The WisdomTree Australia Dividend Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Australia Dividend Index.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated August 1, 2017, the Fund s annual expense ratio was 0.58%.

* Returns of less than one year are cumulative.				

¹ Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on June 4, 2015.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. eastern time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The WisdomTree Global ex-U.S. Hedged Real Estate Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global ex-U.S. Hedged Real Estate Index.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for

direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated August 1, 2017, the Fund s net and gross annual expense ratios were 0.43% and 0.58%, respectively. WisdomTree Asset Management, Inc. has contractually agreed to limit the management fee to 0.43% through July 31, 2018, unless earlier terminated by the Board of Trustees of the Trust for any reason at any time.

The WisdomTree International MidCap Dividend Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree International MidCap Dividend Index.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as

the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated August 1, 2017, the Fund s annual expense ratio was 0.58%.

¹ Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on April 8, 2014.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. eastern time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The WisdomTree Japan Hedged Quality Dividend Growth Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Japan Hedged Quality Dividend Growth Index.

The following performance table is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as

the supply and demand for Fund shares and investors assessments of the underlying value of the Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage

commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. As of the Fund s current prospectus dated August 1, 2017, the Fund s net and gross annual expense ratios were 0.43% and 0.48%, respectively. WisdomTree Asset Management, Inc. has contractually agreed to limit the management fee to 0.43% through July 31, 2018, unless earlier terminated by the Board of Trustees of the Trust for any reason at any time.

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of cost: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from April 1, 2017 to September 30, 2017.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 4/1/17 to 9/30/17 to estimate the expenses you paid on your account during the period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.
