Notes to Interim Condensed Consolidated Financial Statements

(1) Basis of Presentation

The interim condensed consolidated financial statements of UFP Technologies, Inc. (the “Company”) presented herein, have been prepared pursuant to the rules of the Securities and Exchange Commission for quarterly reports on Form 10-Q and do not include all the information and note disclosures required by accounting principles generally accepted in the United States of America. These statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2015, included in the Company's 2015 Annual Report on Form 10-K, as filed with the Securities and Exchange Commission.

The condensed consolidated balance sheet as of March 31, 2016, the condensed consolidated statements of income for the three- month periods ended March 31, 2016 and 2015, and the condensed consolidated statements of cash flows for the three- month periods ended March 31, 2016 and 2015 are unaudited but, in the opinion of management, include all adjustments (consisting of normal, recurring adjustments) necessary for a fair presentation of results for these interim periods.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

The results of operations for the three- month period ended March 31, 2016 are not necessarily indicative of the results to be expected for the entire fiscal year ending December 31, 2016.

Recent Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-09, Improvements to Employee Share Based Payment Accounting. This ASU simplifies several aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards and classification on the statement of cash flows. The provisions of this ASU are effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. Early adoption is permitted. This amendment is applicable to us beginning in the first quarter of 2017. The Company is evaluating the impact of adopting this ASU on its consolidated financial position and results of operations.

(2) Supplemental Cash Flow Information

Cash paid (received) for interest and income taxes is as follows (in thousands):

	Three months ended March 31,	
	2016	2015
Interest, net	\$ (12)	\$ 23
Income taxes, net of refunds	\$ 265	\$ (1)

(3) Fair Value Accounting

The Company has financial instruments, such as accounts receivable, accounts payable, and accrued expenses, which are stated at carrying amounts that approximate fair value because of the short maturity of those instruments. The carrying amount of the Company's long-term debt approximates fair value as the interest rate on the debt approximates the estimated borrowing rate currently available to the Company.

(4) Share-Based Compensation

Share-based compensation is measured at the grant date based on the fair value of the award and is recognized as an expense over the requisite service period (generally the vesting period of the equity grant).

The Company issues share-based awards through several plans that are described in detail in the notes to the consolidated financial statements for the year ended December 31, 2015. The compensation cost charged against income for those plans is included in selling, general & administrative expenses as follows (in thousands):

	Three Months Ended March 31,	
	2016	2015
Total Share-based compensation expense	\$ 201	\$ 210

The total income tax benefit recognized in the condensed consolidated statements of income for share-based compensation arrangements was approximately \$57,000 and \$58,000, respectively, for the three-month periods ended March 31, 2016 and 2015.

The following is a summary of stock option activity under all plans for the three-month period ended March 31, 2016:

	Shares Under Options	Weighted Average Exercise Price (per share)	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (in thousands)

During the three-month period ended March 31, 2015, the total intrinsic value of all options exercised (i.e., the difference between the market price on the exercise date and the price paid by the employees to exercise the options) was approximately \$600,000, and the total amount of consideration received by the Company from the exercised options was approximately \$130,000. There were no options exercised during the three-month period ended March 31, 2016. At its discretion, the Company allows option holders to surrender previously owned common stock in lieu of paying the exercise price and withholding taxes. During the three-months ended March 31, 2016 and 2015, there were no shares surrendered for this purpose.

During each of the three-month periods ended March 31, 2016 and 2015, the Company recognized compensation expense related to stock options granted to directors and employees of approximately \$36,000 and \$44,000, respectively.

On February 22, 2016, the Company's Compensation Committee approved the award of \$400,000, payable in shares of common stock to the Company's Chairman, Chief Executive Officer, and President under the 2003 Incentive Plan. The shares will be issued on December 22, 2016. The Company recorded compensation expense associated with the award of \$100,000 during the three-month period ended March 31, 2016. The Company recorded compensation expense associated with a similar award of \$100,000, during the three-month period ended March 31, 2015.

Table of Contents

The following table summarizes information about Restricted Stock Units (“RSUs”) activity during the three-month period ended March 31, 2016:

(5) Inventories

Inventories are stated at the lower of cost (first-in, first-out) or net realizable value, and consist of the following at the stated dates (in thousands):

	March 31, 2016	December 31, 2015
Raw materials	\$ 7,689	\$ 7,506
Work in process	1,385	1,192
Finished goods	4,144	5,504

Total inventory \$ 13,218 \$ 14,202

(6) Preferred Stock

On March 18, 2009, the Company declared a dividend of one preferred share purchase right (a “Right”) for each outstanding share of common stock, par value \$0.01 per share, to the stockholders of record on March 20, 2009. Each Right entitles the registered holder to purchase from the Company one one-thousandth of a share of Series A Junior Participating Preferred Stock, par value \$0.01 per share (the “Preferred Share”) of the Company, at a price of \$25 per one one-thousandth of a Preferred Share subject to adjustment and the terms of the Rights Agreement. The Rights expire on March 19, 2019.

(7) Income Per Share

Basic income per share is based on the weighted average number of shares of common stock outstanding. Diluted income per share is based upon the weighted average number of common shares outstanding and dilutive common stock equivalent shares outstanding during each period.

Table of Contents

The weighted average number of shares used to compute basic and diluted net income per share consisted of the following (in thousands):

	Three Months Ended March 31,	
	2016	2015
Weighted average common shares outstanding, basic	7,173	7,076
Weighted average common equivalent shares due to stock options and RSUs	82	117
Weighted average common shares outstanding, diluted	7,255	7,193

The computation of diluted earnings per share excludes the effect of the potential exercise of stock awards, including stock options, when the average market price of the common stock is lower than the exercise price of the related options during the period. These outstanding stock awards are not included in the computation of diluted income per share because the effect would be antidilutive. For the three-month periods ended March 31, 2016 and 2015, the number of stock awards excluded from the computation of diluted earnings per share for this reason was 54,969 and 53,651, respectively.

(8) Segment Reporting

The Company consists of a single operating and reportable segment.

Revenues from customers outside of the United States are not material. No customer comprised more than 10% of the Company's consolidated revenues for the three-month period ended March 31, 2016. All of the Company's assets are located in the United States.

The Company's products are primarily sold to customers within the Medical, Automotive, Consumer, Electronics, Industrial and Aerospace and Defense markets. Net sales by market for the three-month periods ended March 31, 2016 and 2015 are as follows (in thousands):

Remainder of:	
2016	238
2017	318
Total	\$ 556

(10) Income Taxes

The income tax expense included in the accompanying unaudited condensed consolidated statements of income principally relates to the Company's proportionate share of the pre-tax income of its wholly-owned subsidiaries. The determination of income tax expense for interim reporting purposes is based upon the estimated effective tax rate for the year, adjusted for the impact of any discrete items which are accounted for in the period in which they occur.

The Company recorded tax expense of approximately 37.3% of income before income tax expense for the three-month period ended March 31, 2016 and approximately 35.0% of income before income tax expense for the three-month period ended March 31, 2015. The increase in the effective tax rate for the current period is due to a tax assessment of approximately \$40,000 from one jurisdiction.

(11) Plant Consolidations

Restructuring Costs

On March 18, 2015, the Company committed to move forward with a plan to cease operations at its Raritan, New Jersey, plant and consolidate operations into its Newburyport, Massachusetts, facility and other UFP facilities. The Company's decision was in response to a continued decline in business at the Raritan facility and the recent purchase of the 137,000-square-foot facility in Newburyport. The activities related to this consolidation were substantially complete at December 31, 2015.

The Company also relocated all operations in its Haverhill, Massachusetts, and Byfield, Massachusetts facilities and plans to relocate certain operations in its Georgetown, Massachusetts facility to Newburyport. The Haverhill and Byfield relocations were complete at December 31, 2015 and the Georgetown relocation is expected to be complete by June 30, 2016.

Table of Contents

The Company expects to incur approximately \$2.1 million in one-time expenses in connection with the Massachusetts consolidations. Included in this amount are approximately \$180,000 relating to employee severance payments and relocation costs, approximately \$1.5 million in moving expenses and expenses associated with vacating the Raritan, Haverhill and Byfield properties, and approximately \$360,000 in lease termination costs. Total cash charges are estimated at \$2.0 million. The Company expects annual cost savings of approximately \$1.0 million as a result of these consolidations. Through March 31, 2016, the Company had incurred approximately \$1.8 million of the costs for this restructuring plan.

On July 16, 2014, the Company committed to move forward with a plan to cease operations at its Costa Mesa, California, plant and consolidate operations into its Rancho Dominguez, California, facility and other UFP facilities. The Company's decision was in response to the December 31, 2014, expiration of the lease on the Costa Mesa facility as well as the close proximity of the two properties. The California consolidation is complete.

The company recorded the following restructuring costs associated with the above noted consolidations for the three-month periods ended March 31, 2016 and 2015 (in thousands):

	Three Months Ended March 31, 2016 Massachusetts	Three Months Ended March 31, 2015 California

December 31, 2015, as well as the risks and uncertainties discussed elsewhere in this Report. We qualify all of our forward-looking statements by these cautionary statements. We caution you that these risks are not exhaustive. We operate in a continually changing business environment and new risks emerge from time to time.

Unless the context requires otherwise, the terms “we”, “us”, “our”, or “the Company” refer to UFP Technologies, Inc. and its consolidated subsidiaries.

Overview

UFP Technologies is an innovative designer and custom converter of foams, plastics, composites and natural fiber products, principally serving the medical, automotive, consumer, electronics, industrial and aerospace and defense markets. The Company consists of a single operating and reportable segment.

Table of Contents

The Company's first quarter results were impacted by expenses related to plant consolidations in both the Northeast and Midwest. The additional expenses were largely in the form of higher material consumed and labor incurred in the manufacturing process as new staff was trained and transferred jobs were re-qualified by customers. The Company expects these incremental costs to subside over the next two quarters as training continues and more equipment and parts get qualified. The Company further expects the completion of the transfer of certain equipment from its Georgetown, Massachusetts location into its newly acquired Newburyport, Massachusetts location by the end of the second quarter.

The Company continues to see robust growth in sales to customers in the medical market. This growth is offsetting softness in sales to customers in the automotive and aerospace and defense markets.

The Company's current strategy includes organic growth and growth through strategic acquisitions.

Results of Operations

Sales

Sales for the three-month period ended March 31, 2016 increased approximately 1.5% to \$34.5 million from sales of \$34.0 million for the same period in 2015. The increase in sales for the three-month period ended March 31, 2016 was primarily due to a 13.3% increase in sales to customers in the medical market partially offset by a 17.6% decline in sales to customers in the automotive market. The increase in medical sales was largely due to recently awarded contracts as well as increased demand for customer products. The decline in automotive sales was largely due to longer shutdowns at certain customers in January as well as disrupted manufacturing at one of the Company's key customers due to a relocation of production to a new facility.

Gross Profit

Gross profit as a percentage of sales ("gross margin") decreased to 22.4% for the three-month period ended March 31, 2016, from 25.4% for the same period in 2015. As a percentage of sales, material and labor costs collectively increased 3.7%, while overhead decreased 0.6%. The increase in collective material and labor costs as a percentage of sales is primarily due to incremental material consumed and labor incurred resulting from recent plant consolidations. The decrease in overhead as a percentage of sales is primarily due to lower occupancy costs resulting from recent plant consolidations. As noted above, the Company anticipates that the manufacturing inefficiencies will gradually subside.

Selling, General and Administrative Expenses

Selling, general, and administrative expenses (“SG&A”) decreased approximately 2.0% to \$5.9 million for the three-month period ended March 31, 2016, from \$6.0 million for the same period in 2015. As a percentage of sales, SG&A decreased to 17.1% for the three-month period ended March 31, 2016, from 17.7% for the same three-month period in 2015. The decrease in SG&A and SG&A as a percentage of sales for the three-month period ended March 31, 2016, is primarily due to lower salaries, benefits and commissions expense resulting largely from recent plant consolidations.

Restructuring Costs

For the three month period ended March 31, 2016, the Company incurred restructuring costs of approximately \$123,000, compared to approximately \$78,000 for the same period in 2015.

Additional information regarding restructuring costs can be found in Note 11 of the Notes to Interim Condensed Consolidated Financial Statements.

Interest Income and Expense

The Company had net interest income of approximately \$11,000 and net interest expense of approximately \$24,000 for the three-month periods ended March 31, 2016 and 2015, respectively. The decrease in net interest expense is primarily due to an increase in interest earned on money market accounts and certificates of deposit and decreasing interest costs on our term loans.

Income Taxes

The Company's effective tax rate was approximately 37.3% and 35.0%, for the three-month periods ended March 31, 2016 and 2015, respectively. The increase in the effective tax rate for the current period is due to a tax assessment of approximately \$40,000 from one jurisdiction. The Company has deferred tax assets on its books associated with net operating losses generated in previous years. The Company has considered both positive and negative available evidence in its determination that the deferred tax assets are more likely than not to be realized, and has not recorded a tax valuation allowance at March 31, 2016. The Company will continue to assess whether the deferred tax assets will be realizable and, when appropriate, will record a valuation allowance against these assets. The amount of the net deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.

Liquidity and Capital Resources

The Company generally funds its operating expenses, capital requirements, and growth plan through internally generated cash and bank credit facilities.

Cash Flows

Net cash used in operations for the three-month period ended March 31, 2016 was approximately \$2.4 million and was primarily a result of net income generated of \$1.1 million, depreciation and amortization of approximately \$1.4 million, share-based compensation of \$0.2 million, a decrease in inventories of approximately \$1.0 million and a decrease in refundable income taxes of approximately \$0.3 million. These cash inflows and adjustments to income were offset by an increase in accounts receivable of approximately \$2.9 million due in part to strong March sales, an increase in prepaid expenses of approximately \$1.5 million due to upfront insurance premium payments and a decrease in accrued expenses of approximately \$2.0 million primarily due to the payment of year-end commissions, profit sharing and employee bonuses.

Net cash used in investing activities during the three-month period ended March 31, 2016 was approximately \$1.6 million and was primarily the result of additions of manufacturing machinery and equipment and the renovations of the new manufacturing and headquarters building in Massachusetts.

Net cash used in financing activities was approximately \$0.3 million during the three-month period ended March 31, 2016, representing cash used to service term debt of approximately \$0.2 million and restricted stock units vested of approximately \$0.1 million.

Outstanding and Available Debt

The Company maintains an unsecured \$40 million revolving credit facility with Bank of America, N.A. The credit facility calls for interest of LIBOR plus a margin that ranges from 1.0% to 1.5% or, at the discretion of the Company, the bank's prime rate less a margin that ranges from 0.25% to zero. In both cases the applicable margin is dependent upon Company performance. Under the credit facility, the Company is subject to a minimum fixed-charge coverage financial covenant as well as a maximum total funded debt to EBITDA financial covenant. The Company's \$40 million credit facility matures on November 30, 2018.

As of March 31, 2016, the Company had no borrowings outstanding under the credit facility and the Company was in compliance with all covenants under the credit facility.

In 2012, the Company financed the purchase of two molded fiber machines through five-year term loans that mature in September 2017. The annual interest rate is fixed at 1.83% and the loans are secured by the related molded fiber machines. As of March 31, 2016, the outstanding balance of the term loan facility was approximately \$1.6 million.

Future Liquidity

The Company requires cash to pay its operating expenses, purchase capital equipment, and to service its contractual obligations. The Company's principal sources of funds are its operations and its revolving credit facility. The Company

used cash of approximately \$2.4 million in operations during the three-month period ended March 31, 2016, and cannot guarantee that its operations will generate cash in future periods. The Company's longer-term liquidity is contingent upon future operating performance.

Throughout fiscal 2016, the Company plans to continue to add capacity to enhance operating efficiencies in its manufacturing plants. The Company may also further expand its Newburyport, Massachusetts manufacturing plant. The Company may consider additional acquisitions of companies, technologies, or products that are complementary to its business. The Company believes that its existing resources, including its revolving credit facility, together with cash expected to be generated from operations and funds expected to be available to it through any necessary equipment financings and additional bank borrowings, will be sufficient to fund its cash flow requirements, including capital asset acquisitions, through the next twelve months.

Stock Repurchase Program

On June 16, 2015, the Company announced that its Board of Directors authorized the repurchase of up to \$10.0 million of the Company's outstanding common stock. Under the program, the Company is authorized to repurchase shares through Rule 10b5-1 plans, open market purchases, privately negotiated transactions, block purchases or otherwise in accordance with applicable federal securities laws, including Rule 10b-18 of the Securities Exchange Act of 1934. The stock repurchase program will end upon the earlier of the date on which the plan is terminated by the Board or when all authorized repurchases are completed. The timing and amount of stock repurchases, if any, will be determined based upon our evaluation of market conditions and other factors. The stock repurchase program may be suspended, modified or discontinued at any time, and the Company has no obligation to repurchase any amount of its common stock under the program. The Company did not repurchase any shares of its common stock under this program in the first quarter of 2016. Through March 31, 2016, the Company had repurchased a total of 29,559 shares of its common stock under this program at a cost of approximately \$587,000. At March 31, 2016, approximately \$9.4 million was available for future repurchases of the Company's common stock under this authorization.
