Date of event requiring this shell company report: For the transition period from _____ to _____
Commission File Number 1-14483

TELEMIG CELULAR PARTICIPAÇÕES S.A.

(Exact name of Registrant as specified in its charter)

TELEMIG CELLULAR HOLDING COMPANY

(Translation of Registrant's name into English)

THE FEDERATIVE REPUBLIC OF BRAZIL

(Jurisdiction of incorporation or organization)

**Rua Levindo Lopes, 258 Funcionários
30.140-170, Belo Horizonte-MG, Brazil**
(Address of principal executive offices)

Roberto Oliveira de Lima

Telephone: 55 31 9933-3535

E-mail: ri@vivo.com.br

Address: Rua levindo Lopes, 258 - Funcionários
30.140.-170, Belo Horizonte-MG, Brazil

Securities registered or to be registered pursuant to Section 12(b) of the Act .

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Preferred Shares without par value	New York Stock Exchange *
Depository Shares, each representing 2 Preferred Shares	New York Stock Exchange

* Not for trading, but only in connection with the registration of American Depository Shares representing those Preferred Shares, on the New York Stock Exchange.

Securities registered or to be registered pursuant to Section 12(g) of the Act:
None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:
None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

Common Shares, without par value: 13,466,059
Preferred Shares, without par value: 22,741,002

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated Filer Accelerated Filer Non-accelerated Filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

INTRODUCTION

Telemig Celular Participações S.A., a corporation organized under the laws of the Federative Republic of Brazil, is referred to in this annual report as the Registrant. Telemig Celular S.A. is the Registrant's operating subsidiary and is referred to in this annual report as Telemig Celular, and, together with the Registrant, as we, us and our unless the context requires otherwise.

References in this annual report to (i) the *real*, *reais* and R\$ are references to Brazilian *reais* (plural) and the Brazilian *real* (singular), the currency of Brazil, (ii) U.S. dollars, dollars and US\$ are references to United States dollars, (iii) preferred shares and common shares are references to the Registrant's authorized and outstanding shares, (iv) ADSs are references to the Registrant's American Depositary Shares, each representing two preferred shares, (v) Commission are to the U.S. Securities and Exchange Commission, (vi) CVM are to the *Comissão de Valores Mobiliários*, the Brazilian securities commission, (vii) Central Bank are to the *Banco Central do Brasil*, the Brazilian Central Bank, (viii) General Telecommunications Law are to *Lei Geral de Telecomunicações*, as amended, which regulates the telecommunications industry in Brazil, (ix) Anatel are to *Agência Nacional de Telecomunicações*, the Brazilian independent telecommunication regulatory agency, and (x) our region means the area covered by our authorizations, including the totality of the state of Minas Gerais.

We are one of the companies formed as a result of the breakup of *Telecomunicações Brasileiras S.A. Telebrás*, or *Telebrás*, by the federal government of Brazil in May 1998. Telemig Celular was formed in January 1998 to receive the cellular telecommunications operations of *Telecomunicações de Minas Gerais S.A.*, its predecessor, an operating company controlled by *Telebrás*. References to Telemig Celular's operations prior to January 1998 are to the cellular operations of its predecessor. See Item 4A. History and Development of the Company.

We have prepared our consolidated financial statements included in this annual report in conformity with generally accepted accounting principles in the United States, or U.S. GAAP, as at and for the year ended December 31, 2005 audited by PricewaterhouseCoopers Auditores Independentes, an independent registered public accounting firm, and as at and for the years ended December 31, 2006 and 2007 audited by Deloitte Touche Tohmatsu Auditores Independentes, an independent registered public accounting firm.

Unless otherwise specified, data relating to the Brazilian telecommunications industry included in this annual report was obtained from Anatel. The Glossary of Telecommunications Terms listed in the Table of Contents provides the definition of certain technical terms used in this annual report.

FORWARD-LOOKING STATEMENTS

This annual report contains statements that may constitute forward looking statements. These include statements regarding our current expectations, intentions and projections about future events and financial trends affecting our business. These statements include, but are not limited to:

- trends affecting our business, financial condition, revenues, results of operations and prospects;
- any statements preceded by, followed by or that include the words believes, expects, predicts, anticipates, intends, estimates, should, may or similar expressions; and
- other statements contained in this annual report regarding matters that are not historical facts.

Because these statements are subject to uncertainty, actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause actual results to differ materially from those contained in forward-looking statements include, but are not limited to:

- the pursuit of business strategies that cause our business, financial condition, revenues, results of operations or prospects to change, including the migration of our network to GSM technology and acquisitions or dispositions of assets or internal affiliates;
- changes to our ownership structure, management or shareholder composition;

- the negotiation of interconnection agreements;
- new governmental regulation and tax matters;
- inflation and changes in currency exchange rates;
- our ability to sustain or improve our performance;
- expectations and estimates of our management concerning future capital expenditures, other investments to attract and retain customers, financial performance, financing plans and the effects of competition;
- new entrants into our area and the increase of competition in the Brazilian telecommunications industry;
- our ability to use deferred tax assets;
- adverse legal or regulatory disputes;
- changes in regional, national and international business and economic conditions, including inflation and currency devaluations;
- incidence of cloning and subscription fraud;
- political, economic, regulatory and demographic developments in Brazil generally and in the region in Brazil where we conduct our business; and
- the factors discussed under Item 3D Risk Factors , which you are urged to carefully review.

You should not place undue reliance on these statements, which speak only as of the date that they were made. These cautions should be considered in connection with any written or oral forward-looking statements that we make.

(*) Per share information has been adjusted to reflect the 10,000:1 reverse stock split occurred in 2007. See note 15(g) to our financial statements.

- (1) Solely for the convenience of the reader, *real* amounts as of and for the year ended December 31, 2007 have been translated into U.S. dollars at the commercial selling rate at closing for purchase of U.S. dollars, as reported by the Central Bank, on December 31, 2007 of R\$1.7713 to US\$1.00. The U.S. dollar equivalent information should not be construed to imply that the *real* amount represent, or could have been or could be converted into, U.S. dollars at this rate or at any other rate.
- (2) For the periods presented, dividends per preferred share were the same as dividends per common share, and they were calculated based upon the number of outstanding shares on the date the dividends were provided.
- (3) Cash disbursements for capital expenditures including accounts payable for property and equipment.
- (4) Current assets less current liabilities.

Exchange Rates

Prior to March 14, 2005, there were two principal legal foreign exchange markets in Brazil:

- the commercial rate exchange market; and
- the floating rate exchange market.

Most trade and financial foreign-exchange transactions were carried out on the commercial rate exchange market. These transactions included the purchase or sale of shares or payment of dividends or interest with respect to shares. Foreign currencies could only be purchased in the commercial exchange market through a Brazilian bank authorized to operate in these markets. In both markets, rates were freely negotiated.

Resolution No. 3,265 by the National Monetary Council, or the CMN, dated March 4, 2005, as amended by Resolutions No. 3,311 and 3,356 of the CMN, dated August 31, 2005 and March 31, 2006, respectively, consolidated the foreign exchange markets into one single foreign exchange market, effective as of March 14, 2005. All foreign exchange transactions are now carried out through institutions authorized to operate in the consolidated market and are subject to registration with the Central Bank's electronic registration system. Pursuant to Resolution No. 3,356, the authorized institutions must present to the Central Bank a list of actions to prevent money laundering and other crimes under Law No. 9,613, dated March 3, 1998. Foreign exchange rates continue to be freely negotiated, but may be

influenced by Central Bank intervention.

Since 1999, the Central Bank has allowed the *real*/U.S. dollar exchange rate to float freely, and during that period, the *real*/U.S. dollar exchange rate has fluctuated considerably. In the past, the Central Bank has intervened occasionally to control unstable movements in foreign exchange rates. We cannot predict whether the Central Bank or the Brazilian government will continue to let the *real* float freely or will intervene in the exchange rate market through a currency band system or otherwise. The *real* may depreciate or appreciate against the U.S. dollar

substantially in the future. On June 18, 2008, the U.S. dollar/*real* exchange rate was R\$1.6105 per US\$1.00. For more information on these risks, see Item 3D. Risk Factors Risks Relating to Brazil.

The following tables set forth the commercial rate, expressed in *reais* per U.S. dollar (R\$/US\$), for the periods indicated.

Year	R\$ per US\$1.00			
	Low	High	Average(1)	Year-End
2003	2.8219	3.6623	3.0600	2.8892
2004	2.6544	3.2051	2.9015	2.6544
2005	2.1625	2.7613	2.4331	2.3407
2006	2.0578	2.3703	2.1671	2.1380
2007	1.7317	2.1548	1.9468	1.7705
2008 (through June 18)	1.6105	1.8243	1.7024	1.6105

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

Our business, financial condition and results of operations could be materially and adversely affected by any of the risks below. The trading price of the ADSs could decline due to any one of these risks and you may lose all or part of

your investment. The risks described below are those that we currently believe may materially affect us. Additional risks not presently known to us or that we currently deem immaterial may also impair our business.

Risks Relating to Brazil

The Brazilian government has exercised, and continues to exercise, significant influence over the Brazilian economy. Brazilian political and economic conditions have a direct impact on the business, financial condition, revenues, results of operations and the market price of the ADSs and our preferred shares.

The Brazilian government frequently intervenes in the Brazilian economy and occasionally makes significant changes in policies and regulations. The Brazilian government's actions to control inflation and affect other policies have involved increases in interest rates, wage and price controls, currency devaluations, capital controls, and limits on imports, among other actions. Our business, financial condition, revenues, results of

operations, prospects and the market price of our preferred shares and ADSs may be adversely affected by changes in government policies, as well as general economic factors including:

- currency fluctuations;
- exchange controls and restrictions on remittances abroad, such as those which were briefly imposed on such remittances (including dividends) in 1989 and in the beginning of 1990;
- inflation;
- price instability;
- interest rate increases;
- liquidity of domestic capital and lending markets;
- changes in tax policy; and
- other political, diplomatic, social and economic developments in or affecting Brazil.

Uncertainty over whether the Brazilian government will implement changes in policy or regulation affecting these or other factors in the future may contribute to economic uncertainty in Brazil and to heightened volatility in the Brazilian securities markets and securities issued abroad by Brazilian issuers.

Inflation and government efforts to combat inflation may contribute significantly to economic uncertainty in Brazil and could harm our business and the market value of the ADSs and our preferred shares.

Brazil has in the past experienced extremely high rates of inflation. According to the General Market Price Index (*Índice Geral de Preços do Mercado*), or the IGP-M, a general price inflation index, the inflation rates in Brazil were 8.7% in 2003, 12.4% in 2004, 1.2% in 2005, 3.8% in 2006 and 7.8% in 2007. Inflation and certain government actions taken to combat inflation have in the past had significant negative effects on the Brazilian economy. Actions taken to curb inflation, coupled with public speculation about possible future governmental actions, have contributed to economic uncertainty in Brazil and heightened volatility in the Brazilian securities market. The Brazilian base interest rate, which is determined by the Brazilian Monetary Policy Committee (*Comitê de Política Monetária*), or COPOM, was 16.5%, 17.7%, 18.0%, 13.0% and 11.3% on December 31, 2003, 2004, 2005, 2006 and 2007, respectively. Future Brazilian government actions, including interest rate decreases, intervention in the foreign exchange market and actions to adjust or fix the value of the *real* may trigger increases in inflation. If Brazil experiences high inflation in the future, we may not be able to adjust the rates we charge our customers to offset the effects of inflation on our cost structure. Inflationary pressures may also hinder our ability to access foreign financial markets or lead to government policies to combat inflation that could harm our business or adversely affect the market value of our preferred shares and, as a result, the ADSs.

Fluctuations in the value of the real against the value of the U.S. dollar and other foreign currencies may adversely affect our ability to service obligations payable in or pegged to the U.S. dollar or other foreign currencies and could lower the market value of the ADSs and our preferred shares.

As a result of inflationary pressures, among other factors, the Brazilian currency has devalued periodically during the last four decades. Throughout this period, the Brazilian government has implemented various economic plans and utilized a number of exchange rate policies, including sudden devaluations, periodic mini-devaluations during which the frequency of adjustments has ranged from daily to monthly, floating exchange rate systems, exchange controls and dual exchange rate markets. Although over long periods depreciation of the Brazilian currency generally has correlated with the rate of inflation in Brazil, devaluation over shorter periods has resulted in significant fluctuations in the exchange rate between the Brazilian currency and the U.S. dollar and other currencies.

The *real* depreciated against the U.S. dollar by 8.5% in 2000 and by 15.7% in 2001. In 2002, the *real* depreciated 34.3% against the U.S. dollar, due in part to political uncertainty surrounding the Brazilian presidential elections and

the global economic slowdown. The *real* appreciated 22.3%, 8.8%, 13.4%, 9.5% and 20.7% against

the U.S. dollar in 2003, 2004, 2005, 2006 and 2007, respectively. The *real* appreciated by 8.01% against the U.S. dollar in the first five months of 2008. Despite the appreciation of the Brazilian currency against the U.S. dollar in recent years, no assurance can be given that the *real* will not depreciate or be devalued against the U.S. dollar again. On June 18, 2008, the U.S. dollar/*real* exchange rate was R\$1.6105 per US\$1.00. See Item 3A. Selected Financial Data Exchange Rates.

Significant costs relating to our network infrastructure and handsets are linked to payment in U.S. dollars. All of our revenues are generated in *reais*. If the value of the *real* decreases relative to the U.S. dollar, our debt becomes more expensive to service. Such decreases also make it more costly for us to pay for the U.S. dollar-denominated technology and goods that are necessary to operate our business, and we may be unable to pass the increased costs to our customers. As of December 31, 2007, we had R\$147.9 million in total debt, 95.8% of which was denominated in U.S. dollars.

Historically, depreciations of the *real* relative to the U.S. dollar have also created additional inflationary pressures in Brazil, and future depreciations could negatively affect us. Depreciations generally curtail access to foreign financial markets and may prompt government intervention, including recessionary governmental policies. Depreciations also reduce the U.S. dollar value of distributions and dividends on the ADSs and the US dollar equivalent of the market price of our preferred shares, and as a result the ADSs.

Deterioration in economic and market conditions in other countries, especially emerging market countries, may adversely affect the Brazilian economy and our business.

The market for securities backed by Brazilian companies is influenced by economic and market conditions in Brazil and, to varying degrees, market conditions in other Latin American and emerging market countries. Although economic conditions in such countries may differ significantly from economic conditions in Brazil, the reaction of investors to developments in these other countries may have an adverse effect on the market value of securities of Brazilian issuers. Developments or conditions in other emerging market countries have at times significantly affected the availability of credit in the Brazilian economy and resulted in considerable outflows of funds and declines in the amount of foreign currency invested in Brazil. Crises in other emerging market countries may hamper investor enthusiasm for securities of Brazilian issuers, including ours. This could adversely affect the trading price of the ADSs and our preferred shares and could also make it difficult for us to access the capital markets and finance our operations in the future on acceptable terms, or at all.

Risks Relating to our Business and the Brazilian Telecommunications Industry

Extensive government regulation of the telecommunications industry and our operating license may limit our flexibility in responding to market conditions, competition or changes in our cost structure or affect our rates.

Our business is subject to extensive government regulation. Anatel regulates or influences, among other things:

- regulations;
- licensing;
- fees;
- competition;
- telecommunications resource allocation;
- service standards;
- technical standards;
- quality standards;

- interconnection and settlement arrangements; and
- supervision of universal service obligations.

Brazil's telecommunications regulatory framework is continuously evolving. The interpretation and enforcement of regulations, the assessment of compliance with regulations and the flexibility of regulatory authorities are all marked by uncertainty. We operate under an authorization from the Brazilian government, and our ability to retain this authorization is a precondition to our success. However, in light of the regulatory framework, we cannot assure you that Anatel will not modify the terms of our authorization adversely. Furthermore, according to the terms of our operating authorization, we are obligated to meet certain requirements and to maintain minimum quality, coverage and service standards. Failure by us to comply with these requirements may result in the imposition of fines or other government actions, including the termination of our operating authorization. Any partial or total revocation of our operating authorization would have a material adverse effect on our business, financial condition, revenues, results of operations and prospects. In recent years, Anatel has also been reviewing and introducing changes in the applicable regulation, especially regarding the interconnection fees among telecommunications service providers in Brazil. Interconnection fees, which are fees charged by telecommunications service providers to each other to interconnect to each others networks, are an important part of our revenue base. To the extent that changes to the rules governing interconnection fees reduce the amount of interconnection fees we are able to collect, our business, financial condition, revenues, results of operations and prospects could be materially adversely affected.

Therefore, our business, results of operations, revenue and financial condition could be negatively affected by the actions of the Brazilian authorities, including, in particular, the following:

- the introduction of new or stricter operational and/or service requirements;
- the granting of operating licenses in our area; and
- delays in the granting of, or the failure to grant, approvals for rate increases.

Our results of operations may be negatively affected by the application of the SMP rules.

In February 2004, we signed a contract with Anatel to migrate from the Cellular Mobile Service Contract (*Serviço Móvel Celular*), or SMC regime, to the Personal Mobile Service Contract (*Serviço Móvel Pessoal*), or SMP regime. The SMP rules, including the ability of customers to select their long-distance carrier on a per call basis, stringent quality indicators and new rules for interconnection fees, are already enforced and their impact have been recorded in our financial statements.

The SMP regime also provides for the freely negotiation of interconnection fees among certain telecommunications service providers. Under the SMC regime, interconnection fees, which comprise a significant portion of our revenues, were determined based on historical inflation and a variable productivity factor established by Anatel. In the freely negotiation environment of the SMP regime, the interconnection fees we receive from other wireless, fixed-line and long-distance telecommunications service providers operating in our area will be determined through direct negotiations with them.

Accordingly, as of July 2005, we implemented a 4.5% interim adjustment in the interconnection fee for the use of the SMP network (VU-M) exclusively for local calls VC1 between ourselves and the following operators: Oi, TIM, CTBC (Fixed and Mobile) and Telemar Norte Leste S.A., or Telemar, based on an agreement among such operators and us. As a result, our interconnection fee increased from R\$0.41611 to R\$0.43483, net of taxes. Further, in July 2007, Commuted Fixed Services (*Serviço Telefônico Fixo Comutado*), or STFC, and SMP providers, with the exception of Embratel, Intelig, GVT and TIM-LD, entered into an agreement amending the interim agreement of 2005. The terms of the new agreement readjusted the interconnection fee (VU-M) by 1.97%, effective on May 31, 2007. The readjustment of the interconnection fee by 68.5% of the adjustment index for 2008 was also negotiated at

the occasion. This adjustment, once ratified by Anatel, will be applied to local calls VC1 between fixed and mobile lines of local operators basic plans.

At the end of 2005, we entered in an interim agreement to readjust prices of the interconnection fee (VU-M) on long-distance calls VC2 and VC3 by 4.5% . Telemar, Brasil Telecom (cellular and fixed lines), Telefônica, CTBC (cellular and fixed lines), Sercomtel (cellular and fixed lines), Oi, Vivo Participações S.A., or Vivo, TIM, Claro, Amazônia Celular S.A., or Amazônia Celular, and Telemig Celular were involved in this agreement. Pursuant to the agreement, implementation of the interim readjustment became effective immediately after Anatel's ratification of new rates for calls to users of fixed-line services, which took place in March 2006.

In September 2007, we also entered into an agreement with Embratel that became effective in January 2008, under which we agreed to readjust prices of the interconnection fee (VU-M) on long-distance calls VC2 and VC3 between Telemig Celular and Embratel by 6.56%, in order to bring to those VU-M rates to prices currently practiced in the market.

The adjustment of the interconnection fee (VU-M) is being questioned by some operators (GVT, Intelig, TIM for long distance calls and Nextel) that are not party to the agreements for local and long-distance calls.

The free negotiation process for interconnection charges has been extended and will proceed until 2010, when a cost based reference interconnection value will be set by Anatel, according to the regulation on SMP Network Usage Fees, issued in July 2006. The submission of our first Account Allocation and Separation Annual Report (*Documento de Alocação e Separação de Contas*), or DSAC report, to Anatel in April 2008, did not result in a change of the VU-M fee. See Item 4B. Business Overview Regulation of the Brazilian Telecommunications Industry.

We cannot assure you that the interconnection rates we negotiated will be upheld or that future negotiations will be as favorable as those that were previously set by Anatel. If the readjustments that we negotiated are cancelled or if freely negotiated interconnection fees in the future are less favorable to us, our business, financial condition, revenues, results of operations and prospects will be adversely affected.

Anatel also issued Regulation No. 460/2007, regarding number portability. According to Anatel's regulation, number portability will be provided by fixed and mobile operators, until March 2009, with most incurring costs being borne by the operators. We are analyzing the impact of number portability on our business and results of operations.

Anatel's new regulation regarding interconnection and network usage fees could have an adverse effect on our results.

Since the beginning of 2005, Anatel published the following new regulations on interconnection and network usage fees of SMP providers, some of which could have an adverse effect on our results: (1) new General Regulation of Interconnection (*Regulamento Geral de Interconexão* Resolution No. 410/2005, or RGI); (2) the Regulation of Separation and Allocation of Costs (Resolution No. 396/2005); (3) the Regulation for Network Usage Fees of SMP providers (*Regulamento de Remuneração pelo Uso de Redes de Prestadoras do SMP* Resolution No. 438/2006) and (4) the Regulation for Usage of Spectrum in the 800, 900, 1800, 1900 and 2100MHz bands (Resolution No. 454/2006). We highlight, among others, the following changes in the regulation that may adversely affect our results:

- two SMP providers controlled by the same economic group can receive only one instead of two interconnection charges (VU-M) for calls originated and terminated in their networks;
- new negotiation rules for VU-M prices by which Anatel will have a role in determining reference prices rather than the current free-market negotiation of prices. The reference prices will apply to SMP providers that have significant market power, which may be the case of Telemig Celular (until further decision by Anatel, all operators are considered to have significant market power).

Reference prices will be cost based commencing in 2008. The prices will be calculated according to the regulation on Costs Separation and Allocation (Resolution No. 396/2005);

- VU-M prices must follow the discounts granted to fixed telephony customers for out-of-business- hours calls;

- when receiving calls from public telephones, VU-M will adopt the same tariff rules that apply to public telephones;
- creation of VU-M price unification among SMP providers of the same economic group having significant market power; and
- the interconnection payments between SMP operators for traffic in the same registration area may occur independently of the traffic balance between the operators (this regime is referred to as full billing). Before the adoption of the above-mentioned regulation, payments between SMP operators for traffic in the same area only occurred when the traffic balance between any two companies was either less than 45% or in excess of 55% (this regime is referred to as partial bill and keep).

Such new regulations could have an adverse effect on our results of operations because (1) our interconnection charges could drop significantly, thereby reducing our revenues, (2) Anatel may allow more favorable prices for economic groups without significant market power, (3) the prices we charge in some regions in which we operate are higher than those in some other regions, and consolidation of those prices, competitive pressures and other factors would reduce our average prices and thereby reduce our revenues and, (4) the granting of new licenses may increase competition in our area from other operators, which could adversely affect our market share, thereby reducing our revenues.

It is difficult to predict how technological changes within the wireless telecommunications industry will affect our business.

The global and the Brazilian wireless telecommunications industry is experiencing significant changes, particularly relating to technological development, ongoing improvements in the capacity, quality and data transmission speed of digital technology, shorter development cycles for new products, and changes in end-user needs and preferences. For instance, the rapid growth in the use of Universal Mobile Telecommunications System, or UMTS, and High-Speed Packet Access, or HSPA, technology worldwide has favored its use in Brazil. Mobile broadband access is the mechanism used to increase all operator services portfolio, customer loyalty and the average revenue per user, or ARPV. In this scenario, the number of providers of wireless services increased. It is of primary importance to develop network technology through IP internetworking and to enable the network to provide one new level of bandwidth. Alternative technologies may be developed to provide services to customers that are superior to those that we provide. The introduction of these new technologies may result in an accelerated erosion of our market share or require us to incur significant capital expenditures in response to competitive pressures that are driven by technological advances. For example, the growing use in Brazil of GSM technology by other wireless service providers and the dwindling supply of Time Division Multiple Access, or TDMA, handsets, were among the important factors that prompted us to migrate our network from TDMA to GSM technology. We cannot assure you that similar technology advances in the future will not force us to make additional changes or investments in our network that we are not currently contemplating.

The Brazilian wireless telecommunications industry s landscape is highly competitive and is changing in a way that may adversely affect our market share and our margins.

At the beginning of 1998, we assumed the cellular operations of Telecomunicações de Minas Gerais S.A., a former cellular operator under the government-owned Telebrás System, and we were initially the only cellular operator in our area. Since that time, the emergence of other wireless telecommunications operators in our area has created an intensely competitive environment. Currently, in addition to us there are four other wireless service providers operating within our authorization area. We face competition from the following operators: (a) TIM, the B Band frequency range operator that launched its services in December, 1998. TIM is primarily owned by Telecom Italia and operates in the entire State of Minas Gerais using TDMA and GSM technologies; (b) Oi, the D Band operator that launched its services in June, 2002. Oi is a subsidiary of Tele Norte Leste Participações S.A. (Telemar). It operates in

the entire State of Minas Gerais using GSM technology; (c) Claro, the E Band operator that launched its services in the fourth quarter of 2005. Claro is controlled by América Móvil and operates in an area that comprises most of the State of Minas Gerais. Claro is not present in the *Triângulo Mineiro* region. Claro operates using GSM technology; and, (d) CTBC Celular, an A Band operator that provides services only in the *Triângulo Mineiro* region. CTBC Celular is controlled by CTBC, a fixed-line operator. CTBC Celular operates

using both TDMA and GSM technologies. The intense competition in our market has resulted in the gradual reduction of our total market share, which was an estimated 29.1% at December 31, 2007, as compared to 31.6% and 38.1% at December 31, 2006 and 2005, respectively.

The ultimate impact that existing competition will have on our business is not yet clear. Our competitors may be able to offer lower prices than we do and to develop and deploy more rapidly new or improved wireless technologies, services and products. Our response to competition may require us to lower rates or extend higher subsidies to our customers for the acquisition of handsets, thereby adversely affecting our margins.

In addition, market participants in other areas of Brazil may also seek to operate in our area, most likely through acquisitions. Certain of our existing and potential future competitors are larger and have greater financial, marketing and management resources than we do.

We experience a high rate of customer turnover, which may impact our future operations.

Customer turnover, or churn, may be voluntary or involuntary, depending on whether the customer freely decides to terminate our services or we terminate the services due to lack of payment. Our average churn rate during the last three years was 2.8% per month in 2005, 3.3% per month in 2006 and 3.1% per month in 2007. To the extent that our competition continues to increase or the Brazilian economy stagnates or falters, our churn rate could increase, negatively affecting our business, financial condition, revenues, results of operations and prospects.

Adverse decisions in one or more of our lawsuits could adversely affect our business and results of operations.

In the ordinary course of business, we are involved in various legal proceedings of a civil, tax, regulatory and labor-related nature. As of December 31, 2007, we maintained provisions in the total amount of R\$979.8 million and court deposits in the total amount of R\$969 million. The majority of our material legal proceedings are related to tax matters. The total amount of the contingencies, based on the value attributed to the lawsuit by the plaintiff, may not correspond to the economic value of the lawsuits, which may be substantially higher than the total amount of contingencies. If the cost of these lawsuits is higher than the amount attributed to them by the plaintiffs or, in the event the total amount of our provisions does not suffice to pay the contingencies due, we could incur greater costs than originally foreseen and could have to make adjustments to our provisions. In addition, adverse decisions in one or more of our lawsuits or disputes in amounts in excess of those deposited in court or provisioned, may result in material losses, which may adversely affect our business and results of operations. For more information on the legal proceedings in which we are involved, see Item 8A. Consolidated Financial Statements and Other Financial Information Legal Proceedings.

Use of wireless phones may pose health risks.

Media reports have suggested that radio frequency emissions from wireless handsets may be linked to various health problems, including cancer, and may interfere with electronic medical devices, including hearing aids and pacemakers. Although we do not know of any definitive studies showing that radio frequency raises health care concerns, concerns over radio frequency emissions may discourage the use of wireless handsets or expose us to potential litigation, which could have a material adverse effect on our business, financial condition, revenues, results of operations and prospects.

Certain covenants contained in our financial agreements limit our ability to incur indebtedness.

Our financing agreements, including the indenture related to the offering of US\$80 million unsecured senior notes due 2009 combined with the offering by Amazônia Celular of US\$40 million unsecured senior notes due 2009,

contain certain financial covenants, limiting our ability to incur indebtedness above a certain level. Failure to comply with those covenants could result in the acceleration of the debt under those financing agreements. As a result, our ability to raise capital above the limits imposed by these agreements may be impaired, which may affect our ability to obtain the resources needed to expand the GSM network so as to cover all of the localities in our area. In addition, certain financing agreements of the Company have cross-acceleration clauses and if Amazônia Celular defaults in any of its other financing agreements, our notes payment will be accelerated.

Risks Relating to the Acquisition of Our Control by Vivo

The segregation of our operations and systems infrastructure from those of Amazônia Celular may adversely impact the quality of the services we provide and impact our results of operations.

Prior to April 3, 2008, we and Amazônia Celular were under common control and, as a consequence, we shared certain operations and systems infrastructure with Amazônia Celular, including pursuant to the terms of a Shared Services Agreement.

We currently still manage certain aspects of our operations and systems infrastructure together with Amazônia Celular. As further explained below, following our acquisition by Vivo on April 3, 2008, we began to share our operations and systems infrastructure with Vivo, and as a result, are working to separate our operations and systems infrastructure from those of Amazônia Celular.

As a result of the acquisition of our control by Vivo, we, Vivo, Telemar, Tele Norte and Amazônia Celular entered into a memorandum of understanding, or MoU, on April 7, 2008 to determine a procedure to segregate our activities from those of Amazônia Celular. The MoU requires Amazônia Celular and Telemig Celular to: (i) enter into a services agreement, pursuant to which Telemig Celular will render certain services to Amazônia Celular, including accounting, information technology, network maintenance, systems control, engineering, development of marketing programs, products and services, among others; (ii) define certain key performance indicators and service level agreements; (iii) determine a timeframe for segregation of these processes; (iv) determine which assets to segregate; (v) keep confidential any information obtained from the other party during this transitional period; and (vi) independently contract auditors to assist in the segregation process and for transparency purposes. This MoU is valid for nine months and is renewable for an additional three-month term.

We cannot assure you that each of the parties will fully comply with the terms of the MoU, or that we may not face difficulties or that the costs of implementing the segregation of operations and systems infrastructure described in the MoU and of developing and implementing a separate systems infrastructure for Telemig Celular will not be significantly higher than we expect. We also cannot assure you that there will be no unforeseen events that may result in this separation taking longer than anticipated or adversely affecting the quality of the services we provide, all of which may have a material adverse effect on our business and on our anticipated benefits with the acquisition of our control.

Risks Related to the ADSs and the Preferred Shares

The relative volatility and illiquidity of the Brazilian securities markets may substantially limit your ability to sell the preferred shares underlying the ADSs at the price and time you desire.

Investing in securities that trade in emerging markets, such as Brazil, often involves greater risk than investing in securities of issuers in the United States, and such investments are generally considered to be more speculative in nature. The Brazilian securities market is substantially smaller, less liquid, more concentrated and can be more volatile than major securities markets in the United States. Accordingly, although you are entitled to withdraw the preferred shares underlying the ADSs from the depositary at any time, your ability to sell the preferred shares underlying the ADSs at a price and time at which you wish to do so may be substantially limited. There is also significantly greater concentration in the Brazilian securities market than in major securities markets in the United States. The ten largest companies in terms of market capitalization represented approximately 50.7% of the aggregate market capitalization of the São Paulo Stock Exchange (*Bolsa de Valores de São Paulo*), or BOVESPA, as of December 31, 2007. The top ten stocks in terms of trading volume accounted for approximately 44.7%, 45.5% and 50.4% of all shares traded on the BOVESPA in 2005, 2006 and 2007, respectively.

If you surrender your ADSs and withdraw preferred shares, you risk losing the ability to remit foreign currency abroad and certain potential Brazilian tax advantages.

As an ADS holder, you will benefit from the electronic certificate of foreign capital registration to be obtained by the custodian for our preferred shares underlying the ADSs in Brazil, which permits the custodian to convert dividends and other distributions with respect to the preferred shares into non-Brazilian currency and remit the proceeds abroad. If you surrender your ADSs and withdraw preferred shares, you will be entitled to continue to

rely on the custodian's electronic certificate of foreign capital registration for only five business days from the date of withdrawal. Thereafter, upon the disposition of or distributions relating to the preferred shares, you will not be able to remit abroad non Brazilian currency unless you obtain your own electronic certificate of foreign capital registration or you qualify under Brazilian foreign investment regulations that entitle some foreign investors to buy and sell shares on Brazilian stock exchanges without obtaining separate electronic certificates of foreign capital registration. If you do not qualify under the foreign investment regulations you will potentially be subject to less favorable tax treatment.

If you attempt to obtain your own electronic certificate of foreign capital registration, you may incur expenses or suffer delays in the application process, which could delay your ability to receive dividends or distributions relating to our preferred shares or the return of your capital in a timely manner. The depository's electronic certificate of foreign capital registration may also be adversely affected by future legislative changes.

Holders of ADSs may be unable to exercise preemptive rights with respect to our preferred shares.

We may not be able to offer our preferred shares to U.S. holders of ADSs pursuant to preemptive rights granted to holders of our preferred shares in connection with any future issuance of our preferred shares unless a registration statement under the United States Securities Act of 1933, or the Securities Act, is effective with respect to such preferred shares and preemptive rights, or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement relating to preemptive rights with respect to our preferred shares, and we cannot assure you that we will file any such registration statement. If such a registration statement is not filed and an exemption from registration does not exist, The Bank of New York, as depository, will attempt to sell the preemptive rights, and you will be entitled to receive the proceeds of such sale. However, these preemptive rights will expire if the depository does not sell them and U.S. holders of ADSs will not realize any value from the granting of such preemptive rights.

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of the Company

General

We operate in most of our authorization area on a frequency referred to as A Band, initially under a concession granted in November 1997 by the federal government of Brazil. Previously, we operated under a permission granted on April 29, 1993 to our predecessor company, Telecomunicações de Minas Gerais S.A. On February 19, 2004, we signed a contract with Anatel to migrate to the SMP regime from the SMC regime. Our SMP authorization is for an indeterminate period of time and covers a region that includes 100% of the municipalities and 100% of the population in the State of Minas Gerais. Telemig Celular started operating in the *Triângulo Mineiro* region on May 30, 2005, on a frequency referred to as E band. The *Triângulo Mineiro* network is fully based on GSM/EDGE technology. At December 31, 2007, we had 3,900,826 subscribers, representing an estimated market share of 29.1% in our region, as opposed to 3,435,562 subscribers, or an estimated 31.6% market share, at December 31, 2006.

The Registrant currently owns 83.3% of the share capital, including 89.2% of the voting shares, of Telemig Celular, and these shares constitute substantially all of the Registrant's assets, other than cash and cash equivalents and temporary cash investments. The Registrant relies almost exclusively on dividends from Telemig Celular to meet its cash needs, including cash to pay dividends to its shareholders.

The Registrant's legal and commercial name is Telemig Celular Participações S.A. The Registrant was formed on August 19, 1998, as a corporation (*sociedade por ações*) organized under the laws of the Federative Republic of Brazil with unlimited duration. Our headquarters are located at Rua Levindo Lopes, 258, Funcionários, 30140-170, in

the city of Belo Horizonte, State of Minas Gerais, Brazil, and our telephone number is 55-31-9933-3535. Our agent for service of process in the United States is Puglisi & Associates, located at 850 Library Avenue, Suite 204, P.O. Box 885, Newark, Delaware 19715.

Historical Background

Before the incorporation of Telebrás in 1972, there were more than 900 telecommunications companies operating throughout Brazil. Between 1972 and 1975, Telebrás and its operating subsidiaries, collectively the Telebrás System, acquired almost all of the other telephone companies in Brazil and monopolized the provision of public telecommunications services in almost all areas of the country. Beginning in 1995, the federal government initiated a comprehensive reform of Brazil's telecommunications regulatory system. In July 1997, Brazil's National Congress adopted the General Telecommunications Law, which provided for the establishment of a new regulatory framework, the introduction of competition, and the privatization of the Telebrás System.

In January 1998, in preparation for the restructuring and privatization of the Telebrás System, the cellular telecommunications operations of the Telebrás System were spun off into separate companies. In May 1998, the Telebrás System was restructured to form, in addition to Telebrás, twelve new holding companies. Virtually all assets and liabilities of Telebrás, including the shares held by Telebrás in the Telebrás System, were allocated to the new holding companies. The resulting holding companies, together with their respective subsidiaries, consisted of (i) eight cellular holding companies, one in each of eight cellular regions, holding one or more operating companies providing cellular services; (ii) three wire line holding companies, one in each of three wire line regions, holding one or more operating companies providing local and intraregional long-distance services; and (iii) Embratel Participações S.A., a holding company of Telecomunicações Brasileiras S.A. - Embratel, which provides domestic and international long-distance telephone services throughout Brazil.

The Registrant is one of the eight cellular holding companies formed in connection with the Telebrás System's restructuring. In connection with the breakup of Telebrás, the Registrant was allocated all the share capital held by Telebrás in Telemig Celular. In July 1998, the federal government sold substantially all of its shares of the new holding companies, including the Registrant's, to private-sector buyers. The majority of the Registrant's voting shares were purchased by Telpart Participações S.A., or Telpart. See Item 4C. Organizational Structure.

Change in Management

Upon taking over the management of Telemig Celular, on April 03 2008, the current management has been reviewing the Company's operations. While the current management's review has not been concluded, management believes it is unlikely, although not impossible, that any findings would result in a material adverse effect on the Company's business, results of operations or net income.

Recent Developments

Stock Purchase Agreement with Vivo

On August 2, 2007, Telpart, the Registrant's controlling shareholder at that time, entered into a stock purchase agreement with Vivo, with the purpose of selling its total equity interest in the Registrant's capital stock and in Tele Norte Celular Participações S.A., or Tele Norte (related company as of March 31, 2008).

Vivo is the controlling shareholder of Vivo S.A., a personal mobile service operator (SMP), in Region I (service areas 3, 4 and 9), in Region II (service areas 5 and 6), and Region III (service areas 1 and 2). Service areas 1 and 2 in Region III comprise São Paulo, service areas 3, 4 and 9 in Region I comprise Espírito Santo, Rio de Janeiro, Minas Gerais, Sergipe and Bahia, service areas 5 and 6 in Region II comprise Paraná, Santa Catarina and Rio Grande do Sul. Service area 7 in Region II comprises Mato Grosso do Sul, Goiás, Tocantins, Mato Grosso, Rondônia, Acre and the Distrito Federal. Service area 8 in Region I comprises Amazonas, Roraima, Pará, Amapá and Maranhão.

The execution of the stock purchase agreement was approved by Telpart's directors on August 2, 2007 and by the shareholders representing 99% of the total capital stock of Telpart's controlling entity, Newtel Participações S.A., or Newtel, in a previous meeting held on that same date, under the provisions of Newtel's Shareholders Agreement. On August 21, 2007, the extraordinary shareholders' meeting of Telpart approved the sale of the shares held by it in the Registrant's and Tele Norte's capital stock, ratifying the stock purchase agreement.

The transfer of the Registrant's control was approved by the Director Council of Anatel on October 23, 2007. The stock purchase agreement provided for the joint acquisition of the shares of the Registrant and Tele Norte.

On December 20, 2007, Vivo entered into a stock purchase agreement with Telemar, with the purpose of selling the shares held by Vivo in Tele Norte's capital stock which Telpart had committed to sell to Vivo under the terms of the stock purchase agreement dated August 2, 2007. The transfer of Tele Norte's control was approved by the Director Council of Anatel on March 4, 2008.

On April 3, 2008, the transfer of our control and that of Tele Norte (and, indirectly, of Amazônia Celular) to Vivo became effective. Subsequently, on that same date, the transfer of control of Tele Norte (and, indirectly, Amazônia Celular) to Telemar also became effective.

The extraordinary shareholders' meeting held on April 3, 2008 elected the directors indicated by Vivo to both companies' board of directors and accepted the resignations of the members of the fiscal council. At that same date, the first meeting of our board members was held, when our new executive committee was appointed. On April 24, 2008, the new members of our fiscal council were appointed.

The sale of our control to Vivo will also be submitted to the review of the Brazilian Administrative Council of Economic Law - CADE, under the provisions of the applicable legislation.

On April 3, 2008, the purchase price of the Registrant's 7,258,108 common shares and 969,932 preferred shares, already including the compensations provided by the stock purchase agreement with Telpart, amounted to R\$1,162,594,377.44. This amount is equivalent to approximately R\$151.17 per common share and R\$67.43 per preferred share. The price paid for the Registrant's common shares corresponds to approximately R\$2,625.04 per share of Telemig Celular.

In addition, Vivo acquired the share subscription rights held by Telpart regarding our and Tele Norte's shares as a consequence of the option provided by CVM Instruction No. 319/99, for the amounts established by the stock purchase agreement with Telpart, in the amount of R\$70,511 and R\$22,611, respectively. On that same date, Vivo transferred the subscription rights regarding Tele Norte to Telemar for the same amount paid to Telpart for its acquisition.

Voluntary Tender Offer

On April 8, 2008, Vivo informed the market that, as approved by its board of directors on August 2, 2007, its subsidiary TCO IP S.A., or TCO, would launch in Brazil on that same date, a tender offer for the acquisition of up to 1/3 of our outstanding preferred shares. In the case of the Registrant, the tender offer was extended to the holders of preferred shares underlying its ADSs. Each of the ADSs of the Registrant represents two preferred shares. On the same date, the tender offer was filed with the Commission, the Schedule TO was distributed to the holders of ADSs of the Registrant and a public notice was broadcasted in Brazil as required by Brazilian law.

The main terms and conditions of the tender offer are the following:

- the price per share, calculated based on the weighted average price per preferred share of Telemig Celular and of the Registrant observed during the 30 trading days on the BOVESPA prior to and including August 1, 2007, including a premium of approximately 25%, was: (i) R\$654.72 per preferred share of Telemig Celular, and (ii) R\$63.90 per preferred share of the Registrant, which is equivalent to approximately US\$74.68 per ADS of the Registrant based on the average of the purchase and the selling U.S. dollar/*real* exchange rate based on the PTAX 800 rate, as set forth by the Central Bank on April 4, 2008, of R\$1.711 per US\$1.00.
- the holders of preferred shares in Brazil who accepted the offer received payment in cash in *reais*, under the terms of the public notice and according to the regulations of the Brazilian Custody and Clearing Company (*Companhia Brasileira de Liquidação e Custódia*), or CBLC. The Bank of New York was the custody agent

of the ADSs, receiving the payment in U.S. dollars and distributing it to the holders of ADSs of the Registrant in the United States who accepted the offer as set forth by the tender offer.

On May 15, 2008, Vivo disclosed a notice of material fact (Fato Relevante) informing the results of the voluntary tender offer. Since the number of shares tendered (TMCP4 and TMGC13) exceeded the maximum number of shares TCO had undertaken to acquire according to the tender offer notice, a proportional allocation was

applied. For the other shares tendered (class B, C, E and F) proration factor was not applied. The complete information is stated below:

Registrant		
Negotiation Code	Amount of shares acquired by the Offeror	Proration factor
TMCP4L	7,257,020	0.3907

Telemig Celular		
Negotiation Code	Amount of shares acquired by the Offeror	Proration factor
TMGC6L (class B)	47	n/a
TMGC7L (class C)	908	n/a
TMGC11L (class E)	703	n/a
TMGC12L (class F)	77	n/a
TMGC13L (class G)	87,757	0.9651

After the tender offer, the ownership interest held by TCO and Vivo in us was the following:

Registrant						
Shareholders	Common		Preferred		Total	%
	shares	%	shares	%		
Vivo	7,258,108	53.899	969,932	4.265	8,228,040	22.725
TCO	-	-	7,257,020	31.912	7,257,020	20.043
Others	6,207,951	46.101	14,514,050	63.823	20,722,001	57.232

Mandatory Tender Offer

On April 11, 2008, Vivo informed the market that it had filed a tender offer request with the CVM for the purchase of all of our outstanding common shares along with a draft of the respective public notice. The effective launching of the tender offer is subject to authorization of the CVM and the BOVESPA, according to the terms of CVM Instruction No. 361/02.

Replacement of Independent Auditors

At a meeting held on May 26, 2008, the board of directors of the Registrant approved the appointment of Ernst & Young Auditores Independentes S.S. as its independent auditors for the period beginning April 2008. The decision to replace the Registrant's current independent auditors is due to the change of its control that took place in

April 2008, so that the financial statements of Vivo Participações S.A., or Vivo, its current controlling shareholder, and those of the Registrant are audited by the same independent auditors.

Capital Expenditures

For a description of our capital expenditures, see Item 5. Operating and Financial Review and Prospects.

B. Business Overview

Our Region

Our authorization area in the State of Minas Gerais covers a region of more than 586,552 square kilometers, which is approximately 6.9% of Brazil's territory, with a population of approximately 19.7 million people, representing 10.4% of Brazil's population. Minas Gerais is the second most populous state in Brazil, and the third largest in terms of gross domestic product and the fourth largest in terms of geographic area. At December 31, 2007, our region had 29 cities with populations in excess of 100,000 people, including the cities of Belo Horizonte, Contagem, Juiz de Fora, Montes Claros, Uberaba and Uberlândia. In 2005, the year for which the latest such information is publicly available, the annual per capita income in Minas Gerais was approximately R\$ 9,934, and the state generated approximately 9.9% of Brazil's gross domestic product. As of December 31, 2007, of the 19.7 million inhabitants in our region, approximately 67.6% used wireless telecommunications services. Our business, financial condition and results of operations depend largely on the performance of the Brazilian economy and the economy of the State of Minas Gerais, in particular. See Item 5A. Operating Results Overview Brazilian Political and Economic Environment for a description of the Brazilian economy.

Our coverage area has continued to grow and is the largest in the State of Minas Gerais, which is an important competitive strength to Telemig Celular. We currently operate in 628 localities of the State, an increase of 7.0% compared to 2006. In 2007, we participated in the State Government's *Minas Comunica* program, which intends to take cellular telephony to all 853 municipalities of the State of Minas Gerais until the end of 2008. We won the public bid process to provide services to 134 cities which did not have cellular coverage and, in 2007, we were able to provide coverage to 24% of them.

The shaded portion of the following map shows the location of the State of Minas Gerais in Brazil.

Services

At December 31, 2007, we had an estimated total market share of 29.1% in our area, as compared to an estimated market share of 31.6% and 38.1% at December 31, 2006 and 2005, respectively. It should be noted that in May 2005, we launched our operations in the Triângulo Mineiro region, an area that previously was not part of our authorization, and where we had no market share. At December 31, 2005, after only seven months of operations as the fourth entrant in the Triângulo Mineiro region, we already had attained an estimated market share of 12.4%, and at December 31, 2007 we had an estimated market share of 20.3% in that region. When considering only the area of our initial authorization, that is, Minas Gerais State excluding the Triângulo Mineiro region, our market share by the end of 2006 and 2007 was estimated to be 33.1% and 30.0%, respectively. Our wireless services use the most successful 2G technology that combines economy of scale, quality of service for voice and high-speed data, global roaming capabilities and future-proof migration path to advanced data capabilities, the GSM/EDGE technology. We have been involved in the process of overlaying GSM technology onto our TDMA/Advanced Mobile Phone System, or AMPS, network since the last quarter of 2004, which incorporates updated versions of Enhanced Data Rates for Global Evolution, or EDGE, technology for data transmission. We offer GSM service to subscribers in all the cities covered in our region, covering 628 localities.

In order to improve its new multimedia services, we have been using 850MHz spectrum (same frequency used by our TDMA network) to implement UMTS/HSPA network, aggregating a new Code Division Multiple Access technology, or CDMA, technology. By taking such measure, we are up to date with the most advanced technology with a potential to becoming the dominant market for broadband technology, at the same time we are going to turn off our analog service, which uses AMPS technology. As one player on the UMTS arena, we are going to be in the forefront of the technology to achieve the highest data rates, with the network already capable to interoperate with future gadgets capable to achieve data rates of up to 14.4 Mbps on the downlink, called HSDPA, and with enhanced uplink, called HSUPA. Recently, Telemig won a licence in 2.100 MHz to be used also to implement a WCDMA (HSDPA) network, aligned on the core band of this 3G technology.

We recognize that adapting our services in response to technology advances is a key factor in maintaining our competitiveness in Minas Gerais, and we are committed to keeping our network and services modern and reliable.

We offer a series of services to prepaid and contract subscribers, as well as business solutions to corporate users. One of our innovative rate plans launched in 2007 was *Poupo*, a new product developed with the purpose to launch our operations to the residential market. *Poupo* obtained a significant result since its launching, due to its mobility and reduced price.

We also improved and reformulated our portfolio of products and services to encourage consumption and offer more facilities to our customers. We launched subscription plans to the individual and corporate segments, we introduced a new portfolio of recharges and distribution channel and the sale of recharge through the subscriber's mobile handset.

One of the innovations in the prepaid segment in 2007 was the credit transfer service. This service allows clients to transfer credit in the amounts of R\$3.0, R\$5.0, R\$10.0 or R\$50.0 among them, through their mobile handsets, via Short Message Service, or SMS. The credits received may be used for voice, data and messages services, and are valid for seven days.

We were pioneers in the launching of a mobile media application in Latin America named *Se Liga*, which broadcasts products, services and promotions in the cellular screen when the equipment is idle, through silent and non intrusive messages.

We were more aggressive in our marketing strategy in 2007, without however, jeopardizing our planned profitability, which was evidenced by a decrease in subscriber acquisition cost of 20.6%. In 2007, we encouraged the sale of chips and recharges, and we offered our mobile customers handsets at more affordable prices and with differentiated advantages. As a result, we became leader in sales in 2007 in the main retail campaigns.

We are constantly evaluating emerging market trends and customer demand in order to develop new services. In 2007, we launched new value added services such as full track downloads, missed call notice, video downloads and mobile payment services.

During 2007, we made a number of important value-added service innovations. We were the first operator to launch a 3G network in Brazil, allowing our subscribers to use mobile internet broadband access and video calling services. In December 2007, we extended the use of this technology across the State of Minas Gerais, by acquiring licenses for service providing through an auction carried out by Anatel, which was an important step to increase the participation of data services in our revenues.

We were also the first Latin American operator to launch a cell phone broadcast service that allows subscribers to receive news, interactive trivia and mobile advertising.

Through agreements with other mobile service providers, we offer automatic roaming services throughout Brazil to our subscribers that allow them to make and receive calls while out of our area. We also offer international roaming on GSM networks through 132 agreements implemented in 123 countries.

In addition, we provide mobile telecommunications services to subscribers of other wireless service providers while they are in our area. These other service providers are charged by us under roaming agreements for the service provided to their subscribers.

Strategy

Our strategy is to increase our profitability by maintaining our market share of revenue focusing on the more valuable subscribers, reducing and containing our costs and expanding operations to markets with good prospects. The key elements in implementing this business strategy are to:

- *Effectively manage the migration of our network to GSM technology.* In November 2004, we introduced GSM service to certain parts of our area. This event marked an important stage of the migration of our network from TDMA to GSM technology. The transition from TDMA to GSM technology will encompass approximately a three to five year period. We are carefully managing the GSM migration process by paying particular attention to maintaining the quality and reliability of service, preventing service disruptions and containing costs relating to the migration. Currently, most of our client base already operates with GSM network, and the other clients will undergo migration naturally.

- *Retain the quality of our subscriber base by providing the best customer service and service plan options to high revenue users.* Further penetration of the Brazilian wireless market will generally involve the addition of subscribers who will purchase prepaid plans to use a relatively small amount of airtime per month. While we expect to continue to increase our subscriber base and to grow in this segment of the market, we also plan to focus heavily on retaining and building our high revenue subscriber base. We also intend to accomplish this goal by continuing to invest and employ our efforts to provide our customers with the best quality of service we can make available to them, including preventing service disruptions and striving to further refine and customize our services to better suit the individual preferences and spending profiles of our customers.
- *Maximize synergies between Telemig and Vivo.* With the transfer of our control to Vivo on April 3, 2008, we expect to take advantage of the synergy existing between both companies, especially the reduction of costs related to the larger scale in the purchase of handsets and equipment and the stronger activity in the Brazilian market.
- *3G evolution.* Telemig will follow the strategy of Vivo for the deployment of its 3G network. The main proposal is to establish a very aggressive coverage target with the network configured to provide high bandwidth data traffic. The access network evolution will be driven for HSPA (High Speed Packet Access) access and its evolution. Vivo and Telemig will smoothly migrate their transport network to be IP based, which is the tendency of the technological evolution and digital convergence. The voice traffic of the high end customers will be gradually driven to W-CDMA access, as the handsets achieve mass-market scale and their costs become as competitive as those for GSM handsets.

Subscribers

The following table sets forth information regarding our operating data and subscriber base for the periods indicated within our area.

	Year ended December 31,		
	2005	2006	2007
Contract subscribers at period end	856,522	798,180	833,414
Prepaid customers at period end	2,487,662	2,637,382	3,067,412
Total	3,344,184	3,435,562	3,900,826

- (1) Estimates based on data from Target 2005 (Brasil em Foco).
- (2) Estimates by our management of the number of people within our region who can access our cellular telephone signal.
- (3) Estimates by our management of the percentage of the population of our region that can access our cellular telephone signal.
- (4) Estimates by our management of the percentage of the population that has cellular lines in service in our region.
- (5) In nominal *reais*, net of value-added taxes the *Programa de Integração Social*, referred to as PIS, and the *Contribuição para Financiamento da Seguridade Social*, known as COFINS and the *Imposto sobre Circulação de Mercadorias e Serviços*, commonly known as the ICMS.
- (6) Calculated based on the (sum of salaries paid to our marketing and selling personnel, consulting fees regarding sales and marketing services, commissions, subsidies for the sale of handsets, advertising and promotion costs, and the Contribution for the Telecommunication Inspection Fund, or FISTEL tax (activation tax)), less the activation fee for the period, divided by the number of gross activations in the period.
- (7) Calculated based on the year-to-date deactivations divided by the sum of average monthly opening number of subscribers since beginning of the year multiplied by 12, divided by the number of months in the period.

Contract and Prepaid Market

At December 31, 2007, we had 3,900,826 subscribers, an increase of 13.5% over December 31, 2006, and an estimated market share of 29.1%, compared to an estimated market share of 31.6% and 38.1% at December 31, 2006 and 2005, respectively. It should be noted that in May 2005, we launched our operations in the *Triângulo Mineiro* region, an area that previously was not part of our authorization, and where we had no market share. After only seven months of operations as the fourth entrant in the *Triângulo Mineiro* region, we already had attained an estimated market share of 12.4% at December 31, 2005 and at December 31, 2007 we had an estimated market share of 20.3% in that region. When considering only the area of our initial authorization, that is, Minas Gerais State excluding the *Triângulo Mineiro* region, our market share by the end of 2007 and 2006 was estimated to be 30.3% and 33.1%, respectively. Our customers base consists of (i) contract subscribers, who pay a monthly fee to enroll in one of our rate plans and who are invoiced monthly after services have been provided to them; and (ii) prepaid customers who purchase in advance cards that contain a specified number of airtime credits that can normally be used within the 180 day period after the prepaid card is activated. Our contract subscribers consist primarily of higher income individuals

who use their handsets for both personal and business purposes. Our prepaid customers are generally younger, have lower income than contract subscribers, and use their handsets more to receive than to place calls.

Our contract subscribers used an average of 198 minutes of airtime per month in 2007, representing a 7.1% increase from an average of 185 minutes per month in 2006. Our prepaid customers used an average of 37 minutes of airtime per month in 2007, as compared to an average of 29 minutes per month in 2006. Increases in the average minutes of use per both prepaid and postpaid users was a result of our campaigns to incentive the use of cellulares and of a better credit quality of clients acquired, in addition to the reformulation of our portfolio of products. Recently, our prepaid customer base has grown, increasing by 16.3% to 3,067,412 at December 31, 2007 from 2,637,382 at December 31, 2006. At December 31, 2005, our prepaid customer base was 2,487,662. Our contract subscriber base increased by 4.4% to 833,414 at December 31, 2007 from 798,180 at December 31, 2006 and reached 856,522 at December 31, 2005. As of December 31, 2007, 78.6% of our subscribers were prepaid customers and 21.4% were contract customers, as compared to 76.8% and 23.2%, respectively, at December 31, 2006 and 74.4% and 25.6%, respectively, at December 31, 2005. The average cost of acquiring our customers decreased to R\$117.0 in 2007, as compared to R\$147.0 in 2006, and to R\$145.4 in 2005.

The growth of prepaid services is due to a number of factors, including (i) previous market penetration efforts having already reached substantially all those who fit the profile of contract subscribers; (ii) a calling party pays environment whereby a prepaid customer does not incur charges in responding to an incoming call while inside our area; (iii) the ability of subscribers to make collect outgoing calls without incurring charges; and (iv) ease of access to prepaid services because no credit checks are conducted in connection with the provision of prepaid services. We believe that prepaid plans are attractive to a wide range of cellular customers. In addition to helping customers control costs, a prepaid program has no monthly invoice and allows customers to prepay for cellular services in cash. The prepaid market is comprised of customers who generally earn a variable income and prefer not to make a fixed financial commitment, who do not have the credit profile required to purchase a contract plan or who seek cellular services for emergencies or limited use only.

In March 2007, we changed the amounts and validity of the prepaid cards. We launched promotional cards in the amounts of R\$20, R\$35 or R\$50 with bonus according to the client's incoming minutes of use and limited to R\$125. Other credits in the amounts of R\$3, R\$5, R\$10 and R\$15 (not including bonus) are offered to clients that are unable to activate credits above R\$20.

Benefits of an increased prepaid customer base include: (i) no billing and collection expenses and no delinquent accounts; (ii) advance receipt of cash from subscribers in exchange for services that may or may not have to be provided, depending upon whether or not the prepaid card is used; and (iii) a lower cost of acquisition for each prepaid customer as compared to a contract subscriber due to, among other things, substantially lower subsidies for prepaid customers' handsets. However, offsetting these benefits is the fact that prepaid customers generally spend less than one-fifth as much as contract customers on cellular services, tend to roam less, and rarely use other value-added services. Most of the revenue generated from the growth of our prepaid customers' base comes in the form of interconnection fees that we charge when subscribers of other telecommunications operators use our network to make an incoming call to one of our prepaid customers.

The growth of the subscriber base of all Brazilian wireless telecommunications service providers, including A Band operators, will likely be predominantly in the prepaid market in the future as most of those who have the profiles of contract subscribers have usually already contracted with a wireless service provider. Further market penetration will largely involve those whose customer profile is better suited to the use of prepaid services.

A prepaid customer is no longer considered a customer after 60 days from the expiration date of the last prepaid card. The validity of the credit varies according to its value: R\$3.0 (three days), R\$5.0 (five days), R\$10.0 (30 days), R\$15.0 (60 days), R\$20.0 (90 days), R\$35.0 (120 days) and R\$50.0 (180 days). Usually, prepaid card balances are automatically cancelled if the customer has not activated a new card before the last day of the expiration date of the current credit. Currently, if a contract subscriber's payment is more than 90 days past due, the subscriber is considered to have turned over, except for the *Plano Controle* subscribers, who are churned if payment is more than 78 days past due.

Churn

We determine annualized churn rates for a given period by dividing the sum of all subscribers disconnected since the beginning of the year by the average number of subscribers at the beginning of each month since the beginning of the year, dividing the product by the number of months in the period to be measured, and multiplying by 12. Churn rates, which measure subscriber turnover, are then expressed as a percentage. Contract subscribers who migrate to prepaid service voluntarily within 30 days of becoming a subscriber are not counted as being churned. Our average blended monthly churn rate in 2005, 2006 and 2007 was 2.8%, 3.3% and 3.1%, respectively. The decrease in our churn rate from 2006 to 2007 is due to the success of our campaigns to attract and retain clients.

Sources of Revenues

We generate revenue from (i) usage charges, which include measured service charges for outgoing calls, incoming collect calls, roaming and other similar charges; (ii) monthly subscription charges; (iii) interconnection fees, which are amounts charged by us to other telecommunications service providers, including other cellular, fixed-line and long-distance service providers, for incoming calls requiring the use of our network and long-distance calls made or received by means of our network; (iv) sales of handsets and accessories; and (v) other charges, such as charges for internet access, text messaging, call forwarding, call waiting and call blocking. The rates that we charge for our service plans and interconnection are influenced by or subject to regulation by Anatel. We still earn monthly revenues from providing co-billing services and from the use of our prepaid platform when our customers choose to use a telecommunications service provider to make long-distance calls, both domestically and internationally.

With the introduction of carrier selection by customers as a result of the transition from the SMC regime to the SMP regime, on a call-per-call basis our interconnection agreements with long-distance service providers were substantially changed. Although the long-distance carriers own the revenues, they must rely on co-billing agreements with us to collect the fees. In the introduction of these new procedures, fraud levels increased substantially and demanded joint efforts of all operators to be refrained. Cooperative efforts among operators persist to keep this problem under control.

Subscriber Rates

Mobile telecommunications services in Brazil are offered on a calling party pays basis, under which the subscriber pays only for calls that he or she places, except that roaming charges are applied to calls received while outside the subscriber's home registration area. In addition, cellular subscribers wishing to place calls may avoid incurring airtime charges by making collect calls because there are no charges for collect calls. Subscriber charges are computed based on factors such as the subscriber's service plan, the location of the party called, the place from which the call originated and the duration of the call. Subscribers pay for at least 30 seconds of airtime even if their call lasts less than 30 seconds, but they are not required to make any payment if their call lasts less than three seconds. After the first 30 seconds of a call have elapsed, we charge subscribers for every six seconds of airtime used.

In April 2007, we launched new postpaid service plans under the name *Conta*, which we believe rendered the postpaid services segment more attractive and competitive with market profile, by offering a flat rate that includes SMS, Multimedia Message, or MMS and long distance advantages, in addition to reduced rates in the new portfolio in all bands. As of December 31, 2007, we recorded a penetration rate of 27.5% in the new plans base.

We also launched, in May 2007, promotional plans to postpaid subscribers. *Plano Fim de Semana* offers its subscribers unlimited Telemig Celular to Telemig Celular calls during the weekends. The *Plano Sempre Amigos*, in turn, offers up to a 90% discount in calls between its subscriber and his selection of our two Telemig Celular numbers. The price of each plan is R\$9.90 per month. These plans contributed to increases in revenues and encouraged customer loyalty.

In 2007, we started to offer one more feature to our *Plano Controle* subscribers. Through this feature, additional contracted credits are made available to the plan's subscriber at the end of the franchise period and payment is only charged in the subscriber's next bill. The *Plano Controle Extra* reduced cards activation costs and led customers that traditionally did not activate credits to do it regularly. This new feature contributed to increases in revenues and enhanced *Plano Controle*'s subscribers' loyalty.

We also offer our subscribers an internet-related service that includes communication, news and entertainment services, and internet and remote access to personal computers. Our most popular value-added services are mobile internet broadband access, text/multimedia messaging, voice mail, income call notice and content downloads. These services are used by 80% of our digital subscribers. Value-added services were responsible for 6.7% of net service revenues in 2007.

Roaming Fees

We also receive revenue from roaming agreements with other cellular service providers. When a call is made from within our area by a subscriber of another cellular service provider, that service provider pays us for the use of our network. Conversely, when one of our subscribers makes a cellular call outside our area, we must pay charges to the mobile telecommunications service provider in whose area the call originates a roaming fee for the use of that service provider's network. In 2007, roaming fees accounted for 1.8% of our net service revenues.

Interconnection Fees

Until July 13, 2006, interconnection fees for local wireless traffic were due only if the traffic balances between any two companies operating in the same area was either less than 45% or in excess of 55% (bill & keep regime). Beginning July 14, 2006, new regulation on SMP network usage fees issued by Anatel established that interconnection payments should occur for the full amount of traffic between operators (full billing regime).

As of July 17, 2005, we implemented a 4.5% adjustment in the interconnection fee for the use of network of the SMP (VU-M) exclusively for local calls VC1 between ourselves and the following operators: Oi, TIM, CTBC (Fixed and Mobile) and Telemar, based on an agreement among such operators and us. As a result, our interconnection fee increased from R\$0.41611 per minute to R\$0.43483, net of taxes.

At the end of 2005, we participated in an agreement to temporarily readjust prices by 4.5% of the interconnection fee (VU-M) on long-distance calls VC2 and VC3. Telemar, Brasil Telecom (cellular and fixed lines), Telefônica, CTBC (cellular and fixed lines), Sercomtel (cellular and fixed lines), Oi, Vivo, TIM, Claro, Amazônia Celular, and Telemig Celular were involved in this agreement. Pursuant to the agreement, implementation of the interim readjustment became effective immediately after Anatel's ratification of new rates for calls to users of fixed-line services, which took place in March 2006.

In September 2007, we also entered into an agreement with Embratel that became effective in January 2008, under which we agreed to readjust prices of the interconnection fee (VU-M) on long-distance calls VC2 and VC3 between Telemig Celular and Embratel by 6.56% in order to bring those VU-M rates to prices currently practiced in the market.

In July 2007, STFC and SMP providers, with the exception of Embratel, Intelig, GVT and TIM-LD, entered into an agreement amending the interim agreement of 2005, which readjusted the interconnection fee (VU-M) effective on May 31, 2007 by 1.97% . The readjustment of the interconnection fee by 68.5% of the adjustment index for 2008 was also negotiated on this occasion. This adjustment, once ratified by Anatel, will be applied to local calls VC1 between fixed and mobile lines of local operators' basic plans.

The adjustment of the interconnection fee (VU-M) for local and long-distance calls is being questioned by some operators that are not party to the agreements for local and long-distance calls and is also being discussed judicially by us. See Item 8A. Consolidated Financial Statements and Other Financial Information Legal Proceedings Regulatory Legal Proceedings GVT Lawsuit against Anatel and Other SMP Operators Regarding VU-M Resolution and Item 3D. Risks Factors Risks Relating to our Business and the Brazilian Telecommunications Industry Anatel's new regulation regarding interconnection and network usage fees could have an adverse effect on our results for further information.

Sales, Marketing and Customer Service

We sell handsets, accessories and calling cards and provide activation services through four primary distribution channels: (i) an extensive network of mostly exclusive independent local distributors; (ii) a network of company-owned stores; (iii) a direct sales force targeting corporate accounts, government accounts and high-volume consumers; and (iv) for prepaid cards, a wide variety of points-of-sale, including supermarkets, lottery ticket stands, newsstands and other retail outlets. The number of points-of-sale for prepaid cards was approximately 37,230 at December 31, 2007, higher than the 29,000 and 24,000 registered in 2006 and 2005, respectively. While operating company-owned stores is the most cost-effective means of distribution in centers with higher populations due to savings on independent distributor commissions, lower sales volumes outside of major urban centers make it more cost-effective to use independent local distributors to avoid the overhead costs associated with operating company-owned stores. We develop customer awareness through marketing and promotion efforts and high-quality

customer care, building upon the strength of its brand name to increase consumer awareness and customer loyalty, and advertising through print, radio, television, wall panels and sponsoring sports and cultural events and outdoor advertising campaigns.

Independent Distributors

Independent distributors sell handsets, handset accessories and calling cards and provide activation services and sales coverage across our area with minimal capital investment being made or operating expenses being incurred by us. Independent distributors provide customers with the convenience of being accessible from a greater number of locations. Independent distributors are paid a variable commission for each (i) new contract customer they sign up for service, provided that the customer retains and pays for service for at least two months and provided, further, that there is no fraud and proper documentation is recorded; and (ii) new prepaid customer, provided the customer subsequently purchases a certain minimum amount in prepaid calling cards. Independent distributors also receive a mark-up margin on sales of handsets and prepaid card kits. In addition, independent distributors are eligible for bonuses for meeting or exceeding sales targets.

At December 31, 2007, we had 939 independent distributors points-of-sale, located primarily in metropolitan centers, as compared to 799 at December 31, 2006 and 747 at December 31, 2005. We have exclusivity arrangements with most of our main distributors. Our exclusive independent retail network includes well-known retail chains, drugstores and supermarkets with well-traveled points-of-sale and active sales promotions. All independent retailers receive marketing support from us to help assure that they maintain specified standards of service and participate in promotions.

Company Stores

We sell telecommunications services, handsets and accessories through company-owned stores located throughout Minas Gerais. These stores are effective in building our image and brand awareness, provide high-quality levels of service, greater accountability and help to ensure consistent customer service. Although the majority of sales at our company-owned stores consist of subscriptions for mobile telecommunications services, the company-owned stores also sell handsets to contract and prepaid customers. At December 31, 2007, we had 20 company-owned stores, as compared to 19 and 20 at December 31, 2006 and 2005, respectively.

Distributors and Marketing

At December 31, 2007 and 2006, we made prepaid cards available at approximately 37,230 and 29,000 points-of-sale located throughout Minas Gerais, respectively, including national and regional retail franchise chains, supermarkets, lottery ticket stands, newsstands, banking branches and drugstores. In addition, we engage in telemarketing and mailing efforts aimed at increasing average revenue per user through the sales of value-added services, directing customers to service plans that best fit their usage patterns, and soliciting potential customers. We have also implemented a customer rewards program based upon the number of minutes of airtime used and length of time as a customer.

Customer Service

One of our principal goals is to provide our customers with excellent customer care. During the first year of service we contact our clients five times through SMS, and nine times through our call center to ask about their degree of customer satisfaction, if they have had any service-related problems or questions, and to ensure they are receiving the plans and services that are best suited to their level of usage and preferences. We provide our clients with 24-hour customer service to answer questions and resolve service problems through a call center infrastructure that can accommodate up to 22,000 calls per hour during peak hours. Through our customer service attendants, we are able to provide immediate accessibility to customers for requests relating to matters such as reactivation, addition of value-added services and number changes. During 2007, our customer service department answered, on average 1,795,068 calls per month and responded to an average of 2,139 letters and e-mails per month, as compared to an

average of 1,746,143 calls per month and 1,849 letters and e-mails per month in 2006. The customer satisfaction rate among our subscribers was 82.6% in 2006 and 82.8% in 2007. In 2007, 91.5% of all complaints threatening termination of subscription were satisfactorily resolved with the customer deciding to retain his or her subscription, as compared to 85.0% in 2006. We adopted the Customer Operations Performance Center methodology, which aims at quality, services, productivity improvement, and cost reduction combined with increase in profits.

Network

In early 2004, we decided to begin transforming our network from a TDMA-based network to a GSM-based network. The introduction of GSM/EDGE service for our customers enhanced their data transmission speed and established a base for the future offering of continuously evolving wireless products and services. During 2006 and 2007, we made capital expenditures of R\$200 million and R\$223 million, respectively, in our network, being primarily associated with the GSM network expansion.

In December 31, 2007 and December 31, 2006, our TDMA network covered approximately 79% of the population in our area, and consisted of 12 and 10 cellular switches and 714 and 702 cell sites, respectively. Our TDMA network is interconnected directly with the local public fixed-line telephone network in Minas Gerais. Currently, our TDMA switches and cell sites have the capacity to provide services to approximately 1.9 million subscribers. Nortel Networks do Brasil Ltda., a subsidiary of Nortel Networks Limited, is the main supplier of our TDMA network equipment.

We expanded the GSM Network (switch and cell sites) during 2006 and 2007, achieving the capacity to provide services to approximately 2,800,000 and 3,300,000 subscribers and 84.0% and 86.0% population coverage, respectively. This capacity is currently provided by six mobile switch centers, 11 media gateways, 16 base stations controllers and 1,179 radio base stations. In 2007, the State of Minas Gerais government started an initiative named *Minas Comunica* to provide cellular telephony to all cities within the state until October 2008.

We were the first company in Brazil to use UMTS/HSPA technology, when commencing our operations in October 2007 in Belo Horizonte using the 850 MHz frequency, which became available in the process of migrating from TDMA to GSM technology. We also won Anatel's public bid to acquire the 2,100 MHz spectrum in December 2007 to expand our 3G network.

The implementation of our UMTS/HSPA network introduced new equipment in existing network. 34 Node B and two Radio Network Controller, or RNC, were introduced as part of the new 3G network. The UMTS/HSPA network is connected to the same GSM core network. The two RNC are connected in two media gateways and one mobile switch center.

In addition to investing in our network in connection with our GSM network migration, we have increased the capacity and improved the quality of our network by improving the existing base stations and by adding more channels. As a result of these measures to improve service quality, our rate of interrupted calls was only 1.2% and 1.4% in 2006 and 2007, respectively, below the 2.0% target level set by Anatel. Our blocked call rate was 0.87% in 2006 and 0.32% in 2007, below the 1.0% target level set by us. We are currently in compliance with substantially all regulatory obligations relating to quality and reliability of service. See Regulation of the Brazilian Telecommunications Industry Obligations of Telecommunications Companies for a description of these obligations.

Technology

Trends in the choice of technologies implemented or being implemented by other wireless service providers in Brazil and worldwide indicate that the future of wireless service lies with technologies such as UMTS and its future updated version with Long-Term Evolution, or LTE, as another access technology, and WiMAX. Currently, a large portion of our customers is using our GSM/EDGE network, which is the dominant wireless technology in Brazil and abroad. As our IS-136 TDMA-compatible customer base has diminished significantly in recent years, we expect to use TDMA spectrum to implement UMTS/HSPA access network in markets where revenues are expected to increase.

TDMA subscribers have increasingly replaced their handsets with GSM devices. This natural shift of our subscribers from a TDMA network to a GSM network has allowed us to increasingly empty our A-Band frequency

ranges (850 MHz range). TDMA customers have been shifting to GSM 900/1,800 MHz frequencies. The 850 MHz bandwidth availability led us to use 850 MHz frequency to implement UMTS/ HSPA (3Grd Generation) based services, as well as the following factors:

- the market pressure for time-to-market innovation and the possibility of becoming the pioneer provider of UMTS-based 3G services in Brazil;
- strong data services competition from other wireline and wireless operators;
- no need of authorization from or bandwidth bid by Anatel to allow us to provide 3G services (once 850 MHz frequency becomes available);
- the existence of foreign operators that were facing the same challenges, such as Telstra, in Australia, and AT&T (former Cingular) in the United States and the successful results they obtained by using 850 MHz frequency to implement UMTS/HSPA, which usually results in a lowering of prices for devices and network elements on a larger scale when various operators use similar strategies;
- the increasing availability of 850 MHz frequency 3G devices (handsets and Personal Computer Memory Card International Association or PCMCIA cards); and
- 3G 850 MHz frequency infrastructure (i.e.: base stations, radio controllers) availability from different vendors.

As to core network, we are changing the connectivity layer to the IP internetworking, including backhaul, as a result of the development of the access network data capacity. All mechanisms to provide quality of service, or QoS, will be implemented and we have included in our plans first measures regarding the implementation of IMS control layer. Currently, GSM is the established standard wireless technology in Brazil. By the end of 2006, approximately 63.5 million wireless subscribers in Brazil were using GSM technology, compared to approximately 10.3 million using TDMA and approximately 26 million using CDMA. At December 31, 2007, approximately 94.9 million wireless subscribers in Brazil were using GSM technology, compared to approximately 5.1 million using TDMA and approximately 20.9 million using CDMA. In early 2004, we decided to begin the process of transforming our network from a TDMA-based network to a GSM-based network. By the end of 2005, the GSM/EDGE technology services covered all our served area. During 2005 we implemented the split architecture in our switch network, introducing core network elements from our two equipment providers (Ericsson Telecomunicações S.A., or Ericsson, and Huawei do Brasil Telecomunicações Ltda., or Huawei). This core switch technology brought savings in operating expenses through lower power consumption and transmission facilities optimizations.

Billing and Collection

We bill our contract customers through monthly invoices providing details about minutes of calling time and the use of additional services. Six staggered billing cycles are used each month to smooth the billing and collection process. Our billing policy stipulates that if a subscriber's payment is past due and a customer has not responded after receiving a payment request, service is suspended until full payment for all outstanding charges is received. Currently, if a contract subscriber's payment is more than 90 days past due, the subscriber is churned, except for the *Plano Controle* subscribers, who are churned if payment is more than 78 days past due.

Provisions for doubtful accounts were 1.9%, 3.7% and 2.3% of net service revenues in 2005, 2006 and 2007, respectively. The decrease in 2007 resulted from more strict credit policies applied in 2007 and improvements in collection system.

Fraud Detection and Prevention

Cloning fraud consists of duplicating the cellular signal of a subscriber and it enables the perpetrator of the fraud to make telephone calls using the subscriber's signal. We have implemented a fraud management system designed to monitor calling patterns, making it possible to detect the presence of cloning activities within one or two days after it begins. If part of a fraudulent local call is carried by the network of another service provider, we are obligated to pay that service provider the applicable interconnection fee, regardless of whether or not we write-off the receivable associated with the call.

Subscription fraud occurs when a person, typically using a fictitious identification and address, obtains mobile telecommunications services with no intention of paying for them and then incurs substantial charges before the service provider is able to identify the fraud and terminate service. When we discover that a receivable has been generated by subscription fraud, we write-off the receivable. The allowance for doubtful accounts does not contemplate this loss profile until it is proven.

We have implemented fraud detection and prevention measures to reduce fraud-related losses. Fraud detection measures consist of computerized reviews of call records to detect abnormal calling patterns. When abnormal patterns are found, the subscriber is contacted by our fraud control staff and, if cloning has occurred, the subscriber's number or handset is changed. Fraud prevention measures include restrictions on international calls from a given number and restrictions on three-way calling by customers with international direct-dial access. We have also implemented a fraud management system to detect cloning in respect of international calls. Our migration to GSM technology has reduced our incidence of cloning fraud because GSM technology employs more sophisticated encryption techniques than TDMA technology.

We have also recently implemented measures to prevent and reduce subscription fraud. These measures include the performance of the customer's credit check, by analyzing his/her identification documents and requiring the submission of documents to prove the receipt of salary and also proof of residence. We have also been training our sales force as to how to detect a potential fraud and measures to be taken in such event. In addition, we have included in new agreements with contract customers a provision allowing us to terminate the agreement at any time in the event of improper use of the cellular phone, which includes improper or fraudulent use of stolen or lost documents by a third party.

Operating Agreements

Interconnection Agreements

Incumbent fixed-line providers are obliged to provide interconnection services to wireless operators with the incumbent's own installations. We have entered into interconnection agreements with CTBC Celular, the A Band in the *Triângulo Mineiro* area, TIM, our B Band competitor, Oi, our D Band competitor, Claro, our E Band competitor, Telemar, Brasil Telecom, Telefônica, GVT, CTBC, Embratel, TIM and Intelig, the long-distance carriers operating in our area, and Telemar, CTBC, Telefônica, Embratel, TIM and Intelig, the local carriers operating in our area and we also have an interconnection agreement with Nextel, the Specialized Mobile Service, or SME, operator. The terms of these interconnection agreements include provisions for the number of connection points, the method by which signals must be received and transmitted and the costs and fees of interconnection. Network usage fees are also assessed based on the terms of these agreements. We have also entered into an agreement with Brasil Telecom under which our subscribers pay a lower rate to use long-distance services offered by Brasil Telecom. See Regulation of the Brazilian Telecommunications Industry Interconnection. For recent changes to the collection and setting of interconnection fees, see Sources of Revenues.

Telemig Celular has agreements with Amazônia Celular, Claro, Oi, TIM, CTBC Celular, Nextel, BrT Celular and Vivo's network regarding short message interworking. The international agreements were established in 26 countries, with operators such as T-Mobile USA, Cingular Wireless USA, Verizon USA, Sprint-Nextel USA, CTI Móvil Argentina and Rogers Wireless Canada, among others. These interconnections allow the customers of Telemig Celular and of all the mentioned operators above to exchange short text messages between their mobile stations in Brazil and other countries.

A MMS network was established and successfully integrated in July 2005 between all the Brazilian operators mentioned above. These interconnections allow the customers of Telemig Celular and of all such operators to

exchange MMS between their mobile stations, also in the whole country of Brazil.

Roaming Agreements

Roaming services must be made available to other wireless operators upon the request of that operator. Within the State of Minas Gerais, we are a party to an operating agreement with CTBC Celular that allows our TDMA customers to use CTBC Celular's network and pay as a regular customer of CTBC Celular, without being charged for any roaming fees. Telemig Celular's clients in Minas Gerais who use the GSM network do not roam in CTBC since Telemig Celular provides the GSM network in the state. We have entered into agreements for automatic roaming with all other A and B Band service providers in Brazil outside our area for the use of the TDMA networks, and with Amazônia Celular, Vivo, Claro, TIM, BrT GSM and CTBC Celular for the use of their GSM networks, for postpaid and prepaid customers. Telemig Celular also offers to its customers GPRS roaming with Amazônia Celular, Vivo, Tim and Claro. These roaming agreements permit our clients to access the networks of other cellular service providers while traveling or roaming outside our area. Conversely, we are required to provide roaming services to customers of those wireless operators from outside our area when they are within our area. The agreements require the parties to provide service to roaming subscribers on the same basis as they provide service to their own customers and to carry out a monthly reconciliation of roaming subscriber usage charges. The agreements regarding GSM network have a one-year term, which is automatically renewable for further one-year terms. The agreements regarding the TDMA network have an indefinite term. As of December 31, 2007, we had implemented 138 bilateral agreements in 110 countries for roaming on the GSM network, which represents the attendance of 99% of the interest traffic of Telemig Celular. We have GSM roaming agreements in countries like: USA, France, Spain, Germany, Argentina, China, Belgium, the Netherlands, Italy, Mexico, Paraguay, Portugal, the United Kingdom, Turkey and Uruguay, among others, and Telemig Celular also offers to its customers international GPRS roaming in Argentina, Mexico, Spain, Japan, Canada, Germany and USA, that also enable subscribers of those carriers to use roaming services in our area.

Competition

At the beginning of 1998, we assumed the cellular operations of Telecomunicações de Minas Gerais S.A., a former cellular operator under the government-owned Telebrás System, and we were initially the only cellular operator in our area. Since that time, the emergence of other wireless telecommunications operators in our area has created an intensely competitive environment.

Currently, in addition to us there are other four wireless service providers operating within our authorization area. We face competition from the following operators: (a) TIM, the B Band frequency range operator that launched its services in December, 1998 (TIM is primarily owned by Telecom Italia and operates in the entire State of Minas Gerais using TDMA and GSM technologies); (b) Oi, the D Band operator that launched its services in June 2002 (Oi is a subsidiary of Tele Norte Leste Participações S.A. (Telemar) and operates in the entire State of Minas Gerais using GSM technology); (c) Claro, the E Band operator that launched its services in the fourth quarter of 2005 (Claro is controlled by América Móvil and operates in an area that comprises most of the State of Minas Gerais excluding the *Triângulo Mineiro* region and operates a GSM technology network); and, (d) CTBC Celular, an A Band operator that provides services only in the *Triângulo Mineiro* region (CTBC Celular is controlled by CTBC, a fixed-line operator and uses both TDMA and GSM technologies).

The intense competition in our market has resulted in the gradual reduction of our market share, which was an estimated 29.1% at December 31, 2007, as compared to 31.6% and 38.1% at December 31, 2006 and 2005, respectively. It should be noted that in May 2005, we launched our operations in the *Triângulo Mineiro* region, an area that previously was not part of our authorization, thus we had no market share. After only seven months of operations as the fourth entrant in the *Triângulo Mineiro* region, we already had attained an estimated market share of 12.4% and at December 31, 2007 we had an estimated market share of 20.3% in that region. When considering only the area of our initial authorization, that is, the state of Minas Gerais excluding the *Triângulo Mineiro* region, our market share by the end of 2006 and 2007 was estimated to be 33.1% and 30.3%, respectively.

By comparison, at December 31, 2007, we had an estimated total market share of 29.12%, while TIM, Oi, Claro and CTBC had estimated market shares of 29.42%, 27.22%, 12.15% and 2.10%, respectively. At December 31, 2006, we had an estimated market share of 31.56%, while TIM, Oi, Claro e CTBC had estimated market shares of 27.53%, 30.26%, 7.98% and 2.66%, respectively.

In addition, in December 2006, Anatel issued Resolution No. 454/2006 setting forth new rules regarding the usage of spectrum at 800, 900, 1800, 1900 and 2100 MHz and also granting auction authorizations to acquire frequencies to operate new licenses including to operate so-called third generation , or 3G, wireless telecommunications services in our area. As Anatel was successful in dropping an injunction that we had obtained to halt this public consultation until a new General Authorizations Plan, or PGA, is approved, the consultation process continued and was concluded in April 2007. We announced a trial to anticipate the offering of 3G services using the already licensed spectrum at 850 MHz. On November 9, 2007, we launched 3G services using spectrum at 850 MHz.

At an auction carried out by Anatel on December 18, 2007 we bought two lots of 2,100MHz fixed frequency to enhance its third generation (3G) cellular telephone services. The amount contracted by both lots totaled R\$53.5 million. On April 29, 2008, we signed the Terms of Authorization for using the subranges of radio frequency J (3G), at the Anatel headquarters in Brasilia, Federal District.

Despite the increase in direct competition that we face in our area, we believe that we have certain competitive advantages that will help us to maintain our operating performance and market position. We were the first cellular operator in our area following the privatization of the Telebrás System and we were therefore able to establish a strong contract subscriber base and a widely recognized name brand inherited from our predecessor operator that was a part of the Telebrás System. We have been able to build upon that foundation by seeking to understand subscriber needs and preferences in our area and to anticipate subscriber behavior and trends. In addition, we have strong network coverage over the highways in Minas Gerais, spanning 2,500 kilometers. We believe that this feature is important to customers when selecting a wireless service provider. See Item 3D. Risk Factors Risks Relating to our Business and the Brazilian Telecommunications Industry The Brazilian wireless telecommunications industry's landscape is highly competitive and is changing in a way that may adversely affect our market share and our margins.

Other Competition

We also compete with fixed-line telephone service providers, the most important of which in Minas Gerais is Telemar. We do not believe that fixed-line service providers present a significant threat or new competition in the telecommunications service market. We also compete with other wireless telecommunications services, such as mobile radio, paging and beeper services, which are used in our area as a substitute for cellular telecommunications services because they are generally less expensive. The most significant provider of these services is Nextel. Satellite services, which provide nationwide coverage, are also available in Brazil. Although satellite services have the benefit of covering a much greater area than cellular telecommunications services, they are considerably more expensive than cellular telecommunications services and do not offer comparable coverage inside buildings. As a result, they do not represent an attractive alternative for most wireless customers.

Regulation of the Brazilian Telecommunications Industry

Our business, including the nature of the services we provide and the rates we charge, is subject to comprehensive regulation under the General Telecommunications Law, which was enacted in July 1997. Anatel is the regulatory agency that oversees our activities and enforces the General Telecommunications Law. Anatel is administratively independent and financially autonomous. Anatel has the authority to propose and issue regulations pursuant to the General Telecommunications Law that are legally binding on telecommunications service providers. Before becoming effective, proposed regulations must undergo a period of public consultation and comments, which may include public hearings.

One of the most important recent public consultations was No. 642, which deals with proposals for changes in the regulation of SMP. The public consultation period set forth by Anatel's proposal ended on January 16, 2006. The new SMP regulation enacted through Resolution No. 477 dated August 14, 2007, became effective on February 13, 2008 and confirmed some of the changes that had already been contemplated in the public consultation, such as:

- revalidation of expired credits upon the insertion of new credits;
- return in double of amounts paid in excess to the SMP operators due to incorrect billing;
- limitation of grace period in postpaid plans to 12 months;
- upgrading SMP service centers to improve access by people with hearing disabilities;

- suspension of services for a period no longer than 180 days at no cost when requested by the client;
- preparation of detailed billing report at no cost when requested by prepaid clients; and
- increase in the time for blocking partial or total access in cases of defaulting customers, going from 15-30 days after the due date, to 30-60 days.

In addition, the new regulation established the following changes to SMP regulation that had not been previously contemplated by the public consultation:

- delivery of protocol number in all interactions with the client, with call traceability and recording;
- tools for comparing the advantages and disadvantages of each plan offered by us; and
- free unlocking of mobile stations, allowing clients who purchased cell phones from us to use it in other cellular phone providers networks.

In order to minimize the impacts resulting from these regulatory changes, we have already prepared ourselves during the last quarter of 2007, to meet and comply with the terms set forth by the new regulation, mainly those related to the customer service which affect procedures and require on significant changes to our systems.

Another Anatel public consultation (CP No. 653/2005) completed in January 2006 established rules about charging administrative fees for the management of numbering plans. The regulation was issued in December 2006, through Resolution No. 451/2006, and may be challenged by the Association of Mobile Operators in Brazil (*Associação Nacional dos Prestadores de Serviço Móvel Celular*), or ACEL.

Anatel also issued Regulation No. 460/2007, regarding number portability, which will allow users to change their operating company, without changing their original phone number. Number portability will be provided by fixed and mobile operators, until March 2009, with most incurring costs being borne by the operators. The creation and establishment of a Portability Implementation Group, or GIP, led by Anatel with the participation of all telephone operators, collectively decided on the implementation of a number portability model and elected the Brazilian Association of Telecom Resources, or ABRT, as managing entity of the portability data base, taking a major step towards implementing the new model, within the forecasted term. We have already adopted network and IT solutions, as well as revised all our operating processes necessary for the implementation of the new model in August 2008, initially in the localities under area code 37. The other localities where we operate will be serviced as of November 2008.

In addition, Anatel published the following new regulations on interconnection and network usage fees of SMP providers, some of which could have an adverse effect on our results: (1) new General Regulation on Interconnection (*Regulamento Geral de Interconexão* Resolution No. 410/2005, or RGI); (2) the Regulation on Costs Separation and Allocation (Resolution No. 396/2005); and (3) the Regulation on SMP Networks Usage Fees of SMP providers (*Regulamento de Remuneração pelo Uso de Redes de Prestadoras do SMP* Resolution No. 438/2006). We highlight, among others, the following changes in the regulation that may adversely affect our results:

- two SMP providers controlled by the same economic group can receive only one instead of two interconnection charges (VU-M) for calls originated and terminated in their networks;
- new negotiation rules for VU-M prices by which Anatel will have a role in determining reference prices rather than the current free-market negotiation of prices. The reference prices will apply to SMP providers that have significant market power, which may be the case of Telemig Celular (until further decision by Anatel, all operators are considered to have significant market power).

Reference prices will be cost based commencing in 2008. The costs will be calculated according to the regulation on Costs Separation and Allocation (Resolution No. 396/2005);

- VU-M prices must follow the discounts granted to fixed telephony customers for out-of-business- hours calls;
- when receiving calls from public telephones, VU-M will adopt the same tariff rules that apply to public telephones;
- creation of VU-M price unification among SMP providers of the same economic group having significant market power; and
- the interconnection payments between SMP operators for traffic in the same registration area may occur independently of the traffic balance between the operators (this regime is referred to as full billing). Before the adoption of the above-mentioned regulation, payments between SMP operators for traffic in the same area only occurred when the traffic balance between any two companies was either less than 45% or in excess of 55% (this regime is referred to as partial bill and keep).

On December 11, 2006, Anatel issued Resolution No. 454/2006, setting forth new rules regarding the usage of spectrum at 800, 900, 1800, 1900 and 2100 MHz bands. The regulation provides for spectrum for one new GSM license in the 1800 MHz band, and up to five UMTS licenses in the 1900/2100 MHz bands. Anatel also identified a narrow spectrum slice (5+5 MHz) that could be used either for a CDMA license, using the American PSC frequency allocation, or for UMTS service. The regulatory process was subject to a public consultation on the General Authorization Plan that establishes the number of licenses that should be allowed for SMP service. As Anatel was successful in dropping an injunction that we had obtained to halt this public consultation until the new PGA is approved, the consultation process continued and was concluded in April 2007. In July 2007, a public bidding notice for the remaining radio frequencies beyond spectrum slice L (5+5MHz) was announced. The public bidding took place in September 2007.

On November 9, 2007, we launched 3G services at 850 MHz band. At an auction carried out by Anatel on December 18, 2007, we acquired two lots of 2,100 MHz fixed frequency to enhance our third generation (3G) cellular telephone services. The amount contracted by both lots totaled R\$53.5 million. On April 29, 2008, we signed the terms of authorization for using the subranges of radio frequency J (3G), at the Anatel headquarters in the city of Brasília.

See Item 3D. Risk Factors Risks Relating to our Business and the Brazilian Telecommunications Industry Anatel's new regulation regarding the interconnection and network usage fees could have an adverse effect on our results.

Co-billing and Fraud

At the end of 2004, market participants began discussing procedures for co-billing by SMP providers. The National Billing Group, created in 2002 with the participation of only fixed-line operators, began to include SMP operators as well.

During the course of 2005, the National Billing Group assumed the responsibility of preparing and disclosing practices and controls to be implemented in co-billing, to ensure that operational failures on the part of both fixed-line and SMP operators, which had been causing losses to fixed-line operators, be avoided. Anatel participated in the discussions, which extended into 2006, given the complexity of co-billing. The working group defined the best practices to be followed for the contracting and installing of co-billing services. Telemig Celular implemented all of the security controls for the group relating to co-billing services.

As a result of fraud in VC2 (long-distance within an area code) and VC3 (long-distance outside an area code) calls, discussions arose regarding co-billing. Market participants started discussing who would undertake the responsibility for paying the use of networks in case of calls involved in frauds. Under the previous model (SMC), wireless telecommunication service providers received the revenues and, consequently, were responsible for VC2 and VC3 calls. At that time, in case of frauds in VC2 and VC3 calls, wireless telecommunication service providers used to

undertake losses and pass due amounts through STFC providers, which were the carriers of these long-distance calls. Under the current model (SMP), STFC providers receive the revenues and, consequently, are responsible for VC2 and VC3 calls. In case of frauds in these calls, STFC providers understand that these calls are not chargeable to users, and consequently, SMP providers are not supposed to be paid for the usage of their networks; causing a complex deadlock.

Also during 2005, several negotiations took place between mobile and fixed line operators regarding co-billing and fraud occurrences within the networks, the negotiations had structures for working groups to discuss the various themes addressed. The National Anti-Fraud Group was created with the participation of mobile and fixed line operators and also representatives of Anatel. The purpose of this group is to integrate fixed line operators into the National Center for Anti-Fraud in order to provide the necessary information database to combat fraud and the misuse of long-distance calls. As a consequence of the creation of this group, a pilot test occurred involving Telemig, the results of which indicated a high-level of performance in the process of centralization. This, in turn, favored the establishment of a national anti-fraud network with the participation of both mobile and fixed line operators. This process is expected to be concluded during 2008. There are also some disputes between SMP and fixed line operators regarding their respective responsibilities in the process of co-billing.

The operational stability we reached during 2007, coupled with the substantial decrease in the amount of frauds relating to cloning of mobile phones in 2006, resulted in a substantial increase in our revenues from calls originated from post-paid customers forwarded for co-billing, as compared to the year ended December 31, 2006. In 2007, we surpassed the average of 86% of revenues from calls originated from post-paid customers forwarded for co-billing, which, according to STFC providers, is the minimum percentage for profitability of their businesses is 80%.

Licenses

On February 19, 2004, we signed a contract with Anatel to migrate from the SMC regime to the SMP regime, which involves the former SMC concessionaire becoming a party to an authorization term. An authorization is a license granted by the public administration under Brazil's private regime, to offer telecommunications services, subject to complying with prescribed network scope and service performance standards. Under the SMP regime, authorizations are granted for an indeterminate period of time, but we will still be required to periodically apply to Anatel for extensions of our right to use our radio frequencies. Our current radio frequency permit that expires in 2008 has already been extended for an additional 15-year term. We obtained from Anatel the additional spectrum on the 1,800 MHz and 900 MHz frequency ranges required to complete our migration to GSM technology.

In Minas Gerais, Telemig Celular and Claro acquired E Band licenses (Telemig Celular for only the *Triângulo Mineiro* region and Claro for the rest of the State of Minas Gerais) by means of a public auction in 2004, and received authorization from Anatel for providing SMP services in the beginning of the year 2005. Telemig Celular began its E Band operations in May 2005, and Claro did not begin its operations until the end of that year.

In December 2004, Anatel granted us a license to provide Multimedia Communication Services (*Serviço de Comunicação Multimídia*), allowing us to provide this high speed data service throughout Brazil and increase our product portfolio.

Radio Frequency

In 2008, our radio frequency license will have been in place for its full term of 15 years. Regulations require us to request an extension 30 months prior to the expiration of the license. Therefore, in October 2006, we applied to extend our licenses for the use of radio frequencies for an additional 15-year term. According to the regulations, the extension is automatically granted and related fee payments will begin in 2010.

The 3G auction that took place on December 18, 2007 allowed us to acquire radio-frequency at 2,100MHz band in all our service area, improving the 3G services. We were pioneers in launching third generation (3G) products in 2007, at 850MHz band, after overcoming regulatory matters that prevented the launching.

Obligations of Telecommunications Companies

As a telecommunications service provider, we are subject to requirements concerning quality of service and network expansion, as established in applicable regulations and in our authorization terms. If we fail to meet these obligations we may be fined, subject to a maximum penalty amount, until we are in full compliance with our obligations. While it is possible for an authorization to be revoked for non-compliance with the obligations imposed by its terms, there are no precedents for such a revocation.

Our authorizations impose obligations on us to meet quality of service standards relating to our network's ability to make and receive calls, call failure rates, capacity to handle peak periods, failed interconnection of calls and customer complaints. These quality of service standards are defined by Anatel and information in respect of these standards must be reported by us to Anatel.

Quality Standards

Since 2004, when we migrated to SMP, we have been providing Anatel with our operational indicators. In addition, we are certified by the *Bureau Veritas Quality International* (BVQI), which vouches for the reliability of all indicators.

We were able to improve our systems and operating procedures during 2005, and we currently meet substantially all required quality standards

In addition, during 2005, 2006 and 2007 we were best ranked by Anatel on customers' satisfaction (least complains per subscriber) among SMP operators with more than 1.5 million customers. However, this better than average performance does not imply that fines cannot be imposed related to the period of time while we were adapting our systems and procedures to meet the stringent SMP quality standards. Accordingly, in January 2007, Telemig Celular received a notification from Anatel related to this matter. Telemig Celular submitted a waiver application in response, which is currently under Anatel's analysis. For further information, see Item 8A. Consolidated Financial Statements and Other Financial Information Legal Proceedings Regulatory Legal Proceedings Litigation with Anatel Regarding Quality Standards.

Interconnection

Under the General Telecommunications Law, all mobile telecommunications service providers must provide interconnection upon the request of any other mobile or fixed-line telecommunications service provider. Under the SMP regime, the terms and conditions of the interconnection (VU-M) are freely negotiated between wireless and fixed-line operators, subject to compliance with regulations established by Anatel relating to traffic capacity and interconnection infrastructure that must be made available to requesting parties. Service providers must offer the same rate to other requesting parties on a nondiscriminatory basis. As not all operators reached an agreement on the terms of interconnection, including with respect to the interconnection rates, Anatel has been requested to act as the final arbiter. In addition, we are judicially discussing the amount of the adjustment of the interconnection fee (VU-M) for local and long-distance calls. See Item 8A Consolidated Financial Statements and Other Financial Information Legal Proceedings Regulatory Legal Proceedings GVT Lawsuit against Anatel and other SMP Operators Regarding VU-M Resolution for more information. For recent changes to the collection and setting of interconnection fees, see Sources of Revenues Interconnection Fees.

Rate Regulation

Currently, our ability to adjust rates relating to existing customer service plans is restricted. Most service plans rates may be adjusted on an annual basis to keep in line with inflation. We may introduce new service plans after receiving Anatel's approval. Once these plans become effective, they are thereafter subject to the annual price-cap mechanism. While subscribers cannot be forced to migrate to new plans, existing plans can be terminated after six months' advance notice has been given to all subscribers under the plan being terminated.

Dependence on Patents, Licenses or Contracts

Our business is highly dependent on the licenses that Anatel has granted us. For a description of these licenses, see Licenses and Regulation of the Brazilian telecommunications industry.

We have either registered or filed intellectual property applications for our most important mobile phone brand names with the Brazilian National Institute of Intellectual Property (*Instituto Nacional de Propriedade Intelectual*), or INPI. We believe the brand names and trademarks that identify us and our businesses are important for us, and we have accordingly taken the appropriate steps to protect them.

C. Organizational Structure

The Registrant has one subsidiary, Telemig Celular, which is a corporation organized under the laws of the Federative Republic of Brazil. The Registrant currently owns 83.3% of the share capital, and 89.2% of the voting shares of Telemig Celular.

On December 31, 2007, the Registrant was part of a group of companies controlled by Telpart., a consortium comprised of: (i) Newtel, which owned 51.07% of Telpart, and is controlled indirectly by investment and mutual funds, and several Brazilian pension funds; (ii) TPSA do Brasil Ltda. (TPSA do Brasil), which owned 48.90% of Telpart, and is controlled indirectly by investment and mutual funds; and (iii) others, who owned 0.03% of Telpart. Telpart also controlled Tele Norte, which is the holding company for Amazônia Celular, a Brazilian cellular telecommunications services provider that covers the States of Pará, Amazonas, Maranhão, Amapá and Roraima.

On August 2, 2007, Telpart, our direct controlling shareholder at that time, entered into a stock purchase agreement with Vivo regarding the sale of the total shares held by Telpart in the capital stock of the Registrant, equivalent to 22.72% of the total capital, 53.90% of the voting capital and 4.27% of the non-voting capital of the Registrant. The Registrant in turn, is the holder of approximately 89.17% of the voting capital of Telemig Celular. The agreement was approved by Anatel on October 23, 2007, through a regulatory procedure known as previous consent (*Anuência Prévia*). On April 3, 2008, the transfer of our control to Vivo became effective under the terms of the stock purchase agreement. See Item 4A. History and Development of the Company Recent Developments.

D. Property, Plant and Equipment

Our principal physical properties consist of transmission equipment, switching equipment and base stations. The Registrant's operating subsidiary's headquarters are located in Belo Horizonte, in the State of Minas Gerais. As of December 31, 2007, we leased approximately 77,000 square meters of space in our area of operations.

At December 31, 2007, we had 10 TDMA cellular switches, 702 TDMA cell sites, six GSM cellular switches, 11 Media Gateways, 16 GSM base stations controllers and 1,179 GSM cell sites. Our switches and cell sites had a total capacity of approximately 1.9 million TDMA subscribers and 3.3 million GSM subscribers as of December 31, 2007.

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

A. Operating Results

The following discussion should be read in conjunction with our consolidated financial statements and accompanying notes and other information appearing elsewhere in this annual report, and in conjunction with the financial information included under Item 3A. Selected Financial Data. Except as otherwise indicated, all financial information in this annual report has been prepared in accordance with U.S. GAAP and is presented in *reais*. For certain purposes, such as providing reports to our Brazilian shareholders, filing financial statements with the CVM and determining dividend payments and other distributions and tax liabilities in Brazil, we have prepared and will continue to be required to prepare financial statements (not presented herewith) in accordance with applicable Brazilian accounting practices and Brazilian Corporate Law.

Overview

Our results of operations are significantly affected by the following key factors, among others.

Brazilian Political and Economic Environment

As a company with all of its operations currently in Brazil, we are affected by general economic conditions in the country. In particular, we have been affected by overall growth or declines in Brazil's per capita income, the volatility of the *real*, inflation and measures taken by the Brazilian government to combat inflation, principally through the setting of interest rates. Our business is directly affected by the macroeconomic trends of the global economy in general and the Brazilian economy in particular. If the Brazilian economy enters a period of rising interest rates and continued recession, demand for telecommunications services is likely to be negatively affected. Declines in the value of the *real* would reduce the purchasing power of Brazilian consumers, negatively affecting demand for mobile telecommunications services. *Real* devaluations would also affect our margins by increasing the carrying costs of our U.S. dollar and other foreign currency denominated debt and increasing those of our costs and expenses that are linked to the U.S. dollar and other foreign currencies.

Our cash flows and results of operations are affected by currency fluctuations. All of our revenues are denominated in *reais*, but a significant part of our capital expenses and cost of product sales are affected by the U.S. dollar, such as those relating to our network infrastructure and handsets. Inflation has also had, and may continue to have, effects on our financial condition and results of operations. Almost all of our operating expenses are denominated in *reais* and the suppliers and service providers of these expense items generally attempt to increase their prices to reflect Brazilian inflation. However, we may also increase rates charged to customers to reflect Brazilian inflation.

Since our privatization, the economic environment has been volatile with respect to inflation as well as exchange rate variations, and characterized by low growth rates.

Since 2004, the macroeconomic indicators in Brazil have consistently improved.

During 2005, Brazil's GDP increased 2.3% and the country achieved a trade surplus of US\$44.5 billion. Inflation in 2005, as measured by the IGP-M, was 1.2% and 5.7% as measured by the Extended National Consumer Price Index (*Índice Nacional de Preços ao Consumidor Amplo*), or IPCA. Interest rates continued to be high, with the Interbank Deposit Certificate (*Certificado de Depósito Interbancário*), or CDI rate, at the end of 2005 equaling an annualized rate of 18.2%. In 2005, the *real* appreciated by 13.4% against the U.S. dollar, reflecting continued investor confidence. On December 31, 2005, the U.S. dollar/*real* exchange rate was R\$2.341 per US\$1.00.

In 2006 the presidential elections did not have a major effect on the macroeconomic environment. Brazilian GDP increased 2.9% and despite accusations of corruption against members of the federal administration and the stepping down of Antônio Palocci, the Treasury Minister, the *real* continued its previous trend and appreciated 8.7% against the U.S. dollar. Even with the continued appreciation of the *real*, Brazil had a trade surplus of US\$46.5 billion, the largest surplus ever registered in Brazil. Brazil's sovereign risk, measured by EMBI, was 192 points as of the year ended 2006. In 2006, inflation as measured by IPCA was 3.1%, the average Long-Term Interest Rate (*Taxa de Juros de Longo Prazo*), or TJLP, was 7.9 per annum and the unemployment rate was 8.4%.

In 2007 the economy continued to expand with credit available at lower interest rates than in previous years. The GDP growth was 5.4%, the second best result in the past 12 years. The SELIC rate has been reduced consistently since May 2005. However, in September 2007 this trend was interrupted, when the SELIC rate stabilized at 11.25% and remained at this level until the end of the year. The *real* appreciated 17.2% against the U.S. dollar in 2007, closing at R\$1.771. The trade surplus was US\$40.0 billion, which was lower than in 2005 and 2006. Brazil's sovereign risk,

measured by EMBI, was 221 as of the year ended 2007. In 2007, inflation measured by TJLP was 6.2% and 4.4% measured by IPCA, in line with the 4.5% target established by COPOM. The unemployment rate was 7.4% at the end of the year.

On April 30, 2008, Brazil received an investment grade rating from the Standard & Poor credit rating agency, joining the group of countries considered to have a low chance of default. This improvement in the risk classification reinforces the Brazilian economy's favorable medium-term scenario, reflecting the maturity of the financial institutions and the country's political structure, as well as the advance of tax policies and external debt controls.

On June 18, 2008, the U.S. dollar/real exchange rate was R\$1.6105 per US\$1.00. The table below sets forth GDP growth, inflation, interest rates and U.S. dollar exchange rate for the periods indicated.

	December 31,				
	2003	2004	2005	2006	2007
GDP growth	0.5%	4.9%	2.3%	2.9%	5.4%
Inflation (IGP-M) ⁽¹⁾	8.7%	12.4%	1.2%	3.8%	7.7%
Inflation (IPCA) ⁽²⁾	9.3%	7.6%	5.7%	3.1%	4.4%
INPC ⁽³⁾	10.4%	6.1%	5.0%	2.8%	n.a.
CDI ⁽⁴⁾	16.8%	17.5%	18.2%	13.1%	11.1%
TJLP ⁽⁵⁾	11.0%	9.8%	9.8%	7.9%	6.2%
Appreciation of the <i>real</i> against the U.S. dollar	22.3%	8.8%	13.4%	9.5%	17.2%
Exchange rate at year end US\$1.00	R\$2.889	R\$2.654	R\$2.341	R\$2.138	R\$1.771
Average exchange rate US\$1.00 ⁽⁶⁾	R\$3.060	R\$2.902	R\$2.433	R\$2.167	R\$1.948

(6) Average of the exchange rates for the period indicated.

Effects of Inflation on Our Results of Operations

After the introduction of the *real* as the Brazilian currency in July 1994, inflation remained under control until January 1999, when it increased due to the devaluation of the *real*. During periods of high inflation, wages in Brazilian currency tend to fall because salaries typically do not increase as quickly as inflation. The effect is a progressive decline in purchasing power of wage earners. The reduction and stabilization of inflation following the implementation of the *real* plan resulted in increased spending on services and goods (including wireless telecommunication services), higher *real* income growth, increased consumer confidence and the increased availability of credit. It also resulted in relatively higher labor costs. However, if Brazil experiences significant inflation, we may be unable to increase the service rates we charge to our customers in amounts that are sufficient to cover our operating costs, and our business may be adversely affected as a consequence.

The table below shows the Brazilian general price inflation (according to the IGP-M and the IPCA indices) for the years ended December 31, 2003 through 2007:

	Inflation Rate (%) as Measured by IGP-M (1)	Inflation Rate (%) as Measured by IPCA (2)
December 31, 2007	7.7	4.4
December 31, 2006	3.8	3.1
December 31, 2005	1.2	5.7
December 31, 2004	12.4	7.6
December 31, 2003	8.7	9.3

(2) *Source:* IPCA, as published by the IBGE.

Taxes on Telecommunications Services

The cost of telecommunications services to customers includes a variety of taxes. The average rate of all such taxes, as a percentage of our gross operating revenues (excluding income taxes), was approximately 20.4% in 2003, 21.8% in 2004, 22.2% in 2005, 21.99% in 2006 and 18.43% in 2007. The principal taxes are a state value-added tax, the *Imposto sobre Circulação de Mercadorias e Serviços*, commonly known as the ICMS. The ICMS is a tax that the Brazilian states impose at varying rates on certain revenues from the sale of goods and services, including telecommunications services. The ICMS rate for domestic telecommunications services in the State of Minas Gerais is 25%.

In June 1998, the governments of the individual Brazilian states approved an agreement to interpret existing Brazilian tax law to apply the ICMS, effective July 1, 1998, to some services to which the ICMS had not previously been applied, including cellular activation and monthly subscription. The agreement also provides that the ICMS may be applied retroactively to activation services rendered during the five years preceding June 30, 1998. See Item 8A. Consolidated Statements and Other Financial Information Legal Proceedings Tax Legal Proceedings for a fuller description of these developments.

Other taxes on gross operating revenues include two federal social contribution taxes, the *Programa de Integração Social*, referred to as PIS, and the *Contribuição para Financiamento da Seguridade Social*, known as COFINS, which are generally imposed on gross revenues derived from telecommunications services (less discounts and returns) at a combined rate of 3.65% .

In addition, the following contributions are imposed on certain telecommunications services revenues after deduction of the value-added taxes mentioned above (ICMS, PIS and COFINS) and discounts:

- *Contribution for the Fund for Universal Access to Telecommunications Services*, or FUST. FUST was established by Law No. 9,998 of August 17, 2000, to provide resources to cover the cost exclusively attributed to fulfilling obligations of universal access to telecommunications services that cannot be recovered with efficient service exploration or that is not the responsibility of the service provider. Contribution to FUST by all telecommunication services companies started on January 2, 2001 at the rate of 1% of net operating telecommunication services revenue (excluding interconnection revenues), and it may not be passed on to customers.

- *Contribution for the Fund of Telecommunications Technological Development*, or FUNTTEL. FUNTTEL was established by Law No. 10,052 of November 28, 2000, in order to stimulate technological innovation, enhance human resources capacity, create employment opportunities and promote access by small- and medium-sized companies to capital resources so as to increase the competitiveness of the Brazilian telecommunications industry. Contribution to FUNTTEL by all telecommunication services companies started on March 28, 2001 at the rate of 0.5% of net operating telecommunication services revenue (excluding interconnection revenues), and it may not be passed on to customers.

We must also pay the Contribution for the Telecommunication Inspection Fund, or FISTEL. The Telecommunication Inspection Fund is supported by a tax applicable to telecommunications operators, the FISTEL, which was established in 1966 to provide financial resources to the Brazilian government for the regulation and inspection of the telecommunications sector. The FISTEL consists of two types of fees: (i) an installation inspection fee assessed on telecommunications stations (such as a base, a repeater or a mobile station) upon the issuance of their authorization certificates; and (ii) an annual operations inspection fee that is based on the number of authorized stations in operation at the end of the previous calendar year. The amount of the installation inspection fee is a fixed value (based on the Brazilian minimum wage), depending upon the kind of equipment installed in the authorized telecommunications station. The operations inspection fee equals 50% of the total amount of the installation inspection fee that would have been paid with respect to existing equipment.

For further information on our tax legal proceedings, see Item 8A. Consolidated Statements and Other Financial Information Legal Proceedings Tax Legal Proceedings for a fuller description of these developments.

Composition of Operating Revenues and Expenses

Operating Revenues

We generate operating revenues from:

- usage charges, which include measured service charges of outgoing calls and roaming and other similar charges, all of which depend upon which service plan has been selected by the customer;
- monthly subscription payments, which depend upon which service plan has been selected by the contract customer;
- network usage fees, which are the amounts charged by us to other cellular, fixed-line and long- distance telephone service providers for use of our network by customers of these service providers;
- sales of handsets and accessories; and
- other services and charges.

Unbilled revenues for the few days in between the billing date and month-end are estimated and recognized as revenue during the month in which the service is provided. Revenue from the sales of prepaid cards is recognized as used on a minute-by-minute basis. In Brazil, cellular telecommunications service providers may not charge customers for incoming calls, unless the customer is roaming. Revenues from sales of handsets are recognized when the equipment is sold and delivered.

In February 2004, we signed a contract with Anatel to migrate from the SMC regime to the SMP regime. The migration has resulted in a number of changes to our operations and our revenue base. One of the consequences of the migration is that our customers are now entitled to select their own long-distance carrier for outbound long-distance traffic and they pay directly, or through co-billing agreements, the long-distance service provider of their choice. We receive interconnection fees from that long-distance service provider. See Item 3D. Risk Factors Risks Relating to our Business and the Brazilian Telecommunications Industry Our results of operations may be negatively affected by the application of the SMP rules for more information.

The SMP regime also provides for the free negotiation of interconnection fees (VU-M) among certain telecommunications service providers. Under the SMC regime, interconnection fees, which comprise a significant portion of our revenues, were determined based on historical inflation and a variable productivity factor established by Anatel. In the free negotiation environment of the SMP regime, the interconnection fees we receive from other wireless, fixed-line and long-distance telecommunications service providers operating in our area will be determined through direct negotiations with them. See Item 4B. Business Overview Sources of Revenues Interconnection Fees and

Item 8A. Consolidated Financial Statements and other Financial Information Legal Proceedings Regulatory Legal Proceedings GVT Lawsuit against Anatel and other SMP Operators Regarding VU-M Resolution for further information on these negotiations.

Until July 13, 2006, interconnection fees for local wireless traffic were due only if the traffic balances between any two companies operating in the same area was either less than 45% or in excess of 55% (bill & keep regime). Beginning July 14, 2006, new regulation on SMP network usage fees issued by Anatel established that interconnection payments between SMP operators for traffic in the same registration area should occur for the full amount of traffic between operators (full billing regime).

The consequences of the adoption of the full billing regime for us have been primarily an increase of interconnection costs and revenues.

The following taxes are deducted from revenues in arriving at net operating revenues: ICMS, PIS and COFINS.

Operating Expenses and Costs

Operating expenses consist of cost of services, selling, general and administrative expenses, allowance for doubtful accounts expense and depreciation and amortization. Cost of services consists primarily of fixed costs such as leased line charges, site rental and network maintenance, including overhead, as well as variable costs such as certain interconnection charges and Telecommunication Inspection Fund fees. Cost of goods consists primarily of handsets. Selling, general and administrative expenses consist primarily of salaries, wages and related benefits for administrative personnel, advertising and promotional expenses, distributors commissions and other overhead expenses. For the purposes of allowance for doubtful accounts expense, we maintain an allowance for doubtful accounts, including accounts receivable to be billed, to become due and also past-due accounts in an amount equal to our estimate of probable future losses on these accounts, based on historical losses and the current level of overdue accounts receivable. We also immediately write-off any accounts receivable arising from fraud. Depreciation and amortization are calculated using the straight-line method based on the estimated useful lives of our assets which may vary from 3 to 20 years.

As a result of the application of the bill and keep rules relating to interconnection revenues and expenses that applied to us until July 13, 2006, the amount of interconnection fees we paid to wireless carriers operating in our area along with revenues, varied based on the traffic volume between the operators. However, beginning on July 14, 2006, the interconnection payments between SMP operators for traffic in the same registration area occur independently of the traffic balance between the operators (this regime is referred to as full billing).

The interconnection fees (VU-M) that we pay to other wireless providers and to fixed line operators are currently freely negotiated. See Item 4B. Business Overview Sources of Revenues Interconnection Fees and Item 8A. Consolidated Financial Statements and other Financial Information Legal Proceedings Readjustment of VU-M for further information on these negotiations.

The following taxes are included in operating costs and expenses: FISTEL, FUST and FUNTTEL. The Temporary Contribution on Financial Transactions, or CPMF tax, which was abolished as of January 1, 2008, and the Tax on Financial Transactions, or IOF tax, are classified as financial expenses.

The Effects of the Increase of Our Prepaid Customer Base on Our Results of Operations

Since the inception of our prepaid plans in March 1999, the number of prepaid customers has steadily grown to represent 74.4%, 76.8% and 78.6% of our total customer base at December 31, 2005, 2006 and 2007, respectively. Prepaid customers, on average, have substantially lower minutes of use than contract customers and do not pay monthly fees and, as a result, generate substantially lower average monthly revenues per customer. Prepaid customers use their cellular phones predominantly for incoming calls, so prepaid customer revenues consist primarily of interconnection fees that we receive from other telecommunications companies when one of their customers uses our

network to call one of our prepaid customers. We expect that the growth of our customer base will continue to be predominantly in the prepaid customer segment.

Consolidation of Operations with Tele Norte and Amazônia Celular

In order to create operating efficiencies and reduce costs, we were a party to a shared services arrangement with our former affiliate, Tele Norte and its operating subsidiary, Amazônia Celular which were under the common control of our shareholder group at that time. Pursuant to this arrangement, various segments of the financial, marketing, call center and human resources departments, as well as portions of the engineering departments of each company were managed by a single team. During the years ended December 31, 2007, 2006 and 2005, Telemig Celular charged Tele Norte and its subsidiary R\$23,307, R\$12,268 and R\$14,864, respectively. Costs and expenses were allocated to each Company based on indicators such as number of employees, customer base, total traffic and others.

As a result of the acquisition of our control by Vivo, we, Vivo, Telemar, Tele Norte and Amazônia Celular entered into a MoU, on April 7, 2008, to determine a procedure to segregate our activities from those of Amazônia Celular. The MoU requires Amazônia Celular and Telemig Celular to: (i) enter into a services agreement, pursuant to which Telemig Celular will render certain services to Amazônia Celular, including accounting, information technology, network maintenance, systems control, engineering, development of marketing programs, products and services, among others; (ii) define certain key performance indicators and service level agreements; (iii) determine a timeframe for segregation of these processes; (iv) determine which assets to segregate; (v) keep confidential any information obtained from the other party during this transitional period; and (vi) independently contract auditors to assist in the segregation process and for transparency purposes. This MoU is valid for nine months and is renewable for an additional three-month term.

See Item 3D. Risk Factors Risks Relating to the Acquisition of Our Control by Vivo. The segregation of our operations and systems infrastructure from those of Amazônia Celular may adversely impact the quality of the services we provide and impact our results of operations.

Regulatory and Competitive Factors

Our business, including the services we provide and the rates we charge, is subject to comprehensive regulation under the General Telecommunications Law. As a result, our business, results of operations, revenue and financial condition could be negatively affected by the actions of the Brazilian authorities, including, in particular, the following:

- the introduction of new or stricter operational and/or service requirements;
- the granting of operating licenses in our area; and
- delays in the granting of, or the failure to grant, approvals for rate increases.

We began to face competition in our area in the fourth quarter of 1998 and competition has contributed to declining prices for cellular telecommunications services and increased pressure on operating margins. Our market share, business, financial condition, revenues and results of operations depend significantly on a variety of factors, including:

- our ability to attract new customers;
- our ability to succeed in the technological migration of our network to GSM;
- the response of our customer base to the implementation of the new GSM technology;
- the rate of growth of our customer base;
- the usage and revenue generated from our customers;
- the level of airtime usage;
- equipment prices;
- the rate of churn; and
- our ability to control costs.

Currently, we face competition from four operators in our authorization area: (a) TIM, the B Band frequency range operator that launched its services in December, 1998. TIM is primarily owned by Telecom Italia and operates in the entire State of Minas Gerais using TDMA and GSM technologies; (b) Oi, the D Band operator that launched its services in June 2002. Oi is a subsidiary of Tele Norte Leste Participações S.A. (Telemar). It operates in the entire State of Minas Gerais using GSM technology; (c) Claro, the E Band operator that launched its services in the fourth quarter of 2005. Claro is controlled by América Móvil and operates in an area that comprises most of the State of Minas Gerais. Claro is not present in the *Triângulo Mineiro* region. Claro operates using GSM technology; and, (d) CTBC Celular, an A Band operator that provides services only in the *Triângulo Mineiro* region. CTBC Celular is controlled by CTBC, a fixed-line operator. CTBC Celular operates using both TDMA and GSM technologies.

In addition, in December 2006, Anatel issued Resolution No. 454/2006 setting forth new rules regarding the usage of spectrum at 800, 900, 1800, 1900 and 2100 MHz and also granting auction authorizations to acquire frequencies to operate new licenses including to operate so-called third generation, or 3G, wireless telecommunications services in our area. As Anatel was successful in dropping an injunction that we had obtained to halt this public consultation until a new PGA is approved, the consultation process continued and was concluded in April 2007. We announced a trial to anticipate the offering of 3G services using the already licensed spectrum at 850 MHz. On November 9, 2007, we launched 3G services using spectrum at 850 MHz.

At December 31, 2006 and 2007, we had an estimated total market share of lines of 31.6% and 29.1%, respectively. Excluding the *Triângulo Mineiro* region, our estimated market share in our region decreased to 30.0% at December 31, 2007 from 33.0% in 2006 and 40.9% in 2005. For the *Triângulo Mineiro* region, we had an estimated market share of 20.3% at December 31, 2007 as compared to the estimated market share of 17.3% at December 31, 2006. The extent that increased and ongoing competition will ultimately have on our market share, business, financial condition, revenues and results of operations will depend on a variety of factors that we cannot yet precisely assess, and many of which may be beyond our control.

Discussion of Critical Accounting Policies

General

The preparation of the consolidated financial statements included in this annual report necessarily involves certain assumptions, which are derived from historical experience and various other factors that we deemed reasonable and relevant. The portrayal of our financial condition and results of operations often requires our management to make judgments regarding the effects on our financial condition and results of operations of matters that are inherently uncertain. Actual results may differ from those estimated under different variables, assumptions or conditions. Note 3 to our consolidated financial statements included in Item 18. Financial Statements includes a summary of the significant accounting policies and methods used in the preparation of our consolidated financial statements.

Revenue Recognition

Revenues from services and sales of handsets and accessories are recognized when the service is provided or when the equipment is sold and delivered in accordance with SEC Staff Accounting Bulletin, or SAB, No. 104, Revenue Recognition, and Emerging Issues Task Force, or EITF, Issue No. 00-21, Revenue Arrangements with Multiple Deliverables. Revenues from cellular telephone services consist of subscription charges, usage charges, network usage charges, long distance charges and charges for maintenance and other customer services. Unbilled revenues from the billing date to the month-end are measured and recognized as revenue during the month in which the service was provided. Revenues from equipment sales refer to sales of handsets and accessories.

The service agreements signed by customers in connection with sales of subsidized handsets are considered to be revenue arrangements with multiple deliverables. Total consideration received in these arrangements is allocated and measured using units of accounting within the arrangement (i.e., service and handset contracts) based on relative fair values. We do not charge activation fee in connection with such service agreements.

Revenues from sales of prepaid cards are recognized according to the services provided for each card, considering customers usage or when the customer credit expires. Our *Plano Controle* rate plans also include a feature whereby unused credits do not expire each month but rather are available for future use. We defer revenue based on unused credits in prepaid cards and in the *Plano Controle* rate plan. Unused credits are controlled and measured by systems.

We consider revenue recognition to be a critical accounting policy because of the uncertainties caused by factors such as the complex information technology required, high volume of transactions, fraud, accounting regulations, management's determination of collectibility and uncertainties regarding our right to receive certain revenues (mainly revenues for use of our network). Significant changes in these factors could cause us to fail to recognize revenues or to recognize revenues that we may not be able to realize in the future, despite our internal controls and procedures.

Deferred Taxes

As of December 31, 2007, we had a net deferred tax asset of R\$255.6 million, as compared to R\$251.5 million at December 31, 2006, related to our corporate reorganization, tax loss carry-forwards and other temporary differences (primarily with respect to provision for contingencies, allowance for doubtful accounts and accrued expenses) that may be used to offset future taxable income.

We regularly review the deferred tax assets for recoverability and establish a valuation allowance, as required, based on our historical taxable income, projected future taxable income, and the expected timing of reversals of temporary differences. If we or our subsidiary operate at a loss or are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates or the time period within which the underlying temporary differences become taxable or deductible, we will evaluate the need to modify or record a valuation allowance against our deferred tax assets. We believe that it is more likely than not that we will use this tax credit mentioned above against our taxable income in the future.

Long-lived Assets

We consider the effects of obsolescence, competition, changes in technology and other economic factors when assigning useful lives to our operating assets. For example, the results for the years ended 2001 and 2002 were affected by the acceleration of the depreciation of our billing system, which was replaced in August 2003.

Due to the launch of the new GSM/EDGE network and the migration from our TDMA network to the GSM/EDGE network, we decided to further reduce the useful lives of our TDMA network and related equipment. Accordingly, the expected useful lives of these assets were reduced from four to three years, beginning on January 1, 2004. As of December 31, 2007, most of our TDMA network was fully depreciated. Changes in the lives of operating assets that have a significant impact on our consolidated financial statements are disclosed whenever they occur.

We assess the carrying amount and potential impairment of these long-lived assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors we consider in determining whether an impairment review is necessary include a significant underperformance of the assets relative to projected future operating results and significant negative industry or economic trends. We determine when an impairment review is necessary through a comparison between the expected undiscounted future cash flows and the carrying amount of the asset. If the carrying amount of the asset is the larger of the two amounts, an impairment loss is recognized by the amount that the carrying amount of the asset exceeds the fair value of the asset. The fair value is determined by quoted market prices, appraisals or the use of valuation techniques, such as expected discounted future cash flows. We must make assumptions regarding these estimated future cash flows and other factors to determine the fair value of the respective assets. In determining estimated future cash flows, we consider historical experience as well as future expectations, and estimated future cash flows are based on expected future rates and expected future consumer

demand. A significant reduction in actual cash flows and estimated cash flows may have a material adverse impact on our operating results and financial condition.

Contingencies

We account for contingencies in accordance with SFAS No. 5 Accounting for Contingencies. Such accruals are estimated based on historical experience, the nature of the claims, as well as the current status of each claim. Accounting for contingencies requires significant judgment by management concerning the estimated probabilities and ranges of exposure to potential liability. Management's assessment of our exposure to contingencies could change as new developments occur or more information becomes available. The outcome of the contingencies could vary significantly and could materially impact our consolidated results of operations, cash flows and financial position. Management has applied its best judgment in applying SFAS No. 5 to these matters.

We do not believe that we are a party to any legal proceedings for which we have not made provisions for probable losses and that will have a material adverse effect on our consolidated financial position. As discussed in Note 14 to our consolidated financial statements included in Item 18. Financial Statements, in December 1998, we were granted an injunction by the Treasury Court of the State of Minas Gerais relating to the application of ICMS to monthly fees, rentals and additional services. We do not believe such services should be subject to ICMS, on the grounds that they do not constitute telecommunications services. However, each Brazilian state has approved an agreement, effective beginning July 1, 1998, to apply ICMS to certain services in respect of which ICMS was not previously applied. Some courts in Brazil have upheld the validity of this agreement. We have deposited amounts equal to uncollected ICMS amounts with the applicable courts and provisions have been made in our consolidated financial statements in respect of these amounts.

We recognize the costs of legal defense in the periods incurred. The costs of defending claims are not included in our provisions because legal expenses are generally determined on the basis of success fees.

Recently Issued Accounting Pronouncements

The Financial Accounting Standard Board, or FASB, has issued a number of standards and interpretations during 2006 and 2007. The following standards and interpretations will be in effect in the near future. Management is evaluating the possible impact of these standards and interpretations.

- In July 2006, FASB issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 which clarifies the accounting for and disclosure of uncertain tax positions. This guidance seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to tax positions with uncertainty. FIN 48 requires that a tax position taken or expected to be taken in a tax return be recognized in the financial statements when it is more likely than not (i.e., a likelihood of more than fifty percent) that the position would be sustained upon examination by tax authorities. A recognized tax position is then measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. We adopted the provisions of FIN 48 effective January 1, 2007. The adoption of this standard did not have a material impact on our consolidated financial statements.
- In September 2006, FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurement. SFAS No. 157 does not require any new fair value measurements. This statement is initially effective for financial statements issued for fiscal years beginning after November 15, 2007 (calendar year 2008), and is to be applied prospectively as of the beginning of the year in which it is initially applied. For all nonrecurring fair value measurements of nonfinancial assets and liabilities, the statement is effective for fiscal years beginning after November 15, 2008 (calendar year 2009). We are currently evaluating the provisions of this

statement, but, as of this date, we do not expect the application of this standard to change our current practice. We will apply the requirements of SFAS No. 157 as transactions occur.

- In February 2007, FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, a standard that provides companies with an option to report selected financial assets and liabilities at fair value. This Standard requires companies to provide additional information that shows the effect of the Company's choice to use fair value on its earnings. It also requires entities to display the fair value of those assets and liabilities for which the Company has chosen to use fair value on the face of the balance sheet. The new Statement does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in FASB Statements No. 157, *Fair Value Measurements*, and No. 107, *Disclosures about Fair Value of Financial Instruments*. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. We elected not to apply the fair value option to any of our financial assets or liabilities as of January 1, 2008.
- In December 2007, FASB issued SFAS No. 141(R), *Business Combinations*. Statement 141(R) establishes principles and requirements for how an acquiring entity in a business combination recognizes and measures the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as a measure for all assets acquired and liabilities assumed and requires the acquirer to disclose to investors and other users all of the information necessary to evaluate and understand the nature and financial effect of the business combination. This statement will be effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 (calendar year 2009).
- In December 2007, FASB also issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements, an amendment ARB 51*. This statement clarifies that a non-controlling (minority) interest in a subsidiary is an ownership interest in the entity that should be reported as equity in the consolidated financial statements. It also requires consolidated net income to include the amounts attributable to both the parent and non-controlling interest, with disclosure on the face of the consolidated income statement of the amounts attributed to the parent and to the non-controlling interest. This statement will be effective prospectively for fiscal years beginning after December 15, 2008 (calendar year 2009), with presentation and disclosure requirements applied retrospectively to comparative financial statements. We are currently evaluating the provisions of this statement.
- In March 2008, FASB issued SFAS 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133. This Statement requires enhanced disclosures about an entity's derivative and hedging activities and thereby improves the transparency of financial reporting. This Statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. This Statement encourages, but does not require, comparative disclosures for earlier periods at initial adoption. Our management is evaluating the potential impacts of this statement in our consolidated financial statements.
- In May 2008, FASB issued SFAS 162, *The Hierarchy of Generally Accepted Accounting Principles*. This Statement identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States. This Statement shall be effective 60 days following SEC's approval of the Public Company Accounting Oversight Board (PCAOB) amendments to AU Section 411 *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. Our management is evaluating the potential impacts of this statement in our consolidated financial statements.

Results of Operations

The following table shows the components of our net income for the years ended December 31, 2007, 2006 and 2005.

	Year Ended December 31,		
	2007	2006	2005
	(in thousands of reais)		
Net operating revenues:			
Services provided to customers	1,293,994	1,110,618	1,095,846
Sale of handsets	100,538	106,122	87,482
	1,394,532	1,216,740	1,183,328
Cost of services ⁽¹⁾	(441,964)	(350,240)	(295,303)
Cost of handsets and accessories	(136,204)	(157,683)	(138,488)
Selling, general and administrative expenses (including cost sharing agreement) ⁽¹⁾	(354,630)	(335,260)	(354,396)
Allowance for doubtful accounts	(29,921)	(41,429)	(21,094)
Other operating income (expense), net	3,177	11	(4,101)
Depreciation and amortization	(215,004)	(179,888)	(205,734)
Operating profit	219,986	152,251	164,212
Financial income	84,062	99,732	145,152
Financial expense	(65,970)	(51,318)	(79,707)
Foreign exchange gain, net	30,075	21,099	49,066
Income before taxes and minority interest	268,153	221,764	278,723
Taxes on income	(84,055)	(69,179)	(85,593)
Minority interest	(30,790)	(23,838)	(32,421)
Net income	153,308	128,747	160,709

(1) Exclusive of depreciation classified separately.

Results of Operations for Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Net Operating Revenues

Total net revenues increased 14.6%, to R\$1,394.5 million in 2007 from R\$1,216.7 million in 2006. This increase is mostly attributable to the 34.7% increase in interconnection revenues to R\$579.9 million in 2007 from R\$430.6 million in 2006, as a result of the adoption of the full billing rule for interconnection revenues.

Our service revenues are comprised mainly of monthly fees, service charges from outgoing traffic and interconnection revenues from incoming traffic. Net service revenues increased 16.5% to R\$1,294.0 million in 2007 from R\$1,110.6 million in 2006. This increase is a result of (1) an increase in interconnection revenues in the amount of R\$149.3 million, as a consequence of the adoption of the full billing rules for interconnection charges in 2007; (2) a R\$43.3 million increase in value added services revenue; and (3) a R\$3.6 million increase in other service revenues.

Cost of Services

Cost of services increased 26.2%, to R\$442.0 million in 2007 from R\$350.2 million in 2006. This increase is due to a 67.3% increase in interconnection and roaming costs as a result as of the adoption of the full billing rule in 2007 for interconnection charge mentioned above. Additionally, there was a 416.2% increase in FISTEL fees as a result of the higher growth in the customer base in 2007 as compared to 2006 and a 48.3% increase in rent and network maintenance costs due to the expansion of our GSM network.

This increase was partially offset by the 8.9% decrease in expenses related to leased line costs, as a result of the replacement of leased transmission lines by lines owned by us, and by replacing Embratel's lines by Telemar's lines due to its reduced cost.

Cost of Handsets and Accessories

Cost of handsets sold decreased 13.6%, from R\$157.7 million in 2006 to R\$136.2 million in 2007, due to the negotiation with suppliers of more favorable terms in handset price policy.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased 5.8%, to R\$354.6 million in 2007 from R\$335.3 million in 2006. As a percentage of net services revenue, selling, general and administrative expenses decreased to 27.4% in 2007, as compared to 30.2% in 2006.

Selling expenses increased 7.2%, to R\$265.7 million in 2007 from R\$247.8 million in 2006. As a percentage of net services revenue, selling expenses decreased to 18.6% in 2007, as compared to 22.3% in 2006. This decrease is mostly attributable to lower advertising and promotional expenses incurred in 2007 in connection with the launch of new products such as *Poupo* and 3G technology, as well as a new line of prepaid cards.

General and administrative expenses increased 1.6%, to R\$88.9 million in 2007 from R\$87.5 million in 2006. This increase is mainly attributable to the reversal of a provision related to value added taxes (VAT - ICMS) in the amount of R\$19.5 million recorded in 2006, which did not occur in 2007. Excluding these effects in 2007 and other non-recurring events, general and administrative expenses would have decreased mainly as a result of the termination of the holdings' office in Brasília and lower expenses with consulting services as compared to 2006.

As a percentage of net services revenue, general and administrative expenses increased to 8.8% in 2007 from 7.9% in 2006.

Allowance for Doubtful Accounts

The allowance for doubtful accounts decreased 27.8%, to R\$29.9 million in 2007 from R\$41.4 million in 2006. This decrease resulted from the establishment of rules for client acquisition focused on credit analysis, appropriate incentives for the distribution channels and new collection actions. As a percentage to net service revenues, the allowance for doubtful accounts decreased to 2.3% in 2007, 1.5% lower than the 3.8% recorded in 2006, due to the increase in sales to premium clients.

Other Operating Income (expense), Net

The net operating expense in 2007 refers mainly to loss on disposal of certain equipment.

Depreciation and Amortization

Depreciation and amortization expenses increased 19.5%, to R\$215.0 million in 2007 from R\$179.9 million in 2006. This increase is a result of a higher volume of capital expenditures in 2007.

Operating Profit

Operating profit increased 44.5%, to R\$220.0 million in 2007 from to R\$152.3 million in 2006, as a result of the factors described above.

Financial Income

Financial income decreased 15.7%, to R\$84.1 million in 2007 from R\$99.7 million in 2006. The decrease is mostly attributable to the declining interest rates occurred in the year.

Financial Expense

Financial expense increased 28.6%, to R\$66.0 million in 2007 from R\$51.3 million in 2006. The increase was directly related to a tax expense on financial transactions in the amount of R\$14.5 million as compared to a gain of approximately R\$40.7 million on such taxes in 2006, since the gain in the amount of R\$16.6 million obtained from the lawsuit that questioned the constitutionality of the basis for application of PIS and COFINS were recognized as financial expenses in 2006. Additionally, in 2007 the results of our cross-currency interest rate swap agreements were in line with those for 2006.

Foreign Exchange Gain, Net

As a result of the 17.2% appreciation of the *real* against the U.S. dollar during 2007, we recorded a foreign exchange gain of R\$30.0 million, as compared to a foreign exchange gain of R\$21.1 million during 2006 when the *real* appreciated against the U.S. dollar by 9.5% .

Taxes on Income

Income taxes increased 21.5%, to R\$84.1 million in 2007 from R\$69.2 million in 2006, as a result of the increase in income before taxes to R\$268.2 million in 2007 from R\$221.8 million in 2006. The effective tax rate in 2007 was 31.3%, as compared to 31.2% in 2006.

Net Income

As a result of the above factors, net income increased to R\$153.3 million in 2007, as compared to R\$128.8 million in 2006.

Other comprehensive income (loss)

Other comprehensive income was R\$3.8 million in 2007. We did not record any comprehensive income in 2006. This variation was due to an increase in unrealized gains on plan assets net of applicable amortization, income taxes and minority interest, basically as a result of actuarial gains arising from actual return of plan assets.

Comprehensive income

As a result of the factors stated above, comprehensive income was R\$157.1 million in 2007 as compared to a comprehensive income of R\$128.7 million in 2006.

Results of Operations for Year Ended December 31, 2006 Compared to Year Ended December 31, 2005

Net Operating Revenues

Total net revenues increased 2.8%, to R\$1,216.7 million in 2006 from R\$1,183.3 million in 2005. This increase is mostly attributable to the 21.3% increase in revenues from the sale of handsets to R\$106.1 million in 2006 from R\$87.5 million in 2005, as a result of the 16.3% increase in the number of handsets sold.

Our service revenues are comprised mainly of monthly fees, service charges from outgoing traffic and interconnection revenues from incoming traffic. Net service revenues increased 1.3%, to R\$1,110.6 million in 2006 from R\$1,095.8 million in 2005. This increase is a result of (1) an increase in interconnection revenues in the amount of R\$68.1 million, as a consequence of the adoption of the full billing rules for interconnection charges; (2) a R\$26.2

million increase in value added services revenue; and (3) a R\$17.2 million increase in other service revenues.

This increase was partially offset by a decrease in roaming in and roaming out revenues in 2006 in the amount of R\$59.3 million and R\$11.1 million, respectively. Additionally, there was a R\$27.3 million decrease in monthly fees revenues as a result of a 6.8% decrease in the number of contract subscribers to 798,140 in 2006 from 856,522 in 2005.

Cost of Services

Cost of services increased 18.6%, to R\$350.2 million in 2006 from R\$295.3 million in 2005. This increase is due to a 64.1% increase in interconnection and roaming costs as a result of the adoption of the full billing rule for interconnection charge mentioned above. Additionally, there was a 17.0% increase in leased lines costs and rent and network maintenance costs due to the expansion of our GSM network.

This increase was partially offset by the 91.4% decrease in expenses related to cloning fraud and the 9.3% decrease in FISTEL expenses, as a result of a lower growth in our customer base in 2006 as compared to 2005.

Cost of Handsets and Accessories

Cost of handsets sold increased 13.9%, to R\$157.7 million in 2006 from R\$138.5 million in 2005, due to the larger number of handsets sold, as mentioned above.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased 5.4%, to R\$335.3 million in 2006 from R\$354.4 million in 2005. As a percentage of net services revenue, selling, general and administrative expenses decreased to 30.2% in 2006, as compared to 32.3% in 2005.

Selling expenses decreased 2.7%, to R\$247.8 million in 2006 from R\$254.6 million in 2005. As a percentage of net services revenue, selling expenses decreased to 22.3% in 2006, as compared to 23.2% in 2005. This decrease is mostly attributable to higher advertising and promotional expenses incurred in 2005 in connection with the launch of operations in the *Triângulo Mineiro* region.

General and administrative expenses decreased 12.43%, to R\$87.5 million in 2006 from R\$99.8 million in 2005. This decrease is mainly attributable to the reversal of a provision related to value added taxes (VAT - ICMS) in the amount of R\$19.5 million recorded in 2006, compared to a provision related to ICMS in the amount of R\$14.8 million recorded in 2005. Excluding these effects in 2006 and in 2005, general and administrative expenses would have increased by 25.4%, mainly as a result of the increase in consulting expenses related to the review of the Company's operations performed by its new management.

As a percentage of net services revenue, general and administrative expenses decreased to 7.9% in 2006 from 9.1% in 2005.

Allowance for Doubtful Accounts

The allowance for doubtful accounts increased 96.2%, to R\$41.4 million in 2006 from R\$21.1 million in 2005. This increase resulted from lighter credit policies and the larger volume of subscription frauds experienced at the end of 2005 and early 2006. Expressed as a percentage of net services revenue, the allowance for doubtful increased to 3.7% in 2006 as compared to 1.9% in 2005.

Other Operating Income (expense), Net

The net operating expense in 2005 refers mainly to loss on disposal of certain equipment.

Depreciation and Amortization

Depreciation and amortization expense decreased by 12.6%, to R\$179.9 million in 2006 from R\$205.7 million in 2005. This decrease is a result of a lower volume of capital expenditures in 2006 and the conclusion of most of the TDMA network depreciation in early 2006.

Operating Profit

Operating profit decreased to R\$152.3 million in 2006 from R\$164.2 million in 2005 as a result of the factors described above.

Financial Income

Financial income decreased 31.3%, to R\$99.7 million in 2006 from R\$145.2 million in 2005. The decrease is mostly attributable to a 27.9% decrease in the average balance of our invested cash in 2006.

Financial Expense

Financial expense decreased 35.6%, to R\$51.3 million in 2006 from R\$79.7 million in 2005. The decrease was directly related to a 47.1% decrease in our average outstanding indebtedness in 2006. Additionally, in 2006 there was a R\$6.9 million decrease in the negative results of our cross-currency interest rate swap agreements.

This decrease was partially offset by the decrease in the amount of PIS and COFINS recoverable taxes recognized in 2006, R\$16.6 million, compared to the R\$21.3 million recognized in 2005. The recognition of these recoverable taxes followed favorable decisions of the courts in relation to legal actions in which we were questioning the constitutionality of the increase in the calculation base of PIS and COFINS taxes.

Foreign Exchange Gain, Net

As a result of the 9.5% appreciation of the *real* against the U.S. dollar during 2006, we recorded a foreign exchange gain of R\$21.1 million, as compared to a foreign exchange gain of R\$49.1 million during 2005 when the *real* appreciated against the U.S. dollar by 13.4%. Additionally, our average outstanding indebtedness, which is entirely indexed to the U.S. dollar, decreased 47.1% in 2006 as mentioned above.

Taxes on Income

Income taxes decreased to R\$69.2 million in 2006 from R\$85.6 million in 2005, as a result of the decrease in income before taxes to R\$221.8 million in 2006 from R\$278.7 million in 2005. The effective tax rate in 2006 was 31.2%, as compared to 30.7% in 2005.

Net Income

As a result of the above factors, net income decreased to R\$128.8 million in 2006, as compared to R\$160.7 million in 2005.

Recent Developments

At a meeting held on May 26, 2008, the board of directors of the Registrant approved the appointment of Ernst & Young Auditores Independentes S.S. as its independent auditors for the period beginning April 2008. The decision to replace the Registrant's current independent auditors is due to the change of its control that took place in April 2008, so that the financial statements of Vivo Participações S.A., or Vivo, its current controlling shareholder, and those of the Registrant are audited by the same independent auditors.

B. Liquidity and Capital Resources

General

Our primary sources of liquidity have historically been cash flows from operating activities and borrowings. We have funded our operations and capital expenditures principally from operating cash flows and loans obtained from financial institutions. We regularly maintain substantial cash and cash equivalents and temporary cash investments

balances in order to be in a position to respond immediately to the changing regulatory and competitive environment in which we operate. Our principal cash requirements include:

- capital expenditures, including those related to the GSM network migration,
- the servicing of our indebtedness,

- the payment of dividends and interest on shareholders' equity, and
- handset subsidies.

Cash Provided by Operating Activities

Cash provided by operating activities was R\$89.9 million in 2007, R\$290.5 million in 2006 and R\$418.9 million in 2005. The 69.1% decrease between 2007 and 2006 is mainly related to lower liquidation of temporary cash investments in 2007 as compared to 2006. The 30.7% decrease between 2006 and 2005 is also mainly related to lower liquidation of temporary cash investments in 2006 as compared to 2005.

Cash Used in Investing Activities

Acquisitions of property and equipment continue to be one of our primary uses of cash flow. Our net cash flow used in investing activities was R\$157.5 million, R\$155.2 million and R\$116.8 million in 2007, 2006 and 2005, respectively. In 2006 and 2005 we invested in expanding our GSM network capacity and the start-up of our operations in the Triângulo Mineiro region. In 2007 we also invested in the expansion of our GSM network capacity and in the *Minas Comunica* program, which intended to provide cellular phone coverage to an additional 134 locations in the State of Minas Gerais until October 2008.

Cash provided by (used in) Financing Activities

Cash provided by financing activities was R\$56.7 million in 2007 as compared to cash used in financing activities of R\$143.2 million and R\$283.1 million in 2006 and 2005, respectively due mainly to cash resulting from the reverse stock split that occurred in 2007, lower dividends paid during 2007 as compared to 2006 (R\$98,697) and 2005 (R\$83,986) and no payment of long-term debt, which will only occur in January, 2009. We paid R\$34.5 million, R\$98.7 million and R\$84.0 million in dividends and interest on shareholders' equity in 2007, 2006 and 2005, respectively.

Increase (Decrease) in Cash and Cash Equivalents

At December 31, 2007, we had R\$10.4 million in cash and cash equivalents, as compared to R\$21.4 million and R\$29.3 million at December 31, 2006 and 2005, respectively, as a result of the factors mentioned above.

Capital Expenditures

We invested R\$305.5 million, R\$250.5 million and R\$297.7 million in 2007, 2006 and 2005, respectively. Capital expenditures priorities in 2007 included primarily expanding our GSM network capacity and our investments in the *Minas Comunica* program. We anticipate that our capital expenditures for 2008 will be around R\$409 million, primarily relating to increasing the capacity of our GSM network, improving the overall quality of our network, the continuation of the *Minas Comunica* program and the increased investment in 3G technology.

We believe that our capital expenditure requirements can be met through our cash flows from operations.

Indebtedness

At December 31, 2007, our total debt was R\$147.9 million, as compared to R\$171.0 million and R\$236.2 million at December 31, 2006 and 2005, respectively. At December 31, 2007, 95.8% of our total debt was denominated in U.S. dollars, with interest at an annual rate of 8.75%. At December 31, 2007, December 31, 2006 and December 31,

2005, we had cross-currency interest rate swap agreements in effect for all of our foreign-currency indexed debt to mitigate exchange rate fluctuations. Our cross-currency interest rate swap agreements exchange U.S.-dollar indexed debt for *reais* debt with a floating interest rate (based on interbank deposit rate).

On January 20, 2004, Telemig Celular issued US\$80 million of 8.75% unsecured senior notes units due 2009. The Telemig Celular note issuance was combined with an issuance by Amazônia Celular of US\$40 million of 8.75% notes due 2009. The Telemig Celular notes and the Amazônia Celular notes may only be transferred together as part of notes units and will not trade separately. The notes units were offered and sold in offshore transactions in

accordance with Regulation S under the Securities Act and to qualified institutional buyers (QIBs) in the United States under Rule 144A of the Securities Act. Interest payments on the Telemig Celular notes are made semi-annually. At December 31, 2007, there was R\$141.7 million aggregate principal amount of notes outstanding.

On December 31, 2007, Telemig Celular and Amazônia Celular were in compliance with the financial covenants set forth in the indenture related to the notes.

In compliance with the terms of the personal mobile service providing agreement, resulting from public bid No. 001/2007, the State of Minas Gerais, through the State Secretary of Economic Development, has undertaken to subscribe debentures issued by Telemig Celular in the scope of the *Minas Comunica* Program, through the use of resources from the Fund of Universalization of the Access to Telecommunication Services, or FUNDOMIC. According to the program, Telemig Celular will provide cellular phone coverage to 134 locations within the State of Minas Gerais (those with area codes No. 34, 35 and 38). In addition, 5,550 single, non convertible, nominal and book-entry debentures will be issued without issuance certificates in up to five series. In December 2007, as consideration from the certification obtained from the State Secretary of Economic Development from serving 15 locations, Telemig Celular issued 621 non convertible debentures from the first series of the first issuance in the total amount of R\$6.2 million. The outstanding balance is adjusted to inflation according to the IPCA plus 0.5% per year. The debentures principal amount and interest are due annually beginning July 2018, with final maturity date in July 2021. The agreement has restrictive clauses concerning: (1) the allocation of funds, (2) certain transactions carried out with related parties and consolidation and merger transactions, and (3) compliance with certain limits substantially based on balance sheet financial indicators and EBITDA, among others.

Our financial instruments restrict our ability, among other things, to pay certain dividends and distributions, create liens on our assets, enter into related-party transactions, or merge, consolidate or sell assets. Our financial instruments also require us to maintain certain ratios (such as a ratio of net indebtedness to adjusted EBITDA, and a ratio of adjusted EBITDA to net interest expense) and deliver certain financial reports. In addition, certain financing agreements of the Company have cross-acceleration clauses. Since our financing agreements limit our ability to incur indebtedness above a certain level, our ability to raise capital above the limits imposed by such agreements may be impaired, which may affect our ability to obtain resources needed to switch or upgrade our technology.

The following table shows our U.S. dollar and non-U.S. dollar-indexed loans for the periods indicated (converted using the exchange rate at the end of the period):

	As of December 31,		
	2005	2006	2007
	(in millions of reais)		
Short-Term Indebtedness Plus Current Portion of Long-Term Indebtedness:			
Non-U.S. Dollar Indexed	-	-	-
U.S. Dollar-Indexed	48.9	-	-
Total	48.9	-	-
Long Term Indebtedness:			
Non-U.S. Dollar Indexed	-	-	6.2
U.S. Dollar-Indexed	187.3	171.0	141.7
Total	187.3	171.0	147.9

Total Indebtedness	236.2	171.0	147.9
---------------------------	-------	-------	-------

C. Research and Development, Patents and Licenses, etc.

We do not conduct any independent research and primarily depend upon the manufacturers of telecommunications products for the development of new hardware. Only some isolated patent initiatives have been conducted for the innovation efforts of the company.

D. Trend Information

We expect competition in our area to remain strong. Currently, we face the competition of four operators in our authorization area: TIM, Oi, Claro and CTBC Celular. The extent that increased and ongoing competition will ultimately have on our market share, business, financial condition, revenues and results of operations will depend on a variety of factors that we cannot yet precisely assess, and many of which may be beyond our control.

We also expect that the supply of TDMA-compatible handsets will continue to decrease in 2008, resulting in pressure on our TDMA subscriber base to switch to GSM service if these subscribers need to replace their existing TDMA handsets.

E. Off-Balance Sheet Arrangements

We have not engaged in any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

F. Tabular Disclosure of Contractual Obligations

The following table sets forth the amount in millions of *reais* of our fixed contractual obligations at December 31, 2007.

	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(in millions of <i>reais</i>)				
Reverse stock split payable to former shareholders	98.2	98.2	-	-	-
Long-Term Debt Obligations ⁽¹⁾	172.7	16.1	150.0	0.1	6.5
Operating Lease Obligations	102.8	23.8	34.7	21.7	22.6
3G Concession Contracts	53.5	37.5	16.0	-	-
Purchase Obligations	178.0	178.0	-	-	-
Cross Currency Interest Weight Swap Agreements	92.0	-	92.0	-	-
Other Long-Term Liabilities	44.4	16.9	6.3	6.2	15.0
Total Contractual Cash Obligations	741.6	370.5	299.0	28.0	44.1

(1) Includes estimated interest payments determined using the interest rate at December 31, 2007. However, our long-term debt is subject to exchange rate variations, and these estimated payments may differ significantly from payments actually made.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**A. Directors and Senior Management**

We are managed by our *Conselho de Administração*, or board of directors, and our *Diretoria*, or executive officers.

Board of Directors

Our board of directors is currently comprised of ten members serving for a term of three years. Our bylaws provide for our board of directors to convene a regular meeting once every three months and special meetings when called by the chairman or by two members of the board of directors.

The following table contains the current members of our board of directors elected on April 3, 2008 except for Marcelo Santos Barbosa and Marcos Duarte Santos, who were elected on March 28, 2008, as well as their respective positions and ages.

Name	Position	Age
Luis Miguel Gilpérez López	Chairman	48
	Vice	
João Pedro Amadeu Baptista	Chairman	50

Table of Contents

Shakhaf Wine	Director	38
Félix Pablo Ivorra Cano	Director	61
Ignácio Aller Malo	Director	62
Rui Manuel de Medeiros D'Espiney Patrício	Director	75
Luiz Kaufmann	Director	62
José Guimarães Monforte	Director	60
Marcelo Santos Barbosa	Director	36
Antônio Gonçalves de Oliveira	Director	64

Set forth below are brief biographical descriptions of our directors:

Luis Miguel Gilpérez López is general director of the mobile division of Telefónica International and a member of the supervisory board of Brasilcel N.V. He was a board member of TCP, Celular CRT, TSD, TCO, Teleacre, Telegoiás, NBT, Telemat, Telems, TCO and Teleron from 2004 to 2005. He began working for the Telefónica group in 1981, having assumed increasingly responsibilities in areas including networks, infrastructure, product and services development and marketing. Mr. López holds a degree in industrial engineering and has a master's degree in business administration, or MBA.

João Pedro Amadeu Baptista is currently the vice chairman of the supervisory board of Brasilcel N.V., the vice chairman of the board of directors of Vivo, the chairman of the supervisory board of Portugal Telecom Investimentos Internacionais Consultoria Internacional, S.A., PT Móveis Serviços de Telecomunicações, SGPS, S.A., PT Acessos de Internet WI-FI, S.A., PT Ventures, SGPS, S.A., Portugal Telecom Brasil, S.A. and Mobitel. Mr. Baptista is also a member of the board of directors of Universo Online UOL and Unitel, SARL, chairman of the manager board of Directel, since 2006. He is a member of the audit committee of the Victoria and Albert Museum of London, since 2005. Mr. Baptista was the leader of the Global Team of Telecommunications and a partner of Booz Allen Hamilton, in the United Kingdom, from 2005 until 2006. Mr. Baptista was the global leader for the group of Technology, Information and Entertainment Industry of Marsh & McLennan Companies Inc., from 2004 until 2005. He was a member of the executive commission and a partner of Mercer Management Consulting, from 1997 until 2005, global responsibility for the groups of Technology, Information and Entertainment, from 2000 until 2005, a co-leader for the United Kingdom, from January 2001 until 2005. Mr. Baptista holds a degree in mechanics engineering, a post-graduate degree in energy from the Federal Polytechnical School of Lausanne, Switzerland, and an MBA from the Stanford Graduate School of Business.

Shakhaf Wine is the president of Portugal Telecom Brasil S.A, a member of the executive committee of PT Investimentos Internacionais S.G.P.S., a member of the board of directors of Brasilcel N.V. and a member of the board of directors of Vivo and Universo Online S.A. Previously, Mr. Wine was a member of the board of directors of TCP, TCO, TSD, Celular CRT and Banco1.Net S.A. Before joining Portugal Telecom in April 2003, Mr. Wine was a director of Investment Banking and a relationship manager for European Corporate Clients in the Global Telecommunications Group of Merrill Lynch International from 1998 to 2003, based in London. Additionally, Mr. Wine was a senior associate director of the Latin American and Telecommunications groups of Deutsche Morgan Grenfell from 1993 until 1998, also based in London. Mr. Wine was a foreign exchange trader and dealer for the Central Bank at Banco Icatu S.A. He holds a degree in economics from the Pontifícia Universidade Católica do Rio de Janeiro.

Félix Pablo Ivorra Cano was the chairman of the board of directors of Telesp Celular Participações S.A., Tele Sudeste Celular Participações S.A., Tele Leste Celular Participações S.A., Celular CRT Participações S.A., Tele Centro Oeste Celular Participações S.A., Telems Celular S.A., Telegoiás Celular S.A., Telemart Celular S.A., Teleron Celular S.A., Teleacre Celular S.A., Norte Brasil Telecom S.A. and TCO IP S.A. from February 1999 to September

2005. Mr. Ivorra is currently a member of the boards of directors of Telecomunicações de São Paulo S.A, Brasilcel N.V and Vivo. He was a member of the board of directors of TSD, TLE, TCO and Celular CRT until February 2006. He joined the Telefónica Group in July 1972 and served in the areas of Technical Specifications, Network Planning, Commercial Planning and as general director of Advanced Communications. In 1993, he was appointed general director of the team that founded Telefónica Servicios Móviles, where he held several positions including general commercial director and general director of Business Development until January 2006. During 1997 and part of 1998, he was chairman of the board of Telefónica Móviles group companies Mensatel, S.A. and Radiored, S.A. Mr. Ivorra has a degree in telecommunications engineering from the Escola Técnica Superior de

Engenharia ETSI in Madrid, and a post-graduate degree in Business Administration from the Instituto Católico de Administração de Empresas ICADE also in Madrid.

Ignacio Aller Malo is a member of the board of directors of Telefonía Móviles México, S.A. de C.V., Brasilcel N.V and Vivo. He was a member of the board of directors of TSD, TLE and Celular CRT until February 2006. Mr. Aller has served as chief operating officer of Telefonía Móviles S.A. since 2003 and has held several positions at Telefonía de España since 1967.

Rui Manuel de Medeiros D Espiney Patrício is a member of the board of directors of Monteiro Aranha S.A., Monteiro Aranha Participações, Klabin S.A., Vivo, Jerónimo Martins (Portugal) and Espirito Santo International Holding. He was a member of the board of directors of Banco Boavista S.A. from 1997 until 2000; member of the board of directors of Banco Inter-Atlântico S.A. from 1980 until 1997, member of the board of directors of Ericsson do Brasil from 1979 until 1997, managing director and executive vice-president of Monteiro Aranha S.A. from 1976 until 1992, representative of the Monteiro Aranha Group in Europe from 1975 until 1976 and worked at Financiadora Volkswagen do Brasil from 1974 until 1975. Mr. Patrício was Minister for Foreign Affairs of Portugal from 1970 until 1974, Under-Secretary of State for Overseas Economic Development of Portugal from 1965 until 1970, member of the Commission for Overseas Development Plan from 1963 until 1965, economic advisor of Sacor (Oil Company) from 1958 until 1964, and between 1958 and 1963 he was assistant professor at Lisbon University. Mr. Patrício has a degree in law from the University of Lisbon, a post-graduate degree in Political Economics from University of Lisbon and a business administration degree from the Fundação Getúlio Vargas.

Luiz Kaufmann has been a member of the board of directors and audit committee of Vivo since July 2005. He was a member of the board of directors and audit committee of TSD, TLE, TCO and Celular CRT, since July 2005 and until February 2006. Mr. Kaufmann is President and chief executive officer of Medial Saude S.A., a health care company. Mr. Kaufmann is also a member of the board of directors of Gol Linhas Aéreas Inteligentes and chairman of its audit committee. Mr. Kaufmann is a partner at L. Kaufmann Consultores Associados, a boutique investment bank, through which Mr. Kaufmann was in charge of the turn-around and sale of Vésper Brazil from May 2001 to November 2003 and in the turn-around and sale of Primesys from October 2004 to October 2005. Mr. Kaufmann was partner of GP Investimentos from 1999 to 2001 and a board member of several companies controlled by GP, chief executive officer of Aracruz Celulose S.A. and chairman of the board of directors of Tecflor from November 1993 to April 1998. Previously he spent several years as managing director of Arthur D. Little in Brazil. Mr. Kaufmann began his career at Serete S.A. Engenharia as a project engineer in 1968, rising to the position of director of finance and control by 1974. Mr. Kaufmann then held various other executive positions prior to those described above. Mr. Kaufmann holds a degree in mechanical engineering from the Universidade Federal do Paraná and a master of sciences in industrial engineering from the Illinois Institute of Technology.

José Guimarães Monforte is currently a member of the board of directors and audit committee of Vivo since June of 2007. Mr. Guimarães Monforte is the president of Jano Comércio, Administração e Participações Ltda. and was the former president of the board of IBGC and Pini Editora S.A., and the vice president of the board of Klicknet. He was also a member of the board of Natura Cosméticos, Caramuru Alimentos, JHSF Participações S.A. and Agreco of Brazil. In addition, Mr. Monforte was also the vice president of ANBID and of the board of the Settlement Department of the Commodity Exchange. He was also the coordinator of the Capital Opening Committee of the BOVESPA and a member of the Listings Commission. In addition, he was a member of the Advisory Panel for the OECD on the Efficiency of the Board of Directors, and a member of the Advisory Board-Americas Cabinet of the Graduate School of Business in Chicago. He also served as an executive in diverse banks and companies, such as Banespa, Banco Merrill Lynch, Banco Citibank N.A., and was president of VBC Energia S/A. Mr. Monforte holds a degree in economics from the Universidade Católica de Santos.

Marcelo S. Barbosa is the founding partner of the law firm Vieira, Rezende, Barbosa e Guerreiro Advogados. Mr. Barbosa holds a bachelor's degree in law from the Faculdade de Direito of UERJ, and a master of law degree from Columbia University. Mr. Barbosa was a professor of law at the Faculdade de Direito of UERJ from 2001 to 2003. He was also a member of the board of directors of the Registrant from 2001 to 2002 and of Tele Norte from 2001 to 2002. Mr. Barbosa was also the director of the Estudar Foundation from 2004 to 2008.

Antonio Gonçalves de Oliveira is currently a member of the board of directors and audit committee of Vivo, since July 2005, and a member of the board of directors of TCP, since March 2001. Mr. Gonçalves de Oliveira was a member of the boards of directors and audit committees of TSD, TLE, TCO and Celular CRT, since July 2005 until February 2006. He is a member of the board of auditors of COELBA - Companhia de Eletricidade da Bahia, since April, 2006 at the appointment of *Caixa de Previdência dos Funcionários do Banco do Brasil*, a large Brazilian pension fund and shareholder of COELBA, president of AAMAC - Associação de Amigos do Museu de Arte Contemporânea da USP, an important participant in the contemporary cultural scene from 2004 to 2006 and member of the council of representatives of the Federation of Industries of the State of Sao Paulo - FIESP from 2003 to 2007. Mr. Gonçalves de Oliveira is also a member of the Social and Economic Development Council of the Brazilian Government, a board member of the Small and Medium Company Working Group sponsored by the Brazilian Government, the vice president of the Brazilian Businessmen's Association for Market Integration (ADEBIM), a member of the orientation and steering council of Banco do Povo do Estado de São Paulo and president of the decision council of the National Employee Association of Banco do Brasil - ANABB. From 1991 to 1995, he served as director of the Latin American Sociology Association and from 1993 to 1994 he served as the executive coordinator of the Small and Medium Company National Movement - MONAMPE. He holds a degree in social sciences and a master's degree in communication sciences from the University of São Paulo.

Executive Officers

The Executive Committee of the Registrant currently consists of the following two executive officers:

Name	Position	Age	Date Elected
Roberto Oliveira de Lima	Chief Executive Officer accumulating functions of Chief Financial Officer and Responsible for Investor Relations	57	April 3, 2008
Marcus Roger Meireles Martins da Costa	Chief Human Resources Officer	50	March 20, 2006

Set forth below are brief biographical descriptions of the executive officers of the Registrant:

Roberto Oliveira de Lima is chief executive officer and executive vice president of Marketing and Innovation since February 11, 2008 of Vivo, Vivo S.A. and TCO-IP S.A. and formerly of TCO, Telerj, Telest, Telebahia, Telergipe, Celular CRT, TC, GT, Telegoiás, Telemat, Telems, Teleacre, Teleron and NBT. Mr. Oliveira de Lima has also been a director of Avista Participações Ltda., Tagilo Participações Ltda., Sudestecel Participações Ltda., TBS Celular Participações Ltda., Ptelecom Brasil S.A., Portelcom Participações S.A. and all affiliates of Brasilcel, since 2005. He was the chief executive officer of TSD, TLE and Celular CRT until February 2006. Mr. Oliveira de Lima was chairman of the board of directors of Grupo Credicard from 1999 to 2005 and chief executive officer of Banco Credicard S.A. from 2002 to 2005. Before 1999, Mr. Oliveira de Lima held executive positions at Accor Brasil S.A.,

Rhodia Rhone Poulec S.A. and Saint Gobain S.A. Mr. Oliveira holds a degree in administration and an MBA from Fundação Getúlio Vargas and a master's degree in finance and strategic planning from the Institute Supérieur des Affaires, Jouy en Josas, France.

Marcus Roger Meireles Martins da Costa holds an economics degree from the State University of Minas Gerais and an Executive MBA from COPPEAD/UFRJ. Mr. Martins da Costa worked for Companhia Vale do Rio Doce as a director of its corporate human resources department. He also worked in the implementation and operation of gold and potassium projects as well as in the implementation of Carajás project from 1980 to 2005. Mr. Martins da Costa is presently the human resources director of Telemig Celular Participações S.A. and Tele Norte Celular.

The Executive Committee of Telemig Celular currently consists of the following executive officers.

Name	Position	Age	Date Elected
Roberto Oliveira de Lima	Chief Executive Officer, accumulating the functions of Chief Financial Officer and Responsible for Investor Relations	57	April 3, 2008
Paulo César Pereira Teixeira	Chief Operation Officer	51	April 3, 2008
Marcus Roger Meireles Martins da Costa	Chief Corporate Services Officer	51	April 3, 2008

B. Compensation

For the year ended December 31, 2007, the aggregate amount of compensation paid by us to all directors and executive officers was approximately R\$3.9 million. This amount includes salaries of approximately R\$1.8 million and bonuses to executive officers of approximately R\$2.1 million. We also paid R\$1.0 million on behalf of Tele Norte relating to the compensation of the executive officers who shared our management and the management of Tele Norte and its affiliate Amazônia Celular. We are not required under Brazilian law to disclose on an individual basis the compensation of our directors and executive officers.

We have a yearly bonus program that provides variable compensation to our executive officers upon the achievement of previously stipulated financial and operating performance results. On October 5, 2000, our board of directors approved two executive stock incentive plans, which applied to our executive officers and were further extinguished on October 4, 2007. On December 29, 2003, our board of directors modified one of the stock incentive plans for key executive officers. See Item 6E. Share Ownership for a description of these plans. We do not have a compensation committee.

C. Board Practices

Our board of directors is responsible for, among other things:

- establishing our general business policies;
- electing and removing the members of our board of executive officers;
- supervising our management and examining our corporate records;
- calling shareholders meetings;
- expressing an opinion on the annual report and management's financial statements;
- appointing external auditors;
- determining the payment of interest on shareholders' equity;
- approving capital increases limited to the amount of the authorized capital stock; and
- authorizing the purchase of our own shares, to the extent permitted by law.

Our board of directors may be composed of a minimum of three and a maximum of 11 directors elected by our shareholders at the shareholders' meeting. Our board of directors has one chairman and one vice-chairman.

Our executive officers are responsible for our day to day management and the representation of the Registrant. The Registrant has three executive officer positions: the *Diretor Presidente* (Chief Executive Officer or CEO), the *Diretor Financeiro* (Chief Financial Officer or CFO) and the *Diretor de Recursos Humanos* (Chief Human Resources Officer). Our service contracts with executive officers provide benefits upon termination of employment.

Pursuant to our bylaws and to the Brazilian laws, a director cannot vote on a proposal, arrangement or contract in which the director's interests conflict with our interests; our shareholders must approve the total compensation of our management and the board of directors is responsible for allocating individual amounts of management compensation.

There is no mandatory retirement age for our directors. Brazilian Corporate Law requires that a director must be a shareholder of the company, but there is no minimum amount of shares required.

Fiscal Council

Our *conselho fiscal*, or fiscal council (board of auditors), was established pursuant to our bylaws, which require us to maintain a fiscal council on a permanent basis. Our fiscal council is a supervisory committee independent from our board of directors and from our independent accountants, and its members are elected by our shareholders on a yearly basis. The responsibilities of the fiscal council are established by Brazilian Corporate Law and include overseeing the activities of management with respect to compliance with the law and our bylaws, reviewing the annual report submitted for the approval of our shareholders, calling shareholders' meetings under certain circumstances and reporting at those meetings. The following table contains the members of our fiscal council elected on April 24, 2008, each of whom is serving as a member for a one-year term, and their respective ages:

Name	Position	Age
Paula Bragança França Mansur	Member	40
Fabiana Faé Vicente Rodrigues	Member	36
Alexsandro de Souza Popovic	Member	31

Set forth below are brief biographical descriptions of the members of our fiscal council:

Paula Bragança França Mansur holds a degree in economic science from UFMG, Ms. Mansur is a former lawyer of TIM Telecom s and was a member of several fiscal councils.

Fabiana Faé Vicente Rodrigues holds a degree in law from PUC-SP, she also holds a master of laws degree (LL.M.) in corporate law from IBMEC São Paulo. Ms. Rodrigues was a member of several fiscal councils.

Alexsandro de Souza Popovic holds a law degree and a graduate degree in tax law. He has worked for over three years in the analysis of corporate governance practices of companies listed on the São Paulo Stock Exchange (BOVESPA). This work includes monitoring corporate events, verifying their legality and that they are in keeping with the current requirements of the international capital market, and that they meet the requirements of the differentiated levels of corporate governance within the BOVESPA, representing various equity investment funds in Brazil. He is a substitute member of the finance committee of Santos Brasil S.A. and member of the finance committee of the Registrant.

Audit and Control Committee

At a meeting held on May 26, 2008, our board of directors appointed an audit and control committee, in compliance with SEC's rules, which is composed of three independent members of our board of directors. The audit and control committee is responsible for, among other actions, making recommendations to the board of directors on the appointment and retention of independent auditors, processing complaints regarding accounting and auditing, and engaging advisors. The current members of our audit and control committee are Luiz Kaufmann, José Guimarães Monforte and Antonio Gonçalves de Oliveira. See Item 16D. Exemptions from the Listing Standards for Audit Committees.

Disclosure Committee

Disclosures are reviewed by the disclosure committee in support of the CEO and CFO. The disclosure committee is responsible for implementing the Policy for Disclosure of Relevant Acts or Facts set up by our board of directors in compliance with Article 16 of CVM Instruction No. 358, dated July 17, 2002, for ensuring transparency, and for the

implementation of our disclosure controls and procedures.

D. Employees

At December 31, 2007, we had 2,893 employees, as compared to 2,388 employees at December 31, 2006 and 2,378 employees at December 31, 2005. At December 31, 2007, 54.5% of our employees were employed in customer service, 20.5% in sales and marketing, 8.4% in engineering, 11.8% in management and 4.8% in information technology. The increase in the number of our employees during 2007 was primarily due to the expansion of employees in our information technology department and in our customer service department. The increase in the number of employees in our customer service department is due to the incorporation of Amazônia

Celular's customer service. In addition, at December 31, 2007, we had 2,170 outsourced employees, 713 of which were temporary employees.

Our employees are represented by Sinttel-MG (*Sindicato de Trabalhadores de Telecomunicações de Minas Gerais*), the labor union for telecommunications companies in the State of Minas Gerais. We negotiate a new collective labor agreement every year with each local chapter of Sinttel-MG. We have not experienced any labor strikes since the privatization.

We have implemented a yearly bonus program, designed to stimulate an increase in our operating productivity, which provides variable compensation to employees according to previously specified financial and operating performance goals. The total amount paid in 2007 in connection with this bonus program was R\$14.3 million and the total amount paid in 2006 was R\$17.6 million. Competition has created, and we believe that it will continue to create, pressure on salaries and our ability to hire and retain qualified upper- and mid-level management personnel.

We participate in a pension fund, the *Fundação Sistel de Seguridade Social*, or Sistel, which supplements government-provided retirement benefits. Currently, we make monthly contributions to Sistel equal to 13.5% of the salary of each employee who is a Sistel member. Each member employee also makes a monthly contribution to Sistel based on his or her age and salary. Members of Sistel qualify for full pension benefits after reaching age 57, provided that they have been members of Sistel for at least ten uninterrupted years and have been affiliated with the social security system for at least 35 years. Sistel operates independently from us. At the time of the privatization, our employees had the right to maintain their rights and benefits in Sistel. In May 2004, we introduced a defined contribution plan, except for medical benefits for which there is a defined benefit up to 24 months, for all of our employees. Sistel participants were invited to switch their defined benefits plan to the new defined contribution plan. In this plan, the participants define the percentage of their contribution. We make monthly contributions to Sistel of up to 8% of the employee's salary and each member employee also makes a monthly contribution to Sistel. Members of Sistel qualify for full pension benefits after reaching age 50, provided that they have been members of Sistel for at least ten consecutive years. They do not have to be affiliated with the social security system. See Note 19 to our consolidated financial statements.

E. Share Ownership

The members of our board of directors and our executive officers, on an individual basis and as a group, beneficially own less than 1% of any class of our stock. See Item 7A. Major Shareholders for more information.

On October 5, 2000, our board of directors approved two executive stock incentive plans, which were further extinguished on October 4, 2007. The first plan covered certain key executives who may receive shares of our common or preferred stock. The options vested only to the extent that we achieved performance goals determined by our board of directors during a five-year performance period. At December 31, 2007, no options were outstanding in connection with this incentive plan as all options had been forfeited.

The second plan covered key executives, who also participated in the first plan, and other employees. Options granted under this plan related to preferred stock and were exercisable at market price at the date of the grant. The vesting period was 20% during the second year, 60% during the third year and 100% during the fourth year. At December 31, 2006, 29,684 options were outstanding. At December 31, 2007, no options were outstanding in connection with this incentive plan as all options had been forfeited. The initial exercise price for the granted options is R\$4.76 per thousand preferred shares. The price is updated by the IGP-M inflation index until the date of exercise.

The second stock incentive plan for key employees was modified by our board of directors on December 29, 2003. At December 31, 2007, the plan covered one executive. Options granted under this plan relate to preferred stock and

were exercisable at market price at the date of the grant, discounted by 20%. The vesting period is 40% during 2004, 30% during 2005 and 30% during 2006. At December 31, 2007, 17,507 options were outstanding under this plan. No options were exercised during the period. The exercise price of the granted options is R\$3.84 per thousand preferred shares. The price is updated by the IGP-M inflation index until the date of exercise. The options expired in January, 2008 without being exercised by the executives.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**A. Major Shareholders**

On August 2, 2007, Telpart, our direct controlling shareholder at that time, entered into a stock purchase agreement with Vivo regarding the sale of the total shares held by Telpart in the capital stock of the Registrant, equivalent to 22.72% of its total capital, 53.90% of its voting capital and 4.27% of its non-voting capital. The Registrant in turn, is the holder of approximately 89.17% of the voting capital of Telemig Celular. The agreement was approved by Anatel on October 23, 2007 through a regulatory procedure known as previous consent (*Anuência Prévia*), and the transfer of our control to Vivo became effective on April 3, 2008.

In accordance with our bylaws, our capital stock is divided into common shares (*ações ordinárias*) and preferred shares (*ações preferenciais*). Upon approval by the board of directors, our capital stock may be increased up to the limit of the authorized capital set forth in the bylaws, provided that the number of preferred shares may not exceed 2/3 of the total capital stock. Each common share entitles its holder to full voting rights at meetings of our shareholders. Our preferred shares have voting rights under limited circumstances. See Item 10B. Memorandum and Articles of Association Preferred Shares and Common Shares for more information regarding our capital stock and our two classes of shares.

The following table presents information concerning our major shareholders at June 13, 2008. We are not aware of any other shareholder owning more than 5% of our common shares or more than 5% of our preferred shares.

Name of Owner	Common	%	Preferred	%	Total Shares	% Total Capital
	Shares	Common Shares	Shares	Preferred Shares

(1) Subsidiary of Brasilcel.

(2) Less than 1% of aggregate.

On December 28, 1999, our shareholders approved a corporate reorganization whereby Telpart contributed assets to us, resulting in future tax benefits. We recorded a deferred tax asset of R\$212.0 million, which will be realized over a period of up to ten years. In accordance with Brazilian Corporate Law, we must issue shares (pro rata both common and preferred) to Telpart for the amount of the tax benefits recognized by us. With our change of control, the shares will be issued to Vivo. See Item 4A. History and Development of the Company Recent

Developments. In addition, minority shareholders are granted preemptive rights. If the minority shareholders do not elect to exercise these rights, the shares will be issued to and subscribed for by Vivo.

B. Related Party Transactions

We have entered into transactions with some of our shareholders and other related parties for the rendering of certain services. Transactions with related parties are carried out based on an amount agreed upon by the respective related parties and we believe those transactions are carried out on an arm's length basis. Our bylaws and applicable Anatel regulations require that any long-term agreement we enter into with related parties must be previously approved by the majority of our voting and non-voting shareholders, with the exclusion of the conflicted party.

Until March 31, 2008, we considered Brasil Telecom S.A. as a related party due to the existence of common partners in our previous control chain.

In a general shareholders' meeting held on April 3, 2008, our control was transferred to Vivo. In view of this transfer, the companies of the Vivo group became related parties.

Shared Service Agreement

In order to increase efficiency in the allocation of resources, capitalize on synergies, avoid unnecessary duplication of activities and improve operating efficiencies, we were a party to a shared service agreement with our former affiliate Tele Norte pursuant to which certain costs incurred for the benefit of both companies and their subsidiaries were allocated to each company based on criteria designed to reflect the actual amount of use by each company. The costs allocated under this shared service agreement related primarily to personnel, marketing and outside consulting fees. See Note 18 to our consolidated financial statements.

As a result of the acquisition of our control by Vivo, we, Vivo, Telemar, Tele Norte and Amazônia Celular entered into a MoU, on April 7, 2008 to determine a procedure to segregate our activities from those of Amazônia Celular. The MoU requires Amazônia Celular and Telemig Celular to: (i) enter into a services agreement, pursuant to which Telemig Celular will render certain services to Amazônia Celular, including accounting, information technology, network maintenance, systems control, engineering, development of marketing programs, products and services, among others; (ii) define certain key performance indicators and service level agreements; (iii) determine a timeframe for segregation of these processes; (iv) determine which assets to segregate; (v) keep confidential any information obtained from the other party during this transitional period; and (vi) independently contract auditors to assist in the segregation process and for transparency purposes. This MoU is valid for nine months and is renewable for an additional three-month term.

Interconnection

Incumbent fixed-line providers are obliged to provide interconnection services to wireless operators with the incumbent's own installations. We have entered into interconnection agreements with a number of other telecommunications operators in Brazil, including Brasil Telecom, and the long-distance and local carriers operating in our area. The terms of these interconnection agreements include provisions for the number of connection points, the method by which signals must be received and transmitted and the costs and fees of interconnection. Network usage fees are also assessed based on the terms of these agreements. We have also entered into an agreement with Brasil Telecom under which our subscribers pay a lower rate to use long-distance services offered by Brasil Telecom.

We have agreements with certain other telecommunications operators in Brazil, including Amazônia Celular, regarding short message interworking. These interconnections allow customers of Telemig Celular and of all parties to

the agreements to exchange SMS between their mobile stations in Brazil and other countries.

A MMS network was established and successfully integrated in July 2005 between certain other telecommunications operators in Brazil, including Amazônia Celular. These interconnections allow the customers of Telemig Celular and of such operators to exchange MMS between their mobile stations and across Brazil.

Roaming Agreements

Roaming services must be made available to other wireless operators upon the request of that operator. We have entered into agreements for automatic roaming with all other A and B Band service providers in Brazil outside our area for the use of the TDMA network, and we have also signed agreements with all other GSM cellular operators in Brazil, including Brasil Telecom and Amazônia Celular, to provide GSM roaming for our postpaid and prepaid customers. We also offer to our customers GPRS roaming with other cellular service providers, including Amazônia Celular, under which our clients have access to the networks of such other cellular service providers while traveling or roaming outside our area and we are required to provide roaming services to customers of those wireless operators from outside our area when they are within our area. The agreements require the parties to provide service to roaming subscribers on the same basis as they provide service to their own customers and to carry out a monthly reconciliation of roaming subscriber usage charges. The agreements regarding GSM network have a one-year term, which is automatically renewable for further one-year terms. The agreements regarding the TDMA network have an indefinite term.

C. Interests of Experts and Counsel

Not applicable.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Financial Statements and Other Financial Information

The information included in Item 18 of this annual report is referred to and incorporated by reference into this Item 8A.

Legal Proceedings

Civil Legal Proceedings

At December 31, 2007 we had provisions of R\$6.9 million for contingent liabilities which we consider sufficient to meet reasonably estimated probable losses arising from civil lawsuits. The most significant civil suits involving us are described below.

Consórcio VOA

Consórcio Voa was created for the purpose of acquiring and operating aircraft for the exclusive use of the parties to the consortium, which include Telemig Participações S.A. and Telemig Celular, under the leadership of Opportunity Equity Partners Administradora de Recursos Ltda. Brasil Telecom has filed a legal proceeding against all members of Consórcio VOA, seeking to remove the leader of the consortium, as well as to receive indemnity for losses, claiming that Opportunity Equity Partners Administradora de Recursos Ltda. abused its power as leader of the consortium, resulting in losses to Brasil Telecom, as member of the consortium and at the time also a member of the Opportunity Group. Even though the injunction was not granted, the members of the consortium removed the leader at a shareholders meeting held at the end of 2005. Telemig Celular filed its response in October 2006, alleging it is not a legitimate party to the lawsuit because Brasil Telecom did not attribute any irregularity to Telemig Celular as member

of the consortium. The main argument in this lawsuit in our favor is that the leadership of the consortium could only be altered by an unanimous decision by all members of the consortium, and not by a judicial decision or at a meeting where not all members were present, which was the case at the shareholder s meeting held at the end of 2005. On December 19, 2007 the trial judge dismissed the proceeding in relation to the Registrant, Telemig Celular, Tele Norte and Amazônia Celular as the court concluded that these companies lacked legitimacy to be considered defendants.

Monthly Subscription Fees

Telemig Celular was questioned by the Public State Ministry about the monthly subscription fees charged by Telemig Celular to its clients. In February 2004, the public prosecutors of the State of Minas Gerais filed civil lawsuits against wireless telecommunications operators of the State of Minas Gerais seeking the elimination of monthly subscription fees charged to postpaid service plans on the grounds that consumers should only have to pay for cellular services actually used. There are three such lawsuits against us. In one suit, an injunction was granted and the Justice Court of Minas Gerais dismissed the suit without examining its merits. The State appealed in such lawsuit, but the decision was favorable to Telemig Celular and the claim was terminated in January 2008. In another suit, we have won at the trial stage, but the state has appealed. The last proceeding is still in its preliminary stages. As we and our legal advisors believe the chance of success in this lawsuit is probable, no provisions have been recorded.

Prepaid Credits

We and other wireless operators in Brazil are party to lawsuits challenging the validity of expiration dates for prepaid telephone credits. We are party to three such lawsuits. One of the proceedings is still in its preliminary stages, and the court has requested that the defendants submit information supporting their basis for setting an expiration term. In May 2007, the trial court decided in our favor in the second proceeding. In the beginning of October 2006, we won our appeal in the third proceeding, after the court had decided against us at the trial stage. We and our legal advisors believe the chance of success in these lawsuits is probable. As there is no monetary value involved in these lawsuits, no provisions have been recorded.

Detailed Accounts, and Length of Contract with Operator

In 2005, the Public State Ministry of Minas Gerais filed two suits against wireless operators, including Telemig Celular, requiring them to send detailed bills to mobile phone users.

The appellate court decided against the wireless operators in both proceedings. Telemig Celular appealed both decisions and remains awaiting decision on the matters.

In 2005, the Public State Ministry of Minas Gerais filed a suit against wireless operators, including Telemig Celular, contesting the legality of the loyalty period clause in postpaid contracts. The request for preliminary injunction by the Public Ministry was dismissed, allowing Telemig to maintain its loyalty period. Telemig appealed to the Superior Court and the appeal is waiting to be admitted for trial by the Superior Court. According to the court's decision, Telemig Celular was notified to prove that it was sending detailed bills to mobile phone users in Araxá and region. However, Telemig Celular failed to observe the court's determination and as a result a penalty in the amount of R\$1 thousand has been applied. The court's decision, however, did not specify if the penalty would be applicable on a daily or monthly basis or at a single time only. The court has not collected the penalty so far and we have not paid any amounts in this respect.

Administrative Penalty in Virtue of Un-Blocking Fee

In February 2004, the Public State Ministry applied an administrative penalty in the amount of R\$1.2 million, alleging that the un-blocking fee that Telemig Celular charges its customers is abusive.

In May 2005, a preliminary injunction requested by Telemig Celular was deferred, suspending the imposition of the penalty. However, in April 2006 the trial judge decided against Telemig Celular, confirming the need to pay the penalty. Because Telemig Celular is appealing, the payment of the penalty has been suspended until a final decision is reached. The State's appellate court decided against Telemig Celular and Telemig Celular has now appealed to the

Superior Court. The appeal to the Superior Court awaits decision regarding its admissibility for trial. As we and our legal advisors believe the chance of success in this lawsuit is possible, no provisions have been recorded.

Litigation Related to Caller ID and the Trademark BINA

Lune Projetos Especiais Telecomunicação Comércio Ind. Ltda., or Lune, has brought a lawsuit against Telemig and other Brazilian mobile telecommunication operators in which Lune claims to be the owner of patents relating to *Equipamento Controlador de Chamadas Entrantes e do Terminal Telefônico*, or Caller ID, and of the trademark BINA (B Identifies the Number of A), and alleges that the mobile telecommunication operators are copying the patent and using the trademark without proper authorization. Lune has requested that the operators be ordered to cease providing Caller ID services and using the trademark BINA and that Lune be indemnified for the unauthorized use of the Caller ID system in an amount equal to the fees paid to the operators by customers for use of the Caller ID system.

In addition to operators, the suit also involves network component manufacturers that supply the Caller ID to the operators. The amount of the indemnification alleged to be owed by the mobile telecommunication operators has not yet been calculated and we believe we have the right to indemnity from the component manufacturers. Nortel has indemnified us against any obligation arising out of allegations of unauthorized use of patents. Accordingly, we have not recorded any provisions with respect to this lawsuit.

The proceeding is still in its preliminary stage. Telemig Celular has presented its defense and the court has determined that the issue be analyzed separately by the courts located in the states where each defendant is based. As we and our legal advisors believe the chance of success in this lawsuit is possible, no provisions have been recorded.

Civil Class Action against SMP operators for the installation of cellular blocks in prisons

In June 2006, the Federal Attorney's Public Office initiated a civil class action against SMP operators, including Telemig Celular, for the installation of cellular blocks in Brazilian prisons. Telemig Celular presented a defense and remains awaiting decision on the matter. We and our legal advisors believe the chance of success in this lawsuit is probable. As there is no monetary value involved in this lawsuit, no provisions have been recorded.

Civil Class Action against telephone operators for alternative methods of cancellation of services

In May 2007, the Federal Attorney's Public Office initiated a civil class action against Telemig Celular and other cellular phone operators of the State, requiring that alternative means for cancellation of telephony subscription contracts be made available to clients, such as by Internet and through personal service in stores. Telemig Celular made a motion contesting the amount attributed to the suit, which if granted, will reduce the amount to R\$200,000. All telephone operators have appealed from the decision. Telemig Celular is currently awaiting decision on the matter. As we and our legal advisors believe the chance of success in this lawsuit is possible, no provisions have been recorded.

Celulares BH Telecomunicações Ltda.

Celulares BH Telecomunicações Ltda. filed a lawsuit against Telemig Celular seeking to collect payment of penalty resulting from early termination of contract and the penalty that was judicially arbitrated. Telemig Celular appealed and is currently awaiting a decision on the matter. The amount involved is R\$1.4 million. We and our legal advisors believe the chance of success in this lawsuit is possible.

Regulatory Legal Proceedings*Litigation with Anatel Regarding Quality Standards*

In February 2007, Telemig Celular filed a writ of mandamus to suspend Anatel's requirement that Telemig Celular pay fines amounting to R\$1.2 million due to non-compliance with the quality standards established in the General

Quality Targets Plan. As the injunction was not granted, Telemig Celular filed an appeal, which was refused. We are awaiting decision on another appeal filed by Telemig Celular. As we and our legal advisors believe the chance of success of this lawsuit is possible, a provision was recorded in the amount of R\$600 thousand. We recorded provisions for loss in the amount considered sufficient to cover probable losses.

The purpose of this injunction is to suspend the administrative proceeding (Procedure to Investigate Breaches of Obligations, or PADO) filed by Anatel, mentioned below in *Administrative Proceedings before Anatel Quality Standards*, in which the initial decision was rendered against Telemig Celular.

Administrative Proceedings with Anatel Regarding Quality Standards

Anatel filed a Procedure to Investigate Breaches of Obligations against Telemig Celular, alleging that it had not complied with the quality standards established in the General Quality Targets Plan for the years of 2004 and 2005. In this same proceeding, filed in October 2006, involving the amount of R\$1.2 million, Telemig Celular filed an administrative defense and is awaiting decision on the matter. A provision was recorded in the amount of R\$600 thousand, which amount we considered sufficient to cover probable losses.

In February 2008, Anatel sent Telemig Celular another PADO alleging that it had not complied with the quality targets for the years 2005 and 2006 and imposing a fine in the amount of R\$128,000. Telemig Celular submitted an appeal to Anatel requesting the calculation chart for said fine. The appeal is under analysis by Anatel. As we and our legal advisors believe the chance of success in this lawsuit is possible, no provision has been recorded.

Again in March 2008, Anatel sent Telemig Celular another PADO alleging that it had not complied with the quality targets for the years 2006 and 2007, imposing a fine in the amount of R\$740,000. Telemig Celular intends to submit an administrative defense against the imposition of the fine. As we and our legal advisors believe the chance of success in this lawsuit is possible, no provision has been recorded.

GVT Lawsuit against Anatel and other SMP Operators Regarding VU-M Resolution

GVT (Global Village Telecom) filed a lawsuit against Anatel and SMP operators, including Telemig Celular, through which GVT intends to reduce the VU-M interconnection fee. The trial court judge initially determined that GVT must pay the operators the amount requested (R\$0.28) and judicially deposit the difference charged. Telemig Celular filed an appeal against such decision before the Federal Regional Court, but the court decided against Telemig Celular. The amount involved in the lawsuit is not material, however, this suit may become an important precedent encouraging similar discussions by other fixed line telephone operators, which may result in a larger financial impact to cellular telephone operators such as Telemig Celular. In March, 2008 Anatel requested to the trial court judge the extinguishment of the arbitration process between the SMP operators and GVT, maintaining the adjustment amount questioned by GVT in the judicial claim. Telemig Celular is currently awaiting decision of the trial court judge on the matter.

GVT's Claim Regarding VU-M

In July 2007, GVT filed a claim before the Secretariat of Economic Law, or SDE, against SMP operators, including Telemig Celular, where it alleges the existence of unfair competition practices, regarding the application of the VU-M by SMP operators. The claim is still under the analysis of the SDE, which has not yet commenced its investigatory and administrative procedures.

GVT's Administrative Proceeding Regarding VU-M

In July 2007, GVT filed a claim before Anatel against SMP operators including Telemig Celular through which it sustains the need to reduce the interconnection fee (VU-M) amounts paid to SMP operators. In March 2008, Anatel extinguished the arbitration process between the cellular telephone operators and GVT, maintaining the adjustment rate (4.5%) that was questioned by GVT in the judicial claim.

Telecommunications Regulations Proceeding

The Brazilian telecommunications regulations prohibit a shareholder from having a controlling interest in more than one wireless telecommunications carrier operating in the same area in Brazil. On June 15, 2005, Telemig Celular initiated court proceedings seeking a court order to prevent PREVI and Banco do Brasil from exercising their voting rights in Telemig Celular, until the legality of their shareholding interest is resolved. The main argument in this lawsuit is that Caixa de Previdência dos Funcionários do Banco do Brasil - PREVI (which is the Banco do

Brasil S.A. pension fund) and Banco do Brasil are a part of our controlling shareholder block and also are a part of the controlling shareholder block of Telemar, which competes with us in our area under the Oi brand name. As we believed the claim had no legal grounds and therefore, would probably be rejected by the Brazilian court, we relinquished our claim on October 18, 2006. On June 27, 2007, the court confirmed our request and dismissed the claim. Opportunity, however, did not agree with our request and filed an appeal against this decision, which is awaiting decision by the Superior Court of Justice.

Tax Legal Proceedings

As of December 31, 2007, we had provisions in the total amount of R\$969.0 million for contingent liabilities relating to tax matters, the most significant of which are described below.

Litigation Related to the Imposition of ICMS on Certain Telecommunications Services, such as Cellular Activations, Monthly Subscriptions and Additional Accessory Services

The ICMS is a tax that the Brazilian states impose at varying rates on revenues from the sale of goods and services, including telecommunications services. We are involved in judicial and administrative proceedings with regard to the extension by state governments of ICMS taxable events to services that are complementary to telecommunications services. According to Agreement No. 69/98 approved by the Brazilian state governments, after June 1998, the ICMS would be imposed on monthly subscriptions, additional services and cellular activations. Before the Agreement's approval, most companies did not subject these services to ICMS because they were not considered to be typical telecommunications services.

We believe the government's attempt to impose the ICMS upon certain of our services is unlawful and unconstitutional. However, we can give no assurance that the Brazilian superior courts will arrive at this same conclusion. We have decided to record the ICMS amounts that would be payable, on a monthly basis. The provisions include not only the tax allegedly due, but also interest that could eventually accrue in the event we fail to succeed in court.

Cellular Activations. The application of ICMS on cellular activations would not materially adversely affect our results of operations for 2002, 2003, 2004 and 2005 because we eliminated the activation fee for all but one of our plans. For the remaining plan, cellular activation has been significantly reduced. We do not believe that the application of the ICMS to cellular activation applied on a prospective basis will have a material adverse effect on our results of operations.

Monthly Subscriptions. In December 1998, we filed a petition with the Treasury Court of the State of Minas Gerais and suspended the remittance of the ICMS on monthly subscriptions and additional services and deposited such amounts in a court-administered trust account. As it is a legal obligation, we have recorded a provision in the amount of the ICMS that would be payable, on a monthly basis and we were depositing in court the amount involved. Accordingly, we have recorded an aggregate provision of R\$691.7 million for 1998 through 2007 in our consolidated financial statements and had deposited in court an aggregate amount of R\$691.7 million as of December 31, 2007. We cannot assure that we will prevail in this matter.

The decisions at trial stage and at the Justice Court of Minas Gerais have been partially adjudicated in our favor. The State of Minas Gerais and Telemig Celular appealed to the Superior Court of Justice. In January 2008, two out of five judges had already decided in our favor and the third judge had requested to review the lawsuit in order to make his decision. Despite the favorable decisions obtained so far, precedents show that in identical claims, unfavorable decisions were given by the other two judges.

Therefore, after detailed analysis of the progress of the judicial lawsuit by our internal and external legal advisors, and various negotiation phases with the State of Minas Gerais, we executed, on January 8, 2008 a Term of Adhesion to an agreement that authorizes the State to grant partial dismissal to the ICMS and its legal charges in view of the provision of telecommunication services. As a result, the State of Minas Gerais reimbursed us of the amount corresponding to the difference between the amounts judicially deposited and the amounts due in connection with the execution the agreement.

With the execution of the Term of Adhesion, the State of Minas Gerais reimbursed us the amount of R\$252 million in cash. In addition, we recognized the levy of the ICMS and resumed its payment in amounts charged as Subscription fees and Value-Added Services as of February 2008.

As a result of this settlement, on January 18, 2008, we filed a request relinquishing the lawsuit which was already confirmed by the Superior Court of Justice.

We paid R\$12 million related to attorney's fees for this lawsuit in the first quarter of 2008.

Litigation Related to Social Security

The National Social Security Institute, or INSS, has issued a tax assessment against us for approximately R\$17.1 million. This proceeding is based on a supposed failure by us to comply with our obligation to withhold and collect 11% of every payment made to service providers, as required under Law No. 9,711/98. We believe a significant portion of the assessment is legally unfounded. As of December 31, 2007, a provision in the amount of approximately R\$3.5 million was recorded.

Litigation Relating to the Conveyance of PIS and COFINS to Users

We and other telecommunications companies are defendants in a civil class action filed by the Public Prosecutor's Office (*Ministério Público Federal*) aiming at (i) preventing the passing on to customers of the amounts paid as Contribution to the Social Integration Program, or PIS, and Contribution for Social Security Financing, or COFINS, and (ii) requiring that we return to our customers two times the amount of PIS- and COFINS-related charges passed along to them. These social contributions are levied on gross telecommunications services revenues from final customers located within the jurisdiction of Uberlândia in Minas Gerais.

On August 17, 2001, a preliminary injunction was issued ordering us to no longer charge the PIS and the COFINS to our customers, but the injunction was later revoked on October 7, 2002. We believe the chance of an unfavorable outcome in this proceeding is remote. In any event, regardless of the outcome of this proceeding, we believe we will not be adversely affected because we did not segregate such taxes in our invoices.

This lawsuit is currently in the technical expertise phase. We are still awaiting final judgment on the matter and the public prosecutor has not brought any other administrative or judicial actions related to the matter.

Litigation Related to the Telecommunication Inspection Fund (FISTEL)

We are subject to the payment of the Telecommunication Inspection Fund contribution - FISTEL. The Telecommunication Inspection Fund is supported by revenues resulting from a tax imposed on telecommunication operators. We have adopted the position that the FISTEL is not due in respect of telecommunications stations that are not owned by us. As a result, we are involved in legal proceedings to obtain a judicial authorization for us to pay the FISTEL solely in respect of telecommunication stations owned by us. The amount involved in these proceedings is R\$246.3 million. As it is a legal obligation, we have recorded a provision in the amount of the FISTEL that would be payable, on a monthly basis and we are depositing in court the amount involved. As the trial court decided against us, we filed an appeal and remain awaiting a decision on the matter. We and our legal advisors believe the chance of success in this lawsuit is possible.

Litigation Related to the Fund for Universal Access to Telecommunication Services (FUST)

Based on Article 6 of Law No. 9,998/2000, which instituted FUST, the Company does not include in the calculation base of the contribution, the revenues obtained from telecommunications services providers as interconnection fee and for the use of its network resources. On December 15, 2005, Anatel's board approved Precedent #7 which determines the inclusion of such revenues in the calculation base of FUST, with retroactive application to January 2001.

Management, based on the advice of its legal advisors, is of the opinion that Precedent #7 of Anatel contravenes the provisions of Law No. 9,998/2000, in addition to several constitutional provisions. Therefore, in January 2006, the mobile telecommunication operators, including Telemig Celular, filed for a writ of mandamus in

order to protect their legal rights to continue to pay FUST without any increase in the calculation base that is not provided for by law.

The injunction was not granted by the trial judge since the judge understood the matter to be complex. The petitioners appealed and in a decision given in March 2006, the Superior Court Judge granted the injunction request to remove the application of the second part of Precedent #7 of Anatel. In February 2007, the lower court judge ruled that the levy of FUST on interconnection revenues specified in the second part of Precedent #7 of Anatel is unconstitutional. As we and our legal advisors believe the chance of success in this lawsuit is possible, no provision has been recorded.

In October 2006, Telemig Celular received a tax claim from Anatel regarding the payment of FUST on interconnection revenues received in 2001. The collection of FUST on interconnection revenues received in 2001 was suspended by an injunction granted in the litigation related to FUST. Telemig Celular submitted a defense and is awaiting decision on the matter. In October 2007 we received another tax claim regarding the payment of FUST on interconnection revenues received in 2002 and filed an administrative defense. We are currently awaiting decision on the matter. In June 3, 2008, we received another tax claim regarding the payment of FUST on interconnection revenues received in 2003. We are evaluating future course of action related to this new claim.

The amount involved in this administrative proceeding is R\$30.5 million. As we and our legal advisors believe the chance of success of this lawsuit is possible, no provision has been recorded.

Administrative Proceeding related to the collection of the Installation Inspection Tax (TFI)

On June 6, 2008, we received a notification from Anatel regarding the collection of the TFI tax on our radio based stations (*estações rádio-base*), or ERBs, and also on all our handsets and those of our clients. According to Anatel, since we are currently in the process of renewing our SMP license, we would be required to also renew the licenses of our handsets and ERBs. FISTEL legislation, in turn, establishes that the payment of the TFI tax is due when licensing ERBs and handsets. As a result, according to Anatel, when a mobile operator renews its mobile operations license it must also license its handsets and ERBs and pay the TFI tax over these amounts. We intend to issue new licenses for our handsets and ERBs in compliance with Anatel's requirements and paid the TFI tax only in relation to our ERBs, in the approximate amount of R\$1.7 million. On June 20, 2008 we submitted a defense challenging the application of the TFI tax on handsets based on the argument that there will be no new installation of handsets. We are currently awaiting decision on the matter. The amount involved in this administrative proceeding is R\$101.2 million. As we and our legal advisors believe the chance of success of this lawsuit is possible, no provision has been recorded.

Administrative Proceeding before the Ministry of Communications

Telecommunications Technological Development Fund (FUNTTEL)

Based on Law No. 10,052/2000 and Law Decree No. 3,737/2001, which instituted FUNTTEL, Telemig Celular does not include in the calculation base of FUNTTEL, the revenues obtained from telecommunications service providers as interconnection fee and those for the use of its network resources.

The Ministry of Communications used Anatel's interpretation regarding the collection of FUNTTEL on interconnection revenues, however, without any law authorizing such collection.

In December 2006, Telemig Celular received a tax claim from the Ministry of Communications regarding the payment of FUNTTEL on interconnection revenues received in 2001. Telemig Celular has submitted a defense and is awaiting decision on the matter. In November 2007, we received another tax claim regarding the payment of

FUNTTEL on interconnection revenues received in 2002 and submitted our administrative defense. We are currently awaiting decision on the matter.

On October 11, 2007, we filed, together with other cellular telephone operators, an injunction questioning the payment of FUNTTEL on interconnection revenues. On November 12, 2007 the federal judge decided in our favor, allowing us to calculate and pay the contribution to FUNTTEL in the total amount of gross operating revenue resulting from the provision of telecommunications services, not including the transfer amounts related to

interconnection. The federal government appealed against the federal judge's decision, before the Federal Regional Court of the First Region and we are currently awaiting decision on the matter. As a result of the federal judge's decision, the payment of FUNTTEL on interconnection revenues is currently suspended.

The amount involved in these administrative proceedings is R\$17.9 million. As we and our legal advisors believe the chance of success in these proceedings is possible, no provision has been recorded.

Labor Legal Proceedings

We are party to several labor claims filed by former employees related mainly to salary adjustments and related charges. At December 31, 2007, we had provisions of R\$3.8 million for contingent liabilities in connection with labor claims.

Service Providers

We currently use the services of approximately 3,104 outsourced service providers. Under Brazilian labor legislation, the legality of outsourced services is closely related to the nature of the services involved. Where the outsourced contracted services are related to the primary activities of the contracting company, there is, in effect, a strong presumption that the outsourcing is not legal. Thus, if the relationship between the outsourced service provider and the company contains any indicator of the essential elements of employment, such as subordination of the outsourced individual worker within the management hierarchy of the company, the outsourcing of services is likely to be found illegal.

We believe there is a risk that part of the services we outsource could be considered illegal. For this reason, we are exposed to the risk of (i) infraction notices issued by labor and social security authorities, (ii) a civil public action by the Government Labor Attorney's Office and (iii) labor claims filed by outsourced service providers claiming the existence of an employment relationship.

In an investigatory proceeding filed by the Government Labor Attorney's Office, we signed a Term of Commitment undertaking not to retain services providers in primary activities, under penalty of paying a fine in case of non-compliance with this obligation. A hearing was held on April 3, 2008, together with the Labor Public Ministry to request that the fine set forth in the Term of Commitment be reduced from R\$10,000 to R\$1,000 for outsourced service providers whose contracting is considered illegal. At the hearing the labor public prosecutor in charge of the proceedings decided to wait for the takeover of our control by Vivo in order to verify its position as to the legality of outsourcing of services by us. After that, Telemig requested the holding of a new hearing, which was held on June 23, 2008 where an addendum to the Commitment Term, including the changes proposed in the hearing, was discussed. The draft of this addendum will be sent by the Labor Public Ministry to be analyzed by Telemig.

In September 2005, the Government Labor Attorney's Office filed a writ of execution against Telemig Celular for non-compliance with the Term of Commitment. Although the court decided in favor of Telemig Celular, the appellate court reversed the decision reducing the fine from R\$1.5 million to R\$150,000. We entered into a judicial agreement in the amount of R\$150,000. The lawsuit has already been excluded from our monthly provision.

Labor Claim against Former Management

In December 2006, Telemig Celular filed a R\$2.5 million suit for damages against its former management, seeking indemnification for damages caused to the Company as a result of undue payments made by Telemig Celular's former management. The defendants filed a counterclaim, claiming moral damages in the amount of at least R\$4 million. We are currently awaiting a hearing that has been scheduled to take place on July 7, 2008. As we and our legal advisors

believe the chance of success in this lawsuit is possible, no provision has been recorded.

Labor Claim brought by Senior Manager against Telemig Celular Participações S.A.

In December 2006, a former senior manager of the Registrant filed a labor claim against the Registrant, with request for preliminary injunction, questioning the termination of his work contract for just cause and requesting severance payment, plus damages for alleged losses incurred. The total value of the matter is R\$477,000.

As we and our legal advisors believe the chance of success in this lawsuit is possible, no provision has been recorded.

Dividend Policy and Dividends

General

Pursuant to Brazilian Corporate Law, each corporation is required to pay its shareholders a minimum mandatory dividend at least on a yearly basis, except in specific cases provided for in the applicable law. The amount of the minimum mandatory dividend may be determined in the bylaws or, should the bylaws be silent, the relevant amount is determined in accordance with the applicable provisions in the Brazilian Corporate Law. The company may also consider the amount of the interest on shareholders' equity distributed to its shareholders for the calculation of the minimum obligatory dividend to be paid. See Item 10B. Memorandum and Articles of Association Allocation of Net Income and Distribution of Dividends. Moreover, Brazilian Corporate Law provides that each Brazilian company may only issue new preferred shares for public distribution if one of the following terms applies to the preferred shares: (i) priority in the receipt of dividends corresponding to at least 3% of the book value per share; (ii) dividends 10% higher than those paid for common shares; or (iii) tag along rights at 80% of the price paid to the controlling shareholder in case of a transfer of control. Our bylaws provide that preferred shares will be entitled to receive, on a priority basis, minimum, non-cumulative dividends according to the greater of the following criteria: (i) 6% per annum of the amount resulting from the division of the amount of the outstanding capital stock by the number of our outstanding shares; or (ii) the right to a share of the mandatory dividend (see the next following paragraph) based on (a) a priority to receive a minimum, non-cumulative dividend corresponding to 3% of the net asset value of each share; and (b) a right to a share of the profits to be distributed on the same basis as common shares, after common shares have been paid a dividend equal to the minimum preferred dividend mentioned in (a) above.

Under our bylaws, we are required to distribute to our shareholders as dividends in respect to each fiscal year ending on December 31 an amount equal to not less than 25% of our net profit in any particular year, adjusted in accordance with the Brazilian Corporate Law. In addition to the mandatory dividend, our board of directors may recommend to our shareholders the payment of intermediate dividends from retained earnings and profit reserves. Any payment of intermediate dividends or the payment of interest on net worth will be netted against the amount of the mandatory dividend for that fiscal year.

Under the Brazilian Corporate Law, if our board of directors determines prior to the annual shareholders' meeting that payment of the mandatory dividend for the preceding fiscal year would be inadvisable in view of our financial condition, we will not be required to pay the mandatory dividend. This determination must be reviewed by our fiscal council and reported to our shareholders and to the CVM. If a mandatory dividend is not so paid, these earnings must be allocated to a special reserve account and, except in the event they are absorbed by future losses, are paid to the shareholders.

Payment of Dividends

Every Brazilian corporation is required to hold an annual shareholders' meeting, at which an annual dividend may be declared, no later than four months after the end of our fiscal year. Our bylaws allow the payment of intermediate dividends on a semiannual basis or shorter period in the current year based on a balance sheet prepared by our management, or out of preexisting and accumulated profits as set forth in the preceding fiscal year's balance sheet or in the preceding six-month period's balance sheet. According to the Brazilian Corporate Law, dividends inherent to a certain share are payable to the person registered as its holder on the date of approval of the payment, which in any event must occur within the same fiscal year of its declaration. See Note 15(C) to the financial statements. Any shareholder has a three year period from the date the dividend payment was made available to claim dividends in respect of its shares, after which the right expires and the amount related to the dividends returns to the Company.

Payments of cash dividends and distributions, if any, will be made in *reais* to the custodian on behalf of the depositary, and the custodian will then convert such proceeds into U.S. dollars and will cause such U.S. dollars to be delivered to the depositary for distribution to holders of ADSs. Under current Brazilian law, dividends paid to shareholders who are not Brazilian residents, including holders of ADSs, will not be subject to Brazilian income tax withholding.

Dividend Policy and History of Dividend Payments

Due to our significant capital expenditure requirements, our policy is to pay only the mandatory dividend owed to common and preferred shareholders, subject to an availability analysis conducted by our board of directors as discussed above. According to the Brazilian Corporate Law, Brazilian corporations cannot retain profits without justification. Therefore, except if retained under any of the reserves provided for in Articles 193 to 197 of the Brazilian Corporate Law, all net profits will have to be distributed to shareholders.

The only significant asset the Registrant has, other than cash, is its shares in Telemig Celular. The Registrant relies almost exclusively on dividends from Telemig Celular to meet cash needs, including the payment of dividends to its shareholders. The Registrant controls the payment of dividends by Telemig Celular, subject to limitations under Brazilian Corporate Law.

The following table sets forth the dividends paid to holders of our common shares and preferred shares since 2003 in *reais*:

Year	Common Shares	Preferred Shares
	(per share/in R\$)*	
2008 (through May 30)	1.06464	1.06464
2007	0.9668	0.9668
2006	2.5712	2.5712
2005	2.2852	2.2852
2004	1.1099	1.1099
2003	0.6934	0.6934

(*) dividends paid per share have been adjusted to reflect the reverse stock split of our shares which occurred in 2007. See note 15 (g) to our U.S.GAAP financial statements).

Shareholders who are not residents of Brazil must generally be registered with the Central Bank to have dividends and/or notional interest attributable to shareholders' equity, sales proceeds or other amounts with respect to their shares eligible to be remitted in foreign currency outside of Brazil. See Item 10D. Exchange Controls. The preferred shares underlying the ADSs are held in Brazil by Banco Itaú S.A., our custodian, as agent for the depositary, which will be the registered owner on the records of the registrar for our preferred shares. The registrar is Banco ABN-AMRO Real S.A.

Payments of cash dividends and distributions, if any, will be made in *reais* to the custodian on behalf of the depositary, which will then convert those proceeds into U.S. dollars and will cause those U.S. dollars to be delivered to the depositary for distribution to holders of ADSs as described above. In the event that the custodian is unable to convert immediately the Brazilian currency received as dividends and/or notional interest attributable to shareholders' equity into U.S. dollars, the amount of U.S. dollars payable to holders of ADSs may be adversely affected by devaluations of the *real* that occur before those distributions are converted and remitted. See Item 3A. Selected Financial Data Exchange Rates. Taxation applicable to dividends and notional interest attributable to shareholders' equity in respect of the preferred shares paid to shareholders who are not Brazilian residents, including holders of ADSs, is discussed in Item 10E. Taxation Brazilian Tax Considerations.

B. Significant Changes

No significant changes or events have occurred after the close of the financial statements as of and for the year ended December 31, 2007, other than the events already described in this annual report.

ITEM 9. THE OFFER AND LISTING**A. Offer and Listing Details**

Our extraordinary shareholders' meeting, held on July 12, 2007, approved the reverse stock split of our shares at a ratio of 10,000:1, effective as of August 14, 2007. Consequently, each of our ADSs currently represents two preferred shares. As a result of an increase in our capital stock approved at an extraordinary shareholders' meeting held on March 28, 2008, our capital stock increased to R\$577,500,000, divided into a total of 13,466,059 outstanding common shares and 22,741,002 preferred shares, without par value. All of our outstanding shares are fully paid.

Our preferred shares trade on the New York Stock Exchange under the symbol **TMB** in the form of American Depositary Shares, or ADSs. The ADSs are evidenced by American Depositary Receipts, or ADRs, issued by The Bank of New York as depository, under a deposit agreement among us, the depository and the owners and beneficial owners of ADRs from time to time. We became a U.S. registered company listed on the New York Stock Exchange on November 16, 1998. See **Item 10B. Memorandum and Articles of Association Preferred Shares and Common Shares** for information of a proposed reverse share split of the shares issued by the Registrant.

The principal trading market for our preferred shares and for our common shares is the São Paulo Stock Exchange (*Bolsa de Valores de São Paulo* - BOVESPA). Our preferred shares commenced trading on the BOVESPA on September 21, 1998. Our preferred shares trade on the BOVESPA under the symbol **TMCP4** and our common shares trade under the symbol **TMCP3**.

At December 31, 2007, there were:

- an aggregate of 22,741,002 preferred shares issued and outstanding and 13,466,059 common shares issued and outstanding, and
- 6,005,057 ADSs, representing 12,010,114 preferred shares, held by foreign investors (to our knowledge, based in each case on their addresses as indicated in our records for the shares in our custody), representing 53% of the total preferred shares outstanding.

We have registered one class of ADSs under a registration statement on Form F-6 pursuant to the Securities Act. All of the ADSs were registered in the name of The Depository Trust Company. At December 31, 2007, there were 69 holders of record of the ADSs.

The following table presents the reported high and low closing sale prices for our preferred shares as reported on the BOVESPA in *reais*.

Calendar Period*	R\$ per 1,000 preferred shares	
	High	Low
2003	R\$5.40	R\$2.35
2004	R\$6.69	R\$3.53

May 2008	US\$69.43	US\$55.78
June 2008 (through June 18)	US\$59.63	US\$57.62

* Stock prices beginning in January 2007 are impacted by the reverse stock split at the ratio of 10,000 : 1.

B. Plan of Distribution

Not applicable.

C. Markets

Trading on the BOVESPA

General

In 2000, the BOVESPA was reorganized through the execution of memoranda of understanding by the Brazilian stock exchanges. Under the memoranda, all securities are now traded only on the BOVESPA, with the exception of electronically traded public debt securities and privatization auctions, which are traded on the Rio de Janeiro Stock Exchange.

When shareholders trade in common and preferred shares on the BOVESPA, the trade is settled in three business days after the trade date without adjustment of the purchase price for inflation. The seller is ordinarily required to deliver the shares to the exchange on the second business day following the trade date. Delivery of and payment for shares are made through the facilities of the clearinghouse, or CBLC.

BOVESPA is the largest stock trading center in Latin America, concentrating about 70% of the volume of trades carried out in the region. Throughout its history, BOVESPA has experienced changes in order to streamline its structure. The most recent one took place on August 28, 2007 through a corporate restructuring process that resulted in the creation of BOVESPA Holding, which has, as fully-owned subsidiaries, the São Paulo Stock Exchange (BVSP) - responsible for the operations by the stock exchange and the organized over-the-counter markets - and CBLC, which provides settlement, clearing and depository services. Such corporate restructuring has consolidated the demutualization process, thereby causing the access to the tradings and other services rendered by the Stock Exchange to be unpegged from the stock ownership. In the former operating format of BOVESPA, only those brokers owing stock exchange memberships were allowed to trade at the Stock Exchange.

The BOVESPA has two open outcry trading sessions each day from 11:00 a.m. to 6:00 p.m., São Paulo time, for all securities traded on all markets, except during daylight savings time in the United States. During daylight savings time in the United States, usually the sessions are from 10:00 a.m. to 5:00 p.m., São Paulo time, to closely mirror the NYSE trading hours. Trading is also conducted between 11:00 a.m. and 6:00 p.m., or between 10:00 a.m. and 5:00 p.m. during daylight savings time in the United States, on an automated system known as the Computer Assisted Trading System (Sistema de Negociação Assistida por Computador) on the BOVESPA and on the National Electronic Trading System (Sistema Eletrônico de Negociação Nacional). This system is a computerized system that links electronically with the seven smaller regional exchanges. The BOVESPA also permits trading from 6:45 p.m. to 7:30 p.m. on an online system connected to traditional and internet brokers called the after market. Trading on the after market is subject to regulatory limits on price volatility and on the volume of shares transacted through internet brokers. There are no specialists or officially recognized market makers for our shares in Brazil.

In order to better control volatility, the BOVESPA adopted a circuit breaker system pursuant to which trading sessions may be suspended for a period of 30 minutes or one hour whenever the indices of the BOVESPA fall below the limits of 10% or 15%, respectively, in relation to the index registered in the previous trading session.

As of December 2007, the aggregate market capitalization of the 470 companies listed on the BOVESPA was approximately R\$2.5 billion (US\$1.4 billion). The Brazilian equity market is relatively small and less liquid compared to major world markets. The ten largest companies represented 50.7% of the total market capitalization of all listed

companies on the BOVESPA. As of December 2007 the average daily trading volume on the BOVESPA was approximately US\$2.6 billion. By comparison, as of December 2007, the aggregate market capitalization of the 2,805 companies listed on the NYSE was approximately US\$27.1 trillion. The 421 non-US listed companies, from 44 countries, represented US\$11.4 trillion in total global market capitalization as of December 31, 2006.

Corporate Governance Practices

In 2000, the BOVESPA introduced three special listing segments, known as Level 1 and 2 of Differentiated Corporate Governance Practices and New Market (*Novo Mercado*), aiming at fostering a secondary market for securities issued by Brazilian companies with securities listed on the BOVESPA, by prompting such companies to follow good practices of corporate governance. The listing segments were designed for the trading of shares issued by companies voluntarily undertaking to abide by corporate governance practices and disclosure requirements in addition to those already imposed by Brazilian law. These rules generally increase shareholders' rights and enhance the quality of information provided to shareholders.

To become a Level 1 (*Nível 1*) company, in addition to the obligations imposed by current Brazilian law, an issuer must agree to (a) ensure that shares of the issuer representing 25% of its total capital are effectively available for trading, (b) adopt offering procedures that favor widespread ownership of shares whenever making a public offering, (c) comply with minimum quarterly disclosure standards including cash flow statements, (d) follow stricter disclosure policies with respect to transactions made by controlling shareholders, directors and officers involving securities issued by the issuer; (e) submit any existing shareholders' agreements and stock option plans to the BOVESPA; and (f) make an annual calendar announcing scheduled corporate events, including information on the company, the event, date and time it is going to take place; any changes in the schedule must be promptly forwarded to BOVESPA and published.

To become a Level 2 (*Nível 2*) company, in addition to the obligations imposed by current Brazilian law, an issuer must agree to (a) comply with all of the listing requirements for Level 1 companies, (b) grant tag-along rights for all shareholders in connection with a transfer of control of the company, offering the same price paid per share for controlling block common shares and 80% of the price paid per share for controlling block preferred shares, (c) grant voting rights to holders of preferred shares in connection with certain corporate restructurings and related-party transactions, such as: (i) any transformation of the company into another corporate form, (ii) any merger, consolidation or spin-off of the company, (iii) approval of any transactions between the company and its controlling shareholder, including parties related to the controlling shareholder, (iv) approval of any valuation of assets to be delivered to the company in payment for shares issued in a capital increase, (v) appointment of an independent company, with renowned expertise, to ascertain the economic value of the company in connection with any deregistration and delisting tender offer, and (vi) any changes to these voting rights, (d) have a board of directors comprised of at least five members, of which at least 20% must be independent, as defined by the BOVESPA, with a term limited to two years, (e) if it elects to delist from the Level 2 segment, hold a tender offer by the company's controlling shareholder (the minimum price of the shares to be offered will be the economic value determined by an appraisal process), and, for the same purposes, in the case of companies with diffuse control (controlling power exercised by the shareholder holding less than 50% of the voting capital and per group of shareholders who are not signatories of voting agreements and which is not under a common control and does not act as a representative of a common interest) to comply with complementary rules to be issued by BOVESPA; (f) disclose: (i) quarterly financial statements in English or prepared in accordance with U.S. GAAP or International Financial Reporting Standards (IFRS); and (ii) annual financial statements in English, including cash flow statements, prepared in accordance with US GAAP or International Financial Reporting Standards (IFRS), in US Dollars or *reais*, and (g) adhere exclusively to the rules of the BOVESPA Arbitration Chamber for resolution of disputes involving the controlling shareholders, the managers and the members of the fiscal committee.

To be listed in the *Novo Mercado*, an issuer must meet all of the requirements described above, and in addition to (a) issuing only voting shares and ensuring that all the shares will be composed exclusively of common shares, (b) granting tag-along rights for all shareholders in connection with a transfer of control of the company, offering the same price paid per share for controlling block common shares.

Regulation of Brazilian Securities Markets

The Brazilian securities markets are regulated by the CVM, which has regulatory authority over the stock exchanges and securities markets, as well as by the Central Bank, which has, among other powers, licensing authority over brokerage firms and regulates foreign investment and foreign exchange transactions. The Brazilian securities market are governed by Law No. 10,198 dated February 14, 2001, Law No. 10,303 dated October 31, 2001, known as Law No. 10,303, and Law No. 10,411 dated February 26, 2002, which introduced new concepts and several changes to Law No. 6,385 dated December 7, 1976, as amended and supplemented, the principal law governing the Brazilian securities markets, by Law No. 6,404 of December 15, 1976, as amended, known as the Brazilian Corporate Law, and by regulations issued by the CVM, the CMN and the Central Bank. These laws and regulations, among others, provide for disclosure requirements applicable to issuers of traded securities, criminal sanctions for insider trading and price manipulation, and protection of minority shareholders. They also provide for licensing and oversight of brokerage firms and governance of Brazilian stock exchanges.

Under the Brazilian Corporate Law, a company is either publicly-held (*companhia aberta*), such as we are, or closely-held (*companhia fechada*). All publicly-held companies are registered with the CVM and are subject to reporting requirements. A company registered with the CVM may have its securities traded either on the BOVESPA or in the Brazilian over-the-counter market. The shares of a publicly-held company may also be traded privately, subject to some limitations. To be listed, a company must apply for registration with the CVM and the BOVESPA.

Trading in securities on the BOVESPA may be suspended at the request of a company in anticipation of a material announcement. Trading may also be suspended at the initiative of the BOVESPA or the CVM, among other reasons, based on or due to a belief that a company has provided inadequate information regarding a material event or has provided inadequate responses to inquiries by the CVM or the BOVESPA.

Trading on the BOVESPA by nonresidents of Brazil is subject to certain limitations under Brazilian foreign investment and tax legislation. The Brazilian custodian for the preferred shares underlying the ADSs must, on behalf of the depositary for the ADSs, obtain registration from the Central Bank to remit U.S. dollars abroad for payments of dividends, any other cash distributions, or upon the disposition of the shares and sales proceeds thereof. If you exchange your ADSs for preferred shares, you will be entitled to continue to rely on the custodian's electronic certificate of foreign capital registration for five business days after the exchange. Thereafter, you may not be able to obtain and remit abroad non-Brazilian currency upon the disposition of or distributions relating to the preferred shares, and will be subject to a less favorable tax treatment on gains with respect to the preferred shares, unless you obtain a new electronic certificate of foreign capital registration or qualify under Brazilian foreign investment regulations that entitle some foreign investors to buy and sell shares on the BOVESPA without obtaining separate electronic certificates of foreign capital registration. See Item 10D. Exchange Controls.

The Brazilian securities laws and regulations provide for, among other things, disclosure requirements applicable to issuers of traded securities, protection of minority shareholders and criminal penalties for insider trading and price manipulation. On January 3, 2002, the CVM issued Instruction No. 358, which amended the rules applicable to the disclosure of relevant facts and became effective on April 28, 2002. In accordance with this regulation, companies must establish internal policies applicable to the disclosure of relevant facts and the confidentiality of non-public information. We have filed our disclosure and confidentiality policy with the CVM. However, the Brazilian securities markets are still not as regulated and supervised as the United States securities markets or markets in certain other jurisdictions.

Changes in the Brazilian Corporate Law

On October 31, 2001, Law No. 10,303, amending the Brazilian Corporate Law, was enacted. The main goal of Law No. 10,303 is to broaden the rights of minority shareholders. Law No. 10,303:

- obligates controlling shareholders to make a tender offer for shares if they increase their interest in share capital to a level that materially and negatively affects the liquidity of our shares, as defined by the CVM;
- requires any acquirer of control to make a tender offer for common shares at a price equal to 80% of the per share price paid for the controlling block of shares;
- authorizes us to redeem minority shareholders' shares if, after a tender offer, our controlling shareholders increase their participation in our total share capital to more than 95%;
- entitles dissenting or, in certain cases, non-voting shareholders to obtain redemption upon a decision to conduct a spin-off that results in (a) a change of our corporate purpose, (b) a reduction in the mandatory dividend or (c) any participation in a group of companies (as defined by the Brazilian Corporate Law);

- requires that the preferred shares have one of the following advantages in order to be listed and to trade on a stock exchange: (a) priority in receipt of dividends corresponding to at least 3% of the book value per share (after this priority condition is met, equal conditions apply to common shares); (b) dividends 10% higher than those paid for common shares; or (c) a tag-along right at 80% of the price paid to the controlling shareholder in case of a transfer control. No withdrawal rights arise from such amendments made before December 31, 2002;
- entitles shareholders that are not controlling shareholders but that together hold (a) preferred shares representing at least 10% of our total share capital or (b) common shares representing at least 15% of our voting capital the right to appoint one member and an alternate to our board of directors. If no group of common or preferred shareholders meets the thresholds described above, shareholders holding preferred or common shares representing at least 10% of our total share capital are entitled to combine their holdings to appoint one member and an alternate to our board of directors. Until 2005, the board members that may be elected pursuant to (a) above or by the combined holdings of holders of preferred and common shares are to be chosen from a list of three names drawn up by the controlling shareholder. Any such members elected by the minority shareholders will have veto powers on the selection of our independent auditors;
- requires controlling shareholders, shareholders that appoint members of our board of directors or fiscal council and members of our board of directors, board of executive officers or fiscal council to file immediately with the CVM and the stock exchanges (or the over-the-counter markets on which our securities are traded) a statement of any change in their shareholdings; and
- requires us to send copies of the documentation we submit to our shareholders in connection with shareholders meetings to the stock exchanges on which our shares are most actively traded.

Amendment to Brazilian Corporate Law, effective for fiscal years beginning on or after January 1, 2008

On December 28, 2007 Law No. 11,638/07 was enacted, modifying the provisions of the Brazilian Corporate Law. The new law sets forth several changes in the preparation of financial statements, aiming at aligning it with the international accounting standards and determines that the CVM issue regulations to publicly traded companies. The main changes introduced by the law will be applicable as of 2008 and refer to: (i) the replacement of the statement of changes in financial position by the statement of cash flows; (ii) mandatory preparation of statement of value added; (iii) possibility to include tax recording into the accounting book, segregating the accounting and tax statements; (iv) creation of a sub-group valuation adjustments to shareholders' equity, in the shareholders' equity section; (v) establishment of evaluation and classification criteria for financial instruments; (vi) duty to perform impairment evaluation of non current assets; (vii) changes in the application of the equity method of accounting; (viii) donations and investment subventions recognition criteria; and (ix) mandatory recording of new assets at fair market value, in case of mergers, acquisitions or spin-offs.

ITEM 10. ADDITIONAL INFORMATION**A. Share Capital**

Not applicable.

B. Memorandum and Articles of Association

Set forth below is certain information concerning our capital stock and a summary of certain significant provisions of our bylaws and Brazilian Corporate Law.

Corporate Purposes

We are a publicly-held corporation and our principal place of business is in the city of Belo Horizonte, Brazil. We are governed mainly by our bylaws and by the Brazilian Corporate Law. Our corporate purposes are found under Article 2 of our bylaws, which establishes that our objectives are:

- to control companies that perform activities related to the mobile telephone sector in the areas of concessions or authorizations;
- to promote, through our controlled or affiliated companies, the expansion and implementation of mobile telephone services in the areas of concessions or authorizations;
- to promote, to perform or to assist in domestic and foreign investments to be made by us or our controlled companies;
- to promote and stimulate studies and research on the development of the mobile telephone sector;
- to perform, directly or through our controlled or affiliated companies, technical services related to the mobile telephone sector;
- to perform or promote the import of goods and services for or through controlled or affiliated companies;
- to promote, to stimulate and to coordinate, directly or through our controlled or affiliated companies, the formation and training of professionals in the mobile telephone sector;
- to perform other mobile telephone related activities; and
- to hold equity interests in other companies.

Shareholders Meeting

Our annual shareholders meeting must occur within four months following the close of our fiscal year and other shareholders meetings must be held whenever required. The Brazilian Corporate Law and our bylaws require that all our shareholders meetings be called by publication of a notice in newspapers of general circulation in our principal place of business, currently the city of Belo Horizonte, at least fifteen days prior to the meeting and for three consecutive business days. In addition, the CVM may also require the first call for a shareholders meeting to be made up to 30 days before such shareholders meeting. The quorum to hold shareholders meetings on first call is generally 25% of the shares entitled to vote and, on second call, the meetings can be held with the presence of any number of

the shares entitled to vote.

Resolutions are generally passed by the majority of the voting shareholders present at the meeting. Brazilian Corporate Law requires the approval of shareholders representing at least half of the voting shares outstanding for matters such as the following:

- to create preferred shares or to increase the preferred shares of existing classes without maintaining the proportion with the remaining classes of preferred shares, except if provided for and authorized in the bylaws;
- to modify the privileges, advantages and amortization or redemption conditions of one or more classes of preferred shares or to create a new class with greater privileges;
- to decrease the mandatory dividend;
- to merge a company into, or to consolidate a company with, another company or to spin it off;
- to become a member of a group of companies;
- to modify the corporate purposes of the company;
- to cease the liquidating status of the company;
- to issue founder's shares; or
- to dissolve the company.

Our bylaws establish that general shareholders' meetings addressed to deliberate subjects requiring special approval must be called at least 30 days in advance.

Preferred Shares and Common Shares

The following is a summary of the material terms of our common and preferred shares, including related provisions of our bylaws and the Brazilian Corporate Law.

General

As a result of an increase in our capital stock approved at an extraordinary shareholders' meeting, held on May 10, 2007, our capital increased to R\$515,000,000, divided into a total of 134,660,593,179 outstanding common shares and 227,410,022,159 preferred shares, without par value. Our extraordinary shareholders' meeting, held on July 12, 2007, approved the reverse stock split of our shares at a ratio of 10,000:1, effective as of August 14, 2007. Consequently, each of our ADSs currently represents two preferred shares. As a result of an increase in our capital stock approved at an extraordinary shareholders' meeting held on March 28, 2008, our capital stock increased to R\$577,500,000, divided into a total of 13,466,059 outstanding common shares and 22,741,002 preferred shares, without par value. All our outstanding shares are fully paid. Under our bylaws, the number of preferred shares may not exceed two-thirds of the total number of outstanding shares. We may issue preferred shares without maintaining a fixed proportion to common shares provided we observe the limit prescribed by law. Under Brazilian Corporate Law, the number of preferred non-voting or restricted voting shares outstanding, such as the preferred shares, may not exceed one-half of the total number of outstanding shares. According to Law No. 10,303, this new limit on the issuance of preferred shares does not apply to existing listed companies, including us. Currently, our common share and preferred share ratio with respect to our total share capital is 0.3719 and 0.6281, respectively.

Under our bylaws, our board of directors may increase our share capital up to 700,000,000,000 shares. Our shareholders must approve at a shareholders' meeting any capital increase that exceeds this limit. Under the Brazilian Corporate Law, if we issue additional shares in a private transaction, the existing shareholders have preemptive rights to subscribe for shares on a pro rata basis according to their current holdings.

Common Shares

Each common share entitles the holder thereof to one vote at our annual and special shareholders meetings. Under the Brazilian Corporate Law, our common shares are entitled to dividends or other distributions made in respect of the common shares in proportion to their share of the amount available for the dividend or distribution. See Allocation of Net Income and Distribution of Dividends Distribution of Dividends for a more complete description of payment of dividends and other distributions on our common shares. In addition, upon any liquidation, our common shares are entitled to return of capital in proportion to their share of our net worth.

Preferred Shares

Holders of preferred shares are generally entitled to priority in the receipt of dividends and return of capital, with no premium. Our bylaws also establish the payment of the higher value between (i) a minimum amount of non-cumulative dividends equivalent to 6% per year of the value resulting from the division of subscribed capital by the total number of shares and (ii) the right to receive a share in the mandatory dividend to be distributed based on the following criteria: (A) priority to receive a minimum, non-cumulative dividend corresponding to 3% of the net asset value of each share; and (B) a right to receive a share in the profits to be distributed on the same basis as common shareholders, after common shares have been paid a dividend equal to the minimum preferred dividend mentioned in letter (A) above.

The Brazilian Corporate Law provides that non-voting or restricted-voting shares (such as the preferred shares) entitled to fixed or minimum dividends acquire unrestricted voting rights beginning when a company has failed for three consecutive fiscal years (or for any shorter period, set forth in a company's bylaws) to pay any fixed or minimum dividend to which such shares are entitled and to continue to hold such voting rights until payment thereof is made. Our bylaws do not provide for any shorter period.

Any change in the preferences or advantages of the preferred shares, or the creation of a class of shares having priority over the preferred shares, would require the approval of holders of a majority of the outstanding preferred shares, voting as a class at a special meeting of holders of preferred shares. In any circumstance in which holders of preferred shares are entitled to vote, each preferred share will entitle the holder thereof to one vote.

Moreover, the preferred shareholders are entitled to vote at general shareholders' meetings in respect of any of the following matters:

- to amend or delete the article in our bylaws that provides that a shareholders' meeting will be required for approving the execution of long-term agreements between us or controlled companies, on one side, and the controlling shareholder, controlled or affiliated companies, those subject to common control, or that in any other way can be considered to be related to us, on the other side, except for standard-form agreements, as well as to approve the execution of any such agreements;
- to amend or delete the article in our bylaws that provides that extraordinary general shareholders' meetings called to decide on special quorum subjects will be valid if the first call is made at least 30 days in advance of the date on which the general shareholders' meeting will take place, and a second call is made at least 10 days in advance therewith; and
- to amend or delete the article in our bylaws that provides that our approval of a merger, spin-off, consolidation or dissolution of controlled companies must be guided by the equal treatment to all the companies involved.

Change in Shareholders' Rights

In principle, a change in shareholders' rights, such as the reduction of the mandatory minimum dividend, requires the vote of shareholders holding at least one half of our voting shares. Under certain circumstances, which may result in a change in the rights of shareholders, the Brazilian Corporate Law requires the approval of a majority of the shareholders who would be adversely affected by the change and who are present at a special meeting called for such purpose.

For further information see Item 6C. Board Practices.

Allocation of Net Income and Distribution of Dividends

Allocation of Net Income

The allocation of our net income is proposed by our management and is subject to approval by our shareholders at a general shareholders meeting. However, the discretion of our management and our shareholders to determine the allocation of our net income is limited by certain rules that determine whether such net income should be distributed as dividends or allocated to certain profit reserves or carried forward to future fiscal years, as described below:

Mandatory dividends. Our shareholders are generally entitled to receive mandatory dividends each year in an amount equivalent to 25% of our adjusted net income. Adjusted net income is net income under Brazilian GAAP following the addition or subtraction of:

- amounts allocated to the formation of a legal reserve account, and
- amounts allocated to the formation of a contingency reserve account and the return of any amounts in any contingency reserve accounts deposited in previous years.

The payment of our mandatory dividends may be limited to the profits actually realized in the fiscal year if the portion of the profits not realized is allocated to the unrealized income reserve account (as described below).

If, prior to a general shareholders meeting, our board of directors recommends that payment of mandatory dividends with respect to the preceding fiscal year would not be advisable in view of our financial condition, our shareholders would decide at the shareholders meeting whether or not to make that distribution. The recommendation of the board of directors must be reviewed by our fiscal council, and reported to our shareholders and to the CVM.

Legal reserve account. We are required to maintain a legal reserve account to which we must allocate 5% of our net income for each fiscal year until the amount of the reserve equals 20% of our share capital. The allocation of a portion of the net income to the legal reserve account is mandatory, even though it must be submitted to the approval by the shareholders voting at the general shareholders meeting and may be transferred to our capital account or used to offset accumulated losses. However, we are not required to make any allocations to our legal reserve in respect of any fiscal year in which it, when added to our other established capital reserves, exceeds 30% of our capital. Net losses, if any, may be charged against the legal reserve account. The legal reserve account is not available for the payment of dividends. At December 31, 2007, our legal reserve account amounted to R\$56.1 million, which was equivalent to 10.8% of our capital stock.

Statutory reserve account. Our bylaws provide that our shareholders may allocate up to 10% of our net income (adjusted pursuant to the Brazilian Corporate Law) to a working capital backup reserve account. This reserve, however may not exceed 10% of our net book value. At December 31, 2007, we had no working capital backup reserve.

Statutory reserve for investments. Our bylaws establish a statutory reserve for investments, to be created with the remaining balance of net income for the preceding fiscal year, provided that it complies with the capital budget previously approved by a shareholders meeting and provided that it is used to support costs with the expansion of our activities and those of our subsidiaries, including through capital increases or the development of new businesses. It may not be approved at the expense of retaining mandatory dividends, as provided in the sole paragraph of article 40 of our bylaws. The balance of this reserve, as well as all profit reserves, except those for contingencies, fiscal benefits and realizable profits, may not exceed our share capital. Should this limit be reached, a general shareholders meeting would have to decide whether the excess should be applied to pay in or increase the capital or to distribute dividends.

At December 31, 2007, our statutory reserve for investments amounted to R\$6.2 million.

Discretionary reserve accounts. The Brazilian Corporate Law also provides for two discretionary allocations of net profits that are subject to approval by the shareholders at the annual meeting. First, a percentage of net profits may be allocated to a contingency reserve account for anticipated losses that are deemed probable in future years. Second, if the mandatory distributable amount exceeds the sum of realized net profits in a given year, such excess may be allocated to an unrealized income reserve account. Our bylaws, which authorize the allocation of a percentage of our net income to the discretionary reserve account, require that the purpose, criteria for allocation and maximum amount of the reserve be specified.

Retention of our net income based on a capital expenditure budget. A portion of our net income may be retained for capital expenditure projects, the amount of which is based on a capital expenditure budget previously presented by our management and approved by our shareholders. If a project relating to this approved capital expenditure budget has a term exceeding one year, the budget relating to the project must be submitted to the general shareholders meeting each fiscal year until the relevant investment is completed.

Fiscal incentive reserve. Due to the recent changes to the Brazilian Corporate Law by Law No. 11,638/07, shareholders at a general meeting may, by proposal of the company's management bodies, assign to the fiscal incentive reserve the portion of net income arising from donations or governmental subventions for investments, which may be excluded from the calculation basis of the mandatory dividend.

Distribution of Dividends

Under the Brazilian Corporate Law, we may pay dividends only from:

- our net income earned in a given fiscal year, *i.e.*, our after tax income reduced by (i) our losses carried forward from prior fiscal years, and (ii) distributions to holders of founders' shares and to managers pursuant to profit-sharing arrangements. Our bylaws authorize a profit sharing plan for management and employees as well as a stock option plan. The amount to be paid is set by our board of directors. Under the Brazilian Corporate Law, this profit sharing may only be paid to management with respect to a fiscal year in which the mandatory dividend has been declared to the shareholders;
- our net income accrued in previous fiscal years or in any six-month and/or quarterly interim periods of a fiscal year; or
- our profit reserves set aside in previous fiscal years or in the first six months of a fiscal year. In this case, profit reserves means any discretionary reserve account, contingency reserve account, amounts allocated to our capital expenditure budget approved by a shareholders' resolution or unrealized income reserve account, not including the capital reserves.

We are required to pay a non-cumulative preferred dividend on our preferred shares in an amount equal to 6% per year over the value resulting from the division of subscribed capital by the total number of shares, or, alternatively, minimum non-cumulative dividends corresponding to 3% of the net asset value of each share. We must choose the alternative representing the higher value. As of December 31, 2007, the calculated preferred dividend requirement amounted to approximately R\$23.9 million. At the annual shareholders' meeting held on March 28, 2008, our shareholders approved the distribution of dividends for both common and preferred shares in the amount of R\$38.5 million, related to the year ended December 31, 2007.

For purposes of the mandatory distribution requirement, we included in adjusted net income part of the unrealized income reserve transferred upon the breakup of Telebrás, which amounted to R\$132.0 million (R\$13.2 million as of December 31, 2007), and which is included in distributable capital and other reserves in our shareholders' equity. We decided to include the unrealized reserve in the calculation of the mandatory distribution requirements over a ten-year period, ending in 2007. We cannot assure you that the mandatory distribution of the unrealized income reserve will not result in substantial additional dividend requirements.

Distributions of interest on our net worth may constitute an alternative form of payment to shareholders. These payments may qualify as part of the mandatory dividend at their net value. Please see Item 10E. Taxation - Brazilian Tax Considerations.

Dividends are generally required to be paid within 60 days after the date the dividends were declared to the holder of record, unless a shareholders' resolution sets forth another date of payment. This date must, in either case, be prior to the end of the fiscal year in which the dividend is declared. A shareholder has a three year period following the date on which the dividend payment is made available to claim the dividend in respect of its shares, after which it reverts to the company. We are not required to adjust the amount of the dividend for inflation for the period from the date of declaration to the payment date (except for the case of judicial dispute resulting indemnity for pain and suffering).

Our calculation of net profits and allocations to reserves for any fiscal year are determined on the basis of financial statements prepared in accordance with Brazilian GAAP and adjusted in accordance with Brazilian Corporate Law. The financial statements included herein have been prepared in accordance with U.S. GAAP and, although our allocations to reserves and dividends will be reflected in those financial statements, investors will not be able to calculate these allocations or required dividend amounts from the U.S. GAAP financial statements.

Interest on Shareholders' Equity

Law No. 9,249, dated December 26, 1995, as amended, provides for distribution of interest on net worth to shareholders as an alternative form of payment to shareholders. Such interest is limited to the daily *pro rata* variation of the TJLP, as determined by the Central Bank from time to time, and may not exceed the greater of:

- 50% of net income (after the deduction of the provisions for social contribution on net profits, but before taking into account the provision for income tax and the interest on shareholders' equity) for the period in respect of which the payment is made; or
- 50% of the sum of retained profits and profit reserves as of the date of the beginning of the period in respect of which the payment is made.

Payments of interest on shareholders' equity may be treated as a deductible expense for corporate income tax and social contribution purposes, provided that some limits are observed. See Item 10E. Taxation Brazilian Tax Considerations Distribution of Interest on Shareholders' Equity.

The amount paid to shareholders as interest on shareholders' equity, net of any withholding tax, may be included as part of any mandatory distributable amount. Under Brazilian law, we are obligated to distribute to shareholders an amount sufficient to ensure that the net amount received by them, after payment by us of applicable Brazilian withholding taxes in respect of the distribution of interest on shareholders' equity, is at least equal to the mandatory distributable amount. When we distribute interest on shareholders' equity, and that distribution is not accounted for as part of the mandatory distribution, Brazilian withholding tax will apply.

Specific Shareholders' Rights

According to the Brazilian Corporate Law, neither a company's bylaws nor actions taken at a general meeting of shareholders may deprive a shareholder of certain specific rights, such as:

- the right to participate in the distribution of profits;
- the right to participate equally and ratably in any remaining residual assets in the event of the company's liquidation;
- the right to supervise the management of the corporate business as specified in the Brazilian Corporate Law;

- preemptive rights in the event of a subscription of shares, debentures convertible into shares or subscription bonuses (other than with respect to a public offering of such securities, as may be provided in the bylaws); and
- the right to withdraw from the company in the cases specified in the Brazilian Corporate Law.

Limitations on Ownership and Voting Rights by non-Brazilian Shareholders

There are no restrictions on ownership of our shares or voting of our common shares by individuals or legal entities domiciled outside Brazil. However, the right to convert dividend payments and proceeds from the sale of common or preferred shares into foreign currency and to remit those amounts outside Brazil is subject to exchange control restrictions and foreign investment legislation which generally require, among other things, obtaining a Certificate of Registration under the Brazilian National Monetary Council's Resolution No. 2,689 or its direct foreign investment regulations. See Item 10D. Exchange Controls.

Share Ownership Disclosure

There are no provisions in our bylaws governing the ownership threshold above which shareholder ownership must be disclosed. CVM regulations require the disclosure of the acquisition of (1) 5% of the voting stock of a listed company, (2) additional acquisitions by a controlling stockholder and (3) shares by members of the board of executive officers, members of the Fiscal Council (if any) and certain relatives of those persons.

Other Provisions

Neither the Brazilian Corporate Law nor our bylaws expressly addresses:

- staggered terms for directors;
- cumulative voting, except as described below; or
- measures that could prevent a takeover attempt.

Nevertheless, the General Telecommunications Law requires Anatel's prior approval for any spin off, merger, incorporation, transformation or transfer of control involving corporations holding any telecommunications concession or authorization.

According to the Brazilian Corporate Law and CVM regulation, shareholders representing at least 5% of the voting capital may request that a multiple voting procedure be adopted to entitle each share to as many votes as there are board members and to give each shareholder the right to vote cumulatively for only one candidate or to distribute his/her votes among several candidates. Pursuant to the Brazilian Corporate Law, shareholders' actions must be taken at a shareholders' meeting duly convened, and not by written consent.

Preemptive Rights

Each of our shareholders has a general preemptive right to subscribe for shares or securities convertible into shares in any capital increase, in proportion to its holding, except in the event of the grant and exercise of any option to acquire shares of our share capital. A period of at least 30 days following the publication of notice of the issuance of shares or securities convertible into shares is allowed for exercise of the right. Under the Brazilian Corporate Law, we may amend our bylaws to eliminate preemptive rights or to reduce the exercise period in connection with a public offering of shares or an exchange offer made to acquire another company. Currently, our bylaws provide for such elimination of the preemptive rights in those circumstances upon approval of the shareholders or the board of directors.

In the event of a capital increase which would maintain or increase the proportion of capital represented by preferred shares, holders of ADSs, except as described above, would have preemptive rights to subscribe only for

newly issued preferred shares. In the event of a capital increase which would reduce the proportion of capital represented by preferred shares, holders of ADSs, except as described above, would have preemptive rights to subscribe for preferred shares in proportion to their shareholdings and for common shares only to the extent necessary to prevent dilution of their interest in us.

Redemption and Rights of Withdrawal

The Brazilian Corporate Law provides that, under limited circumstances, a shareholder has the right to withdraw his or her equity interest from the company and to receive payment for the portion of shareholder's equity attributable to his or her equity interest. This right of withdrawal may be exercised by our dissenting shareholders in the event that at least half of all voting shares outstanding authorize us:

- to create preferred shares or to increase the existing classes of preferred shares, without maintaining the proportion with the remaining classes of preferred shares, except if provided for and authorized in the bylaws, subject to the conditions set forth in the Brazilian Corporate Law;
- changes in the preferences, advantages and conditions of redemption or amortization of one or more classes of preferred shares, or the creation of a new class with greater privileges, subject to the conditions set forth in the Brazilian Corporate Law;
- to reduce the mandatory distribution of dividends;
- to merge into another company or to consolidate with another company, subject to the conditions set forth in the Brazilian Corporate Law;
- to participate in a centralized group of companies as defined under the Brazilian Corporate Law and subject to the conditions set forth therein;
- to change our corporate purpose;
- to split up, subject to the conditions set forth in the Brazilian Corporate Law;
- to transform into another type of company;
- to transfer all of our shares to another company or to receive shares of another company in order to make the company whose shares are transferred a wholly owned subsidiary, a procedure known as *incorporação de ações*; or
- to acquire control of another company at a price which exceeds the limits set forth in the Brazilian Corporate Law.

The right of withdrawal lapses 30 days after publication of the minutes of the shareholders' meeting that approved the corporate actions described above. We would be entitled to reconsider any action giving rise to withdrawal rights within 10 days following the expiration of such rights if the withdrawal of shares of dissenting shareholders would jeopardize our financial stability.

In addition, the rights of withdrawal in the fourth, fifth and ninth bullet points above may not be exercised by holders of shares if such shares (i) are liquid, which definition entails being part of the BOVESPA Index or other stock exchange index (as defined by the CVM), and (ii) are widely held, such that the controlling shareholder or companies it controls have less than 50% of the shares.

This right of withdrawal may also be exercised in the event that the entity resulting from a merger, *incorporação de ações*, as described above, consolidation or spin-off of a listed company fails to become a listed company within 120 days of the shareholders' meeting at which such decision was taken.

The Brazilian Corporate Law allows companies to reimburse the withdrawn shareholders of the amount of their shares at their economic value, subject to the provisions of their bylaws and certain other requirements. Our bylaws currently do not provide that the reimbursement will be effected at its economic value of the shares, consequently, any reimbursement pursuant to the Brazilian Corporate Law would be made based on the book value per share, determined on the basis of the last balance sheet approved by the shareholders. However, if a shareholders meeting giving rise to the reimbursement rights occurred more than 60 days after the date of the last approved balance sheet, a shareholder would be entitled to demand that his or her shares be valued on the basis of a new balance sheet dated within 60 days of such shareholders meeting.

Form and Transfer

According to the Brazilian Corporate Law, all shares issued by Brazilian companies must be nominative and either registered within the companies' registry books (the *Registro de Ações Nominativas*) or placed under the custody of a financial institution specifically designated to perform custodial services by each company. Because preferred shares are in registered book entry only form, the transfer of shares is effected by either an entry made by us in our books by debiting the share account of the transferor and crediting the share account of the transferee or by a book entry by the custodian in case the board of directors authorizes the maintenance of our shares under the custody of a financial institution specifically designated by the shareholders to perform book entry services. Under our bylaws, our shares are in the form of book entry shares and the transfer of those shares is effected through an order to the financial institution which controls the registration of those shares.

Transfers of preferred shares by a foreign investor are made in the same way and executed by that investor's local agent on the investor's behalf except that, if the original investment was registered with the Central Bank pursuant to the Annex - IV Regulations, the foreign investor also should seek amendment, if necessary, through its local agent, of the certificate of registration to reflect the new ownership.

The BOVESPA operates a central clearing system. A holder of our shares may choose, at its discretion, to participate in this system and all shares elected to be put into the system will be deposited in custody with the stock exchange through a Brazilian institution that is duly authorized to operate by the Central Bank having a clearing account with the stock exchange. The fact that these shares are subject to custody with the stock exchange will be reflected in our registry of shareholders. Each participating shareholder will, in turn, be registered in our register of beneficial shareholders maintained by the stock exchange and will be treated in the same way as registered shareholders.

Significant Differences between our Corporate Governance Practices and NYSE Corporate Governance Standards

We are subject to the NYSE corporate governance listing standards. As a foreign private issuer, the standards applicable to us are considerably different than the standards applied to U.S. listed companies. Under the NYSE rules, we are required only to: (i) have an audit committee or audit board, pursuant to an applicable exemption available to foreign private issuers, that meets certain requirements, as discussed below, (ii) provide prompt certification by our chief executive officer of any material non-compliance with any corporate governance rules, and (iii) provide a brief description of the significant differences between our corporate governance practices and the NYSE corporate governance practice required to be followed by U.S. listed companies. The discussion of the significant differences between our corporate governance practices and those required of U.S. listed companies follows below.

Majority of Independent Directors

The NYSE rules require that a majority of the board must consist of independent directors. Independence is defined by various criteria, including the absence of a material relationship between the director and the listed company. Brazilian law does not have a similar requirement. Under Brazilian law, neither our board of directors nor our management is required to test the independence of directors before their election to the board. However, both Brazilian Corporate Law and the CVM have established rules that require directors to meet certain qualification requirements and that address the compensation and duties and responsibilities of, as well as the restrictions applicable to, a company's executive officers and directors. Although our directors meet the qualification requirements of Brazilian Corporate Law and the CVM, we do not believe our directors would be considered independent under the NYSE test for director independence. Brazilian Corporate Law and our bylaws require that our directors be elected by our shareholders at a general shareholders meeting.

Executive Sessions

NYSE rules require that the non-management directors must meet at regularly scheduled executive sessions without management. Brazilian Corporate Law does not have a similar provision. According to Brazilian Corporate Law, up to one-third of the members of the board of directors can be elected from management. The remaining non-management directors are not expressly empowered to serve as a check on management and there is no requirement that those directors meet regularly without management. All of our directors are non-management directors.

Nominating/Corporate Governance Committee

NYSE rules require that listed companies have a Nominating/Corporate Governance Committee composed entirely of independent directors and governed by a written charter addressing the committee's required purpose and detailing its required responsibilities, which include, among other things, identifying and selecting qualified board member nominees and developing a set of corporate governance principles applicable to the company. We are not required under applicable Brazilian law to have a Nominating Committee/Corporate Governance Committee, and accordingly, to date, have not established such a committee. Pursuant to our bylaws, our directors are elected by our shareholders at a general shareholders' meeting. Our corporate governance practices are adopted by the entire board.

Compensation Committee

NYSE rules require that listed companies have a Compensation Committee composed entirely of independent directors and governed by a written charter addressing the committee's required purpose and detailing its required responsibilities, which include, among other things, reviewing corporate goals relevant to CEO compensation, evaluating CEO performance and approving CEO compensation levels and recommending to the board non-CEO compensation, incentive-compensation and equity-based plans. We are not required under applicable Brazilian law to have a Compensation Committee. Under Brazilian Corporate Law, the total amount available for compensation of our directors and executive officers and for profit-sharing payments to our executive officers is established by our shareholders at the annual general meeting. The board of directors is then responsible for determining the individual compensation and profit sharing of each executive officer, as well as the compensation of our board members. In making such determinations, the board reviews the performance of the executive officers, including the performance of our CEO.

Audit Committee

NYSE rules require that listed companies have an audit committee that (i) is composed of a minimum of three independent directors who are all financially literate, (ii) meets the SEC rules regarding audit committees for listed companies, (iii) has at least one member who has accounting or financial management expertise and (iv) is governed by a written charter addressing the committee's required purpose and detailing its required responsibilities. However, as a foreign private issuer, we need only to comply with the requirement that the audit committee meet the SEC rules regarding audit committees for listed companies.

Brazilian Corporate Law requires companies to have a permanent or non-permanent fiscal council (conselho fiscal) composed of three to five members who are elected at the general shareholders' meeting. The fiscal council operates independently from management and from a company's external auditors. Its main function is to monitor the activities of management, examine the financial statements of each fiscal year and provide a formal report to our shareholders. We have a permanent fiscal council that consists of three to five members. Since April 2006, our fiscal council holds ordinary meetings on a quarterly basis and, extraordinarily, whenever necessary. See Item 6C. Board Practices Fiscal Council.

In addition, at a meeting held on May 26, 2008, our board of directors appointed an audit and control committee, in compliance with SEC's rules, which is composed of three independent members of our board of directors. The audit and control committee is responsible for, among other actions, making recommendations to the board of directors on the appointment and retention of independent auditors, processing complaints regarding accounting and auditing, and engaging advisors. The current members of our audit and control committee are Luiz Kaufmann, José Guimarães Monforte and Antonio Gonçalves de Oliveira. See Item 16D. Exemptions from the Listing Standards for Audit Committees.

The members of our audit and control committee are financially literate and one member has accounting expertise that qualifies him as our audit committee financial expert.

Shareholder Approval of Equity Compensation Plans

NYSE rules require that shareholders be given the opportunity to vote on all equity compensation plans and material revisions thereto, with limited exceptions. Under Brazilian Corporate Law, shareholders must approve all stock option plans. In addition, any issuance of new shares that exceeds our authorized share capital established in our bylaws is subject to shareholder approval.

Corporate Governance Guidelines

NYSE rules require that listed companies adopt and disclose corporate governance guidelines. We have not adopted any formal corporate governance guidelines beyond those required by applicable Brazilian law. We have adopted and observe a disclosure policy which requires the public disclosure of all relevant information pursuant to guidelines set forth by the CVM, as well as an insider trading policy, which, among other things, establishes black-out periods and requires insiders to inform management of all transactions involving our securities.

Code of Business Conduct and Ethics

NYSE rules require that listed companies adopt and disclose a code of business conduct and ethics for directors and certain officers, and promptly disclose any waivers of the code for directors or executive officers. Applicable Brazilian law does not have a similar requirement. However, in December 2003, we adopted a code of ethics and conduct applicable to our officers, directors and employees, including at the subsidiary level, providing a whistleblower protection for those who reports violations to the code terms.

Internal Audit Function

NYSE rules require that listed companies maintain an internal audit function to provide management and the audit committee with ongoing assessments of the company's risk management processes and system of internal control. Our internal audit function is the responsibility of our chief executive officer. Our financial department is supported in its internal audit function by our quality control department, which is responsible for the evaluation and effectiveness of our internal procedures and reporting systems.

C. Material Contracts

Personal Mobile Service Authorizations

We obtained a mobile cellular service concession from the Brazilian Ministry of Communications on November 4, 1997. On February 19, 2004, we signed an authorization contract with Anatel to migrate to the SMP regime, which replaced the SMC. We also acquired from Anatel additional spectrum on the 1,800 MHz frequency and the 900 MHz frequency ranges. The terms of our authorization are described in Item 4B. Business Overview Regulation of the Brazilian Telecommunications Industry. In order to extend the area of Telemig Celular to provide the SMP to the whole Minas Gerais State, we also recently acquired an Authorization to the sector 3 of the Area 4 of the Plano Geral de Outorgas PGO of Anatel.

In December 2004, Anatel granted us a license to provide Multimedia Communication Services (*Serviço de Comunicação Multimídia*), allowing us to provide this high speed data service throughout Brazil and increase our product portfolio.

Our authorization to use radio frequencies may be renewed for one more period of 15 years, on a remunerated basis. Our authorization regarding radio frequencies expired on April 29, 2008, and was duly renewed, with the first installment of the renewal being due on April 30, 2010.

Network Agreements

Ericsson Telecomunicações S.A. and Ericsson Serviços de Telecomunicações Ltda.

On May 19, 2006, Telemig Celular entered into a new agreement with Ericsson Telecomunicações S.A. and Ericsson Serviços de Telecomunicações Ltda. to provide and implement the expansion of our GSM CORE network. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM CORE network. The total amount payable to Ericsson under the terms of the agreement is R\$30 million.

On May 19, 2006, Telemig Celular entered into a new agreement with Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda. to provide and implement the expansion of our GSM ACCESS network. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM ACCESS network. The total amount payable to Ericsson under the terms of the agreement is R\$62 million.

On February 9, 2007, Telemig Celular entered into a new agreement with Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda to provide and implement the UMTS/HSPA network. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the implementation of the UMTS/HSPA network. The total amount payable to Ericsson under the terms of the agreement is R\$22.1 million.

On June 6, 2007, Telemig Celular S.A., Amazônia Celular S.A., Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda and Ericsson Gestão e Serviços de Telecomunicações Ltda entered into a new agreement to provide and implement the expansion of our GSM ACCESS and CORE networks. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM ACCESS and CORE networks. The total amount payable to Ericsson under the terms of the agreement is R\$119.8 million. Telemig Celular S.A. is responsible for the payment of 78.7% of this amount.

On June 21, 2007, Telemig Celular entered into a new agreement with Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda. to provide and implement the expansion of our GSM ACCESS and CORE network to implement the *Minas Comunica* project. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM ACCESS and CORE networks. The total amount payable to Ericsson under the terms of the agreement is R\$54.9 million.

On June 30, 2007, Telemig Celular entered into a new agreement with Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda. to provide and implement the expansion of our GSM ACCESS and CORE network to improve the coverage in Minas Gerais. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM ACCESS and CORE networks. The total amount payable to Ericsson under the terms of the agreement is R\$39.1 million.

Huawei do Brasil Telecomunicações

On March 12, 2006, Telemig Celular entered into a new agreement with Huawei do Brasil Telecomunicações Ltda. and Huawei Serviços do Brasil Ltda. to provide and implement the expansion of our GSM network in the *Triângulo Mineiro* region. Under the terms of this agreement, Huawei has agreed to provide all equipment, material, software and services necessary to the expansion of our GSM network (ACCESS and CORE) in the *Triângulo Mineiro*

region. The total amount payable to Huawei under the terms of the agreement is R\$11 million.

On June 15, 2007, Telemig Celular entered into a new agreement with Huawei do Brasil Telecomunicações Ltda. and Huawei Serviços do Brasil Ltda. to provide and implement the expansion of our GSM network in the *Triângulo Mineiro* region. Under the terms of this agreement, Huawei has agreed to provide all equipment, material, software and services necessary to the expansion of our GSM network (ACCESS and CORE) in the *Triângulo Mineiro* region. The total amount payable to Huawei under the terms of the agreement is R\$13.2 million.

D. Exchange Controls

The right to convert dividend or interest payments and proceeds from the sale of shares into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, that the relevant investments have been registered with the Central Bank and the CVM. Such restrictions on the remittance of foreign capital abroad may hinder or prevent the custodian for our preferred shares represented by our ADSs or the holders of our preferred shares from converting dividends, distributions or the proceeds from any sale of these preferred shares into U.S. dollars and remitting the U.S. dollars abroad. Holders of our ADSs could be adversely affected by delays in, or refusal to grant any, required government approval to convert Brazilian currency payments on the preferred shares underlying our ADS and to remit the proceeds abroad.

Resolution No. 1,927 of the National Monetary Council provides for the issuance of depositary receipts in foreign markets in respect of shares of Brazilian issuers. It restates and amends Annex V to Resolution No. 1,289 of the National Monetary Council, known as the Annex V Regulations. The ADS program was approved under the Annex V Regulations by the Central Bank and the CVM prior to the issuance of the ADSs. Accordingly, the proceeds from the sale of ADSs by ADR holders outside Brazil are not subject to Brazilian foreign investment controls, and holders of the ADSs are entitled to favorable tax treatment under certain circumstances.

Under Resolution No. 2,689 of the CMN, of January 26, 2000, foreign investors registered with the CVM may buy and sell Brazilian securities, including our preferred shares, on Brazilian stock exchanges without obtaining separate certificates of registration for each transaction. Registration is available to qualified foreign investors, which principally include foreign financial institutions, insurance companies, pension and investment funds, charitable foreign institutions and other institutions that meet certain minimum capital and other requirements. Resolution 2,689 also extends favorable tax treatment to registered investors. See Item 10E. Taxation Brazilian Tax Considerations.

Pursuant to the Resolution No. 2,689 foreign investors must: (i) appoint at least one representative in Brazil with the ability to perform actions regarding the foreign investment; (ii) complete the appropriate foreign investor registration form; (iii) obtain registration as a foreign investor with CVM; and (iv) register the foreign investment with the Central Bank.

The securities and other financial assets held by a foreign investor pursuant to Resolution 2,689 must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank or by the CVM or be registered in register, clearing and custody systems authorized by the Central Bank or by the CVM. In addition, the trading of securities is restricted to transactions carried out on the stock exchanges or over-the-counter markets licensed by the CVM.

A certificate of registration has been generated in the name of the depositary with respect to the ADSs and is maintained by the custodian on behalf of the depositary. Pursuant to the registration, the custodian and the depositary are able to convert dividends and other distributions with respect to the preferred shares represented by ADSs into foreign currency and remit the proceeds outside Brazil. In the event that a holder of ADSs exchanges such ADSs for preferred shares, such holder will be entitled to continue to rely on the depositary's certificate of registration for five business days after such exchange following which such holder must seek to obtain its own certificate of registration with the Central Bank. A holder of preferred shares may not be able to convert into foreign currency and remit outside Brazil the proceeds from the disposition of, or distribution with respect to, the preferred shares, unless such holder qualifies under Resolution No. 2,689 regulations or obtains its own certificate of registration.

If the shareholder does not qualify under Resolution No. 2,689 by registering with the CVM and the Central Bank and appointing a representative in Brazil, the holder will be subject to less favorable Brazilian tax treatment than a holder of ADSs. Regardless of qualification under Resolution No. 2,689, residents in tax haven jurisdictions are

subject to less favorable tax treatment than other foreign investors. See Item 10E. Taxation Brazilian Tax Considerations.

Under current Brazilian legislation, the federal government may impose temporary restrictions on remittances of foreign capital abroad in the event of a serious imbalance or an anticipated serious imbalance in Brazil's balance of payments. For approximately six months in 1989 and early 1990, the federal government froze all dividend and capital repatriations held by the Central Bank that were owed to foreign equity investors in order to conserve Brazil's foreign currency reserves. These amounts were subsequently released in accordance with federal government directives. There can be no assurances that the federal government will not impose similar restrictions on foreign repatriations in the future.

E. Taxation

The following discussion is a summary of the material Brazilian and U.S. federal income tax consequences of the acquisition, ownership and disposition of preferred shares or ADSs. This summary does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase preferred shares or ADSs. This summary is based upon the tax laws of Brazil and related regulations and on the federal income tax laws of the United States and related regulations as in effect on the date of this annual report. These laws and regulations may change in the future possibly with retroactive effect and may be subject to differing interpretations.

Although there is at present no income tax treaty between Brazil and the United States, the tax authorities of the two countries have had discussions that may culminate in such a treaty. We cannot assure you, however, as to whether or when a treaty will enter into force or how it will affect holders of preferred shares or ADSs. Prospective holders of preferred shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of preferred shares or ADSs in their particular circumstances including the effect of any state, local or other tax laws including U.S. federal estate, gift and alternative minimum taxes.

Brazilian Tax Considerations

The following discussion summarizes material Brazilian tax consequences relating to the acquisition, ownership and disposition of preferred shares or ADSs by a holder not deemed to be domiciled in Brazil for Brazilian tax purposes (a non-Brazilian holder). This discussion does not address all the Brazilian tax considerations that may be applicable to any such particular non-Brazilian holder, and each non-Brazilian holder should consult his or her own tax advisor about the Brazilian tax consequences of investing in preferred shares or ADSs.

Taxation of Dividends

Dividends paid by us in cash or in kind from profits for periods beginning on or after January 1, 1996 (i) to the depositary in respect of preferred shares, underlying ADSs or (ii) to a non-Brazilian holder in respect of preferred shares, will not be subject to Brazilian withholding income tax, in accordance with Law No. 9,249/95, article 10.

Taxation of Capital Gains

According to Law No. 10,833/03, the disposition of assets located in Brazil, by a non-Brazilian holder, whether to a resident in Brazil or not, may be subject to taxation in Brazil. In this sense, on the disposition of the preferred shares, as defined as an asset located in Brazil, the non-Brazilian holder may be subject to income tax on the gains assessed, following the rules described below, no matter if the transaction is conducted in Brazil or abroad and with a Brazilian resident or not. Regarding ADSs, although we believe that the ADSs do not fall within the definition of assets located in Brazil, for purposes of Law No. 10,833/03, considering the general and unclear scope of such provisions and the lack of a judicial court ruling in respect thereto, we are unable to predict whether such understanding will ultimately prevail in the courts of Brazil. Thus, the gain on the disposition of ADSs by a non-Brazilian holder to a resident in Brazil (or even to a non-Brazilian holder in case the argument above do not prevail) may be subject to income tax in Brazil according to the rules described below for the disposition of preferred shares, when applicable.

As a general rule, capital gain or loss is defined as the difference between the amount realized on the sale or exchange and the acquisition cost of the shares sold, measured in nominal *reais* (without correction for inflation).

It is important to note that, for purposes of Brazilian taxation, the income tax rules on gains related to the disposition of preferred shares or ADSs vary depending on the domicile of the non-Brazilian holder, the form by which it has registered its investment before the Central Bank and/or how the disposition is carried out, as described below. The deposit of preferred shares in exchange for ADSs may be subject to Brazilian income tax on capital gains at the rate of 15% if the amount previously registered with the Central Bank, as a foreign investment in the preferred shares is lower than (1) the average price per preferred share on a Brazilian stock exchange on which the greatest number of such shares were sold on the day of deposit; or (2) if no preferred shares were sold on that day, the average price on the Brazilian stock exchange on which the greater number of preferred shares were sold in the 15 trading sessions immediately preceding such deposit. In such a case, the difference between the amount previously registered and the average price of the common shares calculated as above, will be considered a capital gain. There is ground to argue that such taxation is not applicable in case of non-Brazilian holder registered under Resolution 2,689/00 of the National Monetary Council (2,689 holder) that is not domiciled in a country or location that does not impose income tax or where the income tax rate is lower than 20% or where the local legislation imposes restrictions on disclosing the shareholding composition or the ownership of the investment (a tax haven holder). The withdrawal of preferred shares upon cancellation of ADSs is not subject to Brazilian tax as far as the regulatory rules are appropriately observed in respect to the registration of the investment before the Brazilian Central Bank.

Capital gains realized by non-Brazilian holders on dispositions of preferred shares carried out on the Brazilian stock exchange (which includes the transactions carried out on the organized over-the-counter market):

- are exempt from income tax when assessed by a non-Brazilian holder that is a 2,689 holder and is not a tax haven holder;
- are subject to income tax at a rate of 15%, in any other case, including gains assessed by a non-Brazilian holder that (i) is not a 2,689 holder; or (ii) is a 2,689 holder but is a tax haven holder. In these cases, a withholding income tax of 0.005% will be applicable and can be offset with the eventual income tax due on the capital gain.

Any other gains assessed on the disposition of the preferred shares that are not carried out on the Brazilian stock exchange are subject to income tax at a rate of 15%, except for a tax haven resident who, in this case, is subject to income tax at a rate of 25%. In case these gains are related to transactions conducted on the Brazilian non-organized over-the-counter market with intermediation, the withholding income tax of 0.005% will also be applicable and can be offset against with the eventual income tax due on the capital gain.

In the case of redemption or capital reduction of preferred shares or ADSs, the positive difference between the amount effectively received by the non-Brazilian holder and the acquisition cost of the securities reduced/redeemed is treated as gains from the disposition of such preferred shares not carried out on a Brazilian stock exchange market being therefore subject to income tax at a rate of 15%, or 25%, as the case may be.

Any exercise of preemptive rights relating to the preferred shares or ADSs will not be subject to Brazilian taxation. Gain realized by a non-resident holder on the disposition of preemptive rights will be subject to Brazilian income tax according to the same rules applicable to the sale or disposition of preferred shares.

Distribution of Interest on Shareholders' Equity

Brazilian corporations may make payments to shareholders characterized as interest on the shareholders' equity of the company as an alternative form of making dividend distributions. Distributions of interest on shareholders' equity in respect of the preferred shares, including distributions to the depositary in respect of preferred shares underlying ADSs, may be converted into U.S. dollars and remitted outside of Brazil, subject to applicable exchange controls. Law

No. 9,249, dated December 26, 1995, as amended, permits a Brazilian corporation to make distributions to shareholders of interest on shareholders' equity. These distributions may be paid in cash and are deductible for purposes of calculating Brazilian corporate income tax and social contribution on net profits. For tax purposes, this interest is limited to the daily pro rata variation of the TJLP, as determined by the Central Bank from time to time, and may not exceed the greater of:

- 50% of net income (after the deduction of the provisions for social contribution on net profits but before taking into account the provision for income tax and the interest on shareholders' equity) for the period in respect of which the payment is made, or
- 50% of the sum of retained profits and profit reserves as of the date of the beginning of the period in respect of which the payment is made.

Payments of interest on shareholders' equity are decided by the shareholders on the basis of the recommendations of a company's board of directors.

Distributions of interest on shareholders' equity paid to non-Brazilian holders of preferred shares, including payments to the depositary in respect of preferred shares underlying ADSs, are subject to Brazilian withholding tax at the rate of 15%, or 25%, if the non-Brazilian holder is a tax haven holder.

We cannot assure you that our board of directors will not recommend that future distributions of profits should be made by means of interest on shareholders' equity instead of by means of dividends.

Other Brazilian Taxes

There are no Brazilian taxes applicable to the ownership, transfer or disposition of preferred shares or ADSs by a non-Brazilian holder except for gift and inheritance taxes levied by some states in Brazil on gifts made or inheritances bestowed by such non-Brazilian holder to individuals or entities that are resident or domiciled within such state in Brazil.

Conversion of Brazilian currency into foreign currency, such as for purposes of paying dividends and interest, and the conversion into Brazilian currency of proceeds received by a Brazilian entity is subject to Tax on Foreign Exchange Transactions (IOF/Exchange). The tax rate on transactions involving preferred shares or ADSs is currently 0%, but the Minister of Finance has the legal power to increase the rate to a maximum of 25%. Any such increase will be applicable only prospectively.

Tax on Transactions with Bonds or Securities (IOF/Bonds and Securities) may be imposed on any transactions involving bonds and securities, even if these transactions are performed on the Brazilian stock, futures or commodities exchange. As a general rule, the rate of this tax is currently 0% for transactions involving preferred shares and ADSs, but the Minister of Finance may increase such rate up to 1.5% per day, but only with respect to future transactions.

Until December 31, 2007, fund transfers in connection with financial transactions in Brazil were subject to the CPMF tax, which was levied at a rate of 0.38% on any bank account withdrawals.

As of January 1, 2008, the CPMF tax was abolished, and should not be levied on any debit to bank accounts carried out after that. The Brazilian government may attempt to reestablish the CPMF.

U.S. Federal Income Tax Considerations

The following discussion is a general summary of the material U.S. federal income tax considerations of the acquisition ownership and disposition of our preferred shares or ADSs that may be relevant to you if you are a U.S. holder (as defined below) of such shares or ADSs. This discussion is based on provisions of the U.S. Internal Revenue Code of 1986, as amended (the Code), existing and proposed U.S. Treasury regulations, administrative pronouncements of the U.S. Internal Revenue Service (IRS) and judicial decisions, all as now in effect, and all of which are subject to change, possibly with retroactive effect, and to different interpretations. This discussion does not

address all of the U.S. federal income tax considerations that may be relevant to U.S. holders in light of their particular circumstances, and does not discuss any application of state, local or non U.S. tax law or any aspect of U.S. federal tax law other than income taxation. Moreover, this discussion deals only with our preferred shares or ADSs that U.S. holders will hold as capital assets (generally, property held for investment), and it does not apply to U.S. holders subject to special U.S. federal income tax rules, such as banks or other financial institutions, insurance companies, securities dealers, partnerships or other entities classified as partnerships for U.S. federal income tax purposes, tax-exempt organizations, persons that hold our preferred shares or ADSs as a hedge or as part of an integrated investment (including a straddle), persons owning directly, indirectly or constructively, 10% or more of

our voting stock and persons whose functional currency, for U.S. federal income tax purposes, is not the U.S. dollar. For purposes of this discussion, a U.S. holder is a beneficial owner of our preferred shares or ADSs that is, for U.S. federal income tax purposes:

- a citizen or resident alien individual of the United States,
- a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia,
- an estate the income of which is subject to U.S. federal income tax regardless of its source, or
- a trust if (A) a court within the United States is able to exercise primary supervision over the administration of the trust, and one or more U.S. persons have the authority to control all substantial decisions of the trust or (B) the trust has a valid election in effect under applicable Treasury regulations to be treated as a U.S. person.

If a partnership holds preferred shares or ADSs, the U.S. federal income tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. Partners of partnerships holding preferred shares or ADSs should consult their own tax advisors.

Except where specifically described, the following summary assumes that we are not a passive foreign investment company (PFIC) for U.S. federal income tax purposes. Please see the discussion under Passive Foreign Investment Company Rules below. In general, for U.S. federal income tax purposes, holders of American Depositary Receipts evidencing ADSs will be treated as the beneficial owners of our preferred shares represented by those ADSs. Accordingly, deposits and withdrawals of our preferred shares by U.S. holders in exchange for ADSs will not result in the realization of gain or loss for U.S. federal income tax purposes.

Taxation of Distributions

In general, distributions with respect to our preferred shares or ADSs (which likely would include distributions of notional interest charges attributed to shareholders' equity, as described above under Brazilian Tax Considerations Distribution of Interest on Shareholders' Equity) will constitute dividends for U.S. federal income tax purposes, to the extent made from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. If a distribution exceeds the amount of our current and accumulated earnings and profits, the excess first will be treated as a non-taxable return of capital to the extent of a U.S. holder's tax basis in our preferred shares or ADSs, and thereafter as capital gain. We do not intend to calculate our earnings and profits under U.S. federal income tax principles and, unless and until such calculations are made, U.S. holders should assume all distributions are made out of earnings and profits and constitute dividend income. As used below, the term dividend means a distribution that constitutes a dividend for U.S. federal income tax purposes.

The gross amount of any taxable dividend (including amounts withheld in respect of Brazilian taxes) paid with respect to our preferred shares or ADSs generally will be subject to U.S. federal income taxation as ordinary dividend income and will not be eligible for the dividends received deduction allowed to corporations. Taxable dividends paid in Brazilian currency will be included in a U.S. holder's gross income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the date such U.S. holder receives the dividends, or, in the case of dividends received in respect of ADSs, on the date the dividends are received by the depository, whether or not converted into U.S. dollars. U.S. holders will have a tax basis in any distributed Brazilian currency equal to the amount included in gross income, and any gain or loss recognized upon a subsequent disposition of such Brazilian currency generally will be ordinary income or loss. If dividends paid in Brazilian currency are converted into U.S. dollars on the day a U.S. holder or the depository, as the case may be, receives such dividends, such U.S. holder generally should not be

required to recognize foreign currency gain or loss in respect of the dividend income. We urge U.S. holders to consult their own tax advisors regarding the tax treatment of any foreign currency gain or loss if any Brazilian currency received by such U.S. holders or the depositary is not converted into U.S. dollars on the date of receipt.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by certain non-corporate U.S. holders (including individuals) with respect to the ADSs will be subject to taxation at the current rate of 15% if the dividends represent qualified dividend income (such rate is scheduled to expire on January 1, 2011). Dividends paid on the ADSs will be treated as qualified dividend income if (i) the ADSs are readily tradable on an established securities market in the United States and (ii) we were not in the year prior to the year in which the dividend was paid, and are not in the year in which the dividend is paid, a PFIC. Under current guidance issued by the IRS, the ADSs should qualify as readily tradable on an established securities market in the United States so long as they are listed on the New York Stock Exchange. However, no assurances can be given that the ADSs will be or remain readily tradable under future guidance. As discussed below, based on our audited financial statements, financial projections, relevant market and shareholder data, and current estimates regarding the value and nature of our assets, we do not believe that we were a PFIC for U.S. federal income tax purposes with respect to the current or the immediately preceding taxable year. However, because these determinations are based on the nature of our income and assets, and involve the application of complex tax rules, no assurances can be provided that we will not be classified as a PFIC for the current, or any past or future tax year. See [Passive Foreign Investment Company Rules](#) below.

Based on existing guidance, it is not entirely clear whether dividends received with respect to the preferred shares to the extent not represented by ADSs will be treated as qualified dividend income, because the preferred shares are not themselves listed on a U.S. exchange. U.S. holders should be aware that the U.S. Treasury Department has announced its intention to promulgate rules pursuant to which holders of ADSs or preferred stock and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to establish that dividends are treated as qualified dividend income. Because such rules have not yet been issued, we are not certain that we will be able to comply with them. Non-corporate U.S. holders of preferred shares or ADSs should consult their own tax advisors regarding the availability of the preferential U.S. federal income tax rates for qualified dividend income in the light of their own particular circumstances.

Dividends paid with respect to our preferred shares or ADSs generally will be treated as income from sources outside the United States. A U.S. holder will be entitled, subject to a number of complex limitations and conditions, to claim a U.S. foreign tax credit in respect of any Brazilian income taxes withheld on dividends received with respect to our preferred shares or ADSs. With respect to the U.S. foreign tax credit limitation, foreign-source income is classified in a specific basket, and the credit for foreign taxes on income in any basket is limited to the U.S. federal income tax allocable to such income. Dividends should constitute passive category income for most U.S. holders. A U.S. holder who does not elect to claim a credit for any foreign income taxes paid during the taxable year may instead claim a deduction in respect of such Brazilian income taxes, provided that the U.S. holder elects to deduct all foreign taxes paid or accrued for the taxable year. The IRS has expressed concern that intermediaries in connection with depositary arrangements may be taking actions that are inconsistent with the claiming of foreign tax credits by U.S. persons who are holders of depositary shares. Accordingly, the discussion above regarding the creditability of Brazilian withholding tax on dividends could be affected by future actions that may be taken by the IRS. The rules with respect to foreign tax credits are complex and U.S. holders should consult their own tax advisors regarding the availability of foreign tax credits in light of their particular circumstances.

Taxation of Capital Gains

In general, gain or loss, if any, realized upon a sale, exchange or other taxable disposition of our preferred shares or ADSs will be subject to U.S. federal income taxation as capital gain or loss in an amount equal to the difference between the amount realized (including the gross amounts of the proceeds of the sale, exchange or other taxable disposition before deduction of any Brazilian tax) on the sale, exchange or other taxable disposition and a U.S. holder's adjusted tax basis in our preferred shares or ADSs. Such capital gain or loss will be long term capital gain or loss if at the time of sale, exchange or other taxable disposition such U.S. holder held our preferred shares or ADSs for more

than one year. Certain non-corporate U.S. holders (including individuals) are eligible for preferential rates of U.S. federal income taxation in respect of long term capital gains. The deduction for capital losses is subject to certain limitations under the Code. Gain (or loss), if any, realized by a U.S. holder on the sale, exchange or other taxable disposition of our preferred shares or ADSs generally will be treated as U.S. source gain (or loss) for U.S. foreign tax credit purposes. Consequently, if a Brazilian income tax is imposed on the sale, exchange or other taxable disposition of our preferred shares or ADSs, a U.S. holder that does not receive sufficient foreign source income from other sources may not be able to derive effective U.S. foreign tax credit benefits in

respect of such Brazilian income tax. U.S. holders of our preferred shares or ADSs should consult their own tax advisors regarding the application of the U.S. foreign tax credit rules to their investment in, and disposition of, our preferred shares or ADSs.

Passive Foreign Investment Company Rules

Special U.S. federal income tax rules apply to U.S. persons owning shares of a PFIC. A non-U.S. corporation generally will be classified as a PFIC for U.S. federal income tax purposes in any taxable year in which, after applying the relevant look-through rules with respect to the income and assets of subsidiaries, either:

- at least 75% of its gross income is passive income ; or
- on average at least 50% of the gross value of its assets is attributable to assets that produce passive income or are held for the production of passive income.

For this purpose, passive income generally includes, among other things, dividends, interest, rents, royalties, gains from the disposition of passive assets and gains from commodities transactions.

Based on current estimates of our income and assets, we do not expect our preferred shares or ADSs to be considered shares of a PFIC for our current taxable year or the immediately preceding taxable year or for foreseeable future taxable years. However, because the determination of whether our preferred shares or ADSs constitute shares of a PFIC will be made by us on an annual basis, is based upon the composition of our income and assets (including, the income and assets of entities in which we hold at least a 25% interest), and the nature of our activities, from time to time, and because there are uncertainties in the application of the relevant rules, we cannot assure you that our preferred shares or ADSs will not be considered shares of a PFIC for any fiscal year. Moreover, we will not obtain an opinion of counsel, and no ruling will be sought from the IRS, regarding our annual PFIC determination. If our preferred shares or ADSs were shares of a PFIC for any fiscal year, U.S. holders (including certain indirect U.S. holders) may be subject to adverse U.S. federal income tax consequences upon a sale or other disposition of such preferred shares or ADSs, or upon the receipt of certain distributions from us (including imposition of an interest charge on gains or excess distributions attributable to prior years in the U.S. holder's holding period during which we were determined to be a PFIC).

If we are classified as a PFIC and, at any time, we invest in non-U.S. corporations that are classified as PFICs (each, a *Subsidiary PFIC*), U.S. holders generally will be deemed to own, and also would be subject to the PFIC rules with respect to, their indirect ownership interests in that *Subsidiary PFIC*. If we are characterized as a PFIC, the U.S. holder could incur adverse U.S. federal income tax consequences if either (1) we receive a distribution from, or dispose of all or part of our interest in, the *Subsidiary PFIC* or (2) the U.S. holder disposes of all or part of our preferred shares or ADSs.

Any year in which we are classified as a PFIC, U.S. holders will be required to file IRS Form 8621. If we are deemed to be a PFIC for a taxable year, dividends on our ADSs would not constitute qualified dividend income subject to preferential rates of U.S. federal income tax for non-corporate U.S. holders, as discussed above.

The special PFIC tax rules described above will not apply to a U.S. holder if the U.S. holder makes an election to *mark-to-market* with respect to our preferred shares or ADSs (a *mark-to-market election*). A U.S. holder of *marketable stock* in a PFIC may make a *mark-to-market election*, provided the PFIC stock is regularly traded on a *qualified exchange*. Under applicable U.S. Treasury regulations, a *qualified exchange* includes a national securities exchange, such as the New York Stock Exchange, that is registered with the SEC or the national market system established under the Securities Exchange Act of 1934. Also, under applicable Treasury regulations, PFIC stock traded on a

qualified exchange is regularly traded on such exchange for any calendar year during which such stock is traded, other than in *de minimis* quantities, on at least 15 days during each calendar quarter. We cannot assure U.S. holders that our preferred shares or ADSs will be treated as regularly traded for this purpose.

A U.S. holder that makes a mark-to-market election generally would (i) include in gross income, entirely as ordinary income, an amount equal to the difference between the fair market value of our preferred shares or ADSs as of the close of the taxable year and such U.S. holder's adjusted tax basis in our preferred shares or ADSs, and (ii) deduct as an ordinary loss the excess, if any, of such U.S. holder's adjusted tax basis in our preferred shares or ADSs

over the fair market value of our preferred shares or ADSs at the end of the taxable year, but only to the extent of the amount previously included in gross income as a result of the mark-to-market election (to the extent such inclusions were not offset by prior mark-to-market losses). A U.S. holder that makes a mark-to-market election will adjust its tax basis in our preferred shares or ADSs to reflect any income or loss recognized pursuant to the election.

Upon a sale or other taxable disposition of our preferred shares or ADSs, a U.S. holder that makes a mark-to-market election generally would (i) include in gross income, entirely as ordinary income the excess, if any, of the amount realized from the sale or other taxable disposition over such U.S. holder's adjusted tax basis in the preferred shares or ADSs, and (ii) deduct as an ordinary loss the excess, if any, of such U.S. holder's adjusted tax basis in our preferred shares or ADSs over the amount realized with respect to the preferred shares or ADSs, but only to the extent of the amount previously included in gross income as a result of the mark-to-market election (to the extent such inclusions were not offset by prior mark-to-market losses). Any remaining loss realized upon the sale or other taxable disposition shall be capital.

The mark-to-market election is made with respect to marketable stock in a PFIC on a shareholder-by-shareholder basis and, once made, can only be revoked with the consent of the IRS. Special rules would apply if the mark-to-market election is not made for the first taxable year in which a U.S. person owns stock of a PFIC.

Although a U.S. holder may be eligible to make a mark-to-market election with respect to our preferred shares or ADSs, no such election may be made with respect to the stock of any Subsidiary PFIC that such U.S. holder is treated as owning, because such Subsidiary PFIC stock is not marketable. Thus, the mark-to-market election will not be effective to avoid all of the adverse U.S. federal income tax consequences with respect to any Subsidiary PFICs.

U.S. holders should consult with their tax advisors regarding the application of the PFIC rules to our preferred shares or ADSs and the availability and advisability of making an election to avoid the adverse U.S. federal income tax consequences of the PFIC rules should we be considered a PFIC for any taxable year.

U.S. Backup Withholding and Information Reporting

A U.S. holder of our preferred shares or ADSs may, under certain circumstances, be subject to information reporting and backup withholding (currently at the rate of 28%), with respect to certain payments, such as dividends or the proceeds of a sale of our preferred shares or ADSs, unless the U.S. holder (i) is a corporation or comes within certain other exempt categories, and demonstrates this fact when so required, or (ii) provides a correct taxpayer identification number and certifies that such U.S. holder is not subject to backup withholding, and otherwise complies with applicable requirements of the backup withholding rules. Backup withholding is not an additional tax. Any amount withheld under these rules will be creditable against a U.S. holder's U.S. federal income tax liability, provided the requisite information is timely furnished to the IRS.

G. Statement by Experts

Not applicable.

H. Documents on Display

We are subject to the information requirements of the Securities Exchange Act of 1934, as amended, pursuant to which we file reports and other information with the U.S. Securities and Exchange Commission, or the Commission. Reports and other information filed by us with the Commission may be inspected and copied at the public reference room at the Commission at 100 F Street, N.E., Washington, D.C. 20549, and at the Commission's Regional Offices at 233 Broadway, New York, New York 10279 and Northwestern Atrium Center, 500 West Madison Street, Suite 1400, Chicago, IL 60661-2511. You may obtain copies of this material by mail from the Public Reference Section of the Commission, 100 F Street, N.E., Washington, D.C. 20549, at prescribed rates. You may also inspect these reports and other information at the offices of the New York Stock Exchange, 11 Wall Street,

New York, New York 10005, on which our ADSs are listed. We also file financial statements and other periodic reports with the CVM.

Copies of our annual report on Form 20-F and documents referred to in this annual report and our bylaws will be available for inspection upon request at our offices at Rua Levindo Lopes, 258, Funcionários, 30140-170, Belo Horizonte (MG), Brazil.

I. Subsidiary Information

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are primarily exposed to market risk from changes in both foreign currency exchange rates and interest rates. We are exposed to foreign exchange rate risk because certain of our costs and debt are denominated in currencies, primarily the U.S. dollar, other than the *real*, which is the currency in which we earn our revenues. Similarly, we are subject to market risk resulting from changes in interest rates, which may affect the cost of our financing. Except for swap instruments relating to foreign currency denominated debt, as described below, we do not use derivative instruments, such as foreign exchange forward contracts, foreign currency options and forward rate agreements, to manage these market risks, nor do we hold or issue derivative or other financial instruments for trading purposes.

Exchange Rate Risk

We have exchange rate exposure with respect to the U.S. dollar. At December 31, 2007, a major part of all of our indebtedness (R\$141.7 million) was indexed to the U.S. dollar. As of December 31, 2007, we had cross-currency interest swap agreements in effect for 100% of our total foreign currency indexed debt to mitigate foreign exchange rate risks.

Significant costs relating to our network infrastructure and handsets are linked to payment in U.S. dollars. However, other than revenues derived from cross-currency interest rate swap agreements, all of our revenues are generated in *reais*. If the value of the *real* decreases relative to the U.S. dollar, it will be more costly for us to pay for the U.S. dollar-denominated technology and goods that are necessary to operate our business, and we may be unable to pass the increased costs on to our customers.

Interest Rate Risk

At December 31, 2007, we had outstanding loans and financing in the amount of R\$6.2 million bearing interest at floating rates. We invest our excess cash (which was R\$730.6 million at December 31, 2007) mainly in short-term instruments. The potential loss in earnings to us over one year that would result from a hypothetical, instantaneous and unfavorable change of 100 basis points in the interest rates applicable to financial assets and liabilities on December 31, 2007 would be approximately R\$1.9 million for debt and swap instruments and R\$7.3 million for cash investments.

The above sensitivity analysis is based on the assumption of an unfavorable 100 basis point movement of the interest rates applicable to each homogeneous category of financial assets and liabilities and sustained over a period of one year. A homogeneous category is defined according to the currency in which financial assets and liabilities are denominated and assumes the same interest rate movement within each homogeneous category (e.g., U.S. dollars). As a result, our interest rate risk sensitivity model may overstate the impact of interest rate fluctuations for such financial instruments as consistently unfavorable movements of all interest rates are unlikely.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Currently, we are not in default under any of our obligations nor are any payment of dividends in arrears.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

ITEM 15. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

Management with the participation of our chief executive officer and chief financial officer, after evaluating, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 under Rules 13a-15(e)) as of December 31, 2007, the end of the period covered by this report, have concluded that, as of such date, our disclosure controls and procedures were adequate and effective to ensure information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and is collected and communicated to management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosures.

(b) Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2007. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework. Based on this assessment, management has concluded that, as of December 31, 2007, our internal control over financial reporting is effective based on those criteria.

Deloitte Touche Tohmatsu Auditores Independentes, as our independent registered public accounting firm, has issued an auditor's report on the effectiveness of internal control over financial reporting as of December 31, 2007.

(c) Attestation Report of Independent Registered Public Accounting Firm

To the Shareholders and Management of
Telemig Celular Participações S.A.
Belo Horizonte - MG - Brazil

We have audited the internal control over financial reporting of Telemig Celular Participações S.A. and subsidiary (the "Company") as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management

is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Telemig Celular Participações S.A. and subsidiary (the Company) as of December 31, 2007, and the related consolidated statements of operations, stockholders' equity, and cash flows for the year then ended and our report dated June 25, 2008 expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the Company's adoption of a new accounting standard.

/s/ Deloitte Touche Tohmatsu Auditores Independentes

Belo Horizonte, Brazil
June 25, 2008

(d) Changes in internal control over financial reporting

There were no changes in our Company's internal control over financial reporting that occurred during the period covered by this annual report that have materially affected, or are reasonably likely to materially affect, our Company's internal control over financial reporting.

Upon the change of our control, the members of our board of directors and executive committee were replaced by new members appointed by Vivo. Our new management has been reviewing our operations and believes the change of our management has not affected our internal control over financial reporting.

ITEM 16. [RESERVED]

ITEM 16A. Audit Committee Financial Expert

We have determined that Luiz Kaufmann, member of our audit and control committee is the audit committee financial expert as defined by the U.S. Securities and Exchange Commission.

ITEM 16B. Code of Ethics

Our board of directors has adopted a code of ethics applicable to our directors, officers and employees, including our principal executive officer, principal financial officer and controller, providing a whistleblower protection for those who report violations to the code terms. There were no waivers of compliance with our code of ethics in 2007.

ITEM 16C. Principal Accountants Fees and Services

The following table sets forth by category of service the total fees for services performed by Deloitte Touche Tohmatsu Auditores Independentes during the fiscal years ended December 31, 2007 and December 31, 2006, respectively:

	2007	2006
	(in thousands of reais)	
Audit Fees	656	589
Audit-Related Fees	24	
Tax Fees		
All Other Fees	135	
Total	815	589

Audit Fees

Audit fees in 2007 and 2006 consisted of the aggregate fees, including expenses, billed by Deloitte Touche Tohmatsu Auditores Independentes in connection with the audit of our annual financial statements prepared under U.S. GAAP and included in our annual report on Form 20-F, and in connection with the audit of our annual statutory financial statements prepared under Brazilian GAAP and reviews of our quarterly financial information filed with the CVM. Audit fees in 2007 and 2006 also include fees related to the audit of the management assessment and the effectiveness of the Company's internal control over financial reporting by Deloitte Touche Tohmatsu Auditores Independentes.

Audit-Related Fees

Audit related fees amounted to R\$24.2 thousand and refer to audit procedures on the allocation of cost and expense accounts in compliance with Anatel's request to all mobile telephone operators.

Tax Fees

None.

All Other Fees

All other fees include amounts paid to the former auditor related to the review of financial information filed with the SEC (Form 20-F) during 2007.

ITEM 16D. Exemptions from the Listing Standards for Audit Committees

Pursuant to the exemption under Rule 10A-3 (c)(3) of the U.S. Securities Exchange Act of 1934, we have a fiscal council (*conselho fiscal*), which is a board of statutory auditors that follows the requirements of Rule 10A-3(c)(3). In addition, on July 29, 2005, our board of directors decided that our fiscal council would undertake the responsibilities of an Audit Committee, including making recommendations to the board of directors on appointment and retention of independent auditors, processing complaints regarding accounting and auditing, authority to engage advisors.

ITEM 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

None.

PART III**ITEM 17. FINANCIAL STATEMENTS**

We have responded to Item 18 in lieu of responding to this Item.

GLOSSARY OF TELECOMMUNICATIONS TERMS

AMPS (Advanced Mobile Phone System):	The analogue mobile phone technology used in North and South Americas and in approximately 35 countries. Analogue technology represents information by a continuously variable physical quantity such as voltage. It operates in the 800MHz band using FDMA (Frequency Division Multiple Access) technology, which is a transmission technique where the assigned frequency band for a network is divided into sub-bands that are allocated to a subscriber for the duration of their calls.
base station:	A radio transmitter/receiver that maintains communications with the cellular telephones within a given cell. Each base station is interconnected with one MSO (Mobile Switch Office).
CDMA (Code Division Multiple Access):	Also known as spread spectrum, CDMA cellular systems use a single frequency band for all traffic, differentiating individual transmissions by assigning them unique codes before the transmission. There are a number of CDMA variations.
CDMA ONE:	The first commercial CDMA cellular system, deployed in North America and Korea and also known as IS-95.
CDMA 2000:	A member of the IMT-2000 family, compatible with CDMA ONE.
cell:	The area covered by a cellular base station. A cell site may allocate its antennas to service several cells from one location.
cellular service:	A mobile telecommunications service provided by means of a network of interconnected base stations, each of which covers one small geographic cell within the total cellular telecommunications system service area.
channel:	One of a number of discrete frequency ranges utilized by base stations and cellular phones.
digital:	A method for representing information as numbers with discrete values; usually expressed as a sequence of bits.
exchange:	See switch.
GSM (Global System for Mobile):	Global system for mobile communications, the second-generation digital technology originally developed for Europe. Initially developed for operation in the 900MHz band and subsequently modified for the 850, 1800 and 1900MHz bands. GSM originally stood for <i>Groupe Speciale Mobile</i> , the CEPT (Conference of European Post and Telecommunications) committee that began the GSM standardization process.
IMT 2000:	The family of third-generation technologies approved by the ITU (International Telecommunications Union).

network:	An interconnected collection of elements. In a telephone network, these consist of switches connected to each other and to customer equipment. The transmission equipment may be based on fiber optic or metallic cable or point-to-point radio connections.
network usage charge:	Amount paid per minute charged by network operators for the use of their network by other network operators. Also known as interconnection fee.
penetration:	The percentage of a given total population that owns a mobile phone.
repeater:	A device that amplifies an input signal for retransmission.

roaming:	A function that enables subscribers to use their cellular telephones on networks of service providers other than the one with which they signed their initial contract.
SMP (Serviço Móvel Pessoal):	A specific Brazilian set of rules for advanced digital cellular service, enacted by Anatel through Resolution no. 316, dated September 27, 2002, to replace the former SMC (<i>Serviço Móvel Celular</i>) cellular service rules. SMP is also an independent technology definition of service to which was originally allocated the 1.8GHz frequency band, almost equivalent to the North American PCS.
switch:	A device that opens or closes circuits or selects the paths or circuits to be used for transmission of information. Switching is the process of interconnecting circuits to form a transmission path between users. Switches may also record information for billing and control purposes.
T D M A (T i m e D i v i s i o n Multiple Access):	A technique for multiplexing multiple users onto a single channel on a single carrier by splitting the carrier into time slots and allocating these on an as-needed basis.
UMTS:	Third-generation wireless telecommunications system designed by ETSI (European Telecommunications Standard Institute) in accordance with ITU's (International Telecommunication Union) standard. It is viewed as the most likely upgrade of GSM systems.

SIGNATURES

Pursuant to the requirements of Section 12 of the Securities Exchange Act, as amended, the registrant certifies that it meets all of the requirements for filing this annual report on Form 20-F and has duly caused this annual report to be signed on its behalf by the undersigned, thereunto duly authorized.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Management of
Telemig Celular Participações S.A.
Belo Horizonte - MG - Brazil

We have audited the accompanying consolidated balance sheets of Telemig Celular Participações S.A. and subsidiary (the "Company") as of December 31, 2007 and 2006, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the two years in the period ended December 31, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The consolidated financial statements of the Company for the year ended December 31, 2005, before the effects of the adjustments to retrospectively apply the change in accounting disclosures discussed in Note 15 (g) to the consolidated financial statements, were audited by other auditors whose report, dated March 30, 2007, expressed an unqualified opinion on those statements.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Telemig Celular Participações S.A. and subsidiary as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2007, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Notes 3 and 17 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109, effective January 1, 2007.

We also have audited the adjustments to the consolidated financial statements for the year ended December 31, 2005 to retrospectively apply the change in accounting disclosures for the reverse stock split which occurred in 2007, as discussed in Note 15 (g) to the consolidated financial statements. Our procedures included (1) comparing the amounts shown in the earnings per share disclosures for the year ended 2005 to the Company's underlying accounting analyses, (2) comparing the previously reported shares outstanding and income statement amounts per the Company's accounting analyses to the previously issued consolidated financial statements, and (3) recalculating the additional shares to give effect to the reverse stock split and testing the mathematical accuracy of the underlying analyses. In our opinion, such retrospective adjustments are appropriate and have been properly applied. However, we were not engaged to audit, review, or apply any procedures to the 2005 consolidated financial statements of the Company other than those with respect to the retrospective adjustments and, accordingly, we do not express an opinion or any other form of assurance on the consolidated financial statements for the year ended December 31, 2005 taken as a whole.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 25, 2008 expressed an unqualified opinion on the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
Telemig Celular Participações S.A.

In our opinion, the accompanying consolidated statements of operations, of changes in shareholders' equity and of cash flows for the year ended December 31, 2005, before the effects of the adjustments to retrospectively apply the reverse share split described in Note 15 (g), present fairly, in all material respects, the results of operations and cash flows of Telemig Celular Participações S.A. and its subsidiary for the year ended December 31, 2005, in conformity with accounting principles generally accepted in the United States of America (the 2005 financial statements before the effects of the adjustments discussed in Note 15 (g) are not presented herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit, before the effects of the adjustments described above, of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

We were not engaged to audit, review, or apply any procedures to the adjustments to retrospectively apply the reverse share split described in Note 15 (g) and accordingly, we do not express an opinion or any other form of assurance about whether such adjustments are appropriate and have properly applied. Those adjustments were audited by other auditors.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****1 Background and Description of Business**

Telemig Celular Participações S.A. (the Company) is a publicly held company listed on the Brazilian and New York stock exchanges and the parent company of Telemig Celular S.A., a Brazilian listed company, in which it holds 89.18% (2006 89.18%) of its subsidiary's voting capital and 83.25% (2006 83.25%) of its total capital stock.

Telemig Celular S.A. (the Operating Subsidiary) is mainly engaged in providing cellular mobile services and any complementary activities required to perform such services, in conformity with the authorizations granted in the state of Minas Gerais under the terms of a concession granted by the Brazilian Federal Government on November 4, 1997, renewed in 2008, as described below (except for the Triângulo Mineiro Region which expires in 2020).

The services offered and the rates charged by the Operating Subsidiary are regulated by the National Telecommunications Agency (ANATEL), the regulating authority for the Brazilian telecommunications industry, according to the General Law of Telecommunications and relevant regulations.

(a) Concessions

In 2002, ANATEL promoted modifications to the December 2000 Personal Mobile Service Contract (SMP - *Serviço Móvel Pessoal*), encouraging companies operating under the Cellular Mobile Service Contract (SMC - *Serviço Móvel Celular*) to migrate to the SMP regime. SMP is an authorization contract and it replaces the SMC (concession contract). New rules are applicable to companies that migrate to the SMP regime, including changes on long-distance traffic billing and free negotiation between telecommunication service providers on network usage remuneration.

The Operating Subsidiary and ANATEL entered into an Authorization Instrument for the migration to the SMP, which became effective from March 1, 2004. The SMP authorization granted to the Operating Subsidiary is effective for an undetermined term. The radio frequency authorization that expires in 2008 is effective for the previously granted remaining period of the concession, and may be renewed for an additional 15-year period, with extensions being remunerated.

On October 20, 2005 the Company filed with ANATEL an application for extending the right of use of radio frequencies, associated with the instrument of authorization for personal mobile service. According to the regulations, the extension is automatically granted. The Radio-frequency Use Authorization Term has already been signed by Telemig Celular's representatives and by ANATEL's representatives on February 1, 2008 and published in the Official Federal Gazette on February 21, 2008.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

From August 2004, new rules governing the collection of interconnection fees became effective. Under the new rules, interconnection fees for local wireless traffic were due only if the traffic balances between any two companies operating in the same area were either less than 45% or in excess of 55% ("bill & keep" regime).

On July 13, 2006, ANATEL released Resolution No. 438 which approved the "Regulation on Remuneration for Network Usage of Personal Mobile Service Providers (SMP)". Among other amendments, Resolution No. 438 sets forth new rules for concession, pass-through and disclosure of discounts granted over the Value of Usage of SMP Network (VU-M) and established the end of the "bill & keep" regime mentioned above. Therefore, beginning July 14, 2006, the new regulation on SMP network usage fees issued by ANATEL established that interconnection payments between SMP operators for traffic in the same registration area should occur for the full amount of traffic between operators ("full billing" regime).

The creation of the "full billing" regime has resulted in an increase of interconnection costs and revenues in 2006 and 2007.

(b) Change in Regulations

On March 7, 2007 the Management Council of the ANATEL approved the numerical portability in fixed and mobile telephones. The rule will allow the users of the Exchanged Fixed Telephone Service (STFC) and the SMP to change carriers keeping their fixed or cellular phone number, as many times as they request.

The initial offer of portability, in experimental character, will start within 16 months, in capital cities to be chosen for implementation of the pilot-project and it will be totally available throughout the country within 24 months, from the publishing of the General Regulation of Portability in the Federal Official Gazette, occurred on March 21, 2007.

The Operating Subsidiary has already contracted network and Information Technology solutions, as well as reviewed all operating processes needed to the introduction of the portability in August, 2008, initially in the locations with Area Code 37. The other cities of the service provision area will be served as of November, 2008.

On August 13, 2007, ANATEL published in the Federal Official Gazette the New Regulation of the Personal Mobile Service (SMP). The new regulation sets forth new rules for customer service, plans migration, service suspension, validity of pre-paid credits, collection of messaging service, among others. The new regulation became effective as from February 13th, 2008. Considering the Company's operating results measured until the date of this report, no material effects were noted arising from the changes mentioned above.

(c) Stock Purchase Agreement

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

On August 2, 2007, Telpart, the Company's controlling entity, entered into a stock purchase agreement with Vivo Participações S.A. (Vivo), which objective is the sale of the total of the equity interest of Telpart in the Company's capital stock and of Tele Norte Participações S.A. (related company as of March 31, 2008).

Vivo Participações S.A. is the controlling shareholder of Vivo S.A., cellular mobile service and personal mobile service operator, in the areas 7 and 8 of Regions I and II, in the area 7 of Region II and of the SMP, in Region I (service areas 3 and 9), in Region II (service area 6) and Region III (service areas 1 and 2).

The execution of the Stock Purchase Agreement was approved in Telpart's Board Meeting held on August 2, 2007 and also by shareholders representing 99% of the total capital stock of Telpart's controlling entity - Newtel Participações S.A. (Newtel) in a previous meeting held on August 2, 2007, under the provisions of the Newtel's Shareholders Agreement.

Thereafter, the equity interest sale was approved in an Extraordinary Shareholders' Meeting of Telpart held on August 21, 2007 which, accordingly, confirmed the Stock Purchase Agreement.

The transfer of shareholder's control of the Telemig Celular Participações S.A. was approved by the Management Council of ANATEL on October 23, 2007. The Stock Purchase Agreement provided for the joint acquisition of the shares of Telemig Celular Participações S.A. and Tele Norte Celular Participações S.A.

On December 20, 2007 Vivo entered into a stock purchase agreement with Telemar Norte Leste S.A. aiming at selling the shares of Tele Norte Celular Participações S.A. which Telpart committed to sell to Vivo under the terms of the stock purchase agreement dated August 2, 2007.

The transfer of the shareholder's control of Tele Norte Celular Participações S.A. was approved by ANATEL on March 4, 2008.

On April 3, 2008, the transfer of the control of Telemig Celular Participações S.A. (and, indirectly, of Telemig Celular S.A.) to Vivo, as well as of Tele Norte Celular Participações S.A. (and, indirectly, of Amazonia Celular S.A.) became effective under the terms of the Stock Purchase Agreement entered into between Vivo and Telpart, having met all conditions set forth by the contract and the price has been paid.

At the same date, the transfer of the control of Tele Norte Celular Participações S.A. (and, indirectly, Amazonia Celular S.A.) to Telemar Norte Leste S.A. became effective under the terms of the Stock Purchase Agreement entered into Vivo and Telemar Norte Leste S.A.

In Extraordinary Shareholders' Meeting held on April 3, 2008 at Telemig Celular Participações S.A. and Telemig Celular S.A. the board members indicated by Vivo were elected in both Companies and the resignations presented by the fiscal council members were accepted. At the same date, the first meetings of the new board members were held, when the new executive boards of the Company and the Operating Subsidiary have been assigned. In meeting held on April 24, 2008, new fiscal council members of the Company and the Operating Subsidiary have been assigned.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The transaction will also be submitted to the Administrative Council of the Economic Law CADE, under the provisions of the applicable legislation

(d) Tender Offers (Vivo S.A.)

On April 3, 2008 Vivo communicated its shareholders and the public in general, under the terms of CVM Instruction nr. 358/02 that, at that date occurred the transfer of the shareholder's control of Telemig Celular Participações S.A. (and, indirectly, of Telemig Celular S.A.) as well as of Tele Norte Celular Participações S.A. (and, indirectly, of Amazonia Celular S.A.) to Vivo, according to the Stock Purchase Agreement entered into Vivo and Telpart (the Stock Purchase Agreement with Telpart), having been met the conditions set forth in the contract and made the payment of the price.

At the same date, Vivo sold the totality of the 1,292,679 common shares and the 3,715 preferred shares of Tele Norte Celular Participações S.A. acquired from Telpart to Telemar Norte Leste by the same price and conditions provided by the Stock Purchase Agreement with Telpart.

The price paid by Vivo for the 7,258,108 common shares and 969,932 preferred shares of Telemig Celular Participações S.A. on April 3, 2008, already added by the compensations provided by the Stock Purchase Agreement with Telpart, corresponds to R\$1,162,594, equivalent to the approximate value of R\$151.17 per common share and R\$67.43 per preferred share of Telemig Celular Participações S.A. The prices paid for the common shares of Telemig Celular Participações S.A. amount approximately to R\$2,625.04 per share of Telemig Celular S.A.

Additionally, Vivo acquired the rights of Telpart of subscribing shares to be issued by Telemig Celular Participações S.A. and by Tele Norte Celular Participações S.A. as a consequence of the option provided by the CVM Instruction 319/99, for the amounts already restated under the terms of the Stock Purchase Agreement with Telpart, of R\$70,511 and R\$22,611, respectively, having sold in the same date to Telemar Norte Leste the subscription rights to be issued by Tele Norte Celular Participações S.A. for the same amount that it had paid to Telpart for its acquisition.

On April 8, 2008 Vivo informed the market that, as approved by its Board of Directors on August 2, 2007, considering the conclusion of the control acquisition of the control of Telemig Celular Participações S.A. (and, indirectly, of Telemig Celular S.A.), Vivo, by means of its subsidiary TCO IP S.A. (Offeror) launched in Brazil in that date, a Tender Offer (Volunteer Tender Offer) for the acquisition of up to 1/3 of the preferred shares outstanding in the market of Telemig Celular S.A. and of Telemig Celular Participações S.A.. In the case of Telemig Celular Participações S.A., the TO will be extended to the holders of the preferred shares underlining the American Depositary Shares (ADSs) (Maximum Number of Shares). Each ADS of Telemig Celular Participações S.A. represents two preferred shares.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The public notice was broadcasted in the IPE (Eventual and Periodic Information) of CVM and in the local newspaper at the same date. The Tender Offer was filed with the Securities and Exchange Commission of the United States (SEC) also in this date and will be distributed to the holders of ADS of Telemig Celular Participações S.A.

The TO s main terms and conditions are the following:

The price, which corresponds to a premium of approximately 25% (twenty five per cent) over the weighted average of the Preferred Shares price of the respective Company, observed during the last 30 (thirty) trading days of BOVESPA previous to August 1st, 2007, inclusively, will be (i) R\$654.72 per preferred share of Telemig Celular S.A., and (ii) R\$63.90 per preferred share of Telemig Celular Participações S.A. For purposes of reference, the equivalent to approximately US\$74.68 per ADS of Telemig Celular Participações S.A. based on the average between the purchase and selling price of the North-American dollar of the PTAX 800 rate, as disclosed by the Central Bank of Brazil on April 4, 2008, of R\$1.711/US\$ 1.00.

To the holders of preferred shares in Brazil who accept the offer, the price will be paid cash in national currency, under the terms of the Public Notice and according to the norms of the Brazilian Company of Settlement and Custody (CBLC). To the holders of ADS of Telemig Celular Participações S.A. in the United States who accept the offer, the Bank of New York will operate as custody agent of the ADS s (Custody Agent), it will receive the payment in North-American dollars and will make the distribution to the holders of ADS s accepting the offer as set forth by the Tender Offer.

On April 11, Vivo informed the market that, as a result of the control of Telemig Celular Participações S.A. and, indirectly, Telemig Celular S.A., as per the announcement on April 3, 2008, Vivo filed before the Brazilian Securities and Exchange Commission, the application of Tender Offer (OPA for Sale of Control) for the purchase of all common shares outstanding in the market of these companies with the draft of the respective public notice. The effective launching of the Offer is subject to the registration and authorization by CVM and BOVESPA, under the terms of CVM Instruction nr. 361/02.

(e) New Technology

In auction carried out by ANATEL on December 18, 2007 Telemig Celular S.A. bought 2 lots of 2,100MHz fixed frequency to enhance its third generation (3G) cellular telephone services. The amount offered by both lots totaled R\$53.5 million.

The execution of the Radio-frequency Use Authorization Term by the Operating Subsidiary and by ANATEL occurred on April 28, 2008 with the payment of the first installment amounting to 10% of the total value of the contract. The balance will be paid within 12 months from the first installment.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

In 2007, the Company launched third generation products in Minas Gerais in the 850MHz frequency (which it already had). This new technology allows the offer of differentiated services to clients, with data transmission in high speed which make video-calls feasible.

2 Presentation of the Financial Statements

These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) and rules and regulations of the US Securities and Exchange Commission.

The Company has also prepared and issued consolidated financial statements in accordance with accounting practices adopted in Brazil, Brazilian Corporate Law and rules and regulations of the Brazilian Securities and Exchange Commission (CVM) (Brazilian GAAP), not included herewith.

The Brazilian GAAP distributable reserves are the basis out of which dividends are payable.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates are used for, but not limited to: selection of useful lives of the property, plant and equipment, provisions necessary for contingent liabilities, determination of provisions for income tax, allowance for doubtful accounts and other similar items. Actual results may vary from those estimates.

3 Summary of Significant Accounting Policies**(a) Consolidation**

The consolidated financial statements include the accounts of the parent company Telemig Celular Participações S.A. and of the Operating Subsidiary Telemig Celular S.A..

All inter-company transactions and balances are eliminated in consolidation. The main consolidation procedures include:

- Elimination of asset and liability accounts among the consolidated companies;
- Elimination of the capital, reserves and retained earnings of the Operating Subsidiary;
- Elimination of revenues and expenses generated by transactions among the consolidated companies;
- Separate disclosure of the minority interest in the consolidated financial statements, where applicable.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****(b) Cash and cash equivalents**

Cash and cash equivalents consist of highly liquid investments with original maturities of three months or less at the time of purchase which are readily convertible to known amounts of cash and which are so near their maturity that they present insignificant risk of changes in value because of changes in interest rates.

(c) Temporary cash investments

Securities that are bought and held primarily for the purpose of resale in the near term are classified as temporary cash investments assets and are stated at fair value.

Instruments utilized in trading activities include securities stated at fair value in accordance with SFAS N°. 115, "Accounting for Investments in Debt and Equity Securities." Fair value is generally based on quoted market prices. If quoted market prices are not available, fair values are estimated based on dealer quotes, pricing models or quoted pricing models or quoted prices for instruments with similar characteristics.

Realized and unrealized gains and losses are recognized to financial income/expenses.

(d) Accounts receivable, net of allowance for doubtful accounts

Trade receivables are mainly represented by services and products billed to customers, for services provided up to the balance sheet date but not yet billed, and by amounts arising from the use of the Operating Subsidiary's network, by subscribers of other telecommunications carriers.

Allowances are provided, when necessary, in an amount considered by management to be sufficient to meet expected losses.

(e) Inventories

Inventories mainly comprise mobile telephone handsets and are stated at the average acquisition cost, net of allowances for market value adjustment for handsets and accessories or in the event acquisition costs are higher than realizable values.

(f) Property and equipment

Property and equipment are stated at acquisition and/or construction cost less accumulated depreciation. Depreciation is provided using the straight-line method based on the estimated useful lives of the underlying assets as follows:

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

	Years
Buildings	20
Network equipment	3 to 5
Software	5
Mobile service authorization	10
Other	5 to 10

Interest accrued on loans and financing is capitalized as part of property and equipment through the date the asset is placed in service, and to the extent that loans and financing do not exceed construction-in-progress.

The Operating Subsidiary reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

As the wireless telecommunications industry is rapidly evolving it is reasonably possible that property and equipment could become impaired as a result of technological or other industry changes. For assets the Operating Subsidiary intends to hold for use, if the total of the expected future undiscounted cash flows is less than the carrying amount of the asset, a loss is recognized for the difference between the fair value and the carrying value of the assets. For assets the Operating Subsidiary intends to dispose of, a loss is recognized for the amount that the estimated fair value, less costs to sell, is less than the carrying value of the assets. The Operating Subsidiary uses the discounted cash flow method to estimate the fair value of long-lived assets.

(g) Income taxes

Income taxes in Brazil comprise federal income tax and social contribution taxes, as recorded in the Company's statutory accounting records. There is no state or local income taxes in Brazil. The Company and the Operating Subsidiary have applied FASB Statement of Financial Accounting Standard - SFAS No. 109, "Accounting for Income Taxes", for all years presented. The effect of adjustments made to reflect the requirements of US GAAP, as well as differences between the reporting basis of assets and the amounts included in the tax records, are recognized as temporary differences for the purpose of recording deferred income taxes. Net operating loss carry-forwards are recognized as deferred tax assets as losses are incurred to the extent that realization is considered to be more likely than not.

See item (s) below for a discussion of the adoption of FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109 in 2007.

(h) Provision for contingencies

The Company and its Operating Subsidiary are party to a number of legal proceedings in the normal course of their businesses. Based on the opinion of its legal advisors, management records provisions for contingencies when it considers a loss to be probable and estimable.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****(i) Foreign currency transactions**

Transactions in foreign currency are recorded at the prevailing exchange rate at the time of the related transactions. Foreign currency denominated assets and liabilities are translated using the exchange rate at the balance sheet date. Exchange differences are recognized in the statement of income as they occur.

(j) Swaps

The Operating Subsidiary recognizes its cross-currency and interest rate swap agreements on the balance sheet at fair value; with changes in fair value recorded through income.

(k) Revenue recognition

Revenues from services and sales of handsets and accessories are recognized when the service is provided or when the equipment is sold and delivered in accordance with SEC Staff Accounting Bulletin, or SAB, No. 104, *Revenue Recognition*, and Emerging Issues Task Force, or EITF, Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*. Revenues from cellular telephone services consist of monthly subscription charges, usage charges, network usage charges, long distance charges and charges for maintenance and other customer services. Unbilled revenues from the billing date to the month-end are measured and recognized as revenue during the month in which the service was provided.

The service agreements signed by customers in connection with sales of subsidized handsets are considered to be revenue arrangements with multiple deliverables. Total consideration received in these arrangements is allocated and measured using units of accounting within the arrangement (i.e., service and handset contracts) based on relative fair values. The Company does not charge activation fees in connection with its service agreements.

Revenues from the sales of prepaid cards are recognized according to the service used for each card or when credits contractually expire. The Company's *Plano Controle* rate plans also include a feature whereby unused credits do not expire each month but rather are available for future use. The Company defers revenue based on unused credits in prepaid cards and in the *Plano Controle* rate plan. Unused credits are controlled and measured by systems. The balance of the deferral as of December 31, 2007 and 2006 was R\$24,017 and R\$22,976, respectively, and has been included as Other under current liabilities in the consolidated balance sheets.

(l) Employees profit sharing

The Company and its Operating Subsidiary record employee profit sharing personnel expenses based on the achievement of performance goals established for the year, which is subject to the approval of the Shareholders Meeting.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****(m) Pension and other post-retirement benefits**

The Operating Subsidiary participates in (i) a multi-employer pension plan that covers employees who retired prior to January 30, 2000 and (ii) multiple employer pension plans that cover its active employees and employees who retired after 2000. The Operating Subsidiary also participates in a multi-employer post-retirement benefit plan for all of its employees.

Until December 31, 2005, the Operating Subsidiary accounted for such benefit costs in accordance with SFAS N° 87, Employers Accounting for Pensions (Note 19). Accounting for defined benefits plans requires the use of an actuarial method for determining defined benefit pension costs and provides for the deferral of actuarial gains and losses (in excess of a specific corridor) that result from changes in assumptions or actual results that may differ from that which was previously assumed.

On December 31, 2006, the Operating Subsidiary adopted SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132R (SFAS 158). This statement requires an employer to recognize the over or under-funded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through other comprehensive income. The net effect of the adoption of SFAS No. 158 on accumulated other comprehensive income was R\$13,956, net of taxes, on December 31, 2006.

For defined contribution plans, the Operating Subsidiary recognizes as an expense in the statement of operations, the contributions accrued in favor of the beneficiaries of the plans during the relevant periods.

(n) Advertising costs

Advertising costs are expensed as incurred and included in selling, general and administrative expenses. Such costs amounted to R\$ 34,556, R\$35,062 and R\$32,593 for the years ended December 31 2007, 2006 and 2005, respectively.

(o) Interest on shareholders' equity

Brazilian companies are allowed to pay limited amounts of interest attributable to capital to shareholders and treat such payments as a deductible expense for Brazilian income and social contribution tax purposes. This notional interest distribution is treated for accounting purposes as a deduction from shareholders' equity in a manner similar to a dividend. Interest attributable to capital is treated as a dividend for purposes of the mandatory dividend payable. A 15% tax is withheld and paid upon credit of the interest.

(p) Stock-based compensation plan

The Company grants stock options for a fixed number of shares to employees.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No.123(R), *Share-Based Payment*. SFAS 123(R) amended SFAS 123, *Accounting for Stock-Based Compensation* and superseded Accounting Principles Board Opinion (APB) No. 25, *Accounting for Stock Issued to Employees*. In March 2005, the SEC issued Staff Accounting Bulletin (SAB) No.107 to provide guidance on the valuation of share-based payments for public companies. SFAS 123(R) requires companies to recognize all share-based payments, which include stock options and restricted stock, in compensation expense over the service period of the share-based payment award.

SFAS 123(R) establishes fair value as the measurement method in accounting for share-based payment transactions with employees.

The Company adopted SFAS 123(R) effective January 1, 2006 using the modified prospective method in which compensation cost is recognized over the service period for all awards granted subsequent to the Company's adoption of SFAS 123(R) as well as for the unvested portions of awards outstanding as of the Company's adoption of SFAS 123(R). In accordance with the modified prospective method, results for prior periods have not been restated.

As required under this statement, costs resulting from all stock-based compensation transactions are recognized in financial statements. The amount of compensation cost recorded is measured based on the grant-date fair value of the equity or the liability instruments issued. In addition liabilities awards are reassessed each reporting period. Compensation cost is recognized over the period that an employee provides services in exchange for the award.

Prior to the adoption of SFAS 123(R), the Company accounted for stock option grants in accordance with APB Opinion No. 25 *Accounting for Stock Issued to Employees* and related Interpretations.

Pro forma information regarding net income (loss) and earnings (loss) per share was required by SFAS No.123 *Accounting for Stock-Based Compensation* and had been determined as if the Company had accounted for its employee stock options under the fair value method (see Note 24).

The Company has primarily used the Black-Scholes option-pricing model to determine fair value of options issued. The following table presents the pro forma impact on losses and losses per share for the years ended December 31, 2005 if the Company had applied the fair value recognition provisions of SFAS No.123.

	2005
Net income as reported (*)	160,709
Basic earnings per shares (in reais)	
Preferred	4.56
Common	4.56
Diluted earnings per shares (in reais)	
Preferred	4.55
Common	4.55

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Compensation expense under the fair value method (SFAS 123), net of taxes	(81)
Pro forma net income	160,628
Pro forma basic earnings per shares (in reais)	
Preferred	4.55
Common	4.55
Pro forma diluted earnings per shares (in reais)	
Preferred	4.55
Common	4.55

()Per share numbers have been adjusted to reflect the reverse share split and the consolidation of our shares which occurred in 2007. See Note 15(g).*

For purposes of pro forma disclosures, the estimated fair value of the options was amortized to expense over the options' expected life.

(q) Segment information

The Company has adopted SFAS No 131 "Disclosures about Segments of an Enterprise and Related Information" which introduces a "management approach" concept for reporting segment information, whereby financial information is required to be reported on the basis that the chief operating decision-maker uses such information internally for deciding how to allocate resources to segments and in assessing performance. Management, however, has concluded that the Company and its Operating Subsidiary operate in a single segment - telecommunication services provider - and does not consider additional segment disclosures to be necessary.

(r) Asset Retirement Obligation

In March 2005, FASB issued FASB Interpretation N° 47, Accounting for Conditional Asset Retirement Obligations. This statement requires companies to recognize a liability for the fair value of a legal obligation to perform asset retirement obligations that are conditional on a future event if the amount can be reasonably estimated. This statement became effective on December 31, 2005.

The Operating Subsidiary performed an analysis for the retirement of its cellular mobile site structures, switches and equipment (ground towers, roof top sites, and co-location sites) under FIN 47 to determine whether the Operating Subsidiary had any asset retirement obligations. Although the timing of the performance of the asset retirement activity is conditional on removing the towers and equipment and disposing them, the Operating Subsidiary has the responsibility to remove the towers and equipment, dispose of the assets and return the sites as originally found in accordance with the lease agreements.

The Operating Subsidiary determined an average price for removing the towers and equipment. The calculation was performed based on the number of sites and considered (i) for GSM sites, a period through 2023 and 2035 and (ii) for TDMA sites, a period through 2014. Since the Operating Subsidiary expects to assume the obligation for dismantling

and removing the assets and restoring the site on which they are located, all sites were considered in the calculation. As of December 31, 2005 the cumulative effect of the adoption of FIN 47 in liability and in property and equipment amounted to R\$7,020. The effect in the income statement was not significant. As of December 31, 2007, the updated liability for asset retirement obligations amounted to R\$14,175 (Note 13). The increase in the liability for asset retirement obligations and the depreciation of the related assets resulted in additional expenses of R\$2,551 in 2007.(2006 R\$ 2,018)

F-22

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****s) New accounting pronouncements**

- In June 2006, the FASB issued FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in tax returns. Specifically, the financial statement effects of a tax position may be recognized only when it is determined that it is more likely than not that, based on its technical merits, the tax position will be sustained upon examination by the relevant tax authority. The amount recognized shall be measured as the largest amount of tax benefits that exceed a 50% probability of being recognized. This interpretation also expands income tax disclosure requirements. The Company applied the provisions of this interpretation beginning in the first quarter of 2007. The adoption of this standard did not present a material impact on the Company's consolidated financial statements.
- In September 2006, FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurement. SFAS No. 157 does not require any new fair value measurements. This statement is initially effective for financial statements issued for fiscal years beginning after November 15, 2007 (calendar year 2008), and is to be applied prospectively as of the beginning of the year in which it is initially applied. For all nonrecurring fair value measurements of nonfinancial assets and liabilities, the statement is effective for fiscal years beginning after November 15, 2008 (calendar year 2009). The Company is currently evaluating the provisions of this statement, but, as of this date, does not expect the application of this standard to change its current practice. The Company will apply the requirements of SFAS No. 157 as transactions occur.
- In February 2007, FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, a standard that provides companies with an option to report selected financial assets and liabilities at fair value. The Standard requires companies to provide additional information that shows the effect of the Company's choice to use fair value on its earnings. It also requires entities to display the fair value of those assets and liabilities for which the Company has chosen to use fair value on the face of the balance sheet. The new Statement does not eliminate disclosure requirements included in other accounting standards, including requirements for disclosures about fair value measurements included in FASB Statements No. 157, Fair Value Measurements, and No. 107, Disclosures about Fair Value of Financial Instruments. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. The Company elected not to apply the fair value option to any of its financial assets or liabilities at January 1, 2008.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

- In December 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 141(R), Business Combinations. Statement 141(R) establishes principles and requirements for how an acquiring entity in a business combination recognizes and measures the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information needed to evaluate and understand the nature and financial effect of the business combination. This statement will be effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 (calendar year 2009).
- In December 2007, the FASB also issued SFAS No. 160, Non-controlling Interests in Consolidated Financial Statements, an amendment of ARB 51. This statement clarifies that a non-controlling (minority) interest in a Operating Subsidiary is an ownership interest in the entity that should be reported as equity in the consolidated financial statements. It also requires consolidated net income to include the amounts attributable to both the parent and non-controlling interest, with disclosure on the face of the consolidated income statement of the amounts attributed to the parent and to the non-controlling interest. This statement will be effective prospectively for fiscal years beginning after December 15, 2008 (calendar year 2009), with presentation and disclosure requirements applied retrospectively to comparative financial statements. The Company is currently evaluating the provisions of this statement.
- In March 2008, the FASB issued SFAS 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133. This Statement requires enhanced disclosures about an entity's derivative and hedging activities and thereby improves the transparency of financial reporting. This Statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. This Statement encourages, but does not require, comparative disclosures for earlier periods at initial adoption. Management is evaluating the potential impacts of this statement in company's consolidated financial statements.
- In May 2008, the FASB issued SFAS 162, The Hierarchy of Generally Accepted Accounting Principles. This Statement identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States. This Statement shall be effective 60 days following SEC's approval of the Public Company Accounting Oversight Board (PCAOB) amendments to AU Section 411 The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles. Management is evaluating the potential impacts of this statement in company's consolidated financial statements.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****4 Temporary Cash Investments**

On December 31, 2007 and 2006, temporary cash investments were mainly represented by interests held by the Company and by the Operating Subsidiary, together with the related companies, Tele Norte Celular Participações S.A. and Amazônia Celular S.A., in an exclusive quotas investment fund managed by Banco Itaú S.A., comprised by quotas of financial investment funds. On December 31, 2007 and 2006, the portfolios of the Investment Funds were substantially comprised of Brazilian federal government securities with original maturities of more than three months, as follows:

	2007	2006
Brazilian Federal Treasury Bills LTN	53.3%	62.4%
Brazilian Financial Treasury Bills - LFT	31.3%	26.7%
Bank Certificates of Deposit CDB s	12.4%	-
Other	3.0%	10.9%
	100.0%	100.0%

On December 31, 2007 and 2006, there were no guarantees, sureties, mortgages or other guarantees granted in favor of the exclusive funds.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

On December 31, 2007 and 2006, accounts receivable from telecommunications services also included amounts receivable from customers relating to the pass-through of domestic and international long-distance calls made by the Operating Subsidiary's subscribers using the Carrier Selection Code (CSP) of the long-distance carriers, according to the SMP rules.

On December 31, 2007, the Operating Subsidiary had past due accounts receivable from other operators in the amount of R\$30,306 (2006 R\$60,287), resulting from the use of its network. The past due amounts are in the process of collection and negotiation with the operators, which also involve Company's past due accounts payable amounting to R\$22,739 (2006 R\$49,266) (Note 9 (b)) in view of not having collected a portion of the mentioned receivables. Management believes that the recovery of past due amounts is probable.

During 2007, the Operating Subsidiary concluded negotiation for a portion of the past due accounts receivable in the amount of R\$52,754, which also included the settlement of the related accounts payable in the amount of R\$49,266, without material impacts in Operating Subsidiary's statements of operations.

7 PIS and COFINS Taxes Recoverable

In 2005, the Operating Subsidiary was successful in its legal action that questioned the constitutionality of the increase in the calculation base of PIS and COFINS (taxes on revenues) (Law 9,718). Accordingly, considering that the decision is final and unappealable, the Operating Subsidiary recognized the credit of these taxes as current assets, in the amount of R\$21,303, against Financial expense in the statement of operations in 2005. The updated amounts of this credit at December 31, 2007 is R\$33,011 in the Operating Subsidiary.

In 2006, the Company was successful in its legal action that questioned the constitutionality of the increase in the calculation base of PIS and COFINS (Law 9,718). Therefore, considering that the decision is also final and unappealable, the Company recognized the credit of these taxes, in the amount of R\$16,622, against Financial expense in the statement of operations in 2006. The updated amounts of this credit at December 31, 2007 is R\$19,146, which are recorded as non-current assets.

The companies will use their credits after the legal ratification by the Federal Revenue Services.

Long-term portion	147,930	171,040

F-28

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

As of December 31, 2007 long-term debt installments fall due as follows:

2009	141,704
2018 to 2021	6,226
Total	147,930

At December 31, 2007, accrued interest on long-term debt in the amount of R\$5,904 (2006 R\$7,127) is shown in the caption "Accrued liabilities" in current liabilities.

In compliance to the personal mobile service providing contract, pursuant to the public selection of Nr. 001/2007, the State of Minas Gerais, through the State Secretary of Economic Development, has undertaken to subscribe debentures issued by the Company's Operating Subsidiary in the scope of the *Minas Comunica* Program, using resources of the FUNDOMIC - Telecommunication Services Universalization Access Fund. As per the referred program, the Operating Subsidiary will make available the service with the Personal Mobile Service to 134 locations of the area codes 34, 35 and 38.

According to the program, 5,550 simple non-convertible debentures will be issued, nominative and scriptural, without the emission of issuance certificates, up to a five series limit.

On December, 2007, as counterpart of the State Secretary of Economic Development certification from serving 15 locations, Company's Operating Subsidiary issued 621 non convertible debentures based on its 1st Issuance (1st series) in the total amount of R\$6,210.

In 2004, the Operating Subsidiary issued US\$80 million unsecured senior notes bearing fixed annual interests of 8.75% due 2009, combined as units with issuance by Amazônia Celular S.A. of US\$40 million also bearing fixed annual interests of 8.75% due 2009.

The Unsecured Senior Notes and non-convertible debentures funding program includes restrictive covenants regarding the use of funds for the purposes specified in the agreements, certain related-party transactions, merger and takeover transactions, and certain limits substantially based on balance sheet financial ratios, among others. In the event of default by the Operating Subsidiary and/or Amazônia Celular S.A., the amortization of the notes may be accelerated.

As of December 31, 2007, the Company was in compliance regarding to its obligations under debt covenants. However, on December 31, 2006, Amazônia Celular S.A. breached the financial covenants contained in the Indenture related to the notes. On April 16, 2007, Management of the Operating Subsidiary and Amazônia Celular obtained waiver by the requisite amount of holders of the notes, thereby curing the effects of an event of default. The waiver included certain modifications on the covenant calculation terms that are more favorable to the companies. As such, the companies were not in breach of the financial covenants as of March 31, 2007 and Management did not expect to breach these covenants on the following quarters of 2007. Therefore, in 2006 financial statements, the debt was

presented as non-current liabilities in accordance with the original terms of the Indenture.

F-31

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The provisions include not only the tax and other amounts allegedly due, but also interest that may be imposed in the event the Operating Subsidiary's position does not prevail. The court judicial deposits accrue interest based on federal or state official rates.

(a) Tax contingencies**i. Value Added Tax on Sales and Services (ICMS) on monthly subscription and value-added services**

Management, supported by its legal advisors, believes that ICMS should be levied only on telecommunications services and, therefore, the levy on monthly subscriptions and value-added services is unlawful since these are not deemed telecommunications services. The Operating Subsidiary was granted an injunction that suspended the taxation on monthly subscriptions, however it was required to deposit in court the amounts involved against which a provision for loss was made. The provision recorded at December 31, 2007 was R\$691,742 (2006 R\$600,752) with corresponding judicial deposits in the same amount (2006 R\$600,752).

In 2008, after an assessment made by Company's internal and external legal advisors over the progress of the judicial claim that questioned the ICMS taxation over monthly subscription and value added services, *the* Operating Subsidiary entered into with *Minas Gerais* State an Adhesion Term to *the* ICMS Agreement Nr. 72/2006 (incorporated, with limitations, by the *Decree Nr. 44422/2006 and later amendments*). The referred Decree and its modifications authorized the State to grant a partial waiver (reduction in tax rate) on Company's overdue ICMS and its legal increases related to communication services. As a result of the referred Term, the Operating Subsidiary filed, at the Superior Court of Justice, a petition waiving the legal proceeding with the express consent of the State of Minas Gerais, which, as a counterpart, reimbursed the Company the amount of R\$251,624, corresponding to the difference between the judicial deposits and the amounts due in connection with the application of the referred Decree. Starting February 2008, the Operating Subsidiary reassumed its ICMS payments over subscription fees and value added services.

As a consequence of the exposed above, in 2008, the Operating Subsidiary reversed the totality of the ICMS provision over subscription and value added services in the amount of R\$700,005, of which R\$448,381 recorded against to judicial deposits recorded in the long term assets and R\$251,624 recorded in 2008 statement of operation. The 2008 earnings effect, net of expenses, income and social contribution taxes and minority interests amounted R\$126,755.

ii. INSS

On July 2, 2002, the Operating Subsidiary received a tax assessment from the INSS (Brazilian Institute of Social Security) concerning its co-responsibility for the payment of the INSS contribution of service providers and the withholding of 11% as provided for by Law 9,711/98. At December 31, 2007 and 2006, the Operating Subsidiary had a provision of R\$3,547 to cover probable losses arising from this tax assessment, based on the opinion of its legal advisors. The Operating Subsidiary has a judicial deposit in the amount of R\$5,799 at December 31, 2007 and 2006, recorded as Judicial Deposits in non-current assets.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****iii. Telecommunications Inspection Fee (FISTEL)**

The Operating Subsidiary filed a writ of mandamus questioning the responsibility for the payment of inspection fees on mobile stations, which are not owned by the Operating Subsidiary. The Operating Subsidiary has provided for the obligation and deposited amounts in court related to the Operating Inspection Fee (TFF) and Installation Inspection Fee (TFI). The provision recorded at December 31, 2007 was R\$246,273 (2006 - R\$187,421), with corresponding court deposits in the same amount.

On June 6, 2008, we received a notification from Anatel regarding the collection of the TFI tax on our radio based stations (*estações rádio-base*), or ERBs, and also on all our handsets and those of our clients. According to Anatel, since we are currently in the process of renewing our SMP license, we would be required to also renew the licenses of our handsets and ERBs. FISTEL legislation, in turn, establishes that the payment of the TFI tax is due when licensing ERBs and handsets. As a result, according to Anatel, when a mobile operator renews its mobile operations license it must also license its handsets and ERBs and pay the TFI tax over these amounts. We intend to issue new licenses for our handsets and ERBs in compliance with Anatel's requirements and paid the TFI tax only in relation to our ERBs, in the approximate amount of R\$1.7 million. On June 20, 2008 we submitted a defense challenging the application of the TFI tax on handsets based on the argument that there will be no new installation of handsets. We are currently awaiting decision on the matter. The amount involved in this administrative proceeding is R\$101.2 million. As we and our legal advisors believe the chance of loss of this lawsuit is possible, no provision has been recorded.

iv. Universalization Fund of Telecommunications Services - FUST

Pursuant to Article 6 of Law 9,998/2000, which instituted the FUST, the Operating Subsidiary does not include in the contribution calculation basis revenues from telecommunications service providers as interconnection remuneration and from use of its network resources. On December 15, 2006, the Board of ANATEL approved the Precedent No. 7 which determines the inclusion of such revenues in the calculation base of FUST, with retroactive application to January 2001.

In the understanding of management and its legal advisors, the Precedent No. 7 of ANATEL contravenes the provisions of Law 9,998/2000, in addition to several constitutional provisions. In January 2006, the mobile telephone carriers filed for a Writ of Mandamus with the purpose of protecting their legal rights to continue to pay FUST without any increase of the calculation base not provided for by law.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Due to its technical complexity, the injunction request pleaded was denied by the first jurisdiction judge. The petitioners appealed this decision in the Federal Regional Court of the 1st Region, by means of a Bill of Review, and in a decision handed down on March 10, 2006, the Superior Court Judge granted the injunction request to remove the application of the second part of the Precedent No. 7 of Anatel, up to the judgment of its merit.

On October 20, 2006 the Company received 12 Assessment Notices related to FUST on the revenues from interconnection in 2001. On October 27, 2006 it received additional 12 Assessment Notices that were duplicates of those received on October 20. The Notices total R\$11,818. The pertinent Administrative Appeals were filed on November 27, 2006.

Corroborating the above understanding, on March 5, 2007, The Honorable Federal Judge of the Lower Court of the Federal District judged the action in favor of the Company, permitting calculation and payment of the FUST contribution on the total amount of the gross operating revenue arising from telecommunication services, without inclusion of the amounts for transfer of interconnection charges. ANATEL filed an interlocutory appeal to the Court which is still pending judgment.

As a result, the FUST on the Operating Subsidiary's interconnection revenues has its collection suspended.

On October 19, 2007, the Operating Subsidiary received 12 more Assessment Notices related to FUST over fiscal year 2002 interconnection revenues, in the amount of R\$7,840. The respective administrative appeals have been filed by retained legal counsels.

On June 3, 2008, the Operating Subsidiary received 12 more Assessment Notices related to FUST over fiscal year 2003 interconnection revenues, in the amount of R\$9,104. The respective administrative appeals will be filed by retained legal counsels.

In the understanding of management and its legal advisors, there are possible chances of loss in this proceeding. Accordingly, no provision for contingency has been recorded. On December 31, 2007 the amount related to such proceeding was R\$30,519 (2006 - R\$28,032).

v. Fund for Telecommunications Technological Development - FUNTTEL

Based on the provisions of Law 10,052/2000 and Decree 3,737/2001, which instituted FUNTTEL, the company does not include in the calculation basis of the contribution the revenues obtained by providers of telecommunication services on account of remuneration for interconnection and for the use of its network resources.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The Ministry of Communications took advantage of the interpretation given by ANATEL in publishing the Compendium 07/2005 to also assess and collect FUNTELL over interconnection revenues, however, without any regulation that authorizes such collection.

On December 11, 2006 the Operating Subsidiary received an Assessment Notice related to the FUNTELL on interconnection revenues in 2001, amounting to R\$2,999. The law firm retained presented the pertinent Administrative Appeals which are still pending judgment.

On October 11, 2007 the Operating Subsidiary filed, together with the other cellular carriers, an Interlocutory Injunction to argue the collection of FUNTELL on interconnection revenues.

On November 12, 2007 the preliminary decision favorable was granted by the TRF (Federal Regional Court of Appeals) (1st Region) allowing the Operating Subsidiary to calculate and pay the FUNTELL contribution based on its gross operating revenue from telecommunications services, without the inclusion of the interconnection transfers amounts.

Based on the decision of the TRF (1st Region), the requirement to collect FUNTELL over interconnection revenues has been suspended.

On November 28, 2007, the Operating Subsidiary received 01 Assessment Notice from the Ministry of Communications referring to the FUNTELL (fiscal year 2002) over interconnection revenues, in the amount of R\$4,930. The retained legal counsel presented the administrative appeal which is still pending judgment.

Additionally, in the understanding of Management and of its legal counsel, the chances of loss in these proceedings are possible, in both administrative and judicial levels.

Thus, no provision was booked for this contingency. On December 31, 2007, the total amount estimated for this claim was R\$17,907 (2006 - R\$16,986).

vi. Other tax contingencies

The Operating Subsidiary is subject to other tax proceedings for which provisions were made in the amounts of R\$27,451 at December 31, 2007 (2006 - R\$16,765) with the corresponding court deposits at December 31, 2007 totalling R\$17,929 (2006 - R\$8,752). Management, based on the opinion of its legal advisors, believes that the provision recorded is sufficient to cover probable losses that might result from these proceedings.

(b) Civil and labor contingencies

The Company and its Operating Subsidiary are parties to certain labor and civil lawsuits. Civil contingencies refer mainly to proceedings filed by the Operating Subsidiary's customers and to labor contingencies proceedings filed by its former employees. Based on the opinion of its legal advisors, management believes that the provision recorded in the amount of R\$10,763 at December 31, 2007 (2006 - R\$7,526) is sufficient to cover probable losses that might arise from these proceedings. The corresponding court deposits totaled R\$7,269 at December 31, 2007 (2006 - R\$5,026).

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****(c) Possible and remote loss contingencies not accrued for**

The Operating Subsidiary has other tax claims involving risks of loss classified by management and its legal advisors as possible in the amount of R\$43,602 at December 31, 2007 (2006 R\$9,387) for which no provision for contingencies has been recorded.

15 Shareholders Equity**(a) Capital Stock**

The Company's authorized share capital at December 31, 2007 and 2006, comprised 700,000,000 thousand shares.

Changes in number of shares outstanding considering the pro-forma reverse share split effects, mentioned in item (g), below:

	Common shares	Preferred shares	Total
At December 31, 2004	13,019,813	21,987,398	35,007,211
Issued in April (Note 15(e))	143,351	242,085	385,436
At December 31, 2005	13,163,164	22,229,483	35,392,647
Issued in April (Note 15(e))	140,588	237,420	378,008
At December 31, 2006	13,303,752	22,466,904	35,770,656
Issued in April (Note 15(e))	162,307	274,098	436,405
At December 31, 2007	13,466,059	22,741,002	36,207,061

During 2007, 2006 and 2005, R\$34,654, R\$16,340 and R\$54,331, of retained earnings, respectively, were capitalized. Such capitalization did not affect the number of shares outstanding and did not involve issuance of additional shares.

(b) Share rights

The preferred shares are non-voting, except under limited circumstances, and are entitled to receive, (a) on a priority basis, minimum, annual non-cumulative dividends according to the greater of the following: (i) 6% of the stated value of the Company's preferred shares; or (ii) (a) 3% of the stated value of the Company's shareholders' equity; and (b) the right to a portion of the profits to be distributed on the same basis as common shares, after common shares have been paid a dividend equal to the minimum preferred dividend mentioned in (a).

Preferred shares will acquire voting rights should the Company, during three (3) consecutive years, fail to pay the minimum dividends they are entitled to.

(c) Dividends

F-36

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

All shareholders are entitled to an annual dividend of not less than 25% of the net income of each year upon the existence of accumulated retained earnings, calculated in accordance with Brazilian Corporate Law.

Management is required by the Brazilian Corporate Law to propose dividends at year-end to conform to the mandatory minimum dividend regulations. At December 31, 2007, the proposed dividend of R\$38,548 (2006 R\$34,583) was recorded as a liability in the statutory financial statements.

For purpose of US GAAP financial statements, the December 31, 2007 and 2006 liabilities reflect only the amount of the minimum mandatory dividend for 2007 (based on 25% of Brazilian GAAP adjusted net income) of R\$38,548 (2006 R\$30,237). The supplementary dividends (over and above the minimum mandatory dividend) in the amount of R\$4,346 for fiscal year 2006 were recorded as an obligation in the US GAAP financial statements after declared and approved by the shareholders at the Annual Shareholders Meeting. In prior years the minimum and the supplementary dividends were recorded as an obligation only when declared and approved at the Annual Shareholders Meeting. No supplementary dividends were declared for fiscal year 2007.

If dividends remain unclaimed for a period of three years, a shareholder's right to receive the dividend expires. During 2007, 2006 and 2005, dividends totaling R\$1,765, R\$1,155 and R\$1,264, respectively, expired and were reversed to shareholder's equity.

In the event of winding-up of the Company, the preferred shares shall have priority to capital reimbursement.

Dividends provided per share, considering the pro-forma reverse share split effects, mentioned in item (g), below, were:

	(in reais)		
	2007	2006	2005
Preferred shares	1.18	2.15	3.53
Common shares	1.18	2.15	3.53

(d) Stock option plan

At December 31, 2007 the Company has reserved 1.75 shares (or 17,506 shares before the reverse share split) of preferred stock for issuance in connection with its stock option grants (Note 24).

(e) Capital reserves

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

On December 28, 1999, the shareholders approved a legal reorganization whereby Telpart contributed assets to the Company, resulting in future tax benefits. A deferred tax asset of R\$212,045 was recorded as a direct credit to equity which may be realized over a period of up to ten years. Realization is dependent on the Company generating sufficient taxable income in the future. In accordance with Brazilian Corporate Law, the Company may issue shares (*pro rata* both common and preferred) to Telpart for the amount of the tax benefits recognized. In addition, minority shareholders are granted preemptive rights. If the minority shareholders do not elect to exercise these rights, the shares will be issued to and subscribed for by Telpart. As of December 31, 2007 the unrealized portion of the capital reserve related to the legal reorganization determined in accordance with the Brazilian Corporate Law amounted to R\$74,724.

During 2007, 2006 and 2005, the Company issued 274 thousand, 237 thousand and 242 thousand preferred shares, respectively, and 162 thousand, 141 thousand and 143 thousand common shares, respectively, to the shareholder that contributed the tax benefit. The issuances were reflected as a reduction in the Capital reserves accounts with a corresponding increase in contributed capital.

(f) Retained earnings**(i) Appropriated retained earnings**

Appropriated retained earnings are reserve balances, which are restricted as to their distributions that reflect the amounts in the Brazilian GAAP financial statements. The tax incentive and statutory reserves may be transferred to capital or used to absorb losses in the statutory accounting records, but are not, generally, available for distribution as cash dividends.

The statutory reserve is formed based on (i) appropriations from retained earnings of 5% of annual net income in accordance with the Company's Brazilian GAAP financial statements and (ii) tax incentive reserve which arises from an option to apply for certain government approved projects. The amount so applied is credited to income tax and subsequently appropriated from retained earnings to this reserve.

The retained earnings balance includes appropriated retained earnings of R\$56,513 at December 31, 2007 (2006 - R\$49,092) determined in accordance with the Brazilian Corporate Law .

(ii) Unappropriated retained earnings

Brazilian law allows the payment of dividends only in *reais* limited to the retained earnings balances determined in accordance with the Brazilian Corporate Law. Distributable retained earnings aggregated R\$583,582 at December 31, 2007 (2006 - R\$514,034).

(g) Reverse share split

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

In Extraordinary Shareholders Meeting, held on July 12, 2007, the reverse split of Company's representative shares was approved. The shares were grouped in the proportion of 10.000 (ten thousand) existing shares to 01 (one) share of the respective class.

In Extraordinary Shareholders Meeting, held on October 29, 2007, the change in Company's shareholders equity structure was approved in connection with the reverse share split mentioned above.

In October, 2007, the Company performed auctions to sell 563,690 common shares and 490,651 preferred shares related to the fractions resulting from the reverse split. The sale inflow, net of brokerage fee, taxes and income tax, reached R\$106.7967 per common share and R\$51.7210 per preferred share. The mentioned amounts were made available by the Company to the respective shareholders on October 26, 2007.

The amounts already made available to the shareholders but not yet claimed, in the consolidated amount of R\$98,219 (2006 R\$13,185) are recorded as current liabilities in Reverse Share Split Payable to Former Shareholders

16 Earnings per share

Since preferred and common shareholders have different dividend, voting and liquidation rights, basic earnings per share has been calculated using the two-class method. The two-class method is an allocation formula that determines earnings per share for preferred and common shares according to the dividends to be paid as required by the Company's by-laws and participation rights in undistributed earnings.

Basic earnings per common share are computed by reducing net income by distributable and non distributable net income available to preferred shareholders and dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the period. Net income available to preferred shareholders is the sum of the preferred dividends and the preferred shareholders' portion of undistributed net income.

Undistributed net income is computed by deducting preferred dividends and common dividends from net income. Options issued under the Company's 2000 stock options plan were out of the money in the years ended December 31, 2005, 2006 and 2007. Therefore, they were not included in the diluted weighted average number of preferred shares on each of the years presented. Options issued under the 2003 stock option plan are dilutive and included in the diluted weighted average number of preferred shares for the year ended in December 31, 2006. For the years ended December 31, 2007 and 2005, these options were out of the money. Therefore, they are not included in the diluted weighted average number of preferred shares in these years.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The diluted denominator includes those contingently issuable shares in connection with the tax benefit obtained during the year arising from the shareholder contribution in the legal reorganization, as mentioned on Note 15 (e).

Under the Company's by-laws, if the Company is able to pay dividends in excess of the minimum requirement for preferred shareholders and the remainder of the net income is sufficient to provide equal dividends to both common and preferred shareholders, then the earnings per share will be the same for both common and preferred shareholders.

The following table sets forth the computation of basic and diluted earnings per thousand common shares:

(*)	2007	2006	2005
Basic and diluted numerator			
Net income	153,308	128,747	160,709
Net income available to preferred shareholders	96,290	80,864	100,938
Net income available to common shareholders	57,018	47,883	59,771
Basic denominator (in number of shares)			
Weighted-average number of shares			
Preferred	22,627,608	22,366,137	22,152,546
Common	13,398,913	13,244,083	13,117,606
Basic earnings per shares (in reais)			
Preferred	4.26	3.62	4.56
Common	4.26	3.62	4.56
Diluted denominator (in number of shares)			
Weighted-average number of shares			
Preferred	22,764,657	22,503,186	22,188,629
Common	13,480,067	13,325,237	13,117,606
Diluted earnings per shares (in reais)			
Preferred	4.23	3.59	4.55
Common	4.23	3.59	4.55

(*)Per share numbers have been adjusted to reflect the reverse share split and the consolidation of our shares which occurred in 2007. See Note 15(g).

17 Income Taxes**(a) Statutory rates**

Brazilian income taxes comprise federal income tax and the social contribution taxes. The statutory rates for federal income tax and for the social contribution tax are 25% and 9%, respectively.

The following is the income tax expense for the years ended December 31, 2007, 2006 and 2005:

F-40

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

	2007	2006	2005
Federal income tax	(71,227)	(63,431)	(89,493)
Social contribution tax	(19,271)	(14,636)	(22,066)
Deferred taxes	6,443	8,888	25,966
Income tax expense	(84,055)	(69,179)	(85,593)

(b) Tax reconciliation

The following is a reconciliation of the reported income tax expense and the amount calculated by applying the composite statutory tax rate of 34%:

	2007	2006	2005
Income before taxes and minority interest	268,153	221,764	278,723
Composite statutory rate	34%	34%	34%
Tax expense at statutory rates	(91,172)	(75,400)	(94,766)
Adjustments to arrive at the effective rate:			
Benefit arising from payment of interest on shareholders equity	3,436	3,883	4,061
Non-taxable income (non-deductible expenses) net	1,774	1,125	1,178
ADENE tax benefit (75% reduction)	2,292	1,383	1,267
Other	(385)	(170)	2,667
Income tax expense	(84,055)	(69,179)	(85,593)

(c) Tax assets and liabilities

The following is an analysis of deferred income tax assets and liabilities:

2007	2006
-------------	-------------

Edgar Filing: TELEMIG CELULAR PARTICIPACOES SA - Form 20-F

Deferred tax assets		
Accrued expenses and provision for contingencies	237,107	189,054
Asset related to legal reorganization (Note 15(e))	41,496	63,146
Income tax loss carry-forwards	10,180	11,508
Allowance for doubtful accounts	9,895	9,838
Other	507	772
	299,185	274,318

Capitalized interest	(9,634)	(8,198)
Foreign exchange variation taxed on cash basis	(10,008)	-
Accelerated depreciation	(4,738)	-
Pension Plan	(19,176)	(14,578)
Net deferred tax asset	255,629	251,542
Current portion	90,591	69,819
Long-term	165,038	181,723
Net deferred tax asset	255,629	251,542

F-41

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Brazilian tax legislation limits the use of tax loss carry-forwards to 30% of taxable income per year; tax loss carry-forwards do not expire.

The Operating Subsidiary has, as a tax benefit, a 75% reduction in the income tax generated in the ADENE (Northeast Development Agency) incentive area where the operating subsidiary operates (North of the Minas Gerais State and Jequitinhonha Valley) for a 10 year-period starting in 2004.

Additionally, since the enactment of Law 11,196/2005, in the second quarter of 2007, for tax purposes only, the Operating Subsidiary accelerated the depreciation of certain property, plant and equipment items installed in the ADENE incentive area.

In the second quarter of 2007, the Operating Subsidiary changed its tax regime over gains arising from foreign exchange variation from the accrual to cash basis. The deferred income and social contribution taxes presented above refer to gains arising from foreign exchange variation calculated based on the accrual basis of accounting not yet taxed.

(d) Uncertain Tax Positions

The Company adopted the provisions of FIN 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007. There was no impact to the Company's financial position and results of operation as a result of the implementation of FIN 48. The Company records the financial statement effects of an income tax position when it is more likely than not, based on the technical merits, that it will be sustained upon examination. A tax position that meets the more-likely-than-not recognition threshold is measured and recorded as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with a taxing authority. Previously recognized tax positions are derecognized in the first period in which it is no longer more likely than not that the tax position will be sustained. The benefit associated with previously unrecognized tax positions are generally recognized in the first period in which the more-likely-than-not threshold is met at the reporting date, the tax matter is ultimately settled through negotiation or litigation or when the related statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired. The recognition, de-recognition and measurement of tax positions are based on management's best judgment given the facts, circumstance and information available at the reporting date.

Differences between a tax position taken or expected to be taken in the Company's tax returns and the amount of benefit recognized and measured in the financial statements result in unrecognized tax benefits, which are recorded in the balance sheet as either a liability for unrecognized tax benefits or reductions to recorded tax assets, as applicable. The liability for unrecognized tax benefits expected to be realized within one year is classified as current in the balance sheet.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

As a result of implementing FIN 48, the Company has no uncertain tax positions for which it has recorded unrecognized income tax benefits; accordingly, there was no impact on the Company's results of operations from the adoption of this interpretation. In addition, as of the date of the adoption of FIN 48, the Company did not have any accrued interest and penalties related to unrecognized tax benefits.

The Company and its subsidiary will recognize interest and penalties related to unrecognized tax benefits in financial expense and other operating expense, respectively.

The Company and its subsidiary file, separately, income tax returns in the Brazilian federal jurisdiction and are generally no longer subject to federal income tax examinations by tax authorities for years before 2002. All income before taxes, minority interest and related income taxes are from Brazilian sources.

Management does not believe there will be any material changes related to uncertain tax positions over the next 12 months.

18 Transactions with related parties

The Company and the Operating Subsidiary entered into transactions with controlling shareholders and other related parties for certain services. Transactions with related parties are carried out based on amounts agreed upon by the respective related parties which, in the Management's understanding, are in market conditions.

Despite the transfer of the control mentioned in Note 1, on March 31, 2008 the companies Tele Norte Celular Participações S.A. and its Operating Subsidiary, Amazonia Celular S.A., had the same controlling shareholder, for such reason they were maintained as related parties for purposes of this annual information.

(a) Roaming Agreements

The Operating Subsidiary is a member of a Brazilian roaming committee of cellular operators that includes Amazônia Celular S.A. The purpose of the committee is to oversee technical and system aspects to assure the quality of roaming service. As required by Brazilian regulations, the Operating Subsidiary and Amazônia Celular S.A. facilitate roaming to their respective subscribers.

Accounts receivable from and payable to, as well as services revenue with Amazônia Celular, refer to the transfer of the additional tariff and roaming services rendered by the subscribers of the companies.

(b) Cost Sharing Agreement

In order to optimize resource allocation efficiency among Tele Norte Celular Participações S.A., and its Operating Subsidiary, and the Company and its Operating Subsidiary, the Company entered into a cost sharing agreement pursuant to which certain costs that are incurred for the benefit of both companies and their subsidiaries are allocated

to each company based on criteria designed to reflect the actual use by each company. The costs allocated under this agreement refer primarily to personnel, marketing and outside consulting fees.

The balances presented in other non-current assets and in the income from sharing of resources are related exclusively to the resource sharing and jointly-owned unit.

The balances are adjusted based on the *Certificado de Depósito Interbancário* (Interbank Certificates of Deposit) rate, or CDI.

F-44

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Following the acquisition of our control by Vivo on April 3, 2008, we, Telemig Celular, Telemar, Vivo, Tele Norte Celular Participações, and Amazônia Celular entered into a memorandum of understanding, or the MoU, on April 7, 2008 to determine a procedure to segregate our activities from the activities of Telemig Celular, which agreement requires Telemig Celular and Amazonia to: (i) enter into a services agreement, pursuant to which Telemig Celular will render certain services to Amazonia Celular, including accounting, information technology, network maintenance, systems control, engineering, development of marketing programs, products and services, among others; (ii) define together certain key performance indicators and service level agreements; (iii) determine a timeframe for segregation of these processes; (iv) determine which assets to segregate; (v) keep confidential any information obtained from the other party during this transitional period; and (vi) independently contract auditors to assist in the segregation process and for transparency purposes. This MoU is valid for a nine-month term, renewable for additional three-month term.

(c) Brasil Telecom S.A.

Beginning August 1, 2004, the Operating Subsidiary started offering the Carrier Selection Code (CSP) option to its subscribers for intercity (VC2 and VC3) and international calls in conformity with the Personal Mobile Service (SMP) rules. The Operating Subsidiary entered into an agreement with Brasil Telecom S.A. under which its subscribers pay a lower rate to use long-distance services offered by Brasil Telecom S.A..

Brasil Telecom S.A. is considered a related party due to the existence of common partners in the Company's control chain.

On December 31, 2007 and 2006, accounts payable to Brasil Telecom S.A., refer to the transfer of intercity and international calls made by the Operating Subsidiary's subscribers using the CSP service of Brasil Telecom S.A. Accounts receivable and service revenue mainly refer to the interconnection revenues for the Operating Subsidiary's network usage in such long-distance calls.

(d) Vivo S.A.

In a General Shareholders' Meeting held on April 3, 2008, the Company's shareholder control and, indirectly, its subsidiary's, was transferred to Vivo. In consequence of such change, since that date the companies of Vivo group started to be treated as related parties.

On January 28, 2008, the Subsidiary started to offer facilities to its clients who elected for the use of Vivo's Carrier Selection Code (CSP). As a consequence, the subsidiary's clients started to use the CSP in the national long-distance calls (VC2 and VC3) and international calls of their cellular phones, according to the requirements of the Mobile Personal Service - SMP.

On December 31, 2007 and 2006 the accounts payable to Vivo S.A. were classified in current liabilities and they referred to the pass-through of national and international long-distance calls made by the Subsidiary's clients using Vivo's CSP, totaling R\$1,484. The accounts receivable and service revenues referred mainly to the interconnection revenues for the use of the Subsidiary's network in these long distance calls, and totaled R\$3,182 and R\$5,097 respectively. These amounts were classified respectively in current assets and service revenues in the Company's

financial statements.

F-45

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated****19 Pension Plan and Other Post-Retirement Benefit Plans****(a) Defined benefit plans**

The Operating Subsidiary participates in a multi-employer defined benefit pension plan (PBS Assistidos - PBS-A) and a post-retirement medical benefit plan (Plano de Assistência Médica ao Aposentado - PAMA) administered by *Fundação Sistel de Seguridade Social* (Sistel), a minority shareholder.

In 1999, Sistel approved changes to the plan's statutes resulting in the break up of plan assets and liabilities related to the active participants of each sponsor. Sistel did not break up plan assets and liabilities related to retired participants and, thus, the Operating Subsidiary will continue to sponsor the Sistel plan for such retired participants.

Effective January 2000, the plan was modified and changed into a multiple employer pension plan (PBS - Telemig Celular) with respect to active employees. The plan assets and liabilities related to active employees were transferred into this new plan and the benefits remained unchanged. The post-retirement benefit plans continue unchanged as multi-employer plans.

The pension benefit is generally defined as the difference between (i) 90% of the retiree's average salary during the last 36 months indexed to the date of retirement and (ii) the value of the retirement pension paid by the Brazilian social security system. For retired participants the initial pension payment is adjusted to recognize cost of living increases and productivity awards granted to active employees. In addition to the pension supplements, post-retirement health care and life insurance benefits are provided to eligible pensioners and their dependents.

Contributions to the plans are based on actuarial studies prepared by independent actuaries. The Operating Subsidiary uses a measurement date of December 31 for its pension and other post-retirement benefit plans.

The Operating Subsidiary contributed R\$393, R\$2 and R\$146 in 2007, 2006 and 2005, respectively, with respect to the multi-employer plans.

The Operating Subsidiary expects to contribute up to R\$483 to the defined pension plans in 2008.

Funded status and amounts recorded

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Based on the report of the Operating Subsidiary's independent actuary, the funded status and amounts recorded in the Company's consolidated balance sheet for the multiple employer plan (PBS - Telemig Celular) are:

	2007	2006
Change in plan assets		
Fair value of plan assets at beginning of year	90,338	76,335
Actual return on plan assets	17,538	13,395
Sponsors and participants contributions	1,487	1,510
Benefits paid and expenses	(1,444)	(902)
Fair value of plan assets at end of year	107,919	90,338
	2007	2006
Change in benefit obligations		
Benefit obligation at beginning of year	52,867	46,887
Service cost	1,951	1,965
Interest cost	5,342	5,237
Actuarial gains	(614)	(320)
Benefits paid and expenses	(1,444)	(902)
Benefit obligation at end of year	58,102	52,867
	2007	2006
Pension benefits recognized in the balance sheet		
Funded status	49,817	37,471
Unrecognized net gains	-	-
Prepaid benefit cost	49,817	37,471

The accumulated benefit obligation for the pension plans was R\$54,726 and R\$48,719 at December 31, 2007 and 2006, respectively.

Components of net periodic pension cost of the multiple employer plan (PBS Telemig Celular) are:

Edgar Filing: TELEMIG CELULAR PARTICIPACOES SA - Form 20-F

	2007	2006	2005
Service cost	1,952	1,965	2,595
Interest cost	5,341	5,237	5,177
Expected return on assets	(10,071)	(10,509)	(12,672)
Deferred gains amortization	(1,304)	(1,095)	(721)
Employee contributions	(862)	(721)	(934)
Other	-	4,912	(355)
Net periodic pension benefit	(4,944)	(211)	(6,910)

The changes in the accrued pension cost for the year ended December 31, 2006 and 2007 areas follows:

F-47

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

	2007	2006
Prepaid pension cost in the beginning of the year	14,596	13,787
Net periodic pension benefit	4,944	211
Company contributions during the year	835	598
Prepaid pension cost at the end of the year	20,375	14,596
Amounts recognized in accumulated other comprehensive income	29,442	22,875
Net amount recognized	49,817	37,471

The components of the R\$6,567 increase in the amounts recognized in Accumulated OCI during 2007 consisted of:

	2007
Actuarial gain arising from actual return of plan assets	7,467
Amortization of actuarial gain	(1,304)
Actuarial losses arising from actual participant contribution	(210)
Other actuarial gains	614
Effect on Accumulated OCI before income taxes and minority interest	6,567
Income and social contribution taxes	(2,233)
Minority interest	(726)
	3,608

Company amortizes the unrecognized actuarial gains through the participant's average expected future service period (in years), in its statement of operations as a component of net periodic cost, only when the unrecognized actuarial gain exceeds 10% of the greater value between the plan assets and the projected benefit obligation, in accordance with applicable standards.

The benefits expected to be paid in each of the next five fiscal years and in the aggregate for the five fiscal years thereafter are summarized as follow:

	PBS Telemig Celular
2008	1,859
2009	2,234

2010	2,580
2011	3,102
2012	4,073
2013 to 2017	32,732

The net periodic pension cost for next year is summarized as follow:

	2008
Service cost	1,934
Interest cost	6,160
Expected return on assets	(11,620)
Amortization gain	(1,963)
Employee contributions	(948)
Net periodic pension benefit	(6,437)

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The effect of the adoption of SFAS 158 mentioned on Note 3 (m) on the Company's consolidated balance sheet in 2006 for the PBS Telemig Celular plan is shown below.

	Before Adoption	Adjustments	After Adoption
Pension plan surplus	14,596	22,875	37,471
Deferred income taxes	4,963	7,778	12,741
Minority Interest	1,614	2,529	4,143
Accumulated other comprehensive income	-	12,568	12,568

(b) Defined contribution and defined benefit plan (CelPrev - Telemig Celular)

In March 2004, the Company offered to its employees a new benefit plan, which is also administered by Sistel. The new plan permitted, through June 16, 2004, the migration of the participants of the PBS Telemig Celular plan. The Company recognized, during 2004, a curtailment and settlement relating to the implementation of the new plan in the amounts of R\$5,112 and R\$4,790 within the Net Benefit Obligation and Fair Value of Plan Assets, respectively.

The new plan is a defined contribution plan, except for medical benefits, for which there is a defined benefit of up to 24 months. Participants and the Company will each contribute with 50% of the plan's cost. The plan defines retirement at age 60, with early retirement at age 50, and includes disability, retirement, illness benefits and pension in case of casualty. Company matching contributions will range from 0.5% to 2% and additional contributions without Company matching may range from 0.5% to 6% of the participant's salary. Benefits at the time of retirement will depend on the timing and amount of contributions, as well as on the performance of the fund's investments.

Based on the report of the Company's independent actuary, the funded status and amounts recorded in the Company's balance sheet for the multiple employer plan (CelPrev - Telemig Celular) are:

	2007	2006
Change in plan assets		
Fair value of plan assets at beginning of year	3,854	2,742
Actual return on plan assets	542	1,112
Actual benefits paid	(25)	-
Actual employer contribution	187	-
Fair value of plan assets at end of year	4,558	3,854

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

	2007	2006
Change in benefit obligations		
Benefit obligation at beginning of year	1,245	1,164
Service cost	171	187
Interest cost	123	128
Actual benefit payment	(25)	-
Actuarial losses (gains)	(347)	(234)
Benefit obligation at end of year	1,167	1,245

	2007	2006
Pension benefits recognized in the balance sheet		
Funded status	3,391	2,609
Unrecognized gain	-	-
Prepaid (accrued) benefit asset (liability)	3,391	2,609

Components of net periodic pension cost of the CelPrev - Telemig Celular for 2007 and 2006 are (2005 not applicable):

	2007	2006
Service cost	171	187
Interest cost	123	128
Expected return on assets	(418)	(377)
Deferred gains amortization	(96)	(54)
Transition obligation	(18)	(18)
Net periodic pension cost (benefit)	(238)	(134)

The changes in the accrued pension cost for the year ended December 31, 2006 and 2007 are as follows:

	2007	2006
Prepaid (accrued) benefit asset (liability) in the beginning of the year	83	(51)
		284

Edgar Filing: TELEMIG CELULAR PARTICIPACOES SA - Form 20-F

Company's contribution during the year	187	-
Net periodic pension benefit	238	134
Prepaid (accrued) benefit asset (liability) at the end of the year	508	83
Amounts recognized in accumulated other comprehensive income	2,883	2,526
Net amount recognized	3,391	2,609

The components of the \$357 increase in the amounts recognized in Accumulated OCI during 2007 consisted of:

F-50

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

	2007
Actuarial gain arising from actual return of plan assets	124
Amortization of actuarial gain	(96)
Transition obligation	(18)
Other actuarial gains	347
	357
Income and social contribution taxes	(120)
Minority interest	(40)
	197

Company amortizes the unrecognized actuarial gains through the participant's average expected future service period (in years), in its statement of operations as a component of net periodic cost, only when the unrecognized actuarial gain exceeds 10% of the greater value between the plan assets and the projected benefit obligation, in accordance with applicable standards.

The benefits expected to be paid in each of the next five fiscal years and in the aggregate for the five fiscal years thereafter are summarized as follows:

	CelPrev - Telemig Celular
2008	77
2009	162
2010	190
2011	189
2012	207
2013 to 2017	1,303

The effect of the adoption of SFAS 158 mentioned on Note 3 (m) on the Company's consolidated balance sheet in 2006 for the PBS Telemig Celular plan is shown below.

	Before Adoption	Adjustments	After Adoption
Pension plan surplus	83	2,526	2,609
Deferred income taxes	28	859	887
			286

Minority Interest	9	279	288
Accumulated other comprehensive income	-	1,388	1,388

The net periodic pension cost for next year is estimated as follow:

2008

Service cost	172
Interest cost	122
Expected return on assets	(516)
Amortization gain	(114)
Transition obligation	(18)
Net periodic pension benefit	(354)

(c) Main actuarial assumptions

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The main actuarial assumptions used in the calculation of the PBS-Telemig Celular and CelPrev Telemig Celular are:

Weighted-average assumptions

	PBS-Telemig Celular / CelPrev		
	2007	2006	2005
Discount rate of actuarial liabilities (1)	10.77%	10.24%	11.30%
Expected return on plan assets (1)	11.36%	10.90%	13.75%
Salary increase rate (1)	6.59%	6.08%	7.10%

(1) Expressed in nominal terms - assumed future inflation of 4.5% for 2007, 4% for 2006 and 5.0% for 2005.

The discount rate is based on the Brazilian government bonds rates and considers the timing of the expected benefit payment.

The expected return on plan assets for 2007 was set up based on the pension portfolio's past average rate of earnings, discussion with portfolio managers and comparisons with similar companies, which was based on the following target asset allocation:

	PBS - Telemig Celular/CelPrev
Debt securities	89.00%
Equity securities	10.00%
Loans	1.00%
Other	0.00%
Total	100.0%

The pension plan weighted-average asset allocations at December 31, 2007 and 2006, by asset category are as follows:

	PBS Telemig Celular		CelPrev	
	2007	2006	2007	2006

Debt securities	88.6%	73.4%	86.3%	80.0%
Equity securities	11.0%	15.1%	11.9%	7.9%
Loans	0.4%	0.4%	1.8%	2.0%
Other	0.00%	11.1%	0.00%	10.1%
Total	100.0%	100.0%	100.0%	100.0%

The Sistel PBS Telemig Celular and CelPrev Telemig Celular Benefit Plan Investment Policy sets forth the policy for application and management of funds supporting the Plan with the objective of meeting the profitability and social security goals in accordance with the related actuarial liability.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Based on the short, medium and long-term macroeconomic scenarios prepared by Sistel, the Plan Investment Policy sets out objectives, goals and restrictions to the plan fund's investments. The Plan Investment Policy also determines and designs the strategic assignment of these funds in each segment and portfolio, as well as the assets that may be selected and the strategy to be adopted to manage these assets. The Plan Investment Policy sets forth the ceiling and floor limits to break down the asset portfolio into fixed-income and variable assets, as well as loans and financings to the members of the plan. The minimum actuarial rate forecast for the plan consists of a return at least equal to the INPC (Broad National Consumer Price Index) + 6% p.a.

20 Commitments**(a) Capital expenditures**

At December 31, 2007, the Operating Subsidiary had capital expenditure commitments of R\$178,0 million (2006 - R\$4,419) related to the continuing expansion and modernization of the network.

The Operating Subsidiary's concession requires that certain network coverage requirements and service quality milestones be met to continue to be valid and allow the Operating Subsidiary to operate.

On February 9 2007, Telemig Celular S.A. entered into a new agreement with Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda. to provide and implement the UMTS/HSPA network. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the implementation of the UMTS/HSPA network. The total amount payable to Ericsson under the terms of the agreement is R\$22.1 million.

On June 6 2007, Telemig Celular S.A., Amazônia Celular S.A., Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda. entered into a new agreement to provide and implement the expansion of our GSM ACCESS and CORE network. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM ACCESS and CORE networks. The total amount payable to Ericsson under the terms of the agreement is R\$ 119.8 million. Telemig Celular S.A. is responsible for paying 78.7% of this amount.

On June 15, 2007, Telemig Celular S.A. entered into a new agreement with Huawei do Brasil Telecomunicações Ltda. and Huawei Serviços do Brasil Ltda. to provide and implement the expansion of our GSM network in the *Triângulo Mineiro* region. Under the terms of this agreement, Huawei has agreed to provide all equipment, material, software and services necessary to the expansion of our GSM network (ACCESS and CORE) in the *Triângulo Mineiro* region. The total amount payable to Huawei under the terms of the agreement is R\$13.2 million.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

On June 21, 2007, Telemig Celular S.A. entered into a new agreement with Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda. to provide and implement the expansion of our GSM ACCESS and CORE network to implement Minas Comunica project. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM ACCESS and CORE networks. The total amount payable to Ericsson under the terms of the agreement is R\$54.9 million.

On June 30, 2007, Telemig Celular S.A. entered into a new agreement with Ericsson Telecomunicações S.A., Ericsson Serviços de Telecomunicações Ltda. and Ericsson Gestão e Serviços de Telecomunicações Ltda. to provide and implement the expansion of our GSM ACCESS and CORE network to improve the coverage in Minas Gerais. Under the terms of this agreement, Ericsson has agreed to provide all equipment, material, software and services necessary for the expansion of our GSM ACCESS and CORE networks. The total amount payable to Ericsson under the terms of the agreement is R\$39.1 million.

(b) Rental agreements

The Operating Subsidiary rents certain equipment and premises through a number of operating lease agreements that expire at different dates. Total rent expense under these agreements was R\$41,012, R\$38,578 and R\$36,573 for the years ended December 31, 2007, 2006 and 2005, respectively.

Future minimum lease payments under non-cancelable operating leases with an initial term of one year or more are as follows at December 31, 2007.

2008	23,787
2009	19,521
2010	15,215
2011	12,532
2012	9,145
2013	7,500
2014	6,611
2015 to 2019	8,496
Total minimum payments	102,807

(c) Insurance coverage

On December 31, 2007 and 2006 the subsidiary had insurance coverage for operating risks, including assets in inventory, leased assets, property, plant and equipment and loss of profit, for amounts contracted based on assessment by Management, considering the risks and amounts involved.

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements**
Expressed in thousands of Brazilian reais, unless otherwise stated

On December 31, 2007 and 2006 the insured amounts at risk were approximately the following:

	Consolidated	
	2007	2006
Inventories	31,127	35,000
Leased assets and property and equipment	1,099,637	1,169,000
Loss of profit	895,745	1,032,000
	2,026,509	2,236,000

In addition, the subsidiary carries general civil liability and countrywide transportation insurance.

21 Financial Instruments**(a) Fair value of financial assets and liabilities**

Estimated fair values of the Company and its Operating Subsidiary's financial assets and liabilities have been determined using available market information and appropriate valuation methodologies. However, considerable judgment is required in interpreting market data to develop the estimated fair values. Accordingly, the amounts presented below are not necessarily indicative of the amounts that could be realized in a current market exchange. The use of different market assumptions and/or estimated methodologies may have a material effect on the estimated fair values.

The fair value information as of December 31, 2007 and 2006 presented below is based on the Company and its Operating Subsidiary's current loans and financing rates for similar types of loans and financing arrangements.

	2007		2006	
	Book value	Fair value	Book value	Fair value
Long-term debt	147,930	152,175	171,040	178,405

The carrying value of cash, cash equivalents, trade accounts receivable, other current assets, accounts payable and accrued liabilities are a reasonable estimate of their fair value because of the short maturities of such instruments. Interest rates that are currently available to the Company and its Operating Subsidiary for issuance of debt with similar terms and maturities were used to estimate the fair value of loans and financing.

b) Concentration of risks

Credit risk connected with receivables derives from telecommunications services billed and unbilled amounts, resale of handsets and distribution of prepaid cards. The Operating Subsidiary continuously monitors credit granted to its customers and the delinquency level.

F-55

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

Customer access to telecommunications services is blocked when the bill is overdue for more than 15 days, except for telephone services to be maintained for security or national defense reasons. The credit risk of accounts receivable of telecommunications mobile services is diversified. The Operating Subsidiary sets credit limits for handset resellers and prepaid card distributors. These limits are defined based on potential sales, risk history, payment promptness and delinquency levels. On December 31, 2007, the Operating Subsidiary's allowance for losses on receivables amounted to R\$28,175 (2006 R\$27,970) Note 5.

There are no concentrations of services, concessions or rights that could, if suddenly eliminated, severely impact the operations of the Company and its Operating Subsidiary.

22 Swaps

At December 31, 2007 and 2006, the Operating Subsidiary held cross-currency interest rate swap agreements related to its U.S. dollar denominated debt to mitigate risk against volatility of the U.S. dollar and the Brazilian *real* exchange rate.

Through the swap agreements, at December 31, 2007, the Operating Subsidiary earns the exchange variation between the United States dollar and the Brazilian *real* and pays an amount based on 74.8% to 75.25% of the variation of the short-term interbank rate. The annualized short-term interbank rate was 11.8% and 15.0% in 2007 and 2006, respectively. At December 31, 2007 and 2006, these agreements have total updated notional amounts of R\$141,704 and R\$171,040, and expire on January 2009.

The fair values of the Operating Subsidiary's cross-currency interest rate swap agreements were estimated based on quoted market prices of comparable contracts. As of December 31, 2007 and 2006, the unrealized gains and losses of the individual swap contracts are presented on the balance sheet on a gross basis, segregating assets and liabilities as follows:

	2007	2006
Fair market value of asset portion of cross-currency interest rate swap agreements	134,406	153,559
Fair market value of liability portion of cross-currency interest rate swap agreements	(226,441)	(202,228)
Cross-currency interest rate swap agreements	(92,035)	(48,669)
Current liabilities	-	-
Non-current liabilities	(92,035)	(48,669)
Cross-currency interest rate swap agreements	(92,035)	(48,669)

F-56

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

The losses arising from the swap agreements of R\$43,366, R\$43,699 and R\$50,612 for 2007, 2006 and 2005, respectively, are reflected in financial expenses. The Operating Subsidiary does not apply hedge accounting for any of these contracts.

23 Financial results

	2007	2006	2005
Financial Income			
Interest	78,510	97,231	145,047
Other	5,552	2,501	105
	84,062	99,732	145,152
Financial Expenses			
Interest	(4,306)	(5,891)	(28,472)
Loss on swap agreements	(43,366)	(43,699)	(50,612)
Taxes on financial transactions	(14,496)	771	2,580
Other	(3,802)	(2,499)	(3,203)
	(65,970)	(51,318)	(79,707)
Foreign exchange gain	30,075	21,099	49,066
	48,167	69,513	114,511

Taxes on financial transactions in 2006 and 2005 include gain of PIS and COFINS related to the legal action that questioned the constitutionality in the basis of these taxes, in the amount of R\$16,622 and R\$21,303, respectively, as mentioned on Note 7.

24 Stock-Based Compensation Plan

On October 5, 2000, the Company's Board of Directors approved two long-term incentive plans as follows:

(a) Plan A - covers certain key executives who may receive shares of the Company's common or preferred stock. The options vest only to the extent that the Company achieves performance goals determined by the Board of Directors during a five-year performance period. On December 31, 2007 all of the options granted had been forfeited.

(b) Plan B - covers key executives (who can also participate in Plan A) and other employees. Options granted under this plan relate to preferred stock and are exercisable at the market price at the date of grant, adjusted by an inflation index. The vesting period is up to 20% during the second year, 60% during the third year and 100% during the fourth year. The options may be exercised through October 2007. On December 31, 2007 all of the options granted had been forfeited.

F-57

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

A summary of option activity for three years ended December 31, 2007 is presented below (number of options and amounts in *reais* per shares, restated for the reverse share split - Note 15):

Plan B Options Granted on December, 2000

	Number of Options	Initial Exercise Price-R\$	Exercise Price- R\$	Market Price R\$
Outstanding as of December 31, 2004	12.392	47.60	81.50	38.00
Forfeited	(0.239)	47.60	-	-
Outstanding as of December 31, 2005	12.153	47.60	82.50	45.40
Forfeited	(9.184)	47.60	-	-
Outstanding as of December 31, 2006	2.969	47.60	85.60	40.50
Forfeited	(2.969)	-	-	-
Outstanding as of December 31, 2007	-	-	-	-

During the meetings held on December 29 and 30, 2003, the Boards of Directors of the Company and its Operating Subsidiary, respectively, approved changes to Plan B, which did not affect the options granted on October 2000, as follows.

The new options granted under this plan relate to preferred stock and are exercisable at the market price at the date of the grant, discounted by 20%. Additionally, the exercise price is adjusted by an inflation index. The vesting schedule is 40% beginning on January 15, 2004, 70% on January 15, 2005 and 100% on January 15, 2006. The options expired in January, 2008 without being exercised by Company's executives.

A summary of option activity for three years ended December 31, 2007 is presented below (number of options and amounts in *reais* per shares, restated for the reverse share split - Note 15):

Plan B Options Granted on December 2003

	Number of Options	Initial Exercise Price - R\$	Exercise Price- R\$	Market Price R\$
--	------------------------------	---	--------------------------------	-----------------------------

Edgar Filing: TELEMIG CELULAR PARTICIPACOES SA - Form 20-F

Outstanding as of				
December 31, 2004	46.458	38.40	43.20	38.00
Forfeited	(10.376)	38.40	-	-
Outstanding as of				
December 31, 2005	36.082	38.40	43.70	45.40

December 31, 2007	1.751	38.40	48.88	48.51

F-58

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian reais, unless otherwise stated**

At December 31, 2007 all the 1.751 options outstanding were exercisable at R\$48.88 (2006 6.803 options). At December 31, 2007, the remaining contractual terms of these options were 15 days and there were no aggregate intrinsic value since exercise price was above market price. The fair value of these options at the date of grant was R\$27.70.

The Company has a policy of issuing new shares upon share option exercise.

As a result of a significant amount of expected and actual forfeitures during 2006 and 2007, the adoption of SFAS 123(R) did not materially impact Company's consolidated financial statements at its adoption date, January 1, 2006, nor its stock-based compensation expense during the years ended December 31, 2007 and 2006. Additionally, no stock-based agreements were issued during the years ended December 31, 2007 and 2006.

As of December 31, 2007 and 2006, there were no unrecognized compensation costs related to unvested share-based compensation arrangements, since all options were vested.

The remaining options outstanding at December 31, 2007 and 2006 represent liability awards, as their exercise prices are indexed to inflation. The aggregate fair value of these outstanding awards was not material at December 31, 2007 and 2006.

The fair value for the options was estimated using a Black-Scholes option-pricing model with the following weighted-average assumptions:

	2007	2006	2005
Risk-free interest rate	6%	6%	6%
Dividend yield	6%	6%	6%
Volatility factor of the expected market price of the Company's preferred stock	50%	52%	54%
Weighted-average expected life of the option	6	6	6

The Black-Scholes option-pricing model was developed for use in estimating the fair value of traded options, which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock option.

25 Other Information**(a) Proceedings related to the General Law of Telecommunications**

Telemig Celular Participações S.A.**Notes to Consolidated Financial Statements****Expressed in thousands of Brazilian *reais*, unless otherwise stated**

The Brazilian telecommunications regulations prohibit a shareholder from having a controlling interest in more than one wireless telecommunications carrier operating in the same area in Brazil. On June 15, 2005, the Company initiated court proceedings seeking a court order to prevent PREVI and Banco do Brasil from exercising their voting rights in the Company, until the legality of their shareholding interest is resolved. The main argument in this lawsuit is that Caixa de Previdência dos Funcionários do Banco do Brasil - PREVI (which is the Banco do Brasil S.A. pension fund) and Banco do Brasil are a party to our controlling shareholder block and are also party to the controlling shareholder block of Tele Norte Leste Celular Participações S.A., which competes with us in our area under the Oi brand name. Since we currently believe that the claim has no legal grounds and therefore, would probably be rejected by the Brazilian courts, we relinquished our claim on October 18, 2006. On June 27, 2007 the proceeding was extinguished upon the judicial confirmation of the renouncement. Opportunity, however, did not agree with our request and filed an appeal against this decision, which is awaiting decision by the Superior Court of Justice. The final judgment of the decision is still being expected.
