Concurrent Offering of Common Stock and Convertible Senior Subordinated Notes due 2015

On May 28, 2009, we commenced two separate offerings: a public offering of 11,000,000 shares of Common Stock (12,650,000 shares if the underwriters exercise their over-allotment option in full) and an offering of \$150 million aggregate principal amount of 4.00% Convertible Senior Subordinated Notes due 2015 (or \$172.5 million aggregate principal amount of 4.00% Convertible Senior Subordinated Notes due 2015 if the underwriters exercise their over-allotment option in full) (together, the Concurrent Offerings). Assuming no exercise of the underwriters over-allotment option with respect to the Concurrent Offerings, the net proceeds of the Concurrent Offerings, after deducting the underwriting discount and estimated expenses, will be approximately \$281.2 million. The closing of this senior notes offering is conditioned on the closing of the Concurrent Offerings.

Ranking of Other Indebtedness and Subsidiary Guarantees

In the Description of Certain Indebtedness section in the Preliminary Prospectus Supplement, both the 7-3/8% Senior Subordinated Notes due 2014 and the 8.00% Senior Subordinated Notes due 2017 were incorrectly stated to rank equally with the new senior notes offered hereby. Those notes are instead subordinated to the senior notes offered hereby. In addition, any guarantees that might become operative in the future for the 8.00% Senior Subordinated Notes would also rank subordinated (on a senior subordinated basis) to the corresponding guarantees that would become operative for the benefit of the senior notes offered hereby. The correct ranking information was included on the front cover page of the Preliminary Prospectus Supplement and in the Summary--The Offering and Description of the Notes -- Ranking sections of the Preliminary Prospectus Supplement.

Ratio of Earnings to Fixed Charges

The as adjusted ratio of earnings to fixed charges for this offering and the Concurrent Offerings and assumed application of net proceeds thereof would have been 2.6 to 1.0 for the year ended December 31, 2008 and the amount of earnings deficiency for coverage of fixed charges for the three months ended March 31, 2009 would have been \$108.5 million.
