São Paulo, Brazil, February 24, 2016 - GPA [BM&FBOVESPA: PCAR4 (PN); NYSE: CBD] announces its results for the fourth quarter of 2015 (4Q15). The comments refer to the consolidated results of the Group or of its business units. All comparisons are with the same period in 2014, except where stated otherwise.

Fourth Quarter and Full Year 2015 Results

CONSOLIDATED

§ Net sales totaled R\$ 19.7 billion in 4Q15 and R\$69.1 billion in the year, led by resilient performance of the Food segment, which registered market share gain in the Assaí, Pão de Açúcar and proximity formats;

§ The Company rolled out important initiatives to adapt to consumers' needs: continued price competitiveness efforts and promotions, and adjustments to assortments;

§ Thanks to yearlong initiatives to reduce expenses and increase productivity, selling, general and administrative expenses increased by just 5.1%, significantly lower than the inflation in 4Q15;

§ Discipline in investments, with the focus on modernizing Extra stores and on organic growth in other formats with higher returns, such as Assaí and Proximity: 25 openings in 4Q15, for a total of 118 new stores in 2015;

§ The Group's sound financial position led to the solid cash balance of R\$ 11.0 billion at the end of the year, despite the more restrictive consumption scenario. Net cash, including the payment book operation, increased 2.1 times from 2014;

§ Net cash/EBITDA ratio, including the payment book operation, increased from 0.29 times in 2014 to 1.13 times in 2015;

§ Gross debt maturity extended by 181 days compared to the prior year, accompanied by continuous reduction in leverage.

FOOD BUSINESS

§ The food segment continued to perform strongly, with improvements in customer traffic across all banners;

§ Adjusted EBITDA margin of Multivarejo was 9.2% in 4Q15, reflecting the solid margin despite the economic scenario and significantly higher than the margin in 9M15 (7.1%), with expenses notably increasing below inflation;

§ Assaí registered net sales growth of 27.8% in 4Q15, the highest in the year, with significant growth of 52% in EBITDA and 6.0% in margin;

§ Investments in store renovations reached the highest level in the last three years. Store modernizations were carried out at all banners in the Food segment, most intensively at Extra, which corresponded to 25% of the banner's sales in 2015.

VIA VAREJO

§ Net sales of R\$5.4 billion in 4Q15, with market share gain in the overall market and recovery in sales levels compared to 2Q15 and 3Q15, led by increased competitiveness and more attractive promotions;

§ Important adjustments to the cost structure throughout 2015, resulting in better dilution of costs in 4Q15 compared to previous quarters;

§ Adjusted EBITDA in the year totaled R\$1.3 billion, with adjusted EBITDA margin of 6.9%.

CNOVA

§ GMV growth of 16.4% in 2015. Marketplace share of GMV sales reached 15.8% in Brazil in the 4Q15.

(1) Includes the results of Cnova (Cnova Brazil + Cdiscount Group); (2) Totals and percentages may not add up due to rounding. All margins were calculated as a percentage of net sales; (3) Earnings before interest, tax, depreciation and amortization; (4) EBITDA adjusted by the total of "Other Operating Income and Expenses", thus eliminating nonrecurring income and expenses; (5) Net Income adjusted by the total of "Other Operating Income and Expenses", thus eliminating nonrecurring income and expenses, as well as the respective effects of associated income tax.

MESSAGE FROM THE MANAGEMENT

The year 2015 was one of formidable challenges for Brazil and a period when focus and discipline were even more crucial to achieving results and overcoming obstacles. That was how GPA, through its multi-format, multi-channel and multi-region approach, rolled out its strategy, which, combined with important adjustments in the process of adapting the Company to the economic scenario, helped it achieve its goals.

In 2015, we invested in the integration of our businesses and in a solid synergy plan, especially among back office areas so that each business unit could focus on its business objectives, advancing operations and strengthening their competitive advantages.

It was also a year when, despite a challenging scenario, we went ahead with our organic growth plan and opened 118 stores, focusing primarily on higher-return models, such as cash & carry, through Assaí, and proximity, mainly through Minuto Pão de Açúcar.

In the case of Assaí, we opened 11 new stores and increased our market share. The chain posted solid net sales growth of 25.5%, and EBITDA growth of more than 40% in the year, besides generating sufficient cash to fund its own growth, for the first time.

At Multivarejo, the banners were flexible and quick in adapting their assortment and services, each following their vocation and positioning, according to consumers' needs and in line with the economic scenario. Pão de Açúcar once again underlined its leadership in the premium supermarket segment and has registered market share gains for two consecutive years. The proximity format registered growth in customer traffic and sales, offering – through the Minuto Pão de Açúcar and Minimercado Extra brands - different store models according to the profiles of each banner's target market.

At Extra, we continued our strategy of increasing competitiveness and modernized 62 hypermarkets and supermarkets. These measures helped to regain momentum in sales and better trend in customer traffic. However, the results of renovations during the year were still short of the Company's goals. Next year, we will focus on advancing the store renovation plan and price competitiveness strategy, on strengthening the quality and assortment of perishables and on reducing stock outs, aiming to increase operating efficiency and maintain the format's profitability.

Via Varejo, despite a more challenging scenario for the electronics and home appliances market, carried out adjustments to its structure by optimizing processes and rationalizing expenses, all as part of the measures being taken to adapt the Company to the evolving scenario. Furthermore, the intensification of commercial initiatives from the third quarter helped regain market share and increase sales. At Cnova, this was one more year of GMV growth and increase in marketplace share, as well as initiatives focused on improving customer service.

Sustainability remains one of our strategic pillars, in line with the guidelines of the Casino Group and the five commitments of GPA: Valuing our People, Conscientious Consumption and Supply, Transforming the Value Chain, Environmental Impact Management and Social Engagement. In 2015, all banners rolled out high-impact initiatives for each of these pillars. We registered important results in promoting diversity, setting targets for hiring persons with disabilities, and taking effective actions to increase the presence of women in leadership positions. We remain committed to mitigating risks to the environment, playing a positive role in society, always in alignment with the principles of the UN Global Compact.

It was a year when we also made progress in our governance practices across all businesses. We have active committees and processes designed to ensure benefits to all those involved, always observing the rights and interests of our stakeholders.

We have a better and well prepared company for 2016. We will remain fully focused on the customer, while maintaining a strict and disciplined approach to investments, and on actions that will ensure the Company's sustainable growth while creating value for our shareholders.

Sales Performance

Net Revenue	4Q15 x		2015 x	
	4Q15	Δ 4Q14	2015	Δ 2014
(R\$ million)				
Consolidated (1)	19,709	0.2%	69,115	5.5%
Food Businesses	10,477	6.7%	37,198	7.1%

Δ Net 'Same-Store' Sales

	4Q15	2015
Consolidated (1)	-2.3%	-1.2%
Multivarejo + Assaí	1.9%	2.6%
Cnova (3)	9.5%	18.3%
Via Varejo (4)	-15.2%	-16.4%

(1) Excludes revenue from intercompany transactions; (2) Extra and Pão de Açúcar banners. Includes revenue from the leasing of commercial centers; (3) Cnova: Cnova Brazil + Cdiscount Group. Includes revenue from marketplace commissions, excluding merchandise volumes; (4) Includes revenue from intercompany transactions. Excluding the stores closed to comply with the decision by Brazil's antitrust agency CADE, the decrease in the quarter would have been 13.9%.

Sales Performance – Consolidated

§ In 4Q15, consolidated net sales totaled R\$19.7 billion, impacted by the worsening macroeconomic scenario in Brazil during the course of the year, which significantly affected consumption, especially of durable goods.

§ The highlight of the quarter was the strong growth at Assaí (+27.8%), which, combined with the ongoing renovation of Extra stores and the resilience of other Multivarejo banners, resulted in the 6.7% sales growth in the Food segment. Despite the economic slowdown, same-store sales in the Food category grew in comparison with 4Q14, reflecting the growth in customer traffic across all banners.

§ It is important to emphasize the efforts made by the Company to adapt itself to consumers' needs on account of the economic scenario, notably the adjustments to the assortment and initiatives to increase operating efficiency and, consequently, boost competitiveness. Another highlight was the launch of the "Vamo Junto" campaign which, for the first time, launched a nationwide initiative that brought together, initially, all of the Group's brands, supported by key suppliers, to offer more attractive prices, promotions and services.

§ During the quarter, 25 new stores were opened, of which 24 were in the food segment (9 Minuto Pão de Açúcar, 7 Assaí, 6 Minimercado Extra, 1 Pão de Açúcar, and 1 fuel station) and 1 Casas Bahia store. The Company's expansion efforts will continue to prioritize higher-return formats.

§ In 2015, net sales totaled R\$69.1 billion, driven by the inauguration of 118 new stores, with 91 in the food segment (46 Minimercado Extra, 27 Minuto Pão de Açúcar, 11 Assaí, 5 Pão de Açúcar, 1 Extra Super and 1 fuel station) and 27 Casas Bahia stores.

§ In 2016, the Company will continue to focus on price competitiveness to continue gaining market share through higher productivity and operating efficiency and the expansion of higher-return formats.

Food Business (Multivarejo + Assaí)

§ Net sales in the quarter grew 6.7%, with the inauguration of 91 stores in the last 12 months (46 Minimercado Extra, 27 Minuto Pão de Açúcar, 11 Assaí, 5 Pão de Açúcar, 1 Extra Super and 1 fuel station). Same-store sales in the Food Business grew 1.9%, impacted primarily by non-food sales at hypermarkets due to the current economic scenario, which led to a drop in sales of durable goods in the entire market.

§ The performance of Food category remained resilient despite the changes in behavior of consumers, who are increasingly seeking more first-price products or products in promotion. Despite this scenario, Multivarejo and Assaí posted higher same-store Christmas and Black Friday sales than in the whole of the quarter.

§ **Multivarejo:** continuous market-share gains in the Pão de Açúcar banner as a result of the focus on monitoring and improving service quality, differentiated customer service and assortment, as well as on Proximity stores (Minimercado Extra and Minuto Pão de Açúcar) due to the advances in "clustering" and adjustment of assortment at stores. The Extra banner registered an increase in customer traffic compared to 2014, as a result of competitive pricing, store renovations and the training of employees specializing in perishables (bakers, butchers, fishmongers, confectioners, etc.)

§ The plan to renovate Extra stores, rolled out this year, included the modernization of 62 stores (35 hypermarkets and 27 supermarkets), which revised their product assortments and improved customer service, among other initiatives. Renovations already account for about 25% of the banner's sales. Renovated stores posted a significantly higher growth than unrenovated stores.

§ **Assaí:** strong organic growth and positioning resulted in solid growth throughout the year, which proves the effective strategy of the format. In 4Q15, net sales grew 27.8%, outpacing annual growth (25.5%), driven by above-inflation same-store sales and the inauguration of 7 stores in the quarter, 3 of which in the Northeast region, which already has 21 stores. In the last 12 months, 11 stores were opened, representing an expansion in sales area of 18% or 56,000 square meters, with the banner ending the year with 95 stores. Furthermore, 5 more stores are under construction and expected to open in the first half of 2016.

Via Varejo

§ Net sales totaled R\$5.5 billion, down 14.7% from 4Q14 or 13.9% after excluding the effect of the closure of 51 stores since 2Q14 to comply with the CADE ruling. On a same-store basis, the decrease was 15.2%.

§ Via Varejo intensified its sales strategy by improving price competitiveness and strengthening promotions and as a result posted its best sales performance since 2Q15, despite the scenario of a continued decline in consumer spending and confidence. Via Varejo gained market share in the quarter.

§ Sale of services, such as warranties and insurance, increased 5.2% from 4Q14, with a higher penetration due to initiatives such as training programs for sales teams, telemetry, pricing policies and sales campaigns. Also in 4Q15, the Company signed a new agreement with Bradesco for cards, which extends the original agreement and adds benefits that are expected to drive sales and profitability of financial products at the Casas Bahia banner.

§ The Crescer Mais Project already has 121 stores with the new concept of a Furniture category, 176 stores with the new concept of selling mobile phones and 81 banner conversions.

§ Rollout of Click-&-Collect operations (online sales with pickup at stores) at all stores using the inventory of Via Varejo.

§ With the improvement in sales performance in 4Q15, Via Varejo closes the year with a 15.0% decline in net sales, which represents a significant improvement from the two previous quarters (2Q15 and 3Q15), when sales decreased by 22.2%.

§ For the coming quarters, Via Varejo will continue to focus on operational excellence, boosting productivity at stores, reducing distribution costs and strengthening its commercial strategy, which will leave it better prepared to recover sales and increase market share gains.

Cnova

Highlights of the fourth quarter of 2015

§ GMV totaled €1,327 million in 4Q15 (+2.1% at constant currency and -9.3% on a reported basis, compared to the same period in 2014). On a constant currency basis, GMV declined 11.3% at Cnova Brazil.

ü Marketplace share of GMV reached 24.3% (+1,074 bps year-on-year) in the fourth quarter of 2015 (Cnova Brazil at 15.8%, +1,100 bps year-on-year).

§ Net sales totaled €899 million in the fourth quarter of 2015 (-5.9% yoy on a constant currency basis; -17.7% yoy on a reported basis).

Highlights in 2015

§ GMV amounted to €4,835 million in 2015, increasing +16.4% on a constant currency basis compared to 2014. After taking into account the strong negative impact (-8.7%) of the depreciation of the Brazilian real against the Euro, reported GMV grew by +7.8%. At Cnova Brazil, GMV increased by 12.9% on a constant currency basis.

ü The marketplace share of total GMV increased 916 bps in 2015 and reached 20.5% compared to 11.3% in 2014. Cnova Brazil's marketplace share of GMV was 10.8% (+725 bps). As of December 31, 2015, active marketplace sellers increased by +43.6% to almost 10,200 while the number of marketplace product offerings increased from 12 million to 28 million (+137%).

§ Net sales totaled €3,420 million in 2015, up 7.9% (+8.9% excluding the Brazil internal review charge) on a constant currency basis compared to 2014 and stable after taking into account the -8.9% exchange rate impact related to the depreciation of the Brazilian real versus the Euro.

ü Net sales of Cnova Brazil grew 5.1% (on a constant currency basis), while marketplace commissions grew +252%.

Cnova Investigation

As announced by the Company and the subsidiary Cnova NV, on December 18, 2015, an investigation was launched into employees' inventory-management practices that is being conducted by law firms. Over the course of works, other topics were added to the investigation related to accounting matters, as announced to the market on January 12, 2016.

The effects from the adjustments identified are materially related to fiscal year 2015 and amount to a negative effect on profit or loss of R\$177 million. The main effects are R\$47 million in additional provisioning for defective products; R\$75 million in write-offs of items in transit with freight carriers, and R\$55 million in additional trade accounts payable. The adjustment of write-offs of items in transit with freight carriers mentioned above includes the effect of R\$110 million from the reduction in net sales.

Effects related to previous years arising from the investigation impacting the above amounts are considered immaterial in relation to the main lines in the financial statements and in relation to the financial statements taken as a whole. The Management came to this conclusion after considering the quantitative and qualitative aspects.

When preparing the financial statements for the fiscal year ended December 31, 2015, the Company took into consideration all of the information available and does not believe new findings from the independent internal investigation conducted by the law firms could materially affect or change the adjustments identified to date.

Operating Performance

(1) EBITDA adjusted by “Other Operating Income and Expenses”, thus eliminating nonrecurring income and expenses.

(2) For better comparison between the periods, figures exclude the result of Cnova for 2014 and 2015, considering that international operations were only consolidated in GPA as of August 2014.

4Q15

The macroeconomic environment became adverse for consumption during the course of the year, and mainly affected sales of non-food products. Consequently, the Company intensified its efforts at price competitiveness and strengthening of promotions, especially in this segment. As a result, consolidated gross margin was lower than in 4Q14, at 22.2%.

Further to the measures to drive sales, the Company implemented measures to mitigate the impacts of high inflation, most notably: revision of the portfolio of stores and closure of loss-making stores and distribution centers; renegotiation of rental agreements; optimization of media spending; revision of executive benefits; adjustment of headcount in the administrative and operational areas; and initiatives to drive productivity at stores (revision of processes, benchmarks and energy efficiency). This focus on rationalization resulted in selling, general and administrative expenses to increase by just 5.1% in 4Q15, significantly below inflation in the period.

Other operating income and expenses in the quarter are mainly associated with restructuring expenses, net result from property and equipment, and expenses with the investigation at Cnova.

EBITDA adjusted by other operating income and expenses came to R\$921 million in the quarter, with margin of 4.7%. Compared to the margin in 4Q14, the difference is mainly due to the lower share of Via Varejo and Cnova in the Company's EBITDA.

2015

The international operations of Cnova started being consolidated into GPA in August 2014 and hence the results of 2014 reflect only 5 months of these operations. For better comparison purposes, the following comments reflect the result in 2015 and 2014 excluding the consolidated result of Cnova (Cnova Brazil and international operations).

During the course of 2015, the Company faced challenges on diverse fronts: demand was pressured by a recessionary environment, which mainly affected sales of non-food products, while expenses were impacted by high inflation. In this scenario, the Company took measures to adapt itself to the new macroeconomic scenario.

Consolidated gross margin stood at 27.0% compared to 28.1% in 2014, reflecting the lower share of Via Varejo in the Company's gross profit, due to measures taken to drive competitiveness in order to restore sales levels.

The efforts to optimize expenses and drive efficiency across all businesses rolled out throughout the year, resulted in selling, general and administrative expenses to register growth of just 4.4%, significantly below inflation, despite the costs associated with the opening of 118 stores in the year.

Adjusted EBITDA, excluding other operating income and expenses, totaled R\$3.818 billion, with adjusted EBITDA margin of 6.8%, for a contraction of 220 basis points from 2014.

Multivarejo

(1) EBITDA adjusted by “Other Operating Income and Expenses”, thus eliminating nonrecurring income and expenses

The year was marked by a slowdown in household consumption due to the worsening economic scenario. Despite these impacts, Multivarejo closed the quarter and the year with significant margin levels for the segment.

It is important to highlight the differences in the behavior of Multivarejo banners:

- i) Resilient performance by Pão de Açúcar which, despite the challenges posed by the macroeconomic scenario, maintained its high level of profitability in both 4Q15 and 2015 in relation to the previous year;
- ii) Significant improvement in the performance of the proximity format during the year, which ended 4Q15 by breaking even despite the opening of 73 stores in the year. One of the highlights was the successful clusterization strategy to better meet consumers' needs;

In the case of Extra, the results of 4Q15 and the year reflect the efforts to increase competitiveness and store renovations. However, the sales performance and profitability fell below the company's expectations or were sufficient to compensate for the changes seen in consumer behavior and migration of channels. In this scenario, the banner's profitability during the year was lower than in the previous year, although EBITDA margin levels are very solid for the hypermarket format. For the coming year, the Company expects sales to improve with the maintenance of profitability levels, especially through continued renovations and competitiveness efforts, with greater emphasis on the quality and assortment of

perishables, and by reducing stock out.

4Q15

During the quarter, Multivarejo continued its efforts at price competitiveness, especially in the Extra banner. This strategy, combined with changes in consumer habits, resulted in gross margin of 28.9% in the period. It is important to note that the comparison base of 4Q14 was the strongest in recent years.

In terms of operating efficiency, operating expenses (selling, general and administrative expenses) increased by just 3.6%, significantly lower than inflation during the period. This result reflects the cost-cutting initiatives rolled out since the start of the year, mainly related to the optimization of advertising expenses, renegotiation of rental agreements and operating improvements at stores (revision of processes and logistics efficiencies), all of which enabled us to adjust headcount without affecting service quality at the stores.

Adjusted EBITDA totaled R\$675 million, with margin of 9.2%, which is quite significant considering the economic scenario, and substantially higher than the level of 9M15 (7.1%). Compared to margin in 4Q14, note the strong comparison base – particularly in relation to gross margin - in that quarter, as mentioned previously, coupled with the pressure on expenses from inflation, increased expenses with electricity, which rose materially this year, and expenses with store expansion (80 stores opened in the last 12 months).

2015

Gross margin stood at 28.1% in the year, slightly below 2014, reflecting the price competitiveness strategy adopted throughout the year, especially at the Extra banner, which was partially offset by an increase in the share of higher margin formats (Pão de Açúcar, Minimercado Extra and Minuto Pão de Açúcar), coupled with the growth in rental revenue from commercial centers.

Since the start of the year, the Company has been implementing initiatives to adjust expenses in both operating and administrative areas to mitigate the impacts of inflation and higher electricity costs during the year. As a result, selling, general and administrative expenses increased by 7.4%, below the inflation during the period.

Adjusted EBITDA reached R\$2,055 million, with margin of 7.7% in the year, underlining solid margin levels for the segment. The difference in EBITDA margin compared to 2014 mainly reflects the impact of inflation on expenses, higher electricity costs and expenses associated with store expansion (80 new stores in the year). Other operating income and expenses totaled R\$281 million and were mainly related to expenses with restructuring throughout the year and property and equipment write-offs.

(1) EBITDA adjusted by “Other Operating Income and Expenses”, thus eliminating nonrecurring income and expenses

4Q15

In yet another quarter, Assaí registered solid net sales growth of 27.8%, the highest in the year, despite the strong comparison base (+26.5% in 4Q14), as a result of consistent same-store sales growth above inflation and strong organic expansion. This performance reflects the continuous growth in customer traffic at stores, the banner's assertive positioning and attractive prices. Assaí is currently one of the fastest growing Cash & Carry operation in Brazil and in the industry, gaining 200 bps in market share in the last two years*, and is expected to continue to increase its share of GPA Food in 2016 (having reached 30% of GPA Food in 4Q15).

EBITDA grew significantly by 52.1% in 4Q, with EBITDA margin of 6%, compared to 5% in the prior year. The increase reflects the format's strength and rigorous control of expenses. On an adjusted basis, i.e. excluding other operating income and expenses, EBITDA was R\$192 million in the period, up 23.2% from 4Q14. Adjusted EBITDA margin reached 6.1%, despite the higher expenses related to strong organic expansion (7 new stores), which added 35,000 m² of sales area (+15% from 2014) and pressure from expenses related to inflation and electricity, which had a significant impact in the year.

*Nielsen data.

2015

Assaí registered sales of R\$11.3 billion in the year, consolidating its vice leadership in the cash & carry segment. Net sales totaled R\$10.5 billion, for solid growth of 25.5%, increasing the share of Assaí in the

GPA Food portfolio to 28% (vs. 24% in 2014). Gross margin increased 20 basis points, from 14.5% to 14.7%, mainly due to the banner's growth and maturation of new stores.

In the year, EBITDA grew 40.2% and adjusted EBITDA reached R\$441 million, up 27.5%, and outpacing sales growth. Despite the strong expansion of stores in the year and the pressure on expenses related to inflation and mainly electricity costs, EBITDA margin remained stable at 4.2%, as a result of improved operating efficiency.

In 2016, organic expansion will remain a priority for the banner, which already finances its own growth through cash generation and efficient management of working capital.

(1) Some figures in this earnings release differ from those presented in the Via Varejo release due to the effects of intercompany transactions; (2) EBITDA adjusted by “Other Operating Income and Expenses”, thus eliminating nonrecurring income and expenses.

4Q15

Despite the adverse economic scenario for the durable goods industry, which suffered a sharp decline in sales from the second quarter of 2015, Via Varejo intensified its sales strategy by improving price competitiveness and strengthening promotions, posting its best sales performance since 2Q15, with market share gains.

Gross margin reached 30.2% due to the following factors:

- (i) higher share of services in the total sales and operating efficiency gains, which contributed to the aforementioned investments in price;
- (ii) the positive effect of tax credits in 4Q14, which benefitted gross margin in the period, as explained in the Earnings Release for 4Q14.

Via Varejo adopted a series of efficiency measures to mitigate the impact of lower sales on profitability, notably the closure of loss-making stores, optimization of the logistics network and space at distribution centers, adjustment of headcount and renegotiation of rental agreements and other services and expenses. These initiatives, which were rolled out throughout the year, helped cut SG&A expenses by 5.7% in 4Q15, led by a 12.5% reduction in General and Administrative Expenses in the quarter, despite inflation (IPCA) of

10.67% in the year. As a result, EBITDA margin in the period stood at 4.7%. Adjusted by other operating income and expenses related to restructuring, EBITDA came to R\$336 million, with margin of 6.2%.

2015

The year of 2015 was very challenging for the durable goods industry, requiring Via Varejo to work with focus and discipline to make the necessary adjustments and continue to implement its strategic plan, thereby ensuring its leadership position in the market and strengthening its competitive advantages. Via Varejo accelerated initiatives of operating efficiency, such as optimizing the logistics network and capturing back-office synergies with the Group's companies, and adopted measures to streamline processes and rationalize expenses. These measures include revising the store portfolio, with the closing of 39 underperforming stores in the year, revising the logistics network and use of space at distribution centers, headcount adjustment with the reduction of approximately 13,000 positions, and renegotiating rental agreements.

The Company ended 2015 with an adjusted EBITDA of R\$1.321 billion and margin of 6.9%. Other operating income and expenses in the year are mainly related to the restructuring initiatives.

Financial Result

	Consolidated					
(R\$ million)	4Q15	4Q14	Δ	2015	2014	Δ
Financial Revenue	141	196	-28.0%	778	687	13.2%
Financial Expenses	(750)	(626)	19.8%	(2,426)	(2,195)	10.5%

% of Net Revenue	3.1%	2.2%	90 bps	2.4%	2.3%	10 bps

4Q15

Net financial revenue (expense) increased 41.6% in the quarter to R\$609 million. The main variations in net financial result were:

§ Decrease of R\$55 million (or 28.0%) in financial income, reflecting the lower average cash balance in the quarter;

§ Increase of R\$52 million (or 16.3%) in the cost of sale of credit card and payment book receivables, below the increase in CDI rate, mainly due to weaker sales in non-food categories in the quarter;

§ Increase of R\$72 million in the cost of debt and others, in line with the interest rate increase in the period.

2015

In 2015, net financial expense amounted to R\$1.648 billion, increasing 9.3% from 2014, which was significantly lower than the 26.8% hike in the interest rate the period.

As a ratio of net sales, the net financial result increased by just 10 basis points, from 2.3% in 2014 to 2.4% in 2015, virtually stable compared to last year, despite a more challenging macroeconomic scenario.

This was possible due to the cash management strategy adopted by the Company during the year, which resulted in significant optimization of cash.

(1) Net Income adjusted by “Other Operating Income and Expenses”, thus eliminating nonrecurring income and expenses

4Q15

The deterioration of the economic scenario during the year resulted in diverse challenges: decline in demand due to the lowest-ever level of consumer confidence, and pressure on expenses from high inflation. In this context, the Company's results were mainly impacted by the non-food segment (Via Varejo and Cnova). Moreover, the hike in interest rate and other operating income and expenses mainly related to restructuring expenses also affected the quarter's results.

Net income attributable to controlling shareholders and adjusted by Other Operating Income and Expenses amounted to R\$147 million. It is worth highlighting the resilient performance of the Food segment, which continues to deliver strong results, ending the quarter with net income attributable to controlling

Edgar Filing: BRAZILIAN DISTRIBUTION CO COMPANHIA BRASILEIRA DE DISTR CBD - Form 6-K
shareholders of R\$316 million in the same period.

2015

In the year, due to the above-mentioned challenges posed by the macroeconomic scenario, the Company's results were mainly affected by the results of Via Varejo and Cnova. Note that Cnova international operations started being consolidated in GPA in August 2014 and hence were not fully reflected in 2014, impacting the comparison basis.

The Company closed 2015 with net income attributable to controlling shareholders, adjusted by Other Operating Income and Expenses, of R\$595 million, with the Food segment accounting for a significant R\$731 million in the same category.

Indebtedness

Consolidated		
(R\$ million)	12.31.2015	12.31.2014
Short Term Debt	(1,506)	(3,854)

Payment Book - Long Term	(167)	(136)
Net Cash with Payment Book	3,036	1,421
Net Cash with Payment Book / EBITDA	1.13x	0.29x

The company has been continuously reducing its leverage in recent years to further strengthen its financial position. Despite the unfavorable and challenging macroeconomic level, the Company reduced its gross debt by R\$1.348 billion and ended the year with a high level of cash reserves of approximately R\$11.0 billion, leading to a net cash balance of R\$5.511 billion, up R\$1.214 billion from the previous year. As a result, the net cash/EBITDA ratio improved from 0.87 times on December 31, 2014 to 2.06 times on December 31, 2015.

Including payment book operations of Via Varejo, net cash position reached R\$3.036 billion on December 31, 2015, up 2.1 times from the previous year.

Lengthening of the debt maturity profile, including the payment book operation, was 181 days more than on December 31, 2014.

Net Debt	5,511	4,297	5,511	4,297

On December 31, 2015, the Company's cash position was R\$11.015 billion, stable compared to 2014. The main changes in the year were:

§ EBITDA impacted by more disciplined consumption, mainly affecting sales of non-food items;

§ Continued improvement of working capital driven by enhanced management of trade payables and control of inventory levels;

§ Change in other assets and liabilities chiefly related to values advanced in connection with the agreement with Bradesco at Casas Bahia and dividends received from FIC;

§ Amortization of debentures in the approximate amount of R\$2.6 billion.

The Company's cash management strategy enabled it to end the year with a strong cash position despite the economic slowdown.

4Q15

Consolidated investments totaled R\$504 million in the quarter, of which 68% was invested in the Food segment and 20% in Via Varejo.

The Group opened 25 new stores focused on higher-return formats, which included 24 in the food segment (9 Minuto Pão de Açúcar, 7 Assaí, 6 Minimercado Extra, 1 Pão de Açúcar and 1 fuel station) and 1 Casas Bahia store.

2015

In 2015, consolidated investments totaled R\$2,000 million. During the year, 118 new stores were opened, which included 91 in the food segment (46 Minimercado Extra, 27 Minuto Pão de Açúcar, 11 Assaí, 5 Pão de Açúcar, 1 Extra Super and 1 fuel station) and 27 Casas Bahia stores.

In the **Food** segment, apart from new stores, the Company also invested in store renovations, which reached the highest level in the last 3 years. Store renovations were carried out across all banners of the Food segment, more intensely at Extra, which ended the year with 62 stores renovated (35 hypermarkets and 27 supermarkets). These renovations already account for approximately 25% of the banner's sales.

Via Varejo ended 2015 with 176 stores renovated for the new telephone sales category, with better assortment, services, plans and display, and 121 stores for the new furnishings category, which offer better product design, customized furniture, specialized service and improved store layout. Moreover, 81 banner conversions were carried out to adjust the company's positioning to the needs of its customers. In addition to renovations, 27 new stores were opened in the year.

In 2016, the Group plans to maintain its investment discipline, with the focus on organic growth of higher-return formats. In the food segment, Capex will mainly focus on the organic growth of Assaí and

Edgar Filing: BRAZILIAN DISTRIBUTION CO COMPANHIA BRASILEIRA DE DISTR CBD - Form 6-K
renovations in the Extra banner.

16

Dividends

In a meeting held on May 7, 2015, the Board of Directors approved the payment of interim dividends for fiscal year 2015. The payments for 1Q15, 2Q15 and 3Q15 totaled R\$115.4 million and were made on May 28, 2015, August 8, 2015 and November 11, 2015, respectively. This amount corresponded to R\$0.136365 per common share and R\$0.15 per preferred share in each of the interim payments.

Management proposed the distribution of additional dividends in the amount of approximately R\$4 million.

Appendix I – Definitions used in this document

Company's Business Units: The Company's business is divided into four units - Retail, Cash & Carry, Electro (sale of electronics and home appliances in brick-and-mortar stores) and E-commerce – grouped as follows:

Same-Store Sales: The basis for calculating same-store sales is defined by the sales registered in stores open for at least 12 consecutive months. Acquisitions in their first 12 months of operation are not included in the same-store calculation base.

Growth and changes: The growth and changes presented in this document refer to variations from the same period of the previous year, except where stated otherwise.

EBITDA: EBITDA is calculated in accordance with Instruction 527 issued by the Securities and Exchange Commission of Brazil (CVM) on October 4, 2012.

Adjusted EBITDA: Measure of profitability calculated by excluding Other Operating Income and Expenses from EBITDA. Management uses this measure because it believes it eliminates nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.

Adjusted net income: Measure of profitability calculated as Net Income excluding Other Operating Income and Expenses and excluding the effects on Income and Social Contribution Taxes. Also excluded are the effects of nonrecurring direct income tax. Management uses this metric given its understanding that it eliminates any nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.

The individual and parent company financial statements are presented in accordance with IFRS and the accounting practices adopted in Brazil and refer to the fourth quarter of 2015 (4Q15) and fiscal year 2015, except where stated otherwise, with comparisons in relation to the prior-year period.

About GPA: GPA is Brazil's largest retailer, with a distribution network comprising over 2,000 points of sale as well as electronic channels. Established in 1948 in São Paulo, it has its head office in the city and operations in 20 Brazilian states and the Federal District. With a strategy of focusing its decisions on customers and better serving them based on their consumer profile in the wide variety of shopping experiences it offers, GPA adopts a multi-business and multi-channel platform with brick-and-mortar stores and e-commerce operations divided into five business units:

Any and all non-accounting information or derived from non-accounting figures has not been reviewed by independent auditors.

To calculate EBITDA, we use earnings before interest, taxes, depreciation and amortization. The base used to calculate "same-store" gross sales revenue is determined by the sales made in stores open for at least 12 consecutive months and which did not remain closed for seven or more consecutive days in the period. Acquisitions in their first 12 months of operation are not included in the same-store calculation base.

GPA adopts the IPCA consumer price index as its benchmark inflation index, which is also used by the Brazilian Supermarkets Association (ABRAS), since it more accurately reflects the mix of products and brands sold by the Company. The IPCA in the 12 months ended December 2015 was 10.67%.

Disclaimer: Statements contained in this release relating to the business outlook of the Company, projections of operating/financial results, the growth potential of the Company and the market and macroeconomic estimates are mere forecasts and were based on the expectations of Management in relation to the Company's future. These expectations are highly dependent on changes in the market, Brazil's general economic performance, the industry and international markets, and are thus subject to change.

Multivarejo, which operates the supermarket, hypermarket and proximity store formats, as well as fuel stations and drugstores under the Pão de Açúcar and Extra banners; Assaí, which operates in the cash-and-carry wholesale segment; Via Varejo, with brick-and-mortar electronics and home appliance stores under the Casas Bahia and Ponto Frio banners; GPA Malls, which is responsible for managing the real estate assets, expansion projects and new store openings; and the e-commerce segment Cnova, which comprises the operations of Cnova Brazil, Cdiscount in France and their international websites.

SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
