SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

TITLE OF EACH CLASS: Class A Common Stock, Par Value \$0.01 per Share

NAME OF EACH EXCHANGE ON WHICH REGISTERED: New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes [] No [X]

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes [] No [X]

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [X] No []

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes [X] No []

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting

Edgar Filing: NELNET INC - Form 10-K

company” in Rule 12b-2 of the Exchange Act. Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant’s voting common stock held by non-affiliates of the registrant on June 30, 2011 (the last business day of the registrant’s most recently completed second fiscal quarter), based upon the closing sale price of the registrant’s Class A Common Stock on that date of \$22.06 per share, was \$600,914,599. For purposes of this calculation, the registrant’s directors, executive officers, and greater than 10 percent shareholders are deemed to be affiliates.

As of January 31, 2012, there were 35,638,834 and 11,495,377 shares of Class A Common Stock and Class B Common Stock, par value \$0.01 per share, outstanding, respectively (excluding 11,317,364 shares of Class A Common Stock held by wholly owned subsidiaries).

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant’s definitive Proxy Statement to be filed for its 2012 Annual Meeting of Shareholders, scheduled to be held May 24, 2012, are incorporated by reference into Part III of this Form 10-K.

This report contains forward-looking statements and information that are based on management's current expectations as of the date of this document. Statements that are not historical facts, including statements about the Company's plans and expectations for future financial condition, results of operations or economic performance, or that address management's plans and objectives for future operations, and statements that assume or are dependent upon future events, are forward-looking statements. The words "may," "should," "could," "would," "predict," "potential," "continue," "expect," "anticipate," "future," "intend," "plan," "believe," "estimate," "assume," "forecast," "will," and similar expressions, as well as in future tense, are intended to identify forward-looking statements.

The forward-looking statements are based on assumptions and analyses made by management in light of management's experience and its perception of historical trends, current conditions, expected future developments, and other factors that management believes are appropriate under the circumstances. These statements are subject to known and unknown risks, uncertainties, assumptions, and other factors that may cause the actual results and performance to be materially different from any future results or performance expressed or implied by such forward-looking statements. These factors include, among others, the risks and uncertainties set forth in "Risk Factors" and elsewhere in this report, and include such risks and uncertainties as:

risks related to the Company's student loan portfolio, such as interest rate basis and repricing risk resulting from the fact that the interest rate characteristics of the Company's student loan assets do not match the interest rate characteristics of the funding for those assets, the risk of loss of floor income on certain student loans originated under the Federal Family Education Loan Program (the "FFEL Program" or "FFELP") of the U.S. Department of Education (the "Department"), risks related to the use of derivatives to manage exposure to interest rate fluctuations, and potential losses from loan defaults, changes in prepayment rates, guaranty rates, loan floor rates, and credit spreads;

risks related to the Company's funding requirements, including the Company's ability to maintain credit facilities or obtain new facilities, the ability of lenders under the Company's credit facilities to fulfill their lending commitments under these facilities, the Company's ability to satisfy debt obligations secured by student loan assets and related collateral, and changes in the general interest rate environment and in the securitization markets for education loans, which may increase the costs or limit the availability of financings necessary to purchase, refinance, or continue to carry education loans;

risks from changes in the student loan and educational credit and services marketplace resulting from the implementation of, or changes in, applicable laws, regulations, and government programs, including the discontinuance of private sector student loan originations under the FFEL Program effective July 1, 2010, and new regulations effective July 1, 2011 that could affect enrollment at for-profit schools, the uncertain nature of the potential impact of the Department's new loan consolidation initiative or similar consolidation programs, and the Company's ability to maintain or increase volumes under its loan servicing contract with the Department to service federally-owned student loans and to comply with servicing agreements with third-party customers for the service of loans under the Federal Direct Loan and FFEL Programs;

risks from changes in the demand or preferences for educational financing and related services by educational institutions, students, and their families;

uncertainties inherent in forecasting future cash flows from student loan assets and related asset-backed securitizations;

risks associated with litigation, complex government regulations, changes in general economic conditions (which have recently led to higher rates of student loan defaults), changes in credit market conditions, and related party transactions; and

uncertainties inherent in the estimates and assumptions about future events that management is required to make in the preparation of the Company's consolidated financial statements.

All forward-looking statements contained in this report are qualified by these cautionary statements and are made only as of the date of this document. Although the Company may from time to time voluntarily update or revise its prior forward-looking statements to reflect actual results or changes in the Company's expectations, the Company disclaims any commitment to do so except as required by securities laws.

PART I.
ITEM 1. BUSINESS

Overview

Nelnet, Inc. (the “Company”) is an education services company focused primarily on providing fee-based processing services and quality education-related products and services in four core areas: loan financing, loan servicing, payment processing, and enrollment services (education planning). These products and services help students and families plan, prepare, and pay for their education and make the administrative and financial processes more efficient for schools and financial organizations. In addition, the Company earns interest income on a portfolio of federally insured student loans. Substantially all revenue from external customers is earned, and all long-lived assets are located, in the United States.

The Company was formed as a Nebraska corporation in 1977 to service federal student loans for two local banks. The Company built on this initial foundation as a servicer to become a leading originator, holder, and servicer of federal student loans, principally consisting of loans originated under the FFEL Program (a detailed description of the FFEL Program is included in Appendix A to this report).

On March 30, 2010, President Obama signed into law the Health Care and Education Reconciliation Act of 2010 (the “Reconciliation Act of 2010”). Effective July 1, 2010, this law prohibits new loan originations under the FFEL Program and requires that all new federal loan originations be made through the Federal Direct Loan Program. The new law does not alter or affect the terms and conditions of existing FFELP loans.

As a result of the Reconciliation Act of 2010, the Company no longer originates new FFELP loans. In addition, interest income on the Company's existing FFELP loan portfolio, as well as fee-based revenue from guarantee and third-party FFELP servicing and education loan software licensing and consulting fees related to the FFEL Program, will decline over time as the Company's and the Company's third-party lender clients' FFELP loan portfolios are paid down.

To reduce its reliance on interest income on student loans, the Company has significantly diversified and increased its fee-based education-related services.

Customers

The Company serves several different groups of customers, including:

- Students and families
 - Colleges and universities, specifically financial aid, business, and admissions offices
 - Private, faith-based, and other K-12 schools
 - Lenders, servicers, and state agencies in education finance
 - Government entities

An increase in the size of the education market generally increases the demand for the Company's products and services. As shown in the chart below, total student enrollment is projected to continue to grow for many years. An increasing number of students are pursuing a higher education, often with the help of financial aid by the federal government, for whom the Company services loans. In addition, as the education market continues to grow, often with budget and funding concerns, schools at all levels have an increasing need to become more efficient, offer consistent and quality services, and recruit and retain students.

3

Operating Segments

The Company operates as four distinct operating segments with several different brands. The Company's operating segments offer a broad range of services designed to simplify education planning and financing for students and families and the administrative and financial processes for schools and financial institutions. The Company's operating segments are:

Student Loan and Guaranty Servicing

Referred to as Nelnet Diversified Solutions (“NDS”)

Focuses on student loan servicing, student loan servicing-related technology solutions, and outsourcing services for guaranty agencies

Includes the brands Nelnet Loan Servicing, Firstmark Services, Nelnet Guarantor Solutions, and 5280 Solutions

Tuition Payment Processing and Campus Commerce

Commonly known as Nelnet Business Solutions (“NBS”)

Focuses on tuition payment plans and online payment processing

Includes the brand FACTS Management

Enrollment Services

Commonly called Nelnet Enrollment Solutions (“NES”)

Focuses on education planning and enrollment-related services, including interactive marketing

Includes the brands CUnet, Peterson's, EssayEdge, Sparkroom, and Student Marketing Group

Asset Generation and Management

Includes the acquisition and management of the Company's student loan assets

Segment Operating Results

The Company's operating segments are defined by the products and services they offer or the types of customers they serve, and they reflect the manner in which financial information is currently evaluated by management. Management evaluates the Company's generally accepted accounting principles (“GAAP”) based financial information as well as operating results on a non-GAAP performance measure referred to as “base net income.” Management believes “base net income” provides additional insight into the financial performance of the core operations. For further information, see Part II, Item 7, “Management's Discussion and Analysis of Financial Condition and Results of Operations.” The Company includes separate financial information about its operating segments, including revenues, net income or loss, and total assets for each of the Company's segments, for the last three fiscal years in note 14 of the notes to the consolidated financial statements included in this report.

Fee-Based Operating Segments

Student Loan and Guaranty Servicing

The five primary service offerings of this operating segment and each offering's percentage of total Student Loan and Guaranty Servicing revenue during 2011 are as follows:

Servicing FFELP loans (39%)

Servicing federally-owned student loans for the Department of Education (21%)

Originating and servicing non-federally insured student loans (4%)

• Servicing and outsourcing services for guaranty agencies (26%)

• Providing student loan servicing software and other information technology products and services (10%)

The following chart summarizes the Company's loan servicing volume (dollars in millions):

Company owned	\$23,139	\$24,378	\$26,351	\$26,183	\$23,727	\$23,249	\$22,757	\$22,503	\$22,650
% of Total	61.6%	56.7%	55.3%	47.0%	38.6%	34.2%	33.0%	30.2%	29.8%
Number of borrowers:									
Government servicing:	441,913	1,055,896	1,530,308	2,510,630	2,804,502	2,814,142	2,666,183	2,966,706	3,036,534
FFELP servicing:	2,311,558	2,327,016	2,329,150	2,227,288	1,912,748	1,870,538	1,837,272	1,812,582	1,799,484
Total:	2,753,471	3,382,912	3,859,458	4,737,918	4,717,250	4,684,680	4,503,455	4,779,288	4,836,018

As discussed previously under "Overview," due to the Reconciliation Act of 2010, FFELP servicing revenue generated from guarantee and third-party FFELP servicing and education loan software licensing and consulting fees related to the FFEL Program will decline over time as the Company's and the Company's third-party lender clients' FFELP loan portfolios are paid down. However, these decreases will be partially offset by the increase in revenue earned by the Company for servicing loans for the Department. In addition, the Company currently offers a hosted servicing software solution that can be used by third-parties to service various types of student loans including Federal Direct Loan Program and FFEL Program loans.

The following provides an overview of each service offering included in this operating segment.

Servicing FFEL Program loans

The Student Loan and Guaranty Servicing operating segment provides for the servicing of the Company's student loan portfolio and the portfolios of third parties. The loan servicing activities include loan conversion activities, application processing, borrower updates, payment processing, due diligence procedures, funds management reconciliations, and claim processing. These activities are performed internally for the Company's portfolio in addition to generating external fee revenue when performed for third-party clients.

The Company's student loan servicing division uses proprietary systems to manage the servicing process. These systems provide for automated compliance with most of the federal student loan regulations adopted under Title IV of the Higher Education Act of 1965, as amended (the "Higher Education Act").

The Company serviced FFELP loans on behalf of approximately 60 third-party servicing customers as of December 31, 2011. The Company's FFELP servicing customers include national and regional banks, credit unions, and various state and non-profit secondary markets. The majority of the Company's external FFELP loan servicing activities are performed under "life of loan" contracts. Life of loan contract servicing essentially provides that as long as the loan exists, the Company shall be the sole servicer of that loan; however, the agreement may contain "deconversion" provisions where, for a fee, the lender may move the loan to

another servicer. In recent years, the Company has experienced a reduction of third-party servicing customers and servicing volume as customers shift volume to another service provider or exit the FFEL Program completely.

Servicing federally-owned student loans for the Department of Education

In June 2009, the Company was one of four private sector companies awarded a student loan servicing contract by the Department of Education to provide additional servicing capacity for loans owned by the Department. These loans include Federal Direct Loan Program loans originated directly by the Department and FFEL Program loans purchased by the Department. The Company earns a monthly fee from the Department for each unique borrower who has loans owned by the Department and serviced by the Company. The contract spans five years (through June 2014), with one five-year renewal at the option of the Department. In September 2009, the Department began assigning purchased FFELP loans to the four servicers. Beginning with the second year of servicing in June 2010, the Department began allocating new loan volume among the four servicers based on five performance metrics.

Three metrics measure the satisfaction among separate customer groups, including borrowers, financial aid personnel at postsecondary schools participating in the federal student loan program, and Federal Student Aid and other federal agency personnel or contractors who work with the servicers.

Two performance metrics measure the success of default prevention efforts as reflected by the percentage of borrowers and percentage of dollars in each servicer's portfolio that go into default.

Based on the second year of survey results, the Company is currently being allocated 16% of the new loan volume originated by the Department for the period from August 15, 2011 through August 14, 2012 (the third year of the servicing contract). The Department projected an estimated 4.1 million new borrowers in total who will be allocated to the four servicers during the third year of this contract.

Management believes it is important to provide exceptional customer service at a reasonable price in order to increase the Company's servicing volume; therefore, the Company has focused and will continue to focus heavily on customer service-related projects, default management activities, efficiencies, and technology development to improve its allocation in future years of the contract.

Originating and servicing non-federally insured student loans

The Student Loan and Guaranty Servicing operating segment provides origination and servicing activities for non-federally insured loans. Although similar in terms of activities and functions (i.e., disbursement processing, application processing, payment processing, statement distribution, and reporting), non-federally insured loan servicing activities are not required to comply with provisions of the Higher Education Act and may be more customized to individual client requirements. The Company serviced non-federally insured loans on behalf of approximately 20 third-party servicing customers as of December 31, 2011.

Servicing and outsourcing services for guaranty agencies

The Student Loan and Guaranty Servicing operating segment provides servicing support for guaranty agencies, which are the organizations that serve as the intermediary between the U.S. federal government and FFELP lenders, and are responsible for paying the claims made on defaulted loans. The Department has designated 32 guarantors that have been formed as either state agencies or non-profit corporations that provide FFELP guaranty services in one or more states. Approximately half of these guarantors contract externally for operational or technology services. The services provided by the Company include providing software and data center services, borrower and loan updates, default aversion tracking services, claim processing services, and post-default collection services.

The Company's three guaranty servicing customers include Tennessee Student Assistance Corporation, College Assist (which is the Colorado state-designated guarantor of FFELP student loans), and the National Student Loan Program.

Providing student loan servicing software and other information technology products and services

The Student Loan and Guaranty Servicing operating segment provides student loan servicing software, which is used internally by the Company and licensed to third-party student loan holders and servicers. This software system has been adapted so that it can be offered as a hosted servicing software solution that can be used by third-parties to service various types of student loans including Federal Direct Loan Program and FFEL Program loans. The Company earns a monthly fee from its remote hosting customers for each unique borrower on the Company's platform. As of December 31, 2011, 9.6 million borrowers were hosted on the Company's hosted servicing software solution platforms. In addition, this operating segment provides information

technology products and services, with core areas of business in educational loan software solutions, technical consulting services, and enterprise content management solutions.

The Company's clients within the education loan marketplace include large and small financial institutions, secondary markets, loan originators, and loan servicers. A significant portion of the software and technology services business was dependent on the existence of and participants in the FFEL Program. The elimination of the FFEL Program reduced education loan software licensing opportunities and related consulting fees received from lenders using the Company's software products and services. However, the Company has leveraged its efficient, scalable, and compliant software to be used in servicing FFELP and Federal Direct Loan Program loans to provide software hosting services to third-parties, including the non-profit organizations that may service Federal Direct Loan Program loans for the Department as allowed per the provisions of the Reconciliation Act of 2010. Management believes the increase in hosted software servicing revenue will exceed the decrease of software services revenue earned from other FFELP products and services.

Competition

The Company's scalable servicing platform allows it to provide compliant, efficient, and reliable service at a low cost, giving the Company a competitive advantage over others in the industry for all of this segment's services, which are discussed below.

Loan servicing

The principal competitor for existing and prospective FFELP and non-federally insured student loan servicing business is SLM Corporation, the parent company of Sallie Mae. Sallie Mae is the largest for-profit provider of servicing functions, as well as one of the largest service providers of non-federally insured student loans.

With the elimination of the FFEL Program, four servicers, including the Company, were named by the Department as servicers of federally owned loans. The three competitors for gaining future servicing volume from the Department are Great Lakes Educational Loan Services Inc. ("Great Lakes"), Pennsylvania Higher Education Assistance Agency ("PHEAA"), and Sallie Mae.

In addition, non-profit organizations may also service loans for up to 100,000 borrower accounts on behalf of the Department beginning the first quarter of 2012. The ability of the non-profit organizations to retain or increase their borrower accounts will depend on their ability to maintain compliance and meet performance requirements under their agreement with the Department. The non-profit organizations will have their performance measured by the Department using the same performance metrics as described previously for the four private sector companies awarded a servicing contract in June 2009. If a non-profit organization servicing score is equal to or higher than that of the lowest score for each of the four incumbent Federal Direct Loan Program servicers for each of the five performance metrics, the non-profit organization will be allowed to compete with the current Federal Direct Loan Program servicers for a percentage of new borrowers for the next allocation year.

Guaranty servicing

With the elimination of the FFEL Program, these services will continue for agencies' existing portfolios; however, no new portfolios will be created. The Company currently anticipates to continue to serve its existing guaranty customers as their portfolios pay down but does not expect to increase the number of its guaranty servicing customers.

Software and technology

The Company is one of the leaders in the education loan software processing industry. Many lenders in the FFEL Program utilize the Company's software either directly or indirectly. Management believes the Company's competitors in this segment are much smaller than the Company and do not have the depth of knowledge or products offered by the Company. The Company's primary method of competition in this segment is based on its depth of knowledge, experience, and product offerings in the education loan industry. In addition, the Company believes the investments it has made to scale its systems and to create a secure infrastructure to support the Department of Education volume and requirements increases its presence and attraction as a long-term partner in the remote servicing market.

Tuition Payment Processing and Campus Commerce

The Company's Tuition Payment Processing and Campus Commerce operating segment provides products and services to help students and families manage the payment of education costs at all levels (K-12 and higher education). It also provides innovative education-focused technologies, services, and support solutions to help schools with the everyday challenges of collecting and processing commerce data.

K-12

The K-12 market consists of nearly 25,000 private and faith-based educational institutions nationally of which approximately 12,000 institutions have student enrollments greater than 200. In the K-12 market, the Company offers tuition management services, as well as assistance with financial needs assessment and donor management.

The Company is the market leader, having actively managed tuition payment plans in place at approximately 4,800 K-12 educational institutions. Tuition management services include payment plan administration, incidental billing, accounts receivable management, and record keeping. K-12 educational institutions contract with the Company to administer deferred payment plans that allow the responsible party to make monthly payments over 6 to 12 months. The Company collects a fee from either the institution or the payer as an administration fee.

The Company's financial needs assessment service helps K-12 schools evaluate and determine the amount of grants and financial aid to disburse to the families it serves. The Company's donor services allow schools to assess and deliver strategic fundraising solutions using the latest technology.

Higher Education

The higher education market consists of nearly 4,500 colleges and universities. The Company offers two principal products to the higher education market: actively managed tuition payment plans, and campus commerce technologies and payment processing.

The Company has actively managed tuition payment plans in place at approximately 650 colleges and universities. Higher education institutions contract with the Company to administer payment plans that allow the student and family to make monthly payments on either a semester or annual basis. The Company collects a fee from the student or family as an administration fee.

The Company's suite of campus commerce solutions provides services that allow for families' electronic billing and payment of campus charges. Campus commerce includes cashiering for face-to-face transactions, campus-wide commerce management, and refunds management, among others. The Company earns revenue for e-billing, hosting/maintenance, credit card convenience fees, and e-payment transaction fees, which are powered by the Company's QuikPAY system, a secure payment processing engine.

QuikPAY, a campus commerce product, is sold as a subscription service to colleges and universities. QuikPAY processes payments through the appropriate channels in the banking or credit card networks to make deposits into the client's bank account. It can be further deployed to other departments around campus as requested (e.g., application fees, alumni giving, parking, events, etc.). Approximately 180 colleges and universities, representing over 370 campuses, use the QuikPAY system.

Competition

The Company is the largest provider of tuition management services to the private and faith-based K-12 market in the United States. Competitors include financial institutions, tuition management providers, financial needs assessment providers, accounting firms, and a myriad of software companies.

In the higher education market, the Company targets business offices at colleges and universities. In this market, the primary competition is limited to three campus commerce and tuition payment providers, as well as solutions developed in-house by colleges and universities.

The Company's principal competitive advantages are (i) the customer service it provides to institutions, (ii) the information management tools provided with the Company's service, and (iii) the Company's ability to interface with the institution clients. The Company believes its clients select products primarily on technological superiority and feature functionality, but price and service also impact the selection process.

Enrollment Services

The Enrollment Services operating segment offers products and services that are focused on helping colleges recruit and retain students (interactive and list marketing services) and helping students plan and prepare for life after high school and/or military service (publishing services and resource centers). Interactive marketing products and services include agency of record services, qualified inquiry generation, pay per click services, inquiry management software, and other marketing management, along with call center solutions. The inquiry management software allows schools to manage their inquiry flow and perform analytics on the inquiries received by the school. The majority of interactive marketing revenue is derived from fees that are earned through the

delivery of qualified inquiries or clicks to colleges and universities. List marketing services include providing lists to help higher education institutions and businesses reach the middle school, high school, college bound high school, college, and young adult market place. Publishing services include test preparation study guides, school directories and databases, and career exploration guides. Resource centers include online courses, scholarship search and selection data, career planning, and on-line information about colleges and universities.

The Company delivers products and services in this segment through four primary customer channels: higher education, corporate and government, K-12, and direct-to-consumer. Many of the Company's products in this segment are electronically transmitted or distributed online or in other digital media; however, products such as test preparation study guides, school directories, and career exploration guides are also distributed as printed materials.

Competition

In this segment, the primary areas in which the Company competes are: interactive marketing, test preparation study guides, and online courses.

Several large competitors exist in the areas of inquiry generation and test preparation, but the Company does not believe any one competitor has a dominant position in all of the product and service areas offered by the Company. The Company has seen increased competition in the area of call center operations, including outsourced inquiry validation, as other companies have recognized the potential in this market.

The Company competes through various methods, including price, brand awareness, depth of product and service selection, and customer service. The Company is a "one stop shop" for the education seeking family looking for career assessment, test preparation, and college information. The Company also offers its institutional clients a range of services unrivaled in the education industry.

Regulations

Certain provisions in new regulations issued by the Department under the Higher Education Act that became effective July 1, 2011 could have an impact on the Company's Enrollment Services operating segment, in connection with services it provides to for-profit schools. The Higher Education Act provides that to be eligible to participate in Federal student financial aid programs (Title IV funds), educational institutions, including for-profit schools, must enter into a program participation agreement with the Department. The agreement includes a number of conditions with which an institution must comply to be granted initial and continuing eligibility to participate. Among those conditions is a prohibition on institutions providing any commission, bonus, or other incentive payment to any individual or entity engaged in recruiting or admission activities, based on their success in securing enrollments. Previous regulations included a number of activities, or "safe harbors," that did not constitute prohibited incentive compensation. One of those safe harbors permitted an institution to provide incentive compensation for internet-based recruitment and admission activities. The Department's newly issued regulations repeal all existing safe harbors regarding incentive compensation in recruiting, though exempting "click"-based payments to third parties who provide internet generated student contact information. The new regulations also create liability for misrepresentation in advertisements, offers, and communications presented to prospective students, with associated penalties for noncompliance with these standards.

In addition, these new regulations impose strict liability on educational institutions for misrepresentations made by entities, like us, who contract with the institutions to provide marketing services. As a result, our school customers have demanded and, in limited circumstances, we have acquiesced to be subject to increased limitations of liability in our contracts and, in some cases, to indemnify our customers for actions by our third-party publishers. The Company has developed proprietary software systems and processes to detect and remediate potential misrepresentation

violations.

The Department also recently issued new regulations under Title IV of the Higher Education Act providing that for-profit schools are eligible to participate in Title IV student financial aid programs only with respect to educational programs that lead to “gainful employment” in a recognized occupation. These regulations, most of which became effective July 1, 2011, require for-profit schools to provide prospective students with each eligible program's recognized occupations, cost, completion rate, job placement rate, and median loan debt of those that have completed the program, and provide that Title IV funds may not be available to students enrolled in educational programs offered by for-profit schools if those programs do not meet certain debt-to-income ratios and loan repayment metrics to be measured beginning July 1, 2012.

Significantly all interactive marketing revenue (which makes up approximately 80 percent of total revenue included in this segment) is generated from for-profit schools. The regulations discussed above may subject the Company to greater risk of liability and may increase the Company's costs of compliance with these regulations or limit the Company's ability to serve for-profit schools.

9

In addition, these regulations could negatively impact enrollment at for-profit schools, which could adversely affect interactive marketing revenue.

Asset Generation and Management Operating Segment

The Asset Generation and Management operating segment includes the acquisition, management, and ownership of the Company's student loan assets, which was historically the Company's largest product and service offering. The Company generates a substantial portion of its earnings from the spread, referred to as the Company's student loan spread, between the yield it receives on its student loan portfolio and the associated costs to finance such portfolio. See Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Asset Generation and Management Operating Segment - Student Loan Spread Analysis," for further details related to the student loan spread. The student loan assets are held in a series of education lending subsidiaries designed specifically for this purpose. In addition to the student loan spread earned on its portfolio, all costs and activity associated with managing the portfolio, such as servicing of the assets and debt maintenance, are included in this segment.

Student loans consist of federally insured student loans and non-federally insured student loans. Federally insured student loans were made under the FFEL Program. The Company's portfolio of federally insured student loans is subject to minimal credit risk as these loans are guaranteed by the Department at levels ranging from 97 percent to 100 percent. Substantially all of the Company's loan portfolio (99 percent as of December 31, 2011) is federally insured. The Company's portfolio of non-federally insured loans is subject to credit risk similar to other consumer loan assets.

The Higher Education Act regulates every aspect of the federally insured student loan program, including certain communications with borrowers, loan originations, and default aversion. Failure to service a student loan properly could jeopardize the guarantee on federal student loans. In the case of death, disability, or bankruptcy of the borrower, the guarantee covers 100 percent of the loan's principal and accrued interest.

FFELP loans are guaranteed by state agencies or non-profit companies designated as guarantors, with the Department providing reinsurance to the guarantor. Guarantors are responsible for performing certain functions necessary to ensure the program's soundness and accountability. Generally, the guarantor is responsible for ensuring that loans are serviced in compliance with the requirements of the Higher Education Act. When a borrower defaults on a FFELP loan, the Company submits a claim to the guarantor who provides reimbursements of principal and accrued interest subject to the applicable risk share percentage.

Origination and Acquisition

The Reconciliation Act of 2010 resulted in the Company discontinuing originations of new FFELP loans effective July 1, 2010. However, the Company believes there will be opportunities to continue to purchase FFELP loan portfolios from current FFELP participants looking to adjust their FFELP businesses. For example, during 2011 and 2010, the Company purchased from various parties FFELP student loan assets (including the residual interest of a FFELP securitization) of \$2.8 billion and \$3.4 billion, respectively.

Future cash flow from portfolio

The majority of the Company's portfolio of student loans is funded in asset-backed securitizations that are structured to substantially match the maturity of the funded assets, thereby minimizing liquidity risk. In addition, due to (i) the difference between the yield the Company receives on the loans and cost of financing within these transactions, and (ii) the servicing and administration fees the Company earns from these transactions, the Company has created a portfolio that will generate earnings and significant cash flow over the life of these transactions.

Based on cash flow models developed to reflect management's current estimate of, among other factors, prepayments, defaults, deferment, forbearance, and interest rates, as of December 31, 2011, the Company currently expects future undiscounted cash flows from its portfolio to be approximately \$1.81 billion. The forecasted cash flow includes all loans currently funded in asset-backed securitizations. As of December 31, 2011, the Company had \$21.1 billion of loans included in asset-backed securitizations, which represented 87 percent of its total FFELP student loan portfolio. The forecasted cash flow does not include cash flows that the Company expects to receive related to loans funded through the Department of Education's Conduit Program and other warehouse facilities or loans acquired subsequent to December 31, 2011. See Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources," for further details related to the estimated future cash flow from the Company's portfolio.

Floor Income

Loans originated prior to April 1, 2006 generally earn interest at the higher of a floating rate based on the Special Allowance Payment (or "SAP") formula set by the Department and the borrower rate, which is fixed over a period of time. The SAP formula is based on an applicable index plus a fixed spread that is dependent upon when the loan was originated, the loan's repayment status, and funding sources for the loan. The Company generally finances its student loan portfolio with variable rate debt. In low and/or declining interest rate environments, when the fixed borrower rate is higher than the rate produced by the SAP formula, the Company's student loans earn at a fixed rate while the interest on the variable rate debt typically continues to decline. In these interest rate environments, the Company may earn additional spread income that it refers to as floor income.

Depending on the type of loan and when it was originated, the borrower rate is either fixed to term or is reset to an annual rate each July 1. As a result, for loans where the borrower rate is fixed to term, the Company may earn floor income for an extended period of time, which the Company refers to as fixed rate floor income, and for those loans where the borrower rate is reset annually on July 1, the Company may earn floor income to the next reset date, which the Company refers to as variable rate floor income. In accordance with legislation enacted in 2006, lenders are required to rebate fixed rate floor income and variable rate floor income to the Department for all new FFELP loans first originated on or after April 1, 2006.

Absent the use of derivative instruments, a rise in interest rates may reduce the amount of floor income received and this may have an impact on earnings due to interest margin compression caused by increasing financing costs, until such time as the federally insured loans earn interest at a variable rate in accordance with their special allowance payment formulas. In higher interest rate environments, where the interest rate rises above the borrower rate and fixed rate loans effectively become variable rate loans, the impact of the rate fluctuations is reduced. The Company uses derivative instruments as part of its overall risk management strategy, including interest rate swaps to hedge a portion of its floor income.

A summary of fixed rate floor income earned by the Company follows (dollars in thousands).

	Year ended December 31,	
	2011	2010
Fixed rate floor income, gross	\$164,700	151,861
Derivative settlements (a)	(20,246) (19,618
Fixed rate floor income, net	\$144,454	132,243

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income

The high levels of fixed rate floor income earned during 2011 and 2010 are due to historically low interest rates. If interest rates remain low, the Company anticipates continuing to earn significant fixed rate floor income in future periods. See Part II, Item 7A, "Quantitative and Qualitative Disclosures about Market Risk - Interest Rate Risk," which provides additional detail on the Company's portfolio earning fixed rate floor income and the derivatives used by the Company to hedge these loans.

Interest Rate Risk Management

Because the Company generates a significant portion of its earnings from its student loan spread, the interest rate sensitivity of the Company's balance sheet is very important to its operations. The current and future interest rate environment can and will affect the Company's interest income and net income. The effects to the Company's results of operations as a result of the changing interest rate environments are further outlined in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Asset Generation and

Management Operating Segment - Student Loan Spread Analysis" and Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Risk."

Competition

Prior to July 1, 2010, two loan delivery programs provided federally guaranteed student loans: the FFEL Program and the Federal Direct Loan Program. FFEL Program loans were provided by private sector institutions and are ultimately guaranteed by the Department, except for the risk sharing percentage, as discussed previously. Federal Direct Loan Program loans are provided to borrowers directly by the Department on terms similar to student loans historically provided under the FFEL Program.

As discussed previously, as a result of the Reconciliation Act of 2010, effective July 1, 2010, this law prohibits new loan originations under the FFEL Program and requires that all new federal loan originations be made through the Federal Direct Loan Program. The new law does not alter or affect the terms and conditions of existing FFELP loans.

Intellectual Property

The Company owns numerous trademarks and service marks (“Marks”) to identify its various products and services. As of December 31, 2011, the Company had seven pending and 86 registered Marks. The Company actively asserts its rights to these Marks when it believes infringement may exist. The Company believes its Marks have developed and continue to develop strong brand-name recognition in the industry and the consumer marketplace. Each of the Marks has, upon registration, an indefinite duration so long as the Company continues to use the Mark on or in connection with such goods or services as the Mark identifies. In order to protect the indefinite duration, the Company makes filings to continue registration of the Marks. The Company owns one patent application that has been published, but has not yet been issued, and has also actively asserted its rights thereunder in situations where the Company believes its claims may be infringed upon. The Company owns many copyright protected works, including its various computer system codes and displays, Web sites, books and other publications, and marketing collateral. The Company also has trade secret rights to many of its processes and strategies and its software product designs. The Company's software products are protected by both registered and common law copyrights, as well as strict confidentiality and ownership provisions placed in license agreements, which restrict the ability to copy, distribute, or improperly disclose the software products. The Company also has adopted internal procedures designed to protect the Company's intellectual property.

The Company seeks federal and/or state protection of intellectual property when deemed appropriate, including patent, trademark/service mark, and copyright. The decision whether to seek such protection may depend on the perceived value of the intellectual property, the likelihood of securing protection, the cost of securing and maintaining that protection, and the potential for infringement. The Company's employees are trained in the fundamentals of intellectual property, intellectual property protection, and infringement issues. The Company's employees are also required to sign agreements requiring, among other things, confidentiality of trade secrets, assignment of inventions, and non-solicitation of other employees post-termination. Consultants, suppliers, and other business partners are also required to sign nondisclosure agreements to protect the Company's proprietary rights.

Employees

As of December 31, 2011, the Company had approximately 2,400 employees. None of the Company's employees are covered by collective bargaining agreements. The Company is not involved in any material disputes with any of its employees, and the Company believes that relations with its employees are good.

Available Information

Copies of the Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to such reports are available on the Company's Web site free of charge as soon as reasonably practicable after such reports are filed with or furnished to the United States Securities and Exchange Commission (the “SEC”). Investors and other interested parties can access these reports and the Company's proxy statements at <http://www.nelnet.com>. The Company routinely posts important information for investors on its Web site. The SEC maintains an Internet site (<http://www.sec.gov>) that contains periodic and other reports such as annual, quarterly, and current reports on Forms 10-K, 10-Q, and 8-K, respectively, as well as proxy and information statements regarding the Company and other companies that file electronically with the SEC.

The Company has adopted a Code of Conduct that applies to directors, officers, and employees, including the Company's principal executive officer and its principal financial and accounting officer, and has posted such Code of Conduct on its Web site. Amendments to and waivers granted with respect to the Company's Code of Conduct relating to its executive officers and directors which are required to be disclosed pursuant to applicable securities laws and stock exchange rules and regulations will also be posted on its Web site. The Company's Corporate Governance Guidelines, Audit Committee Charter, Compensation Committee Charter, Nominating and Corporate Governance Committee Charter, and the Risk and Finance Committee Charter are also posted on its Web site.

Information on the Company's Web site is not incorporated by reference into this report and should not be considered part of this report.

ITEM 1A. RISK FACTORS

We operate our business in a highly competitive and regulated environment. We are subject to risks including, but not limited to, market, liquidity, credit, regulatory, technology, operational, security, and other business risks such as reputation damage related to negative publicity and dependencies on key personnel, customers, vendors, and systems. This section highlights specific risks that could affect us. Although this section attempts to highlight key risk factors, other risks may emerge at any time and we cannot predict all risks or estimate the extent to which they may affect our financial performance. These risk factors should be read in conjunction with the other information included in this report.

Student Loan Portfolio

Our student loan portfolio is subject to certain risks related to interest rates, our ability to manage the risks related to interest rates, prepayment, and credit risk, each of which could reduce the expected cash flows and earnings on our portfolio.

Interest rate risk - basis and repricing risk

We are exposed to interest rate risk in the form of basis risk and repricing risk because the interest rate characteristics of our student loan assets do not match the interest rate characteristics of the funding for those assets.

We fund the majority of our student loan assets with one-month or three-month LIBOR indexed floating rate securities. In addition, the interest rates on some of our debt are set via a “dutch auction” or through a periodic remarketing. Meanwhile, the interest earned on our student loan assets is indexed to commercial paper and treasury bill rates. The different interest rate characteristics of our loan assets and our liabilities funding these assets results in basis risk. We also face repricing risk due to the timing of the interest rate resets on our liabilities, which may occur as infrequently as once a quarter, in contrast to the timing of the interest rate resets on our assets, which generally occur daily. In a declining interest rate environment, this may cause our student loan spread to compress, while in a rising interest rate environment, it may cause the spread to increase.

As of December 31, 2011, we had \$23.4 billion and \$0.9 billion of FFELP loans indexed to the three-month financial commercial paper rate and the three-month treasury bill rate, respectively, both of which reset daily, and \$19.6 billion of debt indexed to the three-month LIBOR, which resets quarterly, and \$0.7 billion of debt indexed to the one-month LIBOR, which resets monthly. While these indices are all short term in nature with rate movements that are highly correlated over a longer period of time, there have been points in recent history related to the U.S. and European debt crisis that have caused volatility to be high and correlation to be reduced. There can be no assurance that the indices' historically high level of correlation will not be disrupted in the future due to capital market dislocations or other factors not within our control. In such circumstances, our earnings could be adversely affected, possibly to a material extent. See Part II, Item 7A, “Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Risk.”

On December 23, 2011, the President signed the Consolidated Appropriations Act of 2012 into law. This Act includes changes to the FFELP student lender payment index from the commercial paper rate to the one-month LIBOR rate for the Special Allowance Payment calculation on outstanding FFELP loans held by student loan lenders. As of December 31, 2011, we had \$23.4 billion of loans in which we intend to make the election to change the SAP calculation to the one-month LIBOR rate. This change mitigates the Company's exposure to basis risk and will allow the Company to better match borrowing and lending rates. The Company currently expects the new formula to be developed and available for use in the second quarter of 2012.

Interest rate risk - loss of floor income

We are exposed to interest rate risk because of the interest rate characteristics of certain of our student loan assets and the interest rate characteristics of the related funding of those assets.

FFELP loans originated prior to April 1, 2006 generally earn interest at the higher of a floating rate based on the Special Allowance Payment formula set by the Department and the borrower rate, which is fixed over a period of time. We generally finance our student loan portfolio with variable rate debt. In low and/or declining interest rate environments, when the fixed borrower rate is higher than the rate produced by the SAP formula, our student loans earn at a fixed rate while the interest on the variable rate debt typically continues to decline. In these interest rate environments, we may earn additional spread income that we refer to as floor income.

Depending on the type of loan and when it was originated, the borrower rate is either fixed to term or is reset to an annual rate each July 1. As a result, for loans where the borrower rate is fixed to term, we may earn floor income for an extended period of

time, which we refer to as fixed rate floor income, and for those loans where the borrower rate is reset annually on July 1, we may earn floor income to the next reset date, which we refer to as variable rate floor income. In accordance with legislation enacted in 2006, lenders are required to rebate fixed rate floor income and variable rate floor income to the Department for all new FFELP loans originated on or after April 1, 2006.

For the year ended December 31, 2011, we earned \$144.5 million of fixed rate floor income, net of \$20.2 million of settlements paid related to derivatives used to hedge loans earning fixed rate floor income. Absent the use of derivative instruments, a rise in interest rates will reduce the amount of floor income received and this will have an impact on earnings due to interest margin compression caused by increased financing costs until such time as the federally insured loans earn interest at a variable rate in accordance with their SAP formulas. In higher interest rate environments, where the interest rate rises above the borrower rate and fixed rate loans effectively convert to variable rate loans, the impact of the rate fluctuations is reduced. See Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Risk."

Interest rate risk - use of derivatives

We utilize derivative instruments to manage interest rate sensitivity. Our derivative instruments are intended as economic hedges but do not qualify for hedge accounting; consequently, the change in fair value, called the "mark-to-market," of these derivative instruments is included in our operating results. Changes or shifts in the forward yield curve can and have significantly impacted the valuation of our derivatives. Accordingly, changes or shifts in the forward yield curve will impact our financial position, results of operations, and cash flows.

Developing an effective strategy for dealing with movements in interest rates is complex, and no strategy can completely insulate us from risks associated with such fluctuations. Although we believe our derivative instruments are highly effective, because many of our derivatives are not balance guaranteed to a particular pool of student loans, we are subject to prepayment risk that could result in being under or over hedged, which could result in material losses. In addition, our interest rate risk management activities could expose us to substantial mark-to-market losses if interest rates move in a materially different way than was expected based on the environment when the derivatives were entered into. As a result, we cannot offer any assurance that our economic hedging activities will effectively manage our interest rate sensitivity or have the desired beneficial impact on our results of operations or financial condition.

By using derivative instruments, we are exposed to credit and market risk.

We attempt to manage credit and market risks associated with interest rates by establishing and monitoring limits as to the types and degree of risk that may be undertaken and by entering into transactions with high-quality counterparties that are reviewed periodically by our risk committee. As of December 31, 2011, all of our derivative counterparties had investment grade credit ratings. We also have a policy of requiring that all derivative contracts be governed by an International Swaps and Derivatives Association, Inc. Master Agreement.

When the fair value of a derivative contract is positive (an asset on our balance sheet), this generally indicates that the counterparty owes us if the derivative was settled. If the counterparty fails to perform, credit risk with such counterparty is equal to the extent of the fair value gain in the derivative less any collateral held by us. If we were unable to collect from a counterparty, we would have a loss equal to the amount the derivative is recorded on the consolidated balance sheet. As of December 31, 2011, the fair value of our derivatives, which had a positive fair value in our favor (an asset on our balance sheet), was \$92.2 million, of which \$80.6 million related to the fair value of our cross-currency interest rate swaps. As of December 31, 2011, our trustee held \$73.4 million of collateral from the counterparty on the cross-currency interest rate swaps.

When the fair value of a derivative instrument is negative (a liability on our balance sheet), we would owe the counterparty if the derivative was settled and, therefore, have no immediate credit risk. If the negative fair value of derivatives with a counterparty exceeds a specified threshold, we may have to make a collateral deposit with the counterparty. The threshold at which we may be required to post collateral is dependent upon our unsecured credit rating. Based on our current unsecured credit ratings (Standard and Poor: BBB- (stable outlook) and Moody's: Ba1 (stable outlook)), we have substantially collateralized our corporate derivative liability position with our counterparties. As such, further downgrades would not result in additional collateral requirements of a material nature. In addition, no counterparty has the right to terminate its contracts in the event of further downgrades. However, some long dated derivative contracts have mutual optional termination provisions that can be exercised in 2016 and 2021. As of December 31, 2011, the fair value of derivatives with early termination provisions was a negative \$0.1 million (a liability on our balance sheet).

Interest rate movements have an impact on the amount of collateral we are required to deposit with our derivative instrument counterparties. Based on the interest rate swaps outstanding as of December 31, 2011 (for both the floor income and hybrid debt

hedges), if the forward interest rate curve was one basis point lower for the remaining duration of these derivatives, we would have been required to post \$0.7 million in additional collateral. In addition, if the forward basis curve between 1-month and 3-month LIBOR experienced a one basis point reduction in spread for the remaining duration of our 1:3 Basis Swap derivatives (in which we pay 1-month LIBOR and receive 3-month LIBOR), we would have been required to post \$5.1 million in additional collateral.

With our current derivative portfolio, we do not currently anticipate any movement in interest rates having a material impact on our capital or liquidity profile, nor expect that any movement in interest rates would have a material impact on our ability to meet potential collateral deposits with our counterparties. Due to the existing low interest rate environment, our exposure to downward movements in interest rates on our interest rate swaps is limited. In addition, the historical high correlation between 1-month and 3-month LIBOR and the limited notional amount of 1:3 Basis Swap derivatives outstanding limits our exposure to interest rate movements on these derivatives.

However, if interest rates move materially and negatively impact the fair value of our derivative portfolio or if we enter into additional derivatives in which the fair value of such derivatives become negative, we could be required to deposit a significant amount of collateral with our derivative instrument counterparties. The collateral deposits, if significant, could negatively impact our liquidity and capital resources. As of December 31, 2011, the fair value of our derivatives, which had a negative fair value (a liability on our balance sheet), was \$43.8 million and we had \$34.0 million posted as collateral to derivative counterparties.

The Company's cross-currency interest rate swaps are derivatives entered into as a result of certain asset-backed security financings. These derivatives are entered into at the trust level with the counterparty. Trust related derivatives do not contain credit contingent features related to the Company or the trust's credit ratings. As such, there are no collateral requirements and as a result the impact of changes to foreign currency rates has no impact on the amount of collateral the Company would be required to deposit with the counterparty on these derivatives.

Prepayment risk

Higher rates of prepayments of student loans, including consolidation by the Department through the Federal Direct Loan Program, would reduce our interest income.

Pursuant to the Higher Education Act, borrowers may prepay loans made under the FFEL Program at any time without penalty. Prepayments may result from consolidation of student loans by the Department as part of the Federal Direct Loan Program, which historically tends to occur more frequently in low interest rate environments, from borrower defaults, which will result in the receipt of a guaranty payment, and from voluntary full or partial prepayments, among other things.

On October 25, 2011, the White House and the Department announced a short-term consolidation initiative to eligible student loan borrowers beginning in January 2012 and ending June 30, 2012. The Department's initiative will allow student loan borrowers with at least one FFELP loan and at least one federal student loan owned by the Department to convert the FFELP loans to the Federal Direct Loan Program, at which time all of the converted loans, as well as the borrower's existing Direct Loans, would be considered a Special Direct Consolidation Loan. Less than \$2.9 billion of our \$24.3 billion FFELP portfolio is eligible for this initiative. Based on borrower responses to date, the Company does not expect its portfolio of FFELP loans to be significantly impacted by this initiative. However, if this short-term initiative is deemed to be beneficial to the Department, it could be extended or a similar consolidation program could be initiated that could further increase prepayments and reduce interest income.

The rate of prepayments of student loans may be influenced by a variety of economic, social, political, and other factors affecting borrowers, including interest rates, federal budgetary pressures, and the availability of alternative

financing. Our profits could be adversely affected by higher prepayments, which reduce the balance of loans outstanding and, therefore, the amount of interest income we receive.

Credit risk

Future losses due to defaults on loans held by us, or loans sold to unaffiliated third parties which we are obligated to repurchase in the event of certain delinquencies, present credit risk which could adversely affect our earnings.

Over 99 percent of our student loan portfolio is federally guaranteed. The allowance for loan losses from the federally insured loan portfolio is based on periodic evaluations of our loan portfolios considering loans in repayment versus those in nonpaying status, delinquency status, trends in defaults in the portfolio based on Company and industry data, past experience, trends in student loan claims rejected for payment by guarantors, changes to federal student loan programs, current economic conditions, and other relevant factors. The federal government currently guarantees 97 percent of the principal and interest on federally insured student

loans disbursed on and after July 1, 2006 (and 98 percent for those loans disbursed prior to July 1, 2006), which limits our loss exposure on the outstanding balance of our federally insured portfolio. Student loans disbursed prior to October 1, 1993 are fully insured for both principal and interest.

Our non-federally insured loans are unsecured, with neither a government nor a private insurance guarantee. Accordingly, we bear the full risk of loss on these loans if the borrower and co-borrower, if applicable, default. In determining the adequacy of the allowance for loan losses on the non-federally insured loans, we consider several factors, including: loans in repayment versus those in a nonpaying status, delinquency status, type of program, trends in defaults in the portfolio based on Company and industry data, past experience, current economic conditions, and other relevant factors. We place a non-federally insured loan on nonaccrual status when the collection of principal and interest is 30 days past due and charge off the loan when the collection of principal and interest is 120 days past due.

The evaluation of the allowance for loan losses is inherently subjective, as it requires material estimates that may be subject to significant changes. As of December 31, 2011, our allowance for loan losses was \$48.5 million. During the year ended December 31, 2011, we recognized a provision for loan losses of \$21.3 million. The provision for loan losses reflects the activity for the applicable period and provides an allowance at a level that management believes is adequate to cover probable losses inherent in the loan portfolio. However, future defaults can be higher than anticipated due to a variety of factors such as downturns in the economy, regulatory or operational changes, and other unforeseen future trends. If actual performance is worse than estimated, it would materially affect our estimate of the allowance for loan losses and the related provision for loan losses in our statements of income.

We have participated interests in non-federally insured loans to unaffiliated third parties. Loans participated under these agreements have been accounted for as loan sales. Accordingly, the participation interests sold are not included on our consolidated balance sheet. Under the terms of the servicing agreements, our servicing operations are obligated to repurchase loans subject to the participation interests when such loans become 60 or 90 days delinquent. As of December 31, 2011, we had a reserve related to this obligation of \$19.2 million included in other liabilities on the consolidated balance sheet. The evaluation of the reserve related to these participated loans is inherently subjective, as it requires estimates that may be subject to changes. If actual performance is worse than estimated, it would negatively affect our results of operations.

Liquidity and Funding

We fund student loans in FFELP warehouse facilities and a Department conduit program. The current maturities of these facilities do not match the maturity of the related funded assets. Therefore, we will need to modify and/or find alternative funding related to the student loan collateral in these facilities prior to their expiration. If we cannot find any funding alternatives, we would lose our collateral, including the student loan assets and cash advances, related to these facilities.

The majority of our portfolio of student loans is funded with asset-backed securitizations that are structured to substantially match the maturity of the funded assets and there are minimal liquidity issues related to these facilities. We also have student loans funded in FFELP warehouse facilities and a Department conduit program. The current maturities of these facilities do not match the maturity of the related funded assets. Therefore, we will need to modify and/or find alternative funding related to the student loan collateral in these facilities prior to their expiration.

We maintain three FFELP warehouse facilities as described in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources." These facilities have revolving financing structures supported by 364-day liquidity provisions, which expire in 2012 and 2013. In the event we are unable to renew the liquidity provisions, the facilities would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and we would be required to refinance the existing loans in

the facilities by their final maturity dates in 2014 and 2015. The warehouse facilities provide for formula based advance rates depending on FFELP loan type. The advance rates may increase or decrease based on market conditions. The FFELP warehouse facilities also contain financial covenants relating to levels of our consolidated net worth, ratio of adjusted EBITDA to corporate debt interest, and unencumbered cash. Any violation of these covenants could result in a requirement for the immediate repayment of any outstanding borrowings under the facilities. As of December 31, 2011, \$824.4 million was outstanding under the warehouse facilities and \$58.5 million was advanced as equity support.

In May 2009, the Department implemented a program under which it finances eligible FFELP Stafford and PLUS loans in a conduit vehicle established to provide funding for student lenders (the "Conduit Program"). Funding for the Conduit Program is provided by the capital markets at a cost based on market rates, in which we were advanced 97 percent of the student loan face amount. Excess amounts needed to fund the remaining 3 percent of the student loan balances were contributed by us. The Conduit Program expires on May 8, 2014. The Student Loan Short-Term Notes ("Student Loan Notes") issued by the Conduit Program are supported

by a combination of (i) notes backed by FFELP loans, (ii) a liquidity agreement with the Federal Financing Bank, and (iii) a put agreement provided by the Department. If the conduit does not have sufficient funds to pay all Student Loan Notes, then those Student Loan Notes will be repaid with funds from the Federal Financing Bank. The Federal Financing Bank will hold the notes for a short period of time and, if at the end of that time, the Student Loan Notes still cannot be paid off, the underlying FFELP loans that serve as collateral to the Conduit Program will be sold to the Department through a put agreement at a price of 97 percent of the face amount of the loans. As of December 31, 2011, \$2.3 billion was outstanding under this facility and we had \$84.7 million of operating cash advanced in the facility.

If we are unable to obtain cost-effective funding alternatives for the loans in the FFELP warehouse facilities or the Conduit Program prior to the facilities' maturities, our cost of funds could increase, adversely affecting our results of operations. If we cannot find any funding alternatives, we would lose our collateral, including the student loan assets and cash advances, related to these facilities.

We are exposed to mark-to-formula collateral support risk on our FFELP warehouse facilities.

Our warehouse facilities for FFELP loans provide formula based advance rates based on current market conditions, which require equity support to be posted to the facilities. As of December 31, 2011, \$58.5 million was advanced as equity support under these facilities. Should a significant change in the valuation of loans result in additional required equity funding support for the warehouse facilities greater than what we can provide, the warehouse facilities could be subject to an event of default resulting in termination of the facilities and an acceleration of the repayment provisions. If we cannot find any funding alternatives, we would lose our collateral, including the student loan assets and cash advances, related to these facilities. A default on the FFELP warehouse facilities would result in an event of default on our new \$250.0 million unsecured line of credit that would result in the outstanding balance on the line of credit becoming immediately due and payable.

Operations

Risks associated with our operations, as further discussed below, include those related to our information technology systems and security and privacy breaches, our ability to manage performance related to regulatory requirements, and the importance of maintaining scale by retaining existing customers and attracting new business opportunities.

A failure in or breach of our operational or information systems or infrastructure, or those of our third-party vendors and other service providers, including as a result of cyber attacks, could disrupt our businesses, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs, and cause losses.

As a loan servicer, hosted loan servicing software provider, and payment processor for the federal government, financial institutions, and the education industry that serves millions of customers through the Internet and other distribution channels across the U.S., we depend on our ability to process, secure, record, and monitor a large number of customer transactions and confidential information on a continuous basis.

Information security risks have significantly increased in recent years in part because of the proliferation of new technologies, the use of the Internet and telecommunications technologies to support and process customer transactions, and the increased sophistication and activities of organized crime, hackers, terrorists, activists, and other external parties. Our operations rely on the secure processing, transmission, and storage of confidential information in our computer systems and networks. Our Asset Generation and Management, Student Loan and Guaranty Servicing, Tuition Payment Processing and Campus Commerce, and Enrollment Processing business segments rely on our digital technologies, computer and email systems, software, and networks to conduct their operations. In addition, to access our products and services, our customers may use personal smartphones, tablet PC's, and other mobile devices that are

beyond our control systems. Although we believe we have robust information security procedures and controls, our technologies, systems, networks, and our customers' devices may become the target of cyber attacks or information security breaches that could result in the unauthorized release, gathering, monitoring, misuse, loss, or destruction of Company or customer confidential, proprietary, and other information, or otherwise disrupt the Company's or our customers' business operations. A cyber attack or information security breach of this nature could significantly affect our ability to retain strategic business customers which could lead to increased costs to retain customers or a material loss of future revenue.

Third parties with which we do business or that facilitate our business activities, including financial intermediaries, data centers, data storage locations, collection services, distribution centers, or other vendors that provide services or security solutions for our operations, could also be sources of operational and information security risk to us, including from breakdowns or failures of their own systems or capacity constraints.

Although to date we have not experienced a material loss relating to cyber attacks or other information security breaches, there can be no assurance that we will not suffer such losses in the future or a current threat remains undetected at this time. Our risk and exposure to these matters remains heightened because of, among other things, the evolving nature of these threats, the size and scale of our servicing contracts and our contract with the federal government.

As a result, cyber security and the continued development and enhancement of our training, controls, processes, and practices designed to protect and monitor our systems, computers, software, data, and networks from attack, damage, or unauthorized access remain a priority for the Company and each of our business segments. Additionally, we maintain technology and telecommunication, professional services, media, network security, privacy, injury, and liability insurance coverage to offset costs that may be incurred as a result of a cyber attack or information security breach.

As cyber threats continue to evolve, we may be required to expend significant additional resources to continue to modify or enhance our protective measures or to investigate and remediate any information security vulnerabilities.

Additionally, we must continually and cost-effectively maintain and improve our information technology systems and infrastructure in order to successfully deliver competitive products and services to our customers. The widespread adoption of new technologies and market demands could require substantial expenditures to enhance system infrastructure and existing products and services. If we fail to enhance and scale our systems and operational infrastructure or products and services, our operating segments may lose their competitive advantage and this could adversely affect financial and operating results.

We also face the risk of business disruption if system outages occur as a result of changes in infrastructure, introduction of new software or software enhancements, relocation of infrastructure, or failure to perform required services, which could have a material impact upon our reputation and our ability to retain customers. Although we have business continuity management plans, a major physical disaster or other calamity that causes significant damage to or the loss of our information systems or business operations for a sustained period of time could adversely affect our business, cash flows, and ability to retain customers.

We must satisfy certain requirements necessary to maintain the federal guarantees of our federally insured loans, and we may incur penalties or lose our guarantees if we fail to meet these requirements.

We must meet various requirements in order to maintain the federal guaranty on our federally insured loans. The federal guaranty on our federally insured loans is conditional based on our compliance with origination, servicing, and collection policies set by the Department and guaranty agencies. Federally insured loans that are not originated, disbursed, or serviced in accordance with the Department's and guaranty agency regulations may risk partial or complete loss of the guaranty. If we experience a high rate of servicing deficiencies (including any deficiencies resulting from the conversion of loans from one servicing platform to another, errors in the loan origination process, establishment of the borrower's repayment status, and due diligence or claim filing processes), it could result in the loan guarantee being revoked or denied. In most cases we have the opportunity to cure these deficiencies by following a prescribed cure process which usually involves obtaining the borrower's reaffirmation of the debt. The lender becomes ineligible for special allowance interest benefits from the time of the first error leading to the loan rejection through the date that the loan is cured.

We are allowed three years from the date of the loan rejection to cure most loan rejections. If a cure cannot be achieved during this three year period, insurance is permanently revoked, although we maintain our right to collect the loan proceeds from the borrower.

A guaranty agency may also assess an interest penalty upon claim payment if the error(s) does not result in a loan rejection. These interest penalties are not subject to cure provisions and are typically related to isolated instances of due diligence deficiencies.

Failure to comply with federal and guarantor regulations may result in loss of insurance or assessment of interest penalties at the time of claim reimbursement by us. A future increase in either loan claim rejections and/or interest penalties could become material to our operations.

As of December 31, 2011, the Company serviced \$28.1 billion of FFELP loans that maintained a federal guarantee, of which \$22.7 billion and \$5.4 billion were owned by the Company and third-party entities, respectively.

Our largest fee-based customer, the Department of Education, allocates Federal Direct Loan Program servicing volume based on our and our competitors' performance metrics. Failure to be ranked above our competitors will lead to lower loan volume allocations and could lower our ability to renew the Department contract in 2014 and retain hosted servicing software clients who also service Federal Direct Loan Program loans.

In June 2009, we were one of four private sector companies awarded a student loan servicing contract by the Department of Education to provide additional servicing capacity for loans owned by the Department. These loans include Federal Direct Loan Program loans originated directly by the Department and FFEL Program loans purchased by the Department. The contract spans five years (through June 2011), with one five-year renewal at the option of the Department. In September 2009, the Department began assigning purchased FFELP loans to the four servicers. Beginning with the second year of servicing in June 2010, the Department began allocating new loan volume originated under the Federal Direct Loan Program among the four servicers based on five equally weighted performance metrics.

Three metrics measure the satisfaction among separate customer groups, including borrowers, financial aid personnel at postsecondary schools participating in the federal student loan program, and Federal Student Aid and other federal agency personnel or contractors who work with the servicers.

Two performance metrics measure the success of default prevention efforts as reflected by the percentage of borrowers and percentage of dollars in each servicer's portfolio that go into default.

Based on the first and second years of survey results, the Company was ranked fourth out of the four private sector companies and has been allocated 16% of new loan volume originated by the Department from the period from August 15, 2010 through August 14, 2012 (the second and third years of the servicing contract).

The Department projects it will originate new loans for 4.1 million borrowers in total during the third year of this contract (August 15, 2011 through August 14, 2012), which is currently being allocated to the four servicers. As of December 31, 2011, the Company was servicing \$46.1 billion of loans for 3.0 million borrowers under this contract. During 2011, the Company earned \$51.0 million in revenue under this contract.

Additionally, the Company offers a hosted servicing software solution that can be used by third-party clients to service various types of student loans, including Federal Direct Loan Program and FFEL Program loans. As of December 31, 2011, 9.6 million borrowers were hosted on the Company's hosted servicing software solution platforms.

Upon the expiration of the Department of Education contract, any renewal to provide loan servicing to the Department could be subject to a bidding process in which we may not be successful. Not obtaining a renewal of a loan servicing contract upon its expiration would result in a significant reduction in revenue and we would have to make significant changes to our operations, which may result in the recording of special charges, such as workforce reduction costs, charges relating to consolidating excess facilities, and impairments of assets. Additionally, not obtaining a renewal of the Department loan servicing contract could put at risk the long-term viability of the hosted servicing software solution agreements.

Management believes it is important to provide exceptional customer service at a reasonable price in order to increase the Company's servicing volume, renew the Department contract, and grow the hosted servicing software business; therefore, the Company has focused and will continue to focus heavily on customer service-related projects, efficiencies, security, and technology development to improve its allocation in future years of the contract.

Regulatory and Legal

Federal and state regulations can restrict our business, and noncompliance with these regulations could result in penalties, litigation, and reputation damage.

Our operating segments and commercial customers are heavily regulated by federal and state government regulatory agencies. The laws and regulations enforced by these agencies are proposed or enacted to protect consumers and the financial industry as a whole, not necessarily the Company, our operating segments, or our stockholders.

Consequently, these laws and regulations can significantly alter the business environment, limit business operations, increase costs of doing business, and could lead to fines or penalties if we were found to be out of compliance.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). The Dodd-Frank Act represents a comprehensive overhaul of the financial services industry within the United States, and establishes the new federal Consumer Financial Protection Bureau (the “CFPB”). The CFPB, an independent agency within

the Federal Reserve, will regulate consumer financial products, including education loans, and other financial services offered primarily for personal, family, or household purposes, and the CFPB and other federal agencies, including the SEC and the Commodity Futures Trading Commission (the "CFTC"), are required to undertake various assessments and rulemaking to implement the law. Significant powers pertaining to the CFPB became active with the recess appointment of Richard Cordroy as Director on January 4, 2012. The majority of the provisions in the Dodd-Frank Act are aimed at financial institutions. However, there are components of the law that will have an impact on us, including new requirements for derivatives and securitizations as discussed below, corporate governance and executive compensation provisions for public companies, and provisions which may impact us as we work with financial institutions and credit rating agencies.

The Dodd-Frank Act provides the CFTC and the SEC with substantial new authority to regulate over-the-counter derivatives transactions, and includes provisions that require derivatives transactions to be executed through an exchange or centrally cleared, unless an exemption applies based on regulations to be developed by the CFTC and the SEC. The CFTC and the SEC have initiated rulemaking processes with respect to derivatives. Although we cannot predict the ultimate outcome of these processes, new regulations in this area may result in increased costs and cash collateral margin requirements for the types of derivatives we use to hedge or otherwise manage our financial risks related to volatility in interest rates and foreign currency exchange rates.

There are also provisions in the Dodd-Frank Act that will affect future student loan portfolio securitization financing transactions which result in the issuance of asset-backed securities. The SEC and federal banking agencies are directed to adopt regulations requiring issuers of asset backed securities or persons who organize and initiate asset-backed securities transactions to retain a portion of the underlying assets' credit risk, new disclosure and reporting requirements for each tranche of asset-backed securities, including new loan-level data requirements, and new disclosure requirements relating to the representations, warranties, and enforcement mechanisms available to investors in asset-backed securities. The SEC has issued proposed new rules governing asset-backed securities. Although we cannot predict the ultimate outcome of this rulemaking, the Dodd-Frank Act provisions and new regulations in this area are expected to affect the terms of future student loan securitization transactions that we facilitate and result in greater risk retention and less flexibility for structuring such transactions.

At this time, it is difficult to predict the extent to which the Dodd-Frank Act or the resulting regulations will impact our business and operations. As rules and regulations are promulgated by the federal agencies responsible for implementing and enforcing the provisions in the Dodd-Frank Act, we will need to apply adequate resources to ensure that we are in compliance with all applicable provisions. Compliance with these new laws and regulations may result in additional costs and may otherwise adversely impact our results of operations, financial condition, or liquidity.

Certain provisions in new regulations issued by the Department under the Higher Education Act that became effective July 1, 2011 could have an impact on our Enrollment Services operating segment in connection with services it provides to for-profit schools. The Higher Education Act provides that, to be eligible to participate in federal student financial aid programs (Title IV funds), educational institutions, including for-profit schools, must enter into a program participation agreement with the Department. The agreement includes a number of conditions with which an institution must comply to be granted initial and continuing eligibility to participate. Among those conditions is a prohibition on institutions providing any commission, bonus, or other incentive payment to any individual or entity engaged in recruiting or admission activities, based on their success in securing enrollments. Previous regulations included a number of activities, or "safe harbors," that did not constitute prohibited incentive compensation. One of those safe harbors permitted an institution to provide incentive compensation for internet-based recruitment and admission activities. The Department's newly issued regulations repeal all existing safe harbors regarding incentive compensation in recruiting, though exempting "click"-based payments to third parties who provide internet generated student contact information. The new regulations also create liability for misrepresentation in advertisements, offers, and communications presented to prospective students, with associated penalties for noncompliance with these

standards.

In addition, these new regulations impose strict liability on educational institutions for misrepresentations made by entities, like us, who contract with the institutions to provide marketing services. As a result, our school customers have demanded and, in limited circumstances, we have acquiesced to be subject to increased limitations of liability in our contracts and, in some cases, to indemnify our customers for actions by our third-party publishers.

The Department also recently issued new regulations under Title IV of the Higher Education Act providing that for-profit schools are eligible to participate in Title IV student financial aid programs only with respect to educational programs that lead to “gainful employment” in a recognized occupation. These regulations, most of which became effective July 1, 2011, require for-profit schools to provide prospective students with each eligible program's recognized occupations, cost, completion rate, job placement rate, and median loan debt of those that have completed the program, and provide that Title IV funds may not be available to students enrolled in educational programs offered by for-profit schools if those programs do not meet certain debt-to-income ratios and loan repayment metrics to be measured beginning July 1, 2012.

20

Significantly all interactive marketing revenue (which makes up approximately 80 percent of total revenue included in the Enrollment Services operating segment) is generated from for-profit schools. The regulations discussed above may subject us to greater risk of liability and may increase our cost of compliance with these regulations or limit our ability to serve for-profit schools. In addition, these regulations could negatively impact enrollment at for-profit schools, which could adversely affect interactive marketing revenue.

Effective July 1, 2010, the Reconciliation Act of 2010 prohibits new loan originations under the FFEL Program and requires that all new federal loan originations be made through the Federal Direct Loan Program. As a result of this legislation, interest income on our existing FFELP loan portfolio, as well as fee-based revenue from guarantee and third-party FFELP servicing and FFELP loan servicing software licensing and consulting fees will decline over time as our and our third-party lender clients' FFELP loan portfolios are paid down.

On March 30, 2010, President Obama signed into law the Reconciliation Act of 2010. Effective July 1, 2010, this law prohibits new loan originations under the FFEL Program and requires that all new federal loan originations be made through the Federal Direct Loan Program. The new law does not alter or affect the terms and conditions of existing FFELP loans.

As a result of the Reconciliation Act of 2010, we no longer originate new FFELP loans. As such, subsequent to 2010, we will no longer recognize a gain from originating and subsequently selling FFELP loans to the Department under the Department's Loan Purchase Commitment Program (the "Purchase Program"). During 2010 and 2009, we recognized pre-tax gains of \$33.8 million and \$36.6 million, respectively, from selling \$2.1 billion of FFELP loans to the Department during each of these years under the Purchase Program.

In addition, as a result of the Reconciliation Act of 2010, interest income on our existing FFELP loan portfolio, as well as fee-based revenue from guarantee and third-party FFELP servicing and FFELP loan servicing software licensing and consulting fees related to the FFEL Program, will decline over time as our and our third-party lender clients' FFELP loan portfolios are paid down. During the years ended December 31, 2011, 2010, and 2009 we recognized approximately \$367 million, \$377 million, and \$247 million, respectively, of interest income on our FFELP loan portfolio, approximately \$91 million, \$101 million, and \$100 million, respectively, in guarantee and third-party FFELP servicing revenue, and approximately \$7 million, \$8 million, and \$7 million, respectively, in FFELP loan servicing software licensing and consulting fees related to the FFEL Program.

If the Company is unable to grow or develop new revenue streams, the Company's consolidated revenue and operating margin will decrease as a result of the decline in FFELP loan volume outstanding.

Proposed changes to the FFEL Program could have a negative effect on our earnings and operations.

On February 13, 2012, President Obama released a proposed budget of the U.S. federal government for the fiscal year 2013. The budget contains certain proposals that would impact the FFEL Program, including proposals that impact FFELP student loan holders and guaranty agencies. The President's proposals are subject to review by Congress and possible changes. We cannot currently predict whether the current proposals to change the FFEL Program will ultimately be enacted, but if such changes are enacted, they could have a significant adverse impact on the amount of our revenue.

Exposure related to certain tax issues could decrease our net income.

We are subject to federal and state income tax laws and regulations. Income tax regulations are often complex and require interpretation. The nexus standards and the sourcing of receipts from intangible personal property and services have been the subject of state audits and litigation with state taxing authorities and tax policy debates by various state

legislatures. As the U.S. Congress and U.S. Supreme Court have not provided clear guidance in this regard, conflicting state laws and court decisions create tremendous uncertainty and expense for taxpayers conducting interstate commerce. Changes in income tax regulations could negatively impact our results of operations. If states enact legislation, alter apportionment methodologies, or aggressively apply the income tax nexus standards, we may become subject to additional state taxes.

From time to time, we engage in transactions in which the tax consequences may be subject to uncertainty. Examples of such transactions include asset and business acquisitions and dispositions, financing transactions, apportionment, nexus standards, and income recognition. Significant judgment is required in assessing and estimating the tax consequences of these transactions. We prepare and file tax returns based on the interpretation of tax laws and regulations. In the normal course of business, our tax returns are subject to examination by various taxing authorities. Such examinations may result in future tax and interest assessments by these taxing authorities. In accordance with authoritative accounting guidance, we establish reserves for tax contingencies related

to deductions and credits that we may be unable to sustain. Differences between the reserves for tax contingencies and the amounts ultimately owed are recorded in the period they become known. Adjustments to our reserves could have a material effect on our financial statements.

The costs and effects of litigation, investigations, or similar matters, or adverse facts and developments related thereto, could materially affect our financial position, results of operations, and cash flows.

We may be involved from time to time in a variety of lawsuits, investigations, or similar matters arising out of our business operations. Our insurance may not cover all claims that may be asserted against us, and any claims asserted against us, regardless of merit or eventual outcome, may harm our reputation. If the ultimate judgments or settlements in any litigation or investigation significantly exceed our insurance coverage, they could have a material adverse effect on our financial position, results of operations, and cash flows for any particular period.

Principal Shareholder and Related Party Transactions.

Our Chairman and Chief Executive Officer beneficially owns 67.9 percent of the voting rights of our shareholders and has day to day control over all matters at our Company.

Michael S. Dunlap, our Chairman, Chief Executive Officer, and a principal shareholder, beneficially owns 67.9 percent of the voting rights of our shareholders. In addition, Mr. Dunlap, Stephen F. Butterfield, our Vice Chairman, and Angela L. Muhleisen, Mr. Dunlap's sister, beneficially own stock that in the aggregate has 83.4 percent of the voting rights of our shareholders. Accordingly, each member of the Board of Directors and each member of management has been elected or effectively appointed by Mr. Dunlap and can be removed by Mr. Dunlap. As a result, Mr. Dunlap, as Chairman, Chief Executive Officer, and controlling shareholder, has day to day control over all matters at our Company and has the ability to take actions that benefit him and Ms. Muhleisen but may not benefit other minority shareholders, and may otherwise exercise his control in a manner with which other minority shareholders may not agree or which they may not consider to be in their best interests.

We have entered into contractual arrangements with Union Bank & Trust Company ("Union Bank"). Union Bank is controlled by Farmers & Merchants Investment Inc. ("F&M") which owns 81.4 percent of Union Bank's common stock and 15.4 percent of Union Bank's non-voting preferred stock. Michael S. Dunlap, a significant shareholder of us as well as our Chief Executive Officer, Chairman, and a member of our Board of Directors, along with his spouse, owns or controls a total of 40.3 percent of the stock of F&M, while Mr. Dunlap's sister, Angela L. Muhleisen, owns or controls 38.6 percent of F&M stock. The transactions with Union Bank present conflicts of interest and pose risks to our shareholders that the terms may not be as favorable to us as we could receive from unrelated third parties.

Union Bank is controlled by F&M which owns 81.4 percent of Union Bank's common stock and 15.4 percent of Union Bank's non-voting preferred stock. Michael S. Dunlap, a significant shareholder, as well as our Chief Executive Officer, Chairman, and a member of our Board of Directors, owns or controls 22.1 percent of the stock of F&M, while Mr. Dunlap's spouse owns 18.1 percent of the stock of F&M, and Mr. Dunlap's sister, Angela L. Muhleisen, owns or controls 38.6 percent of F&M stock. Mr. Dunlap serves as a Director and Co-President of F&M. Ms. Muhleisen serves as Director and Co-President of F&M and as a Director, Chairperson, President, and Chief Executive Officer of Union Bank. Union Bank is deemed to have beneficial ownership of various shares of Nelnet because it serves in a capacity of trustee and has sole voting and/or investment power. As of December 31, 2011, Union Bank was deemed to beneficially own 12.2 percent of the voting rights of our common stock. As of December 31, 2011, Mr. Dunlap and Ms. Muhleisen beneficially owned 67.9 percent and 13.5 percent, respectively, of the voting rights of our outstanding common stock.

We have entered into certain contractual arrangements with Union Bank. These transactions include:

• Loan purchases - During 2011, we purchased \$0.1 million (par value) of FFELP student loans from Union Bank. No premiums were paid for these loan purchases.

• Loan servicing - As of December 31, 2011, we serviced \$496.3 million of loans for Union Bank. Servicing revenue earned by us from this portfolio was \$1.9 million for the year ended December 31, 2011.

• Funding - We maintain an agreement with Union Bank, as trustee for various grantor trusts, under which Union Bank has agreed to purchase from us participation interests in student loans (the "FFELP Participation Agreement"). We use this facility as a source to fund FFELP student loans. As of December 31, 2011, \$509.2 million of loans were subject to outstanding participation interests held by Union Bank, as trustee, under this agreement. The agreement automatically renews annually and is terminable by either party upon five business days notice. This agreement provides beneficiaries

of Union Bank's grantor trusts with access to investments in interests in student loans, while providing liquidity to us on a short term basis. We can participate loans to Union Bank to the extent of availability under the grantor trusts, up to \$750 million or an amount in excess of \$750 million if mutually agreed to by both parties. Loans participated under this agreement have been accounted for by us as loan sales. Accordingly, the participation interests sold are not included on our consolidated balance sheet.

We have from time to time repurchased certain of our own asset-backed securities (bonds and notes payable). For accounting purposes, these notes have been effectively retired and are not included on our consolidated balance sheet. However, these securities are legally outstanding at the trust level and we could sell these notes to third parties or redeem the notes at par as cash is generated by the trust estate. During 2010, we participated a portion of these securities to Union Bank, as trustee for various grantor trusts, and obtained cash proceeds equal to the par value of the notes. We entered into a Guaranteed Purchase Agreement with Union Bank whereby we must purchase these notes back from Union Bank at par upon the request of Union Bank. As of December 31, 2010, \$107.1 million of these securities were outstanding and subject to the participation agreement and were included in "bonds and notes payable" on our consolidated balance sheet. During the first quarter of 2011, we redeemed all outstanding notes under this participation.

Operating cash - The majority of our cash operating bank accounts are maintained at Union Bank. We also invest cash in the Short term Federal Investment Trust ("STFIT") of the Student Loan Trust Division of Union Bank, which we use as operating cash accounts. As of December 31, 2011, we had \$119.5 million deposited at Union Bank in operating accounts or invested in the STFIT. Interest income earned from cash deposited in these operating cash accounts for the year ended December 31, 2011 was \$0.2 million.

529 Plan administration - We provide certain 529 Plan administration services to certain college savings plans (the "College Savings Plans") through a contract with Union Bank, as the program manager. Union Bank is entitled to a fee as program manager pursuant to its program management agreement with the College Savings Plans. In 2011, we received fees of \$2.3 million from Union Bank related to our administration services provided to the College Savings Plans.

Lease arrangement - Union Bank leases space in our corporate headquarters building. During 2011, Union Bank paid us approximately \$73,000 for rent.

Other fees paid to Union Bank - During 2011, we paid Union Bank approximately \$357,000 for administrative services, commissions, rent expense, and cash management fees.

Other fees received from Union Bank - During 2011, we received approximately \$169,000 from Union Bank related to an employee sharing arrangement and for providing health and productivity services.

Investment services - In December 2010, Union Bank established various trusts whereby Union Bank serves as trustee for the purpose of purchasing, holding, and selling investments in student loan asset backed securities. Union Bank, in its individual capacity, and us, have both invested money into the trusts. As of December 31, 2011, we had \$8.0 million and Union Bank had \$248.5 million, respectively, invested in the trusts.

Prior to May 1, 2011, we and Union Bank employed certain individuals as dual employees and such employees provided consulting and advisory services to Union Bank as trustee for these trusts, and Union Bank agreed to pay us for the share of such employees' salary and payroll based on the value of such services rendered as well as the loss of value of such dual employees' services to us. On May 9, 2011, one of our subsidiaries entered into a management agreement with Union Bank, effective as of May 1, 2011, under which the subsidiary performs various advisory and management services on behalf of Union Bank with respect to investments in securities by the trusts, including

identifying securities for purchase or sale by the trusts. The agreement provides that Union Bank will pay to the subsidiary annual fees of 25 basis points on the outstanding balance of the investments in the trusts. As of December 31, 2011, the outstanding balance of investments in the trusts was \$394.2 million. In addition, Union Bank will pay additional fees to the subsidiary of 50 percent of the gains from the sale of securities from the trusts. For the year ended December 31, 2011, we recognized \$5.1 million of fee revenue related to this agreement.

• Defined contribution plan - Union Bank administers our 401(k) defined contribution plan. Fees paid to Union Bank to administer the plan, approximately \$270,000 in 2011, are paid by the plan's participants.

- Letter of credit - Union Bank has issued a \$25,000 letter of credit for our benefit. Union Bank charged no fee for providing this service.

The net aggregate impact on our consolidated statements of income for the years ended December 31, 2011, 2010, and 2009 related to the transactions with Union Bank as described above was income of approximately \$4.3 million, \$8.2 million, and \$6.9 million, respectively. See note 19 of the notes to the consolidated financial statements included in this Form 10-K for additional information related to the transactions between us and Union Bank.

Transactions between Union Bank and us are generally based on available market information for comparable assets, products, and services and are extensively negotiated. In addition, all related party transactions between Union Bank and us are approved by both the Union Bank Board of Directors and our Board of Directors. Furthermore, Union Bank is subject to regulatory oversight and review by the FDIC, the Federal Reserve, and the State of Nebraska Department of Banking and Finance. The FDIC and the State of Nebraska Department of Banking and Finance regularly review Union Bank's transactions with affiliates. The regulatory standard applied to the bank falls under Regulation W, which places restrictions on certain "covered" transactions with affiliates.

We intend to maintain our relationship with Union Bank, which our management believes provides certain benefits to us. Those benefits include Union Bank's knowledge of and experience in the FFELP industry, its willingness to provide services, and at times liquidity and capital resources on an expedient basis, and the proximity of Union Bank to our corporate headquarters located in Lincoln, Nebraska.

The majority of the transactions and arrangements with Union Bank are not offered to unrelated third parties or subject to competitive bids. Accordingly, these transactions and arrangements not only present conflicts of interest, but also pose the risk to our shareholders that the terms of such transactions and arrangements may not be as favorable to us as we could receive from unrelated third parties. Moreover, we may have and/or may enter into contracts and business transactions with related parties that benefit Mr. Dunlap and his sister, as well as other related parties, that may not benefit us and/or our minority shareholders.

ITEM 1B. UNRESOLVED STAFF COMMENTS

The Company has no unresolved comments from the staff of the Securities and Exchange Commission regarding its periodic or current reports under the Securities Exchange Act of 1934.

ITEM 2. PROPERTIES

The following table lists the principal facilities for office space owned or leased by the Company as of December 31, 2011. The Company owns the building in Lincoln, Nebraska where its principal office is located. The building is subject to a lien securing the outstanding mortgage debt on the property.

Location	Primary Function or Segment	Approximate square feet	Lease expiration date
Lincoln, NE	Corporate Headquarters, Asset Generation and Management, Student Loan and Guaranty Servicing, Tuition Payment Processing and Campus Commerce, Enrollment Services	126,000	–
Lincoln, NE	Student Loan and Guaranty Servicing	54,000	December 2015
Aurora, CO	Student Loan and Guaranty Servicing	96,000	February 2015

Edgar Filing: NELNET INC - Form 10-K

Highlands Ranch, CO	Student Loan and Guaranty Servicing	84,000	March 2017
Paramus, NJ	Enrollment Services	23,000	May 2013
Lawrenceville, NJ	Enrollment Services	13,000	December 2012

The square footage amounts above exclude a total of approximately 37,000 square feet of owned office space in Lincoln, Nebraska that the Company leases to third parties. In addition, not included in the table is a new lease for additional office space in Lincoln, Nebraska that commenced on January 1, 2012. The new lease includes approximately 16,000 square feet and has an expiration date in December 2014. The Company also leases approximately 80,000 square feet and 61,000 square feet of office space in Jacksonville, Florida and Indianapolis, Indiana, respectively, where Asset Generation and Management and Student Loan and Guaranty Servicing operations were previously conducted. As of December 31, 2011, 15,000 square feet in the Indianapolis location was subleased to third parties and such subleases expire in March 2013 and December 2013. The Company leases other office facilities located throughout the United States. These properties are leased on terms and for durations that are reflective of commercial standards in the communities where these properties are located. The Company believes that its respective properties

are generally adequate to meet its long term business goals. The Company's principal office is located at 121 South 13th Street, Lincoln, Nebraska 68508.

ITEM 3. LEGAL PROCEEDINGS

General

The Company is subject to various claims, lawsuits, and proceedings that arise in the normal course of business. These matters principally consist of claims by student loan borrowers disputing the manner in which their student loans have been processed and disputes with other business entities. In addition, from time to time the Company receives information and document requests from state or federal regulators concerning its business practices. The Company cooperates with these inquiries and responds to the requests. While the Company cannot predict the ultimate outcome of any inquiry or investigation, the Company believes its activities have materially complied with applicable law, including the Higher Education Act, the rules and regulations adopted by the Department of Education thereunder, and the Department's guidance regarding those rules and regulations. Other than as specifically discussed below, on the basis of present information, anticipated insurance coverage, and advice received from counsel, it is the opinion of the Company's management that the disposition or ultimate determination of these claims, lawsuits, and proceedings will not have a material adverse effect on the Company's business, financial position, or results of operations.

Bais Yaakov of Spring Valley v. Peterson's Nelnet, LLC

On January 4, 2011, a complaint against Peterson's Nelnet, LLC ("Peterson's"), a subsidiary of the Company, was filed in the U.S. federal District Court for the District of New Jersey (the "District Court"). The complaint alleges that Peterson's sent six advertising faxes to the named plaintiff in 2008-2009 that were not the result of express invitation or permission granted by the plaintiff and did not include certain opt out language. The complaint also alleges that such faxes violated the federal Telephone Consumer Protection Act (the "TCPA"), purportedly entitling the plaintiff to \$500 per violation, trebled for willful violations for each of the six faxes. The complaint further alleges that Peterson's had sent putative class members more than 10,000 faxes that violated the TCPA, amounting to more than \$5 million in statutory penalty damages and more than \$15 million if trebled for willful violations. The complaint seeks to establish a class action for two different classes of plaintiffs: Class A, to whom Peterson's sent unsolicited fax advertisements containing opt out notices similar to those contained in the faxes received by the named plaintiff; and Class B, to whom Peterson's sent fax advertisements containing opt out notices similar to those contained in the faxes received by the named plaintiff. As of the filing date of this report, the District Court has not established or recognized any class.

On February 16, 2011, Peterson's filed a motion to dismiss the complaint based on a lack of federal question or diversity jurisdiction with respect to the complaint, which was denied by the District Court on April 15, 2011, shortly after a similar motion to dismiss that had been granted in an unrelated case involving alleged TCPA violations related to faxes was reversed by the U.S. Court of Appeals for the Third Circuit (the "Appeals Court"), which has jurisdiction over the District Court. On April 29, 2011, Peterson's filed an answer to the complaint, but also filed a motion for reconsideration of the motion to dismiss. On May 17, 2011, the Appeals Court granted a petition for rehearing of the motion to dismiss in the unrelated TCPA fax case, and on May 31, 2011, Peterson's filed a motion for stay pending the outcome of that rehearing. On September 12, 2011, the motion for stay was granted, and the motion for reconsideration was denied by the District Court. On September 20, 2011, the named plaintiff filed a motion for reconsideration of the District Court's order, and at a hearing on November 22, 2011 the District Court ordered counsel to submit a proposed order to modify the stay for a limited third party subpoena, which the District Court approved on December 5, 2011. On January 18, 2012, the U.S. Supreme Court issued a decision in an unrelated TCPA case which held that federal courts have federal question jurisdiction over private causes of action under the TCPA. On January 20, 2012, the named plaintiff requested that the stay be lifted on the basis of the Supreme Court's decision,

and on January 25, 2012 the District Court denied that request since the stay is based on the outcome of the Appeals Court rehearing, and there has been no decision by the Appeals Court with respect to such rehearing.

Peterson's intends to continue to contest the suit vigorously. Due to the preliminary stage of this matter and the uncertainty and risks inherent in class determination and the overall litigation process, the Company believes that a meaningful estimate of a reasonably possible loss, if any, or range of reasonably possible losses, if any, cannot currently be made.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

The Company's Class A common stock is listed and traded on the New York Stock Exchange under the symbol "NNI," while its Class B common stock is not publicly traded. The number of holders of record of the Company's Class A common stock and Class B common stock as of January 31, 2012 was 860 and 22, respectively. The record holders of the Class B common stock are Michael S. Dunlap and Stephen F. Butterfield, an entity controlled by them, various members of their families, and various estate planning trusts established by them. Because many shares of the Company's Class A common stock are held by brokers and other institutions on behalf of shareholders, the Company is unable to estimate the total number of beneficial owners represented by these record holders. The following table sets forth the high and low sales prices for the Company's Class A common stock for each full quarterly period in 2011 and 2010.

2011				2010			
1st Quarter	2nd Quarter	3rd Quarter	4th Quarter	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter
High \$24.00	\$23.19	\$22.69	\$24.65	\$19.45	\$21.46	\$23.98	\$24.06
Low 20.87	19.68	17.34	17.75	14.54	17.72	17.76	21.35

In the first quarter of 2007, the Company began paying dividends of \$0.07 per share on the Company's Class A and Class B common stock which were paid quarterly through the first quarter of 2008. On May 21, 2008, the Company announced that it was temporarily suspending its quarterly dividend program. On November 5, 2009, the Company's Board of Directors voted to reinstate the quarterly dividend program effective for the fourth quarter of 2009.

Accordingly, a dividend of \$0.07 per share on the Company's Class A and Class B common stock was paid during the fourth quarter of 2009 and during the first, second, and third quarters of 2010. In November 2010, the Nelnet Board of Directors declared a fourth quarter cash dividend on its outstanding shares of Class A common stock and Class B common stock of \$0.49 per share. The dividend consisted of a quarterly dividend of \$0.07 per share, and an additional \$0.42 per share representing \$0.07 per share for each of the six quarters in 2008 and 2009 during which the Company had suspended dividend payments to preserve capital during a volatile period in the market. The dividend was paid on December 15, 2010 to shareholders of record as of December 1, 2010.

Dividends of \$0.07, \$0.10, \$0.10, and \$0.10 per share on the Company's Class A and Class B common stock were paid on March 15, 2011, June 15, 2011, September 15, 2011, and December 15, 2011, respectively, to all holders of record as of March 1, 2011, June 1, 2011, September 1, 2011, and December 1, 2011, respectively.

The Company currently plans to continue making quarterly dividend payments, subject to future earnings, capital requirements, financial condition, and other factors. In addition, the payment of dividends is subject to the terms of the Company's outstanding junior subordinated hybrid securities, which generally provide that if the Company defers interest payments on those securities it cannot pay dividends on its capital stock.

Performance Graph

The following graph compares the change in the cumulative total shareholder return on the Company's Class A common stock to that of the cumulative return of the Dow Jones U.S. Total Market Index (the broad equity market index presented in previous years), the S&P 500 Index, the Dow Jones U.S. Financial Services Index (the industry index presented in previous years), and the S&P Financials Index. The S&P 500 Index and the S&P Financials Index have been selected as the broad equity market index and the industry index, respectively, for presentation in the current and future years since the S&P 500 Index is a well known index that the Company's management uses for

various internal evaluations of the Company's performance, and the Company believes that the S&P Financials Index is the industry index that is more frequently used for Company performance comparisons by investment banking firms that follow the Company. The graph assumes that the value of an investment in the Company's Class A common stock and each index was \$100 on December 31, 2006 and that all dividends, if applicable, were reinvested. The performance shown in the graph represents past performance and should not be considered an indication of future performance.

Edgar Filing: NELNET INC - Form 10-K

Company/Index	12/31/2006	12/31/2007	12/31/2008	12/31/2009	12/31/2010	12/31/2011
Nelnet, Inc.	\$100.00	\$47.15	\$53.48	\$64.57	\$91.79	\$96.50
Dow Jones US	100.00	106.01	66.61	85.79	100.08	101.42
S&P 500	100.00	105.49	66.46	84.05	96.71	98.75

The preceding information under the caption “Performance Graph” shall be deemed to be “furnished” but not “filed” with the Securities and Exchange Commission.

Stock Repurchases

The following table summarizes the repurchases of Class A common stock during the fourth quarter of 2011 by the Company or any “affiliated purchaser” of the Company, as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934.

Period	Total number of shares purchased (1)	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs (2)	Maximum number of shares that may yet be purchased under the plans or programs
October 1 - October 31, 2011	311,524	\$ 19.06	310,547	1,568,860
November 1 - November 30, 2011	1,285	21.45	904	1,567,956
December 1 - December 31, 2011	1,729	23.20	1,392	1,566,564
Total	314,538	\$ 19.09	312,843	

The total number of shares includes: (i) shares purchased pursuant to the stock repurchase program discussed in footnote (2) below; and (ii) shares owned and tendered by employees to satisfy tax withholding obligations upon the vesting of restricted shares. Shares of Class A common stock purchased pursuant to the stock repurchase program included 247 shares, 904 shares, and 1,392 shares in October, November, and December 2011, respectively, that had been issued to the Company’s 401(k) plan and allocated to employee participant accounts (1) pursuant to the plan’s provisions for Company matching contributions in shares of Company stock, and were purchased by the Company from the plan pursuant to employee participant instructions to dispose of such shares. Shares of Class A common stock tendered by employees to satisfy tax withholding obligations included 977 shares, 381 shares, and 337 shares in October, November, and December 2011, respectively. Unless otherwise indicated, shares owned and tendered by employees to satisfy tax withholding obligations were purchased at the closing price of the Company’s shares on the date of vesting.

On May 25, 2006, the Company announced that its Board of Directors authorized a stock repurchase program to repurchase up to a total of five million shares of the Company’s Class A common stock. On February 9, 2007, the Company announced that its Board of Directors increased to ten million the total number of shares of Class A common stock authorized for repurchase under the program. The program currently has an expiration date of May 24, 2012. Certain share repurchases included in the table above were made pursuant to a trading plan adopted by the Company in accordance with Rule 10b5-1 under the Securities Exchange Act of 1934.

Equity Compensation Plans

For information regarding the Company’s equity compensation plans, see Part III, Item 12 of this report.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial and other operating information of the Company. The selected financial data in the table is derived from the consolidated financial statements of the Company. The following selected financial data should be read in conjunction with the consolidated financial statements, the related notes, and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in this report.

	Year ended December 31,				
	2011	2010	2009	2008	2007
	(Dollars in thousands, except share data)

Ratios:						
Shareholders' equity to total assets	4.12	% 3.50	% 3.03	% 2.31	% 2.09	%

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income.

(b) The student loans serviced does not include loans serviced by EDULINX for all periods presented. The Company sold EDULINX in May 2007. As a result of this transaction, EDULINX is reported as discontinued operations.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Management's Discussion and Analysis of Financial Condition and Results of Operations is for the years ended December 31, 2011, 2010 and 2009. All dollars are in thousands, except per share amounts, unless otherwise noted.)

The following discussion and analysis provides information that the Company's management believes is relevant to an assessment and understanding of the consolidated results of operations and financial condition of the Company. The discussion should be read in conjunction with the Company's consolidated financial statements included in this Annual Report on Form 10-K for the year ended December 31, 2011.

Reclassifications

Certain amounts previously reported within the Company's consolidated statements of income have been reclassified to conform to the current period presentation. These reclassifications include:

• Reclassifying "software services revenue" to "loan and guaranty servicing revenue."

• Reclassifying "professional and other services," "occupancy and communications," "postage and distribution," "advertising and marketing," and "trustee and other debt related fees" to "other" operating expenses.

• Reclassifying student list amortization, which was previously included in "advertising and marketing" to "depreciation and amortization."

The reclassifications had no effect on consolidated net income or consolidated assets and liabilities.

OVERVIEW

The Company is an education services company focused primarily on providing fee-based processing services and quality education-related products and services in four core areas: loan financing, loan servicing, payment processing, and enrollment services (education planning). These products and services help students and families plan, prepare, and pay for their education and make the administrative and financial processes more efficient for schools and financial organizations. In addition, the Company earns interest income on a portfolio of federally insured student loans.

30

The Company has certain business objectives in place that include:

- Continue to grow and diversify fee-based revenue
- Manage operating costs
- Maximize the value of existing portfolio
- Use liquidity to capitalize on market opportunities

Achieving these business objectives has impacted and will continue to impact the financial condition and operating results of the Company.

Continue to Grow and Diversify Fee-Based Revenue

The Company has expanded products and services generated from businesses that are not dependent upon the FFEL Program. The Company focuses primarily on expanding its fee-based products and services related to loan servicing, payment processing, and enrollment services. A summary of revenue from the Company's fee-based operating segments is shown below.

	Year ended December 31,				
	2011	2010	\$ Change	% Change	
Student Loan and Guaranty Servicing	\$175,657	158,838	16,819	10.6	%
Tuition Payment Processing and Campus Commerce	67,797	59,824	7,973	13.3	
Enrollment Services (a)	130,470	139,897	(9,427)	(6.7))
Total revenue from fee-based businesses	\$373,924	358,559	15,365	4.3	%

Enrollment services revenue has been negatively affected by the current regulatory uncertainty in the for-profit (a) college industry, which has caused schools to decrease spending on marketing efforts as further discussed in this Item 7 under "Enrollment Services Operating Segment – Results of Operations."

As shown below, the Company's revenue and income before taxes related to its fee-based operating segments continues to increase. The table below includes the consolidated operating results of the Company excluding the Asset Generation and Management Operating segment. Thus, the below table reflects the operating results of the Company as if it was not generating any earnings from its student loan portfolio.

Income (loss) before taxes (a)			
(\$5 million)	\$67 million	\$80 million	\$91 million

Excludes restructure, impairment, and litigation charges. Additional information on total operating expenses by (a) segment and these adjustments thereto are further discussed in this Item 7 under "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Manage Operating Costs

Excluding the cost to provide enrollment services; impairment, restructure, and litigation charges; and collection costs related to loan rehabilitation revenue, operating expenses in 2011 remained flat as compared to 2010, as further discussed in this Item 7 under "Results of Operations - Operating Expenses."

Maximize the Value of Existing Portfolio

Fixed rate floor income

Loans originated prior to April 1, 2006 generally earn interest at the higher of a floating rate based on the Special Allowance Payment formula set by the Department and the borrower rate, which is fixed over a period of time. The SAP formula is based on an applicable indice plus a fixed spread that is dependent upon when the loan was originated, the loan's repayment status, and funding sources for the loan. The Company generally finances its student loan portfolio with variable rate debt. In low and/or declining interest rate environments, when the fixed borrower rate is higher than the rate produced by the SAP formula, the Company's student loans earn at a fixed rate while the interest on the variable rate debt typically continues to decline. In these interest rate environments, the Company earns additional spread income that it refers to as floor income. For loans where the borrower rate is fixed to term, the Company earns floor income for an extended period of time, which the Company refers to as fixed rate floor income.

The Company has earned fixed rate floor income as summarized below:

	Year ended December 31,		
	2011	2010	
Fixed rate floor income, gross	\$164,700	151,861	
Derivative settlements (a)	(20,246) (19,618)
Fixed rate floor income, net	\$144,454	132,243	
Fixed rate floor income contribution to spread, net	0.60	% 0.52	%

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income.

The high levels of fixed rate floor income earned during 2011 and 2010 are due to historically low interest rates. In addition, the 2011 amount increased due to the purchase of the residual interest in \$1.9 billion of consolidation loans in July 2011. If interest rates remain low, the Company anticipates continuing to earn significant fixed rate floor income in future periods. See Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," which provides additional detail on the Company's portfolio earning fixed rate floor income and the derivatives used by the Company to hedge these loans.

Future Cash Flow from Portfolio

The majority of the Company's portfolio of student loans is funded in asset-backed securitizations that are structured to substantially match the maturity of the funded assets, thereby minimizing liquidity risk. In addition, due to (i) the difference between the yield the Company receives on the loans and cost of financing within these transactions, and (ii) the servicing and administration fees the Company earns from these transactions, the Company has created a portfolio that will generate earnings and significant cash flow over the life of these transactions.

As of December 31, 2011, based on cash flow models developed to reflect management's current estimate of, among other factors, prepayments, defaults, deferment, forbearance, and interest rates, the Company currently expects future undiscounted cash flows from its portfolio to be approximately \$1.81 billion.

A further description of these future cash flows can be found in this Item 7 under "Liquidity and Capital Resources."

Use Liquidity to Capitalize on Market Opportunities

The Company has used and will continue to use its improved liquidity position to capitalize on market opportunities, including FFELP student loan acquisitions; strategic acquisitions and investments in its core business areas of loan financing, loan servicing, payment processing, and enrollment services (education planning); and capital management initiatives, including stock repurchases, debt repurchases, and dividend distributions.

During 2011, the Company has used its improved liquidity to accomplish the following items:

FFELP Student Loan Acquisitions

-Purchased \$2.8 billion of FFELP student loans

Acquisitions and Investments in Core Business Areas

-Purchased contracts with more than 370 K-12 schools to provide tuition payment plan services

Capital Management

-Repurchased 1,436,423 shares of common stock for \$27.1 million (\$18.89 per share)

-Repurchased \$74.8 million notional amount of debt recognizing a gain of \$7.0 million

-

Raised the quarterly dividend paid on the Company's common stock to \$0.10 per share (\$17.8 million in total dividends paid in 2011)

RESULTS OF OPERATIONS

The Company's operating results are primarily driven by the performance of its existing portfolio and the revenues generated by its fee-based businesses and the costs to provide such services. The performance of the Company's portfolio is driven by interest income and losses related to credit quality of the assets along with the cost to administer and service the assets and related debt.

Net Interest Income

The Company generates a significant portion of its earnings from the spread, referred to as its student loan spread, between the yield the Company receives on its student loan portfolio and the cost of funding these loans. This spread income is reported on the Company's consolidated statements of income as net interest income. The amortization/accretion of loan premiums and discounts, including capitalized costs of origination, the 1.05% per year consolidation loan rebate fee paid to the Department, and yield adjustments from borrower benefit programs, are netted against loan interest income on the Company's consolidated statements of income. The amortization of debt issuance costs is included in interest expense on the Company's consolidated statements of income.

Investment interest income, which is a component of net interest income, includes income from unrestricted interest-earning deposits and investments and funds in the Company's special purpose entities, which are utilized for its asset-backed securitizations.

Net interest income also includes interest expense on unsecured debt offerings. The proceeds from these unsecured debt offerings were used by the Company to fund general business operations and certain asset and business acquisitions.

Provision for Loan Losses

Management estimates and establishes an allowance for loan losses through a provision charged to expense. Losses are charged against the allowance when management believes the collection of the loan principal is unlikely. Recovery of amounts previously charged off is credited to the allowance for loan losses. Management maintains the allowance for federally insured and non-federally insured loans at a level believed to be appropriate to provide for estimated probable credit losses inherent in the loan portfolio. This evaluation is inherently subjective because it requires estimates that may be susceptible to significant changes. The Company analyzes the allowance separately for its federally insured loans and its non-federally insured loans.

The allowance for the federally insured loan portfolio is based on periodic evaluations of the Company's loan portfolios considering loans in repayment versus those in a nonpaying status, delinquency status, trends in defaults in the portfolio based on Company and industry data, past experience, trends in student loan claims rejected for payment by guarantors, changes to federal student loan programs, current economic conditions, and other relevant factors. The federal government guarantees 97 percent of the principal of and the interest on federally insured student loans disbursed on and after July 1, 2006 (and 98 percent for those loans disbursed prior to July 1, 2006), which limits the Company's loss exposure on the outstanding balance of the Company's federally insured portfolio. Student loans disbursed prior to October 1, 1993 are fully insured.

In determining the appropriateness of the allowance for loan losses on the non-federally insured loans, the Company considers several factors including: loans in repayment versus those in a nonpaying status, delinquency status, type of program, trends in defaults in the portfolio based on Company and industry data, past experience, current economic conditions, and other relevant factors. The Company places a non-federally insured loan on nonaccrual status when the collection of principal and interest is 30 days past due and charges off the loan and accrued interest when the

collection of principal and interest is 120 days past due.

Other Income

The Company also earns fees and generates revenue from other sources as summarized below.

Student loan and guaranty servicing revenue – Student loan and guaranty servicing revenue consists of the the following items:

Loan and guaranty servicing fees – Loan servicing fees are determined according to individual agreements with customers and are calculated based on the dollar value of loans, number of loans, or number of borrowers serviced for each customer. Guaranty servicing fees, generally, are calculated based on the number of loans serviced, volume of loans serviced, or amounts collected. Revenue is recognized when earned pursuant to applicable agreements, and when ultimate collection is assured.

Software services revenue – Software services revenue is determined from individual agreements with customers and includes license and maintenance fees associated with student loan software products. Computer and software consulting and remote hosting revenues are recognized over the period in which services are provided to customers.

Tuition payment processing and campus commerce revenue – Tuition payment processing and campus commerce revenue primarily includes actively managed tuition payment solutions and online payment processing. Fees for these services are recognized over the period in which services are provided to customers.

Enrollment services revenue – Enrollment services revenue primarily consists of the following items:

Interactive marketing – Interactive marketing revenue is derived primarily from fees which are earned through the delivery of qualified inquiries or clicks. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectability is reasonably assured. Delivery is deemed to have occurred at the time a qualified inquiry or click is delivered to the customer provided that no significant obligations remain. From time to time, the Company may agree to credit certain inquiries or clicks if they fail to meet the contractual or other guidelines of a particular client. The Company has established a sales reserve based on historical experience. To date, such credits have been immaterial and within management's expectations.

For a portion of its interactive marketing revenue, the Company has agreements with providers of online media or traffic ("Publishers") used in the generation of inquiries or clicks. The Company receives a fee from its customers and pays a fee to Publishers either on a cost per inquiry, cost per click, or cost per number of impressions basis. The Company is the primary obligor in the transaction. As a result, the fees paid by the Company's customers are recognized as revenue and the fees paid to its Publishers are included in "cost to provide enrollment services" in the Company's consolidated statements of income.

List marketing – Revenue from the sale of lists is generally earned and recognized, net of estimated returns, upon delivery.

Publishing services – Revenue from the sale of print products is generally earned and recognized, net of estimated returns, upon shipment or delivery.

Resource centers – Resource centers services include online courses, scholarship search and selection data, career planning, and online information about colleges and universities. The majority of these services are sold based on subscriptions and/or are performance based. Revenues from sales of subscription and performance based services are recognized ratably over the term of the contract as earned. Subscription and performance based revenues received or receivable in advance of the delivery of services is included in deferred revenue.

Other income – Other income primarily includes borrower late fee income, which is earned by the education lending subsidiaries and is recognized when payments are collected from the borrower.

Operating Expenses

Operating expenses includes indirect costs incurred to acquire student loans; costs incurred to manage and administer the Company's student loan portfolio and its financing transactions; costs incurred to service the Company's student loan portfolio and the portfolios of third parties; collection costs related to rehabilitation revenue; the cost to provide enrollment services; costs incurred to provide tuition payment processing, campus commerce, resource center and list marketing services, and software and technical services to third parties; the depreciation and amortization of capital assets and intangible assets; investments in products, services, and technology to meet customer needs and support

continued revenue growth; and other general and administrative expenses. The cost to provide enrollment services, as discussed previously, consists of costs incurred to provide interactive marketing and publishing services in the Company's Enrollment Services operating segment. Operating expenses also includes impairment charges related to the impairment of goodwill and certain intangible assets and employee termination benefits, lease termination costs, and the write-down of certain assets related to the Company's restructuring initiatives. Operating expenses in 2010 also includes a litigation settlement charge.

Edgar Filing: NELNET INC - Form 10-K

Net Interest Income (net of settlements on derivatives)

	Year ended December 31,			December 31, 2011 vs. 2010		December 31, 2010 vs. 2009

The Company maintains an overall risk management strategy that incorporates the use of derivative instruments to reduce the economic effect of interest rate volatility. Management has structured the majority of the Company's (a) derivative transactions with the intent that each is economically effective; however, the Company's derivative instruments do not qualify for hedge accounting. Derivative settlements for each applicable period should be evaluated with the Company's net interest income.

Net interest income after provision for loan losses, net of settlements on derivatives, includes the following items:

	Year ended December 31,			December 31, 2011 vs. 2010		December 31, 2010 vs. 2009	
	2011	2010	2009	Increase(Decrease)		Increase(Decrease)	
				\$	%	\$	%
Variable net interest income, net of settlements on derivatives (a)	\$218,752	241,199	140,679	(22,447)	(9.3)%	100,520	71.5 %

Variable-rate floor income, net of settlements on derivatives (c)	—	—	7,502	—	—	(7,502)	(100.0)
Investment interest (d)	3,168	5,256	10,287	(2,088)	(39.7)	(5,031)	(48.9)
Corporate debt interest expense (e)	(9,649)	(21,891)	(28,935)	12,242	(55.9)	7,044	(24.3)
Provision for loan losses (f)	(21,250)	(22,700)	(29,000)	1,450	(6.4)	6,300	(21.7)
Net interest income after provision for loan losses (net of settlements on derivatives)	\$335,475	334,107	245,631	1,368	0.4 %	88,476	36.0 %

Variable student loan spread is impacted by variable rate student loan interest, consolidation rebate fees, (a) amortization/accretion of loan premiums and discounts, and interest expense on bonds and notes. See Item 7 under "Asset Generation and Management Operating Segment – Results of Operations" for additional information.

(b)

The Company has a portfolio of student loans that are earning interest at a fixed borrower rate which exceeds the statutorily defined variable lender rate generating fixed rate floor income. See Item 7A, “Quantitative and Qualitative Disclosures about Market Risk – Interest Rate Risk” for additional information.

(c) Loans that reset annually on July 1 can generate excess spread income compared with the rate based on the special allowance payment formula in declining interest rate environments. The Company refers to this additional income as variable-rate floor income. A portion of the Company's portfolio was earning variable-rate floor income during 2009 as a result of declining interest rates. No variable-rate floor income was earned during 2011 and 2010.

(d) Investment interest decreased year over year due to lower interest rates and a decrease in average cash held.

(e) Corporate debt interest expense includes interest expense incurred on the Company's 5.125% Senior Notes due 2010 (the "Senior Notes"), Junior Subordinated Hybrid Securities, and \$750 million unsecured line of credit.

Corporate debt interest expense decreased in 2011 compared to 2010 due to a reduction in debt outstanding due to the maturity of the Senior Notes on June 1, 2010, the purchase of Junior Subordinated Hybrid Securities during the third quarter of 2010, and using excess cash to pay down a portion of the unsecured line of credit.

Corporate debt interest expense decreased in 2010 compared to 2009 due to a reduction in debt outstanding due to the purchase of certain Senior Notes during the first, second, and third quarters of 2009, the maturity of the Senior Notes on June 1, 2010, and the purchase of Junior Subordinated Hybrid Securities during the third quarter of 2010.

The provision for loan losses represents the periodic expense of maintaining an allowance sufficient to absorb losses inherent in the Company's portfolio of loans. The non-federally insured loan provision decreased \$2.8 million and \$5.0 million during the years ended December 31, 2011 and 2010, respectively, compared to the same (f) periods in 2010 and 2009. The decrease in 2010 from 2009 is primarily due to a decrease in the dollar amount of the Company's non-federally insured student loan portfolio, including those loans in repayment and loans delinquent, as well as continued aging of the portfolio. The decrease in 2011 from 2010 is primarily due to the continued aging of the portfolio.

The federally insured loan provision increased \$1.3 million during the year ended December 31, 2011 compared to 2010, primarily due to an increase in delinquent loans. The federally insured loan provision decreased \$1.3 million for the year ended December 31, 2010 compared to 2009, primarily due to a decrease in delinquent loans.

Other Income

	Year ended December 31,			December 31, 2011 vs. 2010		December 31, 2010 vs. 2009			
	2011	2010	2009	Increase(Decrease) \$	%	Increase(Decrease) \$	%		
Loan and guaranty servicing revenue (a)	\$ 175,657	158,584	129,911	17,073	10.8 %	28,673	22.1 %		
Tuition payment processing and campus commerce revenue (b)	67,797	59,824	53,894	7,973	13.3	5,930	11.0		
Enrollment services revenue (c)	130,470	139,897	119,397	(9,427)	(6.7)	20,500	17.2		
Other income (d)	29,513	31,310	26,469	(1,797)	(5.7)	4,841	18.3		
Gain on sale of loans and debt repurchases (e)	8,340	78,631	76,831	(70,291)	(89.4)	1,800	2.3		
Derivative market value and foreign currency adjustments (f)	(17,807)	3,587	(30,802)	(21,394)	(596.4)	34,389	(111.6)		
Derivative settlements, net (g)	(7,840)	(14,264)	39,286	6,424	(45.0)	(53,550)	(136.3)		
Total other income	\$386,130	457,569	414,986	(71,439)	(15.6)%	42,583	10.3 %		

"Loan and guaranty servicing revenue" increased year over year due to an increase in loan servicing revenue from the Department of Education, an increase in guaranty servicing revenue as a result of recognizing revenue related to rehabilitation collections on defaulted loans, and due to the volume added to the the Company's servicing (a) platforms related to the hosted servicing software solution. This additional revenue was partially offset by a decrease in external FFELP servicing revenue due to the loss of servicing volume from third-party customers as a result of these customers selling their portfolios and portfolio runoff. See Item 7 under "Student Loan and Guaranty Servicing Operating Segment – Results of Operations" for additional information.

(b) "Tuition payment processing and campus commerce revenue" increased year over year due to an increase in the number of managed tuition payment plans and an increase in campus commerce customers.

(c) "Enrollment services revenue" decreased in 2011 compared to 2010 due mainly to a decrease in interactive marketing services volume, as well as decreases in publishing services revenue and resource center and list marketing revenue. Enrollment services revenue has been negatively affected by the current regulatory uncertainty in the for-profit college industry, which has caused schools to decrease spending on marketing efforts.

“Enrollment services revenue” increased in 2010 compared to 2009 due to an increase in interactive marketing revenue offset by a reduction in revenue related to other enrollment products and services.

See Item 7 under “Enrollment Services Operating Segment - Results of Operations” for additional information.

(d) The following table summarizes the components of "other income."

	Year ended December 31,		
	2011	2010	2009
Borrower late fee income	\$12,647	12,390	11,305
Investment advisory fees (1)	5,062	—	—
529 Plan administration fees	2,275	5,744	3,409
Other	9,529	13,176	11,755
Other income	\$29,513	31,310	26,469

Union Bank established various trusts whereby Union Bank serves as trustee for the purpose of purchasing, holding, managing, and selling investments in student loan asset backed securities. During 2011, the Company entered into an agreement to provide various advisory and management services on behalf of Union Bank with (1) respect to investments included in the trusts. The agreement provides that Union Bank will pay to the Company annual fees of 25 basis points on the outstanding balance of the investments in the trusts and 50 percent of the gains from the sale of securities from the trusts. As of December 31, 2011, the outstanding balance of investments in the trusts was \$394.2 million.

(e) “Gain on sale of loans and debt repurchases” includes the following:

	Year ended December 31, 2011			Year ended December 31, 2010			Year ended December 31, 2009		
	Notional amount	Purchase price	Gain	Notional amount	Purchase price	Gain	Notional amount	Purchase price	Gain
Gains on debt repurchases:									
Junior Subordinated Hybrid Securities	\$62,558	55,651	6,907	34,995	30,073	4,922	1,750	350	1,400
Asset-backed securities	12,254	12,199	55	690,750	650,789	39,961	348,155	319,627	28,528
5.125% Senior Notes due 2010	—	—	—	—	—	—	208,284	196,529	11,755
	\$74,812	67,850	6,962	725,745	680,862	44,883	558,189	516,506	41,683
Gain on sale of loans			1,378			33,748			35,148
Gain on sale of loans and debt repurchases, net			\$8,340			78,631			76,831

Due to improvements in the capital markets during 2011, the opportunities for the Company to repurchase debt at less than par are becoming more limited.

The change in “derivative market value and foreign currency adjustments” is the result of the change in the fair value (f) of the Company’s derivative portfolio and transaction gains/losses resulting from the re-measurement of the Company’s Euro-denominated bonds to U.S. dollars. These changes are summarized below.

Year ended December 31,		
2011	2010	2009

Edgar Filing: NELNET INC - Form 10-K

Change in fair value of derivatives - income (expense)	\$(50,513) (77,134) 6,852	
Foreign currency transaction adjustment - income (expense)	32,706	80,721	(37,654)
Derivative market value and foreign currency adjustments - income (expense)	\$(17,807) 3,587	(30,802)

38

The Company maintains an overall risk management strategy that incorporates the use of derivative instruments to reduce the economic effect of interest rate volatility. Management has structured the majority of the Company's (g) derivative transactions with the intent that each is economically effective; however, the Company's derivative instruments do not qualify for hedge accounting. Derivative settlements for each applicable period should be evaluated with the Company's net interest income.

Further detail of the components of derivative settlements is included in Item 7A, "Quantitative and Qualitative Disclosures about Market Risk."

Operating Expenses

As shown below, excluding the costs to provide enrollment services, impairment charges, restructuring charges, a litigation settlement, and collection costs related to loan rehabilitation revenue, operating expenses remained fairly flat in 2011 compared to 2010 and increased \$19.0 million (6.6%) in 2010 compared to 2009.

	Year ended December 31,			December 31, 2011 vs. 2010		December 31, 2010 vs. 2009		
	2011	2010	2009	Increase(Decrease)		Increase(Decrease)		
	\$	\$	\$	\$	%	\$	%	%
Salaries and benefits	\$177,951	166,011	151,285	11,940	7.2 %	14,726	9.7 %	
Other expenses	126,044	138,868	134,597	(12,824)	(9.2)	4,271	3.2	
Operating expenses, excluding cost to provide enrollment services; impairment, restructure, and litigation charges; and collection costs related to loan rehabilitation revenue	303,995	304,879	285,882	(884)	(0.3)%	18,997	6.6 %	
Cost to provide enrollment services	86,548	91,647	74,926					
Impairment expense (a)	—	26,599	32,728					
Restructure expense	—	6,020	7,982					
Litigation settlement (b)	—	55,000	—					
Collection costs related to loan rehabilitation revenue (c)	17,115	19,341	4,115					
Total operating expenses	\$407,658	503,486	405,633					

As a result of the 2010 annual goodwill impairment test, the Company recorded impairment charges at two reporting units. These charges consisted of \$23.9 million related to its interactive marketing business and \$2.7 million related to its list marketing business. As a result of the 2009 annual goodwill impairment test, the Company recorded impairment charges of \$32.7 million related to its list marketing business.

On August 13, 2010, the Company reached an agreement in principal to pay \$55.0 million to settle all claims associated with the "qui tam" action brought by Jon H. Oberg on behalf of the United States of America. The settlement agreement was finalized on October 25, 2010. As a result of the settlement, the Company recorded a \$55.0 million pre-tax charge during the third quarter of 2010 and paid the settlement on November 3, 2010.

The Company incurred collection costs directly related to revenue earned from rehabilitation loans. These costs are (c) included in "other" under the operating expense section of the consolidated statements of income and are shown separately in the above table for comparability purposes for the periods shown.

The change in operating expenses in 2011 compared to 2010 was due to the following items:

- An increase in salaries and benefits due to adding resources in preparation to support the hosted servicing software product and to service the growth related to the government servicing contract and the increase in the number of managed tuition payment plans and campus commerce customers.

A decrease in other expenses due primarily to a decrease in legal fees associated with the Oberg litigation which was settled in 2010, as well as a decrease in amortization related to student list costs. The decrease in other expenses was partially offset by an increase in expenses related to the government servicing contract and preparation of support for the hosted servicing software product.

The change in operating expenses in 2010 compared to 2009 was due to the following items:

- An increase in salaries and benefits as a result of adding resources to service the growth related to the government servicing contract.

• An increase in other expenses as a result of incurring additional costs related to the government servicing contract and an increase in legal fees associated with the Oberg litigation in 2010.

Income Taxes

The Company's effective tax rate was 36.5% and 37.5% for the years ended December 31, 2011 and 2010, respectively. The effective tax rate during 2011 decreased compared to 2010 due to a decrease in the Company's valuation allowance, state incentive tax credits, and an overall reduction of the Company's state effective tax rate.

The Company's effective tax rate was 37.5% and 35.5% for the years ended December 31, 2010 and 2009, respectively. The effective tax rate during 2010 increased compared to 2009 due to various state tax changes and changes in the Company's gross unrecognized tax benefits liability.

Segment Operating Results

Additional information on the Company's results of operations is included with the discussion of the Company's operating segments in this Item 7 under "Operating Segments."

Financial Condition as of December 31, 2011 compared to December 31, 2010

	As of December 31, 2011	As of December 31, 2010	Change Dollars	Percent	
Assets:					
Student loans receivable, net	\$24,297,876	23,948,014	349,862	1.5	%

Total liabilities and shareholders' equity	\$25,852,217	25,893,892	(41,675)	(0.2))%

The primary items on the Company's balance sheet are student loans and bonds and notes payable. During 2011, the Company acquired \$2.8 billion of student loans, which was partially offset by a decrease of student loans as a result of repayments and the loss of loans to consolidation to external parties. See the activity of loans acquired and loan repayments in this Item 7 under "Asset Generation and Management – Results of Operations." The change in bonds and notes payable was the result of the Company paying down \$448 million of unsecured corporate debt, partially offset

by funding the overall increase in student loan assets.

40

OPERATING SEGMENTS

The Company earns fee-based revenue through its Student Loan and Guaranty Servicing, Tuition Payment Processing and Campus Commerce, and Enrollment Services operating segments. In addition, the Company earns interest income on its student loan portfolio in its Asset Generation and Management operating segment. The Company's operating segments are defined by the products and services they offer or the types of customers they serve, and they reflect the manner in which financial information is currently evaluated by management.

The accounting policies of the Company's operating segments are the same as those described in note 2 in the notes to the consolidated financial statements included in this Report. Intersegment revenues are charged by a segment to another segment that provides the product or service. Intersegment revenues and expenses are included within each segment consistent with the income statement presentation provided to management. Changes in management structure or allocation methodologies and procedures may result in changes in reported segment financial information. In 2010, the Company began allocating certain corporate overhead expenses to the individual operating segments. These expenses include certain corporate activities related to executive management, human resources, accounting, legal, occupancy, and marketing. These costs are allocated to each operating segment based on estimated use of such activities and services. These allocations were not made in 2009, and thus are not reflected in the 2009 segment operating results.

The management reporting process measures the performance of the Company's operating segments based on the management structure of the Company as well as the methodology used by management to evaluate performance and allocate resources. Management, including the Company's chief operating decision maker, evaluates the performance of the Company's operating segments based on their profitability. As discussed further below, management measures the profitability of the Company's operating segments based on "base net income." Accordingly, information regarding the Company's operating segments is provided based on "base net income." The Company's "base net income" is not a defined term within generally accepted accounting principles ("GAAP") and may not be comparable to similarly titled measures reported by other companies. Unlike financial accounting, there is no comprehensive, authoritative guidance for management reporting.

"Base net income" is the primary financial performance measure used by management to develop the Company's financial plans, track results, and establish corporate performance targets and incentive compensation. While "base net income" is not a substitute for reported results under GAAP, the Company relies on "base net income" in operating its business because "base net income" permits management to make meaningful period-to-period comparisons of the operational and performance indicators that are most closely assessed by management. Management believes this information provides additional insight into the financial performance of the core business activities of the Company's operating segments.

Accordingly, the tables presented below reflect "base net income," which is reviewed and utilized by management to manage the business for each of the Company's operating segments. Reconciliation of the segment totals to the Company's consolidated operating results in accordance with GAAP are also included in the tables below. Included below under "Non-GAAP Performance Measures" is further discussion regarding "base net income" and its limitations, including a table that details the differences between "base net income" and GAAP net income by operating segment.

Income Taxes

For segment reporting, income taxes are applied based on 38% of income (loss) before taxes for each individual operating segment. The difference between the consolidated income tax expense and the sum of taxes calculated for each operating segment is included in income taxes in Corporate Activity and Overhead.

Reclassifications

Certain operating segment amounts previously reported have been reclassified to conform to the current period presentation. These reclassifications include reclassifying "software services revenue" to "loan and guaranty servicing revenue" and reclassifying "depreciation and amortization," "impairment expense," "restructure expense," and "litigation settlement," which were previously included in "other expenses." These reclassifications had no effect on any of the segments net income.

Non-GAAP Performance Measures

In accordance with the rules and regulations of the Securities and Exchange Commission, the Company prepares financial statements in accordance with generally accepted accounting principles. In addition to evaluating the Company's GAAP-based financial information, management also evaluates the Company's operating segments on a non-GAAP performance measure referred to as "base net income" for each operating segment. While "base net income" is not a substitute for reported results under GAAP, the Company relies on "base net income" to manage each operating segment because management believes these measures provide additional information regarding the operational and performance indicators that are most closely assessed by management.

"Base net income" is the primary financial performance measure used by management to develop financial plans, establish corporate performance targets, allocate resources, track results, evaluate performance, and determine incentive compensation. Accordingly, financial information is reported to management on a "base net income" basis by operating segment, as these are the measures used regularly by the Company's chief operating decision maker. The Company's board of directors utilizes "base net income" to set performance targets and evaluate management's performance. The Company also believes analysts, rating agencies, and creditors use "base net income" in their evaluation of the Company's results of operations. While "base net income" is not a substitute for reported results under GAAP, the Company utilizes "base net income" in operating its business because "base net income" permits management to make meaningful period-to-period comparisons by eliminating the temporary volatility in the Company's performance that arises from certain items that are primarily affected by factors beyond the control of management. Management believes "base net income" provides additional insight into the financial performance of the core business activities of the Company's operations.

Limitations of "Base Net Income"

While GAAP provides a uniform, comprehensive basis of accounting, for the reasons discussed above, management believes that "base net income" is an important additional tool for providing a more complete understanding of the Company's results of operations. Nevertheless, "base net income" is subject to certain general and specific limitations that investors should carefully consider. For example, as stated above, unlike financial accounting, there is no comprehensive, authoritative guidance for management reporting. The Company's "base net income" is not a defined term within GAAP and may not be comparable to similarly titled measures reported by other companies. Investors, therefore, may not be able to compare the Company's performance with that of other companies based upon "base net income." "Base net income" results are only meant to supplement GAAP results by providing additional information regarding the operational and performance indicators that are most closely monitored and used by the Company's management and board of directors to assess performance and information which the Company believes is important to analysts, rating agencies, and creditors.

Other limitations of "base net income" arise from the specific adjustments that management makes to GAAP results to derive "base net income" results. These differences are described below.

The adjustments required to reconcile from the Company's "base net income" measure to its GAAP results of operations relate to items that are excluded from management's evaluation of the Company's operating results. The following table reflects adjustments associated with these items by operating segment and Corporate Activity and Overhead:

(a) Income taxes are applied based on 38% for the individual operating segments.

Differences between GAAP and “Base Net Income”

Management’s financial planning and evaluation of operating results does not take into account the following items because their volatility and/or inherent uncertainty affect the period-to-period comparability of the Company’s results of operations. A more detailed discussion of the differences between GAAP and “base net income” follows.

Derivative market value and foreign currency adjustments: “Base net income” excludes the periodic unrealized gains and losses that are caused by the change in fair value on derivatives used in the Company’s risk management strategy in which the Company does not qualify for “hedge treatment” under GAAP. As such, the Company recognizes changes in fair value of derivative instruments currently in earnings. The Company maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to reduce the economic effect of interest rate

volatility. Derivative instruments primarily used by the Company to manage interest rate risk includes interest rate swaps and basis swaps. Management has structured the majority of the Company's derivative transactions with the intent that each is economically effective. However, the Company does not qualify its derivatives for "hedge treatment," and the stand-alone derivative must be marked-to-market in the income statement with no consideration for the corresponding change in fair value of the hedged item. The Company believes these point-in-time

estimates of asset and liability values that are subject to interest rate fluctuations make it difficult to evaluate the ongoing results of operations against its business plan and affect the period-to-period comparability of the results of operations. Included in “base net income” are the economic effects of the Company’s derivative instruments, which includes any cash paid or received being recognized as an expense or revenue upon actual derivative settlements. These settlements are included in “derivative market value and foreign currency adjustments and derivative settlements, net” on the Company’s consolidated statements of income.

“Base net income” excludes the foreign currency transaction gains or losses caused by the re-measurement of the Company’s Euro-denominated bonds to U.S. dollars. In connection with the issuance of the Euro-denominated bonds, the Company has entered into cross-currency interest rate swaps. Under the terms of these agreements, the principal payments on the Euro-denominated notes will effectively be paid at the exchange rate in effect between the U.S. dollar and Euro at the issuance date of the bonds. The cross-currency interest rate swaps also convert the floating rate paid on the Euro-denominated bonds (EURIBOR index) to an index based on LIBOR. Included in “base net income” are the economic effects of any cash paid or received being recognized as an expense or revenue upon actual settlements of the cross-currency interest rate swaps. These settlements are included in “derivative market value and foreign currency adjustments and derivative settlements, net” on the Company’s consolidated statements of income. However, the gains or losses caused by the re-measurement of the Euro-denominated bonds to U.S. dollars and the change in market value of the cross-currency interest rate swaps are excluded from “base net income” as the Company believes the point-in-time estimates of value that are subject to currency rate fluctuations related to these financial instruments make it difficult to evaluate the ongoing results of operations against the Company’s business plan and affect the period-to-period comparability of the results of operations. The re-measurement of the Euro-denominated bonds generally correlates with the change in fair value of the cross-currency interest rate swaps. However, the Company will experience unrealized gains or losses related to the cross-currency interest rate swaps if the two underlying indices (and related forward curve) do not move in parallel.

The gains and/or losses included in “derivative market value and foreign currency adjustments and derivative settlements, net” on the Company’s consolidated statements of income are primarily caused by interest rate and currency volatility, as well as the volume and terms of derivatives not receiving hedge treatment. “Base net income” excludes these unrealized gains and losses and isolates the effect of interest rate and currency volatility related to the fair value of such instruments during the period. Under GAAP, the effects of these factors on the fair value of the derivative instruments (but not the underlying hedged item) tend to show more volatility in the short term.

Amortization of intangible assets: “Base net income” excludes the amortization of acquired intangibles, which arises primarily from the acquisition of definite life intangible assets in connection with the Company’s business and asset acquisitions, since the Company feels that such charges do not drive the Company’s operating performance on a long-term basis and can affect the period-to-period comparability of the results of operations.

Compensation related to business combinations: The Company has structured certain business combinations in which the consideration paid has been dependent on the sellers' continued employment with the Company. As such, the value of the consideration paid is recognized as compensation expense by the Company over the term of the applicable employment agreement. “Base net income” excludes this expense because the Company believes such charges do not drive its operating performance on a long-term basis and can affect the period-to-period comparability of the results of operations. If the Company did not enter into the employment agreements in connection with the acquisition, the amount paid to these former shareholders of the acquired entity would have been recorded by the Company as additional consideration of the acquired entity, thus, not having an effect on the Company's results of operations. The compensation expense related to these existing agreements was fully expensed in 2009.

Variable-rate floor income, net of settlements on derivatives: Loans that reset annually on July 1 can generate excess spread income compared with the rate based on the special allowance payment formula in declining interest rate

environments. The Company refers to this additional income as variable-rate floor income. The Company excludes variable-rate floor income, net of settlements paid on derivatives used to hedge student loan assets earning variable-rate floor income, from its “base net income” since the timing and amount of variable-rate floor income (if any) is uncertain, it has been eliminated by legislation for all loans originated on and after April 1, 2006, and it is in excess of expected spreads. In addition, because variable-rate floor income is subject to the underlying rate for the subject loans being reset annually on July 1, it is a factor beyond the Company's control which can affect the period-to-period comparability of results of operations.

STUDENT LOAN AND GUARANTY SERVICING OPERATING SEGMENT – RESULTS OF OPERATIONS

The following are the primary service offerings the Company offers as part of its Student Loan and Guaranty Servicing segment:

• Servicing FFELP loans

• Originating and servicing non-federally insured student loans

• Servicing federally-owned student loans for the Department of Education

• Servicing and outsourcing services for guaranty agencies

- Providing student loan servicing software and other information technology products and services

The Student Loan and Guaranty Servicing operating segment provides for the servicing of the Company's student loan portfolio and the portfolios of third parties. The loan servicing activities include loan origination activities, loan conversion activities, application processing, borrower updates, payment processing, due diligence procedures, funds management reconciliations, and claim processing. These activities are performed internally for the Company's portfolio in addition to generating external fee revenue when performed for third-party clients.

Beginning in 2009, the Company began servicing loans for the Department of Education as further discussed below.

This operating segment also provides servicing activities for guarantee agencies. These activities include providing software and data center services, borrower and loan updates, default aversion tracking services, claim processing services, and post-default collection services.

This operating segment also provides student loan servicing software, which is used internally by the Company and licensed to third-party student loan holders and servicers. This software system has been adapted so that it can be offered as a hosted servicing software solution that can be used by third parties to service various types of student loans, including Federal Direct Loan Program and FFEL Program loans. In October 2011, the Company began hosting student loan servicing volume on its servicing software platforms to a significant customer. The Company earns a monthly fee from remote hosting customers for each unique borrower on the Company's platform. As of December 31, 2011, 9.6 million borrowers were hosted on the Company's hosted servicing software solution platforms. In addition, this operating segment provides information technology products and services, with core areas of business in educational loan software solutions, technical consulting services, and enterprise content management solutions.

Direct Loan Servicing Contract

In June 2009, the Company was one of four private sector companies awarded a student loan servicing contract by the Department to provide additional servicing capacity for loans owned by the Department. These loans include Federal Direct Loan Program loans and FFEL Program loans purchased by the Department. The Company earns a monthly fee from the Department for each unique borrower who has loans owned by the Department and serviced by the Company. In September 2009, the Department began assigning purchased FFELP loans to the four servicers. Beginning with the second year of servicing, the Department began allocating new loan volume among the four servicers based on five performance metrics.

Three metrics measure the satisfaction among separate customer groups, including borrowers, financial aid personnel at postsecondary schools participating in the federal student loan programs, and Federal Student Aid and other federal agency personnel or contractors who work with the servicers.

Two performance metrics measure the success of default prevention efforts as reflected by the percentage of borrowers and percentage of dollars in each servicer's portfolio that go into default.

Based on the first and second years of survey results, the Company was ranked fourth out of the four private sector companies and has been allocated 16% of new loan volume originated by the Department from the period from August 15, 2010 through August 14, 2012 (the second and third years of the servicing contract). The Department projects it will originate new loans for 4.1 million borrowers in total during the third year of this contract (August 15, 2011 through August 14, 2012), which is currently being allocated to the four servicers. Higher allocations could increase total revenue and profit margins. The Company is focused on improving survey results to increase this allocation in future periods and has and will continue to incur additional operating expenses in support of these initiatives.

The servicing contract with the Department spans five years (through June 2014), with one five-year renewal at the option of the Department. Servicing loans under this contract will increase revenue earned by this segment. However, as the federally-owned student loan portfolio becomes a larger portion of the Company's total student loan servicing portfolio, operating margins are expected to be lower than historical levels achieved.

Segment Summary of Results

Significant items impacting 2011 operating results include:

• A decrease in FFELP servicing revenue due to the loss of servicing volume from third-party customers.

• An increase in government servicing revenue due to increased volume from the Department.

• Excluding rehabilitation collections, a decrease in guaranty servicing revenue due to the amortization of the guaranty servicing portfolio.

• An increase in software services revenue as a result of the Company beginning to provide hosted student loan servicing to a significant customer in October 2011.

• A decrease in operating margin due to the government servicing portfolio growing as a percentage of the Company's total servicing portfolio.

• An increase in operating expenses due to incurring additional costs related to the government servicing contract and the hosted servicing software product.

Loan and guaranty servicing revenue	\$1,451	174,206	175,657	1,848	156,990	158,838	3,016	128,421	131,437
-------------------------------------	---------	---------	---------	-------	---------	---------	-------	---------	---------

Year ended December 31, 2011 compared to the year ended December 31, 2010

Loan and guaranty servicing revenue.

FFELP servicing revenue decreased in 2011 compared to 2010 due to the loss of servicing volume from third-party customers as a result of these customers selling their portfolios to the Company and/or the Department of

(a) Education under a program that offered liquidity to student loan lenders. The decrease is also due to third-party customers' FFELP portfolios decreasing in size due to runoff.

(b) Non-federally insured servicing revenue increased during 2011 compared to 2010 due to an overall increase in volume and the addition of a new customer contract.

(c) Government servicing revenue increased during 2011 compared to 2010 due to an increase in volume from the Department.

Guaranty servicing revenue increased in 2011 compared to 2010 due to additional revenue earned from rehabilitation collections on defaulted loan assets. For the year ended December 31, 2011, the Company earned

(d) \$34.2 million in revenue from rehabilitation collections compared to \$33.4 million for the same period in 2010. Excluding the rehabilitation collection revenue, revenue from guaranty servicing decreased \$0.4 million for the year ended December 31, 2011 compared to the same period in 2010 due to the amortization of the guaranty servicing portfolio.

In October 2011, the Company began providing hosted student loan servicing to a significant customer which resulted in an increase of software services revenue compared to the prior year. This increase was offset by a

(e) reduction in revenue due to a decrease in the number of other products and services provided to external customers as a result of legislative changes in the student loan industry.

Intersegment servicing revenue. Intersegment servicing revenue includes servicing revenue earned for the Student Loan and Guaranty Servicing operating segment as a result of servicing loans for the Asset Generation and Management operating segment.

Operating expenses. Excluding restructure expense and collection costs related to loan rehabilitation revenue, 2011 operating expenses increased \$12.1 million (8.3%) compared with the same period in 2010. These increases were due to incurring additional costs related to:

• Supporting the increase in government servicing volume.

• Supporting initiatives to improve performance metrics under the government servicing contract.

• Preparing for the additional volume that was added to the Company's servicing platforms in October 2011 related to the hosted servicing software solution.

The Company expects continued compression of operating margin in this operating segment as a result of the government servicing portfolio growing as a percentage of the Company's total servicing portfolio.

Year ended December 31, 2010 compared to the year ended December 31, 2009

Loan and guaranty servicing revenue.

- (a) FFELP origination revenue decreased in 2010 compared with 2009 due to legislative changes and market disruptions causing lenders to exit the FFELP marketplace. In addition, effective July 1, 2010, the Reconciliation Act of 2010 prohibits new loan originations under the FFEL Program. FFELP servicing revenue decreased in 2010 due to the loss of servicing volume from third-party customers as a result of these customers selling their portfolios to the Company and/or the Department of Education under a program that offered liquidity to student loan lenders.
- (b) Non-federally insured servicing revenue increased during 2010 compared to 2009 due to an overall increase in volume and the addition of customer contracts.
- (c) Government servicing revenue increased during 2010 compared to 2009 due to an increase in volume from the Department.
- (d) Guaranty servicing revenue increased in 2010 compared to 2009 due to additional revenue earned from rehabilitation collections on defaulted loan assets. For the year ended December 31, 2010, the Company earned \$33.4 million in revenue

from rehabilitation collections compared to \$7.8 million for the same period in 2009. Excluding rehabilitation collection revenue, revenue from guaranty servicing decreased \$2.8 million for the year ended December 31, 2010 compared to the same period in 2009 due to the amortization of the guaranty servicing portfolio and the elimination of FFELP origination activity in 2010.

Software services revenue decreased in 2010 compared to 2009 as the result of a reduction in the number of (e) projects for external customers due to the legislative changes in the student loan industry throughout 2009 and 2010.

Intersegment servicing revenue. Intersegment servicing revenue includes servicing revenue earned for the Student Loan and Guaranty Servicing operating segment as a result of servicing loans for the Asset Generation and Management operating segment.

Operating expenses. Excluding restructure charges and collection fees paid related to rehabilitation revenue, 2010 operating expenses increased \$11.1 million (8.2%) compared to the same period in 2009. The additional operating costs were incurred as a direct result of supporting the government servicing volume increase.

TUITION PAYMENT PROCESSING AND CAMPUS COMMERCE OPERATING SEGMENT – RESULTS OF OPERATIONS

The Company's Tuition Payment Processing and Campus Commerce operating segment provides products and services to help students and families manage the payment of education costs at all levels (K-12 and higher education). It also provides innovative education-focused technologies, services, and support solutions to help schools with the everyday challenges of collecting and processing commerce data.

In the K-12 market, the Company offers actively managed tuition payment plans, as well as assistance with financial needs assessment and donor management. The Company offers two principal products to the higher education market: actively managed tuition payment plans and campus commerce technologies and payment processing. On June 30, 2011, the Company purchased contracts with more than 370 K-12 schools to provide tuition payment plan services. This increased the number of K-12 schools the Company works with by eight percent.

This segment of the Company's business is subject to seasonal fluctuations which correspond, or are related to, the traditional school year. Tuition management revenue is recognized over the course of the academic term, but the peak operational activities take place in summer and early fall. Revenue associated with providing electronic commerce subscription services is recognized over the service period with the highest revenue months being July through September and December and January. The Company's operating expenses do not follow the seasonality of the revenues. This is primarily due to generally fixed year-round personnel costs and seasonal marketing costs. Based on the timing of revenue recognition and when expenses are incurred, revenue and pre-tax operating margin are higher in the first quarter and lower in the second quarter.

Segment Summary of Results

Significant items impacting 2011 operating results include:

- An increase in revenue as a result of an increase in the number of managed tuition payment plans and campus commerce customers.

- An improved operating margin, which includes strong revenue growth while still incurring expenses related to continued investments in new products and services.

Summary and Comparison of Operating Results

	Year ended December 31,			December 31, 2011 vs. 2010 Increase (Decrease)		December 31, 2010 vs. 2009 Increase (Decrease)

Income tax expense	(7,709)	(6,189)	(6,156)	(1,520)	24.6	(33)	0.5
"Base net income"	\$12,580	10,092	10,046	2,488	24.7 %	46	0.5 %
Before Tax Operating Margin, excluding corporate overhead allocation	32.0 %	30.5 %	30.0 %				

Tuition payment processing and campus commerce revenue. Tuition payment processing and campus commerce revenue has been increasing year over year as a result of an increase in the number of managed tuition payment plans as well as an increase in campus commerce customers.

Operating expenses. Operating expenses have also been increasing year over year as a result of incurring additional costs to support the increase in the number of managed tuition payment plans and campus commerce customers. In addition, the Company continues to invest in new products and services to meet customer needs and expand product and service offerings. The amount and types of investments made by the Company impacts operating expenses and operating margin from period to period.

ENROLLMENT SERVICES OPERATING SEGMENT – RESULTS OF OPERATIONS

The Enrollment Services operating segment offers products and services that are focused on helping colleges recruit and retain students (interactive and list marketing services) and helping students plan and prepare for life after high school and/or military service (publishing services and resource centers). Interactive marketing products and services include agency of record services, qualified inquiry generation, pay per click services, inquiry management software, and other marketing management, along with call center solutions. The inquiry management software allows schools to manage their inquiry flow and perform analytics on the inquiries received by the school. The majority of interactive marketing revenue is derived from fees that are earned through the delivery of qualified inquiries or clicks to colleges and universities. List marketing services include providing lists to help higher education institutions and businesses reach the middle school, high school, college bound high school, college, and young adult market places. Publishing services include test preparation study guides, school directories and databases, and career exploration guides. Resource centers include online courses, scholarship search and selection data, career planning, and on-line information about colleges and universities.

Certain provisions in new Gainful Employment regulations issued by the Department under the Higher Education Act that became effective July 1, 2011 could have an impact on the Company's Enrollment Services operating segment, in connection with services it provides to for-profit schools. The Higher Education Act provides that to be eligible to participate in Federal student financial aid programs (Title IV funds), educational institutions, including for-profit schools, must enter into a program participation agreement with the Department. The agreement includes a number of conditions with which an institution must comply to be granted initial and continuing eligibility to participate. Among those conditions is a prohibition on institutions providing any commission, bonus, or other incentive payment to any individual or entity engaged in recruiting or admission activities, based on their success in securing enrollments. Previous regulations included a number of activities, or "safe harbors," that did not constitute prohibited incentive compensation. One of those safe harbors permitted an institution to provide incentive compensation for internet-based recruitment and admission activities. The Department's newly issued regulations repeal all existing safe harbors regarding incentive compensation in recruiting, though exempting "click"-based payments to third parties who provide internet

generated student contact information. The new regulations also create liability for misrepresentation in advertisements, offers, and communications presented to prospective students, with associated penalties for noncompliance with these standards.

In addition, these new regulations impose strict liability on educational institutions for misrepresentations made by entities, like the Company, who contract with the institutions to provide marketing services. As a result, the Company's school customers have demanded and, in limited circumstances, the Company has acquiesced to be subject to increased limitations of liability in its contracts and, in some cases, to indemnify its customers for actions by its third-party publishers. The Company has developed proprietary software systems and processes to detect and remediate potential misrepresentation violations.

The Department also recently issued new regulations under Title IV of the Higher Education Act providing that for-profit schools are eligible to participate in Title IV student financial aid programs only with respect to educational programs that lead to "gainful employment" in a recognized occupation. These regulations, most of which became effective July 1, 2011, require for-profit schools to provide prospective students with each eligible program's recognized occupations, cost, completion rate, job placement rate, and median loan debt of those that have completed the program, and provide that Title IV funds may not be available to students enrolled in educational programs offered by for-profit schools if those programs do not meet certain debt-to-income ratios and loan repayment metrics to be measured beginning July 1, 2012.

Significantly all interactive marketing revenue (which makes up approximately 80 percent of total revenue included in this segment) is generated from for-profit schools. The regulations discussed above may subject the Company to greater risk of liability and may increase the Company's costs of compliance with these regulations or limit the Company's ability to serve for-profit schools. In addition, these regulations could negatively impact enrollment at for-profit schools, which could adversely affect interactive marketing revenue.

Segment Summary of Results

Significant items impacting 2011 operating results include a decrease in revenue and operating margin due to the effects from current regulatory uncertainty in the for-profit college industry, which has caused schools to decrease spending on marketing efforts.

Summary and Comparison of Operating Results

	Year ended December 31,			December 31, 2011 vs. 2010 Increase (Decrease)		December 31, 2010 vs. 2009 Increase (Decrease)

Gross profit %	25.2	% 65.7	% 29.8	%	

Enrollment services revenue, cost to provide enrollment services, and gross profit.

Year ended December 31, 2011 compared to December 31, 2010

(a) Interactive marketing revenue decreased \$6.9 million (5.9%) for the year ended December 31, 2011 compared with 2010 as a result of a decrease in interactive marketing services volume. The gross profit margin for the year ended December 31, 2011 compared to 2010 decreased as a result of more competitive pricing. Revenue and profit margin have been affected by the current regulatory uncertainty in the for-profit college industry, which has caused schools to decrease spending on marketing efforts.

(b) Publishing services revenue decreased \$1.4 million (12.9%) for the year ended December 31, 2011 compared with 2010 due to competition related to online delivery of similar products and the timing of book releases and types of products sold. The gross profit margin for publishing increased for the year ended December 31, 2011 compared to the same period in 2010 as a result of a shift in the mix of products sold.

(c) Resource centers and list marketing revenue decreased \$1.1 million (8.7%) for year ended December 31, 2011 compared with 2010 due to decreases in customer spending in both resource center products and list sales.

Year ended December 31, 2010 compared to December 31, 2009

(a) Interactive marketing revenue increased \$21.3 million (22.5%) for the year ended December 31, 2010 compared with 2009 as a result of an increase in interactive marketing services volume. The gross profit margin for the year ended December 31, 2010 compared to 2009 decreased as a result of a decrease in sales of products with a higher profit margin.

(b) Publishing services revenue decreased \$1.3 million (10.3%) for the year ended December 31, 2010 compared with 2009 due to competition related to online delivery of similar products. The gross profit margin for publishing and editing services increased as a result of a shift in the mix of products sold.

(c) Resource centers and list marketing revenue increased \$0.5 million (3.7%) for year ended December 31, 2010 compared with 2009. Resource centers revenue increased due to an increase in contracts for new customers and pricing increases for existing customers. The increase in resource centers revenue was offset by a decrease in list sales.

Depreciation and amortization. Depreciation and amortization for the years ended December 31, 2011, 2010, and 2009, includes \$2.7 million, \$6.6 million, and \$2.9 million, respectively, of amortization expense related to student list costs. In 2010, the Company accelerated the amortization of student list costs to better reflect the pattern in which the economic benefit of this asset is used to generate revenue.

Impairment expense. As a result of the 2010 annual goodwill impairment test, the Company recorded impairment charges at two reporting units included in the Enrollment Services operating segment. These charges consisted of \$23.9 million related to its interactive marketing business and \$2.7 million related to its list marketing business. As a result of the 2009 annual goodwill impairment test, the Company recorded impairment charges of \$32.7 million related to its list marketing business.

Operating expenses. Excluding the cost to provide enrollment services, student list cost amortization expense, and impairment charges, operating expenses for year ended December 31, 2011 was flat compared to 2010 due to a reduction in facilities costs, offset by investment in new products and services to meet customer needs and expand service offerings.

Excluding the cost to provide enrollment services, student list amortization expense, and impairment charges, operating expenses increased \$3.5 million (10.1%) for the year ended December 31, 2010 compared to 2009 as a result of investment in new products and services to meet customer needs and expand product and service offerings.

ASSET GENERATION AND MANAGEMENT OPERATING SEGMENT – RESULTS OF OPERATIONS

The Asset Generation and Management Operating Segment includes the acquisition, management, and ownership of the Company's student loan assets, which was historically the Company's largest product and service offering. The Company generates a substantial portion of its earnings from the spread, referred to as the Company's student loan spread, between the yield it receives on its student loan portfolio and the associated costs to finance such portfolio. The student loan assets are held in a series of education lending subsidiaries designed specifically for this purpose. In addition to the student loan spread earned on its portfolio, all costs and activity associated with managing the portfolio, such as servicing of the assets and debt maintenance, are included in this segment.

Segment Summary of Results

Significant items impacting 2011 operating results include:

Continued recognition of significant fixed rate floor income due to historically low interest rates.

The purchase of \$2.8 billion of FFELP student loans during 2011 from various third parties, including the \$1.9 billion loan acquisition described below.

Loan Acquisition

On July 8, 2011, the Company purchased the residual interest in \$1.9 billion of securitized federally insured consolidation loans. The Company acquired the ownership interest in GCO SLIMS Trust I giving the Company rights to the residual interest in GCO Education Loan Funding Trust-I (the "GCO Trust"). The GCO Trust includes federally insured consolidation loans funded to term with \$1.9 billion of bonds and notes payable. The Company has consolidated these trusts on its consolidated balance sheet because management has determined the Company is the primary beneficiary of the trusts. Upon acquisition of the assets, the Company recorded the student loans and bonds and notes payable at fair value, resulting in the recognition of a student loan discount of \$153.9 million and a bonds and notes payable discount of \$174.9 million. These discounts will be accreted using the effective interest method over the lives of the underlying assets and liabilities.

Student Loan Portfolio

The tables below outline the components of the Company's student loan portfolio:

	As of December 31, 2011	As of December 31, 2010	Held for sale (a)	As of December 31, 2009
	Held for investment	Held for investment		Held for investment
Federally insured loans:				
Stafford and other	\$7,480,182	7,927,525	—	7,620,792
Consolidation	16,852,527	15,830,174	—	15,851,761
Total	24,332,709	23,757,699	—	23,472,553
Non-federally insured loans	26,916	26,370	84,987	163,321
	24,359,625	23,784,069	84,987	23,635,874
Unamortized loan (discount) premium and deferred origination costs, net	(13,267)	207,571	—	341,970
Allowance for loan losses – federally insured loans	(37,205)	(32,908)	—	(30,102)
Allowance for loan losses – non-federally insured loans	(11,277)	(10,718)	—	(20,785)
	\$24,297,876	23,948,014	84,987	23,926,957
Allowance for federally insured loans as a percentage of such loans	0.15	% 0.14	%	0.13 %
Allowance for non-federally insured loans as a percentage of such loans (b)	41.90	% 40.64	%	12.73 %

(a) On January 13, 2011, the Company sold a portfolio of non-federally insured loans for proceeds of \$91.3 million (100% of par value). The Company retained credit risk related to this portfolio and will pay cash to purchase back any loans which become 60 days delinquent. As of December 31, 2010, the Company classified this portfolio as held-for-sale and the loans were carried at fair value.

(b) The allowance for non-federally insured loans as a percentage of such loans significantly increased during 2010. After selling a significant portion of its non-federally insured loans in 2009 and 2010, the remaining balance of non-federally insured loans classified as held for investment includes loans with higher credit risk.

Loan Activity

The following table sets forth the activity of loans classified as "held for investment":

	Year ended December 31,		
	2011	2010	2009
Beginning balance (loans held for investment)	\$23,784,069	23,635,874	25,061,049

--------------------------------------------	--------------	------------	------------

(a) The Reconciliation Act of 2010 resulted in the Company discontinuing originations of new loans under the FFEL Program effective July 1, 2010. However, the Company believes there will be opportunities to continue to

58

purchase FFELP loan portfolios from current FFELP participants looking to adjust their FFELP businesses. For example, during 2011 and 2010, the Company purchased \$2.8 billion and \$3.4 billion, respectively, of FFELP student loans from various third parties.

(b) During both 2010 and 2009, the Company sold \$2.1 billion of student loans to the Department under a program that provided liquidity to student loan lenders. The loan sales in 2011 were not significant.

Activity in the Allowance for Loan Losses

The provision for loan losses represents the periodic expense of maintaining an allowance sufficient to absorb losses, net of recoveries, inherent in the portfolio of student loans. Activity in the allowance for loan losses is shown below.

	Year ended December 31,		
	2011	2010	2009
Balance at beginning of period	\$43,626	50,887	50,922
Provision for loan losses:			
Federally insured loans	20,000	18,700	20,000
Non-federally insured loans	1,250	4,000	9,000
Total provision for loan losses	21,250	22,700	29,000
Charge-offs:			
Federally insured loans	(17,166)	(18,603)	(14,954)
Non-federally insured loans	(4,147)	(7,282)	(5,304)
Total charge-offs	(21,313)	(25,885)	(20,258)
Recoveries - non-federally insured loans	1,310	1,263	1,543
Purchase (sale) of loans, net:			
Federally insured loans	1,463	2,710	(520)
Non-federally insured loans	—	220	—
Reserve related to loans reclassified to held for sale	—	(6,269)	—
Transfer to/from repurchase obligation related to loans sold/purchased, net	2,146	(2,000)	(9,800)
Balance at end of period	\$48,482	43,626	50,887

Federally insured loans	\$37,205	32,908	30,102
Non-federally insured loans	11,277	10,718	20,785
Total allowance for loan losses	\$48,482	43,626	50,887

Repurchase Obligations

As of December 31, 2011, the Company had participated a cumulative amount of \$117.1 million of non-federally insured loans to third parties. Loans participated under these agreements have been accounted for by the Company as loan sales. Accordingly, the participation interests sold are not included on the Company's consolidated balance sheets. Per the terms of the servicing agreements, the Company's servicing operations are obligated to repurchase loans subject to the participation interests in the event such loans become 60 or 90 days delinquent.

In addition, on January 13, 2011, the Company sold a portfolio of non-federally insured loans for proceeds of \$91.3 million (100% par value). The Company retained credit risk related to this portfolio and will pay cash to purchase back any loans which become 60 days delinquent.

The Company's estimate related to its obligation to repurchase these loans is included in "other liabilities" in the Company's consolidated balance sheets. The activity related to this accrual is detailed below.

	Year ended December 31,		
	2011	2010	2009
Beginning balance	\$ 12,600	10,600	—
Repurchase obligation transferred to/from the allowance for loan losses related to loans purchased/sold, net	(2,146) 2,000	9,800
Repurchase obligation associated with loans sold	6,269	—	—
Current period expense	2,500	—	800
Ending balance	\$ 19,223	12,600	10,600

Student Loan Status and Delinquencies

Delinquencies have the potential to adversely impact the Company's earnings through increased servicing and collection costs and account charge-offs. The table below shows the Company's student loan delinquency amounts on loans held for investment.

	As of December 31,		2010		2009	
	2011		Dollars	Percent	Dollars	Percent
Federally Insured Loans:						
Loans in-school/grace/deferment (a)	\$ 3,664,899		\$ 4,358,616		\$ 5,783,648	
Loans in forbearance (b)	3,330,452		2,984,869		2,495,672

Total loans in repayment	17,337,358	100.0 %	16,414,214	100.0 %	15,193,233	100.0 %
Total federally insured loans	\$ 24,332,709		\$ 23,757,699		\$ 23,472,553	
Non-Federally Insured Loans:						
Loans in-school/grace/deferment (a)	\$ 2,058		\$ 3,500		\$ 34,815	
Loans in forbearance (b)	371		292		1,919	
Loans in repayment status:						
Loans current	16,776	68.5 %	16,679	73.9 %	118,761	93.8 %
Loans delinquent 31-60 days (c)	706	2.9	1,546	6.8	3,023	2.4
Loans delinquent 61-90 days (c)	1,987	8.1	1,163	5.2	1,559	1.2
Loans delinquent 91 days or greater (c)	5,018	20.5	3,190	14.1	3,224	2.5
Total loans in repayment	24,487	100.0 %	22,578	100.0 %	126,567	100.0 %
Total non-federally insured loans	\$ 26,916		\$ 26,370		\$ 163,301	

Loans for borrowers who still may be attending school or engaging in other permitted educational activities and are (a) not yet required to make payments on the loans, e.g., residency periods for medical students or a grace period for bar exam preparation for law students.

(b) Loans for borrowers who have temporarily ceased making full payments due to hardship or other factors, according to a schedule approved by the servicer consistent with the established loan program servicing procedures

and policies.

- (c) The period of delinquency is based on the number of days scheduled payments are contractually past due and relate to repayment loans, that is, receivables not charged off, and not in school, grace, deferment, or forbearance.

60

- (d) A portion of loans included in loans delinquent 271 days or greater include federally insured loans in claim status, which are loans that have gone into default and have been submitted to the guaranty agency.

The delinquency trends on the Company's portfolio of loans have increased as of December 31, 2011 due to the sustained downturn in the economy. In addition, the Company has focused significant time and resources on the government servicing contract, which has negatively impacted the delinquency performance of its portfolio. The increased delinquencies resulted in an increase in the federally insured loan provision in 2011 compared to 2010.

The Company's non-federally insured loan portfolio has decreased since 2008 as a result of loan sales, runoff, and the Company no longer originating non-federally insured loans. The amortization of the non-federally insured student loan portfolio during 2010 and 2011 resulted in provision expense being less than charge-offs during these periods.

Student Loan Spread Analysis

The following table analyzes the student loan spread on the Company's portfolio of student loans and represents the spread on assets earned in conjunction with the liabilities and derivative instruments used to fund the assets.

	Year ended December 31,					
	2011		2010		2009	
Variable student loan yield, gross	2.58	%	2.64	%	2.87	%
Consolidation rebate fees	(0.72))	(0.68))	(0.70))
Premium/discount and deferred origination costs amortization/accretion (a)	(0.09))	(0.20))	(0.30))
Variable student loan yield, net	1.77		1.76		1.87	
Student loan cost of funds - interest expense	(0.84))	(0.83))	(1.40))
Student loan cost of funds - bonds and notes payable discount accretion (a)	(0.06))	—		—	
Student loan cost of funds - derivative settlements	0.05		0.03		0.16	
Variable student loan spread	0.92		0.96		0.63	
Variable rate floor income, net of settlements on derivatives	—		—		(0.03))
Fixed rate floor income, net of settlements on derivatives	0.60		0.52		0.58	
Core student loan spread	1.52	%	1.48	%	1.18	%
Average balance of student loans	\$24,045,003		25,212,190		24,794,311	
Average balance of debt outstanding	24,237,459		25,327,210		25,286,533	

- (a) As previously disclosed, on July 8, 2011, the Company purchased the residual interest in \$1.9 billion of consolidation loans and recorded the loans and related debt at fair value resulting in the recognition of a significant student loan discount and bonds and notes payable discount. These discounts are being accreted using the effective interest method over the lives of the underlying assets/liabilities.

A trend analysis of the Company's core and variable student loan spreads is summarized below.

The interest earned on the majority of the Company's FFELP student loan assets is indexed to the three-month commercial paper indice. The Company funds the majority of its assets with the three-month LIBOR indexed (a) floating rate securities. The relationship between these two indices has a significant impact on student loan spread. This table (the right axis) shows the difference between the average three-month LIBOR and commercial paper indices by quarter.

The Company's variable student loan spread was impacted primarily by the following items:

The tightening/widening of the CP/LIBOR spread increases/decreases variable student loan spread. Historically, the movement of the various interest rate indices received on the Company's student loan assets, primarily three-month commercial paper, and paid on the debt to fund such loans, primarily LIBOR, was highly correlated. The short-term movement of these indices was dislocated beginning in August 2007, which negatively impacted the Company's net interest income through the first half of 2009. Beginning in the third quarter of 2009, the CP/LIBOR spread began to tighten to more historical levels, which had a positive impact on spread. In 2010, the average CP/LIBOR spread was 5 basis points compared to 28 basis points in 2009, which resulted in an improved variable student loan spread in 2010 compared with 2009. In 2011, the average CP/LIBOR spread was 13 basis points compared to 5 basis points in 2010, which resulted in a decrease in variable student loan spread in 2011 compared with 2010.

A decrease in the amortization of loan premiums/discounts and deferred origination costs as a result of loans purchased at a discount, reducing the net costs being amortized.

The primary difference between variable student loan spread and core student loan spread is fixed rate floor income, net of settlements on derivatives. A summary of fixed rate floor income and its contribution to core student spread follows:

	Year ended December 31,		
	2011	2010	2009
Fixed rate floor income, gross	\$164,700	151,861	147,107
Derivative settlements (a)	(20,246)	(19,618)	(2,009)
Fixed rate floor income, net	\$144,454	132,243	145,098
Fixed rate floor income contribution to spread, net	0.60	% 0.52	% 0.58

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income.

The high levels of fixed rate floor income earned during 2011, 2010, and 2009 are due to historically low interest rates. In addition, the 2011 amount increased due to the purchase of the residual interest in \$1.9 billion of consolidation loans in July 2011. If interest rates remain low, the Company anticipates continuing to earn significant fixed rate floor income in future periods. See Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," which provides additional detail on the Company's portfolio earning fixed rate floor income and the derivatives used by the Company to hedge these loans.

On December 23, 2011, the President signed the Consolidated Appropriations Act of 2012 into law. This Act includes changes to the FFELP student lender payment index from the commercial rate to the one-month LIBOR rate for the Special Allowance Payment calculation on outstanding FFELP loans held by student loan lenders. As of December 31, 2011, the Company had \$23.4 billion of loans in which it intends to make the election to change the SAP calculation to the one-month LIBOR rate. This change mitigates the Company's exposure to basis risk and will allow the Company to better match borrowing and lending rates.

Summary and Comparison of Operating Results

	Year ended December 31,			December 31, 2011 vs. 2010 Increase (Decrease)		December 31, 2010 vs. 2009 Increase (Decrease)

Net interest income after provision for loan losses (net of settlements on derivatives (i))	\$340,583	348,723	261,499	(8,140)	(2.3)%	87,224	33.4 %		

Variable interest income, net of settlements on derivatives, decreased year over year as a result of a decrease in the yield earned on student loans, net of derivative settlements (2.63% in 2011, 2.67% in 2010, and 3.03% in 2009). In addition, the average student loan portfolio decreased \$1.2 billion (4.6%) during 2011 compared to the same period in 2010. The decrease in yield in 2010 compared to 2009 was partially offset by a \$0.4 billion (1.7%) increase in the average student loan portfolio balance.

Consolidation rebate fees increased in 2011 compared to 2010 due to the purchase of the residual interest in \$1.9 billion of consolidation loans in July 2011. Consolidation rebate fees decreased in 2010 compared to 2009 due to decreases in the average consolidation loan portfolio, for which such fees are paid.

The amortization/accretion of loan premiums/discounts and deferred origination costs decreased year over year as a result of the purchase of loans at a discount, which has reduced the net costs being amortized/accreted.

Interest expense decreased in 2011 compared to 2010 as a result of a decrease in average debt outstanding of \$1.1 billion (4.3%). Interest expense decreased in 2010 compared to 2009 due to a decrease in the cost of funds from 1.40% in 2009 to 0.83% in 2010.

During July 2011, the Company recorded a discount on bonds and notes payable assumed as a result of the purchase of the residual interest on \$1.9 billion of student loans and related debt. The bonds and notes payable discount is being accreted using the effective interest method over the lives of the bonds and notes payable.

Depending on the type of loan and when it was originated, the borrower rate on student loans is either fixed to term or is reset to an annual rate each July 1. As a result, for loans where the borrower rate is fixed to term, the Company may earn floor income for an extended period of time, which the Company refers to as fixed rate floor income. A summary of fixed rate floor income follows.

	Year ended December 31,		
	2011	2010	2009
Fixed rate floor income, gross	\$164,700	151,861	147,107
Derivative settlements (a)	(20,246) (19,618) (2,009
Fixed rate floor income, net	\$144,454	132,243	145,098

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income.

The high levels of fixed rate floor income earned during the years ended December 31, 2011, 2010, and 2009 are due to historically low interest rates. In addition, the 2011 amount increased due to the purchase of the residual interest in \$1.9 billion of consolidation loans in July 2011.

Investment income decreased year over year due to a decrease in interest rates as well as a decrease in average cash held over the same periods.

The provision for loan losses represents the periodic expense of maintaining an allowance sufficient to absorb losses inherent in the Company's portfolio of loans. The non-federally insured loan provision decreased \$2.8 million and \$5.0 million during the years ended December 31, 2011 and 2010, respectively, compared to the same periods in 2010 and 2009. The decrease in 2010 from 2009 is primarily due to a decrease in the dollar amount of the Company's non-federally insured student loan portfolio, including those loans in repayment and loans delinquent, as well as continued aging of the portfolio. The decrease in 2011 from 2010 is primarily due to the continued aging of the portfolio.

The federally insured loan provision increased \$1.3 million during the year ended December 31, 2011 compared to 2010, primarily due to an increase in delinquent loans. The federally insured loan provision decreased \$1.3 million for the year ended December 31, 2010 compared to 2009, primarily due to a decrease in delinquent loans.

The Company maintains an overall risk management strategy that incorporates the use of derivative instruments to reduce the economic effect of interest rate volatility. Management has structured the majority of the Company's (i) derivative transactions with the intent that each is economically effective; however, the Company's derivative instruments do not qualify for hedge accounting. Derivative settlements for each applicable period should be evaluated with the Company's net interest income.

Other income. The following table summarizes the components of “other income”.

	Year ended December 31,		
	2011	2010	2009
Borrower late fee income	\$ 12,647	12,390	11,305
Other	2,769	6,249	5,864
Other income	\$ 15,416	18,639	17,169

Gain on sale of loans and debt repurchases, net. A summary of gains from the sale of loans and debt repurchases follows:

	Year ended December 31,		
	2011	2010	2009
Gain on sale of loans (a)	\$ 1,378	33,748	35,148
Gain on debt repurchases - asset-backed securities (b)	55	39,961	28,528
Gain on sale of loans and debt repurchases, net	\$ 1,433	73,709	63,676

Included in the gain on sale of loans for the years ended December 31, 2010 and 2009 are gains of \$33.8 million (a) and \$36.6 million, respectively, resulting from the sale of \$2.1 billion of student loans in each of these years to the Department under a program that provided liquidity to student loan lenders.

During the years ended December 31, 2011, 2010, and 2009, the Company repurchased asset-backed securities of (b) \$12.3 million, \$690.8 million, and \$348.2 million, respectively. Due to improvements in the capital markets during 2011, the opportunities for the Company to repurchase debt at less than par are becoming more limited.

Salaries and benefits and other expenses. During the year ended December 31, 2011, the Company recorded an other expense of \$2.5 million related to its obligation to repurchase non-federally insured loans. This expense was recorded due to management’s projected performance of the portfolio of loans subject to the repurchase obligation. Excluding this expense, “salaries and benefits” and “other expenses” decreased in 2011 compared with 2010. In addition, “salaries and benefits” and “other expenses” decreased significantly in 2010 compared to 2009. These decreases in 2011 and 2010 were the result of a reduction in associates as part of the Company’s restructuring initiatives and continued focus by the Company on managing costs, as well as a reduction in marketing costs due to the elimination of new loan originations under the FFELP Program. These decreases were partially offset by an increase in fees paid to third parties for the servicing of the Company’s student loan portfolio.

Intersegment expenses, net. Intersegment expenses include fees paid to the Student Loan and Guaranty Servicing operating segment for the servicing of the Company’s student loan portfolio.

LIQUIDITY AND CAPITAL RESOURCES

The Company’s fee generating businesses are non-capital intensive and all produce positive operating cash flows. As such, a minimal amount of debt and equity capital is allocated to the fee-based segments and any liquidity or capital needs are satisfied using cash flow from operations. Therefore, the Liquidity and Capital Resources discussion is concentrated on the Company’s liquidity and capital needs to meet existing debt obligations in the Asset Generation and Management operating segment.

The Company may issue equity and debt securities in the future in order to improve capital, increase liquidity, refinance upcoming maturities, or provide for general corporate purposes. Moreover, the Company may from time-to-time repurchase certain amounts of its outstanding secured and unsecured debt securities, including debt securities which the Company may issue in the future, for cash and/or through exchanges for other securities. Such repurchases or exchanges may be made in open market transactions, privately negotiated transactions, or otherwise.

Any such repurchases or exchanges will depend on prevailing market conditions, the Company's liquidity requirements, contractual restrictions, compliance with securities laws, and other factors. The amounts involved in any such transactions may be material.

The Company has historically utilized operating cash flow, secured financing transactions (which include warehouse facilities, asset-backed securitizations, and liquidity programs offered by the Department), operating lines of credit, and other borrowing arrangements to fund its Asset Generation and Management operations and student loan acquisitions. In addition, the Company has used operating cash flow, borrowings on its unsecured line of credit, and unsecured debt offerings to fund corporate activities, business acquisitions, and repurchases of common stock. The Company has also used its common stock to partially fund certain business acquisitions.

As of December 31, 2011, the Company had \$470.4 million of liquidity available for use (as summarized below). In addition, the Company generates a significant amount of cash from operations. The Company will continue to use its strong liquidity position to capitalize on market opportunities, including FFELP student loan acquisitions; strategic acquisitions and investments in its core business areas of loan financing, loan servicing, payment processing, and enrollment services (education planning); and capital management initiatives, including stock repurchases, debt repurchases, and dividend distributions.

Sources of liquidity currently available

The following table details the Company's sources of liquidity currently available:

	As of December 31, 2011
Sources of primary liquidity:	
Cash and cash equivalents	\$42,570
Investments	50,780
Unencumbered private student loan assets	18,009
Asset-backed security investments - Class B subordinated notes (a)	76,513
Asset-backed security investments (b)	72,516
Available balance on unsecured line of credit (c)	210,000
Total sources of primary liquidity	\$470,388

As part of the Company's issuance of asset-backed securitizations in 2008, due to credit market conditions when these notes were issued, the Company purchased the Class B subordinated notes of \$76.5 million (par value). These notes are not included on the Company's consolidated balance sheet. If the credit market conditions continue to (a) improve, the Company anticipates selling these notes to third parties. Upon a sale to third parties, the Company would obtain cash proceeds equal to the market value of the notes on the date of such sale. The amount included in the table above is the par value of these subordinated notes and may not represent market value upon sale of the notes.

The Company has repurchased its own asset-backed securities (bonds and notes payable). For accounting purposes, these notes are effectively retired and are not included on the Company's consolidated balance sheet. However, as of December 31, 2011, \$72.5 million of these securities are legally outstanding at the trust (b) level and the Company could sell these notes to third parties or redeem the notes at par as cash is generated by the trust estate. Upon a sale to third parties, the Company would obtain cash proceeds equal to the market value of the notes on the date of such sale. The amount included in the table above is the par value of these notes and may not represent market value upon sale of the notes.

As of December 31, 2011, the Company had a \$750.0 million unsecured line of credit with a maturity date of May 8, 2012. On February 17, 2012, the Company entered into a new \$250.0 million unsecured line of credit. In conjunction with entering into this new agreement, the outstanding balance on the \$750.0 million unsecured line of (c) credit of \$64.4 million was paid off in full and the agreement was terminated. As of February 17, 2012, the \$250.0 million unsecured line of credit had an outstanding balance of \$40.0 million and \$210.0 million was available for future use. The \$250.0 million line of credit terminates on February 17, 2016. Included in the table above is the amount of availability on the new line of credit as of February 17, 2012.

Cash generated from operations

The Company has historically generated positive cash flow from operations. For the years ended December 31, 2011, 2010, and 2009, the Company had net cash flow from operating activities of \$310.9 million, \$194.9 million, and

\$324.7 million, respectively.

Liquidity Needs and Sources of Liquidity Available to Satisfy Debt Obligations Secured by Student Loan Assets and Related Collateral

The Company had the following debt obligations outstanding that are secured by student loan assets and related collateral:

	As of December 31, 2011	
	Carrying amount	Final maturity
Asset Generation and Management:		
Bonds and notes issued in asset-backed securitizations	\$21,222,978	11/25/15 - 7/27/48
FFELP warehouse facilities	824,410	7/1/14
Department of Education Conduit	2,339,575	5/8/14
Other borrowings	43,119	11/14/12 - 3/1/22
	\$24,430,082	

Bonds and notes issued in asset-backed securitizations

The majority of the Company's portfolio of student loans is funded in asset-backed securitizations that are structured to substantially match the maturity of the funded assets, thereby minimizing liquidity risk. In addition, due to (i) the difference between the yield the Company receives on the loans and cost of financing within these transactions, and (ii) the servicing and administration fees the Company earns from these transactions, the Company has created a portfolio that will generate earnings and significant cash flow over the life of these transactions.

As of December 31, 2011, based on cash flow models developed to reflect management's current estimate of, among other factors, prepayments, defaults, deferment, forbearance, and interest rates, the Company currently expects future undiscounted cash flows from its portfolio to be approximately \$1.81 billion as detailed below. The \$1.81 billion includes approximately \$340.4 million (as of December 31, 2011) of overcollateralization included in the asset-backed securitizations. These excess net asset positions are reflected variously in the following balances on the consolidated balance sheet: "student loans receivable," "restricted cash and investments," and "accrued interest receivable."

The forecasted cash flow presented below includes all loans currently funded in asset-backed securitizations. As of December 31, 2011, the Company had \$21.1 billion of loans included in asset-backed securitizations, which represented 87 percent of its total FFELP student loan portfolio. The forecasted cash flow does not include cash flows that the Company expects to receive related to loans funded through the Department of Education's Conduit Program and other warehouse facilities or loans acquired subsequent to December 31, 2011.

(a) The Company uses various assumptions, including prepayments and future interest rates, when preparing its cash flow forecast. These assumptions are further discussed below.

Prepayments: The primary variable in establishing a life of loan estimate is the level and timing of prepayments. Prepayment rates equal the amount of loans that prepay annually as a percentage of the beginning of period balance, net of scheduled principal payments. A number of factors can affect estimated prepayment rates, including the level of consolidation activity and default rates. Should any of these factors change, management may revise its assumptions, which in turn would impact the projected future cash flow. The Company's cash flow forecast above assumes prepayment rates that are generally consistent with those utilized in the Company's recent asset-backed securities transactions. If management used a prepayment rate assumption two times greater than what was used to forecast the cash flow, the cash flow forecast would be reduced by approximately \$310 million to \$370 million.

Interest rates: The Company funds the majority of its student loans with three-month LIBOR ("LIBOR") indexed floating rate securities. Meanwhile, the interest earned on the Company's student loan assets are indexed primarily to a commercial paper rate ("CP"). The different interest rate characteristics of the Company's loan assets and liabilities funding these assets result in basis risk. The Company's cash flow forecast assumes LIBOR will exceed CP by 12 basis points for the life of the portfolio, which approximates the historical relationship between these indices. If the forecast is computed assuming a spread of 24 basis points between CP and LIBOR for the life of the portfolio, the cash flow forecast would be reduced by approximately \$80 million to \$120 million.

On December 23, 2011, the President signed the Consolidated Appropriations Act of 2012 into law. This Act includes changes to the FFELP student lender payment index from the commercial rate to the one-month LIBOR rate for the Special Allowance Payment calculation on outstanding FFELP loans held by student loan lenders. As of December 31, 2011, the Company had \$23.4 billion of loans in which it intends to make the election to change the SAP calculation to the one-month LIBOR rate. This change mitigates the Company's exposure to basis risk and will allow the Company to better match borrowing and lending rates.

The Company uses the current forward interest rate yield curve to forecast cash flows. A change in the forward interest rate curve would impact the future cash flows generated from the portfolio. An increase in future interest rates will reduce the amount of fixed rate floor income the Company is currently receiving. The Company attempts to mitigate the impact of a rise in short-term

rates by hedging interest rate risks. As of December 31, 2011, the net fair value of the Company's interest rate derivatives used to hedge loans earning fixed rate floor income was a liability of \$17.8 million. See Item 7A, "Quantitative and Qualitative Disclosures about Market Risk — Interest Rate Risk."

FFELP Warehouse Facilities

The Company funds a portion of its FFELP loan acquisitions using its FFELP warehouse facilities. Student loan warehousing allows the Company to buy and manage student loans prior to transferring them into more permanent financing arrangements.

On July 14, 2011, the Company renewed the liquidity agreement on its existing FFELP warehouse facility (the "NFSLW-I Warehouse") and entered into an additional FFELP warehouse facility (the "NHELP-I Warehouse").

The Company's NFSLW-I Warehouse facility has a maximum financing amount of \$500.0 million, with a revolving financing structure supported by 364-day liquidity provisions, which expires on July 1, 2012. The final maturity date of the facility is July 1, 2014. In the event the Company is unable to renew the liquidity provisions by July 1, 2012, the facility would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and the Company would be required to refinance the existing loans in the facility by July 1, 2014.

The NFSLW-I Warehouse facility provides for formula based advance rates, depending on FFELP loan type, up to a maximum of 85 percent to 98 percent of the principal and interest of loans financed. The advance rates for collateral may increase or decrease based on market conditions, but they are subject to a minimum advance of 84.5 to 90 percent based on loan type. As of December 31, 2011, \$496.7 million was outstanding under the NFSLW-I Warehouse facility, \$3.3 million was available for future use, and \$38.4 million was advanced as equity support.

The NHELP-I Warehouse has a maximum financing amount of \$500.0 million, with a revolving financing structure supported by 364-day liquidity provisions, which expires on October 1, 2012. The final maturity date of the facility is July 1, 2014. In the event the Company is unable to renew the liquidity provisions by October 1, 2012, the facility would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and the Company would be required to refinance the existing loans in the facility by July 1, 2014.

The NHELP-I Warehouse facility provides for formula based advance rates, depending on FFELP loan type, up to a maximum of 93 percent to 95 percent of the principal and interest of loans financed. The advance rates for collateral may increase or decrease based on market conditions, but they are subject to a minimum advance of 85 to 90 percent based on loan type. As of December 31, 2011, \$327.7 million was outstanding under the NHELP-I Warehouse facility, \$172.3 million was available for future use, and \$20.1 million was advanced as equity support.

On February 1, 2012, the Company entered into a new FFELP warehouse facility (the "NHELP-II Warehouse"). The NHELP-II Warehouse has a maximum financing amount of \$250.0 million, with a revolving financing structure supported by 364-day liquidity provisions, which expire on January 31, 2013. The final maturity date of the facility is January 31, 2015. In the event the Company is unable to renew the liquidity provisions by January 31, 2013, the facility would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and the Company would be required to refinance the existing loans in the facility by January 31, 2015.

The FFELP warehouse facilities contain financial covenants relating to levels of the Company's consolidated net worth, ratio of adjusted EBITDA to corporate debt interest, and unencumbered cash. Any violation of these covenants could result in a requirement for the immediate repayment of any outstanding borrowings under the facilities.

Upon termination or expiration of the warehouse facilities, the Company would expect to access the securitization market, use operating cash, rely on sale of assets, or transfer collateral to satisfy any remaining obligations.

Department of Education Conduit

In May 2009, the Department implemented a program under which it finances eligible FFELP Stafford and PLUS loans in a conduit vehicle established to provide funding for student lenders (the "Conduit Program"). Loans eligible for the Conduit Program had to be first disbursed on or after October 1, 2003, but not later than June 30, 2009, and fully disbursed before September 30, 2009, and meet certain other requirements. Funding for the Conduit Program is provided by the capital markets at a cost based on market rates, with the Company being advanced 97 percent of the student loan face amount. Excess amounts needed to fund the remaining 3 percent of the student loan balances were contributed by the Company. The Conduit Program expires on May 8, 2014. The Student Loan Short-Term Notes ("Student Loan Notes") issued by the Conduit Program are supported by a combination of (i)

notes backed by FFELP loans, (ii) a liquidity agreement with the Federal Financing Bank, and (iii) a put agreement provided by the Department. If the conduit does not have sufficient funds to pay all Student Loan Notes, then those Student Loan Notes will be repaid with funds from the Federal Financing Bank. The Federal Financing Bank will hold the notes for a short period of time and, if at the end of that time, the Student Loan Notes still cannot be paid off, the underlying FFELP loans that serve as collateral for the Conduit Program will be sold to the Department through a put agreement at a price of 97 percent of the face amount of the loans. As of December 31, 2011, the Company had \$2.3 billion borrowed under the facility and \$84.7 million advanced as equity support in the facility. Effective July 1, 2010, no additional loans could be funded using the Conduit Program.

The Company expects to access the securitization market prior to the Conduit Program's maturity to refinance the student loan collateral included in the Conduit with debt that is structured to match the maturity of the assets.

Other Liquidity Needs

On March 30, 2010, President Obama signed into law the Reconciliation Act of 2010. Effective July 1, 2010, this law prohibits new loan originations under the FFEL Program and requires that all new federal loan originations be made through the Federal Direct Loan Program. As a result of the Reconciliation Act of 2010, the Company no longer originates new FFELP loans.

Due to the legislative changes in the student loan industry, the Company believes there will be opportunities to purchase FFELP loan portfolios on behalf of current FFELP participants looking to adjust their FFELP businesses.

The Company plans to fund FFELP student loan acquisitions from third parties using its agreement with Union Bank, as trustee for various grantor trusts, under which Union Bank has agreed to purchase from the Company participation interests in student loans (as described below); using its FFELP warehouse facilities (as described above); and continuing to access the asset-backed securities market.

Union Bank Participation Agreement

The Company maintains an agreement with Union Bank, as trustee for various grantor trusts, under which Union Bank has agreed to purchase from the Company participation interests in student loans (the "FFELP Participation Agreement"). As of December 31, 2011, \$509.2 million of loans were subject to outstanding participation interests held by Union Bank, as trustee, under this agreement. The agreement automatically renews annually and is terminable by either party upon five business days notice. This agreement provides beneficiaries of Union Bank's grantor trusts with access to investments in interests in student loans, while providing liquidity to the Company. The Company can participate loans to Union Bank to the extent of availability under the grantor trusts, up to \$750 million or an amount in excess of \$750 million if mutually agreed to by both parties. Loans participated under this agreement have been accounted for by the Company as loan sales. Accordingly, the participation interests sold are not included on the Company's consolidated balance sheets.

Asset-backed securities transactions

Depending on market conditions, the Company anticipates continuing to access the asset-backed securities market. Asset-backed securities transactions would be used to refinance student loans included in the FFELP warehouse facilities, the Department of Education Conduit facility, and/or existing asset-backed security transactions. The FFELP warehouse facilities and Department Conduit facility have advance rates that are less than par. As of December 31, 2011, the Company had approximately \$58.5 million advanced in the FFELP warehouse facilities and approximately \$84.7 million advanced in the Department Conduit facility. Depending on the terms of asset-backed security transactions, refinancing loans included in these facilities could produce positive cash flow to

the Company by reducing required advance rates and are contemplated by management when making student loan financing decisions.

During 2011, the Company completed an asset-backed securities transaction totaling \$384.4 million. Notes issued in this asset-backed securities transaction carry interest rates based on a spread to LIBOR. The Company used the proceeds from the sale of these notes to purchase principal and interest on student loans, including loans which were previously financed in the NFSLW-I Warehouse facility.

Although the Company has recently demonstrated its ability to access the asset-backed securities market and expects asset-backed securities transactions to remain a primary source of funding over the long term, the Company also expects its transaction volumes to be more limited and pricing less favorable than prior to the credit market dislocation that began in August 2007, with significantly reduced opportunities to place subordinated tranches of asset-backed securities with investors. At present, the Company is unable to predict when market conditions will allow for more regular, reliable, and cost-effective access to the term asset-backed securities market.

Liquidity Impact Related to Hedging Activities

The Company utilizes derivative instruments to manage interest rate sensitivity. By using derivative instruments, the Company is exposed to market risk which could impact its liquidity. When the fair value of a derivative instrument is negative (a liability on the Company's balance sheet), it would owe the counterparty if the derivative was settled. If the negative fair value of derivatives with a counterparty exceeds a specified threshold, the Company may have to make a collateral deposit with the counterparty. The threshold at which the Company may be required to post collateral is dependent upon its unsecured credit rating. Based on the Company's current unsecured credit ratings (Standard and Poor: BBB- (stable outlook) and Moody's: Ba1 (stable outlook)), the Company has substantially collateralized its corporate derivative liability position with counterparties. As such, further downgrades would not result in additional collateral requirements of a material nature. In addition, no counterparty has the right to terminate its contracts in the event of further downgrades. However, some long dated derivative contracts have mutual optional termination provisions that can be exercised in 2016 and 2021. As of December 31, 2011, the fair value of derivatives with early termination provisions was a negative \$0.1 million (a liability on the Company's balance sheet).

Based on the derivative portfolio outstanding as of December 31, 2011, the Company does not currently anticipate any movement in interest rates having a material impact on its capital or liquidity profile, nor does the Company expect that any movement in interest rates would have a material impact on its ability to meet potential collateral deposits with its counterparties. However, if interest rates moves materially and negatively impacts the fair value of the Company's derivative portfolio or if the Company enters into additional derivatives in which the fair value of such derivatives become negative, the Company could be required to deposit additional collateral with its derivative instrument counterparties. The collateral deposits, if significant, could negatively impact the Company's liquidity and capital resources. As of December 31, 2011, the fair value of the Company's derivatives which had a negative fair value (a liability on the Company's balance sheet) was \$43.8 million and the Company had \$34.0 million posted as collateral to derivative counterparties.

Description of Other Debt Facilities

Unsecured Line of Credit

As of December 31, 2011, the Company had a \$750.0 million unsecured line of credit with a maturity date of May 8, 2012. As of December 31, 2011, there was \$64.4 million outstanding on this line. On February 17, 2012, the Company entered into a new \$250.0 million unsecured line of credit. In conjunction with entering into this new agreement, the outstanding balance on the \$750.0 million unsecured line of credit of \$64.4 million was paid off in full and the agreement was terminated. As of February 17, 2012, the \$250.0 million unsecured line of credit had an outstanding balance of \$40.0 million and \$210.0 million was available for future use. The \$250.0 million line of credit terminates on February 17, 2016. Upon termination in 2016 there can be no assurance that the Company will be able to maintain this line of credit, find alternative funding, or increase the amount outstanding under the line, if necessary.

The line of credit agreement contains certain financial covenants that, if not met, lead to an event of default under the agreement. The covenants include maintaining:

- a minimum consolidated net worth
- a minimum adjusted EBITDA to recourse indebtedness (over the last four rolling quarters)
- a limitation on recourse indebtedness

- A limitation on the percentage of non-federally insured loans in the Company's portfolio

Many of these covenants are duplicated in the Company's other lending facilities, including its FFELP warehouse facilities.

A default on the Company's FFELP warehouse facilities would result in an event of default on the Company's unsecured line of credit that would result in the outstanding balance on the line of credit becoming immediately due and payable.

The Company's operating line of credit does not have any covenants related to unsecured debt ratings. However, changes in the Company's ratings (as well as the amounts the Company borrows) have modest implications on the pricing level at which the Company obtains funding.

Junior Subordinated Hybrid Securities

In September 2006, the Company issued \$200.0 million aggregate principal amount of Junior Subordinated Hybrid Securities ("Hybrid Securities"), of which \$100.7 million was outstanding as of December 31, 2011. The Hybrid Securities are unsecured obligations of the Company. The interest rate on the Hybrid Securities from the date they were issued through the optional redemption date, September 28, 2011, was 7.40%, payable semi-annually. Beginning September 29, 2011 through September 29, 2036, the "scheduled maturity date," the interest rate on the Hybrid Securities is equal to three-month LIBOR plus 3.375%, payable quarterly, which was 3.95% at December 31, 2011. The principal amount of the Hybrid Securities will become due on the scheduled maturity date only to the extent that the Company has received proceeds from the sale of certain qualifying capital securities prior to such date (as defined in the Hybrid Securities' prospectus). If any amount is not paid on the scheduled maturity date, it will remain outstanding and bear interest at a floating rate as defined in the prospectus, payable monthly. On September 15, 2061, the Company must pay any remaining principal and interest on the Hybrid Securities in full whether or not the Company has sold qualifying capital securities. At the Company's option, the Hybrid Securities are redeemable in whole or in part, any time on or after September 29, 2011, at their principal amount plus accrued and unpaid interest, provided in the case of a redemption in part that the principal amount outstanding after such redemption is at least \$50.0 million.

Debt Repurchases

Due to the Company's positive liquidity position and opportunities in the capital markets, the Company has repurchased debt over the last several years. Gains recorded by the Company from the purchase of debt are included in "gain on the sale of loans and debt repurchases, net" on the Company's consolidated statements of income. A summary of debt repurchases follows:

	Year ended December 31, 2011			Year ended December 31, 2010		
	Notional amount	Purchase price	Gain	Notional amount	Purchase price	Gain
Unsecured debt - Junior Subordinated Hybrid Securities	\$62,558	55,651	6,907	34,995	30,073	4,922
Asset-backed securities	12,254	12,199	55	690,750	650,789	39,961
	\$74,812	67,850	6,962	725,745	680,862	44,883

Due to improvements in the capital markets during 2011, the opportunities for the Company to repurchase debt at less than par value are becoming more limited.

Stock Repurchases

During 2006, the Company's Board of Directors authorized a stock repurchase program to repurchase shares of the Company's Class A common stock. As of December 31, 2011, approximately 1.6 million shares may still be purchased under the program. The program has an expiration date of May 24, 2012. Certain share repurchases reflected in the table below were made pursuant to a trading plan adopted by the Company in accordance with Rule 10b5-1 under the Securities Exchange Act of 1934.

Shares repurchased by the Company during 2011 and 2010 are shown in the table below.

	Total shares repurchased	Purchase price (in thousands)	Average price of shares repurchased (per share)
Year ended December 31, 2011	1,436,423	\$27,134	\$18.89

Edgar Filing: NELNET INC - Form 10-K

Year ended December 31, 2010	1,866,332	\$39,805	\$21.33
------------------------------	-----------	----------	---------

72

Contractual Obligations

The Company's contractual obligations were as follows:

	As of December 31, 2011				
	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Bonds and notes payable	\$24,595,169	8,900	3,163,985	314,335	21,107,949
Operating lease obligations (a)	19,214	6,787	9,107	2,986	334
Total	\$24,614,383	15,687	3,173,092	317,321	21,108,283

(a) The Company is committed under noncancelable operating leases for certain office and warehouse space and equipment. Operating lease obligations are presented net of approximately \$1.2 million in sublease arrangements.

As of December 31, 2011, the Company had a reserve of \$15.0 million for uncertain income tax positions (including the federal benefit received from state positions). This obligation is not included in the above table as the timing and resolution of the income tax positions cannot be reasonably estimated at this time.

As of December 31, 2011, the Company had participated a cumulative amount of \$117.1 million of non-federally insured loans to third parties. Loans participated under these agreements have been accounted for by the Company as loan sales. Accordingly, the participation interests sold are not included on the Company's consolidated balance sheets. Per the terms of the servicing agreements, the Company's servicing operations are obligated to repurchase loans subject to the participation interests in the event such loans become 60 or 90 days delinquent. In addition, on January 13, 2011, the Company sold a portfolio of non-federally insured loans for proceeds of \$91.3 million (100% par value). The Company retained credit risk related to this portfolio and will pay cash to purchase back any loans which become 60 days delinquent. As of December 31, 2011, the Company has \$19.2 million accrued related to these repurchase obligations which is included in "other liabilities" in the Company's consolidated balance sheet. These obligations are not included in the above table.

On January 8, 2010, the Company purchased certain assets of a software company that constituted a business combination. The initial consideration paid by the Company was \$3.0 million in cash. In addition to the initial purchase price, additional payments are to be made by the Company based on certain operating results as defined in the purchase agreement. On February 1, 2011, the Company made an additional payment of \$1.3 million. Additional, contingent payments are payable in two annual installments due in March 2012 and March 2013 and in total are estimated by the Company, as of December 31, 2011, to be \$3.5 million. The estimated contingency payments are included in "other liabilities" in the Company's consolidated balance sheet. The contingent payments will be remeasured to fair value each reporting date until the contingency is resolved, with all changes in fair value being recognized in earnings. This obligation is not included in the above table.

Dividends

Dividends of \$0.07, \$0.10, \$0.10, and \$0.10 per share on the Company's Class A and Class B common stock were paid on March 15, 2011, June 15, 2011, September 15, 2011, and December 15, 2011, respectively, to all holders of record as of March 1, 2011, June 1, 2011, September 1, 2011, and December 1, 2011, respectively.

The Company currently plans to continue making quarterly dividend payments, subject to future earnings, capital requirements, financial condition, and other factors. In addition, the payment of dividends is subject to the terms of the Company's outstanding Hybrid Securities, which generally provide that if the Company defers interest payments on those securities it cannot pay dividends on its capital stock.

CRITICAL ACCOUNTING POLICIES

This Management's Discussion and Analysis of Financial Condition and Results of Operations discusses the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the reporting periods. The Company bases its estimates and judgments on historical experience and on various other factors that the Company believes are reasonable under the circumstances. Actual results may differ from these estimates under varying assumptions or conditions. Note 2 of the consolidated financial statements, which are included in this Annual Report on Form 10-K for the year ended December 31, 2011, includes a summary of the significant accounting policies and methods used in the preparation of the consolidated financial statements.

On an on-going basis, management evaluates its estimates and judgments, particularly as they relate to accounting policies that management believes are most "critical" — that is, they are most important to the portrayal of the Company's financial condition and results of operations and they require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Management has identified the following critical accounting policies that are discussed in more detail below: allowance for loan losses, revenue recognition, impairment assessments related to goodwill and intangible assets, income taxes, and accounting for derivatives.

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses on student loans. This evaluation process is subject to numerous estimates and judgments. The Company evaluates the appropriateness of the allowance for loan losses on its federally insured loan portfolio separately from its non-federally insured loan portfolio.

The allowance for the federally insured loan portfolio is based on periodic evaluations of the Company's loan portfolios considering loans in repayment versus those in a nonpaying status, delinquency status, trends in defaults in the portfolio based on Company and industry data, past experience, trends in student loan claims rejected for payment by guarantors, changes to federal student loan programs, current economic conditions, and other relevant factors. Should any of these factors change, the estimates made by management would also change, which in turn would impact the level of the Company's future provision for loan losses.

In determining the appropriateness of the allowance for loan losses on the non-federally insured loans, the Company considers several factors including: loans in repayment versus those in a nonpaying status, delinquency status, type of program, trends in defaults in the portfolio based on Company and industry data, past experience, current economic conditions, and other relevant factors. Should any of these factors change, the estimates made by management would also change, which in turn would impact the level of the Company's future provision for loan losses. The Company places a non-federally insured loan on nonaccrual status when the collection of principal and interest is 30 days past due and charges off the loan and accrued interest when the collection of principal and interest is 120 days past due.

The allowance for federally insured and non-federally insured loans and the repurchase obligation related to loans sold are maintained at a level management believes is appropriate to provide for estimated probable credit losses inherent in the loan portfolios. This evaluation is inherently subjective because it requires estimates that may be susceptible to significant changes.

Revenue Recognition

Student loan income – The Company recognizes student loan income as earned, net of amortization of loan premiums and discounts and deferred origination costs. Loan income is recognized based upon the expected yield of the loan after giving effect to borrower utilization of incentives such as principal reductions for timely payments (“borrower benefits”) and other yield adjustments. The estimate of the borrower benefits discount is dependent on the estimate of the number of borrowers who will eventually qualify for these benefits. For competitive and liquidity purposes, the Company frequently changed the borrower benefit programs in both amount and qualification factors. These programmatic changes must be reflected in the estimate of the borrower benefit discount. Loan premiums/discounts, deferred origination costs, and borrower benefits are included in the carrying value of the student loan on the consolidated balance sheet and are amortized over the estimated life of the loan. The most sensitive estimate related to the amortization/accretion of loan premiums/discounts, deferred origination costs, and borrower benefits is the estimate of the constant prepayment rate (“CPR”). CPR is a variable in the life of loan estimate that measures the rate at which loans in a portfolio pay before their stated maturity. The CPR is directly correlated to the average life of the portfolio. CPR equals the percentage of loans that prepay annually as a percentage of the beginning of period balance, net of scheduled principal payments. A number of factors can affect the CPR estimate, including the level of consolidation activity and default rates. Should any of these factors change, the estimates made by management would also change, which in turn would impact the amount of loan premium/discount and deferred origination cost amortization recognized by the Company in a particular period.

Loan and guaranty servicing revenue – Loan and guaranty servicing revenue consists of the following items:

Loan and guaranty servicing fees – Loan servicing fees are determined according to individual agreements with customers and are calculated based on the dollar value of loans, number of loans, or number of borrowers serviced for each customer. Guaranty servicing fees, generally, are calculated based on the number of loans serviced, volume of loans serviced, or amounts collected. Revenue is recognized when earned pursuant to applicable agreements, and when ultimate collection is assured.

Software services revenue – Software services revenue is determined from individual agreements with customers and includes license and maintenance fees associated with student loan software products. Computer and software consulting and remote hosting revenues are recognized over the period in which services are provided to customers.

Tuition payment processing and campus commerce revenue – Tuition payment processing and campus commerce revenue primarily includes actively managed tuition payment solutions and online payment processing. Fees for these services are recognized over the period in which services are provided to customers.

Enrollment services revenue – Enrollment services revenue primarily consists of the following items:

Interactive marketing – Interactive marketing revenue is derived primarily from fees which are earned through the delivery of qualified inquiries or clicks. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectability is reasonably assured. Delivery is deemed to have occurred at the time a qualified inquiry or click is delivered to the customer provided that no significant obligations remain. From time to time, the Company may agree to credit certain inquiries or clicks if they fail to meet the contractual or other guidelines of a particular client. The Company has established a sales reserve based on historical experience. To date, such credits have been immaterial and within management’s expectations.

For a portion of its interactive marketing revenue, the Company has agreements with providers of online media or traffic (“Publishers”) used in the generation of inquiries or clicks. The Company receives a fee from its customers and pays a fee to Publishers either on a cost per inquiry, cost per click, or cost per number of impressions basis. The

Company is the primary obligor in the transaction. As a result, the fees paid by the Company's customers are recognized as revenue and the fees paid to its Publishers are included in "cost to provide enrollment services" in the Company's consolidated statements of income.

• List marketing - Revenue from the sale of lists is generally earned and recognized, net of estimated returns, upon delivery.

• Publishing services - Revenue from the sale of print products is generally earned and recognized, net of estimated returns, upon shipment or delivery.

Resource centers – Resource centers services include online courses, scholarship search and selection data, career planning, and online information about colleges and universities. The majority of these services are sold based on subscriptions and/or are performance based. Revenues from sales of subscription and performance based services are

recognized ratably over the term of the contract as earned. Subscription and performance based revenues received or receivable in advance of the delivery of services is included in deferred revenue.

Fees associated with the majority of the services described above are recognized in the period services are rendered and earned under service arrangements with clients where service fees are fixed or determinable and collectability is reasonably assured. The Company's service fees are determined based on written price quotations or service agreements having stipulated terms and conditions that do not require management to make any significant judgments or assumptions regarding any potential uncertainties.

The Company assesses collectability of revenues and its allowance for doubtful accounts based on a number of factors, including past transaction history with the customer and the credit-worthiness of the customer. An allowance for doubtful accounts is established to record accounts receivable at estimated net realizable value. If the Company determines that collection of revenues is not reasonably assured at or prior to delivery of the Company's services, revenue is recognized upon the receipt of cash.

Goodwill and Intangible Assets – Impairment Assessments

The Company reviews goodwill for impairment annually (as of November 30) and whenever triggering events or changes in circumstances indicate its carrying value may not be recoverable. Goodwill is tested for impairment using a fair value approach at the reporting unit level. A reporting unit is the operating segment, or a business one level below that operating segment if discrete financial information is prepared and regularly reviewed by segment management. However, components are aggregated as a single reporting unit if they have similar economic characteristics.

In April 2011, the FASB issued ASU 2011-08, Intangibles - Goodwill and Other: Testing for Goodwill Impairment ("ASU 2011-08"). This ASU amends FASB ASC Topic 350, Intangibles - Goodwill and Other, to simplify how an entity tests for goodwill impairment by allowing entities to first assess certain qualitative factors to determine whether the existence of certain events or circumstances would lead to a determination that it would be more likely than not that the fair value of a reporting unit is less than its carrying amount, instead of first performing a fair value analysis for each reporting unit. Entities that conclude, after assessing the totality of events and circumstances, that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount are not required to perform the two-step impairment test. This guidance became effective on September 15, 2011 for annual and interim impairment tests for fiscal years beginning after December 15, 2011, and early adoption is permitted. The Company adopted the new guidance for its 2011 annual goodwill impairment test. As of November 30, 2011, the Company assessed qualitative factors and concluded it was not more likely than not that the fair value of its reporting units were less than their carrying amount. As such, the Company was not required to perform the two-step impairment test.

The new accounting guidance includes examples of events and circumstances that an entity should consider in evaluating whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including macroeconomic conditions, industry and market considerations, overall financial performance, and entity specific events. The examples of events and circumstances are not intended to be all-inclusive, and an entity may identify other relevant events or circumstances to consider in determining whether to perform the first step of the two-step impairment test. None of the individual examples of events and circumstances are intended to represent standalone events or circumstances that necessarily would require an entity to perform the first step of the goodwill impairment test.

In reaching its conclusion about whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the Company also considered the extent to which an adverse event or circumstance, if any, effected the reporting unit's fair value. The Company placed more weight on the events and circumstances that most affect a

reporting unit's fair value or the carrying amount of its net assets. The Company also considered positive and mitigating events and circumstances. In addition, the Company compared recent fair value calculations of reporting units, when available, to the carrying amount of the reporting units in deciding whether the first step of the impairment test was necessary.

The Company makes judgments about the recoverability of purchased intangible assets annually and whenever triggering events or changes in circumstances indicate that an other than temporary impairment may exist. Each quarter the Company evaluates the estimated remaining useful lives of purchased intangible assets and whether events or changes in circumstances warrant a revision to the remaining periods of amortization. Recoverability of these assets is measured by comparison of the carrying amount of the asset to the future undiscounted cash flows the asset is expected to generate. If the asset is considered to be impaired, the amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset.

The Company's evaluation of whether the fair value of a reporting unit is greater than its carrying amount and assumptions and estimates about future values and remaining useful lives of the Company's intangible and other long-lived assets are complex and subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in the Company's business strategy and internal forecasts. Although the Company believes the

historical assumptions and estimates used are reasonable and appropriate, different assumptions and estimates could materially impact the reported financial results.

Income Taxes

The Company is subject to the income tax laws of the U.S and its states and municipalities in which the Company operates. These tax laws are complex and subject to different interpretations by the taxpayer and the relevant government taxing authorities. In establishing a provision for income tax expense, the Company must make judgments and interpretations about the application of these inherently complex tax laws. The Company must also make estimates about when in the future certain items will affect taxable income in the various tax jurisdictions. Disputes over interpretations of the tax laws may be subject to review/adjudication by the court systems of the various tax jurisdictions or may be settled with the taxing authority upon examination or audit. The Company reviews these balances quarterly and as new information becomes available, the balances are adjusted, as appropriate.

Derivative Accounting

The Company records derivative instruments at fair value on the balance sheet as either an asset or liability. The Company determines the fair value for its derivative contracts using either (i) pricing models that consider current market conditions and the contractual terms of the derivative contract or (ii) counterparty valuations. These factors include interest rates, time value, forward interest rate curve, and volatility factors, as well as foreign exchange rates. Pricing models and their underlying assumptions impact the amount and timing of unrealized gains and losses recognized, and the use of different pricing models or assumptions could produce different financial results. Management has structured the majority of the Company's derivative transactions with the intent that each is economically effective. However, the Company's derivative instruments do not qualify for hedge accounting. Accordingly, changes in the fair value of derivative instruments are reported in current period earnings. Net settlements on derivatives are included in "derivative market value and foreign currency adjustments and derivative settlements, net" on the consolidated statements of income.

RECENT ACCOUNTING PRONOUNCEMENTS

In April 2011, the FASB issued ASU 2011-02, A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring. This ASU amends FASB ASC Topic 310, Receivables, to clarify when a loan restructuring constitutes a troubled debt restructuring. Under the new guidance, student loans for which concessions are granted may now be considered troubled debt restructurings that were previously not. This guidance became effective July 1, 2011, applied retrospectively to January 1, 2011. The Company has determined this new guidance has no impact on its student loan receivable portfolio.

In April 2011, the FASB issued ASU 2011-08. See "Critical Accounting Policies - Goodwill and Intangible Assets - Impairment Assessments" related to the Company's adoption of this standard.

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income, "Presentation of Comprehensive Income." The objective of this ASU is to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. The new guidance requires all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The new guidance will be applied retrospectively for fiscal years, and interim periods within those years, beginning after December 15, 2011. This guidance will be effective for the Company in the first quarter 2012. As of the filing date of this report, the Company had not completed its evaluation of this new guidance.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
(All dollars are in thousands, except share amounts, unless otherwise noted)

Interest Rate Risk

The Company's primary market risk exposure arises from fluctuations in its borrowing and lending rates, the spread between which could impact the Company due to shifts in market interest rates. Because the Company generates a significant portion of its earnings from its student loan spread, the interest sensitivity of the balance sheet is a key profitability driver.

77

The following table sets forth the Company's loan assets and debt instruments by rate characteristics:

	As of December 31, 2011		As of December 31, 2010		
	Dollars	Percent	Dollars	Percent	
Fixed-rate loan assets	\$10,899,733	44.7	% \$8,525,279	35.7	%
Variable-rate loan assets	13,459,892	55.3	15,343,777	64.3	
Total	\$24,359,625	100.0	% \$23,869,056	100.0	%
Fixed-rate debt instruments	\$29,517	0.1	% \$163,255	0.7	%
Variable-rate debt instruments	24,565,652	99.9	24,509,217	99.3	
Total	\$24,595,169	100.0	% \$24,672,472	100.0	%

Loans originated prior to April 1, 2006 generally earn interest at the higher of a floating rate based on the Special Allowance Payment formula set by the Department and the borrower rate, which is fixed over a period of time. The SAP formula is based on an applicable indice plus a fixed spread that is dependent upon when the loan was originated, the loan's repayment status, and funding sources for the loan. The Company generally finances its student loan portfolio with variable rate debt. In low and/or declining interest rate environments, when the fixed borrower rate is higher than the rate produced by the SAP formula, the Company's student loans earn at a fixed rate while the interest on the variable rate debt typically continues to decline. In these interest rate environments, the Company may earn additional spread income that it refers to as floor income.

Depending on the type of loan and when it was originated, the borrower rate is either fixed to term or is reset to an annual rate each July 1. As a result, for loans where the borrower rate is fixed to term, the Company may earn floor income for an extended period of time, which the Company refers to as fixed rate floor income, and for those loans where the borrower rate is reset annually on July 1, the Company may earn floor income to the next reset date, which the Company refers to as variable rate floor income. In accordance with legislation enacted in 2006, lenders are required to rebate fixed rate floor income and variable rate floor income to the Department for all new FFELP loans first originated on or after April 1, 2006. A summary of fixed rate floor income follows.

	Year ended December 31,		
	2011	2010	2009
Fixed rate floor income, gross	\$164,700	151,861	147,107
Derivative settlements (a)	(20,246) (19,618) (2,009
Fixed rate floor income, net	\$144,454	132,243	145,098

(a) Includes settlement payments on derivatives used to hedge student loans earning fixed rate floor income.

The high levels of fixed rate floor income earned during 2011, 2010, and 2009 are due to historically low interest rates. In addition, the 2011 amount increased due to the purchase of the residual interest in \$1.9 billion of consolidation loans in July 2011. If interest rates remain low, the Company anticipates continuing to earn significant fixed rate floor income in future periods.

Absent the use of derivative instruments, a rise in interest rates may reduce the amount of floor income received and this may have an impact on earnings due to interest margin compression caused by increasing financing costs, until such time as the federally insured loans earn interest at a variable rate in accordance with their special allowance payment formulas. In higher interest rate environments, where the interest rate rises above the borrower rate and fixed rate loans effectively become variable rate loans, the impact of the rate fluctuations is reduced.

The following graph depicts fixed rate floor income for a borrower with a fixed rate of 6.75% and a SAP rate of 2.64%:

The following table shows the Company's student loan assets that are earning fixed rate floor income as of December 31, 2011:

Fixed interest rate range	Borrower/lender weighted average yield	Estimated variable conversion rate (a)	Balance of assets earning fixed-rate floor income as of December 31, 2011
< 3.0%	2.88%	0.24%	\$1,724,692
3.0 - 3.49%	3.20%	0.56%	2,004,077
3.5 - 3.99%	3.65%	1.01%	1,963,495
4.0 - 4.49%	4.20%	1.56%	1,500,233
4.5 - 4.99%	4.72%	2.08%	853,672
5.0 - 5.49%	5.24%	2.60%	570,032
5.5 - 5.99%	5.67%	3.03%	346,414
6.0 - 6.49%	6.18%	3.54%	404,603
6.5 - 6.99%	6.70%	4.06%	361,069
7.0 - 7.49%	7.17%	4.53%	142,132
7.5 - 7.99%	7.70%	5.06%	239,146
8.0 - 8.99%	8.17%	5.53%	537,512
> 9.0%	9.04%	6.40%	252,656
			\$10,899,733

(a) The estimated variable conversion rate is the estimated short-term interest rate at which loans would convert to a variable rate. As of December 31, 2011, the short-term interest rate was 20 basis points.

The following table summarizes the outstanding derivative instruments as of December 31, 2011 used by the Company to hedge loans earning fixed rate floor income.

Maturity	Notional amount	Weighted average fixed rate paid by the Company (a)	
2013	\$2,150,000	0.85	%
2014	750,000	0.85	
2015	100,000	2.26	
2020	50,000	3.23	
	\$3,050,000	0.87	%

(a) For all interest rate derivatives, the Company receives discrete three-month LIBOR.

As of December 31, 2011, the Company had \$2.8 billion of student loan assets that were eligible to earn variable-rate floor income.

The Company is exposed to interest rate risk in the form of basis risk and repricing risk because the interest rate characteristics of the Company's assets do not match the interest rate characteristics of the funding. The Company attempts to match the interest rate characteristics of certain pools of loan assets with debt instruments of substantially similar characteristics. Due to the variability in duration of the Company's assets and varying market conditions, the Company does not attempt to perfectly match the interest rate characteristics of the entire loan portfolio with the underlying debt instruments. The Company has adopted a policy of periodically reviewing the mismatch related to the interest rate characteristics of its assets and liabilities together with the Company's outlook as to current and future market conditions. Based on those factors, the Company uses derivative instruments as part of its overall risk management strategy. Derivative instruments used as part of the Company's interest rate risk management strategy currently include interest rate swaps, basis swaps, and cross-currency swaps.

The following table presents the Company's FFELP student loan assets and related funding arranged by underlying indices as of December 31, 2011:

Index	Frequency of variable resets	Assets	Debt outstanding that funded student loan assets (a)
3 month H15 financial commercial paper (b)	Daily	\$23,391,112	—
3 month Treasury bill	Varies	941,597	—
3 month LIBOR (c)	Quarterly	—	19,594,573
1 month LIBOR	Monthly	—	657,830
Auction-rate or remarketing (d)	Varies	—	970,575
Asset-backed commercial paper (e)	Varies	—	3,163,985
Other (f)		97,373	43,119
		\$24,430,082	24,430,082

The Company has certain basis swaps outstanding in which the Company receives three-month LIBOR and pays one-month LIBOR plus or minus a spread as defined in the agreements (the "1:3 Basis Swaps"). The Company (a) entered into these derivative instruments to better match the interest rate characteristics on its student loan assets and the debt funding such assets. The following table summarizes these derivatives as of December 31, 2011:

Maturity	Notional amounts
2021	\$250,000
2023	1,250,000
2024	250,000
2026	800,000
2028	100,000
2036	700,000
2039	150,000
2040	200,000
	\$3,700,000

(b) The Company's FFELP student loans earn interest based on the daily average 90-day H15 financial commercial paper index calculated on a fiscal quarter.

(c) The Company has Euro-denominated notes that reprice on the EURIBOR index. The Company has entered into derivative instruments (cross-currency interest rate swaps) that convert the EURIBOR index to three-month LIBOR. As a result, these notes are reflected in the three-month LIBOR category in the above table. See "Foreign Currency Exchange Risk."

(d) The interest rates on certain of the Company's asset-backed securities are set and periodically reset via a "dutch auction" ("Auction Rate Securities") or through a remarketing utilizing remarketing agents ("Variable Rate Demand Notes"). As of December 31, 2011, the Company is sponsor on \$751.4 million of Auction Rate Securities and \$219.2 million of Variable Rate Demand Notes.

For Auction Rate Securities, investors and potential investors submit orders through a broker-dealer as to the principal amount of notes they wish to buy, hold, or sell at various interest rates. The broker-dealers submit their clients' orders to the auction agent, who then determines the clearing interest rate for the upcoming period. Interest rates on these Auction Rate Securities are reset periodically, generally every 7 to 35 days, by the auction agent or agents. During the first quarter of 2008, as part of the credit market crisis, auction rate securities from various issuers failed to receive sufficient order interest from potential investors to clear successfully, resulting in failed auction status. Since February 8, 2008, the Company's Auction Rate Securities have failed in this manner. Under normal conditions, banks have historically purchased these securities when investor demand is weak. However, since February 2008, banks have been allowing auctions to fail. Currently, all of the Company's Auction Rate Securities are in a failed auction status and the Company believes they will remain in a failed status for an extended period of time and possibly permanently.

As a result of a failed auction, the Auction Rate Securities will generally pay interest to the holder at a maximum rate as defined by the indenture. While these rates will vary, they will generally be based on a spread to LIBOR or Treasury Securities, or the Net Loan Rate as defined in the financing documents. Due to the failed auctions related to these securities, the Company could be subject to interest costs substantially above the anticipated and historical rates paid on these types of securities.

For Variable Rate Demand Notes, the remarketing agents set the price, which is then offered to investors. If there are insufficient potential bid orders to purchase all of the notes offered for sale, the Company could be subject to interest costs substantially above the anticipated and historical rates paid on these types of securities.

(e) Asset-backed commercial paper consists of \$824.4 million funded in the Company's FFELP warehouse facilities and \$2.3 billion funded through the Department's Conduit Program. Funding for the Conduit Program is provided by the capital markets at a cost based on market rates.

(f) Assets include restricted cash and investments and other assets. Debt outstanding includes other debt obligations secured by student loan assets and related collateral.

On December 23, 2011, the President signed the Consolidated Appropriations Act of 2012 into law. This Act includes changes to the FFELP student lender payment index from the commercial paper rate to the one-month LIBOR rate for the Special Allowance Payment calculation on outstanding FFELP loans held by student loan lenders. As of December 31, 2011, the Company had \$23.4 billion of loans in which it intends to make the election to change the SAP calculation to the one-month LIBOR rate. This change

mitigates the Company's exposure to basis risk and will allow the Company to better match borrowing and lending rates. The Company currently expects the new formula to be developed and available for use in the second quarter of 2012.

Financial Statement Impact of Derivative Instruments

The Company recognizes changes in the fair value of derivative instruments currently in earnings unless specific hedge accounting criteria are met. Management has structured the majority of the Company's derivative transactions with the intent that each is economically effective. However, the Company's derivative instruments do not qualify for hedge accounting; consequently, the change in fair value of these derivative instruments is included in the Company's operating results. Changes or shifts in the forward yield curve and fluctuations in currency rates can significantly impact the valuation of the Company's derivatives. Accordingly, changes or shifts to the forward yield curve and fluctuations in currency rates will impact the financial position and results of operations of the Company.

The following table summarizes the effect of derivative instruments included in the consolidated statements of income. All gains and losses recognized in income related to the Company's derivative activity are included in "derivative market value and foreign currency and derivative settlements, net" on the consolidated statements of income.

	Year ended December 31,		
	2011	2010	2009
Settlements:			
Average/discrete basis swaps	\$—	140	11,483

Derivative impact included in the consolidated statements of income	\$(58,353) (91,398) 46,138

Sensitivity Analysis

The following tables summarize the effect on the Company's earnings, based upon a sensitivity analysis performed by the Company assuming hypothetical increases in interest rates of 100 basis points and 300 basis points while funding spreads remain constant. In addition, as it relates to the effect on earnings, a sensitivity analysis was performed assuming the funding indice increases 10 basis points and 30 basis points while holding the asset indice constant, if the funding indice is different than the asset indice. The effect on earnings was performed on the Company's variable rate assets (including loans earning fixed rate floor income) and liabilities. The analysis includes the effects of the Company's interest rate and basis swaps in existence during these periods.

Year ended December 31, 2011

	Interest rates				Asset and funding indice mismatches

83

Foreign Currency Exchange Risk

During 2006, the Company completed separate debt offerings of student loan asset-backed securities that included €420.5 million and €352.7 million Euro Notes with interest rates based on a spread to the EURIBOR index. As a result of these transactions, the Company is exposed to market risk related to fluctuations in foreign currency exchange rates between the U.S. dollar and Euro. The principal and accrued interest on these notes is re-measured at each reporting period and recorded on the Company's balance sheet in U.S. dollars based on the foreign currency exchange rate on that date. Changes in the principal and accrued interest amounts as a result of foreign currency exchange rate fluctuations are included in the "derivative market value and foreign currency adjustments and derivative settlements, net" in the Company's consolidated statements of income.

The Company entered into cross-currency interest rate swaps in connection with the issuance of the Euro Notes. Under the terms of these derivative instrument agreements, the Company receives from a counterparty a spread to the EURIBOR index based on notional amounts of €420.5 million and €352.7 million and pays a spread to the LIBOR index based on notional amounts of \$500.0 million and \$450.0 million, respectively. In addition, under the terms of these agreements, all principal payments on the Euro Notes will effectively be paid at the exchange rate in effect between the U.S. dollar and Euro as of the issuance of the notes.

The following table shows the income statement impact as a result of the re-measurement of the Euro Notes and the change in the fair value of the related derivative instruments. These items are included in "derivative market value and foreign currency adjustments and derivative settlements, net" on the accompanying consolidated statements of income.

	Year ended December 31,		
	2011	2010	2009
Re-measurement of Euro Notes	\$32,706	80,721	(37,654)
Change in fair value of cross currency interest rate swaps	(14,287)	(74,899)	2,497
Total impact to statements of income - income (expense)	\$18,419	5,822	(35,157)

The re-measurement of the Euro-denominated bonds generally correlates with the change in fair value of the cross-currency interest rate swaps. However, the Company will experience unrealized gains or losses related to the cross-currency interest rate swaps if the two underlying indices (and related forward curve) do not move in parallel. Management intends to hold the cross-currency interest rate swaps through the maturity of the Euro-denominated bonds.

Financial Statement Impact – Derivatives and Foreign Currency Transaction Adjustments

The following table summarizes all of the components of "derivative market value and foreign currency adjustments and derivative settlements, net" included in the consolidated statements of income.

	Year ended December 31,		
	2011	2010	2009
Change in fair value of derivatives	\$(50,513)	(77,134)	6,852
Foreign currency transaction adjustment (Euro Notes)	32,706	80,721	(37,654)
Derivative settlements, net	(7,840)	(14,264)	39,286
Derivative market value and foreign currency adjustments and derivative settlements, net - (expense) income	\$(25,647)	(10,677)	8,484

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Reference is made to the consolidated financial statements listed under the heading “(a) 1. Consolidated Financial Statements” of Item 15 of this report, which consolidated financial statements are incorporated into this report by reference in response to this Item 8.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

84

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Under supervision and with the participation of certain members of the Company's management, including the chief executive and chief financial officers, the Company completed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in SEC Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based on this evaluation, the Company's principal executive and principal financial officers concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report to provide reasonable assurance that information required to be disclosed in reports the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported, within the time periods specified in the SEC's rules and forms, and is accumulated and communicated to the Company's management, including the chief executive and chief financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting during the Company's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) for the Company. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements in accordance with U.S. generally accepted accounting principles. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management maintains a comprehensive system of controls intended to ensure that transactions are executed in accordance with management's authorization, assets are safeguarded, and financial records are reliable. Management also takes steps to ensure that information and communication flows are effective and to monitor performance, including performance of internal control procedures.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2011 based on the criteria for effective internal control described in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes that, as of December 31, 2011, the Company's internal control over financial reporting is effective.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2011 has been audited by KPMG LLP, the Company's independent registered public accounting firm, as stated in their report included herein, which expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2011.

Inherent Limitations on Effectiveness of Internal Controls

The Company's management, including the chief executive and chief financial officers, understands that the disclosure controls and procedures and internal controls over financial reporting are subject to certain limitations, including the exercise of judgment in designing, implementing, and evaluating the controls and procedures, the assumptions used in identifying the likelihood of future events, and the inability to eliminate misconduct completely. The design of a control system must reflect the fact that there are resource constraints, and the benefits of a control system must be considered relative to their costs. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

As a result, there can be no assurance that the Company's disclosure controls and procedures or internal controls over financial reporting will prevent all errors or fraud or ensure that all material information will be made known to management in a timely

fashion. By their nature, the Company's or any system of disclosure controls and procedures or internal controls over financial reporting, no matter how well designed and operated, can provide only reasonable assurance regarding management's control objectives.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Nelnet, Inc.:

We have audited Nelnet, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Nelnet, Inc.'s (the Company) management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Nelnet, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Nelnet, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the years in the three year period ended December 31, 2011, and our report dated February 28, 2012 expressed an unqualified opinion on those consolidated financial statements.

ITEM 9B. OTHER INFORMATION

During the fourth quarter of 2011, no information was required to be disclosed in a report on Form 8-K, but not reported.

86

PART III.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

The information as to the directors, executive officers, corporate governance, and Section 16(a) beneficial ownership reporting compliance of the Company set forth under the captions “PROPOSAL 1 - ELECTION OF DIRECTORS - Nominees,” “EXECUTIVE OFFICERS,” “CORPORATE GOVERNANCE,” and “SECURITY OWNERSHIP OF DIRECTORS, EXECUTIVE OFFICERS, AND PRINCIPAL SHAREHOLDERS - Section 16(a) Beneficial Ownership Reporting Compliance” in the Proxy Statement to be filed on Schedule 14A with the SEC, no later than 120 days after the end of the Company's fiscal year, relating to the Company's Annual Meeting of Shareholders scheduled to be held on May 24, 2012 (the “Proxy Statement”) is incorporated into this report by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information set forth under the captions “CORPORATE GOVERNANCE” and “EXECUTIVE COMPENSATION” in the Proxy Statement is incorporated into this report by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information set forth under the caption “SECURITY OWNERSHIP OF DIRECTORS, EXECUTIVE OFFICERS, AND PRINCIPAL SHAREHOLDERS - Stock Ownership” in the Proxy Statement is incorporated into this report by reference. There are no arrangements known to the Company, the operation of which may at a subsequent date result in a change in the control of the Company.

The following table summarizes information about compensation plans under which equity securities are authorized for issuance.

Equity Compensation Plan Information

Plan category	As of December 31, 2011		
	Number of shares to be issued upon exercise of outstanding options, warrants, and rights (a)	Weighted-average exercise price of outstanding options, warrants, and rights (b)	Number of shares remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by shareholders	—	—	3,406,619 (1)
Equity compensation plans not approved by shareholders	—	—	—
Total	—	—	3,406,619

Includes 2,619,721, 170,914, and 615,984 shares of Class A Common Stock remaining available for future (1)issuance under the Nelnet, Inc. Restricted Stock Plan, Nelnet, Inc. Directors Stock Compensation Plan, and Nelnet, Inc. Employee Share Purchase Plan, respectively.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information set forth under the captions “CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS,” “CORPORATE GOVERNANCE - Board Composition and Director Independence,” and “CORPORATE GOVERNANCE - Board Committees” in the Proxy Statement is incorporated into this report by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information set forth under the caption “PROPOSAL 2 - RATIFICATION OF APPOINTMENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM - Independent Accountant Fees and Services” in the Proxy Statement is incorporated into this report by reference.

87

PART IV.

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) 1. Consolidated Financial Statements

The following consolidated financial statements of Nelnet, Inc. and its subsidiaries and the Report of Independent Registered Public Accounting Firm thereon are included in Item 8 above:

	Page
Report of Independent Registered Public Accounting Firm	F-2
Consolidated Balance Sheets as of December 31, 2011 and 2010	F-3
Consolidated Statements of Income for the years ended December 31, 2011, 2010, and 2009	F-4
Consolidated Statements of Shareholders' Equity and Comprehensive Income for the years ended December 31, 2011, 2010, and 2009	F-5
Consolidated Statements of Cash Flows for the years ended December 31, 2011, 2010, and 2009	F-6
Notes to Consolidated Financial Statements	F-7

2. Financial Statement Schedules

All schedules are omitted because they are not applicable or the required information is shown in the consolidated financial statements or notes thereto.

3. Exhibits

The exhibits listed in the accompanying index to exhibits are filed, furnished, or incorporated by reference as part of this report.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Nelnet, Inc.:

We have audited the accompanying consolidated balance sheets of Nelnet, Inc. and subsidiaries (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Nelnet, Inc. and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Nelnet, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 28, 2012 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except share amounts, unless otherwise noted)

1. Description of Business

Nelnet, Inc. and its subsidiaries (“Nelnet” or the “Company”) is an education services company focused primarily on providing fee-based processing services and quality education-related products and services in four core areas: loan financing, loan servicing, payment processing, and enrollment services (education planning). These products and services help students and families plan, prepare, and pay for their education and make the administrative and financial processes more efficient for schools and financial organizations. In addition, the Company earns net interest income on a portfolio of federally insured student loans. Substantially all revenue from external customers is earned, and all long lived assets are located, in the United States.

The Company was formed as a Nebraska corporation in 1977 to service federal student loans for two local banks. The Company built on this initial foundation as a servicer to become a leading originator, holder, and servicer of federal student loans, principally consisting of loans originated under the Federal Family Education Loan Program (“FFELP” or “FFEL Program”) of the U.S. Department of Education (the “Department”). To reduce its reliance on interest income on student loans, the Company has significantly diversified and increased its fee-based education-related services.

The Company operates as four distinct operating segments. The Company's operating segments include:

- Student Loan and Guaranty Servicing
- Tuition Payment Processing and Campus Commerce
- Enrollment Services
- Asset Generation and Management

A description of each operating segment is included below. In addition, see note 14, “Segment Reporting,” for additional information on the Company's segment reporting.

Fee-Based Operating Segments

Student Loan and Guaranty Servicing

The following are the primary service offerings the Company offers as part of its Student Loan and Guaranty Servicing operating segment:

- Servicing FFELP loans
- Originating and servicing non-federally insured student loans
- Servicing federally-owned student loans for the Department of Education
- Servicing and outsourcing services for guaranty agencies
 - Providing student loan servicing software and other information technology products and services

The Student Loan and Guaranty Servicing operating segment provides for the servicing of the Company's student loan portfolio and the portfolios of third parties. The loan servicing activities include loan origination activities, loan conversion activities, application processing, borrower updates, payment processing, due diligence procedures, funds management reconciliations, and claim processing. These activities are performed internally for the Company's portfolio in addition to generating external fee revenue when performed for third-party clients.

In June 2009, the Department of Education named the Company as one of four private sector companies awarded a servicing contract to service federally-owned student loans. In September 2009, the Company began servicing loans under this contract. The contract spans five years, with one five-year renewal at the option of the Department.

This operating segment also provides servicing activities for guarantee agencies. These activities include providing software and data center services, borrower and loan updates, default aversion tracking services, claim processing services, and post-default collection services.

This operating segment also provides student loan servicing software, which is used internally by the Company and licensed to third-party student loan holders and servicers. This software system has been adapted so that it can be offered as a hosted servicing software solution that can be used by third parties to service various types of student loans including federally-owned student

F-7

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

loans and FFEL Program loans. In addition, this operating segment provides information technology products and services, with core areas of business in educational loan software solutions, technical consulting services, and enterprise content management solutions.

Tuition Payment Processing and Campus Commerce

The Company's Tuition Payment Processing and Campus Commerce operating segment provides products and services to help students and families manage the payment of education costs at all levels (K-12 and higher education). It also provides innovative education-focused technologies, services, and support solutions to help schools with the everyday challenges of collecting and processing commerce data.

In the K-12 market, the Company offers actively managed tuition payment plans as well as assistance with financial needs assessment and donor management. The Company offers two principal products to the higher education market: actively managed tuition payment plans and campus commerce technologies and payment processing.

Enrollment Services

The Enrollment Services operating segment offers products and services that are focused on helping colleges recruit and retain students (interactive and list marketing services) and helping students plan and prepare for life after high school and/or military service (publishing services and resource centers). Interactive marketing products and services include agency of record services, qualified inquiry generation, pay per click services, inquiry management software, and other marketing management, along with call center solutions. The inquiry management software allows schools to manage their inquiry flow and perform analytics on the inquiries received by the school. The majority of interactive marketing revenue is derived from fees that are earned through the delivery of qualified inquiries or clicks to colleges and universities. List marketing services include providing lists to help higher education institutions and businesses reach the middle school, high school, college bound high school, college, and young adult market places. Publishing services include test preparation study guides, school directories and databases, and career exploration guides. Resource centers include online courses, scholarship search and selection data, career planning, and on-line information about colleges and universities.

Asset Generation and Management Operating Segment

The Company's Asset Generation and Management operating segment includes the acquisition, management, and ownership of the Company's student loan assets, which was historically the Company's largest product and service offering. Student loan assets included in this segment are loans originated under the FFEL Program, including the Stafford Loan Program, the PLUS Loan program, the Supplemental Loans for Students (“SLS”) program, and loans that consolidate certain borrower obligations (“Consolidation”). The Company generates a substantial portion of its earnings from the spread, referred to as the Company's student loan spread, between the yield it receives on its student loan portfolio and the costs to finance the portfolio. The student loan assets are held in a series of education lending subsidiaries designed specifically for this purpose. In addition to the student loan spread earned on its portfolio, all costs and activity associated with managing the portfolio, such as servicing of the assets and debt maintenance are included in this segment.

On March 30, 2010, President Obama signed into law the Health Care and Education Reconciliation Act of 2010 (the "Reconciliation Act of 2010"). Effective July 1, 2010, this law prohibits new loan originations under the FFEL Program and requires that all new federal loan originations be made through the Federal Direct Loan Program. The new law does not alter or affect the terms and conditions of existing FFELP loans. As a result of this legislation, the Company no longer originates new FFELP loans.

2. Summary of Significant Accounting Policies and Practices

Consolidation

The consolidated financial statements include the accounts of Nelnet, Inc. and its consolidated subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

The Company's education lending subsidiaries are engaged in the securitization of education finance assets. These education lending subsidiaries hold beneficial interests in eligible loans, subject to creditors with specific interests. The liabilities of the Company's education lending subsidiaries are not the direct obligations of Nelnet, Inc. or any of its other subsidiaries. Each

F-8

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

education lending subsidiary is structured to be bankruptcy remote, meaning that they should not be consolidated in the event of bankruptcy of the parent company or any other subsidiary. For accounting purposes, the transfers of student loans to the eligible lender trusts do not qualify as sales, as the trusts continue to be under the effective control of the Company. Accordingly, all the financial activities and related assets and liabilities, including debt, of the securitizations are reflected in the Company's consolidated financial statements.

Reclassifications

Certain amounts previously reported within the Company's consolidated statements of income have been reclassified to conform to the current period presentation. These reclassifications include:

Reclassifying “software services revenue” to “loan and guaranty servicing revenue.”

Reclassifying “professional and other services,” “occupancy and communications,” “postage and distribution,” “advertising and marketing,” and “trustee and other debt related fees” to “other” operating expenses.

Reclassifying student list amortization, which was previously included in “advertising and marketing” to “depreciation and amortization.”

The reclassifications had no effect on consolidated net income or consolidated assets and liabilities.

Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make a number of estimates and assumptions that affect the reported amounts of assets and liabilities, reported amounts of revenues and expenses, and other disclosures. Actual results may differ from those estimates.

Student Loans Receivable

Student loans consist of federally insured student loans and non-federally insured student loans. If the Company has the ability and intent to hold loans for the foreseeable future, such loans are held for investment and carried at amortized cost. Amortized cost includes the unamortized premium or discount and capitalized origination costs and fees, all of which are amortized to interest income. Loans which are held-for-investment also have an allowance for loan loss as needed. Any loans the Company has the ability and intent to sell are classified as held for sale and are carried at the lower of cost or fair value. Loans which are held for sale do not have the associated premium or discount and origination costs and fees amortized into interest income and there is also no related allowance for loan losses.

Federally insured loans may be made under the FFEL Program by certain lenders as defined by the Higher Education Act of 1965, as amended (the “Higher Education Act”). These loans, including related accrued interest, are guaranteed at their maximum level permitted under the Higher Education Act by an authorized guaranty agency, which has a contract of reinsurance with the Department of Education. The terms of the loans, which vary on an individual basis, generally provide for repayment in monthly installments of principal and interest over a period of up to 30 years. Interest rates on loans may be fixed or variable, dependent upon type, terms of loan agreements, and date of

origination. For FFELP loans, the education lending subsidiaries have entered into trust agreements in which unrelated financial institutions serve as the eligible lender trustees. As eligible lender trustees, the financial institutions act as the eligible lender in acquiring certain eligible student loans as an accommodation to the subsidiaries, which hold beneficial interests in the student loan assets as the beneficiaries of such trusts.

Substantially all FFELP loan principal and related accrued interest is guaranteed as defined by the Higher Education Act. These guarantees are made subject to the performance of certain loan servicing procedures stipulated by applicable regulations. If these due diligence procedures are not met, affected student loans may not be covered by the guarantees should the borrower default. Such student loans are subject to “cure” procedures and reinstatement of the guaranty under certain circumstances.

Student loans receivable also includes non-federally insured loans. The terms of the non-federally insured loans, which vary on an individual basis, generally provide for repayment in monthly installments of principal and interest over a period of up to 30 years. The non-federally insured loans are not covered by guarantees or collateral should the borrower default.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses on student loans. The provision for loan losses reflects the activity for the applicable period and provides an allowance at a level that the Company's management believes is adequate to cover probable losses inherent in the loan portfolio. The Company evaluates the adequacy of the allowance for loan losses on its federally insured loan portfolio separately from its non-federally insured loan portfolio. These evaluation processes are subject to numerous judgments and uncertainties.

The allowance for the federally insured loan portfolio is based on periodic evaluations of the Company's loan portfolios considering loans in repayment versus those in a nonpaying status, delinquency status, trends in defaults in the portfolio based on Company and industry data, past experience, trends in student loan claims rejected for payment by guarantors, changes to federal student loan programs, current economic conditions, and other relevant factors. The federal government guarantees 97 percent of the principal of and the interest on federally insured student loans disbursed on and after July 1, 2006 (and 98 percent for those loans disbursed prior to July 1, 2006), which limits the Company's loss exposure on the outstanding balance of the Company's federally insured portfolio. Student loans disbursed prior to October 1, 1993 are fully insured.

In determining the adequacy of the allowance for loan losses on the non-federally insured loans, the Company considers several factors including: loans in repayment versus those in a nonpaying status, delinquency status, type of program, trends in defaults in the portfolio based on Company and industry data, past experience, current economic conditions, and other relevant factors. The Company places a non-federally insured loan on nonaccrual status when the collection of principal and interest is 30 days past due and charges off the loan when the collection of principal and interest is 120 days past due.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, the Company considers all investments with maturities when purchased of three months or less to be cash equivalents.

Investments

Investments are held to provide liquidity and to serve as a source of income. The Company's investments are classified as trading and are accounted for at fair value with unrealized gains and losses included in "other income" on the consolidated statements of income. Securities that the Company has the intent and ability to hold to maturity are classified as held-to-maturity. The Company's held-to-maturity securities are accounted for at amortized cost.

Restricted Cash and Investments

Restricted cash primarily includes amounts for student loan securitizations and other secured borrowings. This cash must be used to make payments related to trust obligations. Amounts on deposit in these accounts are primarily the result of timing differences between when principal and interest is collected on the trust assets and when principal and interest is paid on trust liabilities. Restricted cash also includes collateral deposits with derivative counterparties.

Cash balances that the Company's indentured trusts deposit in guaranteed investment contracts that are held for the related note holders are classified as restricted investments. The Company has classified these investments as held-to-maturity and accounts for them at amortized cost.

Restricted Cash - Due to Customers

As a servicer of student loans, the Company collects student loan remittances and subsequently disburses these remittances to the appropriate lending entities. The Company also collects tuition payments and subsequently remits these payments to the appropriate schools. Cash collected for customers and the related liability are included in the accompanying consolidated balance sheets.

Accounts Receivable

Accounts receivable are presented at their net realizable values, which includes allowances for doubtful accounts. Allowance estimates are based upon individual customer experience, as well as the age of receivables and likelihood of collection.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Goodwill

The Company reviews goodwill for impairment annually (as of November 30) and whenever triggering events or changes in circumstances indicate its carrying value may not be recoverable. Goodwill is tested for impairment using a fair value approach at the reporting unit level. A reporting unit is the operating segment, or a business one level below that operating segment if discrete financial information is prepared and regularly reviewed by segment management. However, components are aggregated as a single reporting unit if they have similar economic characteristics.

In April 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2011-08, Intangibles - Goodwill and Other: Testing for Goodwill Impairment ("ASU 2011-08"). This ASU amends FASB ASC Topic 350, Intangibles - Goodwill and Other, to simplify how an entity tests for goodwill impairment by allowing entities to first assess certain qualitative factors to determine whether the existence of certain events or circumstances would lead to a determination that it would be more likely than not that the fair value of a reporting unit is less than its carrying amount, instead of first performing a fair value analysis for each reporting unit. Entities that conclude, after assessing the totality of events and circumstances, that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount are not required to perform the two-step impairment test (the two-step impairment test is described below). This guidance became effective on September 15, 2011 for annual and interim impairment tests for fiscal years beginning after December 15, 2011, and early adoption is permitted. The Company adopted the new guidance for its 2011 goodwill impairment test. As of November 30, 2011, the Company assessed qualitative factors and concluded it was not more likely than not that the fair value of its reporting units were less than their carrying amount. As such, the Company was not required to perform the two-step impairment test.

If the Company elects to not perform a qualitative assessment or if the Company determines it is more likely than not that the fair value of a reporting unit is less than the carrying amount, then the Company performs a two-step impairment test on goodwill. In the first step, the Company compares the fair value of each reporting unit to its carrying value. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is considered not impaired and the Company is not required to perform further testing. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value of the reporting unit, then the Company must perform the second step of the impairment test in order to determine the implied fair value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then the Company would record an impairment loss equal to the difference.

Determining the fair value of a reporting unit involves the use of significant estimates and assumptions. These estimates and assumptions include revenue growth rates and operating margins used to calculate projected future cash flows, risk-adjusted discount rates, future economic and market conditions, and determination of appropriate market comparables. Actual future results may differ from those estimates.

Intangible Assets

Intangible assets with finite lives are amortized over their estimated lives. Such assets are amortized using a method of amortization that reflects the pattern in which the economic benefits of the intangible asset is consumed or otherwise used up. If that pattern cannot be reliably determined, the Company uses a straight-line amortization method.

The Company evaluates the estimated remaining useful lives of purchased intangible assets and whether events or changes in circumstances warrant a revision to the remaining periods of amortization.

Property and Equipment

Property and equipment are carried at cost, net of accumulated depreciation. Maintenance and repairs are charged to expense as incurred, and major improvements, including leasehold improvements, are capitalized. Gains and losses from the sale of property and equipment are included in determining net income. The Company uses accelerated and straight-line methods for recording depreciation and amortization. Accelerated methods are used for certain equipment and software when this method is believed to provide a better matching of income and expenses. Leasehold improvements are amortized over the lesser of their useful life or the related lease period.

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Impairment of Long Lived Assets

The Company reviews its long-lived assets, such as property and equipment and purchased intangibles subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. The Company uses estimates to determine the fair value of long-lived assets. Such estimates are generally based on estimated future cash flows or cost savings associated with particular assets and are discounted to present value using an appropriate discount rate. The estimates of future cash flows associated with assets are generally prepared using a cost savings method, a lost income method, or an excess return method, as appropriate. In utilizing such methods, management must make certain assumptions about the amount and timing of estimated future cash flows and other economic benefits from the assets, the remaining economic useful life of the assets, and general economic factors concerning the selection of an appropriate discount rate. The Company may also use replacement cost or market comparison approaches to estimating fair value if such methods are determined to be more appropriate.

Assumptions and estimates about future values and remaining useful lives of the Company's intangible and other long-lived assets are complex and subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in the Company's business strategy and internal forecasts. Although the Company believes the historical assumptions and estimates used are reasonable and appropriate, different assumptions and estimates could materially impact the reported financial results.

Other Assets

Other assets are recorded at cost or amortized cost and consist primarily of debt issuance costs, student list costs, certain investments, and other miscellaneous assets. Debt issuance costs are amortized using the effective interest method.

Fair Value Measurements

The Company uses estimates of fair value in applying various accounting standards for its financial statements.

Fair value is defined as the price to sell an asset or transfer a liability in an orderly transaction between willing and able market participants. In general, the Company's policy in estimating fair values is to first look at observable market prices for identical assets and liabilities in active markets, where available. When these are not available, the Company uses unobservable inputs that reflect the Company's market assumptions such as prices of similar instruments. Transaction costs are not included in the determination of fair value. When possible, the Company seeks to validate the model's output to market transactions. Depending on the availability of observable inputs and prices, different valuation models could produce materially different fair value estimates. The values presented may not represent future fair values and may not be realizable. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

The Company categorizes its fair value estimates based on a hierarchical framework associated with three levels of price transparency utilized in measuring financial instruments at fair value. Classification is based on the lowest level of input that is significant to the fair value of the instrument. The three levels include:

Level 1: Quoted prices for identical instruments in active markets. The types of financial instruments included in Level 1 are highly liquid instruments with quoted prices.

Level 2: Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose primary value drivers are observable.

Level 3: Instruments whose primary value drivers are unobservable. Inputs are developed based on the best information available; however, significant judgment is required by management in developing the inputs.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

The Company's accounting policy is to recognize transfers between levels of the fair value hierarchy at the end of the reporting period.

Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available for identical or similar instruments, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument.

Revenue Recognition

Loan interest income - Loan interest is paid by the Department or the borrower, depending on the status of the loan at the time of the accrual. In addition, the Department makes quarterly interest subsidy payments on certain qualified FFELP loans until the student is required under the provisions of the Higher Education Act to begin repayment. Borrower repayment of FFELP loans normally begins within six months after completion of the loan holder's course of study, leaving school, or ceasing to carry at least one-half the normal full time academic load, as determined by the educational institution. Borrower repayment of PLUS and Consolidation loans normally begins within 60 days from the date of loan disbursement. Borrower repayment of non-federally insured loans typically begins six months following a borrower's graduation from a qualified institution and the interest is either paid by the borrower or capitalized annually or at repayment.

The Department provides a special allowance to lenders participating in the FFEL Program. The special allowance is accrued based upon the fiscal quarter average rate of 13 week Treasury Bill auctions (for loans originated prior to January 1, 2000) or the fiscal quarter average rate of daily H15 financial commercial paper rates (for loans originated on and after January 1, 2000) relative to the yield of the student loan.

The Company recognizes student loan income as earned, net of amortization of loan premiums and deferred origination costs and the accretion of loan discounts. Loan income is recognized based upon the expected yield of the loan after giving effect to borrower utilization of incentives such as timely payments ("borrower benefits") and other yield adjustments. Loan premiums or discounts, deferred origination costs, and borrower benefits are amortized/accreted over the estimated life of the loan, which includes an estimate of prepayment speeds. The Company periodically evaluates the assumptions used to estimate the life of the loans and prepayment speeds. The Company also pays the Department an annual 105 basis point rebate fee on Consolidation loans. These rebate fees are netted against loan interest income.

Student loan and guaranty servicing revenue – Student loan and guaranty servicing revenue consists of the the following items:

Loan and guaranty servicing fees – Loan servicing fees are determined according to individual agreements with customers and are calculated based on the dollar value of loans, number of loans, or number of borrowers serviced for each customer. Guaranty servicing fees, generally, are calculated based on the number of loans serviced, volume of loans serviced, or amounts collected. Revenue is recognized when earned pursuant to applicable agreements, and when ultimate collection is assured.

Software services revenue – Software services revenue is determined from individual agreements with customers and includes license and maintenance fees associated with student loan software products. Computer and software consulting and remote hosting revenues are recognized over the period in which services are provided to customers.

Tuition payment processing and campus commerce revenue - Tuition payment processing and campus commerce revenue includes actively managed tuition payment solutions and online payment processing. Fees for these services are recognized over the period in which services are provided to customers.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Enrollment services revenue - Enrollment services revenue primarily consists of the following items:

Interactive marketing - Interactive marketing revenue is derived primarily from fees which are earned through the delivery of qualified inquiries or clicks. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectability is reasonably assured. Delivery is deemed to have occurred at the time a qualified inquiry or click is delivered to the customer provided that no significant obligations remain. From time to time, the Company may agree to credit certain inquiries or clicks if they fail to meet the contractual or other guidelines of a particular client. The Company has established a sales reserve based on historical experience. To date, such credits have been immaterial and within management's expectations.

For a portion of its interactive marketing revenue, the Company has agreements with providers of online media or traffic (“Publishers”) used in the generation of inquiries or clicks. The Company receives a fee from its customers and pays a fee to Publishers either on a cost per inquiry, cost per click, or cost per number of impressions basis. The Company is the primary obligor in the transaction. As a result, the fees paid by the Company's customers are recognized as revenue and the fees paid to its Publishers are included in “cost to provide enrollment services” in the Company's consolidated statements of income.

List marketing - Revenue from the sale of lists is generally earned and recognized, net of estimated returns, upon delivery.

Publishing services - Revenue from the sale of print products is generally earned and recognized, net of estimated returns, upon shipment or delivery.

Resource centers - Resource centers services include online courses, scholarship search and selection data, career planning, and online information about colleges and universities. The majority of these services are sold based on subscriptions and/or are performance based. Revenues from sales of subscription and performance based services are recognized ratably over the term of the contract as earned. Subscription and performance based revenues received or receivable in advance of the delivery of services is included in deferred revenue.

Other income - Other income primarily includes borrower late fee income, which is earned by the education lending subsidiaries and is recognized when payments are collected from the borrower.

Derivative Accounting

The Company records derivative instruments at fair value on the consolidated balance sheet as either an asset or liability. The Company determines the fair value for its derivative contracts using either (i) pricing models that consider current market conditions and the contractual terms of the derivative contract or (ii) counterparty valuations. The factors that impact the fair value of the Company's derivatives include interest rates, time value, forward interest rate curve, and volatility factors, as well as foreign exchange rates. Pricing models and their underlying assumptions impact the amount and timing of unrealized gains and losses recognized, and the use of different pricing models or assumptions could produce different financial results. Management has structured all of the Company's derivative transactions with the intent that each is economically effective. However, the Company's derivative instruments do not qualify for hedge accounting. Accordingly, changes in the fair value of derivative instruments are reported in current period earnings. The changes in fair value on derivative instruments, as well as the settlement payments made on such

derivatives, are included in “derivative market value and foreign currency adjustments and derivative settlements, net” on the consolidated statements of income.

Foreign Currency

During 2006, the Company issued Euro-denominated bonds, which are included in “bonds and notes payable” on the consolidated balance sheets. Transaction gains and losses resulting from exchange rate changes when re-measuring these bonds to U.S. dollars at the balance sheet date are included in “derivative market value and foreign currency adjustments and derivative settlements, net” on the consolidated statements of income.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Income tax expense includes deferred tax expense, which represents the net change in the deferred tax asset or liability balance during the year, plus any change made in the valuation allowance, and current tax expense, which represents the amount of tax currently payable to or receivable from a tax authority plus amounts for expected tax deficiencies (including both tax and interest).

Restructuring Activities

From time to time, the Company implements plans to restructure its business. In conjunction with these restructuring plans, one-time, involuntary benefit arrangements and contract termination costs are accounted for in accordance with the Exit or Disposal Cost Obligations Topic of the FASB Accounting Standards Codification and are classified as restructuring expenses in the accompanying consolidated statements of income.

In conjunction with its restructuring plans, the Company has entered into one-time benefit arrangements with employees, who have been involuntarily terminated. The Company recognizes a liability when all of the following conditions have been met and the benefit arrangement has been communicated to the employees:

• Management, having the authority to approve the action, commits to a plan of termination;

• The plan of termination identifies the number of employees to be terminated, their job classifications or functions, and their locations and the expected completion date;

• The plan of termination establishes the terms of the benefit arrangement, including the benefits that employees will receive upon termination, in sufficient detail to enable employees to determine the type and amount of benefits they will receive if they are involuntarily terminated; and

• Actions required to complete the plan of termination indicate that it is unlikely that significant changes to the plan of termination will be made or that the plan of termination will be withdrawn.

Severance costs under such one-time termination benefit arrangements may include all or some combination of severance pay, medical and dental benefits, outplacement services, and certain other costs. Contract termination costs are expensed at the earlier of (1) the contract termination date or (2) the cease use date under the contract. See note 13, “Restructuring Charges,” for additional information.

(Dollars in thousands, except share amounts, unless otherwise noted)

3. Student Loans Receivable and Allowance for Loan Losses

ASU 2010-20, Disclosure about the Credit Quality of Financing Receivables and the Allowance for Credit Losses (“ASU 2010-20”), requires entities to provide disclosures on a disaggregated basis. The ASU defines two levels of disaggregation – portfolio segment and class of financing receivable. A portfolio segment is defined as the level at which an entity develops and documents a systematic method for determining its allowance for credit losses. Classes of financing receivables generally are a disaggregation of a portfolio segment. The Company evaluates the adequacy of the allowance for loan losses on its federally insured loan portfolio separately from its non-federally insured loan portfolio. Management has determined that each of the federally insured loan portfolio and the non-federally insured loan portfolio meets the definition of a portfolio segment. Accordingly, the portfolio segment basis disclosures required by ASU 2010-20 are presented in this note for each of these portfolios. The Company does not disaggregate its portfolio segment student loan portfolios into classes of financing receivables as defined in ASU 2010-20. In addition, as of December 31, 2011 and 2010, the Company does not have any impaired loans as defined in the Receivables Topic of the FASB ASC.

Student loans receivable consisted of the following:

	As of December 31,		
	2011	2010	
	Held for investment	Held for investment	Held for sale (a)
Federally insured loans	\$24,332,709	23,757,699	—
Non-federally insured loans	26,916	26,370	84,987
	24,359,625	23,784,069	84,987
Unamortized loan premiums/discounts and deferred origination costs, net	(13,267)	207,571	—
Allowance for loan losses – federally insured loans	(37,205)	(32,908)	—
Allowance for loan losses – non-federally insured loans	(11,277)	(10,718)	—
	\$24,297,876	23,948,014	84,987
Allowance for federally insured loans as a percentage of such loans	0.15 %	0.14 %	%
Allowance for non-federally insured loans as a percentage of such loans	41.90 %	40.64 %	%

On January 13, 2011, the Company sold a portfolio of non-federally insured loans for proceeds of \$91.3 million (100% of par value). The Company retained credit risk related to this portfolio and will pay cash to purchase back (a) any loans which become 60 days delinquent. As of December 31, 2010, the Company classified this portfolio as held for sale and the loans were carried at fair value.

Loan Acquisition

On July 8, 2011, the Company purchased the residual interest in \$1.9 billion of securitized federally insured consolidation loans. The Company acquired the ownership interest in GCO SLIMS Trust I (the "SLIMS Trust") giving the Company rights to the residual interest in GCO Education Loan Funding Trust-I (the "GCO Trust"). The

GCO Trust includes federally insured consolidation loans funded to term with \$1.9 billion of notes payable that carry interest rates on a spread to LIBOR or are set and periodically reset via a "dutch auction" ("Auction Rate Securities").

On July 8, 2011, the SLIMS Trust included \$46.2 million of notes payable that carry a fixed interest rate of 5.72%. All excess interest earned from the GCO Trust must be used to pay the interest and principal on the notes payable in the SLIMS Trust until the SLIMS notes are paid in full.

The Company has consolidated these trusts on its consolidated balance sheet because management has determined the Company is the primary beneficiary of the trusts. Upon acquisition, the Company recorded all assets and liabilities of the trusts at fair value, resulting in the recognition of a student loan fair value discount of \$153.9 million and a bonds and notes payable fair value discount of \$174.9 million. These discounts will be accreted using the effective interest method over the lives of the underlying assets and

F-16

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

liabilities. All other assets acquired and liabilities assumed (restricted cash, accrued interest receivable/payable, and other assets/liabilities) were recorded at cost which approximates fair value.

Activity in the Allowance for Loan Losses

The provision for loan losses represents the periodic expense of maintaining an allowance sufficient to absorb losses, net of recoveries, inherent in the portfolio of student loans. Activity in the allowance for loan losses is shown below.

	Year ended December 31,		
	2011	2010	2009
Balance at beginning of period	\$43,626	50,887	50,922
Provision for loan losses:			
Federally insured loans	20,000	18,700	20,000
Non-federally insured loans	1,250	4,000	9,000
Total provision for loan losses	21,250	22,700	29,000
Charge-offs:			
Federally insured loans	(17,166)	(18,603)	(14,954)
Non-federally insured loans	(4,147)	(7,282)	(5,304)
Total charge-offs	(21,313)	(25,885)	(20,258)
Recoveries - non-federally insured loans	1,310	1,263	1,543
Purchase (sale) of loans, net:			
Federally insured loans	1,463	2,710	(520)
Non-federally insured loans	—	220	—
Reserve related to loans reclassified to held for sale	—	(6,269)	—
Transfer to/from repurchase obligation related to loans sold/purchased, net	2,146	(2,000)	(9,800)
Balance at end of period	\$48,482	43,626	50,887
Allocation of the allowance for loan losses:			
Federally insured loans	\$37,205	32,908	30,102
Non-federally insured loans	11,277	10,718	20,785
Total allowance for loan losses	\$48,482	43,626	50,887

Repurchase Obligations

As of December 31, 2011, the Company had participated a cumulative amount of \$117.1 million of non-federally insured loans to third parties. Loans participated under these agreements have been accounted for by the Company as loan sales. Accordingly, the participation interests sold are not included on the Company's consolidated balance sheets. Per the terms of the servicing agreements, the Company's servicing operations are obligated to repurchase loans subject to the participation interests in the event such loans become 60 or 90 days delinquent.

In addition, on January 13, 2011, the Company sold a portfolio of non-federally insured loans for proceeds of \$91.3 million (100% of par value). The Company retained credit risk related to this portfolio and will pay cash to purchase

back any loans which become 60 days delinquent.

F-17

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

The Company's estimate related to its obligation to repurchase these loans is included in "other liabilities" in the Company's consolidated balance sheets. The activity related to this accrual is detailed below.

	Year ended December 31,		
	2011	2010	2009
Beginning balance	\$12,600	10,600	—
Repurchase obligation transferred to/from the allowance for loan losses related to loans purchased/sold, net	(2,146) 2,000	9,800
Repurchase obligation associated with loans sold (a)	6,269	—	—
Current period expense	2,500	—	800
Ending balance	\$19,223	12,600	10,600

As discussed previously, on January 13, 2011, the Company sold a portfolio of loans and retained all credit risk related to this portfolio. These loans were classified as held for sale as of December 31, 2010 and the loans were (a) carried at fair value. Upon sale, the Company established a repurchase obligation associated with those loans that are estimated to become 60 days delinquent.

Student Loan Status and Delinquencies

Delinquencies have the potential to adversely impact the Company's earnings through increased servicing and collection costs and account charge-offs. The table below shows the Company's student loan delinquency amounts on loans held for investment.

	As of December 31,					
	2011		2010			
	Dollars	Percent	Dollars	Percent		
Federally Insured Loans:						
Loans in-school/grace/deferment (a)	\$3,664,899		\$4,358,616			
Loans in forbearance (b)	3,330,452		2,984,869			
Loans in repayment status:						
Loans current	14,600,372	84.2	% 14,309,480	87.2	%

Total non-federally insured loans	\$26,916			\$26,370		

F-18

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Loans for borrowers who still may be attending school or engaging in other permitted educational activities and are (a) not yet required to make payments on the loans, e.g., residency periods for medical students or a grace period for bar exam preparation for law students.

Loans for borrowers who have temporarily ceased making full payments due to hardship or other factors, (b) according to a schedule approved by the servicer consistent with the established loan program servicing procedures and policies.

The period of delinquency is based on the number of days scheduled payments are contractually past due and relate (c) to repayment loans, that is, receivables not charged off, and not in school, grace, deferment, or forbearance.

A portion of loans included in loans delinquent 271 days or greater include federally insured loans in claim status, (d) which are loans that have gone into default and have been submitted to the guaranty agency.

Loan Sales

See note 5, “Gain on Sale of Loans and Debt Repurchases, net,” for a summary of loans sold by the Company during 2011, 2010, and 2009.

Related Party Loan Activity

The Company sold and/or purchased loans to/from Union Bank & Trust Company (“Union Bank”) an entity under common control with the Company. See note 19, “Related Parties,” for additional information.

4. Bonds and Notes Payable

The following tables summarize the Company’s outstanding debt obligations by type of instrument:

	As of December 31, 2011		
	Carrying amount	Interest rate range	Final maturity
Variable-rate bonds and notes (a):			
Bonds and notes based on indices	\$20,252,403	0.42% - 6.90%	11/25/15 - 7/27/48
Bonds and notes based on auction or remarketing	970,575	0.11% - 2.19%	5/1/28 - 5/25/42
Total variable-rate bonds and notes	21,222,978

(a) Issued in asset-backed securitizations

Secured Financing Transactions

The Company has historically relied upon secured financing vehicles as its most significant source of funding for student loans. The net cash flow the Company receives from the securitized student loans generally represents the excess amounts, if any, generated by the underlying student loans over the amounts required to be paid to the bondholders, after deducting servicing fees and any other expenses relating to the securitizations. The Company's rights to cash flow from securitized student loans are subordinate to bondholder interests and may fail to generate any cash flow beyond what is due to bondholders. The Company's secured financing vehicles during the periods presented above include loan warehouse facilities, asset-backed securitizations, and the government's Conduit Program (as described below).

The majority of the bonds and notes payable are primarily secured by the student loans receivable, related accrued interest, and by the amounts on deposit in the accounts established under the respective bond resolutions or financing agreements. Certain variable rate bonds and notes are secured by a letter of credit and reimbursement agreement issued by a third-party liquidity provider.

The Company funds loan acquisitions using loan warehouse facilities and asset-backed securitizations. Student loan warehousing allows the Company to buy and manage student loans prior to transferring them into more permanent financing arrangements. In 2009, the Company funded certain loans under the Department's Conduit Program. FFELP warehouse facilities

The Company funds a portion of its loan acquisitions using its FFELP warehouse facilities.

On August 3, 2009, the Company entered into a FFELP warehouse facility (the "2009 FFELP Warehouse Facility"). The 2009 FFELP Warehouse Facility had a maximum financing amount of \$500.0 million, with a revolving financing structure supported by 364-day liquidity provisions, which were to expire on August 2, 2010.

On July 30, 2010, the Company renewed its FFELP warehouse facility (the “2009/2010 FFELP Warehouse Facility”). The 2009/2010 FFELP Warehouse Facility had a maximum financing amount of \$500.0 million, with a revolving financing structure supported by 364-day liquidity provisions, which were to expire on July 29, 2011. As of December 31, 2010, \$108.4 million was outstanding under the 2009/2010 FFELP Warehouse Facility, \$391.6 million was available for future use, and \$5.3 million was advanced as equity support.

On July 14, 2011, the Company renewed the liquidity agreement on its existing FFELP warehouse facility (the “NFSLW-I Warehouse”) and entered into an additional FFELP warehouse facility (the “NHELP-I Warehouse”).

When the Company renewed the liquidity agreement on its NFSLW-I Warehouse facility on July 14, 2011, it had a maximum financing amount of \$300.0 million which was increased to \$500.0 million on August 10, 2011. The NFSLW-I Warehouse has a

F-20

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

revolving financing structure supported by 364-day liquidity provisions, which expires on July 1, 2012. The final maturity date of the facility is July 1, 2014. In the event the Company is unable to renew the liquidity provisions by July 1, 2012, the facility would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and the Company would be required to refinance the existing loans in the facility by July 1, 2014.

The NFSLW-I Warehouse facility provides for formula based advance rates, depending on FFELP loan type, up to a maximum of 85 percent to 98 percent of the principal and interest of loans financed. The advance rates for collateral may increase or decrease based on market conditions, but they are subject to a minimum advance of 84.5 percent to 90 percent based on loan type. As of December 31, 2011, \$496.7 million was outstanding under the NFSLW-I Warehouse facility, \$3.3 million was available for future use, and \$38.4 million was advanced as equity support.

The NHELP-I Warehouse has a maximum financing amount of \$500.0 million, with a revolving financing structure supported by 364-day liquidity provisions, which expires on October 1, 2012. The final maturity date of the facility is July 1, 2014. In the event the Company is unable to renew the liquidity provisions by October 1, 2012, the facility would become a term facility at a stepped-up cost, with no additional student loans being eligible for financing, and the Company would be required to refinance the existing loans in the facility by July 1, 2014.

The NHELP-I Warehouse facility provides for formula based advance rates, depending on FFELP loan type, up to a maximum of 93 percent to 95 percent of the principal and interest of loans financed. The advance rates for collateral may increase or decrease based on market conditions, but they are subject to a minimum advance of 85 percent to 90 percent based on loan type. As of December 31, 2011, \$327.7 million was outstanding under the NHELP-I Warehouse facility, \$172.3 million was available for future use, and \$20.1 million was advanced as equity support.

The FFELP warehouse facilities contain financial covenants relating to levels of the Company's consolidated net worth, ratio of adjusted EBITDA to corporate debt interest, and unencumbered cash. Any violation of these covenants could result in a requirement for the immediate repayment of any outstanding borrowings under the facilities.

Asset-backed securitizations

During 2011 and 2010, the Company completed asset-backed securities transactions totaling \$0.4 billion and \$1.9 billion, respectively. Notes issued in the 2011 and 2010 asset-backed securities transactions carry interest rates based on a spread to LIBOR.

As part of the Company's issuance of asset-backed securities in 2008, due to credit market conditions when these notes were issued, the Company purchased the Class B subordinated notes of \$76.5 million (par value). These notes are not included on the Company's consolidated balance sheet. If the credit market conditions improve, the Company anticipates selling these notes to third parties. Upon a sale to third parties, the Company would obtain cash proceeds equal to the market value of the notes on the date of such sale. Upon sale, these notes would be shown as "bonds and notes payable" on the Company's consolidated balance sheet. The Company believes the market value of such notes is currently less than par value. The difference between the par value and market value would be recognized by the Company as interest expense over the life of the bonds.

Notes issued during 2006 included €773.2 million (950 million in U.S. dollars) with variable interest rates initially based on a spread to EURIBOR (the "Euro Notes"). As of December 31, 2011 and December 31, 2010, the Euro Notes were recorded on the Company's balance sheet at \$1.0 billion. Transaction gains or losses resulting from exchange rate changes when remeasuring these bonds to U.S. dollars at the balance sheet date are included in "derivative market value and foreign currency adjustments and derivative settlements, net" on the consolidated statements of income. Concurrently with the issuance of the Euro Notes, the Company entered into cross-currency interest rate swaps which are further discussed in note 6, "Derivative Financial Instruments."

The interest rates on certain of the Company's asset-backed securities are set and periodically reset via a "dutch auction" ("Auction Rate Securities") or through a remarketing utilizing remarketing agents ("Variable Rate Demand Notes"). As of December 31, 2011, the Company is currently sponsor on \$751.4 million of Auction Rate Securities and \$219.2 million of Variable Rate Demand Notes.

For Auction Rate Securities, investors and potential investors submit orders through a broker-dealer as to the principal amount of notes they wish to buy, hold, or sell at various interest rates. The broker-dealers submit their clients' orders to the auction agent, who then determines the clearing interest rate for the upcoming period. Interest rates on these Auction Rate Securities are reset periodically, generally every 7 to 35 days, by the auction agent or agents. During the first quarter of 2008, as part of the credit

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

market crisis, auction rate securities from various issuers failed to receive sufficient order interest from potential investors to clear successfully, resulting in failed auction status. Since February 8, 2008, all of the Company's Auction Rate Securities have failed in this manner. Under normal conditions, banks have historically purchased these securities when investor demand is weak. However, since February 2008, banks have been allowing auctions to fail.

As a result of a failed auction, the Auction Rate Securities will generally pay interest to the holder at a maximum rate as defined by the indenture. While these rates will vary, they will generally be based on a spread to LIBOR or Treasury Securities. Based on the relative levels of these indices as of December 31, 2011, the rates expected to be paid by the Company range from 91-day T-Bill plus 125 basis points, on the low end, to LIBOR plus 250 basis points, on the high end. These maximum rates are subject to increase if the credit ratings on the bonds are downgraded.

For Variable Rate Demand Notes, the remarketing agents set the price, which is then offered to investors. If there are insufficient potential bid orders to purchase all of the notes offered for sale, the Company could be subject to interest costs substantially above the anticipated and historical rates paid on these types of securities. The maximum rate for Variable Rate Demand Notes is based on a spread to certain indices as defined in the underlying documents, with the highest to the Company being Prime plus 200 basis points.

Department of Education's Conduit Program

In May 2009, the U.S. Department of Education implemented a program under which it finances eligible FFELP Stafford and PLUS loans in a conduit vehicle established to provide funding for student lenders (the "Conduit Program"). Loans eligible for the Conduit Program had to be first disbursed on or after October 1, 2003, but not later than June 30, 2009, and fully disbursed before September 30, 2009, and meet certain other requirements. Funding for the Conduit Program is provided by the capital markets at a cost based on market rates, with the Company being advanced 97 percent of the student loan face amount. Excess amounts needed to fund the remaining 3 percent of the student loan balances were contributed by the Company. The Conduit Program expires on May 8, 2014. The Student Loan Short-Term Notes ("Student Loan Notes") issued by the Conduit Program are supported by a combination of (i) notes backed by FFELP loans, (ii) a liquidity agreement with the Federal Financing Bank, and (iii) a put agreement provided by the Department. If the conduit does not have sufficient funds to pay all Student Loan Notes, then those Student Loan Notes will be repaid with funds from the Federal Financing Bank. The Federal Financing Bank will hold the notes for a short period of time and, if at the end of that time, the Student Loan Notes still cannot be paid off, the underlying FFELP loans that serve as collateral to the Conduit Program will be sold to the Department through a put agreement at a price of 97 percent of the face amount of the loans. As of December 31, 2011 and 2010, the Company had \$2.3 billion and \$2.7 billion, respectively, borrowed under the facility and \$84.7 million and \$94.1 million advanced as equity support in the facility. Effective July 1, 2010, no additional loans could be funded using the Conduit Program.

Unsecured Line of Credit

As of December 31, 2011, we had a \$750.0 million unsecured line of credit with a maturity date of May 8, 2012. As of December 31, 2011 and 2010, there was \$64.4 million and \$450.0 million, respectively, outstanding on this line. On February 17, 2012, the Company entered into a new \$250.0 million unsecured line of credit. In conjunction with entering into this new agreement, the outstanding balance on the \$750.0 million unsecured line of credit of \$64.4 million was paid off in full and the agreement was terminated. As of February 17, 2012, the \$250.0 million unsecured

line of credit had an outstanding balance of \$40.0 million. The \$250.0 million line of credit terminates on February 17, 2016. Upon termination in 2016, there can be no assurance that the Company will be able to maintain this line of credit, find alternative funding, or increase the amount outstanding under the line, if necessary.

F-22

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

The new line of credit agreement contains certain financial covenants that, if not met, lead to an event of default under the agreement. The covenants include maintaining:

- A minimum consolidated net worth
- A minimum adjusted EBITDA to recourse indebtedness (over the last four rolling quarters)
- A limitation on recourse indebtedness
 - A limitation on the percentage of non-federally insured loans in the Company's portfolio

Many of these covenants are duplicated in the Company's other lending facilities, including its FFELP warehouse facilities.

The Company's new operating line of credit does not have any covenants related to unsecured debt ratings. However, changes in the Company's ratings (as well as the amounts the Company borrows) have modest implications on the pricing level at which the Company obtains funding.

A default on the Company's FFELP warehouse facilities would result in an event of default on the Company's new unsecured line of credit that would result in the outstanding balance on the line of credit becoming immediately due and payable.

Unsecured Fixed Rate Debt

Senior Notes

On May 25, 2005, the Company issued \$275.0 million in aggregate principal amount of Senior Notes due June 1, 2010 (the "Senior Notes"). The Senior Notes were unsecured obligations of the Company. The interest rate on the Notes was 5.125%, payable semiannually. Upon maturity, the Company paid the remaining outstanding balance on the Senior Notes in full.

Junior Subordinated Hybrid Securities

On September 27, 2006 the Company issued \$200.0 million aggregate principal amount of Junior Subordinated Hybrid Securities ("Hybrid Securities"). The Hybrid Securities are unsecured obligations of the Company. The interest rate on the Hybrid Securities from the date they were issued through September 28, 2011 was 7.40%, payable semi-annually. Beginning September 29, 2011 through September 29, 2036, the "scheduled maturity date," the interest rate on the Hybrid Securities is equal to three-month LIBOR plus 3.375%, payable quarterly. The principal amount of the Hybrid Securities will become due on the scheduled maturity date only to the extent that the Company has received proceeds from the sale of certain qualifying capital securities prior to such date (as defined in the Hybrid Securities' prospectus). If any amount is not paid on the scheduled maturity date, it will remain outstanding and bear interest at a floating rate as defined in the prospectus, payable monthly. On September 15, 2061, the Company must pay any remaining principal and interest on the Hybrid Securities in full whether or not the Company has sold

qualifying capital securities. At the Company's option, the Hybrid Securities are redeemable in whole or in part, any time on or after September 29, 2011, at their principal amount plus accrued and unpaid interest, provided in the case of a redemption in part that the principal amount outstanding after such redemption is at least \$50.0 million.

Related Party Transactions

Union Bank Participation Agreement

The Company maintains an agreement with Union Bank as trustee for various grantor trusts, under which Union Bank has agreed to purchase from the Company participation interests in student loans (the "FFELP Participation Agreement"). The Company uses this facility as an additional source to fund FFELP student loans. As of December 31, 2011 and 2010, \$509.2 million and \$350.4 million, respectively, of loans were subject to outstanding participation interests held by Union Bank, as trustee, under this agreement. The agreement automatically renews annually and is terminable by either party upon five business days notice. This agreement provides beneficiaries of Union Bank's grantor trusts with access to investments in interests in student loans, while providing liquidity to the Company. The Company can participate loans to Union Bank to the extent of availability under the

F-23

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

grantor trusts, up to \$750.0 million or an amount in excess of \$750.0 million if mutually agreed to by both parties. Loans participated under this agreement have been accounted for by the Company as loan sales. Accordingly, the participation interests sold are not included on the Company's consolidated balance sheets.

Related Party Debt

The Company has from time to time repurchased certain of its own asset-backed securities (bonds and notes payable). For accounting purposes, these notes have been effectively retired and are not included on the Company's consolidated balance sheets. However, these securities are legally outstanding at the trust level and the Company could sell these notes to third parties or redeem the notes at par as cash is generated by the trust estate. As of December 31, 2010, the Company had \$107.1 million of these securities participated to Union Bank, as trustee for various grantor trusts, and such notes were included in "bonds and notes payable" on the Company's consolidated balance sheet. During the first quarter of 2011, the Company redeemed all outstanding notes under this participation.

Other Borrowings

As discussed in note 3, "Student Loans Receivable and Allowance for Loan Losses," on July 8, 2011, the Company acquired the ownership interest in the SLIMS Trust which included \$46.2 million of notes payable that carry a fixed interest rate of 5.72%. As of December 31, 2011, \$29.5 million of debt remained outstanding under this facility.

On October 13, 2006, the Company purchased a building in which its corporate headquarters is located. In connection with the acquisition of the building, the Company assumed the outstanding note on the property. As of December 31, 2011 and 2010, the outstanding balance on the note was \$4.7 million and \$4.8 million, respectively.

As of December 31, 2011 and 2010, bonds and notes payable includes \$8.9 million and \$10.0 million, respectively, of notes due to a third-party. The Company used the proceeds from these notes to invest in non-federally insured student loan assets via a participation agreement.

As of December 31, 2010, bonds and notes payable included a line of credit with a balance of \$11.9 million. The Company used the proceeds from the line of credit to purchase federally insured student loans. This line of credit was paid off during 2011.

One of the Company's education lending subsidiaries has irrevocably escrowed funds to make the remaining principal and interest payments on previously issued bonds and notes. Accordingly, neither these obligations nor the escrowed funds are included on the accompanying consolidated balance sheets. As of December 31, 2011 and 2010, \$39.7 million and \$36.9 million, respectively, of defeased debt remained outstanding.

Debt Covenants

Certain bond resolutions contain, among other requirements, covenants relating to restrictions on additional indebtedness, limits as to direct and indirect administrative expenses, and maintaining certain financial ratios. Management believes the Company is in compliance with all covenants of the bond indentures and related credit agreements as of December 31, 2011.

Maturity Schedule

Bonds and notes outstanding as of December 31, 2011 are due in varying amounts as shown below.

2012	\$8,900
2013	—
2014	3,163,985
2015	209,172
2016	105,163
2017 and thereafter	21,107,949
	\$24,595,169

F-24

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Generally, the Company's secured financing instruments bearing interest at variable rates can be redeemed on any interest payment date at par plus accrued interest. Subject to certain provisions, all bonds and notes are subject to redemption prior to maturity at the option of certain education lending subsidiaries.

Debt Repurchases

The Company repurchased outstanding debt as summarized in note 5, "Gain on Sale of Loans and Debt Repurchases, net."

5. Gain on Sale of Loans and Debt Repurchases, net

"Gain on sale of loans and debt repurchases, net" in the accompanying consolidated statements of income is composed of the following items:

	Year ended December 31,		
	2011	2010	2009
Gain on sale of loans, net (a)	\$ 1,378	33,748	35,148
Gain from debt repurchases (b)	6,962	44,883	41,683
	\$ 8,340	78,631	76,831

(a) The majority of gains from the sale of loans included in the table above were the result of selling loans to the Department under a program established to provide liquidity to student loan lenders. During each of 2010 and 2009, the Company sold \$2.1 billion (par value) of student loans to the Department and recognized a gain of \$33.8 million and \$36.6 million, respectively.

(b) The activity included in "Gain from debt repurchases" is detailed below:

	Year ended December 31, 2011			Year ended December 31, 2010			Year ended December 31, 2009		
	Notional amount	Purchase price	Gain	Notional amount	Purchase price	Gain	Notional amount	Purchase price	Gain
Gains on debt repurchases:									
Unsecured debt - Senior Notes due 2010	\$—	—	—	—	—	—	208,284	196,529	11,755
Junior Subordinated Hybrid Securities	62,558	55,651	6,907	34,995	30,073	4,922	1,750	350	1,400
Asset-backed securities (1)	12,254	12,199	55	690,750	650,789	39,961	348,155	319,627	28,528
	\$ 74,812	67,850	6,962	725,745	680,862	44,883	558,189	516,506	41,683

(1) For accounting purposes, the asset-backed securities repurchased by the Company are effectively retired and are not included on the Company's consolidated balance sheets. However, as of December 31, 2011, the Company has purchased a cumulative amount of \$72.5 million of these securities that remain legally outstanding at the trust level and the Company could sell these notes to third parties or redeem the notes at par as cash is generated by the trust estate. Upon a sale to third parties, the Company would obtain cash proceeds equal to the market value of the notes on the date of such sale. The par value of these notes (\$72.5 million as of December 31, 2011) may not

represent market value of such securities.

6. Derivative Financial Instruments

The Company is exposed to certain risks relating to its ongoing business operations. The primary risks managed by using derivative instruments are interest rate risk and foreign currency exchange risk.

Interest Rate Risk

The Company's primary market risk exposure arises from fluctuations in its borrowing and lending rates, the spread between which could impact the Company due to shifts in market interest rates. Because the Company generates a significant portion of

F-25

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

its earnings from its student loan spread, the interest rate sensitivity of the balance sheet is a key profitability driver. The Company has adopted a policy of periodically reviewing the mismatch related to the interest rate characteristics of its assets and liabilities together with the Company's assessment of current and future market conditions. Based on those factors, the Company uses derivative instruments as part of its overall risk management strategy.

Basis Swaps

The Company funds the majority of its student loan assets with one-month or three-month LIBOR indexed floating rate securities. Meanwhile, the interest earned on the Company's student loan assets is indexed to commercial paper and treasury bill rates. The different interest rate characteristics of the Company's loan assets and liabilities funding these assets results in basis risk. The Company also faces repricing risk due to the timing of the interest rate resets on its liabilities, which may occur as infrequently as once a quarter, in contrast to the timing of the interest rate resets on its assets, which generally occurs daily. In a declining interest rate environment, this may cause the Company's student loan spread to compress, while in a rising rate environment, it may cause the spread to increase. As of December 31, 2011, the Company had \$23.4 billion and \$0.9 billion of FFELP loans indexed to the three-month financial commercial paper rate and the three-month treasury bill rate, respectively, both of which reset daily, and \$19.6 billion of debt indexed to three-month LIBOR, which resets quarterly, and \$0.7 billion of debt indexed to one-month LIBOR, which resets monthly.

Because of the different indice types and different indice reset frequencies, the Company is exposed to interest rate risk in the form of basis risk and repricing risk, which, as noted above, is the risk that the different indices may reset at different frequencies, or will not move in the same direction or with the same magnitude. While these indices are all short term in nature with rate movements that are highly correlated over a longer period of time, there have been points in recent history when volatility has been high and correlation has been reduced.

The Company has used derivative instruments to hedge both the basis and repricing risk on certain student loans in which the Company earns interest based on a treasury bill rate that resets daily and are funded with debt indexed to primarily three-month LIBOR. To hedge these loans, the Company has entered into basis swaps in which the Company receives three-month LIBOR set discretely in advance and pays a weekly treasury bill rate plus a spread as defined in the agreement ("T-Bill/LIBOR Basis Swaps").

However, the Company does not generally hedge the basis risk on those assets indexed to the commercial paper rate that are funded with liabilities in which the Company pays primarily on the LIBOR indice, since the derivatives needed to hedge this risk are generally illiquid or non-existent and the relationship between these indices has been highly correlated over a long period of time.

The Company has also used derivative instruments to hedge the repricing risk due to the timing of the interest rate resets on its assets and liabilities. The Company has entered into basis swaps in which the Company:

- receives three-month LIBOR set discretely in advance and pays a daily weighted average three-month LIBOR less a spread as defined in the agreements (the "Average/Discrete Basis Swaps")

-

receives three-month LIBOR set discretely in advance and pays one-month LIBOR plus or minus a spread as defined in the agreements (the “1/3 Basis Swaps”)

Interest rate swaps – floor income hedges

FFELP loans originated prior to April 1, 2006 generally earn interest at the higher of a floating rate based on the Special Allowance Payment (or SAP) formula set by the Department and the borrower rate, which is fixed over a period of time. The SAP formula is based on an applicable index plus a fixed spread that is dependent upon when the loan was originated, the loan's repayment status, and funding sources for the loan. The Company generally finances its student loan portfolio with variable rate debt. In low and/or declining interest rate environments, when the fixed borrower rate is higher than the rate produced by the SAP formula, the Company's student loans earn at a fixed rate while the interest on the variable rate debt typically continues to decline. In these interest rate environments, the Company may earn additional spread income that it refers to as floor income.

Depending on the type of loan and when it was originated, the borrower rate is either fixed to term or is reset to an annual rate each July 1. As a result, for loans where the borrower rate is fixed to term, the Company may earn floor income for an extended period of time, which the Company refers to as fixed rate floor income, and for those loans where the borrower rate is reset annually on July 1, the Company may earn floor income to the next reset date, which the Company refers to as variable rate floor income. In accordance with legislation enacted in 2006, lenders are required to rebate fixed rate floor income and variable rate floor income to the Department for all FFELP loans first originated on or after April 1, 2006.

F-27

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Absent the use of derivative instruments, a rise in interest rates may reduce the amount of floor income received and this may have an impact on earnings due to interest margin compression caused by increasing financing costs, until such time as the federally insured loans earn interest at a variable rate in accordance with their special allowance payment formulas. In higher interest rate environments, where the interest rate rises above the borrower rate and fixed rate loans effectively become variable rate loans, the impact of the rate fluctuations is reduced.

As of December 31, 2011 and 2010, the Company had \$10.9 billion and \$8.5 billion, respectively, of student loan assets that were earning fixed rate floor income. The following tables summarize the outstanding derivative investments used by the Company to economically hedge these loans.

Maturity	As of December 31, 2011	
	Notional amount	Weighted average fixed rate paid by the Company (a)
2013	\$2,150,000	0.85 %
2014	750,000	0.85
2015	100,000	2.26
2020	50,000	3.23
	\$3,050,000	0.87 %
Maturity	As of December 31, 2010	
	Notional amount	Weighted average fixed rate paid by the Company (a)
2011	\$4,300,000	0.53 %
2012	3,950,000	0.67
2013	650,000	1.07
2015	100,000	2.26
2020	50,000	3.23
	\$9,050,000	0.66 %

(a) For all interest rate derivatives, the Company receives discrete three-months LIBOR.

Interest rate swaps – unsecured debt hedges

On September 27, 2006, the Company issued \$200.0 million aggregate principal amount of Junior Subordinated Hybrid Securities. As of December 31, 2011, \$100.7 million of these notes were outstanding. The interest rate on the Hybrid Securities from the date they were issued through September 28, 2011 was 7.40%. Beginning September 29, 2011 through September 29, 2036, the interest rate on the Hybrid Securities is equal to three-month LIBOR plus 3.375%, payable quarterly. As of December 31, 2011 and 2010, the Company had the following derivatives outstanding that are used to effectively convert the variable interest rate on the Hybrid Securities to a fixed rate.

NELNET, INC. AND SUBSIDIARIES

(b) For all interest rate derivatives, the Company receives discrete three-month LIBOR.

Foreign Currency Exchange Risk

During 2006, the Company completed separate debt offerings of student loan asset-backed securities that included €420.5 million and €352.7 million Euro Notes with interest rates based on a spread to the EURIBOR index. As a result of these transactions, the Company is exposed to market risk related to fluctuations in foreign currency exchange rates between the U.S. dollar and Euro. The principal and accrued interest on these notes is re-measured at each reporting period and recorded on the Company's balance sheet in U.S. dollars based on the foreign currency exchange rate on that date. Changes in the principal and accrued interest amounts as a result of foreign currency exchange rate fluctuations are included in the "derivative market value and foreign currency adjustments and derivative settlements, net" in the Company's consolidated statements of income.

The Company entered into cross-currency interest rate swaps in connection with the issuance of the Euro Notes. Under the terms of these derivative instrument agreements, the Company receives from a counterparty a spread to the EURIBOR indice based on notional amounts of €420.5 million and €352.7 million and pays a spread to the LIBOR indice based on notional amounts of \$500.0 million and \$450.0 million, respectively. In addition, under the terms of these agreements, all principal payments on the Euro Notes will effectively be paid at the exchange rate in effect between the U.S. dollar and Euro as of the issuance of the notes.

The following table shows the income statement impact as a result of the re-measurement of the Euro Notes and the change in the fair value of the related derivative instruments. These items are included in "derivative market value and foreign currency adjustments and derivative settlements, net" on the accompanying consolidated statements of income.

	Year ended December 31,		
	2011	2010	2009
Re-measurement of Euro Notes	\$32,706	80,721	(37,654)
Change in fair value of cross currency interest rate swaps	(14,287)	(74,899)	2,497
Total impact to statements of income - income (expense)	\$18,419	5,822	(35,157)

The re-measurement of the Euro-denominated bonds generally correlates with the change in fair value of the cross-currency interest rate swaps. However, the Company will experience unrealized gains or losses related to the cross-currency interest rate swaps if the two underlying indices (and related forward curve) do not move in parallel.

Management intends to hold the cross-currency interest rate swaps through the maturity of the Euro-denominated bonds.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Accounting for Derivative Financial Instruments

The Company records derivative instruments on the consolidated balance sheets as either an asset or liability measured at its fair value. Management has structured the majority of the Company's derivative transactions with the intent that each is economically effective; however, the Company's derivative instruments do not qualify for hedge accounting. As a result, the change in fair value of the Company's derivatives at each reporting date are included in "derivative market value and foreign currency adjustments and derivative settlements, net" in the Company's consolidated statements of income. Changes or shifts in the forward yield curve and fluctuations in currency rates can significantly impact the valuation of the Company's derivatives. Accordingly, changes or shifts to the forward yield curve and fluctuations in currency rates will impact the financial position and results of operations of the Company.

Any proceeds received or payments made by the Company to terminate a derivative in advance of its expiration date, or to amend the terms of an existing derivative, are included in "derivative market value and foreign currency adjustments and derivative settlements, net" on the consolidated statements of income and are accounted for as a change in fair value of such derivative. During the years ended December 31, 2011, 2010, and 2009, the Company terminated and/or amended certain derivatives for net proceeds of \$3.4 million in 2011, net proceeds of \$12.0 million in 2010, and net payments of \$11.2 million in 2009, respectively.

The following table summarizes the fair value of the Company's derivatives not designated as hedging:

	Fair value of asset derivatives		Fair value of liability derivatives	
	As of December 31, 2011	As of December 31, 2010	As of December 31, 2011	As of December 31, 2010

Derivative Instruments - Credit and Market Risk

By using derivative instruments, the Company is exposed to credit and market risk.

The Company attempts to manage credit and market risks associated with interest rates by establishing and monitoring limits as to the types and degree of risk that may be undertaken and by entering into transactions with high-quality counterparties that are reviewed periodically by the Company's risk committee. As of December 31, 2011, all of the Company's derivative counterparties had investment grade credit ratings. The Company also has a policy of requiring that all derivative contracts be governed by an International Swaps and Derivatives Association, Inc. Master Agreement.

Credit Risk

When the fair value of a derivative contract is positive (an asset on the Company's balance sheet), this generally indicates that the counterparty would owe the Company if the derivative was settled. If the counterparty fails to perform, credit risk with such counterparty is equal to the extent of the fair value gain in the derivative less any

collateral held by the Company. If the Company was unable to collect from a counterparty, it would have a loss equal to the amount the derivative is recorded on the consolidated balance sheet. As of December 31, 2011, the trustee for certain of the Company's asset-backed securities transactions held \$73.4 million of collateral from the counterparty on the cross-currency interest rate swaps.

F-31

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

The Company considers counterparties' credit risk when determining the fair value of derivative positions on its exposure net of collateral. However, the Company does not use the collateral to offset fair value amounts recognized in the financial statements for derivative instruments.

Market Risk

When the fair value of a derivative instrument is negative (a liability on the Company's balance sheet), the Company would owe the counterparty if the derivative was settled and, therefore, has no immediate credit risk. If the negative fair value of derivatives with a counterparty exceeds a specified threshold, the Company may have to make a collateral deposit with the counterparty. The threshold at which the Company may be required to post collateral is dependent upon the Company's unsecured credit rating. At the Company's current unsecured credit rating (Standard and Poor: BBB- (stable outlook) and Moody's: Ba1 (stable outlook)), the Company has substantially collateralized its corporate derivative liability position with its counterparties. As such, further downgrades would not result in additional collateral requirements of a material nature. In addition, no counterparty has the right to terminate its contracts in the event of further downgrades. However, some long dated derivative contracts have mutual optional termination provisions that can be exercised in 2016 and 2021. The fair value of the derivatives with termination provisions as of December 31, 2011 was not significant. As of December 31, 2011, the Company had \$34.0 million posted as collateral to derivative counterparties, which is included in "restricted cash and investments" in the Company's consolidated balance sheet.

Interest rate movements have an impact on the amount of collateral the Company is required to deposit with its derivative instrument counterparties. With the Company's current derivative portfolio, the Company does not currently anticipate any movement in interest rates having a material impact on its capital or liquidity profile, nor expects that any movement in interest rates would have a material impact on its ability to meet potential collateral deposits with its counterparties. Due to the existing low interest rate environment, the Company's exposure to downward movements in interest rates on its interest rate swaps is limited. In addition, the historical high correlation between 1-month and 3-month LIBOR and the limited notional amount of 1:3 Basis Swaps derivatives outstanding limits the Company's exposure to interest rate movements on these derivatives.

The Company's cross-currency interest rate swaps are derivatives entered into as a result of certain asset-backed security financings. These derivatives are entered into at the trust level with the counterparty. Trust related derivatives do not contain credit contingent features related to the Company or the trust's credit ratings.

7. Investments

A summary of investments and restricted investments follows:

	As of December 31, 2011	2010
Investments:		
Investments - trading securities (a)		
Student loan auction rate asset-backed securities	\$42,412	11,861
Equity securities	6,847	6,250
Debt securities (b)	1,521	25,125
Total investments - trading securities	\$50,780	43,236

Restricted Investments (c):

Guaranteed investment contracts - held-to-maturity	\$236,899	215,009
----------------------------------------------------	-----------	---------

(a) The unrealized gain/loss on the Company's trading securities as of December 31, 2011 and 2010 was not significant.

(b) Debt securities include corporate, mortgage-backed security, and U.S. government bonds and U.S. Treasury securities.

F-32

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

(c) Restricted investments are included in "Restricted cash and investments" on the Company's consolidated balance sheets.

As of December 31, 2011 and 2010, the Company has \$22.2 million and \$22.4 million, respectively, of other investments included in "other assets" on the Company's consolidated balance sheets.

As of December 31, 2011, the stated maturities for the Company's held-to-maturity investments (restricted investments) are shown in the following table:

Year of Maturity:	Restricted investments
2017-2021	\$27,355
After 2021	209,544
Total	\$236,899

8. Intangible Assets and Goodwill

Intangible assets consist of the following:

	Weighted average remaining useful life as of December 31, 2011 (months)	As of December 31,	
		2011	2010
Amortizable intangible assets:			
Customer relationships (net of accumulated amortization of \$59,893 and \$47,770, respectively)	63	\$23,240	28,576
Computer software (net of accumulated amortization of \$5,103 and \$2,419, respectively)	12	2,815	5,499
Trade names (net of accumulated amortization of \$9,274 and \$6,956, respectively)	12	2,319	4,637
Total - amortizable intangible assets	54	\$28,374	38,712

The Company recorded amortization expense on its intangible assets of \$17.1 million, \$22.7 million, and \$22.2 million for the years ended December 31, 2011, 2010, and 2009, respectively. The Company will continue to amortize intangible assets over their remaining useful lives. As of December 31, 2011, the Company estimates it will record amortization expense as follows:

2012	\$18,632
2013	3,399
2014	2,102
2015	829
2016	639
2017 and thereafter	2,773

\$28,374

On January 8, 2010, the Company purchased certain assets of a software company that constituted a business combination. The initial consideration paid by the Company was \$3.0 million in cash. In addition to the initial purchase price, additional payments are to be made by the Company based on certain operating results as defined in the purchase agreement. On February 1, 2011, the Company made an additional payment of \$1.3 million. Additional contingent payments are payable in two annual installments due in March 2012 and March 2013 and, in total, are estimated by the Company to be \$3.5 million as of December 31, 2011. The

F-33

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

estimated contingency payments are included in "other liabilities" on the Company's consolidated balance sheets. The contingent payments will be remeasured to fair value each reporting date until the contingency is resolved, with all changes in fair value being recognized in earnings. Substantially all of the purchase price was allocated to a computer software intangible asset that is being amortized over three years. There was no excess purchase price over net assets acquired (goodwill) recognized as a result of this acquisition.

On June 30, 2011, the Company purchased contracts with more than 370 K–12 schools to provide tuition payment plan services. The initial consideration paid by the Company was \$6.9 million in cash. The initial purchase price is subject to adjustment based on customer retention. In September 2011, the Company received approximately \$51,000 as an adjustment to the purchase price. The final adjustment to purchase price, if any, will occur on May 31, 2012. Substantially all of the purchase price was allocated to a customer relationship intangible asset that is being amortized over three years.

The change in the carrying amount of goodwill by operating segment was as follows:

	Student Loan and Guaranty Servicing	Tuition Payment Processing and Campus Commerce	Enrollment Services	Asset Generation and Management (a)	Total
Balance as of December 31, 2008	\$8,596	58,086	66,613	41,883	175,178
Impairment charge	—	—	(31,461)) —	(31,461)
Balance as of December 31, 2009	8,596	58,086	35,152	41,883	143,717
Impairment charge	—	—	(26,599)) —	(26,599)
Balance as of December 31, 2010 and 2011	\$8,596	58,086	8,553	41,883	117,118

As a result of the Reconciliation Act of 2010, the Company no longer originates new (first disbursement) FFELP loans and net interest income of the Company's existing FFELP loan portfolio will decline over time as the Company's portfolio pays down. As a result, as this revenue stream winds down, goodwill impairment will be (a) triggered for the Asset Generation and Management reporting unit due to the passage of time and depletion of projected cash flows stemming from its FFELP student loan portfolio. Other than the Asset Generation and Management reporting unit, management believes the elimination of FFELP will not have an adverse impact on the fair value of the Company's other reporting units.

The Company reviews goodwill for impairment annually. This annual review is completed by the Company as of November 30 of each year and whenever triggering events or changes in circumstances indicate its carrying value may not be recoverable.

2009 Annual Goodwill Impairment Test

As a result of the 2009 annual test, the Company recorded an impairment charge of \$31.5 million related to its list marketing business. The Company's list marketing business had been negatively affected by the economic recession and deterioration of the direct-to-consumer student loan market. In addition, during the fourth quarter of 2009, the Company recognized an impairment charge of \$1.2 million on certain intangible assets related to its list marketing

business. These charges are included in “impairment expense” in the Company's consolidated statements of income. Information related to the impairment charge follows:

Asset	Operating segment	Impairment charge
Amortizable intangible assets:		
Customer relationships	Enrollment Services	\$584
Trade names	Enrollment Services	506
Covenants not to compete	Enrollment Services	21
Other	Enrollment Services	156
Goodwill	Enrollment Services	31,461
Total impairment charge		\$32,728

F-34

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

2010 Annual Goodwill Impairment Test

As a result of the 2010 annual goodwill impairment test, the Company recorded impairment charges at two reporting units included in the Enrollment Services operating segment. These charges consisted of \$23.9 million related to its interactive marketing business and \$2.7 million related to its list marketing business. After recording these charges, no goodwill remained at these two reporting units. These charges are included in “impairment expense” in the Company's consolidated statements of income.

The Company determined legislation and related public scrutiny at for-profit schools may negatively affect enrollments at these schools which could impact future revenue, operating margins, and cash flows related to the Company's interactive marketing business. In addition, the Company's list marketing business continued to be negatively affected by the economic recession and deterioration of the direct-to-consumer market.

With the exception of these two reporting units, as of November 30, 2010, the fair value of each of the Company's reporting units significantly exceeded the carrying value of the net assets assigned to that unit and the Company was not required to perform further testing for impairment.

2011 Annual Goodwill Impairment Test

As further discussed in note 2, "Summary of Significant Accounting Policies and Practices," as of November 30, 2011, the Company assessed qualitative factors and concluded it was not more likely than not that the fair value of its reporting units were less than their carrying amount. As such, the Company was not required to perform the two-step impairment test and determined there was no impairment of goodwill.

9. Property and Equipment

Property and equipment consisted of the following:

	Useful life	As of December 31,	
		2011	2010
Computer equipment and software	1-5 years	\$79,895	78,929
Office furniture and equipment	3-7 years	10,607	10,481
Leasehold improvements	1-15 years	7,321	8,037
Transportation equipment	3-10 years	3,766	3,766
Buildings	5-39 years	9,144	8,490
Land	—	700	700
		111,433	110,403
Accumulated depreciation		76,614	79,830
		\$34,819	30,573

Depreciation expense for the years ended December 31, 2011, 2010, and 2009 related to property and equipment was \$9.9 million, \$8.9 million, and \$13.4 million, respectively.

10. Shareholders' Equity

Classes of Common Stock

The Company's common stock is divided into two classes. The Class B common stock has ten votes per share and the Class A common stock has one vote per share. Each Class B share is convertible at any time at the holder's option into one Class A share. With the exception of the voting rights and the conversion feature, the Class A and Class B shares are identical in terms of other rights, including dividend and liquidation rights.

F-35

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Stock Repurchases

The Company has a stock repurchase program that expires on May 24, 2012 in which it can repurchase shares of the Company's Class A common stock on the open market, through private transactions, or otherwise. Shares repurchased by the Company during 2011, 2010, and 2009 are shown in the table below.

	Total shares repurchased	Purchase price (in thousands)	Average price of shares repurchased (per share)
Year ended December 31, 2011	1,436,423	\$27,134	\$18.89
Year ended December 31, 2010	1,866,332	39,805	21.33
Year ended December 31, 2009	38,429	430	11.16

As of December 31, 2011, 1.6 million shares may still be purchased under the Company's stock repurchase program

Contingent Consideration - infiNET Integrated Solutions, Inc. ("infiNET")

In 2004, the Company purchased 50% of the stock of infiNET and, in 2006, purchased the remaining 50% of infiNET's stock. infiNET provides software for customer-focused electronic transactions, information sharing, and electronic account and bill presentment for colleges and universities. Consideration for the purchase of the remaining 50% of the stock of infiNET included 95,380 restricted shares of the Company's Class A common stock. The purchase agreement provided that the 95,380 shares of Class A common stock issued in the acquisition were subject to stock price guaranty provisions whereby if on or about February 28, 2011 the average market trading price of the Class A common stock was less than \$104.8375 per share and had not exceeded that price for any 25 consecutive trading days during the 5-year period from the closing of the acquisition to February 28, 2011, then the Company was required to pay additional cash to the sellers of infiNET for each share of Class A common stock issued in an amount representing the difference between \$104.8375 less the greater of \$41.9335 or the gross sales price such seller obtained from a sale of the shares occurring subsequent to February 28, 2011. On February 28, 2011, the Company paid \$5.9 million in cash to satisfy this obligation. This payment was recorded by the Company as a reduction to additional paid-in capital.

11. Earnings per Common Share

Presented below is a summary of the components used to calculate basic and diluted earnings per share. The Company applies the two-class method of computing earnings per share, which requires the calculation of separate earnings per share amounts for unvested share-based awards and for common stock. Unvested share-based awards that contain nonforfeitable rights to dividends are considered securities which participate in undistributed earnings with common stock. Earnings per share attributable to common stock is shown in the table below.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

A reconciliation of weighted average shares outstanding follows:

	Year ended December 31,		
	2011	2010	2009
Net income attributable to Nelnet, Inc.	\$204,335	189,034	139,125
Less earnings allocated to holders of unvested restricted stock	1,263	1,218	889
Net income available to common stockholders	\$203,072	187,816	138,236
Weighted average common shares outstanding - basic	47,860,824	49,127,934	49,484,816
Dilutive effect of the assumed vesting of restricted stock awards	186,845	198,752	200,327
Weighted average common shares outstanding - diluted	48,047,669	49,326,686	49,685,143
Basic earnings per common share	\$4.24	3.82	2.79
Diluted earnings per common share	\$4.23	3.81	2.78

Included in the Company's weighted average shares outstanding during the years ended December 31, 2011, 2010, and 2009 are 117,361 shares, 101,253 shares, and 96,622 shares, respectively, of restricted stock units issued to certain associates of the Company and restricted stock units that will be issued to nonemployee directors upon their termination from the board of directors under the Company's nonemployee directors' compensation plan (see note 18, "Stock Based Compensation Plans - Non-employee Directors Compensation Plan.")

There were no shares that were antidilutive and not included in average shares outstanding for the diluted earnings per share calculation.

12. Income Taxes

The Company is subject to income taxes in the United States and Canada. Significant judgment is required in evaluating the Company's tax positions and determining the provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain.

As required by the Income Taxes Topic of the FASB Accounting Standards Codification, the Company recognizes in the consolidated financial statements only those tax positions determined to be more likely than not of being sustained upon examination, based on the technical merits of the positions. It further requires that a change in judgment related to the expected ultimate resolution of uncertain tax positions be recognized in earnings in the period of such change.

As of December 31, 2011, the total amount of gross unrecognized tax benefits (excluding the federal benefit received from state positions) was \$21.8 million which is included in "other liabilities" on the consolidated balance sheet. Of this total, \$15.0 million (net of the federal benefit on state issues) represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate in future periods. The Company currently anticipates uncertain tax positions will decrease by \$2.3 million prior to December 31, 2012 as a result of a lapse of applicable statute of limitations, settlements, correspondence with examining authorities, and recognition or measurement considerations with federal and state jurisdictions; however, actual developments in this area could differ from those currently expected. Of the \$2.3 million anticipated decrease, \$1.8 million, if recognized, would affect the Company's effective tax rate. A reconciliation of the beginning and ending amount of gross unrecognized tax benefits follows:

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

	Year ended December 31,	
	2011	2010
Gross balance - beginning of year	\$ 10,546	8,629
Additions based on tax positions of prior years	7,898	401
Additions based on tax positions related to the current year	4,359	2,383
Settlements with taxing authorities	—	—
Reductions for tax positions of prior years	(417) (750
Reductions based on tax positions related to the current year	—	—
Reductions due to lapse of applicable statute of limitations	(592) (117
Gross balance - end of year	\$ 21,794	10,546

All of the reductions due to the lapse of statute of limitations and for prior year tax positions shown above impacted the effective tax rate.

The Company's policy is to recognize interest and penalties accrued on uncertain tax positions as part of interest expense and other expense, respectively. As of December 31, 2011 and 2010, \$2.4 million and \$1.7 million in accrued interest and penalties, respectively, were included in “other liabilities” on the consolidated balance sheets. The Company recognized interest expense related to uncertain tax positions of \$0.7 million and \$0.3 million for the years ended December 31, 2011 and 2010, respectively, and interest income of \$0.6 million for the year ended December 31, 2009. Penalties were accrued in the amount of \$0.2 million in both 2010 and 2009. The amount of penalties accrued in 2011 was not significant. The impact of timing differences and tax attributes are considered when calculating interest and penalty accruals associated with the unrecognized tax benefits.

The Company and its subsidiaries file a consolidated federal income tax return in the U.S. and the Company or one of its subsidiaries files income tax returns in various state, local, and foreign jurisdictions. The Company is no longer subject to U.S. federal income tax examinations for years prior to 2008. The Company is no longer subject to U.S. state/local income tax examinations by tax authorities prior to 2004. As of December 31, 2011, the tax years subject to examination by a significant jurisdiction are as follows:

U.S. Federal	2008 and 2009
California	2004 through 2009

The provision for income taxes consists of the following components:

	Year ended December 31,		
	2011	2010	2009
Current:			
Federal	\$ 123,737	102,162	88,413
State	1,354	6,827	7,194
Foreign	87	158	23
Total current provision	125,178	109,147	95,630
Deferred:

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

The differences between the income tax provision computed at the statutory federal corporate tax rate and the financial statement provision for income taxes are shown below:

	Year ended December 31,		
	2011	2010	2009
Tax expense at federal rate	35.0	35.0	35.0
		%	%
Increase (decrease) resulting from:			
State tax, net of federal income tax benefit	0.9	2.2	1.9
Provision of uncertain federal and state tax matters	1.1	0.4	—
Tax credits	(0.4)	(0.2)	(0.4)
Valuation allowance	(0.3)	0.1	(0.6)
Other	0.2	—	(0.4)
Effective tax rate	36.5	37.5	35.5
		%	%

The Company's net deferred income tax liability, which is included in “other liabilities” on the consolidated balance sheets, consists of the following components:

	As of December 31,	
	2011	2010
Deferred tax assets:		
Student loans	\$23,605	21,413
Intangible assets	23,476	20,578
Accrued expenses	3,282	4,981
Net operating loss carryforwards	680	2,081
Stock compensation	867	899
Deferred revenue	2,625	734
Foreign tax credit	397	721
Bond issuance costs	656	667
Other	—	55
Total gross deferred tax assets	55,588	52,129
Less valuation allowance	(250) (1,161
Deferred tax assets	55,338	50,968
Deferred tax liabilities:		
Loan origination services	31,576	36,878
Debt repurchases	30,637	33,391
Basis in certain derivative contracts	4,420	10,644
Depreciation	5,819	2,215
Other	454	53
Deferred tax liabilities	72,906	83,181
Net deferred income tax liability	\$17,568	32,213

The Company has performed an evaluation of the recoverability of deferred tax assets. In assessing the realizability of the Company's deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent upon the generation

of future taxable income during the period in which those temporary differences become deductible. Management considers the scheduled reversals of deferred tax liabilities, projected taxable income, carry back opportunities, and tax planning strategies in making the assessment of the amount of the valuation allowance. With the exception of a portion of the Company's state net operating loss, it is management's opinion

F-39

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

that it is more likely than not that the deferred tax assets will be realized and should not be reduced by a valuation allowance. The amount of deferred tax assets considered realizable; however, could be reduced in the near term if estimates of future taxable income during the carry forward period are reduced. As of December 31, 2011, various subsidiaries have state net operating loss carry forwards of \$11.6 million expiring at various times through 2030 and foreign tax credit carry forwards of \$0.4 million expiring in 2018. A valuation allowance has been established at December 31, 2011 and 2010 of \$0.3 million and \$1.2 million, respectively, to reduce deferred income tax assets to amounts expected to be realized. The net change in the valuation allowance for the year ended December 31, 2011 was a decrease of \$0.9 million, which affected the Company's effective tax rate. Certain events occurred during the year which, in the judgment of management, changed the level of the Company's state net operating loss and foreign tax credit carry forwards expected to be realized.

During 2010, the Company recorded a \$55.0 million pre-tax charge related to a legal settlement. Prior to the Company filing its 2010 U.S. Federal income tax return, it executed a binding agreement with the Internal Revenue Service concluding that the settlement payment was deductible as an ordinary and necessary business expense. See note 15, "Legal Proceedings," for additional information on this settlement.

As of December 31, 2011 and 2010, current income taxes receivable of \$5.6 million and current income taxes payable of \$2.6 million are included in "other assets" and "other liabilities," respectively, on the consolidated balance sheets.

13. Restructuring Charges

Restructuring Charge - Legislative Impact (2009 Restructuring Plan)

On May 8, 2009, as a result of the continued challenges in the economy and legislative changes in the student loan industry, the Company adopted a plan to further streamline its operations by continuing to reduce its geographic footprint and consolidate servicing operations and related support services.

Management developed a restructuring plan that resulted in lower costs and provided enhanced synergies through cross training, career development, and simplified communications. The Company simplified its operating structure to leverage its larger facilities and technology by closing certain offices and downsizing its presence in certain geographic locations. Approximately 300 associates were impacted by this restructuring plan. However, the majority of these functions were relocated to the Company's Lincoln headquarters and Denver offices. Implementation of the plan began immediately and was completed during the third quarter of 2010.

The total charge to earnings associated with this restructuring plan was \$11.7 million, of which \$7.3 million and \$4.4 million was recognized in 2009 and 2010, respectively. The majority of this restructuring charge and related activity impacted the Company's Student Loan and Guaranty Servicing operating segment. See note 14, "Segment Reporting," which identifies the income statement impact of this restructuring for each operating segment.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Selected information related to the restructuring charge follows:

	2009 Restructuring Plan		2008 Restructuring Plan (a)	2007 Restructuring Plan (b)	Total
	Employee termination benefits	Lease terminations	Lease terminations	Lease terminations	
Restructuring accrual as of December 31, 2008	\$—	—	589	2,891	3,480

Cash payments	(683)	(1,387)	(223)	(1,541)	(3,834)
Restructuring accrual as of December 31, 2011	\$355	2,067	—	1,824	4,246

During, 2008, the Company announced a plan to reduce operating expenses related to its student loan origination (a) and related businesses as a result of ongoing disruptions in the credit markets. This restructuring plan was completed during the second quarter of 2008.

During 2007, the Company initiated a restructuring plan to modify its student loan business model in advance of (b) the enactment of the College Cost Reduction Act, which impacted the FFEL Program. This restructuring plan was completed as of December 31, 2007.

The restructuring accrual as of December 31, 2011 and 2010 is included in "other liabilities" on the consolidated balance sheets.

14. Segment Reporting

The Company earns fee-based revenue through its Student Loan and Guaranty Servicing, Tuition Payment Processing and Campus Commerce, and Enrollment Services operating segments. In addition, the Company earns interest income on its student loan portfolio in its Asset Generation and Management operating segment. The Company's operating segments are defined by the products and services they offer and the types of customers they serve, and they reflect the manner in which financial information is currently evaluated by management. See note 1, "Description of Business," for a description of each operating segment.

The accounting policies of the Company's operating segments are the same as those described in the summary of significant accounting policies. Intersegment revenues are charged by a segment to another segment that provides the product or service. Intersegment revenues and expenses are included within each segment consistent with the income statement presentation provided to management. Changes in management structure or allocation methodologies and procedures may result in changes in reported segment financial information. In 2010, the Company began allocating certain corporate overhead expenses to the individual operating segments. These expenses include certain corporate activities related to executive management, human resources, accounting, legal, occupancy, and marketing. These costs are allocated to each operating segment based on estimated use of such activities and services. These allocations were not made in 2009, and thus are not reflected in the 2009 segment operating results.

Segment Operating Results – “Base Net Income”

The tables below include the operating results of each of the Company's operating segments. Management, including the chief operating decision maker, evaluates the performance of the Company's operating segments based on their profitability. Management measures the profitability of the Company's operating segments based on “base net income.” Accordingly, information regarding the Company's operating segments is provided based on “base net income.” The Company's “base net income” is not a defined

F-41

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

term within generally accepted accounting principles and may not be comparable to similarly titled measures reported by other companies. Unlike financial accounting, there is no comprehensive, authoritative guidance for management reporting. While “base net income” is not a substitute for reported results under GAAP, the Company relies on “base net income” to manage each operating segment because it believes this measure provides additional information regarding the operational and performance indicators that are most closely assessed by management.

“Base net income” is the primary financial performance measure used by management to develop the Company’s financial plans, track results, and establish corporate performance targets and incentive compensation. Management believes this information provides additional insight into the financial performance of the core business activities of the Company’s operating segments. Accordingly, the tables presented below reflect “base net income,” which is the operating measure reviewed and utilized by management to manage the business, allocate resources, and evaluate performance. Reconciliations of the segment totals to the Company’s operating results in accordance with GAAP are also included in the tables below.

Corporate Activity and Overhead

Included in the tables below are certain corporate activities ("Corporate Activity and Overhead"). Corporate Activity and Overhead includes the following items:

- Income earned on certain investment activities
- Interest expense incurred on unsecured debt transactions
- Other products and service offerings that are not considered operating segments

Corporate Activities also includes certain corporate activities and overhead functions related to executive management, human resources, accounting and finance, legal, and marketing. Beginning in 2010, these costs were allocated to each operating segment based on estimated use of such activities and services.

Income Taxes

For segment reporting, income taxes are applied based on 38% of income (loss) before taxes for each individual operating segment. The difference between the consolidated income tax expense and the sum of taxes calculated for each operating segment is included in income taxes in Corporate Activity and Overhead.

Reclassifications

Certain operating segment amounts previously reported have been reclassified to conform to the current period presentation. These reclassifications include reclassifying "software services revenue" to "loan and guaranty servicing revenue" and reclassifying "depreciation and amortization," "impairment expense," "restructure expense," and "litigation settlement," which were previously included in “other expenses.” These reclassifications had no effect on any of the segments net income.

Total adjustments to GAAP	\$3,006	4,613	6,174	16,782	(1,094) 29,481

(a) Derivative market value and foreign currency adjustments: "Base net income" excludes the periodic unrealized gains and losses that are caused by the change in fair value on derivatives used in the Company's risk management

strategy in which the Company does not qualify for “hedge treatment” under GAAP. Included in “base net income” are the economic effects of the Company’s derivative instruments, which includes any cash paid or received being recognized as an expense or revenue upon actual derivative settlements. “Base net income” also excludes the foreign currency transaction gains or losses caused by the re-measurement of the Company’s Euro-denominated bonds to U.S. dollars.

(b) Amortization of intangible assets: “Base net income” excludes the amortization of acquired intangibles.

Compensation related to business combinations: The Company has structured certain business combinations in (c) which the consideration paid has been dependent on the sellers' continued employment with the Company. As such, the value

F-46

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

of the consideration paid is recognized as compensation expense by the Company over the term of the applicable employment agreement. The compensation expense related to existing agreements was fully expensed in 2009. “Base net income” excludes this expense.

Variable-rate floor income: Loans that reset annually on July 1 can generate excess spread income compared with the rate based on the special allowance payment formula in declining interest rate environments. The Company refers to this additional income as variable-rate floor income. The Company excludes variable-rate floor income, net of settlements paid on derivatives used to hedge student loan assets earning variable-rate floor income, from its (d) “base net income” since the timing and amount of variable-rate floor income (if any) is uncertain, it has been eliminated by legislation for all loans originated on and after April 1, 2006, and it is in excess of expected spreads. In addition, because variable-rate floor income is subject to the underlying rate for the subject loans being reset annually on July 1, it is a factor beyond the Company's control which can affect the period-to-period comparability of results of operations.

(e) Income taxes are applied based on 38% for the individual operating segments.

15. Legal Proceedings

General

The Company is subject to various claims, lawsuits, and proceedings that arise in the normal course of business. These matters principally consist of claims by student loan borrowers disputing the manner in which their student loans have been processed and disputes with other business entities. In addition, from time to time, the Company receives information and document requests from state or federal regulators concerning its business practices. The Company cooperates with these inquiries and responds to the requests. While the Company cannot predict the ultimate outcome of any inquiry or investigation, the Company believes its activities have materially complied with applicable law, including the Higher Education Act, the rules and regulations adopted by the Department of Education thereunder, and the Department's guidance regarding those rules and regulations. On the basis of present information, anticipated insurance coverage, and advice received from counsel, it is the opinion of the Company's management that the disposition or ultimate determination of these claims, lawsuits, and proceedings will not have a material adverse effect on the Company's business, financial position, or results of operations.

Bais Yaakov of Spring Valley v. Peterson's Nelnet, LLC

On January 4, 2011, a complaint against Peterson's Nelnet, LLC (“Peterson's”), a subsidiary of the Company, was filed in the U.S. federal District Court for the District of New Jersey (the “District Court”). The complaint alleges that Peterson's sent six advertising faxes to the named plaintiff in 2008-2009 that were not the result of express invitation or permission granted by the plaintiff and did not include certain opt out language. The complaint also alleges that such faxes violated the federal Telephone Consumer Protection Act (the “TCPA”), purportedly entitling the plaintiff to \$500 per violation, trebled for willful violations for each of the six faxes. The complaint further alleges that Peterson's had sent putative class members more than 10,000 faxes that violated the TCPA, amounting to more than \$5 million in statutory penalty damages and more than \$15 million if trebled for willful violations. The complaint seeks to establish a class action for two different classes of plaintiffs: Class A, to whom Peterson's sent unsolicited fax advertisements containing opt out notices similar to those contained in the faxes received by the named plaintiff; and Class B, to

whom Peterson's sent fax advertisements containing opt out notices similar to those contained in the faxes received by the named plaintiff. As of the filing date of this report, the District Court has not established or recognized any class.

On February 16, 2011, Peterson's filed a motion to dismiss the complaint based on a lack of federal question or diversity jurisdiction with respect to the complaint, which was denied by the District Court on April 15, 2011, shortly after a similar motion to dismiss that had been granted in an unrelated case involving alleged TCPA violations related to faxes was reversed by the U.S. Court of Appeals for the Third Circuit (the "Appeals Court"), which has jurisdiction over the District Court. On April 29, 2011, Peterson's filed an answer to the complaint, but also filed a motion for reconsideration of the motion to dismiss. On May 17, 2011, the Appeals Court granted a petition for rehearing of the motion to dismiss in the unrelated TCPA fax case, and on May 31, 2011, Peterson's filed a motion for stay pending the outcome of that rehearing. On September 12, 2011, the motion for stay was granted, and the motion for reconsideration was denied by the District Court. On September 20, 2011, the named plaintiff filed a motion for reconsideration of the District Court's order, and at a hearing on November 22, 2011 the District Court ordered counsel to submit a proposed order to modify the stay for a limited third party subpoena, which the District Court approved on December 5, 2011. On January 18, 2012, the U.S. Supreme Court issued a decision in an unrelated TCPA case which held that federal courts have federal question jurisdiction over private causes of action under the TCPA. On January 20, 2012, the named plaintiff requested

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

that the stay be lifted on the basis of the Supreme Court's decision, and on January 25, 2012 the District Court denied that request since the stay is based on the outcome of the Appeals Court rehearing, and there has been no decision by the Appeals Court with respect to such rehearing.

Peterson's intends to continue to contest the suit vigorously. Due to the preliminary stage of this matter and the uncertainty and risks inherent in class determination and the overall litigation process, the Company believes that a meaningful estimate of a reasonably possible loss, if any, or range of reasonably possible losses, if any, cannot currently be made.

Oberg Litigation

In September 2009, the Company was served with a Complaint (the "Oberg Complaint") naming the Company as one of ten defendant student loan lenders in a "qui tam" action brought by Jon H. Oberg on behalf of the United States of America. The Oberg Complaint alleged that the defendants submitted false claims for payment to the Department in order to obtain special allowance payments on certain student loans at a rate of 9.5%, which the Oberg Complaint alleged were in excess of amounts permitted by law, and that approximately \$407 million in unlawful 9.5% special allowance payment claims were submitted by the Company. The Oberg Complaint sought a judgment against the defendants in the amount of three times the amount of damages sustained by the government in connection with the alleged overbilling by the defendants for special allowance payments, as well as civil penalties.

During 2010, the Company entered into a settlement agreement to settle all claims associated with the Oberg Complaint. As a result of the settlement, the Company recorded a \$55.0 million pre-tax charge during the third quarter of 2010, and paid that amount on November 3, 2010. The Company believed it had strong defenses to the Oberg Complaint, but entered into the settlement agreement in order to eliminate the uncertainty, distraction, and expense of a trial.

16. Operating Leases

The Company is committed under noncancelable operating leases for office and warehouse space and equipment. Total rental expense incurred by the Company for the years ended December 31, 2011, 2010, and 2009 was \$8.2 million, \$9.3 million, and \$10.4 million, respectively. Minimum future rentals, as of December 31, 2011, under noncancelable operating leases are shown below:

2012	\$6,787
2013	5,708
2014	3,399
2015	1,656
2016 and thereafter	1,664
	\$19,214

Future rental commitments for leases in the table above have been reduced by minimum non-cancelable sublease rentals aggregating approximately \$1.2 million as of December 31, 2011.

17. Defined Contribution Benefit Plan

The Company has a 401(k) savings plan that cover substantially all of its employees. Employees may contribute up to 100 percent of their pre tax salary, subject to IRS limitations. The Company matches up to 100 percent on the first 3 percent of contributions and 50 percent on the next 2 percent. The Company made contributions to the plan of \$3.4 million, \$3.1 million, and \$3.2 million during the years ended December 31, 2011, 2010, and 2009, respectively. Union Bank, an entity under common control with the Company, serves as the trustee and administrator for the plan.

F-48

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

18. Stock Based Compensation Plans

Restricted Stock Plan

The Company has a restricted stock plan that is intended to provide incentives to attract, retain, and motivate employees in order to achieve long term growth and profitability objectives. The restricted stock plan provides for the grant to eligible employees of awards of restricted shares of Class A common stock. An aggregate of 4,000,000 shares of Class A common stock have been reserved for issuance under the restricted stock plan, subject to antidilution adjustments in the event of certain changes in capital structure.

The following table summarizes restricted stock activity:

	Years ended December 31,		
	2011	2010	2009
Non-vested shares at beginning of year	311,119	320,461	329,173
Granted	82,845	96,327	72,471
Vested	(54,184) (48,523) (43,873
Canceled	(54,062) (57,146) (37,310
Non-vested shares at end of year	285,718	311,119	320,461

The fair value of restricted stock awards is determined on the grant date based on the Company's stock price and is amortized to compensation cost over the related vesting periods. As of December 31, 2011, there was \$3.0 million of unrecognized compensation cost included in "additional paid-in capital" on the consolidated balance sheet related to restricted stock, which is expected to be recognized as compensation expense as shown in the table below.

2012	\$952
2013	680
2014	491
2015	349
2016	235
2017 and thereafter	304
	\$3,011

To date, the shares issued under this plan vest immediately or vest in either three or ten years. The Company pays dividends on non-vested stock. For the years ended December 31, 2011, 2010, and 2009, the Company recognized compensation expense of \$1.3 million, \$1.5 million, and \$1.6 million, respectively, related to shares issued under the restricted stock plan.

Employee Share Purchase Plan

The Company has an employee share purchase plan pursuant to which employees are entitled to purchase common stock from payroll deductions at a 15% discount from market value. All employees, other than those whose customary employment is 20 hours or less per week, who have been employed for at least six months, or another period determined by the Company's compensation committee not in excess of two years, are eligible to purchase Class A common stock under the plan. During the years ended December 31, 2011, 2010, and 2009, the Company recognized

compensation expense of approximately \$137,000, \$141,000, and \$216,000, respectively, in connection with issuing 29,989 shares, 31,729 shares, and 52,311 shares, respectively, under this plan.

Employee Stock Purchase Loan Plan

The Company has entered into loan agreements with employees pursuant to the Company's Employee Stock Purchase Loan Plan (the "Loan Plan"). Loans under this plan mature ten years from grant date and bear interest equal to the three-month LIBOR rate plus 50 basis points. As of December 31, 2011 and 2010, the balance of the loans granted under the Loan Plan was \$1.1 million

F-49

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

and \$1.2 million, respectively, and is reflected as a reduction to stockholders' equity on the consolidated balance sheets. During 2010, the Company's Board of Directors terminated the Loan Plan effective as of December 31, 2010 such that no future awards or loans will be made under the plan. Such termination does not affect loans outstanding.

Non-employee Directors Compensation Plan

The Company has a compensation plan for non-employee directors pursuant to which non-employee directors can elect to receive their annual retainer fees in the form of cash or Class A common stock. If a nonemployee director elects to receive Class A common stock, the number of shares of Class A common stock that are awarded is equal to the amount of the annual retainer fee otherwise payable in cash divided by 85% of the fair market value of a share of Class A common stock on the date the fee is payable. Non-employee directors who choose to receive Class A common stock may also elect to defer receipt of the Class A common stock until termination of their service on the board of directors.

For the years ended December 31, 2011, 2010, and 2009, the Company recognized approximately \$641,000, \$585,000, and \$575,000, respectively, of expense related to this plan. The following table provides the number of shares issued under this plan for the years ended December 31, 2011, 2010, and 2009.

	Shares issued - not deferred	Shares issued - deferred	Total
Year ended December 31, 2011	13,059	20,843	33,902
Year ended December 31, 2010	14,632	12,466	27,098
Year ended December 31, 2009	7,143	36,078	43,221

19. Related Parties

Union Bank is controlled by Farmers & Merchants Investment Inc. ("F&M") which owns a majority of Union Bank's common stock and a minority share of Union Bank's non-voting preferred stock. Michael S. Dunlap, a significant shareholder, Chief Executive Officer, Chairman, and a member of the Board of Directors of the Company, along with his spouse, owns or controls a significant portion of the stock of F&M, while Mr. Dunlap's sister, Angela L. Muhleisen, also owns or controls a significant portion of F&M stock. Mr. Dunlap serves as a Director and Co-President of F&M. Ms. Muhleisen serves as Director and Co-President of F&M and as a Director, Chairperson, President, and Chief Executive Officer of Union Bank. Union Bank is deemed to have beneficial ownership of various shares of the Company because it serves in a capacity of trustee and has sole voting and/or investment power. Mr. Dunlap and Ms. Muhleisen beneficially own a significant percent of the voting rights of the Company's outstanding common stock.

The Company has entered into certain contractual arrangements with Union Bank. These transactions are summarized below.

Loan Sales and Purchases

During 2009 and 2008, the Company sold \$76.4 million (par value) and \$535.4 million (par value), respectively, of FFELP student loans (the "FFELP Loans") to Union Bank. The Company recognized losses of \$0.8 million and \$3.9

million, respectively, on these loan sales, which represented unamortized loan costs on the portfolios. These loans were sold pursuant to an affiliate transaction exemption granted by the Federal Reserve Board which allowed Union Bank to purchase FFELP loans from the Company. In connection with the exemption and the loan purchases by Union Bank, an Assurance Commitment Agreement (the "Commitment Agreement") was also entered into, by and among, the Company, Union Bank, and Mr. Dunlap. Per the terms of the Commitment Agreement, the Company provided certain assurances to Union Bank designed to mitigate potential losses related to the FFELP Loans, including holding amounts in escrow equal to the unguaranteed portion and reimbursing Union Bank for losses, if any, related to the portfolio. As part of this agreement, the Company was also obligated to buy back loans once they were 30 days delinquent. In 2010 and 2009, the Company bought back from Union Bank \$11.7 million (par value) and \$36.9 million (par value), respectively, in loans and incurred expenses of \$128,000 and \$374,000, respectively, related to this obligation.

F-50

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

In March 2010, the Company purchased \$524.2 million (par value) of federally insured student loans from Union Bank, which represented all outstanding FFELP loans remaining under the provisions of the Commitment Agreement. As a result of this loan purchase, the Company no longer has a commitment to hold amounts in escrow, reimburse Union Bank for losses, and buy back delinquent loans related to this portfolio.

During the years ended December 31, 2011, 2010, and 2009, the Company purchased student loans of \$0.1 million (par value), \$989.2 million (par value), and \$47.6 million (par value), respectively, from Union Bank, which includes \$535.9 million (par value) and \$36.9 million (par value) of loans purchased in 2010 and 2009, respectively, under the Commitment Agreement as discussed previously. No premiums were paid for loans purchased in 2011, 2010, and 2009.

Loan Servicing

The Company serviced \$496.3 million, \$530.0 million, and \$539.8 million of loans for Union Bank as of December 31, 2011, 2010, and 2009, respectively. Servicing revenue earned by the Company from servicing loans for Union Bank was \$1.9 million, \$1.8 million, and \$1.9 million for the years ended December 31, 2011, 2010, and 2009, respectively. As of both December 31, 2011 and 2010, accounts receivable includes \$0.2 million due from Union Bank for loan servicing.

Funding

Participation Agreement

The Company maintains an agreement with Union Bank, as trustee for various grantor trusts, under which Union Bank has agreed to purchase from the Company participation interests in student loans (the “FFELP Participation Agreement”). The Company uses this facility as a source to fund FFELP student loans. As of December 31, 2011 and 2010, \$509.2 million and \$350.4 million, respectively, of loans were subject to outstanding participation interests held by Union Bank, as trustee, under this agreement. The agreement automatically renews annually and is terminable by either party upon five business days notice. This agreement provides beneficiaries of Union Bank's grantor trusts with access to investments in interests in student loans, while providing liquidity to the Company on a short-term basis. The Company can participate loans to Union Bank to the extent of availability under the grantor trusts, up to \$750 million or an amount in excess of \$750 million if mutually agreed to by both parties. Loans participated under this agreement have been accounted for by the Company as loan sales. Accordingly, the participation interests sold are not included on the Company's consolidated balance sheets.

Bonds and Notes Payable

The Company has from time to time repurchased certain of its own asset-backed securities (bonds and notes payable). For accounting purposes, these notes have been effectively retired and are not included on the Company's consolidated balance sheets. However, these securities are legally outstanding at the trust level and the Company could sell these notes to third parties or redeem the notes at par as cash is generated by the trust estate. During 2010, the Company participated \$218.7 million of these securities to Union Bank, as trustee for various grantor trusts, and obtained cash proceeds equal to the par value of the notes. The Company has entered into a Guaranteed Purchase Agreement with Union Bank whereby the Company must purchase these notes back from Union Bank at par upon the request of Union

Bank. As of December 31, 2010, \$107.1 million of these securities were outstanding and subject to the participation agreement and are included in “bonds and notes payable” on the Company's consolidated balance sheet. During the first quarter of 2011, the Company redeemed all outstanding notes under this participation.

Operating Cash Accounts

The majority of the Company's cash operating accounts are maintained at Union Bank. The Company also participates in the Short term Federal Investment Trust (“STFIT”) of the Student Loan Trust Division of Union Bank, which is included in “cash and cash equivalents - held at a related party” and “restricted cash - due to customers” on the accompanying consolidated balance sheets. As of December 31, 2011 and 2010, the Company had \$119.5 million and \$326.9 million, respectively, invested in the STFIT or deposited at Union Bank in operating accounts, of which \$84.2 million and \$50.1 million as of December 31, 2011 and 2010, respectively, represented cash collected for customers. Interest income earned by the Company on the amounts invested in the STFIT for the years ended December 31, 2011, 2010, and 2009 was \$0.2 million, \$1.1 million, and \$2.9 million, respectively.

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

529 Plan Administration Services

The Company provides certain 529 Plan administration services to certain college savings plans (the “College Savings Plans”) through a contract with Union Bank, as the program manager. Union Bank is entitled to a fee as program manager pursuant to its program management agreement with the College Savings Plans. For the years ended December 31, 2011, 2010, and 2009, the Company has received fees of \$2.3 million, \$5.7 million, and \$3.4 million, respectively, from Union Bank related to the administration services provided to the College Savings Plans.

Lease Arrangements

Union Bank leases approximately 4,000 square feet in the Company's corporate headquarters building. Union Bank paid the Company approximately \$73,000, \$71,000, and \$70,000 for commercial rent and storage income during 2011, 2010, and 2009, respectively. The lease agreement expires on June 30, 2018.

On October 31, 2011, the Company entered into a lease agreement with Union Bank under which the Company will lease office space of approximately 1,300 square feet for \$25,000 per year. The initial term of the lease expires on November 30, 2012, and the lease agreement provides for automatic renewals each year. The Company paid Union Bank approximately \$4,000 during 2011 in accordance with the lease agreement.

Other Fees Paid to Union Bank

During the years ended December 31, 2011, 2010, and 2009, the Company paid Union Bank approximately \$64,000, \$358,000, and \$210,000, respectively, in administrative services; approximately \$104,000, \$120,000, and \$118,000, respectively, in commissions, and approximately \$185,000, 177,000, and \$72,000, respectively, in cash management fees.

Other Fees Received from Union Bank

During the years ended December 31, 2011, 2010, and 2009, Union Bank paid the Company approximately \$144,000, \$112,000, and \$110,000, respectively, under an employee sharing arrangement and approximately \$25,000, \$52,000, and \$57,000, respectively, for health and productivity services.

Investment Services

In December 2010, Union Bank established various trusts whereby Union Bank serves as trustee for the purpose of purchasing, holding, managing, and selling investments in student loan asset backed securities. Union Bank, in its individual capacity, and the Company have both invested money into the trusts. As of December 31, 2011 and 2010, the Company had \$8.0 million and \$4.9 million, respectively, invested in the trusts, and such investments are included in "investments" on the consolidated balance sheets.

Prior to May 1, 2011, the Company and Union Bank employed certain individuals as dual employees and such employees provided consulting and advisory services to Union Bank as trustee for these trusts, and Union Bank agreed to pay the Company for the share of such employees' salary and payroll based on the value of such services rendered as well as the loss of value of such dual employees' services to the Company. On May 9, 2011, one of the

Company's subsidiaries entered into a management agreement with Union Bank, effective as of May 1, 2011, under which the subsidiary performs various advisory and management services on behalf of Union Bank with respect to investments in securities by the trusts, including identifying securities for purchase or sale by the trusts. The agreement provides that Union Bank will pay to the subsidiary annual fees of 25 basis points on the outstanding balance of the investments in the trusts. As of December 31, 2011, the outstanding balance of investments in the trusts was \$394.2 million. In addition, Union Bank will pay additional fees to the subsidiary of 50 percent of the gains from the sale of securities from the trusts. For the year ended December 31, 2011, the Company recognized \$5.1 million of fee revenue related to this agreement, which is included in "other income" on the consolidated statements of income.

401(k) Plan Administer

Union Bank administers the Company's 401(k) defined contribution plan. Fees paid to Union Bank to administer the plan are paid by the plan participants and were approximately \$270,000, \$239,000, and \$193,000 during the years ended December 31, 2011, 2010, and 2009, respectively.

Letter of Credit

As of December 31, 2011, Union Bank has issued a \$25,000 letter of credit for the Company's benefit. Union Bank charged no fee for providing this service.

20. Fair Value

The Company uses estimates of fair value in applying various accounting standards for its financial statements.

The Company categorizes its fair value estimates based on a hierarchical framework associated with three levels of price transparency utilized in measuring financial instruments at fair value. For additional information regarding the Company's policies for determining fair value and the hierarchical framework, see note 2, "Summary of Significant Accounting Policies and Practices - Fair Value Measurements."

The following tables present the Company's financial assets and liabilities that are measured at fair value on a recurring basis.

	As of December 31, 2011			
	Level 1	Level 2	Level 3	Total
Assets:				
Investments - trading securities (a):				
Student loan auction rate asset-backed securities	\$—	42,412	—	42,412

F-53

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

Investments represent investments classified by the Company as trading securities which are recorded at fair value on a recurring basis. Level 1 investments are measured based upon quoted prices and include investments traded on an active exchange, such as the New York Stock Exchange, as well as corporate, mortgage-backed security, and U.S. government bonds and U.S. Treasury securities that trade in active markets. Level 2 and level 3 investments (a) include student loan auction rate asset-backed securities. The fair value for the student loan auction rate asset-backed securities is determined using indicative quotes from broker dealers or an income approach valuation technique (present value using the discount rate adjustment technique) that considers, among other things, rates currently observed in publicly traded debt markets for debt of similar terms to companies with comparable credit risk.

All derivatives are accounted for at fair value on a recurring basis. The fair value of derivative financial instruments is determined using a market approach in which derivative pricing models use the stated terms of the (b) contracts and observable yield curves, forward foreign currency exchange rates, and volatilities from active markets.

When determining the fair value of derivatives, the Company takes into account counterparty credit risk for positions where it is exposed to the counterparty on a net basis by assessing exposure net of collateral held. The net exposures for each counterparty are adjusted based on market information available for the specific counterparty.

The following table presents a roll forward of the fair value of level 3 (significant unobservable inputs) assets.

	Level 3
Balance at December 31, 2009	\$—
Total realized and unrealized gains (losses) included in income, net (a)	150
Purchases	12,061
Redemptions/Sales	(350)
Balance at December 31, 2010	11,861
Total realized and unrealized gains (losses) included in income, net (a)	(78)
Purchases	93,823
Redemptions/Sales	(63,194)
Transfers out of level 3 (b)	(42,412)
Balance at December 31, 2011	\$—

(a) Realized and unrealized gains (losses) related to the Company's asset-backed securities investments are included in "other income" in the Company's consolidated statements of income.

(b) On December 31, 2011, the Company transferred its asset-backed securities investments from level 3 to level 2 as a result of an increase in market activity for such securities.

The Company measures certain assets at fair value on a nonrecurring basis in accordance with GAAP. For the years ended December 31, 2010 and 2009, these adjustments to fair value resulted from the write-down to fair value of goodwill and intangible assets. For assets measured at fair value on a nonrecurring basis during the years ended December 31, 2011, 2010, and 2009 that were still held on the balance sheet at each respective period end, the

Edgar Filing: NELNET INC - Form 10-K

following table provides the fair value hierarchy and the carrying value of the related individual assets at year end.

	Level 3		
	2011	2010	2009
Goodwill (a)	\$117,118	117,118	143,717
Intangible assets (b)	28,374	38,712	53,538
	\$145,492	155,830	197,255

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

- (a) Goodwill is reviewed annually for impairment and whenever triggering events or changes in circumstances indicate its carrying value may not be recoverable.
- (b) Long-lived assets, such as purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The following table presents the fair value adjustments included in the consolidated statements of income related to the decrease in value of the above assets. The fair value adjustments were recorded by the Company as impairment charges and are included in “impairment expense” in the consolidated statements of income.

	Year ended December 31,		
	2010	2009	
Goodwill	\$(26,599)	(31,461)

NELNET, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements – (continued)

(Dollars in thousands, except share amounts, unless otherwise noted)

The methodologies for estimating the fair value of financial assets and liabilities that are measured at fair value on a recurring basis are discussed above. The remaining financial assets and liabilities were estimated using the following methods and assumptions:

Student Loans Receivable and Student Loans Receivable – Held for Sale

The Company's student loans are accounted for at cost or at the lower of cost or market if the loan is held-for-sale. Student loans classified as held for sale at December 31, 2010 are those loans which the Company sold in January 2011 and were valued using the sales price (100% of par value) less the estimated credit risk related to this portfolio. The Company retained credit risk related to this portfolio and will pay cash to purchase back any loans which become 60 days delinquent. For all other loans, fair values were determined by modeling loan cash flows using stated terms of the assets and internally-developed assumptions to determine aggregate portfolio yield, net present value, and average life. The significant assumptions used to project cash flows are prepayment speeds, default rates, cost of funds, required return on equity, and future interest rates and indice relationships. A number of significant inputs into the models are internally derived and not observable to market participants.

Cash and Cash Equivalents, Restricted Cash, Restricted Cash – Due to Customers, Restricted Investments, Accrued Interest Receivable/Payable and Due to Customers

The carrying amount approximates fair value due to the variable rate of interest and/or the short maturities of these instruments.

Bonds and Notes Payable

Bonds and notes payable are accounted for at cost in the financial statements except when denominated in a foreign currency. Foreign currency-denominated borrowings are re-measured at current spot rates in the financial statements. The fair value of bonds and notes payable was determined from quotes from broker dealers or through standard bond pricing models using the stated terms of the borrowings, observable yield curves, and market credit spreads. Fair value adjustments for unsecured corporate debt are made based on indicative quotes from observable trades.

22. Condensed Parent Company Financial Statements

The following represents the condensed balance sheets as of December 31, 2011 and 2010 and condensed statements of income and cash flows for each of the years in the three-year period ended December 31, 2011 for Nelnet, Inc.

The Company is limited in the amount of funds that can be transferred to it by its subsidiaries through intercompany loans, advances, or cash dividends. These limitations relate to the restrictions by trust indentures under the education lending subsidiaries debt financing arrangements. The amounts of cash and investments restricted in the respective reserve accounts of the education lending subsidiaries are shown on the consolidated balance sheets as restricted cash and investments.

APPENDIX A

Description of The Federal Family Education Loan Program

The Federal Family Education Loan Program

The Higher Education Act provides for a program of federal insurance for student loans as well as reinsurance of student loans guaranteed or insured by state agencies or private non-profit corporations.

The Higher Education Act authorizes certain student loans to be insured and reinsured under the Federal Family Education Loan Program ("FFELP"). The Student Aid and Fiscal Responsibility Act, enacted into law on March 30, 2010, as part of the Health Care and Education Reconciliation Act of 2010, terminated the authority to make FFELP loans. As of July 1, 2010, no new FFELP loans can be disbursed.

Generally, a student was eligible for loans made under the Federal Family Education Loan Program only if he or she:

- had been accepted for enrollment or was enrolled in good standing at an eligible institution of higher education;
- was carrying or planning to carry at least one-half the normal full-time workload, as determined by the institution, for the course of study the student was pursuing;
- was not in default on any federal education loans;
- had not committed a crime involving fraud in obtaining funds under the Higher Education Act which funds had not been fully repaid; and
- met other applicable eligibility requirements.

Eligible institutions included higher educational institutions and vocational schools that complied with specific federal regulations. Each loan is evidenced by an unsecured note.

The Higher Education Act also establishes maximum interest rates for each of the various types of loans. These rates vary not only among loan types, but also within loan types depending upon when the loan was made or when the borrower first obtained a loan under the Federal Family Education Loan Program. The Higher Education Act allows lesser rates of interest to be charged.

Types of loans

Four types of loans were available under the Federal Family Education Loan Program:

- Subsidized Stafford Loans
- Unsubsidized Stafford Loans
- PLUS Loans
- Consolidation Loans

These loan types vary as to eligibility requirements, interest rates, repayment periods, loan limits, and eligibility for interest subsidies and special allowance payments. Some of these loan types have had other names in the past. References to these various loan types include, where appropriate, their predecessors.

The primary loan under the Federal Family Education Loan Program is the Subsidized Stafford Loan. Students who were not eligible for Subsidized Stafford Loans based on their economic circumstances might have obtained Unsubsidized Stafford Loans. Graduate or professional students and parents of dependent undergraduate students might have obtained PLUS Loans. Consolidation Loans were available to borrowers with existing loans made under the Federal Family Education Loan Program and other federal programs to consolidate repayment of the borrower's existing loans. Prior to July 1, 1994, the Federal Family Education Loan Program also offered Supplemental Loans for Students ("SLS Loans") to graduate and professional students and independent undergraduate students and, under certain circumstances, dependent undergraduate students, to supplement their Stafford Loans.

Subsidized Stafford Loans

General. Subsidized Stafford Loans are eligible for insurance and reinsurance under the Higher Education Act if the eligible student to whom the loan was made was accepted or was enrolled in good standing at an eligible institution of higher education or vocational school and carried at least one-half the normal full-time workload at that institution. Subsidized Stafford Loans had limits as to the maximum amount which could be borrowed for an academic year and in the aggregate for both undergraduate and graduate or professional study. Both annual and aggregate limitations excluded loans made under the PLUS Loan Program. The Secretary of Education had discretion to raise these limits to accommodate students undertaking specialized training requiring exceptionally high costs of education.

Subsidized Stafford Loans were made only to student borrowers who met the needs tests provided in the Higher Education Act. Provisions addressing the implementation of needs analysis and the relationship between unmet need for financing and the availability of Subsidized Stafford Loan Program funding have been the subject of frequent and extensive amendments.

Interest rates for Subsidized Stafford Loans. For Stafford Loans first disbursed to a “new” borrower (a “new” borrower is defined for purposes of this section as one who had no outstanding balance on a Federal Family Education Loan Program loan on the date the new promissory note was signed) for a period of enrollment beginning before January 1, 1981, the applicable interest rate is fixed at 7%.

For Stafford Loans first disbursed to a “new” borrower, for a period of enrollment beginning on or after January 1, 1981, but before September 13, 1983, the applicable interest rate is fixed at 9%.

For Stafford Loans first disbursed to a “new” borrower, for a period of enrollment beginning on or after September 13, 1983, but before July 1, 1988, the applicable interest rate is fixed at 8%.

For Stafford Loans first disbursed to a borrower with an outstanding balance on a PLUS, SLS, or Consolidation Loan, but not on a Stafford Loan, where the new loan is intended for a period of enrollment beginning before July 1, 1988, the applicable interest rate is fixed at 8%.

For Stafford Loans first disbursed before October 1, 1992, to a “new” borrower or to a borrower with an outstanding balance on a PLUS, SLS, or Consolidation Loan, but not a Stafford Loan, where the new loan is intended for a period of enrollment beginning on or after July 1, 1988, the applicable interest rate is as follows:

Original fixed interest rate of 8% for the first 48 months of repayment. Beginning on the first day of the 49th month of repayment, the interest rate increased to a fixed rate of 10% thereafter. Loans in this category were subject to excess interest rebates and have been converted to a variable interest rate based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 3.25%. The variable interest rate is adjusted annually on July 1. The maximum interest rate for loans in this category is 10%.

For Stafford Loans first disbursed on or after July 23, 1992, but before July 1, 1994, to a borrower with an outstanding Stafford Loan made with a 7%, 8%, 9%, or 8%/10% fixed interest rate, the original, applicable interest rate is the same as the rate provided on the borrower's previous Stafford Loan (i.e., a fixed rate of 7%, 8%, 9%, or 8%/10%). Loans in this category were subject to excess interest rebates and have been converted to a variable interest rate based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate for a loan in this category is equal to the loan's previous fixed rate (i.e., 7%, 8%, 9%, or 10%).

Edgar Filing: NELNET INC - Form 10-K

For Stafford Loans first disbursed on or after October 1, 1992, but before December 20, 1993, to a borrower with an outstanding balance on a PLUS, SLS, or Consolidation Loan, but not on a Stafford Loan, the original, applicable interest rate is fixed at 8%. Loans in this category were subject to excess interest rebates and have been converted to a variable interest rate based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate for a loan in this category is 8%.

For Stafford Loans first disbursed on or after October 1, 1992, but before July 1, 1994, to a “new” borrower, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate for a loan in this category is 9%.

A-2

For Stafford Loans first disbursed on or after December 20, 1993, but before July 1, 1994, to a borrower with an outstanding balance on a PLUS, SLS, or Consolidation Loan, but not on a Stafford Loan, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate for a loan in this category is 9%.

For Stafford Loans first disbursed on or after July 1, 1994, but before July 1, 1995, where the loan is intended for a period of enrollment that includes or begins on or after July 1, 1994, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate for a loan in this category is 8.25%.

For Stafford Loans first disbursed on or after July 1, 1995, but before July 1, 1998, the applicable interest rate is as follows:

When the borrower is in school, in grace, or in an authorized period of deferment, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 2.5%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 8.25%.

When the borrower is in repayment or in a period of forbearance, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 8.25%.

For Stafford Loans first disbursed on or after July 1, 1998, but before July 1, 2006, the applicable interest rate is as follows:

When the borrower is in school, in grace, or in an authorized period of deferment, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 1.7%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 8.25%.

When the borrower is in repayment or in a period of forbearance, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1, plus 2.3%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 8.25%.

For Stafford Loans first disbursed on or after July 1, 2006, the applicable interest rate is fixed at 6.80%. However, for Stafford Loans for undergraduates, the applicable interest rate was reduced in phases for which the first disbursement was made on or after:

July 1, 2008 and before July 1, 2009, the applicable interest rate is fixed at 6.00%,

July 1, 2009 and before July 1, 2010, the applicable interest rate is fixed at 5.60%.

Unsubsidized Stafford Loans

General. The Unsubsidized Stafford Loan program was created by Congress in 1992 for students who did not qualify for Subsidized Stafford Loans due to parental and/or student income and assets in excess of permitted amounts. These students were entitled to borrow the difference between the Stafford Loan maximum for their status (dependent or

independent) and their Subsidized Stafford Loan eligibility through the Unsubsidized Stafford Loan Program. The general requirements for Unsubsidized Stafford Loans, including special allowance payments, are essentially the same as those for Subsidized Stafford Loans. However, the terms of the Unsubsidized Stafford Loans differ materially from Subsidized Stafford Loans in that the federal government will not make interest subsidy payments and the loan limitations were determined without respect to the expected family contribution. The borrower is required to either pay interest from the time the loan is disbursed or the accruing interest is capitalized when repayment begins and at the end of deferment and forbearance periods. Unsubsidized Stafford Loans were not available before October 1, 1992. A student meeting the general eligibility requirements for a loan under the Federal Family Education Loan Program was eligible for an Unsubsidized Stafford Loan without regard to need.

Interest rates for Unsubsidized Stafford Loans. Unsubsidized Stafford Loans are subject to the same interest rate provisions as Subsidized Stafford Loans, with the exception of Unsubsidized Stafford Loans first disbursed on or after July 1, 2008, which retain a fixed interest rate of 6.80%.

A-3

PLUS Loans

General. PLUS Loans were made to parents, and under certain circumstances spouses of remarried parents, of dependent undergraduate students. Effective July 1, 2006, graduate and professional students were eligible borrowers under the PLUS Loan program. For PLUS Loans made on or after July 1, 1993, the borrower could not have an adverse credit history as determined by criteria established by the Secretary of Education. The basic provisions applicable to PLUS Loans are similar to those of Stafford Loans with respect to the involvement of guarantee agencies and the Secretary of Education in providing federal insurance and reinsurance on the loans. However, PLUS Loans differ significantly, particularly from the Subsidized Stafford Loans, in that federal interest subsidy payments are not available under the PLUS Loan Program and special allowance payments are more restricted.

Interest rates for PLUS Loans. For PLUS Loans first disbursed on or after January 1, 1981, but before October 1, 1981, the applicable interest rate is fixed at 9%.

For PLUS Loans first disbursed on or after October 1, 1981, but before November 1, 1982, the applicable interest rate is fixed at 14%.

For PLUS Loans first disbursed on or after November 1, 1982, but before July 1, 1987, the applicable interest rate is fixed at 12%.

Beginning July 1, 2001, for PLUS Loans first disbursed on or after July 1, 1987, but before October 1, 1992, the applicable interest rate is variable and is based on the weekly average one-year constant maturity Treasury bill yield for the last calendar week ending on or before June 26 preceding July 1 of each year, plus 3.25%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 12%. Prior to July 1, 2001, PLUS Loans in this category had interest rates which were based on the 52-week Treasury bill auctioned at the final auction held prior to the preceding June 1, plus 3.25%. The annual (July 1) variable interest rate adjustment was applicable prior to July 1, 2001, as was the maximum interest rate of 12%. PLUS Loans originally made at a fixed interest rate, which have been refinanced for purposes of securing a variable interest rate, are subject to the variable interest rate calculation described in this paragraph.

Beginning July 1, 2001, for PLUS Loans first disbursed on or after October 1, 1992, but before July 1, 1994, the applicable interest rate is variable and is based on the weekly average one-year constant maturity Treasury yield for the last calendar week ending on or before June 26 preceding July 1 of each year, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 10%. Prior to July 1, 2001, PLUS Loans in this category had interest rates which were based on the 52-week Treasury bill auctioned at the final auction held prior to the preceding June 1, plus 3.1%. The annual (July 1) variable interest rate adjustment was applicable prior to July 1, 2001, as was the maximum interest rate of 10%.

Beginning July 1, 2001, for PLUS Loans first disbursed on or after July 1, 1994, but before July 1, 1998, the applicable interest rate is variable and is based on the weekly average one-year constant maturity Treasury yield for the last calendar week ending on or before June 26 preceding July 1 of each year, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 9%. Prior to July 1, 2001, PLUS Loans in this category had interest rates which were based on the 52-week Treasury bill auctioned at the final auction held prior to the preceding June 1, plus 3.1%. The annual (July 1) variable interest rate adjustment was applicable prior to July 1, 2001, as was the maximum interest rate of 9%.

For PLUS Loans first disbursed on or after July 1, 1998, but before July 1, 2006, the applicable interest rate is variable and is based on the bond equivalent rate of the 91-day Treasury bill auctioned at the final auction before the preceding June 1 of each year, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 9%.

For PLUS Loans first disbursed on or after July 1, 2006, the applicable interest rate is fixed at 8.5%.

SLS Loans

General. SLS Loans were limited to graduate or professional students, independent undergraduate students, and dependent undergraduate students, if the students' parents were unable to obtain a PLUS Loan. Except for dependent undergraduate students, eligibility for SLS Loans was determined without regard to need. SLS Loans were similar to Stafford Loans with respect to the involvement of guarantee agencies and the Secretary of Education in providing federal insurance and reinsurance on the loans. However, SLS Loans differed significantly, particularly from Subsidized Stafford Loans, because federal interest subsidy payments were not available under the SLS Loan Program and special allowance payments were more restricted. The SLS Loan Program was discontinued on July 1, 1994.

A-4

Interest rates for SLS Loans. The applicable interest rates on SLS Loans made before October 1, 1992, and on SLS Loans originally made at a fixed interest rate, which have been refinanced for purposes of securing a variable interest rate, are identical to the applicable interest rates described for PLUS Loans made before October 1, 1992.

For SLS Loans first disbursed on or after October 1, 1992, but before July 1, 1994, the applicable interest rate is as follows:

Beginning July 1, 2001, the applicable interest rate is variable and is based on the weekly average one-year constant maturity Treasury yield for the last calendar week ending on or before June 26 preceding July 1 of each year, plus 3.1%. The variable interest rate is adjusted annually on July 1. The maximum interest rate is 11%. Prior to July 1, 2001, SLS Loans in this category had interest rates which were based on the 52-week Treasury bill auctioned at the final auction held prior to the preceding June 1, plus 3.1%. The annual (July 1) variable interest rate adjustment was applicable prior to July 1, 2001, as was the maximum interest rate of 11%.

Consolidation Loans

General. The Higher Education Act authorized a program under which certain borrowers could consolidate their various federally insured education loans into a single loan insured and reinsured on a basis similar to Stafford Loans. Consolidation Loans could be obtained in an amount sufficient to pay outstanding principal, unpaid interest, late charges, and collection costs on federally insured or reinsured student loans incurred under the Federal Family Education Loan and Direct Loan Programs, including PLUS Loans made to the consolidating borrower, as well as loans made under the Perkins Loan (formally National Direct Student Loan Program), Federally Insured Student Loan (FISL), Nursing Student Loan (NSL), Health Education Assistance Loan (HEAL), and Health Professions Student Loan (HPSL) Programs. To be eligible for a FFELP Consolidation Loan, a borrower had to:

• have outstanding indebtedness on student loans made under the Federal Family Education Loan Program and/or certain other federal student loan programs; and

• be in repayment status or in a grace period on loans to be consolidated.

Borrowers who were in default on loans to be consolidated had to first make satisfactory arrangements to repay the loans to the respective holder(s) or had to agree to repay the consolidating lender under an income-sensitive repayment arrangement in order to include the defaulted loans in the Consolidation Loan. For applications received on or after January 1, 1993, borrowers could add additional loans to a Consolidation Loan during the 180-day period following the origination of the Consolidation Loan.

A married couple who agreed to be jointly liable on a Consolidation Loan for which the application was received on or after January 1, 1993, but before July 1, 2006, was treated as an individual for purposes of obtaining a Consolidation Loan.

Interest rates for Consolidation Loans. For Consolidation Loans disbursed before July 1, 1994, the applicable interest rate is fixed at the greater of:

9%, or

• The weighted average of the interest rates on the loans consolidated, rounded to the nearest whole percent.

For Consolidation Loans disbursed on or after July 1, 1994, based on applications received by the lender before November 13, 1997, the applicable interest rate is fixed and is based on the weighted average of the interest rates on

the loans consolidated, rounded up to the nearest whole percent.

For Consolidation Loans on which the application was received by the lender between November 13, 1997, and September 30, 1998, inclusive, the applicable interest rate is variable according to the following:

For the portion of the Consolidation Loan which is comprised of FFELP, Direct, FISL, Perkins, HPSL, or NSL loans, the variable interest rate is based on the bond equivalent rate of the 91-day Treasury bills auctioned at the final auction before the preceding June 1, plus 3.1%. The variable interest rate for this portion of the Consolidation Loan is adjusted annually on July 1. The maximum interest rate for this portion of the Consolidation Loan is 8.25%.

A-5

For the portion of the Consolidation Loan which is attributable to HEAL Loans (if applicable), the variable interest rate is based on the average of the bond equivalent rates of the 91-day Treasury bills auctioned for the quarter ending June 30, plus 3.0%. The variable interest rate for this portion of the Consolidation Loan is adjusted annually on July 1. There is no maximum interest rate for the portion of a Consolidation Loan that is represented by HEAL Loans.

For Consolidation Loans on which the application was received by the lender on or after October 1, 1998, the applicable interest rate is determined according to the following:

For the portion of the Consolidation Loan which is comprised of FFELP, Direct, FISL, Perkins, HPSL, or NSL loans, the applicable interest rate is fixed and is based on the weighted average of the interest rates on the non-HEAL loans being consolidated, rounded up to the nearest one-eighth of one percent. The maximum interest rate for this portion of the Consolidation Loan is 8.25%.

For the portion of the Consolidation Loan which is attributable to HEAL Loans (if applicable), the applicable interest rate is variable and is based on the average of the bond equivalent rates of the 91-day Treasury bills auctioned for the quarter ending June 30, plus 3.0%. The variable interest rate for this portion of the Consolidation Loan is adjusted annually on July 1. There is no maximum interest rate for the portion of the Consolidation Loan that is represented by HEAL Loans.

For a discussion of required payments that reduce the return on Consolidation Loans, see “Fees - Rebate fee on Consolidation Loans” in this Appendix.

Interest rate during active duty

The Higher Education Opportunity Act of 2008 revised the Servicemembers Civil Relief Act to include FFEL Program loans. Interest charges on FFEL Program loans are capped at 6% during a period of time on or after August 14, 2008, in which a borrower has served or is serving on active duty in the Armed Forces, National Oceanic and Atmospheric Administration, Public Health Services, or National Guard. The interest charge cap includes the interest rate in addition to any fees, service charges, and other charges related to the loan. The cap is applicable to loans made prior to the date the borrower was called to active duty.

Maximum loan amounts

Each type of loan was subject to certain limits on the maximum principal amount, with respect to a given academic year and in the aggregate. Consolidation Loans were limited only by the amount of eligible loans to be consolidated. PLUS Loans were limited to the difference between the cost of attendance and the other aid available to the student. Stafford Loans, subsidized and unsubsidized, were subject to both annual and aggregate limits according to the provisions of the Higher Education Act.

Loan limits for Subsidized Stafford and Unsubsidized Stafford Loans. Dependent and independent undergraduate students were subject to the same annual loan limits on Subsidized Stafford Loans; independent students were allowed greater annual loan limits on Unsubsidized Stafford Loans. A student who had not successfully completed the first year of a program of undergraduate education could borrow up to \$3,500 in Subsidized Stafford Loans in an academic year. A student who had successfully completed the first year, but who had not successfully completed the second year, could borrow up to \$4,500 in Subsidized Stafford Loans per academic year. An undergraduate student who had successfully completed the first and second years, but who had not successfully completed the remainder of a program of undergraduate education, could borrow up to \$5,500 in Subsidized Stafford Loans per academic year.

Dependent students could borrow an additional \$2,000 in Unsubsidized Stafford Loans for each year of undergraduate study. Independent students could borrow an additional \$6,000 of Unsubsidized Stafford Loans for each of the first two years and an additional \$7,000 for the third, fourth, and fifth years of undergraduate study. For students enrolled in programs of less than an academic year in length, the limits were generally reduced in proportion to the amount by which the programs were less than one year in length. A graduate or professional student could borrow up to \$20,500 in an academic year where no more than \$8,500 was representative of Subsidized Stafford Loan amounts.

The maximum aggregate amount of Subsidized Stafford and Unsubsidized Stafford Loans, including that portion of a Consolidation Loan used to repay such loans, which a dependent undergraduate student may have outstanding is \$31,000 (of which only \$23,000 may be Subsidized Stafford Loans). An independent undergraduate student may have an aggregate maximum of \$57,500 (of which only \$23,000 may be Subsidized Stafford Loans). The maximum aggregate amount of Subsidized Stafford and Unsubsidized Stafford Loans, including the portion of a Consolidation Loan used to repay such loans, for a graduate or professional student,

A-6

including loans for undergraduate education, is \$138,500, of which only \$65,500 may be Subsidized Stafford Loans. In some instances, schools could certify loan amounts in excess of the limits, such as for certain health profession students.

Loan limits for PLUS Loans. For PLUS Loans made on or after July 1, 1993, the annual amounts of PLUS Loans were limited only by the student's unmet need. There was no aggregate limit for PLUS Loans.

Repayment

Repayment periods. Loans made under the Federal Family Education Loan Program, other than Consolidation Loans and loans being repaid under an income-based or extended repayment schedule, must provide for repayment of principal in periodic installments over a period of not less than five nor more than ten years. A borrower may request, with concurrence of the lender, to repay the loan in less than five years with the right to subsequently extend the minimum repayment period to five years. Since the 1998 Amendments, lenders have been required to offer extended repayment schedules to new borrowers disbursed on or after October 7, 1998 who accumulate outstanding Federal Family Education Loan Program Loans of more than \$30,000, in which case the repayment period may extend up to 25 years, subject to certain minimum repayment amounts. Consolidation Loans must be repaid within maximum repayment periods which vary depending upon the principal amount of the borrower's outstanding student loans, but may not exceed 30 years. For Consolidation Loans for which the application was received prior to January 1, 1993, the repayment period cannot exceed 25 years. Periods of authorized deferment and forbearance are excluded from the maximum repayment period. In addition, if the repayment schedule on a loan with a variable interest rate does not provide for adjustments to the amount of the monthly installment payment, the maximum repayment period may be extended for up to three years.

Repayment of principal on a Stafford Loan does not begin until a student drops below at least a half-time course of study. For Stafford Loans for which the applicable rate of interest is fixed at 7%, the repayment period begins between nine and twelve months after the borrower ceases to pursue at least a half-time course of study, as indicated in the promissory note. For other Stafford Loans, the repayment period begins six months after the borrower ceases to pursue at least a half-time course of study. These periods during which payments of principal are not due are the "grace periods."

In the case of SLS, PLUS, and Consolidation Loans, the repayment period begins on the date of final disbursement of the loan, except that the borrower of a SLS Loan who also has a Stafford Loan may postpone repayment of the SLS Loan to coincide with the commencement of repayment of the Stafford Loan.

During periods in which repayment of principal is required, unless the borrower is repaying under an income-based repayment schedule, payments of principal and interest must in general be made at a rate of at least \$600 per year, except that a borrower and lender may agree to a lesser rate at any time before or during the repayment period. However, at a minimum, the payments must satisfy the interest that accrues during the year. Borrowers may make accelerated payments at any time without penalty.

Income-sensitive repayment schedule. Since 1993, lenders have been required to offer income-sensitive repayment schedules, in addition to standard and graduated repayment schedules, for Stafford, SLS, and Consolidation Loans. Beginning in 2000, lenders have been required to offer income-sensitive repayment schedules to PLUS borrowers as well. Use of income-sensitive repayment schedules may extend the maximum repayment period for up to five years if the payment amount established from the borrower's income will not repay the loan within the maximum applicable repayment period.

Income-based repayment schedule. Effective July 1, 2009, a borrower in the Federal Family Education Loan Program or Federal Direct Loan Program, other than a PLUS Loan made to a parent borrower or any Consolidation Loan that

repaid one or more parent PLUS loans, may qualify for an income-based repayment schedule regardless of the disbursement dates of the loans if he or she has a partial financial hardship. A borrower has a financial hardship if the annual loan payment amount based on a 10-year repayment schedule exceeds 15% of the borrower's adjusted gross income, minus 150% of the poverty line for the borrower's actual family size. Interest will be paid by the Secretary of Education for subsidized loans for the first three years for any borrower whose scheduled monthly payment is not sufficient to cover the accrued interest. Interest will capitalize at the end of the partial financial hardship period, or when the borrower begins making payments under a standard repayment schedule. The Secretary of Education will cancel any outstanding balance after 25 years if a borrower who has made payments under this schedule meets certain criteria.

Deferment periods. No principal payments need be made during certain periods of deferment prescribed by the Higher Education Act. For a borrower who first obtained a Stafford or SLS loan which was disbursed before July 1, 1993, deferments are available:

• during a period not exceeding three years while the borrower is a member of the Armed Forces, an officer in the Commissioned Corps of the Public Health Service or, with respect to a borrower who first obtained a student loan

A-7

disbursed on or after July 1, 1987, or a student loan for a period of enrollment beginning on or after July 1, 1987, an active duty member of the National Oceanic and Atmospheric Administration Corps;

during a period not exceeding three years while the borrower is a volunteer under the Peace Corps Act;

during a period not exceeding three years while the borrower is a full-time paid volunteer under the Domestic Volunteer Act of 1973;

during a period not exceeding three years while the borrower is a full-time volunteer in service which the Secretary of Education has determined is comparable to service in the Peace Corp or under the Domestic Volunteer Act of 1970 with an organization which is exempt from taxation under Section 501(c)(3) of the Internal Revenue Code;

during a period not exceeding two years while the borrower is serving an internship necessary to receive professional recognition required to begin professional practice or service, or a qualified internship or residency program;

during a period not exceeding three years while the borrower is temporarily totally disabled, as established by sworn affidavit of a qualified physician, or while the borrower is unable to secure employment because of caring for a dependent who is so disabled;

during a period not exceeding two years while the borrower is seeking and unable to find full-time employment;

during any period that the borrower is pursuing a full-time course of study at an eligible institution (or, with respect to a borrower who first obtained a student loan disbursed on or after July 1, 1987, or a student loan for a period of enrollment beginning on or after July 1, 1987, is pursuing at least a half-time course of study);

during any period that the borrower is pursuing a course of study in a graduate fellowship program;

during any period the borrower is receiving rehabilitation training services for qualified individuals, as defined by the Secretary of Education;

during a period not exceeding six months while the borrower is on parental leave; and

only with respect to a borrower who first obtained a student loan disbursed on or after July 1, 1987, or a student loan for a period of enrollment beginning on or after July 1, 1987, during a period not exceeding three years while the borrower is a full-time teacher in a public or nonprofit private elementary or secondary school in a "teacher shortage area" (as prescribed by the Secretary of Education), and during a period not exceeding one year for mothers, with preschool age children, who are entering or re-entering the work force and who are paid at a rate of no more than \$1 per hour more than the federal minimum wage.

For a borrower who first obtained a loan on or after July 1, 1993, deferments are available:

during any period that the borrower is pursuing at least a half-time course of study at an eligible institution;

during any period that the borrower is pursuing a course of study in a graduate fellowship program;

during any period the borrower is receiving rehabilitation training services for qualified individuals, as defined by the Secretary of Education;

during a period not exceeding three years while the borrower is seeking and unable to find full-time employment; and

during a period not exceeding three years for any reason which has caused or will cause the borrower economic hardship. Economic hardship includes working full time and earning an amount that does not exceed the greater of the federal minimum wage or 150% of the poverty line applicable to a borrower's family size and state of residence. Additional categories of economic hardship are based on the receipt of payments from a state or federal public assistance program, service in the Peace Corps, or until July 1, 2009, the relationship between a borrower's educational debt burden and his or her income.

A-8

A borrower serving on active duty during a war or other military operation or national emergency, or performing qualifying National Guard duty during a war or other military operation or national emergency may obtain a military deferment. Eligible borrowers may receive the deferment for all outstanding Title IV loans in repayment effective October 1, 2007, for all periods of active duty service that include that date or begin on or after that date. The deferment period includes the borrower's service period and 180 days following the demobilization date.

A borrower serving on or after October 1, 2007, may receive up to 13 months of active duty student deferment after the completion of military service if he or she meets the following conditions:

is a National Guard member, Armed Forces reserves member, or retired member of the Armed Forces;

is called or ordered to active duty; and

is enrolled at the time of, or was enrolled within six months prior to, the activation in a program at an eligible institution.

The active duty student deferment ends the earlier of when the borrower returns to an enrolled status, or at the end of 13 months.

PLUS Loans first disbursed on or after July 1, 2008, are eligible for the following deferment options:

A parent PLUS borrower, upon request, may defer the repayment of the loan during any period during which the student for whom the loan was borrowed is enrolled at least half time. Also upon request, the borrower can defer the loan for the six-month period immediately following the date on which the student for whom the loan was borrowed ceases to be enrolled at least half time, or if the parent borrower is also a student, the date after he or she ceases to be enrolled at least half time.

A graduate or professional student PLUS borrower may defer the loan for the six-month period immediately following the date on which he or she ceases to be enrolled at least half time. This option does not require a request and may be granted each time the borrower ceases to be enrolled at least half time.

Prior to the 1992 Amendments, only certain of the deferments described above were available to PLUS and Consolidation Loan borrowers. Prior to the 1986 Amendments, PLUS Loan borrowers were not entitled to certain deferments.

Forbearance periods. The Higher Education Act also provides for periods of forbearance during which the lender, in case of a borrower's temporary financial hardship, may postpone any payments. A borrower is entitled to forbearance for a period not exceeding three years while the borrower's debt burden under Title IV of the Higher Education Act (which includes the Federal Family Education Loan Program) equals or exceeds 20% of the borrower's gross income. A borrower is also entitled to forbearance while he or she is serving in a qualifying internship or residency program, a "national service position" under the National and Community Service Trust Act of 1993, a qualifying position for loan forgiveness under the Teacher Loan Forgiveness Program, or a position that qualifies him or her for loan repayment under the Student Loan Repayment Program administered by the Department of Defense. In addition, mandatory administrative forbearances are provided in exceptional circumstances such as a local or national emergency, a military mobilization, or when the geographical area in which the borrower or endorser resides has been designated a disaster area by the President of the United States or Mexico, the Prime Minister of Canada, or by the governor of a state.

Interest payments during grace, deferment, and forbearance periods. The Secretary of Education makes interest payments on behalf of the borrower for certain eligible loans while the borrower is in school and during grace and deferment periods. Interest that accrues during forbearance periods and, if the loan is not eligible for interest subsidy

payments, during in-school, grace, and deferment periods, may be paid monthly or quarterly by the borrower. Any unpaid accrued interest may be capitalized by the lender.

Fees

Guarantee fee and Federal default fee. For loans for which the date of guarantee of principal was on or after July 1, 2006, a guarantee agency was required to collect and deposit into the Federal Student Loan Reserve Fund a Federal default fee in an amount equal to 1% of the principal amount of the loan. The fee was collected either by deduction from the proceeds of the loan or by payment from other non-Federal sources. Federal default fees could not be charged to borrowers of Consolidation Loans.

A-9

Origination fee. Beginning with loans first disbursed on or after July 1, 2006, the maximum origination fee which could be charged to a Stafford Loan borrower decreased according to the following schedule:

1.5% with respect to loans for which the first disbursement was made on or after July 1, 2007, and before July 1, 2008;

1.0% with respect to loans for which the first disbursement was made on or after July 1, 2008, and before July 1, 2009; and

0.5% with respect to loans for which the first disbursement was made on or after July 1, 2009, and before July 1, 2010.

A lender could charge a lesser origination fee to Stafford Loan borrowers as long as the lender did so consistently with respect to all borrowers who resided in or attended school in a particular state. Regardless of whether the lender passed all or a portion of the origination fee on to the borrower, the lender had to pay the origination fee owed on each loan it made to the Secretary of Education.

An eligible lender was required to charge the borrower of a PLUS Loan an origination fee equal to 3% of the principal amount of the loan. This fee had to be deducted proportionately from each disbursement of the PLUS Loan and had to be remitted to the Secretary of Education.

Lender fee. The lender of any loan made under the Federal Family Education Loan Program was required to pay a fee to the Secretary of Education. For loans made on or after October 1, 2007, the fee was equal to 1.0% of the principal amount of such loan. This fee could not be charged to the borrower.

Rebate fee on Consolidation Loans. The holder of any Consolidation Loan made on or after October 1, 1993, is required to pay to the Secretary of Education a monthly rebate fee. For loans made on or after October 1, 1993, from applications received prior to October 1, 1998, and after January 31, 1999, the fee is equal to 0.0875% (1.05% per annum) of the principal and accrued interest on the Consolidation Loan. For loans made from applications received during the period beginning on or after October 1, 1998, through January 31, 1999, the fee is 0.0517% (0.62% per annum).

Interest subsidy payments

Interest subsidy payments are interest payments paid on the outstanding principal balance of an eligible loan before the time that the loan enters repayment and during deferment periods. The Secretary of Education and the guarantee agencies enter into interest subsidy agreements whereby the Secretary of Education agrees to pay interest subsidy payments on a quarterly basis to the holders of eligible guaranteed loans for the benefit of students meeting certain requirements, subject to the holders' compliance with all requirements of the Higher Education Act. Subsidized Stafford Loans are eligible for interest payments. Consolidation Loans for which the application was received on or after January 1, 1993, are eligible for interest subsidy payments. Consolidation Loans made from applications received on or after August 10, 1993, are eligible for interest subsidy payments only if all underlying loans consolidated were Subsidized Stafford Loans. Consolidation Loans for which the application is received by an eligible lender on or after November 13, 1997, are eligible for interest subsidy payments on that portion of the Consolidation Loan that repaid subsidized Federal Family Education Loan Program Loans or similar subsidized loans made under the Direct Loan Program. The portion of the Consolidation Loan that repaid HEAL Loans is not eligible for interest subsidy, regardless of the date the Consolidation Loan was made.

Special allowance payments

The Higher Education Act provides for special allowance payments (SAP) to be made by the Secretary of Education to eligible lenders. The rates for special allowance payments are based on formulas that differ according to the type of loan, the date the loan was originally made or insured, and the type of funds used to finance the loan (taxable or tax-exempt).

Stafford Loans. The effective formulas for special allowance payment rates for Subsidized Stafford and Unsubsidized Stafford Loans are summarized in the following chart. The T-Bill Rate mentioned in the chart refers to the average of the bond equivalent yield of the 91-day Treasury bills auctioned during the preceding quarter.

A-10

Edgar Filing: NELNET INC - Form 10-K

Date of Loans	Annualized SAP Rate
On or after October 1, 1981	T-Bill Rate less Applicable Interest Rate + 3.5%
On or after November 16, 1986	T-Bill Rate less Applicable Interest Rate + 3.25%
On or after October 1, 1992	T-Bill Rate less Applicable Interest Rate + 3.1%
On or after July 1, 1995	T-Bill Rate less Applicable Interest Rate + 3.1% ⁽¹⁾
On or after July 1, 1998	T-Bill Rate less Applicable Interest Rate + 2.8% ⁽²⁾
On or after January 1, 2000	3 Month Commercial Paper Rate less Applicable Interest Rate + 2.34% ⁽³⁾⁽⁶⁾
On or after October 1, 2007 and held by a Department of Education certified not-for-profit holder or Eligible Lender Trustee holding on behalf of a Department of Education certified not-for-profit entity	3 Month Commercial Paper Rate less Applicable Interest Rate + 1.94% ⁽⁴⁾⁽⁶⁾
All other loans on or after October 1, 2007	3 Month Commercial Paper Rate less Applicable Interest Rate + 1.79% ⁽⁵⁾⁽⁶⁾

⁽¹⁾ Substitute 2.5% in this formula while such loans are in-school, grace, or deferment status

⁽²⁾ Substitute 2.2% in this formula while such loans are in-school, grace, or deferment status.

⁽³⁾ Substitute 1.74% in this formula while such loans are in-school, grace, or deferment status.

⁽⁴⁾ Substitute 1.34% in this formula while such loans are in-school, grace, or deferment status.

⁽⁵⁾ Substitute 1.19% in this formula while such loans are in-school, grace, or deferment status.

⁽⁶⁾ The Military Construction and Veterans Affairs and Related Agencies Appropriations Act of 2012 provides an alternate calculation method that substitutes for 3 Month Commercial Paper Rate "1 Month London Inter Bank Offered Rate (LIBOR) for United States dollars in effect for each of the days in such quarter as compiled and released by the British Banker's Association." This method has to be selected by each lender or beneficial holder before April 1, 2012 and applies to all loans held under the same lender identification number for the quarter beginning April 1, 2012 and all succeeding 3-month periods.

PLUS, SLS, and Consolidation Loans. The formula for special allowance payments on PLUS, SLS, and Consolidation Loans are as follows:

Date of Loans	Annualized SAP Rate
On or after October 1, 1992	T-Bill Rate less Applicable Interest Rate + 3.1%
On or after January 1, 2000	3 Month Commercial Paper Rate less Applicable Interest Rate + 2.64% ⁽¹⁾
PLUS loans on or after October 1, 2007 and held by a Department of Education certified not-for-profit holder or Eligible Lender Trustee holding on behalf of a Department of Education certified not-for-profit entity	3 Month Commercial Paper Rate less Applicable Interest Rate + 1.94% ⁽¹⁾
All other PLUS loans on or after October 1, 2007	3 Month Commercial Paper Rate less Applicable Interest Rate + 1.79% ⁽¹⁾
Consolidation loans on or after October 1, 2007 and held by a Department of Education certified not-for-profit holder or Eligible Lender Trustee holding on behalf of a Department of Education certified not-for-profit entity	3 Month Commercial Paper Rate less Applicable Interest Rate + 2.24% ⁽¹⁾
All other Consolidation loans on or after October 1, 2007	3 Month Commercial Paper Rate less Applicable Interest Rate + 2.09% ⁽¹⁾

⁽¹⁾ The Military Construction and Veterans Affairs and Related Agencies Appropriations Act of 2012 provides an alternate calculation method that substitutes for 3 Month Commercial Paper Rate "1 Month London Inter Bank Offered Rate (LIBOR) for United States dollars in effect for each of the days in such quarter as compiled and released by the

British Banker's Association." This method has to be selected by each lender or beneficial holder before April 1, 2012 and applies to all loans held under the same lender identification number for the quarter beginning April 1, 2012 and all succeeding 3-month periods.

For PLUS and SLS Loans made prior to July 1, 1994, and PLUS loans made on or after July 1, 1998, which bear interest at rates adjusted annually, special allowance payments are made only in quarters during which the interest rate ceiling on such loans operates to reduce the rate that would otherwise apply based upon the applicable formula. See "Interest Rates for PLUS Loans"

A-11

and “Interest Rates for SLS Loans.” Special allowance payments are available on variable rate PLUS Loans and SLS Loans made on or after July 1, 1987, and before July 1, 1994, and on any PLUS Loans made on or after July 1, 1998, and before January 1, 2000, only if the variable rate, which is reset annually, based on the weekly average one-year constant maturity Treasury yield for loans made before July 1, 1998, and based on the 91-day or 52-week Treasury bill, as applicable for loans made on or after July 1, 1998, exceeds the applicable maximum borrower rate. The maximum borrower rate is between 9% and 12% per annum. The portion, if any, of a Consolidation Loan that repaid a HEAL Loan is ineligible for special allowance payments.

Recapture of excess interest. The Higher Education Reconciliation Act of 2005 provides that, with respect to a loan for which the first disbursement of principal was made on or after April 1, 2006, if the applicable interest rate for any three-month period exceeds the special allowance support level applicable to the loan for that period, an adjustment must be made by calculating the excess interest and crediting such amounts to the Secretary of Education not less often than annually. The amount of any adjustment of interest for any quarter will be equal to:

the applicable interest rate minus the special allowance support level for the loan, multiplied by

the average daily principal balance of the loan during the quarter, divided by

four.

Special allowance payments for loans financed by tax-exempt bonds. The effective formulas for special allowance payment rates for Stafford Loans and Unsubsidized Stafford Loans differ depending on whether loans to borrowers were acquired or originated with the proceeds of tax-exempt obligations. The formula for special allowance payments for loans financed with the proceeds of tax-exempt obligations originally issued prior to October 1, 1993 is:

T-Bill Rate less Applicable Interest Rate + 3.5%

2

provided that the special allowance applicable to the loans may not be less than 9.5% less the Applicable Interest Rate. Special rules apply with respect to special allowance payments made on loans

originated or acquired with funds obtained from the refunding of tax-exempt obligations issued prior to October 1, 1993, or

originated or acquired with funds obtained from collections on other loans made or purchased with funds obtained from tax-exempt obligations initially issued prior to October 1, 1993.

Amounts derived from recoveries of principal on loans eligible to receive a minimum 9.5% special allowance payment may only be used to originate or acquire additional loans by a unit of a state or local government, or non-profit entity not owned or controlled by or under common ownership of a for-profit entity and held directly or through any subsidiary, affiliate or trustee, which entity has a total unpaid balance of principal equal to or less than \$100,000,000 on loans for which special allowances were paid in the most recent quarterly payment prior to September 30, 2005. Such entities may originate or acquire additional loans with amounts derived from recoveries of principal until December 31, 2010. Loans acquired with the proceeds of tax-exempt obligations originally issued after October 1, 1993, receive special allowance payments made on other loans. Beginning October 1, 2006, in order to receive 9.5% special allowance payments, a lender must undergo an audit arranged by the Secretary of Education attesting to proper billing for 9.5% payments on only eligible “first generation” and “second generation” loans. First generation loans include those loans acquired using funds directly from the issuance of the tax-exempt obligation. Second-generation loans include only those loans acquired using funds obtained directly from first-generation loans. Furthermore, the lender must certify compliance of its 9.5% billing on such loans with each request for payment.

Adjustments to special allowance payments. Special allowance payments and interest subsidy payments are reduced by the amount which the lender is authorized or required to charge as an origination fee. In addition, the amount of the lender origination fee is collected by offset to special allowance payments and interest subsidy payments. The Higher Education Act provides that if special allowance payments or interest subsidy payments have not been made within 30 days after the Secretary of Education receives an accurate, timely, and complete request, the special allowance payable to the lender must be increased by an amount equal to the daily interest accruing on the special allowance and interest subsidy payments due the lender.
