UnifiedOnline, Inc. and Subsidiaries  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - NATURE OF BUSINESS

On January 5, 2015, IceWEB, Inc. changed its name to UnifiedOnline, Inc.

UnifiedOnline, Inc. (the “Company”) began trading publicly in April 2002. During the six months ended December 31, 2015 we had three wholly owned operating subsidiaries, Computers & Telecom, Inc. and KCNAP, LLC, (collectively “CTC) and IceWEB Storage Corporation (formerly known as Inline Corporation). CTC provides wireless and fiber broadband service, co-location space and related services and operates a Network Access Point (“NAP”) where customers directly interconnect with a network ecosystem of partners and customers. This access to Internet routes provides CTC customers improved reliability and streamlined connectivity while significantly reducing costs by reaching a critical mass of networks within a centralized physical location. In addition, through our IceWEB Storage Corporation subsidiary we deliver on-line cloud computing application services, other managed services such as Disaster Recovery, Archive Storage, Redundant File Storage, Redundant Broadband Services and Business Continuity Services.

CTC operates a wireless internet service business, providing WIMAX broadband to small and medium size businesses in the metro Kansas-City, Missouri area. In addition CTC offers the following solutions: (i) premium data center co-location, (ii) interconnection and (iii) exchange and outsourced IT infrastructure services.

We leverage our NAP which allows our customers to increase information and application delivery performance while reducing costs. Our platform enables scalable, reliable and cost-effective co-location, interconnection and traffic exchange thus lowering overall cost and increasing flexibility.

On October 27, 2015, the Company acquired 100% of the membership interest ChanBond, LLC (ChanBond) (see Note 18), a portfolio of patents that disclose a technology that allows cable companies to provide high-speed data transmission over their existing hybrid-fiber coaxial networks. ChanBond contends that virtually every cable multi-system operator (MSO) in the U.S. utilizing DOCSIS 3.0+ is infringing upon its patents, accordingly on September 21, 2015 ChanBond filed lawsuits in U.S. District Court in Delaware against the 13 largest cable MSOs in the country (See Note 18).

NOTE 2 - BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation and Interim Financial Information

The accompanying unaudited consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (“US GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 8-03 of Regulation S-X and include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. Accordingly, the consolidated financial statements do not include all of the information and footnotes required by US GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and such adjustments are of a normal recurring nature. These consolidated financial statements should be read in conjunction with the Company’s audited financial statements for the year ended June 30, 2015, contained in the Company’s Annual Report on Form 10-K filed with the SEC on October 13, 2015. The results of operations for the three and six months ended December 31, 2015, are not necessarily indicative of results to be expected for any other interim period or the fiscal year ending June 30, 2016.

Reclassifications

Certain reclassifications have been made to previously reported amounts to conform to 2016 amounts. The reclassifications had no impact on previously reported results of operations or stockholders' deficit. The changes were as a result of the reverse stock split which occurred on January 5, 2015, which was retrospectively applied, the reclass of certain depreciation related to assets used for providing service to cost of sales from operating expense, the reclass of a capital lease payable from notes payable to capital lease payable and the reclass of derivative expense from interest expense.

#### Going Concern

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The Company had net losses and net cash used in operating activities of \$1,349,251 and \$127,113, respectively, for the six months ended December 31, 2015. The Company also had an accumulated deficit and stockholder's deficit of \$56,046,142 and \$5,390,637 respectively at December 31, 2015. These matters raise substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include any adjustments related to the recovery and classification of recorded assets, or the amounts and classification of liabilities that might be necessary in the event we cannot continue in existence. Additionally, the Company is currently in default on the loans to IWEB Growth Fund, and there is no guarantee that IWEB Growth Fund will not enter a judgment against the Company.

UnifiedOnline, Inc. and Subsidiaries  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Management has established plans intended to increase the sales of our products and services. Management intends to seek new capital from new equity securities offerings to provide funds needed to increase liquidity, fund growth, and implement its business plan. However, no assurances can be given that we will be able to raise any additional funds.

#### Marketable Securities

UnifiedOnline accounts for the purchase of marketable equity securities in accordance with FASB Accounting Standards Codification (ASC) 320, "Investment – Debt and Equity Securities" with any unrealized gains and losses included as a net amount as a separate component of stockholders' equity. However, those securities may not have the trading volume to support the stock price if the Company were to sell all their shares in the open market at once, so the Company may have a loss on the sale of marketable securities even though they record marketable equity securities at the current market value.

#### Cash and Cash Equivalents

We consider all highly liquid debt instruments with original maturities of three months or less to be cash equivalents.

#### Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the balance sheets and the reported amounts of sales and expenses during the reporting periods. Actual results could differ from those estimates. Significant estimates include the valuation of stock-based compensation, the allowance for doubtful accounts, the useful life of property and equipment, the valuation, useful life and potential impairment of intangible assets, derivative liabilities, deferred tax and valuation allowance and litigation reserves.

#### Accounts Receivable

Accounts receivable consists of normal trade receivables. We recorded a bad debt allowance of \$4,305 as of December 31, 2015. Management performs ongoing evaluations of its accounts receivable, and believes that all remaining receivables are fully collectable. Bad debt expense amounted to \$16,964 and \$545 for the six months ended December 31, 2015 and 2014, respectively.

#### Derivative Liability

The Company issued warrants to purchase the Company's common stock in connection with the issuance of convertible debt, which contain certain ratchet provisions that reduce the exercise price of the warrants or the conversion price in certain circumstances. In accordance with ASC 815 the Company determined that the warrants and/or the conversion features with provisions that reduce the exercise price of the warrants did not qualify for a scope exception under ASC 815 as they were determined not to be indexed to the Company's stock.

Derivatives are required to be recorded on the balance sheet at fair value (see Note 12). These derivatives, including embedded derivatives in the Company's structured borrowings, are separately valued and accounted for on the Company's balance sheet. Fair values for exchange traded securities and derivatives are based on quoted market prices. Where market prices are not readily available, fair values are determined using market based pricing models incorporating readily observable market data and requiring judgment and estimates.

#### Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The established fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes

three levels of inputs that may be used to measure fair value:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

9

---

UnifiedOnline, Inc. and Subsidiaries  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not active; and model-driven valuations whose inputs are observable or whose significant value drivers are observable. Valuations may be obtained from, or corroborated by, third-party pricing services.

Level 3: Unobservable inputs to measure fair value of assets and liabilities for which there is little, if any market activity at the measurement date, using reasonable inputs and assumptions based upon the best information at the time, to the extent that inputs are available without undue cost and effort.

#### Fair Value of Financial Instruments

The Company's financial instruments, including cash and cash equivalents, receivables, accounts payable and accrued liabilities and notes payable are carried at cost, which approximates their fair value, due to the relatively short maturity of these instruments.

Our derivative financial instruments, consisting of embedded conversion features in our convertible debt and ratchet provisions in our warrants, are required to be measured at fair value on a recurring basis under FASB ASC 815. As of December 31, 2015 and 2014 our derivatives are measured at fair value, using a Black-Scholes valuation model which approximates a binomial lattice valuation methodology utilizing Level 3 inputs. Level 3 inputs are unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities (see Note 12).

#### Property and Equipment

Property and equipment is stated at cost, net of accumulated depreciation. Depreciation expense is recorded by using the straight-line method over the estimated useful lives of the related assets.

#### Product Warranties

The Company's products typically carry a warranty for periods of up to three years. We have not had any significant warranty claims on our products.

#### Long-lived Assets

In accordance with ASC Topic 360, "Property, Plant, and Equipment", we review the carrying value of intangibles and other long-lived assets for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of long-lived assets is measured by comparison of its carrying amount to the undiscounted cash flows that the asset or asset group is expected to generate. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the property, if any, exceeds its fair market value.

#### Revenue Recognition

We follow the guidance of ASC Topic 605, "Revenue Recognition" for revenue recognition. In general, we record revenue when persuasive evidence of an arrangement exists, services have been rendered or product delivery has occurred, the sales price to the customer is fixed or determinable, and collectability is reasonably assured.

It is our practice to obtain a signed master sales agreement for recurring revenue sales, and/or a sales order for events and one-time services. Taxes collected from customers and remitted to government authorities are reported on a net basis and are excluded from revenue.

We derive the majority of our revenues from recurring revenue streams, consisting of:

1. Wireless and fiber broadband service;
2. Co-location, which includes the licensing of cabinet and power;
3. Interconnection services, such as cross connects;
4. Managed infrastructure services.

Revenues from recurring revenue streams are generally billed monthly and recognized ratably over the term of the contract, generally one to three years for data center space customers. We generally recognize revenue beginning on the date the customer commences use of our services.

Implementation and set-up fees are recognized at the time those services are completed and service is working. For services that are billed according to customer usage, revenue is recognized in the month in which the usage is provided.

Professional services are recognized in the period services are provided.

Amounts that have been invoiced are recorded in accounts receivable and revenue

UnifiedOnline, Inc. and Subsidiaries  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Our customers generally have the right to cancel their contracts by providing prior written notice to us of their intent to cancel the remainder of the contract term. The customer would be required to pay any charge for early cancellation that their contract specifies. In the event that a customer cancels their contract, they are not entitled to a refund for services already rendered. A customer can continue service on a month-to-month basis after their contract expires.

#### Barter Transactions

Barter activity is accounted for in accordance with ASC 845, Nonmonetary Transactions. Barter revenue relates to the exchange of wireless bandwidth and internet connectivity provided by CTC to business customers in exchange primarily for roof rights for antennae, advertising and other products and services that CTC would otherwise be required to buy for cash. Barter expenses reflect the expense offset to barter revenue. The amount of barter revenue and expense is recorded at the estimated fair value of the services received or the services provided, whichever is more objectively determinable, in the month the services are exchanged. For the six months ended December 31, 2015, the Company recorded barter revenue of \$9,000 and barter expense of \$0 and for the six months ended December 31, 2014, the Company recorded barter revenue of \$15,428 and barter expense of \$12,950. For the three months ended December 31, 2015, the Company recorded barter revenue of \$4,500 and barter expense of \$0 and for the three months ended December 31, 2014, the Company recorded barter revenue of \$7,714 and barter expense of 12,950.

#### Prepaid expenses

Prepaid expenses are comprised primarily of prepaid costs related to the installation of new customers, prepaid advertising costs which are expensed when used, and deferred financing costs which are amortized over the life of the related financing.

#### Deferred Revenue

Amounts billed in advance of services being provided are recorded as deferred revenue and are recognized in the consolidated statement of operations as services are provided.

#### Deferred Financing Costs

Debt issuance costs incurred in connection with the issuance of debt are capitalized and amortized to interest expense based on the related debt agreements on a straight-line basis, which approximates the effective interest method. Unamortized amounts are included in prepaid expenses in the accompanying unaudited consolidated balance sheets.

#### Earnings per Share

We compute earnings per share in accordance with ASC Topic 260, "Earnings Per Share" Under the provisions of ASC Topic 260, basic earnings per share is computed by dividing the net income (loss) for the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing the net income (loss) for the period by the weighted average number of common and potentially dilutive common shares outstanding during the period. Potentially dilutive common shares consist of the common shares issuable upon the exercise of stock options and warrants (using the treasury stock method) and upon the conversion of convertible notes and preferred stock (using the if-converted method). Potentially dilutive common shares are excluded from the calculation if their effect is antidilutive. At December 31, 2015, there were options and warrants to purchase 1,135,457,218 shares of common stock, there was \$122,886 of convertible debt outstanding, which, if converted on December 31, 2015 would amount to 276,237,000 shares, and 1,567 shares issuable upon conversion of Series B preferred stock outstanding which could potentially dilute future earnings per share.

#### Stock-Based Compensation

As more fully described in Note 15, we have three stock option plans that provide for non-qualified options to be issued to directors, officers, employees and consultants (the 2012 Equity Compensation Plan, 2013 Equity Plan and the 2015 Employee Option Plan (the "Plans")).

Cost of Sales

Cost of sales consists primarily of the costs of providing wireless and fiber bandwidth and colocation services as well as depreciation of assets used in providing these services.

## IWEB Growth Fund, LLC

On November 2, 2012 the Company entered into a Loan Agreement with IWEB Growth Fund, LLC, a Virginia limited liability company ("IWEB Growth Fund") established by Messrs. Compton, Bush, Carosi, Pirtle and Stavish and General Soyster, our former independent directors. Under the terms of the Loan Agreement, IWEB Growth Fund agreed to make one or more loans to us up to the total principal amount of \$1.5 million. The lending of any amounts under the Loan Agreement is conditioned upon the negotiation of notes and related loan documents which contain terms and conditions that are acceptable to the lender to be determined at the time of the loans. We agreed to grant IWEB Growth Fund a security interest in our assets as collateral for these loans. In the event we should default under the terms of the Loan Agreement, IWEB Growth Fund is entitled to declare all amounts advanced under the various notes immediately due and payable. An event of default includes a breach by us of any covenant, representation or warranty in the Loan Agreement or a default under any note entered into with the lender.

Between November 9, 2012 and July 11, 2013, IWEB Growth Fund lent us an aggregate of \$186,000 under the terms of 9 separate Confession of Judgment Promissory Notes. In Fiscal 2015, \$1,000 was paid on one of the notes. These notes, which are identical in their terms other than the dates and principal amounts, are for a one year term and bear interest at 12% per annum payable at maturity. Embodied in each of the notes is a confession of judgment which means that should we default upon the payment of the note, we have agreed to permit IWEB Growth Fund to enter a

judgment against us in the appropriate court in Virginia before filing suit against us for collection of the amounts. Pursuant to the terms of the Loan Agreement, we paid IWEB Growth Fund's expenses of \$1,500 for the preparation of the Loan Agreement and related documents. We used the net proceeds from these initial loans for general working capital. The Company is currently in default on these loans. There is no guarantee that IWEB Growth Fund will not enter a judgment against the Company.

NOTE 5 – CAPITAL LEASE PAYABLE

Agility Ventures, LLC and UO! IP of NC, LLC

On October 1, 2013, in conjunction with the acquisition of CTC, we entered into an equipment lease agreement with Agility Ventures, LLC in the principal amount of \$1,678,531 which is secured by all of the assets of the Company. The lease agreement has a term of 36 months and bears interest at 15% per annum. We also issued Agility Ventures 2,500 shares of the Company's restricted common stock, and a Series T common stock warrant covering a total of 9,187 shares with a term of two years and a conversion price of \$22.00 per share which expired December 31, 2015. The Company has the option to purchase the equipment at the end of the term.

On February 27, 2014, Agility Ventures LLC sold and assigned the Master Lease and Equipment Schedule to a third party, UO! IP of NC, LLC. UO! IP of NC, LLC is a related party to the Company's majority shareholder, Unified Online! LLC. The agreement changed the interest rate to 3.75% on the outstanding principal balance of the lease at February 27, 2014. UO! IP of NC, LLC assigned the lease back to UOIP as part of the subscription agreement at the same terms.

The Company applied the 10% cash flow test pursuant to Topic ASC 470-50-40-10 "Debt Modification and Extinguishment" to calculate the difference between the present value of the new loan's cash flows and the present value of the old loan's remaining cash flow and concluded that the results exceeded the 10% factor, the debt modification is considered substantially different and applied extinguishment accounting. Accordingly, the gain or loss on extinguishment should be measured by the difference between the carrying amount of the old debt and the fair value of the new debt. Additionally, Topic ASC 470-50-40-17 states if the exchange or modification is to be accounted for in the same manner as a debt extinguishment and the new debt instrument is initially recorded at fair value, then the fees paid or received shall be associated with the extinguishment of the old debt instrument and included in determining the debt extinguishment gain or loss to be recognized. The fair value of the new debt was determined to be \$1,983,164 and the carrying amount of the old debt of principal and accrued interest totaling \$1,717,853 resulted in a total loss on the extinguishment of debt of \$265,311 at June 30, 2014.

The underlying assets and related depreciation were included in the appropriate fixed asset category, and related depreciation account. Capitalized equipment under lease agreements totaled approximately \$1.9 million prior to the CTC acquisition of which \$666,782 was recorded at fair value at the time of acquisition. \$0 remains net of accumulated depreciation as of December 31, 2015 and \$16,176 remains net of accumulated depreciation as of June 30, 2015. The lease term of each capital equipment lease is 36 months.

The payment terms were amended to (i) require a payment equal to the greater of \$1 million and 20% of gross proceeds received by the Company as the result of any funding transaction within five business days of receipt of funds by the Company; (ii) require payments of principal and interest equal to 20% of the gross proceeds received by the Company from the sale or license of any or all of the ChanBond intellectual property within five business days of receipt of funds by the Company; (iii) require a payment of principal and interest equal to 100% of the net proceeds received by the Company from the sale of all or substantially all of the equipment, the leases and the other business assets of the Company; (iv) extend the final payment date to October 31, 2017 at which time the then outstanding principal balance, together with all accrued but unpaid interest on the unpaid balance, shall be due and payable in full. The payments described above shall in no case exceed the amount of the remaining balance due. The accrued interest balance was \$39,366 and \$0 at December 31, 2015 and June 30, 2015, respectively. ## NOTE 9 – FAIR VALUE MEASUREMENTS

The Company follows ASC 820, which, among other things, defines fair value, establishes a consistent framework for measuring fair value and expands disclosure for each major asset and liability category measured at fair value on either a recurring or nonrecurring basis. The Company did not adopt the ASC 820 fair value framework for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial

statements at least annually. ASC 820 clarifies that fair value is an exit price, representing the amount that would either be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, ASC 820 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1. Observable inputs such as quoted prices in active markets for identical assets or liabilities;

UnifiedOnline, Inc. and Subsidiaries  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Investments Measured at Fair Value on a Recurring Basis:

	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Marketable Equity Securities	\$ -	\$ -	\$ -
Derivative liabilities, warrants	\$ -	\$ -	\$ 621,906

Under the guidance of ASC 320, "Investments", we periodically evaluate other-than-temporary impairment (OTTI) of securities to determine whether a decline in their value is other than temporary. Management utilizes criteria such as the magnitude and duration of the decline, in addition to the reasons underlying the decline, to determine whether the loss in value is other than temporary. The term "other-than-temporary" is not intended to indicate that the decline is permanent. It indicates that the prospects for a near term recovery of value are not necessarily favorable, or that there is a lack of evidence to support fair values equal to, or greater than, the carrying value of the investment. Once a decline in value is determined to be other than temporary, the value of the security is reduced and a corresponding impairment charge to earnings is recognized. In the assessment of OTTI for various securities at December 31, 2015 the guidance in ASC 320, "the Investment-Debt and Equity Securities," is carefully followed.

There were no impairment charges on investments in publicly traded equity securities for the three or six months ended December 31, 2015 or the three or six months ended December 31, 2014.

The Company has evaluated its publicly traded equity securities as of December 31, 2015, and has determined that there were no unrealized losses that indicate an other-than-temporary impairment. This determination was based on several factors, which include the length of time and extent to which fair value has been less than the cost basis and the financial condition and near-term prospects of the issuer, and the Company's intent and ability to hold the publicly traded equity securities for a period of time sufficient to allow for any anticipated recovery in market value.

#### NOTE 10 - COMPREHENSIVE LOSS

Comprehensive loss is comprised of net loss and other comprehensive loss. Other comprehensive loss refers to revenue, expenses, gains and losses that under accounting principles generally accepted in the United States are included in comprehensive loss but excluded from net loss as these amounts are recorded directly as an adjustment to stockholders' equity.

The Company's accumulated other comprehensive loss consists of unrealized loss on marketable securities available for sale of \$81,000 at December 31, 2015 and \$80,998 at June 30, 2015.

#### NOTE 15 - STOCK OPTION PLAN

On April 8, 2015 the Board of Directors of UnifiedOnline, Inc. adopted the UnifiedOnline, Inc. 2015 Employee Option Plan (the "Plan"). The purpose of the Plan is to enable our company to attract and retain employees and consultants and provide them with the long-term financial incentives to enhance our performance. The Plan authorizes the grant of (i) options which qualify as incentive stock options under Section 422(b) of the Internal Revenue Code of 1986, as amended, (ii) non-qualified options which do not qualify as incentive stock options, (iii) awards of our common stock (iv) and rights to make direct purchases of our common stock which may be subject to certain restrictions. The maximum number of shares which can be issued over the term of the Plan is 1,800,000 shares.

In August 2012, the Board of Directors adopted the 2012 Equity Compensation Plan (the "Plan") for directors, officers and employees that provides for non-qualified and incentive stock options to be issued enabling holders thereof to purchase common shares of the Company at exercise prices determined by the Company's Board of Directors.

The purpose of the Plan is to advance the Company's interests and those of its stockholders by providing a means of attracting and retaining key employees, directors and consultants. In order to serve this purpose, the Company believes the Plan encourages and enables key employees, directors and consultants to participate in its future prosperity and growth by providing them with incentives and compensation based on its performance, development and financial success. Participants in the Plan may include the Company's officers, directors, other key employees and consultants who have responsibilities affecting our management, development or financial success.

Awards may be made under the Plan in the form of Plan options, shares of the Company's common stock subject to a vesting schedule based upon certain performance objectives ("Performance Shares") and shares subject to a vesting schedule based on the recipient's continued employment ("restricted shares"). Plan options may either be options qualifying as incentive stock options under Section 422 of the Internal Revenue Code of 1986, as amended or options that do not so qualify. Any incentive stock option granted under the Plan must provide for an exercise price of not less than 100% of the fair market value of the underlying shares on the date of such grant, but the exercise price of any incentive option granted to an eligible employee owning more than 10% of our common stock must be at least 110% of such fair market value as determined on the date of the grant. Only persons who are officers or other key employees are eligible to receive incentive stock options and performance share grants. Any non-qualified stock option granted under the Plan must provide for an exercise price of not less than 50% of the fair market value of the underlying shares on the date of such grant.

UnifiedOnline, Inc. and Subsidiaries  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Plan, as amended permits the grant of options and shares for up to 105,000,000 shares of our common stock. The Plan terminates 10 years from the date of the Plan's adoption by our stockholders.

The term of each Plan option and the manner in which it may be exercised is determined by the Board of Directors, provided that no Plan option may be exercisable more than three years after the date of its grant and, in the case of an incentive option granted to an eligible employee owning more than 10% of the Company's common stock, no more than five years after the date of the grant. The exercise price of the stock options may be paid in either cash, or delivery of unrestricted shares of common stock having a fair market value on the date of delivery equal to the exercise price, or surrender of shares of common stock subject to the stock option which has a fair market value equal to the total exercise price at the time of exercise, or a combination of the foregoing methods.

The fair value of stock options granted was estimated at the date of grant using the Black-Scholes options pricing model. The Company used the following assumptions for determining the fair value of options granted under the Black-Scholes option pricing model:

	Nine Months Ended June 30, 2014	
Expected volatility	13% - 278	%
Expected term	1 -3 Years	
Risk-free interest rate	0.01% - 0.34	%
Forfeiture rate	0.00	%
Expected dividend yield	0.00	%

The expected volatility was determined with reference to the historical volatility of the Company's stock. The Company uses historical data to estimate option exercise and employee termination within the valuation model. The expected term of options granted represents the period of time that options granted are expected to be outstanding. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury rate in effect at the time of grant.

For the three and six months ended December 31, 2015 and 2014, total stock-based compensation charged to operations for option-based arrangements amounted to \$8,328 and \$8,328 and \$12,415 and \$24,830, respectively. At December 31, 2015, there was no unrecognized compensation expense related to non-vested option-based compensation arrangements under the Plan.

A summary of the status of the Company's outstanding stock options as of December 31, 2015 and changes during the period ending on that date is as follows:

	Number of Options	Weighted Average Exercise Price
Balance at June 30, 2015	7,232	\$33.47

At December 31, 2015 we had a working capital deficit of approximately \$11.0 million and an accumulated deficit of approximately \$55.9 million. The report from our independent registered public accounting firm on our audited financial statements for the year ended June 30, 2015 contained an explanatory paragraph regarding doubt as to our ability to continue as a going concern as a result of our net losses in operations. Our sales were not sufficient to pay our operating expenses. We reported a net loss of \$1,175,134 for the six months ended December 31, 2015. There are no assurances that we will report income from operations in any future periods.

Historically, our revenues have not been sufficient to fund our operations and we have relied on capital provided through the sale of equity securities, and various financing arrangements and loans from related parties. At December 31, 2015 we had cash on hand of approximately \$25,000.

We do not have any commitments for capital expenditures. Our working capital needs in future periods are dependent primarily on the rate at which we can increase our revenues while controlling our expenses and decreasing the use of cash to fund operations. Additional capital may be needed to fund acquisitions of additional companies or assets, although we are not a party to any pending agreements at this time and, accordingly, cannot estimate the amount of capital which may be necessary, if any, for acquisitions.

As long as our cash flow from operations remains insufficient to completely fund operations, we will continue depleting our financial resources and seeking additional capital through equity and/or debt financing.

There can be no assurance that acceptable financing can be obtained on suitable terms, if at all. Our ability to continue our existing operations and to continue growth strategy could suffer if we are unable to raise the additional funds on acceptable terms which will have the effect of adversely affecting our ongoing operations and limiting our ability to increase our revenues and maintain profitable operations in the future. If we are unable to secure the necessary additional working capital as needed, we may be forced to curtail some or all of our operations.
