WisdomTree ICBCCS S&P China 500 Fund – WCHN (NYSE Arca, Inc.)
Summary Prospectus – December 18, 2017

Before you invest in the Fund, as defined below, you may want to review the Fund’s prospectus and statement of additional information (“SAI”), which contain more information about the Fund and the risks of investing in the Fund. The Fund’s current prospectus and SAI are incorporated by reference into this summary prospectus. You can find the Fund’s prospectus and SAI, as well as other information about the Fund, online at www.wisdomtree.com/resource-library/prospectus-regulatory-reports. You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to getinfo@wisdomtree.com.

Investment Objective

The WisdomTree ICBCCS S&P China 500 Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the S&P China 500 Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.55%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	1
Total Annual Fund Operating Expenses	0.55%

¹ Other Expenses are based on estimated amounts for the current fiscal year.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year 3 Years
\$ 56 \$ 176

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment

WisdomTree Trust Prospectus 1

objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index selects the largest 500 eligible companies from the broader S&P Total China BMI Index, which represents the entire investment universe of Chinese companies that meet certain minimum market capitalization and trading volume thresholds, and is weighted by float-adjusted market capitalization. All Chinese share classes, including A-Shares and offshore listings, are eligible for inclusion in the Index. The Index seeks to maintain the same sector weights as the S&P Total China BMI Index and uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial and information technology sectors. The following chart provides an overview of the different share classes eligible for inclusion in the Index:

Share Class	Definition
A-Shares	These are shares of Chinese companies incorporated in mainland China that trade in Chinese Renminbi on the Shanghai or Shenzhen Stock Exchanges.
B-Shares	These are shares of Chinese companies incorporated in mainland China that trade in U.S. dollars on the Shanghai Stock Exchange and in Hong Kong dollars on the Shenzhen Stock Exchange.
H-Shares	These are shares of Chinese companies incorporated in mainland China that trade in Hong Kong dollars on the Hong Kong Stock Exchange. H-Shares are available to non-residents of China.
Red Chips	These are shares of Chinese companies incorporated outside of mainland China that trade in Hong Kong dollars on the Hong Kong Stock Exchange. Red Chips, which are controlled by mainland Chinese entities, are available to non-residents of China.
P Chips	These are shares of non-state-owned Chinese companies incorporated outside of mainland China in domiciles of convenience such as the Cayman Islands, Bermuda, etc. and listed on the Hong Kong Stock Exchange.
U.S. Listed or Foreign Listed Chinese Companies	U.S. listed or foreign listed Chinese companies are defined as companies that primarily operate in mainland China but whose primary listings are on a U.S. or foreign exchange (i.e., all exchanges outside of mainland China).

The Index consists of companies that: (i) are constituents of the S&P Total China BMI Index; (ii) have a float-adjusted market capitalization of at least \$300 million (\$250 million for existing constituents) as of the semi-annual Index screening date ("float-adjusted" means that the share amounts reflect only shares available to investors); and (iii) have a six-month median daily dollar trading volume of at least \$1 million (\$0.8 million for existing constituents) as of the semi-annual Index screening date. It is anticipated that A-Shares will comprise the largest portion of the Index. The Fund may also invest up to 20% of its total assets (exclusive of collateral held from securities lending) in investments that are not included in the Index, including futures contracts, swaps and other derivative instruments that the sub-adviser believes will help the Fund achieve its investment objective.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

The Fund seeks to track the performance of the Index by investing directly in the A-Shares of China domestic equity securities listed and traded on the Shanghai Stock Exchange (“SSE”) or Shenzhen Stock Exchange (“SZSE”) via the Shanghai-Hong Kong or Shenzhen-Hong Kong Stock Connect programs (“Stock Connect”) and through the Renminbi Qualified Foreign Institutional Investor (“RQFII”) quota of ICBC Credit Suisse Asset Management (International) Company Limited (“ICBCCS”), the Fund’s sub-adviser, as well as by investing in the other share classes of equity securities, set forth above, issued by Chinese companies that are listed on exchanges outside of mainland China. Stock Connect is a securities trading and clearing linked program between either SSE or SZSE, and the Stock Exchange of Hong Kong Limited (“SEHK”), Hong Kong Securities Clearing Company Limited (“HKSCC”), and China Securities Depository and Clearing Corporation Limited (“ChinaClear”), with an aim to achieve mutual stock market access between the People’s Republic of China (“PRC”) and Hong Kong. Stock Connect comprises a Northbound Trading Link (for investment in China A-Shares) by which investors, through their Hong Kong brokers and a securities trading service company established by SEHK, may place orders to trade eligible shares listed on SSE or SZSE by routing orders to the applicable exchange. Through Stock Connect, overseas investors (including the Fund) may be allowed, subject to rules and regulations issued and/or amended by the applicable regulatory authority from time to time, to trade China A-Shares listed on the SSE or SZSE (together, the “Mainland Securities”) through the Northbound Trading Link. The Mainland Securities include all of the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, all of the constituent stocks of the SZSE Component Index and SZSE Small/Mid Cap Innovation Index that have a market capitalization of not less than 6 billion Renminbi (“RMB”), and all of the SSE- and SZSE-listed China A-Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on SEHK, except those SSE- and SZSE-listed shares which are (i) not traded in RMB and (ii) included in the “risk alert board”. The list of eligible securities may be changed subject to the review and approval by the relevant PRC regulators from time to time.

To the extent the Fund invests in China A-Shares other than through Stock Connect, under current regulations in the PRC, generally foreign investors can invest only through certain qualified foreign institutional investors, such as the Fund’s sub-adviser, that have obtained status as a Qualified Foreign Institutional Investor (“QFII”) or a RQFII from the China Securities Regulatory Commission (“CSRC”) and have been granted quota(s) by the PRC State Administration of Foreign Exchange (“SAFE”) to remit foreign freely convertible currencies (in the case of a QFII) and RMB (in the case of a RQFII) into the PRC for the purpose of investing in the PRC’s domestic securities markets.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Fund” and “Additional Non-Principal Risk Information.”

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

Market Risk. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums and discounts

greater than those of domestic ETFs.

WisdomTree Trust Prospectus 3

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material premium or discount to NAV (or not trade at all) and possibly face delisting: (i) APs exit the business, have a business disruption or otherwise become unable or unwilling to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business, have a business disruption or significantly reduce their business activities and no other entities step forward to perform their functions.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

Cash Redemption Risk. The Fund’s investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

Currency Exchange Rate Risk. The Fund invests a relatively large percentage of its assets in investments denominated in Renminbi and/or Hong Kong dollars or in securities that provide exposure to such currency, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of Renminbi and/or Hong Kong dollars will affect the value of the Fund’s investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund’s Prospectus, such as market risk and issuer-specific risk.

Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund’s use of futures contracts and/or swaps. With respect to swaps and futures contracts, these risks include but are not limited to: (1) the success of the adviser’s and sub-adviser’s ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of swaps and futures contracts; and (3) no guarantee that an active market will exist for swaps and futures contracts at any particular time.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or

regulatory conditions not associated with investments in U.S. securities and instruments or investments in
4 WisdomTree Trust Prospectus

more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Foreign Securities Risk. Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

Geographic Concentration in China. Because the Fund concentrates its investments in China, the Fund's performance is expected to be closely tied to social, political, and economic conditions within China and to be more volatile than the performance of more geographically diversified funds. Although the Chinese economy has grown rapidly during recent years and the Chinese government has implemented significant economic reforms to liberalize trade policy, promote foreign investment, and reduce government control of the economy, there can be no guarantee that economic growth or these reforms will continue. The Chinese economy may also experience slower growth if global or domestic demand for Chinese goods decreases significantly and/or key trading partners apply trade tariffs or implement other protectionist measures. The Chinese economy is also susceptible to rising rates of inflation, economic recession, market inefficiency, volatility, and pricing anomalies that may be connected to governmental influence, a lack of publicly-available information and/or political and social instability. The government of China maintains strict currency controls in order to achieve economic, trade and political objectives and regularly intervenes in the currency market. The Chinese government also plays a major role in the country's economic policies regarding foreign investments. Foreign investors are subject to the risk of loss from expropriation or nationalization of their investment assets and property, governmental restrictions on foreign investments and the repatriation of capital invested. The Chinese securities markets are subject to more frequent trading halts and low trading volume, resulting in substantially less liquidity and greater price volatility. These and other factors could have a negative impact on the Fund's performance and increase the volatility of an investment in the Fund.

Geographic Concentration in Hong Kong. Investing in companies organized or traded in Hong Kong involves special considerations not typically associated with investing in countries with more democratic governments or more established economies or securities markets. China is Hong Kong's largest trading partner, both in terms of exports and imports. Any changes in the Chinese economy, trade regulations or currency exchange rates may have an adverse impact on Hong Kong's economy.

Geopolitical Risk. China has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of such countries or regions) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Index and Data Risk. The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or

other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

WisdomTree Trust Prospectus 5

Information Technology Sector Risk. The Fund currently invests a significant portion of its assets in the information technology sector. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Mid-Capitalization Investing Risk. The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

RQFII Regime Risk. The Fund is not a RQFII but may obtain direct access to RQFII-permissible investments by using the RQFII quota of a RQFII, such as ICBCCS, the Fund's sub-adviser. Investors should note that the sub-adviser's RQFII status could be suspended or revoked if, among other things, the sub-adviser becomes insolvent or breaches the "Circular on Issues Related to the Pilot Scheme for Domestic Securities Investment through Renminbi Qualified Foreign Institutional Investors" (the "RQFII Measures"), which may have an adverse effect on the Fund's performance as the Fund may be required to dispose of certain of its securities holdings. In addition, restrictions may be imposed by the Chinese government on RQFIIs and/or quotas may become inadequate, which may have an adverse effect on the Fund's liquidity and performance.

Stock Connect Risk. The Fund's ability to invest in China A-Shares through Stock Connect, or on such other stock exchanges in China that participate in Stock Connect from time to time or in the future, is subject to trading limits, rules and regulations by the applicable regulatory authority. These restrictions and regulations may adversely affect the Fund's ability to achieve its investment objective. For example, daily quotas that limit the Fund's maximum daily net purchases through Stock Connect may restrict the Fund's ability to invest in A-Shares through Stock Connect on a timely basis. Investments through Stock Connect are also subject to trading, clearance and settlement procedures that are relatively untested in mainland China. Stock Connect only operates on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days.

Accordingly, the Fund may be subject to price fluctuations at times when Stock Connect is not open for trading. SEHK, SSE and SZSE also reserve the right to suspend trading through Stock Connect, if necessary, to ensure an orderly and fair market and manage risks prudently. Halts may adversely affect the Fund's access to the PRC market. In addition, investments through Stock Connect are subject to the laws and rules of the PRC. As such, they are not covered by Hong Kong's Investor Compensation Fund, which compensates investors of any nationality who suffer pecuniary losses as a result of the default of a licensed intermediary or authorized financial institution in relation to exchange-traded products in Hong Kong. Investing through Stock Connect is also premised on the proper functioning of operational systems maintained by each market participant and the connectivity of differing securities regimes and

legal systems in the PRC and Hong Kong. Investments through Stock Connect are also governed by departmental regulations that have legal effect in the PRC but have not been tested in the PRC courts. Moreover,

6 WisdomTree Trust Prospectus

the current regulations are subject to change. There can be no assurance that Stock Connect will not be abolished. The Fund, which may invest in the PRC markets through Stock Connect, may be adversely affected as a result of such changes.

Tax Risk in China. Uncertainties in PRC tax rules governing taxation of income and gains from investments in A-Shares could result in unexpected tax liabilities for the Fund. The Fund's investments in securities, including A-Shares, issued by PRC companies may cause the Fund to become subject to withholding and other taxes imposed by the PRC.

Fund Performance

The Fund is new and therefore does not have a performance history.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management serves as investment adviser to the Fund. ICBC Credit Suisse Asset Management (International) Company Limited ("ICBCCS") serves as sub-adviser to the Fund.

Portfolio Manager

Ada Yin, Senior Portfolio Manager of Index and Quantitative Investment of ICBCCS, has been a portfolio manager of the Fund since its inception.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, Inc., and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.
