of total assets	0.36 %	0.28	0.29	0.30	0.19
Nonperforming loans as a % of total loans	0.65 %	0.52	0.54	0.55	0.38
Accruing loans 90 days or more past due	\$ 5	42			211

The table below provides information concerning the composition of nonaccrual loans for the third quarter of 2017 and the previous four quarters.

2017

2016

	Third	Second	First	Fourth	Third
<i>(In thousands)</i>	Quarter	Quarter	Quarter	Quarter	Quarter
Nonaccrual loans:					
Commercial and industrial	\$ 33	34	35	37	38
Construction and land development			22	32	45
Commercial real estate	2,500	1,797	1,850	2,027	1,521
Residential real estate	353	406	391	252	10
Consumer installment	16	18	20	22	
Total nonaccrual loans	\$ 2,902	2,255	2,318	2,370	1,614

The Company discontinues the accrual of interest income when (1) there is a significant deterioration in the financial condition of the borrower and full repayment of principal and interest is not expected or (2) the principal or interest is 90 days or more past due, unless the loan is both well-secured and in the process of collection. At September 30, 2017 and December 31, 2016, respectively, the Company had \$2.9 million and \$2.4 million in loans on nonaccrual.

At September 30, 2017 there were \$5 thousand in loans 90 days or more past due and still accruing compared to none at December 31, 2016.

Table of Contents

The table below provides information concerning the composition of other real estate owned for the third quarter of 2017 and the previous four quarters.

Residential	103	103	115	115	37
Total other real estate owned	\$ 103	103	152	152	37

Potential Problem Loans

Potential problem loans represent those loans with a well-defined weakness and where information about possible credit problems of a borrower has caused management to have serious doubts about the borrower's ability to comply with present repayment terms. This definition is believed to be substantially consistent with the standards established by the Federal Reserve Bank, the Company's primary regulator, for loans classified as substandard, excluding nonaccrual loans. Potential problem loans, which are not included in nonperforming assets, amounted to \$5.8 million, or 1.3% of total loans at September 30, 2017, compared to \$5.8 million, or 1.4% of total loans at December 31, 2016.

The table below provides information concerning the composition of potential problem loans for the third quarter of 2017 and the previous four quarters.

<i>(In thousands)</i>	2017				2016
	Third	Second	First	Fourth	Third
	Quarter	Quarter	Quarter	Quarter	Quarter
Potential problem loans:					
Commercial and industrial	\$ 130	609	210	233	356
Construction and land development	273	286	298	340	352
Commercial real estate	767	1,528	795	854	1,184
Residential real estate	4,524	4,416	4,285	4,326	4,423
Consumer installment	96	97	99	90	89

Total potential problem loans	\$ 5,790	6,936	5,687	5,843	6,404
-------------------------------	----------	-------	-------	-------	-------

At September 30, 2017, approximately \$0.8 million, or 14% of total potential problem loans were past due at least 30 days, but less than 90 days.

The following table is a summary of the Company's performing loans that were past due at least 30 days, but less than 90 days, for the third quarter of 2017 and the previous four quarters.

	2017				2016
	Third	Second	First	Fourth	Third
	Quarter	Quarter	Quarter	Quarter	Quarter
<i>(In thousands)</i>					
Performing loans past due 30 to 89 days:					
Commercial and industrial	\$ 64	195	1	66	3
Construction and land development	175	2	3	395	
Commercial real estate		748		242

Consumer installment	33	25	17	38	40
Total	\$ 785	1,466	1,207	2,042	412

Table of Contents

Deposits

Total deposits were \$732.6 million at September 30, 2017, compared to \$739.1 million at December 31, 2016. Decreases of \$9.4 million in interest bearing deposits were partially offset by increases in noninterest bearing deposits of \$2.9 million during the first nine months of 2017. Noninterest bearing deposits were \$184.8 million, or 25.2% of total deposits, at September 30, 2017, compared to \$181.9 million, or 24.6% of total deposits at December 31, 2016.

The average rate paid on total interest-bearing deposits was 0.62% in the first nine months of 2017 and 0.69% in the first nine months of 2016.

Other Borrowings

Other borrowings consist of short-term borrowings and long-term debt. Short-term borrowings generally consist of federal funds purchased and securities sold under agreements to repurchase with an original maturity less than one year. The Bank had available federal funds lines totaling \$41.0 million with none outstanding at September 30, 2017, and at December 31, 2016, respectively. Securities sold under agreements to repurchase totaled \$3.6 million and \$3.4 million at September 30, 2017 and December 31, 2016, respectively.

The average rate paid on short-term borrowings was 0.52% in the first nine months of 2017 compared to 0.51% in the first nine months of 2016.

Long-term debt includes subordinated debentures related to trust preferred securities. The Company had \$3.2 million in junior subordinated debentures related to trust preferred securities outstanding at September 30, 2017 and December 31, 2016. The junior subordinated debentures mature on December 31, 2033 and have been redeemable since December 31, 2008.

The average rate paid on long-term debt was 3.87% in the first nine months of 2017 and 3.52% in the first nine months of 2016.

CAPITAL ADEQUACY

The Company's consolidated stockholders' equity was \$86.5 million and \$82.2 million as of September 30, 2017 and December 31, 2016, respectively. The increase from December 31, 2016 was primarily driven by net earnings of \$6.0 million and other comprehensive income due to the change in unrealized gains (losses) on securities available-for-sale, net-of-tax, of \$0.9 million, which was partially offset by cash dividends paid of \$2.5 million.

On January 1, 2015, the Company and Bank became subject to the rules of the Basel III regulatory capital framework and related Dodd-Frank Wall Street Reform and Consumer Protection Act changes. The new rules included the implementation of a new capital conservation buffer that is added to the minimum requirements for capital adequacy purposes. The capital conservation buffer is subject to a three year phase-in period that began on January 1, 2016 and will be fully phased-in on January 1, 2019 at 2.5%. The required phase-in capital conservation buffer during 2017 is 1.25%. A banking organization with a conservation buffer of less than the required amount will be subject to limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers. At September 30, 2017, the ratios for the Company and Bank were sufficient to meet the fully phased-in conservation buffer.

The Company's tier 1 leverage ratio was 10.70%, common equity tier 1 (CET1) risk-based capital ratio was 16.15%, tier 1 risk-based capital ratio was 16.71%, and total risk-based capital ratio was 17.62% at September 30, 2017. These

ratios exceed the minimum regulatory capital percentages of 5.0% for tier 1 leverage ratio, 6.5% for CET1 risk-based capital ratio, 8.0% for tier 1 risk-based capital ratio, and 10.0% for total risk-based capital ratio to be considered well capitalized. The Company's capital conservation buffer was 9.62% at September 30, 2017.

MARKET AND LIQUIDITY RISK MANAGEMENT

Management's objective is to manage assets and liabilities to provide a satisfactory, consistent level of profitability within the framework of established liquidity, loan, investment, borrowing, and capital policies. The Bank's Asset Liability Management Committee (ALCO) is charged with the responsibility of monitoring these policies, which are designed to ensure an acceptable asset/liability composition. Two critical areas of focus for ALCO are interest rate risk and liquidity risk management.

Table of Contents**Interest Rate Risk Management**

In the normal course of business, the Company is exposed to market risk arising from fluctuations in interest rates. ALCO measures and evaluates interest rate risk so that the Bank can meet customer demands for various types of loans and deposits. Measurements used to help manage interest rate sensitivity include an earnings simulation model and an economic value of equity (EVE) model.

Earnings simulation. Management believes that interest rate risk is best estimated by our earnings simulation modeling. Forecasted levels of earning assets, interest-bearing liabilities, and off-balance sheet financial instruments are combined with ALCO forecasts of market interest rates for the next 12 months and other factors in order to produce various earnings simulations and estimates. To help limit interest rate risk, we have guidelines for earnings at risk which seek to limit the variance of net interest income from gradual changes in interest rates. For changes up or down in rates from management's flat interest rate forecast over the next 12 months, policy limits for net interest income variances are as follows:

- +/- 20% for a gradual change of 400 basis points
- +/- 15% for a gradual change of 300 basis points
- +/- 10% for a gradual change of 200 basis points
- +/- 5% for a gradual change of 100 basis points

At September 30, 2017, our earnings simulation model indicated that we were in compliance with the policy guidelines noted above.

Economic Value of Equity. EVE measures the extent that the estimated economic values of our assets, liabilities, and off-balance sheet items will change as a result of interest rate changes. Economic values are estimated by discounting expected cash flows from assets, liabilities, and off-balance sheet items, which establishes a base case EVE. In contrast with our earnings simulation model, which evaluates interest rate risk over a 12 month timeframe, EVE uses a terminal horizon which allows for the re-pricing of all assets, liabilities, and off-balance sheet items. Further, EVE is measured using values as of a point in time and does not reflect any actions that ALCO might take in responding to or anticipating changes in interest rates, or market and competitive conditions. To help limit interest rate risk, we have stated policy guidelines for an instantaneous basis point change in interest rates, such that our EVE should not decrease from our base case by more than the following:

- 45% for an instantaneous change of +/- 400 basis points
- 35% for an instantaneous change of +/- 300 basis points
- 25% for an instantaneous change of +/- 200 basis points
- 15% for an instantaneous change of +/- 100 basis points

At September 30, 2017, our EVE model indicated that we were in compliance with the policy guidelines noted above.

Each of the above analyses may not, on its own, be an accurate indicator of how our net interest income will be affected by changes in interest rates. Income associated with interest-earning assets and costs associated with interest-bearing liabilities may not be affected uniformly by changes in interest rates. In addition, the magnitude and duration of changes in interest rates may have a significant impact on net interest income. For example, although certain assets and liabilities may have similar maturities or periods of repricing, they may react in different degrees to changes in market interest rates, and other economic and market factors, including market perceptions. Interest rates

on certain types of assets and liabilities fluctuate in advance of changes in general market rates, while interest rates on other types of assets and liabilities may lag behind changes in general market rates. In addition, certain assets, such as adjustable rate mortgage loans, have features (generally referred to as interest rate caps and floors) which limit changes in interest rates. Prepayment and early withdrawal levels also could deviate significantly from those assumed in calculating the maturity of certain instruments. The ability of many borrowers to service their debts also may decrease during periods of rising interest rates or economic stress, which may differ across industries and economic sectors. ALCO reviews each of the above interest rate sensitivity analyses along with several different interest rate scenarios in seeking satisfactory, consistent levels of profitability within the framework of the Company's established liquidity, loan, investment, borrowing, and capital policies.

Table of Contents

The Company may also use derivative financial instruments to improve the balance between interest-sensitive assets and interest-sensitive liabilities, and as a tool to manage interest rate sensitivity while continuing to meet the credit and deposit needs of our customers. From time to time, the Company may enter into interest rate swaps (swaps) to facilitate customer transactions and meet their financing needs. These swaps qualify as derivatives, but are not designated as hedging instruments. At September 30, 2017 and December 31, 2016, the Company had no derivative contracts designated as part of a hedging relationship to assist in managing its interest rate sensitivity.

Liquidity Risk Management

Liquidity is the Company's ability to convert assets into cash equivalents in order to meet daily cash flow requirements, primarily for deposit withdrawals, loan demand and maturing obligations. Without proper management of its liquidity, the Company could experience higher costs of obtaining funds due to insufficient liquidity, while excessive liquidity can lead to a decline in earnings due to the cost of foregoing alternative higher-yielding investment opportunities.

Liquidity is managed at two levels. The first is the liquidity of the Company. The second is the liquidity of the Bank. The management of liquidity at both levels is essential, because the Company and the Bank are separate and distinct legal entities with different funding needs and sources, and each are subject to regulatory guidelines and requirements. The Company depends upon dividends from the Bank for liquidity to pay its operating expenses, debt obligations and dividends. The Bank's payment of dividends depends on its earnings, liquidity, capital and the absence of any regulatory restrictions.

The primary source of funding and the primary source of liquidity for the Company include dividends received from the Bank, and secondarily proceeds from the possible issuance of common stock or other securities. Primary uses of funds by the Company include dividends paid to stockholders, stock repurchases, and interest payments on junior subordinated debentures issued by the Company in connection with trust preferred securities. The junior subordinated debentures are presented as long-term debt in the accompanying consolidated balance sheets and the related trust preferred securities are currently includible in Tier 1 Capital for regulatory capital purposes.

Primary sources of funding for the Bank include customer deposits, other borrowings, repayment and maturity of securities, sales of securities, and the sale and repayment of loans. The Bank has access to federal funds lines from various banks and borrowings from the Federal Reserve discount window. In addition to these sources, the Bank may participate in the FHLB's advance program to obtain funding for its growth. Advances include both fixed and variable terms and may be taken out with varying maturities. At September 30, 2017, the Bank had a remaining available line of credit with the FHLB of \$246.8 million. At September 30, 2017, the Bank also had \$41.0 million of available federal funds lines with none outstanding. Primary uses of funds include repayment of maturing obligations and growing the loan portfolio.

Management believes that the Company and the Bank have adequate sources of liquidity to meet all their respective known contractual obligations and unfunded commitments, including loan commitments and reasonable borrower, depositor, and creditor requirements over the next twelve months.

Off-Balance Sheet Arrangements, Commitments and Contingencies

At September 30, 2017, the Bank had outstanding standby letters of credit of \$7.6 million and unfunded loan commitments outstanding of \$71.3 million. Because these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. If needed to fund these outstanding commitments, the Bank could liquidate federal funds sold or a

portion of securities available-for-sale, or draw on its available credit facilities.

Mortgage lending activities

Since 2009, we have primarily sold residential mortgage loans in the secondary market to Fannie Mae while retaining the servicing of these loans. The sale agreements for these residential mortgage loans with Fannie Mae and other investors include various representations and warranties regarding the origination and characteristics of the residential mortgage loans. Although the representations and warranties vary among investors, they typically cover ownership of the loan, validity of the lien securing the loan, the absence of delinquent taxes or liens against the property securing the loan, compliance with loan criteria set forth in the applicable agreement, compliance with applicable federal, state, and local laws, among other matters.

Table of Contents

As of September 30, 2017, the unpaid principal balance of residential mortgage loans, which we have originated and sold, but retained the servicing rights was \$314.7 million. Although these loans are generally sold on a non-recourse basis, we may be obligated to repurchase residential mortgage loans or reimburse investors for losses incurred (make whole requests) if a loan review reveals a potential breach of seller representations and warranties. Upon receipt of a repurchase or make whole request, we work with investors to arrive at a mutually agreeable resolution. Repurchase and make whole requests are typically reviewed on an individual loan by loan basis to validate the claims made by the investor and to determine if a contractually required repurchase or make whole event has occurred. We seek to reduce and manage the risks of potential repurchases, make whole requests, or other claims by mortgage loan investors through our underwriting and quality assurance practices and by servicing mortgage loans to meet investor and secondary market standards.

In the first nine months of 2017, as a result of the representation and warranty provisions contained in the Company's sale agreements with Fannie Mae, the Company was required to repurchase three loans with an aggregate principal balance of \$0.6 million, which were current as to principal and interest at the time of repurchase. At September 30, 2017, the Company had one pending repurchase request.

We service all residential mortgage loans originated and sold by us to Fannie Mae. As servicer, our primary duties are to: (1) collect payments due from borrowers; (2) advance certain delinquent payments of principal and interest; (3) maintain and administer any hazard, title, or primary mortgage insurance policies relating to the mortgage loans; (4) maintain any required escrow accounts for payment of taxes and insurance and administer escrow payments; and (5) foreclose on defaulted mortgage loans or take other actions to mitigate the potential losses to investors consistent with the agreements governing our rights and duties as servicer.

The agreement under which we act as servicer generally specifies a standard of responsibility for actions taken by us in such capacity and provides protection against expenses and liabilities incurred by us when acting in compliance with the respective servicing agreements. However, if we commit a material breach of our obligations as servicer, we may be subject to termination if the breach is not cured within a specified period following notice. The standards governing servicing and the possible remedies for violations of such standards are determined by servicing guides issued by Fannie Mae as well as the contract provisions established between Fannie Mae and the Bank. Remedies could include repurchase of an affected loan.

Although repurchase and make whole requests related to representation and warranty provisions and servicing activities have been limited to date, it is possible that requests to repurchase mortgage loans or reimburse investors for losses incurred (make whole requests) may increase in frequency if investors more aggressively pursue all means of recovering losses on their purchased loans. As of September 30, 2017, we do not believe that this exposure is material due to the historical level of repurchase requests and loss trends, in addition to the fact that 99% of our residential mortgage loans serviced for Fannie Mae were current as of such date. We maintain ongoing communications with our investors and will continue to evaluate this exposure by monitoring the level and number of repurchase requests as well as the delinquency rates in our investor portfolios.

Effects of Inflation and Changing Prices

The Consolidated Financial Statements and related consolidated financial data presented herein have been prepared in accordance with U.S. generally accepted accounting principles and practices within the banking industry which require the measurement of financial position and operating results in terms of historical dollars without considering the changes in the relative purchasing power of money over time due to inflation. Unlike most industrial companies, virtually all the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the effects of general levels of inflation.

Table of Contents

CURRENT ACCOUNTING DEVELOPMENTS

The following Accounting Standards Updates (Updates or ASUs) have been issued by the FASB but are not yet effective.

ASU 2014-09, *Revenue from Contracts with Customers*;

ASU 2015-14, *Revenue from Contracts with Customers – Deferral of the Effective Date*;

ASU 2016-01, *Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities*;

ASU 2016-02, *Leases*;

ASU 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*;

ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*; and

ASU 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash*.

Information about these pronouncements is described in more detail below.

ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)* was developed as a joint project with the International Accounting Standards Board to remove inconsistencies in revenue requirements and provide a more robust framework for addressing revenue issues. The ASU's core principle is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued *Accounting Standards Update 2015-14*, which deferred the effective date by one year (i.e., interim and annual reporting periods beginning after December 15, 2017). Early adoption is permitted, but not before the original effective date (i.e., interim and annual reporting periods beginning after December 15, 2016). The ASU may be adopted using either a modified retrospective method or a full retrospective method. The Company intends to adopt the ASU during the first quarter of 2018, as required, using a modified retrospective approach. The Company's preliminary analysis suggests that the adoption of this accounting guidance is not expected to have a material impact on the Company's consolidated financial statements as the majority of its revenue stream is generated from financial instruments which are not within the scope of this ASU. However, the Company is still evaluating the impact for other fee-based income. The FASB continues to release new accounting guidance related to the adoption of this ASU and the results of the Company's materiality analysis may change based on conclusions reached as to the application of this new guidance.

ASU 2016-01, *Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities*, enhances the reporting model for financial instruments to provide users of financial statements with more decision-useful information. The ASU addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. Some of the amendments include the following: 1) Require equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; 2) Simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; 3) Require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; 4) Require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value; among others. For public business entities, the amendments of this ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Although the Company has not finalized its evaluation of the impact of adopting ASU No. 2016-01, adoption is not expected to have a material impact on the Company's consolidated financial statements. Additionally, for purposes of disclosing the fair value of loans carried at amortized cost, we are evaluating our valuation methods to determine the necessary changes to conform to an exit price notion as required by the Standard. Accordingly, the fair value amounts disclosed for such loans may change upon adoption.

Table of Contents

ASU 2016-02, *Leases*, requires lessees to recognize the assets and liabilities that arise from leases on the balance sheet. A lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for lease term. The new guidance is effective for annual and interim reporting periods beginning after December 15, 2018. The amendment should be applied at the beginning of the earliest period presented using a modified retrospective approach with earlier application permitted as of the beginning of an interim or annual reporting period. The Company is currently evaluating the impact this ASU will have on its consolidated financial statements.

ASU 2016-13, *Financial Instruments - Credit Losses (Topic 326): - Measurement of Credit Losses on Financial Instruments*, amends guidance on reporting credit losses for assets held at amortized cost basis and available for sale debt securities. For assets held at amortized cost basis, the new standard eliminates the probable initial recognition threshold in current GAAP and, instead, requires an entity to reflect its current estimate of all expected credit losses using a broader range of information regarding past events, current conditions and forecasts assessing the collectability of cash flows. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial assets to present the net amount expected to be collected. For available for sale debt securities, credit losses should be measured in a manner similar to current GAAP, however the new standard will require that credit losses be presented as an allowance rather than as a write-down. The new guidance affects entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. For public business entities that are SEC filers, the new guidance is effective for annual and interim periods in fiscal years beginning after December 15, 2019, and early adoption is permitted beginning in 2019. The Company is currently evaluating the impact this ASU will have on its consolidated financial statements.

ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*, provides guidance on eight specific cash flow issues where current GAAP is either unclear or does not include specific guidance on classification in the statement of cash flows. The new guidance is effective for annual and interim reporting periods in fiscal years beginning after December 15, 2017. The Company is currently evaluating the impact this ASU will have on its consolidated financial statements.

ASU 2016-18, *Statement of Cash Flows (Topic 230): Restricted cash*, amends guidance on how the statement of cash flows presents the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in this Update do not provide a definition of restricted cash or restricted cash equivalents. The new guidance is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The amendments are applied using a retrospective transition method to each period transitioned. The Company is currently evaluating the impact this ASU will have on its consolidated financial statements.

Table of Contents**Table 1 Explanation of Non-GAAP Financial Measures**

In addition to results presented in accordance with U.S. generally accepted accounting principles (GAAP), this quarterly report on Form 10-Q includes certain designated net interest income amounts presented on a tax-equivalent basis, a non-GAAP financial measure, including the presentation and calculation of the efficiency ratio.

The Company believes the presentation of net interest income on a tax-equivalent basis provides comparability of net interest income from both taxable and tax-exempt sources and facilitates comparability within the industry. Although the Company believes these non-GAAP financial measures enhance investors' understanding of its business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. The reconciliations of these non-GAAP financial measures to their most directly comparable GAAP financial measures are presented below.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information called for by ITEM 3 is set forth in ITEM 2 under the caption MARKET AND LIQUIDITY RISK MANAGEMENT and is incorporated herein by reference.

ITEM 4. CONTROLS AND PROCEDURES

The Company, with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based upon that evaluation and as of the end of the period covered by this report, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective to allow timely decisions regarding disclosure in its reports that the Company files or submits to the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended. There have been no changes in the Company's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the normal course of its business, the Company and the Bank are, from time to time, involved in legal proceedings. The Company's and Bank's management believe there are no pending or threatened legal, governmental, or regulatory proceedings that, upon resolution, are expected to have a material adverse effect upon the Company's or the Bank's financial condition or results of operations. See also, Part I, Item 3 of the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. RISK FACTORS in the Company's Annual Report on Form 10-K for the year ended December 31, 2016, which could materially affect our business, financial condition or future results. The risks described in our annual report on Form 10-K are not the only the risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition, and/or operating results in the future.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION
