Exploration and Production Refining Marketing and Distribution Chemicals

COMPANY PROFILE

Sinopec Corp. is one of the largest integrated energy and chemical companies in China. Its principal operations include the exploration and production, pipeline transportation and sale of petroleum and natural gas; the production, sale, storage and transportation of refinery products, petrochemical products, coal chemical products, synthetic fibre, and other chemical products; the import and export, including an import and export agency business, of petroleum, natural gas, petroleum products, petrochemical and chemical products, and other commodities and technologies; and research, development and application of technologies and information.

DEFINITIONS:

In this report, unless the context otherwise requires, the following terms shall have the meaning set out below:

Sinopec Corp.: China Petroleum & Chemical Corporation;

Company: Sinopec Corp. and its subsidiaries;

China Petrochemical Corporation: our controlling shareholder, China Petrochemical Corporation;

Sinopec group: China Petrochemical Corporation and its subsidiaries;

Sichuan-to-East China Pipeline Co.: Sinopec Sichuan-to-East China Natural Gas Pipeline Co., Ltd;

RMC: Oil and Natural Gas Reserves Management Committee of the Company;

CSRC: China Securities Regulatory Commission.

Hong Kong Stock Exchange: The Stock Exchange of Hong Kong Limited Hong Kong Listing Rules: Listing Rules of the Hong Kong Stock Exchange

Conversion:

For domestic production of crude oil, 1 tonne = 7.1 barrels;

For overseas production of crude oil: 2016, 1 tonne = 7.20 barrels; 2015, 1 tonne = 7.21 barrels; 2014, 1 tonne = 7.22 barrels;

For production of natural gas, 1 cubic meter = 35.31 cubic feet;

Refinery throughput is converted at 1 tonne = 7.35 barrels.

CHAIRMAN'S STATEMENT

Mr. Wang Yupu, Chairman

Dear Shareholders and Friends:

On behalf of the Board of Directors, the management and all the staff of Sinopec Corp., I would like to express my sincere gratitude to our shareholders and the wider community for your interest and support.

In 2016, as a result of low oil prices, the Company faced a challenging and complex operating environment. Given those conditions, on one hand, in light of the government's new thinking about the country's development, the Company took a visionary approach to the future. Guided by our strategies of value-oriented growth, innovation-driven development, integrated resource allocation, openness to cooperation, and green, low-carbon development, we formulated our 13th Five-Year Plan and has been continuously creating new and sustainable competitive advantages. On the

other hand, in view of the difficulties that low oil prices created for our upstream operations, along with slower growth in downstream demand and structural changes in the external environment, we intensified our reform initiatives and implemented stricter controls over our investment plans in tandem with a series of major reforms on the supply side. Over the past year, our focus on transformation of growth mode and structural adjustments allowed us to improve the quality and efficiency of our assets as well as upgrade our operations. Under the management's leadership, the entire staff united to advance these goals. We achieved significant improvement in our operating results through unremitting joint efforts to explore new markets, optimise our operations, reduce costs and improve risk management. Together, these achievements

represented an exceptional start to our 13th Five-Year Plan.

In 2016, in accordance with the IFRS, the Company recorded a turnover and other operating revenue of RMB 1,930.9 billion. Profit before taxation was RMB80.2 billion, represented a 42.1% increase year on year, of which profit attributable to owners of the Company amounted to RMB46.7 billion, represented a 43.6% increase year on year.

Taking into account the Company's profitability, shareholders return and the need for future development, the Board of Directors proposed a final dividend of RMB 0.17 per share, which, combined with the interim dividend of RMB 0.079 per share, brought the full-year dividend to RMB 0.249 per share. The dividend payout ratio reaches 64.6%.

Over the past year, in its efforts to implement supply-side structural reform, the Company benefited from its integrated value chain, which allows our businesses to complement each other well. As we increased the effective supply of petroleum and petrochemical products and related services to the community, we reaped economic benefits and improved our asset utilisation. To cope with harsh conditions in the upstream sector, we strengthened measures to rein in costs and address our weaknesses. At the same time, we gave priority to high-efficiency exploration activities and made a number of important new discoveries. In line with our emphasis on profitability, we made continuous improvements in our oil production and trimmed production of high-cost oilfields, thereby effectively controlling our production costs. The Company also continuously improves its energy structure by increasing production of shale gas. As a result, domestic gas production for the year reached 21.6 billion cubic meters, while we further developed Fuling shale gas field, China's first large-scale shale gas project, to an annual capacity of 7 billion cubic meters. Our energy structure improved steadily as our gas supply in the Yangtze River Economic Belt and the Beijing-Tianjin-Hebei region continued to grow. In

downstream operations, the Company achieved robust results by taking advantage of market opportunities to expand the effective supply of mid-range and high-end products. We optimised the structure of our refinery products according to market demand and vigorously promoted applications of new technologies, leading to a lower diesel- to-gasoline ratio. Moreover, we pressed ahead with upgrading of our oil product specification to ensure implementation of GB V standards for automobile gasoline and diesel fuels and the GB VI standards for Beijing. At the same time, we eliminated obsolete and low-efficiency production

facilities. In the chemical business, we adhered to development of basic and high-end chemicals. We further increased the proportion of high end products from three major synthetic materials. As we enhanced our efforts in new product development, we pressed ahead with integration of production, sales, research and consumption, striving to offer comprehensive solutions to customers. Meanwhile, we continuously adapted our marketing initiatives to reflect the latest market trends. With our superior network, we delivered more environmentally friendly premium gasoline products to the market. In addition, we complemented our marketing activities by growing our emerging businesses. We continuously expanded our business types and product varieties in an aim to provide one-stop service to our customers. Transaction value of our emerging business surged by 41%. These results mark an important milestone for us in our development as an comprehensive service provider.

In 2016, the Company further enhanced cooperation with our business partners. In our overseas operations, we were actively involved in expanding projects across the Belt and Road region and we continued to make progress in developing a number of major projects, such as the Yanbu refinery in Saudi Arabia, which commenced operations during the year. In our domestic businesses, the Company further strengthened its mixed-ownership operations and partnered with 14 provinces and cities in China to drive the development of our natural gas business. We brought in new investors to Sichuan-to-East China Pipeline Co.,

a result, we achieved effective control over our expenses and kept inventories at reasonable levels. Moreover, we enjoyed abundant free cash flow and maintained the ratio of liabilities to assets at a low level.

Over the past year, the Company actively fulfilled its social responsibilities and firmly established itself as a good corporate citizen. We advanced our green, low-carbon development initiatives as we delivered more environmentally friendly products. We also successfully concluded our Clear Water, Blue Sky environmental campaign, achieving further declines in the emissions of major pollutants. We stressed the importance of biodiversity and strove to minimise the environmental impact of our operations. Meanwhile, we continued to open up the Company to public scrutiny. As a people-oriented enterprise, we reinforced workplace safety for our employees and secured their legitimate rights and interests. In 2016, we earmarked a total of RMB 6.584 billion to promote social, educational, medical and healthcare development in the areas where we have operations. In addition, we stepped up targeted measures to combat poverty, reduce privation in impoverished areas in Qinghai and Tibet, with total donations amounted to RMB 133 million to help local residents achieve sustainable development.

Looking ahead to 2017, we expect the global political and economic landscape to become more complex, with international oil prices hovering at low levels. Meanwhile, we believe that more positive trends will emerge in China's economy, driving faster growth in domestic demand for petroleum and petrochemical products. The Company will adhere to its development strategies of value-oriented growth, innovation-driven development,

assets. We will take advantage of opportunities that arise from the government's support policies, including reforms in the oil and gas sector and in state-owned enterprises as well as the Belt and Road initiative, to enhance the quality and profitability of our business.

In 2017, under the Company's 13th Five-Year Plan, our planned capital expenditures will be RMB 110.2 billion. We will strive to increase our upstream reserves and resource base. We will also expand natural gas, especially shale gas, businesses to promote gas consumption in the Yangtze River Economic Belt. In the refining and chemical businesses, we will build four world-class refining bases, in Mao Zhan, Zhenhai, Shanghai and Nanjing. We will promote further upgrades in oil products and improve our capability to deliver high-end, high-value-added products. At the same time, we will give full play of our advantages in the marketing network and brand name to supply the market with cleaner oil products and reinforce our efforts to tap potentials in our emerging businesses and transform into an comprehensive services provider. Through the implementation of Energy Efficiency Doubling Plan and Green Enterprises Action Plan, we will endeavor to become the leading green, low-carbon operators in the industry.

raising RMB 22.8 billion. Meanwhile, Sinopec Marketing Co. Ltd.'s shareholding reform progressed smoothly. While we have continued developing our refining and chemical production bases and shifting our focus towards mid-range and high-end products, we increased our efforts to find additional opportunities for cooperation in various sectors with the aim of enabling all participants to enjoy the benefits of shared development.

In 2016, the Company continued to improve its management and operating efficiency. We diligently promoted a corporate culture of rigorousness, meticulousness and pragmatism, thus ensuring that we conducted our operations in compliance with applicable laws and regulations. At the same time, we integrated our internal control and risk management systems and further improved our controls on investment and financial management. We also increased our efforts to promote information-based, intelligent operations throughout the Company and to develop our data sharing platform. As

integrated resource allocation, openness to cooperation, and green, low-carbon development. In accordance with our objective of progressing at a steady pace, we will strive to achieve safety and environmental friendly goals, stable production and operations, and steady improvements in operating results. On top of that, we will actively pursue market opportunities and further deepen supply-side structural reform. While redoubling efforts to implement structural adjustments, we will promote technological innovations and prudently implement mixed-ownership reforms. In addition, we will explore ways to create a new business model that will capitalise on our finance business to support development of core physical operations. These measures will help us rejuvenate our operations, enhance our operating efficiency and augment the profitability of our

The Board of Directors and I believe that through the joint efforts of the Board, the management and all the staff, coupled with the support of our shareholders and the wider community, Sinopec Corp. will continue to make progress in its various businesses, growing stronger and bigger and delivering greater value to our shareholders and our society.

Wang Yupu
Chairman

Beijing, China 24 March 2017

BUSINESS REVIEW AND PROSPECTS

BUSINESS REVIEW

In 2016, global economic recovery continued to be weak, while China's economy maintained its stable growth, with gross domestic product (GDP) up by 6.7%. International oil prices fluctuated above their lowest levels. With abundant supply, domestic oil products market witnessed strong competition. Demand for chemicals grew steadily, and China's environmental regulations became more stringent. The Company actively addressed market changes through a focus on growth quality, profitability and restructuring. We pressed ahead with measures to address market development, optimisation, cost reduction and risk control, coordinating all aspects of our work, which helped deliver operating results that were better than expected.

1 MARKET REVIEW

(1) Crude Oil Market

In 2016, international crude oil prices bottomed out and fluctuated upwards, yet still remained at a low level. The average spot price of Platt's Brent for the year was USD 43.69 per barrel, down by 16.7% from the previous year.

(2) Refined Oil Products Market

In 2016, domestic demand for refined oil products maintained its growth while the structure of consumption continued to change, and market supply was in surplus. According to our statistics, apparent consumption of refined oil products (including gasoline, diesel and kerosene) was 288 million tonnes, up by 4.3% from the previous year, with gasoline up by 11.9%, kerosene up by 11.0% and diesel down by 2.2%. The government further improved the pricing mechanism for refined oil products by setting the floor price. In 2016, the government made 15 price adjustments with 10 increases and 5 decreases.

(3) Chemical Products Market

In 2016, domestic demand for chemicals grew steadily. According to our statistics, domestic apparent consumption of ethylene equivalent was up by 3.0% from the previous year, and consumption of synthetic resin, synthetic fiber and synthetic rubber rose by 5.1%, 2.6% and 7.5%, respectively. Domestic chemical product prices decreased compared with the previous year, but experienced an upward trend, in line with movements of international chemical product prices.

2 PRODUCTION & OPERATIONS REVIEW

(1) Exploration and Production

In 2016, faced with low oil prices and coped with harsh conditions in the upstream sector, we strengthened measures to rein in costs and address our weaknesses. At the same time, we gave priority to high-efficiency exploration activities and made a number of important new discoveries in the Xinjiang Tahe Basin, the Beibu Gulf in Guangxi and the Yin-E Basin in Neimongol, along with new shale gas findings in the Yongchuan block in Sichuan. In development, we adopted a profit-oriented approach, adjusting the development structure, enhancing cost discipline, and cutting low-efficiency oil production and high-cost EOR operations. We implemented Phase Two of Fuling Shale Gas development project and increased our production of natural gas. We also completed the mixed ownership reform of Sichuan-to-East China Pipeline Co. and improved our asset profitability. The Company's production of oil and gas declined to 431.29 million barrels of oil equivalent, with domestic crude production down by 14.6% from the previous year and natural gas production up by 4.3%.

Summary of Operations for the Exploration and Production Segment

	2016	2015	2014	Change from 2015 to 2016 (%)
Oil and gas production (mmboe)	431.29	471.91	480.22	(8.6)
Crude oil production (mmbbls)	303.51	349.47	360.73	(13.2)

(2) Refining

In 2016, the Company completed GB V automobile gasoline and diesel quality upgrading program ahead of schedule and actively promoting VI automobile gasoline and diesel quality upgrading in Beijing. We advanced the adjustment of our product structure and increased output of gasoline (especially premium gasoline) and kerosene, with the diesel-to-gasoline ratio further declining to 1.19. We actively responded to the challenges of abundant market supply, and succeeded in maintaining the utilisation rate at a high level. Meanwhile, through superior feedstock optimisation by our international trading business, we further cut crude procurement costs and achieved moderate increases in product exports. We brought our centralised marketing advantages fully into play to further improve margins for LPG, asphalt and other products. In 2016, the company processed 236 million tonnes of crude and produced 149 million tonnes of refined oil products, up by 0.53% from the previous year, with gasoline up by 4.4% and kerosene up by 4.6%.

Summary of Operations for the Refining Segment Unit: million tonnes

	2016	2015	2014	Change from 2015 to 2016 (%)
Refinery throughput	235.53	236.49	235.38	(0.4)
Gasoline, diesel and kerosene production	149.17	148.38	146.23	0.5
Gasoline	56.36	53.98	51.22	4.4
Diesel	67.34	70.05	74.26	(3.9)
Kerosene	25.47	24.35	20.75	4.6
Light chemical feedstock production	38.54	38.81	39.17	(0.7)
Light product yield (%)	76.33	76.50	76.52	(0.17) percentage points
Refinery yield (%)	94.70	94.75	94.66	(0.05) percentage points

Note: Includes 100% of the production of domestic joint ventures.

(3) Marketing and Distribution

In 2016, the company actively responded to changes in the market environment to bring our advantages in integrated business and distribution network into full play, achieving solid operating results. We optimised internal and external resources and achieved growth in both total sales volume and retail scale. We made timely adjustments to our marketing strategies, promoted effective supply and further expanded the retail volume of premium gasoline. We also improved our marketing network by accelerating the planning and construction of service stations and refined oil product pipelines. We expanded natural gas retail business for automobiles by expediting the construction and operation of CNG/LNG stations, achieving 25% growth in sales volume of natural gas for automobiles. In 2016, the total sales volume of oil products was 195 million tonnes, of which domestic sales accounted for 173 million tonnes. Our emerging business maintained its rapid growth with increased scale and profits. Emerging business transaction volume reached RMB 35.1 billion, up by 41.4% from the previous year.

Summary of Operations for the Marketing and Distribution Segment

	2016	2015	2014	Change from 2015 to 2016 (%)
Total sales volume of oil products (million tonnes)	194.84	189.33	189.17	2.9
Total domestic sales volume of oil products (million tonnes)	172.70	171.37	170.97	0.8
Retail sales (million tonnes)	120.14	119.03	117.84	0.9
Direct sales and distribution (million tonnes)	52.56	52.34	53.13	0.4
Annual average throughput per station (tonne/station)	3,926	3,896	3,858	0.8

	31 December 2016	31 December 2015	31 December 2014	Change from the end of the previous year to the end of the reporting period (%)
Total number of service stations under the Sinopec brand	30,603	30,560	30,551	0.1
Number of company-operated stations	30,597	30,547	30,538	0.2

(4) Chemicals

In 2016, we accelerated development of basic and high-end chemicals to promote effective supply, and we optimised the operations of our facilities based on their profit margins. The Company fine-tuned its chemical feedstock mix to lower costs, optimised product mix by maximising production of high-value-added products tailored to market demands, and intensified its efforts to enhance research and development, production, marketing and sales of high value added new products, achieving good results. Ethylene output was 11.059 million tonnes, with the differential ratio of synthetic fiber reaching 86.5% and the specialty and new products as a percentage of synthetic resins reaching 61.4%. By implementing low-inventory and differentiated marketing strategies, our full-year chemical sales volume increased by 11.3% from the previous year to 69.96 million tonnes, with all produced chemicals sold.

Summary of Operations for the Chemicals Segment

Unit: thousand tonnes

	2016	2015	2014	Change from 2015 to 2016 (%)
Ethylene	11,059	11,118	10,698	(0.5)
Synthetic resin	15,201	15,065	14,639	0.9
Synthetic rubber	857	843	939	1.7
Synthetic fiber monomer and polymer	9,275	8,994	8,383	3.1
Synthetic fiber	1,242	1,282	1,315	(3.1)

Note: Includes 100% of the production of domestic joint ventures.

(5) Research and Development

In 2016, the Company pushed ahead with its innovation-driven strategy, continuing to advance its R&D activities with notable results. In our upstream business, our development in shale gas exploration technologies enabled us to make breakthroughs in shale gas exploration in Yongchuan, Chongqing, the breakthrough in Ordovician oil and gas reservoir formation theory and exploration technologies led us to the discovery of the Shunbei field. In refining, we applied technologies such as for production of high-octane gasoline from FCC diesel. In chemicals, we commercialised the production of ethylene glycol from syngas, adopted butadiene tail-gas selective hydrogenation technologies, employed technologies to produce light olefins from coal as well as olefin catalytic cracking technologies, and developed new products including environmentally friendly polypropylene resin with high stiffness and tenacity, and a specialty resin used in high-performance medical spun-bond non-woven fabrics. In 2016, the Company filed 5,612 patent applications at home and abroad, of which 3,942 were granted. The Company also won

four second prizes in the National Technology and Innovation Awards and one golden award and nine excellent patent awards in China's Patent Award competition.

(6) Health, Safety and the Environment

In 2016, the Company fully followed its safe production and accountability scheme, strengthened the identification and control of risks, completed the rectification of potential hazards from oil and gas pipelines, further push forward management on potential hazards from oil storage tanks, reinforced on-site supervision and management, and achieved overall safe production and operations. We standardised measures to enhance worker protection and improved occupational health safeguards for our employees. By implementing its green, low-carbon strategy, the Company established a more stringent environmental protection management system, completed Clear Water, Blue Sky environmental protection project, and met emission reduction targets for major pollutants. Compared with last year, energy intensity was reduced by 1.59%, industrial water consumption was down by 1.1%, COD in discharged water was down by 3.86%, sulfur dioxide emissions were down by 4.84%, and all hazardous chemicals, discharged water, gas, and solid wastes were properly treated. For more detailed information, please refer to our Communication on Progress for Sustainable Development.

(7) Capital Expenditures

In 2016, focusing on quality and profitability of investment, the Company continuously optimised its investment projects. Total capital expenditures were RMB 76.456 billion. Capital expenditures for the exploration and production segment were RMB 32.187 billion, mainly for Fuling shale gas and Yuanba gas field development projects and LNG terminal projects in Guangxi and Tianjin, as well as overseas projects. Capital expenditures for the refining segment were RMB 14.347 billion, mainly for gasoline and diesel quality upgrading projects, adjustments in the product mix and refinery revamping projects. Capital expenditures for the marketing and distribution segment were RMB 18.493 billion, mainly for constructing and renovating service stations and building refined oil product pipelines, depots and storage facilities, as well as for rectification of safety hazards. Capital expenditures for the chemicals segment were RMB 8.849 billion, mainly for adjustment of the feedstock and product structure, the Ningdong coal chemical project and the Zhongtianhechuang coal to chemical project. Capital expenditures for the corporate and others segment were RMB 2.58 billion, mainly for R&D facilities and information technology application projects.

BUSINESS PROSPECTS

(1) Market Outlook

Looking ahead to 2017, we expect even more uncertainty in the global economy while China's economy maintains its steady growth. International oil prices are expected to fluctuate at a low level, with domestic demand for refined oil products continuing to grow as the consumption structure undergoes further adjustments. Domestic demand for petrochemical products will increase steadily as the consumption structure gradually shifts towards the high end.

(2) Operations

In 2017, bearing in mind structural reforms on the supply side, the Company will focus on enhancing quality and profitability of our assets, cost reduction, market expansion, structural adjustments, reforms, and consolidating the basis for further growth. We will undertake the following work during the year:

Exploration and Production: We will maintain exploration activities, optimising our plans to achieve high-efficiency exploration. Our goal will be discovery of low-cost, large-scale reserves to expand our resources. In oil development, we will fine-tune development plans based on oil price trends and promote oilfield development by increasing the volume and profitability of both incremental and existing reserves. In gas development, we will advance key projects for capacity construction, refine the management of developed gas fields and optimise gas production and marketing plans. In 2017, we plan to produce 294 million barrels of crude oil, of which overseas production will account for 46 million barrels. We plan to produce 879.9 billion cubic feet of natural gas.

Refining: We will continue with our market-oriented, profitability-driven strategy to optimise crude oil procurement and resource allocation and to lower our purchasing costs. We will comprehensively adjust our production plans to ensure safe and reliable operations. We will enhance our product structure by increasing the production of jet fuel and gasoline (especially premium gasoline) and further lowering the diesel-to-gasoline ratio. We will accelerate the quality and supply of GB VI gasoline and diesel in Beijing and GB V regular diesel in other area. In 2017, we plan to process 240 million tonnes of crude and produce 150 million tonnes of oil products.

Marketing and Distribution: We will intensify our marketing strategy of balancing profits and volume, with the priority on profits. We will undertake measures to fully explore markets, expand our retail volume and increase our market share. We will further improve our marketing network to reinforce our advantages. We will accelerate construction of gas stations to strengthen our presence in the CNG/LNG market. We will step up the promotion of key merchandise and self-branding and boost the growth of our emerging business. We will explore building a new type of customer service center, employ techniques of Big Data analysis to conduct precision marketing and further our transformation into a modern comprehensive services provider. In 2017, we plan to sell 175 million tonnes of oil products in the domestic market.

Chemicals: We will continue to adjust our feedstock mix to lower costs, fine-tune our product slate to deliver more popular, profitable and high-value-added products, optimise our facility utilisation rate, shut down facilities which have no marginal contributions. We will deepen the adjustment on sector structure, through advancing the development of fine chemicals and biochemicals, and improving operations of our coal-chemical projects. Meanwhile, we will enhance our strategies of product differentiation and precision marketing, and provide our customers with full process solutions and value-added services. In 2017, we plan to produce 11.66 million tonnes of ethylene.

Research and Development: We will continue to implement our strategy of development driven by innovation, improving mechanisms for technological innovation and fast-tracking key technical breakthroughs. In exploration and production, we will focus on increasing reserves and production and pushing ahead with breakthroughs in enhanced oil recovery technologies and development of difficult-to-tap reserves. In refining, R&D initiatives will address processing of heavy crude oil, quality upgrading of oil products and optimisation of product slate. In chemicals we will focus on adjustments in our product mix along with further progress in R&D for basic chemicals, synthetic materials, coal-chemicals, fine chemicals and bio-chemicals. We also expect to make progress in safety, environmental and energy-conserving technologies as well as prospective and basic research to enhance our capabilities for innovation and to achieve new R&D breakthroughs.

Capital Expenditures: In 2017, we will devote attention to the quality and profitability of investments, and optimise our investment projects. Capital expenditures for the year are budgeted at RMB 110.2 billion. The exploration and production segment will account for expenditures of RMB 50.5 billion, mainly for Phase II of Fuling shale gas development, Tianjin LNG project, and gas storage project, and overseas oil and gas project development. The refining segment will account for RMB 22.8 billion, mainly for building of refining bases, structural adjustments in the refining business, and revamping of refineries as well as GB VI quality upgrading of oil products. The marketing and distribution segment will account for RMB 18 billion, mainly for revamping service stations, improving pipeline network, building oil tank farms and removing safety hazards. The chemicals segment will account for RMB 15.1 billion, mainly for the integrated refining and chemical project in Zhanjiang of Guangdong Province, the integrated refining and chemical project in Gulei of Fujian Province and the high-efficiency and environmentally friendly aromatics project in Hainan refinery. The corporate and others segment will account for RMB 3.8 billion, mainly for R&D and Information technology projects.

MANAGEMENT'S DISCUSSION AND ANALYSIS

THE FOLLOWING DISCUSSION AND ANALYSIS SHOULD BE READ IN CONJUNCTION WITH THE COMPANY'S AUDITED FINANCIAL STATEMENTS AND THE ACCOMPANYING NOTES. PARTS OF THE FOLLOWING FINANCIAL DATA WERE ABSTRACTED FROM THE COMPANY'S AUDITED FINANCIAL STATEMENTS THAT HAVE BEEN PREPARED ACCORDING TO THE IFRS, UNLESS OTHERWISE STATED. THE PRICES IN THE FOLLOWING DISCUSSION DO NOT INCLUDE VALUE-ADDED TAX.

1 CONSOLIDATED RESULTS OF OPERATIONS

In 2016, the Company's turnover and other operating revenues were RMB 1,930.9 billion, decreased by 4.4% compared with that of 2015. The operating profit was RMB 77.2 billion, representing a year on year increase of 35.9%.

The following table sets forth the main revenue and expenses from the Company's consolidated financial statements:

	Year ended 31 December		
	2016	2015	Change
	RMB million	RMB million	(%)
Turnover and other operating revenues	1,930,911	2,020,375	(4.4)
Turnover	1,880,190	1,977,877	(4.9)
Other operating revenues	50,721	42,498	19.3

Purchased crude oil, product and operating supplies and expenses	(1,379,691)	(1,494,046)	(7.7)
Selling, general and administrative expenses	(64,360)	(69,491)	(7.4)
Depreciation, depletion and amortisation	(108,425)	(96,460)	12.4
Exploration expenses, including dry holes	(11,035)	(10,459)	5.5
Personnel expenses	(63,887)	(56,619)	12.8
Taxes other than income tax	(232,006)	(236,349)	(1.8)
Other operating income/(expense), net	5,686	(129)	—
Operating profit	77,193	56,822	35.9
Net finance costs	(6,611)	(9,239)	(28.4)
Investment income and share of profits less losses from associates and joint ventures	9,569	8,828	8.4
Profit before taxation	80,151	56,411	42.1
Tax expense	(20,707)	(12,613)	64.2
Profit for the year	59,444	43,798	35.7
Attributable to:			
Owners of the Company	46,672	32,512	43.6
Non-controlling interests	12,772	11,286	13.2

(1) Turnover and other operating revenues

In 2016, the Company's turnover was RMB 1,880.2 billion, representing a decrease of 4.9% over 2015. This was mainly attributable to the decline of crude oil and petrochemical products prices.

The following table sets forth the external sales volume, average realised prices and respective rates of change of the Company's major products in 2016 and 2015:

Sales volume (thousand tonnes)	Average realised price
--------------------------------	------------------------

	Year ended 31 December			(RMB/tonne, RMB/thousand cubic meters Year ended 31 December		
	2016	2015	Change (%)	2016	2015	Change (%)
Crude oil	6,808	9,674	(29.6)	1,628	2,019	(19.4)
Natural gas (million cubic meters)	19,008	18,440	3.1	1,258	1,519	(17.2)
Gasoline	77,480	69,749	11.1	6,386	6,749	(5.4)
Diesel	91,492	95,472	(4.2)	4,482	4,937	(9.2)
Kerosene	25,164	23,028	9.3	2,807	3,387	(17.1)
Basic chemical feedstock	32,248	29,608	8.9	4,054	4,175	(2.9)
Monomer and polymer for synthetic fibre	7,146	6,071	17.7	5,325	5,796	(8.1)
Synthetic resin	12,223	11,989	2.0	7,488	7,771	(3.6)
Synthetic fibre	1,369	1,380	(0.8)	7,113	7,740	(8.1)
Synthetic rubber	1,098	1,104	(0.5)	9,608	8,778	9.5
Chemical fertiliser	714	243	193.8	1,612	1,823	(11.6)

Most crude oil and a small portion of natural gas produced by the Company were internally used for refining and chemical production, with the remaining sold to external customers. In 2016, the turnover from crude oil, natural gas and other upstream products sold externally amounted to RMB 47.4 billion, a decrease of 17.8% over 2015. The change was mainly due to the decrease of crude oil prices and sales volume in 2016.

In 2016, petroleum products (mainly consisting of oil products and other refined petroleum products) sold by Refining Segment and Marketing and Distribution Segment achieved external sales revenues of RMB 1,130.4 billion, accounting for 58.5% of the Company's turnover and other operating revenues, representing a decrease of 6.3% over 2015 mainly due to the decline of various refined oil products prices. The sales revenue of gasoline, diesel and kerosene was RMB 975.6 billion, representing a decrease of 4.4% over 2015, and accounting for 86.3% of the total sales revenue of petroleum products. Turnover of other refined petroleum products was RMB 154.8 billion, representing a decrease of 17.0% compared with 2015, accounting for 13.7% of the total sales revenue of petroleum products.

The Company's external sales revenue of chemical products was RMB 284.3 billion, representing an increase of 2.8% over 2015, accounting for 14.7% of the Company's total turnover and other operating revenues. This was mainly due to the increase of chemical products sales volume.

(2) Operating expenses

In 2016, the Company's operating expenses were RMB 1,853.7 billion, decreased by 5.6% compared with 2015. The operating expenses mainly consisted of the following:

Purchased crude oil, products and operating supplies and expenses were RMB 1,379.7 billion, representing a decrease of 7.7% over the same period of 2015, accounting for 74.4% of the total operating expenses, of which:

Crude oil purchasing expenses were RMB 373.7 billion, representing a decrease of 20.4% over the same period of 2015. Throughput of crude oil purchased externally in 2016 was 202.40 million tonnes (excluding the volume processed for third parties), representing a decrease of 1.9% over the same period of 2015. The average cost of crude oil purchased externally was RMB 2,084 per tonne, representing a drop of 19.6% over 2015.

The Company's other purchasing expenses were RMB 1,006.0 billion, representing a decrease of 1.8% over the same period of 2015. This was mainly due to the decline in prices of externally purchased raw materials.

Selling, general and administrative expenses were RMB 64.4 billion, representing an decrease of 7.4% over 2015. That was mainly due to that the Company promoted the reform of employment system, adjusted the cost and tax accounting, and continuously enhanced cost control.

Depreciation, depletion and amortisation were RMB 108.4 billion, representing an increase of 12.4% as compared with 2015. That was mainly due to the significant increase in depreciation and depletion rate as a result of oil and gas reserve revision in the exploration and production segment corresponding to decreased oil price.

Exploration expenses were RMB 11.0 billion, representing an increase of 5.5% year on year. That was mainly due to that the Company maintained its exploration intensity in low oil price environment.

Personnel expenses were RMB 63.9 billion, representing an increase of 12.8% over 2015. That was mainly due to that the Company promoted the reform of employment system since 2016.

Taxes other than income tax were RMB 232.0 billion, representing a decrease of 1.8% compared with 2015. Mainly due to the decrease in consumption tax by RMB 4.9 billion as a result of decreased production of diesel, and decrease in resource tax by RMB 1.0 billion as a result of drop in crude prices over the same period of 2015.

Other operating income/(expense), net were RMB 5.7 billion, decreasing 5.8 billion over the same period of 2015. That was mainly due to the non-operating income from reorganisation and capital injection of Sichuan-to-East China Pipeline Co., and the increase of impairment of assets.

Operating profit was RMB 77.2 billion, representing an increase of 35.9% compared with 2015. This is mainly due (3) to outstanding performance of the Company's downstream business as we fully tapped potential from our integrated business. It effectively offset the negative impact of low oil prices.

Net finance costs were RMB 6.6 billion, representing a decrease of 28.4% over 2015, of which: interest expense increased by RMB 1.1 billion over 2015 as a result of the replacement of debt denominated in US dollars by debt denominated in RMB (inclusive of replacing borrowings in US dollars and decrease exposure to US dollars); net (4) losses from foreign exchange was RMB 600 million, decreased by RMB 3.2 billion as compared with 2015; interest income increased by RMB 200 million as a result of increased interest income compared with the same period of 2015.

(5) Profit before taxation was RMB 80.2 billion, representing an increase of 42.1% year on year.

(6) Tax expense was RMB 20.7 billion, representing an increase of 64.2% year on year. That was mainly due to a substantial increase in profit over the same period of 2015.

(7) Profit attributable to non-controlling interests was RMB 12.8 billion, representing an increase of RMB 1.5 billion comparing with 2015.

(8) Profit attributable to owners of the Company was RMB 46.7 billion, representing an increase of 43.6% year on year.

2 RESULTS OF SEGMENT OPERATIONS

The Company manages its operations through four business segments, namely exploration and production segment, refining segment, marketing and distribution segment and chemicals segment, and corporate and others. Unless otherwise specified, the inter-segment transactions have not been eliminated from financial data discussed in this section. In addition, the operating revenue data of each segment include other operating revenues.

The following table shows the operating revenues by each segment, the contribution of external sales and inter-segment sales as a percentage of operating revenues before elimination of inter-segment sales, and the contribution of external sales as a percentage of consolidated operating revenues (i.e. after elimination of inter-segment sales) for the periods indicated.

	Operating revenues		As a percentage of consolidated operating revenue before elimination of inter-segment sales		As a percentage of consolidated operating revenue after elimination of inter-segment sales	
	Year ended 31 December		Year ended 31 December		Year ended 31 December	
	2016	2015	2016	2015	2016	2015
	RMB million	RMB million	(%)	(%)	(%)	(%)
Exploration and Production Segment

(1) Exploration and Production Segment

Most crude oil and a small portion of the natural gas produced by the exploration and production segment were used for the Company's refining and chemical operations. Most of the natural gas and a small portion of crude oil were sold externally to other customers.

In 2016, the operating revenues of this segment were RMB 115.9 billion, representing a decrease of 16.4% over 2015. This was mainly attributable to the decline of realised price of crude oil and natural gas as well as decrease in sales volume of crude oil.

In 2016, the segment sold 36.38 million tonnes of crude oil, representing a decrease of 13.8% over 2015. Natural gas sales volume was 20.56 billion cubic meters, representing an increase of 3.7% over 2015. Average realised prices of crude oil and natural gas were RMB 1,734 per tonne and RMB 1,267 per thousand cubic meters, representing decreases of 13.9% and 17.5% respectively over 2015.

In 2016, the operating expenses of this segment were RMB 152.6 billion, representing a decrease of 2.2% over 2015. That was mainly due to the following:

• Depreciation, depletion and amortisation increased by RMB 9.8 billion year on year.

• Impairment loss on oil and gas related assets increased by RMB 6.7 billion year on year;

• The Company with the restructuring of Sichuan-to-East China Pipeline Co., other expenses (net) decreased by RMB 20.6 billion.

In 2016, the oil and gas lifting cost was RMB 786 per tonne, representing a moderate year-on-year increase of 0.8%, under the backdrop of a 13.2% decrease in crude oil production.

In 2016, the segment made every effort to optimise resource mix, attached great emphasis on cash flow contributions, and proactively controlled costs. Due to the drop in crude oil and natural gas prices, the operating loss of the exploration and production segment were RMB 36.6 billion, representing an expanded losses as compared with 2015.

(2) Refining Segment

Business activities of the refining segment include purchasing crude oil from third parties and the exploration and production segment of the Company, as well as processing crude oil into refined petroleum products. Gasoline, diesel and kerosene are sold internally to the marketing and distribution segment of the Company; part of the chemical feedstock is sold to the chemicals segment of the Company; and other refined petroleum products are sold externally to both domestic and overseas customers.

In 2016, the operating revenues of this segment were RMB 855.8 billion, representing a decrease of 7.6% over 2015. This was mainly attributable to the decreased in refined oil products prices.

The following table sets forth the sales volumes, average realised prices and the respective changes of the Company's major refined oil products of the segment in 2016 and 2015.

Sales Volume (thousand tonnes)			Average realised price (RMB/tonne)	
Year ended 31 December			Year ended 31 December	
2016	2015	Change (%)	2016	2015

					Change (%)
Gasoline	52,461	50,921	3.0	5,904	6,191 (4.6)
Diesel	58,734	63,359	(7.3)	4,505	4,797 (6.1)
Kerosene	14,529	13,518	7.5	2,814	3,420 (17.7)
Chemical feedstock	36,408	35,945	1.3	2,584	2,984 (13.4)
Other refined petroleum products	55,742	52,418	6.3	2,529	2,842 (11.0)

In 2016, sales revenues of gasoline were RMB 309.7 billion, representing a decrease of 1.8% over 2015.

The sales revenues of diesel were RMB 264.6 billion, representing a decrease of 12.9% over 2015.

The sales revenues of kerosene were RMB 40.9 billion, representing a decrease of 11.6% over 2015.

The sales revenues of chemical feedstock were RMB 94.1 billion, representing a decrease of 12.3% over 2015.

The sales revenues of refined petroleum products other than gasoline, diesel, kerosene and chemical feedstock were RMB 141.0 billion, representing a decrease of 5.4% over 2015.

In 2016, the segment's operating expenses were RMB 799.5 billion, representing a decrease of 11.7% over 2015, mainly attributable to the decline in procurement cost of crude oil.

In 2016, the average processing cost for crude oil was RMB 2,194 per tonne, representing a decrease of 18.5% over 2015. Total crude oil processed was 220.98 million tonnes (excluding volume processed for third parties), representing a decrease of 1.1% over 2015. The total cost of crude oil processed was RMB 484.8 billion, representing a decrease of 19.4% over 2015.

In 2016, refining gross margin was RMB 471.9 per tonne, representing an increase of RMB 153.8 per tonne compared with 2015. This is mainly due to widened price spread between product and feedstocks as a result of the Company's effort in product mix optimisation, upward movement of crude oil price during the period as well as floor price policy announced by the Chinese government.

In 2016, the unit refining cash operating cost (defined as operating expenses less the processing cost of crude oil and refining feedstock, depreciation and amortisation, taxes other than income tax and other operating expenses, then divided by the throughput of crude oil and refining feedstock) was RMB 165.7 per tonne, a decrease of RMB 1.9 per tonne against 2015, mainly because the segment enforced control over costs, improved efficiency of operations, and decreased operational costs in fuel, power, and other auxiliaries facilities.

In 2016, the segment seized the favorable opportunities of the bottoming out of crude oil prices, enforced management in crude oil procurement, adjusted product mix based on market needs, increased export volume, made great efforts to improve the profitability of by-products, and as a result, realised significant increase in operating profit.

In 2016, the operating profit of the segment totaled RMB 56.3 billion, representing an increase of RMB 35.3 billion as compared with 2015.

(3)Marketing and Distribution Segment

The business activities of the marketing and distribution segment include purchasing refined oil products from the refining segment and third parties, conducting wholesale and direct sales to domestic customers and distributing oil products through the segment's retail and distribution network, as well as providing related services.

In 2016, the operating revenues of this segment were RMB 1,052.9 billion, a decrease of 4.9% over 2015, of which: the sales revenues of gasoline totaled RMB 495.2 billion, a increase of 5.1% compared with 2015; the sales revenues of diesel were RMB 412.0 billion, a decrease of 13.0% over 2015, and the sales revenues of kerosene were RMB 70.6 billion, a decrease of 9.5% over 2015.

The following table sets forth the sales volumes, average realised prices, and the respective percentage changes of the segment's four major refined oil products in 2016 and 2015, including breakdown in retail, direct sales and wholesale of gasoline and diesel:

 

	Year ended 31 December			Year ended 31 December		
	2016	2015	Change (%)	2016	2015	Change (%)
	Sales Volume (Thousand tonnes)			Average realised price (RMB/tonne)		
	Year ended 31 December			Year ended 31 December		
	2016	2015	Change (%)	2016	2015	Change (%)
Gasoline	77,613	69,842	11.1	6,380	6,747	(5.4)
Retail	63,718	58,211	9.5	6,722	6,996	(3.9)
Direct sales and wholesale	13,895	11,630	19.5	4,812	5,498	(12.5)
Diesel	91,998	95,907	(4.1)	4,478	4,936	(9.3)
Retail	46,656	50,756	(8.1)	5,088	5,490	(7.3)
Direct sales and wholesale	45,342	45,150	0.4	3,851	4,314	(10.7)
Kerosene	25,164	23,028	9.3	2,807	3,387	(17.1)
Fuel	22,034	24,980	(11.8)	1,703	2,215	(23.1)

In 2016, the operating expenses of the segment were RMB 1,020.7 billion, representing a decrease of RMB 57.1 billion or 5.3% as compared with that of 2015. This was mainly due to decreased procurement volume and prices of diesel and fuel oil.

In 2016, the segment's marketing cash operating cost (defined as the operating expenses less purchase costs, taxes other than income tax, depreciation and amortisation, and then divided by the sales volume) was RMB 197.3 per tonne, representing an increase of 4.3% compared with that of 2015.

In 2016, facing abundant domestic supply of refined oil products and strong market competition, the segment made full use of the advantages of end user marketing network, actively expanded the gasoline market, increased the sales volume of high octane number gasoline, made efforts to improve total sales volume, coordinate internal and external resources, increased the spread between sales and procurement prices as compared with 2015, and achieved better performance.

In 2016, the operating profit of this segment was RMB 32.2 billion, representing an increase of 11.4% compared with 2015.

(4) Chemicals Segment

The business activities of the chemicals segment include purchasing chemical feedstock from the refining segment and third parties, producing, marketing and distributing petrochemical and inorganic chemical products.

In 2016, the operating revenues of the chemicals segment were RMB 335.1 billion, representing an increase of 1.9% as compared with that of 2015. This was mainly due to increase in sales volume of chemical products as compared with 2015.

The sales revenues generated by the segment's six major categories of chemical products (namely basic organic chemicals, synthetic resin, synthetic fibre monomer and polymer, synthetic fibre, synthetic rubber, and chemical fertiliser) totaled RMB 316.2 billion, representing an increase of 2.1% as compared with 2015, and accounting for 94.3% of the operating revenues of the segment.

The following table sets forth the sales volume, average realised prices and respective percentage changes of each of the segment's six major categories of chemical products in 2016 and 2015.

	Sales Volume (Thousand tonnes)			Average realised price (RMB/tonne)		
	Year ended 31 December			Year ended 31 December		
	2016	2015	Change (%)	2016	2015	Change (%)
Basic organic chemicals	41,605	38,903	6.9	3,963	4,121	(3.8)
Synthetic fibre monomer and polymer	7,169	6,083	17.9	5,328	5,797	(8.1)
Synthetic resin	12,250	11,993	2.1	7,482	7,771	(3.7)
Synthetic fibre	1,369	1,380	(0.8)	7,113	7,739	(8.1)
Synthetic rubber	1,099	1,107	(0.7)	9,609	8,769	9.6
Chemical fertiliser	714	243	193.8	1,612	1,823	(11.6)

In 2016, the operating expenses of the chemicals segment were RMB 314.5 billion, representing an increase of 1.6% over 2015.

In 2016, the segment seized the favorable opportunities of the low feed stock price, further adjust feed stock and product mix, coordinated production with sales, strictly controlled costs and expenses, thus, resulting in remarkable profits.

In 2016, the operating profit of this segment was RMB 20.6 billion, representing an increase of RMB 1.1 billion as compared with 2015.

(5) Corporate and Others

The business activities of corporate and others mainly consist of import and export business activities of the Company's subsidiaries, research and development activities of the Company, and managerial activities of headquarters.

In 2016, the operating revenues generated from corporate and others were RMB 739.9 billion among which the sales revenues realised by trading companies were RMB 736.2 billion, representing a decrease of 5.6% over 2015 mainly attributed to the drop of international crude oil prices as well as less revenue from crude oil trading business as compared with 2015.

In 2016, the operating expenses of corporate and others were RMB 736.7 billion, among which operating expenses realised by trading companies were RMB 728.0 billion, representing a decrease of 6.0% over 2015.

In 2016, the operating profit from corporate and others was RMB 3.2 billion, among which the operating profit realised by trading companies was RMB 8.2 billion.

3 ASSETS, LIABILITIES, EQUITY AND CASH FLOWS

The major funding sources of the Company are its operating activities and short-term and long-term loans. The major use of funds includes operating expenses, capital expenditures, and repayment of the short-term and long-term debts.

(1) Assets, liabilities and equity

Unit: RMB million

	As of 31 December 2016	As of 31 December 2015	Change
Total assets	1,498,609	1,447,268	51,341
Current assets	412,261	333,657	78,604
Non-current assets	1,086,348	1,113,611	(27,263)
Total liabilities	667,374	659,107	8,267
Current liabilities	485,543	462,832	22,711
Non-current liabilities	181,831	196,275	(14,444)
Total equity attributable to owners of the Company	710,994	676,197	34,797
Share capital	121,071	121,071	—
Reserves	589,923	555,126	34,797
Non-controlling interests	120,241	111,964	8,277
Total equity	831,235	788,161	43,074

As of 31 December 2016, the Company's total assets were RMB 1,498.6 billion, representing an increase of RMB 51.3 billion compared with that of the end of 2015, of which:

Current assets were RMB 412.3 billion, representing an increase of RMB 78.6 billion compared with that of the end of 2015, of which, cash and cash equivalent, and time deposit in financial institutions increased by RMB 72.8 billion, mainly due to significant increase in cash flow from operating activities, decrease in investment, abundant surplus in cash, as well as increase in inventory by RMB 10.9 billion.

Non-current assets were RMB 1,086.3 billion, representing a decrease of RMB 27.3 billion as compared with that of the end of 2015. This was mainly due to the fact that property, plant and equipment (net) decreased by RMB 42.9 billion, construction in progress decreased by RMB 22.7 billion, equity of associates and joint ventures increased by RMB 32.5 billion (the Company sold 50% equity in Sichuan-to-East China Pipeline Co., with the remaining 50% equity corresponding to RMB 22.8 billion switched to item of interests in associates);

The Company's total liabilities were RMB 667.4 billion, representing an increase of RMB 8.3 billion compared with that of the end of 2015, of which:

Current liabilities were RMB 485.5 billion, representing an increase of RMB 22.7 billion as compared with that of the end of 2015. This was mainly due to increase in accounts payable by RMB 43.7 billion, short-term debts and borrowings from China Petrochemical Corp and its subsidiaries decreased by RMB 40.6 billion, other accounts payable and taxes payable increased by RMB 17.3 billion.

Non-current liabilities were RMB 181.8 billion, representing a decrease of RMB 14.4 billion compared with that of the end of 2015. This was mainly due to long-term debts decreased by RMB 22.8 billion, estimated liabilities increased by RMB 6.1 billion.

Total equity attributable to owners of the Company was RMB 711.0 billion, representing an increase of RMB 34.8 billion compared with that of the end of 2015, which was mainly due to the increase in reserves by RMB 34.8 billion.

(2) Cash Flow

The following table sets forth the major items in the consolidated cash flow statements for 2016 and 2015.

Unit: RMB million

Major items of cash flows	Year ended 31	
	2016	2015
Net cash generated from operating activities	214,543	165,740
Net cash used in investing activities	(66,217)	(116,719)
Net cash generated from/(used in) financing activities	(93,047)	9,093

In 2016, the net cash generated from operating activities of the company was RMB 214.5 billion, representing an increase of RMB 48.8 billion as compared with 2015. This was mainly due to the increase in profit before tax by RMB 23.7 billion, depreciation, depletion and amortization increased by RMB 12.0 billion, and asset impairment increased by RMB 8.3 billion over the same period of 2015. Meanwhile, due to strict control on occupation of funds, occupation of working capital decreased significantly compared with 2015.

In 2016, the net cash used in investing activities was RMB 66.2 billion, representing a decrease of RMB 50.5 billion over 2015. This was mainly due to the decrease of RMB 30.0 billion in capital expenditure over the same period of 2015 as well as RMB 13.2 billion received as proceeds from the sale of equity in Sinopec Sichuan-to-East China

Pipeline Co., Ltd.

In 2016, the net cash used in the Company's financing activities was RMB 93.0 billion, representing an increase of RMB 102.1 billion over 2015. This was mainly due to the impact of RMB 105.0 billion from the capital introduction of Sinopec Marketing Co., Ltd. in 2015; the significant reduction in interest bearing debts for two consecutive years, of which, the Company repaid RMB 62.6 billion and RMB 63.0 billion in 2015 and 2016, respectively.

At the end of 2016, the cash and cash equivalents were RMB 124.5 billion.

(3)Contingent Liabilities

Please refer to "Material Guarantee Contracts and Their Performances" in the "Significant Events" section of this report.

(4)Capital Expenditures

Please refer to "Capital Expenditures" in the "Business Review and Prospects" section of this report.

(5)Research & development expenses and environmental expenditures

Research & development expenses refer to the expenses recognised as expenditures when they occur. In 2016, the expenditure for research & development was RMB 5.94 billion.

Environmental expenditures refer to the normal routine pollutant discharge fees paid by the Company, excluding capitalised cost of pollutant treatment properties. In 2016, the Company paid environmental expenditures of RMB 6.36 billion.

(6) Measurement of fair values of derivatives and relevant system

The Company has established sound decision-making mechanism, business process and internal control systems relevant to financial instrument accounting and information disclosure.

Items relevant to measurement of fair values Unit: RMB million

Items	Beginning of the year	End of the year	Profits and losses from variation of values in the current year	Accumulated variation of fair values recorded as equity	Impairment loss provision of the current year	Funding source
Available-for-sale financial assets	261	262	—	56	—	Self-owned fund
Stock	261	262	—	56	—	
Derivative financial instruments	403	314	(160)	—	—	Self-owned fund
Cash flow hedging instruments	4,722	(4,024)	11	(3,813)	—	Self-owned fund
Total	5,386	(3,448)	(149)	(3,757)	—	

4 ANALYSIS OF FINANCIAL STATEMENTS PREPARED UNDER ASBE

The major differences between the Company's financial statements prepared under ASBE and IFRS are set out in Section C of the financial statements of the Company from page 202 of this report.

(1) Under ASBE, the operating income and operating profit or loss by reportable segments were as follows:

	Year ended 31 December	
	2016	2015
	RMB million	RMB million
Operating income		
Exploration and Production Segment	115,939	138,653
Refining Segment	855,786	926,616
Marketing and Distribution Segment	1,052,857	1,106,666
Chemicals Segment	335,114	328,871
Corporate and Others	739,947	783,874
Elimination of inter-segment sales	(1,168,732)	(1,264,305)
Consolidated operating income	1,930,911	2,020,375

Net profit attributable to equity shareholders of the Company	46,416	32,281

Operating profit: In 2016, the operating profit of the Company was RMB 78.9 billion, representing an increase of RMB 26.6 billion as compared with 2015.

Net profit: In 2016, the net profit attributable to the equity shareholders of the Company was RMB 46.4 billion, representing an increase of RMB 14.1 billion or 43.8% comparing with 2015.

(2) Financial data prepared under ASBE

	As of 31 December 2016 RMB million	As of 31 December 2015 RMB million	Change
Total assets	1,498,609	1,447,268	51,341
Long-term liabilities	180,541	194,871	(14,330)
Shareholders' equity	832,525	789,565	42,960

At the end of 2016, the Company's total assets were RMB 1,498.6 billion, representing an increase of RMB 51.3 billion compared with that of the end of 2015. This was mainly due to the following factors: a) cash and cash equivalents increased by RMB 72.8 billion; b) long term equity investment increased by RMB 32.5 billion; c) intangible assets and other non-current assets increased by RMB 5.9 billion; d) fixed assets and construction in progress decreased by RMB 65.6 billion.

At the end of 2016, the Company's long-term liabilities were RMB 180.5 billion, representing a decrease of RMB 14.3 billion compared with that of the end of 2015. This was mainly due to the following factors: a) bonds payable decreased by RMB 28.3 billion; b) long-term loans increased by RMB 6.0 billion; c) provision increased by RMB 6.1 billion; d) other non-current liabilities increased by RMB 2.5 billion.

At the end of 2016, the shareholders' equity of the Company was RMB 832.5 billion, representing an increase of RMB 43.0 billion compared with that of the end of 2015. This was mainly due to the undistributed profit increased by RMB 29.5 billion, other comprehensive income increased by RMB 7.1 billion, capital reserve decreased by RMB 2.1 billion for this period.

*: Gross profit margin = (operation income - operation cost, tax and surcharges)/operation income.

5 THE CAUSE AND IMPACT OF THE CHANGE IN THE COMPANY'S ACCOUNTING POLICY

In 2014, the International Accounting Standards Board published Amendments to International Accounting Standard 27 (IAS 27) - Separate Financial Statements. These amendments allowed entities to use equity method to account for

investments in subsidiaries, joint ventures and associates in their separate financial statements. Entities wishing to change to the equity method must do so retrospectively. The amendment is effective from 1 January 2016.

In order to eliminate the difference regarding subsequent measurements on investments in joint ventures and associates between separate financial statements prepared in accordance with ASBE and IFRS, the Company changed its subsequent measurements on investments in associates and joint ventures from cost method to equity method in its separate financial statements prepared in accordance with IFRS from 1 January 2016.

By adopting the amendments to IAS 27-Separate Financial Statements, the balance of investments in associates, investments in joint ventures, retained earnings and other reserves as of 31 December 2015 would be increased by RMB 8,056 million, RMB 644 million, RMB 8,672 million and RMB 28 million in the separated financial statements prepared in accordance with IFRS due to the retrospective adjustment.

The change in accounting policy carries no impact on financial statements prepared in accordance with the ASBE as well as consolidated financial statements prepared in accordance with the IFRS.

6 SIGNIFICANT CHANGES IN MAJOR ASSETS DURING THE REPORTING PERIOD

During the reporting period, there are no significant changes in the Company's major assets.

SIGNIFICANT EVENTS

1 MAJOR PROJECTS

(1) Fuling shale gas project

In accordance with the guidance of “overall deployment and stage-wise implementation”, the second phase of production capacity building was promoted comprehensively in 2016. The Company’s self-owned fund accounts for 50% of the project investment and bank loan is the main source of the other 50%. By the end of 2016, the cumulative realised investment was RMB 29.3 billion and total production capacity was 7 billion cubic meters per year. According to the plan, by the end of 2017, the total production capacity will be 10 billion cubic meters per year.

(2) Yuanba gas field project

The production capacity building of Yuanba marine facies gas field with total production capacity of 3.4 billion cubic meters per year has been completed by the end of 2016. The Company’s self-owned fund accounts for 50% of the project investment and bank loan is the main source of the other 50%. By the end of 2016, the cumulative realised investment was RMB 12.8 billion.

(3) Guangxi LNG project

The Guangxi LNG project with designed receiving capacity of 3 million tonnes per year consists mainly of the construction of wharf, terminal and transportation pipelines. It was put into operation in April 2016. The Company’s self-owned fund accounts for 40% of the project investment and bank loan is the main source of the other 60%. By the end of 2016, the cumulative investment was RMB 9.7 billion.

(4) Tianjin LNG project

The Tianjin LNG project with designed receiving capacity of 3 million tonnes per year consists mainly of the construction of wharf, terminal and transportation pipelines. It is expected to be completed and operational in December 2017. The Company’s self-owned fund accounts for 40% of the project investment and bank loan is the main source of the other 60%. By the end of 2016, the cumulative investment was RMB 8.2 billion.

(IPOs)	 	 	2 Solving the issues regarding the legality of land-use rights certificates and property ownership rights certificates within a specified period of time;	 	 	 
 	 	 	3 Implementation of the Reorganisation Agreement (please refer to the definition of Reorganisation Agreement in the H share prospectus of Sinopec Corp.);	 	 	 
 	 	 	4 Granting licenses for intellectual property rights;	 	 	 
 	 	 	5 Avoiding competition within the same industry;	 	 	 
			6 Abandonment of business competition and conflicts of interest with Sinopec Corp.			
Other undertakings	Other	China Petrochemical Corporation	China Petrochemical Corporation would dispose of its minor remaining chemicals business within five years in order to avoid competition with Sinopec Corp. in the chemicals business.	Within five years, commencing from 15 March 2012	Yes	Yes
Other undertakings	Other	China Petrochemical Corporation	Given that China Petrochemical Corporation engages in the same or similar businesses as Sinopec Corp. with regard to the exploration and production of overseas petroleum and natural gas,	Within 10 years after 29 April 2014 or the date when China Petrochemical Corporation acquires the assets	Yes	Yes

China Petrochemical Corporation hereby grants a 10-year option to Sinopec Corp. with the following provisions: (i) after a thorough analysis from political, economic and other perspectives, Sinopec Corp. is entitled to require China Petrochemical Corporation to sell its overseas oil and gas assets owned as of the date of the undertaking and still in its possession upon Sinopec Corp.'s exercise of the option to Sinopec Corp.; (ii) in relation to the overseas oil and gas assets acquired by China Petrochemical Corporation after the issuance of the undertaking, within 10 years of the completion of such acquisition, after a thorough analysis from political, economic and other perspectives, Sinopec Corp. is entitled to require China Petrochemical Corporation to sell these assets to Sinopec Corp. China Petrochemical Corporation undertakes to transfer the assets as required by Sinopec Corp. under aforesaid items (i) and (ii) to Sinopec Corp., provided that the exercise of such option complies with applicable laws and regulations, contractual obligations and other procedural requirements.

Since 2012, China Petrochemical Corporation has earnestly fulfilled its undertaking in eliminating competitions in chemical business with Sinopec Corp. through: (1) subscribing capital contribution of joint ventures controlled by Sinopec Corp., by way of injecting net assets of certain chemical business and cash; (2) authorising Sinopec Corp. to be in charge of production plan, management and sales of the remaining chemical business. The competition in chemical business between China Petrochemical Corporation and Sinopec Corp. has been eliminated.

As of the date of this report, Sinopec Corp. had no undertakings in respect of profits, asset injections or asset restructuring that had not been fulfilled, nor did Sinopec Corp. make any profit forecast in relation to any asset or project.

5 SIGNIFICANT ASSETS AND EQUITY SALE

On 2 August 2016, the 7th meeting of sixth session of the board of directors of Sinopec Corp. considered and approved the proposal to introduce capital to invest in Sichuan-to-East China natural gas pipeline project, and agreed to take the Sichuan-to-East China Pipeline Co. as the platform to introduce capital publicly. On 12 December 2016, Sinopec Natural Gas Co., Ltd. (“Natural Gas Company”), a wholly-owned subsidiary of Sinopec Corp., entered into the capital injection agreement in relation to Sichuan-to-East China Pipeline Co. with China Life Insurance Company Limited (“China Life”) and SDIC Communications Holding Co., Ltd. (“SDIC Communications”). China life and SDIC Communications subscribed a total of 50% equity interest in Sichuan-to-East China Pipeline Co., a wholly-owned subsidiary of Natural Gas Company, in cash with an aggregate amount of RMB 22.8 billion, among which China Life paid RMB 20 billion and SDIC Communications paid RMB 2.8 billion. Upon the completion of capital injection, the registered capital of Sichuan-to-East China Pipeline Co. increased from RMB 100 million to RMB 200 million, and each of Natural Gas Company, China Life and SDIC Communication will hold 50%, 43.86% and 6.14% equity interest in Sichuan-to-East China Pipeline Co., respectively. For more details, please refer to the announcement published in the China Securities Journal, the Shanghai Securities News and the Securities Times by Sinopec Corp. on 13 December 2016 and the announcement published on the website of the Hong Kong Stock Exchange on 12 December 2016.

¹⁴ DEPOSITS AT SINOPEC FINANCE CO., LTD. AND SINOPEC CENTURY BRIGHT CAPITAL INVESTMENT, LTD.

In order to regulate connected transactions between the Company and Sinopec Finance Co., Ltd. (Sinopec Corp.'s domestic settlement center, hereinafter referred to as the "Finance Company") and to ensure the safety and liquidity of the deposits of the Company in the Finance Company, Sinopec Corp. and the Finance Company formulated the Risk Control System on Connected Transactions of China Petroleum & Chemical Corporation and Sinopec Finance Co., Ltd., which covers the risk control system and the risk management plan of the Company to prevent financial risks and to ensure that the deposits of the Company in the Finance Company can be utilised at the Company's discretion. At the same time, as the controlling shareholder of the Finance Company, China Petrochemical Corporation undertakes that in case of an emergency where the Finance Company has difficulty in making payments, China Petrochemical Corporation will increase the capital of the Finance Company in accordance with the actual need for the purpose of making payment.

In order to regulate connected transactions between the Company and Sinopec Century Bright Capital Investment, Ltd. (Sinopec Corp.'s overseas settlement center, hereinafter referred to as the Century Bright Company), Century Bright Company ensures the safety of the deposits of the Company in Century Bright Company by strengthening internal risk controls and obtaining support from China Petrochemical Corporation. China Petrochemical Corporation has formulated a number of internal rules, including the Rules for the Internal Control System, the Rules for Implementation of Overseas Capital Management Methods, and the Provisional Methods for Overseas Fund Platform Management, to impose strict rules on Century Bright Company for providing overseas financial services. Century Bright Company has also established the Rules for the Implementation of the Internal Control System, which ensures the standardisation and safety of its corporate deposits business. At the same time, as the wholly controlling shareholder of Century Bright Company, China Petrochemical Corporation entered into a keep-well agreement with Century Bright Company in 2013, in which China Petrochemical Corporation undertakes that when Century Bright Company has difficulty in making payments, China Petrochemical Corporation will ensure that Century Bright Company will fulfill its repayment obligation through various channels.

The deposits of the Company in the Finance Company and Century Bright Company during the reporting period did not exceed the cap as approved at the general meeting of shareholders. During daily operations, Sinopec Corp. can withdraw the full amount of its deposits in the Finance Company and Century Bright Company.

CONNECTED TRANSACTIONS

¹ AGREEMENTS CONCERNING CONTINUING CONNECTED TRANSACTIONS BETWEEN SINOPEC CORP. AND CHINA PETROCHEMICAL CORPORATION

Prior to Sinopec Corp.'s overseas listing, in order to ensure the smooth continuation of production and business conducted by the Company and China Petrochemical Corporation, the two parties entered into a number of agreements on continuing connected transactions, details of which are as follows:

- (1) The Company and China Petrochemical Corporation will mutually supply ancillary services for products, production and construction services (Mutual Supply Agreement)
- (2) China Petrochemical Corporation will provide trademarks, patents and computer software to the Company for use free of charge
- (3) China Petrochemical Corporation will provide cultural and educational, hygienic and community services to the Company (Cultural and Educational Hygienic and Community Services Agreement)
- (4) China Petrochemical Corporation will provide leasing services for lands and certain properties to the Company
- (5) China Petrochemical Corporation will provide comprehensive insurance to the Company
 - (6) China Petrochemical Corporation will provide shareholders' loans to the Company and
- (7) The Company will provide franchise licenses for service stations to China Petrochemical Corporation.

On 26 August 2015, Sinopec Corp. and China Petrochemical Corporation entered into a supplementary agreement of the continuing connected transactions, whereby the terms of the Mutual Supply Agreement and the Cultural and Educational, Hygienic and Community Services Agreement were extended from 1 January 2016 to 31 December 2018. The resolution relating to continuing connected transactions for the three years from 2016 to 2018 was approved at the first extraordinary general meeting for 2015 held on 23 October 2015. For details of the above continuing connected transactions, please refer to relevant announcements published on 27 August 2015 in the China Securities Journal, the Shanghai Securities News and the Securities Times and on the websites of the Shanghai Stock Exchange and the Hong Kong Stock Exchange (dated 26 August 2015). The capitalised terms used in this section shall have the same meaning as that used in the above-mentioned announcements.

COMPLIANCE OF DISCLOSURES AND APPROVALS OF CONTINUING CONNECTED TRANSACTIONS BETWEEN THE COMPANY AND SINOPEC GROUP WITH HONG KONG LISTING RULES AND THE SHANGHAI LISTING RULES

Pursuant to the Hong Kong Listing Rules and the Shanghai Listing Rules, the continuing connected transactions between the Company and Sinopec Group are generally subject to full disclosure based on the nature and the value of the transactions, and are also subject to approvals of independent non-executive directors and/or independent shareholders. The Hong Kong Stock Exchange and Shanghai Stock Exchange exempted Sinopec Corp. from full compliance with the relevant listing rules regarding the above continuing connected transactions and conditionally exempted Sinopec Corp. from complying with the continuous disclosure obligations.

There was no change to the above-mentioned supplementary agreements on continuing connected transactions during the reporting period. The aggregated amount of the continuing connected transactions for 2016 of the Company is in compliance with the relevant requirements of the Hong Kong Listing Rules and the Shanghai Listing Rules. For performance details of connected transaction agreements, please refer to Item 3 below.

³ ACTUAL CONTINUING CONNECTED TRANSACTIONS ENTERED INTO BY THE COMPANY DURING THE YEAR

Sinopec Corp. and China Petrochemical Corporation have implemented the relevant framework agreements in relation to the continuing connected transactions, including Mutual Supply Agreement, Cultural, Educational, Hygiene and Community Services Agreement, Land Use Rights Leasing Agreement, Properties Leasing Agreement, Intellectual Property Licence Agreements and SPI Fund Document.

Pursuant to the above-mentioned agreements on continuing connected transactions, the aggregate amount of the continuing connected transactions of the Company during the year was RMB 260.704 billion. Among the transaction amount, purchases expenses amounted to RMB 179.82 billion, representing 9.32% of the total amount of this type of transaction for the reporting period, including purchases of products and services (procurement, storage, exploration and development services, and production-related services) of RMB 161.317 billion, purchases of auxiliary and community services of RMB 6.584 billion. The housing rent paid by the Company amounted to RMB 449 million. The rent for use of land was RMB 10.474 billion. Interest expenses amounted to RMB 996 million. The sales income amounted to RMB 80.884 billion, representing 4.04% of the total amount of this type of transaction for the reporting period, including RMB 80.634 billion for sales of products and services, RMB 41 million for agency commission income, and RMB 209 million for interest income.

The amounts of the above continuing connected transactions between the Company and Sinopec Group did not exceed the caps for the continuing connected transactions as approved by the general meeting of shareholders and the Board.

Principle of pricing for the continuing connected transactions:

- (a) The government-prescribed price will apply;
- (b) when there is no government-prescribed price but there is a government-guidance price, the government-guidance price will apply;
- (c) when there is neither a government-prescribed price nor a government-guidance price, the market price will apply;
or
- (d) when none of the above is applicable, the price for the provision of the products or services is to be agreed upon by the relevant parties, and shall be the reasonable cost incurred in providing the products or services plus 6% or less of such cost.

For details of the pricing principle, please refer to relevant announcements published on 27 August 2015 in the China Securities Journal, the Shanghai Securities News and the Securities Times and on the websites of the Shanghai Stock Exchange and the Hong Kong Stock Exchange.

Decision-making procedures:

The major continuing connected transaction agreements were entered into in the ordinary course of the Company's business and in accordance with normal commercial terms that are fair and reasonable to the Company and its shareholders. The Company, according to internal control procedures, adjusts the scope and amount of continuing connected transactions and the caps for the amount exempted from disclosure every three years, and will be announced and implemented upon the approval of the Board and/or independent shareholders. For the other connected transactions, Sinopec Corp., in strict compliance with domestic and overseas regulatory rules, will publish the announcement and implement the transactions only after submitting the relevant proposals of connected transactions to the Board and/or the general meeting of shareholders for consideration and approval according to internal control procedures.

Related party transactions with the Sinopec Group that occurred during the year, as set out in Note 34 to the financial statements prepared under the IFRS in this annual report, also fall under the definition of connected transactions under Chapter 14A of the Hong Kong Listing Rules.

The above-mentioned connected transactions between the Company and Sinopec Group in 2016 were approved at the 12th meeting of the sixth session of the Board and has complied with the disclosure requirements under Chapter 14A of the Hong Kong Listing Rules.

The external auditor of Sinopec Corp. was engaged to report on the Company's continuing connected transactions in accordance with the Hong Kong Standard on Assurance Engagements 3000, Assurance Engagement Other Than Audits or Reviews of Historical Financial Information, and with reference to Practice Note 740, Auditor's Letter on Continuing Connected Transactions under the Hong Kong Listing Rules, issued by the Hong Kong Institute of Certified Public Accountants. The auditor has issued its unqualified letter containing its conclusions in respect of the above-mentioned continuing connected transactions in accordance with Rule 14A.56 of the Hong Kong Listing Rules. Sinopec Corp. has submitted a copy of the auditor's letter to the Hong Kong Stock Exchange.

After reviewing the above-mentioned connected transactions, the independent non-executive directors of Sinopec Corp. have confirmed the following:

(a) The transactions have been conducted in the ordinary course of the Company's business.

(b) The transactions have been entered into based on either of the following terms:

i normal commercial terms; or

ii terms not less favorable than those available from or to independent third parties, where there is no available comparison to determine whether such terms are on normal commercial terms.

(c) The transactions were conducted pursuant to the terms of relevant agreements, and the terms were fair and reasonable and in the interests of Sinopec Corp. and its shareholders as a whole.

4 OTHER SIGNIFICANT CONNECTED TRANSACTIONS OCCURED THIS YEAR

There are no other significant connected transactions during the reporting period.

5 FUNDS PROVIDED BETWEEN RELATED PARTIES

In accordance with the disclosure requirement of the Shanghai Stock Exchange, where there are funds or guarantees provided between the Company and related parties, disclosure shall be made as to the reasons, the opening balance, the amount incurred in the current period and the ending balance of the funds provided, and their impacts on the Company.

CORPORATE GOVERNANCE

1 IMPROVEMENTS IN CORPORATE GOVERNANCE DURING THE REPORTING PERIOD

During the reporting period, Sinopec Corp. was in full compliance with domestic and overseas laws and regulations as well as the Articles of Association of the Company, and operates in line with all legal requirements and its corporate governance has been further improved. The Board and Board committees' members and senior management staff were adjusted in time, based on personnel changes. Shareholders' meetings, Board meetings and meetings of Board of Supervisors were organised in a standardised and efficient manner. Independent directors have played their roles dutifully by offering suggestions to the Company for its planning, reform and development plan for the "Thirteenth Five-Year" Period. Oriented at investors' demand, bilateral communication has been strengthened, high-quality information disclosure conducted, and green low-carbon development actively promoted and practiced, winning the recognition of the capital market and the society as a whole.

During the reporting period, there are no significant differences in Sinopec Corp.'s corporate governance and the requirements from the PRC Company Law and related regulations on securities of the CSRC. The Board of Supervisors of Sinopec Corp. agreed with all supervised matters. None of Sinopec Corp., the Board, directors, supervisors, senior management, controlling shareholders or de facto controllers of Sinopec Corp. were under the investigation by the CSRC or punished administratively or criticized publicly by the CSRC, the Hong Kong Securities and Futures Commission, the Securities and Exchange Commission of the United States, or received any public censure from Shanghai Stock Exchange, the Hong Kong Stock Exchange, the New York Stock Exchange or the London Stock Exchange.

2 ANNUAL GENERAL MEETING

During the reporting period, Sinopec Corp. convened the 1st extraordinary general meeting for 2016 and 2015 annual general meeting in Beijing, China on 25 February 2016 and 18 May 2016 respectively in accordance with relevant laws and regulations and procedures of noticing, convening and holding pursuant to the Articles of Association. For meeting details, please refer to the poll results announcements published in China Securities Journal, Shanghai Securities News and Securities Times and on the websites of Hong Kong Stock Exchange after each meeting.

3 EQUITY INTERESTS OF DIRECTORS, SUPERVISORS AND OTHER SENIOR MANAGEMENT

As of 31 December 2016, apart from 13,000 A shares of Sinopec Corp. held by Vice President Mr. Ling Yiqun, none of the directors, supervisors or other senior management of Sinopec Corp. held any shares of Sinopec Corp.

Save as disclosed above, during the reporting period, none of the directors, supervisors and senior management of Sinopec Corp. and their associates had any interests or short positions (including any interest or short position that is regarded or treated as being held in accordance with the Securities and Futures Ordinance (SFO) in the shares, debentures and underlying shares) of Sinopec Corp. or any associated corporations (as defined in Part XV of SFO) would fall to be disclosed to the Sinopec Corp. and the Hong Kong Stock Exchange under the Division 7 and 8 of Part XV of SFO or which was recorded in the register required to be kept under section 352 of SFO or otherwise notified to Sinopec Corp. and the Hong Kong Stock Exchange pursuant to the Model Code for Securities Transactions by Directors of Listed Company.

4 PERFORMANCE OF THE INDEPENDENT DIRECTORS

During the reporting period, the independent non-executive directors of Sinopec Corp. fulfilled their duties in good faith as required by laws and regulations and the Articles of Association, and actively contributed to the development of the Company. They actively attended, meetings of the Board and meetings of the Board committees (please refer to the Report of the Board of Directors in this annual report for details of their attendance), reviewed the relevant documents with due care and exercised their profession advantages to offer advice and suggestions to Sinopec Corp.'s development strategy, operations and reform. The independent non-executive directors gave their independent opinions on matters such as connected transactions, dividend distributions and appointments of senior management as

required by relevant rules and regulations, and maintained timely and effective communications with the executive directors, management, external auditors and the internal auditing department. The independent non-executive directors independently and objectively protected the legitimate interests of the Company and the shareholders, especially the minority shareholders, when performing their duties.

5 COMPANY'S INDEPENDENCE FROM CONTROLLING SHAREHOLDER

The Company is independent from its controlling shareholder in terms of, among other matters, business, assets and finances. The Company has a well-integrated independent business and independent operational capabilities.

6 COMPETITION BETWEEN SINOPEC CORP AND ITS CONTROLLING SHAREHOLDER

Please refer to "Performance of Undertaking by China Petrochemical Corporation" under the section "Significant Events" in this annual report for details.

7 IMPROVEMENT AND IMPLEMENTATION OF THE INTERNAL CONTROL SYSTEM

For details of internal control self-assessment and internal control auditing, please refer to the internal control assessment report and the internal control auditing report published by the Company on the same day of this annual report.

8 SENIOR MANAGEMENT APPRAISAL AND INCENTIVE SCHEMES

Sinopec Corp. has established and is continuously improving the fairness and transparency of its performance appraisal standards, its incentive schemes and requirements for directors, supervisors and other senior management. Sinopec Corp. has implemented a number of incentive schemes, including the Measures of Sinopec Corp. for the Implementation of Remuneration for Senior Managers, the Measures of Sinopec Corp. for the Management of Annual Performance Evaluations and the Measures of the Leadership of Companies Directly under Sinopec Corp. and the Headquarters Department for the Management of Performance Evaluation.

9 CORPORATE GOVERNANCE REPORT (IN ACCORDANCE WITH HONG KONG LISTING RULES)

(1) Compliance with the Corporate Governance Code

Based on its actual circumstances, Sinopec Corp. did not establish a Nomination Committee of the Board according to section A.5 of the Corporate Governance Code and Corporate Governance Report (Corporate Governance Code) as set out in Appendix 14 of the Hong Kong Listing Rules. Sinopec Corp. is of the view that the nomination of Director candidates by all members of the Board would be better suited in view of its actual situation. The board of directors of Sinopec Corp. (Board) would perform the duties of the Nomination Committee prescribed in the Corporate Governance Code.

Save as disclosed above, Sinopec Corp. complied with all code provisions set out in the Corporate Governance Code during the reporting period.

A Board of Directors

A.1 Board of Directors

a. The Board is the decision-making body of Sinopec Corp. and abides by good corporate governance practices and procedures. All decisions made by the Board are implemented by the Management of Sinopec Corp.

b. The meeting of the Board is held at least once a quarter. The Board will usually communicate the time and proposals of the Board meeting 14 days before convening of the meeting. The relevant documents and materials for Board meetings are usually sent to each Director 10 days in advance. In 2016, Sinopec Corp. held six Board meetings. For details about the attendance of each Director, please refer to the Report of the Board of Directors in this annual report.

c. Each Director of the Board may submit proposals to be included in the agenda of Board meetings, and each Director is entitled to request other related information.

d. The Board has reviewed and evaluated its performance in 2016 and is of the view that the Board made decisions in compliance with domestic and overseas regulatory authorities' requirements and the Company's internal rules; that the Board have received the suggestions from the Board of Supervisors and Management during its decision making process; and that the Board safeguarded the rights and interests of Sinopec Corp. and its shareholders.

e. The Secretary to the Board assists the Directors in handling the daily work of the Board, continuously informs the Directors of any regulations, policies or other requirements of domestic or overseas regulatory bodies in relation to corporate governance and ensures that the Directors comply with domestic and overseas laws and regulations when performing their duties and responsibilities. Sinopec Corp. has purchased liability insurance for all Directors to

minimise their risks that might incur, arising from the performance of their duties.

A.2 Chairman and President

Mr. Wang Yupu serves as Chairman of the Board and Mr. Dai Houliang serves as Vice Chairman of the Board and President of Sinopec Corp. The Chairman of the Board is elected by a majority vote of all Directors, and the President is nominated and appointed by the Board. The main duties and responsibilities of the Chairman and the President are clearly distinguished from each other, and the scope of their respective duties and responsibilities are set out in the Articles of Association.

The Chairman of the Board places great emphasis on communication with the Independent Directors. The Chairman independently held two meetings with the Independent Directors in respect of development strategy, corporate governance and operational management, etc. of Sinopec Corp.

The Chairman encourages open and active discussions. Directors have spoken freely at the Board meetings and actively and deeply participated in the discussions of significant decision made by the Board in the Board meetings.

A.3 Board composition

The Board consists of ten members (please refer to the Directors, Supervisors, Other Senior Management and Employees in this annual report), of which, five are Executive Directors; five are Non-executive Directors (including 4 Independent Non-executive Directors, which represent more than one-third of the Board). The Board
a. has a fairly good diversity. The Chairman and Executive Directors of Sinopec Corp. have petroleum and petrochemical technical background and/or extensive management experience in large-scale enterprises. The Independent Non-executive Directors have rich experience in economics, capital management and investment.

Sinopec Corp. has received from each of the Independent Directors a letter of confirmation for 2016 regarding their
b. compliance with relevant independence requirements set out in Rule 3.13 of the Hong Kong Listing Rules. Sinopec Corp. considers that each of the Independent Non-executive Directors is independent.

A.4 Appointment, re-election and dismissal

The term of each session of the Directors of Sinopec Corp. is three years, and the consecutive term of office of an
a. Independent Non-executive Director cannot exceed six years.

All Directors of Sinopec Corp. have been elected at the general meeting of shareholders. The Board has no power to
b. appoint temporary Directors.

c. Sinopec Corp. engages professional consultants to prepare detailed materials for newly appointed Directors, to notify them of the regulations of each listing place of Sinopec Corp. and to remind them of their rights, responsibilities and obligations as Directors.

A.5 Nomination Committee

Considering that the Board did not establish a Nomination Committee, the Board will perform the duties of the Nomination Committee prescribed in the Corporate Governance Code. The rules in relation to the nomination of Directors has been prescribed clearly in the Articles of Association and Rules of Procedure for the Shareholders' Meeting. Nomination of Directors may be proposed by shareholders who individually or collectively hold 3% of the
a. total voting shares of Sinopec Corp. (1% for the nomination of Independent Directors), by the Board or by the Board of Supervisors for approval at the general meeting of shareholders. When the Board nominates a candidate for Director, Independent Non-executive Directors shall give their independent opinions on the nomination in advance. Nine out of total ten Directors of the Board were elected at the annual general meeting of shareholders for the year 2014; one was elected at the first extraordinary general meeting of shareholders for the year 2016.

The Board establishes the Policy Concerning Diversity of Board Members which stipulates that the members of the Board shall be nominated and appointed based on the skills and experience required by the Board as well as the
b. principles on diversity of the Board. When deciding the composition of the Board, Sinopec Corp. shall consider several factors in relation to the diversity of the Board, including but not limited to, gender, age, culture and background of education, locations, profession and experience, skills, knowledge and service term.

A.6 Responsibility of Directors

All Non-executive Directors have the same duties and powers as the Executive Directors. In addition, the Independent Non-executive Directors are entitled to certain specific powers. The Articles of Association and the
a. Rules of Procedure for Meetings of Boards of Directors clearly prescribe the duties and powers of Directors, Non-executive Directors including Independent Non-executive Directors. The above duties and powers are published on the Sinopec Corp.'s website at <http://www.sinopec.com>.

b. Each of the Directors was able to devote sufficient time and effort to handling the matters of Sinopec Corp.

c.

Each of the Directors confirmed that he has complied with the Model Code for Securities and Transactions by Directors of Listed Companies during the reporting period. In addition, Sinopec Corp. formulated the Rules Governing Shares Held by Company Directors, Supervisors and Senior Managers and Changes in Shares and the Model Code of Securities Transactions by Company Employees to regulate the purchase and sale of Sinopec Corp.'s securities by relevant personnel.

- d. Sinopec Corp. organised and arranged training sessions for Directors and paid the relevant fees. The Directors actively participated in the trainings and continuing professional development program.

A.7 Provision of and access to information

- a. The agenda and other reference documents for meetings of the Board and Board committees will be distributed prior to the meetings to give each Director sufficient time to review the materials so that Directors can make informed decisions.

- b. Each Director can obtain all related information in a comprehensive and timely manner. The Secretary to the Board is responsible for organising and preparing the materials for the Board meetings, including preparation of explanations for each proposal to ensure fully understanding by the Directors. The Management is responsible for providing the Directors with necessary information and materials. The Director may ask the Management, or ask, via the Management, relevant departments to provide necessary information or explanations. The Directors may seek advices from professional consultants when necessary.

B Remuneration and Appraisal Committee

- a. Remuneration and Appraisal Committee (Remuneration Committee) consists of Independent Non-executive Director Mr. Fan Gang, who serves as the Chairman, and the Vice Chairman of the Board & President Mr. Dai Houliang and Independent Non-executive Director Mr. Jiang Xiaoming, who serve as the members of the Remuneration Committee. The Remuneration Committee is responsible for reviewing the implementation of the annual remuneration plans for Directors. Supervisors and other senior Management as approved at the general meeting of the shareholders, and report to the Board.

- b. The Remuneration Committee always consults the Chairman of the Board and the President about the remuneration plans for other Executive Directors. After the Remuneration Committee's review, it is of the view that all the Executive Directors of Sinopec Corp. have fulfilled the duty clauses in the service contracts of the Directors in 2016.

- c. The members of the Remuneration Committee may engage independent professionals when performing its duties. Reasonable costs arising from such consultations are borne by Sinopec Corp. In the meantime, the Remuneration Committee has also appointed consultants to provide advices. The working expenses of the Remuneration Committee are included in the budget of Sinopec Corp. According to the policies of Sinopec Corp., the senior Management and relevant departments of Sinopec Corp. must actively cooperate with the Remuneration Committee.

C Accountability and Auditing

C.1 Financial reporting

- a. Directors are responsible for supervising the preparation of accounts for each fiscal period to ensure that the accounts truly and fairly reflect the condition of the business, its performance and the cash flow of the Company during the period. The Board approved the Financial Report for 2016 and warranted that the annual report contained no false representations, no material omissions or misleading statements and jointly and severally accepted full responsibility for the authenticity, accuracy and completeness of the content.

- b. Sinopec Corp. provides Directors with information about the financial, production and operating status of the Company every month to ensure that the Directors can learn about the latest developments of the Company in a timely manner.

- c. Sinopec Corp. has adopted an internal control mechanism to ensure that the Management and relevant departments have provided the Board and the Audit Committee with sufficient financial data and related explanations and materials.

d. The external auditors of Sinopec Corp. made a statement about their reporting responsibilities in the auditor's report contained in the financial report.

C.2 Internal Control and Risk Management

Sinopec Corp. has formulated and implemented its internal control and risk management system. The Board as a decision-making body is responsible for evaluating and review the effectiveness of its internal control and risk management. The Board and Audit Committee periodically (at least annually) receive reports of the Company regarding internal control and risk management information from the Management. All major internal control and risk management issues are reported to the Board and Audit Committee. Sinopec Corp. has set up its internal control and risk management department and internal auditing departments, which are equipped with sufficient staff, and these departments periodically (at least twice per year) report to the Audit Committee. The internal control and risk management system of the Company are designed to manage rather than eliminate all the risks of the Company.

In terms of internal control, Sinopec Corp. adopted the internal control framework prescribed in the internationally accepted Committee of Sponsoring Organizations of the Treadway Commission Report (COSO). Based upon the Articles of Association and the applicable management policies currently in effect, as well as in accordance with relevant domestic and overseas applicable regulations, Sinopec Corp. formulated and continuously improves the Internal Control Manual to achieve internal control of all factors of internal environment, risk evaluation, control activities, information and communication, and internal supervision. At the same time, Sinopec Corp. has constantly supervised and evaluate its internal control, and conducted comprehensive and multi-level checks including regular test, enterprise self-examination and auditing check, and subsumed headquarters, branches and subsidiaries into the scope of internal control evaluation, with an internal control evaluation report being produced. The Board annually review the internal control evaluation report. For detailed information about the internal control during the reporting period, please refer to the report on internal control prepared by Sinopec Corp.

Sinopec Corp. has formulated and implemented its information disclosure policy and insider information registration policy. The corporation regularly evaluates the policy implementation and makes disclosure in accordance with relevant regulations. Please refer to the website of Sinopec Corp. for the details of the information disclosure policy

In terms of risk management, Sinopec Corp. adopted the enterprise risk management framework provided by COSO, and established its risk management policy and risk management organisation system. The Company annually conducts risk evaluation to identify major and important risks and perform risk management duties. It has designed major and important risks tackling measures combined with its internal control system and periodically monitor their implementation to ensure adequate care, monitor and tackling of major risks.

Based upon the review and evaluation of internal control and risk management of the reporting period, the Board is of the view that the internal control and risk management of the Company are effective.

C.3 Audit Committee

The Board has established an Audit Committee. The Audit Committee consists of Independent Non-executive Director Mr. Andrew Y. Yan, who serves as the Chairman, and Independent Non-executive Director Mr. Jiang Xiaoming and Independent Non-executive Director Mr. Tang Min, who serve as members. As verified, none of them has served as a partner or a former partner in our current auditing firm.

During the reporting period, the Audit Committee held four meetings. (please refer to the section Meetings held by the special committees of the Board under the Report of the Board of Directors in this annual report) The review opinions were issued at the meetings and submitted to the Board after signed by the members of the Audit Committee. During the reporting period, the Board and the Audit Committee had no disagreement.

Audit Committee members may engage independent professionals when performing its duties. Reasonable costs arising from such consultations are borne by Sinopec Corp. In the meantime, the Audit Committee has appointed consultants to provide advices. The working expenses of the Audit Committee are included in the budget of Sinopec Corp. In accordance with the policies of Sinopec Corp., the senior Management and relevant departments of Sinopec Corp. must actively cooperate with the Audit Committee.

The Audit Committee held two meetings with auditors without the presence of Sinopec Corp.'s Management to discuss the auditing of financial reports and the auditing fee for the year. The Audit Committee has reviewed the adequacy of the resources for accounting and financial reporting and the qualifications and experience of the employees as well as the sufficiency of the training courses provided to relevant employees. Audit Committee is of the view that the Management has fulfilled the duties to establish an effective internal control system. The Company established a whistle-blowing policy in its internal control system, providing several channels as online reporting, letter reporting, receipt of appeals and a complaint mailbox, etc. to employees to report behavior that violates the

internal control system of the Company. The Audit Committee has reviewed and approved such policy.

D Delegation of power by the Board

The Board and the Management have clear terms of reference in writing. The Articles of Association and the Rules of Procedure for the General Meetings of Shareholders and the Rules of Procedure for Meetings of Boards of Directors clearly set forth the scope of duties, powers and delegation of power of the Board and Management, which are published on the website of Sinopec Corp. at <http://www.sinopec.com>.

In addition to the Audit Committee and the Remuneration Committee, the Board had established the Strategy Committee and the Social Responsibility Management Committee. The Strategy Committee is responsible for overseeing long-term development strategies and significant investment decisions of the Company. The Strategy Committee consists of eight directors, including Chairman of the Board Mr. Wang Yupu, who serves as Chairman, as well as Vice Chairman of the Board & President Mr. Dai Houliang, Executive Director Mr. Wang Zhigang, Mr. Zhang Haichao, Mr. Jiao Fangzheng, Mr. Ma Yongsheng and Independent Non-executive Directors Mr. Andrew Y. Yan and Mr. Fan Gang, who serve as members. The Social Responsibility Management is responsible for preparing policies, governance, strategies and plans for social responsibility management of the Company. The Social Responsibility Management Committee consists of three Directors, including Chairman of the Board Mr. Wang Yupu, who serves as Chairman, Vice Chairman of the Board & President Mr. Dai Houliang and Independent Non-executive Director Mr. Tang Min, who serve as members.

Each Board Committee is required to report its decisions and recommendations to the Board. The terms of reference of the Audit Committee and the Remuneration Committee are published on the website of Sinopec Corp. at <http://www.sinopec.com>.

E Investor Relations

Sinopec Corp. pays close attention to investor relations. The Chairman of the Board, President and Chief Financial Officer conduct road shows every year to answer questions on subjects of concern to investors, such as development strategies and the production and business performance of the Company. Sinopec Corp. established a department responsible for communicating with investors. In compliance with regulatory provisions, Sinopec Corp. enhanced communication with investors by holding meetings with institutional investors, setting up an investor hotline and communicating through internet platform.

During the reporting period, separate resolution was proposed for each substantially separate issue at the general meeting. All resolutions were voted by poll to ensure the interests of all shareholders. Notices of the general meeting of shareholders were dispatched to shareholders 45 days (excluding the date of the general meeting) in advance.

During the reporting period, the Chairman of the Board did not attend the annual general meeting for the year 2015 due to other business arrangement. As recommended by more than half number of Directors, the then Director & President Mr. Li Chunguang hosted the annual general meeting for the year 2015 and arranged the members of the Board and senior Management to attend the meeting and communicate with the investors extensively.

F Company Secretary

The Hong Kong Stock Exchange recognised the Secretary to the Board as having the relevant qualifications as company Secretary. Nominated by the Chairman of the Board and appointed by the Board, the Secretary to the Board is the Senior Management Officer of Sinopec Corp. and responsible for the Company and the Board. The Secretary gives opinions on corporate governance to the Board and arranges orientation training and professional development for the Directors.

b.

During the reporting period, the Secretary to the Board actively participated in career development training with more than 15 training hours.

G Shareholders' rights

Shareholders who individually or collectively hold 10% of the total voting shares of Sinopec Corp. may request the Board in writing to convene the general meeting of shareholders. If the Board fails to grant the request to convene the meeting according to the Rules of Procedure for Meetings of Boards of Directors, the shareholders may convene and hold the meeting at their discretion according to applicable laws, and reasonable expenses incurred will be borne by Sinopec Corp. These provisions are subject to the following conditions: the proposals at the general meeting of shareholders must fall within the responsibilities of the general meeting of shareholders, with specific proposals and resolutions and in compliance with relevant laws, administrative regulations and the Articles of Association.

When Sinopec Corp. holds the general meeting of shareholders, shareholders who individually or collectively hold b.3% of the total voting shares of Sinopec Corp. may propose a supplementary proposal 10 days before the date of the general meeting.

The eligibility for attending the general meeting, the rights of shareholders, the proposals at the meeting and the c. voting procedures are clearly stated in the notice of the general meeting of Sinopec Corp. dispatched to the shareholders.

According to relevant rules of Sinopec Corp., the Board Secretary is responsible for establishing an effective communication channel between Sinopec Corp. and its shareholders, for setting up special departments to d. communicate with the shareholders and for passing the opinions and proposals of the shareholders to the Board and Management in a timely manner. Contact details of Sinopec Corp. can be found on the Investor Center page on Sinopec Corp.'s website.

(2) Auditors

The appointment of PricewaterhouseCoopers Zhong Tian LLP and PricewaterhouseCoopers as Sinopec Corp.'s external auditors for 2016 and the authorisation of the Board to determine their remuneration were approved at Sinopec Corp.'s annual general meeting for the year 2015 on 18 May 2016. The audit fee for 2016 is RMB 51.58 million (including audit fee of internal control), which was approved at the 12th meeting of the sixth session of the Board. The annual financial statements have been audited by PricewaterhouseCoopers Zhong Tian LLP and PricewaterhouseCoopers. The Chinese certified accountants signing the report are Zhao Jianrong and Gao Peng from PricewaterhouseCoopers Zhong Tian LLP.

During the reporting period, neither PricewaterhouseCoopers Zhong Tian LLP nor PricewaterhouseCoopers provided any non-audit service to the Company.

(3) Other information about Sinopec Corp.'s corporate governance

Except for their working relationships with Sinopec Corp., none of the Directors, Supervisors or other Senior Management has any financial, business or family relationship or any relationship in other material aspects with one another. For information about changes in share capital and shareholdings of substantial shareholders, please refer to page 6 to page 7; for information about meetings of the Board, please refer to page 51; for information about equity interests of Directors, Supervisors and other senior Management, please refer to page 43; for information about the biographies and annual remuneration of Directors, Supervisors and other senior Management, please refer to page 60 to page 71.

REPORT OF THE BOARD OF DIRECTORS

All above discussions constitute parts of the report of the Board of Directors.

7 DIVIDEND

The profit distribution policy of Sinopec Corp. maintains consistency and steadiness, and gives further consideration to the long-term interests of the Company, overall interests of all the shareholders and the sustainable development of the Company. Sinopec Corp. gives priority to adopting cash dividends for profit distribution, and is able to deliver an interim profit distribution. When the net profits and retained earnings of the Company are positive in current year, and in the event that the cash flow of Sinopec Corp. can satisfy the normal operation and sustainable development, Sinopec Corp. should adopt cash dividends, and the distribution profits in cash every year are no less than 30% of the net profits of the Company in current year.

The profit distribution plan of Sinopec Corp. for the current year will be carried out in accordance with the policy and procedures stipulated as per the Articles of Association, with the advice of minority shareholders being heard and considered, meanwhile, the independent directors will issue independent opinions.

Proposals for dividend distribution

At the 12th meeting of the sixth session of the Board, the Board approved the proposal to distribute a final cash dividend of RMB 0.17 (tax inclusive) per share, combining with an interim distributed dividend of RMB0.079 (tax inclusive) per share, the total dividend for the whole year is RMB 0.249 (tax included) per share.

The dividend will be denominated and declared in RMB, and distributed to the domestic shareholders and investors participating in the Shanghai-Hong Kong Stock Connect Program in RMB and to the overseas shareholders in Hong Kong Dollar. The exchange rate for the dividend calculation in Hong Kong Dollar is based on the average benchmark exchange rate of RMB against Hong Kong Dollar as published by the People's Bank of China one week preceding the date of the declaration of such dividend. The arrangement of the payment of the final dividend will be published in due course.

In accordance with the Enterprise Income Tax Law of the People's Republic of China which came into effect on 1 January 2008 and its implementation regulations, Sinopec Corp. is required to withhold and pay enterprise income tax at the rate of 10% on behalf of the non-resident enterprise shareholders whose names appear on the register of members for H Shares of Sinopec Corp. when distributing cash dividends or issuing bonus shares by way of capitalisation from retained earnings. Any H Shares of the Sinopec Corp. which is not registered under the name of an individual shareholder, including those registered under HKSCC Nominees Limited, other nominees, agents or trustees, or other organizations or groups, shall be deemed as shares held by nonresident enterprise shareholders. Therefore, on this basis, enterprise income tax shall be withheld from dividends payable to such shareholders. If holders of H Shares intend to change its shareholder status, please enquire about the relevant procedures with your agents or trustees. Sinopec Corp. will strictly comply with the law or the requirements of the relevant government authority to withhold and pay enterprise income tax on behalf of the relevant shareholders based on the registration of members for H shares of Sinopec Corp. as at the record date.

If the individual holders of the H shares who are Hong Kong or Macau residents or residents of the countries which had an agreed tax rate of 10% for the cash dividends or bonus shares by way of capitalisation from retained earnings with China under the relevant tax agreement, Sinopec Corp. should withhold and pay individual income tax on behalf of the relevant shareholders at a rate of 10%. Should the individual holders of the H Shares are residents of the countries which had an agreed tax rate of less than 10% with China under the relevant tax agreement, Sinopec Corp. shall withhold and pay individual income tax on behalf of the relevant shareholders at a rate of 10%. In that case, if the relevant individual holders of the H Shares wish to reclaim the extra amount withheld (Extra Amount) due to the application of 10% tax rate, Sinopec Corp. would apply for the relevant agreed preferential tax treatment provided that the relevant shareholders submit the evidence required by the notice of the tax agreement to the share register of Sinopec Corp. in a timely manner. Sinopec Corp. will assist with the tax refund after the approval of the competent tax authority. Should the individual holders of the H Shares are residents of the countries which had an agreed tax rate of over 10% but less than 20% with China under the tax agreement, Sinopec Corp. shall withhold and pay the individual income tax at the agreed actual rate in accordance with the relevant tax agreement. In the case that the individual holders of the H Shares are residents of the countries which had an agreed tax rate of 20% with China, or which has not entered into any tax agreement with China, or otherwise, Sinopec Corp. shall withhold and pay the individual income tax at a rate of 20%

Pursuant to the Notice on the Tax Policies Related to the Pilot Program of the Shanghai-Hong Kong Stock Connect (Caishui [2014] No. 81):

For domestic investors investing in the H Shares of Sinopec Corp. through Shanghai-Hong Kong Stock Connect Program, the company shall withhold and pay income tax at the rate of 20% on behalf of individual investors and securities investment funds. The company will not withhold or pay the income tax of dividends for domestic enterprise investors and those domestic enterprise investors shall report and pay the relevant tax by themselves.

For investors of the Hong Kong Stock Exchange (including enterprises and individuals) investing in the A Shares of Sinopec Corp. through Shanghai-Hong Kong Stock Connect Program, the Company will withhold and pay income taxes at the rate of 10% on behalf of those investors and will report to the tax authorities for the withholding. For investors who are tax residents of other countries, whose country of domicile is a country having entered into a tax treaty with the PRC stipulating a dividend tax rate of lower than 10%, the enterprises and individuals may, or may entrust a withholding agent to, apply to the competent tax authorities for the entitlement of the rate under such tax treaty. Upon approval by the tax authorities, the amount paid in excess of the tax payable based on the tax rate according to such tax treaty will be refunded.

The dividend distribution and bonus shares declared by Sinopec Corp. in the past three years are as follows:

	2016*	2015	2014
Cash dividends (RMB/Share, tax inclusive)	0.249	0.15	0.20
Total amount of cash dividends (RMB million, tax inclusive)	30,147	18,160	23,830
Net profits attributed to the shareholders of the listed company shown in the consolidated statement for the dividend year (RMB million)	46,416	32,281	47,603
Ratio between the dividends and the net profit attributed to the shareholders of the listed company in the consolidated statement (%)	64.95	56.26	50.06

*:The final cash dividend for 2016 is subject to approval at the 2016 annual general meeting.

The aggregate cash dividend declared by Sinopec Corp. during three years from 2014 to 2016 is RMB 0.599 per share, and the total dividend payment from 2014 to 2016 as a percentage of average net profits in the three years is 171.35%.

8 RESPONSIBILITIES FOR THE COMPANY'S INTERNAL CONTROL

The Board is fully responsible for establishing and maintaining the internal control system related to the financial statements as well as ensuring its effective implementation. In 2016, the Board assessed and evaluated the internal control of Sinopec Corp. according to the Basic Standard for Enterprise Internal Control, Application Guidelines for Enterprise Internal Control and Estimation Guidelines for Enterprise Internal Control. There were no significant defects in relation to the internal control system related to the financial statements as of 31 December 2016. Therefore the internal control system of Sinopec Corp. related to the financial statements is sound and effective.

The 2016 Annual Internal Control Assessment Report of Sinopec Corp. was reviewed and approved on the 12th meeting of the sixth Session of the Board on 24 March 2017, and all members of the Board undertook that the contents of the report are true, accurate and complete, and without any false representation, misleading statements or material omissions.

9 DURING THIS REPORTING PERIOD, THE COMPANY DID NOT VIOLATE ENVIRONMENTAL POLICIES

21 PERMITTED INDEMNITY PROVISIONS

During the reporting period, Sinopec Corp. has purchased liability insurance for all directors to minimise their risks arising from the performance of their duties. The permitted indemnity provisions are provided in such directors liability insurance in respect of potential liability and costs associated with legal proceedings that may be brought against such directors.

22 EQUITY-LINKED AGREEMENTS

For the reporting period, the Company has not entered into any equity-linked agreement.

23 OIL & GAS RESERVE APPRAISAL PRINCIPLES

We manage our reserves estimation through a two-tier management system. Our Oil and Natural Gas Reserves Management Committee, or RMC, at the headquarters level oversees the overall reserves estimation process and reviews the reserves estimation of our company. Each of our branches has a reserves management committee that manages the reserves estimation process and reviews the reserve estimation report at the branch level.

Our RMC is led by a couple of senior vice presidents, as well as experts and directors general of Sinopec's exploration and production segment. Mr. Wang Zhigang, the chairman of RMC holds a Ph.D. in geology from the Geology and Geophysics Research Institute of the Chinese Academy of Sciences and has over 30 years of experience in the oil and gas industry. Our RMC also includes other members who are senior managers in charge of exploration and development activities at the production bureau level. A majority of our RMC members hold doctorates or master's degrees, and our members have an average of 20 years of technical experience in relevant professional fields, such as geology, engineering and economics.

Our reserves estimates are guided by procedural manuals and technical experts. A number of working divisions at the production bureau level, including the exploration, development, financial and legal divisions, are responsible for initial collection and compilation of information about reserves. Exploration and development division collectively prepares the initial report on the reserves estimate. Together with technical experts, reserves management committees at the subsidiary level then review the report to ensure qualitative and quantitative compliance with technical guidance and the accuracy and reasonableness of the reserves estimation. At corporate level, the RMC is primarily responsible for the management and coordination of the reserves estimation process, review and approval of annual changes and results in the reserves estimate, and disclosure of our proved reserves. We also engage outside consultants to assist in our compliance with the rules and regulations of the U.S. Securities and Exchange Commission. Our reserves estimation process is further facilitated by a specialised reserves database, which is improved and updated periodically.

24 CORE COMPETITIVENESS ANALYSIS

The Company is a large scale integrated energy and petrochemical company with upstream, mid-stream and downstream operations. The Company is a large scaled oil and gas producer in China; in respect of refining capacity, it ranks first in China; equipped with a well-developed refined oil products sales network, the Company is the largest supplier of refined oil products in China; and in terms of ethylene production capacity, the Company takes the first position in China, and has a well-established marketing network for chemical products.

The integrated business structure of the Company carries strong advantages in synergy among its various business segments, enabling the Company to continuously tap onto potentials in attaining an efficient and comprehensive utilization of its resources, and endowed the Company with strong resistance against risks, as well as remarkable capabilities in sustaining profitability.

The Company enjoys a favorable positioning with its operations located close to the consumer markets. Along with the steady growth in the Chinese economy, sales volume of both oil products and chemical products of the Company has been increasing steadily over the years; through continuous and specialized marketing efforts, the Company's capability in international operations and market expansion has been further enhanced.

The Company owns a team of professionals and expertise engaged in the production of oil and gas, operation of refineries and chemical plants, as well as marketing activities. The Company applies outstanding fine management measures with its remarkable capabilities in management of operations, and enjoys a favorable operational cost advantage in its downstream businesses.

The Company has formulated a well-established technology system and mechanism, and owns competent teams specialised in scientific research covering a wide range of subjects; the four platforms for technology advancement is taking shape, which includes exploration and development of oil and gas, refining, chemicals and strategic emerging technology. With its overall technologies reaching state of the art level in the global arena, and some of them taking the lead globally, the Company enjoys strong capability for technical innovations.

The Company always attaches great importance to fulfilling social responsibilities, and carries out the green and low carbon development strategy to pursue a sustainable development. Moreover, the Company enjoys an outstanding brand name, plays an important role in the economy and is a renowned and reputable company in China.

25 RISK FACTORS

In the course of its production and operations, the Company will actively take various measures to circumvent operational risks. However, in practice, it may not be possible to prevent the occurrence of all risks and uncertainties described below.

Risks with regard to the variations from macroeconomic situation: The business results of the Company are closely related to China's and global economic situation. The development of Chinese economy has entered New Normal. Although various countries have adopted different kinds of macroeconomic policies to eliminate negative effects caused by lower growth of global economy, the turnaround of economic recovery still remains uncertain. The Company's business could also be adversely affected by such factors as the impact on export due to trade protectionism from some countries, and impact on import which is likely caused by regional trade agreements and etc.

Risks with regard to the cyclical effects from the industry: The majority of the Company's operating income comes from the sales of refined oil products and petrochemical products, and part of the those businesses and their related products are cyclic and are sensitive to macro-economy, cyclic changes of regional and global economy, the changes of the production capacity and output, demand of consumers, prices and supply of the raw materials, as well as prices and supply of the alternative products etc. Although the Company is an integrated company with upstream, midstream and downstream operations, it can only counteract the adverse influences of industry cycle to some extent.

Risks from the macroeconomic policies and government regulation: Although the Chinese government is gradually liberalizing the market entry regulations on petroleum and petrochemicals sector, the petroleum and petrochemical industries in China are still subject to entry regulations to a certain degree, which include: issuing licenses in relation to exploration and development of crude oil and natural gas, issuing business licenses for trading crude oil and refined oil, setting caps for retail prices of gasoline, diesel and other oil products, the imposing of the special oil income levy, formulation of import and export quotas and procedures, formulation of safety, quality and environmental protection standards and formulation of energy conservation policies. In addition, the changes which have occurred or might occur in macroeconomic and industry policies such as the opening up of crude oil import licenses, and further improvement in pricing mechanism of refined oil products, reforming and improvement in pricing mechanism of natural gas, cost supervision of gas pipeline and access to third party, and reforming in resource tax and environmental tax, will cause effects on our business operations. Such changes might further intensify market competition and have certain effect on the operations and profitability of the Company.

Risks with regard to the changes from environmental legislation requirements: Our production activities generate waste liquids, gases and solids. The Company has built up the supporting effluent treatment systems to prevent and reduce the pollution to the environment. However, the relevant government authorities may issue and implement much stricter environmental protection laws and regulations, adopt much stricter environment protection standards. Under such situations, the Company may increase expenses in relation to the environment protection accordingly.

Risks from the uncertainties of obtaining additional oil and gas resources: The future sustainable development of the Company is partly dependent to a certain extent on our abilities in continuously discovering or acquiring additional oil and natural gas resources. To obtain additional oil and natural gas resources, the Company faces some inherent risks associated with exploration and development and/or with acquisition activities, and the Company has to invest a large amount of money with no guarantee of certainty. If the Company fails to acquire additional resources through further exploration, development and acquisition to increase the reserves of crude oil and natural gas, the oil and natural gas reserves and production of the Company may decline overtime which may adversely affect the Company's financial situation and operation performance.

Risks with regard to the external purchase of crude oil: A significant amount of crude oil as needed by the Company is satisfied through external purchases. In recent years, especially influenced by the mismatch between supply and demand of crude oil, geopolitics, global economic growth and other factors, the prices of crude oil fell sharply. Additionally, the supply of crude oil may even be interrupted due to some extreme major incidents in certain regions. Although the Company has taken flexible counter measures, it may not fully avoid risks associated with any significant fluctuation of international crude oil prices and sudden disruption of supply of crude oil from certain regions.

Risks with regard to the operation and natural disasters: The process of petroleum chemical production is exposed to the risks of inflammation, explosion and environmental pollution and is vulnerable to natural disasters. Such contingencies may cause serious impacts to the community, major financial losses to the Company and grievous injuries to people. The Company has always been paying great emphasis on the safety of production, and has implemented a strict HSE management system as an effort to avoid such risks as far as possible. Meanwhile, the main assets and inventories of the Company as well as the possibility of damage to a third party have been insured. However, such measures may not shield the Company from financial losses or adverse impact resulting from such contingencies.

Investment risks: Petroleum and chemical sector is a capital intensive industry. Although the Company adopted a prudent investment strategy and conducted rigorous feasibility study on each investment project, some certain investment risks may exist in the sense that expected returns may not be achieved due to major changes in factors such as market environment, prices of equipment and raw materials, and construction period during the implementation of the projects.

Risks with regard to overseas business development and management: The Company engages in oil and gas exploration, refining and chemical, warehouse logistics and international trading businesses in some regions outside China. The Company's overseas businesses and assets are subject to the jurisdiction of the host country's laws and regulations. In light of the complicity of geopolitics, economic and other conditions, including sanctions, barriers to entry, instability in the financial and taxation policies, contract defaults, the Company's risks with regard to overseas business development and management could be increased.

Currency risks: At present, China implements an administered floating exchange rate regime based on market supply and demand which is regulated with reference to a basket of currencies in terms of the exchange rate of Renminbi. As the Company purchases a significant portion of crude oil in foreign currency which is based on US dollar-denominated prices, fluctuations in the exchange rate of Renminbi against US dollars and certain other foreign currencies may affect the Company's purchasing costs of crude oil. Meanwhile, according to domestic pricing mechanism of refined oil products, the prices of domestic refined oil products fluctuate with Renminbi exchange rate, and the prices of other domestic refined and chemical products would also be influenced by import price.

By order of the Board
Wang Yupu
Chairman

Beijing, China, 24 March 2017

REPORT OF THE BOARD OF SUPERVISORS

Dear Shareholders:

In 2016, the Board of Supervisors and each supervisor of Sinopec Corp. diligently performed their supervision responsibilities, actively participated in the supervision process of decision making, carefully reviewed and effectively supervised the major decisions of the Company, and endeavored to safeguard the interests of shareholders and the Company in accordance with the PRC Company Law and the Articles of Association of Sinopec Corp.

During this reporting period, the Board of Supervisors held four (4) meetings in total, and mainly reviewed and approved Sinopec Corp.'s annual report, financial statement, communication on progress report for sustainable development, internal control assessment report and working report of the board of supervisors etc.

On 28 March 2016, the 4th meeting of the sixth session of the Board of Supervisors was held, and Financial Statements of Sinopec Corp. for 2015, Annual Report of Sinopec Corp. for 2015, 2015 Communication on Progress for Sustainable Development Report of Sinopec Corp., Internal Control Assessment Report of Sinopec Corp. for 2015, Report on the Work of Board of Supervisors of Sinopec Corp. for 2015 were reviewed and approved at the meeting.

On 28 April 2016, the 5th meeting of the sixth session of the Board of Supervisors was held, and the First Quarterly Report of Sinopec Corp. for 2016 was approved at the meeting.

On 26 August 2016, the 6th meeting of the sixth session of the Board of Supervisors was held, and the Interim Financial Statements of Sinopec Corp. for 2016 as well as Interim Report of Sinopec Corp. for 2016 were reviewed and approved at the meeting.

On 27 October 2016, the 7th meeting of the sixth session of the Board of Supervisors was held, and Third Quarterly Report of Sinopec Corp. for 2016 was approved at the meeting.

In addition, the supervisors attended the general meetings of shareholders and presented at meetings of the Board. The Board of Supervisors also organised supervisors to attend the trainings for directors and supervisors of listed companies organised by Beijing Securities Supervisory Bureau under CSRC. And these activities have further improved their capabilities in performing supervisory duties.

Through supervision and inspection on the production and operation management as well as financial management conditions, the Board of Supervisors and all the supervisors conclude that under the severe operating environment of excessive supply of oil products in domestic market and fluctuation of international crude oil prices at low level, the Company focused on transformation of its growth mode, improve asset quality, increase asset efficiency and upgrade the asset structure, with an aim to optimise resource and structure adjustment. Make every effort to expand the market, optimise structure, reduce costs, and control risks, all contributing to a hard-won business result. The Board of Supervisors had no objection to the supervised issues during this reporting period.

Firstly, the Board and the management of Sinopec Corp. performed their responsibilities pursuant to relevant laws and regulations, and implemented efficient management. The Board diligently fulfilled its obligations and exercised its rights under the PRC Company Law and the Articles of Association, and made informed decisions on major issues concerning change in growth mode, structure adjustment, as well as development and profitability. The senior management diligently implemented the resolutions approved by the Board, continued to deepen the reform, focus on innovations, regulate operations, intensified strict management and strived to tap potentials and enhance efficiency, optimise business structures, committed to achieving the aim of sustaining profit and growth set by the Board. During the reporting period, the Board of Supervisors did not discover any behaviors of any other director or senior management which violated laws, regulations, and the Articles of Association, or were detrimental to the interests of Sinopec Corp. or its shareholders.

Secondly, the reports and financial statements prepared by Sinopec Corp. in 2016 complied with the relevant regulation of domestic and overseas securities regulators, the disclosed information truly, accurately, completely and fairly reflected Sinopec Corp.'s financial status and operation performance. The dividend distribution plan was made after comprehensively consideration of the long-term interests of Sinopec Corp and the interest of the shareholder. No violation of confidential provisions of persons who prepared and reviewed the report was found.

Thirdly, Sinopec Corp.'s internal control system is robust and effective, no material defects of internal control were found. In the meantime, Sinopec Corp. actively fulfilled its social responsibilities and promoted the sustainable development of social economy. Information disclosed in the sustainable development report was in compliance with requirements made by Shanghai Stock Exchange and Hong Kong Stock Exchange for listed companies with regard to the publication of social responsibility report.

Fourthly, all connected transactions between the Company and Sinopec Group were in compliance with the relevant rules and regulations of domestic and overseas listing places. The pricing of all the connected transaction was fair and reasonable. No insider trading or asset loss which is detrimental to the interests of Sinopec Corp. or its shareholders was found.

In 2017, the Board of Supervisors and each supervisor will continue to follow the principle of due diligence and integrity, earnestly perform the duties of supervision as delegated by the shareholders, strictly review the significant decisions, strengthen the process control and supervision, increase the strength of inspection and supervision on subsidiaries and protect Sinopec Corp.'s benefit and its shareholders' interests.

DIRECTORS, SUPERVISORS, SENIOR MANAGEMENT AND EMPLOYEES

1 INTRODUCTION OF DIRECTORS, SUPERVISORS AND OTHER SENIOR MANAGEMENT

(1) Directors

Wang Yupu, aged 60, Chairman of Board of Directors of Sinopec Corp. Mr. Wang is a professor level senior engineer with a Ph.D. degree and an academician of the Chinese Academy of Engineering. In October 2000, he was appointed as Director, Deputy General Manager of Daqing Oilfield Company Limited; in December 2003, he was appointed as Chairman and General Manager of Daqing Oilfield Company Limited; in March 2008, he was appointed as Chairman and General Manager (Director-General) of Daqing Oilfield Company Limited (Daqing Petroleum Administration Bureau); in August 2009, he was appointed as Vice Governor of the People's Government of Heilongjiang Province. Note 1: All above subsidiaries except Fujian Petrochemical Company Limited are audited by PricewaterhouseCoopers Zhong Tian LLP or PricewaterhouseCoopers in 2016. KPMG Huazhen LLP served the exception.

2: The above indicated total assets and net profit has been prepared in accordance with ASBE. Except for Sinopec Kantons Holdings Limited and Sinopec Overseas Investment Holdings Ltd, which are incorporated in Bermuda and Hong Kong SAR, respectively, all of the above wholly-owned and non-wholly-owned subsidiaries are incorporated in the PRC. All of the above wholly-owned and controlling subsidiaries are limited liability companies except for Sinopec Shanghai Petrochemical Company Limited and Sinopec

Kantons Holdings Limited. The Board of Directors considered that it would be redundant to disclose the particulars of all subsidiaries and, therefore, only those which have material impact on the results or assets of Sinopec Corp. are set out above.

REPORT OF THE PRC AUDITOR

PwC ZT Shen Zi (2017) No. 10001

To the Shareholders of China Petroleum & Chemical Corporation,

OPINION

What we have audited

We have audited the accompanying financial statements of China Petroleum & Chemical Corporation (hereinafter “Sinopec Corp.”), which comprise the consolidated and company balance sheets as at 31 December 2016, the consolidated and company income statements, the consolidated and company cash flow statements and the consolidated and company statements of changes in shareholders’ equity for the year then ended, and the notes to the financial statements.

Our opinion

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and company’s financial position of Sinopec Corp. as at 31 December 2016, and their financial performance and cash flows for the year then ended in accordance with the requirements of Accounting Standards for Business Enterprises (“CASs”).

BASIS FOR OPINION

We conducted our audit in accordance with China Standards on Auditing (“CSAs”). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of Sinopec Corp. in accordance with the Code of Ethics for Professional Accountants of the Chinese Institute of Certified Public Accountants (“CICPA Code”), and we have fulfilled our other ethical responsibilities in accordance with the CICPA Code.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters identified in our audit are summarised as follows:

Recoverability of the carrying amount of oil and gas properties;

Accounting for investment income of capital injection by external investors into Sinopec Sichuan to East China Gas Pipeline Co., Ltd.

Key Audit Matter	How our audit addressed the Key Audit Matter
Recoverability of the carrying amount of oil and gas properties	<p>In auditing the respective discounted cash flow of the relevant oil and gas properties, we have performed the following key procedures on the relevant discounted cash flow projections prepared by management:</p> <p>Evaluated and tested the key controls, relating to the preparation of the discounted cash flow projections of oil and gas properties.</p> <p>Compared estimates of future crude oil prices adopted by the Group against a range of reputable published crude oil price forecasts.</p> <p>Compared the future production profiles against the oil and gas reserve estimation report approved by the Group’s reserve management committee. Evaluated the competence, capability and objectivity of the management’s experts engaged in estimating the oil and gas reserves. Assessed key estimations or assumptions used in the reserve estimation, by reference to historical data, management plans and/or reputable external data.</p> <p>Compared the future cost profiles against historical costs or relevant budgets of the Group.</p> <p>Independently estimated a range of discount rates, and found that the discount rates adopted by management were within the range.</p> <p>Tested selected other key data inputs, such as nature gas prices and production profiles in the projections by reference to historical data and/or relevant</p>
<p>Refer to note 13 “FIXED ASSETS” to the consolidated financial statements.</p> <p>As at 31 December 2016, the carrying amount of oil and gas properties amounted to RMB 215,124 million.</p> <p>Low crude oil prices gave rise to possible indication that the carrying amount of oil and gas properties as at 31 December 2016 might be impaired. The Group has adopted discounted cash flow as the respective recoverable amounts of the oil and gas properties, which involved estimations or assumptions including:</p> <ul style="list-style-type: none"> Future crude oil prices; Future production profiles; Future cost profiles; and Discount rates. <p>Because of the significance of the carrying amount of oil and gas properties as at 31 December 2016, together with the use of estimations or assumptions in determining their respective discounted cash flow, we had placed our audit emphasis on this matter.</p>	

budgets of the Group.

Assessed the methodology adopted in, and tested mathematical accuracy of the discounted cash flow projections.

Evaluated the sensitivity analyses prepared by the Group, and assessed the potential impacts of a range of possible outcomes.

Based on our work, we found the key assumptions and input data adopted were supported by the evidence we gathered and consistent with our expectations.

In auditing the investment income of capital injection by external investors into Pipeline Ltd, we have performed the following procedures:

Evaluated the effective date on which the Group lost control over the Pipeline Ltd, taking into consideration of factors including when the composition of the board of directors was changed.

Tested the consideration to the Group as compensation for the loss of control over the Pipeline Ltd by checking against the relevant bank receipt notices. Corroborated the detail of the transaction by inspecting the relevant documents, agreements and contracts.

Recomputed the investment income arising from the capital injection by external investors into Pipeline Ltd of RMB 20.562 billion, and agreed to management's computation.

Based on our work, we found that the investment income of capital injection by external investors into Pipeline Ltd of RMB 20.562 billion was supported by the evidence we gathered.

Accounting for investment income of capital injection by external investors into Sinopec Sichuan to East China Gas Pipeline Co., Ltd

Refer to note 12 "LONG-TERM EQUITY INVESTMENTS" to the consolidated financial statements, an amount of RMB 20.562 billion investment income was arisen as a result of the derecognition of the assets and liabilities of a former subsidiary (Sinopec Sichuan to East China Gas Pipeline Co., Ltd, the "Pipeline Ltd") from the consolidated financial position of the Group when the control over Pipeline Ltd was lost. The Group continues to retain a 50% equity interest in the Pipeline Ltd, and hence its significant influence over the Pipeline Ltd. As a result, the Group deconsolidated the Pipeline Ltd when the control was lost, and accounts for its 50% equity interest in the Pipeline Ltd as an associate company.

Because of the significance of such investment income in the year ended 31 December 2016, we had placed our audit emphasis on this matter.

OTHER INFORMATION

Management is responsible for the other information. The other information comprises all of the information included in 2016 annual report of Sinopec Corp. other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the CASs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing these financial statements, management is responsible for assessing Sinopec Corp.'s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intend to liquidate Sinopec Corp. or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Sinopec Corp.'s financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether these financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Sinopec Corp.'s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in these financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause Sinopec Corp. to cease to continue as a going concern.

Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Sinopec Corp. to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTES TO THE FINANCIAL STATEMENTS
for the year ended 31 December 2016

1 STATUS OF THE COMPANY

China Petroleum & Chemical Corporation (the “Company”) was established on 25 February 2000 as a joint stock limited company. The company is registered in Beijing, the People’s Republic of China, and the headquarter is located in Beijing, the People’s Republic of China. The approval date of the financial report is 24 March 2017.

According to the State Council’s approval to the “Preliminary Plan for the Reorganisation of China Petrochemical Corporation” (the “Reorganisation”), the Company was established by China Petrochemical Corporation (“Sinopec Group Company”), which transferred its core businesses together with the related assets and liabilities at 30 September 1999 to the Company. Such assets and liabilities had been valued jointly by China United Assets Appraisal Corporation, Beijing Zhong Zheng Appraisal Company, CIECC Assets Appraisal Corporation and Zhong Fa International Properties Valuation Corporation. The net asset value was determined at RMB 98,249,084,000. The valuation was reviewed and approved by the Ministry of Finance (the “MOF”) (Cai Ping Zi [2000] No. 20 “Comments on the Review of the Valuation Regarding the Formation of a Joint Stock Limited Company by China Petrochemical Corporation”).

In addition, pursuant to the notice Cai Guan Zi [2000] No. 34 “Reply to the Issue Regarding Management of State-Owned Equity by China Petroleum and Chemical Corporation” issued by the MOF, 68.8 billion domestic state-owned shares with a par value of RMB 1.00 each were issued to Sinopec Group Company, the amount of which is equivalent to 70% of the above net asset value transferred from Sinopec Group Company to the Company in connection with the Reorganisation.

Pursuant to the notice Guo Jing Mao Qi Gai [2000] No. 154 “Reply on the Formation of China Petroleum and Chemical Corporation”, the Company obtained the approval from the State Economic and Trade Commission on 21 February 2000 for the formation of a joint stock limited company.

The Company took over the exploration, development and production of crude oil and natural gas, refining, chemicals and related sales and marketing business of Sinopec Group Company after the establishment of the Company.

The company and its subsidiaries (the “Group”) engage in the oil and gas and chemical operations and businesses, including:

- (1) the exploration, development and production of crude oil and natural gas;
- (2) the refining, transportation, storage and marketing of crude oil and petroleum product; and
- (3) the production and sale of chemical.

Pursuant to the resolution passed at the Directors’ meeting on 29 October 2015, the Company entered into the JV Agreement with Sinopec Assets Management Corporation (“SAMC”) in relation to the formation of the Gaoqiao Petrochemical Co. Ltd. According to the JV Agreement, the Company and SAMC jointly set up Gaoqiao Petrochemical Co. Ltd. for RMB 100 million in cash in 2016. Subsequently, the Company subscribed capital contribution with the net assets of Gaoqiao Branch of the Company and SAMC subscribed capital contribution with the net assets of Gaoqiao Branch of SAMC. The capital contribution was completed on 1 June 2016, after which the Company held 55% of Gaoqiao Petrochemical Co. Ltd.’s voting rights and become the parent company of Gaoqiao Petrochemical Co.Ltd..

As Sinopec Group Company controls both the Group and SAMC, the non-cash transaction described above between Sinopec and SAMC has been accounted as business combination under common control. Accordingly, the assets and liabilities of Gaoqiao Branch of SAMC have been accounted for at historical cost, and the consolidated financial statements of the Group prior to these acquisitions have been restated to include the results of operation and the assets and liabilities of Gaoqiao Branch of SAMC on a combined basis.

(1)The financial information disclosed in the consolidated scope changes are as follows:

The acquiree	Obtain Proportion	The basis for the business combination under the common control	Consolidation date	Determination basis of consolidation date	Revenue of the acquiree from 1 January 2016 to the consolidation date RMB Million	Net profit of the acquiree from 1 January 2016 to the consolidation date RMB Million	Revenue of the acquiree from 1 January 2015 to 31 December 2015 RMB Million	Net profit of the acquiree from 1 January 2015 to 31 December 2015 RMB Million
Gaoqiao Branch of SAMC	55%	The acquiree and the company are controlled by Sinopec Group Company both before and after combination, and the control is not transitory.	June 2016	The consolidation date is the date on which the Company effectively obtains control of the acquiree.	916	86	2,563	13

(2)The consolidation cost is as follow:

Consolidation cost (RMB million) 2,137

1 STATUS OF THE COMPANY (CONTINUED)

(3) The carrying value of the assets and liabilities of the acquiree are as follows:

	At Consolidation date	At 31 December 2015
	Book Value	Book Value
	RMB million	RMB million
Current assets	937	1,287
Total assets	4,130	4,174
Current liabilities	203	225
Total liabilities	203	232
Total shareholders' equity	3,927	3,942

Details of the Company's principal subsidiaries are set out in Note 53.

2 BASIS OF PREPARATION

(1) Statement of compliance of China Accounting Standards for Business Enterprises ("ASBE")

The financial statements have been prepared in accordance with the requirements of Accounting Standards for Business Enterprises-Basic Standards, specific standards and relevant regulations (hereafter referred as ASBE collectively) issued by the MOF on or after 15 February 2006. These financial statements also comply with the disclosure requirements of "Regulation on the Preparation of Information Disclosures of Companies Issuing Public Shares, No.15: General Requirements for Financial Reports" issued by the China Securities Regulatory Commission ("CSRC"). These financial statements present truly and completely the consolidated and company financial position as at 31 December 2016, and the consolidated and company financial performance and the consolidated and company cash flows for the year then ended.

These financial statements are prepared on a basis of going concern.

(2) Accounting period

The accounting year of the Group is from 1 January to 31 December.

(3) Measurement basis

The financial statements of the Group have been prepared under the historical cost convention, except for the assets and liabilities set out below:

~~Financial asset and financial liability with change in fair value recognised through profit or loss (see Note 3(11))~~

~~Available-for-sale financial assets (see Note 3(11))~~

~~Convertible bonds (see Note 3(11))~~

~~Derivative financial instruments (see Note 3(11))~~

(4) Functional currency and presentation currency

The functional currency of the Company's and most of its subsidiaries are Renminbi. The Group's consolidated financial statements are presented in Renminbi. The Company translates the financial statements of subsidiaries from their respective functional currencies into Renminbi (see Note 3(2)) if the subsidiaries' functional currencies are not Renminbi.

3 SIGNIFICANT ACCOUNTING POLICIES

The Group determines specific accounting policies and accounting estimates based on the characteristics of production and operational activities, mainly reflected in the accounting for allowance for accounts receivable (Note 3(12)), valuation of inventories (Note 3(4)), depreciation of fixed assets and depletion of oil and gas properties (Note 3(6), (7)), measurement of provisions (Note 3(16)), etc.

Principal accounting estimates and judgements of the Group are set out in Note 52.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(1) Accounting treatment of business combination involving entities under common control and not under common control

(a) Business combination involving entities under common control

A business combination involving entities or businesses under common control is a business combination in which all of the combining entities or businesses are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. The assets and liabilities that the acquirer receives in the acquisition are accounted for at the acquiree's carrying amount on the acquisition date. The difference between the carrying amount of the acquired net assets and the carrying amount of the consideration paid for the acquisition (or the total nominal value of shares issued) is recognised in the share premium of capital reserve, or the retained earnings in case of any shortfall in the share premium of capital reserve. Any costs directly attributable to the combination shall be recognised in profit or loss for the current period when occurred. The expense incurred for equity securities and debt securities issued as the consideration of the combination is recognised in the initial cost of the securities. The combination date is the date on which the acquirer effectively obtains control of the acquiree.

(b) Business combination involving entities not under common control

A business combination involving entities or businesses not under common control is a business combination in which all of the combining entities or businesses are not ultimately controlled by the same party or parties both before and after the business combination. Difference between the consideration paid by the Group as the acquirer, comprises of the aggregate of the fair value at the acquisition date of assets given, liabilities incurred or assumed, and equity securities issued by the acquirer in exchange for control of the acquiree, and the Group's interest in the fair value of the identifiable net assets of the acquiree, is recognised as goodwill (Note 3(9)) if it is an excess, otherwise in the profit or loss. The expense incurred for equity securities and debt securities issued as the consideration of the combination is recognised in the initial cost of the securities. Any other expense directly attributable to the business combination is recognised in the profit or loss for the year. The difference between the fair value and the book value of the assets given is recognised in profit or loss. The acquiree's identifiable assets, liabilities and contingent liabilities, if satisfying the recognition criteria, are recognised by the Group at their fair value at the acquisition date. The acquisition date is the date on which the acquirer effectively obtains control of the acquiree.

(c) Method for preparation of consolidated financial statements

The scope of consolidated financial statements is based on control and the consolidated financial statements comprise the Company and its subsidiaries. Control means an entity is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Where the Company combines a subsidiary during the reporting period through a business combination involving entities under common control, the financial statements of the subsidiary are included in the consolidated financial statements as if the combination had occurred at the beginning of the earliest comparative year presented or, if later, at the date that common control was established. Therefore the opening balances and the comparative figures of the consolidated financial statements are restated. In the preparation of the consolidated financial statements, the subsidiary's assets, liabilities and results of operations are included in the consolidated balance sheet and the consolidated income statement, respectively, based on their carrying amounts in the subsidiary's financial statements, from the date that common control was established.

Where the Company acquires a subsidiary during the reporting year through a business combination involving entities not under common control, the identifiable assets, liabilities and results of operations of the subsidiaries are consolidated into consolidated financial statements from the date that control commences, based on the fair value of

those identifiable assets and liabilities at the acquisition date.

Where the Company acquired a minority interest from a subsidiary's minority shareholders, the difference between the investment cost and the newly acquired interest into the subsidiary's identifiable net assets at the acquisition date is adjusted to the capital reserve (capital surplus) in the consolidated balance sheet. Where the Company partially disposed an investment of a subsidiary that do not result in a loss of control, the difference between the proceeds and the corresponding share of the interest into the subsidiary is adjusted to the capital reserve (capital surplus) in the consolidated balance sheet. If the credit balance of capital reserve (capital surplus) is insufficient, any excess is adjusted to retained profits.

In a business combination involving entities not under common control achieved in stages, the Group remeasures its previously held equity interest in the acquiree on the acquisition date. The difference between the fair value and the net book value is recognised as investment income for the year. If other comprehensive income was recognised regarding the equity interest previously held in the acquiree before the acquisition date, the relevant other comprehensive income is transferred to investment income in the period in which the acquisition occurs.

Where control of a subsidiary is lost due to partial disposal of the equity investment held in a subsidiary, or any other reasons, the Group derecognises assets, liabilities, minority interests and other equity items related to the subsidiary. The remaining equity investment is remeasured to fair value at the date in which control is lost. The sum of consideration received from disposal of equity investment and the fair value of the remaining equity investment, net of the fair value of the Group's previous share of the subsidiary's identifiable net assets recorded from the acquisition date, is recognised in investment income in the period in which control is lost. Other comprehensive income related to the previous equity investment in the subsidiary, is transferred to investment income when control is lost.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(1) Accounting treatment of business combination involving entities under common control and not under common control (Continued)

(c) Method for preparation of consolidated financial statements (Continued)

Minority interest is presented separately in the consolidated balance sheet within shareholders' equity. Net profit or loss attributable to minority shareholders is presented separately in the consolidated income statement below the net profit line item.

The excess of the loss attributable to the minority interests during the period over the minority interests' share of the equity at the beginning of the reporting period is deducted from minority interests.

Where the accounting policies and accounting period adopted by the subsidiaries are different from those adopted by the Company, adjustments are made to the subsidiaries' financial statements according to the Company's accounting policies and accounting period. Intra-group balances and transactions, and any unrealised profit or loss arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

The unrealised profit or loss arising from the sale of assets by the Company to its subsidiaries is eliminated in full against the net profit attributed to shareholders; the unrealised profit or loss from the sale of assets by subsidiaries to the Company is eliminated according to the distribution ratio between shareholders of the parent company and minority interests. For sale of assets that occurred between subsidiaries, the unrealised gains and losses is eliminated according to the distribution ratio for its subsidiaries seller between net profit attributable to shareholders of the parent company and minority interests.

(2) Transactions in foreign currencies and translation of financial statements in foreign currencies

Foreign currency transactions are, on initial recognition, translated into Renminbi at the spot exchange rates quoted by the People's Bank of China ("PBOC rates") at the transaction dates.

Foreign currency monetary items are translated at the PBOC rates at the balance sheet date. Exchange differences, except for those directly related to the acquisition, construction or production of qualified assets, are recognised as income or expenses in the income statement. Non-monetary items denominated in foreign currency measured at historical cost are not translated. Non-monetary items denominated in foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined. The difference between the translated amount and the original currency amount is recognised as other comprehensive income, if it is classified as available-for-sale financial assets; or charged to the income statement if it is measured at fair value through profit or loss.

The assets and liabilities of foreign operation are translated into Renminbi at the spot exchange rates at the balance sheet date. The equity items, excluding "Retained earnings", are translated into Renminbi at the spot exchange rates at the transaction dates. The income and expenses of foreign operation are translated into Renminbi at the spot exchange rates or an exchange rate that approximates the spot exchange rates on the transaction dates. The resulting exchange differences are separately presented as other comprehensive income in the balance sheet within equity. Upon disposal of a foreign operation, the cumulative amount of the exchange differences recognised in which relate to that foreign operation is transferred to profit or loss in the year in which the disposal occurs.

(3) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits, short-term and highly liquid investments which are readily convertible into known amounts of cash and are subject to an insignificant risk of change in value.

(4) Inventories

Inventories are initially measured at cost. Cost includes the cost of purchase and processing, and other expenditures incurred in bringing the inventories to their present location and condition. The cost of inventories is calculated using the weighted average method. In addition to the cost of purchase of raw material, work in progress and finished goods include direct labour and an appropriate allocation of manufacturing overhead costs.

At the balance sheet date, inventories are stated at the lower of cost and net realisable value.

Any excess of the cost over the net realisable value of each item of inventories is recognised as a provision for diminution in the value of inventories. Net realisable value is the estimated selling price in the normal course of business less the estimated costs of completion and the estimated costs necessary to make the sale and relevant taxes. The net realisable value of materials held for use in the production is measured based on the net realisable value of the finished goods in which they will be incorporated. The net realisable value of the quantity of inventory held to satisfy sales or service contracts is measured based on the contract price. If the quantities held by the Group are more than the quantities of inventories specified in sales contracts, the net realisable value of the excess portion of inventories is measured based on general selling prices.

Inventories include raw materials, work in progress, semi-finished goods, finished goods and reusable materials. Reusable materials include low-value consumables, packaging materials and other materials, which can be used repeatedly but do not meet the definition of fixed assets. Reusable materials are amortised in full when received for use. The amounts of the amortisation are included in the cost of the related assets or profit or loss.

Inventories are recorded by perpetual method.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(5) Long-term equity investments

(a) Investment in subsidiaries

In the Company's separate financial statements, long-term equity investments in subsidiaries are accounted for using the cost method. Except for cash dividends or profits distributions declared but not yet distributed that have been included in the price or consideration paid in obtaining the investments, the Company recognises its share of the cash dividends or profit distributions declared by the investee as investment income irrespective of whether these represent the net profit realised by the investee before or after the investment. Investments in subsidiaries are stated at cost less impairment losses (see Note 3(12)) in the balance sheet. At initial recognition, such investments are measured as follows:

The initial investment cost of a long-term equity investment obtained through a business combination involving entities under common control is the Company's share of the carrying amount of the subsidiary's equity at the combination date. The difference between the initial investment cost and the carrying amounts of the consideration given is adjusted to share premium in capital reserve. If the balance of the share premium is insufficient, any excess is adjusted to retained earnings.

For a long-term equity investment obtained through a business combination not involving enterprises under common control, the initial investment cost comprises the aggregate of the fair values of assets transferred, liabilities incurred or assumed, and equity securities issued by the Company, in exchange for control of the acquiree. For a long-term equity investment obtained through a business combination not involving enterprises under common control, if it is achieved in stages, the initial cost comprises the carrying value of previously-held equity investment in the acquiree immediately before the acquisition date, and the additional investment cost at the acquisition date.

An investment in a subsidiary acquired otherwise than through a business combination is initially recognised at actual purchase cost if the Group acquires the investment by cash, or at the fair value of the equity securities issued if an investment is acquired by issuing equity securities, or at the value stipulated in the investment contract or agreement if an investment is contributed by investors.

(b) Investment in joint ventures entities and associates

A joint venture is an incorporated entity over which the Group, based on legal form, contractual terms and other facts and circumstances, has joint control with the other parties to the joint venture and rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the Group and the parties sharing control.

An associate is the investee that the Group has significant influence on their financial and operating policies. Significant influence represents the right to participate in the financial and operating policy decisions of the investee but is not control or joint control over the establishment of these policies. The Group generally considers the following circumstances in determining whether it can exercise significant influence over the investee: whether there is representative appointed to the board of directors or equivalent governing body of the investee; whether to participate in the investee's policy-making process; whether there are significant transactions with the investees; whether there is management personnel sent to the investee; whether to provide critical technical information to the investee.

An investment in a joint ventures entity or an associate is accounted for using the equity method, unless the investment is classified as held for sale (see Note 3(10)).

The initial cost of investment in joint ventures entities and associates is stated at the consideration paid except for cash dividends or profits distributions declared but unpaid at the time of acquisition and therefore included in the

consideration paid should be deducted if the investment is made in cash. Under the circumstances that the long-term investment is obtained through non-monetary asset exchange, the initial cost of the investment is stated at the fair value of the assets exchanged if the transaction has commercial substance, the difference between the fair value of the assets exchanged and its carrying amount is charged to profit or loss; or stated at the carrying amount of the assets exchanged if the transaction lacks commercial substance.

The Group's accounting treatments when adopting the equity method include:

Where the initial investment cost of a long-term equity investment exceeds the Group's interest in the fair value of the investee's identifiable net assets at the date of acquisition, the investment is initially recognised at the initial investment cost. Where the initial investment cost is less than the Group's interest in the fair value of the investee's identifiable net assets at the time of acquisition, the investment is initially recognised at the investor's share of the fair value of the investee's identifiable net assets, and the difference is charged to profit or loss.

After the acquisition of the investment, the Group recognises its share of the investee's net profits or losses and other comprehensive income as investment income or losses and other comprehensive income, and adjusts the carrying amount of the investment accordingly. Once the investee declares any cash dividends or profits distributions, the carrying amount of the investment is reduced by that attributable to the Group.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(5) Long-term equity investments (Continued)

(b) Investment in joint ventures entities and associates (Continued)

The Group recognises its share of the investee's net profits or losses after making appropriate adjustments to align the accounting policies or accounting periods with those of the Group based on the fair values of the investee's net identifiable assets at the time of acquisition. Under the equity accounting method, unrealised profits and losses resulting from transactions between the Group and its associates or joint ventures entities are eliminated to the extent of the Group's interest in the associates or joint ventures entities. Unrealised losses resulting from transactions between the Group and its associates or joint ventures entities are fully recognised in the event that there is an evidence of impairment.

The Group discontinues recognising its share of net losses of the investee after the carrying amount of the long-term equity investment and any long-term interest that is in substance forms part of the Group's net investment in the associate or the joint ventures entity is reduced to zero, except to the extent that the Group has an obligation to assume additional losses. However, if the Group has incurred obligations for additional losses and the conditions on recognition of provision are satisfied in accordance with the accounting standard on contingencies, the Group continues recognising the investment losses and the provision. Where net profits are subsequently made by the associate or joint venture entity, the Group resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The Group adjusts the carrying amount of the long-term equity investment for changes in owners' equity of the investee other than those arising from net profits or losses and other comprehensive income, and recognises the corresponding adjustment in capital reserve.

(c) The impairment assessment method and provision accrual on investment

The impairment assessment and provision accrual on investments in subsidiaries, associates and joint ventures entities are stated in Note 3(12).

(6) Fixed assets and construction in progress

Fixed assets represent the tangible assets held by the Group using in the production of goods, rendering of services and for operation and administrative purposes with useful life over one year.

Fixed assets are stated in the balance sheet at cost less accumulated depreciation and impairment losses (see Note 3(12)). Construction in progress is stated in the balance sheet at cost less impairment losses (see Note 3(12)).

The cost of a purchased fixed asset comprises the purchase price, related taxes, and any directly attributable expenditure for bringing the asset to working condition for its intended use. The cost of self-constructed assets includes the cost of materials, direct labour, capitalised borrowing costs (see Note 3(19)), and any other costs directly attributable to bringing the asset to working condition for its intended use. According to legal or contractual obligations, costs of dismantling and removing the items and restoring the site on which the related assets located are included in the initial cost.

Construction in progress is transferred to fixed assets when the asset is ready for its intended use. No depreciation is provided against construction in progress.

Where the individual component parts of an item of fixed asset have different useful lives or provide benefits to the Group in different patterns thus necessitating use of different depreciation rates or methods, each part is recognised as a separate fixed asset.

The subsequent costs including the cost of replacing part of an item of fixed assets are recognised in the carrying amount of the item if the recognition criteria are satisfied, and the carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of fixed assets are recognised in profit or loss as incurred.

The Group terminates the recognition of an item of fixed asset when it is in a state of disposal or it is estimated that it is unable to generate any economic benefits through use or disposal. Gains or losses arising from the retirement or disposal of an item of fixed asset are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal.

Other than oil and gas properties, the cost of fixed assets less residual value and accumulated impairment losses is depreciated using the straight-line method over their estimated useful lives, unless the fixed asset is classified as held for sale (see Note 3(10)). The estimated useful lives and the estimated rate of residual values adopted for respective classes of fixed assets are as follows:

	Estimated useful life	Estimated rate of residual value
Plants and buildings	12-50 years	3%
Equipment, machinery and others	4-30 years	3%

Useful lives, residual values and depreciation methods are reviewed at least each year end.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(7) Oil and gas properties

Oil and gas properties include the mineral interests in properties, wells and related support equipment arising from oil and gas exploration and production activities.

The acquisition cost of mineral interest is capitalised as oil and gas properties. Costs of development wells and related support equipment are capitalised. The cost of exploratory wells is initially capitalised as construction in progress pending determination of whether the well has found proved reserves. Exploratory well costs are charged to expenses upon the determination that the well has not found proved reserves. However, in the absence of a determination of the discovery of proved reserves, exploratory well costs are not carried as an asset for more than one year following completion of drilling. If, after one year has passed, a determination of the discovery of proved reserves cannot be made, the exploratory well costs are impaired and charged to expense. All other exploration costs, including geological and geophysical costs, are charged to profit or loss in the year as incurred.

The Group estimates future dismantlement costs for oil and gas properties with reference to engineering estimates after taking into consideration the anticipated method of dismantlement required in accordance with the industry practices. These estimated future dismantlement costs are discounted at credit-adjusted risk-free rate and are capitalised as oil and gas properties, which are subsequently amortised as part of the costs of the oil and gas properties.

Capitalised costs of proved oil and gas properties are amortised on a unit-of-production method based on volumes produced and reserves.

(8) Intangible assets

Intangible assets, where the estimated useful life is finite, are stated in the balance sheet at cost less accumulated amortisation and provision for impairment losses (see Note 3(12)). For an intangible asset with finite useful life, its cost less estimated residual value and accumulated impairment losses is amortised on a straight-line basis over the expected useful lives, unless the intangible assets are classified as held for sale (see Note 3(10)).

An intangible asset is regarded as having an indefinite useful life and is not amortised when there is no foreseeable limit to the year over which the asset is expected to generate economic benefits for the Group.

Useful lives and amortisation methods are reviewed at least each year end.

(9) Goodwill

The initial cost of goodwill represents the excess of cost of acquisition over the acquirer's interest in the fair value of the identifiable net assets of the acquiree under the business combination involving entities not under common control.

Goodwill is not amortised and is stated at cost less accumulated impairment losses (see Note 3(12)). On disposal of an asset group or a set of asset groups, any attributable amount of purchased goodwill is written off and included in the calculation of the profit or loss on disposal.

(10) Held for sale and discontinued operation

Non-current assets or disposal group that meet the following conditions will be classified as held for sale. (i) for the non-current assets or the disposal group, they can only be sold immediately in current condition, according to the usual terms of selling the assets or disposal group; (ii) the Group has made the resolution and obtain the appropriate approval on disposal of the non-current assets or the disposal group; (iii) the Group has signed an irrevocable transfer agreement with the transferee; (iv) the transfer will be completed within one year.

Non-current assets, except for financial assets and deferred tax assets that satisfy the cognition criteria for assets held for sale are stated at the lower of carrying amount and the fair value less costs to sell. Any excess of the original carrying amount over the fair value less costs to sell is recognised as asset impairment loss.

The assets and liabilities in the non-current asset or disposal groups which have been classified as assets held for sale are classified as current assets and current liabilities, and are presented separately in the consolidated balance sheet.

A discontinued operation is a component of the Group that either has been disposed of, or is classified as held for sale, can be clearly distinguished operationally and for financial reporting purposes from the rest of the Group and (i) represents a separate major line of business or geographical area of operations, (ii) is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations, or (iii) is a subsidiary acquired exclusively with a view to resale.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(11) Financial Instruments

Financial instruments of the Group include cash and cash equivalents, bond investments, equity securities other than long-term equity investments, receivables, derivative financial instruments, payables, loans, bonds payable, and share capital, etc.

(a) Classification, recognition and measurement of financial instruments

The Group recognises a financial asset or a financial liability on its balance sheet when the Group enters into and becomes a party to the underlining contract of the financial instrument.

The Group classifies financial assets and liabilities into different categories at initial recognition based on the purpose of acquiring assets and assuming liabilities: financial assets and financial liabilities at fair value through profit or loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets and other financial liabilities.

Financial assets and financial liabilities are initially recognised at fair value. For financial asset or financial liability of which the change in its fair value is recognised in profit or loss, the relevant transaction cost is recognised in profit or loss. The transaction costs for other financial assets or financial liabilities are included in the initially recognised amount. Subsequent to initial recognition financial assets and liabilities are measured as follows:

~~Financial asset or financial liability with change in fair value recognised through profit or loss~~

A financial asset or financial liability is classified as at fair value through profit or loss if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if it is a derivative, unless the derivative is a designated and effective hedging instrument, or a financial guarantee contract, or a derivative that is linked to and must be settled by delivery of an unquoted equity instrument (without a quoted price from an active market) whose fair value cannot be reliably measured. These financial instruments are initially measured at fair value with subsequently changes in fair value recognised in profit or loss. Subsequent to initial recognition, financial assets and financial liabilities at fair value through profit or loss are measured at fair value, and changes therein are recognised in profit or loss.

~~Loans and Receivables~~

Loans and Receivables are non-derivative financial assets with fixed or determinable recoverable amount and with no quoted price in active market. After the initial recognition, loans and receivables are measured at amortised cost using the effective interest rate method.

~~Held-to-maturity investment~~

Held-to-maturity investment includes non-derivative financial assets with fixed or determinable recoverable amount and fixed maturity that the Group has the positive intention and ability to hold to maturity. Subsequent to initial recognition, held-to-maturity investments are measured at amortised cost using the effective interest method.

~~Available-for-sale financial assets~~

Available-for-sale financial assets include non-derivative financial assets that are designated as available for sales and other financial assets which do not fall into any of the above categories.

Available-for-sale financial assets whose fair value cannot be measured reliably are measured at cost subsequent to initial recognition. Other than the above equity instrument investments whose fair values cannot be measured reliably,

other available-for-sale financial assets are initially stated at fair values. The gains or losses arising from changes in the fair value are directly recognised in equity, except for the impairment losses and exchange differences from monetary financial assets denominated in foreign currencies, which are recognised in profit or loss. The cumulative gains and losses previously recognised in equity are transferred to profit or loss when the available-for-sale financial assets are derecognised. Dividend income from these equity instruments is recognised in profit or loss when the investee declares the dividends. Interest on available-for-sale debt instrument investments calculated using the effective interest rate method is recognised in profit or loss (see Note 3(17) (c)).

Other financial liabilities

Financial liabilities other than the financial liabilities at fair value through profit or loss are classified as other financial liabilities.

Other financial liabilities include the liabilities arising from financial guarantee contracts. Financial guarantees are contracts that require the issuer (i.e. the guarantor) to make specified payments to reimburse the beneficiary of the guarantee (the holder) for a loss the holder incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Where the Group issues a financial guarantee, subsequent to initial recognition, the guarantee is measured at the higher of the amount initially recognised less accumulated amortisation and the amount of a provision determined in accordance with the principles of contingencies (see Note 3(16)).

Except for the other financial liabilities described above, subsequent to initial recognition, other financial liabilities are measured at amortised cost using the effective interest method.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(11) Financial Instruments (Continued)

(b) Disclosure of financial assets and financial liabilities

In the balance sheet, financial assets and liabilities are not offset unless all the following conditions are met:

~~the~~ Group has a legally enforceable right to set off financial assets against financial liabilities; and

~~the~~ Group intends to settle the financial assets and liabilities on a net basis, or to realise the assets and settle the liabilities simultaneously.

(c) Determination of fair value

If there is an active market for a financial asset or financial liability, the quoted price in the active market is used to establish the fair value of the financial asset or financial liability.

If no active market exists for a financial instrument, a valuation technique is used to establish the fair value. Valuation techniques include using arm's length market transactions between knowledgeable, and willing parties; reference to the current fair value of other instrument that is substantially the same; discounted cash flows and option pricing model. The Group calibrates the valuation technique and tests it for validity periodically.

(d) Hedge accounting

Hedge accounting is a method which recognises the offsetting effects on profit or loss of changes in the fair values of the hedging instrument and the hedged item in the same accounting period(s).

Hedged items are the items that expose the Group to risks of changes in fair value or future cash flows and that are designated as being hedged. The Group's hedged items include fixed-rate borrowings that expose the Group to risk of changes in fair values, floating rate borrowings that expose the Group to risk of variability in cash flows, and a forecast transaction that is settled with a fixed amount of foreign currency and expose the Group to foreign currency risk, and a forecast transaction that is settled with an undetermined future market price and exposes the Group to risk of variability in cash flows, etc.

A hedging instrument is a designated derivative whose changes in fair value or cash flows are expected to offset changes in the fair value or cash flows of the hedged item.

The hedge is assessed by the Group for effectiveness on an ongoing basis and determined to have been highly effective throughout the accounting periods for which the hedging relationship was designated. The Group uses a ratio analysis to assess the subsequent effectiveness of a cash flow hedge, and uses a regression analysis to assess the subsequent effectiveness of a fair value hedge.

Cash flow hedges

A cash flow hedge is a hedge of the exposure to variability in cash flows. The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in shareholders' equity as a separate component. That effective portion is adjusted to the lesser of the following (in absolute amounts):

~~the~~ cumulative gain or loss on the hedging instrument from inception of the hedge;

~~the~~ cumulative change in present value of the expected future cash flows on the hedged item from inception of the hedge.

The portion of the gain or loss on the hedging instrument that is determined to be an ineffective hedge is recognised in profit or loss.

If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset, the associated gain or loss is removed from shareholders' equity, included in the initial cost of the non-financial asset, and recognised in profit or loss in the same year during which the non-financial asset affects profit or loss. However, if the Group expects that all or a portion of a net loss recognised directly in shareholders' equity will not be recovered in future accounting periods, it reclassifies the amount that is not expected to be recovered into profit or loss.

If a hedge of a forecast transaction subsequently results in the recognition of a financial asset or a financial liability, the associated gain or loss is removed from equity and recognised in profit or loss in the same period during which the financial asset or financial liability affects profit or loss. However, if the Group expects that all or a portion of a net loss recognised directly in shareholders' equity will not be recovered in future accounting periods, it reclassifies the amount that is not expected to be recovered into profit or loss.

For cash flow hedges, other than those covered by the preceding two policy statements, the associated gain or loss is removed from shareholders' equity and recognised in profit or loss in the same period or periods during which the hedged forecast transaction affects profit or loss.

When a hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting, the Group will discontinue the hedge accounting treatments prospectively. In this case, the gain or loss on the hedging instrument that remains recognised directly in shareholders' equity from the period when the hedge was effective shall not be reclassified into profit or loss and is recognised in accordance with the above policy when the forecast transaction occurs. If the forecast transaction is no longer expected to occur, the gain or loss on the hedging instrument that remains recognised directly in shareholders' equity from the period when the hedge was effective shall be reclassified into profit or loss immediately.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(11) Financial Instruments (Continued)

(d) Hedge accounting (Continued)

~~Fair value hedges~~

A fair value hedge is a hedge of the exposure to changes in fair value of a recognised asset or liability or an unrecognised firm commitment, or an identified portion of such an asset, liability or unrecognised firm commitment.

The gain or loss from remeasuring the hedging instrument at fair value is recognised in profit or loss. The gain or loss on the hedged item attributable to the hedged risk adjusts the carrying amount of the hedged item and is recognised in profit or loss.

When a hedging instrument expires or is sold, terminated or exercised, or no longer meets the criteria for hedge accounting, the Group discontinues prospectively the hedge accounting treatments. If the hedged item is a financial instrument measured at amortised cost, any adjustment to the carrying amount of the hedged item is amortised to profit or loss from the adjustment date to the maturity date using the recalculated effective interest rate at the adjustment date.

~~Hedge of net investment in foreign operation~~

A hedge of a net investment in a foreign operation is a hedge of the exposure to foreign exchange risk associated with a net investment in a foreign operation. The portion of the gain or loss on a hedging instrument that is determined to be an effective hedge is recognised directly in equity as a separate component until the disposal of the foreign operation, at which time the cumulative gain or loss recognised directly in equity is recognised in profit or loss. The ineffective portion is recognised immediately in profit or loss.

(e) Convertible bonds

~~Convertible bonds that contain an equity component~~

Convertible bonds that can be converted to equity share capital at the option of the holder, where the number of shares that would be issued on conversion and the value of the consideration that would be received at that time do not vary, are accounted for as compound financial instruments which contain both a liability component and an equity component.

At initial recognition, the liability component of the convertible bonds is measured as the present value of the future interest and principal payments, discounted at the market rate of interest applicable at the time of initial recognition to similar liabilities that do not have a conversion option. Any excess of proceeds over the amount initially recognised as the liability component is recognised as the equity component. Transaction costs that relate to the issue of the convertible bonds are allocated to the liability and equity components in proportion to the allocation of proceeds.

Subsequent to initial recognition, the liability component of a convertible corporate bond is measured at amortised cost using the effective interest method, unless it is designated at fair value through profit or loss. The equity component of a convertible corporate bond is not remeasured subsequent to initial recognition.

If the convertible corporate bond is converted, the liability component, together with the equity component, is transferred to share capital and capital reserve (share premium). If the convertible corporate bond is redeemed, the

consideration paid for the redemption, together with the transaction costs that relate to the redemption, are allocated to the liability and equity components. The difference between the allocated and carrying amounts is charged to profit or loss if it relates to the liability component or is directly recognised in equity if it relates to the equity component.

Other convertible bonds

Convertible bonds issued with a cash settlement option and other embedded derivative features are split into liability and derivative components.

At initial recognition, the derivative component of the convertible bonds is measured at fair value. Any excess of proceeds over the amount initially recognised as the derivative component is recognised as the liability component. Transaction costs that relate to the issue of the convertible bonds are allocated to the liability and derivative components in proportion to the allocation of proceeds. The portion of the transaction costs relating to the liability component is recognised initially as part of the liability. The portion relating to the derivative component is recognised immediately as an expense in profit or loss.

The derivative component is subsequently remeasured at each balance sheet date and any gains or losses arising from change in the fair value are recognised in profit or loss. The liability component is subsequently carried at amortised cost using the effective interest method until extinguished on conversion or redemption. Both the liability and the related derivative components are presented together for financial statements reporting purposes.

If the convertible bonds are converted, the carrying amounts of the derivative and liability components are transferred to share capital and share premium as consideration for the shares issued. If the convertible bonds are redeemed, any difference between the amount paid and the carrying amount of both components is recognised in profit or loss.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(11) Financial Instruments (Continued)

(f) Derecognition of financial assets and financial liabilities

The Group derecognises a financial asset when the contractual right to receive cash flows from the financial asset expires, or where the Group transfers substantially all risks and rewards of ownership of the financial asset, or where the Group neither transfers nor retains substantially all risks and rewards of ownership of the financial asset but the Group gives up the control of a financial asset.

On derecognition of a financial asset, the difference between the following amounts is recognised in profit or loss:

— the carrying amounts; and

~~the~~ sum of the consideration received and any cumulative gain or loss that had been recognised directly in equity.

Where the obligations for financial liabilities are completely or partially discharged, the entire or parts of financial liabilities are derecognised.

(12) Impairment of financial assets and non-financial long-term assets

(a) Impairment of financial assets

The carrying amount of financial assets (except those financial assets stated at fair value with changes in the fair values charged to profit or loss) are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. If any such evidence exists, impairment loss is provided.

Objective evidences of impairment include but not limited to:

- (i) significant financial difficulty of the debtor;
- (ii) a breach of contract, such as a default or delinquency in interest or principal payments;
- (iii) it becoming probable that the debtor will enter bankruptcy or other financial reorganisation;
- (iv) due to the significant financial difficulty of the debtor, financial assets is unable to be traded in active market;
- (v) significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; and the cost of investment may not be recoverable; and
- (vi) a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

Receivables and held-to-maturity investments

Receivables are assessed for impairment on the combination of an individual basis and the aging analysis.

Held-to-maturity investments are assessed for impairment on an individual basis.

Where impairment is assessed on an individual basis, an impairment loss in respect of a receivable or held-to-maturity investment is calculated as the excess of its carrying amount over the present value of the estimated future cash flows

(exclusive of future credit losses that have not been incurred) discounted at the original effective interest rate. All impairment losses are recognised in profit or loss.

Impairment loss on receivables and held-to-maturity investments is reversed in profit or loss if evidence suggests that the financial assets' carrying amounts have increased and the reason for the increase is objectively as a result of an event occurred after the recognition of the impairment loss. The reversed carrying amount shall not exceed the amortised cost if the financial assets had no impairment recognised.

Available-for-sale financial assets

Available-for-sale financial assets are assessed for impairment on an individual basis. Objective evidence of impairment for equity instruments classified as available-for-sale includes information about significant but not temporary decline in the fair value of the equity investment instrument below its cost. The Group assesses equity instruments classified as available-for-sale separately at the end of each reporting period, it will be considered as impaired if the fair value of the equity instrument at reporting date is less than its initial investment cost over 50% (including 50%) or the duration of the fair value below its initial investment cost is more than one (including one) year, if the fair value of the equity instrument at reporting date is less than its initial investment cost over 20% (including 20%) but below 50%, other related factors such as price volatility will be taken into consideration to assess if it is impaired.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(12) Impairment of financial assets and non-financial long-term assets (Continued)

(a) Impairment of financial assets (Continued)

When available-for-sale financial assets measured at fair value are impaired, despite not being derecognised, the cumulative losses resulted from the decrease in fair value which had previously been recognised directly in shareholders' equity, are reversed and charged to profit or loss.

When available-for-sale financial assets measured at cost are impaired, the differences between the book value and the discounted present value with the market return of similar financial assets are charged to profit or loss.

Impairment loss of available-for-sale debt instrument is reversed, if the reason for the subsequent increase in fair value is objectively as a result of an event occurred after the recognition of the impairment loss. Impairment loss for available-for-sale equity instrument is not reversed through profit or loss. Impairment loss for available-for-sale financial assets measured by the cost cannot be reversed in the following period.

(b) Impairment of other non-financial long-term assets

Internal and external sources of information are reviewed at each balance sheet date for indications that the following assets, including fixed assets, oil and gas properties, construction in progress, goodwill, intangible assets and investments in subsidiaries, associates and joint ventures may be impaired.

Assets are tested for impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. The recoverable amounts of goodwill and intangible assets with uncertain useful lives are estimated annually no matter there are any indications of impairment. Goodwill is tested for impairment together with related asset units or groups of asset units.

An asset unit is the smallest identifiable group of assets that generates cash inflows largely independent of the cash inflows from other assets or groups of assets. An asset unit comprises related assets that generate associated cash inflows. In identifying an asset unit, the Group primarily considers whether the asset unit is able to generate cash inflows independently as well as the management style of production and operational activities, and the decision for the use or disposal of asset.

The recoverable amount is the greater of the fair value less costs to sell and the present value of expected future cash flows generated by the asset (or asset unit, set of asset units).

Fair value less costs to sell of an asset is based on its selling price in an arm's length transaction less any direct costs attributable to the disposal. Present value of expected future cash flows is the estimation of future cash flows to be generated from the use of and upon disposal of the asset, discounted at an appropriate pre-tax discount rate over the asset's remaining useful life.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount is reduced to the recoverable amount. The amount by which the carrying amount is reduced is recognised as an impairment loss in profit or loss. A provision for impairment loss of the asset is recognised accordingly. Impairment losses related to an asset unit or a set of asset units first reduce the carrying amount of any goodwill allocated to the asset unit or set of asset units, and then reduce the carrying amount of the other assets in the asset unit or set of asset units on a pro rata basis. However, the carrying amount of an impaired asset will not be reduced below the highest of its individual fair value less costs to sell (if determinable), the present value of expected future cash flows (if determinable) and zero.

Impairment losses for assets are not reversed.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(13) Long-term deferred expenses

Long-term deferred expenses are amortised on a straight-line basis over their beneficial periods.

(14) Employee benefits

Employee benefits are all forms of considerations and compensation given in exchange for services rendered by employees, including short term compensation, post-employment benefits, termination benefits and other long term employee benefits.

(a) Short term compensation

Short term compensation includes salaries, bonuses, allowances and subsidies, employee benefits, medical insurance premiums, work-related injury insurance premium, maternity insurance premium, contributions to housing fund, unions and education fund and short-term absence with payment etc. When an employee has rendered service to the Group during an accounting period, the Group shall recognise the short term compensation actually incurred as a liability and charged to the cost of an asset or to profit or loss in the same period, and non-monetary benefits are valued with the fair value.

(b) Post-employment benefits

The Group classifies post-employment benefits into either Defined Contribution Plan (DC plan) or Defined Benefit Plan (DB plan). DC plan means the Group only contributes a fixed amount to an independent fund and no longer bears other payment obligation; DB plan is post-employment benefits other than DC plan. In this reporting period, the post-employment benefits of the Group primarily comprise basic pension insurance and unemployment insurance and both of them are DC plans.

Basic pension insurance

Employees of the Group participate in the social insurance system established and managed by local labor and social security department. The Group makes basic pension insurance to the local social insurance agencies every month, at the applicable benchmarks and rates stipulated by the government for the benefits of its employees. After the employees retire, the local labor and social security department has obligations to pay them the basic pension. When an employee has rendered service to the Group during an accounting period, the Group shall recognise the accrued amount according to the above social security provisions as a liability and charged to the cost of an asset or to profit or loss in the same period.

(c) Termination benefits

When the Group terminates the employment relationship with employees before the employment contracts expire, or provides compensation as an offer to encourage employees to accept voluntary redundancy, a provision for the termination benefits provided is recognised in profit or loss under the conditions of both the Group has a formal plan for the termination of employment or has made an offer to employees for voluntary redundancy, which will be implemented shortly; and the Group is not allowed to withdraw from termination plan or redundancy offer unilaterally.

(15) Income tax

Current tax and deferred tax are recognised in profit or loss except to the extent that they relate to business combinations and items recognised directly in equity (including other comprehensive income).

Current tax is the expected tax payable calculated at the applicable tax rate on taxable income for the year, plus any adjustment to tax payable in respect of previous years.

At the balance sheet date, current tax assets and liabilities are offset if the Group has a legally enforceable right to set them off and also intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Deferred tax assets and liabilities are recognised based on deductible temporary differences and taxable temporary differences respectively. Temporary difference is the difference between the carrying amounts of assets and liabilities and their tax bases. Unused tax losses and unused tax credits able to be utilised in subsequent years are treated as temporary differences. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available to offset the deductible temporary differences.

Temporary differences arise in a transaction, which is not a business combination, and at the time of transaction, does not affect accounting profit or taxable profit (or unused tax losses), will not result in deferred tax. Temporary differences arising from the initial recognition of goodwill will not result in deferred tax.

At the balance sheet date, the amounts of deferred tax recognised is measured based on the expected manner of recovery or settlement of the carrying amount of the assets and liabilities, using tax rates that are expected to be applied in the period when the asset is recovered or the liability is settled in accordance with tax laws.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(15) Income tax (Continued)

The carrying amount of deferred tax assets is reviewed at each balance sheet date. If it is unlikely to obtain sufficient taxable income to offset against the benefit of deferred tax asset, the carrying amount of the deferred tax assets is written down. Any such write-down should be subsequently reversed where it becomes probable that sufficient taxable income will be available.

At the balance sheet date, deferred tax assets and liabilities are offset if all the following conditions are met:

~~the~~ taxable entity has a legally enforceable right to offset current tax assets and current tax liabilities; and

~~they~~ relate to income taxes levied by the same tax authority on either:

~~the~~ same taxable entity; or

- different taxable entities which either to intend to settle the current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

(16) Provisions

Provisions are recognised when the Group has a present obligation as a result of a contingent event, it is probable that an outflow of economic benefits will be required to settle the obligations and a reliable estimate can be made. Where the effect of time value of money is material, provisions are determined by discounting the expected future cash flows.

Provisions for future dismantlement costs are initially recognised based on the present value of the future costs expected to be incurred in respect of the Group's expected dismantlement and abandonment costs at the end of related oil and gas exploration and development activities. Any subsequent change in the present value of the estimated costs, other than the change due to passage of time which is regarded as interest costs, is reflected as an adjustment to the provision of oil and gas properties.

(17) Revenue recognition

Revenue is the gross inflow of economic benefits arising in the course of the Group's normal activities when the inflows result in increase in shareholder's equity, other than increase relating to contributions from shareholders. Revenue is recognised in profit or loss when it is probable that the economic benefits will flow to the Group, the revenue and costs can be measured reliably and the following respective conditions are met.

(a) Revenues from sales of goods

Revenue from the sales of goods is recognised when all of the general conditions stated above and following conditions are satisfied:

~~the~~ significant risks and rewards of ownership and title have been transferred to buyers; and

~~the~~ Group does not retain the management rights, which is normally associated with owner, on goods sold and has no control over the goods sold.

Revenue from the sales of goods is measured at fair value of the considerations received or receivable under the sales contract or agreement.

(b) Revenues from rendering services

The Group determines the revenue from the rendering of services according to the fair value of the received or to-be received price of the party that receives the services as stipulated in the contract or agreement.

At the balance sheet date, when the outcome of a transaction involving the rendering of services can be estimated reliably, revenue from rendering of services is recognised in the income statement by reference to the stage of completion of the transaction based on the proportion of services performed to date to the total services to be performed.

When the outcome of rendering the services cannot be estimated reliably, revenues are recognised only to the extent that the costs incurred are expected to be recoverable. If the costs of rendering of services are not expected to be recoverable, the costs are recognised in profit or loss when incurred, and revenues are not recognised.

(c) Interest income

Interest income is recognised on a time proportion basis with reference to the principal outstanding and the applicable effective interest rate.

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(18) Government grants

Government grants are the gratuitous monetary assets or non-monetary assets that the Group receives from the government, excluding capital injection by the government as an investor. Special funds such as investment grants allocated by the government, if clearly defined in official documents as part of “capital reserve” are dealt with as capital contributions, and not regarded as government grants.

Government grants are recognised when there is reasonable assurance that the grants will be received and the Group is able to comply with the conditions attaching to them. Government grants in the form of monetary assets are recorded based on the amount received or receivable, whereas non-monetary assets are measured at fair value.

Government grants received in relation to assets are recorded as deferred income, and recognised evenly in profit or loss over the assets’ useful lives. Government grants received in relation to revenue are recorded as deferred income, and recognised as income in future periods as compensation when the associated future expenses or losses arise; or directly recognised as income in the current period as compensation for past expenses or losses.

(19) Borrowing costs

Borrowing costs incurred on borrowings for the acquisition, construction or production of qualified assets are capitalised into the cost of the related assets.

Except for the above, other borrowing costs are recognised as financial expenses in the income statement when incurred.

(20) Repairs and maintenance expenses

Repairs and maintenance (including overhauling expenses) expenses are recognised in profit or loss when incurred.

(21) Environmental expenditures

Environmental expenditures that relate to current ongoing operations or to conditions caused by past operations is expensed as incurred. Liabilities related to future remediation costs are recorded when environmental assessments and/or cleanups are probable and the costs can be reliably estimated. As facts concerning environmental contingencies become known to the Group, the Group reassesses its position both with respect to accrued liabilities and other potential exposures.

(22) Research and development costs

Research costs and development costs that cannot meet the capitalisation criteria are recognised in profit or loss when incurred.

(23) Operating leases

Operating lease payments are charged as expenses on a straight-line basis over the period of the respective leases.

(24) Dividends

Dividends and distributions of profits proposed in the profit appropriation plan which will be authorised and declared after the balance sheet date, are not recognised as a liability at the balance sheet date and are separately disclosed in the notes to the financial statements. Dividends are recognised as a liability in the period in which they are declared.

(25) Related parties

If a party has the power to control, jointly control or exercise significant influence over another party, or vice versa, or where two or more parties are subject to common control, joint control from another party, they are considered to be related parties. Related parties may be individuals or enterprises. Where enterprises are subject to state control but are

otherwise unrelated, they are not related parties. Related parties of the Group and the Company include, but not limited to:

- (a) the holding company of the Company;
- (b) the subsidiaries of the Company;
- (c) the parties that are subject to common control with the Company;
- (d) investors that have joint control or exercise significant influence over the Group;
- (e) enterprises or individuals if a party has control, joint control over both the enterprises or individuals and the Group;
- (f) joint ventures of the Group, including subsidiaries of the joint ventures;
- (g) associates of the Group, including subsidiaries of the associates;
- (h) principle individual investors of the Group and close family members of such individuals;

3 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(25) Related parties (Continued)

(i) key management personnel of the Group, and close family members of such individuals;

(j) key management personnel of the Company's holding company;

(k) close family members of key management personnel of the Company's holding company; and

(l) an entity which is under control, joint control of principle individual investor, key management personnel or close family members of such individuals.

(26) Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organisation, management requirements and internal reporting system. An operating segment is a component of the Group that meets the following respective conditions:

engage in business activities from which it may earn revenues and incur expenses;

whose operating results are regularly reviewed by the Group's management to make decisions about resource to be allocated to the segment and assess its performance; and

for which financial information regarding financial position, results of operations and cash flows are available.

Inter-segment revenues are measured on the basis of actual transaction price for such transactions for segment reporting, and segment accounting policies are consistent with those for the consolidated financial statements.

4 TAXATION

Major types of tax applicable to the Group are income tax, consumption tax, resources tax, value added tax, city construction tax, education surcharge and local education surcharge.

Consumption tax was levied based on sales quantities of taxable products, tax rate of products is presented as below:

Products	Effective from 13 December 2014 (RMB/Ton)	Effective from 13 January 2015 (RMB/Ton)
Gasoline	1,943.20	2,109.76
Diesel	1,293.60	1,411.20
Naphtha	1,939.00	2,105.20
Solvent oil	1,794.80	1,948.64
Lubricant oil	1,576.40	1,711.52
Fuel oil	1,116.50	1,218.00
Jet fuel oil	1,370.60	1,495.20

Value added tax rate for liquefied petroleum gas, natural gas and certain agricultural products is 13% and that for other products is 17%.

Pursuant to the Circular on the Overall Promotion of Pilot Program of Levying VAT in place of Business Tax' (Cai Shui [2016] 36) jointly issued by the Ministry of Finance and the State Administration of Taxation, revenue from modern service of the subsidiaries of the Group, are subject to VAT from 1 May 2016, and the applicable tax rate is 6%, while the business tax was from 3% to 5% before then.

10 INVENTORIES

The Group

	At 31 December 2016	At 31 December 2015
	RMB million	RMB million
Raw materials	75,680	59,376
Work in progress	14,141	22,762
Finished goods	65,772	66,320
Spare parts and consumables	1,838	1,552
	157,431	150,010
Less: Provision for diminution in value of inventories	920	4,402
Total	156,511	145,608

Provision for diminution in value of inventories is mainly against finished goods and raw materials. For the year ended 31 December 2016, the provision for diminution in value of inventories of the Group was primarily due to the costs of finished goods and raw materials of the refining segment and chemical segment were higher than their net realizable value.

11 AVAILABLE-FOR-SALE FINANCIAL ASSETS

At 31 December 2016
 At 31 December 2015
 RMB million RMB million

	At 31 December 2016 RMB million	At 31 December 2015 RMB million

	The Republic of Kazakhstan	British Virgin Islands	NA	Crude oil and natural gas extraction	10,000USD	50.00%

All the joint ventures and associates above are limited companies.

Note:

On 12 December 2016, the Group entered into the Capital Injection Agreement in relation to Sinopec Sichuan To East China Gas Pipeline Co., Ltd. ("Pipeline Ltd"), a wholly-owned subsidiary of the Group, with China Life Insurance Company Limited ("China Life") and SDIC Communications Holding Co., Ltd. ("SDIC Holding") (the "Capital Injection Agreement"). According to the provisions of the Capital Injection Agreement, China Life and SDIC Holding made cash contribution to the Pipeline Ltd amounting to RMB 20 billion and RMB 2.8 billion, respectively, in exchange for 43.86% and 6.14% equity interest, respectively, in the Pipeline Ltd. Thereafter, the Group's equity interest in the Pipeline Ltd was diluted from 100% to 50%. Based on the composition and decision making mechanism of the Board of Directors of the Pipeline Ltd, the Group determines that it has only retained the power to participate in the financial and operating policy decisions of the Pipeline Ltd, and was no longer (i) exclusively possessing the power to govern policy decisions of the Pipeline Ltd.

Consequently, the Group has deconsolidated the Pipeline Ltd and started accounting for its 50% equity interest in the Pipeline Ltd as an investment in associate company. In this connection, the Group recognized an amount of RMB 20.562 billion investment income, which was resulted from the loss of control and the re-measurement of the remaining 50% equity interest in the Pipeline Ltd (Note 45, 58).

Management is in the process of allocating the fair value to identifiable assets and liabilities of Pipeline Ltd. The accompanying summarized financial information of Pipeline Ltd (Note 12(c)) is based on management's preliminary fair value allocation which may be subjected to further change.

In August 2015, one of the subsidiaries of Sinopec Group Company completed the acquisition from LUKOIL OVERSEAS WEST PROJECT Ltd. a 50% equity interests in CIR and revised CIR's Articles of Association subsequently. According to the revised CIR's Articles of Association, the Group retained significant influences over CIR. As a result, the Group reclassified the investment interest in CIR from joint ventures to associates.

The additions to oil and gas properties of the Group and the Company for the year ended 31 December 2016 included RMB 3,420 million (2015: RMB 2,899 million) (Note 31) and RMB 2,939 million (2015: RMB 2,954 million), respectively of the estimated dismantlement costs for site restoration.

13 FIXED ASSETS (Continued)

Impairment losses on fixed assets for the year ended 31 December 2016 primarily represent impairment losses recognised in the exploration and production (“E&P”) segment of RMB 10,594 million (2015: RMB 4,213 million) on fixed assets, for the chemicals segment of RMB 2,840 million (2015: RMB 142 million) of fixed assets and for the refining segment of RMB 1,245 million (2015: RMB 8 million) of fixed assets. The primary factors resulting in the E&P segment impairment loss were downward revision of oil and gas reserve due to price change and high operating and development cost for certain oil fields. The carrying values of these E&P properties were written down to recoverable amounts which were determined based on the present values of the expected future cash flows of the assets using a pre-tax discount rate 10.47% (2015: 10.80%). Further future downward revisions to the Group’s oil price outlook by 10% or more would lead to further impairments which, in aggregate, are likely to be material. It is estimated that a general decrease of 10% in oil price, with all other variables held constant, would result in additional impairment loss in E&P segment by approximately RMB 3,010 million. It is estimated that a general increase of 5% in operating cost, with all other variables held constant, would result in additional impairment loss in E&P segment by approximately RMB 1,193 million. It is estimated that a general increase of 5% in discount rate, with all other variables held constant, would result in additional impairment loss in E&P segment by approximately RMB 439 million. The assets in the chemicals segment and refining segment were written down due to the suspension of operations of certain production facilities.

At 31 December 2016 and 2015, the Group and the Company had no individually significant fixed assets which were pledged.

At 31 December 2016 and 2015, the Group and the Company had no individually significant fixed assets which were temporarily idle or pending for disposal.

At 31 December 2016 and 2015, the Group and the Company had no individually significant fully depreciated fixed assets which were still in use.

Amortisation of the intangible assets of the Group charged for the year ended 31 December 2016 is RMB 4,299 million (2015: RMB 3,923 million).

16 GOODWILL

Goodwill is allocated to the following Group's cash-generating units:

Name of investees	Principal activities	At 31 December 2016	At 31 December 2015
		RMB million	RMB million
 	 		
 	 		
Sinopec Beijing Yanshan Petrochemical Branch ("Sinopec Yanshan")	Manufacturing of intermediate petrochemical products and petroleum products	1,157	1,157
Sinopec Zhenhai Refining and Chemical Branch ("Sinopec Zhenhai")	Manufacturing of intermediate petrochemical products and petroleum products	4,043	4,043
Sinopec (Hong Kong) Limited	Trading of petrochemical products	941	853

Other units without individual significant goodwill	212	218
Total	6,353	6,271

Goodwill represents the excess of the cost of purchase over the fair value of the underlying assets and liabilities. The recoverable amounts of the above cash generating units are determined based on value in use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a one-year period and pre-tax discount rates primarily ranging from 10.4% to 11.0% (2015: 10.7% to 11.3%). Cash flows beyond the one-year period are maintained constant.

Key assumptions used for cash flow forecasts for these entities are the gross margin and sales volume. Management determined the budgeted gross margin based on the gross margin achieved in the period immediately before the budget period and management's expectation on the future trend of the prices of crude oil and petrochemical products. The sales volume was based on the production capacity and/or the sales volume in the period immediately before the budget period.

17 LONG-TERM DEFERRED EXPENSES

Long-term deferred expenses primarily represent prepaid rental expenses over one year and catalysts expenditures.

18 DEFERRED TAX ASSETS AND LIABILITIES

Deferred tax assets and liabilities before the consolidated elimination adjustments are as follows:

	Deferred tax assets		Deferred tax liabilities		Net balance	
	At 31 December 2016 RMB million	At 31 December 2015 RMB million	At 31 December 2016 RMB million	At 31 December 2015 RMB million	At 31 December 2016 RMB million	At 31 December 2015 RMB million
Current						
Receivables and inventories	347	1,755	—	—	347	1,755
Accruals	391	413	—	—	391	413
Cash flow hedges	27	348	(242)	(98)	(215)	250
Non-current						
Fixed assets	11,264	8,209	(14,615)	(17,340)	(3,351)	(9,131)
Tax value of losses carried forward	2,477	5,883	—	—	2,477	5,883
Others	133	98	(229)	(58)	(96)	40
Deferred tax assets/(liabilities)	14,639	16,706	(15,086)	(17,496)	(447)	(790)

The consolidated elimination amount between deferred tax assets and liabilities are as follows:

	At 31 December 2016 RMB million	At 31 December 2015 RMB million
Deferred tax assets	7,425	9,237
Deferred tax liabilities	7,425	9,237

Deferred tax assets and liabilities after the consolidated elimination adjustments are as follows:

	At 31 December 2016 RMB million	At 31 December 2015 RMB million
Deferred tax assets	7,214	7,469
Deferred tax liabilities	7,661	8,259

At 31 December 2016, certain subsidiaries of the Company did not recognise deferred tax of deductible loss carried forward of RMB 19,194 million (2015: RMB 19,338 million), of which RMB 3,833 million (2015: RMB 4,080 million) was incurred for the year ended 31 December 2016, because it was not probable that the related tax benefit will be realised. These deductible losses carried forward of RMB 3,777 million, RMB 2,634 million, RMB 4,870 million, RMB 4,080 million and RMB 3,833 million will expire in 2017, 2018, 2019, 2020, 2021 and after, respectively.

Periodically, management performed assessment on the probability that future taxable profit will be available over the period which the deferred tax assets can be realised or utilised. In assessing the probability, both positive and negative evidence was considered, including whether it is probable that the operations will have sufficient future taxable profits over the periods which the deferred tax assets are deductible or utilised and whether the tax losses result from identifiable causes which are unlikely to recur. During the year ended 31 December 2016, write-down of deferred tax assets amounted to RMB 811 million (2015: RMB 75 million) (Note 48).

19 OTHER NON-CURRENT ASSETS

Other non-current assets mainly represent prepayments for construction projects and purchases of equipment.

20 DETAILS OF IMPAIRMENT LOSSES

At 31 December 2016, impairment losses of the Group are analysed as follows:

	Note	Balance at 1 January 2016	Provision for the year	Written back for the year	Written off for the year	Other increase/ (decrease)	Balance at 31 December 2016
		 RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Allowance for doubtful accounts							
Included: Accounts receivable	7	525	238	(8)	(72)	—	683
Other receivables	8	1,392	132	(144)	(33)	2	1,349
Prepayments	9	23	14	(1)	(5)	—	31
		1,940	384	(153)	(110)	2	2,063
Inventories	10	4,402	430	(10)	(4,021)	119	920
Long-term equity investments	12	677	1	—	(1)	45	722
Fixed assets	13	40,368	14,921	—	(584)	57	54,762
Construction in progress	14	220	1,486	—	(5)	(8)	1,693
Intangible assets	15	831	11	—	—	12	854
Goodwill	16	7,657	6	—	—	—	7,663
Others		43	—	—	—	—	43
Total		56,138	17,239	(163)	(4,721)	227	68,720

The reasons for recognising impairment losses are set out in the respective notes of respective assets.

21 SHORT-TERM LOANS

The Group's short-term loans represent:

	At 31 December 2016			At 31 December 2015		
	Original currency	Exchange million rates	RMB million	Original currency	Exchange million rates	RMB million
Short-term bank loans			11,944			31,036
– Renminbi loans			10,931			11,357
– US Dollar loans	146	6.9370	1,013	1,821	6.4936	11,824
– Euro loans	—	7.3068	—	1,107	7.0952	7,855
Short-term loans from Sinopec Group Company and fellow subsidiaries			18,430			43,693
– Renminbi loans			2,858			10,806
– US Dollar loans	1,957	6.9370	13,577	5,063	6.4936	32,878
– HK Dollar loans	2,202	0.8945	1,969	6	0.8373	5
– Euro loans	1	7.3068	5	1	7.0952	4
– Singapore Dollar loans	4	4.7995	21	—	4.5875	—
Total			30,374			74,729

At 31 December 2016, the Group's interest rates on short-term loans were from interest 0.68% to 6.19% (2015: from interest 0.23% to 6.16%). The majority of the above loans are by credit.

At 31 December 2016 and 2015, the Group had no significant overdue short-term loan.

22BILLS PAYABLE

Bills payable primarily represented bank accepted bills for the purchase of material, goods and products. Bills payable were due within one year.

At 31 December 2016 and 2015, the Group had no overdue unpaid bills.

23ACCOUNTS PAYABLE

At 31 December 2016 and 2015, the Group had no individually significant accounts payable aged over one year.

24ADVANCES FROM CUSTOMERS

At 31 December 2016 and 2015, the Group had no individually significant advances from customers aged over one year.

25EMPLOYEE BENEFITS PAYABLE

At 31 December 2016 and 2015, the Group's employee benefits payable primarily represented wages payable and social insurance payables.

26 TAXES PAYABLE

The Group

	At 31 December 2016	At 31 December 2015
	RMB million	RMB million
Value-added tax payable	8,668	4,433
Consumption tax	29,682	20,491
Income tax	6,051	1,048
Mineral resources compensation fee	196	213
Other taxes	8,289	6,307
Total	52,886	32,492

27 OTHER PAYABLES

At 31 December 2016 and 2015, the Group's other payables primarily represented payables for constructions.

At 31 December 2016 and 2015, the Group had no individually significant other payables aged over three years.

28 NON-CURRENT LIABILITIES DUE WITHIN ONE YEAR

The Group's non-current liabilities due within one year represent:

	At 31 December 2016			At 31 December 2015		
	Original currency	Exchange million rates	RMB million	Original currency	Exchange million rates	RMB million
Long-term bank loans						
– Renminbi loans			8,753			5,559
– US Dollar loans	6	6.9370	42	8	6.4936	54

Long-term loans from Sinopec Group Company and fellow subsidiaries			44,772			44,300
Total			62,461			56,493

The maturity analysis of the Group's long-term loans is as follows:

	At 31 December 2016 RMB million	At 31 December 2015 RMB million
Between one and two years	3,957	8,988
Between two and five years	56,725	10,467
After five years	1,779	37,038
Total	62,461	56,493

Long-term loans are primarily unsecured, and carried at amortised costs.

30 DEBENTURES PAYABLE

The Group

	At 31 December 2016	At 31 December 2015
	RMB million	RMB million
Short-term corporate bonds (i)	6,000	30,000
Debtures payable:		
Corporate Bonds (ii)	84,485	88,121
Less: Current portion	(29,500)	(4,868)
Total	54,985	83,253

Note:

The company issued 180-day corporate bonds of face value RMB 10 billion to corporate investors in the PRC debenture market on 23 September 2015 at par value of RMB 100. The effective cost of the 180-day corporate bonds is 2.99% per annum. The short-term bonds were due on 23 March 2016 and have been fully paid by the Group at maturity.

The company issued 182-day corporate bonds of face value RMB 16 billion to corporate investors in the PRC debenture market on 14 December 2015 at par value of RMB 100. The effective cost of the 182-day corporate bonds is 2.90% per annum. The short-term bonds were due on 14 June 2016 and have been fully paid by the Group at maturity.

The company issued 180-day corporate bonds of face value RMB 4 billion to corporate investors in the PRC debenture market on 31 December 2015 at par value of RMB 100. The effective cost of the 180-day corporate bonds is 2.75% per annum. The short-term bonds were due on 30 June 2016 and have been fully paid by the Group at maturity.

The company issued 182-day corporate bonds of face value RMB 6 billion to corporate investors in the PRC debenture market on 12 September 2016 at par value of RMB 100. The effective cost of the 182-day corporate bonds is 2.54% per annum.

These corporate bonds are carried at amortised cost, including USD denominated corporate bonds of RMB 18,985 million, and RMB denominated corporate bonds of RMB 65,500 million (2015: USD denominated corporate bonds of RMB 22,621 million, and RMB denominated corporate bonds of RMB 65,500 million). At 31 December 2016, RMB 18,985 million (2015: RMB 22,621 million) are guaranteed by Sinopec Group Company.

31 PROVISIONS

Provisions primarily represent provision for future dismantlement costs of oil and gas properties. The Group has established certain standardised measures for the dismantlement of its retired oil and gas properties by making reference to the industry practices and is thereafter constructively obligated to take dismantlement measures of its retired oil and gas properties. Movement of provision of the Group's obligations for the dismantlement of its retired oil and gas properties is as follows:

	The Group
	RMB
	million

Balance at 1 January 2016	33,115
Provision for the year	3,420
Accretion expenses	1,057
Utilised for the year	(843)
Exchange adjustments	169
Balance at 31 December 2016	36,918

32 OTHER NON-CURRENT LIABILITIES

Other non-current liabilities primarily represent long-term payables, special payables and deferred income.

33 SHARE CAPITAL

The Group

	At 31 December 2016	At 31 December 2015
	RMB million	RMB million
Registered, issued and fully paid:		
95,557,771,046 domestic listed A shares (2015: 95,557,771,046) of RMB 1.00 each	95,558	95,558
25,513,438,600 overseas listed H shares (2015: 25,513,438,600) of RMB 1.00 each	25,513	25,513
Total	121,071	121,071

The Company was established on 25 February 2000 with a registered capital of 68.8 billion domestic state-owned shares with a par value of RMB 1.00 each. Such shares were issued to Sinopec Group Company in consideration for the assets and liabilities transferred to the Company (Note 1).

Pursuant to the resolutions passed at an Extraordinary General Meeting held on 25 July 2000 and approvals from relevant government authorities, the Company is authorised to increase its share capital to a maximum of 88.3 billion shares with a par value of RMB 1.00 each and offer not more than 19.5 billion shares with a par value of RMB 1.00 each to investors outside the PRC. Sinopec Group Company is authorised to offer not more than 3.5 billion shares of its shareholdings in the Company to investors outside the PRC. The shares sold by Sinopec Group Company to investors outside the PRC would be converted into H shares.

In October 2000, the Company issued 15,102,439,000 H shares with a par value of RMB 1.00 each, representing 12,521,864,000 H shares and 25,805,750 American Depositary Shares (“ADSs”, each representing 100 H shares), at prices of HKD 1.59 per H share and USD 20.645 per ADS, respectively, by way of a global initial public offering to Hong Kong and overseas investors. As part of the global initial public offering, 1,678,049,000 state-owned ordinary shares of RMB 1.00 each owned by Sinopec Group Company were converted into H shares and sold to Hong Kong and overseas investors.

In July 2001, the Company issued 2.8 billion listed A shares with a par value of RMB 1.00 each at RMB 4.22 by way of a public offering to natural persons and institutional investors in the PRC.

During the year ended 31 December 2010, the Company issued 88,774 listed A shares with a par value of RMB 1.00 each, as a result of exercise of 188,292 warrants entitled to the Bonds with Warrants.

During the year ended 31 December 2011, the Company issued 34,662 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

During the year ended 31 December 2012, the Company issued 117,724,450 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

On 14 February 2013, the Company issued 2,845,234,000 listed H shares (“the Placing”) with a par value of RMB 1.00 each at the Placing Price of HKD 8.45 per share. The aggregate gross proceeds from the Placing amounted to approximately HKD 24,042,227,300.00 and the aggregate net proceeds (after deduction of the commissions and estimated expenses) amounted to approximately HKD 23,970,100,618.00.

In June 2013, the Company issued 21,011,962,225 listed A shares and 5,887,716,600 listed H shares as a result of bonus issues of 2 shares converted from the retained earnings, and 1 share transferred from capital reserves for every 10 existing shares.

During the year ended 31 December 2013, the Company issued 114,076 listed A shares with a par value of RMB 1.00 each, as a result of exercise of conversion by the holders of the 2011 Convertible Bonds.

During the year ended 31 December 2014, the Company issued 1,715,081,853 listed A shares with a par value of RMB 1.00 each, as a result of exercise of conversion by the holders of the 2011 Convertible Bonds.

During the year ended 31 December 2015, the Company issued 2,790,814,006 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

All A shares and H shares rank pari passu in all material aspects.

Capital management

Management optimises the structure of the Group's capital, which comprises of equity and debts and bonds. In order to maintain or adjust the capital structure of the Group, management may cause the Group to issue new shares, adjust the capital expenditure plan, sell assets to reduce debt, or adjust the proportion of short-term and long-term loans and bonds. Management monitors capital on the basis of the debt-to-capital ratio, which is calculated by dividing long-term loans (excluding current portion) and debentures payable, by the total of equity attributable to owners of the Company and long-term loans (excluding current portion) and debentures payable, and liability-to-asset ratio, which is calculated by dividing total liabilities by total assets. Management's strategy is to make appropriate adjustments according to the Group's operating and investment needs and the changes of market conditions, and to maintain the debt-to-capital ratio and the liability-to-asset ratio of the Group at a range considered reasonable. As at 31 December 2016, the debt-to-capital ratio and the liability-to-asset ratio of the Group were 14.2% (2015: 17.1%) and 44.5% (2015: 45.4%), respectively.

The schedule of the contractual maturities of loans and commitments are disclosed in Notes 29 and 54, respectively.

There were no changes in the management's approach to capital management of the Group during the year. Neither the Company nor any of its subsidiaries is subject to externally imposed capital requirements.

34 CAPITAL RESERVE

The movements in capital reserve of the Group are as follows:

 	RMB million
Balance at 1 January 2016	121,576
Adjustment for the combination of entities under common control	(2,137)
Transaction with minority interests	(30)
Others	116
Balance at 31 December 2016	119,525

Capital reserve represents mainly: (a) the difference between the total amount of the par value of shares issued and the amount of the net assets transferred from Sinopec Group Company in connection with the Reorganisation; (b) share premiums derived from issuances of H shares and A shares by the Company and excess of cash paid by investors over their proportionate shares in share capital, the proportionate shares of unexercised portion of the Bond with Warrants at the expiration date, and the amount transferred from the proportionate liability component and the derivative component of the converted portion of the 2011 Convertible Bonds; (c) difference between consideration paid for the combination of entities under common control and the transactions with minority interests over the carrying amount of the net assets acquired.

36 SPECIFIC RESERVE

According to relevant PRC regulations, the Group is required to transfer an amount to specific reserve for the safety production fund based on the turnover of certain refining and chemicals products or based on the production volume of crude oil and natural gas. The movements of specific reserve are as follows:

	The Group
	RMB million
Balance at 1 January 2016	612
Provision for the year	3,345
Utilisation for the year	(3,192)
Balance at 31 December 2016	765

37 SURPLUS RESERVES

Movements in surplus reserves are as follows:

	The Group
--	-----------

 	Statutory surplus reserve	Discretionary surplus reserves	Total
 	RMB million	RMB million	RMB million
Balance at 1 January 2016	79,640	117,000	196,640
Appropriation	—	—	—
Balance at 31 December 2016	79,640	117,000	196,640

The PRC Company Law and Articles of Association of the company have set out the following profit appropriation plans:

- (a) 10% of the net profit is transferred to the statutory surplus reserve. In the event that the reserve balance reaches 50% of the registered capital, no transfer is needed;
- (b) After the transfer to the statutory surplus reserve, a transfer to discretionary surplus reserve can be made upon the passing of a resolution at the shareholders' meeting.

Pursuant to the Articles of Association of the Company and a resolution passed at the Directors' meeting on 24 March 2017, the directors proposed to transfer RMB 2,359 million to the statutory surplus reserve.

38 OPERATING INCOME AND OPERATING COSTS

	The Group		The Company	
	2016	2015	2016	2015
	RMB million	RMB million	RMB million	RMB million
Income from principal operations	1,880,190	1,977,877	696,211	819,593
Income from other operations	50,721	42,498	29,967	25,692
Total	1,930,911	2,020,375	726,178	845,285
Operating costs	1,492,165	1,594,070	513,514	609,596

The income from principal operations mainly represents revenue from sales of crude oil, natural gas, refined petroleum products and chemical products. The income from other operations mainly represents revenue from sale of materials, service, rental income and others. Operating costs primarily represent the products cost related to the principal operations. The Group's segmental information is set out in Note 56.

39 TAXES AND SURCHARGES

The Group

	2016	2015
	RMB million	RMB million
Consumption tax	193,836	198,754
City construction tax	18,155	18,195
Education surcharge	13,695	13,686

 - (x) Interest expense represents interest charges on the loans and advances obtained from Sinopec Group Company and fellow subsidiaries.
 - (xi) The Group obtained or repaid loans from or to Sinopec Group Company and fellow subsidiaries.

51 RELATED PARTIES AND RELATED PARTY TRANSACTIONS (CONTINUED)

- (3) The principal related party transactions with Sinopec Group Company and fellow subsidiaries, associates and joint ventures, which were carried out in the ordinary course of business, are as follows: (Continued)

In connection with the Reorganisation, the Company and Sinopec Group Company entered into a number of agreements under which 1) Sinopec Group Company will provide goods and products and a range of ancillary, social and supporting services to the Group and 2) the Group will sell certain goods to Sinopec Group Company. These agreements impacted the operating results of the Group for the year ended 31 December 2016. The terms of these agreements are summarised as follows:

- The Company has entered into a non-exclusive “Agreement for Mutual Provision of Products and Ancillary Services” (“Mutual Provision Agreement”) with Sinopec Group Company effective from 1 January 2000 in which Sinopec Group Company has agreed to provide the Group with certain ancillary production services, construction services, information advisory services, supply services and other services and products. While each of Sinopec Group Company and the Company is permitted to terminate the Mutual Provision Agreement upon at least six months’ notice, Sinopec Group Company has agreed not to terminate the agreement if the Group is unable to obtain comparable services from a third party. The pricing policy for these services and products provided by Sinopec Group Company to the Group is as follows:

• the government-prescribed price;

• where there is no government-prescribed price, the government-guidance price;

• where there is neither a government-prescribed price nor a government-guidance price, the market price; or

• where none of the above is applicable, the price to be agreed between the parties, which shall be based on a reasonable cost incurred in providing such services plus a profit margin not exceeding 6%.

- The Company has entered into a non-exclusive “Agreement for Provision of Cultural and Educational, Health Care and Community Services” with Sinopec Group Company effective from 1 January 2000 in which Sinopec Group Company has agreed to provide the Group with certain cultural, educational, health care and community services on the same pricing terms and termination conditions as agreed to in the above Mutual Provision Agreement.

- The Company has entered into a number of lease agreements with Sinopec Group Company to lease certain lands and buildings effective on 1 January 2000. The lease term is 40 or 50 years for lands and 20 years for buildings, (c) respectively. The Company and Sinopec Group Company can renegotiate the rental amount every three years for land. The Company and Sinopec Group Company can renegotiate the rental amount for buildings every year. However such amount cannot exceed the market price as determined by an independent third party.

- The Company has entered into agreements with Sinopec Group Company effective from 1 January 2000 under (d) which the Group has been granted the right to use certain trademarks, patents, technology and computer software developed by Sinopec Group Company.

- The Company has entered into a service station franchise agreement with Sinopec Group Company effective from (e) 1 January 2000 under which its service stations and retail stores would exclusively sell the refined products supplied by the Group.

51 RELATED PARTIES AND RELATED PARTY TRANSACTIONS (CONTINUED)

(4) Balances with Sinopec Group Company and fellow subsidiaries, associates and joint ventures

The balances with the Group's related parties at 31 December 2016 and 2015 are as follows:

	The ultimate holding company		Other related companies	
	At 31 December 2016	At 31 December 2015	At 31 December 2016	At 31 December 2015
	RMB million	RMB million	RMB million	RMB million
Cash and cash equivalents	—	—	40,073	18,303
Accounts receivable	25	1	10,953	22,392
Prepayments and other current assets	33	34	13,397	9,050
Other non-current assets	—	—	20,385	17,760
Accounts payable	3	5	19,416	13,190
Advances from customers	13	20	1,969	1,792
Other payables	178	29	19,430	18,616
Other non-current liabilities	—	—	9,998	8,226
Short-term loans	—	—	18,430	43,693
Long-term loans (including current portion) (Note)	—	—	44,922	44,536

Note: The long-term borrowings mainly include an interest-free loan with a maturity period of 20 years amounting to RMB 35,560 million from the Sinopec Group Company through the Sinopec Finance. This borrowing is a special arrangement to reduce financing costs and improve liquidity of the Company during its initial global offering in 2000.

Amounts due from/to Sinopec Group Company and fellow subsidiaries, associates and joint ventures, other than short-term loans and long-term loans, bear no interest, are unsecured and are repayable in accordance with normal commercial terms. The terms and conditions associated with short-term loans and long-term loans payable to Sinopec Group Company and fellow subsidiaries are set out in Note 21 and Note 29.

As at and for the year ended 31 December 2016 and 2015, no individually significant impairment losses for bad and doubtful debts were recorded in respect of amounts due from Sinopec Group Company and fellow subsidiaries, associates and joint ventures.

(5) Key management personnel emoluments

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, including directors and supervisors of the Group. The key management personnel compensations are as follows:

	2016	2015
	RMB thousand	RMB thousand
Short-term employee benefits	5,648	5,225
Retirement scheme contributions	499	510
Total	6,147	5,735

52 PRINCIPAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The Group's financial condition and results of operations are sensitive to accounting methods, assumptions and estimates that underlie the preparation of the financial statements. The Group bases the assumptions and estimates on historical experience and on various other assumptions that it believes to be reasonable and which form the basis for making judgements about matters that are not readily apparent from other sources. On an on-going basis, management evaluates its estimates. Actual results may differ from those estimates as facts, circumstances and conditions change.

The selection of critical accounting policies, the judgements and other uncertainties affecting application of those policies and the sensitivity of reported results to changes in conditions and assumptions are factors to be considered when reviewing the financial statements. The significant accounting policies are set forth in Note 3. The Group believes the following critical accounting policies involve the most significant judgements and estimates used in the preparation of the financial statements.

(a) Oil and gas properties and reserves

The accounting for the exploration and production segment's oil and gas activities is subject to accounting rules that are unique to the oil and gas industry. The Group has used the successful efforts method to account for oil and gas business activities. The successful efforts method reflects the volatility that is inherent in exploring for mineral resources in that costs of unsuccessful exploratory efforts are charged to expense. These costs primarily include dry hole costs, seismic costs and other exploratory costs.

Engineering estimates of the Group's oil and gas reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated oil and gas reserves can be designated as "proved". Proved and proved developed reserves estimates are updated at least annually and take into account recent production and technical information about each field. In addition, as prices and cost levels change from year to year, the estimate of proved and proved developed reserves also changes. This change is considered a change in estimate for accounting purposes and is reflected on a prospective basis in related depreciation rates. Oil and gas reserves have a direct impact on the assessment of the recoverability of the carrying amounts of oil and gas properties reported in the financial statements. If proved reserves estimates are revised downwards, earnings could be affected by changes in depreciation expense or an immediate write-down of the property's carrying amount.

Future dismantlement costs for oil and gas properties are estimated with reference to engineering estimates after taking into consideration the anticipated method of dismantlement required in accordance with industry practices in the similar geographic area, including estimation of economic life of oil and gas properties, technology and price level. The present values of these estimated future dismantlement costs are capitalised as oil and gas properties with equivalent amounts recognised as provisions for dismantlement costs.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expense, impairment expense and future dismantlement costs. Capitalised costs of proved oil and gas properties are amortised on a unit-of-production method based on volumes produced and reserves.

(b) Impairment for assets

If circumstances indicate that the net book value of a long-lived asset may not be recoverable, the asset may be considered "impaired", and an impairment loss may be recognised in accordance with "ASBE 8 – Impairment of Assets". The carrying amounts of long-lived assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to recoverable amount. For goodwill, the recoverable amount is estimated annually. The recoverable amount is the greater of the fair value less costs to sell and the present value of

expected future cash flows. It is difficult to precisely estimate the fair value because quoted market prices for the Group's assets or cash-generating units are not readily available. In determining the value of expected future cash flows, expected cash flows generated by the asset or the cash-generating unit are discounted to their present value, which requires significant judgement relating to sales volume, selling price and amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of sales volume, selling price and amount of operating costs.

(c) Depreciation

Fixed assets are depreciated on a straight-line basis over the estimated useful lives of the assets, after taking into account the estimated residual value. Management reviews the estimated useful lives of the assets at least annually in order to determine the amount of depreciation expense to be recorded during any reporting year. The useful lives are based on the Group's historical experience with similar assets and taking into account anticipated technological changes. The depreciation expense for future years is adjusted if there are significant changes from previous estimates.

(d) Allowances for doubtful accounts

Management estimates impairment losses for bad and doubtful debts resulting from the inability of the Group's customers to make the required payments. Management bases the estimates on the ageing of the accounts receivable balance, customer credit-worthiness, and historical write-off experience. If the financial condition of the customers were to deteriorate, actual write-offs would be higher than estimated.

(e) Allowance for diminution in value of inventories

If the costs of inventories become higher than their net realisable values, an allowance for diminution in value of inventories is recognised. Net realisable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. Management bases the estimates on all available information, including the current market prices of the finished goods and raw materials, and historical operating costs. If the actual selling prices were to be lower or the costs of completion were to be higher than estimated, the actual allowance for diminution in value of inventories would be higher than estimated.

53 PRINCIPAL SUBSIDIARIES

The Company's principal subsidiaries have been consolidated into the Group's financial statements for the year ended 31 December 2016. The following list contains the particulars of subsidiaries which principally affected the results, assets and liabilities of the Group:

Full name of enterprise	Principal activities	Registered capital/paid-up capital million	Actual investment at 31 December 2016 million	Percentage of equity interest/voting right held by the Group %	Minority Interests at 31 December 2016 RMB million
(a) Subsidiaries acquired through group restructuring:					
China Petrochemical International Company Limited	Trading of petrochemical products	RMB 1,400	RMB 1,856	100.00	26
China International United Petroleum and Chemical Company Limited	Trading of crude oil and petrochemical products	RMB 3,000	RMB 4,585	100.00	3,790
Sinopec Catalyst Company Limited	Production and sale of catalyst products	RMB 1,500	RMB 1,562	100.00	194
Sinopec Yangzi Petrochemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	RMB 13,203	RMB 15,651	100.00	—
Sinopec Pipeline Storage & Transportation Company Limited	Pipeline storage and transportation of crude oil	RMB 12,000	RMB 12,000	100.00	—
Sinopec Lubricant Company Limited	Production and sale of refined petroleum products, lubricant base oil, and petrochemical materials	RMB 3,374	RMB 3,374	100.00	49
Sinopec Yizheng Chemical Fibre Limited Liability Company	Production and sale of polyester chips and polyester fibres	RMB 4,000	RMB 6,713	100.00	—
Sinopec Marketing Company Limited ("Marketing Company")	Marketing and distribution of refined petroleum products	RMB 28,403	RMB 20,000	70.42	63,555
Sinopec Kantons Holdings Limited ("Sinopec Kantons")	Trading of crude oil and petroleum products	HKD 248	HKD 3,952	60.34	3,398
Sinopec Shanghai Petrochemical Company Limited ("Shanghai Petrochemical")	Manufacturing of synthetic fibres, resin and plastics, intermediate petrochemical products and petroleum products	RMB 10,800	RMB 5,820	50.56	12,518
Fujian Petrochemical Company Limited ("Fujian Petrochemical") (i)	Manufacturing of plastics, intermediate petrochemical products and petroleum products	RMB 5,745	RMB 2,873	50.00	3,619
(b) Subsidiaries established by the Group:		RMB 8,000		100.00	15,253

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Sinopec International Petroleum Exploration and Production Limited (“SIPL”)	Investment in exploration, production and sale of petroleum and natural gas		RMB 8,000

Sinopec Chemical Sales Company Limited	Marketing and distribution of petrochemical products	RMB 1,000	RMB 1,165	100.00	64	
Sinopec Great Wall Energy & Chemical Company Limited	Coal chemical industry investment management, production and sale of coal chemical products	RMB 20,739	RMB 20,773	100.00	201	
Sinopec Beihai Refining and Chemical Limited Liability Company	Import and processing of crude oil, production, storage and sale of petroleum products and petrochemical products	RMB 5,294	RMB 5,240	98.98	81	
Sinopec Qingdao Refining and Chemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	RMB 5,000	RMB 4,250	85.00	1,066	
Sinopec-SK(Wuhan) Petrochemical Company Limited (“Zhonghan Wuhan”)	Production, sale, research and development of ethylene and downstream byproducts	RMB 6,270	RMB 4,076	65.00	3,029	
(c) Subsidiaries acquired through business combination under common control:						
Sinopec Hainan Refining and Chemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	RMB 3,986	RMB 2,990	75.00	1,941	
Sinopec Qingdao Petrochemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	RMB 1,595	RMB 7,233	100.00	—	
Gaoqiao Petrochemical Company Limited (Note 1)	Manufacturing of intermediate petrochemical products and petroleum products	RMB 10,000	RMB 4,804	55.00	4,211	
(d) Subsidiaries acquired through business combination not under common control:						
Sinopec Zhanjiang Dongxing Petrochemical Company Limited	Manufacturing of intermediate petrochemical products and petroleum products	RMB 4,397	RMB 3,225	75.00	825	

* The minority interests of subsidiaries which the Group holds 100% of equity interests at the end of the year are the minority interests of their subsidiaries.

Except for Sinopec Kantons and SOIH, which are incorporated in Bermuda and Hong Kong, respectively, all of the above principal subsidiaries are incorporated and operate their businesses principally in the PRC.

Note:

The Group consolidated the financial statements of the entity because it is exposed to, or has rights to, variable (i) returns from its involvement with the entity and has the ability to affect those return through its power over the entity.

53 PRINCIPAL SUBSIDIARIES (Continued)

Summarised financial information on subsidiaries with material minority interests

Set out below are the summarised financial information which the amount before inter-company eliminations for each subsidiary that has minority interests that are material to the Group.

54 COMMITMENTS

Operating lease commitments

The Group lease land and buildings, service stations and other equipment through non-cancellable operating leases. These operating leases do not contain provisions for contingent lease rentals. None of the rental agreements contains escalation provisions that may require higher future rental payments.

At 31 December 2016 and 2015, the future minimum lease payments of the Group under operating leases are as follows:

	At 31 December 2016	At 31 December 2015
	RMB million	RMB million
Within one year	14,917	13,737
Between one and two years	14,228	13,265
Between two and three years	13,966	13,199
Between three and four years	13,217	13,091
Between four and five years	12,980	12,430
After five years	275,570	284,300
Total	344,878	350,022

Capital commitments

At 31 December 2016 and 2015, the capital commitments of the Group are as follows:

	At 31 December 2016	At 31 December 2015
	RMB million	RMB million
Authorised and contracted for (i)	116,379	113,017
Authorised but not contracted for	31,720	47,043
Total	148,099	160,060

These capital commitments relate to oil and gas exploration and development, refining and petrochemical production capacity expansion projects, the construction of service stations and oil depots and investment commitments.

Note:

(i) The investment commitments of the Group is RMB 4,173 million (2015: RMB 4,089 million).

Commitments to joint ventures

Pursuant to certain of the joint venture agreements entered into by the Group, the Group is obliged to purchase products from the joint ventures based on market prices.

Exploration and production licenses

Exploration licenses for exploration activities are registered with the Ministry of Land and Resources. The maximum term of the Group's exploration licenses is 7 years, and may be renewed twice within 30 days prior to expiration of the original term with each renewal being for a two-year term. The Group is obligated to make progressive annual minimum exploration investment relating to the exploration blocks in respect of which the license is issued. The Ministry of Land and Resources also issues production licenses to the Group on the basis of the reserve reports approved by relevant authorities. The maximum term of a full production license is 30 years unless a special dispensation is given by the State Council. The maximum term of the production licenses issued to the Group is 80

years as a special dispensation was given to the Group by the State Council. The Group's production license is renewable upon application by the Group 30 days prior to expiration.

The Group is required to make payments of exploration license fees and production right usage fees to the Ministry of Land and Resources annually and recognised in profit and loss. Payments incurred were approximately RMB 333 million for the year ended 31 December 2016 (2015: RMB 372 million).

Estimated future annual payments of the Group are as follows:

	At 31 December 2016 RMB million	At 31 December 2015 RMB million
Within one year	263	283
Between one and two years	123	125
Between two and three years	25	32
Between three and four years	24	22
Between four and five years	25	21
After five years	867	834
Total	1,327	1,317

The implementation of commitments in previous year and the Group's commitments did not have material discrepancy.

55 CONTINGENT LIABILITIES

The Company has been advised by its PRC lawyers that, except for liabilities constituting or arising out of or relating to the business assumed by the Company in the Reorganisation, no other liabilities were assumed by the Company, and the Company is not jointly and severally liable for other debts and obligations incurred by Sinopec Group Company prior to the Reorganisation.

At 31 December 2016 and 2015, guarantees by the Group in respect of facilities granted to the parties below are as follows:

	At 31 December 2016 RMB million	At 31 December 2015 RMB million
Joint ventures	658	703
Associates (i)	11,545	—
Others	10,669	6,010
Total	22,872	6,713

The group provided a guarantee in respect to standby credit facilities granted to Zhongtian Synergetic Energy by banks amount to RMB 17,050 million. As at 31 December 2016, the amount withdrawn by Zhongtian Synergetic Energy from banks and guaranteed by the group was RMB 11,545 million.

The Group monitors the conditions that are subject to the guarantees to identify whether it is probable that a loss has occurred, and recognises any such losses under guarantees when those losses are reliably estimable. At 31 December 2016 and 2015, it was not probable that the Group will be required to make payments under the guarantees. Thus no liabilities have been accrued for a loss related to the Group's obligation under these guarantee arrangements.

Environmental contingencies

Under existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Group. The PRC government, however, has moved, and may move further towards more rigorous enforcement of applicable laws, and towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect the Group's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to refineries, oil fields, service stations, terminals and land development areas, whether operating, closed or sold, (ii) the extent of required cleanup efforts, (iii) varying costs of alternative remediation strategies, (iv) changes in environmental remediation requirements, and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under proposed or future environmental legislation cannot reasonably be estimated at present, and could be material. The Group paid normal routine pollutant discharge fees of approximately RMB 6,358 million for the year ended 31 December 2016 (2015: RMB 5,813 million).

Legal contingencies

The Group is a defendant in certain lawsuits as well as the named party in other proceedings arising in the ordinary course of business. Management has assessed the likelihood of an unfavourable outcome of such contingencies, lawsuits or other proceedings and believes that any resulting liabilities will not have a material adverse effect on the financial position, operating results or cash flows of the Group.

56 SEGMENT REPORTING

Segment information is presented in respect of the Group's operating segments. The format is based on the Group's management and internal reporting structure.

In a manner consistent with the way in which information is reported internally to the Group's chief operating decision maker for the purposes of resource allocation and performance assessment, the Group has identified the following five reportable segments. No operating segments have been aggregated to form the following reportable segments.

- (i) Exploration and production — which explores and develops oil fields, produces crude oil and natural gas and sells such products to the refining segment of the Group and external customers.

Refining — which processes and purifies crude oil, which is sourced from the exploration and production segment of the Group and external suppliers, and manufactures and sells petroleum products to the chemicals and marketing and distribution segments of the Group and external customers.
- (ii) Marketing and distribution — which owns and operates oil depots and service stations in the PRC, and distributes and sells refined petroleum products (mainly gasoline and diesel) in the PRC through wholesale and retail sales networks.
- (iii) Chemicals — which manufactures and sells petrochemical products, derivative petrochemical products and other chemical products to external customers.
- (iv) Corporate and others — which largely comprise the trading activities of the import and export companies of the Group and research and development undertaken by other subsidiaries.
- (v)

The segments were determined primarily because the Group manages its exploration and production, refining, marketing and distribution, chemicals, and corporate and others businesses separately. The reportable segments are each managed separately because they manufacture and/or distribute distinct products with different production processes and due to their distinct operating and gross margin characteristics.

56 SEGMENT REPORTING (Continued)

(1) Information of reportable segmental revenues, profits or losses, assets and liabilities

The Group's chief operating decision maker evaluates the performance and allocates resources to its operating segments on an operating income basis, without considering the effects of finance costs or investment income. Inter-segment transfer pricing is based on the market price or cost plus an appropriate margin, as specified by the Group's policy.

Assets and liabilities dedicated to a particular segment's operations are included in that segment's total assets and liabilities. Segment assets include all tangible and intangible assets, except for cash at bank and on hand, long-term equity investments, deferred tax assets and other unallocated assets. Segment liabilities exclude short-term loans, short-term debentures payable, non-current liabilities due within one year, long-term loans, debentures payable, deferred tax liabilities, other non-current liabilities and other unallocated liabilities.

Reportable information on the Group's operating segments is as follows:

	2016	2015
	RMB million	RMB million
Income from principal operations		
Exploration and production		
External sales	47,443	57,740
Inter-segment sales	58,954	71,019
	106,397	128,759
Refining		
External sales	102,983	120,650
Inter-segment sales	747,317	800,962
	850,300	921,612
Marketing and distribution		
External sales	1,027,373	1,086,098
Inter-segment sales	3,480	3,056
	1,030,853	1,089,154
Chemicals		
External sales	284,289	276,640
Inter-segment sales	38,614	43,814
	322,903	320,454

57 FINANCIAL INSTRUMENTS

Overview

Financial assets of the Group include cash at bank, equity investments other than long-term equity investment, accounts receivable, bills receivable, available-for-sale financial assets, derivative financial instruments and other receivables. Financial liabilities of the Group include short-term and long-term loans, accounts payable, bills payable, debentures payable, employee benefits payable, derivative financial instruments and other payables.

The Group has exposure to the following risks from its uses of financial instruments:

• credit risk;

• liquidity risk;

• market risk;

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework, and developing and monitoring the Group's risk management policies.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, and set appropriate risk limits and controls to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations. Internal audit department undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Group's audit committee.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's deposits placed with financial institutions and receivables from customers. To limit exposure to credit risk relating to deposits, the Group primarily places cash deposits only with large financial institution in the PRC with acceptable credit ratings. The majority of the Group's accounts receivable relates to sales of petroleum and chemical products to related parties and third parties operating in the petroleum and chemical industries. No single customer accounted for greater than 10% of total accounts receivable at 31 December 2016, except for the amounts due from Sinopec Group Company and fellow subsidiaries. The Group performs ongoing credit evaluations of its customers' financial condition and generally does not require collateral on accounts receivable. The Group maintains an impairment loss for doubtful accounts and actual losses have been within management's expectations.

The carrying amounts of cash at bank, trade accounts and bills receivables, derivative financial instruments and other receivables, represent the Group's maximum exposure to credit risk in relation to financial assets.

Liquidity risk

Liquidity risk is the risk that the Group encounters short fall of capital when meeting its obligation of financial liabilities. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed capital conditions, without incurring unacceptable losses or risking damage to the Group's reputation. The Group prepares monthly cash flow budget to ensure that they will always have sufficient liquidity to meet its financial obligation as they fall due. The Group arranges and negotiates financing with financial institutions and maintains a certain level of standby credit facilities to reduce the liquidity risk.

At 31 December 2016, the Group has standby credit facilities with several PRC financial institutions which provide the Group to borrow up to RMB 256,375 million (2015: RMB 297,997 million) on an unsecured basis, at a weighted average interest rate of 3.57% (2015: 2.50%). At 31 December 2016, the Group's outstanding borrowings under these facilities were RMB 36,933 million (2015: RMB 32,991 million) and were included in loans.

The following table sets out the remaining contractual maturities at the balance sheet date of the Group's financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on prevailing rates current at the balance sheet date) and the earliest date the Group would be required to repay:

At 31 December 2016

Carrying amount	Total contractual undiscounted cash flow	Within one year or on demand	More than one year but less than two years	More than two years but less than five years	More than five years

Non-current liabilities due within one year	11,277	11,405	11,405	—	—	—
Short-term debentures payable	30,000	30,486	30,486	—	—	—
Long-term loans	56,493	58,156	703	9,366	10,930	37,157
Debentures payable	83,253	97,611	3,314	32,274	39,502	22,521
Bills payable	3,566	3,566	3,566	—	—	—
Accounts payable	130,558	130,558	130,558	—	—	—
Other payables and employee benefits payable	87,522	87,522	87,522	—	—	—
Total	477,398	494,618	342,868	41,640	50,432	59,678

Management believes that the Group's current cash on hand, expected cash flows from operations and available standby credit facilities from financial institutions will be sufficient to meet the Group's short-term and long-term capital requirements.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

(a) Currency risk

Currency risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured. The Group's currency risk exposure primarily relates to short-term and long-term debts denominated in US Dollars, Euro, Hong Kong Dollars and Singapore Dollars, and the Group enters into foreign exchange contracts to manage currency risk exposure.

Included in short-term and long-term debts denominated are the following amounts denominated in a currency other than the functional currency of the entity to which they relate:

The Group

	At 31 December 2016 million	At 31 December 2015 million
Gross exposure arising from loans and borrowings US Dollars	USD 126	USD 1,181

Euro	EUR 1	EUR 1,108
Hong Kong Dollars	HKD 6	HKD 6
Singapore Dollars	SGD 4	—

A 5 percent strengthening/weakening of Renminbi against the following currencies at 31 December 2016 and 2015 would have increased/decreased net profit for the year of the Group by the amounts shown below. This analysis has been determined assuming that the change in foreign exchange rates had occurred at the balance sheet date and had been applied to the foreign currency balances to which the Group has significant exposure as stated above, and that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for 2015.

The Group

	At 31 December 2016	At 31 December 2015
	million	million
US Dollars	33	288
Euro	—	295
Singapore Dollars 1	—	—

Other than the amounts as disclosed above, the amounts of other financial assets and liabilities of the Group are substantially denominated in the functional currency of respective entity of the Group.

57 FINANCIAL INSTRUMENTS (Continued)

Market risk (Continued)

(b) Interest rate risk

The Group's interest rate risk exposure arises primarily from its short-term and long-term loans. Loans carrying interest at variable interest rates and at fixed interest rates expose the Group to cash flow interest rate risk and fair value interest rate risk respectively. The interest rates and terms of repayment of short-term and long-term loans of the Group are disclosed in Note 21 and Note 29, respectively.

At 31 December 2016, it is estimated that a general increase/decrease of 100 basis points in variable interest rates, with all other variables held constant, would increase/decrease the Group's net profit for the year by approximately RMB 44 million (2015: decrease/increase RMB 91 million). This sensitivity analysis has been determined assuming that the change in interest rates had occurred at the balance sheet date and the change was applied to the Group's loans outstanding at that date with exposure to cash flow interest rate risk, which in part be eliminated by cash holdings on a variable interest rate basis. The analysis is performed on the same basis for 2015.

(c) Commodity price risk

The Group engages in oil and gas operations and is exposed to commodity price risk related to price volatility of crude oil, refined oil products and chemical products. The fluctuations in prices of crude oil, refined oil products and chemical products could have significant impact on the Group. The Group uses derivative financial instruments, including commodity futures and swaps, to manage a portion of such risk.

At 31 December 2016, the Group had certain commodity contracts of crude oil, refined oil products and chemical products designated as qualified cash flow hedges and economic hedges. At 31 December 2016, the net fair value of such derivative hedging financial instruments is derivative financial assets of RMB 312 million (2015: RMB 7,875 million) recognised in other receivables and derivative financial liabilities of RMB 4,336 million (2015: RMB 2,750 million) recognised in other payables.

At 31 December 2016, it is estimated that a general increase/decrease of USD 10 per barrel in basic price of derivative financial instruments, with all other variables held constant, would impact the fair value of derivative financial instruments which would decrease/increase the Group's profit for the year by approximately RMB 634 million (2015: decrease/increase RMB 1,951 million), and decrease/increase the Group's other comprehensive income by approximately RMB 4,007 million (2015: decrease/increase RMB 3,052 million). This sensitivity analysis has been determined assuming that the change in prices had occurred at the balance sheet date and the change was applied to the Group's derivative financial instruments at that date with exposure to commodity price risk. The analysis is performed on the same basis for 2015.

Fair values

(i) Financial instruments carried at fair value

The following table presents the carrying value of financial instruments measured at fair value at the balance sheet date across the three levels of the fair value hierarchy. With the fair value of each financial instrument categorised in its entirety based on the lowest level of input that is significant to that fair value measurement. The levels are defined as follows:

• Level 1 (highest level): fair values measured using quoted prices (unadjusted) in active markets for identical financial instruments.

•

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Level 2: fair values measured using quoted prices in active markets for similar financial instruments, or using valuation techniques in which all significant inputs are directly or indirectly based on observable market data.

Level 3 (lowest level): fair values measured using valuation techniques in which any significant input is not based on observable market data.

At 31 December 2016

The Group

	Level 1 RMB million	Level 2 RMB million	Level 3 RMB million	Total RMB million

	2,586	1,886	—	4,472

135

57 FINANCIAL INSTRUMENTS (Continued)

Fair values (Continued)

(i) Financial instruments carried at fair value (Continued)

At 31 December 2015

The Group

	Level 1 RMB million	Level 2 RMB million	Level 3 RMB million	Total RMB million
Assets				
Available-for-sale financial assets:				
– Listed	261	—	—	261
Derivative financial instruments:				
– Derivative financial assets	4,235	3,640	—	7,875
	4,496	3,640	—	8,136
Liabilities				
Derivative financial instruments:				
– Derivative financial liabilities	305	2,445	—	2,750
	305	2,445	—	2,750

During the years ended 31 December 2016 and 2015, there was no transfer between instruments in Level 1 and Level 2.

(ii) Fair values of financial instruments carried at other than fair value

The fair values of the Group's financial instruments carried at other than fair value (other than long-term debts and unquoted security investments) approximate their carrying amounts due to the short-term maturity of these instruments. The fair values of long-term debts are estimated by discounting future cash flows using current market interest rates offered to the Group for debt with substantially the same characteristics and maturities ranging 1.06% to 4.90% (2015: 1.08% to 4.90%). The following table presents the carrying amount and fair value of the Group's long-term debts other than loans from Sinopec Group Company and fellow subsidiaries at 31 December 2016 and 2015:

	At 31 December 2016 RMB million	At 31 December 2015 RMB million
Carrying amount	110,969	105,927
Fair value	109,308	103,482

The Group has not developed an internal valuation model necessary to make the estimate of the fair value of loans from Sinopec Group Company and fellow subsidiaries as it is not considered practicable to estimate their fair value because the cost of obtaining discount and borrowing rates for comparable borrowings would be excessive based on the Reorganisation of the Group, its existing capital structure and the terms of the borrowings.

Other unquoted equity investments are individually and in the aggregate not material to the Group's financial position or results of operations. There are no listed market prices for such interests in the PRC and, accordingly, a reasonable estimate of fair value could not be made without incurring excessive costs. The Group intends to hold these unquoted equity investments for long term purpose.

Except for the above items, the financial assets and liabilities of the Group are carried at amounts not materially different from their fair values at 31 December 2016 and 2015.

58 EXTRAORDINARY GAINS AND LOSSES

Pursuant to “Explanatory Announcement No.1 on Information Disclosure for Companies Offering Their Securities to the Public- Extraordinary Gain and Loss” (2008), the extraordinary gains and losses of the Group are as follows:

	2016	2015
	RMB million	RMB million
Extraordinary (gains)/losses for the year:		
Net loss on disposal of non-current assets	1,528	721
Donations	133	112
Government grants	(3,987)	(5,002)
Gain on holding and disposal of various investments	(518)	(943)
Investment income on loss of control remeasuring interests in the Pipeline Ltd (Note 12(i))	(20,562)	—
Other non-operating loss	1,328	331
Net gains of combination under common control from 1 January 2016 to the consolidation date	(86)	(134)
	(22,164)	(4,915)
Tax effect	5,578	1,060
Total	(16,586)	(3,855)

Equity shareholders of the Company	(16,703)	(3,380)
Minority interests	117	(475)

59 BASIC AND DILUTED EARNINGS PER SHARE

(i) Basic earnings per share

Basic earnings per share is calculated by the net profit attributable to equity shareholders of the Company and the weighted average number of outstanding ordinary shares of the Company:

	2016	2015
Net profit attributable to equity shareholders of the Company (RMB million)	46,416	32,281
Weighted average number of outstanding ordinary shares of the Company (million)	121,071	120,853
Basic earnings per share (RMB/share)	0.383	0.267

The calculation of the weighted average number of ordinary shares is as follows:

	2016	2015
Weighted average number of outstanding ordinary shares of the Company at 1 January (million)	121,071	118,280
Conversion of the 2011 Convertible Bonds (million)	—	2,573
Weighted average number of outstanding ordinary shares of the Company at 31 December (million)	121,071	120,853

(ii) Diluted earnings per share

Diluted earnings per share is calculated by the net profit attributable to equity shareholders of the Company (diluted) and the weighted average number of ordinary shares of the Company (diluted):

	2016	2015
Net profit attributable to equity shareholders of the Company (diluted) (RMB million)	46,413	32,279
Weighted average number of outstanding ordinary shares of the Company (diluted) (million)	121,071	120,853
Diluted earnings per share (RMB/share)	0.383	0.267

The calculation of the weighted average number of ordinary shares (diluted) is as follows:

	2016	2015
The weighted average number of the ordinary shares issued at 31 December (million)	121,071	120,853
Weighted average number of the ordinary shares issued at 31 December (diluted) (million)	121,071	120,853

60 RETURN ON NET ASSETS AND EARNINGS PER SHARE

In accordance with “Regulation on the Preparation of Information Disclosures of Companies Issuing Public Shares No.9 – Calculation and Disclosure of the Return on Net Assets and Earnings Per Share” (2010 revised) issued by the CSRC and relevant accounting standards, the Group’s return on net assets and earnings per share are calculated as follows:

	2016			2015		
	Weighted average return on net assets (%)	Basic earnings per share (RMB/Share)	Diluted earnings per share (RMB/Share)	Weighted average return on net assets (%)	Basic earnings per share (RMB/Share)	Diluted earnings per share (RMB/Share)
Net profit attributable to the Company’s ordinary equity shareholders	6.68	0.383	0.383	5.07	0.267	0.267
	4.33	0.245	0.245	4.52	0.239	0.239

Net profit deducted
extraordinary gains and
losses attributable to the
Company's ordinary equity
shareholders

61EVENTS AFTER THE BALANCE SHEET DATE

According to the purchase and sale agreement signed between SOIHL Hong Kong Holding Limited (“SOIHL HK”), a wholly owned subsidiary of the Group, and Chevron Global Energy Inc. (“CGEI”) on 21 March 2017, SOIHL HK is going to acquire the equity shares of and related interest in Chevron South Africa (Proprietary) Limited and the equity shares of Chevron Botswana (Proprietary) Limited (“the Targets”) held by CGEI, in a total consideration approximate to USD 900 million (“the Transaction”). The consideration is subject to adjustment according to the circumstances of the Targets, such as the changes in working capital, at the completion. The Transaction has been approved by the Board of Directors of the Company, and is still subject to the satisfaction of the certain conditions to completion. The Targets’ principle activities are to manufacture and market refined oil products in South Africa and market refined oil products in Botswana. According to the purchase and sale agreement signed between SOIHL Hong Kong Holding Limited (“SOIHL HK”), a wholly owned subsidiary of the Group, and Chevron Global Energy Inc. (“CGEI”) on 21 March 2017, SOIHL HK is going to acquire the equity shares of and related interest in Chevron South Africa (Pty) Limited and the equity shares of Chevron Botswana (Pty) Limited (“the Targets”) held by CGEI, in a total consideration approximate to USD 900 million, which is subject to adjustment according to the circumstances of the Targets at the completion day (“the Transaction”). The Transaction has been approved by the Board of Directors of the Company, and is still subject to the governments’ approval where the Targets operates. The Targets’ principle activities are to manufacture and market refined oil products in South Africa and market refined oil products in Botswana.

REPORT OF THE INTERNATIONAL AUDITOR

Independent Auditor's Report

To the shareholders of China Petroleum & Chemical Corporation
(incorporated in People's Republic of China with limited liability)

OPINION

What we have audited

The consolidated financial statements of China Petroleum & Chemical Corporation (the "Company") and its subsidiaries (the "Group") set out on pages 147 to 201, which comprise:

• the consolidated balance sheet as at 31 December 2016;

• the consolidated income statement for the year then ended;

• the consolidated statement of comprehensive income for the year then ended;

• the consolidated statement of changes in equity for the year then ended;

• the consolidated statement of cash flows for the year then ended; and

• the notes to the consolidated financial statements, which include a summary of significant accounting policies.

Our opinion

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2016, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs") as issued by the International Accounting Standard Board and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

BASIS FOR OPINION

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSA") issued by the Hong Kong Instituted of Certified Public Accountants ("HKICPA"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters identified in our audit are summarised as follows:

Recoverability of the carrying amount of oil and gas properties; and

Accounting for gain of capital injection by external investors into Sinopec Sichuan to East China Gas Pipeline Co., Ltd (“Pipeline Ltd”).

Key Audit Matter	How our audit addressed the Key Audit Matter	
Recoverability of the carrying amount of oil and gas properties	Evaluated and tested the key controls, relating to the preparation of the discounted cash flow projections of oil and gas properties.	
Refer to note 16 “PROPERTY, PLANT AND EQUIPMENT” to the consolidated financial statements.		
As at 31 December 2016, the carrying amount of oil and gas properties amounted to RMB 215,124 million.	Compared estimates of future crude oil prices adopted by the Group against a range of reputable published crude oil price forecasts.	
Low crude oil prices gave rise to possible indication that the carrying amount of oil and gas properties as at 31 December 2016 might be impaired. The Group has adopted values in use as the respective recoverable amounts of the oil and gas properties, which involved estimations or assumptions including:	Compared the future production profiles against the oil and gas reserve estimation report approved by the Group’s reserve management committee. Evaluated the competence, capability and objectivity of the management’s experts engaged in estimating the oil and gas reserves. Assessed key estimations or assumptions used in the reserve estimation, by reference to historical data, management plans and/or reputable external data.	
Future crude oil prices;		
Future production profiles;		
Future cost profiles; and		
Discount rates.		
Because of the significance of the carrying amount of oil and gas properties as at 31 December 2016, together with the use of estimations or assumptions in determining their respective values in use, we had placed our audit emphasis on this matter.	Compared the future cost profiles against historical costs or relevant budgets of the Group.	
	Independently estimated a range of discount rates, and found that the discount rates adopted by management were within the range.	
	Tested selected other key data inputs, such as nature gas prices and	

production profiles in the projections by reference to historical data and/or relevant budgets of the Group.

• Assessed the methodology adopted in, and tested mathematical accuracy of, the discounted cash flow projections.

• Evaluated the sensitivity analyses prepared by the Group, and assessed the potential impacts of a range of possible outcomes.

Accounting for gain of capital injection by external investors into Pipeline Ltd

Refer to note 8 "OTHER OPERATING INCOME/(EXPENSE) NET" to the consolidated financial statements.

A gain of RMB 20.562 billion arose as a result of the derecognition of the assets and liabilities of a former subsidiary (Pipeline Ltd) from the consolidated financial position of the Group when the control over Pipeline Ltd was lost. The Group continues to retain a 50% equity interest in the Pipeline Ltd, and hence its significant influence over the Pipeline Ltd. As a result, the Group deconsolidated the assets and liabilities of Pipeline Ltd when the control was lost, and accounts for its 50% equity interest in the Pipeline Ltd as an associate company.

Because of the significance of such gain in the year ended 31 December 2016, we had placed our audit emphasis on this matter.

Based on our work, we found the key assumptions and input data adopted were supported by the evidence we gathered and consistent with our expectations.

In auditing the gain of capital injection by external investors into Pipeline Ltd, we have performed the following procedures:

• Evaluated the effective date on which the Group lost control over the Pipeline Ltd, taking into consideration of factors including when the composition of the board of directors was changed.

• Tested the consideration to the Group as compensation for the loss of control over the Pipeline Ltd by checking against the relevant bank receipt notices. Corroborated the detail of the transaction by inspecting the relevant documents, agreements and contracts.

• Recomputed the gain arising from the capital injection by external investors into Pipeline Ltd of RMB 20.562 billion, and agreed to management's computation.

Based on our work, we found that the gain of capital injection by external investors into Pipeline Ltd of RMB 20.562 billion was supported by the evidence we gathered.

OTHER INFORMATION

The directors of the Company are responsible for the other information. The other information comprises all of the information included in the annual report other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF DIRECTORS AND THOSE CHARGED WITH GOVERNANCE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRSs and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is HON CHONG HENG.

Note:

According to the PRC Company Law and the Articles of Association of the Company, the Company is required to transfer 10% of its net profit determined in accordance with the accounting policies complying with Accounting Standards for Business Enterprises (“ASBE”), adopted by the Group to statutory surplus reserve. In the event that the reserve balance reaches 50% of the registered capital, no transfer is required. The transfer to this reserve must be made before distribution of a dividend to shareholders. Statutory surplus reserve can be used to make good previous years’ losses, if any, and may be converted into share capital by issuing of new shares to shareholders in (a) proportion to their existing shareholdings or by increasing the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital.

Pursuant to the Articles of Association of the Company and the resolution passed at the Directors’ meeting on 24 March 2017, the directors proposed to transfer RMB 2,359 million to the statutory surplus reserve, being 10% of the current year’s net profit determined in accordance with the accounting policies complying with ASBE to this reserve.

(b) The usage of the discretionary surplus reserve is similar to that of statutory surplus reserve.

As at 31 December 2016, the amount of retained earnings available for distribution was RMB 182,440 million (2015: RMB 175,679 million), being the amount determined in accordance with ASBE. According to the Articles of Association of the Company, the amount of retained earnings available for distribution to owners of the (c) Company is lower of the amount determined in accordance with the accounting policies complying with ASBE and the amount determined in accordance with the accounting policies complying with International Financial Reporting Standards (“IFRS”).

The capital reserve represents (i) the difference between the total amount of the par value of shares issued and the amount of the net assets transferred from Sinopec Group Company in connection with the Reorganisation; and (ii) (d) the difference between the considerations paid over or received the amount of the net assets of entities and related operations acquired from or sold to Sinopec Group Company and non-controlling interests.

(e) The application of the share premium account is governed by Sections 167 and 168 of the PRC Company Law.

The notes on pages 154 to 201 form part of these consolidated financial statements.

The notes on pages 154 to 201 form part of these consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
for the year ended 31 December 2016

1 PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PREPARATION

Principal activities

China Petroleum & Chemical Corporation (the “Company”) is an energy and chemical company that, through its subsidiaries (hereinafter collectively referred to as the “Group”), engages in oil and gas and chemical operations in the People’s Republic of China (the “PRC”). Oil and gas operations consist of exploring for, developing and producing crude oil and natural gas; transporting crude oil and natural gas by pipelines; refining crude oil into finished petroleum products; and marketing crude oil, natural gas and refined petroleum products. Chemical operations include the manufacture and marketing of a wide range of chemicals for industrial uses.

Organisation

The Company was established in the PRC on 25 February 2000 as a joint stock limited company as part of the reorganisation (the “Reorganisation”) of China Petrochemical Corporation (“Sinopec Group Company”), the ultimate holding company of the Group and a ministry-level enterprise under the direct supervision of the State Council of the PRC. Prior to the incorporation of the Company, the oil and gas and chemical operations of the Group were carried on by oil administration bureaux, petrochemical and refining production enterprises and sales and marketing companies of Sinopec Group Company.

As part of the Reorganisation, certain of Sinopec Group Company’s core oil and gas and chemical operations and businesses together with the related assets and liabilities were transferred to the Company. On 25 February 2000, in consideration for Sinopec Group Company transferring such oil and gas and chemical operations and businesses and the related assets and liabilities to the Company, the Company issued 68.8 billion domestic state-owned ordinary shares with a par value of RMB 1.00 each to Sinopec Group Company. The shares issued to Sinopec Group Company on 25 February 2000 represented the entire registered and issued share capital of the Company on that date. The oil and gas and chemical operations and businesses transferred to the Company were related to (i) the exploration, development and production of crude oil and natural gas, (ii) the refining, transportation, storage and marketing of crude oil and petroleum products, and (iii) the production and sales of chemicals.

Basis of preparation

Pursuant to the resolution passed at the Directors’ meeting on 29 October 2015, the Company entered into the JV Agreement with Sinopec Assets Management Corporation (“SAMC”) in relation to the formation of the Gaoqiao Petrochemical Co., Ltd. According to the JV Agreement, the Company and SAMC jointly set up Gaoqiao Petrochemical Co., Ltd. for RMB 100 million in cash in 2016. Subsequently, the Company subscribed capital contribution with the net assets of Gaoqiao Branch of the Company and SAMC subscribed capital contribution with the net assets of Gaoqiao Branch of SAMC. The capital contribution was completed on 1 June 2016, after which the Company held 55% of Gaoqiao Petrochemical Co., Ltd.’s voting rights and became the parent company of Gaoqiao Petrochemical Co., Ltd.

As Sinopec Group Company controls both the Group and SAMC, the non-cash transaction described above between Sinopec and SAMC has been accounted as business combination under the common control and it has been reflected in the accompanying consolidated financial statements as combination of entities under common control in a manner of predecessor value accounting. Accordingly, the assets and liabilities of Gaoqiao Branch of SAMC have been accounted for at historical cost, and the consolidated financial statements of the Group prior to these acquisitions have been restated to include the results of operation and the assets and liabilities of Gaoqiao Branch of SAMC on a combined basis.

1 PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PREPARATION (Continued)

Basis of preparation (Continued)

The financial condition as at 31 December 2015 and the results of operation for the year ended 31 December 2015 previously reported by the Group have been restated to include the results of operations and the assets and liabilities of Gaoqiao Branch of SAMC on a combined basis as set out below:

	The Group, as previously reported	Gaoqiao Branch of SAMC	Elimination and Adjustment*	The Group, as restated
	RMB million	RMB million	RMB million	RMB million
Summarised consolidated income statement for the year ended 31 December 2015:				
Turnover and other operating revenues	2,018,883	2,563	(1,071)	2,020,375
Profit attributable to owners of the Company	32,438	134	(60)	32,512
Profit attributable to non-controlling interests	11,226	—	60	11,286
Basic earnings per share (RMB)	0.268	0.001	—	0.269
Diluted earnings per share (RMB)	0.268	0.001	—	0.269
Summarised consolidated balance sheet as at 31 December 2015:				
Current assets	332,405	1,287	(35)	333,657
Total assets	1,443,129	4,174	(35)	1,447,268
Current liabilities	462,642	225	(35)	462,832
Total liabilities	658,910	232	(35)	659,107
Total equity attributable to owners of the Company	674,029	3,942	(1,774)	676,197
Non-controlling interests	110,190	—	1,774	111,964
Summarised consolidated statement of cash flows for the year ended 31 December 2015:				
Net cash generated from/(used in) operating activities	165,818	(79)	1	165,740
Net cash (used in)/generated from investing activities	(116,952)	201	32	(116,719)
Net cash generated from/(used in) financing activities	9,310	(185)	(32)	9,093
Net increase/(decrease) in cash and cash equivalents	58,176	(63)	1	58,407

Gaoqiao Branch of SAMC sold its chemical products and steam to the Group. The transactions between the Group and the Gaoqiao Branch of SAMC have been eliminated on combination. All other significant balances and transactions between the Group and Gaoqiao Branch of SAMC have been eliminated on combination.

At the completion date, the non-controlling interests amount to RMB 2,137 million was recognized in relation to SAMC's 45% interest in Gaoqiao Branch of the Company.

The accompanying consolidated financial statements have been prepared in accordance with all applicable IFRSs as issued by the International Accounting Standards Board ("IASB"). IFRS includes International Accounting Standards ("IAS") and related interpretations ("IFRIC"). These consolidated financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited.

A summary of the significant accounting policies adopted by the Group are set out in Note 2.

(a) New and amended standards and interpretations adopted by the Group

The following is the Amendment to IAS 27 that has been adopted by the Group. The Group has changed from cost method to equity method to measure investments in joint ventures and associates in the separate financial statements from 1 January 2016 and accordingly made retrospective adjustments.

Amendment to IAS 27, 'Method to measure investments in subsidiaries, joint ventures and associates', allows entities to use equity method to measure investments in subsidiaries, joint ventures and associates in their separate financial statements. Previously, IAS 27 allows entities to measure their investments in subsidiaries, joint ventures and associates either at cost or as a financial asset in their separate financial statements. The amendments introduce the equity method as a third option. The election can be made independently for each category of investment (subsidiaries, joint ventures and associates). Entities wishing to change to the equity method must do so retrospectively. The amendment is effective for annual period beginning on or after 1 January 2016.

1 PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PREPARATION (Continued)

Basis of preparation (Continued)

(b) New and amended standards and interpretations not yet adopted by the Group

The following relevant IFRSs, amendments to existing IFRSs and interpretation of IFRS have been published and are mandatory for accounting periods beginning on or after 1 January 2017 or later periods and have not been early adopted by the Group. Management is in the process of making an assessment of what the impact of these amendments, new standards and new interpretations is expected to be in the period of initial application and has so far concluded that, except for IFRS 16, the adoption of these amendments, new standards and new interpretations is unlikely to have a significant impact on the Group's results of operations and financial position.

IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the whole of IAS 39. IFRS 9 introduces a new model for the recognition of impairment losses; the expected credit losses (ECL) model, which constitutes a change from the incurred loss model in IAS 39. IFRS 9 applies to all hedging relationships, with the exception of portfolio fair value hedges of interest rate risk. The new guidance better aligns hedge accounting with the risk management activities of an entity and provides relief from the more "rule-based" approach of IAS 39. IFRS 9 is effective for annual periods beginning on or after 1 January 2018. Earlier application is permitted.

Amendments to IFRS 10 and IAS 28 on sale or contribution of assets between an investor and its associate or joint venture. The amendments address an inconsistency between IFRS 10 and IAS 28 in the sale and contribution of assets between an investor and its associate or joint venture. A full gain or loss is recognised when a transaction involves a business. A partial gain or loss is recognised when a transaction involves assets that do not constitute a business, even if those assets are in a subsidiary. The amendments were originally intended to be effective for annual periods beginning on or after 1 January 2016. The effective date has now been deferred/removed. Early application of the amendments continues to be permitted.

IFRS 15, 'Revenue from contracts with customers', establishes a comprehensive framework for determining when to recognise revenue and how much revenue to recognise through a 5-step approach. IFRS 15 provides specific guidance on capitalisation of contract cost and licence arrangements. It also includes a cohesive set of disclosure requirements about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers. The core principle is that a company should recognise revenue to depict the transfer of promised goods or services to the customer in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. IFRS 15 replaces the previous revenue standards: IAS 18 'Revenue' and IAS 11 'Construction Contracts' and the related Interpretations on revenue recognition: IFRIC 13 'Customer Loyalty Programmes', IFRIC 15 'Agreements for the Construction of Real Estate', IFRIC 18 'Transfers of Assets from Customers' and SIC 31 'Revenue—Barter Transactions Involving Advertising Services'. IFRS 15 is effective for annual reporting periods beginning on or after 1 January 2018, with earlier application permitted.

IFRS 16, 'Leases', provides updated guidance on the definition of leases, and the guidance on the combination and separation of contracts. Under IFRS 16, a contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. IFRS 16 requires lessees to recognise lease liability reflecting future lease payments and a 'right-of-use asset' for almost all lease contracts, with an exemption for certain short-term leases and leases of low-value assets. The lessors accounting stays almost the same as under IAS 17 'Leases'. An entity shall apply IFRS 16 for annual reporting periods beginning on or after 1 January 2019. Earlier application is permitted if IFRS 15 is also applied.

Amendments to IAS 7, 'Statement of cash flows', the IASB has issued an amendment to IAS 7 introducing an additional disclosure that will enable users of financial statements to evaluate changes in liabilities arising from financing activities. The amendment is part of the IASB's Disclosure Initiative, which continues to explore how financial statement disclosure can be improved. Amendments to IAS 7 are effective for annual periods beginning on or after 1 January 2017.

Amendments to IAS 12, 'Income taxes', the IASB has issued amendments to IAS 12, 'Income taxes'. These amendments on the recognition of deferred tax assets for unrealised losses clarify how to account for deferred tax assets related to debt instruments measured at fair value. Amendments to IAS 12 are effective for annual periods beginning on or after 1 January 2017.

The accompanying consolidated financial statements are prepared on the historical cost basis except for the remeasurement of available-for-sale securities (Note 2(k)), securities held for trading (Note 2(k)), derivative financial instruments (Note 2(l) and (n)) and derivative component of the convertible bonds (Note 2(r)) to their fair values.

The preparation of the consolidated financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Key assumptions and estimation made by management in the application of IFRSs that have significant effect on the consolidated financial statements and the major sources of estimation uncertainty are disclosed in Note 39.

2 SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of consolidation

The consolidated financial statements comprise the Company and its subsidiaries, and interest in associates and joint ventures.

(i) Subsidiaries and non-controlling interests

Subsidiaries are those entities controlled by the Group. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control effectively commences until the date that control effectively ceases.

Non-controlling interests at the balance sheet date, being the portion of the net assets of subsidiaries attributable to equity interests that are not owned by the Company, whether directly or indirectly through subsidiaries, are presented in the consolidated balance sheet and consolidated statement of changes in equity within equity, separately from equity attributable to the owners of the Company. Non-controlling interests in the results of the Group are presented on the face of the consolidated income statement and the consolidated statement of comprehensive income as an allocation of the total profit or loss and total comprehensive income for the year between non-controlling interests and the owners of the Company.

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions, whereby adjustments are made to the amounts of controlling and non-controlling interests within consolidated equity to reflect the change in relative interests, but no adjustments are made to goodwill and no gain or loss is recognised.

When the Group loses control of a subsidiary, it is accounted for as a disposal of the entire interest in that subsidiary, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former subsidiary at the date when control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset (Note 2(k)) or, when appropriate, the cost on initial recognition of an investment in an associate or joint venture (Note 2(a) (ii)).

In the Company's balance sheet, investments in subsidiaries are stated at cost less impairment losses (Note 2(o)).

The particulars of the Group's principal subsidiaries are set out in Note 37.

(ii) Associates and joint ventures

An associate is an entity, not being a subsidiary, in which the Group exercises significant influence over its management. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations each investor has rather than the legal structure of the joint arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

Investments in associates and joint ventures are accounted for in the consolidated financial statements using the equity method from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. Under the equity method, the investment is initially recorded at cost and adjusted thereafter for

the post acquisition change in the Group's share of the investee's net assets and any impairment loss relating to the investment (Note 2(j) and (o)).

The Group's share of the post-acquisition, post-tax results of the investees and any impairment losses for the year are recognised in the consolidated income statement, whereas the Group's share of the post-acquisition, post-tax items of the investees' other comprehensive income is recognised in the consolidated statement of comprehensive income.

When the Group ceases to have significant influence over an associate or joint control over a joint venture, it is accounted for as a disposal of the entire interest in that investee, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former investee at the date when significant influence or joint control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset (see Note 2(k)) or, when appropriate, the cost on initial recognition of an investment in an associate (see Note 2(a) (ii)).

In the Company's balance sheet, investments in associates and joint ventures are stated at carrying amount (Note 2(o)).

(iii) Transactions eliminated on consolidation

Inter-company balances and transactions and any unrealised gains arising from inter-company transactions are eliminated on consolidation. Unrealised gains arising from transactions with associates and joint ventures are eliminated to the extent of the Group's interest in the entity. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(a) Basis of consolidation (Continued)

(iv) Merger accounting for common control combination

The consolidated financial statements incorporate the financial statements of the combining entities or businesses in which the common control combination occurs as if they had been combined from the date when the combining entities or businesses first came under the control of the controlling party. The net assets of the combining entities or businesses are combined using the existing book values from the controlling parties' perspective. No amount is recognised as consideration for goodwill or excess of acquirers' interest in the net fair value of acquiree's identifiable assets, liabilities and contingent liabilities over cost at the time of common control combination, to the extent of the continuation of the controlling party's interest.

The consolidated income statement includes the results of each of the combining entities or businesses from the earliest date presented or since the date when the combining entities or businesses first came under the common control, where there is a shorter period, regardless of the date of the common control combination. The comparative amounts in the consolidated financial statements are presented as if the entities or businesses had been combined at the previous balance sheet date or when they first came under common control, whichever is shorter.

A uniform set of accounting policies is adopted by those entities. All intra-group transactions, balances and unrealised gains on transactions between combining entities or businesses are eliminated on consolidation. Transaction costs, including professional fees, registration fees, costs of furnishing information to shareholders, costs or losses incurred in combining operations of the previously separate businesses, etc., incurred in relation to the common control combination that is to be accounted for by using merger accounting is recognised as an expense in the period in which it is incurred.

(b) Translation of foreign currencies

The presentation currency of the Group is Renminbi. Foreign currency transactions during the year are translated into Renminbi at the applicable rates of exchange quoted by the People's Bank of China ("PBOC") prevailing on the transaction dates. Foreign currency monetary assets and liabilities are translated into Renminbi at the PBOC's rates at the balance sheet date.

Exchange differences, other than those capitalised as construction in progress, are recognised as income or expense in the "finance costs" section of the consolidated income statement.

The results of foreign operations are translated into Renminbi at the applicable rates quoted by the PBOC prevailing on the transaction dates. Balance sheet items, including goodwill arising on consolidation of foreign operations are translated into Renminbi at the closing foreign exchange rates at the balance sheet date. The income and expenses of foreign operation are translated into Renminbi at the spot exchange rates or an exchange rate that approximates the spot exchange rates on the transaction dates. The resulting exchange differences are recognised in other comprehensive income and accumulated in equity in the other reserves.

On disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation is reclassified from equity to the consolidated income statement when the profit or loss on disposal is recognised.

(c) Cash and cash equivalents

Cash equivalents consist of time deposits with financial institutions with an initial term of less than three months when purchased. Cash equivalents are stated at cost, which approximates fair value.

(d) Trade, bills and other receivables

Trade, bills and other receivables are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method, less impairment losses for bad and doubtful debts (Note 2(o)). Trade, bills and other receivables are derecognised if the Group's contractual rights to the cash flows from these financial assets expire or if the Group transfers these financial assets to another party without retaining control or substantially all risks and rewards of the assets.

(e) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost includes the cost of purchase computed using the weighted average method and, in the case of work in progress and finished goods, direct labour and an appropriate proportion of production overheads. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(f) Property, plant and equipment

An item of property, plant and equipment is initially recorded at cost, less accumulated depreciation and impairment losses (Note 2(o)). The cost of an asset comprises its purchase price, any directly attributable costs of bringing the asset to working condition and location for its intended use. The Group recognises in the carrying amount of an item of property, plant and equipment the cost of replacing part of such an item when that cost is incurred, when it is probable that the future economic benefits embodied with the item will flow to the Group and the cost of the item can be measured reliably. All other expenditure is recognised as an expense in the consolidated income statement in the year in which it is incurred.

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment, other than oil and gas properties, are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised as income or expense in the consolidated income statement on the date of retirement or disposal.

Depreciation is provided to write off the cost amount of items of property, plant and equipment, other than oil and gas properties, over its estimated useful life on a straight-line basis, after taking into account its estimated residual value, as follows:

	Estimated usage period	Estimated residuals rate
Buildings	12 to 50 years	3%
Equipment, machinery and others	4 to 30 years	3%

Where parts of an item of property, plant and equipment have different useful lives, the cost of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reassessed annually.

(g) Oil and gas properties

The Group uses the successful efforts method of accounting for its oil and gas producing activities. Under this method, costs of development wells, the related supporting equipment and proved mineral interests in properties are capitalised. The cost of exploratory wells is initially capitalised as construction in progress pending determination of whether the well has found proved reserves. The impairment of exploratory well costs occurs upon the determination that the well has not found proved reserves. The exploratory well costs are usually not carried as an asset for more than one year following completion of drilling, unless (i) the well has found a sufficient quantity of reserves to justify its completion as a producing well if the required capital expenditure is made; (ii) drilling of the additional exploratory wells is under way or firmly planned for the near future; or (iii) other activities are being undertaken to sufficiently progress the assessing of the reserves and the economic and operating viability of the project. All other exploration costs, including geological and geophysical costs, other dry hole costs and annual lease rentals, are expensed as incurred. Capitalised costs of proved oil and gas properties are amortised on a unit-of-production method based on volumes produced and reserves.

Management estimates future dismantlement costs for oil and gas properties with reference to engineering estimates after taking into consideration the anticipated method of dismantlement required in accordance with the industry practices and the future cash flows are adjusted to reflect such risks specific to the liability, as appropriate. These estimated future dismantlement costs are discounted at pre-tax risk-free rate and are capitalised as oil and gas properties, which are subsequently amortised as part of the costs of the oil and gas properties.

(h) Lease prepayments

Lease prepayments represent land use rights paid to the relevant government authorities. Land use rights are carried at cost less accumulated amount charged to expense and impairment losses (Note 2(o)). The cost of lease prepayments is charged to expense on a straight-line basis over the respective periods of the rights.

(i) Construction in progress

Construction in progress represents buildings, oil and gas properties, various plant and equipment under construction and pending installation, and is stated at cost less impairment losses (Note 2(o)). Cost comprises direct costs of construction as well as interest charges, and foreign exchange differences on related borrowed funds to the extent that they are regarded as an adjustment to interest charges, during the periods of construction.

Construction in progress is transferred to property, plant and equipment when the asset is substantially ready for its intended use.

No depreciation is provided in respect of construction in progress.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(j) Goodwill

Goodwill represents amounts arising on acquisition of subsidiaries, associates or joint ventures. Goodwill represents the difference between the cost of acquisition and the fair value of the net identifiable assets acquired.

Prior to 1 January 2008, the acquisition of the non-controlling interests of a consolidated subsidiary was accounted for using the acquisition method whereby the difference between the cost of acquisition and the fair value of the net identifiable assets acquired (on a proportionate share) was recognised as goodwill. From 1 January 2008, any difference between the amount by which the non-controlling interest is adjusted (such as through an acquisition of the non-controlling interests) and the cash or other considerations paid is recognised in equity.

Goodwill is stated at cost less accumulated impairment losses. Goodwill arising on a business combination is allocated to each cash-generating unit, or groups of cash-generating units, that is expected to benefit the synergies of the combination and is tested annually for impairment (Note 2(o)). In respect of associates or joint ventures, the carrying amount of goodwill is included in the carrying amount of the interest in the associate or joint venture and the investment as a whole is tested for impairment whenever there is objective evidence of impairment (Note 2(o)).

(k) Available-for-sale financial assets

Investments in available-for-sale securities are carried at fair value with any change in fair value recognised in other comprehensive income and accumulated separately in equity in other reserves. When these investments are derecognised or impaired, the cumulative gain or loss is reclassified from equity to the consolidated income statement. Investments in equity securities, other than investments in associates and joint ventures, that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are recognised in the balance sheet at cost less impairment losses (Note 2(o)).

Investments in securities held for trading are classified as current assets. Any attributable transaction costs are recognised in the consolidated income statement as incurred. At each balance sheet date, the fair value is remeasured, with any resultant gain or loss being recognised in the consolidated income statement.

(l) Derivative financial instruments

Derivative financial instruments are recognised initially at fair value. At each balance sheet date, the fair value is remeasured. The gain or loss on remeasurement to fair value is recognised immediately in the consolidated income statement, except where the derivatives qualify for cash flow hedge accounting or hedge the net investment in a foreign operation, in which case recognition of any resulting gain or loss depends on the nature of the item being hedged (Note 2(n)).

(m) Offsetting financial instruments

Financial assets and liabilities are presented respectively in the consolidated balance sheet, without any offset. However, they are offset and reported in the balance sheet when satisfied the following: (1) There is a legally enforceable right to offset the recognised amounts. (2) There is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

(n) Hedging

(i) Cash flow hedges

Where a derivative financial instrument is designated as a hedge of the variability in cash flows of a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk of a committed future transaction, the effective portion of any gains or losses on remeasurement of the derivative financial instrument to fair value are recognised in other comprehensive income and accumulated separately in equity in other reserves. The ineffective portion of any gain or loss is recognised immediately in the consolidated income statement.

If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset, the associated gain or loss is reclassified from equity to be included in the initial cost or other carrying amount of the non-financial asset.

If a hedge of a forecast transaction subsequently results in the recognition of a financial asset or a financial liability, the associated gain or loss is reclassified from equity to the consolidated income statement in the same period or periods during which the asset acquired or liability assumed affects the consolidated income statement (such as when interest income or expense is recognised).

For cash flow hedges, other than those covered by the preceding two policy statements, the associated gain or loss is reclassified from equity to the consolidated income statement in the same period or periods during which the hedged forecast transaction affects the consolidated income statement.

When a hedging instrument expires or is sold, terminated, exercised, or the entity revokes designation of the hedge relationship but the hedged forecast transaction is still expected to occur, the cumulative gain or loss at that point remains in equity until the transaction occurs and it is recognised in accordance with the above policy. If the hedged transaction is no longer expected to take place, the cumulative unrealised gain or loss is reclassified from equity to the consolidated income statement immediately.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(n) Hedging (Continued)

(ii) Fair value hedges

A fair value hedge is a hedge of the exposure to changes in fair value of a recognised asset or liability or an unrecognised firm commitment, or an identified portion of such an asset, liability or unrecognised firm commitment.

The gain or loss from remeasuring the hedging instrument at fair value is recognised in profit or loss. The gain or loss on the hedged item attributable to the hedged risk adjusts the carrying amount of the hedged item and is recognised in profit or loss.

When a hedging instrument expires or is sold, terminated or exercised, or no longer meets the criteria for hedge accounting, the Group discontinues prospectively the hedge accounting treatments. If the hedged item is a financial instrument measured at amortised cost, any adjustment to the carrying amount of the hedged item is amortised to profit or loss from the adjustment date to the maturity date using the recalculated effective interest rate at the adjustment date.

(iii) Hedge of net investments in foreign operations

The portion of the gain or loss on remeasurement to fair value of an instrument used to hedge a net investment in a foreign operation that is determined to be an effective hedge is recognised in other comprehensive income and accumulated separately in equity in the other reserve until the disposal of the foreign operation, at which time the cumulative gain or loss is reclassified from equity to the consolidated income statement. The ineffective portion is recognised immediately in the consolidated income statement. In this year no hedge of net investment in foreign operations was held by the Group.

(o) Impairment of assets

(i) Trade accounts receivable, other receivables and investment in equity securities that do not have a quoted market price in an active market are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. If any such evidence exists, an impairment loss is determined and recognised.

The impairment loss is measured as the difference between the asset's carrying amount and the estimated future cash flows, discounted at the current market rate of return for a similar financial asset where the effect of discounting is material, and is recognised as an expense in the consolidated income statement. Impairment losses for trade and other receivables are reversed through the consolidated income statement if in a subsequent period the amount of the impairment losses decreases. Impairment losses for equity securities carried at cost are not reversed.

For investments in associates and joint ventures accounted under the equity method (Note 2(a) (ii)), the impairment loss is measured by comparing the recoverable amount of the investment as a whole with its carrying amount in accordance with the accounting policy set out in Note 2(o) (ii). The impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount in accordance with the accounting policy set out in Note 2(o) (ii).

(ii) Impairment of other long-lived assets is accounted as follows:

The carrying amounts of other long-lived assets, including property, plant and equipment, construction in progress, lease prepayments and other assets, are reviewed at each balance sheet date to identify indicators that the assets may be impaired. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount

is reduced to the recoverable amount. For goodwill, the recoverable amount is estimated at each balance sheet date.

The recoverable amount is the greater of the fair value less costs to disposal and the value in use. In determining the value in use, expected future cash flows generated by the asset are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

The amount of the reduction is recognised as an expense in the consolidated income statement. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit and then, to reduce the carrying amount of the other assets in the unit on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs to disposal, or value in use, if determinable.

Management assesses at each balance sheet date whether there is any indication that an impairment loss recognised for a long-lived asset, except in the case of goodwill, in prior years may no longer exist. An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. A subsequent increase in the recoverable amount of an asset, when the circumstances and events that led to the write-down or write-off cease to exist, is recognised as an income. The reversal is reduced by the amount that would have been recognised as depreciation had the write-down or write-off not occurred. An impairment loss in respect of goodwill is not reversed.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(p) Trade, bills and other payables

Trade, bills and other payables are initially recognised at fair value and thereafter stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

(q) Interest-bearing borrowings

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the consolidated income statement over the period of borrowings using the effective interest method.

(r) Convertible bonds

(i) Convertible bonds that contain an equity component

Convertible bonds that can be converted to equity share capital at the option of the holder, where the number of shares that would be issued on conversion and the value of the consideration that would be received at that time do not vary, are accounted for as compound financial instruments that contain both a liability component and an equity component.

At initial recognition, the liability component of the convertible bonds is measured as the present value of the future interest and principal payments, discounted at the market rate of interest applicable at the time of initial recognition to similar liabilities that do not have a conversion option. Any excess of proceeds over the amount initially recognised as the liability component is recognised as the equity component. Transaction costs that relate to the issuance of the convertible bonds are allocated to the liability and equity components in proportion to the allocation of proceeds.

The liability component is subsequently carried at amortised cost. The interest expense on the liability component is calculated using the effective interest method. The equity component is recognised in the capital reserve until the bond is converted or redeemed.

If the bond is converted, the capital reserve, together with the carrying amount of the liability component at the time of conversion, is transferred to share capital and share premium as consideration for the shares issued. If the bond is redeemed, the capital reserve is transferred to share premium.

(ii) Other convertible bonds

Convertible bonds issued with a cash settlement option and other embedded derivative features are accounted for as compound financial instruments that contain a liability component and a derivative component.

At initial recognition, the derivative component of the convertible bonds is measured at fair value. Any excess of proceeds over the amount initially recognised as the derivative component is recognised as the liability component. Transaction costs that relate to the issuance of the convertible bonds are allocated to the liability and derivative components in proportion to the allocation of proceeds. The portion of the transaction costs relating to the liability component is recognised initially as part of the liability. The portion relating to the derivative component is recognised immediately as an expense in the consolidated income statement.

The derivative component is subsequently remeasured at each balance sheet date and any gains or losses arising from change in the fair value are recognised in the consolidated income statement. The liability component is subsequently carried at amortised cost until extinguished on conversion or redemption. The interest expense recognised in the consolidated income statement on the liability component is calculated using the effective interest method. Both the liability and the related derivative components are presented together for financial statements reporting purposes.

If the convertible bonds are converted, the carrying amounts of the derivative and liability components are transferred to share capital and share premium as consideration for the shares issued. If the convertible bonds are redeemed, any difference between the amount paid and the carrying amounts of both components is recognised in the consolidated income statement.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(s) Provisions and contingent liability

A provision is recognised for liability of uncertain timing or amount when the Group has a legal or constructive obligation arising as a result of a past event, when it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made.

When it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

Provisions for future dismantlement costs are initially recognised based on the present value of the future costs expected to be incurred in respect of the Group's expected dismantlement and abandonment costs at the end of related oil and gas exploration and development activities. Any subsequent change in the present value of the estimated costs, other than the change due to passage of time which is regarded as interest cost, is reflected as an adjustment to the provision and oil and gas properties.

(t) Revenue recognition

Revenues associated with the sale of crude oil, natural gas, petroleum and chemical products and ancillary materials are recorded when the customer accepts the goods and the significant risks and rewards of ownership and title have been transferred to the buyer. Revenue from the rendering of services is recognised in the consolidated income statement upon performance of the services. No revenue is recognised if there are significant uncertainties regarding recovery of the consideration due, the possible return of goods, or when the amount of revenue and the costs incurred or to be incurred in respect of the transaction cannot be measured reliably.

Interest income is recognised on a time apportioned basis that takes into account the effective yield on the asset.

A government grant that becomes receivable as compensation for expenses or losses already incurred with no future related costs is recognised as income in the period in which it becomes receivable.

(u) Borrowing costs

Borrowing costs are expensed in the consolidated income statement in the period in which they are incurred, except to the extent that they are capitalised as being attributable to the construction of an asset which necessarily takes a period of time to get ready for its intended use.

(v) Repairs and maintenance expenditure

Repairs and maintenance expenditure is expensed as incurred.

(w) Environmental expenditures

Environmental expenditures that relate to current ongoing operations or to conditions caused by past operations are expensed as incurred.

Liabilities related to future remediation costs are recorded when environmental assessments and/or cleanups are probable and the costs can be reliably estimated. As facts concerning environmental contingencies become known to the Group, the Group reassesses its position both with respect to accrued liabilities and other potential exposures.

(x) Research and development expense

Research and development expenditures that cannot be capitalised are expensed in the period in which they are incurred. Research and development expense amounted to RMB 5,941 million for the year ended 31 December 2016 (2015: RMB 5,654 million).

(y) Operating leases

Operating lease payments are charged to the consolidated income statement on a straight-line basis over the period of the respective leases.

(z) Employee benefits

The contributions payable under the Group's retirement plans are recognised as an expense in the consolidated income statement as incurred and according to the contribution determined by the plans. Further information is set out in Note 35.

Termination benefits, such as employee reduction expenses, are recognised when, and only when, the Group demonstrably commits itself to terminate employment or to provide benefits as a result of voluntary redundancy by having a detailed formal plan which is without realistic possibility of withdrawal.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

(aa) Income tax

Income tax comprises current and deferred tax. Current tax is calculated on taxable income by applying the applicable tax rates. Deferred tax is provided using the balance sheet liability method on all temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes only to the extent that it is probable that future taxable income will be available against which the assets can be utilised. Deferred tax is calculated on the basis of the enacted tax rates or substantially enacted tax rates that are expected to apply in the period when the asset is realised or the liability is settled. The effect on deferred tax of any changes in tax rates is charged or credited to the consolidated income statement, except for the effect of a change in tax rate on the carrying amount of deferred tax assets and liabilities which were previously charged or credited to other comprehensive income or directly in equity.

The tax value of losses expected to be available for utilisation against future taxable income is set off against the deferred tax liability within the same legal tax unit and jurisdiction to the extent appropriate, and is not available for set off against the taxable profit of another legal tax unit. The carrying amount of a deferred tax asset is reviewed at each balance sheet date and is reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(bb) Dividends

Dividends and distributions of profits proposed in the profit appropriation plan which will be authorized and declared after the balance sheet date, are not recognised as a liability at the balance sheet date and are separately disclosed in the notes to the financial statements. Dividends are recognised as a liability in the period in which they are declared.

(cc) Segment reporting

Operating segments, and the amounts of each segment item reported in the consolidated financial statements, are identified from the financial information provided regularly to the Group's chief operating decision maker for the purposes of allocating resources to, and assessing the performance of the Group's various lines of business.

3 TURNOVER

Turnover primarily represents revenue from the sales of crude oil, natural gas, refined petroleum products and chemical products.

4 OTHER OPERATING REVENUES

	2016	2015
	RMB million	RMB million
Sale of materials, service and others	49,812	41,524
Rental income	909	974
	50,721	42,498

5 SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

The following items are included in selling, general and administrative expenses:

	2016	2015
	RMB million	RMB million
Operating lease charges	14,410	14,384
Auditor's remuneration:		
– audit services	73	64
– others	2	—

Impairment losses:

– trade accounts receivable	230	40
– other receivables	(12)	49
– accounts prepayments	13	(25)

6 PERSONNEL EXPENSES

	2016	2015
	RMB million	RMB million
Salaries, wages and other benefits	55,502	48,741
Contributions to retirement schemes (Note 35)	8,385	7,878
	63,887	56,619

7 TAXES OTHER THAN INCOME TAX

	2016	2015
	RMB million	RMB million
Consumption tax (i)	193,836	198,754
City construction tax (ii)	18,155	18,195
Education surcharge	13,695	13,686
Resources tax	3,871	4,853
Other	2,449	861
	232,006	236,349

Note:

(i) Consumption tax was levied based on sales quantities of taxable products, tax rate of products is presented as below:

	Effective from 13 December 2014	Effective from 13 January 2015
	RMB/Ton	RMB/Ton
Gasoline	1,943.20	2,109.76
Diesel	1,293.60	1,411.20
Naphtha	1,939.00	2,105.20
Solvent oil	1,794.80	1,948.64
Lubricant oil	1,576.40	1,711.52
Fuel oil	1,116.50	1,218.00
Jet fuel oil	1,370.60	1,495.20

City construction tax is levied on an entity based on its total paid amount of value-added tax, consumption tax and business tax. Pursuant to the Circular on the Overall Promotion of Pilot Program of Levying VAT (ii) in place of Business Tax (Cai Shui [2016] 36) jointly issued by the Ministry of Finance and the State Administration of Taxation, revenue from modern service of the subsidiaries of the Group, are subject to VAT from 1 May 2016, and the applicable tax rate is 6%, while the business tax was from 3% to 5% before then.

8 OTHER OPERATING INCOME/(EXPENSE), NET

	2016	2015
	RMB million	RMB million
Gain on dilution and remeasurement of interests in the Pipeline Ltd (i)	20,562	—
Government grant (ii)	4,101	5,131
Ineffective portion of change in fair value of cash flow hedges	304	165
Net realised and unrealised gain on derivative financial instruments not qualified as hedging	195	870
Impairment losses on long-lived assets (iii)	(16,425)	(5,146)
Loss on disposal of property, plant, equipment and other non-current assets, net	(1,528)	(748)
Fines, penalties and compensations	(152)	(90)
Donations	(133)	(112)
Others	(1,238)	(199)
	5,686	(129)

Note:

On 12 December 2016, the Group entered into the Capital Injection Agreement in relation to Sinopec Sichuan To East China Gas Pipeline Co., Ltd. (“Pipeline Ltd”), a wholly-owned subsidiary of the Group, with China Life Insurance Company Limited (“China Life”) and SDIC Communications Holding Co., Ltd. (“SDIC Holding”) (the “Capital Injection Agreement”). According to the provisions of the Capital Injection Agreement, China Life and SDIC Holding made cash contribution to the Pipeline Ltd amounting to RMB 20 billion and RMB 2.8 billion, respectively, in exchange for 43.86% and 6.14% equity interest, respectively, in the Pipeline Ltd. Thereafter, the (i) Group’s equity interest in the Pipeline Ltd was diluted from 100% to 50%. Based on the composition and decision making mechanism of the Board of Directors of the Pipeline Ltd, the Group determines that it has only retained the power to participate in the financial and operating policy decisions of the Pipeline Ltd, and was no longer exclusively possessing the power to govern policy decisions of the Pipeline Ltd. Consequently, the Group has deconsolidated the Pipeline Ltd and started accounting for its 50% equity interest in the Pipeline Ltd as an investment in associate company. In this connection, the Group recognized a gain of RMB 20.562 billion, which was resulted from the dilution and the remeasurement of the remaining 50% equity interest in the Pipeline Ltd.

Government grants for the years ended 31 December 2016 and 2015 primarily represent financial appropriation (ii) income and non-income tax refunds received from respective government agencies without conditions or other contingencies attached to the receipts of the grants.

Impairment losses on long-lived assets for the year ended 31 December 2016 primarily represent impairment losses recognised in the exploration and production (“E&P”) segment of RMB 11,605 million (2015: RMB 4,864 million), the chemicals segment of RMB 2,898 million (2015: RMB 142 million) and for the refining segment of RMB 1,655 million (2015: RMB 9 million) (Note 36), most of which are impairment losses on property, plant and equipment (Note 16). The primary factors resulting in the E&P segment impairment loss were downward revision of oil and gas reserve due to price change and high operating and development cost for certain oil fields. The carrying values of these E&P properties were written down to recoverable amounts which were determined based on the present values of the expected future cash flows of the assets using a pre-tax discount rate 10.47% (2015: (iii) 10.80%). Further future downward revisions to the Group’s oil price outlook by 10% or more would lead to further impairments which, in aggregate, are likely to be material. It is estimated that a general decrease of 10% in oil price, with all other variables held constant, would result in additional impairment loss in E&P segment by approximately RMB 3,010 million. It is estimated that a general increase of 5% in operating cost, with all other variables held constant, would result in additional impairment loss in E&P segment by approximately RMB 1,193 million. It is estimated that a general increase of 5% in discount rate, with all other variables held constant, would result in additional impairment loss in E&P segment by approximately RMB 439 million. The assets in the chemicals and refining segment were written down mainly due to the suspension of operations of certain production facilities.

9 INTEREST EXPENSE

	2016 RMB million	2015 RMB million
Interest expense incurred	9,021	8,273
Less: Interest expense capitalised*	(859)	(1,221)
	8,162	7,052
Accretion expenses (Note 31)	1,057	1,081
Interest expense	9,219	8,133
* Interest rates per annum at which borrowing costs were capitalised for construction in progress	2.65% to 4.82%	2.6% to 5.9%

10 TAX EXPENSE

Tax expense in the consolidated income statement represents:

	2016 RMB million	2015 RMB million
Current tax		
– Provision for the year	21,313	13,677
– Adjustment of prior years	228	279
Deferred taxation (Note 27)	(834)	(1,343)
	20,707	12,613

Reconciliation between actual income tax expense and the expected income tax expense at applicable statutory tax rates is as follows:

	2016 RMB million	2015 RMB million
Profit before taxation	80,151	56,411
Expected PRC income tax expense at a statutory tax rate of 25%	20,038	14,103
Tax effect of non–deductible expenses	1,529	788
Tax effect of non–taxable income	(2,786)	(2,583)
Tax effect of preferential tax rate (i)	83	(1,033)
Effect of difference between income taxes at foreign operations tax rate and the PRC statutory tax rate	299	391
Tax effect of utilisation of previously unrecognised tax losses and temporary differences	(453)	(235)
Tax effect of tax losses not recognised	958	828
Write–down of deferred tax assets	811	75
Adjustment of prior years	228	279
Actual income tax expense	20,707	12,613

Note:

The provision for PRC current income tax is based on a statutory income tax rate of 25% of the assessable income of the Group as determined in accordance with the relevant income tax rules and regulations of the PRC, except for (i) certain entities of the Group in western regions in the PRC are taxed at preferential income tax rate of 15% through the year 2020.

11 DIRECTORS' AND SUPERVISORS' EMOLUMENTS

(a) Directors' and supervisors' emoluments

The emoluments of every director and supervisor is set out below:

Name	Emoluments paid or receivable in respect of director's other services in connection with the management of the affairs of the Company or its subsidiary undertaking			Emoluments paid or receivable in respect of a person's services as a director, whether of the Company or its subsidiary undertaking

- (iv) Mr Xu Bin, Mr. Geng Limin, Mr. Li Xinjian, Mr. Zhou Shiliang and Mr. Chen Mingzheng ceased being supervisors from 27 May 2015; Mr. Liu Zhongyun, Mr. Zhou Hengyou and Mr. Wang Yajun were elected as supervisors from 27 May 2015. Mr. Liu Yun ceased being director and was elected as supervisor from 27 May 2015.
- (v) Mr. Kang Mingde ceased being independent supervisor from 27 May 2015.

12 SENIOR MANAGEMENT'S EMOLUMENTS

For the year ended 31 December 2016, the five highest paid individuals in the Company included one director and four senior management. The emolument paid to each of one director and four senior management was below RMB 1,000 thousand. The total salaries, wages and other benefits was RMB 3,244 thousand, and the total amount of their retirement scheme contributions was RMB 333 thousand. For the year ended 31 December 2015, all the five highest paid individuals in the Company were senior management.

13 DIVIDENDS

Dividends payable to owners of the Company attributable to the year represent:

	2016 RMB million	2015 RMB million
Dividends declared and paid during the year of RMB 0.079 per share (2015: RMB 0.09 per share)	9,565	10,896
Dividends declared after the balance sheet date of RMB 0.17 per share (2015: RMB 0.06 per share)	20,582	7,264
	30,147	18,160

Pursuant to the Company's Articles of Association and a resolution passed at the Directors' meeting on 26 August 2016, the directors authorised to declare the interim dividends for the year ending 31 December 2016 of RMB 0.079 (2015: RMB 0.09) per share totaling RMB 9,565 million (2015: RMB 10,896 million). Dividends were paid on 21 September 2016.

Pursuant to a resolution passed at the director's meeting on 24 March 2017, final dividends in respect of the year ended 31 December 2016 of RMB 0.17 (2015: RMB 0.06) per share totaling RMB 20,582 million (2015: RMB 7,264 million) were proposed for shareholders' approval at the Annual General Meeting. Final cash dividend proposed after the balance sheet date has not been recognised as a liability at the balance sheet date.

Dividends payable to owners of the Company attributable to the previous financial year, approved during the year represent:

	2016 RMB million	2015 RMB million
Final cash dividends in respect of the previous financial year, approved and paid during the year of RMB 0.06 per share (2015: RMB 0.11 per share)	7,264	13,318

Pursuant to the shareholders' approval at the Annual General Meeting on 18 May 2016, a final dividend of RMB 0.06 per share totaling RMB 7,264 million according to total shares of 23 June 2016 was approved. All dividends have been paid in the year ended 31 December 2016.

Pursuant to the shareholders' approval at the Annual General Meeting on 27 May 2015, a final dividend of RMB 0.11 per share totaling RMB 13,318 million according to total shares of 18 June 2015 was approved. Cash dividends have been paid on 19 June 2015.

14 OTHER COMPREHENSIVE INCOME

	2016			2015		
	Before tax amount RMB million	Tax effect RMB million	Net of tax amount RMB million	Before tax amount RMB million	Tax effect RMB million	Net of tax amount RMB million
Cash flow hedges:

15 BASIC AND DILUTED EARNINGS PER SHARE

The calculation of basic earnings per share for the year ended 31 December 2016 is based on the profit attributable to ordinary owners of the Company of RMB 46,672 million (2015: RMB 32,512 million) and the weighted average number of shares of 121,071,209,646 (2015: 120,852,547,200) during the year.

The calculation of diluted earnings per share for the year ended 31 December 2016 is based on the profit attributable to ordinary owners of the Company (diluted) of RMB 46,669 million (2015: RMB 32,510 million) and the weighted average number of shares of 121,071,209,646 (2015: 120,852,547,200) calculated as follows:

(i) Profit attributable to ordinary owners of the Company (diluted)

	2016 RMB million	2015 RMB million
Profit attributable to ordinary owners of the Company	46,672	32,512
After tax effect of employee share option scheme of Shanghai Petrochemical	(3)	(2)
Profit attributable to ordinary owners of the Company (diluted)	46,669	32,510

(ii) Weighted average number of shares (diluted)

	2016 Number of shares	2015 Number of shares
Weighted average number of shares at 31 December	121,071,209,646	120,852,547,200
Weighted average number of shares (diluted) at 31 December	121,071,209,646	120,852,547,200

16 PROPERTY, PLANT AND EQUIPMENT

Net book value:

Balance at 1 January 2015	61,125	239,905	403,252	704,282
Balance at 31 December 2015	63,404	238,943	431,102	733,449
Balance at 31 December 2016	66,348	215,124	409,122	690,594

The additions to oil and gas properties of the Group for the year ended 31 December 2016 included RMB 3,420 million (2015: RMB 2,899 million) of estimated dismantlement costs for site restoration (Note 31).

17 CONSTRUCTION IN PROGRESS

	2016	2015
	RMB million	RMB million
Balance at 1 January	152,325	177,716
Additions	81,837	106,809
Dry hole costs written off	(7,467)	(6,099)
Transferred to property, plant and equipment	(87,399)	(119,471)
Reclassification to lease prepayments and other long-term assets	(6,900)	(5,600)
Impairment losses for the year	(1,486)	(111)
Disposals	(1,445)	(1,009)
Exchange adjustments	116	90
Balance at 31 December	129,581	152,325

As at 31 December 2016, the amount of capitalised cost of exploratory wells included in construction in progress related to the exploration and production segment was RMB 12,192 million (2015: RMB 16,772 million). The geological and geophysical costs paid during the year ended 31 December 2016 were RMB 2,899 million (2015: RMB 4,347 million).

18 GOODWILL

	31 December	31 December
	2016	2015
	RMB million	RMB million
Cost	14,016	13,928
Less: Accumulated impairment losses	(7,663)	(7,657)
	6,353	6,271

Impairment tests for cash-generating units containing goodwill

Goodwill is allocated to the following Group's cash-generating units:

	Principal activities	31 December	31 December
		2016	2015
		RMB million	RMB million
Sinopec Beijing Yanshan Petrochemical Branch ("Sinopec Yanshan")	Manufacturing of intermediate petrochemical products and petroleum products	1,157	1,157
Sinopec Zhenhai Refining and Chemical Branch ("Sinopec Zhenhai")	Manufacturing of intermediate petrochemical products and petroleum products	4,043	4,043
Sinopec (Hong Kong) Limited	Trading of petrochemical products	941	853
Other units without individually significant goodwill		212	218
		6,353	6,271

Goodwill represents the excess of the cost of purchase over the fair value of the underlying assets and liabilities. The recoverable amounts of the above cash generating units are determined based on value in use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a one-year period and pre-tax discount rates primarily ranging from 10.4% to 11.0% (2015: 10.7% to

11.3%). Cash flows beyond the one-year period are maintained constant.

Key assumptions used for cash flow forecasts for these entities are the gross margin and sales volume. Management determined the budgeted gross margin based on the gross margin achieved in the period immediately before the budget period and management's expectation on the future trend of the prices of crude oil and petrochemical products. The sales volume was based on the production capacity and/or the sales volume in the period immediately before the budget period.

19 INTEREST IN ASSOCIATES

The Group's investments in associates are with companies primarily engaged in the oil and gas, petrochemical, and marketing and distribution operations in the PRC.

The Group's principal associates are as follows:

Name of company	% of ownership interests	Principal activities	Measurement method	Country of incorporation	Principal place of business
Sinopec Sichuan To East China Gas Pipeline Co., Ltd. ("Pipeline Ltd")	50.00	Operation of natural gas pipelines and auxiliary facilities	Equity method	PRC	PRC
Sinopec Finance Company Limited ("Sinopec Finance")	49.00	Provision of non-banking financial services	Equity method	PRC	PRC
Zhongtian Synergetic Energy Company Limited ("Zhongtian Synergetic Energy")	38.75	Manufacturing of coal-chemical products	Equity method	PRC	PRC
China Aviation Oil Supply Company Limited ("China Aviation Oil")	29.00	Marketing and distribution of refined petroleum products	Equity method	PRC	PRC
Caspian Investments Resources Ltd. ("CIR") (i)	50.00	Crude oil and natural gas extraction	Equity method	British Virgin Islands	The Republic of Kazakhstan

The share of profit and other comprehensive loss for the year ended 31 December 2016 in all individually immaterial associates accounted for using equity method in aggregate was RMB 1,977 million (2015: RMB 1,418 million) and RMB 384 million (2015: RMB 632 million) respectively. As at 31 December 2016, the carrying amount of all individually immaterial associates accounted for using equity method in aggregate was RMB 18,395 million (2015: RMB 16,596 million).

Note:

- (i) In August 2015, one of the subsidiaries of Sinopec Group Company completed the acquisition from LUKOIL OVERSEAS WEST PROJECT Ltd. a 50% equity interests in CIR and revised CIR's Articles of Association subsequently. According to the revised CIR's Articles of Association, the Group retained significant influences over CIR. As a result, the Group reclassified the investment interest in CIR from joint ventures to associates. The summarized statement of comprehensive income for the year 2015 of CIR represents the operating result for the period from the date when the Group reclassified the investment interest in CIR from joint ventures to associates to 31 December 2015.

Management is in the process of allocating the fair value to identifiable assets and liabilities of Pipeline Ltd, (ii) therefore the summarised financial information of Pipeline Ltd is based on management's preliminary fair value allocation which may be subject to further change.

- (iii) Other reflects the excess of fair value of the consideration transferred over the Group's share of the fair value of the investee's identifiable assets and liabilities as of the transaction date.
- (iv) The summarised statement of comprehensive income of Pipeline Ltd represents the operating results of the Pipeline Ltd for the period from the date when the Group lost control to 31 December 2016 (Note 8(i)).
- (v) The main asset of Zhongtian Synergetic Energy was under construction during the year ended 31 December 2016.

20 INTEREST IN JOINT VENTURES

The Group's principal interests in joint ventures are as follows:

Name of entity	% of ownership interests	Principal activities	Measurement method	Country of incorporation	Principal place of business
Fujian Refining & Petrochemical Company Limited ("FREP")	50.00	Manufacturing refining oil products	Equity method	PRC	PRC
BASF–YPC Company Limited ("BASF–YPC")	40.00	Manufacturing and distribution of petrochemical products	Equity method	PRC	PRC
Mansarovar Energy Colombia Ltd. ("Mansarovar")	50.00	Crude oil and natural gas extraction	Equity method	British Bermuda	Colombia
Taihu Limited ("Taihu")	49.00	Crude oil and natural gas extraction	Equity method	Cyprus	Russia
Yanbu Aramco Sinopec Refining Company Ltd. ("YASREF")	37.50	Petroleum refining and processing business	Equity method	Saudi Arabia	Saudi Arabia

24 TRADE ACCOUNTS RECEIVABLE AND BILLS RECEIVABLE

	31 December 2016	31 December 2015
	RMB million	RMB million
Amounts due from third parties	39,994	34,261
Amounts due from Sinopec Group Company and fellow subsidiaries	6,398	18,672
Amounts due from associates and joint ventures	4,580	3,734
	50,972	56,667
Less: Impairment losses for bad and doubtful debts	(683)	(525)
Trade accounts receivable, net	50,289	56,142
Bills receivable	13,197	10,964
	63,486	67,106

The ageing analysis of trade accounts and bills receivables (net of impairment losses for bad and doubtful debts) is as follows:

	31 December 2016	31 December 2015
	RMB million	RMB million
Within one year	63,051	66,342
Between one and two years	233	715
Between two and three years	177	36
Over three years	25	13
	63,486	67,106

Impairment losses for bad and doubtful debts are analysed as follows:

	2016	2015
	RMB million	RMB million
Balance at 1 January	525	530
Provision for the year	238	40
Written back for the year	(8)	(13)
Written off for the year	(72)	(38)
Others	—	6
Balance at 31 December	683	525

Sales are generally on a cash term. Credit is generally only available for major customers with well-established trading records. Amounts due from Sinopec Group Company and fellow subsidiaries are repayable under the same terms.

Trade accounts receivable and bills receivables (net of impairment losses for bad and doubtful debts) primarily represent receivables that are neither past due nor impaired. These receivables relate to a wide range of customers for whom there is no recent history of default.

25 INVENTORIES

31 December 31 December

	2016	2015
	RMB million	RMB million
Crude oil and other raw materials	75,680	59,376
Work in progress	14,141	22,762
Finished goods	65,772	66,320
Spare parts and consumables	1,838	1,552
	157,431	150,010
Less: Allowance for diminution in value of inventories	(920)	(4,402)
	156,511	145,608

The cost of inventories recognised as an expense in the consolidated income statement amounted to RMB 1,461,285 million for the year ended 31 December 2016 (2015: RMB 1,572,798 million). It includes the write-down of inventories of RMB 430 million (2015: RMB 3,687 million) and the reversal of write-down of inventories made in prior years of RMB 10 million (2015: RMB 34 million), which were recorded in purchased crude oil, products and operating supplies and expenses in the consolidated income statement. The write-down of inventories of RMB 4,021 million for the year ended 31 December 2016 (2015: RMB 2,931 million) was realised primarily with the sales of inventories.

26 PREPAID EXPENSES AND OTHER CURRENT ASSETS

	49,767	51,277

27 DEFERRED TAX ASSETS AND LIABILITIES

Deferred tax assets and deferred tax liabilities before offset are attributable to the items detailed in the table below:

	Deferred tax assets		Deferred tax liabilities		Net balance	
	31 December 2016	31 December 2015	31 December 2016	31 December 2015	31 December 2016	31 December 2015
	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Current						
Receivables and inventories	347	1,755	—	—	347	1,755
Accruals	391	413	—	—	391	413
Cash flow hedges	27	348	(242)	(98)	(215)	250
Non-current						
Property, plant and equipment	11,264	8,209	(14,615)	(17,340)	(3,351)	(9,131)
Tax losses carried forward	2,477	5,883	—	—	2,477	5,883
Others	133	98	(229)	(58)	(96)	40
Deferred tax assets/(liabilities)	14,639	16,706	(15,086)	(17,496)	(447)	(790)

At 31 December 2016, certain subsidiaries of the Company did not recognise deferred tax of deductible loss carried forward of RMB 19,194 million (2015: RMB 19,338 million), of which RMB 3,833 million (2015: RMB 4,080 million) was incurred for the year ended 31 December 2016, because it was not probable that the future taxable profits will be realised. These deductible losses carried forward of RMB 3,777 million, RMB 2,634 million, RMB 4,870 million, RMB 4,080 million and RMB 3,833 million will expire in 2017, 2018, 2019, 2020, 2021 and after, respectively.

Periodically, management performed assessment on the probability that future taxable profit will be available over the period which the deferred tax assets can be realised or utilised. In assessing the probability, both positive and negative evidence was considered, including whether it is probable that the operations will have sufficient future taxable profits over the periods which the deferred tax assets are deductible or utilised and whether the tax losses result from identifiable causes which are unlikely to recur. During the year ended 31 December 2016, write-down of deferred tax assets amounted to RMB 811 million (2015: RMB 75 million) (Note 10).

27 DEFERRED TAX ASSETS AND LIABILITIES (Continued)

31 PROVISIONS

Provisions primarily represent provision for future dismantlement costs of oil and gas properties. The Group has mainly committed to the PRC government to establish certain standardised measures for the dismantlement of its oil and gas properties by making reference to the industry practices and is thereafter constructively obligated to take dismantlement measures of its oil and gas properties.

Movement of provision of the Group's obligations for the dismantlement of its oil and gas properties is as follow:

	2016	2015
	RMB million	RMB million
Balance at 1 January	33,115	29,613
Provision for the year	3,420	2,899
Accretion expenses	1,057	1,081
Utilised for the year	(843)	(599)
Exchange adjustments	169	121
Balance at 31 December	36,918	33,115

32 SHARE CAPITAL

	31 December 2016	31 December 2015
	RMB million	RMB million
Registered, issued and fully paid		
95,557,771,046 listed A shares (2015: 95,557,771,046) of RMB 1.00 each	95,558	95,558
25,513,438,600 listed H shares (2015: 25,513,438,600) of RMB 1.00 each	25,513	25,513
	121,071	121,071

The Company was established on 25 February 2000 with a registered capital of 68.8 billion domestic state-owned shares with a par value of RMB 1.00 each. Such shares were issued to Sinopec Group Company in consideration for the assets and liabilities transferred to the Company (Note 1).

Pursuant to the resolutions passed at an Extraordinary General Meeting held on 25 July 2000 and approvals from relevant government authorities, the Company is authorised to increase its share capital to a maximum of 88.3 billion shares with a par value of RMB 1.00 each and offer not more than 19.5 billion shares with a par value of RMB 1.00 each to investors outside the PRC. Sinopec Group Company is authorised to offer not more than 3.5 billion shares of its shareholdings in the Company to investors outside the PRC. The shares sold by Sinopec Group Company to investors outside the PRC would be converted into H shares.

In October 2000, the Company issued 15,102,439,000 H shares with a par value of RMB 1.00 each, representing 12,521,864,000 H shares and 25,805,750 American Depositary Shares ("ADSs", each representing 100 H shares), at prices of HKD 1.59 per H share and USD 20.645 per ADS, respectively, by way of a global initial public offering to Hong Kong and overseas investors. As part of the global initial public offering, 1,678,049,000 state-owned ordinary shares of RMB 1.00 each owned by Sinopec Group Company were converted into H shares and sold to Hong Kong and overseas investors.

In July 2001, the Company issued 2.8 billion listed A shares with a par value of RMB 1.00 each at RMB 4.22 by way of a public offering to natural persons and institutional investors in the PRC.

During the year ended 31 December 2010, the Company issued 88,774 listed A shares with a par value of RMB 1.00 each, as a result of exercise of 188,292 warrants entitled to the Bonds with Warrants.

During the year ended 31 December 2011, the Company issued 34,662 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

During the year ended 31 December 2012, the Company issued 117,724,450 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

32 SHARE CAPITAL (Continued)

On 14 February 2013, the Company issued 2,845,234,000 listed H shares (“the Placing”) with a par value of RMB 1.00 each at the Placing Price of HKD 8.45 per share. The aggregate gross proceeds from the Placing amounted to approximately HKD 24,042,227,300 and the aggregate net proceeds (after deduction of the commissions and estimated expenses) amounted to approximately HKD 23,970,100,618.

In June 2013, the Company issued 21,011,962,225 listed A shares and 5,887,716,600 listed H shares as a result of bonus issues of 2 shares converted from the retained earnings, and 1 share transferred from the share premium for every 10 existing shares.

During the year ended 31 December 2013, the Company issued 114,076 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

During the year ended 31 December 2014, the Company issued 1,715,081,853 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

During the year ended 31 December 2015, the Company issued 2,790,814,006 listed A shares with a par value of RMB 1.00 each, as a result of conversion by the holders of the 2011 Convertible Bonds.

All A shares and H shares rank *pari passu* in all material aspects.

Capital management

Management optimises the structure of the Group’s capital, which comprises of equity and debts. In order to maintain or adjust the capital structure of the Group, management may cause the Group to issue new shares, adjust the capital expenditure plan, sell assets to reduce debt, or adjust the proportion of short-term and long-term loans. Management monitors capital on the basis of the debt-to-capital ratio, which is calculated by dividing long-term loans (excluding current portion), including long-term debts and loans from Sinopec Group Company and fellow subsidiaries, by the total of equity attributable to owners of the Company and long-term loans (excluding current portion), and liability-to-asset ratio, which is calculated by dividing total liabilities by total assets. Management’s strategy is to make appropriate adjustments according to the Group’s operating and investment needs and the changes of market conditions, and to maintain the debt-to-capital ratio and the liability-to-asset ratio of the Group at a range considered reasonable. As at 31 December 2016, the debt-to-capital ratio and the liability-to-asset ratio of the Group were 14.2 % (2015: 17.1 %) and 44.5% (2015: 45.5%), respectively.

The schedule of the contractual maturities of loans and commitments are disclosed in Notes 28 and 33, respectively.

There were no changes in the management’s approach to capital management of the Group during the year. Neither the Company nor any of its subsidiaries is subject to externally imposed capital requirements.

33 COMMITMENTS AND CONTINGENT LIABILITIES

Operating lease commitments

The Group leases land and buildings, service stations and other equipment through non-cancellable operating leases. These operating leases do not contain provisions for contingent lease rentals. None of the rental agreements contains escalation provisions that may require higher future rental payments.

At 31 December 2016 and 2015, the future minimum lease payments under operating leases are as follows:

	31 December	31 December
--	-------------	-------------

	2016	2015
	RMB million	RMB million
Within one year	14,917	13,737
Between one and two years	14,228	13,265
Between two and three years	13,966	13,199
Between three and four years	13,217	13,091
Between four and five years	12,980	12,430
Thereafter	275,570	284,300
	344,878	350,022

33 COMMITMENTS AND CONTINGENT LIABILITIES (Continued)

Capital commitments

At 31 December 2016 and 2015, capital commitments are as follows:

	31 December 2016	31 December 2015
	RMB million	RMB million
Authorised and contracted for (i)	116,379	113,017
Authorised but not contracted for	31,720	47,043
	148,099	160,060

These capital commitments relate to oil and gas exploration and development, refining and petrochemical production capacity expansion projects, the construction of service stations and oil depots and investment commitments.

Note:

(i) The investment commitments of the Group is RMB 4,173 million (2015: RMB 4,089 million).

Commitments to joint ventures

Pursuant to certain of the joint venture agreements entered into by the Group, the Group is obliged to purchase products from the joint ventures based on market prices.

Exploration and production licenses

Exploration licenses for exploration activities are registered with the Ministry of Land and Resources. The maximum term of the Group's exploration licenses is 7 years, and may be renewed twice within 30 days prior to expiration of the original term with each renewal being for a two-year term. The Group is obligated to make progressive annual exploration investment relating to the exploration blocks in respect of which the license is issued. The Ministry of Land and Resources also issues production licenses to the Group on the basis of the reserve reports approved by relevant authorities. The maximum term of a full production license is 30 years unless a special dispensation is given by the State Council. The maximum term of production licenses issued to the Group is 80 years as a special dispensation was given to the Group by the State Council. The Group's production license is renewable upon application by the Group 30 days prior to expiration.

The Group is required to make payments of exploration license fees and production right usage fees to the Ministry of Land and Resources annually which are expensed. Payments incurred were approximately RMB 333 million for the year ended 31 December 2016 (2015: RMB 372 million).

Estimated future annual payments are as follows:

	31 December 2016	31 December 2015
	RMB million	RMB million
Within one year	263	283
Between one and two years	123	125
Between two and three years	25	32
Between three and four years	24	22
Between four and five years	25	21
Thereafter	867	834
	1,327	1,317

Contingent liabilities

At 31 December 2016 and 2015, guarantees by the group in respect of facilities granted to the parties below are as follows:

	31 December 2016	31 December 2015
	RMB million	RMB million
Joint ventures	658	703
Associates(ii)	11,545	—
Others	10,669	6,010
	22,872	6,713

33 COMMITMENTS AND CONTINGENT LIABILITIES (Continued)

Contingent liabilities (Continued)

Management monitors the conditions that are subject to the guarantees to identify whether it is probable that a loss has occurred, and recognises any such losses under guarantees when those losses are estimable. At 31 December 2016 and 2015, it was not probable that the Group will be required to make payments under the guarantees. Thus no liabilities have been accrued for a loss related to the Group's obligation under these guarantee arrangements.

Note:

The Group provided a guarantee in respect to standby credit facilities granted to Zhongtian Synergetic Energy by (ii) banks amount to RMB 17,050 million. As at 31 December 2016, the amount withdrawn by Zhongtian Synergetic Energy and guaranteed by the Group was RMB 11,545 million.

Environmental contingencies

Under existing legislation, management believes that there are no probable liabilities that will have a material adverse effect on the financial position or operating results of the Group. The PRC government, however, has moved, and may move further towards more rigorous enforcement of applicable laws, and towards the adoption of more stringent environmental standards. Environmental liabilities are subject to considerable uncertainties which affect management's ability to estimate the ultimate cost of remediation efforts. These uncertainties include (i) the exact nature and extent of the contamination at various sites including, but not limited to refineries, oil fields, service stations, terminals and land development areas, whether operating, closed or sold, (ii) the extent of required cleanup efforts, (iii) varying costs of alternative remediation strategies, (iv) changes in environmental remediation requirements, and (v) the identification of new remediation sites. The amount of such future cost is indeterminable due to such factors as the unknown magnitude of possible contamination and the unknown timing and extent of the corrective actions that may be required. Accordingly, the outcome of environmental liabilities under proposed or future environmental legislation cannot reasonably be estimated at present, and could be material. The Group paid normal routine pollutant discharge fees of approximately RMB 6,358 million in the consolidated financial statements for the year ended 31 December 2016 (2015: RMB 5,813 million).

Legal contingencies

The Group is defendant in certain lawsuits as well as the named party in other proceedings arising in the ordinary course of business. Management has assessed the likelihood of an unfavourable outcome of such contingencies, lawsuits or other proceedings and believes that any resulting liabilities will not have a material adverse effect on the financial position, operating results or cash flows of the Group.

34 RELATED PARTY TRANSACTIONS

Parties are considered to be related to the Group if the Group has the ability, directly or indirectly, to control or jointly control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Group and the party are subject to control or common control. Related parties may be individuals (being members of key management personnel, significant shareholders and/or their close family members) or other entities and include entities which are under the significant influence of related parties of the Group where those parties are individuals, and post-employment benefit plans which are for the benefit of employees of the Group or of any entity that is a related party of the Group.

(a) Transactions with Sinopec Group Company and fellow subsidiaries, associates and joint ventures

The Group is part of a larger group of companies under Sinopec Group Company, which is controlled by the PRC government, and has significant transactions and relationships with Sinopec Group Company and fellow subsidiaries. Because of these relationships, it is possible that the terms of these transactions are not the same as those that would

result from transactions among wholly unrelated parties.

The principal related party transactions with Sinopec Group Company and fellow subsidiaries, associates and joint ventures, which were carried out in the ordinary course of business are as follows:

	Note	2016	2015
		 RMB million	RMB million
Sales of goods	(i)	194,179	211,197
Purchases	(ii)	118,242	92,627
Transportation and storage	(iii)	1,333	1,299
Exploration and development services	(iv)	27,201	37,444
Production related services	(v)	10,816	10,880
Ancillary and social services	(vi)	6,584	6,754
Operating lease charges for land	(vii)	10,474	10,618
Operating lease charges for buildings	(vii)	449	462
Other operating lease charges	(vii)	456	302
Agency commission income	(viii)	129	116
Interest income	(ix)	209	207
Interest expense	(x)	996	1,194
Net deposits placed with related parties	(ix)	(21,770)	(14,082)
Net loans repaid to related parties	(xi)	(24,877)	(57,881)

The amounts set out in the table above in respect of the year ended 31 December 2016 and 2015 represent the relevant costs and income as determined by the corresponding contracts with the related parties.

34 RELATED PARTY TRANSACTIONS (Continued)

(a) Transactions with Sinopec Group Company and fellow subsidiaries, associates and joint ventures (Continued) Included in the transactions disclosed above, for the year ended 31 December 2016 are: a) purchases by the Group from Sinopec Group Company and fellow subsidiaries amounting to RMB 114,526 million (2015: RMB 112,089 million) comprising purchases of products and services (i.e. procurement, transportation and storage, exploration and development services and production related services) of RMB 96,023 million (2015: RMB 93,061 million), ancillary and social services provided by Sinopec Group Company and fellow subsidiaries of RMB 6,584 million (2015: RMB 6,754 million), operating lease charges for land and buildings paid by the Group of RMB 10,474 million and RMB 449 million (2015: RMB 10,618 million and RMB 462 million), respectively and interest expenses of RMB 996 million (2015: RMB 1,194 million); and b) sales by the Group to Sinopec Group Company and fellow subsidiaries amounting to RMB 56,251 million (2015: RMB 77,747 million), comprising RMB 56,010 million (2015: RMB 77,513 million) for sales of goods, RMB 209 million (2015: RMB 207 million) for interest income and RMB 32 million (2015: RMB 27 million) for agency commission income.

At 31 December 2016 and 2015, there was no guarantee given to banks by the Group in respect of banking facilities to related parties, except for the guarantees disclosed in Note 33.

The directors of the Company are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and on normal commercial terms or in accordance with the agreements governing such transactions, and this has been confirmed by the independent directors.

Note:

- (i) Sales of goods represent the sale of crude oil, intermediate petrochemical products, petroleum products and ancillary materials.
- (ii) Purchases represent the purchase of materials and utility supplies directly related to the Group's operations such as the procurement of raw and ancillary materials and related services, supply of water, electricity and gas.
- (iii) Transportation and storage represent the cost for the use of railway, road and marine transportation services, pipelines, loading, unloading and storage facilities.
- (iv) Exploration and development services comprise direct costs incurred in the exploration and development such as geophysical, drilling, well testing and well measurement services.

Production related services represent ancillary services rendered in relation to the Group's operations such as equipment repair and general maintenance, insurance premium, technical research, communications, firefighting, (v) security, product quality testing and analysis, information technology, design and engineering, construction of oilfield ground facilities, refineries and chemical plants, manufacture of replacement parts and machinery, installation, project management and environmental protection.

Ancillary and social services represent expenditures for social welfare and support services such as educational (vi) facilities, media communication services, sanitation, accommodation, canteens, property maintenance and management services.

(vii) Operating lease charges represent the rental paid to Sinopec Group Company for operating leases in respect of land, buildings and equipment.

(viii)

Agency commission income represents commission earned for acting as an agent in respect of sales of products and purchase of materials for certain entities owned by Sinopec Group Company.

(ix) Interest income represents interest received from deposits placed with Sinopec Finance Company Limited and Sinopec Century Bright Capital Investment Limited, finance companies controlled by Sinopec Group Company. The applicable interest rate is determined in accordance with the prevailing saving deposit rate. The balance of deposits at 31 December 2016 was RMB 40,073 million (2015: RMB 18,303 million).

(x) Interest expense represents interest charges on the loans and advances obtained from Sinopec Group Company and fellow subsidiaries.

(xi) The Group obtained or repaid loans from or to Sinopec Group Company and fellow subsidiaries.

In connection with the Reorganisation, the Company and Sinopec Group Company entered into a number of agreements under which 1) Sinopec Group Company will provide goods and products and a range of ancillary, social and supporting services to the Group and 2) the Group will sell certain goods to Sinopec Group Company. These agreements impacted the operating results of the Group for the year ended 31 December 2016. The terms of these agreements are summarised as follows:

The Company has entered into a non-exclusive “Agreement for Mutual Provision of Products and Ancillary Services” (“Mutual Provision Agreement”) with Sinopec Group Company effective from 1 January 2000 in which Sinopec Group Company has agreed to provide the Group with certain ancillary production services, construction services, information advisory services, supply services and other services and products. While each of Sinopec Group Company and the Company is permitted to terminate the Mutual Provision Agreement upon at least six months notice, Sinopec Group Company has agreed not to terminate the agreement if the Group is unable to obtain comparable services from a third party. The pricing policy for these services and products provided by Sinopec Group Company to the Group is as follows:

- (1) the government-prescribed price;
- (2) where there is no government-prescribed price, the government-guidance price;
- (3) where there is neither a government-prescribed price nor a government-guidance price, the market price; or
- (4) where none of the above is applicable, the price to be agreed between the parties, which shall be based on a reasonable cost incurred in providing such services plus a profit margin not exceeding 6%.

34 RELATED PARTY TRANSACTIONS (Continued)

(a) Transactions with Sinopec Group Company and fellow subsidiaries, associates and joint ventures (Continued)

The Company has entered into a non-exclusive “Agreement for Provision of Cultural and Educational, Health Care and Community Services” with Sinopec Group Company effective from 1 January 2000 in which Sinopec Group Company has agreed to provide the Group with certain cultural, educational, health care and community services on the same pricing terms and termination conditions as described in the above Mutual Provision Agreement.

The Company has entered into a series of lease agreements with Sinopec Group Company to lease certain lands and buildings effective on 1 January 2000. The lease term is 40 or 50 years for lands and 20 years for buildings, respectively. The Company and Sinopec Group Company can renegotiate the rental amount every three years for land. The Company and Sinopec Group Company can renegotiate the rental amount for buildings every year. However such amount cannot exceed the market price as determined by an independent third party.

The Company has entered into agreements with Sinopec Group Company effective from 1 January 2000 under which the Group has been granted the right to use certain trademarks, patents, technology and computer software developed by Sinopec Group Company.

The Company has entered into a service stations franchise agreement with Sinopec Group Company effective from 1 January 2000 under which its service stations and retail stores would exclusively sell the refined products supplied by the Group.

Amounts due from/to Sinopec Group Company and fellow subsidiaries, associates and joint ventures included in the following accounts captions are summarised as follows:

	31 December 2016 RMB million	31 December 2015 RMB million
Trade accounts receivable	10,978	22,393
Prepaid expenses and other current assets	13,430	9,084
Long-term prepayments and other assets	20,385	17,760
Total	44,793	49,237
Trade accounts payable	19,419	13,195
Accrued expenses and other payables	21,590	20,457
Other long-term liabilities	9,998	8,226
Short-term loans and current portion of long-term loans from Sinopec Group Company and fellow subsidiaries	18,580	43,929
Long-term loans excluding current portion from Sinopec Group Company and fellow subsidiaries	44,772	44,300
Total	114,359	130,107

Amounts due from/to Sinopec Group Company and fellow subsidiaries, associates and joint ventures, other than short-term loans and long-term loans, bear no interest, are unsecured and are repayable in accordance with normal commercial terms. The terms and conditions associated with short-term loans and long-term loans payable to Sinopec Group Company and fellow subsidiaries are set out in Note 28.

The long-term borrowings mainly include an interest-free loan with a maturity period of 20 years amounting to RMB 35,560 million from the Sinopec Group Company (a state-owned enterprise) through the Sinopec Finance. This borrowing is a special arrangement to reduce financing costs and improve liquidity of the Company during its initial global offering in 2000.

As at and for the year ended 31 December 2016, and as at and for the year ended 31 December 2015, no individually significant impairment losses for bad and doubtful debts were recognised in respect of amounts due from Sinopec Group Company and fellow subsidiaries, associates and joint ventures.

(b) Key management personnel emoluments

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, including directors and supervisors of the Group. The key management personnel compensation is as follows:

	2016	2015
	RMB'000	RMB'000
Short-term employee benefits	5,648	5,225
Retirement scheme contributions	499	510
	6,147	5,735

(c) Contributions to defined contribution retirement plans

The Group participates in various defined contribution retirement plans organised by municipal and provincial governments for its staff. The details of the Group's employee benefits plan are disclosed in Note 35. As at 31 December 2016 and 2015, the accrual for the contribution to post-employment benefit plans was not material.

34 RELATED PARTY TRANSACTIONS (Continued)

(d) Transactions with other state-controlled entities in the PRC

The Group is a state-controlled energy and chemical enterprise and operates in an economic regime currently dominated by entities directly or indirectly controlled by the PRC government through its government authorities, agencies, affiliations and other organisations (collectively referred as “state-controlled entities”).

Apart from transactions with Sinopec Group Company and fellow subsidiaries, the Group has transactions with other state-controlled entities, include but not limited to the followings:

• sales and purchases of goods and ancillary materials;

• rendering and receiving services;

• lease of assets;

• depositing and borrowing money; and

• uses of public utilities.

These transactions are conducted in the ordinary course of the Group’s business on terms comparable to those with other entities that are not state–controlled.

35 EMPLOYEE BENEFITS PLAN

As stipulated by the regulations of the PRC, the Group participates in various defined contribution retirement plans organised by municipal and provincial governments for its staff. The Group is required to make contributions to the retirement plans at rates ranging from 17.0% to 24.0% of the salaries, bonuses and certain allowances of its staff. In addition, the Group provides a supplementary retirement plan for its staff at rates not exceeding 5% of the salaries. The Group has no other material obligation for the payment of pension benefits associated with these plans beyond the annual contributions described above. The Group’s contributions for the year ended 31 December 2016 were RMB 8,385 million (2015: RMB 7,878 million).

36 SEGMENT REPORTING

Segment information is presented in respect of the Group’s business segments. The format is based on the Group’s management and internal reporting structure.

In a manner consistent with the way in which information is reported internally to the Group’s chief operating decision maker for the purposes of resource allocation and performance assessment, the Group has identified the following five reportable segments. No operating segments have been aggregated to form the following reportable segments.

(i) Exploration and production, which explores and develops oil fields, produces crude oil and natural gas and sells such products to the refining segment of the Group and external customers.

Refining, which processes and purifies crude oil, that is sourced from the exploration and production segment of (ii) the Group and external suppliers, and manufactures and sells petroleum products to the chemicals and marketing and distribution segments of the Group and external customers.

(iii)

Marketing and distribution, which owns and operates oil depots and service stations in the PRC, and distributes and sells refined petroleum products (mainly gasoline and diesel) in the PRC through wholesale and retail sales networks.

- (iv) Chemicals, which manufactures and sells petrochemical products, derivative petrochemical products and other chemical products mainly to external customers.
- (v) Corporate and others, which largely comprises the trading activities of the import and export companies of the Group and research and development undertaken by other subsidiaries.

The segments were determined primarily because the Group manages its exploration and production, refining, marketing and distribution, chemicals, and corporate and others businesses separately. The reportable segments are each managed separately because they manufacture and/or distribute distinct products with different production processes and due to their distinct operating and gross margin characteristics.

36 SEGMENT REPORTING (Continued)

(1) Information of reportable segmental revenues, profits or losses, assets and liabilities

The Group's chief operating decision maker evaluates the performance and allocates resources to its operating segments on an operating income basis, without considering the effects of finance costs or investment income. Inter-segment transfer pricing is based on the market price or cost plus an appropriate margin, as specified by the Group's policy.

Assets and liabilities dedicated to a particular segment's operations are included in that segment's total assets and liabilities. Segment assets include all tangible and intangible assets, except for interest in associates and joint ventures, investments, deferred tax assets, cash and cash equivalents, time deposits with financial institutions and other unallocated assets. Segment liabilities exclude short-term, income tax payable, long-term debts, loans from Sinopec Group Company and fellow subsidiaries, deferred tax liabilities and other unallocated liabilities.

Information of the Group's reportable segments is as follows:

	2016	2015
	RMB million	RMB million
Turnover		
Exploration and production		
External sales	47,443	57,740

37 PRINCIPAL SUBSIDIARIES

At 31 December 2016, the following list contains the particulars of subsidiaries which principally affected the results, assets and liabilities of the Group.

Name of company	Particulars of issued capital (million)	Interests held by the Company %	Interests	Name of company
Sinopec International Petroleum Exploration and Production Limited (“SIPL”)	RMB 8,000	100.00	-	Investment in exploration, production and sale of petroleum and natural gas
Sinopec Great Wall Energy & Chemical Company Limited	RMB 20,739	100.00	-	Coal chemical industry investment management, production and sale of coal chemical products
Sinopec Yangzi Petrochemical Company Limited	RMB 13,203	100.00	-	Manufacturing of intermediate petrochemical products and petroleum products
Sinopec Pipeline Storage & Transportation Company Limited	RMB 12,000	100.00	-	Pipeline storage and transportation of crude oil
Sinopec Yizheng Chemical Fibre Limited Liability Company	RMB 4,000	100.00	-	Production and sale of polyester chips and polyester fibres
Sinopec Lubricant Company Limited	RMB 3,374	100.00	-	Production and sale of refined petroleum products, lubricant base oil, and petrochemical materials
Sinopec Qingdao Petrochemical Company Limited	RMB 1,595	100.00	-	Manufacturing of intermediate petrochemical products and petroleum products
Sinopec Chemical Sales Company Limited	RMB 1,000	100.00	-	Marketing and distribution of petrochemical products
China International United Petroleum and Chemical Company Limited	RMB 3,000	100.00	-	Trading of crude oil and petrochemical products
Sinopec Overseas Investment Holding Limited (“SOIH”)	USD 1,638	100.00	-	Investment holding
Sinopec Catalyst Company Limited	RMB 1,500	100.00	-	Production and sale of catalyst products
China Petrochemical International Company Limited	RMB 1,400	100.00	-	Trading of petrochemical products
Sinopec Beihai Refining and Chemical Limited Liability Company	RMB 5,294	98.98	1.02	Import and processing of crude oil, production, storage and sale of petroleum products and petrochemical products
Sinopec Qingdao Refining and Chemical Company Limited	RMB 5,000	85.00	15.00	Manufacturing of intermediate petrochemical products and petroleum products
Sinopec Zhanjiang Dongxing Petrochemical Company Limited	RMB 4,397	75.00	25.00	Manufacturing of intermediate petrochemical products and petroleum products
Sinopec Hainan Refining and Chemical Company Limited	RMB 3,986	75.00	25.00	Manufacturing of intermediate petrochemical products and petroleum products

Edgar Filing: CHINA PETROLEUM & CHEMICAL CORP - Form 6-K

Sinopec Marketing Company Limited (“Marketing Company”)	RMB 28,403	70.42	29.58	Marketing and distribution of refined petroleum products
Sinopec Petrochemical Company Limited (“Zhonghan Wuhan”)	RMB 6,270	65.00	35.00	Production, sale, research and development of ethylene and downstream byproducts
Sinopec Kantons Holdings Limited (“Sinopec Kantons”)	HKD 248	60.34	39.66	Trading of crude oil and petroleum products
Gaoqiao Petrochemical Company Limited (Note 1)	RMB 10,000	55.00	45.00	Manufacturing of intermediate petrochemical products and petroleum products
Sinopec Shanghai Petrochemical Company Limited (“Shanghai Petrochemical”)	RMB 10,800	50.56	49.44	Manufacturing of synthetic fibres, resin and plastics, intermediate petrochemical products and petroleum products
Fujian Petrochemical Company Limited (“Fujian Petrochemical”) (i)	RMB 5,745	50.00	50.00	Manufacturing of plastics, intermediate petrochemical products and petroleum products

Except for Sinopec Kantons and SOIH, which are incorporated in Bermuda and Hong Kong respectively, all of the above principal subsidiaries are incorporated and operate their businesses principally in the PRC. All of the above principal subsidiaries are limited companies.

Note:

The Group consolidated the financial statements of the entity because it is exposed to, or has rights to, variable (i) returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Note:

(ii) This listed company will announce its financial information for the year ended 31 December 2016 later than the Company, therefore its 2016 financial information is not currently disclosed.

38 FINANCIAL RISK MANAGEMENT AND FAIR VALUES

Overview

Financial assets of the Group include cash and cash equivalents, time deposits with financial institutions, investments, trade accounts receivable, bills receivable, amounts due from Sinopec Group Company and fellow subsidiaries, amounts due from associates and joint ventures, available-for-sale financial assets, derivative financial instruments and other receivables. Financial liabilities of the Group include short-term and long-term debts, loans from Sinopec Group Company and fellow subsidiaries, trade accounts payable, bills payable, amounts due to Sinopec Group Company and fellow subsidiaries, derivative financial instruments and other payables.

The Group has exposure to the following risks from its uses of financial instruments:

• credit risk;

• liquidity risk;

• market risk.

The Board of Directors has overall responsibility for the establishment, oversight of the Group's risk management framework, and developing and monitoring the Group's risk management policies.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, and set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management controls and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations. Internal audit department undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Group's audit committee.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's deposits placed with financial institutions and receivables from customers. To limit exposure to credit risk relating to deposits, the Group primarily places cash deposits only with large financial institutions in the PRC with acceptable credit ratings. The majority of the Group's trade accounts receivable relate to sales of petroleum and chemical products to related parties and third parties operating in the petroleum and chemical industries. No single customer accounted for greater than 10% of total accounts receivable at 31 December 2016, except the amounts due from Sinopec Group Company and fellow subsidiaries. Management performs ongoing credit evaluations of the Group's customers' financial condition and generally does not require collateral on trade accounts receivable. The Group maintains an impairment loss for doubtful accounts and actual losses have been within management's expectations.

The carrying amounts of cash and cash equivalents, time deposits with financial institutions, trade accounts and bills receivables, derivative financial instruments and other receivables, represent the Group's maximum exposure to credit risk in relation to financial assets.

38 FINANCIAL RISK MANAGEMENT AND FAIR VALUES (Continued)

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach in managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. Management prepares monthly cash flow budget to ensure that the Group will always have sufficient liquidity to meet its financial obligations as they fall due. The Group arranges and negotiates financing with financial institutions and maintains a certain level of standby credit facilities to reduce the Group's liquidity risk.

At 31 December 2016, the Group has standby credit facilities with several PRC financial institutions which provide borrowings up to RMB 256,375 million (2015: RMB 297,997 million) on an unsecured basis, at a weighted average interest rate of 3.57% per annum (2015: 2.50%). At 31 December 2016, the Group's outstanding borrowings under these facilities were RMB 36,933 million (2015: RMB 32,991 million) and were included in debts.

The following table sets out the remaining contractual maturities at the balance sheet date of the Group's financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on prevailing rates current at the balance sheet date) and the earliest date the Group would be required to repay:

	31 December 2016					
	Carrying amount	Total contractual undiscounted cash flow	Within 1 year or on demand	More than 1 year but less than 2 years	More than 2 years but less than 5 years	More than 5 years
	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Short-term debts	56,239	57,515	57,515	—	—	—
Long-term debts	72,674	85,021	2,672	27,277	30,535	24,537
Loans from Sinopec Group Company and fellow subsidiaries	63,352	63,678	18,790	2,092	42,796	—
Trade accounts payable	174,301	174,301	174,301	—	—	—
Bills payable	5,828	5,828	5,828	—	—	—
Accrued expenses and other payables	81,781	81,781	81,781	—	—	—
	454,175	468,124	340,887	29,369	73,331	24,537
	31 December 2015					
	Carrying amount	Total contractual undiscounted cash flow	Within 1 year or on demand	More than 1 year but less than 2 years	More than 2 years but less than 5 years	More than 5 years
	RMB million	RMB million	RMB million	RMB million	RMB million	RMB million
Short-term debts	71,517	72,476	72,476	—	—	—
Long-term debts	95,446	110,678	3,747	41,176	41,637	24,118
Loans from Sinopec Group Company and fellow subsidiaries	88,229	89,258	44,439	464	8,795	35,560
Trade accounts payable	130,558	130,558	130,558	—	—	—

Bills payable	3,566	3,566	3,566	—	—	—
Accrued expenses and other payables	88,082	88,082	88,082	—	—	—
	477,398	494,618	342,868	41,640	50,432	59,678

Management believes that the Group's current cash on hand, expected cash flows from operations and available standby credit facilities from financial institutions will be sufficient to meet the Group's short-term and long-term capital requirements.

38 FINANCIAL RISK MANAGEMENT AND FAIR VALUES (Continued)

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Currency risk

Currency risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured. The Group's currency risk exposure primarily relates to short-term and long-term debts and loans from Sinopec Group Company and fellow subsidiaries denominated in USD, EUR, SGD and HKD. The Group enters into foreign exchange contracts to manage its currency risk exposure.

Included in short-term and long-term debts and loans from Sinopec Group Company and fellow subsidiaries of the Group are the following amounts denominated in a currency other than the functional currency of the entity to which they relate:

	31 December 2016 million	31 December 2015 million
Gross exposure arising from loans		
USD	USD 126	USD 1,181
EUR	EUR 1	EUR 1,108
SGD	SGD 4	—
HKD	HKD 6	HKD 6

A 5 percent strengthening/weakening of RMB against the following currencies at 31 December 2016 and 2015 would have increased/decreased net profit for the year of the Group by the amounts shown below. This analysis has been determined assuming that the change in foreign exchange rates had occurred at the balance sheet date and had been applied to the foreign currency balances to which the Group has significant exposure as stated above, and that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for 2015.

	31 December 2016 RMB million	31 December 2015 RMB million
USD	33	288
EUR	—	295
SGD	1	—

Other than the amounts as disclosed above, the amounts of other financial assets and liabilities of the Group are substantially denominated in the functional currency of respective entity within the Group.

Interest rate risk

The Group's interest rate risk exposure arises primarily from its short-term and long-term debts. Debts bearing interest at variable rates and at fixed rates expose the Group to cash flow interest rate risk and fair value interest rate risk respectively. The interest rates of short-term and long-term debts, and loans from Sinopec Group Company and fellow subsidiaries of the Group are disclosed in Note 28.

As at 31 December 2016, it is estimated that a general increase/decrease of 100 basis points in variable interest rates, with all other variables held constant, would increase/decrease the Group's net profit for the year by approximately RMB 44 million (2015: decrease/increase by approximately RMB 91 million). This sensitivity analysis has been determined assuming that the change of interest rates was applied to the Group's debts outstanding at the balance sheet date with exposure to cash flow interest rate risk, which in part be eliminated by cash holdings on a variable interest rates basis. The analysis is performed on the same basis for 2015.

Commodity price risk

The Group engages in oil and gas operations and is exposed to commodity price risk related to price volatility of crude oil, refined oil products and chemical products. The fluctuations in prices of crude oil, refined oil products and chemical products could have significant impact on the Group. The Group uses derivative financial instruments, including commodity futures and swaps, to manage a portion of this risk. As at 31 December 2016, the Group had certain commodity contracts of crude oil, refined oil products and chemical products designated as qualified cash flow hedges and economic hedges. The fair values of these derivative financial instruments as at 31 December 2016 are set out in Notes 26 and 30.

As at 31 December 2016, it is estimated that a general increase/decrease of USD 10 per barrel in basic price of derivative financial instruments, with all other variables held constant, would impact the fair value of derivative financial instruments, which would decrease/increase the Group's profit for the period by approximately RMB 634 million (2015: decrease/increase RMB 1,951 million), and decrease/increase the Group's other reserves by approximately RMB 4,007 million (2015: decrease/increase RMB 3,052 million). This sensitivity analysis has been determined assuming that the change in prices had occurred at the balance sheet date and the change was applied to the Group's derivative financial instruments at that date with exposure to commodity price risk. The analysis is performed on the same basis for 2015.

38 FINANCIAL RISK MANAGEMENT AND FAIR VALUES (Continued)

Fair values

(i) Financial instruments carried at fair value

The following table presents the carrying value of financial instruments measured at fair value at the balance sheet date across the three levels of the fair value hierarchy defined in IFRS 7, 'Financial Instruments: Disclosures', with the fair value of each financial instrument categorised in its entirety based on the lowest level of input that is significant to that fair value measurement. The levels are defined as follows:

Level 1 (highest level): fair values measured using quoted prices (unadjusted) in active markets for identical financial instruments.

Level 2: fair values measured using quoted prices in active markets for similar financial instruments, or using valuation techniques in which all significant inputs are directly or indirectly based on observable market data.

Level 3 (lowest level): fair values measured using valuation techniques in which any significant input is not based on observable market data.

At 31 December 2016

	Level 1 RMB million	Level 2 RMB million	Level 3 RMB million	Total RMB million
Assets				
Available for sale financial assets:				
Listed	262	—	—	262
Derivative financial instruments:				
Derivative financial assets	29	733	—	762
	291	733	—	1,024
Liabilities				
Derivative financial instruments:				
Derivative financial liabilities	2,586	1,886	—	4,472
	2,586	1,886	—	4,472

At 31 December 2015

	Level 1 RMB million	Level 2 RMB million	Level 3 RMB million	Total RMB million
Assets				
Available for sale financial assets:				
Listed	261	—	—	261
Derivative financial instruments:				
Derivative financial assets	4,235	3,640	—	7,875
	4,496	3,640	—	8,136
Liabilities				
Derivative financial instruments:				
Derivative financial liabilities	305	2,445	—	2,750
	305	2,445	—	2,750

During the years ended 31 December 2016 and 2015, there was no transfer between instruments in Level 1 and Level 2.

(ii) Fair values of financial instruments carried at other than fair value

The disclosures of the fair value estimates, and their methods and assumptions of the Group's financial instruments, are made to comply with the requirements of IFRS 7 and IAS 39 and should be read in conjunction with the Group's consolidated financial statements and related notes. The estimated fair value amounts have been determined by the Group using market information and valuation methodologies considered appropriate. However, considerable judgement is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Group could realise in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The fair values of the Group's financial instruments carried at other than fair value (other than long-term indebtedness and investments in unquoted equity securities) approximate their carrying amounts due to the short-term maturity of these instruments. The fair values of long-term indebtedness are estimated by discounting future cash flows using current market interest rates offered to the Group that range from 1.06% to 4.90% (2015: 1.08% to 4.90%). The following table presents the carrying amount and fair value of the Group's long-term indebtedness other than loans from Sinopec Group Company and fellow subsidiaries at 31 December 2016 and 2015:

38 FINANCIAL RISK MANAGEMENT AND FAIR VALUES (Continued)

Fair values (Continued)

(ii) Fair values of financial instruments carried at other than fair value (Continued)

	31 December 2016	31 December 2015
	RMB million	RMB million
Carrying amount	110,969	105,927
Fair value	109,308	103,482

The Group has not developed an internal valuation model necessary to estimate the fair values of loans from Sinopec Group Company and fellow subsidiaries as it is not considered practicable to estimate their fair values because the cost of obtaining discount and borrowing rates for comparable borrowings would be excessive based on the Reorganisation, the Group's existing capital structure and the terms of the borrowings.

Investments in unquoted equity securities are individually and in the aggregate not material to the Group's financial condition or results of operations. There are no listed market prices for such interests in the PRC and, accordingly, a reasonable estimate of fair value could not be made without incurring excessive costs. The Group intends to hold these unquoted other investments in equity securities for long term purpose.

Except for the above items, the financial assets and liabilities of the Group are carried at amounts not materially different from their fair values at 31 December 2016 and 2015.

39 ACCOUNTING ESTIMATES AND JUDGEMENTS

The Group's financial condition and results of operations are sensitive to accounting methods, assumptions and estimates that underlie the preparation of the consolidated financial statements. Management bases the assumptions and estimates on historical experience and on various other assumptions that it believes to be reasonable and which form the basis for making judgements about matters that are not readily apparent from other sources. On an ongoing basis, management evaluates its estimates. Actual results may differ from those estimates as facts, circumstances and conditions change.

The selection of critical accounting policies, the judgements and other uncertainties affecting application of such policies and the sensitivity of reported results to changes in conditions and assumptions are factors to be considered when reviewing the consolidated financial statements. The significant accounting policies are set forth in Note 2. Management believes the following critical accounting policies involve the most significant judgements and estimates used in the preparation of the consolidated financial statements.

Oil and gas properties and reserves

The accounting for the exploration and production's oil and gas activities is subject to accounting rules that are unique to the oil and gas industry. There are two methods to account for oil and gas business activities, the successful efforts method and the full cost method. The Group has elected to use the successful efforts method. The successful efforts method reflects the volatility that is inherent in exploring for mineral resources in that costs of unsuccessful exploratory efforts are charged to expense as they are incurred. These costs primarily include dry hole costs, seismic costs and other exploratory costs. Under the full cost method, these costs are capitalised and written-off or depreciated over time.

Engineering estimates of the Group's oil and gas reserves are inherently imprecise and represent only approximate amounts because of the subjective judgements involved in developing such information. There are authoritative guidelines regarding the engineering criteria that have to be met before estimated oil and gas reserves can be designated as "proved". Proved and proved developed reserves estimates are updated at least annually and take into account recent production and technical information about each field. In addition, as prices and cost levels change from year to year, the estimate of proved and proved developed reserves also changes. This change is considered a change in estimate for accounting purposes and is reflected on a prospective basis in relation to depreciation rates. Oil and gas reserves have a direct impact on the assessment of the recoverability of the carrying amounts of oil and gas properties reported in the financial statements. If proved reserves estimates are revised downwards, earnings could be affected by changes in depreciation expense or an immediate write-down of the property's carrying amount.

Future dismantlement costs for oil and gas properties are estimated with reference to engineering estimates after taking into consideration the anticipated method of dismantlement required in accordance with industry practices in similar geographic area, including estimation of economic life of oil and gas properties, technology and price level. The present values of these estimated future dismantlement costs are capitalised as oil and gas properties with equivalent amounts recognised as provisions for dismantlement costs.

Despite the inherent imprecision in these engineering estimates, these estimates are used in determining depreciation expense, impairment loss and future dismantlement costs. Capitalised costs of proved oil and gas properties are amortised on a unit-of-production method based on volumes produced and reserves.

39 ACCOUNTING ESTIMATES AND JUDGEMENTS (Continued)

Impairment for long-lived assets

If circumstances indicate that the net book value of a long-lived asset may not be recoverable, the asset may be considered “impaired”, and an impairment loss may be recognised in accordance with IAS 36 “Impairment of Assets”. The carrying amounts of long-lived assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to recoverable amount. For goodwill, the recoverable amount is estimated annually. The recoverable amount is the greater of the net selling price and the value in use. It is difficult to precisely estimate selling price because quoted market prices for the Group’s assets or cash-generating units are not readily available. In determining the value in use, expected cash flows generated by the asset or the cash-generating unit are discounted to their present value, which requires significant judgement relating to level of sale volume, selling price and amount of operating costs. Management uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of sale volume, selling price and amount of operating costs.

Depreciation

Property, plant and equipment, other than oil and gas properties, are depreciated on a straight-line basis over the estimated useful lives of the assets, after taking into account the estimated residual value. Management reviews the estimated useful lives of the assets at least annually in order to determine the amount of depreciation expense to be recorded during any reporting period. The useful lives are based on the Group’s historical experience with similar assets and take into account anticipated technological changes. The depreciation expense for future periods is adjusted if there are significant changes from previous estimates.

Impairment for bad and doubtful debts

Management estimates impairment losses for bad and doubtful debts resulting from the inability of the Group’s customers to make the required payments. Management bases the estimates on the ageing of the accounts receivable balance, customer credit-worthiness, and historical write-off experience. If the financial condition of the customers were to deteriorate, actual write-offs would be higher than estimated.

Allowance for diminution in value of inventories

If the costs of inventories become higher than their net realisable values, an allowance for diminution in value of inventories is recognised. Net realisable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. Management bases the estimates on all available information, including the current market prices of the finished goods and raw materials, and historical operating costs. If the actual selling prices were to be lower or the costs of completion were to be higher than estimated, the actual allowance for diminution in value of inventories could be higher than estimated.

40 EVENTS AFTER THE BALANCE SHEET DATE

According to the purchase and sale agreement signed between SOIHL Hong Kong Holding Limited (“SOIHL HK”), a wholly owned subsidiary of the Group, and Chevron Global Energy Inc. (“CGEI”) on 21 March 2017, SOIHL HK is going to acquire the equity shares of and related interest in Chevron South Africa (Proprietary) Limited and the equity shares of Chevron Botswana (Proprietary) Limited (“the Targets”) held by CGEI, in a total consideration approximate to USD 900 million (“the Transaction”). The consideration is subject to adjustment according to the circumstances of the Targets, such as the changes in working capital, at the completion. The Transaction has been approved by the Board of Directors of the Company, and is still subject to the satisfaction of the certain conditions to completion. The Targets’ principle activities are to manufacture and market refined oil products in South Africa and market refined oil products in Botswana.

41 PARENT AND ULTIMATE HOLDING COMPANY

The directors consider the parent and ultimate holding company of the Group as at 31 December 2016 is Sinopec Group Company, a state-owned enterprise established in the PRC. This entity does not produce financial statements available for public use.

Note:

(i) In 2014, the International Accounting Standards Board published Amendments to International Accounting Standard 27 (IAS 27) – Separate Financial Statements. These amendments allowed entities to use equity method to account for investments in subsidiaries, joint ventures and associates in their separate financial statements. Entities wishing to change to the equity method must do so retrospectively. The amendment is effective from 1 January 2016. In order to eliminate the difference regarding subsequent measurements on investments in joint ventures and associates between separate financial statements prepared in accordance with ASBE and IFRS,

the Company changed its subsequent measurements on investments in associates and joint ventures from cost method to equity method in its separate financial statements prepared in accordance with IFRS from 1 January 2016. By adopting the amendments to IAS 27 – Separate Financial Statements, the balance of investments in associates, investments in joint ventures, retained earnings and other reserves as at 31 December 2015 would be increased by RMB 8,056 million, RMB 644 million, RMB 8,672 million and RMB 28 million in the separated financial statements prepared in accordance with IFRS due to the retrospective adjustment.

(C) DIFFERENCES BETWEEN CONSOLIDATED FINANCIAL STATEMENTS PREPARED IN ACCORDANCE WITH THE ACCOUNTING POLICIES COMPLYING WITH ASBE AND IFRS (UNAUDITED)

Other than the differences in the classifications of certain financial statements captions and the accounting for the items described below, there are no material differences between the Group's consolidated financial statements prepared in accordance with the accounting policies complying with ASBE and IFRS. The reconciliation presented below is included as supplemental information, is not required as part of the basic financial statements and does not include differences related to classification, presentation or disclosures. Such information has not been subject to independent audit or review. The major differences are:

(I) GOVERNMENT GRANTS

Under ASBE, grants from the government are credited to capital reserve if required by relevant governmental regulations. Under IFRS, government grants relating to the purchase of fixed assets are recognised as deferred income and are transferred to the income statement over the useful life of these assets.

(II) SAFETY PRODUCTION FUND

Under ASBE, safety production fund should be recognised in profit or loss with a corresponding increase in reserve according to PRC regulations. Such reserve is reduced for expenses incurred for safety production purposes or, when safety production related fixed assets are purchased, is reduced by the purchased cost with a corresponding increase in the accumulated depreciation. Such fixed assets are not depreciated thereafter. Under IFRS, payments are expensed as incurred, or capitalised as fixed assets and depreciated according to applicable depreciation methods.

Effects of major differences between the net profit under ASBE and the profit for the year under IFRS are analysed as follows:

	Note	2016	2015
		 RMB million	RMB million
Net profit under ASBE		59,170	43,480
Adjustments:			
Government grants	(i)	114	127
Safety production fund	(ii)	160	191
Profit for the year under IFRS*		59,444	43,798

Effects of major differences between the shareholders' equity under ASBE and the total equity under IFRS are analysed as follows:

	Note	31 December	31 December
		 2016	2015
		 RMB million	RMB million
Shareholders' equity under ASBE		832,525	789,565
Adjustments:			
Government grants	(i)	(1,290)	(1,404)
Total equity under IFRS*		831,235	788,161

*The figures are extracted from the consolidated financial statements prepared in accordance with the accounting policies complying with IFRS during the year ended 31 December 2015 and 2016 which have been audited by

PricewaterhouseCoopers.

(D) SUPPLEMENTAL INFORMATION ON OIL AND GAS PRODUCING ACTIVITIES (UNAUDITED)

In accordance with the Accounting Standards Update 2010-03, “Extractive Activities; Oil and Gas (Topic 932): Oil and Gas Reserve Estimation and Disclosures” (“ASU 2010-03”), issued by the Financial Accounting Standards Board of the United States, and in accordance with “Industrial Information Disclosure Guidelines for Public Company; No.8 Oil and Gas Exploitation”, issued by Shanghai Stock Exchange, this section provides supplemental information on oil and gas exploration and producing activities of the Group and its equity method investments at 31 December 2016 and 2015, and for the years then ended in the following six separate tables. Tables I through III provide historical cost information under IFRS pertaining to capitalised costs related to oil and gas producing activities; costs incurred in oil and gas exploration and development; and results of operation related to oil and gas producing activities. Tables IV through VI present information on the Group’s and its equity method investments’ estimated net proved reserve quantities; standardised measure of discounted future net cash flows; and changes in the standardised measure of discounted cash flows.

Tables I to VI of supplemental information on oil and gas producing activities set out below represent information of the Company and its consolidated subsidiaries and equity method investments.

Total of the Group's and its equity method investments' results of operations for producing activities	(40,099)	(35,582)	(4,517)	1,105	629	476

The results of operations for producing activities for the years ended 31 December 2016 and 2015 are shown above. Revenues include sales to unaffiliated parties and transfers (essentially at third-party sales prices) to other segments of the Group. Income taxes are based on statutory tax rates, reflecting allowable deductions and tax credits. General corporate overhead and interest income and expense are excluded from the results of operations.

Table IV: Reserve quantities information

The Group's and its equity method investments' estimated net proved underground oil and gas reserves and changes thereto for the years ended 31 December 2016 and 2015 are shown in the following table.

Proved oil and gas reserves are those quantities of oil and gas, which by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulation before contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of

whether the estimate is a deterministic estimate or probabilistic estimate. Due to the inherent uncertainties and the limited nature of reservoir data, estimates of underground reserves are subject to change as additional information becomes available.

Proved developed oil and gas reserves are proved reserves that can be expected to be recovered through existing wells with existing equipment and operating methods or in which the cost of the required equipment is relatively minor compared with the cost of a new well.

“Net” reserves exclude royalties and interests owned by others and reflect contractual arrangements and obligation of rental fee in effect at the time of the estimate.

Table V: Standardised measure of discounted future net cash flows

The standardised measure of discounted future net cash flows, related to the above proved oil and gas reserves, is calculated in accordance with the requirements of ASU 2010-03 and “Industrial Information Disclosure Guidelines for Public Company No.8 Oil and Gas Exploitation”. Estimated future cash inflows from production are computed by applying the average, first-day-of-the-month price for oil and gas during the twelve-month period before the ending date of the period covered by the report to year-end quantities of estimated net proved reserves. Future price changes are limited to those provided by contractual arrangements in existence at the end of each reporting year. Future development and production costs are those estimated future expenditures necessary to develop and produce year-end estimated proved reserves based on year-end cost indices, assuming continuation of year-end economic conditions. Estimated future income taxes are calculated by applying appropriate year-end statutory tax rates to estimated future pre-tax net cash flows, less the tax basis of related assets. Discounted future net cash flows are calculated using 10% discount factors. This discounting requires a year-by-year estimate of when the future expenditure will be incurred and when the reserves will be produced.

The information provided does not represent management’s estimate of the Group’s and its equity method investments’ expected future cash flows or value of proved oil and gas reserves. Estimates of proved reserve quantities are imprecise and change over time as new information becomes available. Moreover, probable and possible reserves, which may become proved in the future, are excluded from the calculations. The arbitrary valuation requires assumptions as to the timing and amount of future development and production costs. The calculations are made for the years ended 31 December 2016 and 2015 and should not be relied upon as an indication of the Group’s and its equity method investments’ future cash flows or value of its oil and gas reserves.
