FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended January 3, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number 001-33264

U.S. AUTO PARTS NETWORK, INC.
(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)
16941 Keegan Avenue, Carson, CA 90746
(Address of Principal Executive Offices) (Zip Code)
Registrant's Telephone Number, Including Area Code: (310) 735-0085

68-0623433
(I.R.S. Employer
Identification No.)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$0.001 par value per share	The NASDAQ Stock Market LLC (NASDAQ Global Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by a check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-Accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

The aggregate market value of the common stock held by non-affiliates of the registrant as of June 28, 2014 was approximately \$50.7 million (based on the closing sales price of the registrant's common stock on that date). For the purposes of this calculation, shares owned by officers, directors and 10% stockholders known to the registrant have been deemed to be owned by affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of March 12, 2015, there were 33,776,499 shares of the registrant's common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of our proxy statement for the 2015 Annual Meeting of Stockholders (the "Proxy Statement") are incorporated by reference in Part III hereof. Except with respect to information specifically incorporated by reference in this Form 10-K, the Proxy Statement is not deemed to be filed as a part hereof.

Unless the context requires otherwise, as used in this report, the terms “U.S. Auto Parts,” the “Company,” “we,” “us” and “our” refer to U.S. Auto Parts Network, Inc. and its subsidiaries. Unless otherwise stated, all amounts are presented in thousands.

U.S. Auto Parts®, U.S. Auto Parts Network™, AutoMD AutoMD Insta-Quotes!®, Kool-Vue™, JC Whitn@y, and Stylintrucks™, amongst others, are our United States trademarks. All other trademarks and trade names appearing in this report are the property of their respective owners.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

The statements included in this report, other than statements or characterizations of historical or current fact, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and we intend that such forward-looking statements be subject to the safe harbors created thereby. Any forward-looking statements included herein are based on management’s beliefs and assumptions and on information currently available to management. We have attempted to identify forward-looking statements by terms such as “anticipates,” “believes,” “could,” “estimates,” “expects,” “intends,” “may,” “plans,” “potential,” “predicts,” “projects,” “should,” “will,” “would”, “will likely result” and variations of these words or similar expressions. These forward-looking statements include, but are not limited to, statements regarding future events, our future operating and financial results, financial expectations, expected growth and strategies, current business indicators, capital needs, financing plans, capital deployment, liquidity, contracts, litigation, product offerings, customers, acquisitions, competition and the status of our facilities. Forward-looking statements, no matter where they occur in this document or in other statements attributable to the Company involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by the forward-looking statements. We discuss many of these risks in greater detail under the heading “Risk Factors” in Part I, Item 1A of this report. Given these uncertainties, you should not place undue reliance on these forward-looking statements. You should read this report and the documents that we reference in this report and have filed as exhibits to the report completely and with the understanding that our actual future results may be materially different from what we expect. Also, forward-looking statements represent our management’s beliefs and assumptions only as of the date of this report. Except as required by law, we assume no obligation to update these forward-looking statements publicly, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.

PART I

ITEM 1. BUSINESS

Overview

We are one of the leading online sources for automotive aftermarket parts and repair information. Our vision is that vehicle repairs and upgrades are easy and affordable. Our mission is to provide an exceptionally easy experience for our customers. Our mantra is "make it easy for our customers." Our five core values are: customer focus, teamwork, integrity, quality, and continuous improvement.

We operate under two reportable operating segments. The criteria we use to identify operating segments are primarily the nature of the products we sell or services we provide and the consolidated operating results that are regularly reviewed by our chief operating decision maker to assess performance and make operating decisions. The two reportable operating segments we identified are the core auto parts business (“Base USAP”) and an online automotive repair information source of which we are a majority stockholder (“AutoMD”).

We principally sell our products, identified as stock keeping units (“SKUs”), to individual consumers through our network of websites and online marketplaces. Our user-friendly websites provide customers with a comprehensive selection of approximately 1.6 million SKUs with detailed product descriptions, attributes and photographs. We have developed a proprietary product database that maps our SKUs to product applications based on vehicle makes, models and years.

Our online sales channel and relationships with suppliers enable us to eliminate intermediaries in the traditional auto parts supply chain and to offer a broader selection of SKUs than can easily be offered by offline competition. We were incorporated in Delaware in 1995 as a distributor of aftermarket auto parts and launched our first website in 2000. We then expanded our online operations, increasing the number of SKUs sold through our e-commerce network, adding additional websites, improving our internet marketing proficiency, and commencing sales on online marketplaces. Like most e-commerce retailers, our success depends on our ability to attract online consumers to our websites and convert them into customers in a cost-effective manner. Historically, marketing through search engines provided the most efficient opportunity to reach online auto part buyers. In order to improve our business, we worked

towards enhancing the process of consolidation and implementing improvements to our multiple websites in order to improve our ranking on online search results and pursued opportunities in third-party online marketplaces. Our efforts to improve the website purchase experience for our online customers have included our efforts to: (1) help our customers find the parts they want to buy through a customized and guided

shopping experience specific to key part names; (2) increase order size across our sites through improved recommendation engines; and (3) provide best in-class customer service and product support.

We intend to continue to implement strategies to increase gross profit per transaction, increase transaction attachment rate, increase repeat purchases, and improve conversion; together all of which we believe will increase our customer lifetime value and allow for more efficient marketing.

In October 2008, we acquired AutoMD.com for the purpose of developing content and a user community to educate consumers on maintenance and service of their vehicles. The site provides auto information, with tools for diagnosing car troubles, locating repair shops, estimating the cost of repairs, accessing recalls and technical service bulletins, reading do-it-yourself (“DIY”) repair guides, and getting questions answered in the automotive enthusiast community forum. Currently, AutoMD estimates auto repair costs to help consumers understand the costs and time involved in selected repairs and to improve the consumer’s experience when getting their vehicle serviced. In 2013, we launched our AutoMD Insta-Quotes! program. In locations where service shops were selected to participate in the AutoMD Insta-Quotes! program, AutoMD provides real-time price estimates specific to each participating shop. In locations without the AutoMD Insta-Quotes! program, AutoMD provides general estimates based on industry standard parts and labor data as available for the consumer’s location. In October 2014, we sold a noncontrolling interest in AutoMD to outside investors and certain of our existing shareholders. We believe this investment will help AutoMD grow the number of repair shops participating in the AutoMD Insta-Quotes! program, and establish AutoMD as the preferred resource for vehicle repair information for consumers.

In August 2010, we acquired all of the issued and outstanding shares of Automotive Specialty Accessories and Parts, Inc. and its wholly-owned subsidiary Whitney Automotive Group, Inc. (referred to herein as “WAG”), at the time, the nation’s leading catalog and internet direct marketer of automotive aftermarket performance parts and accessories. The acquisition of WAG allowed us to expand of our product line, which increased our ability to reach customers in the DIY automobile and off-road accessories market. 2015 marks the 100 year anniversary of JC Whitney and we are celebrating this milestone with a centennial celebration and other promotional events throughout the year.

Our flagship websites are located at www.autopartswarehouse.com, www.carparts.com, www.jcwhitney.com and www.AutoMD.com and our corporate website is located at www.usautoparts.net.

We report on a 52/53-week fiscal year, ending on the Saturday nearest the end of December. References to 2014 relate to the 53-week fiscal year ended January 3, 2015. References to 2013 and 2012 relate to the 52-weeks ended December 28, 2013 and December 29, 2012, respectively.

Our Products

We offer a broad selection of aftermarket auto parts. We continually refine our product offering by introducing new brands and parts categories, while discontinuing low-selling brands and SKUs. We broadly classify our products into three categories: body parts serving the collision repair segment, hard parts to serve the replacement/wear parts market and performance parts and accessories.

Body Parts. The body parts category is primarily comprised of parts for the exterior of an automobile. Our parts in this category are typically replacement parts for original body parts that have been damaged as a result of a collision or through general wear and tear. The majority of these products are sold through our websites. In addition, we sell an extensive line of mirror products, including our own private-label brand called Kool-View™, which are marketed and sold as aftermarket replacement parts and as upgrades to existing parts.

Hard Parts. The hard parts category is comprised of engine and chassis components as well as other mechanical and electrical parts. These parts serve as replacement parts for existing engine parts and are generally used by professionals and do-it-yourselfers for engine and mechanical maintenance and repair.

Performance Parts and Accessories. We offer performance versions of many parts sold in each of the above categories. Performance parts and accessories generally consist of parts that enhance the performance of the automobile, upgrade existing functionality of a specific part or improve the physical appearance or comfort of the automobile.

Our Sales Channels

Our sales channels include the online channel and the offline channel.

Online Sales Channel. Our online sales channel consists of our e-commerce websites, online marketplaces and online advertising. Our e-commerce channel includes a network of e-commerce websites, supported by our call-center sales agents. We also sell our products through online marketplaces, including third-party auction sites and shopping portals, which provide

2

us with access to additional consumer segments. The majority of our online sales are to individual consumers. We sell online advertising and sponsorship positions on our e-commerce websites to highlight vendor brands and offer complementary products and services that benefit our customers. Advertising is targeted to specific sections of the websites and can also be targeted to specific users based on the vehicles they drive. Advertising partners primarily include part vendors, national automotive aftermarket brands, and automobile manufacturers.

Offline Sales Channel. We sell and deliver to collision repair shops from our Chesapeake, Virginia warehouse facility. We also market our Kool-Vue™ products nationwide to auto parts wholesale distributors and serve consumers by operating a retail outlet store in LaSalle, Illinois.

Our Fulfillment Operations

We fulfill customer orders using two primary methods: (1) stock-and-ship, where we take physical delivery of merchandise and store it in one of our distribution centers until it is shipped to a customer, and (2) drop-ship, where merchandise is shipped directly to customers from our suppliers. We believe that the flexibility of fulfilling orders using two different fulfillment methods allows us to offer a broader product selection, helps optimize product inventory and enhances our overall business profitability.

Stock-and-Ship Fulfillment. Our stock-and-ship products are sourced primarily from manufacturers and other suppliers located in Asia and in the U.S. and are stored in one of our distribution centers in Chesapeake, Virginia and LaSalle, Illinois. All products received into our distribution centers are entered into our inventory management systems, allowing us to closely monitor inventory availability. We consider a number of factors in determining which items to stock in our distribution centers, including which products can be purchased at a meaningful discount to domestic prices for similar items, which products have historically sold in high volumes, and which products may be out of stock when we attempt to fulfill via drop-ship.

Drop-Ship Fulfillment. We have developed relationships with several U.S.-based automobile parts distributors that operate their own distribution centers and can deliver products directly to our customers. We internally developed a proprietary distributor selection system, Auto-Vend™, which allows us to electronically select multiple vendors for a given order. Auto-Vend™ will attempt to first direct an order to one of our warehouses. If the product is not in stock, Auto-Vend™ will process the order to the next appropriate vendor based on customer location, cost, contractual agreements, and service level history.

Suppliers

We source our private label products primarily from manufacturers and trading companies located in the Asia-Pacific region. We source our branded products primarily from U.S.-based manufacturers and distributors. In some cases we drop-ship orders for products manufactured in the U.S. directly from our manufacturers and distributors. We have developed and implemented application programming interfaces with the majority of these drop ship suppliers that allow us to electronically transmit orders, check inventory availability, and receive the shipment tracking information which is easily passed on to our customers. We are a significant customer for many of our drop-ship vendors and have long standing relationships and contracts with many of these suppliers. For the fiscal year ended January 3, 2015, three of our drop-ship vendors accounted for 12% of our total product purchases.

Marketing

Our online marketing efforts are designed to attract visitors to our websites, convert visitors into purchasing customers and encourage repeat purchases among our existing customer base. We use a variety of marketing methods, including online marketing methods to attract visitors, which include paid search advertising, search engine optimization, affiliate programs, e-mail marketing, print catalogues and inclusion in online shopping engines. To convert visitors into paying customers, we periodically run promotions for discounted purchases. We seek to create cross-selling opportunities by displaying complementary and related products available for sale throughout the purchasing process. We utilize several marketing techniques, including targeted e-mails about specific vehicle promotions, to increase customer awareness of our products.

International Operations

In April 2007, we established offshore operations in the Philippines. Our offshore operations allow us to access a workforce with the necessary technical skills at a significantly lower cost than comparably experienced U.S.-based professionals. Our offshore operations are responsible for a majority of our website development, catalog

management, and back office support. Our offshore operations also house our main call center. We had 704 employees in the Philippines as of January 3, 2015. In addition to our operations in the Philippines, we have a Canadian subsidiary; the subsidiary currently has no operations or employees. We ship auto parts through a freight forwarding partner throughout the world. In 2014, we shipped auto parts to over 132 different countries.

3

Competition

The auto repair information and parts industry is competitive and highly fragmented, with products distributed through multi-tiered and overlapping channels. We compete with both online and offline retailers who offer original equipment manufacturer (“OEM”), aftermarket and private label parts to either the DIY or do-it-for-me (“DIFM”) customer segments. Current or potential competitors include the following:

- national auto parts retailers such as Advance Auto Parts, AutoZone, Napa Auto Parts, CarQuest, O’Reilly Automotive and Pep Boys;
- large online marketplaces such as Amazon.com and sellers on eBay;
- other online retailers and auto repair information websites;
- local independent retailers or niche auto parts retailers; and
- wholesale aftermarket auto parts distributors such as LKQ Corporation.

We believe the principal competitive factors in our market are helping customers easily find their parts, educating consumers on the service and maintenance of their vehicles, maintaining a proprietary product catalog that maps individual parts to relevant vehicle applications, broad product selection and availability, price, knowledgeable customer service, rapid order fulfillment and delivery, and easy product returns. We believe we compete favorably on the basis of these factors. However, some of our competitors may be larger, may have stronger brand recognition or may have access to greater financial, technical and marketing resources or may have been operating longer than we have.

Government Regulation

We are subject to federal and state consumer protection laws, including laws protecting the privacy of customer non-public information and the handling of customer complaints and regulations prohibiting unfair and deceptive trade practices. The growth and demand for online commerce has and may continue to result in more stringent consumer protection laws that impose additional compliance burdens on online companies. These laws may cover issues such as user privacy, spyware and the tracking of consumer activities, marketing e-mails and communications, other advertising and promotional practices, money transfers, pricing, content and quality of products and services, taxation, electronic contracts and other communications and information security. In addition, most states have passed laws that prohibit or limit the use of aftermarket auto parts in collision repair work and/or require enhanced disclosure or vehicle owner consent before using aftermarket auto parts in such repair work and additional legislation of this kind may be introduced in the future.

There is also great uncertainty over whether or how existing laws governing issues such as property ownership, sales and other taxes, auctions, libel and personal privacy apply to the Internet and commercial online services. These issues may take years to resolve. For example, tax authorities in a number of states, as well as a Congressional advisory commission, are currently reviewing the appropriate tax treatment of companies engaged in online commerce, and new state tax regulations may subject us to additional state sales and income taxes. New legislation or regulation, the application of laws and regulations from jurisdictions whose laws do not currently apply to our business or the application of existing laws and regulations to the Internet and commercial online services could result in significant additional taxes or regulatory restrictions on our business. These taxes or restrictions could have an adverse effect on our cash flows and results of operations. Furthermore, there is a possibility that we may be subject to significant fines or other payments for any past failures to comply with these requirements.

Seasonality

We believe our business is subject to seasonal fluctuations. We have historically experienced higher sales of body parts in winter months when inclement weather and hazardous road conditions typically result in more automobile collisions. Engine parts and performance parts and accessories have historically experienced higher sales in the summer months when consumers have more time to undertake elective projects to maintain and enhance the performance of their automobiles and the warmer weather during that time is conducive for such projects. We expect the historical seasonality trends to continue, and such trends may have a material impact on our financial condition and results of operations in subsequent periods.

Employees

As of January 3, 2015, we had 279 employees in the United States and 704 employees in the Philippines for a total of 983 employees. None of our employees are represented by a labor union, and we have never experienced a work stoppage.

Available Information

Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports are available free of charge on the Investor Relations section of our corporate website located at www.usautoparts.net as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the Securities and Exchange Commission ("SEC"). The inclusion of our website address in this report does not include or incorporate by reference into this report any information on our website.

ITEM 1A. RISK FACTORS

Our business is subject to a number of risks which are discussed below. Other risks are presented elsewhere in this report and in our other filings with the SEC. You should consider carefully the following risks in addition to the other information contained in this report and our other filings with the SEC, including our subsequent reports on Forms 10-Q and 8-K, and any amendments thereto, before deciding to buy, sell or hold our common stock. If any of the following known or unknown risks or uncertainties actually occurs with material adverse effects on us, our business, financial condition, results of operations and/or liquidity could be seriously harmed. In that event, the market price for our common stock will likely decline and you may lose all or part of your investment.

Risks Related To Our Business

Purchasers of aftermarket auto parts may not choose to shop online, which would prevent us from acquiring new customers who are necessary to the growth of our business.

The online market for aftermarket auto parts is less developed than the online market for many other business and consumer products, and currently represents only a small part of the overall aftermarket auto parts market. Our success will depend in part on our ability to attract new customers and to convert customers who have historically purchased auto parts through traditional retail and wholesale operations. Specific factors that could discourage or prevent prospective customers from purchasing from us include:

- concerns about buying auto parts without face-to-face interaction with sales personnel;
- the inability to physically handle, examine and compare products;
- delivery time associated with Internet orders;
- concerns about the security of online transactions and the privacy of personal information;
- delayed shipments or shipments of incorrect or damaged products;
- increased shipping costs; and
- the inconvenience associated with returning or exchanging items purchased online.

If the online market for auto parts does not gain widespread acceptance, our sales may decline and our business and financial results may suffer.

We depend on search engines and other online sources to attract visitors to our websites, and if we are unable to attract these visitors and convert those into customers in a cost-effective manner, our business and results of operations will be harmed.

Our success depends on our ability to attract online consumers to our websites and convert them into customers in a cost-effective manner. We are significantly dependent upon search engines, shopping comparison sites and other online sources for our website traffic. We are included in search results as a result of both paid search listings, where we purchase specific search terms that will result in the inclusion of our listing, and algorithmic searches that depend upon the searchable content on our sites.

Algorithmic listings cannot be purchased and instead are determined and displayed solely by a set of formulas utilized by the search engine. Search engines, shopping comparison sites and other online sources have in the past, and will continue to revise their algorithms from time to time in an attempt to optimize their search results. For example, search engines, like Google, revise their algorithms regularly in an attempt to optimize their search results. In fiscal years 2012 and 2013, we were negatively impacted by the changes in methodology for how Google displayed or selected our different websites for customer search results, which reduced our unique visitor count and adversely affected our financial results. We believe that we have addressed the challenges due to the changes in the methodology for customer search results that we experienced in 2012 and 2013; however no assurance can be made whether we will be successful in addressing similar changes in the future. If other search engines, shopping

comparison sites or similar online sources on which we rely for website traffic were to modify their

5

general methodology for how they display or select our websites in a manner similar to the changes made by Google, or if Google continues to make changes to Google's search results ranking algorithms that cause those algorithms to interact with our platform in a manner that continues to reduce our unique visitors, even fewer consumers may click through to our websites, and our financial results could be further adversely affected.

Similarly, if any free search engine or shopping comparison site on which we rely begins charging fees for listing or placement, or if one or more of the search engines, shopping comparison sites and other online sources on which we rely for purchased listings, modifies or terminates its relationship with us, our expenses could rise, we could lose customers and traffic to our websites could decrease.

Shifting online consumer behavior for purchasers of aftermarket auto parts may shift from desktop based to mobile device based online shopping, which could impact the growth of our business and our financial results could suffer. Mobile device based online shopping represents an increasing part of our business. Shifting consumer behavior indicates that our customers may become more inclined to shop for aftermarket auto parts through their mobile devices. Mobile customers exhibit different behaviors than our more traditional desktop based e-commerce customers. User sophistication and technological advances have increased consumer expectations around the user experience on mobile devices, including speed of response, functionality, product availability, security, and ease of use. If we are unable to continue to adapt our mobile device shopping experience from desktop based online shopping in ways that improve our customer's mobile experience and increase the engagement of our mobile customers our sales may decline and our business and financial results may suffer.

During fiscal 2014, our net losses continued, and we expect our net losses to continue in 2015.

During the fiscal year ended 2014, we incurred a net loss of \$6,879 compared to a net loss of \$15,634 for the fiscal year ended 2013. Overall, we expect our net losses to continue in 2015, although at a lower level than in 2014. If these negative trends continue, they could severely impact our liquidity, as we may not be able to provide positive cash flows from operations in order to meet our working capital requirements. We may need to borrow additional funds from our credit facility, which under certain circumstances may not be available, sell additional assets or seek additional equity or additional debt financing in the future. There can be no assurance that we would be able to raise such additional financing or engage in such asset sales on acceptable terms, or at all. If the net losses we have experienced continues for longer than we expect because our strategies to return to positive sales growth and profitability are not successful or otherwise, and if we are not able to raise adequate additional financing or proceeds from asset sales to continue to fund our ongoing operations, we will need to defer, reduce or eliminate significant planned expenditures, restructure or significantly curtail our operations, file for bankruptcy or cease operations. Our operations are restricted by our credit facility, and our ability to borrow funds under our credit facility is subject to a borrowing base.

Our credit facility includes a number of restrictive covenants. These covenants could impair our financing and operational flexibility and make it difficult for us to react to market conditions and satisfy our ongoing capital needs and unanticipated cash requirements. Specifically, such covenants restrict our ability and, if applicable, the ability of our subsidiaries to, among other things:

- incur additional debt;
- make certain investments and acquisitions;
- enter into certain types of transactions with affiliates;
- use assets as security in other transactions;
- pay dividends on our capital stock or repurchase our equity interests, excluding payments of preferred stock dividends which are specifically permitted under our credit facility;
- sell certain assets or merge with or into other companies;
- guarantee the debts of others;
- enter into new lines of business;
- pay or amend our subordinated debt;
- form any joint ventures or subsidiary investments.

Restrictions in our credit facility could also prevent us from satisfying certain of our contingent obligations set forth in the documents we entered into in connection with AutoMD's sale of common stock. For example, in order for us to be able to consummate the purchase of 2,000,000 shares of AutoMD common stock as required by the terms of the purchase agreement we entered into with AutoMD, which would be triggered in the event that AutoMD fails to meet specified cash balances and numbers of approved auto repair shops submitting a quotation on AutoMD's website, at the time such obligation is triggered we must have excess availability to borrow under the credit agreement of at least \$4 million and must satisfy a minimum fixed charge coverage ratio of 1.25:1.0. In addition, in order for us to be able to reimburse AutoMD for legal expenses incurred by AutoMD in connection with proceedings related to AutoMD's intellectual property, which we could be required to do for a period of three years, at the time of such reimbursement we must have excess availability to borrow under the credit agreement of at least \$4 million. In the event that restrictions in our credit facility cause us to breach our contractual obligations under the documents we entered into in connection with AutoMD's sale of common stock, we could be sued for breach of contract, be liable for damages to other investors in AutoMD, and AutoMD's support from its strategic investors could be compromised, each of which could have a material adverse effect on our financial condition and results of operations.

In addition, our credit facility is subject to a borrowing base derived from certain of our receivables, inventory, property and equipment. In the event that components of the borrowing base are adversely affected for any reason, including adverse market conditions or downturns in general economic conditions, we could be restricted in the amount of funds we can borrow under the credit facility. Furthermore, in the event that components of the borrowing base decrease to a level below the amount of loans then-outstanding under the credit facility, we could be required to immediately repay loans to the extent of such shortfall. If any of these events were to occur, it could severely impact our liquidity and capital resources, limit our ability to operate our business and could have a material adverse effect on our financial condition and results of operations.

Furthermore, under certain circumstances, our credit facility may require us to satisfy a financial covenant, which could limit our ability to react to market conditions or satisfy extraordinary capital needs and could otherwise impact our liquidity and capital resources, restrict our financing and have a material adverse effect on our results of operations.

Our ability to comply with the covenants and other terms of our debt obligations will depend on our future operating performance. If we fail to comply with such covenants and terms, we would be required to obtain waivers from our lenders to maintain compliance with our debt obligations. In the future, if we are unable to obtain any necessary waivers and our debt is accelerated, a material adverse effect on our financial condition and future operating performance would result. Additionally, our indebtedness could have important consequences, including the following:

- we will have to dedicate a portion of our cash flow to making payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions or other general corporate purposes;
- certain levels of indebtedness may make us less attractive to potential acquirers or acquisition targets;
- certain levels of indebtedness may limit our flexibility to adjust to changing business and market conditions, and make us more vulnerable to downturns in general economic conditions as compared to competitors that may be less leveraged; and
- as described in more detail above, the documents providing for our indebtedness contain restrictive covenants that may limit our financing and operational flexibility.

Furthermore, our ability to satisfy our debt service obligations will depend, among other things, upon fluctuations in interest rates, our future operating performance and ability to refinance indebtedness when and if necessary. These factors depend partly on economic, financial, competitive and other factors beyond our control. We may not be able to generate sufficient cash from operations to meet our debt service obligations as well as fund necessary capital expenditures and general operating expenses. In addition, if we need to refinance our debt, or obtain additional debt financing or sell assets or equity to satisfy our debt service obligations, we may not be able to do so on commercially reasonable terms, if at all. If this were to occur, we may need to defer, reduce or eliminate significant planned expenditures, restructure or significantly curtail our operations, file for bankruptcy or cease operations.

We may not be able to successfully acquire new businesses or integrate acquisitions, which could cause our business to suffer.

We may not be able to successfully complete potential strategic acquisitions if we cannot reach agreement on acceptable terms, due to restrictions under our credit facility or for other reasons. If we acquire a company or a division of a company, we may experience difficulty integrating that company's or division's personnel and operations, which could negatively affect our operating results. In addition:

the key personnel of the acquired company may decide not to work for us;

- customers of the acquired company may decide not to purchase products from us;
- we may experience business disruptions as a result of information technology systems conversions;
- we may experience additional financial and accounting challenges and complexities in areas such as tax planning, treasury management, and financial reporting;
- we may be held liable for environmental, tax or other risks and liabilities as a result of our acquisitions, some of which we may not have discovered during our due diligence;
- we may intentionally assume the liabilities of the companies we acquire, which could materially and adversely affect our business;
- our ongoing business may be disrupted or receive insufficient management attention;
- we may not be able to realize the cost savings or other financial benefits or synergies we anticipated, either in the amount or in the time frame that we expect; and
- we may incur additional debt or issue equity securities to pay for any future acquisition, the issuance of which could involve the imposition of restrictive covenants or be dilutive to our existing stockholders.

Integrating any newly acquired businesses' websites, technologies or services is likely to be expensive and time consuming. Our integration activities in connection with our acquisitions have also caused a substantial diversion of our management's attention. If we are unable to successfully complete the integration of acquisitions, we may not realize the anticipated synergies from such acquisitions, we may take further impairment charges and write-downs associated with such acquisitions, and our business and results of operations could suffer. We may selectively pursue additional acquisitions of businesses, technologies or services in order to expand our capabilities, enter new markets or increase our market share.

If our assets become impaired we may be required to record a significant charge to earnings.

We review our long-lived assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Factors that may be considered are changes in circumstances indicating that the carrying value of our assets may not be recoverable include a decrease in future cash flows. We may be required to record a significant charge to earnings in our financial statements during the period in which any impairment of our assets is determined, resulting in an impact on our results of operations. For example, during the second quarter of 2013, we recorded an impairment charge on property and equipment of \$4.8 million and on intangible assets of \$1.3 million. During the fourth quarter of 2012, we recorded an impairment charge on goodwill of \$18.9 million and on intangible assets of \$5.6 million.

If we are unable to manage the challenges associated with our international operations, the growth of our business could be limited and our business could suffer.

We maintain international business operations in the Philippines. This international operation includes development and maintenance of our websites, our main call center, and sales and back office support services. We also have a Canadian subsidiary, which we may in the future operate to facilitate sales in Canada. We are subject to a number of risks and challenges that specifically relate to our international operations. Our international operations may not be successful if we are unable to meet and overcome these challenges, which could limit the growth of our business and may have an adverse effect on our business and operating results. These risks and challenges include:

- the amount and timing of operating costs and capital expenditures relating to the maintenance and expansion of our business, operations and infrastructure;
- difficulties and costs of staffing and managing foreign operations, including any impairment to our relationship with employees caused by a reduction in force;
- restrictions imposed by local labor practices and laws on our business and operations;
- exposure to different business practices and legal standards;
- unexpected changes in regulatory requirements;
- the imposition of government controls and restrictions;
- political, social and economic instability and the risk of war, terrorist activities or other international incidents;
- the failure of telecommunications and connectivity infrastructure;
- natural disasters and public health emergencies;

potentially adverse tax consequences;
the failure of local laws to provide a sufficient degree of protection against infringement of our intellectual property;
and
fluctuations in foreign currency exchange rates and relative weakness in the U.S. dollar.

We are dependent upon relationships with suppliers in Taiwan, China and the United States for the vast majority of our products.

We acquire substantially all of our products from manufacturers and distributors located in Taiwan, China and the United States. Our top ten suppliers represented 44% of our total product purchases during the fifty-three weeks ended January 3, 2015. We do not have any long-term contracts or exclusive agreements with our foreign suppliers that would ensure our ability to acquire the types and quantities of products we desire at acceptable prices and in a timely manner. In addition, our ability to acquire products from our suppliers in amounts and on terms acceptable to us is dependent upon a number of factors that could affect our suppliers and which are beyond our control. For example, financial or operational difficulties that some of our suppliers may face could result in an increase in the cost of the products we purchase from them. In addition, the increasing consolidation among auto parts suppliers may disrupt or end our relationship with some suppliers, result in product shortages and/or lead to less competition and, consequently, higher prices. Furthermore, as part of our routine business, suppliers extend credit to us in connection with our purchase of their products. In the future, our suppliers may limit the amount of credit they are willing to extend to us in connection with our purchase of their products, if any. If this were to occur, it could impair our ability to acquire the types and quantities of products that we desire from the applicable suppliers on acceptable terms, severely impact our liquidity and capital resources, limit our ability to operate our business and could have a material adverse effect on our financial condition and results of operations.

In addition, because many of our suppliers are outside of the United States, additional factors could interrupt our relationships or affect our ability to acquire the necessary products on acceptable terms, including:

- political, social and economic instability and the risk of war or other international incidents in Asia or abroad;
- fluctuations in foreign currency exchange rates that may increase our cost of products;
- tariffs and protectionist laws and business practices that favor local businesses;
- difficulties in complying with import and export laws, regulatory requirements and restrictions;
- natural disasters and public health emergencies; and
- import shipping delays resulting from foreign or domestic labor shortages, slow downs, or stoppage.

Additionally, if we do not maintain our relationships with our existing suppliers or develop relationships with new suppliers on acceptable commercial terms, we may not be able to continue to offer a broad selection of merchandise at competitive prices and, as a result, we could lose customers and our sales could decline.

We are dependent upon third parties for distribution and fulfillment operations with respect to many of our products. For a number of the products that we sell, we outsource the distribution and fulfillment operation and are dependent on our distributors to manage inventory, process orders and distribute those products to our customers in a timely manner. For the fifty-three weeks ended January 3, 2015, our product purchases from three drop-ship suppliers represented 12% of our

total product purchases. If we do not maintain our existing relationships with these suppliers and our other distributors on acceptable commercial terms, we will need to obtain other suppliers and may not be able to continue to offer a broad selection of merchandise at competitive prices, and our sales may decrease.

In addition, because we outsource to distributors a number of these traditional retail functions relating to those products, we have limited control over how and when orders are fulfilled. We also have limited control over the products that our distributors purchase or keep in stock. Our distributors may not accurately forecast the products that will be in high demand or they may allocate popular products to other resellers, resulting in the unavailability of certain products for delivery to our customers. Any inability to offer a broad array of products at competitive prices and any failure to deliver those products to our customers in a timely and accurate manner may damage our reputation and brand and could cause us to lose customers.

We depend on third-party delivery services to deliver our products to our customers on a timely and consistent basis, and any deterioration in our relationship with any one of these third parties or increases in the fees that they charge could harm our reputation and adversely affect our business and financial condition.

We rely on third parties for the shipment of our products and we cannot be sure that these relationships will continue on terms favorable to us, or at all. Shipping costs have increased from time to time, and may continue to increase, which could harm our business, prospects, financial condition and results of operations by increasing our costs of doing business and resulting in reduced gross margins. In addition, if our relationships with these third parties are terminated or impaired, or if these third parties are unable to deliver products for us, whether due to labor shortage, slow down or stoppage, deteriorating financial or business condition, responses to terrorist attacks or for any other reason, we would be required to use alternative carriers for the shipment of products to our customers. Changing carriers could have a negative effect on our business and operating results due to reduced visibility of order status and package tracking and delays in order processing and product delivery, and we may be unable to engage alternative carriers on a timely basis, upon terms favorable to us, or at all.

If commodity prices such as fuel, plastic and steel increase, our margins may reduce.

Our third party delivery services have increased fuel surcharges from time to time, and such increases negatively impact our margins, as we are generally unable to pass all of these costs directly to consumers. Increasing prices in the component materials for the parts we sell may impact the availability, the quality and the price of our products, as suppliers search for alternatives to existing materials and as they increase the prices they charge. We cannot ensure that we can recover all the increased costs through price increases, and our suppliers may not continue to provide the consistent quality of product as they may substitute lower cost materials to maintain pricing levels, all of which may have a negative impact on our business and results of operations.

If our fulfillment operations are interrupted for any significant period of time or are not sufficient to accommodate increased demand, our sales would decline and our reputation could be harmed.

Our success depends on our ability to successfully receive and fulfill orders and to promptly deliver our products to our customers. The majority of orders for our auto body parts products are filled from our inventory in our distribution centers, where all our inventory management, packaging, labeling and product return processes are performed.

Increased demand and other considerations may require us to expand our distribution centers or transfer our fulfillment operations to larger facilities in the future.

Our distribution centers are susceptible to damage or interruption from human error, fire, flood, power loss, telecommunications failures, terrorist attacks, acts of war, break-ins, earthquakes and similar events. We do not currently maintain back-up power systems at our fulfillment centers. We do not presently have a formal disaster recovery plan and our business interruption insurance may be insufficient to compensate us for losses that may occur in the event operations at our fulfillment center are interrupted. Any interruptions in our fulfillment operations for any significant period of time, including interruptions resulting from the expansion of our existing facilities or the transfer of operations to a new facility, could damage our reputation and brand and substantially harm our business and results of operations and alternate arrangements may increase the cost of fulfillment. In addition, if we do not successfully expand our fulfillment capabilities in response to increases in demand, we may not be able to substantially increase our net sales.

We rely on bandwidth and data center providers and other third parties to provide products to our customers, and any failure or interruption in the services provided by these third parties could disrupt our business and cause us to lose customers.

We rely on third-party vendors, including data center and bandwidth providers. Any disruption in the network access or co-location services, which are the services that house and provide Internet access to our servers, provided by these third-party providers or any failure of these third-party providers to handle current or higher volumes of use could significantly harm our business. Any financial or other difficulties our providers face may have negative effects on our business, the nature and extent of which we cannot predict. We exercise little control over these third-party vendors, which increases our vulnerability to problems with the services they provide. We also license technology and related databases from third parties to facilitate elements of our e-commerce platform. We have experienced and expect to continue to experience interruptions and delays in service and availability for these elements. Any errors, failures,

interruptions or delays experienced in connection with these third-party technologies could negatively impact our relationship with our customers and adversely affect our business. Our systems also heavily depend on the availability of electricity, which also comes from third-party providers. If we were to experience a major power outage, we would have to rely on back-up generators. These back-up generators may not operate properly through a major power outage, and their fuel supply could also be inadequate during a major power outage. Information systems such as ours may be disrupted by even brief power outages, or by the fluctuations in power resulting from switches to and from backup generators. This could disrupt our business and cause us to lose customers.

We face intense competition and operate in an industry with limited barriers to entry, and some of our competitors may have greater resources than us and may be better positioned to capitalize on the growing e-commerce auto parts market.

The auto parts industry is competitive and highly fragmented, with products distributed through multi-tiered and overlapping channels. We compete with both online and offline retailers who offer original equipment manufacturer (“OEM”) and aftermarket auto parts to either the DIY or do-it-for-me customer segments. Current or potential competitors include the following:

- national auto parts retailers such as Advance Auto Parts, AutoZone, Napa Auto Parts, CarQuest, O’Reilly Automotive and Pep Boys;
- large online marketplaces such as Amazon.com and eBay;
- other online retailers and auto repair information websites;
- local independent retailers or niche auto parts online retailers; and
- wholesale aftermarket auto parts distributors such as LKQ Corporation.

Barriers to entry are low, and current and new competitors can launch websites at a relatively low cost. Many of our current and potential competitors have longer operating histories, larger customer bases, greater brand recognition and significantly greater financial, marketing, technical, management and other resources than we do. For example, in the event that online marketplace companies such as Amazon or eBay, who have larger customer bases, greater brand recognition and significantly greater resources than we do, focus more of their resources on competing in the aftermarket auto parts market, it could have a material adverse effect on our business and results of operations. In addition, some of our competitors have used and may continue to use aggressive pricing tactics and devote substantially more financial resources to website and system development than we do. We expect that competition will further intensify in the future as Internet use and online commerce continue to grow worldwide. Increased competition may result in reduced sales, lower operating margins, reduced profitability, loss of market share and diminished brand recognition.

Additionally, we have experienced significant competitive pressure from our suppliers who are now selling their products directly to customers. Since our suppliers have access to merchandise at very low costs, they can sell products at lower prices and maintain higher gross margins on their product sales than we can. Our financial results have been negatively impacted by direct sales from our suppliers to our current and potential customers, and our total number of orders and average order value may continue to decline due to increased competition. Continued competition from suppliers of ours that are capable of maintaining high sales volumes and acquiring products at lower prices than us will continue to negatively impact our business and results of operations, including through reduced sales, lower operating margins, reduced profitability, loss of market share and diminished brand recognition. We are in the process of implementing several strategies to attempt to overcome the challenges created by our suppliers selling directly to our customers and potential customers, including by lowering our prices by increasing foreign sourced products and by improvements in our websites, which may not be successful. If these strategies are not successful, our operating results and financial conditions could be materially and adversely affected.

If we fail to offer a broad selection of products at competitive prices to meet our customers’ demands, our revenue could decline.

In order to expand our business, we must successfully offer, on a continuous basis, a broad selection of auto parts that meet the needs of our customers, including by being the first to market with new SKUs. Our auto parts are used by consumers for a variety of purposes, including repair, performance, improved aesthetics and functionality. In addition, to be successful, our product offerings must be broad and deep in scope, competitively priced, well-made, innovative and attractive to a wide range of consumers. We cannot predict with certainty that we will be successful in offering products that meet all of these requirements. If our product offerings fail to satisfy our customers’ requirements or respond to changes in customer preferences, our revenue could decline.

Challenges by OEMs to the validity of the aftermarket auto parts industry and claims of intellectual property infringement could adversely affect our business and the viability of the aftermarket auto parts industry.

OEMs have attempted to use claims of intellectual property infringement against manufacturers and distributors of aftermarket products to restrict or eliminate the sale of aftermarket products that are the subject of the claims. The OEMs have brought such claims in federal court and with the United States International Trade Commission. We have received in the past, and we anticipate we may in the future receive, communications alleging that certain products we sell infringe the patents, copyrights, trademarks and trade names or other intellectual property rights of OEMs or other third parties. For instance, after approximately three and a half years of litigation and related costs and expenses, on April 16, 2009, we entered into a settlement agreement with Ford Motor Company and Ford Global Technologies, LLC that ended the two legal actions that were

initiated by Ford against us related to claims of intellectual property infringement. The United States Patent and Trademark Office records indicate that OEMs are seeking and obtaining more design patents than they have in the past. To the extent that the OEMs are successful with intellectual property infringement claims, we could be restricted or prohibited from selling certain aftermarket products which could have an adverse effect on our business. Infringement claims could also result in increased costs of doing business arising from increased legal expenses, adverse judgments or settlements or changes to our business practices required to settle such claims or satisfy any judgments. Litigation could result in interpretations of the law that require us to change our business practices or otherwise increase our costs and harm our business. We do not maintain insurance coverage to cover the types of claims that could be asserted. If a successful claim were brought against us, it could expose us to significant liability. If we are unable to protect our intellectual property rights, our reputation and brand could be impaired and we could lose customers.

We regard our trademarks, trade secrets and similar intellectual property such as our proprietary back-end order processing and fulfillment code and process as important to our success. We rely on trademark and copyright law, and trade secret protection, and confidentiality and/or license agreements with employees, customers, partners and others to protect our proprietary rights. We cannot be certain that we have taken adequate steps to protect our proprietary rights, especially in countries where the laws may not protect our rights as fully as in the United States. In addition, our proprietary rights may be infringed or misappropriated, and we could be required to incur significant expenses to preserve them. In the past we have filed litigation to protect our intellectual property rights. The outcome of such litigation can be uncertain, and the cost of prosecuting such litigation may have an adverse impact on our earnings. We have common law trademarks, as well as pending federal trademark registrations for several marks and several registered marks. Even if we obtain approval of such pending registrations, the resulting registrations may not adequately cover our intellectual property or protect us against infringement by others. Effective trademark, service mark, copyright, patent and trade secret protection may not be available in every country in which our products and services may be made available online. We also currently own or control a number of Internet domain names, including www.usautoparts.net, www.carparts.com, www.autopartswarehouse.com, www.jcwhitney.com and www.AutoMD.com, and have invested time and money in the purchase of domain names and other intellectual property, which may be impaired if we cannot protect such intellectual property. We may be unable to protect these domain names or acquire or maintain relevant domain names in the United States and in other countries. If we are not able to protect our trademarks, domain names or other intellectual property, we may experience difficulties in achieving and maintaining brand recognition and customer loyalty.

If our product catalog database is stolen, misappropriated or damaged, or if a competitor is able to create a substantially similar catalog without infringing our rights, then we may lose an important competitive advantage. We have invested significant resources and time to build and maintain our product catalog, which is maintained in the form of an electronic database, which maps SKUs to relevant product applications based on vehicle makes, models and years. We believe that our product catalog provides us with an important competitive advantage in both driving traffic to our websites and converting that traffic to revenue by enabling customers to quickly locate the products they require. We cannot assure you that we will be able to protect our product catalog from unauthorized copying or theft or that our product catalog will continue to operate adequately, without any technological challenges. In addition, it is possible that a competitor could develop a catalog or database that is similar to or more comprehensive than ours, without infringing our rights. In the event our product catalog is damaged or is stolen, copied or otherwise replicated to compete with us, whether lawfully or not, we may lose an important competitive advantage and our business could be harmed.

Our e-commerce system is dependent on open-source software, which exposes us to uncertainty and potential liability. We utilize open-source software such as Linux, Apache, MySQL, PHP, Fedora and Perl throughout our web properties and supporting infrastructure although we have created proprietary programs. Open-source software is maintained and upgraded by a general community of software developers under various open-source licenses, including the GNU General Public License (“GPL”). These developers are under no obligation to maintain, enhance or provide any fixes or updates to this software in the future. Additionally, under the terms of the GPL and other

open-source licenses, we may be forced to release to the public source-code internally developed by us pursuant to such licenses. Furthermore, if any of these developers contribute any code of others to any of the software that we use, we may be exposed to claims and liability for intellectual property infringement. A number of lawsuits are currently pending against third parties over the ownership rights to the various components within some open-source software that we use. If the outcome of these lawsuits is unfavorable, we may be held liable for intellectual property infringement based on our use of these open-source software components. We may also be forced to implement changes to the code-base for this software or replace this software with internally developed or commercially licensed software.

We face exposure to product liability lawsuits.

The automotive industry in general has been subject to a large number of product liability claims due to the nature of personal injuries that result from car accidents or malfunctions. As a distributor of auto parts, including parts obtained overseas, we could be held liable for the injury or damage caused if the products we sell are defective or malfunction. While we carry insurance against product liability claims, if the damages in any given action were high or we were subject to multiple lawsuits, the damages and costs could exceed the limits of our insurance coverage. If we were required to pay substantial damages as a result of these lawsuits, it may seriously harm our business and financial condition. Even defending against unsuccessful claims could cause us to incur significant expenses and result in a diversion of management's attention. In addition, even if the money damages themselves did not cause substantial harm to our business, the damage to our reputation and the brands offered on our websites could adversely affect our future reputation and our brand, and could result in a decline in our net sales and profitability.

We rely on key personnel and may need additional personnel for the success and growth of our business.

Our business is largely dependent on the personal efforts and abilities of highly skilled executive, technical, managerial, merchandising, marketing, and call center personnel. Competition for such personnel is intense, and we cannot assure that we will be successful in attracting and retaining such personnel. The loss of any key employee or our inability to attract or retain other qualified employees could harm our business and results of operations.

System failures, including failures due to natural disasters or other catastrophic events, could prevent access to our websites, which could reduce our net sales and harm our reputation.

Our sales would decline and we could lose existing or potential customers if they are not able to access our websites or if our websites, transactions processing systems or network infrastructure do not perform to our customers' satisfaction. Any Internet network interruptions or problems with our websites could:

- prevent customers from accessing our websites;
- reduce our ability to fulfill orders or bill customers;
- reduce the number of products that we sell;
- cause customer dissatisfaction; or
- damage our brand and reputation.

We have experienced brief computer system interruptions in the past, and we believe they may continue to occur from time to time in the future. Our systems and operations are also vulnerable to damage or interruption from a number of sources, including a natural disaster or other catastrophic event such as an earthquake, typhoon, volcanic eruption, fire, flood, terrorist attack, computer viruses, power loss, telecommunications failure, physical and electronic break-ins and other similar events. For example, our headquarters and the majority of our infrastructure, including some of our servers, are located in Southern California, a seismically active region. We also maintain offshore and outsourced operations in the Philippines, an area that has been subjected to a typhoon and a volcanic eruption in the past. In addition, California has in the past experienced power outages as a result of limited electrical power supplies and due to recent fires in the southern part of the state. Such outages, natural disasters and similar events may recur in the future and could disrupt the operation of our business. Our technology infrastructure is also vulnerable to computer viruses, physical or electronic break-ins and similar disruptions. Although the critical portions of our systems are redundant and backup copies are maintained offsite, not all of our systems and data are fully redundant. We do not presently have a formal disaster recovery plan in effect and may not have sufficient insurance for losses that may occur from natural disasters or catastrophic events. Any substantial disruption of our technology infrastructure could cause interruptions or delays in our business and loss of data or render us unable to accept and fulfill customer orders or operate our websites in a timely manner, or at all.

Risks Related To Our Capital Stock

Our common stock price has been and may continue to be volatile, which may result in losses to our stockholders. The market prices of technology and e-commerce companies generally have been extremely volatile and have recently experienced sharp share price and trading volume changes. The trading price of our common stock is likely to be volatile and could fluctuate widely in response to, among other things, the risk factors described in this report and other factors beyond our control such as fluctuations in the operations or valuations of companies perceived by investors to be comparable to us, our ability to meet analysts' expectations, or conditions or trends in the Internet or

auto parts industries.

13

Since the completion of our initial public offering in February 2007 through January 3, 2015, the trading price of our common stock has been volatile, ranging from a high of \$12.61 per share to a low per share of \$0.91. We have also experienced significant fluctuations in the trading volume of our common stock. General economic and political conditions unrelated to our performance may also adversely affect the price of our common stock. In the past, following periods of volatility in the market price of a public company's securities, securities class action litigation has often been initiated. Due to the inherent uncertainties of litigation, we cannot predict the ultimate outcome of any such litigation if it were initiated. The initiation of any such litigation or an unfavorable result could have a material adverse effect on our financial condition and results of operations.

Our common stock may be delisted from the Nasdaq Global Market ("Nasdaq") if we are unable to maintain compliance with Nasdaq's continued listing standards.

As a company traded on the Nasdaq, we are subject to compliance with Nasdaq's listing rules, which require, among other things, that our Board of Directors be comprised of a majority of independent directors. In July 2013, we received a notice from Nasdaq that the Company's Board of Directors was no longer comprised of a majority of independent directors due to the resignation of one of our independent directors. We regained compliance in November 2013 with the appointment of two new independent directors, prior to the expiration of the cure period provided by Nasdaq,

Nasdaq imposes, among other requirements, continued listing standards including minimum bid and public float requirements. The price of our common stock must trade at or above \$1.00 to comply with Nasdaq's minimum bid requirement for continued listing on the Nasdaq. If our stock trades at bid prices of less than \$1.00 for a period in excess of 30 consecutive business days, the Nasdaq could send a deficiency notice to us for not remaining in compliance with the minimum bid listing standards. In 2014 our common stock never traded below \$1.00. At certain times during the third quarter of 2013, our common stock traded below \$1.00 per share at closing before it returned to trading at or above \$1.00 to comply with Nasdaq's minimum bid requirement for continued listing on the Nasdaq, however, at no time did such period exceed 30 consecutive business days. If the closing bid price of our common stock fails to meet Nasdaq's minimum closing bid price requirement, or if we otherwise fail to meet any other applicable requirements of the Nasdaq and we are unable to regain compliance, Nasdaq may make a determination to delist our common stock.

Any delisting of our common stock could adversely affect the market liquidity of our common stock and the market price of our common stock could decrease. Furthermore, if our common stock were delisted it could adversely affect our ability to obtain financing for the continuation of our operations and/or result in the loss of confidence by investors, customers, suppliers and employees.

Our executive officers and directors and certain related parties own a significant percentage of our stock.

As of January 3, 2015, our executive officers and directors and certain related parties and entities that are affiliated with them beneficially owned in the aggregate approximately 52.5% of our outstanding shares of stock. This significant concentration of share ownership may adversely affect the trading price for our common stock because investors often perceive disadvantages in owning stock in companies with controlling stockholders. Also, these stockholders, acting together, will be able to significantly influence our management and affairs and control matters requiring stockholder approval including the election of our entire Board of Directors and certain significant corporate actions such as mergers, consolidations or the sale of substantially all of our assets. As a result, this concentration of ownership could delay, defer or prevent others from initiating a potential merger, takeover or other change in our control, even if these actions would benefit our other stockholders and us.

The rights, preferences and privileges of our existing preferred stock may restrict our financial and operational flexibility.

In March 2013, our Board of Directors, under the authority granted by our Certificate of Incorporation, established a series of preferred stock, our Series A Convertible Preferred, which has various rights, preferences and privileges senior to the shares of our common stock. Dividends on the Series A Convertible Preferred are payable quarterly, subject to the satisfaction of certain conditions, at a rate of \$0.058 per share per annum in cash, in shares of common stock or in any combination of cash and common stock as determined by our Board of Directors. While we may, at

our election, subject to the satisfaction of certain conditions, pay any accrued but unpaid dividends on the Series A Convertible Preferred in either cash or in common stock, we may be unable to satisfy the requisite conditions for paying dividends in common stock and, under such circumstances, we will be required to pay such accrued but unpaid dividends in cash. In such circumstances, we will be required to use cash that would otherwise be used to fund our ongoing operations to pay such accrued but unpaid dividends. To the extent we do pay dividends in common stock, the ownership percentage of our common stockholders who are not holders of the Series A Convertible Preferred will be diluted. Our Series A Convertible Preferred is initially convertible for 4,149,997 shares of common stock, and to the extent that the Series A Convertible Preferred is converted, the common stock ownership percentage of our common stockholders who are not converting holders of the Series A Convertible Preferred will be diluted.

Our future operating results may fluctuate and may fail to meet market expectations.

We expect that our revenue and operating results will continue to fluctuate from quarter to quarter due to various factors, many of which are beyond our control. If our quarterly revenue or operating results fall below the expectations of investors or securities analysts, the price of our common stock could significantly decline. The factors that could cause our operating results to continue to fluctuate include, but are not limited to:

- fluctuations in the demand for aftermarket auto parts;
- price competition on the Internet or among offline retailers for auto parts;
- our ability to attract visitors to our websites and convert those visitors into customers, including to the extent based on our ability to successfully work with different search engines to drive visitors to our websites;
- our ability to successfully sell our products through third-party online marketplaces;
- competition from companies that have longer operating histories, larger customer bases, greater brand recognition, access to merchandise at lower costs and significantly greater resources than we do, like third-party online market places and our suppliers;
- our ability to maintain and expand our supplier and distribution relationships without significant price increases or reduced service levels;
- our ability to borrow funds under our credit facility;
- the effects of seasonality on the demand for our products;
- our ability to accurately forecast demand for our products, price our products at market rates and maintain appropriate inventory levels;
- our ability to build and maintain customer loyalty;
- our ability to successfully integrate our acquisitions;
- infringement actions that could impact the viability of the auto parts aftermarket or portions thereof;
- the success of our brand-building and marketing campaigns;
- our ability to accurately project our future revenues, earnings, and results of operations;
- government regulations related to use of the Internet for commerce, including the application of existing tax regulations to Internet commerce and changes in tax regulations;
- technical difficulties, system downtime or Internet brownouts;
- the amount and timing of operating costs and capital expenditures relating to expansion of our business, operations and infrastructure; and
- the impact of adverse economic conditions on retail sales, in general.

If we fail to maintain an effective system of internal control over financial reporting or comply with Section 404 of the Sarbanes-Oxley Act of 2002, we may not be able to accurately report our financial results or prevent fraud, and our stock price could decline.

While management has concluded that our internal controls over financial reporting were effective as of January 3, 2015, we have in the past, and could in the future, have a significant deficiency or material weakness in internal control over financial reporting or fail to comply with Section 404 of the Sarbanes-Oxley Act of 2002. If we fail to properly maintain an effective system of internal control over financial reporting, it could impact our ability to prevent fraud or to issue our financial statements in a timely manner that presents fairly our financial condition and results of operations. The existence of any such deficiencies or weaknesses, even if cured, may also lead to the loss of investor confidence in the reliability of our financial statements, could harm our business and negatively impact the trading price of our common stock. Such deficiencies or material weaknesses may also subject us to lawsuits, investigations and other penalties.

Our charter documents could deter a takeover effort, which could inhibit your ability to receive an acquisition premium for your shares.

Provisions in our certificate of incorporation and bylaws could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our stockholders. Such provisions include the following:

our Board of Directors are authorized, without prior stockholder approval, to create and issue preferred stock which could be used to implement anti-takeover devices;

advance notice is required for director nominations or for proposals that can be acted upon at stockholder meetings;

our Board of Directors is classified such that not all members of our board are elected at one time, which may make it more difficult for a person who acquires control of a majority of our outstanding voting stock to replace all or a majority of our directors;

stockholder action by written consent is prohibited except with regards to an action that has been approved by the Board;

special meetings of the stockholders are permitted to be called only by the chairman of our Board of Directors, our chief executive officer or by a majority of our Board of Directors;

stockholders are not permitted to cumulate their votes for the election of directors; and

stockholders are permitted to amend certain provisions of our bylaws only upon receiving at least 66 2/3% of the votes entitled to be cast by holders of all outstanding shares then entitled to vote generally in the election of directors, voting together as a single class.

We do not intend to pay dividends on our common stock.

We currently do not expect to pay any cash dividends on our common stock for the foreseeable future.

General Market and Industry Risk

Economic conditions have had, and may continue to have an adverse effect on the demand for aftermarket auto parts and could adversely affect our sales and operating results.

We sell aftermarket auto parts consisting of body and engine parts used for repair and maintenance, performance parts used to enhance performance or improve aesthetics and accessories that increase functionality or enhance a vehicle's features. Demand for our products has been and may continue to be adversely affected by general economic conditions. In declining economies, consumers often defer regular vehicle maintenance and may forego purchases of nonessential performance and accessories products, which can result in a decrease in demand for auto parts in general. Consumers also defer purchases of new vehicles, which immediately impacts performance parts and accessories, which are generally purchased in the first six months of a vehicle's lifespan. In addition, during economic downturns some competitors may become more aggressive in their pricing practices, which would adversely impact our gross margin and could cause large fluctuations in our stock price. Certain suppliers may exit the industry which may impact our ability to procure parts and may adversely impact gross margin as the remaining suppliers increase prices to take advantage of limited competition.

Vehicle miles driven, vehicle accident rates and insurance companies' willingness to accept a variety of types of replacement parts in the repair process have fluctuated and may decrease, which could result in a decline of our revenues and negatively affect our results of operations.

We and our industry depend on the number of vehicle miles driven, vehicle accident rates and insurance companies' willingness to accept a variety of types of replacement parts in the repair process. Decreased miles driven reduce the number of accidents and corresponding demand for crash parts, and reduce the wear and tear on vehicles with a corresponding reduction in demand for vehicle repairs and replacement or hard parts. If consumers were to drive less in the future, as a result of higher gas prices or otherwise, our sales may decline and our business and financial results may suffer.

The success of our business depends on the continued growth of the Internet as a retail marketplace and the related expansion of the Internet infrastructure.

Our future success depends upon the continued and widespread acceptance and adoption of the Internet as a vehicle to purchase products. If customers or manufacturers are unwilling to use the Internet to conduct business and exchange information, our business will fail. The commercial acceptance and use of the Internet may not continue to develop at historical rates, or may not develop as quickly as we expect. The growth of the Internet, and in turn the growth of our business, may be inhibited by concerns over privacy and security, including concerns regarding "viruses" and "worms," reliability issues arising from outages or damage to Internet infrastructure, delays in development or adoption of new

standards and protocols to handle the demands of increased Internet activity, decreased accessibility, increased government regulation, and taxation of Internet activity. In addition, our business growth may be adversely affected if the Internet infrastructure does not keep pace with the

growing Internet activity and is unable to support the demands placed upon it, or if there is any delay in the development of enabling technologies and performance improvements.

We may be subject to liability for sales and other taxes and penalties, which could have an adverse effect on our business.

In 2014, we collected sales or other similar taxes only on the shipment of goods to the states of California, Kansas, Virginia, Illinois and Ohio. The U.S. Supreme Court has ruled that vendors whose only connection with customers in a state is by common carrier or the U.S. mail are free from state-imposed duties to collect sales and use taxes in that state. However, states could seek to impose additional income tax obligations or sales tax collection obligations on out-of-state companies such as ours, which engage in or facilitate online commerce, based on their interpretation of existing laws, including the Supreme Court ruling, or specific facts relating to us. If sales tax obligations are successfully imposed upon us by a state or other jurisdiction, we could be exposed to substantial tax liabilities for past sales and penalties and fines for failure to collect sales taxes. We could also suffer decreased sales in that state or jurisdiction as the effective cost of purchasing goods from us increases for those residing in that state or jurisdiction. In addition, a number of states, as well as the U.S. Congress, have been considering various initiatives that could limit or supersede the Supreme Court's apparent position regarding sales and use taxes on Internet sales. If any of these initiatives are enacted, we could be required to collect sales and use taxes in additional states and our revenue could be adversely affected. Furthermore, the U.S. Congress has not yet extended a moratorium, which was first imposed in 1998 but has since expired, on state and local governments' ability to impose new taxes on Internet access and Internet transactions. The imposition by state and local governments of various taxes upon Internet commerce could create administrative burdens for us as well as substantially impair the growth of e-commerce and adversely affect our revenue and profitability. Since our service is available over the Internet in multiple states, these jurisdictions may require us to qualify to do business in these states. If we fail to qualify in a jurisdiction that requires us to do so, we could face liabilities for taxes and penalties.

Security threats to our IT infrastructure could expose us to liability, and damage our reputation and business. It is essential to our business strategy that our technology and network infrastructure remain secure and is perceived by our customers to be secure. Despite security measures, however, any network infrastructure may be vulnerable to cyber-attacks by hackers and other security threats. As a leading online source for automotive aftermarket parts and repair information, we may face cyber-attacks that attempt to penetrate our network security, including our data centers, to sabotage or otherwise disable our network of websites and online marketplaces, misappropriate our or our customers' proprietary information, which may include personally identifiable information, or cause interruptions of our internal systems and services. If successful, any of these attacks could negatively affect our reputation, damage our network infrastructure and our ability to sell our products, harm our relationship with customers that are affected and expose us to financial liability.

If we do not respond to technological change, our websites could become obsolete and our financial results and conditions could be adversely affected.

We maintain a network of websites which requires substantial development and maintenance efforts, and entails significant technical and business risks. To remain competitive, we must continue to enhance and improve the responsiveness, functionality and features of our websites. The Internet and the e-commerce industry are characterized by rapid technological change, the emergence of new industry standards and practices and changes in customer requirements and preferences. Therefore, we may be required to license emerging technologies, enhance our existing websites, develop new services and technology that address the increasingly sophisticated and varied needs of our current and prospective customers, and adapt to technological advances and emerging industry and regulatory standards and practices in a cost-effective and timely manner. Our ability to remain technologically competitive may require substantial expenditures and lead time and our failure to do so may harm our business and results of operations.

Existing or future government regulation could expose us to liabilities and costly changes in our business operations and could reduce customer demand for our products and services.

We are subject to federal and state consumer protection laws and regulations, including laws protecting the privacy of customer non-public information and regulations prohibiting unfair and deceptive trade practices, as well as laws and regulations governing businesses in general and the Internet and e-commerce and certain environmental laws.

Additional laws and regulations may be adopted with respect to the Internet, the effect of which on e-commerce is uncertain. These laws may cover issues such as user privacy, spyware and the tracking of consumer activities, marketing e-mails and communications, other advertising and promotional practices, money transfers, pricing, content and quality of products and services, taxation, electronic contracts and other communications, intellectual property rights, and information security. Furthermore, it is not clear how existing laws such as those governing issues such as property ownership, sales and other taxes, trespass, data mining and

collection, and personal privacy apply to the Internet and e-commerce. To the extent we expand into international markets, we will be faced with complying with local laws and regulations, some of which may be materially different than U.S. laws and regulations. Any such foreign law or regulation, any new U.S. law or regulation, or the interpretation or application of existing laws and regulations to the Internet or other online services or our business in general, may have a material adverse effect on our business, prospects, financial condition and results of operations by, among other things, impeding the growth of the Internet, subjecting us to fines, penalties, damages or other liabilities, requiring costly changes in our business operations and practices, and reducing customer demand for our products and services. We do not maintain insurance coverage to cover the types of claims or liabilities that could arise as a result of such regulation.

We may be affected by global climate change or by legal, regulatory, or market responses to such change.

The growing political and scientific sentiment is that global weather patterns are being influenced by increased levels of greenhouse gases in the earth's atmosphere. This growing sentiment and the concern over climate change have led to legislative and regulatory initiatives aimed at reducing greenhouse gas emissions. For example, proposals that would impose mandatory requirements on greenhouse gas emissions continue to be considered by policy makers in the United States. Laws enacted that directly or indirectly affect our suppliers (through an increase in the cost of production or their ability to produce satisfactory products) or our business (through an impact on our inventory availability, cost of sales, operations or demand for the products we sell) could adversely affect our business, financial condition, results of operations and cash flows. Significant increases in fuel economy requirements or new federal or state restrictions on emissions of carbon dioxide that may be imposed on vehicles and automobile fuels could adversely affect demand for vehicles, annual miles driven or the products we sell or lead to changes in automotive technology. Compliance with any new or more stringent laws or regulations, or stricter interpretations of existing laws, could require additional expenditures by us or our suppliers. Our inability to respond to changes in automotive technology could adversely impact the demand for our products and our business, financial condition, results of operations or cash flows.

The United States government may substantially increase border controls and impose restrictions on cross-border commerce that may substantially harm our business.

We purchase a substantial portion of our products from foreign manufacturers and other suppliers who source products internationally. Restrictions on shipping goods into the United States from other countries pose a substantial risk to our business. Particularly since the terrorist attacks on September 11, 2001, the United States government has substantially increased border surveillance and controls. If the United States were to impose further border controls and restrictions, impose quotas, tariffs or import duties, increase the documentation requirements applicable to cross border shipments or take other actions that have the effect of restricting the flow of goods from other countries to the United States, we may have greater difficulty acquiring our inventory in a timely manner, experience shipping delays, or incur increased costs and expenses, all of which would substantially harm our business and results of operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

As of January 3, 2015, the total square footage of our leased office and distribution centers was 574,000 square feet. This includes approximately 531,000 square feet for our corporate headquarters located in Carson, California and distribution centers in LaSalle, Illinois and Chesapeake, Virginia; and approximately 43,000 square feet of office space in the Philippines. For additional information regarding our obligations under property leases, see “Note 10-Commitments and Contingencies” of the Notes to Consolidated Financial Statements, included in Part IV, Item 15 of this report.

ITEM 3. LEGAL PROCEEDINGS

The information set forth under the caption “Legal Matters” in “Note 10-Commitments and Contingencies” of the Notes to Consolidated Financial Statements, included in Part IV, Item 15 of this report, and is incorporated herein by reference. For an additional discussion of certain risks associated with legal proceedings, see the section entitled “Risk Factors” in Item 1A of this report.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock is being trading on the Nasdaq under the symbol "PRTS." The table below sets forth the high and low sales prices of our common stock for the periods indicated:

	High	Low
2014:		
Quarter ended March 29, 2014	\$3.36	\$1.82
Quarter ended June 28, 2014	4.00	2.52
Quarter ended September 27, 2014	4.09	2.55
Quarter ended January 3, 2015	3.19	2.13
2013:		
Quarter ended March 30, 2013	\$2.24	\$1.01
Quarter ended June 29, 2013	1.88	1.03
Quarter ended September 28, 2013	1.38	0.91
Quarter ended December 28, 2013	3.18	1.21

On March 12, 2015, the last reported sale price of our common stock on the Nasdaq was \$2.63 per share.

Holders

As of March 12, 2015, there were approximately 1,673 holders of record of our common stock.

Stock Performance Graph

The material in this section is not "soliciting material," is not deemed "filed" with the SEC, and shall not be deemed to be incorporated by reference into any of our filings under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended.

The following graph shows a quarterly comparison of the total cumulative returns of an investment of \$100 in cash on December 31, 2009, in (i) our common stock, (ii) the Morgan Stanley Technology Index, (iii) the S&P 500 Retail Index and (iv) NASDAQ Composite Index, in each case through December 31, 2014. The performance of our stock, the Morgan Stanley Technology Index, the S&P 500 Retail Index and the NASDAQ Composite Index have been obtained from online data available. We have used the available prices at the end of the week closest to the end of the period for the purposes of the graph. The comparisons in the graph are required by the SEC and are not intended to forecast or be indicative of the possible future performance of our common stock. The graph assumes that all common stock dividends have been reinvested (to date, we have not declared dividends on our common stock).

Dividend Policy

No dividends on common stock were paid during the fiscal year ended January 3, 2015. We issued approximately \$240,000 in common stock to our Series A Preferred shareholders during the fiscal year ended January 3, 2015. We paid approximately \$64,000 of dividends in cash and approximately \$60,000 in common stock to our Series A Preferred shareholders during the fiscal year ended December 28, 2013. We do not anticipate that we will declare or pay any cash dividends on our common stock in the foreseeable future; however, we will have to pay dividends to our preferred shareholders until such shares are redeemed or converted. We maintain an asset-based revolving credit facility with JPMorgan Chase Bank (the "Credit Agreement") that provides for, among other things, a revolving commitment in an aggregate principal amount of up to \$25 million subject to a borrowing base derived from certain of our receivables, inventory and property and equipment. The Credit Agreement requires us to obtain a prior written consent from JPMorgan Chase Bank when we determine to pay any dividends on or make any distribution with respect to our common stock. Under the Second Amendment to Credit Agreement dated March 25, 2013, we obtained written consent from JPMorgan Chase Bank to pay dividends on our Series A Preferred Shares. See "Liquidity and Capital Resources" in Item 7 of Part II included in this report for further information on the covenants under the secured Credit Agreement. Any future determination to pay cash dividends on our common stock will be subject to the above restriction, as well as restrictions under any other existing indebtedness, at the discretion of our Board of Directors and will be dependent upon our financial condition, results of operations, capital requirements, and other factors the Board of Directors deems relevant.

Recent Sales of Unregistered Securities

None.

Use of Proceeds from Sales of Registered Securities

None.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

We did not repurchase any of our outstanding equity securities during the most recent quarter covered by this report.

ITEM 6. SELECTED FINANCIAL DATA

The following selected financial information as of and for the dates and periods indicated have been derived from our audited consolidated financial statements. The information set forth below is not necessarily indicative of results of future operations, and should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Part II, Item 7 of this report and our consolidated financial statements and related notes included elsewhere in this report (in thousands, except per share data).

	53 Weeks Ended January 3, 2015 (“fiscal year 2014”) (1)	52 Weeks Ended December 28, 2013 (“fiscal year 2013”) (2)	52 Weeks Ended December 29, 2012 (“fiscal year 2012”) (3)	52 Weeks Ended December 31, 2011 (“fiscal year 2011”) (4)	52 Weeks Ended January 1, 2011 (“fiscal year 2010”) (5)

(1) Fiscal year 2014 included restructuring charges of \$1.1 million incurred due to the closure of our warehouse in Carson, California.

(2) Fiscal year 2013 included severance charges of \$0.7 million incurred due to a reduction in workforce during the first half of 2013.

- (3) Fiscal year 2012 included restructuring costs of \$0.6 million related to severance charges incurred due to a reduction in workforce from the closure of our call center in La Salle, Illinois.
- (4) Fiscal year 2011 included acquisition and integration costs of \$7.4 million related to our WAG acquisition. During fiscal year 2010, the net sales of \$39.1 million and the net loss of \$6.0 million of WAG since the acquisition date of August 12, 2010 were included in the consolidated statement of operations. We recognized \$3.1 million of acquisition and integration related costs in fiscal year 2010. Also, the recognition of \$13.6 million
- (5) valuation allowance for deferred income tax assets was included in fiscal year 2010. The total valuation allowance recorded during the year was \$18.3 million, of which \$4.7 million was recorded as a reduction to the value of the acquired deferred tax assets of WAG recorded as part of the purchase accounting for WAG.

	January 3, 2015	December 28, 2013	December 29, 2012	December 31, 2011	January 1, 2011

Noncontrolling interests	2,946	—	—	—	—

(1) As of December 31, 2011 and January 1, 2011, balances excluded \$2.1 million and \$4.1 million of investments which were reclassified to long-term due to illiquidity in the market.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement

You should read the following discussion and analysis in conjunction with our consolidated financial statements and the related notes thereto contained in Part IV, Item 15 of this report. Certain statements in this report, including statements regarding our business strategies, operations, financial condition, and prospects are forward-looking statements. Use of the words "anticipates," "believes," "could," "estimates," "expects," "intends," "may," "plans," "potential," "projects," "should," "will," "would," "will likely continue," "will likely result" and similar expressions that contemplate future events may identify forward-looking statements.

The information contained in this section is not a complete description of our business or the risks associated with an investment in our common stock. We urge you to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the SEC, which are available on the SEC's website at <http://www.sec.gov>. The section entitled "Risk Factors" set forth in Part I, Item 1A of this report, and similar discussions in our other SEC filings, describe some of the important factors, risks and uncertainties that may affect our business, results of operations and financial condition and could cause actual results to differ materially from those expressed or implied by these or any other forward-looking statements made by us or on our behalf. You are cautioned not to place undue reliance on these forward-looking statements, which are based on current expectations and reflect management's opinions only as of the date thereof. We do not assume any obligation to revise or update forward-looking statements. Finally, our historic results should not be viewed as indicative of future performance.

Overview

We are one of the largest online providers of aftermarket auto parts, including body parts, hard parts, and performance parts and accessories. Our user-friendly websites provide customers with a broad selection of SKUs, with detailed product descriptions and photographs. Our proprietary product database maps our SKUs to product applications based on vehicle makes, models and years. We principally sell our products to individual consumers through our network of websites and online marketplaces. Our flagship websites are located at www.autopartswarehouse.com, www.carparts.com, www.jcwhitney.com and www.AutoMD.com and our corporate website is located at www.usautoparts.net. We believe our strategy of disintermediating the traditional auto parts supply chain and selling products directly to customers over the Internet allows us to more efficiently deliver products to our customers while generating higher margins. Industry-wide trends that support our strategy include:

1. Number of SKUs required to serve the market. The number of automotive SKUs has grown dramatically over the last several years. In today's market, unless the consumer is driving a high volume vehicle and needs a simple

maintenance item, the part they need is not typically on the shelf at a brick-and-mortar store. We believe our user-friendly websites provide customers with a comprehensive selection of approximately 1.6 million SKUs with detailed product descriptions, attributes and photographs paired with the flexibility of fulfilling orders using both drop-ship and stock-and-ship as well as our internally developed distributor selection system, and provide customers with a favorable alternative to the brick-and-mortar shopping experience.

2.U.S. vehicle fleet expanding and aging. The average age of U.S. vehicles, an indicator of auto parts demand, remained at a record-high 11.4 years as of January 2014, according to IHS Automotive, a market analytics firm that expects the average age to remain at 11.4 years through 2015, and then rise to 11.5 years by 2017 and 11.7 years by 2019. IHS expects the number of vehicles that are 12 years or older to increase by 15% by 2019. IHS found that the total number of light vehicles in operation in the U.S. has increased to record levels, with new vehicle registrations outpacing scrappage rates by more than 24%. We believe an increasing vehicle base and rising average age of vehicles will have a positive impact on overall aftermarket parts demand because older vehicles generally require more repairs.

3.Growth of online sales. The overall revenue from online sales of auto parts and accessories is expected to increase from \$5.1 billion in 2013 to \$16.56 billion in 2020, according to a forecast from Frost and Sullivan. Lower prices and consumers' growing comfort with digital platforms are driving the shift to online sales. We believe that we are well positioned for the shift to online sales due to our history of being a leading source for aftermarket automotive parts through online marketplaces and our network of websites.

Our History. We were formed in Delaware in 1995 as a distributor of aftermarket auto parts and launched our first website in 2000. We rapidly expanded our online operations, increasing the number of SKUs sold through our e-commerce network, adding additional websites, improving our Internet marketing proficiency and commencing sales in online marketplaces. Additionally, in August 2010, through our acquisition of Whitney Automotive Group, Inc. (referred to herein as "WAG"), we expanded our product-lines and increased our customer reach in the do-it-yourself ("DIY") automobile and off-road accessories market.

International Operations. In April 2007, we established offshore operations in the Philippines. Our offshore operations allow us to access a workforce with the necessary technical skills at a significantly lower cost than comparably experienced U.S.-based professionals. Our offshore operations are responsible for a majority of our website development, catalog management, and back office support. Our offshore operations also house our main call center. We had 714 employees in the

Philippines as of December 28, 2013. We had 704 employees in the Philippines as of January 3, 2015. We believe that the cost advantages of our offshore operations provide us with the ability to grow our business in a cost-effective manner.

AutoMD. On October 8, 2014, AutoMD entered into a common stock purchase agreement to sell seven million shares of AutoMD common stock at a purchase price of \$1.00 per share to third-party investors, reducing the Company's ownership interest in AutoMD to 64.1%.

AutoMD's mission is to be the repair shop advocate for all vehicle owners, increase their confidence in the repair process and provide the most affordable and high quality options for automobile repair. AutoMD's current focus is on marketing and technology. AutoMD's current marketing strategy involves driving growth in their repair shop network. During 2014, marketing efforts resulted in approximately 1,700 repair shops joining AutoMD's network, rising from about 400 repair shops in January 2014 to approximately 2,100 at the end of fiscal 2014. AutoMD now has repair shops participating in 41 states. In addition to marketing, AutoMD continues to refine the online experience, including their mobile presence.

E-commerce. To understand revenue generation through our network of e-commerce websites, we monitor several key business metrics, including the following:

	Fiscal Year Ended		
	January 3, 2015	December 28, 2013	December 29, 2012
Unique Visitors (millions) ¹	119.8	132.9	168.9
E-commerce Orders (thousands)	2,010	1,939	2,427
Online Marketplace Orders (thousands)	1,049	741	649
Total Online Orders (thousands)	3,059	2,680	3,076
E-commerce Average Order Value	\$111	\$112	\$114
Online Marketplace Average Order Value	\$66	\$67	\$77
Total Online Average Order Value	\$96	\$99	\$106

Edgar Filing: U.S. Auto Parts Network, Inc. - Form 10-K

Revenue Capture ¹	85.0	% 83.3	% 83.9	%
Conversion ¹	1.7	% 1.5	% 1.4	%

¹ Excludes online marketplaces and media properties (e.g. AutoMD).

25

Unique Visitors: A unique visitor to a particular website represents a user with a distinct IP address that visits that particular website. We define the total number of unique visitors in a given month as the sum of unique visitors to each of our websites during that month. We measure unique visitors to understand the volume of traffic to our websites and to track the effectiveness of our online marketing efforts. The number of unique visitors has historically varied based on a number of factors, including our marketing activities and seasonality. Included in the unique visitors are mobile device based customers, who are becoming an increasing part of our business. Shifting consumer behavior and technology enhancements indicates that customers are becoming more inclined to purchase auto parts through their mobile devices. User sophistication and technological advances have increased consumer expectations around the user experience on mobile devices, including speed of response, functionality, product availability, security, and ease of use. We believe enhancements to online solutions specifically catering to mobile based shopping can result in an increase in the number of orders and revenues. We believe an increase in unique visitors to our websites will result in an increase in the number of orders. We seek to increase the number of unique visitors to our websites by attracting repeat customers and improving search engine marketing and other internet marketing activities. During fiscal year 2014, our unique visitors decreased by 9.9% compared to the fiscal year 2013. We expect the total number of unique visitors in 2015 to marginally improve, as we believe we have addressed the challenges we experienced from changes search engines have made to the formulas, or algorithms, that they use to optimize their search results, as described in further detail under “—Executive Summary” below.

Total Number of Orders: We monitor the total number of orders as an indicator of future revenue trends. During the fiscal year 2014, the total number of orders was up by 14.1% compared to the fiscal year 2013, with e-commerce and online marketplace orders improving by 4.1% and 41.6%, respectively. We believe that e-commerce orders improved through an improved customer experience and pricing strategies. We believe that the increase in online marketplace orders was primarily due to competitive pricing strategies. We expect the total number of orders in 2015 to marginally improve over our results for 2014. We recognize revenue associated with an order when the products have been delivered, consistent with our revenue recognition policy.

Average Order Value: Average order value represents our net sales on a placed orders basis for a given period of time divided by the total number of orders recorded during the same period of time. During the fiscal year 2014, our average order value decreased by 3.0% compared to the fiscal year 2013. We expect this trend to continue in 2015 primarily due to increased competition, as described in further detail under “Executive Summary” below. We seek to increase the average order value as a means of increasing net sales. Average order values vary depending upon a number of factors, including the components of our product offering, the order volume in certain online sales channels, macro-economic conditions, and the competition online.

Revenue Capture: Revenue capture is the amount of actual dollars retained after taking into consideration returns, credit card declines and product fulfillment. During the fiscal year 2014, our revenue capture increased by 1.7% to 85.0% compared to 83.3% in fiscal year 2013. The increase in revenue capture was due to lower credit card declines and improved product fulfillment in 2014 compared to 2013. We expect our revenue capture level to improve in 2015 as we continue to improve our customers’ purchase experience.

Conversion: Conversion is the number of orders as a rate to the total number of unique visitors. This rate indicates how well we convert a visitor to a customer sales order. During fiscal year 2014, our conversion improved by 0.2% to 1.7% compared to 1.5% in fiscal year 2013.

Executive Summary

For fiscal year 2014, the Company generated net sales of \$283,508, compared with \$254,753 for fiscal year 2013, representing an increase of 11.3%. Net loss for fiscal year 2014 was \$6,879, or \$0.21 per share. This compares to a net loss of \$15,634, or \$0.48 per share, for fiscal year 2013. We generated net income before interest expense, net, income tax provision, depreciation and amortization expense and amortization of intangible assets, plus share-based compensation expense, impairment loss and restructuring costs (“Adjusted EBITDA”) of \$7,903 in fiscal year 2014 compared to \$6,000 in fiscal year 2013. Adjusted EBITDA, which is not a Generally Accepted Accounting Principle measure, is presented because such measure is used by rating agencies, securities analysts, investors and other parties in evaluating the Company. It should not be considered, however, as an alternative to operating income, as an

indicator of the Company's operating performance, or as an alternative to cash flows as measures of the Company's overall liquidity, as presented in the Company's consolidated financial statements. Further, the Adjusted EBITDA measure shown may not be comparable to similarly titled measures used by other companies. Refer to the table presented below for reconciliation of net loss to Adjusted EBITDA.

Total revenues increased in fiscal year 2014 compared to the same period in 2013 primarily due to growth in our online sales. Our online sales, which include our e-commerce, online marketplace sales channels and online advertising, contributed 90.7% of total revenues, and our offline sales, which consist of our Kool-Vue™ and wholesale operations, contributed 9.3% of total revenues. Our online sales for fiscal year 2014 increased by \$27,764, or 12.1%, to \$257,160 compared to \$229,396 in

fiscal year 2013 primarily due to a 14.1% increase in the total number of orders. Our offline sales increased by \$992, or 3.9%, to \$26,349 compared to the same period last year. Quarterly revenue increased year-over-year in each quarter of 2014. Prior to the first quarter of fiscal 2014, year-over-year quarterly revenue declined for six consecutive quarters beginning in the third quarter of 2012. The highest decline occurred during the first quarter of 2013 (25.2%) as compared to the first quarter of 2012, and the least in the fourth quarter of 2013 compared to the fourth quarter of 2012 (5.0%). The table below presents quarterly revenues (in thousands) and the change in quarterly year-over-year revenues. All quarters presented below represent thirteen week periods with the exception of the quarter ended January 3, 2015, which is a fourteen week period.

Year over year quarterly sales trend

Quarter ended	Net Sales	Quarter ended	Net sales	% change	
Sept. 29, 2012	\$73,014	Oct 1, 2011	\$78,593	(7.1)%
Dec 29, 2012	\$62,848	Dec 31, 2011	\$77,233	(18.6)%
Mar 30, 2013	\$65,405	Mar 31, 2012	\$87,436	(25.2)%
Jun 29, 2013	\$67,889	Jun 30, 2012	\$80,719	(15.9)%
Sept. 28, 2013	\$61,724	Sept 29, 2012	\$73,014	(15.5)%
Dec 28, 2013	\$59,735	Dec 29, 2012	\$62,848	(5.0)%
Mar 29, 2014	\$68,028	Mar 30, 2013	\$65,405	4.0	%
Jun 28, 2014	\$76,947	Jun 29, 2013	\$67,889	13.3	%
Sep 27, 2014	\$67,965	Sept. 28, 2013	\$61,724	10.1	%
Jan 3, 2015	\$70,568	Dec 28, 2013	\$59,735	18.1	%

Like most e-commerce retailers, our success depends on our ability to attract online consumers to our websites and convert them into customers in a cost-effective manner. Historically, marketing through search engines provided the most efficient opportunity to reach millions of on-line auto part buyers. We are included in search results through paid search listings, where we purchase specific search terms that will result in the inclusion of our listing, and algorithmic searches that depend upon the searchable content on our websites. Algorithmic listings cannot be purchased and instead are determined and displayed solely by a set of formulas utilized by the search engine. We have had a history of success with our search engine marketing techniques, which gave our different websites preferred positions in search results. But search engines, like Google, revise their algorithms from time to time in an attempt to optimize their search results. Since 2011, Google has released changes to Google's search results ranking algorithm aimed to lower the rank of certain sites and return other sites near the top of the search results based upon the quality of the particular site as determined by Google. Google made additional updates throughout fiscal year 2012 and 2013. We were negatively impacted by the changes in methodology for how Google displayed or selected our different websites for customer search results. This reduced our unique visitor count which adversely affected our financial results. Our unique visitor count decreased by 13.1 million, or 9.9%, for fiscal 2014 to 119.8 million unique visitors compared to 132.9 million unique visitors for fiscal 2013. In 2012 and 2013 we believe we were affected by search engine algorithm changes due to the use of our product catalog across multiple websites. To address this issue we consolidated to a significantly smaller number of websites to ensure unique catalog content. The consolidation resulted in fewer visitors in both 2013 and 2014 as websites continued to close. However, because of the consolidation and improvements in catalog content, orders increased in 2014. As we are significantly dependent upon search engines for our website traffic, if we are unable to attract unique visitors, our business and results of operations will be harmed.

Barriers to entry in the automotive aftermarket industry are low, and current and new competitors can launch websites at a relatively low cost. Due to a number of factors, including the rise of online marketplaces, it is easier for a traditional offline supplier to begin selling online and compete with us. These larger suppliers have access to merchandise at lower costs, enabling them to sell products at lower prices while maintaining adequate gross margins. Our financial results were negatively impacted by the increased level of competition. Our average order value went down marginally by \$4, or 3.0%, for fiscal year 2014 to \$95 compared to \$99 in fiscal year 2013 as a result of increased pricing competition. Our current and potential customers may decide to purchase directly from our

suppliers. Continuing increased competition from our suppliers that have access to products at lower prices than us could result in reduced sales, lower operating margins, reduced profitability, loss of market share and diminished brand recognition. In addition, some of our competitors have used and may continue to use aggressive pricing tactics. We expect that competition will further intensify in the future as Internet use and online commerce continue to grow worldwide. We took a number of steps during 2014 to attempt to reduce the selling prices of our products while increasing margins, which are discussed below.

Total expenses, which primarily consisted of cost of sales and operating costs, increased in fiscal year 2014 compared to the same period in 2013. Components of our cost of sales and operating costs are described in further detail under — “Basis of Presentation” below.

Headcount decreased in fiscal year 2014 compared to fiscal year 2013. Our employees at the end of fiscal year 2014 decreased by about 4.7% to 983 compared to 1,032 at the end of fiscal year 2013. Our employees in the Philippines decreased to 704 at the end of fiscal year 2014 compared to 714 at the end of fiscal year 2013. In the first half of 2014, as part of our initiatives to reduce labor costs and improve operating efficiencies in response to the challenges in the marketplace and general market conditions, we reduced our workforce by 77 employees (for additional details, refer to “Note 12-Restructuring Costs” of the Notes to Consolidated Financial Statements, included in Part I, Item 1 of this report). Partially offsetting the decrease in headcount related to restructuring, we hired 28 employees, mostly to support the additional inventory volume at our two remaining warehouses. While we have and continue to undertake several initiatives to continue to increase revenues, improve gross margin and reduce the losses in 2015, if the downward trend in our gross margin and net loss continue in 2015, we may be required to further reduce our labor costs. Excluding impairment charges and higher depreciation and amortization in fiscal year 2013, operating expenses increased primarily due to higher fulfillment charges and marketing spend related to higher sales volume. As a percent of revenue, operating expenses were favorable in fiscal 2014 compared to fiscal 2013 except for fulfillment expense. In 2014, we made positive strides towards achieving our strategic goals and in 2015 we will continue to pursue these strategies to continue our positive sales growth and improve gross profit while reducing operating costs as percent of sales:

We expect to continue positive e-commerce growth by providing unique catalog content and providing better content on our websites thereby improving our ranking on the search results. In addition, we intend improve mobile enabled websites to take advantage of shifting consumer behaviors. We expect this to increase unique visitors to our website and help us grow our revenues. We expect revenue trends to remain positive in 2015.

We continue to work to improve the website purchase experience for our customers by (1) helping our customers find the parts they want to buy by reducing failed searches and increasing user purchase confidence; (2) selling more highly customized accessories by partnering with manufacturers to build custom shopping experiences; (3) increasing order size across our sites through improved recommendation engines; and (4) completing the roll out of high quality images and videos with emphasis on accessory product lines. In addition, we intend to build mobile enabled websites to take advantage of shifting consumer behaviors. These efforts may increase the conversion rate of our visitors to customers, total number of orders and average order value, repeat purchases and contribute to our revenue growth. We continue to work to becoming one of the best low price options in the market. We will lower our prices by increasing foreign sourced private label products as they are generally less expensive and we believe provide better value for the consumer. We expect this to improve the conversion rate for our visitors to our website, grow our revenues and improve our margins. We also plan to transition away from lower margin stock ship branded products and expand our private label mix, which provides higher margins.

Increase product selection by being the first to market with new SKUs. We currently have over 45,000 private label SKUs and 1.6 million branded SKUs in our product selection. We will seek to add new categories and expand our existing specialty categories. We expect this to increase the total number of orders and contribute to our revenue growth. Additionally, we plan to continue to maintain our inventory in stock position throughout the year to ensure improved service levels and customer experience.

Be the consumer advocate for auto repair through AutoMD.com. We will continue to devote resources to AutoMD.com and its system development. We expect this to improve our brand recognition and contribute to our revenue growth.

Continue to implement cost saving measures.

Overall, we expect revenue growth and reduced net losses in 2015 compared to 2014, due to the initiatives we have implemented. However, if the revenue growth and reduced net losses we experienced in fiscal year 2014 do not continue in 2015 and are more negative than we expect, it could severely impact our liquidity as we may not be able to provide positive cash flows from operations in order to meet our working capital requirements. We may need to borrow additional funds from our credit facility, which under certain circumstances may not be available, sell additional assets or seek additional equity or additional debt financing in the future. Refer to the “Liquidity and Capital Resources” section below for additional details. There can be no assurance that we would be able to raise such additional financing or engage in such asset sales on acceptable terms, or at all. If our net losses continue for longer

than we expect because our strategies to return to profitability are not successful or otherwise, and if we are not able to raise adequate additional financing or proceeds from asset sales to continue to fund our ongoing operations, we will need to defer, reduce or eliminate significant planned expenditures, restructure or significantly curtail our operations.

28

As we redesign our approach to attracting customers through search engines, we hope to offset much of the decline in visitors to our e-commerce sites by continuing to pursue revenue opportunities in third-party online marketplaces, a number of which are growing significantly each year. Auto parts buyers are finding third-party online marketplaces to be a very attractive environment, for many reasons, the top four being: (1) the security of their personal information; (2) the ability to easily compare product offerings from multiple sellers; (3) transparency (consumers can leave positive or negative feedback about their experience); and (4) favorable pricing. Successful selling in these third-party online marketplaces depends on product innovation, and strong relationships with suppliers, both of which we believe to be our core competencies.

Adjusted EBITDA, which is not a Generally Accepted Accounting Principle measure, is presented because such measure is used by rating agencies, securities analysts, investors and other parties in evaluating the Company. It should not be considered, however, as an alternative to operating income, as an indicator of the Company's operating performance, or as an alternative to cash flows as measures of the Company's overall liquidity, as presented in the Company's consolidated financial statements. Further, the Adjusted EBITDA measure shown may not be comparable to similarly titled measures used by other companies. The table below reconciles net loss to Adjusted EBITDA for the periods presented (in thousands):

	Fifty-Three Weeks Ended January 3, 2015	Fifty-Two Weeks Ended December 28, 2013	Fifty-Two Weeks Ended December 29, 2012
Consolidated			
Net loss	\$(7,086)	\$(15,634)	\$(35,978)
Interest expense, net	1,101	972	774
Income tax provision (benefit)	138	43	(937)
Amortization of intangibles	422	381	1,189
Depreciation and amortization	8,923	12,175	15,204
EBITDA	3,498	(2,063)	(19,748)
Impairment loss on goodwill	—	—	18,854
Impairment loss on property and equipment	—	4,832	1,960
Impairment loss on intangible assets	—	1,245	5,613
Share-based compensation	2,371	1,263	1,673
Loss on debt extinguishment	—	—	360
Legal costs related to intellectual property rights	—	—	67
Inventory write-down related to Carson closure ⁽²⁾	897	—	—
Restructuring costs ⁽¹⁾	1,137	723	640
Adjusted EBITDA	7,903	6,000	9,419
Add: AutoMD net loss	2,151	1,990	2,322
Less: AutoMD depreciation and amortization	(1,693)	(1,588)	(1,056)
Adjusted EBITDA attributable to Base USAP	\$8,361	\$6,402	\$10,685

We incurred restructuring costs related to our initiatives to reduce labor costs and improve operating efficiencies in (1) response to the challenges in the marketplace and general market conditions. Refer to "Note 12 – Restructuring Costs" of our Notes to Consolidated Financial Statements for additional details.

As a result of the closure of the Carson warehouse, the Company expects that the remaining warehouses may reach capacity constraints when inventory levels peak in late winter/early spring. To mitigate this risk, the Company has (2) reduced the sales price of certain inventory and incurred lower of cost or market adjustments in an effort to reduce inventory levels. Additional charges were incurred related to inventory that was not deemed economical to transfer to the remaining warehouses. Refer to "Note 12 – Restructuring Costs" of our Notes to Consolidated Financial Statements for additional details.

Basis of Presentation

Net Sales. Online and offline sales represent two different sales channels for our products. We generate online net sales primarily through the sale of auto parts to individual consumers through our network of e-commerce websites, which includes mobile based sales, and online marketplaces, including online advertising. E-commerce sales are derived from our network of websites, which we own and operate. E-commerce and online marketplace sales also include inbound telephone sales through our call center that supports these sales channels. Online marketplaces consist primarily of sales of our products on online auction websites, where we sell through auctions as well as through storefronts that we maintain on third-party owned websites. We sell advertising and sponsorship positions on our e-commerce websites to highlight vendor brands and offer complementary products and services that benefit our customers. Advertising is targeted to specific sections of the websites and can also be targeted to specific users based on the vehicles they drive. Advertising partners primarily include part vendors, national automotive aftermarket brands and automobile manufacturers. Our offline sales channel represents our distribution of products directly to commercial customers by selling auto parts to collision repair shops. Our offline sales channel also includes the distribution of our Kool-Vue™ mirror line to auto parts distributors nationwide. We also serve consumers by operating a retail outlet store in LaSalle, Illinois.

Cost of Sales. Cost of sales consists of the direct costs associated with procuring parts from suppliers and delivering products to customers. These costs include direct product costs, outbound freight and shipping costs, warehouse supplies and warranty costs, partially offset by purchase discounts and cooperative advertising. Depreciation and amortization expenses are excluded from cost of sales and included in marketing, general and administrative and fulfillment expenses as noted below.

Marketing Expense. Marketing expense consists of online advertising spend, internet commerce facilitator fees and other advertising costs, as well as payroll and related expenses associated with our marketing catalog, customer service and sales personnel. These costs are generally variable and are typically a function of net sales. Marketing expense also includes depreciation and amortization expense and share-based compensation expense.

General and Administrative Expense. General and administrative expense consists primarily of administrative payroll and related expenses, merchant processing fees, legal and professional fees and other administrative costs. General and administrative expense also includes depreciation and amortization expense and share-based compensation expense.

Fulfillment Expense. Fulfillment expense consists primarily of payroll and related costs associated with our warehouse employees and our purchasing group, facilities rent, building maintenance, depreciation and other costs associated with inventory management and our wholesale operations. Fulfillment expense also includes share-based compensation expense.

Technology Expense. Technology expense consists primarily of payroll and related expenses of our information technology personnel, the cost of hosting our servers, communications expenses and Internet connectivity costs, computer support and software development amortization expense. Technology expense also includes share-based compensation expense.

Amortization of Intangible Assets. Amortization of intangibles consists of the amortization expense associated with our definite-lived intangible assets.

Impairment Loss. Impairment loss is recorded as a result of impairment testing performed for goodwill and indefinite-lived intangible assets in accordance with ASC 350 Intangibles – Goodwill and Other, and long-lived assets, including intangible assets subject to amortization, in accordance with ASC 360 Property, Plant and Equipment.

Other Income, Net. Other income, net consists of miscellaneous income or expense such as gains/losses from disposition of assets, and interest income comprised primarily of interest income on investments.

Interest Expense. Interest expense consists primarily of interest expense on our outstanding loan balance, deferred financing cost amortization and capital lease interest.

Segment Data

The Company operates in two reportable segments identified as Base USAP, which is the core auto parts business, and AutoMD, an online automotive repair source of which the Company is a majority stockholder. Segment

information is prepared on the same basis that our chief executive officer, who is our chief operating decision maker, manages the segments, evaluates financial results, and makes key operating decisions. Management evaluates the performance of its operating segments based on net sales, gross profit and loss from operations. The accounting policies of the operating segments are the same as those described in “Note 1 - Summary of Significant Accounting Policies” of our Notes to Consolidated Financial Statements. Operating income represents earnings before other income, interest expense and income taxes. The identifiable assets by segment disclosed in this note are those assets specifically identifiable within each segment.

Summarized segment information for our continuing operations from the two reportable segments for the periods presented is as follows (in thousands):

	Base USAP	AutoMD	Consolidated
Fiscal year ended January 3, 2015			
Net sales	\$283,211	\$297	\$283,508
Gross profit	78,153	297	78,450
Operating costs (1)	81,887	2,475	84,362
Loss from operations	(3,734) (2,178) (5,912
Capital expenditures	4,237	1,319	5,556
Depreciation and amortization	7,230	1,693	8,923
Total assets, net of accumulated depreciation	\$74,414	\$8,493	\$82,907
Fiscal year ended December 28, 2013			
Net sales	254,422	331	254,753
Gross profit	73,802	331	74,133
Operating costs (1)	86,579	2,321	88,900
Loss from operations	(12,777) (1,990) (14,767
Capital expenditures	6,297	2,028	8,325
Depreciation and amortization	10,676	1,499	12,175
Total assets, net of accumulated depreciation	67,039	2,143	69,182
Fiscal year ended December 29, 2012			
Net sales	\$303,667	\$350	\$304,017
Gross profit	91,288	350	91,638
Operating costs (1)	125,048	2,380	127,428
Loss from operations	(33,760) (2,030) (35,790
Capital expenditures	8,547	1,608	10,155
Depreciation and amortization	13,475	1,729	15,204
Total assets, net of accumulated depreciation	86,818	2,059	88,877

(1) Operating costs for AutoMD primarily consist of depreciation on fixed assets and personnel costs.

Results of Operations

The following table sets forth selected statement of operations data for the periods indicated, expressed as a percentage of net sales:

	Fiscal Year Ended				
	January 3, 2015	December 28, 2013	December 29, 2012		
Net sales	100.0	% 100.0	% 100.0	%	
Cost of sales	72.3	70.9	69.9		
Gross profit	27.7	29.1	30.1		
Operating expenses:					
Marketing	14.8	16.1	16.9		
General and administrative	5.9	6.9	6.5		
Fulfillment	7.2	7.3	7.3		
Technology	1.7	2.0	2.1		
Amortization of intangible assets	0.1	0.2	0.4		
Impairment loss on goodwill	—	—	6.2		
Impairment loss on property and equipment	—	1.9	0.6		
Impairment loss on intangible assets	—	0.5	1.9		
Total operating expenses	29.7	34.9	41.9		
Loss from operations	(2.0)) (5.8)) (11.8))	
Other income (expense):					
Other income, net	—	0.1	—		
Interest expense	(0.4)) (0.4)) (0.2))	
Loss on debt extinguishment	—	—	(0.1))	
Total other expense	(0.4)) (0.3)) (0.3))	
Loss before income taxes	(2.4)) (6.1)) (12.1))	
Income tax (benefit) provision	—	—	(0.3))	
Net loss	(2.4))% (6.1))% (11.8))%	

Fifty-Three Weeks Ended January 3, 2015 Compared to the Fifty-Two Weeks Ended December 28, 2013
Net Sales and Gross Margin

	Fiscal Year Ended		\$ Change	% Change	
	January 3, 2015	December 28, 2013			
	(in thousands)				
Net sales	\$283,508	\$254,753	\$28,755	11.3	%
Cost of sales	205,058	180,620	24,438	13.5	%
Gross profit	\$78,450	\$74,133	\$4,317	5.8	%
Gross margin	27.7	% 29.1	%	(1.4))%

Net sales increased \$28,755, or 11.3%, for fiscal year 2014 compared to fiscal year 2013. Our net sales consisted of online sales, which included mobile based online sales, representing 90.7% of the total for fiscal year 2014 (compared to 90.0% in fiscal year 2013), and offline sales, representing 9.3% of the total for fiscal year 2014 (compared to 10.0% in fiscal year 2013). The net sales increase was due to an increase of \$27,764, or 12.1%, in online sales and a \$992, or 3.9%, increase in offline sales. Online sales increased primarily due to a 14.1% increase in number of orders.

Gross profit increased \$4,317, or 5.8%, in fiscal year 2014 compared to fiscal year 2013. Gross margin decreased 1.4% to 27.7% in fiscal year 2014 compared to 29.1% in fiscal year 2013. Gross margin primarily decreased in fiscal year 2014 compared to fiscal year 2013 due to reduced margins from online sales. Our gross margins were negatively impacted by the factors described in further detail under “Executive Summary” above.

Marketing Expense

	Fiscal Year Ended		\$ Change	% Change	
	January 3, 2015	December 28, 2013			
	(in thousands)				
Marketing expense	\$42,008	\$41,045	\$963	2.3	%
Percent of net sales	14.8	% 16.1	%	(1.3)%

Total marketing expense increased \$963, or 2.3%, for fiscal year 2014 compared to fiscal year 2013 but declined as a percent of sales by 130 basis points due to more efficient marketing spend in fiscal year 2014. Online advertising expense, which includes catalog costs, was \$18,485, or 7.2%, of online sales for fiscal year 2014, compared to \$16,619, or 7.2%, of online sales for fiscal year 2013. Online advertising expense increased primarily due to increased online e-commerce advertising and non-catalog advertising costs of \$1,608. Marketing expense, excluding online advertising, was \$23,523, or 8.3%, of net sales for fiscal year 2014, compared to \$24,426, or 9.6%, of net sales for fiscal year 2013. Marketing expenses, excluding online advertising, decreased primarily due to lower product management wages and depreciation and amortization expense.

General and Administrative Expense

	Fiscal Year Ended		\$ Change	% Change	
	January 3, 2015	December 28, 2013			
	(in thousands)				
General and administrative expense	\$16,701	\$17,567	\$(866)	(4.9)%
Percent of net sales	5.9	% 6.9	%	(1.0)%

General and administrative expense decreased \$866, or 4.9%, for fiscal year 2014 compared to fiscal year 2013. The decrease for fiscal year 2014 as compared to fiscal year 2013 was primarily due to lower wages and overhead. The decrease in general and administrative expense was partially offset by greater merchant processing fees resulting from increased online sales during 2014.

Fulfillment Expense

	Fiscal Year Ended		\$ Change	% Change	
	January 3, 2015	December 28, 2013			
	(in thousands)				
Fulfillment expense	\$20,368	\$18,702	\$1,666	8.9	%
Percent of net sales	7.2	% 7.3	%	(0.1)

Fulfillment expense increased \$1,666, or 8.9%, for fiscal year 2014 compared to fiscal year 2013 and declined as a percent of sales due to improving sales volume during 2014, which led to increased shipping costs and warehouse wages. Additionally, we incurred severance costs of \$414 and labor related and other restructuring charges of approximately \$145 associated with the closure of our Carson warehouse in 2014. The increase in fulfillment expense was partially offset by lower depreciation and amortization expense because of certain assets that were fully depreciated after the third quarter of 2013.

Technology Expense

	Fiscal Year Ended		\$ Change	% Change
	January 3, 2015	December 28, 2013		
	(in thousands)			
Technology expense	\$4,863	\$5,128	\$(265)	(5.2)%
Percent of net sales	1.7	% 2.0	%	(0.3)%

Technology expense decreased \$265, or 5.2%, for fiscal year 2014 compared to fiscal year 2013. The decrease was primarily due to lower telephone costs and computer support costs incurred in fiscal year 2014 compared to the fiscal year 2013.

Amortization of Intangible Assets

	Fiscal Year Ended		\$ Change	% Change
	January 3, 2015	December 28, 2013		
	(in thousands)			
Amortization of intangible assets	\$422	\$381	\$41	10.8%
Percent of net sales	0.1	% 0.2	%	(0.1)%

Amortization of intangibles increased by \$41, or 10.8%, for fiscal year 2014 compared to fiscal year 2013. The increase was primarily due to the purchase of intangible assets during fiscal 2014.

Impairment Loss on Property and Equipment

	Fiscal Year Ended		\$ Change	% Change
	January 3, 2015	December 28, 2013		
	(in thousands)			
Impairment loss on property and equipment	\$—	\$4,832	\$(4,832)	(100.0)%
Percent of net sales	—	% 1.9	%	(1.9)%

Impairment loss on property and equipment consists of a non-cash impairment charge during fiscal year 2013 for the excess of the carrying value over the fair value of internally developed software of \$4,832. During fiscal 2014 there were no impairment losses on property and equipment. See further detail in “Note 1- Summary of Significant Accounting Policies and Nature of Operations”, “Note 3 – Fair Value Measurements” and “Note 4- Property and Equipment, Net” of the Notes to Consolidated Financial Statements included in Part IV, Item 15 of this report and under “Critical Accounting Policies and Estimates” section below.

Impairment Loss on Intangible Assets

	Fiscal Year Ended		\$ Change	% Change
	January 3, 2015	December 28, 2013		
	(in thousands)			
Impairment loss on intangible assets	\$—	\$1,245	\$(1,245)	(100.0)%
Percent of net sales	—	% 0.5	%	(0.5)%

Impairment loss on intangible assets consists of a non-cash impairment charge during fiscal 2013 related to certain intangible assets in the amount of \$1,245. During fiscal 2014 there were no impairment losses on intangible assets. See further detail in 1- Summary of Significant Accounting Policies and Nature of Operations”, “Note 3 – Fair Value Measurements” and “Note 5- Intangible Assets, net” of the Notes to Consolidated Financial Statements included in Part IV, Item 15 of this report and under “Critical Accounting Policies and Estimates” section below.

Total Other Expense, Net

	Fiscal Year Ended		\$ Change	% Change
	January 3, 2015	December 28, 2013		
	(in thousands)			
Other expense, net	\$(1,036)	\$(824)	\$212	25.7 %
Percent of net sales	0.4	% 0.3	%	0.1

Total other expense, net increased \$212, or 25.7%, for fiscal year 2014 compared to fiscal year 2013. Total other expense increased during fiscal year 2014 compared to fiscal year 2013 primarily due to increased interest expense. (See further detail in "Note 6 – Borrowings" of the Notes to Consolidated Financial Statements, included in Part IV, Item 15 of this report).

Income Tax Provision

	Fiscal Year Ended		\$ Change	% Change
	January 3, 2015	December 28, 2013		
	(in thousands)			
Income tax provision	\$138	\$43	\$95	220.9 %
Percent of net sales	—	% —	%	— %

We have a full valuation allowance against our net deferred income tax assets. In fiscal year 2014 and fiscal 2013, we recorded an addition of \$2,366 and \$6,621, respectively, to our income valuation allowance. Income tax expense in 2014 and 2013 relate primarily to deferred taxes related to earnings of our Philippines subsidiary (see below).

Income tax provision differs from the amount that would result from applying the federal statutory rate as follows (in thousands):

	Fiscal Year Ended	
	January 3, 2015	December 28, 2013
Income tax at U.S. federal statutory rate	\$(2,362)	\$(5,301)
Share-based compensation	33	43
State income tax, net of federal tax effect	(143)	(1,348)
Foreign tax	117	70
Other	127	(42)
Change in valuation allowance	2,366	6,621
Effective income tax provision	\$138	\$43

The Company's effective tax rate was impacted by income taxes incurred in foreign jurisdictions. The favorable impact of foreign taxes for fiscal year 2013 is due in large part to a tax holiday in the Philippines, which was effective through September 2013. The Company does not expect to receive any future tax holidays. Accordingly, the Philippines tax liability has been computed assuming no tax holiday on the post expiration earnings. The impact of this tax holiday decreased foreign taxes by \$39 for fiscal year 2013. The benefit of the tax holiday on net loss per share was immaterial for the related years.

Prior to 2012, the Company treated earnings of the foreign subsidiaries as permanently invested in that jurisdiction. As a result, no additional income tax withholding was provided on the possible future repatriation of these earnings to the parent company in prior years. During fiscal year 2012, based on current year operating and future cash flow needs the Company decided that it could no longer represent that these funds would be indefinitely reinvested in the foreign jurisdictions but that such funds may be needed for general corporate purposes. As a result, the Company recorded future withholding taxes which would be due if the funds are required to be repatriated. The Company intends to

continue to pursue all reasonable means to increase its investment in the foreign jurisdictions as dictated by future growth in general business activities or as allowed by the foreign jurisdictions to avoid incurring the income tax withholding expense.

As of January 3, 2015, the Company had no material unrecognized tax benefits, interest or penalties related to federal and state income tax matters. At January 3, 2015, federal and state net operating loss (“NOL”) carryforwards were \$57,552 and

\$73,610, respectively. Federal NOL carryforwards of \$2,690 were acquired in the acquisition of WAG which are subject to Internal Revenue Code section 382 and limited to an annual usage limitation of \$135. Additionally, the tax benefit of \$41 of the federal and state NOL carryforwards which was created by the exercise of stock options will be credited to additional paid-in-capital once recognized. Federal NOL carryforwards begin to expire in 2029, while state NOL carryforwards begin to expire in 2015.

As a result of the October 8, 2014 sale transaction, AutoMD will no longer be included in the consolidated state and federal tax filings of the Company. For the fiscal year ended January 3, 2015, the effective tax rate for AutoMD was (0.2)%. AutoMD's effective tax rate differs from the U.S. federal statutory rate primarily as a result of the recording of a \$195 valuation allowance against the Company's net deferred tax assets. At January 3, 2015, AutoMD had NOLs of approximately \$2,582 for federal tax purposes that begin to expire in 2031. These amounts are included in the consolidated figures presented above. AutoMD state NOLs were not material as of January 3, 2015.

Fifty-Two Weeks Ended December 28, 2013 Compared to the Fifty-Two Weeks Ended December 29, 2012
Net Sales and Gross Margin

	Fiscal Year Ended		\$ Change	% Change	
	December 28, 2013	December 29, 2012			
	(in thousands)				
Net sales	\$254,753	\$304,017	\$(49,264)	(16.2))%
Cost of sales	180,620	212,379	(31,759)	(15.0))%
Gross profit	\$74,133	\$91,638	\$(17,505)	(19.1))%
Gross margin	29.1	% 30.1	%	(1.0))%

Net sales decreased \$49,264, or 16.2%, for fiscal year 2013 compared to fiscal year 2012. Our net sales consisted of online sales, representing 90.0% of the total for fiscal year 2013 (compared to 91.8% in fiscal year 2012), and offline sales, representing 10.0% of the total for fiscal year 2013 (compared to 8.2% in fiscal year 2012). The net sales decrease was due to a decline of \$49,705, or 17.8%, in online sales, partially offset by a \$440, or 2.0%, increase in offline sales. Included in the net sales decrease of 16.2% in fiscal year 2013 is a decrease in net sales channels, excluding websites we retired in 2013, of 8.5%. Online sales decreased primarily due to a 21% reduction in unique visitors, a 20% reduction in total number of orders and a decline in average order value by 2%. The overall decrease in unique visitors was due to a reduction in customer traffic as a result of changes search engines made the algorithms that search engines use to optimize their search results.

Gross profit decreased \$17,505, or 19.1%, in fiscal year 2013 compared to fiscal year 2012. Gross margin rate decreased 1.0% to 29.1% in fiscal year 2013 compared to 30.1% in fiscal year 2012. Gross margin decreased in fiscal year 2013 compared to fiscal year 2012 due to reduced margins from online sales partially offset by higher margins on offline sales.

Marketing Expense

	Fiscal Year Ended		\$ Change	% Change	
	December 28, 2013	December 29, 2012			
	(in thousands)				
Marketing expense	\$41,045	\$51,416	\$(10,371)	(20.2))%
Percent of net sales	16.1	% 16.9	%	(0.8))%

Total marketing expense decreased \$10,371, or 20.2%, for fiscal year 2013 compared to fiscal year 2012. Online advertising expense, which includes catalog costs, was \$16,619, or 7.2%, of online sales for fiscal year 2013, compared to \$21,067, or 7.5%, of online sales for fiscal year 2012. Online advertising expense decreased primarily due to reduced online e-commerce advertising and non-catalog advertising costs of \$4,448. Marketing expense, excluding online advertising, was \$24,425, or 9.6%, of net sales for fiscal year 2013, compared to \$30,348, or 10.0%, of net sales for fiscal year 2012. Marketing expenses, excluding online advertising, decreased primarily due to lower

call center wages, marketing overhead, depreciation and amortization expense and stock-based compensation.

General and Administrative Expense

	Fiscal Year Ended		\$ Change	% Change
	December 28, 2013	December 29, 2012		
	(in thousands)			
General and administrative expense	\$17,567	\$19,857	\$(2,290)	(11.5)%
Percent of net sales	6.9%	6.5%		0.4%

General and administrative expense decreased \$2,290, or 11.5%, for fiscal year 2013 compared to fiscal year 2012. The decrease for fiscal year 2013 as compared to fiscal year 2012 was primarily due to reduced merchant processing fees resulting from lower online sales and lower overhead.

Fulfillment Expense

	Fiscal Year Ended		\$ Change	% Change
	December 28, 2013	December 29, 2012		
	(in thousands)			
Fulfillment expense	\$18,702	\$22,265	\$(3,563)	(16.0)%
Percent of net sales	7.3%	7.3%		—%

Fulfillment expense decreased \$3,563, or 16.0%, for fiscal year 2013 compared to fiscal year 2012. The decrease was primarily due to lower shipments and revenues, lower depreciation and amortization expense because of certain assets that were fully depreciated after the third quarter of 2012 and lower warehouse wages and salaries. Also, severance charges were lower in fiscal year 2013 compared to the prior fiscal year.

Technology Expense

	Fiscal Year Ended		\$ Change	% Change
	December 28, 2013	December 29, 2012		
	(in thousands)			
Technology expense	\$5,128	\$6,274	\$(1,146)	(18.3)%
Percent of net sales	2.0%	2.1%		(0.1)%

Technology expense decreased \$1,146, or 18.3%, for fiscal year 2013 compared to fiscal year 2012. Technology expense as a percentage of net sales remained consistent compared to the prior year. The decrease was primarily due to lower telephone expenses incurred in fiscal year 2013 compared to fiscal year 2012.

Amortization of Intangible Assets

	Fiscal Year Ended		\$ Change	% Change
	December 28, 2013	December 29, 2012		
	(in thousands)			
Amortization of intangible assets	\$381	\$1,189	\$(808)	(68.0)%
Percent of net sales	0.1%	0.4%		(0.2)%

Amortization of intangible assets decreased by \$808, or 68.0%, for fiscal year 2013 compared to fiscal year 2012. The decrease was primarily due to certain intangible assets that were impaired in the fourth quarter of 2012. We recorded impairment losses on intangible assets subject to amortization of \$1,189, which reduced the net carrying amount of those intangible assets to zero in the fourth quarter of 2012.

Impairment Loss on Goodwill

	Fiscal Year Ended		\$ Change	% Change	
	December 28, 2013	December 29, 2012			
	(in thousands)				
Impairment loss on goodwill	\$—	\$18,854	\$(18,854)	(100.0))%
Percent of net sales	—	% 6.2	%	(6.2))%

Impairment loss on goodwill consists of a non-cash impairment charge during the fourth quarter of 2012 for the excess of the carrying value over the implied fair value of goodwill in the amount of \$18,854. See further detail in “Note 1- Summary of Significant Accounting Policies and Nature of Operations”, “Note 3 – Fair Value Measurements” and “Note 5- Intangible Assets, net” of the Notes to Consolidated Financial Statements included in Part IV, Item 15 of this report and under “Critical Accounting Policies and Estimates” section below.

Impairment Loss on Property and Equipment

	Fiscal Year Ended		\$ Change	% Change	
	December 28, 2013	December 29, 2012			
	(in thousands)				
Impairment loss on property and equipment	\$4,832	\$1,960	\$2,872	146.5	%
Percent of net sales	1.9	% 0.6	%	1.3	%

Impairment loss on property and equipment consists of non-cash impairment charge during fiscal year 2013 for the excess of the carrying value over the fair value of internally developed software of \$4,832. Impairment loss on property and equipment consists of a non-cash impairment charge during fiscal year 2012 for the excess of the carrying value over the fair value of a building and internally developed website and software development costs of \$1,000 and \$960, respectively. See further detail in “Note 1- Summary of Significant Accounting Policies and Nature of Operations”, “Note 3 – Fair Value Measurements” and “Note 4- Property and Equipment, Net” of the Notes to Consolidated Financial Statements included in Part IV, Item 15 of this report and under “Critical Accounting Policies and Estimates” section below.

Impairment Loss on Intangible Assets

	Fiscal Year Ended		\$ Change	% Change	
	December 28, 2013	December 29, 2012			
	(in thousands)				
Impairment loss on intangible assets	\$1,245	\$5,613	\$(4,368)	(77.8))%
Percent of net sales	0.5	% 1.9	%	(1.4))%

Impairment loss on intangible assets consists of a non-cash impairment charge during fiscal year 2013 related to product design intellectual property and certain domain and trade names of \$1,245. Impairment loss on intangible assets consists of non-cash impairment charge during 2012 related to certain intangible assets in the amount of \$5,613. See further detail in 1- Summary of Significant Accounting Policies and Nature of Operations”, “Note 3 – Fair Value Measurements” and “Note 5- Intangible Assets, net” of the Notes to Consolidated Financial Statements included in Part IV, Item 15 of this report and under “Critical Accounting Policies and Estimates” section below.

Total Other Expense, Net

	Fiscal Year Ended		\$ Change	% Change	
	December 28, 2013	December 29, 2012			
	(in thousands)				
Other expense, net	\$824	\$1,125	\$(301)	(26.8)	%
Percent of net sales	0.3	% 0.3	%	—	%

Total other expense, net decreased \$301, or 26.8%, for fiscal year 2013 compared to fiscal year 2012. Total other expense decreased during fiscal year 2013 compared to fiscal year 2012 primarily due to loss on debt extinguishment of \$360 during the second quarter of 2012, partially offset by higher interest expense. (See further detail in “Note 6 – Borrowings” of the Notes to Consolidated Financial Statements, included in Part IV, Item 15 of this report).

Income Tax Benefit

	Fiscal Year Ended		\$ Change	% Change	
	December 28, 2013	December 29, 2012			
	(in thousands)				
Income tax provision (benefit)	\$43	\$(937)	\$980	(104.6)	%
Percent of net sales	—	% (0.3)	%	0.3	%

The Company has a full valuation allowance against its net deferred income tax assets. In fiscal year 2013 and fiscal 2012, the Company recorded an addition of \$6,621 and \$14,080, respectively, to its valuation allowance. Income tax expense in 2013 related primarily to deferred taxes related to the earnings of its Philippines subsidiary. In 2012, the effective income tax benefit stems primarily from the reversal of the net deferred income tax liability resulting from the write down of goodwill and other intangible assets, and the impact of the Philippine tax holiday, partially offset by the accrual of withholding taxes related to potential repatriation of earnings in the Philippines. The Company’s Philippine tax holiday was effective through September 2013.

As of December 28, 2013, the Company had no material unrecognized tax benefits, interest or penalties related to federal and state income tax matters.

Liquidity and Capital Resources

Sources of Liquidity

During the fifty-three weeks ended January 3, 2015, we primarily funded our operations with cash and cash equivalents generated from operations as well as through borrowing under our credit facility. We had cash and cash equivalents of \$7,653 as of January 3, 2015, representing a \$6,835 increase from \$818 of cash and cash equivalents as of December 28, 2013. The cash increase was primarily due to the \$7,000 AutoMD cash investment from third party investors reducing the Company's ownership interest to 64.1%. Based on our current operating plan, we believe that our existing cash and cash equivalents, investments, cash flows from operations and debt financing will be sufficient to finance our operational cash needs through at least the next twelve months (see “Debt and Available Borrowing Resources” below).

As of January 3, 2015, our credit facility provided for a revolving commitment of up to \$40,000 subject to a borrowing base derived from certain of our receivables, inventory and property and equipment (see “Debt and Available Borrowing Resources” below).

In August 2014, we filed a shelf registration statement covering the offer and sale of up to \$100,000 of common stock with the SEC. The shelf registration was declared effective by the SEC on August 20, 2014. The terms of any offering under our shelf registration statement will be determined at the time of the offering and disclosed in a prospectus supplement filed with the SEC. The shelf registration expires on August 20, 2017. Refer to “Note 7 – Stockholders’

Equity and Share-Based Compensation “ of our Notes to Consolidated Financial Statements included in Part I, Item 1 of this report for additional details.

39

On October 8, 2014, AutoMD entered into a common stock purchase agreement to sell seven million shares of AutoMD common stock at a purchase price of \$1.00 per share to third party investors reducing the Company's ownership interest in AutoMD to 64.1%. The proceeds from the sale of AutoMD common stock will be used to fund the operating activities of AutoMD.

Working Capital

As of January 3, 2015 and December 28, 2013, our working capital was \$14,645 and \$9,761, respectively. Our revolving loan does not require principal payments, however it is classified as current due to certain U.S. GAAP requirements (see "Debt and Available Borrowing Resources" below for further details). The historical seasonality in our business during the year can cause cash and cash equivalents, inventory and accounts payable to fluctuate, resulting in changes in our working capital.

Cash Flows

The following table summarizes the key cash flow metrics from our consolidated statements of cash flows for fiscal year 2014, 2013 and 2012, respectively (in thousands):

	Fiscal Year Ended		
	January 3, 2015	December 28, 2013	December 29, 2012
Net cash (used in) provided by operating activities	\$1,243	\$867	\$(400)
Net cash used in investing activities	(5,730)	(8,339)	(7,178)
Net cash (used in) provided by financing activities	11,311	7,219	(1,736)
Effect of exchange rate changes on cash	11	41	9
Net increase (decrease) in cash and cash equivalents	\$6,835	\$(212)	\$(9,305)

Operating Activities

Cash provided by operating activities is primarily comprised of net loss, adjusted for non-cash activities such as depreciation and amortization expense, amortization of intangible assets, impairment losses and share-based compensation expense. These non-cash adjustments represent charges reflected in net loss and, therefore, to the extent that non-cash items increase or decrease our operating results, there will be no corresponding impact on our cash flows. Net loss adjusted for non-cash adjustments to operating activities was \$4,689 (adjusted for non-cash charges primarily consisting of depreciation and amortization expense of \$8,923) for the period ended January 3, 2015 compared to \$4,398 (adjusted for non-cash charges primarily consisting of impairment losses of \$6,077 and depreciation and amortization expense of \$12,175) for the period ended December 28, 2013.

Net loss adjusted for non-cash adjustments to operating activities was \$4,398 (adjusted for non-cash charges primarily consisting of impairment losses of \$6,077 and depreciation and amortization expense of \$12,175) for the period ended December 28, 2013 compared to \$8,161 (adjusted for non-cash charges primarily consisting of impairment losses of \$26,427 and depreciation and amortization expense of \$15,204) for the period ended December 29, 2012. After excluding the effects of the non-cash charges, the primary changes in cash flows relating to operating activities resulted from changes in operating assets and liabilities.

Accounts receivable decreased to \$3,804 at January 3, 2015 from \$5,029 at December 28, 2013, resulting in a decrease in operating assets and reflecting a cash inflow of \$1,225 for the fiscal year ended January 3, 2015. Accounts receivable decreased primarily due to the closure of the Carson warehouse and the related accounts receivable associated with offline sales processed through the Carson warehouse. Accounts receivable decreased to \$5,029 at December 28, 2013 from \$7,431 at December 29, 2012, resulting in a decrease in operating assets and reflecting a cash inflow of \$2,403 for the fiscal year ended December 28, 2013. Accounts receivable decreased primarily due to lower revenues.

Inventory increased to \$48,362 at January 3, 2015 from \$36,986 at December 28, 2013, resulting in an increase in operating assets and reflecting a cash outflow of \$11,376 for the fiscal year ended January 3, 2015. Inventory decreased to \$36,986 at December 28, 2013 from \$42,727 at December 29, 2012, resulting in a decrease in operating assets and reflecting a cash inflow of \$5,740 for the fiscal year ended December 28, 2013.

Accounts payable and accrued expenses increased to \$33,109 at January 3, 2015 compared to \$25,628 at December 28, 2013 resulting in an increase in operating liabilities and reflecting a cash inflow of \$7,481 for

40

the fiscal year ended January 3, 2015. Accounts payable and accrued expenses increased primarily due to the increase in accounts payable of \$5,693, a \$733 increase in accrued marketing and a \$602 increase in payroll related accruals. Accounts payable and accrued expenses decreased to \$25,628 at December 28, 2013 compared to \$38,510 at December 29, 2012 resulting in a decrease in operating liabilities and reflecting a cash outflow of \$11,833 for the fiscal year ended December 28, 2013 and unpaid accruals for asset purchases and property acquired under capital leases of \$1,067. Accounts payable and accrued expenses decreased primarily due to the decrease in accounts payable of \$8,356.

Other current liabilities decreased to \$3,505 at January 3, 2015 compared to \$3,682 at December 28, 2013, resulting in a decrease in operating liabilities and reflecting a cash outflow of \$177 for the fiscal year ended January 3, 2015.

Other current liabilities decreased due to decreases in deferred rent, deferred revenues and customer deposits. Other current liabilities decreased to \$3,682 at December 28, 2013 compared to \$4,738 at December 29, 2012, resulting in a decrease in operating liabilities and reflecting a cash outflow of \$1,056 for the fiscal year ended December 28, 2013. Other current liabilities decreased due to decreases in sales returns deferred revenues and customer deposits.

Investing Activities

For the fiscal years ended January 3, 2015 and December 28, 2013, net cash used in investing activities was primarily the result of increases in property and equipment (\$5,556 and \$8,325, respectively). Property and equipment is primarily internally developed software. Capitalized costs include amounts directly related to website and software development, primarily payroll and payroll related costs for employees and outside contractors who are directly associated with and devote time to the internal use software project. We expect our capital expenditures to be flat or slightly higher in fiscal 2015 compared to fiscal 2014.

For the fiscal year ended December 29, 2012, net cash used in investing activities was primarily the result of increases in property and equipment of \$10,155, partially offset from net proceeds received from the sales of our investments of \$3,171. Property and equipment is primarily internally developed software.

Financing Activities

For the fiscal year ended January 3, 2015, net cash provided by financing activities was primarily due to gross proceeds of \$7,000 received from the sale of 35.9% of AutoMD's outstanding common stock and the net draws made on debt, totaling \$4,248. For the fiscal year ended December 28, 2013, net cash provided by financing activities was primarily due to gross proceeds received from the issuance of Series A Preferred of \$6,017 and common stock of \$2,235, and proceeds from the sale leaseback of our LaSalle, Illinois facility for \$9,584, partially offset by the net payments made on debt, totaling \$9,447 (see further discussion in "Debt and Available Borrowing Resources" below). For the fiscal year ended December 29, 2012, net cash used in financing activities was primarily the result of payments made on debt, totaling \$28,384, which included the payoff of our previous term loan balance of \$17,875 and payments on our new revolving loan of \$10,509, partially offset by the proceeds received from our revolving loan of \$26,731.

Debt and Available Borrowing Resources

Total debt (primarily comprised of a revolving loan payable of \$11,022, discussed further below, and capital leases of \$9,539) was \$20,561 as of January 3, 2015, compared to \$16,545 (primarily comprised of a revolving loan payable of \$6,774, discussed further below, and capital leases of \$9,771) as of December 28, 2013.

The Company maintains an asset-based revolving credit facility that provides for, among other things, a revolving commitment in an aggregate principal amount of up to \$25,000, which is subject to a borrowing base derived from certain receivables, inventory and property and equipment. Upon satisfaction of certain conditions, the Company has the right to increase the revolving commitment to up to \$40,000. The Company, to date, has not requested any such increases. The credit facility matures on April 26, 2017.

On August 4, 2014, the Company, certain of its domestic subsidiaries and JPMorgan entered into a Fourth Amended Credit Agreement amending the Credit Agreement to, among other things, amend certain definitions to allow for additional add-backs to adjusted EBITDA for fiscal quarters ended June 28, 2014 and September 27, 2014.

On October 8, 2014, the Company, certain of its domestic subsidiaries and JPMorgan entered into a Fifth Amendment to Credit Agreement and First Amendment to Pledge and Security Agreement, which amended the Credit Agreement previously entered into by the Company, certain of its domestic subsidiaries and JPMorgan on April 26, 2012 and the

Pledge and Security Agreement previously entered into by the Company, certain of its domestic subsidiaries and JPMorgan on April 26, 2012. Pursuant to the Amendment, JPMorgan increased its revolving commitment from \$20,000 to \$25,000, which is subject to a borrowing base derived from certain receivables, inventory, property and pledged cash. In addition, the Company's ability to

perform certain contingent obligations set forth in the documents executed in connection with the Purchase Agreement is dependent on the Company satisfying certain contractual and financial tests, including, without limitation, (i) with respect to the purchase of two million shares of AutoMD common stock described above, the Company having excess availability to borrow under the Credit Agreement of at least \$4 million and the satisfaction of a minimum fixed charge coverage ratio of 1.25:1.0, (ii) with respect to the reimbursement of certain intellectual property litigation expenses incurred by AutoMD, which the Company could be required to do for a period of three years, the Company having excess availability to borrow under the credit agreement of at least \$4 million, and (iii) with respect to the Company electing to purchase AutoMD common stock in connection with certain transfers not permitted under an investor rights agreement entered into by the Company or AutoMD electing to exercise its option to repurchase shares of its common stock under specific circumstances as contemplated by such investor rights agreement, the Company having excess availability to borrow under the credit agreement of at least \$6 million and the satisfaction of a minimum fixed charge coverage ratio of 1.25:1.0. In addition, certain definitions were amended to allow for additional add-backs to adjusted EBITDA for fiscal quarters ended September 27, 2014 and January 3, 2015.

The Company entered into a sixth amendment to the credit facility effective January 2, 2015. Pursuant to the Amendment, the following amendments to the Credit Agreement were made, among others:

- The net orderly liquidation value inventory advance rate was increased from 85% to 90%.

- The Company's required excess availability related to the "Covenant Testing Trigger Period" (as defined under the Credit Agreement) under the revolving commitment under the Credit Agreement was reduced to less than \$2,000 from less than \$4,000 for the period commencing on any day that excess availability is less than \$2,000 and continuing until excess availability has been greater than or equal to \$2,000 for 45 consecutive days.

- The period during which the Company is subject to a fixed charge coverage ratio begins after June 30, 2016 and the applicable testing period would begin for a 5 month period ending May 31, 2016 or fiscal year 2016 rather than a trailing twelve month period. The full trailing twelve month testing period would begin with the twelve month period ending December 31, 2016.

- Certain negative covenants applicable to the Company and AutoMD, Inc. ("AutoMD"), a subsidiary of the Company, related to certain contractual and financial tests to permit the Company and AutoMD to consummate certain obligations set forth in the agreements entered into by the Company and AutoMD on October 8, 2014 (the "Financing Documents") in connection with the sale of AutoMD common stock to certain investors (the "AutoMD Financing") have been revised where the availability requirements are no longer applicable until after June 30, 2016 and further revised reducing the availability requirement to \$2,000 before and after giving effect to the consummation of such obligations. A summary of the Financing Documents and the AutoMD Financing were disclosed by the Company in a Current Report on Form 8-K filed with the Securities and Exchange Commission on October 9, 2014.

- The trigger, requiring the Company to provide certain reports under the Credit Agreement, relating to excess availability under the revolving commitment under the Credit Agreement, has been reduced to less than \$4,000 from less than \$6,000 and continuing until excess availability has been greater than or equal to \$4,000 for 45 consecutive days.

Loans drawn under the Credit Facility bear interest, at the Company's option, at a per annum rate equal to either (a) one month LIBOR plus an applicable margin of 2.25%, or (b) an "alternate base rate" plus an applicable margin of 0.25%. Subsequent to June 30, 2016, each applicable margin as set forth in the prior sentence is subject to reduction by up to 0.50% per annum based upon the Company's fixed charge coverage ratio. At January 3, 2015, the Company's LIBOR based interest rate was 2.44% (on \$11,000 principal) and the Company's prime based rate was 3.50% (on \$22 principal). A commitment fee, based upon undrawn availability under the credit facility bearing interest at a rate of 0.25% per annum, is payable monthly. Under the terms of the credit facility, cash receipts are deposited into a lock-box, which are at the Company's discretion unless the "cash dominion period" is in effect, during which cash receipts will be used to reduce amounts owing under the Credit Agreement. The cash dominion period is triggered in an event of default or if excess availability is less than \$4,000 at any time, as defined, and will continue until, during the preceding 45 consecutive days, no event of default existed and excess availability has been greater than \$4,000 at

all times. The Company's excess availability was \$8,329 at January 3, 2015. Also as of March 12, 2015, our excess availability was \$7,189 and our outstanding revolving loan balance was \$12,698. As of the date hereof, the cash dominion period has not been in effect; accordingly no principal payments are currently due.

Certain of the Company's domestic subsidiaries are co-borrowers (together with the Company, the "Borrowers") under the Credit Agreement, and certain other domestic subsidiaries are guarantors (the "Guarantors" and, together with the Borrowers, the "Loan Parties") under the Credit Agreement. The Borrowers and the Guarantors are jointly and severally liable for the Borrowers' obligations under the Credit Agreement. The Loan Parties' obligations under the Credit Agreement are secured, subject to customary permitted liens and certain exclusions, by a perfected security interest in (a) all tangible and

intangible assets and (b) all of the capital stock owned by the Loan Parties (limited, in the case of foreign subsidiaries, to 65% of the capital stock of such foreign subsidiaries). The Borrowers may voluntarily prepay the loans at any time with payment of a premium equal to the aggregate revolving commitments multiplied by 0.5% if such termination of the commitments occurs prior to January 2, 2016. If prepayment occurs after January 2, 2016 no premium is required. The Borrowers are required to make mandatory prepayments of the loans (without payment of a premium) with net cash proceeds received upon the occurrence of certain “prepayment events,” which include certain sales or other dispositions of collateral, certain casualty or condemnation events, certain equity issuances or capital contributions, and the incurrence of certain debt.

The Credit Agreement contains customary representations and warranties and customary affirmative and negative covenants applicable to the Company and its subsidiaries, including, among other things, restrictions on indebtedness, liens, fundamental changes, investments, dispositions, prepayment of other indebtedness, mergers, and dividends and other distributions.

The period during which the Company is subject to a fixed charge coverage ratio begins after June 30, 2016 and the applicable testing period would begin for a five month period ending May 31, 2016 or fiscal year 2016 rather than a trailing twelve month period. The full trailing twelve month testing period would begin with the twelve month period ending December 31, 2016. During the period when the Company is not subject to a fixed charge coverage ratio an “Availability Block” (as defined under the Credit Agreement) of \$2,000 will be in effect, and thereafter the “Availability Block” will be eliminated. Beginning July 1, 2016, in the event that “excess availability” (as defined under the Credit Agreement) is less than \$2,000, the Company shall be required to maintain a minimum fixed charge coverage ratio of 1.0 to 1.0. Events of default under the Credit Agreement include: failure to timely make payments due under the Credit Agreement; material misrepresentations or misstatements under the Credit Agreement and other related agreements; failure to comply with covenants under the Credit Agreement and other related agreements; certain defaults in respect of other material indebtedness; insolvency or other related events; certain defaulted judgments; certain ERISA-related events; certain security interests or liens under the loan documents cease to be, or are challenged by the Company or any of its subsidiaries as not being, in full force and effect; any loan document or any material provision of the same ceases to be in full force and effect; and certain criminal indictments or convictions of any Loan Party. As of January 3, 2015, the Company was in compliance with all covenants under the Credit Agreement.

Our Credit Facility requires us to satisfy certain financial covenants which could limit our ability to react to market conditions or satisfy extraordinary capital needs and could otherwise restrict our financing and operations. If we are unable to satisfy the financial covenants and tests at any time, we may as a result cease being able to borrow under the Credit Facility or be required to immediately repay loans under the Credit Facility, and our liquidity and capital resources and ability to operate our business could be severely impacted, which would have a material adverse effect on our financial condition and results of operations. In those events, we may need to sell additional assets or seek additional equity or additional debt financing or attempt to modify our existing Credit Agreement. There can be no assurance that we would be able to raise such additional financing or engage in such asset sales on acceptable terms, or at all, or that we would be able to modify our existing Credit Agreement.

As of January 3, 2015, the Company had total capital leases payable of \$9,539. The present value of the net minimum payments on capital leases as of January 3, 2015 is as follows:

Total minimum lease payments	\$18,520
Less amount representing interest	(8,981)
Present value of net minimum lease payments	9,539
Current portion of capital leases payable	269
Capital leases payable, net of current portion	\$9,270

See additional information in “Note 6 – Borrowings” of the Notes to Consolidated Financial Statements included in Part IV, Item 15 of this report.

Funding Requirements

Based on our current operating plan, we believe that our existing cash, cash equivalents, investments, cash flows from operations and available debt financing will be sufficient to finance our operational cash needs through at least the next twelve months. Our future capital requirements may, however, vary materially from those now planned or anticipated. Changes in our operating plans, lower than anticipated net sales or gross margins, increased expenses, continued or worsened economic conditions, worsening operating performance by us, or other events, including those described in “Risk Factors” included in

Part II, Item 1A may force us to sell additional assets and seek additional debt or equity financing in the future. We may need to issue additional common stock under our shelf registration, discussed above. There can be no assurance that we would be able to raise such additional financing or engage in such additional asset sales on acceptable terms, or at all. If we are not able to raise adequate additional financing or proceeds from additional asset sales, we will need to defer, reduce or eliminate significant planned expenditures, restructure or significantly curtail our operations.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements.

Contractual Obligations

The following table sets forth our contractual cash obligations and commercial commitments as of January 3, 2015:

Contractual Obligations:	Payment Due By Period (in thousands)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Principal payments on revolving loan payable (1)	\$ 11,022	\$—	\$ 11,022	\$—	\$—
Interest payments on revolving loan payable (2)	628	271	357	—	—
Operating lease obligations (3)	2,065	1,279	786	—	—
Capital lease obligations (4)	18,520	1,009	1,877	1,843	13,791

Amounts represent the expected principal cash payments relating to our debt and do not include any fair value adjustments or discounts and premiums. Our outstanding debt is comprised of a revolving loan which currently has (1) no principal payment requirements, and matures in April 2017. The principal outstanding balance at January 3, 2015 is presumed to be the amount due in April 2017. See additional information in “Liquidity and Capital Resources – Debt and Available Borrowing Resources” above.

Amounts represent the expected interest cash payments relating to our revolving loan balance at January 3, 2015.

(2) The principal outstanding balance and the interest rates prevalent at January 3, 2015 were used to calculate the expected future interest payments.

(3) Commitments under operating leases relate primarily to our leases on our principal facility in Carson, California, our distribution centers in Chesapeake, Virginia and La Salle, Illinois, and our call center in the Philippines.

(4) Commitments under capital leases include the lease for our LaSalle distribution facility and equipment lease agreements which include interest.

Seasonality

We believe our business is subject to seasonal fluctuations. We have historically experienced higher sales of body parts in winter months when inclement weather and hazardous road conditions typically result in more automobile collisions. Engine parts and performance parts and accessories have historically experienced higher sales in the summer months when consumers have more time to undertake elective projects to maintain and enhance the performance of their automobiles and the warmer weather during that time is conducive for such projects. We expect the historical seasonality trends to continue to have a material impact on our financial condition and results of operations during the reporting periods in any given year.

Inflation

Inflation has not had a material impact upon our operating results, and we do not expect it to have such an impact in the near future. We cannot assure you that our business will not be affected by inflation in the future.

Recent Accounting Pronouncements

See “Note 1 – Summary of Significant Accounting Policies and Nature of Operations” of the Notes to Consolidated Financial Statements, included in Part IV, Item 15 of this report.

Critical Accounting Policies and Estimates

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of our financial statements requires us to make estimates and assumptions that

affect the reported amounts of assets, liabilities, net sales, costs and expenses, as well as the disclosure of contingent assets and liabilities and other related disclosures. On an ongoing basis, we evaluate our estimates, including, but not limited to, those related to

revenue recognition, uncollectible receivables, inventory, valuation of deferred tax assets and liabilities, intangible and other long-lived assets and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about carrying values of our assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates, and we include any revisions to our estimates in our results for the period in which the actual amounts become known.

We believe the critical accounting policies described below affect the more significant judgments and estimates used in the preparation of our consolidated financial statements. Accordingly, these are the policies we believe are the most critical to aid in fully understanding and evaluating our historical consolidated financial condition and results of operations:

Revenue Recognition. We recognize revenue from product sales and shipping revenues, net of promotional discounts and return allowances, when the following four revenue recognition criteria are met: persuasive evidence of an arrangement exists, both title and risk of loss or damage have transferred, the selling price is fixed or determinable, and collectability is reasonably assured. The Company retains the risk of loss or damage during transit, therefore, revenue from product sales is recognized at the delivery date to the customer. Return allowances, which reduce product revenue by the Company's best estimate of expected product returns, are estimated using historical experience. Revenue from sales of advertising is recorded when performance requirements of the related advertising program agreement are met.

We evaluate the criteria of ASC 605-45 Revenue Recognition Principal Agent Considerations in determining whether it is appropriate to record the gross amount of product sales and related costs or the net amount earned as commissions. Generally, when the Company is the primary party obligated in a transaction, the Company is subject to inventory risk, has latitude in establishing prices and selecting suppliers, or has several but not all of these indicators, revenue is recorded at gross.

Payments received prior to the delivery of goods to customers are recorded as deferred revenue.

We periodically provide incentive offers to our customers to encourage purchases. Such offers include current discount offers, such as percentage discounts off of current purchases and other similar offers. Current discount offers, when accepted by our customers, are treated as a reduction to the sales price of the related transaction.

Sales discounts are recorded in the period in which the related sale is recognized. Sales return allowances are estimated based on historical amounts and are recorded upon recognizing the related sales. Credits are issued to customers for returned products.

Fair Value Measurements. We account for fair value measurements in accordance with ASC Topic 820 Fair Value Measurements and Disclosures ("ASC 820"), which defines fair value, provides a framework for measuring fair value and provides the disclosure requirements for fair value measurements. ASC 820 also establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1 - defined as observable inputs such as quoted prices in active markets; Level 2 - defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3 - defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Inventory. Inventory consists of finished goods available-for-sale. We purchase inventory from suppliers both domestically and internationally, primarily in Taiwan and China. We believe that our products are generally available from more than one supplier, and we maintain multiple sources for many of our products, both internationally and domestically. We offer a broad line of auto parts for automobiles, trucks, motorcycles and recreational vehicles from model years 1965 to 2014. Because of the continued demand for our products, we primarily purchase products in bulk quantities to take advantage of quantity discounts and to ensure inventory availability.

Inventory is accounted for using the first-in first-out ("FIFO") method and valued at the lower of cost or market value. During this valuation, we are required to make judgments about expected disposition of inventory, generally, through sales, returns to product vendors, or liquidations of obsolete or scrap products, and expected recoverable values of each disposition category based on currently-available information. If actual market conditions are less favorable than those anticipated by management, additional write-down of the value of our inventory may be required.

Website and Software Development Costs. We capitalize certain costs associated with software developed for internal use according to ASC Topic 350-40- Intangibles – Goodwill and Other – Internal-Use Software (“ASC 350-40”), and ASC Topic 350-50- Intangibles – Goodwill and Other – Website Development Costs (“ASC 350-50”). Under these provisions, we capitalize costs associated with website development and software developed for internal use when both the preliminary project

45

design and testing stage are completed and management has authorized further funding for the project, which it deems probable of completion and to be used for the function intended. Capitalized costs include amounts directly related to website development and software development such as payroll and payroll-related costs for employees who are directly associated with, and who devote time to, the internal-use software project. Capitalization of these costs ceases when the project is substantially complete and ready for its intended use. These amounts are amortized on a straight-line basis over two to three years once the software is placed into service.

Long-Lived Assets and Intangibles. We acquire tangible and intangible assets in the normal course of business. We evaluate the recoverability of the carrying amount of these long-lived assets whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable in accordance with ASC Topic 360-Property, Plant, and Equipment (“ASC 360”). Management assesses potential impairments whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. An impairment loss will result when the carrying value exceeds the undiscounted cash flows estimated to result from the use and eventual disposition of the asset. We continually use judgment when applying these impairment rules to determine the timing of the impairment tests, undiscounted cash flows used to assess impairments, and the fair value of a potentially impaired asset. The reasonableness of our judgments could significantly affect the carrying value of our long-lived assets. As of January 3, 2015, the Company identified adverse events related to the Company's financial performance, including a downward trend in gross margin, and continued operating losses, which indicated property and equipment and intangibles subject to amortization may not be recoverable. The Company performed impairment testing under the provisions of ASC 360 and after performing step 1, the Company determined property and equipment was not impaired as of January 3, 2015. For fiscal year 2013, we recorded impairment charges on property and equipment and intangibles subject to amortization of \$4,832 and \$1,245, respectively. For fiscal year 2012, we recorded impairment charges on property and equipment and intangibles subject to amortization of \$1,960 and \$5,613, respectively. Any further reduction in the fair value of long-lived assets will result in additional impairment charges.

Goodwill and Indefinite-Lived Intangibles. We account for goodwill under the guidance set forth in ASC Topic 350-Intangibles – Goodwill and Other (“ASC 350”), which specifies that goodwill and indefinite-lived intangibles should not be amortized. We have historically evaluated goodwill and indefinite-lived intangibles for impairment on an annual basis or more frequently if events or circumstances occur that would indicate a reduction in fair value. The goodwill impairment test is a two-step impairment test. The first step compares the fair value of each reporting unit with its carrying amount including goodwill. We estimate the fair value of the reporting unit based on the income approach, which utilizes discounted future cash flows. Assumptions critical to the fair value estimates under the discounted cash flow model include discount rates, cash flow projections, projected long-term growth rates and the determination of terminal values. The market approach is used as a test of reasonableness to corroborate the income approach. The market approach utilized market multiples of invested capital from publicly traded companies in similar lines of business. The market multiples from invested capital include revenues, total assets, book equity plus debt and EBITDA. In fiscal year 2012, we recorded impairment charges on goodwill of \$18,854 and impairment charges on other indefinite-lived intangibles of \$3,894. Subsequent to those write-downs, the carrying value of goodwill and indefinite-lived intangibles was zero.

Income Taxes. The Company accounts for income taxes in accordance with ASC Topic 740 Income Taxes (“ASC 740”). Under ASC 740, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amount of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. When appropriate, a valuation reserve is established to reduce deferred tax assets, which include tax credits and loss carry forwards, to the amount that is more likely than not to be realized. The ability to realize deferred tax assets depends on the ability to generate sufficient taxable income within the carryback or carryforward periods provided for in the tax law for each applicable tax jurisdiction. We consider the following possible sources of taxable income when assessing the realization of our deferred tax assets:

- Future reversals of existing taxable temporary differences;

- Future taxable income exclusive of reversing temporary differences and carryforwards;
- Taxable income in prior carryback years; and
- Tax-planning strategies.

The assessment regarding whether a valuation allowance is required or should be adjusted also considers, among other matters, the nature, frequency and severity of recent losses, forecasts of future profitability, the duration of statutory carryforward periods, our experience with tax attributes expiring unused and tax planning alternatives. In making such judgments, significant weight is given to evidence that can be objectively verified.

Concluding that a valuation allowance is not required is difficult when there is significant negative evidence that is objective and verifiable, such as cumulative losses in recent years. We utilized a three-year analysis of actual results as the primary measure of cumulative losses in recent years. However, because a substantial portion of those cumulative losses relate to impairment of intangible assets and goodwill, those three-year cumulative results are adjusted for the effect of these items. In addition, the near- and medium-term financial outlook is considered when assessing the need for a valuation allowance.

The valuation of deferred tax assets requires judgment and assessment of the future tax consequences of events that have been recorded in the financial statements or in the tax returns, and our future profitability represents our best estimate of those future events. Changes in our current estimates, due to unanticipated events or otherwise, could have a material effect on our financial condition and results of operations. Due to our combined cumulative three-year adjusted loss position, it was determined that it was not more likely than not that we would realize our net deferred tax assets. As of December 29, 2012, the valuation allowance was \$36,915, after recording an additional valuation allowance of \$14,080 in fiscal year 2012. As of December 28, 2013, the valuation allowance was \$43,509, after recording an additional valuation allowance of \$6,621 in fiscal year 2013. As of January 3, 2015, the valuation allowance was \$45,867, after recording an additional valuation allowance of \$2,358 in fiscal year 2014.

If, in the future, we generate taxable income on a sustained basis in jurisdictions where we have recorded full valuation allowances, our conclusion regarding the need for full valuation allowances in these tax jurisdictions could change, resulting in the reversal of some or all of the valuation allowances. If our operations generate taxable income prior to reaching profitability on a sustained basis, we would reverse a portion of the valuation allowance related to the corresponding realized tax benefit for that period, without changing our conclusions on the need for a full valuation allowance against the remaining net deferred tax assets.

As of January 3, 2015, federal and state NOL carryforwards were \$57,552 and \$73,610, respectively. Federal NOL carryforwards of \$2,690 were acquired in the acquisition of WAG which are subject to Internal Revenue Code section 382 and limited to an annual usage limitation of \$135. Additionally, the tax benefit of \$41 of the federal and state NOL carryforwards which was created by the exercise of stock options will be credited to additional paid-in-capital once recognized. Federal NOL carryforwards expire in 2029, while state NOL carryforwards begin to expire in 2015. The state NOL carryforwards expire in the respective tax years as follows (in thousands):

2015 - 2022	\$40,553
2023 - 2032	33,057
	\$73,610

As a result of the October 8, 2014 sale transaction, AutoMD will no longer be included in the consolidated state and federal tax filings of the Company. For the fiscal year ended January 3, 2015, the effective tax rate for AutoMD was (0.2)%. AutoMD's effective tax rate differs from the U.S. federal statutory rate primarily as a result of the recording of a \$195 valuation allowance against the Company's net deferred tax assets. As of January 3, 2015, AutoMD had net operating loss carryforwards (NOLs) of approximately \$2,582 for federal tax purposes that begin to expire in 2031. These amounts are included in the consolidated figures presented above. AutoMD state NOLs were not material as of January 3, 2015.

We utilize a two-step approach to recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. We consider many factors when evaluating and estimating our tax positions and tax benefits, which may require periodic adjustments and which may not accurately forecast actual outcomes. As of January 3, 2015, we had no material unrecognized tax benefits, interest or penalties related to federal and state income tax matters. The Company's policy is to record interest and penalties as income tax expense.

We are subject to U.S. federal income tax as well as income tax of foreign and state tax jurisdictions. During fiscal 2010, the Company was audited by the Internal Revenue Service for the year ended December 31, 2008. The audit was concluded with no change. The tax years 2010-2013 remain open to examination by the major taxing jurisdictions to which the Company is subject, except the Internal Revenue Service for which the tax years 2011-2013 remain open. The Company does not anticipate a significant change to the amount of unrecognized tax benefits within the next twelve months.

Share-Based Compensation. We account for share-based compensation in accordance with ASC Topic 718- Compensation – Stock Compensation (“ASC 718”). ASC 718 requires that all share-based compensation to employees,

including grants of employee stock options, be recognized in our financial statements based on their respective grant date fair values. Under this standard, the fair value of each share-based payment award is estimated on the date of grant using an option pricing model that meets certain requirements. We currently use the Black-Scholes option pricing model to estimate the fair value of our share-based payment awards. The Black-Scholes valuation models require extensive use of accounting judgment and financial estimates, including estimates of the expected term participants will retain their vested stock options before exercising them, the estimated volatility of our common stock price over the expected term and the number of options that will be forfeited prior to the completion of their vesting requirements. Application of alternative assumptions could produce significantly different estimates of the fair value of share-based compensation and, consequently, the related amount of share-based compensation expense recognized in the Consolidated Statements of Comprehensive Operations could have been significantly different than the amounts recorded.

The Company has incorporated its own historical volatility into the grant-date fair value calculations. The Company's historical volatility was not materially different than the estimates applied to past award fair value calculations. The expected term of an award is based on combining historical exercise data with expected weighted time outstanding. Expected weighted time outstanding is calculated by assuming the settlement of outstanding awards is at the midpoint between the remaining weighted average vesting date and the expiration date. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures significantly differ from those estimates. The Company considers many factors when estimating expected forfeitures, including employee class, economic environment, and historical experience.

The Company accounts for equity instruments issued in exchange for the receipt of services from non-employee directors in accordance with the provisions of ASC 718. The Company accounts for equity instruments issued in exchange for the receipt of goods or services from other than employees in accordance with ASC 505-50 Equity-Based Payments to Non-Employees. Costs are measured at the estimated fair market value of the consideration received or the estimated fair value of the equity instruments issued, whichever is more reliably measurable. The value of equity instruments issued for consideration other than employee services is determined on the earlier of a performance commitment or completion of performance by the provider of goods or services. Equity instruments awarded to non-employees are periodically re-measured as the underlying awards vest unless the instruments are fully vested, immediately exercisable and non-forfeitable on the date of grant.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk. Market risk represents the risk of loss that may impact our financial position, results of operations or cash flows due to adverse changes in financial commodity market prices and rates. We are exposed to market risk primarily in the area of changes in U.S. interest rates and conditions in the credit markets. We also have some exposure related to foreign currency fluctuations. Under our current policies, we do not use interest rate derivative instruments to manage exposure to interest rate changes. We do not have any derivative financial instruments as of January 3, 2015. We attempt to increase the safety and preservation of our invested principal funds by limiting default risk, market risk and reinvestment risk. We mitigate default risk by investing in investment grade securities and mutual funds that hold debt securities.

Interest Rate Risk. Our investment securities generally consist of mutual funds. As of January 3, 2015, our investments were comprised of \$62 of investments in mutual funds that primarily hold debt securities.

As of January 3, 2015, we had a balance of \$11,022 outstanding under a revolving loan under our credit facility. The interest rate on this loan is computed based on a LIBOR and Prime loan rate, adjusted by features specified in our loan agreement. At our debt level as of January 3, 2015, a 100 basis point increase in interest rates would not materially affect our earnings and cash flows. If, however, we are unable to meet the covenants in our loan agreement, we would be required to renegotiate the terms of credit under the loan agreement, including the interest rate. There can be no assurance that any renegotiated terms of credit would not materially impact our earnings. At January 3, 2015, our LIBOR based interest rate was 2.44% per annum (on \$11,000 principal) and our Prime based rate was 3.50% per annum (on \$22 principal). Refer to additional discussion in Item 7, under the caption "Liquidity and Capital Resources – Debt and Available Borrowing Resources" and in "Note 6 – Borrowings" of the Notes to Consolidated Financial

Statements, included in Part IV, Item 15 of this report.

Foreign Currency Risk. Our purchases of auto parts from our Asian suppliers are denominated in U.S. dollars; however, a change in the foreign currency exchange rates could impact our product costs over time. Our financial reporting currency is the U.S. dollar and changes in exchange rates significantly affect our reported results and consolidated trends. For example, if the U.S. dollar weakens year-over-year relative to currencies in our international locations, our consolidated gross profit and operating expenses will be higher than if currencies had remained constant. Likewise, if the U.S. dollar strengthens year-over-year relative to currencies in our international locations, our consolidated gross profit and operating expenses will be lower than if currencies had remained constant. Our operating expenses in the Philippines are generally paid in Philippine Pesos, and as the exchange rate fluctuates, it adversely or favorably impacts our operating results. In light of the above, a fluctuation of 10% in the Peso/U.S. dollar exchange rate would have approximately a \$410 impact on our Philippine operating expenses for the

fifty-three weeks ended January 3, 2015. During fiscal 2014 we hedged a portion of our forecasted foreign currency exposure associated with operating expenses incurred in the Philippines. The use of such hedging activities may not offset any or more than a portion of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place. As of January 3, 2015, we had no hedges in place. We are evaluating our options on how to manage this risk and considering various methods to mitigate such risk. Our Canadian website sales are denominated in Canadian dollars; however, fluctuations in exchange rates from these operations are only expected to have a nominal impact on our operating results due to the relatively small number of sales generated in Canada. We believe it is important to evaluate our operating results and growth rates before and after the effect of currency changes.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements required by this Item 8 are set forth in Part IV, Item 15 of this report and are hereby incorporated into this Item 8 by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed with the SEC under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the specified time periods, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of January 3, 2015 pursuant to Rule 13a-15 and 15d-15 of the Exchange Act. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of such date, our disclosure controls and procedures were effective to meet the objectives for which they were designed and operated at the reasonable assurance level.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). We assessed the effectiveness of our internal control over financial reporting as of January 3, 2015, based on the "Internal Control — Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission. This assessment was conducted utilizing our documentation of policies and procedures, risk control matrices, gap analysis, key process walk-throughs and management's knowledge of and interaction with its controls and testing of our key controls.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis. Based on such assessment and criteria, management has concluded that the internal controls over financial reporting were effective, and were operating at the reasonable assurance level as of January 3, 2015.

Changes in Internal Control Over Financial Reporting

The Company monitors and evaluates on an ongoing basis its internal control over financial reporting in order to improve its overall effectiveness. In the course of these evaluations, the Company modifies and refines its internal processes as conditions warrant. As required by Rule 13a-15(d), the Company's management, including the Chief Executive Officer and the Chief Financial Officer, also conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the quarter ended January 3, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

(a) Identification of Directors. The information under the caption “Election of Directors,” appearing in the Proxy Statement (“Proxy Statement”), is hereby incorporated by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

(b) Identification of Executive Officers and Certain Significant Employees. The information under the caption “Executive Compensation and Other Information—Executive Officers,” appearing in the Proxy Statement, is hereby incorporated by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

(c) Compliance with Section 16(a) of the Exchange Act. The information under the caption “Section 16(a) Beneficial Ownership Reporting Compliance,” appearing in the Proxy Statement, is hereby incorporated by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

(d) Code of Ethics. The information under the caption “Corporate Governance – Code of Ethics and Business Conduct,” appearing in the Proxy Statement, is hereby incorporated by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

(e) Board Committees. The information under the caption “Corporate Governance — Board Committees and Meetings,” appearing in the Proxy Statement, is hereby incorporated by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

ITEM 11. EXECUTIVE COMPENSATION

The information under the caption “Executive Compensation and Other Information”, appearing in the Proxy Statement, is incorporated herein by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information under the captions “Equity Compensation Plans” and “Ownership of Securities by Certain Beneficial Owners and Management,” appearing in the Proxy Statement, is incorporated herein by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information under the captions “Corporate Governance — Director Independence” and “Certain Relationships and Related Transactions,” appearing in the Proxy Statement, is incorporated herein by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information under the caption “Fees Paid to Independent Registered Public Accounting Firm,” appearing in the Proxy Statement, is incorporated herein by reference. The Proxy Statement will be filed with the SEC within 120 days from the end of fiscal year 2014.

PART IV

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

<u>Report of Deloitte & Touche LLP, independent registered public accounting firm</u>	<u>F- 1</u>
<u>Consolidated Balance Sheets as of January 3, 2015 and December 28, 2013</u>	<u>F- 2</u>
<u>Consolidated Statements of Operations and Comprehensive Operations for each of the three years in the period ended January 3, 2015</u>	<u>F- 3</u>
<u>Consolidated Statements of Stockholders' Equity for each of the three years in the period ended January 3, 2015</u>	<u>F- 4</u>
<u>Consolidated Statements of Cash Flows for each of the three years in the period ended January 3, 2015</u>	<u>F- 5</u>
<u>Notes to Consolidated Financial Statements</u>	<u>F- 6</u>

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
U.S. Auto Parts Network, Inc.
Carson, CA

We have audited the accompanying consolidated balance sheets of U.S. Auto Parts Network, Inc. and subsidiaries (the “Company”) as of January 3, 2015 and December 28, 2013, and the related consolidated statements of operations and comprehensive operations, stockholders’ equity, and cash flows for each of the three years in the period ended January 3, 2015. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of U.S. Auto Parts Network, Inc. and subsidiaries as of January 3, 2015 and December 28, 2013 and the results of their operations and their cash flows for each of the three years in the period ended January 3, 2015, in conformity with accounting principles generally accepted in the United States of America.

U.S. AUTO PARTS NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Thousands, Except Per Share Data)

Note 1 – Summary of Significant Accounting Policies and Nature of Operations

U.S. Auto Parts Network, Inc. (including its subsidiaries) is a distributor of aftermarket auto parts and accessories and was established in 1995. The Company entered the e-commerce sector by launching its first website in 2000 and currently derives the majority of its revenues from online sales channels. The Company sells its products to individual consumers through a network of websites and online marketplaces. Through AutoMD.com, the Company educates consumers on maintenance and service of their vehicles. The site provides auto information, with tools for diagnosing car troubles, locating repair shops and do-it-yourself (“DIY”) repair guides. Our flagship websites are located at www.autopartswarehouse.com, www.carparts.com, www.jcwhitney.com and www.AutoMD.com and our corporate website is located at www.usautoparts.net. References to the “Company,” “we,” “us,” or “our” refer to U.S. Auto Parts Network, Inc. and its consolidated subsidiaries.

The Company’s products consist of body parts, hard parts, performance parts and accessories. The body parts category is primarily comprised of parts for the exterior of an automobile. Our parts in this category are typically replacement parts for original body parts that have been damaged as a result of a collision or through general wear and tear. The majority of these products are sold through our websites. In addition, we sell an extensive line of mirror products, including our own private-label brand called Kool-Vue™, which are marketed and sold as aftermarket replacement parts and as upgrades to existing parts. The hard parts category is comprised of engine components and other mechanical and electrical parts. These parts serve as replacement parts for existing engine parts and are generally used by professionals and do-it-yourselfers for engine and mechanical maintenance and repair. We offer performance versions of many parts sold in each of the above categories. Performance parts and accessories generally consist of parts that enhance the performance of the automobile, upgrade existing functionality of a specific part or improve the physical appearance or comfort of the automobile.

The Company is a Delaware C corporation and is headquartered in Carson, California. The Company also has employees located in Kansas, Virginia, Tennessee, Texas, Wyoming and Illinois, as well as in the Philippines.

Fiscal Year

The Company’s fiscal year is based on a 52/53 week fiscal year ending on the Saturday closest to December 31. The fiscal year ended January 3, 2015 (fiscal year 2014) is a 53 week period and the fiscal years ended December 28, 2013 (fiscal year 2013) and December 29, 2012 (fiscal year 2012) are 52 week periods.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries and its subsidiaries in which it has a controlling interest. On October 8, 2014, AutoMD, Inc. (“AutoMD”) sold seven million shares of its common stock to third-party investors, reducing the Company’s ownership interest in AutoMD to 64.1%. The 35.9% of AutoMD controlled by third-party investors is being reported as a noncontrolling interest. The Company reports noncontrolling interests in consolidated entities as a component of equity separate from the Company’s equity. All inter-company transactions between and among the Company and its consolidated subsidiaries have been eliminated in consolidation.

Basis of Presentation

During fiscal year 2014, the Company’s revenues increased 11.3% from fiscal Year 2013 after having decreased in fiscal year 2013 by 16.2% from fiscal year 2012. In Fiscal Year 2014, the Company incurred a net loss of \$6,879, after incurring net losses of \$15,634 and \$35,978 in Fiscal Years 2013 and 2012, respectively. Based on our current operating plan, we believe that our existing cash, cash equivalents, investments, cash flows from operations and available debt financing will be sufficient to finance our operational cash needs through at least the next twelve months. When compared to fiscal year 2014, we expect our revenues to increase and our net loss to be lower in fiscal year 2015. Should the Company’s operating results not meet expectations in 2015, it could negatively impact our liquidity as we may not be able to provide positive cash flows from operations in order to meet our working capital requirements. We may need to borrow additional funds from our credit facility, which under certain circumstances may not be available, sell assets or seek additional equity or additional debt financing in the future. There can be no

assurance that we would be able to raise such additional financing or engage in such additional asset sales on acceptable terms, or at all. If revenues were to decline and the net loss is larger or continues for longer than we expect because our strategies to return to profitability are not successful or otherwise, and if we are not able to raise adequate additional financing or proceeds from asset sales to continue to fund our ongoing operations, we will need to defer, reduce or eliminate significant planned expenditures, restructure or significantly curtail our operations.

F- 6

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates made by management include, but are not limited to, those related to revenue recognition, uncollectible receivables, the valuation of investments, valuation of inventory, valuation of deferred tax assets and liabilities, valuation of intangible assets including goodwill and other long-lived assets, recoverability of software development costs, contingencies and share-based compensation expense that results from estimated grant date fair values and vesting of issued equity awards. Actual results could differ from these estimates.

Statement of Cash Flows

The net change in the Company's book overdraft is presented as an operating activity in the consolidated statement of cash flows. The book overdraft represents a credit balance in the Company's general ledger but the Company has a positive bank account balance.

Cash and Cash Equivalents

The Company considers all money market funds and short-term investments purchased with original maturities of ninety days or less to be cash equivalents.

Fair Value of Financial Instruments

Financial instruments that are not measured at fair value include accounts receivable, accounts payable and debt. Refer to "Note 3 – Fair Value Measurements" for additional fair value information. If the Company's revolving loan payable (see "Note 6 – Borrowings") had been measured at fair value, it would be categorized in Level 2 of the fair value hierarchy, as the estimated value would be based on the quoted market prices for the same or similar issues or on the current rates available to the Company for debt of the same or similar terms. The carrying values of cash and cash equivalents, accounts receivable and accounts payable approximate fair value at January 3, 2015 and December 28, 2013 due to their short-term maturities. Marketable securities and investments are carried at fair value, as discussed below. Based on the borrowing rates currently available to the Company for bank loans with similar terms and average maturities, the fair value of our revolving loan payable, classified as current liability in our consolidated balance sheet, approximates its carrying amount because the interest rate is variable.

Accounts Receivable and Concentration of Credit Risk

Accounts receivable are stated net of allowance for doubtful accounts. The allowance for doubtful accounts is determined primarily on the basis of past collection experience and general economic conditions. The Company determines terms and conditions for its customers primarily based on the volume purchased by the customer, customer creditworthiness and past transaction history.

Concentrations of credit risk are limited to the customer base to which the Company's products are sold. The Company does not believe significant concentrations of credit risk exist.

Investments

Investments are comprised of closed-end funds primarily invested in mutual funds that hold government bonds and stock and short-term money market funds. Mutual funds are classified as short-term investments available-for-sale and recorded at fair market value, based on quoted prices of identical assets that are trading in active markets as of the end of the period for which the values are determined.

Other-Than-Temporary Impairment

All of the Company's marketable securities and investments are subject to a periodic impairment review. The Company recognizes an impairment charge when a decline in the fair value of its investments below the cost basis is judged to be other-than-temporary. The Company considers various factors in determining whether to recognize an impairment charge, including the length of time and extent to which the fair value has been less than the Company's cost basis, the financial condition and near-term prospects of the investee, and the Company's intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in the market value. No other-than-temporary impairment charges were recorded on any investments during fiscal years presented.

Inventory

Inventories consist of finished goods available-for-sale and are stated at the lower of cost or market value, determined using the first-in first-out (“FIFO”) method. The Company purchases inventory from suppliers both domestically and internationally, and routinely enters into supply agreements with U.S.-based suppliers and its primary drop-ship vendors. The Company believes that its products are generally available from more than one supplier and seeks to maintain multiple sources for its products, both internationally and domestically. The Company primarily purchases products in bulk quantities to take advantage of quantity discounts and to ensure inventory availability. Inventory is reported at the lower of cost or market, adjusted for slow moving, obsolete or scrap product. Inventory at January 3, 2015 and December 28, 2013 was \$48,362 and \$36,986, respectively, which included items in-transit to our warehouses, in the amount of \$12,155 and \$6,750, respectively.

Website and Software Development Costs

The Company capitalizes certain costs associated with website and software developed for internal use according to ASC 350-50 Intangibles – Goodwill and Other – Website Development Costs and ASC 350-40 Intangibles – Goodwill and Other – Internal-Use Software, when both the preliminary project design and testing stage are completed and management has authorized further funding for the project, which it deems probable of completion and to be used for the function intended. Capitalized costs include amounts directly related to website and software development such as payroll and payroll-related costs for employees who are directly associated with, and who devote time to, the internal-use software project. Capitalization of such costs ceases when the project is substantially complete and ready for its intended use. These amounts are amortized on a straight-line basis over two to three years once the software is placed into service. The Company capitalized website and software development costs of \$5,651 and \$8,150 during fiscal year 2014 and 2013, respectively. At January 3, 2015 and December 28, 2013, our internally developed website and software costs amounted to \$40,757 and \$50,250, respectively, and the related accumulated amortization and impairment amounted to \$36,060 and \$44,211, respectively. During fiscal year 2013 and 2012, the Company recognized an impairment loss on websites and software development costs of \$4,832 and \$3,868, respectively. No impairment was recognized during fiscal year 2014.

Long-Lived Assets and Intangibles Subject to Amortization

The Company accounts for the impairment and disposition of long-lived assets, including intangibles subject to amortization, in accordance with ASC 360 Property, Plant and Equipment (“ASC 360”). Management assesses potential impairments whenever events or changes in circumstances indicate that the carrying value of an asset or asset group may not be recoverable. An impairment loss will result when the carrying value exceeds the undiscounted cash flows estimated to result from the use and eventual disposition of the asset or asset group. Impairment losses will be recognized in operating results to the extent that the carrying value exceeds the discounted future cash flows estimated to result from the use and eventual disposition of the asset or asset group. The Company continually uses judgment when applying these impairment rules to determine the timing of the impairment tests, undiscounted cash flows used to assess impairments, and the fair value of a potentially impaired asset or asset group. The reasonableness of our judgments could significantly affect the carrying value of our long-lived assets. As of January 3, 2015, the Company’s long-lived assets did not indicate a potential impairment under the provisions of ASC 360, therefore no impairment charges were recorded for fiscal year 2014. During the second quarter of 2013, the Company recognized an impairment loss on property and equipment and intangible assets subject to amortization of \$4,832 and \$1,245, respectively. During the fourth quarter of 2012, the Company recognized an impairment loss on property and equipment and intangible assets subject to amortization of \$1,960 and \$1,745, respectively. Future impairment losses could result if the fair value of the Company’s long lived assets continues to decline. Refer to “Note 3 – Fair Value Measurements” “Note 4 – Property and Equipment, Net” and “Note 5 – Intangible Assets, net” for further details.

Goodwill and Indefinite-Lived Intangibles.

The Company accounts for goodwill under the guidance set forth in ASC Topic 350- Intangibles – Goodwill and Other (“ASC 350”), which specifies that goodwill and indefinite-lived intangibles should not be amortized. The Company has historically evaluated goodwill and indefinite-lived intangibles for impairment on an annual basis or more frequently if events or circumstances occur that would indicate a reduction in fair value. The goodwill impairment test is a two-step impairment test. The first step compares the fair value of each reporting unit with its carrying amount

including goodwill. The Company estimates the fair value of the reporting unit based on the income approach, which utilizes discounted future cash flows. Assumptions critical to the fair value estimates under the discounted cash flow model include discount rates, cash flow projections, projected long-term growth rates and the determination of terminal values. The market approach is used as a test of reasonableness to corroborate the income approach. The market approach utilized market multiples of invested capital from publicly traded companies in similar lines of business. The market multiples from invested capital include revenues, total assets, book equity plus debt and EBITDA.

F- 8

During the fourth quarter of 2012, the Company identified adverse events related to the Company's overall financial performance, including the continued downward trend in the Company's revenues and negative cash flows from operations, and a sustained decline in the Company's share price, that would more likely than not reduce the fair value of our reporting units below their carrying amounts. The excess of carrying value over fair value for our reporting unit as of October 31, 2012, the annual testing date, was approximately \$21,843. If the carrying amount exceeds the estimated fair value, then the second step of the impairment test is performed to measure the amount of any impairment loss and the impairment losses will be recognized in operating results. Therefore, the Company performed the second step of the goodwill impairment test to measure the amount of impairment loss. The second step compares the implied fair value of goodwill with the carrying amount of goodwill. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. Based on its analysis, the Company recognized an impairment loss on goodwill of \$18,854, which represented its carrying value as of October 31, 2012. For indefinite lived intangible assets, the Company utilized the royalty savings method to determine the fair value of the trade name intangible assets using a discounted rate of 15.0% and royalty rate of 0.1% for fiscal year 2012. During the fourth quarter of 2012, we recorded an impairment loss on indefinite lived intangible assets totaling \$3,868. As a result of the impairment losses taken in fiscal year 2012, the Company did not have any goodwill or indefinite-lived intangibles on its balance sheet in fiscal year 2013. In addition, all the remaining indefinite lived intangibles were reclassified as definite lived intangibles and subject to amortization. Refer to "Note 3- Fair Value Measurements" and "Note 5 – Intangible Assets, net" for additional details.

Deferred Catalog Expenses

Deferred catalog expenses consist of third-party direct costs including primarily creative design, paper, printing, postage and mailing costs for all Company direct response catalogs. Such costs are capitalized as deferred catalog expenses and are amortized over their expected future benefit period. Each catalog is fully amortized within nine months. Deferred catalog expenses are included in other current assets and amounted to \$441 and \$485 at January 3, 2015 and December 28, 2013, respectively.

Deferred Financing Costs

Deferred financing costs are being amortized over the life of the loan using the straight-line method as it is not significantly different from the effective interest method.

Revenue Recognition

The Company recognizes revenue from product sales and shipping revenues, net of promotional discounts and return allowances, when the following revenue recognition criteria are met: persuasive evidence of an arrangement exists, both title and risk of loss or damage have transferred, delivery has occurred, the selling price is fixed or determinable, and collectability is reasonably assured. The Company retains the risk of loss or damage during transit, therefore, revenue from product sales is recognized at the delivery date to customers. Return allowances, which reduce product revenue by the Company's best estimate of expected product returns, are estimated using historical experience. Revenue from sales of advertising is recorded when performance requirements of the related advertising program agreement are met. For each of the fiscal years ended 2014, 2013 and 2012, the advertising revenue represented approximately 1%, of our total revenue.

The Company evaluates the criteria of ASC 605-45 Revenue Recognition Principal Agent Considerations in determining whether it is appropriate to record the gross amount of product sales and related costs or the net amount earned as commissions. Generally, when the Company is the primary party obligated in a transaction, the Company is subject to inventory risk, has latitude in establishing prices and selecting suppliers, or has several but not all of these indicators, revenue is recorded at gross.

Payments received prior to the delivery of goods to customers are recorded as deferred revenue.

The Company periodically provides incentive offers to its customers to encourage purchases. Such offers include current discount offers, such as percentage discounts off current purchases and other similar offers. Current discount offers, when accepted by the Company's customers, are treated as a reduction to the purchase price of the related transaction.

Sales discounts are recorded in the period in which the related sale is recognized. Sales return allowances are estimated based on historical amounts and are recorded upon recognizing the related sales. Credits are issued to customers for returned products. Credits for returned products amounted to \$24,903, \$24,618, and \$30,420 for fiscal year 2014, 2013 and 2012, respectively.

F- 9

No customer accounted for more than 10% of the Company's net sales.

The following table provides an analysis of the allowance for sales returns and the allowance for doubtful accounts (in thousands):

	Balance at Beginning of Period	Charged to Revenue, Cost or Expenses	Deductions	Balance at End of Period
Fifty-Three Weeks Ended January 3, 2015				
Allowance for sales returns	\$893	\$24,907	\$(24,903)) \$897
Allowance for doubtful accounts	213	64	(236)) 41
Fifty-Two Weeks Ended December 28, 2013				
Allowance for sales returns	\$1,364	\$24,147	\$(24,618)) \$893
Allowance for doubtful accounts	221	181	(189)) 213
Fifty-Two Weeks Ended December 29, 2012				
Allowance for sales returns	\$1,726	\$30,058	\$(30,420)) \$1,364
Allowance for doubtful accounts	183	247	(209)) 221

Cost of Sales

Cost of sales consists of the direct costs associated with procuring parts from suppliers and delivering products to customers. These costs include direct product costs, outbound freight and shipping costs, warehouse supplies and warranty costs, partially offset by purchase discounts and cooperative advertising. Total freight and shipping expense included in cost of sales for fiscal year 2014, 2013 and 2012 was \$40,428, \$34,182, and \$39,702, respectively. Depreciation and amortization expenses are excluded from cost of sales and included in marketing, general and administrative and fulfillment expenses as noted below.

Warranty Costs

The Company or the vendors supplying its products provide the Company's customers limited warranties on certain products that range from 30 days to lifetime. In most cases, the Company's vendors are the party primarily responsible for warranty claims. Standard product warranties sold separately by the Company are recorded as deferred revenue and recognized ratably over the life of the warranty, ranging from one to five years. The Company also offers extended warranties that are imbedded in the price of selected private label products we sell. The product brands that include the extended warranty coverage are offered at three different service levels: (a) a five year unlimited product replacement, (b) a five year one-time product replacement, and (c) a three year one-time product replacement. Warranty costs relating to merchandise sold under warranty not covered by vendors are estimated and recorded as warranty obligations at the time of sale based on each product's historical return rate and historical warranty cost. The standard and extended warranty obligations are recorded as warranty liabilities and included in other current liabilities in the consolidated balance sheets. For the fiscal year 2014 and 2013, the activity in our aggregate warranty liabilities was as follows (in thousands):

	January 3, 2015	December 28, 2013
Warranty liabilities, beginning of period	\$296	\$282
Adjustments to preexisting warranty liabilities	(123)) (58)
Additions to warranty liabilities	119	165
Reductions to warranty liabilities	(74)) (93)
Warranty liabilities, end of period	\$218	\$296

Marketing Expense

Marketing costs, including advertising, are expensed as incurred. The majority of advertising expense is paid to internet search engine service providers and internet commerce facilitators. For fiscal year 2014, 2013 and 2012, the Company recognized advertising costs of \$18,485, \$16,619 and \$21,068, respectively. Marketing costs also include

depreciation and amortization expense and share-based compensation expense.

F- 10

General and Administrative Expense

General and administrative expense consists primarily of administrative payroll and related expenses, merchant processing fees, legal and professional fees and other administrative costs. General and administrative expense also includes depreciation and amortization expense and share-based compensation expense.

Fulfillment Expense

Fulfillment expense consists primarily of payroll and related costs associated with warehouse employees and the Company's purchasing group, facilities rent, building maintenance, depreciation and other costs associated with inventory management and wholesale operations. Fulfillment expense also includes share-based compensation expense.

Technology Expense

Technology expense consists primarily of payroll and related expenses of our information technology personnel, the cost of hosting the Company's servers, communications expenses and Internet connectivity costs, computer support and software development amortization expense. Technology expense also includes share-based compensation expense.

Share-Based Compensation

The Company accounts for share-based compensation in accordance with ASC 718 Compensation – Stock Compensation (“ASC 718”). All share-based payment awards issued to employees are recognized as share-based compensation expense in the financial statements based on their respective grant date fair values, and are recognized within the statement of comprehensive income or loss as marketing, general and administrative, fulfillment or technology expense, based on employee departmental classifications. Under this standard, compensation expense for both time-based and performance-based restricted stock units is based on the closing stock price of our common shares on the date of grant, and is recognized on a straight-line basis over the requisite service period. Compensation expense for performance-based awards is measured based on the amount of shares ultimately expected to vest, estimated at each reporting date based on management's expectations regarding the relevant performance criteria. Compensation expense for stock options is based on the fair value estimated on the date of grant using an option pricing model that meets certain requirements, and is recognized over the vesting period of three to four years. The Company currently uses the Black-Scholes option pricing model to estimate the fair value of share-based payment awards for such stock options, which is affected by the Company's stock price and a number of assumptions, including expected volatility, expected life, risk-free interest rate and expected dividends.

The Company incorporates its own historical volatility into the grant-date fair value calculations for the stock options. The expected term of an award is based on combining historical exercise data with expected weighted time outstanding. Expected weighted time outstanding is calculated by assuming the settlement of outstanding awards is at the midpoint between the remaining weighted average vesting date and the expiration date. The risk-free interest rate assumption is based on observed interest rates appropriate for the expected life of awards. The dividend yield assumption is based on the Company's expectation of paying no dividends on its common stock. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures significantly differ from those estimates. The Company considers many factors when estimating expected forfeitures, including employee class, economic environment, and historical experience.

The Company accounts for equity instruments issued in exchange for the receipt of services from non-employee directors in accordance with the provisions of ASC 718. The Company accounts for equity instruments issued in exchange for the receipt of goods or services from other than employees in accordance with ASC 505-50 Equity-Based Payments to Non-Employees. Costs are measured at the estimated fair market value of the consideration received or the estimated fair value of the equity instruments issued, whichever is more reliably measurable. The value of equity instruments issued for consideration other than employee services is determined on the earlier of a performance commitment or completion of performance by the provider of goods or services. Equity instruments awarded to non-employees are periodically re-measured as the underlying awards vest unless the instruments are fully vested, immediately exercisable and non-forfeitable on the date of grant.

The Company accounts for modifications to its share-based payment awards in accordance with the provisions of ASC 718. Incremental compensation cost is measured as the excess, if any, of the fair value of the modified award over the fair value of the original award immediately before its terms are modified, measured based on the share price and other pertinent factors at that date, and is recognized as compensation cost on the date of modification (for vested awards) or over the remaining service (vesting) period (for unvested awards). Any unrecognized compensation cost remaining from the original award is recognized over the vesting period of the modified award.

Other Income, net

Other income, net consists of miscellaneous income or expense such as gains/losses from disposition of assets, and interest income comprised primarily of interest income on investments.

Interest Expense

Interest expense consists primarily of interest expense on our outstanding loan balance, deferred financing cost amortization, and capital lease interest.

Income Taxes

The Company accounts for income taxes in accordance with ASC 740 Income Taxes (“ASC 740”). Under ASC 740, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amount of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. When appropriate, a valuation allowance is established to reduce deferred tax assets, which include tax credits and loss carry forwards, to the amount that is more likely than not to be realized. In making such determination, the Company considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, future taxable income exclusive of reversing temporary differences and carryforwards, taxable income in prior carryback years, tax planning strategies and recent financial operations.

The Company utilizes a two-step approach to recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The Company considers many factors when evaluating and estimating our tax positions and tax benefits, which may require periodic adjustments and which may not accurately forecast actual outcomes. As of January 3, 2015, the Company had no material unrecognized tax benefits, interest or penalties related to federal and state income tax matters. The Company’s policy is to record interest and penalties as income tax expense.

Taxes Collected from Customers and Remitted to Governmental Authorities

We present taxes collected from customers and remitted to governmental authorities on a net basis in accordance with the guidance on ASC 605-45-50-3 Taxes Collected from Customers and Remitted to Governmental Authorities.

Leases

The Company analyzes lease agreements for operating versus capital lease treatment in accordance with ASC 840 Leases. Rent expense for leases designated as operating leases is expensed on a straight-line basis over the term of the lease. For capital leases, the present value of future minimum lease payments at the inception of the lease is reflected as a capital lease asset and a capital lease payable in the consolidated balance sheets. Amounts due within one year are classified as current liabilities and the remaining balance as non-current liabilities.

Foreign Currency Translation

For each of the Company’s foreign subsidiaries, the functional currency is its local currency. Assets and liabilities of foreign operations are translated into U.S. dollars using the current exchange rates, and revenues and expenses are translated into U.S. dollars using average exchange rates. The effects of the foreign currency translation adjustments are included as a component of accumulated other comprehensive income or loss in the Company’s consolidated balance sheets.

Comprehensive Income

The Company reports comprehensive income or loss in accordance with ASC 220 Comprehensive Income. Accumulated other comprehensive income or loss, included in the Company’s consolidated balance sheets, includes foreign currency translation adjustments related to the Company’s foreign operations, and unrealized holding gains and losses from available-for-sale marketable securities and investments. The Company presents the components of net income or loss and other comprehensive income or loss in its consolidated statements of comprehensive operations.

Segment Data

The Company operates in two reportable operating segments. The criteria we use to identify operating segments are primarily the nature of the products we sell or services we provide and the consolidated operating results that are regularly reviewed by our chief operating decision maker to assess performance and make operating decisions. We identified two reportable operating segments, Base USAP, which is the core auto parts business, and AutoMD, an online automotive repair source, in accordance with ASC 280 Segment Reporting (“ASC 280”).

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2014-9, “Revenue from Contracts with Customers,” (“ASU 2014-9”) which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This guidance will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for fiscal years beginning after December 15, 2016. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-9 will have on the consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has the effect of the standard on ongoing financial reporting been determined. On August 27, 2014, the FASB issued ASU 2014-15, which provides guidance on determining when and how reporting entities must disclose going-concern uncertainties in their financial statements. The new standard requires management to perform interim and annual assessments of an entity’s ability to continue as a going concern within one year of the date of issuance of the entity’s financial statements (or within one year after the date on which the financial statements are available to be issued, when applicable). Further, an entity must provide certain disclosures if there is “substantial doubt about the entity’s ability to continue as a going concern.” The ASU is effective for annual periods ending after December 15, 2016, and interim periods thereafter; early adoption is permitted. The Company is evaluating the impact the adoption of ASU 2014-15 will have on its consolidated financial statements.

Note 2 – Investments

As of January 3, 2015, the Company held the following securities and investments, recorded at fair value:

	Amortized Cost	Unrealized Gains	Losses	Fair Value
Mutual funds ⁽¹⁾	\$62	\$—	\$—	\$62

As of December 28, 2013, the Company held the following securities and investments, recorded at fair value:
