FORWARD-LOOKING STATEMENTS

This report contains certain forward-looking statements. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by terms such as “anticipate,” “believe,” “could,” “estimate,” “expects,” “intend,” “may,” “plan,” “potential,” “project,” “should,” “will” and “would” or the terms or other comparable terminology.

Forward-looking statements contained in this report are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us or are within our control. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Forward-looking statements we make in this report are subject to various risks and uncertainties that could cause actual results to vary from our forward-looking statements, including:

- the factors described in this report, including those set forth under the sections captioned “Risk Factors” and “Business;”
- changes in our industry, interest rates, the debt securities markets, real estate markets or the general economy;
 - increased rates of default and/or decreased recovery rates on our investments;
 - availability, terms and deployment of capital;
 - availability of qualified personnel;
 - changes in governmental regulations, tax rates and similar matters;
 - changes in our business strategy;
- availability of investment opportunities in commercial real estate-related and commercial finance assets;
 - the degree and nature of our competition;
 - the adequacy of our cash reserves and working capital; and
 - the timing of cash flows, if any, from our investments.

We caution you not to place undue reliance on these forward-looking statements which speak only as of the date of this report. All subsequent written and oral forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Except to the extent required by applicable law or regulation, we undertake no obligation to update these forward-looking statements to reflect events or circumstances after the date of this filing or to reflect the occurrence of unanticipated events.

PART I

ITEM 1. BUSINESS

General

We are a specialty finance company that focuses primarily on commercial real estate and commercial finance. We are organized and conduct our operations to qualify as a real estate investment trust, or REIT, for federal income tax purposes. Our objective is to provide our stockholders with total returns over time, including quarterly distributions and capital appreciation, while seeking to manage the risks associated with our investment strategy. We invest in a combination of commercial real estate debt and other real estate-related assets and, to a lesser extent, higher-yielding commercial finance assets. We have financed a substantial portion of our portfolio investments through borrowing strategies seeking to match the maturities and repricing dates of our financings with the maturities and repricing dates of those investments, and to mitigate interest rate risk through derivative instruments.

We are externally managed by Resource Capital Manager, Inc., which we refer to as the Manager, a wholly-owned indirect subsidiary of Resource America, Inc. (NASDAQ: REXI), a specialized asset management company that uses industry specific expertise to generate and administer investment opportunities for its own account and for outside investors in the commercial finance, real estate, and financial fund management sectors. As of December 31, 2008, Resource America managed approximately \$17.5 billion of assets in these sectors. To provide its services, the Manager draws upon Resource America, its management team and their collective investment experience.

[\(Back to Index\)](#)

[\(Back to Index\)](#)

Our investments target the following asset classes:

Asset Class	Principal Investments
Commercial real estate-related assets	<ul style="list-style-type: none"> · First mortgage loans, which we refer to as whole loans · First priority interests in first mortgage real estate loans, which we refer to as A notes · Subordinated interests in first mortgage real estate loans, which we refer to as B notes · Mezzanine debt related to commercial real estate that is senior to the borrower's equity position but subordinated to other third-party financing · Commercial mortgage-backed securities, which we refer to as CMBS
C o m m e r c i a l finance assets	<ul style="list-style-type: none"> · Senior secured corporate loans, which we refer to as bank loans · Other asset-backed securities, which we refer to as other ABS, · Equipment leases and notes, principally small- and middle-ticket commercial direct financing leases and notes · Debt tranches of collateralized debt obligations, which we refer to as CDOs

Beginning in the second half of 2007, there have been unprecedented disruptions in the credit markets, abrupt and significant devaluations of assets directly or indirectly linked to the U.S. real estate finance markets, and the attendant removal of liquidity, both long and short term, from the capital markets. These conditions have had, and we expect will continue to have, an adverse effect on us and companies we finance. During the years ended December 31, 2008 and 2007, we recorded provisions for loan and lease losses of \$46.2 million and \$6.2 million, respectively. We also recorded \$26.3 million in asset impairments during the year ended December 31, 2007. In addition, we recorded losses through other comprehensive income of \$46.9 million and \$22.6 million on our CMBS-private placement portfolio as of December 31, 2008 and 2007, respectively, all as a result of the unprecedented disruptions in the credit markets.

The events occurring in the credit markets have impacted our financing strategies. The market for securities issued by new securitizations collateralized by assets similar to those in our investment portfolio has largely disappeared. While we were able to sponsor two new securitizations in 2007, we expect our ability to sponsor new securitizations will be severely limited, if not gone for the foreseeable future. The availability of short-term financing through warehouse lines of credit and repurchase agreements has contracted severely as a result of the increased volatility in the valuation of assets similar to those we originate. These events have impacted (and we expect will continue to impact) our ability to grow and finance our business on a long-term, match-funded basis and our ability to build our investment portfolio securities.

Beginning in the second half of 2007 and continuing throughout 2008, we have focused on managing our exposure to liquidity risks primarily by reducing our exposure to possible margin calls under repurchase agreements and seeking to conserve our liquidity. As a result, we have substantially reduced our repurchase agreement debt to \$17.1 million at December 31, 2008 from \$116.4 million at December 31, 2007. We have continued to manage our liquidity and originate new assets primarily through capital recycling as payoffs occur and through existing capacities within our completed securitizations. While we recorded significant allowances for loan and lease loss reserves as a result of the developments in the credit markets resulting in a net loss during 2008, we declared common dividends of \$1.60 per

share on estimated REIT taxable income of \$1.57 per share.

[\(Back to Index\)](#)

(Back to Index)

We calculate our distributions to our shareholders based on our estimate of our REIT taxable income, which may vary greatly from our net income calculated in accordance with U.S. generally accepted accounting principles, or GAAP. We expect that our REIT taxable income will be comprised primarily of our net investment income and our fee income. We expect that our REIT taxable income will be greater than our GAAP net income primarily because asset impairments and provisions for loan and lease losses are not deductible until realized for tax purposes as well as net book to tax adjustments for our taxable foreign REIT subsidiaries and fee income received by our taxable REIT subsidiaries, or TRSs, that is dividended to us and included in our REIT taxable income but deferred or eliminated for GAAP purposes. For further discussion, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Our Business Strategy

The core components of our business strategy are:

Managing our investment portfolio. As of December 31, 2008, we managed \$1.9 billion of assets, including \$1.7 billion of assets held in CDOs. The core of our management process is credit analysis which we use to actively monitor our existing investments and as a basis for evaluating new investments. Senior management of our Manager and Resource America has extensive experience in underwriting the credit risk associated with our targeted asset classes, and conducts detailed due diligence on all credit-sensitive investments, including the use of proprietary credit stratifications and collateral stresses. After making an investment, the Manager and Resource America engage in active monitoring of our investments for early detection of troubled and deteriorating securities. If a default occurs, we will use our senior management team’s asset management skills to mitigate the severity of any losses, and we will seek to optimize the recovery from assets if we foreclose upon them.

Managing our interest rate and liquidity risk. We generally seek to manage interest rate and liquidity risk so as to reduce the effects of interest rate changes on us. On our long-term financing we seek to match the maturity and repricing dates of our investments with the maturities and repricing dates of our financing. Historically, we have used CDO vehicles structured for us by our Manager to achieve this goal. Currently, we finance new investments through existing capacity in our CDOs or through cash available from principal repayments on or payoffs of existing investments. We also seek to mitigate interest rate risk through derivative instruments.

Historically, we have managed our interest rate and liquidity risk on our short-term financing, principally repurchase agreements, by limiting the amount of our financial exposure under the facilities to either a stated investment amount or a fixed guaranty amount. During the past 18 months, we have managed these risks by substantially reducing the amount of our short-term financing. As of December 31, 2008, we had \$17.1 million of outstanding short term debt.

Investment in real estate and commercial finance assets. We expect to continue to invest in commercial real estate whole loans, B notes, mezzanine debt, CMBS rated below AAA by Standard & Poors, or S&P, commercial finance assets, including bank loans, and to a lesser extent, direct financing leases and notes, subject to the availability of investment funds and financing. Our equity at December 31, 2008 was invested 72% in commercial real estate loans, 25% in commercial bank loans and 3% in direct financing lease and notes. In 2009, we expect to recycle capital within our CDO structures to make a limited amount of new investments to replace loans that have been paid down or paid off and to replace loans that may be sold.

Diversification of investments. We seek to manage our investment risk by maintaining a diversified portfolio of real estate-related and commercial finance assets. As funds become available for investment or reinvestment, we seek to maintain that diversification while allocating our capital to those sectors that we believe are the most economically attractive. The percentage of assets that we may invest in certain of our targeted asset classes is subject to the federal income tax requirements for REIT qualification and the requirements for exclusion from Investment Company Act regulation.

Our Operating Policies and Strategies

Investment guidelines. We have established investment policies, procedures and guidelines that are reviewed and approved by our investment committee and board of directors. The investment committee meets regularly to monitor the execution of our investment strategies and our progress in achieving our investment objectives. As a result of our investment strategies and targeted asset classes, we acquire our investments primarily for income. We do not have a policy that requires us to focus our investments in one or more particular geographic areas.

Financing policies. We have used leverage in order to increase potential returns to our stockholders and for financing our portfolio. We do not speculate on changes in interest rates. While we have identified our leverage targets for each of our targeted asset classes, our investment policies require no minimum or maximum leverage and our investment committee has the discretion, without the need for further approval by our board of directors, to increase the amount of leverage we incur above our targeted range for individual asset classes.

[\(Back to Index\)](#)

(Back to Index)

We have historically used borrowing and securitization strategies, substantially through CDOs, to accomplish our long-term match funding, financing strategy. However, the developments in the credit markets, particularly since the second half of 2007, have significantly limited our ability to execute our long term financing strategy. In the foreseeable future, we will seek to finance our investments through investing restricted cash and reinvesting loan repayments received under our current securitized financings, and to a lesser extent, bank lines of credit and other methods that preserve our capital.

Hedging and interest rate management strategy. We use derivative financial instruments to hedge a portion of the interest rate risk associated with our borrowings. Under the federal income tax laws applicable to REITs, we generally will be able to enter into certain transactions to hedge indebtedness that we may incur, or plan to incur, to acquire or carry real estate assets, provided that our total gross income from such hedges and other non-qualifying sources must not exceed 25% of our total gross income. These hedging transactions may include interest rate swaps, collars, caps or floors, puts and calls and options.

Credit and risk management policies. Our Manager focuses its attention on credit and risk assessment from the earliest stage of the investment selection process. In addition, the Manager screens and monitors all potential investments to determine their impact on maintaining our REIT qualification under federal income tax laws and our exclusion from investment company status under the Investment Company Act of 1940. Risks related to portfolio management, including the management of risks related to credit losses, interest rate volatility, liquidity and counterparty credit are generally managed on a portfolio-by-portfolio basis by each of Resource America's asset management divisions, although there is often interaction and cooperation between divisions in this process.

Our Investment Strategy

The following table describes certain characteristics of our commercial real estate loans, bank loans, CMBS, other ABS and direct financing leases and notes as of December 31, 2008 (dollars in thousands):

	Amortized cost	Estimated fair value (1)	Percent of portfolio	Weighted average coupon
Loans Held for Investment				
Commercial real estate loans:				
Mezzanine loans	\$ 210,733	\$ 197,458	13.0%	5.46%
B notes	89,069	88,529	5.8%	6.21%
Whole loans	519,337	519,524	34.2%	7.25%
Bank loans	937,507	582,416	38.3%	5.13%
	1,756,646	1,387,927	91.3%	

Investments in Available-for-Sale Securities
