

TELEMIG CELULAR PARTICIPACOES SA
Form 20-F
June 30, 2005

As filed with the Securities and Exchange Commission on June 30, 2005

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 20-F

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE
ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934 FOR THE FISCAL YEAR ENDED DECEMBER 31, 2004

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from to
Commission File Number 1-14483

TELEMIG CELULAR PARTICIPAÇÕES S.A.

(Exact name of Registrant as specified in its charter)

TELEMIG CELLULAR HOLDING COMPANY

(Translation of Registrant's name into English)

THE FEDERATIVE REPUBLIC OF BRAZIL
(Jurisdiction of incorporation or organization)

SCN Quadra 4, Bloco B, Ed. Centro Empresarial Varig, Torre Oeste, Sala 702-A
70714-000 Brasilia-DF, Brazil
(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act .

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Preferred Shares without par value:	New York Stock Exchange *
Depository Shares, each representing 20,000 Preferred Shares	New York Stock Exchange *

* Not for trading, but only in connection with the registration of American Depositary Shares representing those Preferred Shares, on the New York Stock Exchange.

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

Common Shares, without par value: 130,198,132,862

Preferred Shares, without par value: 219,873,977,832

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark which financial statement item the registrant has elected to follow:

INTRODUCTION

Telemig Celular Participações S.A., a corporation organized under the laws of the Federative Republic of Brazil, is referred to in this annual report as the Registrant. Telemig Celular S.A. is the Registrant's operating subsidiary and is referred to in this annual report as Telemig Celular, and, together with the Registrant, as we, us and our unless the context requires otherwise.

References in this annual report to (i) the *real*, *reais* and R\$ are references to Brazilian *reais* (plural) and the Brazilian *real* (singular), the currency of Brazil, (ii) U.S. dollars, *dollars* and US\$ are references to United States dollars, (iii) preferred shares and common shares are references to the Registrant's authorized and outstanding shares of non-voting preferred shares, designated as *ações preferenciais* and common shares, designated as *ações ordinárias*, in each case without par value, (iv) ADSs are references to the Registrant's American Depositary Shares, each representing 20,000 preferred shares, (v) Commission are to the U.S. Securities and Exchange Commission, (vi) CVM are to the *Comissão de Valores Mobiliários*, the Brazilian securities commission, (vii) Central Bank are to the *Banco Central do Brasil*, the Brazilian Central Bank, (viii) General Telecommunications Law are to *Lei Geral de Telecomunicações*, as amended, which regulates the telecommunications industry in Brazil, (ix) Anatel are to *Agência Nacional de Telecomunicações*, the Brazilian independent telecommunication regulatory agency, and (x) our region means the area covered by our authorizations, including the totality of the state of Minas Gerais.

We are one of the companies formed as a result of the breakup of Telecomunicações Brasileiras S.A. Telebrás, or Telebrás, by the federal government of Brazil in May 1998. Telemig Celular was formed in January 1998 to receive the cellular telecommunications operations of Telecomunicações de Minas Gerais S.A., its predecessor, an operating company controlled by Telebrás. References to Telemig Celular's operations prior to January 1998 are to the cellular operations of its predecessor. See Item 4 Information on the Company Historical Background. We have prepared our consolidated financial statements included in this annual report in conformity with generally accepted accounting principles in the United States, or U.S. GAAP, as at and for the years ended December 31, 2002 and 2003 audited by Ernst & Young Auditores Independentes S/S, Belo Horizonte, Brazil, Independent Auditors, and for the year ended December 31, 2004 audited by PricewaterhouseCoopers Auditores Independentes, Belo Horizonte, Brazil, Independent Auditors.

Unless otherwise specified, data relating to the Brazilian telecommunications industry included in this annual report was obtained from Anatel. The Glossary of Telecommunications Terms that begins on page 75 provides the definition of certain technical terms used in this annual report.

FORWARD-LOOKING STATEMENTS

This annual report contains statements that may constitute forward-looking statements. These include statements regarding our current expectations, intentions and projections about future events and financial trends affecting our business. These statements include, but are not limited to:

- trends affecting our business, financial condition, revenues, results of operations and prospects,
- any statements preceded by, followed by or that include the words believes, expects, predicts, anticipates, intends, estimates, should, may or similar expressions, and
- other statements contained in this annual report regarding matters that are not historical facts.

Because these statements are subject to uncertainty, actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause actual results to differ materially from those contained in forward-looking statements include, but are not limited to:

- the pursuit of business strategies that cause our business, financial condition, revenues, results of operations or prospects to change and acquisitions or dispositions of assets or internal affiliates,
- changes to our ownership structure, management or shareholder composition,
- our migration from the Cellular Mobile Service Contract (*Serviço Móvel Celular*), or SMC, regime to the Personal Mobile Service Contract (*Serviço Móvel Pessoal*), or SMP, regime,
- the negotiation of interconnection agreements,
- new governmental regulation and tax matters,
- inflation and changes in currency exchange rates,
- our ability to sustain or improve our performance,
- expectations and estimates of our management concerning future capital expenditures, other investments to attract and retain subscribers, financial performance, financing plans and the effects of competition,
- new entrants into our area and the intensification of competition in the Brazilian telecommunications industry,
- our ability to use deferred tax assets
- adverse legal or regulatory disputes,
- changes in regional, national and international business and economic conditions, including inflation and currency devaluations,
- incidence of cloning and subscription fraud,
- political, economic, regulatory and demographic developments in Brazil generally and in the region in Brazil where we conduct our business, and
- the factors discussed under Item 3D Risk Factors , which you are urged to carefully review.

You should not place undue reliance on these statements, which speak only as of the date that they were made. These cautions should be considered in connection with any written or oral forward-looking statements that we make.

---------------	---------	---------	---------	---------	---------

(1) For the periods presented, dividends per preferred share were the same as dividends per common share, and they were calculated based upon the number of outstanding shares on the date the dividends were declared.

Exchange Rates

Prior to March 14, 2005, there were two principal legal foreign exchange markets in Brazil:

- the commercial rate exchange market; and
- the floating rate exchange market.

Most trade and financial foreign-exchange transactions were carried out on the commercial rate exchange market. These transactions included the purchase or sale of shares or payment of dividends or interest with respect to shares. Foreign currencies could only be purchased in the commercial exchange market through a Brazilian bank authorized to operate in these markets. In both markets, rates were freely negotiated.

Resolution No. 3.265 by the National Monetary Council, dated March 4, 2005, consolidated the foreign exchange markets into one single foreign exchange market, effective as of March 14, 2005. All foreign exchange transactions are now carried out through institutions authorized to operate in the consolidated market and are subject to registration with the Central Bank's electronic registration system. Foreign exchange rates continue to be freely negotiated, but may be influenced by Central Bank intervention.

Since 1999, the Central Bank has allowed the *real*/U.S. dollar exchange rate to float freely, and during that period, the *real*/U.S. dollar exchange rate has fluctuated considerably. In the past, the Central Bank has intervened occasionally to control unstable movements in foreign exchange rates. We cannot predict whether the Central Bank or the Brazilian government will continue to let the *real* float freely or will intervene in the exchange rate market through a currency band system or otherwise. The *real* may depreciate or appreciate against the U.S. dollar substantially in the future. For more information on these risks, see Risk Factors Risks Relating to Brazil.

The following tables set forth the commercial selling rate, expressed in *reais* per U.S. dollar (R\$/US\$), for the periods indicated.

Year	R\$ per US\$1.00			
	Low	High	Average (1)	Year-End
2000	1.7234	1.9847	1.8348	1.9554
2001	1.9357	2.8007	2.3532	2.3204
2002	2.2709	3.9552	2.9983	3.5333
2003	2.8219	3.6623	3.0600	2.8892
2004	2.6544	3.2051	2.9015	2.6544

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for Offer and Use of Proceeds

Not applicable.

D. Risk Factors

Our business, financial condition and results of operations could be materially and adversely affected by any of the risks below. The trading price of the ADSs could decline due to any one of these risks and you may lose all or part of your investment. The risks described below are those that we currently believe may materially affect us. Additional risks not presently known to us or that we currently deem immaterial may also impair our business.

Risks Relating to Brazil

The Brazilian government has exercised, and continues to exercise, significant influence over the Brazilian economy. Brazilian political and economic conditions have a direct impact on the business, financial condition, revenues, results of operations and the market price of the ADSs and our preferred shares.

In the past, the Brazilian government has intervened in the Brazilian economy and occasionally made drastic changes in policy. The Brazilian government's actions to control inflation and affect other policies have included high interest rates, wage and price controls, currency devaluations, capital controls, and limits on imports, among other actions. Our business, financial condition, revenues, results of operations and prospects may be adversely affected by changes in government policies, as well as general economic factors including:

- currency fluctuations;
- inflation;
- price instability;
- energy policy;
- interest rate increases;
- liquidity of domestic capital and lending markets;
- changes in tax policy; and
- other political, diplomatic, social and economic developments in or affecting Brazil.

Uncertainty over whether the Brazilian government will implement changes in policy or regulation affecting these or other factors in the future may contribute to economic uncertainty in Brazil and to heightened volatility in the

Brazilian securities markets and securities issued abroad that are supported by Brazilian issuers. These and other future developments in the Brazilian economy and governmental policies may adversely affect us and our business and results of operations and may adversely affect the trading price of the ADSs.

Inflation and government efforts to combat inflation may contribute significantly to economic uncertainty in Brazil and could harm our business and the market value of the ADSs.

Brazil has in the past experienced extremely high rates of inflation. More recently, Brazil's annual rate of inflation was 10.0% in 2000, 10.4% in 2001, 25.3% in 2002, 8.7% in 2003 and 12.4% in 2004 (as measured by

Índice Geral de Preços Mercado, or the IGP-M). Inflation, and certain government actions taken to combat inflation, have in the past had significant negative effects on the Brazilian economy. Actions taken to curb inflation, coupled with public speculation about possible future governmental actions, have contributed to economic uncertainty in Brazil and heightened volatility in the Brazilian securities market. Future Brazilian government actions, including interest rate decreases, intervention in the foreign exchange market and actions to adjust or fix the value of the *real* may trigger increases in inflation. If Brazil experiences high inflation in the future, we may not be able to adjust the rates we charge our customers to offset the effects of inflation on our cost structure. Inflationary pressures may also hinder our ability to access foreign financial markets or lead to government policies to combat inflation that could harm our business or adversely affect the market value of our preferred shares and, as a result, the ADSs.

Fluctuations in the value of the real against the value of the U.S. dollar and other foreign currencies may adversely affect our ability to service obligations payable in or pegged to the U.S. dollar or other foreign currencies and could lower the market value of the ADSs and our preferred shares.

As a result of inflationary pressures, among other factors, the Brazilian currency has devalued periodically during the last four decades. Throughout this period, the Brazilian government has implemented various economic plans and utilized a number of exchange rate policies, including sudden devaluations, periodic mini-devaluations during which the frequency of adjustments has ranged from daily to monthly, floating exchange rate systems, exchange controls and dual exchange rate markets. Although over long periods depreciation of the Brazilian currency generally has correlated with the rate of inflation in Brazil, devaluation over shorter periods has resulted in significant fluctuations in the exchange rate between the Brazilian currency and the U.S. dollar and other currencies.

The *real* depreciated against the U.S. dollar by 8.5% in 2000 and by 15.7% in 2001. In 2002, the *real* depreciated 34.3% against the U.S. dollar, due in part to political uncertainty surrounding the Brazilian presidential elections and the global economic slowdown. Although the *real* appreciated 22.3% and 8.8% against the U.S. dollar in 2003 and 2004, respectively, no assurance can be given that the *real* will not depreciate or be devalued against the U.S. dollar again. See Exchange Rates.

Significant costs relating to our network infrastructure and handsets are payable or linked to payment in U.S. dollars. However, other than revenues derived from hedging transactions, all of our revenues are generated in *reais*. If the value of the *real* decreases relative to the U.S. dollar, our debt becomes more expensive to service. Such decreases also make it more costly for us to pay for the U.S. dollar-denominated technology and goods that are necessary to operate our business, and we may be unable to pass the increased costs to our customers. As of December 31, 2004, we had R\$482.8 million in total debt, of which R\$399.7 million was denominated in U.S. dollars and R\$24.6 million was denominated in *reais* but indexed to a foreign currency basket.

Historically, depreciations of the *real* relative to the U.S. dollar have also created additional inflationary pressures in Brazil, and future depreciations could negatively affect us. Depreciations generally curtail access to foreign financial markets and may prompt government intervention, including recessionary governmental policies. Depreciations also reduce the U.S. dollar value of distributions and dividends on the ADSs and the market price of the ADSs.

Deterioration in economic and market conditions in other countries, especially emerging market countries, may adversely affect the Brazilian economy and our business.

The market for securities backed by Brazilian companies is influenced by economic and market conditions in Brazil and, to varying degrees, market conditions in other Latin American and emerging market countries. Although economic conditions in such countries may differ significantly from economic conditions in Brazil, the reaction of investors to developments in these other countries may have an adverse effect on the market value of securities of

Brazilian issuers. Developments or conditions in other emerging market countries have at times significantly affected the availability of credit in the Brazilian economy and resulted in considerable outflows of funds and declines in the amount of foreign currency invested in Brazil. Crises in other emerging market countries may hamper investor enthusiasm for securities of Brazilian issuers, including ours. This could adversely affect the trading price of the ADSs and our preferred shares and could also make it difficult for us to access the capital markets and finance our operations in the future on acceptable terms, or at all.

Risks Relating to the Business and the Brazilian Telecommunications Industry

Extensive government regulation of the telecommunications industry and our operating license may limit our flexibility in responding to market conditions, competition or changes in our cost structure or affect our tariffs.

Our business is subject to extensive government regulation. Anatel, which is the telecommunications industry regulator in Brazil, regulates or influences, among other things:

- licensing;
- tariffs;
- competition;
- service standards; and
- interconnection and settlement arrangements.

Brazil's telecommunications regulatory framework is continuously evolving. The interpretation and enforcement of regulations, the assessment of compliance with regulations and the flexibility of regulatory authorities are all marked by uncertainty. We operate under a license from the Brazilian government, and our ability to retain this license is a precondition to our success. However, in light of the regulatory framework, we cannot assure you that Anatel will not modify the terms of our license adversely. Furthermore, according to the terms of our operating license, we are obligated to meet certain requirements and to maintain minimum quality, coverage and service standards. The quality and coverage standards established by Anatel may require us to make unplanned capital expenditures. Failure by us to comply with these requirements may result in the imposition of fines or other government actions, including the termination of our operating license. Any partial or total revocation of our operating license would have a material adverse effect on our business, financial condition, revenues, results of operations and prospects. In recent years, Anatel has also been reviewing and introducing changes to the framework that applies to interconnection fees among telecommunications service providers in Brazil. Interconnection fees, which are fees charged by telecommunications service providers to each other to interconnect to each others' networks, are an important part of our revenue base. To the extent that changes to the rules governing interconnection fees reduce the amount of interconnection fees we are able to collect, our business, financial condition, revenues, results of operations and prospects could be materially adversely affected.

Our results of operations may be negatively affected by the application to us of the SMP rules.

On February 19, 2004, we signed a contract with Anatel to migrate from the Cellular Mobile Service Contract (*Serviço Móvel Celular*), or SMC, regime to the Personal Mobile Service Contract (*Serviço Móvel Pessoal*), or SMP, regime. The migration has resulted in a number of changes to our operations and our revenue base. One of the consequences of the migration is that our customers are now entitled to select their own long-distance carrier for outbound long distance traffic. Under the SMC regime, our customers were not entitled to select their long-distance carrier and we generated revenues for long distance calls made by our customers by charging our customers directly for those calls. Under the SMP regime, we no longer receive revenues directly from our customers when they make long distance calls. Instead, our customers select and pay directly the long-distance service provider of their choice and we receive interconnection fees from that long-distance service provider. We cannot assure you that the interconnection fees that we will receive from the long-distance service providers selected by our customers under the SMP regime will match the revenues that we received directly from our customers for outbound long-distance traffic under the SMC regime.

The SMP regime also provides for the free negotiation of interconnection fees among certain telecommunications service providers. Under the SMC regime, interconnection fees, which comprise a significant portion of our revenues, were determined based on historical inflation and a variable productivity factor established by Anatel. In the free

negotiation environment of the SMP regime, the interconnection fees we receive from other

wireless telecommunications service providers operating in our area will be determined through direct negotiations with them. We cannot assure you that the interconnection rates we negotiate will be as favorable as those that were previously set by Anatel. If the freely negotiated interconnection fees are less favorable to us, our business, financial condition, revenues, results of operations and prospects will be adversely affected.

In addition, under new bill and keep rules that apply to us, in certain circumstances we do not collect interconnection fees from other wireless telecommunications service providers operating in our area. If the volume of our network's incoming call traffic originating from another wireless carrier's network in our area stays within 10% of the volume of incoming calls to that wireless carrier's network that originate from our network, no interconnection fees will be paid by either carrier. In the second half of 2005, Anatel intends to eliminate the 10% band applicable to the bill and keep rules so that there will be no interconnection fees paid between wireless carriers operating in the same area. Interconnection fees comprise a significant part of our revenues, and the application of the bill and keep rules to our business may have an adverse effect on our financial condition, revenues, results of operations and prospects.

More stringent coverage and service quality standards also apply to carriers operating in the SMP regime as compared to carriers under the SMC regime. In order to comply with these standards, we may have to make unplanned capital expenditures and network upgrades requiring resources that we would otherwise use for other purposes. Failure by us to comply with these coverage and service quality standards may result in the imposition of fines or other government actions, including the termination of our operating license.

It is difficult to predict how technological changes within the wireless telecommunications industry will affect our business.

The global and the Brazilian wireless telecommunications industry is experiencing significant changes, particularly relating to technological development, ongoing improvements in the capacity, quality and data transmission speed of digital technology, shorter development cycles for new products, and changes in end-user needs and preferences. Alternative technologies may be developed to provide services to customers that are superior to those that we are able to provide. The introduction of these new technologies may result in an accelerated erosion of our market share or require us to incur significant capital expenditures in response to competitive pressures that are driven by technological advances. For example, the growing use in Brazil of GSM technology by other wireless service providers and the dwindling supply of TDMA handsets, were among the important factors that prompted us to migrate our network from TDMA to GSM technology. We cannot assure you that similar technology advances in the future will not force us to make additional changes or investments in our network that we are not currently contemplating.

The Brazilian wireless telecommunications industry's landscape is highly competitive and is changing in a way that may adversely affect our market share and our margins.

At the beginning of 1998, we assumed the cellular operations of Telecomunicações de Minas Gerais S.A., a former cellular operator under the government-owned Telebrás System, and we were initially the only cellular operator in our area. Since that time, the emergence of other wireless telecommunications operators in our area has created an intensely competitive environment. The arrival in December 1998 of Maxitel S.A., the B Band frequency range operator primarily owned by Telecom Italia that began operations in our area using TDMA technology under the TIM brand name, and a subsidiary of Tele Norte Leste Participações S.A., or Telemar, the D Band operator that commenced operations in our areas using GSM technology in June 2002 under the brand name Oi, has resulted in the gradual reduction of our market share, which was an estimated 48% at December 31, 2004, as compared to 58% and 64% at December 31, 2003 and 2002, respectively.

Beginning in 2005, we expect that another competitor will commence operations in our area. Claro successfully bid for the E Band frequency in our area in an Anatel auction held in September 2004 and is expected to begin service in

our area in the second half of 2005. The addition of Claro will further intensify competition in our area and our market share may continue to decrease as a result.

The ultimate impact that existing competition and new market entrants will have on our business is not yet clear. Our competitors may be able to offer lower prices than we do and to develop and deploy more rapidly new or improved wireless technologies, services and products. Our responses to the entry of these new competitors may

require us to lower rates or extend higher subsidies to our customers for the acquisition of handsets, thereby adversely affecting our margins.

In addition, market participants in other areas of Brazil may also seek to operate in our area, most likely through acquisitions. Certain of our existing and potential future competitors are larger and have greater financial, marketing and management resources than we do.

We experience a high rate of customer turnover.

We have experienced a customer turnover, or churn rate, that is high in comparison to other service providers in the Brazilian mobile telecommunications industry. The turnover may be voluntary or involuntary, depending on whether the customer freely decides to terminate our services or we terminate the services due to lack of payment. Our average churn rate during the last three years was 3.1% per month in 2002, 2.3% per month in 2003 and 2.6% per month in 2004. To the extent that our competition continues to increase or the Brazilian economy stagnates or falters, our churn rate could increase, negatively affecting our business, financial condition, revenues, results of operations and prospects.

Use of wireless phones may pose health risks.

Media reports have suggested that radio frequency emissions from wireless handsets may be linked to various health problems, including cancer, and may interfere with electronic medical devices, including hearing aids and pacemakers. Although we do not know of any definitive studies showing that radio frequency raises health care concerns, concerns over radio frequency emissions may discourage the use of wireless handsets or expose us to potential litigation, which could have a material adverse effect on our business, financial condition, revenues, results of operations and prospects.

Certain covenants contained in our financial agreements limit our ability to incur indebtedness.

Our financing agreements limit our ability to incur indebtedness above a certain level. As a result, our ability to raise capital above the limits imposed by these agreements may be impaired, which may affect our ability to obtain the resources needed to complete the GSM overlay of our network so as to cover all of the localities in our area. In addition, certain financing agreements of the Company have cross-acceleration clauses.

Risks Related to the ADSs and the Preferred Shares

The relative volatility and illiquidity of the Brazilian securities markets may substantially limit your ability to sell the preferred shares underlying the ADSs at the price and time you desire.

Investing in securities that trade in emerging markets, such as Brazil, often involves greater risk than investing in securities of issuers in the United States, and such investments are generally considered to be more speculative in nature. The Brazilian securities market is substantially smaller, less liquid, more concentrated and can be more volatile than major securities markets in the United States. Accordingly, although you are entitled to withdraw the preferred shares underlying the ADSs from the depository at any time, your ability to sell the preferred shares underlying the ADSs at a price and time at which you wish to do so may be substantially limited. There is also significantly greater concentration in the Brazilian securities market than in major securities markets in the United States. The ten largest companies in terms of market capitalization represented approximately 48% of the aggregate market capitalization of the BOVESPA as of December 31, 2004. The top ten stocks in terms of trading volume accounted for approximately 56%, 53% and 45% of all shares traded on the BOVESPA in 2002, 2003 and 2004, respectively.

Holders of the ADSs and the preferred shares may not receive any dividends.

According to our by-laws, we must generally pay our shareholders at least 25% of our annual net income as dividends, as determined and adjusted under Brazilian GAAP. This adjusted income may be capitalized, used to absorb losses or otherwise appropriated as allowed under the Brazilian corporation law and may not be available to be paid as dividends. We may not pay dividends to our shareholders in any particular fiscal year if our board of directors determines that such distributions would be inadvisable in view of our financial condition.

If you surrender your ADSs and withdraw preferred shares, you risk losing the ability to remit foreign currency abroad and certain Brazilian tax advantages.

As an ADS holder, you will benefit from the electronic certificate of foreign capital registration to be obtained by the custodian for our preferred shares underlying the ADSs in Brazil, which permits the custodian to convert dividends and other distributions with respect to the preferred shares into non-Brazilian currency and remit the proceeds abroad. If you surrender your ADSs and withdraw preferred shares, you will be entitled to continue to rely on the custodian's electronic certificate of foreign capital registration for only five business days from the date of withdrawal. Thereafter, upon the disposition of or distributions relating to the preferred shares, you will not be able to remit abroad non-Brazilian currency unless you obtain your own electronic certificate of foreign capital registration or you qualify under Brazilian foreign investment regulations that entitle some foreign investors to buy and sell shares on Brazilian stock exchanges without obtaining separate electronic certificates of foreign capital registration. If you do not qualify under the foreign investment regulations you will generally be subject to less favorable tax treatment of dividends and distributions on, and the proceeds from any sale of, the preferred shares.

If you attempt to obtain your own electronic certificate of foreign capital registration, you may incur expenses or suffer delays in the application process, which could delay your ability to receive dividends or distributions relating to our preferred shares or the return of your capital in a timely manner. The depository's electronic certificate of foreign capital registration may also be adversely affected by future legislative changes.

Changes in Brazilian tax laws may have an adverse impact on the taxes applicable to a disposition of the ADSs or our preferred shares.

According to Law No. 10,833, enacted on December 29, 2003, the disposition of assets located in Brazil by a non-resident to either a Brazilian resident or a non-resident is subject to taxation in Brazil, regardless of whether the disposition occurs outside or within Brazil. In the event that the disposition of assets is interpreted to include a disposition of the ADSs or our preferred shares, this tax law could result in the imposition of withholding taxes on a disposition of the ADSs or our preferred shares by a non-resident of Brazil to another non-resident of Brazil. Due to the fact that Law No. 10,833 has been recently enacted and no judicial guidance as to its application yet exists, we are unable to predict whether an interpretation applying such tax laws to dispositions of the ADSs or our preferred shares between non-residents could ultimately prevail in the courts of Brazil.

Holders of ADSs may be unable to exercise preemptive rights with respect to our preferred shares.

We may not be able to offer our preferred shares to U.S. holders of ADSs pursuant to preemptive rights granted to holders of our preferred shares in connection with any future issuance of our preferred shares unless a registration statement under the United States Securities Act of 1933, or the Securities Act, is effective with respect to such preferred shares and preemptive rights, or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement relating to preemptive rights with respect to our preferred shares, and we cannot assure you that we will file any such registration statement. If such a registration statement is not filed and an exemption from registration does not exist, The Bank of New York, as depository, will attempt to sell the preemptive rights, and you will be entitled to receive the proceeds of such sale. However, these preemptive rights will expire if the depository does not sell them and U.S. holders of ADSs will not realize any value from the granting of such preemptive rights.

ITEM 4. INFORMATION ON THE COMPANY

We are the leading provider of cellular telecommunications services in the State of Minas Gerais in Brazil. We operate on a frequency referred to as A Band, initially under a concession granted in November 1997 by the federal

government of Brazil. Previously, we operated under a permission granted on April 29, 1993 to our predecessor company, Telecomunicações de Minas Gerais S.A. On February 19, 2004, we signed a contract with Anatel to migrate to the *Serviço Móvel Pessoal*, or SMP, regime from the *Serviço Móvel Celular*, or SMC, regime. Our SMP authorization is for an indeterminate period of time and covers a region that includes 93% of the municipalities and approximately 91% of the population in the State of Minas Gerais. At December 31, 2004, we had 2,777,282 subscribers, representing an estimated market share of 48% in our region, as opposed to 2,321,620 subscribers, or an estimated 58% market share, at December 31, 2003.

The Registrant owns 82.9% of the share capital, including 89.2% of the voting shares, of Telemig Celular, and these shares constitute substantially all of the Registrant's assets, other than cash and cash equivalents. The Registrant relies almost exclusively on dividends from Telemig Celular to meet its cash needs, including cash to pay dividends to its shareholders.

The Registrant's legal and commercial name is Telemig Celular Participações S.A. and it is a corporation (*sociedade anônima*) organized under the laws of the Federative Republic of Brazil. Our headquarters are located at SCN, Quadra 4, Bloco B, Edifício Centro Empresarial Varig, Torre Oeste, Sala 702-A, 70.714 -000 Brasília - DF, Brazil, and our telephone number is 55-61-429-5600. Our agent for service of process in the United States is Puglisi & Associates, located at 850 Library Avenue, Suite 204, P.O. Box 885, Newark, Delaware 19715.

BUSINESS

Our Region

Our authorization area in the State of Minas Gerais covers a region of more than 586,552 square kilometers, which is approximately 7% of Brazil's territory, with a population of approximately 18.8 million people, representing 10.5% of Brazil's population. Minas Gerais is the second most populous state in Brazil, and the third largest in terms of gross domestic product and the fourth largest in terms of geographic area. At December 31, 2004, our region had 23 cities with populations in excess of 100,000 people, including the cities of Belo Horizonte, Contagem, Juiz de Fora and Montes Claros. In 2002, the year for which the latest such information is publicly available, the annual per capita income in Minas Gerais was approximately R\$6,775, and the state generated approximately 9% of Brazil's gross domestic product. Of the 18.8 million inhabitants in our region, approximately 36% use wireless telecommunications services. Our business, financial condition and results of operations depend largely on the performance of the Brazilian economy and the economy of the State of Minas Gerais, in particular. See Item 5A Operating and Financial Review and Prospects Operating Results Overview-Brazilian Political and Economic Environment for a description of the Brazilian economy.

The shaded portion of the following map shows the location of the State of Minas Gerais in Brazil.

Services

We are the leading provider of wireless telecommunications services in Minas Gerais. As of December 31, 2004, we had a market share of 48% in our area, as compared to an estimated market share of 58% and 64% at December 31, 2003 and 2002, respectively. Our digital service uses Time Division Multiple Access, or TDMA, technology; our analog service uses a technology standard called Advanced Mobile Phone Service, or AMPS; and we are in the process of overlaying GSM technology onto our network, which incorporates updated versions of Enhanced Data Rates for Global Evolution, or EDGE, technology for data transmission. We offer digital service to subscribers in all the cities covered in our region, covering over 401 localities. At December 31, 2004, approximately 99.6% of our subscribers received digital service and 95.8% of our wireless traffic was digital. We recognize that adapting our services in response to technology advances is a key factor in maintaining our competitiveness and market leadership position in Minas Gerais, and we are committed to keeping our network and services modern and reliable. In early 2004, we decided to begin the process of transforming our network from a TDMA-based network to a GSM-based network. This process will involve overlaying GSM technology onto our existing network over a three to five year period. Our introduction of GSM/EDGE service for our subscribers will improve data transmission speed and establish a base for the future offering of continuously evolving wireless products and services. In November 2004, we began offering GSM/EDGE technology services in certain parts of our area, expanding our capacity to provide GSM services to up to approximately 572,000 of our subscribers.

We offer a series of services to prepaid and contract subscribers, as well as business solutions to corporate users. One of our innovative rate plans, commercially branded as *Plano Controle*, or Control Plan, caters to a market niche (which includes some of our postpaid and prepaid subscribers) that prefers to pay a set monthly fee for wireless services as long as that fee is set at a low and controlled rate. The *Plano Controle* mixes the best features of prepaid and contract plans. After the monthly amount of fixed minutes is used, no more outgoing calls are allowed. However, the user is still able to receive calls. The user can, at his or her option, recharge his or her phone with extra calling minutes, just as in the prepaid plans. The minutes that are not used can be carried over to the following month. Due to the plan's popularity, in April 2004, we began to offer three new *Plano Controle* options with higher denominations of fixed minutes to our customers.

We also provide value-added services such as fax reception through mobile handsets, voicemail, call forwarding, call waiting and call conferencing, caller line identification and three-way calling. In addition, we provide special services, such as customized ring tones, real time play-by-play of soccer matches, information searches (including accessing bank statements, office or home information), and convenience services, all through the subscriber's mobile handset. We constantly evaluate the readiness of our network to respond to emerging market trends and customer demands for new services. In order to attract subscribers, we sell handsets to customers at or near cost.

Through agreements with other mobile service providers, we offer automatic roaming services throughout Brazil to our subscribers that allows them to make and receive calls while out of our area. We also offer international roaming in countries such as Argentina, Uruguay and the United States through agreements with local mobile service providers based in those countries.

In addition, we provide mobile telecommunications services to subscribers of other wireless service providers while they are in our area. These other service providers are charged by us under roaming agreements for the service provided to their subscribers.

Strategy

Our strategy is to increase our profitability by maintaining our market share of high revenue subscribers, reducing and containing our costs and expanding operations to markets with good prospects. The key elements in implementing this business strategy are to:

- *Effectively manage the migration of our network to GSM technology.* In November 2004, we introduced GSM service to certain parts of our area. This event marked an important stage of the migration of our network from TDMA to GSM technology. The transition from TDMA to GSM technology will continue for an approximately three- to five-year period. We believe that our success to date has been due largely to the reliability and quality of our wireless service. We intend to carefully manage the GSM migration process by paying particular attention to maintaining the quality and reliability of service, preventing service disruptions and containing costs relating to the migration.
- *Retain the quality of our subscriber base by providing the best customer service and service plan options to high revenue users.* Further penetration of the Brazilian wireless market will generally involve the addition of subscribers who will purchase prepaid plans to use a relatively small amount of airtime per month. While we expect to continue to increase our subscriber base and to grow in this segment of the market, we also plan to focus heavily on retaining and building our high revenue subscriber base. We anticipate that our introduction of GSM/EDGE services will help us to attain this objective, as GSM/EDGE wireless features are likely to have their greatest appeal among the postpaid customer segment. We also intend to accomplish this goal by continuing to provide our customers with the best quality of service we can make available to them, including preventing service disruptions and striving to further refine and customize our services to better suit the

individual preferences and spending profiles of our customers.

- *Effectively manage the launch of operations in the Triângulo Mineiro region.* As of December 31, 2004, our authorization to operate as a wireless service provider covered all of the State of Minas Gerais, with the exception of the portion of Minas Gerais referred to as the *Triângulo Mineiro*, which has 1.8 million inhabitants. In September 2004, at an auction conducted by Anatel we successfully bid for the E Band frequency for the *Triângulo Mineiro*. We expect to begin operating in the *Triângulo Mineiro* by the end of the first half of 2005, and our area will then cover all of the State of Minas Gerais. To develop our subscriber base and gain market share in the *Triângulo Mineiro*, we intend to launch our operations there

by emphasizing the quality and reliability of our service and our reputation as the leading wireless service provider in the rest of the State of Minas Gerais.

Subscribers

The following table sets forth information regarding our operating data and subscriber base for the periods indicated within our area.

	Year ended December 31,		
	2002	2003	2004
Contract subscribers	656,791	707,835	756,810
Prepaid subscribers	1,266,065	1,613,785	2,020,472
Total	1,922,856	2,321,620	2,777,282
Net subscriber growth during year	15%	21%	20%
Estimated population of our region at year - end (in millions) ⁽¹⁾	16.4	16.8	17.0
Estimated covered population at year-end (in millions) ⁽²⁾	12.3	13.3	13.4
Percentage of population covered at year-end ⁽³⁾	75%	79%	78%
Penetration at year-end ⁽⁴⁾	15.7%	23.9%	33.9%
Average monthly incoming minutes of use per subscriber:			
Contract subscribers	73	64	66
Prepaid subscribers	53	39	29
Average monthly outgoing minutes of use per subscriber:			
Contract subscribers	102	130	135
Prepaid subscribers	14	11	9
Average monthly revenues per subscriber ⁽⁵⁾			
Contract subscribers	R\$68	R\$79	R\$79
Prepaid subscribers	R\$21	R\$19	R\$15
Total blended average	R\$39	R\$39	R\$34
Cost of acquisition per subscriber	R\$114	R\$117	R\$118
Average monthly churn	3.1%	2.3%	2.6%
Estimated market share	64%	58%	48%

(1) Estimates based on data from Target 2004 (Brasil em Foco).

(2) Estimates by our management of the number of people within our area who can access our signal.

(3) Estimates by our management of the percentage of the population of our area that can access our signal

(4) Estimates by our management of the number of cellular lines in service in our area.

(5) In nominal *reais*, net of value-added taxes.

Contract and Prepaid Market

As of December 31, 2004, we had 2,777,282 subscribers, an increase of 20% over December 31, 2003, and an estimated market share of 48%, compared to an estimated market share of 58% and 64% at December 31, 2003 and 2002, respectively. Our subscriber base consists of (i) contract subscribers, who pay a monthly fee to enroll in one of

our rate plans and who are invoiced monthly after services have been provided to them; and (ii) prepaid subscribers who purchase in advance cards containing a specified number of airtime credits that can be used within the 180-day period after the prepaid card is activated. Our contract subscribers consist primarily of higher income individuals who use their handsets for both personal and business purposes. Our prepaid subscribers are generally younger, have lower income than contract subscribers, and use their handsets more to receive than to place calls.

Our contract subscribers used an average of 201 minutes of airtime per month in 2004, a 4% increase from an average of 194 minutes per month in 2003. Our prepaid subscribers used an average of 38 minutes of airtime per month in 2004, as compared to an average of 50 minutes per month in 2003. Decreases in the average minutes of use per subscriber can be expected in the future as further market penetration adds customers to our subscriber base who had previously not been subscribers due to lower income or less active calling habits, and who generally are prepaid customers who use fewer minutes of airtime per month. Recently, our prepaid subscriber base has grown considerably, increasing by 25% to 2,020,472 at December 31, 2004 from 1,613,785 at December 31, 2003. During that time, our contract subscriber base increased to 756,810 at December 31, 2004 from 707,835 at December 31, 2003. As of December 31, 2004, 73% of our subscribers were prepaid customers and 27% were contract customers, as compared to 70% and 30%, respectively, at December 31, 2003. The average cost of acquiring our subscribers remained relatively stable at R\$118 in 2004, as compared to R\$117 in 2003.

The growth of prepaid services is due to a number of factors, including (i) previous market penetration efforts having already reached substantially all those who fit the profile of contract subscribers; (ii) a calling party pays environment whereby a prepaid subscriber does not incur charges in responding to an incoming call while inside our area; (iii) the ability of subscribers to make collect outgoing calls without incurring charges; and (iv) ease of access to prepaid services because no credit checks are conducted in connection with the provision of prepaid services. We believe that prepaid plans are attractive to a wide range of cellular customers. In addition to helping customers control costs, a prepaid program has no monthly invoice and allows customers to prepay for cellular services in cash. The prepaid market is comprised of customers who generally earn a variable income and prefer not to make a fixed financial commitment, who do not have the credit profile required to purchase a contract plan or who seek cellular services for emergencies or limited use only.

Benefits of an increased prepaid subscriber base include: (i) no billing and collection expenses and no delinquent accounts; (ii) advance receipt of cash from subscribers in exchange for services that may or may not have to be provided, depending upon whether or not the prepaid card is used; and (iii) a lower cost of acquisition for each prepaid subscriber as compared to a contract subscriber due to, among other things, substantially lower subsidies for prepaid subscriber's handsets. However, offsetting these benefits is the fact that prepaid customers generally spend about one-fifth as much as contract customers on cellular services, tend to roam less, and rarely use other value-added services. Most of the revenue generated from the growth of our prepaid subscriber base comes in the form of interconnection fees that we charge when subscribers of other telecommunications operators use our network to make an incoming call to one of our prepaid subscribers.

Despite the growth in the prepaid market, most Brazilian A Band companies, including us, continue to have a lower percentage of prepaid customers than their competitors because A Band companies were the first to offer cellular services after the privatization of the Brazilian wireless sector and were therefore the first to acquire business and higher-income customers, who are generally contract subscribers. However, the growth of the subscriber base of all Brazilian wireless telecommunications service providers, including A Band operators, will likely be predominantly in the prepaid market in the future as most of those who have the profiles of contract subscribers have usually already contracted with a wireless service provider. Further market penetration will largely involve those whose customer profile is better suited to the use of prepaid services.

A prepaid customer is no longer considered a customer when 240 days have elapsed since the customer purchased and activated, or added credit to, his or her last prepaid card. The customer's number is then deactivated, and he or she is considered to have turned over. Usually, prepaid card balances are automatically cancelled if the customer has not activated a new card within 180 days after activation of the previous card. Currently, if a contract subscriber's payment is more than 90 days past due, the subscriber is considered to have turned over, except for the *Plano Controle* subscribers, who are churned if payment is more than 78 days past due.

Churn

We determine annualized churn rates for a given period by dividing the sum of all subscribers disconnected since the beginning of the year by the average number of subscribers at the beginning of each month since the beginning of the year, dividing the product by the number of months in the period to be measured, and multiplying by 12. Churn rates, which measure subscriber turnover, are then expressed as a percentage. Contract subscribers who migrate to prepaid service voluntarily within 30 days of becoming a subscriber are not counted as being churned.

Our average blended annualized churn rate in 2002, 2003 and 2004 was 37%, 28% and 31%, respectively. During 2004, we experienced an increase in the blended annualized churn rate as compared to 2003 as a result of an increase in our prepaid annualized churn rate. This increase was primarily due to the highly competitive environment in our area. The annualized churn rate for contract customers remained stable during 2004.

Network

In early 2004, we decided to begin the process of transforming our network from a TDMA-based network to a GSM-based network. This process will involve overlaying GSM technology onto our existing network over a three to five year period. Our introduction of GSM/EDGE service for our subscribers will enhance their data transmission speed and establishes a base for the future offering of continuously evolving wireless products and services. We made capital expenditures of R\$206 million relating to the GSM network migration during 2004.

During 2005, we expect to make approximately R\$230 million of capital expenditures related to the GSM migration and the expansion of our network into the *Triângulo Mineiro* region.

At December 31, 2004, our TDMA network covered approximately 79% of the population in our area, and consisted of 13 cellular switches and 743 cell sites, unchanged from the scope of our TDMA network at December 31, 2003. Our TDMA network is interconnected directly with the local public fixed-line telephone network in Minas Gerais. Currently, our TDMA switches and cell sites have the capacity to provide services to approximately 2.9 million subscribers. Nortel Networks do Brasil Ltda., a subsidiary of Nortel Networks Limited, is the main supplier of our TDMA network equipment.

In November 2004, we began offering services to subscribers in portions of our area using GSM technology. By December 31, 2004, our GSM network covered 77% of the population in our area, and consisted of 1 cellular switch, 7 base stations controllers and 577 cell sites. Our GSM network is interconnected with other networks through our TDMA network. Currently, our GSM switch and cell sites have the capacity to provide services to approximately 572,000 subscribers. Ericsson Telecomunicações S.A is the main supplier of our GSM network equipment.

In addition to investing in our network in connection with our GSM network migration, we have increased the capacity and improved the quality of our network by investing in existing base stations and by adding more channels. As a result of these measures to improve service quality, our rate of interrupted calls was only 0.99% in 2004, well below the 2% target level set by Anatel. Our blocked call rate remained fairly stable at 0.47% in 2004, as compared to 0.40% in 2003. We are currently in compliance with regulatory obligations relating to quality and reliability of service. See Regulation of the Brazilian telecommunications industry Obligations of telecommunications companies for a description of these obligations.

Billing and Collection

We bill our contract customers through monthly invoices providing details about minutes of calling time and the use of additional services. Six staggered billing cycles are used each month to smooth the billing and collection process. Our billing policy stipulates that if a subscriber's payment is past due and a customer has not responded after receiving a payment request, service is suspended until full payment for all outstanding charges is received. Currently, if a contract subscriber's payment is more than 90 days past due, the subscriber is churned, except for the *Plano Controle* subscribers, who are churned if payment is more than 78 days past due.

Provisions for doubtful accounts were 2.0%, 1.3% and 1.8% of net service revenues in 2002, 2003 and 2004, respectively. We have integrated certain aspects of our billing and collection system with that of our affiliate, Amazônia Celular S.A. This integration is designed to reduce administrative costs by eliminating unnecessary duplication of services.

Fraud Detection and Prevention

Cloning fraud consists of duplicating the cellular signal of a subscriber and it enables the perpetrator of the fraud to make telephone calls using the subscriber's signal. We have implemented a fraud management system designed to monitor calling patterns, making it possible to detect the presence of cloning activities within one or two days after it begins. If part of a fraudulent call is carried by the network of another service provider, we are obligated to pay that service provider the applicable interconnection fee, regardless of whether or not we write off the receivable associated with the call.

Subscription fraud occurs when a person, typically using a fictitious identification and address, obtains mobile telecommunications services with no intention of paying for them and then incurs substantial charges before the

service provider is able to identify the fraud and terminate service. When we discover that a receivable has been generated by subscription fraud, we write off the receivable.

We have implemented fraud detection and prevention measures to reduce fraud-related losses. Fraud detection measures consist of computerized reviews of call records to detect abnormal calling patterns. When abnormal patterns are found, the subscriber is contacted by our fraud control staff and, if cloning has occurred, the subscriber's number or handset is changed. Fraud prevention measures include restrictions on international calls from a given number and restrictions on three-way calling by customers with international direct-dial access. We have also implemented a fraud management system to detect cloning in respect of international calls. We expect

that our migration to GSM technology will reduce our incidence of cloning fraud because GSM technology employs more sophisticated encryption techniques than TDMS technology.

Sales, Marketing and Customer Service

We sell handsets, accessories and calling cards and provide activation services through four primary distribution channels: (i) an extensive network of mostly exclusive independent local distributors; (ii) a network of company-owned stores; (iii) a direct sales force targeting corporate accounts, government accounts and high-volume consumers; and (iv) for prepaid cards, a wide variety of points-of-sale, including supermarkets, lottery ticket stands, newsstands and other retail outlets. The number of points-of-sale for prepaid cards was approximately 20,000 at December 31, 2004, and was relatively unchanged from 2003 and 2002. While operating company-owned stores is the most cost-effective means of distribution in centers with higher populations due to savings on independent distributor commissions, lower sales volumes outside of major urban centers make it more cost-effective to use independent local distributors to avoid the overhead costs associated with operating company-owned stores. We develop customer awareness through marketing and promotion efforts and high-quality customer care, building upon the strength of its brand name to increase consumer awareness and customer loyalty, and advertising through print, radio, television, and sponsoring sports events and outdoor advertising campaigns.

Independent Distributors

Independent distributors sell handsets, accessories and calling cards and provide activation services and sales coverage across our area with minimal capital investment being made or operating expenses being incurred by us. Independent retailers provide customers with the convenience of being accessible from a greater number of locations. Independent distributors are paid a variable commission for each new contract customer they sign up for service, provided that the customer retains and pays for service for at least three months. Independent distributors also receive a variable commission for each new prepaid customer, as well as a mark-up margin on sales of handsets and prepaid card kits. In addition, independent distributors are eligible for bonuses for meeting or exceeding sales targets.

At December 31, 2004, we had 642 independent distributors points-of-sale, located primarily in metropolitan centers, as compared to 576 at December 31, 2003. We have exclusivity arrangements with most of our main distributors. Our exclusive independent retail network includes well-known retail chains, drugstores and supermarkets with well-traveled points-of-sale and active sales promotions. All independent retailers receive marketing support from us to help assure that they maintain specified standards of service and participate in promotions.

Company Stores

We sell telecommunications services, handsets and accessories through company-owned stores located throughout Minas Gerais. These stores are effective in building our image and brand awareness, provide high-quality levels of service, greater accountability and help to ensure consistent customer service. Although the majority of sales at our company-owned stores consist of subscriptions for mobile telecommunications services, the company-owned stores also sell handsets to contract and prepaid customers. At December 31, 2004, we had 15 company-owned stores, the same number of company-owned stores at December 31, 2003.

Distributors and Marketing

We make prepaid cards available at approximately 20,000 points-of-sale located throughout Minas Gerais, including national and regional retail franchise chains, lottery stands, newsstands and banking branches. In addition, we engage in telemarketing and mailing efforts aimed at increasing average revenue per user through the sales of value-added services, directing customers to service plans that best fit their usage patterns, and soliciting potential

customers. We have also implemented a customer rewards program based upon the number of minutes of airtime used and length of time as a customer.

Customer Service

One of our principal goals is to provide our subscribers with excellent customer care. We contact our subscribers six times during their first year of service and ask about their degree of customer satisfaction, if they

have had any service-related problems or questions, and to ensure they are receiving the plans and services that are best suited to their level of usage and preferences. We provide our subscribers with 24-hour customer service to answer questions and resolve service problems through a call center infrastructure that can accommodate up to 17,000 calls per hour during peak hours. Through our customer service attendants, we are able to provide immediate accessibility to customers for requests relating to matters such as reactivation, addition of value-added services and number changes. During 2004, our customer service department answered, on average, approximately 1,428,000 calls per month and responded to an average of 6,172 letters and e-mails per month, as compared to an average of 1,060,000 calls per month and 6,080 letters and e-mails per month in 2003. In 2004, the customer satisfaction rate among our subscribers was 82%, as compared to 84% in 2003, and 76% of all complaints threatening termination of subscription were satisfactorily resolved with the customer deciding to retain his or her subscription, as compared to 78% in 2003.

Sources of Revenues

We generate revenue from (i) usage charges, which include measured service charges for outgoing calls and roaming and other similar charges; (ii) monthly subscription charges; (iii) interconnection fees, which are amounts charged by us to other telecommunications services providers, including other cellular, fixed-line and long-distance service providers, for incoming calls requiring the use of our network; (iv) sales of handsets and accessories; and (v) other charges, such as charges for internet access, text messaging, call forwarding, call waiting and call blocking. The rates that we charge for our service plans and interconnection are subject to regulation by Anatel.

Our migration from the SMC regime to the SMP regime and recent regulatory initiatives have changed the structure of our revenue base. In connection with our transition to the SMP regime, as of August 1, 2004, our customers began to select the long distance service provider for their outgoing long-distance domestic and international calls. Prior to that time, our customers did not choose their long-distance service provider. Instead, we routed their long-distance calls to long-distance carriers and charged our customers directly for long-distance calls pursuant to so called VC2 and VC3 charges, and paid a portion of these VC2 and VC3 charges to the applicable long-distance service provider. Under the SMP regime, we no longer receive VC2 or VC3 revenues from our customers for long distance calls. Instead, we receive interconnection revenues from the long-distance service provider that our customers select to complete their long-distance calls. We cannot assure you that the interconnection fees we receive from the long-distance service providers selected by our customers under the SMP regime will match the VC2 and VC3 charges we received directly from our customers for outbound long-distance traffic under the SMC regime.

In addition, beginning in August 2004, new rules governing the collection of interconnection fees became effective. Under the new rules, which are referred to as the "bill and keep" rules, if the volume of our network's incoming call traffic originating from another wireless carrier's network in our area stays within 10% of the volume of incoming calls to that wireless carrier's network originating from our network, no interconnection fees will be paid by either carrier. In the second half of 2005, Anatel intends to eliminate this 10% band so that no interconnection fees will be paid between wireless carriers operating in the same area. To date, interconnection fees have comprised a significant part of our revenues, and the application of the bill and keep rules to our business may have an adverse effect on our financial condition, revenues, results of operations and prospects.

The SMP regime also provides for the free negotiation of interconnection fees among certain telecommunications service providers. Under the SMC regime, interconnection fees were determined based on historical inflation and a variable productivity factor established by Anatel. In the free negotiation environment of the SMP regime, the interconnection fees we receive from other wireless telecommunications service providers operating in our area will be determined through direct negotiations with them. We cannot assure you that the interconnection rates we negotiate will be as favorable as those that were previously set by Anatel. If the freely negotiated interconnection fees are less

favorable to us, our business, financial condition, revenues, results of operations and prospects will be adversely affected.

Subscriber Rates

Mobile telecommunications services in Brazil are offered on a calling party pays basis, under which the subscriber pays only for calls that he or she places, except that roaming charges are applied to calls received while outside the subscriber's home registration area. In addition, cellular subscribers wishing to place calls may avoid incurring airtime charges by making collect calls because there are no charges for collect calls. Subscriber charges are computed based on factors such as the subscriber's service plan, the location of the party called, the place from

which the call originated and the duration of the call. Subscribers pay for at least 30 seconds of airtime even if their call lasts less than 30 seconds, but they are not required to make any payment if their call lasts less than 3 seconds. After the first 30 seconds of a call have elapsed, we charge subscribers for every 6 seconds of airtime used.

We provide contract services through a variety of rate plans, mostly under the *Ideal* brand name, ranging from plans offering a fixed number of free minutes each month to plans offering rate discounts to subscribers using wireless services during specified times of the day or on weekends. During 2004, we generated approximately 22% of our service revenues from monthly fees in connection with contract service plans, consistent with 2003. We offer four prepaid service plans that are primarily tailored for use during specified times of the day or on weekends. Together, monthly contract service fees and airtime charges for outgoing calls generated 51% of our net service revenues during 2004, in line with 2003.

We also offer our subscribers an internet-related service called *i.telemigcelular*. The *i.telemigcelular* services include communication, news and entertainment services, and internet and remote access to personal computers. The most popular of the *i.telemigcelular* options is the text-messaging option, which is now used by approximately 27% of our digital subscribers. The *i.telemigcelular* service can also be used to participate in chat rooms, customize ring tones and play games. Our internet-related services do not comprise a significant portion of our overall revenues, but have increased from 3% of service revenues in 2003 to 5% of service revenues in 2004.

Roaming Fees

The Company has adopted the bill and keep rule for interconnection charges as of August 1, 2004. The rule establishes that payments between the SMP companies for traffic in the same registration area only occur when the traffic balance between any two companies is either less than 45% or exceeds 55%. As already discussed, current regulation stipulates that the bill and keep rule could change as of June 30, 2005.

We also receive revenues under roaming agreements with other cellular service providers. When a call is made from within our area by a subscriber of another cellular service provider, that service provider pays us for the use of our network. Conversely, when one of our subscribers makes a cellular call outside our of area, we must pay charges the mobile telecommunications service provider in whose area the call originates a roaming fee for the use of that service provider's network. In each of 2003 and 2004, roaming fees accounted for 4% of our net service revenues.

Interconnection Fees

We earn revenues from any call, cellular or fixed-line, originating with another service provider and terminating on the handset of one of our subscribers or a roaming client of another operator traveling within our area. We charge the service provider from whose network the call originates an interconnection fee for every minute our network is used in connection with the call. From February 2003 until January 2004, the interconnection fee we charged was R\$0.3856 per minute, net of taxes. As of February 2004, the interconnection fee increased to R\$0.41611 per minute. We offer the incumbent fixed-line operator in our area a 30% discount on interconnection fees for off-peak calls. Interconnection fees accounted for approximately 37% of our net service revenues in 2004 and 40% in 2003. For recent changes to the collection and setting of interconnection fees, see *Sources of Revenue* above.

Technology

Trends in the choice of technologies implemented or being implemented by other wireless service providers in Brazil and worldwide indicate that the future of wireless service lies with technologies such as GSM and its updated version, UMTS, and CDMA ONE and its updated version, CDMA 2000. Currently, most of our subscribers are still using our TDMA network, which was the dominant wireless technology in Brazil between 1998 and 2002. However,

the availability of TDMA-compatible handsets has diminished significantly in recent years and we expect that customers replacing TDMA handsets will generally migrate to our GSM network. Currently, GSM is emerging as the standard wireless technology in Brazil. By the end of 2004, approximately 24 million wireless subscribers in Brazil were using GSM technology, compared to approximately 23 million using TDMA and approximately 20 million using CDMA. In early 2004, we decided to begin the process of transforming our network from a TDMA-based network to a GSM-based network. This process will involve overlaying GSM technology onto our existing network over a three to five year period. Our introduction of GSM/EDGE service for our subscribers will enhance their data transmission speed and establishes a base for the future offering of continuously evolving wireless products and services. In November 2004, we began offering GSM/EDGE technology services in certain parts of our area, covering approximately 572,000 of our subscribers. We based our decision to migrate to GSM technology on a number of factors, the most important of which included controlling capital expenditures, accommodating subscriber service preferences, evaluating handset subsidies associated with the alternative technologies and negotiating favorable terms with suppliers and with other operators in Brazil for roaming purposes.

Competition

Until May 2002, the only direct competition that we faced in our area came from the B Band frequency range operator in Minas Gerais. The B Band license in our area was granted to Maxitel S.A., a company owned primarily by Telecom Italia, which operates under the TIM brand name. The B Band license agreement covers the entire State of Minas Gerais. TIM operates with GSM and TDMA technologies.

Since June 2002, we have been facing direct competition from an additional wireless telecommunications provider. An auction was held in February 2001 for the D Band frequency range for SMP licenses covering our area. A subsidiary of Tele Norte Leste Participações S.A., or Telemar, a holding company that owns the principal fixed-line service provider in our area, won the bid. Telemar's subsidiary launched its services based on GSM technology on June 24, 2002, using the brand name Oi. As of December 31, 2004, we had an estimated market share of 48%, while TIM and Oi had estimated market shares of 25% and 27%, respectively. As of December 31, 2003, we had an estimated 58% market share, and TIM and Oi had estimated market shares of 23% and 19%, respectively.

Beginning in 2005, we expect that another competitor will commence operations in our area. Claro successfully bid for the E Band frequency in our area in an Anatel auction held in September 2004, and is expected to begin service in our area in the second half of 2005. The addition of Claro will further intensify competition in our area and our market share may continue to decrease as a result.

It is also possible that Anatel may decide in the future to auction authorizations to acquire frequencies to operate so-called third generation, or 3G, wireless telecommunications services in our area.

Despite the increase in direct competition that we face in our area, we believe that we have certain competitive advantages that will help us to maintain our operating performance and market position. We were the first cellular operator in our area following the privatization of the Telebrás System and we were therefore able to establish a strong contract subscriber base and a widely recognized name brand inherited from our predecessor operator that was a part of the Telebrás System. We have been able to build upon that foundation by seeking to understand subscriber needs and preferences in our area and to anticipate subscriber behavior and trends. In addition, we have strong network coverage over the highways in Minas Gerais, spanning 2,500 kilometers. We believe that this feature is important to customers when selecting a wireless service provider. See Item 3D-Risk Factors-The Brazilian wireless telecommunications industry's landscape is highly competitive and is changing in a way that may adversely affect our market share and our margins. We also compete with fixed-line telephone service providers, the most important of which in Minas Gerais is Telemar. We do not believe that fixed-line service providers present a significant threat or new competition in the telecommunications service market. We also compete with other wireless telecommunications services, such as mobile radio, paging and beeper services, which are used in our area as a substitute for cellular telecommunications services because they are generally less expensive. The most significant provider of these services is Nextel. Satellite services, which provide nationwide coverage, are also available in Brazil. Although satellite services have the benefit of covering a much greater area than cellular telecommunications services, they are considerably more expensive than cellular telecommunications services and do not offer comparable coverage inside buildings. As a result, they do not represent an attractive alternative for most wireless customers.

Operating Agreements

Interconnection Agreements

Incumbent fixed-line providers are obliged to provide interconnection services to wireless operators with the incumbent's own installations. We have entered into interconnection agreements with TIM, our B Band competitor, Oi, our D Band competitor, Embratel and Intelig, the two long distance carriers operating in our area, and Telemar and

Vésper S.A., the two local carriers operating in our area. We also expect to enter into an interconnection agreement with Claro in connection with their entry into our area. The terms of these interconnection agreements include provisions for the number of connection points, the method by which signals must be received and transmitted and the costs and fees of interconnection. Network usage fees are also assessed based on the terms of these agreements. See

Regulation of the Brazilian telecommunications industry

Obligations of telecommunications companies Interconnection. For recent changes to the collection and setting of interconnection fees, see Sources of Revenue above.

Roaming Agreements

Roaming services must be made available to other wireless operators upon the request of that operator. Within the State of Minas Gerais, we are a party to an operating agreement with CTBC Celular that allows our subscribers to use CTBC Celular's network and pay as a regular customer of CTBC Celular, without being charged for any roaming fees. We have entered into agreements for automatic roaming with all other A and B Band service providers in Brazil that outside our area for the use of the TDMA networks, and with Amazônia Celular, Claro, TIM and CTBC Celular for the use of their GSM networks. These roaming agreements permit our subscribers to access the networks of other cellular service providers while traveling or roaming outside our area. Conversely, we are required to provide roaming services to subscribers of those wireless operators from outside our area when they are within our area. The agreements require the parties to provide service to roaming subscribers on the same basis as they provide service to their own subscribers and to carry out a monthly reconciliation of roaming subscriber usage charges. The agreements have a three-year term, which is automatically renewable for further one-year terms. We have also entered into international roaming agreements with foreign carriers with TDMA networks that permit our subscribers to use roaming services in Argentina, Uruguay and the United States and that enable subscribers of those carriers to use roaming services in our area, and we have a partnership with Gradiente for roaming services on GSM networks around the world.

Historical Background

Before the incorporation of Telebrás in 1972, there were more than 900 telecommunications companies operating throughout Brazil. Between 1972 and 1975, Telebrás and its operating subsidiaries, collectively the Telebrás System, acquired almost all of the other telephone companies in Brazil and monopolized the provision of public telecommunications services in almost all areas of the country. Beginning in 1995, the federal government initiated a comprehensive reform of Brazil's telecommunications regulatory system. In July 1997, Brazil's National Congress adopted the General Telecommunications Law, which provided for the establishment of a new regulatory framework, the introduction of competition, and the privatization of the Telebrás System.

In January 1998, in preparation for the restructuring and privatization of the Telebrás System, the cellular telecommunications operations of the Telebrás System were spun off into separate companies. In May 1998, the Telebrás System was restructured to form, in addition to Telebrás, twelve new holding companies. Virtually all assets and liabilities of Telebrás, including the shares held by Telebrás in the Telebrás System, were allocated to the new holding companies. The resulting holding companies, together with their respective subsidiaries, consisted of (i) eight cellular holding companies, one in each of eight cellular regions, holding one or more operating companies providing cellular services; (ii) three wireline holding companies, one in each of three wireline regions, holding one or more operating companies providing local and intraregional long-distance services; and (iii) Embratel Participações S.A., a holding company of Telecomunicações Brasileiras S.A. - Embratel, which provides domestic and international long-distance telephone services throughout Brazil.

The Registrant is one of the eight cellular holding companies formed in connection with the Telebrás System's restructuring. In connection with the breakup of Telebrás, the Registrant was allocated all the share capital held by Telebrás in Telemig Celular. In July 1998, the federal government sold substantially all of its shares of the new holding companies, including the Registrant's, to private-sector buyers. The majority of the Registrant's voting shares were purchased by Telpart Participações S.A., see Organizational Structure.

Regulation of the Brazilian Telecommunications Industry

Our business, including the nature of the services we provide and the rates we charge, is subject to comprehensive regulation under the General Telecommunications Law, which was enacted in July 1997. Anatel is the regulatory agency that oversees our activities and enforces the General Telecommunications Law. Anatel is administratively independent and financially autonomous. Anatel has the authority to propose and issue regulations pursuant to the General Telecommunications Law that are legally binding on telecommunications service providers. Before becoming effective, proposed regulations must undergo a period of public comment, which may include public hearings.

Licenses

On February 19, 2004, we signed a contract with Anatel to migrate from the SMC *Serviço Móvel Celular* regime to the SMP- *Serviço Móvel Pessoal* regime, which involves the former SMC concessionaire becoming a party to an authorization contract. An authorization is a permission granted by the public administration under Brazil's private regime, to offer telecommunications services, subject to complying with prescribed network scope and service performance standards. Under the SMP regime, authorizations are granted for an indeterminate period of time, but we will still be required to periodically apply to Anatel for extensions of our right to use our radio frequencies. Our current radio frequency permit expires in 2008. We obtained from Anatel the additional spectrum on the 1,800 MHz and 900 MHz frequency ranges required to complete our migration to GSM technology.

Obligations of Telecommunications Companies

As a telecommunications service provider, we are subject to requirements concerning quality of service and network expansion, as established in applicable regulations and in our authorization agreements. If we fail to meet these obligations we may be fined, subject to a maximum penalty amount, until we are in full compliance with our obligations. While it is possible for an authorization to be revoked for non-compliance with the obligations imposed by its terms, there are no precedents for such a revocation.

Our authorizations impose obligations on us to meet quality of service standards relating to our network's ability to make and receive calls, call failure rates, capacity to handle peak periods, failed interconnection of calls and customer complaints. These quality of service standards are defined by Anatel and information in respect of these standards must be reported by us to Anatel. More stringent coverage and service quality standards apply to carriers operating in the SMP regime as compared to carriers under the SMC regime. In order to comply with these standards, we may have to make additional capital expenditures and network upgrades requiring resources that we would otherwise use for other purposes.

Interconnection

Under the General Telecommunications Law, all mobile telecommunications service providers must provide interconnection upon the request of any other mobile or fixed-line telecommunications service provider. Under the SMP regime, the terms and conditions of the interconnection are freely negotiated between wireless and fixed-line operators, subject to compliance with regulations established by Anatel relating to traffic capacity and interconnection infrastructure that must be made available to requesting parties. Service providers must offer the same tariff to other requesting parties on a nondiscriminatory basis. If the parties cannot reach an agreement on the terms of interconnection, including with respect to the interconnection rates, Anatel will act as the final arbiter. For recent changes to the collection and setting of interconnection fees, see *Sources of Revenue* above.

Rate Regulation

Currently, our ability to adjust rates relating to existing customer service plans is restricted. Most service plans rates may be adjusted on an annual basis to keep in line with inflation. We may introduce new service plans after receiving Anatel's approval. Once these plans become effective, they are thereafter subject to the annual price-cap mechanism. While subscribers cannot be forced to migrate to new plans, existing plans can be terminated after six months' advance notice has been given to all subscribers under the plan being terminated.

Organizational Structure

The Registrant has one subsidiary, Telemig Celular, which is a corporation organized under the laws of the Federative Republic of Brazil. The Registrant owns 82.9% of the share capital, and 89.2% of the voting shares of Telemig Celular.

The Registrant is part of a group of companies controlled by Telpart Participações S.A., a consortium comprised of: (i) Newtel Participações S.A., which owns 51.07% of Telpart, and is controlled indirectly by investment and mutual funds, and several Brazilian pension funds; (ii) TPSA do Brasil Ltda. (TPSA do Brasil), which owns 48.90% of Telpart, and is controlled indirectly by investment and mutual funds; and (iii) others, who own 0.03% of Telpart. See Item 7 Major Shareholders and Related Party Transactions. Telpart Participações S.A. also controls Tele Norte Celular Participações S.A., which is the holding company for Amazônia Celular, a

Brazilian cellular telecommunications services provider that covers the States of Pará, Amazonas, Maranhão, Amapá and Roraima.

Property, Plant and Equipment

Our principal physical properties consist of transmission equipment, switching equipment and base stations. Our headquarters are located in Belo Horizonte, in the State of Minas Gerais. We lease approximately 19,000 square meters of space in Belo Horizonte and 54,000 in the State of Minas Gerais.

At December 31, 2004, we had 13 TDMA cellular switches, 743 TDMA cell sites, 1 GSM cellular switch, 7 GSM base stations controllers and 577 GSM cell sites. Our switches and cell sites have a total capacity of approximately 2.9 million TDMA subscribers and 572,000 GSM subscribers. Nortel Networks do Brasil Ltda. and Ericsson Telecomunicações S.A. are the primary suppliers of our TDMA and GSM network equipment, respectively.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

A. Operating Results

The following discussion should be read in conjunction with our consolidated financial statements and accompanying notes and other information appearing elsewhere in this annual report, and in conjunction with the financial statements included under Item 3A Key information Selected Financial Data. Except as otherwise indicated, all financial information in this annual report has been prepared in accordance with U.S. GAAP and is presented in *reais*. For certain purposes, such as providing reports to our Brazilian shareholders, filing financial statements with the *Comissão de Valores Mobiliários*, or CVM (the Brazilian Securities Commission), and determining dividend payments and other distributions and tax liabilities in Brazil, we have prepared and will continue to be required to prepare financial statements in accordance with applicable Brazilian accounting practices and Brazilian Corporation Law.

Overview

Our results of operations are significantly affected by the following key factors, among others.

Brazilian Political and Economic Environment

As a company with all of its operations currently in Brazil, we are affected by general economic conditions in the country. In particular, we have been affected by overall growth or declines in Brazil's per capita income, the devaluation of the *real*, inflation and measures taken by the Brazilian government to combat inflation, principally through the setting of interest rates. Our business is directly affected by the macroeconomic trends of the global economy in general and the Brazilian economy in particular. If the Brazilian economy enters a period of rising interest rates and continued recession, demand for telecommunications services is likely to be negatively affected. Declines in the value of the *real* would reduce the purchasing power of Brazilian consumers, negatively affecting demand for mobile telecommunications services. *Real* devaluations would also affect our margins by increasing the carrying costs of our U.S. dollar- and other foreign currency-denominated debt and increasing those of our costs and expenses that are linked to the U.S. dollar and other foreign currencies.

Our cash flows and results of operations are affected by currency fluctuations. All of our revenues are denominated in *reais*, but a significant part of our capital expenses and cost of product sales are either payable in or affected by the U.S. dollar, such as those relating to our network infrastructure and handsets. Inflation has also had, and may continue to have, effects on our financial condition and results of operations. Almost all of our operating expenses are

denominated in *reais* and the suppliers and service providers of these expense items generally attempt to increase their prices to reflect Brazilian inflation. However, we may also increase rates charged to customers to reflect Brazilian inflation.

Since our privatization, the economic environment has been volatile with respect to inflation as well as exchange rate variations, and characterized by low growth rates. The growth of the Brazilian economy slowed in 2001 (when real GDP grew by only 1.3%, as compared to 4.4% in 2000). The *real* depreciated by 15.7% against the U.S. dollar during 2001 and inflation was 10.4%, as measured by the IGP-M index, which is the general market price index in Brazil.

Presidential elections were held in Brazil in 2002. The country went through a period of market turmoil in the second half of the year as investors feared that, if elected, the Labor Party led by Luiz Inácio Lula da Silva would change the economic policies of the previous administration. The *real* fluctuated significantly as a result, depreciating by 34.3% during the year and closing at R\$3.5333 to US\$1.00 on December 31, 2002. Inflation for the year, as measured by the IGP-M index, was 25.3% and 12.5% as measured by the IPCA. Real GDP grew by 1.9% .

In 2003, the new government administration largely continued the macroeconomic policies of the previous administration, focusing on fiscal responsibility. Investor confidence rebounded as a result and the *real* appreciated by 22.3% against the U.S. dollar to R\$2.8892 per US\$1.00 at December 31, 2003. The benchmark BOVESPA index rose 97% in 2003. Inflation for the year, as measured by the IGP-M index, which is the general market price index in Brazil, decreased to 8.7% and 9.3% as measured by the IPCA. However, Brazil's real GDP decreased by 0.2% during 2003, largely because the very high interest rates that prevailed at the beginning of 2003 to combat inflationary pressures acted to also constrain economic growth. The Brazilian Central Bank reduced interest rates seven times during 2003, ending at a rate of 16.5% as of December 31, 2003.

During 2004, Brazil's GDP increased 5.2% to US\$559.6 billion and the country achieved a trade surplus of US\$33.7 billion, its highest trade surplus ever. Inflation in 2004, as measured by the IGP-M, was 12.4% and 7.6% as measured by the IPCA. The Brazilian Central Bank's year-end inflation target for each of 2005 and 2006 is 4.5%, based on the IPCA index, within a band of 2.5 and 2.0 percentage points, respectively. Interest rates continued to be high, with the CDI rate averaging 17.8% in 2004. In 2004, the *real* appreciated by 8.8% against the U.S. dollar, reflecting continued investor confidence. On May 31, 2005, the U.S. dollar/*real* exchange rate was R\$2.4038 per US\$1.00.

The following table shows data for GDP, inflation, interest rates, and the U.S. dollar exchange rate for and as at the periods indicated.

	December 31,		
	2002	2003	2004
Real growth in gross domestic product	1.9%	(0.2)%	5.2%
Inflation (IGP-M) ⁽¹⁾	25.3%	8.7%	12.4%
Inflation (IPCA) ⁽²⁾	12.5%	9.3%	7.6%
Depreciation (appreciation) of the <i>real</i> vs.			
U.S. dollar	34.3%	(22.3)%	(8.8)%
CDI rate ⁽³⁾	22.9%	16.8%	17.5%
LIBOR rate ⁽⁴⁾	1.4%	1.1%	1.8%
Period-end exchange rate US\$1.00	R\$3.5333	R\$2.8892	R\$2.6544
Average exchange rate US\$1.00 ⁽⁵⁾	R\$2.9983	R\$3.0600	R\$2.9015

Sources: *Fundação Getúlio Vargas, the Central Bank and Bloomberg*

- (1) Inflation (IGP-M) is the general market price index measured by the *Fundação Getúlio Vargas*.
- (2) Inflation (IPCA) is a broad consumer price index measured by the *Instituto Brasileiro de Geografia e Estatística*.
- (3) The CDI rate is average of daily inter-bank overnight rates in Brazil (accumulated for period-end month, annualized).
- (4) Three-month U.S. dollar LIBOR rate as of the last date of the period. The LIBOR rate is the London inter-bank offer rate, which is the rate applicable to the short-term international inter-bank market.
- (5) Represents the average of the exchange rates on the last day of each month during the period.

Effects of Inflation in Our Results of Operations

After the introduction of the *real* as the Brazilian currency in July 1994, inflation remained under control until January 1999, when it increased due to the devaluation of the *real*. During periods of high inflation, wages in Brazilian currency tend to fall because salaries typically do not increase as quickly as inflation. The effect is a progressive decline in purchasing power of wage earners. The reduction and stabilization of inflation following the implementation of the *real* plan resulted in increased spending on services and goods (including wireless telecommunication services), higher real income growth, increased consumer confidence and the increased availability of credit. It also resulted in relatively higher labor costs. However, if Brazil experiences significant inflation, we may be unable to increase the service rates we charge to our customers in amounts that are sufficient to cover our operating costs, and our business may be adversely affected as a consequence.

The table below shows the Brazilian general price inflation (according to the IGP-M and the IPCA indices) for the years ended December 31, 2000 through 2004:

	Inflation Rate (%) as Measured by IGP-M (1)	Inflation Rate (%) as Measured by IPCA (2)
December 31, 2004	12.4	7.6
December 31, 2003	8.7	9.3
December 31, 2002	25.3	12.5
December 31, 2001	10.4	7.7
December 31, 2000	10.0	6.0

(1) *Source:* IGP-M, as published by the Fundação Getúlio Vargas.

(2) *Source:* IPCA, which is a consumer price index.

Composition of Operating Revenues and Expenses

Operating Revenues

We generate operating revenues from:

- usage charges, which include measured service charges of outgoing calls and roaming and other similar charges, all of which depend upon which service plan has been selected by the customer;
- monthly subscription payments, which depend upon which service plan has been selected by the contract customer;
- network usage fees, which are the amounts charged by us to other cellular (except for the calls under the bill & keep rule) and fixed-line telephone services providers for use of our network by customers of these service providers;
- sales of handsets and accessories; and
- other services and charges.

Unbilled revenues for the few days in between the billing date and month-end are estimated and recognized as revenue during the month in which the service is provided. Revenue from the sales of prepaid cards is recognized as used on a minute-by-minute basis. In Brazil, cellular telecommunications service providers may not charge customers for incoming calls, unless the customer is roaming.

On February 19, 2004, we signed a contract with Anatel to migrate from the Cellular Mobile Service Contract (*Serviço Móvel Celular*), or SMC, regime to the Personal Mobile Service Contract (*Serviço Móvel Pessoal*), or SMP, regime. The migration has resulted in a number of changes to our revenue base. One of the consequences of the migration is that our customers are now entitled to select their own long-distance carrier for outbound long distance traffic. Under the SMC regime, our customers were not entitled to select their long-distance carrier and we generated revenues for long distance calls made by our customers by charging our customers directly for those calls. Under the SMP regime, we no longer receive revenues directly from our customers when they make long distance calls. Instead, our customers select and pay directly the long-distance service provider of their choice and we receive interconnection fees from that long-distance service provider.

The SMP regime also provides for the free negotiation of interconnection fees among certain telecommunications service providers. Under the SMC regime, interconnection fees, which comprise a significant portion of our revenues, were determined based on historical inflation and a variable productivity factor established by Anatel. In the free negotiation environment of the SMP regime, the interconnection fees we receive from other wireless telecommunications service providers operating in our area will be determined through direct negotiations with them.

In addition, under new bill and keep rules that apply to us, in certain circumstances we do not collect interconnection fees from other wireless telecommunications service providers operating in our area. If the volume of our network's incoming call traffic originating from another wireless carrier's network in our area stays within 10% of the volume of incoming calls to that wireless carrier's network that originate from our network, no interconnection fees will be paid by either carrier. In the second half of 2005, Anatel intends to eliminate the 10%

band applicable to the bill and keep rules so that there will be no interconnection fees paid between wireless carriers operating in the same area.

Operating Expenses and Costs

Operating expenses consist of cost of services, selling, general and administrative expenses, bad debt expense and depreciation and amortization. Cost of services consists primarily of fixed costs such as leased line charges, site rental and network maintenance, including overhead, as well as variable costs such as certain interconnection charges and Telecommunication Inspection Fund fees. Cost of goods consists primarily of handsets. Selling, general and administrative expenses consist primarily of salaries, wages and related benefits for administrative personnel, advertising and promotional expenses, distributors' commissions and other overhead expenses. For the purposes of bad debt expense, we maintain an allowance for past-due accounts receivable in an amount equal to our estimate of probable future losses on these accounts, based on historical losses and the current level of overdue accounts receivable. We also immediately write-off any accounts receivable arising from fraud.

As a result of the application of the bill and keep rules relating to interconnection revenues and expenses, the amount of interconnection fees we pay in the future to wireless carriers operating in our area may decrease, along with revenues. The interconnection fees that we pay to fixed line operators are currently being negotiated. We anticipate that upon the completion of these negotiations, the rate of interconnection fees we pay to fixed line carriers will increase in comparison to previous years.

The Effects of the Increase of Our Prepaid Customer Base on Our Results of Operations

Since the inception of our prepaid plans in March 1999, the number of prepaid customers has steadily grown to represent 66%, 70% and 73% of our total customer base at December 31, 2002, 2003 and 2004, respectively. Prepaid customers, on average, have substantially lower minutes of use than contract customers and do not pay monthly fees and, as a result, generate substantially lower average monthly revenues per customer. Prepaid customers use their cellular phones predominantly for incoming calls, so prepaid customer revenues consist primarily of interconnection fees that we receive from other telecommunications companies when one of their customers uses our network to call one of our prepaid customers. We expect that the growth of our customer base will continue to be predominately in the prepaid customer segment.

Consolidation of Operations with Our Affiliate

In order to create operating efficiencies and reduce costs, we are a party to a shared services arrangement with our affiliate, Tele Norte Celular Participações S.A. and its operating subsidiary, Amazônia Celular S.A. Pursuant to this arrangement, various segments of the financial, marketing, call center and human resources departments, as well as portions of the engineering departments of each company are now managed by a single team. During the years ended December 31, 2004, 2003 and 2002, the Company charged Tele Norte Celular Participações S.A. and its subsidiary R\$15,079, R\$12,904 and R\$16,345, respectively.

Regulatory and Competitive Factors

Our business, including the services we provide and the rates we charge, is subject to comprehensive regulation under the General Telecommunications Law. As a result, our business, results of operations, revenue and financial condition could be negatively affected by the actions of the Brazilian authorities, including, in particular, the following:

- delays in the granting of, or the failure to grant, approvals for rate increases;
- the granting of operating licenses in our area; and
- the introduction of new or stricter operational requirements.

We began to face competition in our area in the fourth quarter of 1998 and competition has contributed to declining prices for cellular telecommunications services and increased pressure on operating margins. Our market share, business, financial condition, revenues and results of operations depend significantly on a variety of factors, including:

- our ability to attract new customers;

- our ability to succeed in the technological migration of our network to GSM;
- the response of our customer base to the implementation of the new GSM technology;
- the rate of growth of our customer base;
- the usage and revenue generated from our customers;
- the level of airtime usage;
- equipment prices;
- the rate of churn; and
- our ability to control costs.

Currently, we have two direct competitors in our area, which are Oi and TIM. Our estimated market share in our region decreased to 48% in 2004 from 58% in 2003 and 64% in 2002. A third competitor, Claro, is expected to begin operations in our operating area in the second half of 2005. The extent that increased and ongoing competition will ultimately have on our market share, business, financial condition, revenues and results of operations will depend on a variety of factors that we cannot yet precisely assess, and many of which may be beyond our control.

Taxes on Telecommunications Services

The cost of telecommunications services to customers includes a variety of taxes. The average rate of all such taxes, as a percentage of our gross operating revenues, was approximately 22% in each of 2004, 2003 and 2002. The principal taxes are a state value-added tax, the *Imposto sobre Circulação de Mercadorias e Serviços*, commonly known as the ICMS. The ICMS is a tax that the Brazilian states impose at varying rates on revenues from the sale of goods and services, including telecommunications services. The ICMS rate for domestic telecommunications services in the State of Minas Gerais is 25%.

In June 1998, the governments of the individual Brazilian states approved an agreement to interpret existing Brazilian tax law to apply the ICMS, effective July 1, 1998, to some services to which the ICMS had not previously been applied, including cellular activation and monthly subscription. The agreement also provides that the ICMS may be applied retroactively to activation services rendered during the five years preceding June 30, 1998. See Item 8A Financial Information Consolidated Statements and Other Financial Information Legal Proceedings for a fuller description of these developments.

Other taxes on gross operating revenues include two federal social contribution taxes, the *Programa de Integração Social*, referred to as PIS, and the *Contribuição para Financiamento da Seguridade Social*, known as COFINS, which are imposed on gross revenues derived from telecommunications services at a combined rate of 3.65% .

In addition, the following contributions are imposed on certain telecommunications services revenues:

- *Contribution for the Fund for Universal Access to Telecommunications Services*, or FUST. FUST was established by Law 9,998 of August 17, 2000 to provide resources to cover the cost exclusively attributed to fulfilling obligations of universal access to telecommunications services that cannot be recovered with efficient service exploration or that is not the responsibility of the service provider. Contribution to FUST by all telecommunication services companies started on January 2, 2001 at the rate of 1% of net operating

telecommunication services revenue (excluding interconnection revenues), and it may not be passed on to customers.

- *Contribution for the Fund of Telecommunications Technological Development, or FUNTTEL.* FUNTTEL was established by Law 10,052 of November 28, 2000 in order to stimulate technological innovation, enhance human resources capacity, create employment opportunities and promote access by small- and medium-sized companies to capital resources so as to increase the competitiveness of the Brazilian telecommunications industry. Contribution to FUNTTEL by all telecommunication services companies started on March 28, 2001 at the rate of 0.5% of net operating telecommunication services revenue (excluding interconnection revenues), and it may not be passed on to customers.

We must also pay the Contribution for the Telecommunication Inspection Fund. The Telecommunication Inspection Fund is supported by a tax applicable to telecommunications operators, the Telecommunication Inspection Fund tax, which was established in 1966 to provide financial resources to the Brazilian government for the regulation and inspection of the telecommunications sector. The Telecommunication Inspection Fund tax consists of two types of fees: (i) an installation inspection fee assessed on telecommunications stations (such as a base, a repeater or a mobile station) upon the issuance of their authorization certificates; and (ii) an annual operations inspection fee that is based on the number of authorized stations in operation at the end of the previous calendar year. The amount of the installation inspection fee is a fixed value, depending upon the kind of equipment installed in the authorized telecommunications station. The operations inspection fee equals 50% of the total amount of the installation inspection fee that would have been paid with respect to existing equipment.

Discussion of Critical Accounting Policies

General

The preparation of the consolidated financial statements included in this annual report necessarily involves certain assumptions, which are derived from historical experience and various other factors that we deemed reasonable and relevant. The portrayal of our financial condition and results of operations often requires our management to make judgments regarding the effects on our financial condition and results of operations of matters that are inherently uncertain. Actual results may differ from those estimated under different variables, assumptions or conditions. Note 3 of our consolidated financial statements includes a summary of the significant accounting policies and methods used in the preparation of our consolidated financial statements.

Deferred Taxes

As of December 31, 2004, we had a net deferred tax asset of R\$225.3 million, as compared to R\$216.2 million at December 31, 2003, related to our legal reorganization, tax loss carryforwards and other temporary differences (primarily with respect to provision for contingencies, allowance for doubtful accounts and accrued expenses) that may be used to offset future taxable income.

We regularly review the deferred tax assets for recoverability and establish a valuation allowance, as required, based on our historical taxable income, projected future taxable income, and the expected timing of reversals of temporary differences. If we or one of our subsidiaries operate at a loss or are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates or the time period within which the underlying temporary differences become taxable or deductible, we will evaluate the need to modify or record a valuation allowance against our deferred tax assets. We believe that it is more likely than not that we will use this tax credit against our taxable income in the future.

Long-lived Assets

We consider the effects of obsolescence, competition, changes in technology and other economic factors when assigning useful lives to our operating assets. For example, the results for the years-ended 2001 and 2002 were affected by the acceleration of the depreciation of our billing system, which was replaced in August 2003.

Due to the launch of the new GSM/EDGE network and the migration away from our TDMA network, we decided to further reduce the useful lives of our TDMA network and related equipment. Accordingly, the expected useful lives of these assets were reduced from four to three years, beginning on January 1, 2004. As a result, depreciation and amortization expense increased by 4% to R\$258.0 million in 2004, as compared to R\$248.8 million in 2003.

Changes in the lives of operating assets that have a significant impact on our consolidated financial statements are disclosed whenever they occur.

Contingencies

We do not believe that we are a party to any legal proceedings for which we have not made provisions and that will have a material adverse effect on our consolidated financial position. As discussed in Note 14 of our consolidated financial statements, in December 1998, we were granted an injunction by the Treasury Court of the State of Minas Gerais relating to the application of ICMS to monthly fees, rentals and additional services. We do not believe such services should be subject to ICMS, on the grounds that they do not constitute telecommunications

services. However, each Brazilian state has approved an agreement, effective from July 1, 1998, to apply ICMS to certain services in respect of which ICMS was not previously applied. Some courts in Brazil have upheld the validity of this agreement. We have deposited amounts equal to uncollected ICMS amounts with the applicable courts and provisions have been made in our consolidated financial statements in respect of these amounts.

We recognize the costs of legal defense in the periods incurred. The costs of defending claims are not included in our provisions because legal expenses are generally determined on the basis of success fees.

Results of Operations

The following table shows the components of our net income for the years ended December 31, 2004, 2003 and 2002.

	Year Ended December 31,		
	2004	2003	2002
	(in thousands of reais)		
Net operating revenues:			
Services provided to third parties	1,124,512	1,055,865	930,610
Sale of handsets	93,603	93,250	77,593
	1,218,115	1,149,115	1,008,203
Cost of services	(356,491)	(326,390)	(281,382)
Cost of handsets and accessories	(123,566)	(106,739)	(87,886)
Selling, general and administrative expenses (including cost sharing agreement)	(251,842)	(218,105)	(240,712)
Allowance for doubtful accounts	(20,153)	(13,376)	(18,190)
Other operating income, net	458	968	1,963
Depreciation and amortization	(257,997)	(248,779)	(179,765)
Operating profit	208,524	236,694	202,231
Financial income	150,314	136,391	161,950
Financial expense	(123,957)	(97,060)	(88,137)
Foreign exchange gain (loss), net	33,330	112,764	(249,195)
Income before taxes and minority interest	268,211	388,789	26,849
Taxes on income	(86,210)	(128,786)	(1,135)
Minority interest	(31,406)	(44,420)	(3,474)
Net income and comprehensive income	150,595	215,583	22,240

Results of Operations for Year Ended December 31, 2004 Compared to Year Ended December 31, 2003

Net Operating Revenues

Our service revenues are comprised mainly of monthly fees, service charges from outgoing traffic and interconnection revenues from incoming traffic.

Net revenues increased 6% to R\$1,218.1 million in 2004 from R\$1,149.1 million in 2003. This increase is attributable to the 7% increase in net services revenue to R\$1,124.5 million, as compared to R\$1,055.9 million in 2003. The growth in net services revenue was primarily due to a 20% increase in our customer base from 2,321,620 to 2,777,282 customers. This growth in customer base in turn contributed to a 7% increase in outgoing traffic revenues, and a 5% increase in monthly fees revenues. Additionally, there was a 24% increase in roaming revenues. The increase was partially offset by a 2% decrease in interconnection revenues as a result of the application of the bill and keep rules under the SMP regime.

Revenues from the sale of handsets remained fairly stable at R\$93.6 million in 2004, as compared to R\$93.3 million in 2003. The 63% increase in the number of handsets sold was offset by an increase in handset subsidies.

Cost of Services

Cost of services increased 9% to R\$356.5 million in 2004 from R\$326.4 million in 2003. This increase is mainly attributable to a R\$10.8 million increase in rent and network maintenance, a R\$6.7 million increase in Telecommunication Inspection Fund and other taxes paid due to our larger customer base and a R\$7.9 million increase in interconnection costs. The increase in interconnection costs was a result of a greater volume of outgoing calls that was partially offset by the effect of the application of the bill and keep rules under the SMP regime.

Cost of Handsets and Accessories

Although revenues from the sale of handsets remained fairly stable in 2004, the cost of handsets sold increased 16% to R\$123.6 million in 2004 from R\$106.7 million in 2003, due to the larger number of handsets sold.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased 15% to R\$251.8 million in 2004, as compared to R\$218.1 million in 2003. As a percentage of net services revenue, selling, general and administrative expenses increased to 22% in 2004, as compared to 21% in 2003.

Selling expenses increased 17% to R\$174.3 million in 2004 from R\$148.5 million in 2003. As a percentage of net services revenue, selling expenses increased to 15% in 2004, as compared to 14% in 2003. This increase was primarily the result of higher commissions paid to independent distributors.

General and administrative expenses increased 11% to R\$77.5 million in 2004 from R\$69.6 million in 2003. This increase is primarily attributable to the partial reversal of a contingency provision in respect of ICMS taxes of R\$8.4 million in 2003. As a percentage of net services revenue, general and administrative expenses remained stable at 7% in each of 2004 and 2003.

Allowance for Doubtful Accounts

The allowance for doubtful accounts increased 51% to R\$20.2 million in 2004 from R\$13.4 million in 2003. Expressed as a percentage of net services revenue, the allowance increased slightly to 1.8% in 2004, as compared to 1.3% in 2003. The increase can be explained by deterioration in the profile of our base contract customers.

Other Operating Income, Net

Other net operating income decreased to R\$0.5 million in 2004 from R\$1.0 million in 2003.

Depreciation and Amortization

Depreciation and amortization expense increased 4% to R\$258.0 million in 2004 from R\$248.8 million in 2003. This increase was due to the reduction of the expected useful lives of our TDMA network and related equipment, relating to our migration to GSM technology, from four to three years, beginning on January 1, 2004.

Operating Profit

Operating income decreased to R\$208.5 million in 2004 from R\$236.7 million in 2003 as a result of the factors described above.

Financial Income

Financial income increased 10% to R\$150.3 million in 2004 from R\$136.4 million in 2003. The increase is attributable to a 30% growth in the average balance of our invested cash in 2004.

Financial Expense

Financial expense increased 28% to R\$124.0 million in 2004 from R\$97.1 million in 2003. The increase was directly related to higher negative results of our cross-currency interest rate swap agreements during 2004, which increased to R\$52.0 million in 2004 from R\$28.2 million in 2003, as a result of a decrease in the market prices of our swap contracts. This increase was partially offset by a 27% decrease in our average outstanding indebtedness in 2004.

Foreign Exchange Gain (Loss), Net

As a result of the 8.8% appreciation of the *real* against the U.S. dollar during 2004, we recorded a foreign exchange gain of R\$33.3 million, as compared to a foreign exchange gain of R\$112.8 million during 2003 when the *real* appreciated against the U.S. dollar by 22.3% .

Taxes on Income

Income taxes decreased to R\$86.2 million in 2004, as compared to R\$128.8 million in 2003, as a result of the reduction in income before taxes to R\$268.2 million in 2004 from R\$388.8 million in 2003. The effective tax rate during 2004 was 32%, as compared to 33% during 2003.

Net Income and Comprehensive Income

As a result of the above factors, net income decreased to R\$150.6 million during 2004, as compared to R\$215.6 million in 2003.

Results of Operations for Year Ended December 31, 2003 Compared to Year Ended December 31, 2002

Net Operating Revenues

Our service revenues are comprised mainly of monthly fees, service charges from outgoing traffic and interconnection revenues from incoming traffic. Net revenues increased 14% to R\$1,149.1 million in 2003 from R\$1,008.2 million in 2002. This increase is mostly attributable to the 13% increase in net services revenue to R\$1,055.9 million, as compared to R\$930.6 million in 2002. The growth in net services revenue was primarily due to a 21% increase in our customer base from 1,922,856 to 2,321,620 customers. This growth in customer base in turn contributed to a 22% increase in outgoing traffic revenues, and a 21% increase in monthly fees revenues. In addition, a 22% increase in interconnection rates was authorized by Anatel in February 2003.

Revenues from the sale of handsets rose 20% to R\$93.3 million in 2003 from R\$77.6 million in 2002 due to a 27% increase in the number of handsets sold and an 8% increase in gross additions stemming from the expansion of our customer base, partially offset by an increase in handset subsidies.

Cost of Services

The cost of services increased 16% to R\$326.4 million in 2003 from R\$281.4 million in 2002, primarily as a result of an 18% increase in interconnection fees paid by us to other providers (due to 20% higher outgoing traffic) and higher interconnection rates, as well as a 25% increase in Telecommunication Inspection Fund taxes paid due to our larger customer base.

Cost of Handsets and Accessories

The cost of handsets increased 21% to R\$106.7 million in 2003 from R\$87.9 million in 2002, in line with the increase in revenues from handset sales.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased 10% to R\$218.1 million in 2003, as compared to R\$240.7 million in 2002. As a percentage of net services revenue, selling, general and administrative expenses decreased to

21% in 2003, as compared to 26% in 2002.

Selling expenses decreased 9% to R\$148.5 million in 2003 from R\$162.4 million in 2002. As a percentage of net services revenue, selling expenses fell to 14% in 2003, as compared to 17% in 2002. This decrease was primarily the result of fewer, more focused advertising and promotional campaigns and stable independent distributor commissions.

General and administrative expenses decreased 11% to R\$69.6 million in 2003 from R\$78.3 million in 2002. As a percentage of net services revenue, general and administrative expenses decreased to 7% in 2003, as compared to 8% in 2002. This decrease is primarily attributable to the partial reversal of a contingency provision in respect of ICMS taxes of R\$8.4 million.

Allowance for Doubtful Accounts

The allowance for doubtful accounts decreased 26% to R\$13.4 million in 2003 from R\$18.2 million in 2002. Expressed as a percentage of net services revenue, the allowance fell to 1.3% in 2003, as compared to 2.0% in 2002, due primarily to continued tightening of credit controls, more active collection policies and the growth of our prepaid customer base.

Other Operating Income, Net

Other net operating income decreased to R\$1.0 million in 2003 from R\$2.0 million in 2002.

Depreciation and Amortization

Depreciation and amortization expense increased by 38% to R\$248.8 million in 2003, as compared to R\$179.8 million in 2002. This increase was due to our plan to migrate our technology from TDMA to GSM, as a result of which we decided to reduce the expected useful lives of our TDMA network and related equipment from eight to four years, beginning on January 1, 2003.

Operating Profit

Operating income increased to R\$236.7 million in 2003 from R\$202.2 million in 2002 as a result of the factors described above.

Financial Income

Financial income decreased 16% to R\$136.4 million in 2003 from R\$162.0 million in 2002. This decrease was directly related to the positive results of our cross-currency interest rate swap agreements in 2002, which totaled R\$62.0 million due to the 34.3% devaluation of the *real* against the U.S. dollar in 2002, partially offset by a 22% growth in the average balance of our invested cash.

Financial Expense

Financial expense increased 10% to R\$97.1 million in 2003 from R\$88.1 million in 2002. This increase was directly related to the negative results of our cross-currency interest rate swap agreements during 2003, totaling R\$28.2 million, due to the 22.3% appreciation of the *real* against the U.S. dollar, partially offset by a 13% decrease in our average indebtedness in 2003.

Foreign Exchange Gain (Loss), Net

As a result of the 22.3% appreciation of the *real* against the U.S. dollar during 2003, we recorded a foreign exchange gain of R\$112.8 million, as compared to a R\$249.2 million foreign exchange loss during 2002 when the *real* devalued against the U.S. dollar by 34.3% .

Taxes on Income

Income taxes increased significantly to R\$128.8 million in 2003, as compared to R\$1.1 million in 2002, as a result of the increase in income before taxes to R\$388.8 million in 2003 from R\$26.9 million in 2002. The effective tax rate during 2003 was 33%, as compared to 4% during 2002.

Net Income and Comprehensive Income

As a result of the above factors, net income increased to R\$215.6 million during 2003, as compared to R\$22.2 million in 2002.

B. Liquidity and Capital Resources

General

We have funded our operations and capital expenditures principally from operating cash flows and loans obtained from financial institutions. At December 31, 2004, we had R\$960.5 million in cash and cash equivalents, as compared to R\$642.7 million and R\$586.0 million at December 31, 2003 and 2002, respectively. We regularly

maintain substantial cash and cash equivalents balances in order to be in a position to respond immediately to the changing regulatory and competitive environment in which we operate. Our principal cash requirements include:

- capital expenditures, including those related to the GSM network migration,
- the servicing of our indebtedness,
- the payment of dividends and interest on capital, and
- handset subsidies.

Our primary sources of liquidity have historically been cash flows from operating activities and borrowings. Cash provided by operating activities was R\$483.5 million in 2004, R\$403.7 million in 2003 and R\$353.4 million in 2002. Cash used in financing activities was R\$19.8 million in 2004, R\$288.0 million in 2003 and R\$112.6 million in 2002. In 2004, R\$146.4 million was used for capital expenditures, and R\$61.7 million and R\$73.8 million was used for capital expenditures in 2003 and 2002, respectively. During 2004, R\$44.4 million was paid in dividends and interest on capital, and R\$30.4 million and R\$29.9 million was paid in 2003 and 2002, respectively.

Indebtedness

At December 31, 2004, our total debt was R\$482.8 million, as compared to R\$489.1 million and R\$850.0 million at December 31, 2003 and 2002, respectively. At December 31, 2004, R\$212.4 million (or US\$80.0 million) of our total debt was denominated in U.S. dollars, with interest at an annual rate of 8.75%, R\$187.3 million was denominated in U.S. dollars with interest computed at six-month LIBOR plus an annual rate ranging from 4.875% to 5.4%, and R\$83.1 million was denominated in *reais*, with interest at an annual rate of 5.8% over either (i) the average cost of the BNDES currency basket, or (ii) the long-term interest rate disclosed by the Central Bank (which was 9.75% at December 31, 2004).

At December 31, 2004 and December 31, 2003, we had cross-currency interest rate swap agreements in effect for 52% and 100%, respectively, of our foreign currency indexed debt to mitigate exchange rate fluctuations. Our cross-currency interest rate swap agreements exchange fixed rates (12.3% per annum to 14.9% per annum) over the U.S. dollar variation for an internal floating rate (the interbank deposit rate). At December 31, 2002, we had cross-currency interest rate swap agreements in effect for 78% of our foreign currency-indexed debt to mitigate exchange rate fluctuations.

On January 20, 2004, Telemig Celular issued US\$80 million of 8.75% unsecured senior notes units due 2009. The Telemig Celular note issuance was combined with an issuance by Amazônia Celular of US\$40 million of 8.75% notes due 2009. The Telemig Celular notes and the Amazônia Celular notes may only be transferred together as part of notes units and will not trade separately. The notes units were offered and sold in offshore transactions in accordance with Regulation S under the Securities Act and to qualified institutional buyers (QIBs) in the United States under Rule 144A of the Securities Act. Interest payments on the Telemig Celular notes will be made semi-annually. At December 31, 2004, there was R\$212 million aggregate principal amount of notes outstanding.

Our financial instruments restrict our ability, among other things, to pay certain dividends and distributions, create liens on our assets, enter into related-party transactions, or merge, consolidate or sell assets. Our financial instruments also require us to maintain certain ratios (such as a ratio of net indebtedness to adjusted EBITDA, and a ratio of adjusted EBITDA to net interest expense) and deliver certain financial reports. In addition, certain financing agreements of the Company have cross-acceleration clauses. Since our financing agreements limit our ability to incur indebtedness above a certain level, our ability to raise capital above the limits imposed by such agreements may be

impaired, which may affect our ability to obtain resources needed to switch or upgrade our technology.

Our credit facilities are described under Item 10C Additional Information Material Contracts Material Financing Agreements. In 2002, Telemig breached certain financial covenants contained in a credit agreement with the Brazilian National Economic and Social Development Bank, or BNDES, and a consortium of three Brazilian banks. Waivers were obtained in connection with the covenant breaches. During 2003, Telemig Celular breached certain of its financial covenants contained in a credit agreement with the Export Development Corporation of Canada and other parties. Telemig has since remained in compliance with its financial covenants.

The following table shows our U.S. dollar and non-U.S. dollar-indexed loans for the periods indicated (converted using the exchange rate at the end of the period):

	As of December 31,		
	2002	2003	2004
	(in millions of reais)		
Short-Term Indebtedness Plus Current Portion of Long-Term Indebtedness:			
Non-U.S. Dollar Indexed	R\$58.5	R\$61.6	R\$58.5
U.S. Dollar-Indexed	227.4	140.8	156.4
Total	R\$285.9	R\$202.4	R\$214.9
Long Term Indebtedness:			
Non-U.S. Dollar Indexed	R\$112.1	R\$56.4	R\$-
U.S. Dollar-Indexed	452.0	230.3	267.9
Total	R\$564.1	R\$286.7	R\$267.9
Total Indebtedness	R\$850.0	R\$489.1	R\$482.8

Capital Expenditures

We made R\$306.8 million of capital expenditures in 2004, compared to R\$72.2 million in 2003 and R\$89.3 million in 2002. Capital expenditures priorities in 2004 included the migration of our network from TDMA to GSM technology. We anticipate that our capital expenditures for 2005 will be between R\$350 million and R\$400 million, primarily relating to increasing the capacity of our GSM network and to the start-up our operations in the *Triângulo Mineiro* region. Capital expenditure priorities in 2003 and 2002 included expanding our network capacity, improving the overall service quality of our network, and upgrading of our billing system.

We believe that our capital expenditure requirements can be met through a combination of the proceeds from the issuance of US\$80 million of debt securities by Telemig Celular in January 2004, cash flows from operations, equipment financing from vendors, and credit facilities from export credit agencies and Brazilian and international financial institutions.

C. Research and Development, Patents and Licenses, etc.

We do not conduct any independent research and primarily depend upon the manufacturers of telecommunications products for the development of new hardware.

D. Trend Information

We expect competition in our area to remain strong. Telemar, the principal fixed-line operator in our area, began wireless telecommunications operations during the first half of 2002 through its wireless subsidiary in our area, using the brand name Oi, joining Maxitel S.A., operating under the TIM brand name, as our direct competitor. Beginning in 2005, we expect that another competitor will commence operations in our area. Claro successfully bid for the E Band frequency in our area in an Anatel auction held in September 2004 and is expected to begin service in our area during the second half of 2005. The addition of Claro will further intensify competition in our area and our market share may continue to decrease as a result.

We also expect that the supply of TDMA-compatible handsets will continue to decrease in 2005, resulting in pressure on our TDMA subscriber base to switch to GSM service if these subscribers need to replace their existing TDMA handsets.

E. Off-Balance Sheet Arrangements

We have not engaged in any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

F. Aggregate Contractual Obligations

The following table sets forth the amount in millions of *reais* of our fixed contractual obligations at December 31, 2004:

	Total	Less than 1 year	1-3 years	3-5 years	<u>More than 5 years</u>
Long-Term Debt Obligations	482.8	214.9	55.5	212.4	-
Operating Lease Obligations	67.0	16.8	28.1	9.6	12.5
Purchase Obligations	300.7	300.7	-	-	-
Other Long-Term Liabilities	23.0	-	15.7	7.3	-
Total Contractual Cash Obligations	873.5	532.4	99.3	229.3	12.5

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**A. Directors and Senior Management**

We are managed by our *Conselho de Administração*, or board of directors, and our *Diretoria*, or executive officers.

Board of Directors

Our board of directors is currently comprised of eleven members serving for a term of three years. Our bylaws provide for our board of directors to convene a regular meeting once every three months and special meetings when called by the chairman or by two members of the board of directors.

The following are the current members of our board of directors, and their respective positions and ages:

Name	Position	Age
Arthur Joaquim de Carvalho	Chairman	48
Verônica Valente Dantas	Vice Chairman	49
Rodrigo Bhering Andrade	Director	46
José Wilson da Silva	Director	44
José Leitão Viana	Director	65
Maria Amalia Delfim de Melo Coutrim	Director	47
Danielle Silbergleid Ninio	Director	30
Marcos Nascimento Ferreira	Director	38
Wagner Pinheiro de Oliveira	Director	43
Eleazar de Carvalho Filho	Director	47
Danilo de Siqueira Campos	Director	45

Set forth below are brief biographical descriptions of our directors:

Arthur Joaquim de Carvalho is the chairman of the board of directors of Telemig Celular Participações S.A. and Tele Norte Celular Participações S.A. He has nine years of experience in private equity investments and is currently a partner at Opportunity Equity Partners. Mr. Carvalho was in charge of the investment area of Manoel Joaquim de Carvalho Ltda from 1980 to 1993, and, since the foundation of the Opportunity Group in 1993, he has been one of the main officers of the group. In the past, he also worked with two companies engaged in agribusiness and exports. Mr. Carvalho holds a business administration degree from the Universidade Federal da Bahia, or the Federal University of Bahia.

Verônica Valente Dantas is a partner and managing director of Opportunity Equity Partners. Ms. Dantas is also a director of Tele Norte Celular Participações S.A. Her past experience includes being the managing director of Icatu Empreendimentos e Participações Ltda., an investment company established in Brazil. Ms. Dantas holds a degree in business administration from the Universidade Federal da Bahia, or the Federal University of Bahia.

Rodrigo Bhering Andrade has been a partner of Opportunity Equity Partners since 1997. He was a vice-president in the M&A department for Latin America at J.P. Morgan from 1990 to 1995 and an investment officer at GP Investimentos from 1995 to 1997. His past experience includes working as an associate at two law firms: Pinheiro Neto Advogados and Bingham, Dana & Gould. Mr. Andrade holds a graduate degree from the Universidade de Brasília, or the University of Brasília, and a masters degree from the Yale Law School.

José Wilson da Silva is an employee of Banco do Brasil, where he has been employed since April 1997 and is the director of the Bank Employees Union in Brazil's Federal District. Mr. da Silva is also a member of the Decision-Making Council (*Conselho Deliberativo*) of Caixa de Previdência dos Funcionários do Banco do Brasil (PREVI). Mr. da Silva holds an undergraduate degree in psychology from Brasília University and is currently completing a masters of business administration in social welfare and pension funds management from *Fundação Getúlio Vargas*, or the Getúlio Vargas Foundation.

José Leitão Viana is a member of the board of directors of both Telemig Celular and Tele Norte Celular S.A. and also works as an independent business consultant. He was the chief financial officer of our predecessor, Telecomunicações de Minas Gerais S.A. - Telemig, from 1972 to 1982 and its vice chairman from 1982 to 1985. Mr. Viana worked as the chief investment officer of Fundação de Seguridade Social SISTEL and the chief financial officer of Telebrás from 1985 to 1989. His past experience also includes acting as chief financial officer and member of the boards of directors of several subsidiaries of Telebrás. Mr. Viana holds a degree in economic sciences from the University of the State of Guanabara (currently the University of the State of Rio de Janeiro) and a masters degree in economic engineering and industrial administration from the Universidade Federal do Rio de Janeiro, or the Federal University of Rio de Janeiro.

Maria Amalia Delfim de Melo Coutrim is also a director of Tele Norte Celular Participações S.A., Telemig Celular S.A. and Amazônia Celular S.A. and has been a director and a partner at Opportunity Equity Partners since 1997. Before that, she was a director of Opportunity Asset Management and had previously worked as a director and partner of Banco Icatu from 1986 to 1994. She has a degree in economics from Universidade Federal Rural do Rio de Janeiro, or the Rural Federal University of Rio de Janeiro.

Danielle Silbergleid Ninio has worked as a corporate legal advisor at Opportunity Equity Partners since 1999, and is also a member of the board of directors of Tele Norte Celular Participações S.A. She holds a law degree from the Catholic University of Rio de Janeiro.

Marcos Nascimento Ferreira is also a member of the board of directors of Tele Norte Celular Participações S.A., Telemig Celular S.A. and Amazônia Celular S.A. From 1987 to 1994, Mr. Ferreira worked in several positions for different companies of the OAS Group, including Vega Sopave and Ultratec Engenharia. From 1995 to 1998, he was a director of Pantanal Linhas Aéreas, and, in recent years, he has been an active member of the boards of directors of major telecommunication companies in Brazil, including Telet S.A. and Americel S.A. (1999-2000) and Pegasus S.A. (2000). Mr. Ferreira holds a degree in civil engineering from the Federal University of Bahia, or Universidade Federal da Bahia, as well as a post-graduate degree in business administration from the University of California, Berkeley.

Wagner Pinheiro de Oliveira is an economist and the president of Petros - Fundação Petrobrás de Seguridade Social. In the past, he has worked with Banespa as an investment analyst; was a financial and budget advisor of the Labor Party in the House of Representatives of São Paulo, and was elected the representative of the participants of the Banesprev, a retirement fund administered by Banespa. Mr. Oliveira was a member of the government transition team of President Luiz Inácio Lula da Silva.

Eleazar de Carvalho Filho is an economist and partner of Iposeira Gestão de Ativos and is a member of the boards of directors of São Paulo Alpagatas and Santista Têxtil. He is also a member of the advisory board of ABN AMRO

Brasil Participações Financeira, vice president of the board of trustees of the Brazilian Symphony Orchestra and of the decision-making council of the Association of Friends of the Paço Imperial. In the past, he has been a director and the president of BNDES, president of the UBS Bank in Brazil and worked in the Garantia bank, Alcoa and Crefisul-Citibank. Mr. Carvalho graduated with a Masters Degree in International Relations from Johns Hopkins University.

Danilo de Siqueira Campos is an employee of Banco do Brasil currently assigned to the Brazilian Agricultural Ministry. In the past, Mr. Campos has also acted as a member of the fiscal councils of Coteminas in 2002

and 2003, and Cia Siderúrgica Belgo Mineira in 2004. Mr. Campos holds a law degree from UNIUBE/OAB/UFMG and a MBA in corporate law from the Getúlio Vargas Foundation. He is also has a specialization in agribusiness management from Lavras Federal University.

Executive Officers

The Executive Committee of the Registrant currently consists of three executive officers:

Name	Position	Age	Date Elected
Antônio José Ribeiro dos Santos	Chief Executive Officer	60	08/30/2002
Ricardo Del Guerra Perpetuo	Chief Financial Officer and Responsible for Investor Relations	42	11/04/2004
Aloysio José Mendes Galvão	Chief Human Resources Officer	57	08/16/2001

Set forth below are brief biographical descriptions of the executive officers of the Registrant:

Antônio José Ribeiro dos Santos was appointed as our chief executive officer in August 2002. He is also the chief executive officer of Tele Norte Celular Participações S.A. and works as a part-time professor at the Electrical Engineering Department of the University of Brasília. He was an engineer and manager at Telecomunicações de Brasília S.A. Telebrásília from 1970 to 1983, and held the position of chief engineering officer of the same company from 1983 to 1995. In 1996 and 1997, Mr. Santos served as a senior advisor and steering committee member for certain Brazilian pension funds that were members of a consortium participating in the public bidding for cellular B Band in Brazil. In 1997-1998 Mr. Santos was the chief strategic planning officer of Americel S.A. and in 1998-1999 he served as the executive vice president of Telet S.A. In 1999-2001, he was the vice president for business development of Telemig and Tele Norte Celular Participações S.A. and in 2001-2002 he served as the chief executive officer of Telemig Celular and Amazônia Celular S.A. Mr. Santos past experience includes working as an advisor for the Brazilian Secretary of Information Technology. He holds a degree in Electric Engineering by the University of Brasília, or Universidade de Brasília, in 1969.

Ricardo Del Guerra Perpetuo was appointed as our chief financial officer in November 4, 2004, and has been the chief financial officer of Telemig Celular and our affiliate, Amazônia Celular, since July 2003. Before joining Telemig, he was the chief financial officer of several companies in Brazil, including Sanepar Cia. de Saneamento do Paraná, Método Engenharia S.A. and Civilcorp Engenharia, Construção e Incorporação Ltda. Mr. Perpetuo holds a degree in civil engineering from the Mackenzie University in Brazil and has attended post-graduate studies in business administration at the Getúlio Vargas Foundation.

Aloysio José Mendes Galvão has been our chief human resources officer since August 2001. From 1998 to 2001, Mr. Galvão acted as a human resources consultant to major corporations in Brazil, including Petrobrás, Embraer, Unimed and Nestlé. Mr. Galvão was director of human resources for the Odebrecht Group from 1973 to 1998. During this period, he was involved in several local and international projects. He also worked at *Banco do Estado da Bahia*, or the Bank of the State of Bahia, where he was responsible for the human development area from 1970 to 1973. Mr. Galvão holds a degree in business administration from the *Escola de Administração de Empresas da Bahia* (Business Administration School of Bahia).

The Executive Committee of Telemig Celular currently consists of three executive officers.

Name	Position	Age
------	----------	-----

			Date Elected
Ricardo Grau	Chief Operations Officer	37	12/07/1999
	Chief Financial Officer and Responsible for Investor		
Ricardo Del Guerra Perpetuo	Relations	42	08/14/2003
Marcos Pacheco	Chief Technical Officer	48	01/24/2003

Telemig Celular's Chief Executive Officer position is currently vacant due to the resignation of João Cox Neto on August 11, 2004. Pursuant to the by-laws of Telemig Celular, in the absence a Chief Executive Officer, the principal executive officer is the Chief Operations Officer.

Set forth below are brief biographical descriptions of the executive officers of Telemig Celular who are not also officers of the Registrant.

Marcos Pacheco has worked for seven years with wireless telecommunications. In 1993, when wireless telecommunications were implemented in the state of Minas Gerais, he was responsible for the establishment of the network operation and maintenance structure and also for the activation and operation of the call center project. Mr. Pacheco also worked for 12 years at our predecessor company, Telecomunicações de Minas Gerais S.A. Telemig, where he was responsible for management of the network, the call center and the operation support system development. Mr. Pacheco holds an electric engineering degree and a masters degree in nuclear engineering from the *Universidade Federal de Minas Gerais*, or the Federal University of Minas Gerais.

Ricardo Grau was appointed as Telemig Celular's chief operations officer in December 2003 and oversees operations in Minas Gerais. Prior to this appointment, Mr. Grau had been the director of marketing of Telemig Celular since June 2000. Mr. Grau has 12 years of experience in the management of product marketing and has also held management positions in this capacity for BCP Participações, Gessy Lever and Johnson & Johnson. Mr. Grau graduated with a Business Administration degree from the *Fundação Getúlio Vargas* in São Paulo.

B. Compensation

For the year ended December 31, 2004, the aggregate amount of compensation paid by us to all directors and executive officers was approximately R\$3.9 million. This amount includes salaries of approximately R\$2.3 million and bonuses to executive officers of approximately R\$1.6 million. We also paid R\$0.9 million on behalf of Tele Norte Celular Participações S.A. relating to the compensation of the executive officers who share our management and the management of our affiliates, Tele Norte Celular Participações S.A and Amazônia Celular S.A. We are not required under Brazilian law to disclose on an individual basis the compensation of our directors and executive officers.

We have a yearly bonus program that provides variable compensation to our executive officers upon the achievement of previously stipulated financial and operating performance results. On October 5, 2000, our board of directors approved two executive stock incentive plans, which apply to our executive officers. On December 29, 2003, our board of directors modified one of the stock incentive plans for key executive officers. See [Share Ownership](#) for a description of these plans. We do not have a compensation committee.

C. Board Practices

Our board of directors is responsible for, among other things:

establishing our general business policies;

electing and removing the members of our board of executive officers;

supervising our management and examining our corporate records;

calling shareholders' meetings;

expressing an opinion on the annual report and management's financial statements;

appointing external auditors;

determining the payment of interest on net worth; and

authorizing the purchase of our shares, to the extent permitted by law.

Our board of directors may be composed of a minimum of three and a maximum of 11 directors elected by our shareholders at the annual shareholders meeting. Our board of directors has one chairman and one vice-chairman.

Our board of executive officers is responsible for our day-to-day management. It is composed of three members, one president and two executive officers. We have service contracts with executive officers that provide benefits upon termination of employment.

Our *conselho fiscal*, or fiscal council (board of auditors), was established pursuant to our bylaws, which require us to maintain a fiscal council on a permanent basis. Our fiscal council is a supervisory committee independent from our board of directors and from our independent accountants, and its members are elected by our

shareholders on a yearly basis. The responsibilities of the fiscal council are established by Brazilian Corporation Law and include overseeing the activities of management with respect to compliance with the law and our bylaws, reviewing the annual report submitted for the approval of our shareholders, calling shareholders meetings under certain circumstances and reporting at those meetings. Our fiscal council is made up of the following individuals, each of whom is serving as a member for a one-year term:

Name	Position	Age
Luiz Otávio Nunes West	Chairman	46
Gilberto Braga	Member	44
Augusto Cesar Calazans Lopes	Member	30
Aldo Bastos Alfano	Member	68

D. Employees

At December 31, 2004, we had 2,126 employees, as compared to 1,982 employees at December 31, 2003 and 1,846 employees at December 31, 2002. At December 31, 2004, 51.7% of our employees were employed in customer service, 19.5% in sales and marketing, 10.3% in engineering, 14.4% in administration and 4.2% in information technology. The increase in the number of employees was due to the implementation of our new GSM network and the maintenance of our TDMA network.

Our employees are represented by Sinttel-MG (*Sindicato de Trabalhadores de Telecomunicações de Minas Gerais*), the labor union for telecommunications companies in the State of Minas Gerais. We negotiate a new collective labor agreement every year with each local chapter of Sinttel-MG. We have not experienced any labor strikes since the privatization.

We have implemented a yearly bonus program, designed to stimulate an increase in our operating productivity, which provides variable compensation to employees according to previously specified financial and operating performance goals. The total amount paid in 2005 in connection with this bonus program was R\$15.4 million and the total amount paid in 2004 was R\$10.9 million. Competition has created, and we believe that it will continue to create, pressure on salaries and our ability to hire and retain qualified upper- and mid-level management personnel.

We participate in a pension fund, the *Fundação Sistel de Seguridade Social*, or Sistel, which supplements government-provided retirement benefits. Currently, we make monthly contributions to Sistel equal to 13.5% of the salary of each employee who is a Sistel member. Each member employee also makes a monthly contribution to Sistel based on his or her age and salary. Members of Sistel qualify for full pension benefits after reaching age 57, provided that they have been members of Sistel for at least ten uninterrupted years and have been affiliated with the social security system for at least 35 years. Sistel operates independently from us. At the time of the privatization, our employees had the right to maintain their rights and benefits in Sistel. In May 2004, we introduced a defined contribution plan, except for medical benefits for which there is a defined benefit up to 24 months, for all of our employees. Sistel participants were invited to switch their defined benefits plan to the new defined contribution plan. In this plan, the participants define the percentage of their contribution. We make monthly contributions to Sistel of up to 8% of the employee's salary and each member employee also makes a monthly contribution to Sistel. Members of Sistel qualify for full pension benefits after reaching age 50, provided that they have been members of Sistel for at least ten consecutive years. They do not have to be affiliated with the social security system. See Note 12 to our consolidated financial statements.

E. Share Ownership

The members of our board of directors and our executive officers, on an individual basis and as a group, beneficially own less than 1% of any class of our stock. See Item 7A Major Shareholders and Related Party Transactions Major Shareholders for more information.

On October 5, 2000, our board of directors approved two executive stock incentive plans. The first plan covers certain key executives who may be granted target awards of our shares of common or preferred stock. The awards are earned and shares will be issued only to the extent that we achieve performance goals determined by our board of directors during a five-year performance period. At December 31, 2004, no shares had been granted in connection with this incentive plan. The second plan covers key executives, who also participate in the first plan,

and other employees. Options granted under this plan relate to preferred stock and are exercisable at the market price at the date of the grant. The vesting period is 20% during the second year, 60% during the third year and 100% during the fourth year. As of December 31, 2004, 123,915 options had been granted and none had been exercised under the second plan. The exercise price for the granted options is R\$4.76 per thousand of our preferred shares. The price is updated by the IGP-M inflation index until vesting of the option.

The second stock incentive plan for key employees was modified by our board of directors on December 29, 2003. Today, the plan covers 15 executives. Options granted under this plan relate to preferred stock and are exercisable at the market price at the date of the grant, discounted by 20%. The vesting period is 40% during 2004, 30% during 2005 and 30% during 2006. As of December 31, 2004, 464,583 options had been granted under this plan. The exercise price of the granted options is R\$3.84 per thousand of our preferred shares. The price is updated by the IGP-M inflation index until vesting of the option.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. Major Shareholders

In accordance with our bylaws, we have two classes of capital stock authorized and outstanding: common shares (*ações ordinárias*) and preferred shares (*ações preferenciais*). Each common share entitles its holder to full voting rights at meetings of our shareholders. Our preferred shares have voting rights under limited circumstances. See Item 10B Additional Information Memorandum and Articles of Association Preferred Shares and Common Shares for more information regarding our capital stock and our two classes of shares.

The following table presents information concerning the ownership of common shares by our major shareholders at March 31, 2005. We are not aware of any other shareholder owning more than 5% of our common shares.

Name of Owner	Number of Common Shares Owned	Percentage of Outstanding Common Shares
Telpart Participações S.A	68,590,869,489	52.7
Latinvest Holdings Delaware LLC	9,357,394,538	7.2
Utilitivist II Delaware LLC	8,045,236,002	6.2
Caixa de Previdência dos Funcionários do Banco do Brasil	6,803,198,007	5.2

The Registrant's controlling shareholder is Telpart Participações S.A., or Telpart, which as of May 31, 2005, owns 53.1% of the Registrant's outstanding common shares. As a result of its controlling interest, Telpart has the ability to control the election of the majority of our board of directors, and to direct our operations.

Telpart is a corporation owned by Newtel Participações S.A., or Newtel, which owns approximately 51% of Telpart, and TPSA do Brasil Ltda., or TPSA, which owns approximately 49%. TPSA is controlled by Highlake International Business Company Ltd., or Highlake, which is controlled by Opportunity Fund.

Newtel is a holding company. Fifty-three percent of Newtel is owned by MEM Celular Participações S.A., which is indirectly held by the three mutual funds: Opportunity Fund, Citigroup Venture Capital International Brazil L.P. and Investidores Institucionais FIA. The management of Investidores Institucionais FIA is currently being challenged in a legal proceeding filed by one of its quota holders. Forty-seven percent of Newtel is owned by four Brazilian pension

funds: Fundação 14 de Previdência Privada, TELOS - Fundação Embratel de Seguridade Social, PETROS - Fundação Petrobrás de Seguridade Social and PREVI - Caixa de Previdência dos Funcionários do Banco do Brasil. The relationship among the shareholders of Newtel is governed by a shareholders agreement.

Telpart also owns a controlling interest in our affiliate, Tele Norte Celular Participações S.A., the controlling shareholder of Amazonia Celular S.A., which is the A Band cellular service provider in the north region of Brazil operating in the states of Pará, Amazonas, Maranhão, Amapá and Roraima.

Globalvest Management Company L.P., a fund administrator, is the proxy to a group of private equity investment fund shareholders, including Latinvest Holdings Delaware LLC and Utilitinvest II, which together held approximately 22% of our outstanding voting stock, as of May 31, 2005.

On March 4, 2005, Highlake and Futuretel S.A., which was at the time an entity controlled by Opportunity Fund, CVC/Opportunity Equity Partners L.P. and Investidores Institucionais FIA, announced that they would begin a competitive bidding process for the sale of more than 50% of our voting capital. However, shortly thereafter, International Equity Investments, Inc. replaced the management of CVC/Opportunity Equity Partners L.P. with Citigroup Venture Capital International Brazil LLC. At the same time, the name of the fund was changed to Citigroup Venture Capital International Brazil L.P. After that, an injunction was obtained by International Equity Investments, Inc. to temporarily suspend the competitive bidding process.

On December 28, 1999, our shareholders approved a legal reorganization whereby Telpart contributed assets to us, resulting in future tax benefits. We recorded a deferred tax asset of R\$212.0 million, which will be realized over a period of up to ten years. In accordance with Brazilian Corporation Law, we may issue shares (pro rata both common and preferred) to Telpart for the amount of the tax benefits recognized by us. In addition, minority shareholders are granted preemptive rights. If the minority shareholders do not elect to exercise these rights, the shares will be issued to and subscribed for by Telpart. See Note 8 to the consolidated financial statements for a more detailed description of this transaction.

B. Related Party Transactions

We have entered into transactions with some of our shareholders and other related parties for the provision of certain services. Transactions with related parties are carried out on an arm's-length basis, and are conducted on the same prices, terms and rates that apply to third parties. Our by-laws and applicable Anatel regulations require that any long-term agreement we enter into with related parties must be previously approved by the majority of our voting and non-voting shareholders, with the exclusion of the conflicted party.

Shared Service Agreement

In order to increase efficiency in the allocation of resources, capitalize on synergies, avoid unnecessary duplication of activities and improve operating efficiencies, we are a party to a shared service agreement with Tele Norte Participações S.A. pursuant to which certain costs incurred for the benefit of both companies and their subsidiaries are allocated to each company based on criteria designed to reflect the actual amount of use by each company. The costs allocated under this shared service agreement relate primarily to personnel, marketing and outside consulting fees. See Note 11 to our consolidated financial statements.

Interconnection

Incumbent fixed-line providers are obliged to provide interconnection services to wireless operators with the incumbent's own installations. We have entered into interconnection agreements with a number of other telecommunications operators in Brazil, including Brasil Telecom and Amazônia Celular S.A., and the local carriers operating in our area. The terms of these interconnection agreements include provisions for the number of connection points, the method by which signals must be received and transmitted and the costs and fees of interconnection. Network usage fees are also assessed based on the terms of these agreements. We have also entered into an agreement with Brasil Telecom under which our subscribers pay a lower rate to use long distance services offered by Brasil Telecom.

Roaming Agreements

We have entered into roaming agreements with all other A and B Band services providers outside our region and we have also signed agreements with all other GSM cellular operators in Brazil, including Brasil Telecom and Amazônia Celular S.A., to provide GSM roaming for our subscribers,

Service Agreement

On June 30, 2001, we entered into a service agreement with Amazônia Celular S.A. and LHS do Brasil Ltda under which Sema, a subsidiary of LHS do Brasil Ltda., licensed a limited right to use certain of its software, together with software produced by third parties, to Telemig Celular and Amazônia Celular S.A. and further agreed

to perform specified services in connection with its proprietary software and the third party software. The provision of these services ended in February 2004.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Financial Statements and Other Financial Information

The information included in Item 18 of this annual report is referred to and incorporated by reference into this Item 8A.

Legal Proceedings

Litigation Relating to the Breakup of Telebrás

The breakup of Telebrás is the subject of several lawsuits in which the plaintiffs have requested, and in certain cases obtained, preliminary injunctions against the breakup. All of these preliminary injunctions have been subsequently quashed by decisions of the relevant federal court, but several of these decisions are currently on appeal.

These lawsuits are based on a number of legal theories, the principal among them being:

- Brazil's federal constitution requires that the creation of the 12 holding companies spun-off from Telebrás be specifically authorized by the Telecommunications Law;
- the Telebrás shareholders' meeting held on May 22, 1998, which approved the breakup, was not properly convened;
- national sovereignty will be threatened if the country's telecommunications companies are controlled by foreign entities; and
- the General Telecommunications Law requires that some matters, such as the entry of new competitors and the administration of development and technology funds, be regulated prior to the breakup and privatization either by an executive order of the President or by an act of Congress.

If any of the plaintiffs in the above-described lawsuits ultimately prevails, the Telebrás breakup might have to be unwound. This could require any combination of the following:

- amending the Telecommunications Law;
- reconvening the May 22, 1998 Telebrás shareholders' meeting; and
- the passing of additional laws by Congress or the issuance of executive orders by the President.

Litigation Arising Out of Events Prior to the Telebrás Breakup

Telebrás, our predecessor company, Telecomunicações de Minas Gerais S.A., and we are defendants in a number of legal proceedings, including tax- and labor-related matters, and are subject to certain other claims and contingencies.

Liability for any claims arising out of acts committed by our predecessor company prior to the effective date of the spin-off of the predecessor company's cellular assets and liabilities to us remains with the predecessor company except for:

- labor and tax claims, for which the predecessor company and we are jointly and severally liable by operation of law, and
- liabilities with respect to which our predecessor company made a specific accounting provision prior to the breakup and assigned them to us.

Any claims against our predecessor company that are not satisfied by it could result in claims against us to the extent that our received assets at the time of the spin-off might have been used to settle those claims. Under the shareholders' resolution pursuant to which the spin-off was effected, we have contribution rights against our predecessor company with respect to the entire amount of any payments made by us in connection with any labor or tax claims brought against us that relate to events prior to the effective date of the spin-off.

Under the terms of the Telebrás breakup, liability for any claims arising out of acts committed by Telebrás prior to the effective date of the breakup remains with Telebrás except for:

- labor and tax claims, for which Telebrás and the 12 holding companies are jointly and severally liable by operation of law, and
- any liability with respect to which Telebrás made a specific accounting provision prior to the breakup, to the extent that such provision has been assigned to Telemig or one of the 12 holding companies.

Civil Legal Proceedings

At December 31, 2004, we had provisions of R\$3.1 million for contingent liabilities in connection with civil lawsuits classified as probable risks. We believe that these civil proceedings, would not, if decided against us, have a material adverse effect on our operating results or financial condition. The most significant civil suits involving us are described below.

General Telecommunications Law Proceeding

The General Telecommunications Law prohibits a shareholder from having a controlling interest in more than one wireless telecommunications carrier operating in the same area in Brazil. Caixa de Previdência dos Funcionários do Banco do Brasil - PREVI (which is the Banco do Brasil S.A. pension fund) and Banco do Brasil are a part of our controlling shareholder block and also are a part of the controlling shareholder block of Telemar, which competes with us in our area under the Oi brand name. On June 15, 2005, the Company has initiated court proceedings seeking a court order to prevent PREVI and Banco do Brasil from exercising their voting rights in the Company until the legality of their shareholding interest is resolved. These proceedings are ongoing.

Monthly Subscription Fees

In February 2004, the public prosecutors of the State of Minas Gerais filed a civil lawsuit against wireless telecommunications operators of the State of Minas Gerais seeking the elimination of monthly subscriptions fees charged to post paid service plans on the grounds that consumers should only have to pay for cellular services actually used. This legal proceeding is still in its preliminary stages.

Prepaid Credits

We and other wireless operators in Minas Gerais are party to three lawsuits challenging the validity of expiration dates for prepaid telephone credits. One of the proceedings is still in its preliminary stage, and the court has requested

that the defendants submit information supporting their basis for setting an expiration term. Another proceeding is in the appeal stage after the court decided against us at the trial stage.

In 2003, a similar suit was filed against us and other wireless operators in Uberlandia, Minas Gerais. The suit also seeks an injunction for the immediate suspension of expiration dates for telephone credits, as well as to

restore credits to customers who forfeited credits due to their expiration. The injunction has not been granted to date.

Litigation Related to Caller ID and the Trademark BINA

Lune Projetos Especiais Telecomunicação Comércio Ind. Ltda., or Lune, has brought a lawsuit against Telemig and other Brazilian mobile telecommunication operators in which Lune claims to be the owner of patents relating to *Equipamento Controlador de Chamadas Entrantes e do Terminal Telefonico*, or Caller ID, and of the trademark BINA (B Identifies the Number of A), and alleges that the mobile telecommunication operators are copying the patents and using the trademark without proper authorization. Lune has requested that the operators be ordered to cease providing Caller ID services and using the trademark BINA and that Lune be indemnified for the unauthorized use of the Caller ID system in an amount equal to the fees paid to the operators by customers for use of the Caller ID system.

In addition to operators, the suit also involves network component manufacturers that supply the Caller ID to the operators. The amount of the indemnification alleged to be owed by the mobile telecommunication operators has not yet been calculated and we believe we have the right to indemnity from the component manufacturers. Nortel has indemnified us against any obligation arising out of allegations of unauthorized use of patents. Accordingly, we have not made any provisions with respect to this lawsuit.

Tax Legal Proceedings

As of December 31, 2004, we had provisions of R\$484 million for contingent liabilities relating to tax matters, the most significant of which are described below.

Litigation Related to the Imposition of ICMS on Certain Telecommunications Services, such as Cellular Activations, Monthly Subscriptions and Additional Accessory Services

We are involved in judicial and administrative proceedings with regard to the extension by state governments of ICMS taxable events to services that are complementary to telecommunications services. According to Agreement No. 69/98 approved by the Brazilian state governments, after June 1998, the ICMS would be imposed on monthly subscriptions, additional services and cellular activations. Before the Agreement's approval, most companies did not subject these services to ICMS because they were not considered to be typical telecommunications services.

We believe that the government's attempt to impose the ICMS upon certain of our services is unlawful and unconstitutional. However, we can give no assurance that the Brazilian superior courts will arrive at this same conclusion. Our external attorneys believe that there is a probable liability outcome in this matter and we have made provisions with regard to contingent liabilities. The provisions include not only the tax allegedly due, but also interest that could be eventually imposed in the event that we fail to succeed in court.

The application of ICMS on cellular activations would not materially adversely affect our results of operations for 2002, 2003 and 2004 because we eliminated the activation fee for all but one of our plans. For the remaining plan, cellular activation has been significantly reduced. We do not believe that the application of the ICMS to cellular activation applied on a prospective basis will have a material adverse effect on our results of operations.

In December 1998, we filed a petition with the Treasury Court of the State of Minas Gerais and suspended the remittance of the ICMS on monthly subscriptions and additional services and deposited such amounts in a court-administered trust account. We cannot assure that we will prevail in this matter. Accordingly, we have recorded an aggregate provision of R\$396 million for 1998 through 2004 in our consolidated financial statements.

Litigation Relating to the Conveyance of PIS and COFINS to Users

We and other telecommunications companies are defendants in a civil class action filed by the Federal Public Prosecutor (*Ministério Público Federal*) to (i) prevent the passing on to customers of the amounts of the

social contributions referred to as PIS, or the Contribution to the Social Integration Program, and COFINS, or the Contribution for Social Security Financing and (ii) to require the return to customers of two times the amount of PIS- and COFINS-related charges passed along to them. These social contributions are based on gross telecommunications services revenues from final users located within the jurisdiction of Uberlândia in Minas Gerais.

On August 17, 2001, a preliminary injunction was issued ordering us to no longer pass the PIS and the COFINS to our customers, but the injunction was later revoked on October 7, 2002. The maximum liability for this action is approximately R\$125 million. We believe that the probability of an unfavorable outcome in this proceeding is remote.

Litigation Related to Social Security

The Social Security National Institute, or INSS, has issued a tax assessment against us for approximately R\$17.1 million. The proceedings were the result of an alleged failure by us to comply with our obligation to withhold and collect 11% of every payment made to service providers, as required under Law No. 9.711/98. We believe that a significant portion of the assessment is legally unfounded, and a provision was made of approximately R\$3.5 million.

Litigation Related to the Telecommunication Inspection Fund

We are subject to the payment of the Telecommunication Inspection Fund contribution. The Telecommunication Inspection Fund is supported by revenues resulting from a tax imposed on telecommunication operators. We have adopted the position that the Telecommunication Inspection Fund tax is not due in respect of telecommunications stations that are not owned by us. As a result, we are involved in legal proceedings to obtain a judicial authorization for us to pay the Telecommunication Inspection Fund tax solely in respect of telecommunication stations owned by us. The amount involved in these proceedings is R\$75.3 million, for which we have made contingency provisions.

Anatel Proceedings

Anatel has commenced administrative proceedings against Telemig Celular regarding (i) possible irregularities in respect of the election of four members to its board of directors appointed by a non-controlling shareholder, and (ii) possible non-compliance with investment obligations relating to the maintenance and enhancement of the services. Telemig Celular filed a timely defense and is awaiting a response from Anatel. In the event that we its found to have breached any of its obligations, Telemig Celular may be subject to a penalty ranging from a warning to the loss of our authorization. There can be no assurance of the outcome of the proceeding, but we do not believe that the loss of our authorization is a likely outcome.

Service Providers

We currently use the services of approximately 720 outsourced service providers who are engaged in activities such as sales promotions, information technologies, security and maintenance. Under Brazilian labor legislation, the legality of contracting-out services is closely related to the nature of the services involved. Where the outsourced contracted services are related to the primary activities of the contracting company, there is, in effect, a strong presumption that the contracting-out is not legal. Thus, if the relationship between the outsourced service provider and the company contains any indicia of the essential elements of employment, such as subordination of the outsourced individual worker within the management hierarchy of the company, the contracting-out of services is likely to be found illegal.

We believe there is a risk that part of the contracting-out of services could be considered illegal. For this reason, we are exposed to the risk of (i) infraction notices issued by labor and social security authorities, (ii) a civil public action by the Government Labor Attorney's Office and (iii) labor claims filed by outsourced service providers claiming the

existence of an employment relationship.

In an investigatory proceeding filed by the Government Labor Attorney's Office, we signed a Term of Commitment undertaking not to retain services providers in primary activities, under penalty of paying a fine in case of non-compliance with this obligation.

Dividend Policy and Dividends

General

Brazilian Corporation Law generally requires that the bylaws of each Brazilian corporation specify a minimum percentage of the distributable profits comprising dividends and/or notional interest attributable to shareholders equity, or distributable amount, of the corporation for each fiscal year that must be distributed to shareholders as dividends. See Item 10B Additional Information Memorandum and Articles of Association Allocation of Net Income and Distribution of Dividends. Moreover, Brazilian Corporation Law provides that each Brazilian company may only issue new preferred shares for public distribution if one of the following terms applies to the preferred shares: (i) priority in the receipt of dividends corresponding to at least 3% of the book value per share; (ii) dividends 10% higher than those paid for common shares; or (iii) tag along rights at 80% of the price paid to the controlling shareholder in case of a transfer of control. Our bylaws provide that preferred shares will be entitled to receive, on a priority basis, minimum, non-cumulative dividends according to the greater of the following criteria: (i) 6% per annum of the amount resulting from the division of the amount of the outstanding capital stock by the number of our outstanding shares; or (ii) the right to a share of the mandatory dividend (see the next following paragraph) based on (a) a priority to receive a minimum, non-cumulative dividend corresponding to 3% of the net asset value of each share; and (b) a right to a share of the profits to be distributed on the same basis as common shares, after common shares have been paid a dividend equal to the minimum preferred dividend mentioned in (a) above.

Under our by-laws, we are required to distribute to our shareholders as dividends in respect to each fiscal year ending on December 31 an amount equal to not less than 25% of our net profit in any particular year, adjusted in accordance with the Brazilian Corporation Law. In addition to the mandatory dividend, our board of directors may recommend to our shareholders the payment of dividends from retained earnings, profit reserves, and, under certain conditions, capital reserves. Any payment of interim dividends or the payment of interest on shareholders equity will be netted against the amount of the mandatory dividend for that fiscal year.

Under the Brazilian Corporation Law, if our board of directors determines prior to the annual shareholders meeting that payment of the mandatory dividend for the preceding fiscal year would be inadvisable in view of our financial condition, we need not pay the mandatory dividend. This determination must be reviewed by our fiscal council and reported to our shareholders and to the CVM. If a mandatory dividend is not so paid, these earnings must be allocated to a special reserve account. If we do not incur the expected losses that cause us to withhold the mandatory dividend, we will be obligated to pay the mandatory dividend.

Payment of Dividends

We are required to hold an annual shareholders meeting, at which an annual dividend may be declared, by no later than four months after the end of our fiscal year. Our bylaws permit payment of interim dividends out of net income for a six-month or shorter period in the current year based on a balance sheet prepared by our management, or out of preexisting and accumulated profits as set forth in the preceding fiscal year's balance sheet or in the preceding six-month period's balance sheet. According to the Brazilian Corporation Law, dividends must be paid to the holder of record on a dividend declaration date that must occur prior to the end of the fiscal year in which the dividend was declared. A shareholder has a three-year period from the date the dividend payment was made available to claim dividends in respect of its shares, after which such claim is barred by statutory limitations.

Payments of cash dividends and distributions, if any, will be made in *reais* to the custodian on behalf of the depositary, and the custodian will then convert such proceeds into U.S. dollars and will cause such U.S. dollars to be

delivered to the depository for distribution to holders of ADSs. Under current Brazilian law, dividends paid to shareholders who are not Brazilian residents, including holders of ADSs, will not be subject to Brazilian income tax withholding.

Dividend Policy and History of Dividend Payments

Due to our significant capital expenditure requirements, our policy is to pay only the mandatory dividend on our outstanding common and preferred shares, subject to any determination by our board of directors that such distribution would be inadvisable in view of our financial condition. According to the Brazilian Corporation Law, Brazilian corporations cannot retain profits without justification. Therefore, except if retained under any of the

reserves provided for in Articles 193 to 197 of the Brazilian Corporation Law, all net profits will have to be distributed to shareholders.

The only significant asset the Registrant has, other than cash, is its shares of Telemig Celular. The Registrant relies almost exclusively on dividends from Telemig Celular to meet cash needs, including the payment of dividends to its shareholders. The Registrant controls the payment of dividends by Telemig Celular, subject to limitations under Brazilian Corporation Law.

The following table sets forth the dividends paid to holders of our common shares and preferred shares since 2002 in *reais*:

Year	Common Shares	Preferred Shares
	(per 1,000 shares/in R\$)	
2004	0.11099	0.11099
2003	0.06934	0.06934
2002	0.07331	0.07331

Shareholders who are not residents of Brazil must generally register with the Central Bank to have dividends and/or notional interest attributable to shareholders' equity, sales proceeds or other amounts with respect to their shares eligible to be remitted in foreign currency outside of Brazil. See Item 10D Additional Information Exchange Controls. The preferred shares underlying the ADSs are held in Brazil by Banco Itaú S.A., our custodian, as agent for the depositary, which will be the registered owner on the records of the registrar for our preferred shares. The registrar is Banco ABN-AMRO Real S.A.

Payments of cash dividends and distributions, if any, will be made in *reais* to the custodian on behalf of the depositary, which will then convert those proceeds into U.S. dollars and will cause those U.S. dollars to be delivered to the depositary for distribution to holders of ADSs as described above. In the event that the custodian is unable to convert immediately the Brazilian currency received as dividends and/or notional interest attributable to shareholders' equity into U.S. dollars, the amount of U.S. dollars payable to holders of ADSs may be adversely affected by devaluations of the *real* that occurs before those distributions are converted and remitted. See Item 3A Key Information Selected Financial Data Exchange Rates. Dividends and notional interest attributable to shareholders' equity in respect of the preferred shares paid to shareholders who are not Brazilian residents, including holders of ADSs, are exempt from Brazilian withholding tax in respect of profits accrued as of January 1, 1996. See Item 10E Additional Information Taxation Brazilian Tax Considerations.

B. Significant Changes

We are not aware of any significant changes bearing upon our financial condition since the date of the consolidated financial statements included in this annual report.

ITEM 9. THE OFFER AND LISTING

A. Offer and Listing Details

Our preferred shares trade on the New York Stock Exchange under the symbol **TMB** in the form of American Depositary Shares, or ADSs. Each ADS represents 20,000 preferred shares, without par value. The ADSs are evidenced by American Depositary Receipts, or ADRs, issued by The Bank of New York as depositary, under a

deposit agreement among us, the depositary and the owners and beneficial owners of ADRs from time to time. We became a U.S. registered company listed on the New York Stock Exchange on November 16, 1998.

The principal trading market for our preferred shares and for our common shares is the São Paulo Stock Exchange (*Bolsa de Valores de São Paulo* - BOVESPA). Our preferred shares commenced trading on the BOVESPA on September 21, 1998. Our preferred shares trade on the BOVESPA under the symbol TMCP4 and our common shares trade under the symbol TMCP3.

At December 31, 2004, there were:

- an aggregate of 219,873,977,832 preferred shares issued and outstanding and 130,198,132,862 common shares issued and outstanding, and

- 5,990,518 ADSs, representing 119,810,360,000 preferred shares, held by foreign investors (to our knowledge, based in each case on their addresses as indicated in our records for the shares in our custody), representing 54.49% of the total preferred shares outstanding.

We have registered one class of ADSs under a registration statement on Form F-6 pursuant to the Securities Act. All of the ADSs were registered in the name of The Depository Trust Company. At December 31, 2004, there were 90 holders of record of the ADSs.

The following table presents the reported high and low closing sale prices for our preferred shares as reported on the São Paulo Stock Exchange in *reais*.

Calendar Period	R\$ per 1,000 preferred shares	
	High	Low
2000	9.30	3.61
2001	7.01	2.61
2002	4.65	2.30

B. Plan of Distribution

Not applicable.

C. Markets

Trading on the Brazilian Stock Exchanges

General

All equity and corporate debt securities in Brazil are traded on the São Paulo Stock Exchange and all government securities are traded on the Rio de Janeiro Stock Exchange. The São Paulo Stock Exchange is a nonprofit entity owned by its member brokerage firms. Trading on the exchange is limited to member brokerage firms and a limited number of authorized nonmembers. The São Paulo Stock Exchange has two open trading sessions each day from 10:00 a.m. to 1:00 p.m. and from 2:00 p.m. to 4:45 p.m. Trading is also conducted from

10:00 a.m. to 5:00 p.m. on an automated system. There are no specialists or market makers for our shares on the São Paulo Stock Exchange.

Settlement of transactions is effected three business days after the trade date without adjustment of the purchase price for inflation. Payment for shares is made through the facilities of the separate clearinghouses or the *Companhia Brasileira de Liquidação e Custódia - CBLC*, the clearinghouse for the São Paulo Stock Exchange, which maintains accounts for member brokerage firms. The seller is ordinarily required to deliver the shares to the exchange on the second business day following the trade date.

At December 31, 2004, the aggregate market capitalization of the 358 companies listed on the São Paulo Stock Exchange was approximately US\$340.9 billion. The Brazilian equity market is relatively small and illiquid compared to major world markets. In 2004, the ten largest companies represented approximately 48.8% of the total market capitalization of all listed companies on the São Paulo Stock Exchange. In 2004, the average monthly trading volume on the São Paulo Stock Exchange was approximately US\$8.7 billion. By comparison, as of December 31, 2004, the aggregate market capitalization of the 2,768 listed companies on the New York Stock Exchange was approximately US\$19.8 trillion and the ten largest companies listed on the New York Stock Exchange represented approximately 10.8% of the total market capitalization of all listed companies. In December 2000, the São Paulo Stock Exchange implemented new listing segments: the *Novo Mercado* and the Differentiated Levels of Corporate Governance. The *Novo Mercado* is a listing segment under the São Paulo Stock Exchange designed for the trading of shares issued by companies that voluntarily undertake to abide by further corporate governance practices and disclosure requirements in addition to those already imposed by Brazilian law. A company in the *Novo Mercado* listing segment must follow a series of corporate rules known as good practices of corporate governance. These rules generally increase shareholders rights and enhance the quality of information provided to shareholders.

The São Paulo Stock Exchange Differentiated Levels of Corporate Governance imposes obligations meant to improve a company's methods of disclosure to the market and dispersing its shares among the largest number of shareholders possible. The corporate governance practices and disclosure requirements applicable to these segments are not as extensive as those applicable to the *Novo Mercado* segment.

Trading on Brazilian stock exchanges by nonresidents of Brazil is subject to certain limitations under Brazilian foreign investment and tax legislation. See Item 10D Additional Information Exchange Controls.

Regulation of Brazilian Securities Markets

The Brazilian securities market is governed by Law No. 6,385 of December 7, 1976, as amended, and Law No. 6,404 of December 15, 1976, as amended, known as the Brazilian Corporation Law, and by regulations issued by the CVM, which has authority over stock exchanges and the securities markets generally, and by the Central Bank, which has licensing authority over brokerage firms and regulates foreign investment and foreign exchange transactions.

Under the Brazilian Corporation Law, a company is either public (*companhia aberta*), such as we are, or closely-held (*companhia fechada*). All public companies are registered with the CVM and are subject to reporting requirements. A company registered with the CVM may have its securities traded either on the São Paulo Stock Exchange or in the Brazilian over-the-counter market. The shares of a public company may also be traded privately, subject to some limitations. To be listed, a company must apply for registration with the CVM and the São Paulo Stock Exchange.

Trading in securities on the São Paulo Stock Exchange may be suspended at the request of a company in anticipation of a material announcement. Trading may also be suspended at the initiative of the São Paulo Stock Exchange or the CVM, among other reasons, based on or due to a belief that a company has provided inadequate

information regarding a material event or has provided inadequate responses to inquiries by the CVM or the São Paulo Stock Exchange.

The Brazilian securities laws and regulations provide for, among other things, disclosure requirements applicable to issuers of traded securities, protection of minority shareholders and criminal penalties for insider trading and price manipulation. On January 3, 2002, the CVM issued Instruction No. 358, which amended the rules applicable to the disclosure of relevant facts and became effective on April 28, 2002. In accordance with this regulation, companies must establish internal policies applicable to the disclosure of relevant facts and the

confidentiality of non-public information. We have filed our disclosure and confidentiality policy with the CVM. However, the Brazilian securities markets are still not as regulated and supervised as the United States securities markets or markets in certain other jurisdictions.

ITEM 10. ADDITIONAL INFORMATION

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

Set forth below is certain information concerning our capital stock and a summary of certain significant provisions of our bylaws and Brazilian Corporation Law.

Corporate Purposes

We are a publicly held corporation and our principal place of business is in the city of Brasília, Brazil. We are governed mainly by our bylaws and by the Brazilian Corporation Law. Our corporate purposes are found under Article 2 of our bylaws, which establishes that our objectives are:

- to control companies that perform activities related to the mobile telephone sector in the areas of concessions or authorizations;
- to promote, through our controlled or affiliated companies, the expansion and implementation of mobile telephone services in the areas of concessions or authorizations;
- to promote, to perform or to assist in domestic and foreign investments to be made by us or our controlled companies;
- to promote and stimulate studies and research on the development of the mobile telephone sector;
- to perform, directly or through our controlled or affiliated companies, technical services related to the mobile telephone sector;
- to perform or promote the import of goods and services for or through controlled or affiliated companies;

- to promote, to stimulate and to coordinate, directly or through our controlled or affiliated companies, the formation and training of professionals in the mobile telephone sector;
- to perform other mobile telephone related activities; and
- to hold equity interests in other companies.

Shareholders Meeting

Our annual shareholders meeting must occur within four months following the close of our fiscal year and other shareholders meetings must be held when required. The Brazilian Corporation Law and our bylaws require that all our shareholders meetings be called by publication of a notice in newspapers of general circulation in our

principal place of business, currently the city of Brasília, at least fifteen days prior to the meeting and for three consecutive business days. In addition, the CVM may also require the first call for a shareholders' meeting to be made up to 30 days before such shareholders' meeting. The quorum to hold shareholders' meetings on first call is generally 25% of the shares entitled to vote and, on second call, the meetings can be held with the presence of any number of the shares entitled to vote.

Resolutions are generally passed by the majority of the voting shareholders present at the meeting. Brazilian Corporation Law requires the approval of shareholders representing at least half of the voting shares outstanding for matters such as the following:

- to create preferred shares or to increase the preferred shares of existing classes without maintaining the proportion with the remaining classes of preferred shares, except if provided for and authorized in the bylaws;
- to modify the privileges, advantages and amortization or redemption conditions of one or more classes of preferred shares or to create a new class with greater privileges;
- to decrease the mandatory dividend;
- to incorporate a company into another company or to merge it or to spin it off;
- to become a member of a group of companies;
- to modify the corporate purposes of the company;
- to wind-up or liquidate the company;
- to issue founder's shares; or
- to split-up the company.

Our bylaws establish that general shareholders' meetings addressed to deliberate subjects requiring special approval must be called at least 30 days in advance.

Preferred Shares and Common Shares

The following is a summary of the material terms of our common and preferred shares, including related provisions of our bylaws and the Brazilian Corporation Law.

General

On April 26, 2005, our capital was R\$413,900,000 and share capital consisted of a total of 131,631,638,473 outstanding common shares and 222,294,831,142 preferred shares, without par value. All our outstanding shares are fully paid. Under our bylaws, the number of preferred shares may not exceed two-thirds of the total number of outstanding shares. We may issue preferred shares without maintaining a fixed proportion to common shares provided we observe the limit prescribed by law. Under Brazilian Corporation Law, the number of preferred non-voting or restricted voting shares outstanding, such as the preferred shares, may not exceed one-half of the total number of outstanding shares. According to Law No. 10,303, this new limit on the issuance of preferred shares does not apply to existing listed companies, including us. Currently, our common share and preferred share ratio with respect to our total share capital is 0.3719 and 0.6281, respectively.

Under our bylaws, our board of directors may increase our share capital up to 700,000,000,000 shares. Our shareholders must approve at a shareholders meeting any capital increase that exceeds this limit. Under the Brazilian Corporation Law, if we issue additional shares in a private transaction, the existing shareholders have preemptive rights to subscribe for shares on a *pro rata* basis according to their current holdings.

Common Shares

Each common share entitles the holder thereof to one vote at our annual and special shareholders meetings. Under the Brazilian Corporation Law, our common shares are entitled to dividends or other distributions made in respect of the common shares in proportion to their share of the amount available for the dividend or

distribution. See [Distribution of Dividends](#) for a more complete description of payment of dividends and other distributions on our common shares. In addition, upon any liquidation, our common shares are entitled to return of capital in proportion to their share of our net worth.

Preferred Shares

Holders of preferred shares are generally entitled to priority in the receipt of dividends and return of capital, with no premium. Our bylaws also establish the payment of the higher value between (i) a minimum amount of non-cumulative dividends equivalent to 6% per year of the value resulting from the division of subscribed capital by the total number of shares and (ii) the right to receive a share in the mandatory dividend to be distributed based on the following criteria: (a) priority to receive a minimum, non-cumulative dividend corresponding to 3% of the net asset value of each share; and (b) a right to receive a share in the profits to be distributed on the same basis as common shareholders, after common shares have been paid a dividend equal to the minimum preferred dividend mentioned in letter (a) above.

The Brazilian Corporation Law provides that non-voting or restricted-voting shares (such as the preferred shares) entitled to fixed or minimum dividends acquire unrestricted voting rights beginning when a company has failed for three consecutive fiscal years (or for any shorter period, set forth in a company's bylaws) to pay any fixed or minimum dividend to which such shares are entitled and to continue to hold such voting rights until payment thereof is made. Our bylaws do not provide for any shorter period.

Any change in the preferences or advantages of the preferred shares, or the creating of a class of shares having priority over the preferred shares, would require the approval of holders of a majority of the outstanding preferred shares, voting as a class at a special meeting of holders of preferred shares. In any circumstance in which holders of preferred shares are entitled to vote, each preferred share will entitle the holder thereof to one vote.

Moreover, the preferred shareholders are entitled to vote at general shareholders' meetings in respect of any of the following matters:

- to amend or delete the article in our bylaws that provides that a shareholders' meeting will be required for approving the execution of long-term agreements between us or controlled companies, on one side, and the controlling shareholder, controlled or affiliated companies, those subject to common control, or that in any other way can be considered to be related to us, on the other side, except for standard-form agreements, as well as to approve the execution of any such agreements;
- to amend or delete the article in our bylaws that provides that extraordinary general shareholders' meetings called to decide on special quorum subjects will be valid if the first call is made at least 30 days in advance of the date on which the general shareholders' meeting will take place, and a second call is made at least 10 days in advance therewith; and
- to amend or delete the article in our bylaws that provides that our approval of a merger, spin-off, consolidation or dissolution of controlled companies must be guided by the equal treatment to all the companies involved.

Change in Shareholders' Rights

In principle, a change in shareholders' rights, such as the reduction of the mandatory minimum dividend, requires the vote of shareholders holding at least one half of our voting shares. Under certain circumstances, which may result in a change in the rights of shareholders, the Brazilian Corporation Law requires the approval of a majority of the shareholders who would be adversely affected by the change and who are present at a special meeting called for such

purpose.

Allocation of Net Income and Distribution of Dividends

Allocation of Net Income

The allocation of our net income is proposed by our management and is subject to approval by our shareholders at a general shareholders meeting. However, the discretion of our management and our shareholders to determine the allocation of our net income is limited by certain rules that determine whether such net income

should be distributed as dividends or allocated to certain profit reserves or carried forward to future fiscal years, as described below:

Mandatory dividends. Our shareholders are generally entitled to receive mandatory dividends each year in an amount equivalent to 25% of our adjusted net income. Adjusted net income is net income under Brazilian GAAP following the addition or subtraction of:

- amounts allocated to the formation of a statutory reserve account, and
- amounts allocated to the formation of a contingency reserve account and the return of any amounts in any contingency reserve accounts deposited in previous years.

The payment of our mandatory dividends may be limited to the profits actually realized in the fiscal year if the portion of the profits not realized is allocated to the unrealized income reserve account (as described below).

If, prior to a general shareholders meeting, our board of directors recommends that payment of mandatory dividends with respect to the preceding fiscal year would not be advisable in view of our financial condition, our shareholders would decide at the shareholders meeting whether or not to make that distribution. The recommendation of the board of directors must be reviewed by our fiscal council, and reported to our shareholders and to the CVM.

Legal reserve account. We are required to maintain a legal reserve account to which we must allocate 5% of our net income for each fiscal year until the amount of the reserve equals 20% of our share capital. The allocation of a portion of the net income to the legal reserve account is mandatory, even though it must be submitted to the approval by the shareholders voting at the general shareholders meeting and may be transferred to our capital account or used to offset accumulated losses. However, we are not required to make any allocations to our legal reserve in respect of any fiscal year in which it, when added to our other established capital reserves, exceeds 30% of our capital. Net losses, if any, may be charged against the legal reserve account. The legal reserve account is not available for the payment of dividends. At December 31, 2004, the balance of our legal reserve was R\$34.3 million, which was equal to 10% of our share capital.

Statutory reserve account. Our bylaws provide that our shareholders may allocate up to 10% of our net income (adjusted pursuant to the Brazilian Corporation Law) to a working capital backup reserve account. This reserve, however may not exceed 10% of our net book value. At December 31, 2004, we had no working capital back-up reserve.

Statutory reserve for investments. Our bylaws establish a statutory reserve for investments, to be created with the remaining balance of net income for the preceding fiscal year, provided that it complies with the capital budget previously approved by a shareholders meeting and provided that it is used to support costs with the expansion of our activities and those of our subsidiaries, including through capital increases or the development of new businesses. It may not be approved at the expense of retaining mandatory dividends, as provided in article 41 of our bylaws. The balance of this reserve, as well as all profit reserves, except those for contingencies and realizable profits, may not exceed our share capital. Should this limit be reached, a general shareholders meeting would have to decide whether the excess should be applied to pay in or increase the capital or to distribute dividends.

Discretionary reserve accounts. The Brazilian Corporation Law also provides for two discretionary allocations of net profits that are subject to approval by the shareholders at the annual meeting. First, a percentage of net profits may be allocated to a contingency reserve account for anticipated losses that are deemed probable in future years. Second, if the mandatory distributable amount exceeds the sum of realized net profits in a given year, such excess may be allocated to an unrealized income reserve account. Our bylaws, which authorize the allocation of a percentage of our

net income to the discretionary reserve account, require that the purpose, criteria for allocation and maximum amount of the reserve be specified.

Retention of our net income based on a capital expenditure budget. A portion of our net income may be retained for capital expenditure projects, the amount of which is based on a capital expenditure budget previously presented by our management and approved by our shareholders. If a project relating to this approved capital expenditure budget has a term exceeding one year, the budget relating to the project must be submitted to the general shareholders meeting each fiscal year until the relevant investment is completed.

Distribution of Dividends

Under the Brazilian Corporation Law, we may pay dividends only from:

- our net income earned in a given fiscal year, *i.e.*, our after-tax income reduced by (i) our losses carried forward from prior fiscal years, and (ii) distributions to holders of founders' shares and to managers pursuant to profit-sharing arrangements. Our by-laws authorize a profit sharing plan for management and employees as well as a stock option plan. The amount to be paid is set by our board of directors. Under the Brazilian Corporation Law, this profit sharing may only be paid to management with respect to a fiscal year in which the mandatory dividend has been declared to the shareholders;
- our net income accrued in previous fiscal years or in any six-month and/or quarterly interim periods of a fiscal year; or
- our profit reserves set aside in previous fiscal years or in the first six months of a fiscal year. In this case, profit reserves means any discretionary reserve account, contingency reserve account, amounts allocated to our capital expenditure budget approved by a shareholders' resolution or unrealized income reserve account, not including the capital reserves.

We are required to pay a non-cumulative preferred dividend on our preferred shares in an amount equal to 6% per year over the value resulting from the division of subscribed capital by the total number of shares, or, alternatively, minimum non-cumulative dividends corresponding to 3% of the net asset value of each share. We must choose the alternative representing the higher value. As of December 31, 2004, the calculated preferred dividend requirement amounted to approximately R\$19.5 million. For the fiscal year ended December 31, 2004, management proposed the distribution of dividends for both common and preferred shares in the amount of R\$41.2 million. This proposal was approved at our annual shareholders' meeting held on April 26, 2005.

For purposes of the mandatory distribution requirement, we included in adjusted net income part of the unrealized income reserve transferred upon the breakup of Telebrás, which amounted to R\$132.0 million (R\$39.6 million as of December 31, 2004), and which is included in distributable capital and other reserves in our shareholders' equity. We decided to include the unrealized reserve in the calculation of the mandatory distribution requirements over a ten-year period, ending in 2007. We cannot assure you that the mandatory distribution of the unrealized income reserve will not result in substantial additional dividend requirements.

Distributions of interest on our net worth may constitute an alternative form of payment to shareholders. These payments may qualify as part of the mandatory dividend at their net value. Please see [Taxation - Brazilian Tax Considerations](#). Dividends are generally required to be paid within 60 days after the date the dividends were declared to the holder of record, unless a shareholders' resolution sets forth another date of payment. This date must, in either case, be prior to the end of the fiscal year in which the dividend is declared. A shareholder has a three-year period following the date on which the dividend payment is made available to claim the dividend in respect of its shares, after which it reverts to the company. We are not required to adjust the amount of the dividend for inflation for the period from the date of declaration to the payment date.

Our calculation of net profits and allocations to reserves for any fiscal year are determined on the basis of financial statements prepared in accordance with Brazilian GAAP and adjusted in accordance with Brazilian Corporation Law. The financial statements included herein have been prepared in accordance with U.S. GAAP and, although our allocations to reserves and dividends will be reflected in those financial statements, investors will not be able to calculate these allocations or required dividend amounts from the U.S. GAAP financial statements.

Interest on Shareholders' Equity

Law No. 9,249, of December 26, 1995, as amended, provides for the distribution of interest on our capital as an alternative form of payment to shareholders. Such interest is limited to the daily *pro rata* variation of the federal government's long-term interest rate as determined by the Central Bank from time to time. We may treat these payments as a deductible expense for corporate income tax and social contribution purposes, but the deduction cannot exceed the greater of:

- 50% of net income (before taking into account such contribution and any deductions for income taxes and after taking into account any deductions for social contribution on net profits) for the period in respect of which the payment is made; or
- 50% of retained earnings.

Any payment of interest on capital to holders of ADSs or preferred shares, whether or not they are Brazilian residents, is subject to Brazilian withholding tax at the rate of 15% (or 25% if the beneficiary is resident in a tax haven jurisdiction). The amount paid to shareholders as interest on capital, net of any withholding tax, may be included as part of any mandatory distributable amount. Under Brazilian law, we are obligated to distribute to shareholders an amount sufficient to ensure that the net amount received by them, after payment by us of applicable Brazilian withholding taxes in respect of the distribution of interest on capital, is at least equal to the mandatory distributable amount. When we distribute interest on capital, and that distribution is not accounted for as part of the mandatory distribution, Brazilian withholding tax will apply.

Specific Shareholders' Rights

According to the Brazilian Corporation Law, neither a company's bylaws nor actions taken at a general meeting of shareholders may deprive a shareholder of certain specific rights, such as:

- the right to participate in the distribution of profits;
- the right to participate equally and ratably in any remaining residual assets in the event of the company's liquidation;
- the right to supervise the management of the corporate business as specified in the Brazilian Corporation Law;
- preemptive rights in the event of a subscription of shares, debentures convertible into shares or subscription bonuses (other than with respect to a public offering of such securities, as may be provided in the bylaws); and
- the right to withdraw from the company in the cases specified in the Brazilian Corporation Law.

Other Provisions

Neither the Brazilian Corporation Law nor our bylaws expressly addresses:

- staggered terms for directors;
- cumulative voting, except as described below; or
- measures that could prevent a takeover attempt.

Nevertheless, the General Telecommunications Law requires Anatel's prior approval for any spin off, merger, incorporation, transformation or transfer of control involving corporations holding any telecommunications concession or authorization.

According to the Brazilian Corporation Law and CVM regulation, shareholders representing at least 5% of the voting capital may request that a multiple voting procedure be adopted to entitle each share to as many votes as there are board members and to give each shareholder the right to vote cumulatively for only one candidate or to

distribute his/her votes among several candidates. Pursuant to the Brazilian Corporation Law, shareholders' actions must be taken at a shareholders' meeting duly convened, and not by written consent.

Preemptive Rights

Each of our shareholders has a general preemptive right to subscribe for shares or securities convertible into shares in any capital increase, in proportion to its holding, except in the event of the grant and exercise of any option to acquire shares of our share capital. A period of at least 30 days following the publication of notice of the issuance of shares or securities convertible into shares is allowed for exercise of the right. Under the Brazilian Corporation Law, we may amend our bylaws to eliminate preemptive rights or to reduce the exercise period in connection with a public offering of shares or an exchange offer made to acquire another company. Currently, our bylaws provide for such elimination of the preemptive rights in those circumstances upon approval of the shareholders or the board of directors.

In the event of a capital increase which would maintain or increase the proportion of capital represented by preferred shares, holders of ADSs, except as described above, would have preemptive rights to subscribe only for newly issued preferred shares. In the event of a capital increase which would reduce the proportion of capital represented by preferred shares, holders of ADSs, except as described above, would have preemptive rights to subscribe for preferred shares in proportion to their shareholdings and for common shares only to the extent necessary to prevent dilution of their interest in us.

Redemption and Rights of Withdrawal

The Brazilian Corporation Law provides that, under limited circumstances, a shareholder has the right to withdraw his or her equity interest from the company and to receive payment for the portion of shareholder's equity attributable to his or her equity interest. This right of withdrawal may be exercised by our dissenting shareholders in the event that at least half of all voting shares outstanding authorize us:

- to create preferred shares or to increase the existing classes of preferred shares, without maintaining the proportion with the remaining classes of preferred shares, except if provided for and authorized in the bylaws;
- changes in the preferences, advantages and conditions of redemption or amortization of one or more classes of preferred shares, or the creation of a new class with greater privileges;
- to reduce the mandatory distribution of dividends;
- to merge into another company or to consolidate with another company, subject to the conditions set forth in the Brazilian Corporation Law;
- to participate in a centralized group of companies as defined under the Brazilian Corporation Law and subject to the conditions set forth therein;
- to change our corporate purpose;
- to split up, subject to the conditions set forth in the Brazilian Corporation Law;
- to transform into another type of company;

- to transfer all of our shares to another company or to receive shares of another company in order to make the company whose shares are transferred a wholly owned subsidiary, a procedure known as *incorporação de ações*; or
- to acquire control of another company at a price which exceeds the limits set forth in the Brazilian Corporation Law.

The right of withdrawal lapses 30 days after publication of the minutes of the shareholders' meeting that approved the corporate actions described above. We would be entitled to reconsider any action giving rise to withdrawal rights within 10 days following the expiration of such rights if the withdrawal of shares of dissenting shareholders would jeopardize our financial stability.

In addition, the rights of withdrawal in the fourth, fifth and ninth bullet points above may not be exercised by holders of shares if such shares (i) are liquid, which definition entails being part of the São Paulo Stock Exchange Index or other stock exchange index (as defined by the CVM), and (ii) are widely held, such that the controlling shareholder or companies it controls have less than 50% of the shares.

This right of withdrawal may also be exercised in the event that the entity resulting from a merger, *incorporação de ações*, as described above, consolidation or spin-off of a listed company fails to become a listed company within 120 days of the shareholders' meeting at which such decision was taken.

The Brazilian Corporation Law allows companies to redeem their shares at their economic value, subject to the provisions of their bylaws and certain other requirements. Our bylaws currently do not provide that our capital stock will be redeemable at its economic value and, consequently, any redemption pursuant to the Brazilian Corporation Law would be made based on the book value per share, determined on the basis of the last balance sheet approved by the shareholders. However, if a shareholders' meeting giving rise to redemption rights occurred more than 60 days after the date of the last approved balance sheet, a shareholder would be entitled to demand that his or her shares be valued on the basis of a new balance sheet dated within 60 days of such shareholders' meeting.

Form and Transfer

According to the Brazilian Corporation Law, all shares issued by Brazilian companies must be nominative and either registered within the companies' registry books (the *Registro de Ações Nominativas*) or placed under the custody of a financial institution specifically designated to perform custodial services by each company. Because preferred shares are in registered book-entry only form, the transfer of shares is effected by either an entry made by us in our books by debiting the share account of the transferor and crediting the share account of the transferee or by a book entry by the custodian in case the board of directors authorizes the maintenance of our shares under the custody of a financial institution specifically designated to perform book-entry services. Under our bylaws, our shares are in the form of book-entry shares and the transfer of those shares is effected through an order to the financial institution which controls the registration of those shares.

Transfers of preferred shares by a foreign investor are made in the same way and executed by that investor's local agent on the investor's behalf except that, if the original investment was registered with the Central Bank pursuant to the Annex - IV Regulations, the foreign investor also should seek amendment, if necessary, through its local agent, of the certificate of registration to reflect the new ownership.

The São Paulo Stock Exchange operates a central clearing system. A holder of our shares may choose, at its discretion, to participate in this system and all shares elected to be put into the system will be deposited in custody with the stock exchange through a Brazilian institution that is duly authorized to operate by the Central Bank having a clearing account with the stock exchange. The fact that these shares are subject to custody with the stock exchange will be reflected in our registry of shareholders. Each participating shareholder will, in turn, be registered in our register of beneficial shareholders maintained by the stock exchange and will be treated in the same way as registered shareholders.

Significant Differences between our Corporate Governance Practices and NYSE Corporate Governance Standards

We are subject to the NYSE corporate governance listing standards. As a foreign private issuer, the standards applicable to us are considerably different than the standards applied to U.S. listed companies. Under the NYSE rules, we are required only to: (i) have an audit committee or audit board, pursuant to an applicable exemption available to foreign private issuers, that meets certain requirements, as discussed below, (ii) provide prompt certification by our

chief executive officer of any material non-compliance with any corporate governance rules, and (iii) provide a brief description of the significant differences between our corporate governance practices and the NYSE corporate governance practice required to be followed by U.S. listed companies. The discussion of the significant differences between our corporate governance practices and those required of U.S. listed companies follows below.

Majority of Independent Directors

The NYSE rules require that a majority of the board must consist of independent directors. Independence is defined by various criteria, including the absence of a material relationship between the director and the listed company. Brazilian law does not have a similar requirement. Under Brazilian law, neither our board of directors nor our management is required to test the independence of directors before their election to the board. However, both Brazilian Corporate Law and the CVM have established rules that require directors to meet certain qualification requirements and that address the compensation and duties and responsibilities of, as well as the restrictions applicable to, a company's executive officers and directors. While our directors meet the qualification requirements of Brazilian Corporate Law and the CVM, we do not believe that our directors would be considered independent under the NYSE test for director independence. Brazilian Corporate Law and our bylaws require that our directors be elected by our shareholders at a general shareholders meeting.

Executive Sessions

NYSE rules require that the non-management directors must meet at regularly scheduled executive sessions without management. Brazilian Corporate Law does not have a similar provision. According to Brazilian Corporate Law, up to one-third of the members of the board of directors can be elected from management. The remaining non-management directors are not expressly empowered to serve as a check on management and there is no requirement that those directors meet regularly without management. All of our directors are non-management directors.

Nominating/Corporate Governance Committee

NYSE rules require that listed companies have a Nominating/Corporate Governance Committee composed entirely of independent directors and governed by a written charter addressing the committee's required purpose and detailing its required responsibilities, which include, among other things, identifying and selecting qualified board member nominees and developing a set of corporate governance principles applicable to the company. We are not required under applicable Brazilian law to have a Nominating Committee/Corporate Governance Committee, and accordingly, to date, have not established such a committee. Pursuant to our bylaws, our directors are elected by our shareholders at a general shareholders meeting. Our corporate governance practices are adopted by the entire board.

Compensation Committee

NYSE rules require that listed companies have a Compensation Committee composed entirely of independent directors and governed by a written charter addressing the committee's required purpose and detailing its required responsibilities, which include, among other things, reviewing corporate goals relevant to CEO compensation, evaluating CEO performance and approving CEO compensation levels and recommending to the board non-CEO compensation, incentive-compensation and equity-based plans. We are not required under applicable Brazilian law to have a Compensation Committee. Under Brazilian Corporate Law, the total amount available for compensation of our directors and executive officers and for profit-sharing payments to our executive officers is established by our shareholders at the annual general meeting. The board of directors is then responsible for determining the individual compensation and profit sharing of each executive officer, as well as the compensation of our board members. In making such determinations, the board reviews the performance of the executive officers, including the performance of our CEO.

Audit Committee

NYSE rules require that listed companies have an audit committee that (i) is composed of a minimum of three independent directors who are all financially literate, (ii) meets the SEC rules regarding audit committees for listed companies, (iii) has at least one member who has accounting or financial management expertise and (iv) is governed

by a written charter addressing the committee's required purpose and detailing its required responsibilities. However, as a foreign private issuer, we need only to comply with the requirement that the audit committee, or fiscal council in our case, meet the SEC rules regarding audit committees for listed companies. Brazilian Corporate Law requires companies to have a permanent or non-permanent *conselho fiscal* composed of three to five members who are elected at the general shareholders' meeting. The *conselho fiscal* operates independently from management and from a company's external auditors. Its main function is to monitor the activities of management, examine the financial statements of each fiscal year and provide a formal report to our shareholders.

We have a permanent *conselho fiscal* that consists of three to five members and which has ordinary meetings every three months. The members of our *conselho fiscal* are all financially literate and two members have accounting expertise that qualifies them as audit committee financial experts.

Shareholder Approval of Equity Compensation Plans

NYSE rules require that shareholders be given the opportunity to vote on all equity compensation plans and material revisions thereto, with limited exceptions. Under Brazilian Corporate Law, shareholders must approve all stock option plans. In addition, any issuance of new shares that exceeds our authorized share capital established in our by-laws is subject to shareholder approval.

Corporate Governance Guidelines

NYSE rules require that listed companies adopt and disclose corporate governance guidelines. We have not adopted any formal corporate governance guidelines beyond those required by applicable Brazilian law. We have adopted and observe a disclosure policy which requires the public disclosure of all relevant information pursuant to guidelines set forth by the CVM, as well as an insider trading policy, which, among other things, establishes black-out periods and requires insiders to inform management of all transactions involving our securities.

Code of Business Conduct and Ethics

NYSE rules require that listed companies adopt and disclose a code of business conduct and ethics for directors and certain officers, and promptly disclose any waivers of the code for directors or executive officers. Applicable Brazilian law does not have a similar requirement. However, in December 2003, we adopted a code of ethics and conduct applicable to our officers, directors and employees, including at the subsidiary level, providing a whistleblower protection for those who reports violations to the code terms.

Internal Audit Function

NYSE rules require that listed companies maintain an internal audit function to provide management and the audit committee with ongoing assessments of the company's risk management processes and system of internal control. Our internal audit function is the responsibility of our financial department under the supervision of our chief financial officer. Our financial department is supported in its internal audit function by our quality control department, which is responsible for the evaluation and effectiveness of our internal procedures and reporting systems.

C. Material Contracts

Personal Mobile Service Authorizations

We obtained a mobile cellular service concession from the Brazilian Ministry of Communications on November 4, 1997. On February 19, 2004, we signed an Authorization Contract with Anatel to migrate to the SMP regime, which replaced the SMC. We also acquired from Anatel additional spectrum on the 1,800 MHz frequency and the 900 MHz frequency ranges. The terms of our Authorization are described in Item 4 Information on the Company Regulation of the Brazilian Telecommunications Industry. In order to extend the area of Telemig Celular to provide the SMP to the whole Minas Gerais State, we also recently acquired an Authorization to the sector 3 of the Area 4 of the Plano Geral de Outorgas PGO of Anatel.

Material Financing Agreements

Export Development Corporation of Canada

On July 8, 1999, Telemig Celular entered into a US\$91 million credit agreement with the Export Development Corporation of Canada, which was restated and amended on April 3, 2001 and April 23, 2001, with an additional US\$50 million of credit, relating to the purchase of cellular telecommunications equipment and services from Northern Telecom companies. ABN Amro Bank NV is acting as administrative agent. The annual interest rate under this agreement is six month LIBOR plus 4.875% . Principal payments (which began on April 30, 2003) and interest are payable semi-annually. The maturity date is April 28, 2006. On January 8, 2004, the credit agreement

was amended in order to permit the Telemig Celular's participation in the Notes Units transaction described in Operating and Financial Review and Prospects - Liquidity and Capital Resources - Indebtedness. At December 31, 2004, there was R\$160 million outstanding under this credit agreement.

BNDES

On November 9, 2000, Telemig Celular obtained a R\$260 million, five-year facility from the Brazilian National Economic and Social Development Bank (*Banco Nacional de Desenvolvimento Econômico e Social (BNDES)*) and a consortium of three Brazilian banks: Banco Itaú BBA S.A., Banco Bradesco S.A. and Banco Alfa de Investimento S.A. The proceeds of this facility, which has an annual interest rate of 5.8% (3.8% until October, 2004) over either (i) the average cost of BNDES currency basket or (ii) the long-term interest rate disclosed by the Central Bank, were invested in the expansion of our coverage area and the introduction of new services. Principal is payable monthly with a final maturity on January 15, 2006. At December 31, 2004, there was R\$83 million outstanding under this facility.

Network Agreements

Ericsson Telecomunicações S.A. and Ericsson Serviços de Telecomunicações Ltda.

On July 1, 2004, Telemig, Amazônia Celular S.A., Ericsson Telecomunicações S.A. and Ericsson Serviços de Telecomunicações Ltda. entered into an agreement to provide and implement the GSM CORE network. Under the terms of this agreement, Ericsson will provide the equipment, material, software and services forming our GSM CORE network. The total amount payable to Ericsson under the terms of the agreement is R\$60 million, of which we will pay R\$43 million and Amazônia will pay R\$17 million.

On July 16, 2004, Telemig entered into an agreement with Ericsson to provide and implement our GSM ACCESS network. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services forming our GSM ACCESS network. The total amount payable to Ericsson under the terms of the agreement is R\$146 million.

Huawei do Brasil Telecomunicações

On December 29, 2004, Telemig entered an agreement with Huawei do Brasil Telecomunicações Ltda and Huawei Serviços do Brasil Ltda. Under the terms of this agreement, Huawei will provide all equipment, material, software and services that are part of the GSM ACCESS networks in the Triângulo Mineiro region and Montes Claros region and our GSM CORE network in the Triângulo Mineiro region and Montes Claros region (System III). The total amount payable to Huawei under the terms of the agreement is R\$44 million.

D. Exchange Controls

The system of foreign investment in financial and capital markets in Brazil was modified by Resolution No. 2,689 of the National Monetary Council on January 26, 2000, which substitutes the rules of Annex IV to Resolution No. 1,289 of the National Monetary Council.

According to Resolution No. 2,689, the entry of foreign capital through the free-rate exchange market, as an investment in the Brazilian financial and capital markets, will be subject to electronic registration with the Central Bank. Qualified foreign investors registered with the CVM and acting through authorized custody accounts managed by local agents may buy and sell shares on Brazilian stock exchanges without obtaining separate certificates of registration for each transaction. However, institutions that provide custody services must submit monthly information to the Central Bank regarding each foreign investor as well as submit to the Central Bank or the CVM records of

transactions made by foreign investors.

The term "qualified foreign investors" includes any individual or financial or non-financial institution, resident or domiciled abroad, which:

- has a legal representative in Brazil;
- fills out a form to be kept on hand by the legal representative;

- obtains registration with the CVM as a foreign investor; and
- registers the foreign investment with the Central Bank.

The issuance of depositary receipts in foreign markets in respect of shares of Brazilian issuers, such as our ADRs, is permitted by Resolution No. 1,927 of the National Monetary Council, which is the restated and amended Annex V to Resolution No. 1,289 of the National Monetary Council. Our ADS program was approved under the Annex V regime by the Central Bank and the CVM prior to the issuance of the ADSs. Accordingly, the proceeds from the sale of ADSs by ADR holders outside Brazil are free of Brazilian foreign investment controls and holders of the ADSs will be entitled to the favorable tax treatment.

An electronic registration has been generated in the name of the depositary with respect to the ADSs and is maintained by the custodian on behalf of the depositary. Pursuant to the registration, the custodian and the depositary are able to convert dividends and other distributions with respect to the preferred shares represented by ADSs into foreign currency and remit the proceeds outside Brazil. In the event that a holder of ADSs exchanges such ADSs for preferred shares, such holder will be entitled to continue to rely on the depositary's certificate of registration for five business days after such exchange following which such holder must seek to obtain its own certificate of registration with the Central Bank. A holder of preferred shares may not be able to convert into foreign currency and remit outside Brazil the proceeds from the disposition of, or distribution with respect to, the preferred shares, unless such holder qualifies under Resolution No. 2,689 regulations or obtains its own certificate of registration. A holder of preferred shares that obtains a certificate of registration will be subject to less favorable Brazilian tax treatment than a holder of ADSs. See [Taxation Brazilian Tax Considerations](#) for a description of this tax treatment. In addition, if the holder resides in a tax haven jurisdiction, this holder will also be subject to less favorable tax treatment.

The right to convert dividend payments and proceeds from the sale of shares into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, that the relevant investments be registered with the Central Bank.

The restrictions on the remittance of foreign capital abroad may hinder or prevent Banco Itaú S.A., which is acting as custodian for the preferred shares represented by ADSs, or holders who have exchanged ADRs for preferred shares, from converting dividends, distributions or the proceeds from any sale of such preferred shares, as the case may be, into U.S. dollars and remitting such U.S. dollars abroad. Holders of ADSs could be adversely affected by delays in, or refusal to grant any, required government approval for conversions of Brazilian currency payments and remittances abroad of the proceeds from dividends or sales of Preferred Shares underlying the ADSs.

Under current Brazilian legislation, the federal government may impose temporary restrictions on remittances of foreign capital abroad in the event of a serious imbalance or an anticipated serious imbalance in Brazil's balance of payments. For approximately six months in 1989 and early 1990, the federal government froze all dividend and capital repatriations held by the Central Bank that were owed to foreign equity investors in order to conserve Brazil's foreign currency reserves. These amounts were subsequently released in accordance with federal government directives. There can be no assurances that the federal government will not impose similar restrictions on foreign repatriations in the future.

E. Taxation

The following summary contains a description of the material Brazilian and U.S. federal income tax consequences of the acquisition, ownership and disposition of preferred shares or ADSs. This summary does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase preferred shares or ADSs. This summary is based upon the tax laws of Brazil and related regulations and on the tax laws of the United

States and related regulations as in effect on the date of this annual report. These laws and regulations may change in the future.

Although there is at present no income tax treaty between Brazil and the United States, the tax authorities of the two countries have had discussions that may culminate in such a treaty. We cannot assure you, however, as to whether or when a treaty will enter into force or how it will affect the U.S. holders of preferred shares or ADSs. In some circumstances, due to internal provisions of each country, a tax in Brazil (see below Distribution of Interest on Capital), can generate a tax credit for the holder. Prospective holders of preferred shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of preferred shares or ADSs in their particular circumstances.

Brazilian Tax Considerations

The following discussion summarizes material Brazilian tax consequences relating to the acquisition, ownership and disposition of preferred shares or ADSs by a holder not deemed to be domiciled in Brazil for Brazilian tax purposes. This discussion does not address all the Brazilian tax considerations that may be applicable to any such particular non-Brazilian holder, and each non-Brazilian holder should consult his or her own tax advisor about the Brazilian tax consequences of investing in preferred shares or ADSs.

Taxation of Dividends

Dividends paid by us in cash or in kind from profits for periods beginning on or after January 1, 1996 (i) to the depositary in respect of preferred shares, underlying ADSs or (ii) to a non-Brazilian holder in respect of preferred shares, will not be subject to Brazilian withholding tax, in accordance with Law No. 9.249/95, article 10.

Dividends paid from profits generated before January 1, 1996 may be subject to Brazilian withholding tax at 15% if the profits were generated in 1994 or 1995, and at 25% if the profits were generated before 1994. Stock dividends are not subject to Brazilian tax.

Taxation of Capital Gains

Capital gain or loss is defined as the difference between the amount realized on the sale or exchange and the acquisition cost of the shares sold, measured in nominal *reais*. The acquisition cost of shares registered as an investment with the Central Bank is calculated on the basis of the foreign currency amount registered with the Central Bank.

Capital gains realized outside Brazil by a non-Brazilian holder on the disposition of ADSs or preferred shares to another non-Brazilian holder are not subject to Brazilian tax. The deposit of preferred shares in exchange for ADSs and the withdrawal of preferred shares upon cancellation of ADSs are also not subject to Brazilian tax.

Capital gains realized by non-Brazilian holders on dispositions of preferred shares in Brazil or in transactions with Brazilian residents may be free of Brazilian tax or may be taxed at one of the following rates, depending on the circumstances described below:

- Gains realized through off-exchange transactions in Brazil or with Brazilian residents are generally subject to tax at a rate of 15%.
- Gains realized through transactions on Brazilian stock exchanges are subject to tax at a rate of 20%.
- Gains on the sale or exchange of duly-registered investments made in accordance with Resolution No. 2,689 of the Monetary Council are not subject to Brazilian tax if such sale or exchange occurs on a Brazilian stock exchange, except for investments originating from countries considered by Brazilian tax authorities a tax haven, or where income is not taxed or is taxed at a rate lower than 20%, which are taxed in accordance with the same tax rules applicable to Brazilian residents.
- Gains on the disposition of preferred shares obtained upon cancellation of ADSs are not taxed in Brazil if such disposition is made, and the proceeds are remitted abroad, within five business days after cancellation.
- If the sales value of the preferred shares contains a component of interest on capital, the amount of this interest will be taxed at a rate of 15%. See *Distribution of Interest on Capital* below.

Any gains realized by a non-Brazilian holder upon the redemption of preferred shares will be treated as gains from the disposition of such preferred shares to a Brazilian resident occurring off of a stock exchange and will accordingly be subject to tax at a rate of 15%.

We cannot assure you that the current preferential treatment for holders of ADSs and non-Brazilian holders of preferred shares under the Resolution No. 2,689 regime will be maintained.

Any exercise of preemptive rights relating to the preferred shares or ADSs will not be subject to Brazilian taxation. Gains on the sale or assignment of preemptive rights relating to the preferred shares underlying ADSs,

complying with the rules set forth by the National Monetary Council will be treated differently for Brazilian tax purposes depending on whether the transaction takes place on a Brazilian stock exchange or not.

Gains on sales or assignments made on a Brazilian stock exchange are not taxed in Brazil, but gains on other sales or assignments may be subject to tax at rates up to 15%.

Distribution of Interest on Capital

Brazilian corporations may make payments to shareholders characterized as interest on the capital of the company as an alternative form of making dividend distributions. Distributions of interest on capital in respect of the preferred shares, including distributions to the depositary in respect of preferred shares underlying ADSs, may be converted into U.S. dollars and remitted outside of Brazil, subject to applicable exchange controls. The rate of interest is calculated on the company's equity and it may not be higher than the federal government's long-term interest rate as determined by the Central Bank from time to time. The deduction of the total amount distributed as interest on capital may not exceed the greater of:

- 50% of net income for the year in respect of which the payment is made before taking such distribution into account, or
- 50% of retained earnings for years prior to the year in respect of which the payment is made, plus profit reserves.

Payments of interest on capital are decided by the shareholders on the basis of the recommendations of a company's board of directors.

Distributions of interest on capital paid to Brazilian and non-Brazilian holders of preferred shares, including payments to the depositary in respect of preferred shares underlying ADSs, are deductible by us for Brazilian corporate income tax purposes. These payments are subject to Brazilian withholding tax at the rate of 15%, except for payments to persons who are constitutionally exempt from tax in Brazil. Payments to persons situated in jurisdictions deemed to be tax havens will be subject to tax at a 25% rate. Tax havens are defined by Brazilian tax authorities in a list and or in case of countries that either have no income tax or in which the income tax rate is less than 20%.

We cannot assure you that our board of directors will not recommend that future distributions of profits should be made by means of interest on capital instead of by means of dividends.

Other Brazilian Taxes

There are no Brazilian taxes applicable to the ownership, transfer or disposition of preferred shares or ADSs by a non-Brazilian holder except for gift and inheritance taxes levied by some states in Brazil on gifts made or inheritances bestowed by individuals or entities not resident or domiciled in Brazil or in the relevant state to individuals or entities that are resident or domiciled within such state in Brazil.

A financial transaction tax (*Imposto sobre Operações Financeiras - IOF*) may be imposed on the conversion of Brazilian currency into foreign currency, such as for purposes of paying dividends and interest. The tax rate on such conversions is currently 0%, but the Minister of Finance has the legal power to increase the rate to a maximum of 25%. Any such increase will be applicable only prospectively.

In addition to the IOF tax, a second tax (*Contribuição sobre movimentação financeira - CPMF*) that applies to the removal of funds from accounts at banks and other financial institutions, is imposed on distributions by us in respect

of the ADSs at the time such distributions are converted into U.S. dollars and remitted abroad by the custodian. This tax is currently levied at a general rate of 0.38% . Financial institutions performing transactions to which the tax applies are responsible for the collection of the tax.

The Brazilian Congress also approved, as of July 2002, an exemption to CPMF for the removal of funds from accounts at banks to buy and sell stocks. Therefore, stock exchanges transactions have been exempt from the CPMF tax since 2002.

U.S. Federal Income Tax Considerations

The following discussion is a general summary of the principal U.S. federal income tax consequences of the ownership and disposition of our preferred shares or ADSs that may be relevant to you if you are a U.S. holder (as defined below) of such shares or ADSs. This discussion is based on provisions of the U.S. Internal Revenue Code of 1986, as amended (the Code), existing and proposed Treasury regulations, administrative pronouncements of the U.S. Internal Revenue Service (IRS) and judicial decisions, all as now in effect, and all of which are subject to change, possibly with retroactive effect, and to different interpretations. This discussion does not address all of the U.S. federal income tax considerations that may be relevant to you in light of your particular circumstances, and does not discuss any application of state, local or non-U.S. tax law or any aspect of U.S. federal tax law other than income taxation. Moreover, this discussion deals only with our preferred shares or ADSs that you will hold as capital assets (generally, property held for investment), and it does not apply to U.S. holders subject to special U.S. federal income tax rules, such as banks, insurance companies, securities dealers, partnerships or other entities classified as partnerships for U.S. federal income tax purposes, tax-exempt organizations, persons that hold our preferred shares or ADSs as a hedge or as part of an integrated investment (including a straddle), persons owning directly, indirectly or constructively, 10% or more of our voting stock and persons whose functional currency is not the U.S. dollar. For purposes of this discussion, a U.S. holder is a beneficial owner of our preferred shares or ADSs that is, for U.S. federal income tax purposes:

- a citizen or resident alien individual of the United States,
- a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia,
- an estate the income of which is subject to U.S. federal income tax regardless of its source, or
- a trust if (A) a court within the United States is able to exercise primary supervision over the administration of the trust, and one or more U.S. persons have the authority to control all substantial decisions of the trust or (B) the trust has a valid election in effect under applicable Treasury regulations to be treated as a U.S. person.

If a partnership holds preferred shares or ADSs, the U.S. federal income tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. Partners of partnerships holding preferred shares or ADSs should consult their own tax advisers.

In general, for U.S. federal income tax purposes, holders of American Depositary Receipts evidencing ADSs will be treated as the beneficial owners of the preferred shares represented by those ADSs. Accordingly, deposits and withdrawals of our preferred shares by U.S. holders in exchange for ADSs will not result in the realization of gain or loss for U.S. federal income tax purposes.

Taxation of Distributions

In general, distributions with respect to our preferred shares or the ADSs (which likely would include distributions of notional interest charges attributed to shareholders' equity, as described above under [Brazilian Tax Considerations Distribution of Interest on Capital](#)) will constitute dividends for U.S. federal income tax purposes, to the extent made from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. If a distribution exceeds the amount of our current and accumulated earnings and profits, the excess will be treated as a non-taxable return of capital to the extent of your tax basis in our preferred shares or ADSs, and thereafter as capital gain. As used below, the term dividend means a distribution that constitutes a dividend for U.S. federal income tax purposes.

The gross amount of any taxable dividend (including amounts withheld in respect of Brazilian taxes) paid with respect to our preferred shares or ADSs generally will be subject to U.S. federal income taxation as ordinary dividend income and will not be eligible for the dividends received deduction allowed to corporations. Taxable dividends paid in Brazilian currency will be included in your gross income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the date you receive the dividends, or, in the case of dividends you receive in respect of ADSs, on the date the dividends are received by the depositary, whether or not converted into U.S. dollars. You will have a tax basis in any distributed Brazilian currency equal to the amount included in gross income, and any gain or loss recognized upon a subsequent disposition of such Brazilian currency generally will be ordinary income or loss. If dividends paid in Brazilian currency are converted into U.S. dollars on the day you or

the depositary, as the case may be, receive such dividends, you generally should not be required to recognize foreign currency gain or loss in respect of the dividend income. Such foreign currency gain or loss, if any, will be U.S. source ordinary income or loss. We urge you to consult your own tax advisers regarding the treatment of any foreign currency gain or loss if any Brazilian currency received by you or the depositary is not converted into U.S. dollars on the date of receipt.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual prior to January 1, 2009 with respect to the ADSs will be subject to taxation at a maximum rate of 15% if the dividends represent qualified dividend income. Dividends paid on the ADSs will be treated as qualified dividend income if (i) the ADSs are readily tradable on an established securities market in the United States and (ii) we were not in the year prior to the year in which the dividend was paid, and are not in the year in which the dividend is paid, a passive foreign investment company (PFIC). Under current guidance issued by the IRS, the ADSs should qualify as readily tradable on an established securities market in the United States so long as they are listed on the New York Stock Exchange. However, no assurances can be given that the ADSs will be or remain readily tradable under future guidance. Based on our audited financial statements, financial projections, relevant market and shareholder data, and current estimates regarding the value and nature of our assets, we believe that we were not treated as a PFIC for U.S. federal income tax purposes with respect to our 2004 taxable year. However, because these determinations are based on the nature of our income and assets from time to time, and involve the application of complex tax rules, no assurances can be provided that we will not be considered a PFIC for the current, or any past or future tax year. See *Passive Foreign Investment Company Rules* below.

Based on existing guidance, it is not entirely clear whether dividends received with respect to the preferred shares will be treated as qualified dividend income, because the preferred shares are not themselves listed on a U.S. exchange. In addition, the U.S. Treasury Department has announced its intention to promulgate rules pursuant to which holders of ADSs or preferred stock and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to establish that dividends are treated as qualified dividend income. Because such procedures have not yet been issued, we are not certain that we will be able to comply with them. U.S. holders of ADSs and preferred shares should consult their own tax advisers regarding the availability of the preferential U.S. federal income tax rates for qualified dividend income in the light of their own particular circumstances.

For foreign tax credit purposes, dividends paid with respect to our preferred shares or ADSs generally will be treated as income from sources outside the United States. The limitation on foreign taxes eligible for the credit is calculated separately with respect to specific classes of income. For this purpose, dividends paid by us generally will constitute passive (or possibly, in the case of certain U.S. holders, financial services) income. U.S. holders should note, however, that recently enacted legislation eliminates the financial services income category with respect to taxable years beginning after December 31, 2006. Under this legislation, the foreign tax credit limitation categories will be limited to passive category income and general category income. Subject to generally applicable limitations under U.S. federal income tax law, Brazilian withholding tax imposed on such dividends, if any, will be eligible for credit against a U.S. holder's U.S. federal income tax liability (or at a U.S. holder's election, all foreign income taxes paid may instead be deducted in computing such holder's taxable income). In general, special rules will apply to the calculation of foreign tax credits in respect of dividend income that is subject to preferential rates of U.S. federal income tax. U.S. holders should be aware that the IRS has expressed concern that parties to whom ADSs are released may be taking actions that are inconsistent with the claiming of foreign tax credits by U.S. holders of ADSs. Accordingly, the discussion above regarding the creditability of Brazilian withholding tax on dividends could be affected by future actions that may be taken by the IRS. The rules with respect to foreign tax credits are complex and U.S. holders should consult their own tax advisers regarding the availability of foreign tax credits in light of their particular circumstances.

Taxation of Capital Gains

In general, gain or loss, if any, realized upon a sale or other taxable disposition of our preferred shares or ADSs will be subject to U.S. federal income taxation as capital gain or loss in an amount equal to the difference between the amount realized (including the gross amounts of the proceeds of the sale or other taxable disposition before deduction of any Brazilian tax) on the sale or other taxable disposition and your adjusted tax basis in our preferred shares or ADSs. Such capital gain or loss will be long-term capital gain or loss if at the time of sale or other taxable disposition you held our preferred shares or ADSs for more than one year. Certain non-corporate U.S. holders (including individuals) are eligible for preferential rates of U.S. federal income taxation in respect of long-term capital gains. The deduction for capital losses is subject to certain limitations under the Code. Gain (or loss), if any, recognized by a U.S. holder on the sale or other taxable disposition of our preferred shares or ADSs

generally will be treated as U.S. source income (or loss) for U.S. foreign tax credit purposes. Consequently, if a Brazilian withholding tax is imposed on the sale or other taxable disposition of our preferred shares or ADSs, a U.S. holder that does not receive sufficient foreign source income from other sources may not be able to derive effective U.S. foreign tax credit benefits in respect of such Brazilian withholding tax. U.S. holders of our preferred shares or ADSs should consult their own tax advisers regarding the application of the U.S. foreign tax credit rules to their investment in, and disposition of, such shares or ADSs.

Passive Foreign Investment Company Rules

Special U.S. federal income tax rules apply to U.S. persons owning shares of a PFIC. A non-U.S. corporation generally will be classified as a PFIC for U.S. federal income tax purposes in any taxable year in which, after applying relevant look-through rules with respect to the income and assets of subsidiaries, either:

- at least 75% of its gross income is passive income ; or
- on average at least 50% of the gross value of its assets is attributable to assets that produce passive income or are held for the production of passive income.

For this purpose, passive income generally includes, among other things, dividends, interest, rents, royalties, gains from the disposition of passive assets and gains from commodities transactions.

Based on certain estimates of our current and projected gross income and gross assets, we do not expect our preferred shares or ADSs to be considered shares of a PFIC for our current fiscal year or for foreseeable future fiscal years. However, because the determination of whether our preferred shares or ADSs constitute shares of a PFIC will be made by us on an annual basis, is based upon the composition of our income and assets (including, among others, entities in which we hold at least a 25% interest), and the nature of our activities, from time to time, and because there are uncertainties in the application of the relevant rules, we cannot assure you that our preferred shares or ADSs will not be considered shares of a PFIC for any fiscal year. Moreover, we will not obtain an opinion of counsel, and no ruling will be sought from the IRS, regarding our annual PFIC determination. If our preferred shares or ADSs were shares of a PFIC for any fiscal year, U.S. holders (including certain indirect U.S. holders) may be subject to adverse U.S. federal income tax consequences upon a sale or other disposition of such preferred shares or ADSs, or upon the receipt of certain distributions from us (including imposition of an interest charge on gains or excess distributions attributable to prior years in the U.S. holder's holding period during which we were determined to be a PFIC), unless such U.S. holders made certain available elections, generally for the first taxable year for which shares of a PFIC were considered to be held.

If you are a U.S. holder of marketable stock in a PFIC, you may make a mark-to-market election, provided the PFIC stock is regularly traded on a qualified exchange. Under applicable Treasury regulations, a qualified exchange includes a national securities exchange, such as the New York Stock Exchange, that is registered with the SEC or the national market system established under the Securities Exchange Act of 1934. Also, under applicable Treasury Regulations, PFIC stock traded on a qualified exchange is regularly traded on such exchange for any calendar year during which such stock is traded, other than in *de minimis* quantities, on at least 15 days during each calendar quarter. We cannot assure you that our stock will be treated as regularly traded for this purpose.

If the mark-to-market election is made, you, as the electing U.S. holder, generally would (i) include in gross income, entirely as ordinary income, an amount equal to the difference between the fair market value of the PFIC stock as of the close of such taxable year and its adjusted tax basis, and (ii) deduct as an ordinary loss the excess, if any, of the adjusted tax basis of the PFIC stock over its fair market value at the end of the taxable year, but only to the extent of the amount previously included in gross income as a result of the mark-to-market election.

The mark-to-market election is made with respect to marketable stock in a PFIC on a shareholder-by-shareholder basis and, once made, can only be revoked with the consent of the IRS. If we are deemed to be a PFIC for a taxable year, dividends on our ADSs would not constitute qualified dividend income subject to preferential rates of U.S. federal income tax, as discussed above. Special rules would apply if the mark-to-market election is not made for the first taxable year in which a U.S. person owns stock of a PFIC. You should consult with your tax advisor regarding the application of the PFIC rules to our preferred shares or ADSs and the availability and advisability of making an election to avoid the adverse U.S. federal income tax consequences of the PFIC rules should we be considered a PFIC for any taxable year.

U.S. Backup Withholding and Information Reporting

If you are a U.S. holder of our preferred shares or ADSs, you may, under certain circumstances, be subject to information reporting and backup withholding (currently at the rate of 28%), with respect to certain payments to U.S. holders, such as dividends we pay or the proceeds of a sale of our preferred shares or ADSs, unless you (i) are a corporation or come within certain other exempt categories, and demonstrate this fact when so required, or (ii) provide a correct taxpayer identification number and certify that you are not subject to backup withholding, and otherwise comply with applicable requirements of the backup withholding rules. Backup withholding is not an additional tax. Any amount withheld under these rules will be creditable against your U.S. federal income tax liability, provided the requisite information is timely furnished to the IRS.

H. Documents on Display

We are subject to the information requirements of the Securities Exchange Act of 1934, as amended, pursuant to which we file reports and other information with the U.S. Securities and Exchange Commission, or the Commission. Reports and other information filed by us with the Commission may be inspected and copied at the public reference facilities maintained by the Commission at Room 1024, 450 Fifth Street, N.W., Washington, D.C. 20549, and at the Commission's Regional Offices at 233 Broadway, New York, New York 10279 and Northwestern Atrium Center, 500 West Madison Street, Suite 1400, Chicago, IL 60661-2511. You may obtain copies of this material by mail from the Public Reference Section of the Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, at prescribed rates. You may also inspect these reports and other information at the offices of the New York Stock Exchange, 11 Wall Street, New York, New York 10005, on which our ADSs are listed. We also file financial statements and other periodic reports with the CVM.

Copies of our annual report on Form 20-F and documents referred to in this annual report and our bylaws will be available for inspection upon request at our offices at SCN Quadra 4, Bloco B, Edifício Centro Empresarial Varig, Torre Oeste, sala 702-A, 70714-000 Brasilia DF, Brazil.

I. Subsidiary Information

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are primarily exposed to market risk from changes in both foreign currency exchange rates and interest rates. We are exposed to foreign exchange rate risk because certain of our costs and debt are denominated in currencies, primarily the U.S. dollar, other than the *real*, which is the currency in which we earn our revenues. Similarly, we are subject to market risk resulting from changes in interest rates, which may affect the cost of our financing. Except for swap instruments relating to foreign currency denominated debt, as described below, we do not use derivative instruments, such as foreign exchange forward contracts, foreign currency options and forward rate agreements, to manage these market risks, nor do we hold or issue derivative or other financial instruments for trading purposes.

Exchange Rate Risk

We have exchange rate exposure with respect to the U.S. dollar and other foreign currencies. At December 31, 2004, R\$424.3 million of our indebtedness was indexed to foreign currencies (of which R\$399.7 million was denominated in U.S. dollars and R\$24.6 million was indexed to the average cost of BNDES's currency basket). As of December 31, 2004, we had cross-currency interest swap agreements in effect for 52% of our total foreign currency indexed debt to mitigate foreign exchange rate risks.

Interest Rate Risk

At December 31, 2004, we had R\$482.8 million in loans and financing outstanding and bearing interest at floating rates. We invest our excess liquidity (which was R\$960.5 million at December 31, 2004) mainly in short-term instruments. At December 31, 2004, we had swap instruments in place in a notional amount of R\$222.1 million to manage our interest rate risk. The potential loss in earnings to us over one year that would result from a hypothetical, instantaneous and unfavorable change of 100 basis points in the interest rates applicable to financial assets and liabilities on December 31, 2004 would be approximately R\$12.7 million.

The above sensitivity analysis is based on the assumption of an unfavorable 100 basis point movement of the interest rates applicable to each homogeneous category of financial assets and liabilities and sustained over a period of one year. A homogeneous category is defined according to the currency in which financial assets and liabilities are denominated and assumes the same interest rate movement within each homogeneous category (e.g., U.S. dollars). As a result, our interest rate risk sensitivity model may overstate the impact of interest rate fluctuations for such financial instruments as consistently unfavorable movements of all interest rates are unlikely.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II**ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

Currently, we are not in default under any of our obligations nor is any payment of dividends in arrears. In 2002, we breached certain financial covenants contained in a credit agreement with the Brazilian Economic and Social Development Bank, or BNDES, and a consortium of three Brazilian banks. Waivers were obtained in connection with the covenant breaches. During 2003, we breached certain of our financial covenants contained in a credit agreement with the Export Development Corporation of Canada and other parties, in respect of which a waiver was obtained.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

ITEM 15. DISCLOSURE CONTROLS AND PROCEDURES

Our chief executive officer and our chief financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in the U.S. Securities Exchange Act of 1934 under Rules 13a-15(e)) as of the end of the period covered by this annual report, have concluded that, as of that date, our disclosure controls and procedures were effective to ensure that material information relating to us was made known to them by others within our company particularly during the period in which this annual report and accounts was being prepared.

There were no significant changes in our internal controls or in other factors that could significantly affect these controls and procedures subsequent to the date our chief executive officer and our chief financial officer completed their evaluation, nor were there any significant deficiencies or material weaknesses in our internal controls requiring corrective actions.

ITEM 16.**A. Audit Committee Financial Expert**

We have determined that Luiz Otávio Nunes West and Gilberto Braga, two members of our fiscal council (*conselho fiscal*), which is a board of statutory auditors, are audit committee financial experts as defined by the United States Securities and Exchange Commission.

B. Code of Ethics

Our board of directors has adopted a code of ethics applicable to our directors, officers and employees, including our principal executive officer, principal financial officer and controller, providing a whistleblower protection for those who report violations to the code terms. There were no waivers of compliance with our code of ethics in 2004.

C. Principal Accountants Fees and Services

The following table sets forth by category of service the total fees for services performed by PricewaterhouseCoopers Auditores Independentes during the fiscal year ended December 31, 2004 and by Ernst & Young Auditores Independentes S/S during the fiscal year ended December 31, 2003:

	2004	2003
	(in thousands of R\$)	
Audit Fees	\$193	\$531
Audit-Related Fees	\$--	\$--
Tax Fees	\$--	\$2
All Other Fees	\$--	\$226
Total	\$193	\$759

Audit Fees

Audit fees in 2004 and 2003 consisted of the aggregate fees, including expenses, billed by PricewaterhouseCoopers Auditores Independentes and Ernst & Young Auditores Independentes S/S, respectively, in connection with the audit of our annual financial statements prepared under U.S. GAAP and included in our annual report on Form 20-F, and in connection with the audit of our annual statutory financial statements prepared under Brazilian GAAP and reviews of our quarterly financial information filed with the CVM.

Audit-Related Fees

None.

Tax Fees

Tax fees in 2003 consisted of the aggregate fees, including expenses, billed by Ernst & Young Auditores Independentes S/S in connection with services for tax compliance, tax planning and tax advice.

All Other Fees

The aggregate of all other fees, other than those described above, including expenses, billed by Ernst & Young Auditores Independentes S/S in 2003 related to a review of processes and procedures for data services (R\$207,000 in 2003), actuarial review of the mathematical model for a proposed subscriber loyalty program (R\$19,000 in 2003). All non-audit services carried out subsequent to May 6, 2003 were pre-approved by our board of directors, as required by Rule 2-01 of Regulation S-X.

D. Exemptions from the Listing Standards for Audit Committees

Pursuant to the exemption under Rule 10A-3 (c)(3) of the U.S. Securities Exchange Act of 1934, we have a fiscal council (*conselho fiscal*), which is a board of statutory auditors that follows the requirements of Rule 10A-3(c)(3).

E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

None.

GLOSSARY OF TELECOMMUNICATIONS TERMS

AMPS (Advanced Mobile Phone System):	The analogue mobile phone technology used in North and South Americas and in approximately 35 countries. Analogue technology represents information by a continuously variable physical quantity such as voltage. It operates in the 800MHz band using FDMA (Frequency Division Multiple Access) technology, which is a transmission technique where the assigned frequency band for a network is divided into sub-bands that are allocated to a subscriber for the duration of their calls.
base station:	A radio transmitter/receiver that maintains communications with the cellular telephones within a given cell. Each base station is interconnected with one MSO (Mobile Switch Office).
CDMA (Code Division Multiple Access):	Also known as spread spectrum, CDMA cellular systems use a single frequency band for all traffic, differentiating individual transmissions by assigning them unique codes before the transmission. There are a number of CDMA variations.
CDMA ONE:	The first commercial CDMA cellular system, deployed in North America and Korea and also known as IS-95.
CDMA 2000:	A member of the IMT-2000 family, compatible with CDMA ONE.
cell:	The area covered by a cellular base station. A cell site may allocate its antennas to service several cells from one location.
Cellular service:	A mobile telecommunications service provided by means of a network of interconnected base stations, each of which covers one small geographic cell within the total cellular telecommunications system service area.
Channel:	One of a number of discrete frequency ranges utilized by base stations and cellular phones.
digital:	A method for representing information as numbers with discrete values; usually expressed as a sequence of bits.
exchange:	See switch.
GSM (Global System for Mobile):	Global system for mobile communications, the second-generation digital technology originally developed for Europe. Initially developed for operation in the 900MHz band and subsequently modified for the 850, 1800 and 1900MHz bands. GSM originally stood for <i>Groupe Speciale Mobile</i> , the CEPT (Conference of European Post and Telecommunications) committee that began the GSM standardization process.
IMT 2000:	The family of third-generation technologies approved by the ITU (International Telecommunications Union).
network:	

An interconnected collection of elements. In a telephone network, these consist of switches connected to each other and to customer equipment. The transmission equipment may be based on fiber optic or metallic cable or point- to-point radio connections.

network usage charge: Amount paid per minute charged by network operators for the use of their network by other network operators. Also known as interconnection fee.

penetration: The percentage of a given total population that owns a mobile phone.

repeater:	A device that amplifies an input signal for retransmission.
roaming:	A function that enables subscribers to use their cellular telephones on networks of service providers other than the one with which they signed their initial contract.
SMP (<i>Serviço Móvel Pessoal</i>):	A specific Brazilian set of rules for advanced digital cellular service, enacted by Anatel through Resolution no. 316, dated September 27, 2002, to replace the former SMC (<i>Serviço Móvel Celular</i>) cellular service rules. SMP is also an independent technology definition of service to which was originally allocated the 1.8GHz frequency band, almost equivalent to the North American PCS.
switch:	A device that opens or closes circuits or selects the paths or circuits to be used for transmission of information. Switching is the process of interconnecting circuits to form a transmission path between users. Switches may also record information for billing and control purposes.
TDMA (Time Division Multiple Access):	A technique for multiplexing multiple users onto a single channel on a single carrier by splitting the carrier into time slots and allocating these on an as-needed basis.
UMTS:	Third-generation wireless telecommunications system designed by ETSI (European Telecommunications Standard Institute) in accordance with ITU-T's (International Telecommunication Union) standard. It is viewed as the most likely upgrade of GSM systems.

SIGNATURES

Pursuant to the requirements of Section 12 of the Securities Exchange Act, as amended, the registrant certifies that it meets all of the requirements for filing this annual report on Form 20-F and has duly caused this annual report to be signed on its behalf by the undersigned, thereunto duly authorized.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
Telemig Celular Participações S.A.

In our opinion, the accompanying consolidated balance sheet and the related consolidated statements of operations and comprehensive income, of changes in shareholders' equity and of cash flows present fairly, in all material respects, the financial position of Telemig Celular Participações S.A. and its subsidiary (together the Company) at December 31, 2004, and the results of their operations and their cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion. The financial statements of the Company as of December 31, 2003 and for the years ended December 31, 2003 and 2002 were audited by other auditors whose report dated March 3, 2004 expressed an unqualified opinion on those statements.

June 15, 2005

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders

Telemig Celular Participações S.A.

We have audited the accompanying consolidated balance sheet of Telemig Celular Participações S.A. as of December 31, 2003, and the related consolidated statements of income and comprehensive income, changes in shareholders' equity, and cash flows for each of the two years in the period ended December 31, 2003. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Telemig Celular Participações S.A. at December 31, 2003, and the consolidated results of its operations and its cash flows for each of the two years in the period ended December 31, 2003, in conformity with accounting principles generally accepted in the United States.

Brasília, March 3, 2004

Telemig Celular Participações S.A.

Notes to the Consolidated Financial Statements Expressed in thousands of Brazilian *reais*, unless otherwise stated

1 Background and Description of Business

Telemig Celular Participações S.A. is a publicly held company listed on the Brazilian and New York stock exchanges and the parent company of Telemig Celular S.A., a Brazilian listed company, holding 89.18% of its subsidiary's voting capital and 82.94% of its total capital stock.

Telemig Celular Participações S.A. and its subsidiary, Telemig Celular S.A. (together the Company or we), are the primary suppliers of cellular telecommunications services in the state of Minas Gerais under the terms of a concession granted by the Brazilian Federal Government on November 4, 1997, which expires in 2008. The Company is controlled by Telpart Participações S.A., or Telpart, a consortium comprised of: (i) Newtel Participações S.A., or Newtel, which owns approximately 51% of Telpart, and is controlled indirectly by investment and mutual funds and several Brazilian pension funds; and (ii) TPSA do Brasil Ltda., or TPSA, which owns approximately 49% of Telpart, and is controlled by Highlake International Business Company Ltd., or Highlake, which is controlled by Opportunity Fund. At December 31, 2004, Telpart owns, of record, 52.7% of the outstanding voting shares.

The Company's business, including the services it may provide and the rates it charges, is regulated by Anatel (*Agência Nacional de Telecomunicações*) and is fully dependent upon the cellular telecommunications authorization granted by the Federal Government.

In 2002, Anatel changed the December 2000 Personal Mobile Service Contract (SMP - *Serviço Móvel Pessoal*), encouraging companies operating under the Cellular Mobile Service Contract (SMC - *Serviço Móvel Celular*) to migrate to the SMP regime. SMP is an authorization contract and it replaces the SMC (concession contract). New rules are applicable to companies that migrate.

On February 19, 2004, Telemig Celular S.A. signed a contract with Anatel to migrate from the SMC regime to the SMP regime. The authorization was granted for an indeterminate period. The Company will be required to apply for an extension of the right to use the radio frequencies which expire in 2009.

Under the SMP regime, the Company will no longer receive payment from its subscribers for outbound long-distance traffic, but will receive payment for the use of its network from August 1, 2004, in accordance with the network usage remuneration plan. However, the SMP regime establishes free negotiation of the network usage among telecommunication service providers beginning June 30, 2004. The subsidiary began to operate under the SMP rules on August 1, 2004.

Migration to GSM technology

In November 2004, the subsidiary started operating with the GSM EDGE standard. EDGE,

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements**
Expressed in thousands of Brazilian *reals*, unless otherwise stated

Enhanced Data Rate for GSM Evolution, allows GSM networks to support the first Third Generation (3G) services, such as video downloads at greater speed. It has a higher data transmission rate and enables a whole range of new services, such as sending and receiving photographs, videos and audio, all at high speed, in addition to much faster communication between the terminal and the Internet.

The TDMA system is being maintained with the same standard of quality standard while there is a market and/or subscribers interested in using this technology. The subscribers will have the option to choose if and when they wish to migrate to the GSM EDGE, they may do so without changing their phone number. Development of the new technology is being implemented by means of a parallel network to the TDMA network (overlay). The main partner in this venture is Ericsson, which is the supplier of the GSM EDGE network.

Authorization for Rendering Personal Mobile Service - "Triângulo Mineiro" Region (Minas Triangle)

The Company was granted authorization to render SMP services on the radio frequency E in the municipalities comprising the Sector 3 of Region I ("Triângulo Mineiro") of the Authorization General Plan (PGO) following a successful bid to Anatel on September 21, 2004. The amount offered was R\$ 9,725 (Note 7). The Company is awaiting final conclusion of the bid process to sign the Authorization Term allowing it to render services on this radio frequency in the region.

The Company has made and will continue to make significant capital and operating expenditures on an ongoing basis in order to deploy its cellular telecommunications network, which will require the Company to seek additional financing. Some of these investments may be financed through debt denominated in foreign currencies. A significant devaluation of the Brazilian *real* could affect the Company's financial position, cash flows or results of operations.

2 Presentation of the Financial Statements

These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) and rules and regulations adopted by the US Securities and Exchange Commission.

The Company has also prepared and issued consolidated financial statements in accordance with accounting practices adopted in Brazil and rules and regulations adopted by the Brazilian Securities Commission (CVM) (Brazilian GAAP), not included herewith.

The Brazilian GAAP distributable reserves are the basis from which dividends are payable.

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions relating to the reporting of assets and liabilities and the

disclosure of contingent assets and liabilities at the date of

F-11

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements**
Expressed in thousands of Brazilian *reais*, unless otherwise stated

the financial statements and the reported amounts of revenues and expenses during the period reported. Actual results could differ from those estimates.

3 Summary of Significant Accounting Policies**(a) Consolidation**

The consolidated financial statements include the accounts of Telemig Celular Participações S.A. and its subsidiary. All significant intercompany balances and transactions have been eliminated.

(b) Cash and cash equivalents

Cash and cash equivalents consist of highly liquid investments with original maturities of three months or less at the time of purchase which are readily convertible to known amounts of cash and which are so near their maturity that they present insignificant risk of changes in value because of changes in interest rates.

(c) Inventories

Inventories are stated at the lower of average cost or market. Inventories to be applied in the expansion of the network are classified as property and equipment, and goods intended for sale, Handsets, pre-paid cards and accessories are classified as current assets.

(d) Foreign currency transactions

Transactions in foreign currency are recorded at the prevailing exchange rate at the time of the related transactions. Foreign currency denominated assets and liabilities are translated using the exchange rate at the balance sheet date. Exchange differences are recognized in the statement of operations as they occur.

(e) Property and equipment

Property and equipment are stated at cost. Depreciation is provided using the straight-line method based on the estimated useful lives of the underlying assets as follows:

F-12

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Years	Years beginning 2004	2003	Years prior to 2003
Buildings	20	20	20
Network equipment (Note 5)	3 to 5	4 to 5	8
Other	5 to 10	5 to 10	5 to 10

Interest incurred on borrowings is capitalized as part of property and equipment until such time as the asset is placed in service, and to the extent that borrowings do not exceed construction-in-progress.

The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

The wireless telecommunications industry is rapidly evolving and therefore it is reasonably possible that property and equipment could become impaired as a result of technological or other industry changes. For assets the Company intends to hold for use, if the total of the expected future undiscounted cash flows is less than the carrying amount of the asset, a loss is recognized for the difference between the fair value and the carrying value of the assets. For assets the Company intends to dispose of, a loss is recognized for the amount that the estimated fair value, less costs to sell, is less than the carrying value of the assets. The Company uses the discounted cash flow method to estimate the fair value of long-lived assets.

(f) Income taxes

Income taxes in Brazil comprise Federal income tax and social contribution taxes, as recorded in the Company's statutory accounting records. There are no state or local income taxes in Brazil. The Company has applied SFAS No. 109, "Accounting for Income Taxes", for all years presented. The effect of adjustments made to reflect the requirements of US GAAP, as well as differences between the reporting basis of assets and the amounts included in the tax records, are recognized as temporary differences for the purpose of recording deferred income taxes. Net operating loss carryforwards are recognized as deferred tax assets as losses are incurred. A valuation allowance is recorded when realization of the loss carryforwards are not considered to be more likely than not.

(g) Revenue recognition

Revenues from services and sales of handsets and accessories are recognized when the service is provided or when the equipment is sold and delivered. Revenues from cellular telephone services consist of subscription charges, usage charges, network usage charges, long distance charges and charges for maintenance and other customer services. Unbilled revenues from the billing date to the month-end are measured and recognized as revenue during the month in which the service was provided. Revenues from equipment sales refer to sales of handsets and accessories.

Revenues from the sales of prepaid cards are recognized according to the minutes used for each card. Revenue from unused minutes is deferred until used. Amounts deferred, which are not significant, are included in other liabilities

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements**
Expressed in thousands of Brazilian reais, unless otherwise stated**(h) Pension and other post-retirement benefits**

The Company participates in (i) a multi-employer pension plan that covers employees who retired prior to January 30, 2000 and (ii) multiple employer pension plans that cover its active employees and employees who retired after 2000. The Company also participates in a multi-employer post-retirement benefit plan for all of its employees. The Company accounts for such benefit costs in accordance with SFAS 87, *Employers Accounting for Pensions* (Note 12). Accounting for defined benefits plans requires the use of an actuarial method for determining defined benefit pension costs and provides for the deferral of actuarial gains and losses (in excess of a specific corridor) that result from changes in assumptions or actual results that may differ from that which was previously assumed. For defined contribution plans, the Company recognizes as an expense in the statement of operations, the contributions accrued in favor of the beneficiaries of the plan during the relevant period.

(i) Advertising costs

Advertising costs are expensed as incurred and included in selling, general and administrative expenses. Such costs amounted to R\$26,820, R\$22,978 and R\$27,749 for the years ended December 31, 2004, 2003 and 2002, respectively.

(j) Stock-based compensation

The Company grants stock options for a fixed number of shares to employees. The Company accounts for stock option grants in accordance with APB Opinion No. 25 *Accounting for Stock Issued to Employees* and related Interpretations.

Pro forma information regarding net income and earnings per share is required by SFAS 123 *Accounting for Stock-Based Compensation*, and has been determined as if the Company had accounted for its employee stock options under the fair value method of that Statement. The fair value for these options was estimated at the date of grant using a Black-Scholes option-pricing model with the following weighted-average assumptions:

	2004	2003	2002
Risk-free interest rate	6%	6%	6%
Dividend yield	6%	6%	6%
Volatility factor of the expected market price of the			
Company's preferred stock	0.58	0.61	0.66
Weighted-average expected life of the option	6	6	6

Edgar Filing: TELEMIG CELULAR PARTICIPACOES SA - Form 20-F

The Company's pro forma information in accordance with SFAS 123 for the years ended December 31, 2004, 2003, and 2002 is as follows:

	2004	2003	2002
Net income as reported	150,595	215,583	22,240
Basic and diluted earnings per thousand of shares (in <i>reais</i>)			
Preferred	0.43	0.62	0.07

F-14

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Common	0.43	0.62	0.07
Compensation expense under the fair value method	(317)	(50)	(75)
Pro forma net income	150,278	215,533	22,165
Pro forma basic and diluted earnings per thousand of shares (in reais)			
Preferred	0.43	0.62	0.07
Common	0.43	0.62	0.07

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options, which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options.

For purposes of pro forma disclosures, the estimated fair value of the options is amortized to expense over the options expected life.

(k) Swaps

The Company entered into cross-currency interest rate swap agreements as part of its program to manage its US dollar denominated debt portfolio and related costs of borrowing. The Company recognizes its cross-currency and interest rate swap agreements on the balance sheet at fair value; adjustments to fair value are recorded through income.

(l) Segment information

The Company has adopted SFAS No. 131 "Disclosures about Segments of an Enterprise and Related Information" which introduces a "management approach" concept for reporting segment information, whereby financial information is required to be reported on the basis that the chief operating decision-maker uses such information internally for deciding how to allocate resources to segments and in assessing performance. Management, however, has concluded that the Company operates in a single segment - telecommunication services provider - and does not consider additional segment disclosures to be necessary.

(m) New accounting pronouncements

The FASB recently issued a number of standards and interpretations. The following standards and interpretations will be in effect in the near future. Management is evaluating the possible impact of these standards and interpretations, but does not expect they will significantly affect the Company's consolidated financial statements:

F-15

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

- SFAS No. 153 - "Exchanges of Nonmonetary Assets" was issued in December 2004 and eliminates the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. This Statement is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005.
- SFAS No. 123R - "Share-Based Payment" was issued in December 2004 and sets accounting requirements for "share-based" compensation to employees, and provides guidance on accounting for awards to non-employees. This Statement will require companies to recognize in the statement of operations the grant-date fair value of stock options and other equity-based compensation issued to employees, but expresses no preference for a type of valuation model.
Public companies with calendar year-ends will be required to adopt SFAS 123R in 2006.
- Emerging Issues Task Force (EITF) Issue 03-06 "Participating Securities and the Two-Class Method under SFAS No. 128, Earnings per Share" is effective for reporting periods beginning after March 31, 2004. Prior period earnings per share data should be restated to conform to the guidance in this Issue. The EITF addresses a number of questions regarding the computation of earnings per share ("EPS") by companies that have issued securities other than common stock that contractually entitle the holder to participate in dividends and earnings of the company when, and if, it declares dividends on its common stock. The EITF also provides further guidance in applying the two-class method of calculating EPS. It clarifies what constitutes a participating security and how to apply the two-class method of computing EPS once it is determined that a security is participating, including how to allocate undistributed earnings to such a security.

4 Cash and Cash Equivalents

Other	389,947	189,148	200,799
Construction-in-progress	31,303	-	31,303
	1,481,048	920,561	560,487
December 31, 2004			
Buildings	39,555	26,616	12,939
Network equipment	1,221,174	977,702	243,472
Other	310,448	148,144	162,304
Construction-in-progress	190,439	-	190,439
	1,761,616	1,152,462	609,154

The Company incurred interest of R\$54,312, R\$100,068 and R\$92,796 of which R\$7,552, R\$3,008 and R\$4,659 was capitalized as property and equipment for the years ended December 31, 2004, 2003 and 2002, respectively

In 2003, due to the imminent changes in the wireless technology and the Company's plans to migrate its technology from TDMA to GSM, the Company modified the useful lives of its TDMA network and related equipment. The expected useful lives of these assets were reduced from eight to four years, as of January 1, 2003. Accordingly, 2003 consolidated net income was reduced by the increase of R\$80,210 in depreciation expense (R\$43,860 net of taxes and minority interest), representing R\$0.23 per thousand shares (R\$0.12 net of taxes and minority interest).

In 2004, based on new studies of the expected useful lives of its TDMA network, considering updated migration estimates of the Company's TDMA subscribers to GSM technology, management accelerated the depreciation of TDMA network and related equipment. The expected useful lives of these assets were reduced from four to three years, as of January 1, 2004. Accordingly, 2004 consolidated net income was reduced by the increase of R\$34,200 in depreciation expense (R\$18,720 net of taxes and minority interest), representing R\$0.10 per thousand shares (R\$0.05 net of taxes and minority interest).

On January 12, 2004, Telemig Celular S.A., together with Amazônia Celular S.A., which is a subsidiary of Tele Norte Celular Participações and is jointly controlled by the same principal shareholders group as that which controls the Company, consummated an international debt offering, through the issuance of unsecured senior notes, negotiated together as note units. The total value of the transaction was US\$120 million (R\$337,956 at January 12, 2004), US\$80 million (R\$225,304 at January 12, 2004) of which was provided to Telemig Celular S.A. and US\$40 million (R\$112,652 at January 12, 2004) provided to Amazônia Celular S.A. Issuance terms are as follows: Coupon: 8.75% p.a.; Issuance price: 99.504%; Yield to maturity: 8.875%; Term: 5 years

The unsecured senior notes and the financing contracts raised by Telemig Celular S.A. from the BNDES and the EDC contain covenants related to the use of those funds, as specified in the contracts, and the maintenance of balance sheet ratios. In the event of default, due dates may be accelerated.

The financing agreement entered into with EDC is covered by a guarantee provided by the Company, promissory notes, liens and mortgages on property and equipment in the amount of R\$ 14,725. The financing agreements entered into with BNDES are covered by a guarantee provided by the Company, promissory notes and a lien on receivables amounting to 1.4 times the highest installment due. The financing agreement entered into with Dresdner Bank is guaranteed by promissory notes.

	23,037

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****8 Shareholders Equity****(a) Capital**

The Company's authorized share capital at December 31, 2004 and 2003, comprised 700,000,000 thousand shares. At December 31, 2004, 219,873,978 thousand preferred shares (217,788,637 thousand at December 31, 2003) and 130,198,133 thousand common shares (128,963,301 thousand at December 31, 2003) were outstanding.

During 2004, 2003 and 2002, R\$50,579, R\$13,227 and R\$34,481, of retained earnings, respectively, were capitalized in accordance with Brazilian Corporate Law. Such capitalization increased the number of shares outstanding but did not involve issuance of additional shares.

Changes in number of shares outstanding (thousands):

	Common shares	Preferred shares	Total
At December 31, 2001	125,171,982	211,385,993	336,557,975
Issued in April	1,440,587	2,432,812	3,873,399
At December 31, 2002	126,612,569	213,818,805	340,431,374
Issued in April	2,350,732	3,969,832	6,320,564
At December 31, 2003	128,963,301	217,788,637	346,751,938
Issued in April	1,234,832	2,085,341	3,320,173
At December 31, 2004	130,198,133	219,873,978	350,072,111

(b) Share rights

The preferred shares are non-voting, except under limited circumstances, and are entitled to receive, (a) on a priority basis, minimum, annual non-cumulative dividends according to the greater of the following: (i) 6% of the stated value of the Company's preferred shares; or (ii) (a) 3% of the stated value of the Company's shareholders' equity; and (b) the right to a share of the profits, as defined, to be distributed on the same basis as common shares, after common shares have been paid a dividend equal to the minimum preferred dividend mentioned in (a).

All shareholders are entitled to an annual dividend of not less than 25% of the net income of each year if there are accumulated retained earnings, calculated in accordance with Brazilian Corporation Law. Brazilian companies are permitted to treat the distribution to shareholders of interest on shareholders' equity as tax deductible item. This notional interest distribution is treated as a deduction from shareholders' equity in a manner similar to a dividend. A 15% tax is normally withheld and paid by the Company upon credit of the interest. Interest attributed to shareholders' equity is treated as a dividend for purposes of the mandatory dividend payable by the Company.

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Management is required by the Brazilian Corporate Law to propose dividends at year-end to conform to the mandatory minimum dividend regulations. At December 31, 2004, the proposed dividend of R\$41,217 (2003 R\$38,486) was provided as a liability in the statutory financial statements, but will only be reflected as an obligation in these US GAAP financial statements once approved and declared by the shareholders.

If dividends remain unclaimed for a period of three years, a shareholder's right to receive the dividend lapses. During 2004 and 2003, dividends totaling R\$669 and R\$597, respectively, lapsed and were reverted to equity.

In the event of dissolution of the Company, the preferred shares have priority to capital reimbursement.

Dividends and interest on capital paid per thousand shares were:

	2004	2003	2002
Preferred shares	0.11	0.07	0.07
Common shares	0.11	0.07	0.07

(c) Stock option plan

At December 31, 2004 the Company has reserved 588,498 thousand shares of preferred stock for issuance in connection with its stock option plans (464,583 thousand for the 2003 plan and 123,915 thousand for the 2000 plan) (Note 17).

(d) Additional paid-in capital

Additional paid-in capital refers to the reversal related to the remaining portion of the liabilities against TPSA, which was a significant former shareholder (Note 11 (b)).

(e) Capital reserves

On December 28, 1999, our shareholders approved a legal reorganization whereby Telpart contributed assets to the Company, resulting in future tax benefits. We recorded a deferred tax asset of R\$212,045, which will be realized over a period of up to ten years. In accordance with Brazilian Corporation Law, the Company may issue shares (*pro rata* both common and preferred) to Telpart for the amount of the tax benefits recognized. In addition, minority shareholders are granted preemptive rights. If the minority shareholders do not elect to exercise these rights, the shares will be issued to and subscribed for by Telpart.

During 2004, 2003 and 2002, the Company issued 2,085,341 thousand, 3,969,832 thousand and 2,432,812 thousand preferred shares, respectively, and 1,234,832 thousand, 2,350,732 thousand and 1,440,587 thousand common shares, respectively, to the shareholder that contributed the tax benefit. The issuances were reflected as a reduction in Capital reserves.

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements**
Expressed in thousands of Brazilian *reais*, unless otherwise stated**(f) Retained earnings****(i) Appropriated retained earnings**

Appropriated retained earnings are reserve balances, which are restricted as to their distribution that reflect the amounts in the financial statements that were prepared in accordance with Brazilian GAAP. The tax incentive and statutory reserves may be transferred to capital or used to absorb losses in the statutory accounting records, but are not, generally, available for distribution as cash dividends.

The statutory reserve is formed based on (i) appropriations from retained earnings of 5% of annual net income as stated in the Company's financial statements prepared in accordance with Brazilian GAAP and (ii) tax incentive reserve which arises from an option to apply a portion of income tax otherwise payable for the acquisition of capital stock of companies undertaking specified government approved projects. The amount so applied is credited to income tax and subsequently appropriated from retained earnings to this reserve.

(ii) Unappropriated retained earnings

Brazilian law permits the payment of dividends only in *reais* limited to the retained earnings balances in the financial statements prepared in accordance with Brazilian GAAP. Distributable retained earnings (summarized in the following accounts in the statutory financial statements: *Reserva estatutária para investimentos*; *Reserva de lucros a realizar* and *Lucros acumulados*), aggregated R\$473,497 at December 31, 2004 (2003 R\$412,960).

9 Earnings per share

In these consolidated financial statements, information is disclosed per one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchange.

Since the preferred and common shareholders have different dividend, voting and liquidation rights, basic earnings per share has been calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for preferred and common shares according to the dividends to be paid as required by the Company's by-laws and participation rights in undistributed earnings.

Basic earnings per common share is computed by reducing net income by distributable and undistributable net income available to preferred shareholders and dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the period. Net income available to preferred shareholders is the sum of the preferred dividends and the preferred shareholders' portion of undistributed net income.

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian *reais*, unless otherwise stated**

Undistributed net income is computed by deducting preferred dividends and common dividends from net income. Options issued under the Company's 2000 stock options plan are antidilutive for each of the years presented. Options issued under the 2003 stock option plan are dilutive and included in the diluted weighted average number of preferred shares only for the year ended in December 31, 2003.

Under the Company's by-laws, if the Company is able to pay dividends in excess of the minimum requirement for preferred shareholders and the remainder of the net income is sufficient to provide equal dividends to both common and preferred shareholders, then the earnings per share will be the same for both common and preferred shareholders.

The following table sets forth the computation of basic and diluted earnings per thousand common shares:

	2004	2003	2002
Basic and diluted numerator:			
Net income	150,595	215,583	22,240
Net income available to preferred shareholders	94,586	135,404	13,969
Net income available to common shareholders	56,009	80,179	8,271
Basic denominator (in thousands of shares)			
Weighted-average number of shares			
Preferred	219,275,724	216,940,289	213,025,642
Common	129,843,878	128,460,953	126,142,898
Basic earnings per thousand shares (in <i>reais</i>)			
Preferred	0.43	0.62	0.07
Common	0.43	0.62	0.07
Diluted denominator (in thousands of shares)			
Weighted-average number of shares			
Preferred	219,275,724	217,537,785	213,025,642
Common	129,843,878	128,460,953	126,142,898
Diluted earnings per thousand shares (in <i>reais</i>)			
Preferred	0.43	0.62	0.07
Common	0.43	0.62	0.07

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****10 Income Taxes****(a) Statutory rates**

Brazilian income taxes comprise federal income tax and the social contribution taxes. The statutory rates for federal income tax and for the social contribution tax are 25% and 9% at December 31, 2004, respectively. The following is the income tax expense for the years ended December 31, 2004, 2003 and 2002:

	2004	2003	2002
Federal income tax	(75,138)	(65,262)	(26,541)
Social contribution tax	(20,222)	(17,638)	(6,204)
Deferred taxes	9,150	(45,886)	31,610
Income tax expense	(86,210)	(128,786)	(1,135)

(b) Tax reconciliation

The following is a reconciliation of the reported income tax expense and the amount calculated by applying the composite statutory tax rate of 34%:

	2004	2003	2002
Income before taxes and minority interest	268,211	388,789	26,849
Composite statutory rate	34%	34%	34%
Tax expense at statutory rates	(91,192)	(132,188)	(9,129)
Adjustments to derive effective rate:			
Interest on capital paid to minority shareholders	3,551	3,430	2,775
(Non-deductible expenses) net of non-taxable income	1,631	(28)	29
Social contribution enacted rate adjustment	-	-	5,190
Other	(200)	-	-
Income tax expense	(86,210)	(128,786)	(1,135)

During 2002, the enacted social contribution rate was increased from 8% to 9% beginning on January 1, 2003.

F-24

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements**
Expressed in thousands of Brazilian reais, unless otherwise stated**(c) Tax assets and liabilities**

The following is an analysis of deferred income tax assets and liabilities:

	2004	2003
Deferred tax assets:		
Asset related to legal reorganization (Note 8(c))	106,448	128,087
Accrued expenses and provision for contingencies	95,467	64,511
Income tax loss carryforwards	18,250	19,730
Allowance for doubtful accounts	6,459	5,565
Accelerated depreciation	678	1,509
	227,302	219,402
Deferred tax liabilities:		
Capitalized interest	(1,977)	(993)
Cumulative indexation differences	-	(2,234)
Net deferred tax asset	225,325	216,175
Current portion	44,763	39,163
Long-term deferred income taxes	180,562	177,012
Net deferred tax asset	225,325	216,175

Brazilian tax legislation limits the use of tax loss carryforwards to 30% of taxable income per year; the tax loss carryforwards do not expire.

11 Transactions with related parties

The Company has entered into transactions with its controlling shareholders and other related parties for certain services. Transactions with related parties are carried out based on amounts agreed upon by the respective related parties.

(a) Roaming Agreements

Telemig Celular S.A. is a member of a Brazilian roaming committee of cellular operators that includes Amazônia Celular S.A., which is a subsidiary of the Company's affiliate Tele Norte Celular Participações S.A. The purpose of

the committee is to oversee technical and system aspects to assure the highest quality of roaming service. As required by Brazilian regulations, Telemig Celular S.A. and Amazônia Celular S.A. facilitate roaming to their respective subscribers.

(b) TPSA do Brasil Ltda

Until March 26, 2003, Telpart was a corporation owned by Newtel which owned approximately 51% of Telpart and TIW do Brasil Ltda., later renamed TPSA, which owned approximately 49%. On March 26, 2003, Highlake International Business Company Ltd., or Highlake, which is indirectly

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

controlled by investment and mutual funds managed by Banco Opportunity, a related party, acquired TPSA's total share ownership in Telpart.

In March 2003, a dispute involving the reimbursement of certain expenses paid by TPSA on behalf of the Company was settled. The Company reversed R\$1,576 related to the excess of the liability recorded on its books over the amount of the settlement as a credit to shareholders' equity.

(c) Cost Sharing Agreement

In order to optimize resource allocation efficiency among Tele Norte Celular Participações S.A., and its subsidiary, and the Company and its subsidiary, the Company entered into a cost sharing agreement pursuant to which certain costs that are incurred for the benefit of both companies and their subsidiaries are allocated to each company based on criteria designed to reflect the actual use by each company. The costs allocated under this agreement refer primarily to personnel, marketing and outside consulting fees. During the years ended December 31, 2004, 2003 and 2002 the Company charged Tele Norte Celular Participações S.A. and its subsidiary R\$15,079, R\$12,904 and R\$16,345, respectively.

(d) Brasil Telecom S.A.

As from August 1, 2004, the subsidiary began offering the Carrier Selection Code (CSP) option to its subscribers for intercity (VC2 and VC3) and international calls in conformity with the Personal Mobile Service (SMP) rules.

On December 31, 2004, accounts payable to Brasil Telecom S.A., in the amount of R\$34,594 (2003 nil), refer to the transfer of intercity and international calls made by the Company's subscribers using the CSP service of Brasil Telecom S.A. Accounts receivable and service revenues mainly refer to the interconnection revenues for the subsidiary's network usage in such long-distance calls.

12 Pension plan and other post-retirement benefit plans**(a) Defined benefit plans**

The Company participates in a multi-employer defined benefit pension plan (PBS Assistidos - PBS-A) and a post-retirement benefit plan (Plano de Assistência Médica ao Aposentado - PAMA) administered by the *Fundação Sistel de Seguridade Social* (Sistel), a minority shareholder.

In 1999, Sistel approved changes to the plan's statutes resulting in the break up of plan assets and liabilities related to the active participants of each sponsor. Sistel did not break up plan assets and liabilities related to retired participants and, thus, the Company will continue to sponsor the Sistel plan for such retired participants.

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Effective January 2000, the plan was modified and changed into a multiple employer pension plan (PBS - Telemig Celular) with respect to active employees. The plan assets and liabilities related to active employees were transferred into this new plan and the benefits remained unchanged. The post-retirement benefit plans continue unchanged as multi-employer plan. The pension benefit is generally defined as the difference between (i) 90% of the retiree's average salary during the last 36 months indexed to the date of retirement and (ii) the value of the retirement pension paid by the Brazilian social security system. For retired participants the initial pension payment is adjusted to recognize cost of living increases and productivity awards granted to active employees. In addition to the pension supplements, post-retirement health care and life insurance benefits are provided to eligible pensioners and their dependents.

Contributions to the plans are based on actuarial studies prepared by independent actuaries. The Company uses a measurement date of December 31 for its pension and other post-retirement benefit plans.

Substantially all of the Company's employees are covered by these plans. The Company contributed R\$117, R\$446 and R\$457 in 2004, 2003 and 2002, respectively, with respect to the multi-employer plans.

The Company expects to contribute up to R\$1,188 (unaudited) to the defined pension plans in 2005

Funded status and amounts recorded

Based on the report of the Company's independent actuary, the funded status and amounts recorded in the Company's balance sheet for the multiple employer plan (PBS - Telemig Celular) are:

Change in plan assets:

	2004	2003
Fair value of plan assets at beginning of year	60,389	46,899
Actual return on plan assets	11,502	11,411
Sponsors' and participants' contributions	2,672	2,788
Benefits paid and expenses	(635)	(709)
Effect of settlement	(4,790)	-
Fair value of plan assets at end of year	69,138	60,389

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Change in benefit obligations:

	2004	2003
Benefit obligation at beginning of year	44,228	43,375
Service cost	2,327	3,239
Interest cost	4,396	4,888
Actuarial losses (gains)	997	(6,565)
Benefits paid and expenses	(635)	(709)
Effect of curtailment	(322)	-
Effect of settlement	(4,790)	-
Benefit obligation at end of year	46,201	44,228

Pension benefits recognized in the balance sheet:

Funded status	22,937	16,161
Unrecognized net gains	(16,861)	(17,007)
Prepaid (accrued) benefit cost	6,076	(846)

The accumulated benefit obligation for the pension plans was R\$39,898 and R\$36,718 at December 31, 2004 and 2003, respectively.

Components of net periodic pension cost of the multiple employer plan (PBS Telemig Celular) are:

	2004	2003	2002
Service cost	2,327	3,239	2,553
Interest cost	4,396	4,888	3,949
Expected return on assets	(6,655)	(7,259)	(5,297)
Actuarial loss	(1,818)	(1,121)	(1,121)
Employee contributions	(1,039)	(1,111)	(1,124)
Effect of curtailment	(322)	-	-
Effect of settlement	(3,837)	-	-
Other	-	(672)	(68)
Net periodic pension benefit	(6,948)	(2,036)	(1,108)

The benefits expected to be paid in each of the next five fiscal years and in the aggregate for the five fiscal years thereafter can be summarized as follow:

	PBS Telemig Celular
2005	788
2006	1,165
2007	1,527
2008	1,858
2009	2,397
2010 to 2014	25,963

(b) Defined contribution and defined benefit plan (CELPREV Telemig Celular)

F-28

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

In March 2004, the Company offered to its employees a new benefit plan which is also administered by Sistel. The new plan permitted, through June 16, 2004, the migration of the participants of the PBS Telemig Celular plan. The Company recognized, during 2004, a curtailment and settlement relating to the implementation of the new plan in the amounts of R\$ 5,112 and R\$ 4,790, respectively, within the Net Benefit Obligation and Fair Value of Plan Assets.

The new plan is a defined contribution plan, except for medical benefits, for which there is a defined benefit of up to 24 months. Participants and the Company will each contribute 50% of the plan's cost. The plan defines retirement at age 60, with advanced retirement at age 50, and includes disability, retirement, sickness benefits and pension in case of casualty. Company matching contributions will range from 0.5% to 2% and additional contributions without Company matching may range from 0.5% to 6% of the participant's salary. Benefits at the time of retirement will depend on the timing and amount of contributions, as well as on the performance of the fund's investments.

Based on the report of the Company's independent actuary, the CELPREV - Telemig Celular funded status, is as follows:

	2004
Projected benefit obligation	(788)
Fair value of plan assets	1,053
Funded status - Initial Transition Obligation	265

The benefits expected to be paid in each of the next five fiscal years and in the aggregate for the five fiscal years thereafter can be summarized as follow:

	CELPREV- Telemig Celular
2005	58
2006	123
2007	133
2008	144
2009	157
2010 to 2014	918

(c) Main actuarial assumptions

Main actuarial assumptions used in the calculation of the PBS-A, PBS-Telemig Celular, CELPREV - Telemig Celular and PAMA are:

Weighted-average assumptions

F-29 **PBS-A** **PBS-Telemig
Celular/CELPREV**

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

	2004	2003	2002	2003	2004	2002
Discount rate of actuarial liabilities	11.30%	11.30%	11.30%	11.30%	11.30%	11.30%
Expected return on plan assets	12.20%	11.30%	18.20%	11.83%	14.45%	14.45%
Salary increase rate	7.10%	7.10%	7.10%	7.10%	8.15%	8.15%

PAMA

	2004	2003	2002
Discount rate of actuarial liabilities	11.30%	11.30%	11.30%
Expected return on plan assets	16.40%	11.30%	14.45%
Salary increase rate	7.10%	7.10%	8.15%
Health Care Cost Trend Rate	8.15%	8.15%	-

Expressed in nominal terms - assumed inflation of 5 % for 2004, 2003 and 2002

The expected return on plan assets for 2005 was set up based on the pension portfolio's past average rate of earnings, discussion with portfolio managers and comparisons with similar companies, which was based on the following asset allocation:

	PBS-A	PBS-Telemig Celular/CELPREV	PAMA
Debt securities	75.0%	80.0%	100.0%
Equity securities	17.0%	17.5%	0.0%
Real estate	6.0%	0.0%	0.0%
Loans	2.0%	2.5%	0.0%
Total	100.0%	100.0%	100.0%

The pension plan weighted-average asset allocations at December 31, 2004 and 2003, by asset category are as follows:

	PBS-A	PBS-Telemig Celular/CELPREV	PAMA
--	--------------	--	-------------

	2004	2003	2004	2003	2004	2003
Debt securities	63.9%	60.2%	82.4%	83.1%	100.0%	100.0%
Equity securities	26.9%	31.1%	16.5%	15.7%	0.0%	0.0%
Real estate	8.7%	8.2%	0.0%	0.0%	0.0%	0.0%
Loans	0.5%	0.5%	1.1%	1.2%	0.0%	0.0%
Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

The Sistel PBS Telemig Celular and CELPREV Telemig Celular Benefit Plan Investment Policy is addressed in the Equity Application Master Plan (PDAP). The PDAP sets forth the policy for application and management of funds supporting the Plan with the objective of meeting the profitability and social security goals in accordance with the related actuarial liability. Based on the short, medium and long-term macroeconomic scenarios prepared by Sistel, the PDAP sets out objectives, goals and restrictions to the plan fund s investments of plan funds. The PDAP also determines and designs the strategic assignment of these funds in each segment and portfolio, as well as the assets that may be selected and the strategy to be adopted to manage

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

these assets. The PDAP sets forth the ceiling and floor limits to break down the asset portfolio into fixed-income and variable assets, as well as loans and financings to the members of the plan. The minimum actuarial rate forecast for the plan consists of a return at least equal to the INPC (Broad National Consumer Price Index) + 6% p.a.

13 Commitments

At December 31, 2004, the Company had capital expenditure commitments of R\$41,000 related to the continuing expansion and modernization of the network.

The Company rents certain equipment and premises through a number of operating lease agreements that expire at different dates. Total rent expense under these agreements was R\$24,500, R\$16,829 and R\$16,872 for the years ended December 31, 2004, 2003 and 2002, respectively.

Future minimum lease payments under non-cancelable operating leases with an initial term of one year or more are as follows at December 31, 2004.

2005	16,816
2006	12,189
2007	8,946
2008	6,920
2009	5,206
2010	4,384
2011	3,865
Thereafter	8,629
Total minimum payments	66,955

The Company's concession requires that certain network coverage requirements and service quality milestones be met to continue to be valid and permit the Company to operate.

14 Contingencies

	2004	2003
Tax contingencies	484,814	294,547
Civil and labor claims	4,844	4,055
Court judicial deposits	(449,654)	(268,553)
	40,004	30,049

(a) Tax contingencies**ICMS tax on monthly fees and additional services**

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The Company believes that the ICMS (*Imposto sobre Circulação de Mercadorias e Serviços*), a state value-added tax, relates to telecommunications services and monthly fees and rentals do not constitute telecommunications services and, therefore, the Company believes that it should not be assessed ICMS on these services. In December 1998, the Company was granted an injunction by the Treasury Court that suspended the taxation on monthly subscription fees. The Company, therefore, started to accrue and deposit into the courts, as judicial deposits, the amounts involved.

The balance of the provision for monthly fees, activation fees and rentals is R\$396,121 (2003 - R\$251,658), which is presented net of escrow deposits is R\$369,466 (2003 - R\$232,249).

Telecommunication Inspection Fund FISTEL

Although the Company contributes to the FISTEL fund, it has filed a lawsuit questioning its responsibility for contributions in respect of telecommunications stations which it does not own. The Company started to accrue and deposit into an escrow account the amounts involved. As of December 31, 2004, the Company recorded a provision of R\$75,326 (2003 - R\$32,132), which is presented net of escrow deposits in the same amount.

Social Security

The National Social Security Institute - INSS issued a tax assessment against the Company for approximately R\$17,100 on the joint responsibility for the payment of service providers' INSS and the withholding of 11% of social security contributions of every payment made to service providers. The Company has recorded, based on the advice of its legal counsel, a provision of R\$3,547 (2003 - R\$3,569) for probable losses arising from this tax assessment.

Other tax litigation

The Company is subject to legal proceedings, administrative proceedings and claims of various types in the ordinary course of its business for which provisions of R\$9,820 and R\$7,188, as of December 31, 2004 and 2003 respectively, have been recorded. In management's opinion, the ultimate settlements, if any, will not have any additional significantly adverse effect on the Company's financial condition or results of operations.

(b) Civil and labor claims**Civil claims**

The Company is party to several civil claims filed by subscribers. Based on the advice of its legal counsel, management recorded a provision for this contingency at December 31, 2004 of R\$3,065 (2003 - R\$2,468).

Labor litigation

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The Company is a party to several labor claims filed by former employees related principally to salary adjustments and related charges. Based on the advice of its legal counsel, management believes that the provision recorded at December 31, 2004 in the amount of R\$1,779 (2003 R\$1,587) is sufficient to cover probable losses.

(c) Possible contingencies not provided

The Company does not have other legal proceedings in progress, involving contingent risks, which are considered as possible losses.

15 Financial instruments**(a) Fair value of financial assets and liabilities**

Estimated fair values of the Company's financial assets and liabilities have been determined using available market information and appropriate valuation methodologies. However, considerable judgment is required in interpreting market data to develop the estimated fair values. Accordingly, the amounts presented below are not necessarily indicative of the amounts that could be realized in a current market exchange. The use of different market assumptions and/or estimated methodologies may have a material effect on the estimated fair values.

The fair value information as of December 31, 2004 and 2003 presented below is based on the Company's current borrowing rates for similar types of borrowing arrangements.

	2004		2003	
	Book value	Fair value	Book value	Fair value
Long-term debt	482,800	490,348	489,094	490,641

The carrying value of cash, cash equivalents, trade accounts receivable, other current assets, accounts payable and accrued liabilities are a reasonable estimate of their fair value because of the short maturities of such instruments. Interest rates that are currently available to the Company for issuance of debt with similar terms and maturities were used to estimate the fair value of loans and financing.

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements****Expressed in thousands of Brazilian *reais*, unless otherwise stated****(b) Concentration of risks**

Credit risk with respect to trade accounts receivable is mitigated by the Company's broad subscriber base. The Company continually monitors the level of trade accounts receivable and limits the exposure to bad debts by cutting access to the telephone network if any invoice is 15 days past due.

There are no concentrations of services, concessions or rights, other than those mentioned above, that could, if suddenly eliminated, severely impact the Company's operations.

All of the Company's employees participate in a collective bargaining agreement which expires and is renewable on an annual basis.

16 Swaps

The Company uses derivative instruments to mitigate risks arising from foreign currency and interest rate volatility. At December 31, 2004 and 2003, the Company held cross-currency interest rate swap agreements related to its U.S. dollar denominated debt agreements to mitigate against volatility of the U.S. dollar and the Brazilian *real* exchange rate.

Through the swap agreements, at December 31, 2004, the Company earns the exchange variation between the United States dollar and the Brazilian *real* plus 12.30% to 14.90% and pays an amount based on a short term inter bank rate. The annualized short term inter bank rate was 16.10% and 23.17% at December 31, 2004 and 2003, respectively. At December 31, 2004 and 2003, these agreements have total updated notional amounts of R\$222,056 and R\$375,544, and expire on various dates through 2006.

The fair values of the Company's cross-currency interest rate swap agreements were estimated based on quoted market prices of comparable contracts and, at December 31, 2004 and 2003 were estimated as below:

	2004	2003
Gross assets	230,218	404,749
Gross liabilities	(212,170)	(338,596)
Net investments - swap agreements	18,048	66,153
Less current portion - assets	(16,776)	(6,929)
Long term portion - assets	(3,098)	(59,224)
Long term portion - liabilities	1,826	-

The income (expense) derived from the swap agreements of R\$(51,956), R\$(28,203) and R\$62,030 for 2004, 2003 and 2002, respectively, is reflected in financial income (expense). The Company does not apply hedge accounting for any of these contracts.

F-34

Telemig Celular Participações S.A.**Notes to the Consolidated Financial Statements**
Expressed in thousands of Brazilian reais, unless otherwise stated**17 Stock-Based Compensation**

On October 5, 2000, the Company's Board of Directors approved two long-term incentive plans as follows:

- (i) Plan A covers certain key executives who may receive shares of the Company's common or preferred stock. The shares earned will be issued only to the extent that the Company achieves performance goals determined by the Board of Directors during a five-year performance period. Through December 31, 2004, no shares have been granted as the performance goals have not been achieved and, consequently, no compensation expense has been recognized.
- (ii) Plan B covers key executives (who can also participate in the first plan) and other employees. Options granted under this plan relate to preferred stock and are exercisable at the market price at the date of grant, adjusted by an inflation index. No compensation expense has been recognized as the market price of the underlying stock is below the exercise price. The vesting period is up to 20% during the second year, 60% during the third year and 100% during the fourth year. Information related to these options is summarized below:

Amounts in reais per shares

	Number of Options	Initial Exercise Price-R\$	Exercise Price- R\$	Market Price R\$
Outstanding as of December 31, 2001	197,705	4.76	5.32	4.07
Forfeited	(3,682)	4.76	-	-
Outstanding as of December 31, 2002	194,023	4.76	6.67	2.98

Balance at end of year	18,200	16,312	17,128

19 Subsequent events

On March 4, 2005, Highlake and Futuretel S.A., which was at the time an entity controlled by Opportunity Fund, CVC/Opportunity Equity Partners L.P. and Investidores Institucionais FIA, announced that they would begin a competitive bidding process for the sale of more than 50% of the Company's voting capital. However, shortly thereafter, International Equity Investments, Inc. replaced the management of CVC/Opportunity Equity Partners L.P. with Citigroup Venture Capital International Brazil L.L.C. At the same time, the name of the fund was changed to Citigroup Venture Capital International Brazil L.P. An injunction was subsequently granted to International Equity Investments, Inc. to temporarily suspend the competitive bidding process.
