Notes to Unaudited Interim Consolidated Financial Statements

Note 1 - Significant Accounting Policies

Business Operations

The accompanying unaudited interim consolidated financial statements of Synovus include the accounts of the Parent Company and its consolidated subsidiaries. Synovus provides integrated financial services, including commercial and retail banking, financial management, insurance, and mortgage services to its customers through locally-branded divisions of its wholly-owned subsidiary bank, Synovus Bank, in offices located throughout Georgia, Alabama, South Carolina, Florida, and Tennessee.

In addition to our banking operations, we also provide various other financial services to our customers through direct and indirect wholly-owned non-bank subsidiaries, including: Synovus Securities, Inc., headquartered in Columbus, Georgia, which specializes in professional portfolio management for fixed-income securities, investment banking, the execution of securities transactions as a broker/dealer and the provision of individual investment advice on equity and other securities; Synovus Trust Company, N.A., headquartered in Columbus, Georgia, which provides trust, asset management and financial planning services; and Synovus Mortgage Corp., headquartered in Birmingham, Alabama, which offers mortgage services.

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with the instructions to the SEC Form 10-Q and Article 10 of Regulation S-X; therefore, they do not include all information and footnotes necessary for a fair presentation of financial position, results of operations, comprehensive income, and cash flows in conformity with GAAP. All adjustments consisting of normally recurring accruals that, in the opinion of management, are necessary for a fair presentation of the consolidated financial position and results of operations for the periods covered by this Report have been included. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes appearing in Synovus' 2014 Form 10-K. There have been no significant changes to the accounting policies as disclosed in Synovus' 2014 Form 10-K.

In preparing the unaudited interim consolidated financial statements in accordance with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the respective consolidated balance sheets and the reported amounts of revenues and expenses for the periods presented. Actual results could differ significantly from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses; the valuation of other real estate; the fair value of investment securities; the fair value of private equity investments; contingent liabilities related to legal matters; and the deferred tax assets valuation allowance.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and due from banks. At March 31, 2015 and December 31, 2014, \$125 thousand of the due from banks balance was restricted as to withdrawal.

Short-term Investments

Short-term investments consist of interest bearing funds with the Federal Reserve Bank, interest earning deposits with banks, and Federal funds sold and securities purchased under resale agreements. At March 31, 2015 and December 31, 2014, interest bearing funds with the Federal Reserve Bank included \$81.5 million and \$89.7 million, respectively, on deposit to meet Federal Reserve Bank requirements. Interest earning deposits with banks include \$7.0 million and \$7.1 million at March 31, 2015 and December 31, 2014, respectively, which is pledged as collateral in connection with certain letters of credit. Federal funds sold include \$67.5 million at March 31, 2015 and December 31, 2014, which are pledged to collateralize certain derivative instruments. Federal funds sold and securities purchased under resale agreements, and Federal funds purchased and securities sold under repurchase agreements, generally mature in one day.

Recently Adopted Accounting Standards Updates

During 2014, the FASB issued the following ASUs, all of which became effective January 1, 2015:

ASU 2014-01, Investments-Equity Method and Joint Ventures (Topic 323), Accounting for Investments in Qualified Affordable Housing Projects

In January 2014, the FASB issued amended guidance which permits Synovus to make an accounting policy election to account for its investments in qualified affordable housing projects using a proportional amortization method, if certain conditions are met, and to present the amortization as a component of income tax expense. The amended guidance would

7

Table of Contents

be applied retrospectively to all periods presented and is effective for fiscal years, and interim periods within those years, beginning after December 15, 2014. Regardless of the policy election, the amended guidance, where disclosed, enables the users of the financial statements to understand the nature of investments in qualified affordable housing projects and the effect of the measurement of the investments in qualified affordable housing projects and the related tax credits on Synovus' financial position and results of operations.

Synovus adopted the amended guidance on January 1, 2015, and did not make an accounting policy election to apply the proportional amortization method for its investments in qualified affordable housing projects because the impact to the consolidated financial statements was insignificant. Therefore, the adoption did not have an impact on Synovus' consolidated financial statements. At March 31, 2015, the aggregate carrying value of Synovus' investments in LIHTC partnerships was \$8.7 million. See Note 18 "Variable Interest Entities" to the consolidated financial statements of Synovus' 2014 Form 10-K for additional information regarding these investments.

Additionally, adoption of the following standards effective January 1, 2015 did not have a significant impact on Synovus' consolidated financial statements.

ASU 2014-14, Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure

ASU 2014-12, Accounting for Share-Based Payments when the Terms of an Award Provide that a Performance Target Could be Achieved after the Requisite Service Period

ASU 2014-11, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures

ASU 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity

ASU 2014-04, Receivables-Troubled Debt Restructurings by Creditors (Subtopic 310-40), Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure

Reclassifications

Prior periods' consolidated financial statements are reclassified whenever necessary to conform to the current periods' presentation.

Subsequent Events

Synovus has evaluated for consideration, or disclosure, all transactions, events, and circumstances, subsequent to the date of the consolidated balance sheet and through the date the accompanying unaudited interim consolidated financial statements were issued, and has reflected, or disclosed, those items deemed appropriate within the unaudited interim consolidated financial statements.

Note 2 - Share Repurchase Program

On October 21, 2014, Synovus announced a \$250 million share repurchase program, which will expire on October 23, 2015. As of March 31, 2015, Synovus had repurchased a total of \$147.2 million or 5.6 million shares of common stock under the share repurchase program through a combination of share repurchases under the accelerated share repurchase (ASR) agreement described below and open market transactions.

During October 2014, Synovus entered into an ASR agreement to purchase \$75.0 million of Synovus common stock under the share repurchase program. As of December 31, 2014, Synovus had repurchased 2,510,460 shares under the ASR agreement. During January 2015, Synovus repurchased 391,612 shares upon completion of the ASR agreement. Additionally, since October 2014 through March 31, 2015, Synovus has repurchased \$72.2 million or 2,683,755 shares of common stock through open market transactions including \$59.1 million or 2,179,986 shares of common stock repurchased during the first quarter of 2015.

Note 3 - Reverse Stock Split and Increase in Number of Authorized Common Shares

On April 24, 2014, at Synovus' 2014 Annual Shareholders' Meeting ("Annual Meeting"), Synovus' shareholders approved a proposal authorizing Synovus' Board of Directors to effect a one-for-seven reverse stock split of Synovus' common stock. Following the Annual Meeting, Synovus' Board of Directors authorized the one-for-seven reverse stock split. The reverse stock split became effective on May 16, 2014, and Synovus' shares of common stock began trading on a post-split basis on the New York Stock Exchange (NYSE) at the opening of trading on May 19, 2014. All prior periods presented in this Report have been adjusted to reflect the one-for-seven reverse stock split. Financial

information updated by this capital change includes earnings per common share, dividends per common share, stock price per common share, weighted average common shares, outstanding common shares, treasury shares, common stock, additional paid-in capital, and share-based compensation.

8

Additionally, on April 24, 2014, Synovus' shareholders also approved an amendment to Synovus' articles of incorporation to increase the number of authorized shares of Synovus' common stock from 1.2 billion shares to 2.4 billion shares. Synovus effected the increase in the number of authorized shares on April 24, 2014. Upon the reverse stock split effective date, the number of Synovus' authorized shares of common stock was proportionately reduced from 2.4 billion shares to 342.9 million shares.

Note 4 - Sale of Branches

On January 17, 2014, Synovus completed the sale of certain loans, premises, deposits, and other assets and liabilities of the Memphis, Tennessee branches of Trust One Bank, a division of Synovus Bank. The sale included \$89.6 million in total loans and \$191.3 million in total deposits. Results for the three months ended March 31, 2014 reflect a pre-tax gain, net of associated costs, of \$5.8 million relating to this transaction.

Note 5 - Investment Securities

The amortized cost, gross unrealized gains and losses, and estimated fair values of investment securities available for sale at March 31, 2015 and December 31, 2014 are summarized below.

(in thousands)	March 31, 2015			
	Amortized Cost ⁽¹⁾	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total investment securities available for sale	\$3,020,904	32,857	(12,355)) 3,041,406

(1) Amortized cost is adjusted for other-than-temporary impairment charges in 2014, which have been recognized in the consolidated statements of income and were considered inconsequential.

At March 31, 2015 and December 31, 2014, investment securities with a carrying value of \$2.05 billion and \$2.12 billion respectively, were pledged to secure certain deposits and securities sold under repurchase agreements as required by law and contractual agreements.

Table of Contents

Synovus has reviewed investment securities that are in an unrealized loss position as of March 31, 2015 and December 31, 2014 for OTTI and does not consider any securities in an unrealized loss position to be other-than-temporarily impaired. If Synovus intended to sell a security in an unrealized loss position, the entire unrealized loss would be reflected in income. Synovus does not intend to sell investment securities in an unrealized loss position prior to the recovery of the unrealized loss, which may be until maturity, and has the ability and intent to hold those securities for that period of time. Additionally, Synovus is not currently aware of any circumstances which will require it to sell any of the securities that are in an unrealized loss position prior to the respective securities recovery of all such unrealized losses.

Declines in the fair value of available for sale securities below their cost that are deemed to have OTTI are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized in other comprehensive income. Currently, unrealized losses on debt securities are attributable to increases in interest rates on comparable securities from the date of purchase. Synovus regularly evaluates its investment securities portfolio to ensure that there are no conditions that would indicate that unrealized losses represent OTTI. These factors include the length of time the security has been in a loss position, the extent that the fair value is below amortized cost, and the credit standing of the issuer. As of March 31, 2015, Synovus had one investment security in a loss position for less than twelve months and thirty-five investment securities in a loss position for twelve months or longer.

Gross unrealized losses on investment securities and the fair value of the related securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at March 31, 2015 and December 31, 2014, are presented below.

(in thousands)	March 31, 2015

Table of Contents

The amortized cost and fair value by contractual maturity of investment securities available for sale at March 31, 2015 are shown below. The expected life of mortgage-backed securities or CMOs may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. For purposes of the maturity table, mortgage-backed securities and CMOs, which are not due at a single maturity date, have been classified based on the final contractual maturity date.

(in thousands)	Distribution of Maturities at March 31, 2015					Total

Table of Contents

Note 6 - Restructuring Charges

For the three months ended March 31, 2015 and 2014 total restructuring charges consist of the following components:

(in thousands)	Three Months Ended March 31,	
	2015	2014
Severance charges	\$—	8,047
Gain on sale of assets held for sale, net	(157) —
Professional fees and other charges	50	530
Total restructuring charges, net	\$(107) 8,577

For the three months ended March 31, 2015, Synovus recorded net gains of \$157 thousand on the sale of certain branch locations and recorded additional expense of \$50 thousand associated with the 2014 branch closings.

Restructuring charges for the three months ended March 31, 2014 related primarily to expense savings initiatives that were approved during 2014 with an expected completion date of mid-2015. The initiatives include the consolidation or closing of certain branch locations as well as workforce reductions. Severance charges for the three months ended March 31, 2014 consisted of estimated involuntary termination benefits for targeted staff reductions identified during 2014. These termination benefits were provided under an ongoing benefit arrangement as defined in ASC 712, Compensation-Nonretirement Postemployment Benefits; accordingly, the charges were recorded pursuant to the liability recognition criteria of ASC 712. Additionally, substantially all of the professional fees and other charges for the three months ended March 31, 2014 consist of professional fees incurred in connection with an organizational restructuring implemented during 2014.

The following table presents aggregate activity associated with accruals that resulted from restructuring charges during the three months ended March 31, 2015 and 2014:

	Severance Charges	Lease Termination Charges	Total
(in thousands)			
Balance at December 31, 2013	\$1,572	1,383	2,955
Accruals for efficiency initiatives	8,047	—	8,047
Payments	(1,931) (1,289) (3,220
Balance at March 31, 2014	7,688	94	7,782
Balance at December 31, 2014	3,291	5,539	8,830
Payments	(521) (221) (742
Balance at March 31, 2015	\$2,770	5,318	8,088

All professional fees and other charges were paid in the years that they were incurred. No other restructuring charges resulted in payment accruals.

⁽¹⁾Total before net deferred fees and costs of \$29.4 million.

⁽²⁾Total before net deferred fees and costs of \$30.8 million.

Table of Contents

The credit quality of the loan portfolio is summarized no less frequently than quarterly using the standard asset classification system utilized by the federal banking agencies. These classifications are divided into three groups – Not Criticized (Pass), Special Mention, and Classified or Adverse rating (Substandard, Doubtful, and Loss) and are defined as follows:

Pass - loans which are well protected by the current net worth and paying capacity of the obligor (or guarantors, if any) or by the fair value, less cost to acquire and sell in a timely manner, of any underlying collateral.

Special Mention - loans which have potential weaknesses that deserve management's close attention. These loans are not adversely classified and do not expose an institution to sufficient risk to warrant an adverse classification.

Substandard - loans which are inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. Loans with this classification are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful - loans which have all the weaknesses inherent in loans classified as Substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable on the basis of currently known facts, conditions, and values.

Loss - loans which are considered by management to be uncollectible and of such little value that their continuance on the institution's books as an asset, without establishment of a specific valuation allowance or charge-off is not warranted.

In the following tables, retail loans are generally assigned a risk grade similar to the classifications described above; however, upon reaching 90 days and 120 days past due, they are generally downgraded to Substandard and Loss, respectively, in accordance with the FFIEC Uniform Retail Credit Classification and Account Management Policy. Additionally, in accordance with the Interagency Supervisory Guidance on Allowance for Loan and Lease Losses Estimation Practices for Loans and Lines of Credit Secured by Junior Liens on 1-4 Family Residential Properties, the risk grade classifications of retail loans (home equity lines and consumer mortgages) secured by junior liens on 1-4 family residential properties also consider available information on the payment status of the associated senior lien with other financial institutions.

⁽¹⁾ Includes \$170.5 million and \$170.9 million of non-accrual Substandard loans at March 31, 2015 and December 31, 2014, respectively.

⁽²⁾ The loans within this risk grade are on non-accrual status. Commercial loans generally have an allowance for loan losses in accordance with ASC 310, and retail loans generally have an allowance for loan losses equal to 50% of the loan amount.

⁽³⁾ The loans within this risk grade are on non-accrual status and have an allowance for loan losses equal to the full loan amount.

⁽⁴⁾ Represent amounts that were 120 days past due. These credits are downgraded to the Loss category with an allowance for loan losses equal to the full loan amount and are generally charged off upon reaching 181 days past due in accordance with the FFIEC Uniform Retail Credit Classification and Account Management Policy.

⁽⁵⁾Total before net deferred fees and costs of \$29.4 million.

⁽⁶⁾Total before net deferred fees and costs of \$30.8 million.

Table of Contents

The following table details the changes in the allowance for loan losses by loan segment for the three months ended March 31, 2015 and 2014.

Allowance for Loan Losses and Recorded Investment in Loans

Table of Contents

The average recorded investment in impaired loans was \$754.3 million for the three months ended March 31, 2014. Excluding accruing TDRs, there was no interest income recognized for the investment in impaired loans for the three months ended March 31, 2014. Interest income recognized for accruing TDRs was \$4.0 million for the three months ended March 31, 2014 . At March 31, 2015 and December 31, 2014, all impaired loans other than \$313.4 million and \$348.4 million, respectively, of accruing TDRs, were on non-accrual status.

Concessions provided in a TDR are primarily in the form of providing a below market interest rate given the borrower's credit risk, a period of time generally less than one year with a reduction of required principal and/or interest payments (e.g., interest only for a period of time), or extension of the maturity of the loan generally for less than one year. Insignificant periods of reduction of principal and/or interest payments, or one-time deferrals of 3 months or less, are generally not considered to be financial concessions.

Table of Contents

The following tables represent, by concession type, the post-modification balance for loans modified or renewed during the three months ended March 31, 2015 and 2014 that were reported as accruing or non-accruing TDRs.

Total TDRs	2	\$115	2	\$708

* Default is defined as the earlier of the troubled debt restructuring being placed on non-accrual status or reaching 90 days past due with respect to principal and/or interest payments.

If, at the time a loan was designated as a TDR, the loan was not already impaired, the measurement of impairment that resulted from the TDR designation changes from a general pool-level reserve to a specific loan measurement of impairment in accordance with ASC 310-10-35. Generally, the change in the allowance for loan losses resulting from such TDR designation is not significant. At March 31, 2015, the allowance for loan losses allocated to accruing TDRs totaling \$313.4 million was \$17.6 million compared to accruing TDRs of \$348.4 million with an allocated allowance for loan losses of \$21.0 million at December 31, 2014. Non-accrual, non-homogeneous loans (commercial-type impaired loans greater than \$1 million) that are designated as TDRs, are individually measured for the amount of impairment, if any, both before and after the TDR designation.

Table of Contents

Note 8 - Other Real Estate

The carrying value of ORE was \$74.8 million and \$85.5 million at March 31, 2015 and December 31, 2014, respectively. During the three months ended March 31, 2015 and 2014, \$5.4 million and \$12.9 million, respectively, of loans and other loans held for sale were foreclosed and transferred to other real estate at fair value less costs to sell. During the three months ended March 31, 2015 and 2014, Synovus recognized foreclosed real estate expense, net, of \$9.5 million and \$5.7 million, respectively. These expenses included write-downs for declines in fair value of ORE subsequent to the date of foreclosure and net realized losses resulting from sales transactions totaling \$7.3 million and \$4.8 million for the three months ended March 31, 2015 and 2014, respectively.

Table of Contents

Note 9 - Other Comprehensive Income (Loss)

The following table illustrates activity within the balances in accumulated other comprehensive income (loss) by component for the three months ended March 31, 2015 and 2014.

Changes in Accumulated Other Comprehensive Income (Loss) by Component (Net of Income Taxes)

(in thousands)	Net unrealized gains (losses) on cash flow hedges	Net unrealized gains (losses) on investment securities available for sale	Post-retirement unfunded health benefit	Total
Balance as of December 31, 2013	\$(13,099) (28,936) 777	(41,258)

Amounts reclassified from accumulated other comprehensive income (loss)	69	(818) (44) (793)
Net current period other comprehensive income	69	10,770	(44) 10,795
Balance as of March 31, 2014	\$(13,030) (18,166) 733	(30,463)
Balance as of December 31, 2014	\$(12,824) (713) 932	(12,605)
Other comprehensive income before reclassifications	—	9,355	—	9,355
Amounts reclassified from accumulated other comprehensive income (loss)	69	(444) (26) (401)
Net current period other comprehensive income	69	8,911	(26) 8,954
Balance as of March 31, 2015	\$(12,755) 8,198	906	(3,651)

In accordance with ASC 740-20-45-11(b), a deferred tax asset valuation allowance associated with unrealized gains and losses not recognized in income is charged directly to other comprehensive income (loss). During the years 2010 and 2011, Synovus recorded a deferred tax asset valuation allowance associated with unrealized gains and losses not recognized in income directly to other comprehensive income (loss) by applying the portfolio approach for allocation of the valuation allowance. Synovus has consistently applied the portfolio approach which treats derivative financial instruments, equity securities, and debt securities as a single portfolio. As of March 31, 2015, the balance in net unrealized gains (losses) on cash flow hedges and net unrealized gains (losses) on investment securities available for sale includes unrealized losses of \$12.1 million and \$13.3 million, respectively, related to the residual tax effects remaining in OCI due to a previously established deferred tax asset valuation allowance. Under the portfolio approach, these unrealized losses are realized at the time the entire portfolio is sold or disposed.

Table of Contents

The following table illustrates activity within the reclassifications out of accumulated other comprehensive income (loss), for the three months ended March 31, 2015 and 2014.

Reclassifications out of Accumulated Other Comprehensive Income (Loss)

Details About Accumulated Other Comprehensive Income (Loss) Components	Amount Reclassified from Accumulated Other Comprehensive Income (Loss) For the Three Months Ended March 31,		Affected Line Item in the Statement Where Net Income is Presented

Table of Contents

Note 10 - Fair Value Accounting

Synovus carries various assets and liabilities at fair value based on the fair value accounting guidance under ASC 820, Fair Value Measurements, and ASC 825, Financial Instruments. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an "exit price") in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

Fair Value Hierarchy

Synovus determines the fair value of its financial instruments based on the fair value hierarchy established under ASC 820-10, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the financial instrument's fair value measurement in its entirety. There are three levels of inputs that may be used to measure fair value. The three levels of inputs of the valuation hierarchy are defined below:

Level 1 Quoted prices (unadjusted) in active markets for identical assets and liabilities for the instrument or security to be valued. Level 1 assets include marketable equity securities, U.S. Treasury securities, and mutual funds.

Level 2 Observable inputs other than Level 1 quoted prices, such as quoted prices for similar assets and liabilities in active markets, quoted prices in markets that are not active or model-based valuation techniques for which all significant assumptions are derived principally from or corroborated by observable market data. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined by using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. U.S. Government sponsored agency securities, mortgage-backed securities issued by U.S. Government sponsored enterprises and agencies, obligations of states and municipalities, collateralized mortgage obligations issued by U.S. Government sponsored enterprises, and mortgage loans held-for-sale are generally included in this category. Certain private equity investments that invest in publicly traded companies are also considered Level 2 assets.

Level 3 Unobservable inputs that are supported by little, if any, market activity for the asset or liability. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow models and similar techniques, and may also include the use of market prices of assets or liabilities that are not directly comparable to the subject asset or liability. These methods of valuation may result in a significant portion of the fair value being derived from unobservable assumptions that reflect Synovus' own estimates for assumptions that market participants would use in pricing the asset or liability. This category primarily includes collateral-dependent impaired loans, other real estate, certain equity investments, and private equity investments.

See Note 16 "Fair Value Accounting" to the consolidated financial statements of Synovus' 2014 Form 10-K for a description of valuation methodologies for assets and liabilities measured at fair value on a recurring and non-recurring basis.

Table of Contents

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table presents all financial instruments measured at fair value on a recurring basis as of March 31, 2015 and December 31, 2014, according to the valuation hierarchy included in ASC 820-10. For equity and debt securities, class was determined based on the nature and risks of the investments. Transfers between levels for the period ended March 31, 2015 and December 31, 2014 were inconsequential.

⁽¹⁾ Based on an analysis of the nature and risks of these investments, Synovus has determined that presenting these investments as a single asset class is appropriate.

⁽²⁾ Mortgage derivatives consist of customer interest rate lock commitments that relate to the potential origination of mortgage loans, which would be classified as held for sale and forward loan sales commitments with third party

investors.

Table of Contents

Fair Value Option

The following table summarizes the difference between the fair value and the unpaid principal balance of mortgage loans held for sale measured at fair value and the changes in fair value of these loans. Mortgage loans held for sale are initially measured at fair value with subsequent changes in fair value recognized in earnings. Changes in fair value were recorded as a component of mortgage banking income in the consolidated statements of income. An immaterial portion of these changes in fair value was attributable to changes in instrument-specific credit risk.

Changes in Fair Value Included in Net Income

(in thousands)	For the Three Months Ended

Unpaid principal balance	86,995	61,488
Fair value less aggregate unpaid principal balance	\$2,250	1,840

Table of Contents

Changes in Level 3 Fair Value Measurements

As noted above, Synovus uses significant unobservable inputs (Level 3) in determining the fair value of assets and liabilities classified as Level 3 in the fair value hierarchy. The table below includes a roll-forward of the amounts on the consolidated balance sheet for the three months ended March 31, 2015 and 2014 (including the change in fair value), for financial instruments of a material nature that are classified by Synovus within Level 3 of the fair value hierarchy and are measured at fair value on a recurring basis. Transfers between fair value levels are recognized at the end of the reporting period in which the associated changes in inputs occur. During the first three months of 2015 and 2014, Synovus did not have any transfers between levels in the fair value hierarchy.

Assets Measured at Fair Value on a Non-recurring Basis

Certain assets are recorded at fair value on a non-recurring basis. These non-recurring fair value adjustments typically are a result of the application of lower of cost or fair value accounting or a write-down occurring during the period. For example, if the fair value of an asset in these categories falls below its cost basis, it is considered to be at fair value at the end of the period of the adjustment. The following table presents assets measured at fair value on a non-recurring basis as of the dates indicated for which there was a fair value adjustment during the period.

(in thousands)	March 31, 2015				December 31, 2014

* Impaired loans that are collateral-dependent.

Quantitative Information about Level 3 Fair Value Measurements

The tables below provide an overview of the valuation techniques and significant unobservable inputs used in those techniques to measure financial instruments that are classified within Level 3 of the valuation hierarchy. The range of sensitivities that management utilized in its fair value calculations is deemed acceptable in the industry with respect to the identified financial instruments. The tables below present both the total balance as of the dates indicated for assets measured at fair value on a recurring basis and the assets measured at fair value on a non-recurring basis for which there was a fair value adjustment during the period.

Table of Contents

Sensitivity Analysis of Level 3 Unobservable Inputs Measured on a Recurring Basis

Included in the fair value estimates of financial instruments carried at fair value on the consolidated balance sheet are those estimated in full or in part using valuation techniques based on assumptions that are not supported by observable market prices, rates, or other inputs. Unobservable inputs are assessed carefully, considering the current economic environment and market conditions. However, by their very nature, unobservable inputs imply a degree of uncertainty in their determination, because they are supported by little, if any, market activity for the related asset or liability.

Investment Securities Available for Sale

The significant unobservable inputs used in the fair value measurement of the corporate obligations in Level 3 assets are the credit spread embedded in the discount rate and the discount for lack of liquidity. Generally, a change in one or more assumptions, and the degree or sensitivity of the change used, can have a significant impact on fair value. With regard to the trust preferred securities in Level 3 assets, raising the credit spread, and raising the discount for lack of liquidity assumptions will result in a lower fair value measurement.

Private Equity Investments

In the absence of quoted market prices, inherent lack of liquidity, and the long-term nature of private equity investments, significant judgment is required to value these investments. The significant unobservable inputs used in the fair value measurement of private equity investments include current operations, financial condition, and cash flows, comparables and private sales, when available, and recently executed financing transactions related to investee companies. Significant increases or decreases in any of these inputs in isolation would result in a significantly lower or higher fair value measurement.

Visa Derivative Liability

The fair value of the Visa derivative contract is determined based on management's estimate of the timing and amount of the Covered Litigation settlement, and the resulting payments due to the counterparty under the terms of the contract. Significant changes in any of these inputs in isolation could result in a significantly higher (lower) valuation of the Visa derivative liability. Also, additional funding into the escrow generally results in a proportional increase in our derivative liability.

Fair Value of Financial Instruments

The following table presents the carrying and fair values of financial instruments at March 31, 2015 and December 31, 2014. The fair value represents management's best estimates based on a range of methodologies and assumptions. For financial instruments that are not recorded at fair value on the balance sheet, such as loans, interest bearing deposits (including brokered deposits), and long-term debt, the fair value amounts should not be taken as an estimate of the amount that would be realized if all such financial instruments were to be settled immediately.

Table of Contents

The carrying and estimated fair values of financial instruments, as well as the level within the fair value hierarchy, as of March 31, 2015 and December 31, 2014 are as follows:

Note 11 - Derivative Instruments

As part of its overall interest rate risk management activities, Synovus utilizes derivative instruments to manage its exposure to various types of interest rate risk. These derivative instruments generally consist of interest rate swaps, interest rate lock commitments made to prospective mortgage loan customers, and commitments to sell fixed-rate mortgage loans. Interest rate lock commitments represent derivative instruments since it is intended that such loans will be sold.

Synovus may also utilize interest rate swaps to manage interest rate risks primarily arising from its core banking activities. These interest rate swap transactions generally involve the exchange of fixed and floating interest rate payment obligations without the exchange of underlying principal amounts. Swaps may be designated as either cash flow hedges or fair value hedges, as discussed below. As of March 31, 2015 and December 31, 2014, Synovus had no outstanding interest rate swap contracts utilized to manage interest rate risk.

Synovus is party to master netting arrangements with its dealer counterparties; however, Synovus does not offset assets and liabilities under these arrangements for financial statement presentation purposes.

Counterparty Credit Risk and Collateral

Entering into derivative contracts potentially exposes Synovus to the risk of counterparties' failure to fulfill their legal obligations, including, but not limited to, potential amounts due or payable under each derivative contract. Notional principal amounts are often used to express the volume of these transactions, but the amounts potentially subject to credit risk are much smaller. Synovus assesses the credit risk of its dealer counterparties by regularly monitoring publicly available credit rating information and other market indicators. Dealer collateral requirements are determined via risk-based policies and procedures and in accordance with existing agreements. Synovus seeks to minimize dealer credit risk by dealing with highly rated counterparties and by obtaining collateral for exposures above certain predetermined limits. Management closely monitors credit conditions within the customer swap portfolio, which management deems to be of higher risk than dealer counterparties. Collateral is secured at origination and credit related fair value adjustments are recorded against the asset value of the derivative as deemed necessary based upon an analysis, which includes consideration of the current asset value of the swap, customer credit rating, collateral value, and customer standing with regards to its swap contractual obligations and other related matters. Such asset values fluctuate based upon changes in interest rates regardless of changes in notional amounts and changes in customer specific risk.

Cash Flow Hedges

Synovus designates hedges of floating rate loans as cash flow hedges. These swaps hedge against the variability of cash flows from specified pools of floating rate prime based loans. Synovus calculates effectiveness of the hedging relationship quarterly using regression analysis. The effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transactions affect earnings. Ineffectiveness from cash flow hedges is recognized in the consolidated statements of income as a component of other non-interest income. As of March 31, 2015, there were no cash flow hedges outstanding, and therefore, no cumulative ineffectiveness.

Synovus expects to reclassify from accumulated other comprehensive income (loss) \$447 thousand of interest expense during the next twelve months as amortization of deferred losses is recorded.

Synovus did not terminate any cash flow hedges during 2015 or 2014. The remaining unamortized deferred net loss balance of all previously terminated cash flow hedges at March 31, 2015 and December 31, 2014 was \$(1.0) million and \$(1.1) million, respectively.

Fair Value Hedges

Synovus designates hedges of fixed rate liabilities as fair value hedges. These swaps hedge against the change in fair value of various fixed rate liabilities due to changes in the benchmark interest rate, LIBOR. Synovus calculates effectiveness of the fair value hedges quarterly using regression analysis. Ineffectiveness from fair value hedges is recognized in the consolidated statements of income as a component of other non-interest income. As of March 31, 2015, there were no fair value hedges outstanding, and therefore, no cumulative ineffectiveness.

Synovus did not terminate any fair value hedges during 2015 or 2014. The remaining unamortized deferred gain balance on all previously terminated fair value hedges at March 31, 2015 and December 31, 2014 was \$6.8 million

and \$7.6 million, respectively. Synovus expects to reclassify from hedge-related basis adjustment, a component of long-term debt, \$3.1 million of the deferred gain balance on previously terminated fair value hedges as a reduction to interest expense during the next twelve months as amortization of deferred gains is recorded.

Customer Related Derivative Positions

35

Table of Contents

Synovus enters into interest rate swap agreements to facilitate the risk management strategies of a small number of commercial banking customers. Synovus mitigates this risk by entering into equal and offsetting interest rate swap agreements with highly rated third party financial institutions. The interest rate swap agreements are free-standing derivatives and are recorded at fair value on Synovus' consolidated balance sheet. Fair value changes are recorded in non-interest income in Synovus' consolidated statements of income. As of March 31, 2015, the notional amount of customer related interest rate derivative financial instruments, including both the customer position and the offsetting position, was \$1.11 billion, an increase of \$20.6 million compared to December 31, 2014.

Visa Derivative

In conjunction with the sale of Class B shares of common stock issued by Visa to Synovus as a Visa USA member, Synovus entered into a derivative contract with the purchaser, which provides for settlements between the parties based upon a change in the ratio for conversion of Visa Class B shares to Visa Class A shares. The conversion ratio changes when Visa deposits funds to a litigation escrow established by Visa to pay settlements for certain litigation, for which Visa is indemnified by Visa USA members. The litigation escrow is funded by proceeds from Visa's conversion of Class B shares. The fair value of the derivative contract was \$1.4 million at March 31, 2015 and December 31, 2014, respectively. The fair value of the derivative contract is determined based on management's estimate of the timing and amount of the Covered Litigation settlement, and the resulting payments due to the counterparty under the terms of the contract.

Mortgage Derivatives

Synovus originates first lien residential mortgage loans for sale into the secondary market. Mortgage loans are sold by Synovus for conversion to securities and the servicing of these loans is generally sold to a third-party servicing aggregator, or Synovus sells the mortgage loans as whole loans to investors either individually or in bulk on a servicing released basis.

Synovus enters interest rate lock commitments for residential mortgage loans which commits it to lend funds to a potential borrower at a specific interest rate and within a specified period of time. Interest rate lock commitments that relate to the origination of mortgage loans that, if originated, will be held for sale, are considered derivative financial instruments under applicable accounting guidance. Outstanding interest rate lock commitments expose Synovus to the risk that the price of the mortgage loans underlying the commitments may decline due to increases in mortgage interest rates from inception of the rate lock to the funding of the loan.

At March 31, 2015 and December 31, 2014, Synovus had commitments to fund at a locked interest rate, primarily fixed-rate mortgage loans to customers in the amount of \$125.5 million and \$73.4 million, respectively. The fair value of these commitments resulted in a gain of \$1.1 million and \$649 thousand for the three months ended March 31, 2015 and 2014, respectively, which was recorded as a component of mortgage banking income in the consolidated statements of income.

At March 31, 2015 and December 31, 2014, outstanding commitments to sell primarily fixed-rate mortgage loans amounted to \$170.5 million and \$113.0 million, respectively. Such commitments are entered into to reduce the exposure to market risk arising from potential changes in interest rates, which could affect the fair value of mortgage loans held for sale and outstanding rate lock commitments, which guarantee a certain interest rate if the loan is ultimately funded or granted by Synovus as a mortgage loan held for sale. The commitments to sell mortgage loans are at fixed prices and are scheduled to settle at specified dates that generally do not exceed 90 days. The fair value of outstanding commitments to sell mortgage loans resulted in a gain of \$5 thousand and a loss of \$(969) thousand for the three months ended March 31, 2015 and 2014, respectively, which was recorded as a component of mortgage banking income in the consolidated statements of income.

Collateral Contingencies

Certain derivative instruments contain provisions that require Synovus to maintain an investment grade credit rating from each of the major credit rating agencies. When Synovus' credit rating falls below investment grade, these provisions allow the counterparties of the derivative instrument to demand immediate and ongoing full collateralization on derivative instruments in net liability positions and, for certain counterparties, request immediate termination. As Synovus' current rating is below investment grade, Synovus is required to post collateral, as required by each agreement, against these positions. Additionally, as of June 10, 2013, the CCC became mandatory for certain

trades as required under the Dodd-Frank Act. These derivative transactions also carry collateral requirements, both at the inception of the trade, and as the value of each derivative position changes. As trades are migrated to the CCC, dealer counterparty exposure will be reduced, and higher notional amounts of Synovus' derivative instruments will be housed at the CCC, a highly regulated and well-capitalized entity. As of March 31, 2015, collateral totaling \$67.5 million consisting of Federal funds sold was pledged to the derivative counterparties, including \$7.6 million with the CCC, to comply with collateral requirements.

Table of Contents

The impact of derivative instruments on the consolidated balance sheets at March 31, 2015 and December 31, 2014 is presented below.

(in thousands)	Fair Value of Derivative Assets			Fair Value of Derivative Liabilities		
	Location on Consolidated Balance Sheet	March 31, 2015	December 31, 2014	Location on Consolidated Balance Sheet	March 31, 2015	December 31, 2014
Derivatives not designated as hedging instruments:						
Interest rate contracts	Other assets	\$33,183	30,904	Other liabilities	\$33,856	31,398
Mortgage derivatives	Other assets	2,311	1,213	Other liabilities	749	753
Visa derivative		—	—	Other liabilities	1,425	1,401
Total derivatives not designated as hedging instruments		\$35,494	32,117		\$36,030	33,552

The pre-tax effect of fair value hedges on the consolidated statements of income for the three months ended March 31, 2015 and 2014 is presented below.

(in thousands)	Location of Gain (Loss) Recognized in Income	Gain (Loss) Recognized in Income	
		Three Months Ended March 31, 2015	2014
Derivatives not designated as hedging instruments			
Interest rate contracts ⁽¹⁾	Other non-interest income	\$(179)) 104
Mortgage derivatives ⁽²⁾	Mortgage banking income	1,102	(320)
Total		\$923	(216)

⁽¹⁾ Gain (loss) represents net fair value adjustments (including credit related adjustments) for customer swaps and offsetting positions.

⁽²⁾ Gain (loss) represents net fair value adjustments recorded for interest rate lock commitments and commitments to sell mortgage loans to third party investors.

During the three months ended March 31, 2015 and 2014, Synovus reclassified \$774 thousand and \$914 thousand, respectively, from hedge-related basis adjustment, a component of long-term debt, as a reduction to interest expense. These deferred gains relate to hedging relationships that have been previously terminated and are reclassified into earnings over the remaining life of the hedged items.

Table of Contents

Note 12 - Net Income Per Common Share

The following table displays a reconciliation of the information used in calculating basic and diluted earnings per common share for the three months ended March 31, 2015 and 2014.

(in thousands, except per share data)	Three Months Ended March	
	2015	2014
Basic Net Income Per Common Share:		
Net income available to common shareholders	\$51,404	45,857
Weighted average common shares outstanding	134,933	138,932
Net income per common share, basic	0.38	0.33
Diluted Net Income Per Common Share:		
Net income available to common shareholders	51,404	45,857
Weighted average common shares outstanding	134,933	138,932
Potentially dilutive shares from assumed exercise of securities or other contracts to purchase common stock	811	572
Weighted average diluted common shares	135,744	139,504
Net income per common share, diluted	0.38	0.33

A reverse stock split became effective on May 16, 2014, and Synovus' shares of common stock began trading on a post-split basis on the NYSE at the opening of trading on May 19, 2014. Share and per share amounts for prior periods included in this Report have been adjusted to reflect the one-for-seven reverse stock split.

Basic net income per common share is computed by dividing net income by the average common shares outstanding for the period. Diluted net income per common share reflects the dilution that could occur if securities or other contracts to issue common stock were exercised or converted. The dilutive effect of outstanding options and restricted share units is reflected in diluted net income per common share, unless the impact is anti-dilutive, by application of the treasury stock method.

As of March 31, 2015 and 2014, there were 3.1 million and 3.5 million, respectively, potentially dilutive shares related to common stock options and Warrants to purchase shares of common stock that were outstanding during 2015 and 2014, but were not included in the computation of diluted net income per common share because the effect would have been anti-dilutive.

Note 13 - Share-based Compensation

General Description of Share-based Plans

Synovus has a long-term incentive plan under which the Compensation Committee of the Board of Directors has the authority to grant share-based awards to Synovus employees. At March 31, 2015, Synovus had a total of 6,696,079 shares of its authorized but unissued common stock reserved for future grants under the 2013 Omnibus Plan. The 2013 Omnibus Plan authorizes 8,571,429 common share equivalents available for grant, where grants of options count as one share equivalent and grants of full value awards (e.g., restricted share units, market restricted share units, and performance share units) count as two share equivalents. Any restricted share units that are forfeited and options that expire unexercised will again become available for issuance under the Plan. The Plan permits grants of share-based compensation including stock options, restricted share units, market restricted share units, and performance share units. The grants generally include vesting periods ranging from three to five years and contractual terms of ten years. Stock options are granted at exercise prices which equal the fair value of a share of common stock on the grant-date. Synovus has historically issued new shares to satisfy share option exercises and share unit conversions. Dividend equivalents are paid on outstanding restricted share units, market restricted share units, and performance share units in the form of additional restricted share units that vest over the same vesting period or the vesting period left on the original restricted share unit grant.

Share-based Compensation Expense

Share-based compensation costs associated with employee grants are recorded as a component of salaries and other personnel expense in the consolidated statements of income. Share-based compensation costs associated with grants made to non-employee directors of Synovus are recorded as a component of other operating expenses. Total share-based compensation expense was \$3.2 million for the three months ended March 31, 2015 and \$2.2 million for the three months ended March 31, 2014.

Table of Contents

Stock Options

No stock option grants were made during the three months ended March 31, 2015. At March 31, 2015, there were 2,361,598 outstanding options to purchase shares of common stock with a weighted average exercise price of \$45.13.

Restricted Share Units, Performance Share Units, and Market Restricted Share Units

During the three months ended March 31, 2015, Synovus awarded 291,754 restricted share units that have a service-based vesting period of three years and awarded 82,152 performance share units that vest upon service conditions and performance conditions. Synovus also granted 82,152 market restricted share units during the three months ended March 31, 2015. The weighted average grant-date fair value of the awarded restricted share units, performance share units and market restricted share units was \$28.30 per share. Market restricted share units and performance share units are granted at target and are compared annually to required market and performance metrics. The performance share units vest upon meeting certain service and performance conditions. Return on average assets (ROAA) performance will be evaluated each year over a three-year performance period, with share distribution determined at the end of the three years. The number of performance share units that will ultimately vest ranges from 0% to 150% of target based on Synovus' three-year weighted average ROAA (as defined). The market restricted share units have a three-year service-based vesting component as well as a total shareholder return multiplier. The number of market restricted share units that will ultimately vest ranges from 75% to 125% of target based on Synovus' total shareholder return (TSR). At March 31, 2015, including dividend equivalents granted, there were 1,099,065 restricted share units, performance share units and market restricted share units outstanding with a weighted average grant-date fair value of \$24.80.

Note 14 - Legal Proceedings

Synovus and its subsidiaries are subject to various legal proceedings and claims that arise in the ordinary course of its business. Additionally, in the ordinary course of business, Synovus and its subsidiaries are subject to regulatory examinations, information gathering requests, inquiries and investigations. Synovus, like many other financial institutions, has been the target of numerous legal actions and other proceedings asserting claims for damages and related relief for losses resulting from the recent financial crisis. These actions include claims and counterclaims asserted by individual borrowers related to their loans and allegations of violations of state and federal laws and regulations relating to banking practices, including several purported putative class action matters. In addition to actual damages if Synovus does not prevail in such asserted legal action, credit-related litigation could result in additional write-downs or charge-offs of assets, which could adversely affect Synovus' results of operations during the period in which the write-down or charge-off occurred.

Synovus carefully examines and considers each legal matter, and, in those situations where Synovus determines that a particular legal matter presents loss contingencies that are both probable and reasonably estimable, Synovus establishes an appropriate accrual. An event is considered to be probable if the future event is likely to occur. While the final outcome of any legal proceeding is inherently uncertain, based on the information currently available, advice of counsel and available insurance coverage, management believes that the amounts accrued with respect to legal matters as of March 31, 2015 are adequate. The actual costs of resolving legal claims may be higher or lower than the amounts accrued.

In addition, where Synovus determines that there is a reasonable possibility of a loss in respect of legal matters, including those legal matters described below, Synovus considers whether it is able to estimate the total reasonably possible loss or range of loss. An event is "reasonably possible" if "the chance of the future event or events occurring is more than remote but less than likely." An event is "remote" if "the chance of the future event occurring is more than slight but less than reasonably possible." In many situations, Synovus may be unable to estimate reasonably possible losses due to the preliminary nature of the legal matters, as well as a variety of other factors and uncertainties. For those legal matters where Synovus is able to estimate a range of reasonably possible losses, management currently estimates the aggregate range from our outstanding litigation, including, without limitation, the matters described below, is from zero to \$15 million in excess of the amounts accrued, if any, related to those matters. This estimated aggregate range is based upon information currently available to Synovus, and the actual losses could prove to be higher. As there are further developments in these legal matters, Synovus will reassess these matters, and the estimated range of reasonably possible losses may change as a result of this assessment. Based on Synovus' current

knowledge and advice of counsel, management presently does not believe that the liabilities arising from these legal matters will have a material adverse effect on Synovus' consolidated financial condition, results of operations or cash flows. However, it is possible that the ultimate resolution of these legal matters could have a material adverse effect on Synovus' results of operations for any particular period.

Synovus intends to vigorously pursue all available defenses to these legal matters, but will also consider other alternatives, including settlement, in situations where there is an opportunity to resolve such legal matters on terms that Synovus considers to be favorable, including in light of the continued expense and distraction of defending such legal matters. Synovus also maintains insurance coverage, which may (or may not) be available to cover legal fees, or potential losses that might be incurred in connection with the legal matters described below. The above-noted estimated range of reasonably possible losses does not take into consideration insurance coverage which may or may not be available for the respective legal matters.

Posting Order Litigation

Table of Contents

On September 21, 2010, Synovus, Synovus Bank and CB&T were named as defendants in a putative multi-state class action relating to the manner in which Synovus Bank charges overdraft fees to customers. The case, Childs et al. v. Columbus Bank and Trust et al., was filed in the Northern District of Georgia, Atlanta Division, and asserts claims for breach of contract and breach of the covenant of good faith and fair dealing, unconscionability, conversion and unjust enrichment for alleged injuries suffered by plaintiffs as a result of Synovus Bank's assessment of overdraft charges in connection with its POS/debit and automated-teller machine cards allegedly resulting from the sequence used to post payments to the plaintiffs' accounts. On October 25, 2010, the Childs case was transferred to a multi-district proceeding in the Southern District of Florida. In Re: Checking Account Overdraft Litigation, MDL No. 2036. Plaintiffs amended their complaint on October 21, 2011. The Synovus entities filed a motion to dismiss the amended complaint on November 22, 2011. On July 26, 2012, the court denied the motion as to Synovus and Synovus Bank, but granted the motion as to CB&T. Synovus and Synovus Bank filed their answer to the amended complaint on September 24, 2012.

On August 23, 2014, Synovus reached a settlement in principle with plaintiffs' counsel to settle the Posting Order Litigation. Under the settlement in principle, Synovus shall cause to be paid \$3.75 million plus payment of \$150,000 in settlement expenses (the "Posting Order Settlement Payment") in exchange for broad releases, dismissal with prejudice of the Posting Order Litigation and other material and customary terms and conditions. The District Court granted final approval of the Posting Order Settlement Payment on April 2, 2015.

TelexFree Litigation

On October 22, 2014, several pending lawsuits were consolidated into a multi-district putative class action case captioned In re: TelexFree Securities Litigation, MDL Number 4:14-md2566-TSH, United States District Court District of Massachusetts. Synovus Financial Corp. and Synovus Bank were named as defendants with numerous other defendants in the purported class action lawsuit. An Amended Complaint was filed on March 31, 2015 which consolidated and amended the claims previously asserted. The claims against Synovus Financial Corp. were dismissed by Plaintiffs on April 10, 2015 so now, as to Synovus-related entities, only claims against Synovus Bank remain pending. TelexFree was a merchant customer of Base Commerce, LLC "Base Commerce", an independent sales organization/member service provider sponsored by Synovus Bank. The purported class action lawsuit generally alleges that TelexFree engaged in an improper multi-tier marketing scheme involving voice-over Internet protocol telephone services and that the various defendants, including Synovus Bank, provided financial services to TelexFree that allowed TelexFree to conduct its business operations.

Synovus Bank believes it has substantial defenses related to these purported claims and intends to vigorously defend the claims asserted. Synovus currently cannot reasonably estimate losses attributable to this matter.

ITEM 2. – MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In this Report, the words “Synovus,” “the Company,” “we,” “us,” and “our” refer to Synovus Financial Corp. together with Synovus Bank and Synovus' other wholly-owned subsidiaries, except where the context requires otherwise.

FORWARD-LOOKING STATEMENTS

Certain statements made or incorporated by reference in this Report which are not statements of historical fact including those under "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this Report, constitute forward-looking statements within the meaning of, and subject to the protections of, Section 27A of the Securities Act, and Section 21E of the Exchange Act. Forward-looking statements include statements with respect to Synovus' beliefs, plans, objectives, goals, targets, expectations, anticipations, assumptions, estimates, intentions and future performance and involve known and unknown risks, many of which are beyond Synovus' control and which may cause Synovus' actual results, performance or achievements or the commercial banking industry or economy generally, to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements.

All statements other than statements of historical fact are forward-looking statements. You can identify these forward-looking statements through Synovus' use of words such as “believes,” “anticipates,” “expects,” “may,” “will,” “assume,” “predicts,” “could,” “should,” “would,” “intends,” “targets,” “estimates,” “projects,” “plans,” “potential” and other similar words or expressions of the future or otherwise regarding the outlook for Synovus' future business and financial performance

and/or the performance of the commercial banking industry and economy in general. Forward-looking statements are based on the current beliefs and expectations of Synovus' management and are subject to significant risks and uncertainties. Actual results may differ materially from those contemplated by such forward-looking statements. A number of factors could cause actual results to differ materially from those contemplated by the forward-looking statements in this document. Many of these factors are beyond Synovus' ability to control or predict. These factors include, but are not limited to:

- (1) the risk that competition in the financial services industry may adversely affect our future earnings and growth;
- (2) the risk that we may not realize the expected benefits from our efficiency and growth initiatives, which will negatively affect our future profitability;
- (3) the risk that we may be required to make substantial expenditures to keep pace with the rapid technological changes in the financial services market;
- (4) the risk that our enterprise risk management framework may not identify or address risks adequately, which may result in unexpected losses;
- (5) the risk that our allowance for loan losses may prove to be inadequate or may be negatively affected by credit risk exposures;
- (6) the risk that any future economic downturn could have a material adverse effect on our capital, financial condition, results of operations and future growth;
- (7) the risk that we could realize additional losses if our levels of non-performing assets increase and/or if we determine to sell certain non-performing assets and the proceeds we receive are lower than the carrying value of such assets;
- (8) changes in the interest rate environment and competition in our primary market area may result in increased funding costs or reduced earning assets yields, thus reducing margins and net interest income;
- (9) the risk that if we pursue acquisitions in the future as part of our growth strategy, we may not be able to complete such acquisitions or successfully integrate bank or nonbank acquisitions into our existing operations;

Table of Contents

- (10) risks related to a failure in or breach of our operational or security systems of our infrastructure, or those of our third-party vendors and other service providers, including as a result of cyber attacks, which could disrupt our businesses, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs or cause losses;
- (11) risks related to our reliance on third parties to provide key components of our business infrastructure, including the costs of services and products provided to us by third parties, and risks related to disruptions in service or financial difficulties of a third-party vendor;
- (12) the impact on our financial results, reputation, and business if we are unable to comply with all applicable federal and state regulations, or other supervisory actions or directives and any necessary capital initiatives; the impact of recent and proposed changes in governmental policy, laws and regulations, including proposed and recently enacted changes in the regulation of banks and financial institutions, or the interpretation or application thereof, including restrictions, increased capital requirements, limitations and/or penalties arising from banking, securities and insurance laws, enhanced regulations and examinations and restrictions on compensation;
- (13) the risks that if economic conditions worsen or regulatory capital rules are modified, or the results of mandated “stress testing” do not satisfy certain criteria, we may be required to undertake additional strategic initiatives to improve our capital position;
- (14) changes in the cost and availability of funding due to changes in the deposit market and credit market, or the way in which we are perceived in such markets, including a downgrade in our credit ratings;
- (15) the impact on our borrowing costs, capital costs and our liquidity due to our status as a non-investment grade issuer;
- (16) restrictions or limitations on access to funds from historical and alternative sources of liquidity could adversely affect our overall liquidity, which could restrict our ability to make payments on our obligations and our ability to support asset growth and sustain our operations and the operations of Synovus Bank;
- (17) the risk that we may be unable to pay dividends on our common stock or Series C Preferred Stock or obtain any applicable regulatory approval to take certain capital actions, including any increases in dividends on our common stock, any repurchases of common stock (including repurchases under the current share repurchase program) or any other issuance or redemption of any other regulatory capital instruments;
- (18) our ability to receive dividends from our subsidiaries could affect our liquidity, including our ability to pay dividends or take other capital actions (including repurchases under the current share repurchase program);
- (19) the risk that for our deferred tax assets, we may be required to increase the valuation allowance in future periods, or we may not be able to realize all of the deferred tax assets in the future;
- (20) the risk that we could have an “ownership change” under Section 382 of the IRC, which could impair our ability to timely and fully utilize our net operating losses and built-in losses that may exist when such “ownership change” occurs;
- (21) risks related to recent and proposed changes in the mortgage banking industry, including the risk that we may be required to repurchase mortgage loans sold to third parties and the impact of the “ability to pay” and “qualified mortgage” rules on our loan origination process and foreclosure proceedings;
- (22) the costs and effects of litigation, investigations, inquiries or similar matters, or adverse facts and developments related thereto;
- (23) risks related to the fluctuation in our stock price;
- (24) the effects of any damages to Synovus' reputation resulting from developments related to any of the items identified above; and
- (25)

other factors and other information contained in this Report, other reports and filings that we make with the
(26) SEC under the Exchange Act, including, without limitation, those found in “Part I-Item 1A. Risk Factors” of Synovus' 2014 Form 10-K.

For a discussion of these and other risks that may cause actual results to differ from expectations, refer to “Part I-Item 1A. Risk Factors” and other information contained in Synovus' 2014 Form 10-K and our other periodic filings, including quarterly reports on Form 10-Q and current reports on Form 8-K, that we file from time to time with the SEC. All written or oral forward-

Table of Contents

looking statements that are made by or are attributable to Synovus are expressly qualified by this cautionary notice. You should not place undue reliance on any forward-looking statements since those statements speak only as of the date on which the statements are made. Synovus undertakes no obligation to update any forward-looking information and statements, whether written or oral, to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of new information or unanticipated events, except as may otherwise be required by law.

INTRODUCTION AND CORPORATE PROFILE

Synovus Financial Corp. is a financial services company and a registered bank holding company headquartered in Columbus, Georgia. We provide integrated financial services including commercial and retail banking, financial management, insurance and mortgage services to our customers through 28 locally-branded banking divisions of our wholly-owned subsidiary bank, Synovus Bank, and other offices in Georgia, Alabama, South Carolina, Florida and Tennessee.

The following financial review summarizes the significant trends affecting Synovus' results of operations and financial condition for the three months ended March 31, 2015 and 2014. This discussion supplements, and should be read in conjunction with, the unaudited interim consolidated financial statements and notes thereto contained elsewhere in this Report and the consolidated financial statements of Synovus, the notes thereto, and management's discussion and analysis contained in Synovus' 2014 Form 10-K.

Management's Discussion and Analysis of Financial Condition and Results of Operations consist of:

Discussion of Results of Operations - Reviews Synovus' financial performance, as well as selected balance sheet items, items from the statements of income, and certain key ratios that illustrate Synovus' performance.

Credit Quality, Capital Resources and Liquidity - Discusses credit quality, market risk, capital resources, and liquidity, as well as performance trends. It also includes a discussion of liquidity policies, how Synovus obtains funding, and related performance.

Additional Disclosures - provides comments on additional important matters including other contingencies, critical accounting policies and non-GAAP financial measures used within this Report. A reading of each section is important to understand fully the nature of our financial performance.

Results for the Three Months Ended March 31, 2015

For the three months ended March 31, 2015, net income available to common shareholders was \$51.4 million, or \$0.38 per diluted common share, compared to net income available to common shareholders of \$50.6 million, or \$0.37 per diluted common share for the three months ended December 31, 2014, and net income available to common shareholders of \$45.9 million or \$0.33 per diluted common share for the three months ended March 31, 2014.

Table of Contents

Results for the three months ended March 31, 2015 reflect continued broad-based improvement in credit quality as the NPL ratio declined to 0.92% at March 31, 2015 from 0.94% at December 31, 2014 and 1.91% a year ago.

Additionally, other real estate balances declined \$10.7 million, or 12.5%, and \$36.0 million, or 32.5%, compared to December 31, 2014, and March 31, 2014, respectively. Credit costs totaled \$15.7 million for the three months ended March 31, 2015, compared to \$16.4 million for the three months ended December 31, 2014, and \$17.6 million for the three months ended March 31, 2014. Net charge-offs for the three months ended March 31, 2015 totaled \$12.3 million, or 0.23% of average loans annualized, down \$3.9 million from \$16.3 million in the fourth quarter of 2014 and down \$2.8 million from \$15.2 million in the first quarter of 2014. Total non-performing assets were \$270.1 million at March 31, 2015, down \$16.7 million, or 5.8%, from the previous quarter, and down \$228.1 million, or 45.8%, from the first quarter of 2014.

Adjusted pre-tax, pre-credit costs income (which excludes provision for loan losses, other credit costs, restructuring charges, securities gains and losses, gain on the Memphis transaction, and certain other items) was \$101.0 million for the first quarter of 2015, an increase of \$1.4 million from \$99.6 million for the previous quarter and an increase of \$4.5 million, or 4.7%, as compared to the first quarter of 2014. The sequential quarter increase of \$1.4 million in adjusted pre-tax, pre-credit costs income was primarily due to a decline in adjusted non-interest expense of \$5.0 million and an increase in adjusted non-interest income of \$580 thousand partially offset by the impact of two fewer calendar days with a decline in net-interest income of \$4.2 million. Compared to the three months ended March 31, 2014, adjusted pre-tax, pre-credit costs income grew \$4.5 million primarily from an increase in net interest income of \$2.7 million with year-over-year average loan growth of \$1.03 billion or 5.1% and an increase of \$2.1 million in adjusted non-interest income. See reconciliation of "Non-GAAP Financial Measures" in this Report.

The net interest margin declined six basis points to 3.28% compared to 3.34% in the previous quarter and was eleven basis points below the first quarter of 2014 net interest margin of 3.39%. The yield on earning assets was 3.73%, a decline of five basis points from the fourth quarter of 2014, and the effective cost of funds increased one basis point to 0.45%. Compared to the first quarter of 2014, the yield on earning assets declined thirteen basis points from 3.86% and the effective cost of funds declined two basis points from 0.47%.

At March 31, 2015, total loans outstanding were \$21.11 billion, a sequential quarter increase of \$8.5 million and a year-over-year increase of \$947.2 million, or 4.7%. Total average loans grew \$254.1 million or 4.9% annualized from the previous quarter and \$1.03 billion or 5.1% as compared to the first quarter of 2014.

At March 31, 2015, total deposits were \$22.11 billion and total average deposits were \$21.62 billion, with total average deposits up \$279.0 million or 5.3% annualized from the previous quarter. Average core deposits ended the quarter at \$20.02 billion, up \$286.6 million, or 5.9%, compared to the fourth quarter of 2014. Average core deposits excluding average state, county, and municipal (SCM) deposits grew \$247.1 million, or 5.7% annualized, over the fourth quarter of 2014 and \$670.7 million, or 3.9%, over the first quarter of 2014. See reconciliation of "Non-GAAP Financial Measures" in this Report.

Synovus continued to return capital to shareholders during the quarter, acquiring an additional \$59.1 million of common stock. Since October 2014 through March 31, 2015, Synovus has repurchased \$147.2 million of common stock. Additionally, during the first quarter of 2015, Synovus declared a quarterly common stock dividend of \$0.10 per share, representing a 43% increase from the dividend declared during the first quarter of 2014. Total shareholders' equity was \$3.03 billion at March 31, 2015, compared to \$3.04 billion at December 31, 2014, and \$3.00 billion at March 31, 2014.

Changes in Financial Condition

During the three months ended March 31, 2015, total assets increased \$582.6 million from \$27.05 billion at December 31, 2014 to \$27.63 billion. The principal component of this increase was an increase of \$542.5 million in interest bearing funds with the Federal Reserve Bank. An increase of \$576.2 million in deposits drove the increase in interest bearing funds at the Federal Reserve Bank.

⁽¹⁾ Percentage changes are annualized

At March 31, 2015, total loans were \$21.11 billion, an increase of \$947.2 million or 4.7% compared to March 31, 2014, driven by balanced growth across the entire loan portfolio. Annual loan growth for 2015 is currently expected to be in the mid single-digits.

Commercial Loans

Total commercial loans (which are comprised of C&I and CRE loans) at March 31, 2015 were \$17.21 billion or 81.5% of the total loan portfolio compared to \$17.19 billion, or 81.4%, at December 31, 2014 and \$16.55 billion, or 82.0%, at March 31, 2014.

At both March 31, 2015 and December 31, 2014, Synovus had 25 commercial loan relationships with total commitments of \$50 million or more (including amounts funded). The average funded balance of these relationships at both March 31, 2015 and December 31, 2014 was approximately \$36 million.

Commercial and Industrial Loans

The C&I portfolio represents the largest category of Synovus' total loan portfolio and is currently concentrated on small to middle market commercial and industrial lending dispersed throughout a diverse group of industries in the Southeast, including health care and social assistance, manufacturing, retail trade, real-estate related industries, wholesale trade, and finance and insurance as shown in the following table (aggregated by NAICS code). Loans in the health care and social assistance industry have grown approximately \$62 million or 13.4% annualized from December 31, 2014, as specialized lending units continue to build relationships in senior housing, medical office lending, and other health care related areas. The portfolio is relationship focused and, as a result, Synovus' lenders have in-depth knowledge of the borrowers, most of which have guaranty arrangements. C&I loans are primarily originated through Synovus' local market banking divisions and made to commercial customers primarily to finance capital expenditures, including real property, plant and equipment, or as a source of working capital. In accordance with Synovus' uniform lending policy, each loan undergoes a detailed underwriting process which incorporates uniform underwriting standards and oversight in proportion to the size and complexity of the lending relationship.

Approximately 92% of Synovus' C&I loans are secured by real estate, business equipment, inventory, and other types of collateral.

Total C&I loans at March 31, 2015 were \$10.31 billion, or 48.8% of the total loan portfolio compared to \$10.27 billion, or 48.6% of the total loan portfolio at December 31, 2014 and \$9.96 billion, or 49.4% of the total loan portfolio at March 31, 2014. C&I loans grew \$33.8 million or 1.3% annualized from December 31, 2014, driven primarily by increases in specialty units such as senior housing and equipment finance.

(1) Loan balance in each category expressed as a percentage of total commercial and industrial loans.

Synovus has actively invested in additional expertise, product offerings, and product quality to provide its C&I clients with increased and enhanced product offerings and customer service. Complementing this investment in C&I, management continues to focus on streamlining and enhancing Synovus' existing product lines, especially for traditional retail, small business, and professional services customers.

The Corporate Banking Group provides lending solutions to larger corporate clients and includes specialty units such as syndications, senior housing, and equipment finance. These units partner with Synovus' local bankers to build relationships across the five-state footprint, as well as the southeastern and southwestern United States. To date, loan syndications consist primarily of loans where Synovus is participating in the credit (versus being the lead bank). Senior housing loans are typically extended to borrowers in the assisted living, independent living, or memory care facilities sectors. The equipment finance group originates loans to small, middle, and large commercial banking customers, and the formation of this group has further strengthened the equipment financing line of business and signals Synovus' continued commitment to offer a broad range of expertise, products, and services to commercial customers. The Corporate Banking Group also originates direct loans to well-capitalized public companies and larger private companies that operate in the five-state footprint as well as other states in the Southeast.

At March 31, 2015, \$6.22 billion of C&I loans, or 29.4% of the total loan portfolio, represented loans originated for the purpose of financing commercial, financial, and agricultural business activities. The primary source of repayment on these loans is revenue generated from products or services offered by the business or organization. The secondary source of repayment is the collateral, which consists primarily of equipment, inventory, accounts receivable, time deposits, and other business assets.

At March 31, 2015, \$4.09 billion of C&I loans, or 19.4% of the total loan portfolio, represented loans originated for the purpose of financing owner-occupied properties. The primary source of repayment on these loans is revenue generated from products or services offered by the business or organization. The secondary source of repayment on these loans is the real estate. These loans are predominately secured by owner-occupied properties and other real estate, and to a lesser extent, other types of collateral.

Commercial Real Estate Loans

CRE loans consist of investment properties loans, 1-4 family properties loans, and land acquisition loans. CRE loans are primarily originated through Synovus' local market banking divisions. These loans are subject to the same uniform lending policies referenced above. Total CRE loans, which represent 32.7% of the total loan portfolio at March 31, 2015, were \$6.91 billion compared to \$6.92 billion or 32.8% of the total loan portfolio at December 31, 2014 and \$6.59 billion or 32.6% of the total loan portfolio at March 31, 2014. CRE loans declined \$13.2 million or 0.8% annualized from December 31, 2014, primarily as a result of planned reductions in land acquisition and 1-4 family properties loans. CRE loans increased \$319.8 million or 4.9% from March 31, 2014 primarily as a result of growth in investment properties loans being partially offset by planned reductions in land acquisition and 1-4 family properties loans.

Table of Contents

Investment Properties Loans

Total investment properties loans as of March 31, 2015 were \$5.22 billion, or 75.6% of the total CRE portfolio and 24.8% of the total loan portfolio, compared to \$5.21 billion or 75.3% of the total CRE portfolio, and 24.7% of the total loan portfolio at December 31, 2014. Investment properties loans consist of construction and mortgage loans for income producing properties and are primarily made to finance multi-family properties, hotels, office buildings, shopping centers, warehouses, and other commercial development properties. Synovus' investment properties portfolio is well diversified with no concentration by property type, geography (other than the fact that most of these loans are in Synovus' primary market areas of Georgia, Alabama, Tennessee, South Carolina, and Florida), or tenants. These loans have been underwritten with stressed interest rates and vacancies with short-term maturities (three years or less) allowing for restructuring opportunities that reduce Synovus' overall risk exposure. The investment properties loans are primarily secured by the property being financed by the loans; however, these loans may also be secured by real estate or other assets beyond the property being financed.

1-4 Family Properties Loans

At March 31, 2015, 1-4 family properties loans totaled \$1.12 billion, or 16.3% of the total CRE portfolio and 5.3% of the total loan portfolio, compared to \$1.13 billion, or 16.4% of the total CRE portfolio and 5.4% of the total loan portfolio at December 31, 2014. 1-4 family properties loans include construction loans to homebuilders, commercial mortgage loans to real estate investors, and residential development loans to developers and are almost always secured by the underlying property being financed by such loans. These properties are primarily located in the markets served by Synovus. Underwriting standards for these types of loans include stricter approval requirements as well as more stringent underwriting standards than current regulatory guidelines. Construction and residential development loans are generally interest-only loans and typically have maturities of three years or less, and 1-4 family rental properties generally have maturities of three to five years, with amortization periods of up to fifteen to twenty years.

Land Acquisition Loans

Total land acquisition loans were \$559.3 million at March 31, 2015, or 2.6% of the total loan portfolio, a decline of \$16.3 million or 11.5% annualized from December 31, 2014. Land acquisition loans are secured by land held for future development, typically in excess of one year. These loans have short-term maturities and are typically unamortized. Land securing these loans is substantially within the Synovus footprint, and loan terms generally include personal guarantees from the principals. Loans in this portfolio are underwritten based on the loan to value of the collateral and the capacity of the guarantor(s). Generally, the maximum loan-to-value at the time of origination or refinancing is aligned with regulatory requirements. Synovus has continued to reduce its exposure to these types of loans.

Retail Loans

Retail loans at March 31, 2015 totaled \$3.92 billion, representing 18.5% of the total loan portfolio compared to \$3.93 billion, or 18.6% of the total loan portfolio at December 31, 2014 and \$3.64 billion or 18.0% of the total loan portfolio at March 31, 2014.

The retail loan portfolio consists of a wide variety of loan products offered through Synovus' banking network, including first and second residential mortgages, home equity lines, credit card loans, automobile loans, and other retail loans. The majority of Synovus' retail loans are consumer mortgages and home equity lines secured by first and second liens on residential real estate primarily located in the markets served by Synovus in Georgia, Florida, South Carolina, Alabama, and Tennessee. Substantially all retail loans are to in-market borrowers with no indirect lending products, which increases opportunities for cross-selling. Credit card loans totaled \$242.3 million at March 31, 2015, including \$58.2 million of commercial credit card loans. The commercial credit card loans relate to Synovus' commercial customers who utilize corporate credit cards for various business activities.

Retail loans are subject to uniform lending policies and consist primarily of loans with strong borrower credit scores (most recently measured as of December 31, 2014). At December 31, 2014, weighted-average FICO scores within the residential real estate portfolio were 772 for HELOCs and 735 for consumer mortgages. Conservative debt-to-income ratios (average HELOC debt to income ratio of loans originated) were maintained in the first quarter of 2015 at 31.3% compared to 30.8% in the fourth quarter of 2014. HELOC utilization rates (total amount outstanding as a percentage of total available lines) of 60.5% and 61.3% at March 31, 2015 and December 31, 2014, respectively, and

loan-to-value ratios based upon prudent guidelines were maintained to ensure consistency with Synovus' overall risk philosophy. At March 31, 2015, 34% of home equity line balances were secured by a first lien, and 66% were secured by a second lien. Apart from credit card loans and unsecured loans, Synovus does not originate loans with LTV ratios greater than 100% at origination except for infrequent situations provided that certain underwriting requirements are met. Additionally, at origination, loan maturities are determined based on the borrower's ability to repay (cash flow or earning power of the borrower that represents the primary source of repayment) and the collateralization of the loan, including the economic life of the asset being pledged. Collateral securing these loans provides a secondary source of repayment in that the collateral may be liquidated. Synovus determines the need for collateral on a case-by-case basis. Factors considered include the purpose of the loan, current and prospective credit-worthiness of the customer, terms of the loan, and economic conditions.

Table of Contents

Risk levels 1-6 (descending) are assigned to retail loans based upon a risk score matrix. At least annually, the retail loan portfolio data is sent to a consumer credit reporting agency for a refresh of customers' credit scores. The most recent credit score refresh was completed as of December 31, 2014. Management reviews the refreshed scores to monitor the credit risk migration of the retail loan portfolio, which impacts the allowance for loan losses. Management also considers the results from the refreshed scores for possible changes in underwriting policies. Revolving lines of credit are regularly reviewed for any material change in financial circumstances, and when appropriate, the line of credit may be suspended.

Higher-risk consumer loans as defined by the FDIC are consumer loans (excluding consumer loans defined as nontraditional mortgage loans) where, as of the origination date or, if the loan has been refinanced, as of the refinance date, the probability of default within two years is greater than 20%, as determined using a defined historical stress period. These loans are not a part of Synovus' retail lending strategy, and Synovus does not currently develop or offer specific higher-risk consumer loans, alt-A, no documentation or stated income retail residential real estate loan products. Synovus estimates that, as of March 31, 2015, it had \$127.7 million of higher-risk consumer loans (3.3% of the retail portfolio and 0.6% of the total loan portfolio). Included in this amount is approximately \$16 million of accruing TDRs. Synovus makes retail lending decisions based upon a number of key credit risk determinants including FICO scores as well as bankruptcy predictor scores, loan-to-value, and debt-to-income ratios.

Other Real Estate

The carrying value of ORE was \$74.8 million, \$85.5 million, and \$110.8 million at March 31, 2015, December 31, 2014, and March 31, 2014, respectively. As of March 31, 2015, the ORE carrying value reflects cumulative write-downs totaling approximately \$83 million, or 53% of the related loans' unpaid principal balance. During the three months ended March 31, 2015 and 2014, \$5.4 million and \$12.9 million, respectively, of loans and other loans held for sale were foreclosed and transferred to other real estate at fair value less costs to sell. During the three months ended March 31, 2015 and 2014, Synovus recognized foreclosed real estate expense, net, of \$9.5 million and \$5.7 million, respectively. These expenses included write-downs for declines in fair value of ORE subsequent to the date of foreclosure and net realized losses resulting from sales transactions totaling \$7.3 million and \$4.8 million for the three months ended March 31, 2015 and 2014, respectively.

Synovus' objective is to dispose of ORE properties in a timely manner and to maximize net sale proceeds. Synovus has a centralized managed assets division, with the specialized skill set to facilitate this objective. While there is not a defined timeline for their sale, ORE properties are actively marketed through unaffiliated third parties, including real estate brokers and real estate auctioneers. Sales are made on an opportunistic basis, as acceptable buyers and terms are identified. In addition, Synovus may also decide to sell ORE properties in bulk asset sales to unaffiliated third parties, in which case the typical period of marketing the property will likely not occur. In some cases, Synovus is approached by potential buyers of ORE properties or Synovus may contact independent third parties who we believe might have an interest in an ORE property.

Table of Contents

Deposits

Deposits provide the most significant funding source for interest earning assets. The following table shows the relative composition of average deposits for the time periods indicated.

Composition of Average Deposits

⁽¹⁾ Deposits balance in each category expressed as percentage of total deposits.

⁽²⁾ See reconciliation of "Non-GAAP Financial Measures" in this Report.

During the first quarter of 2015, total average deposits increased \$279.0 million, or 5.3% annualized, compared to the fourth quarter of 2014, and increased \$889.8 million, or 4.3%, compared to the first quarter of 2014. Average core deposits were up \$286.6 million, or 5.9% annualized, compared to the prior quarter, and up \$529.8 million, or 2.7%, compared to the first quarter a year ago. Average core deposits excluding average state, county, and municipal (SCM) deposits grew \$247.1 million, or 5.7%, over the prior quarter and \$670.7 million, or 3.9%, over the first quarter of 2014. The increase in deposits during the quarter was largely due to growth in money market and time deposit products. Additionally, average non-interest bearing demand deposits, excluding average SCM deposits, grew 4.5% annualized compared to the prior quarter and grew 10.8% over the prior year quarter. Average non-interest bearing demand deposits as a percentage of total average deposits was 28.3% for the three months ended March 31, 2015, compared to 28.6% for the three months ended December 31, 2014 and 26.7% for the three months ended March 31, 2014. See reconciliation of "Non-GAAP Financial Measures" in this Report.

Average time deposits of \$100,000 and greater for the three months ended March 31, 2015, December 31, 2014 and March 31, 2014 were \$3.34 billion, \$3.29 billion, and \$2.98 billion respectively, and included average brokered time deposits of \$1.41 billion, \$1.41 billion, and \$1.03 billion, respectively. These larger deposits represented 15.4%, 15.4%, and 14.4% of total average deposits for the three months ended March 31, 2015, December 31, 2014, and March 31, 2014, respectively, and included brokered time deposits which represented 6.5%, 6.6%, and 5.0% of total average deposits for the three months ended March 31, 2015, December 31, 2014, and March 31, 2014, respectively. During the first quarter of 2015, total average brokered deposits represented 7.4% of Synovus' total average deposits compared to 7.5% and 6.0% of total average deposits the previous quarter and the first quarter a year ago, respectively.

Table of Contents

Non-interest Income

Non-interest income for the three months ended March 31, 2015 was \$65.9 million compared to \$70.2 million for the three months ended March 31, 2014. Adjusted non-interest income, which excludes net investment securities gains and the prior year net gain of \$5.8 million from the Memphis transaction, increased \$2.1 million, or 3.3%, for the three months ended March 31, 2015, compared to the same period a year ago, driven primarily by increases in mortgage banking income, brokerage revenue, and gains from sales of SBA loans. See reconciliation of "Non-GAAP Financial Measures" in this Report.

The following table shows the principal components of non-interest income.

Non-interest Income	Three Months Ended March 31,	
(in thousands)	2015	2014
Service charges on deposit accounts	\$19,133	19,214
Fiduciary and asset management fees	11,571	11,033
Brokerage revenue	7,251	6,213
Mortgage banking income	6,484	3,511
Bankcard fees	8,077	7,518
Investment securities gains, net	725	1,331
Other fee income	5,246	4,863
Gain on sale of Memphis branches, net	—	5,789
Other non-interest income	7,367	10,710
Total non-interest income	\$65,854	70,182

Principal Components of Non-interest Income

Service charges on deposit accounts for the three months ended March 31, 2015 were \$19.1 million, down slightly by \$81 thousand, or 0.4%, compared to the three months ended March 31, 2014. Service charges on deposit accounts consist of NSF fees, account analysis fees, and all other service charges. NSF fees were \$8.7 million for the three months ended March 31, 2015, an increase of \$323 thousand, or 3.9%, compared to the three months ended March 31, 2014, due to an increase in overdraft service utilization rates and higher Regulation E opt-in rates (Regulation E limits the ability of a financial institution to assess an overdraft fee for paying automated teller machine and debit card transactions that overdraw a customer's account unless the customer affirmatively consents, or opts-in, to the institution's payment of overdrafts for these transactions). Account analysis fees were \$5.8 million for the three months ended March 31, 2015, down \$223 thousand, or 3.7%, compared to the three months ended March 31, 2014, primarily due to higher earnings credit balances and a decline in the number of accounts on analysis. All other service charges on deposit accounts, which consist primarily of monthly fees on retail demand deposit and saving accounts, were \$4.7 million for the three months ended March 31, 2015, down \$180 thousand, or 3.7%, compared to the same period in 2014, with more retail customers meeting requirements to qualify for fee waivers on checking products.

Fiduciary and asset management fees are derived from providing estate administration, employee benefit plan administration, personal trust, corporate trust, corporate bond, investment management, and financial planning services. Fiduciary and asset management fees were \$11.6 million for the three months ended March 31, 2015, an increase of \$538 thousand, or 4.9%, compared to the same period in 2014 due to new talent acquisition in strategic markets and an increase in assets-under-management of approximately 9.0%.

Brokerage revenue, which consists primarily of brokerage commissions, was \$7.3 million for the three months ended March 31, 2015, up \$1.0 million, or 16.7%, compared to the three months ended March 31, 2014. The year-over-year increase was largely due to the unfavorable impact of severe winter weather on transactions during the first quarter of 2014. Additionally, the increase was driven by talent acquisition of commission-based financial consultants and brokers and a favorable increase in customer fee-based assets-under-management.

Mortgage banking income increased \$3.0 million, or 84.7%, for the three months ended March 31, 2015, when compared to the same period in 2014, due primarily to an increase in mortgage production of 72.3%. Synovus currently expects further increases in mortgage revenue from first quarter 2015 levels in the second quarter of 2015.

Bankcard fees increased \$559 thousand, or 7.4%, for the three months ended March 31, 2015, compared to the same period in 2014, due primarily to an increase in transaction volume. Bankcard fees consist primarily of credit card interchange fees and debit card interchange fees. Debit card interchange fees were \$3.4 million, up \$146 thousand, or 4.5%, for the three months ended

Table of Contents

March 31, 2015, compared to the same period in 2014. Credit card interchange fees were \$5.6 million, up \$347 thousand, or 6.7%, for the three months ended March 31, 2015, compared to the same period in 2014.

Other fee income includes fees for letters of credit, safe deposit box fees, access fees for automated teller machine use, customer swap dealer fees, and other service charges. Other fee income increased \$383 thousand, or 7.9%, for the three months ended March 31, 2015, compared to the same period in 2014 due primarily to an increase in customer swap dealer fees.

The 2014 gain on sale of Memphis branches consists of a gain, net of associated costs, from the sale of certain loans, premises, deposits, and other assets and liabilities of the Memphis, Tennessee operations of Trust One Bank, a division of Synovus Bank on January 17, 2014. Please see "Note 4 - Sale of Branches" of this Report for further explanation of this transaction.

The main components of other non-interest income are income from company-owned life insurance policies, gains from sales of SBA loans, insurance commissions, card sponsorship fees, and other miscellaneous items. Other non-interest income was \$7.4 million for the three months ended March 31, 2015, compared to \$10.7 million for the same period in 2014. Other non-interest income for the first quarter of 2014 included a \$3.1 million gain from the sale of a branch property. Gains from sales of SBA loans totaled \$1.5 million during the first quarter of 2015, up from \$383 thousand during the first quarter of 2014. Synovus has an increased focus on the SBA lending line of business and expects an increase in SBA gains for the full year 2015 compared to 2014.

Non-interest Expense

Non-interest expense for the three months ended March 31, 2015 declined \$5.3 million, or 2.9%, compared to the same period in 2014. Adjusted non-interest expense for the three months ended March 31, 2015, which excludes restructuring charges, credit costs, and Visa indemnification charges, increased \$307 thousand, or 0.2%, compared to the same period in 2014. See "Non-GAAP Financial Measures" in this Report for applicable reconciliation.

The following table summarizes the components of non-interest expense for the three months ended March 31, 2015 and 2014.

Non-interest Expense

(in thousands)	Three Months Ended March 31,	
	2015	2014
Salaries and other personnel expense	\$96,488	93,445
Net occupancy and equipment expense	26,172	26,056
Third-party processing expense	10,343	10,097
FDIC insurance and other regulatory fees	6,957	9,645
Professional fees	5,594	7,677
Advertising expense	3,443	2,477
Foreclosed real estate expense, net	9,496	5,681
Visa indemnification charges	375	396
Restructuring charges, net	(107) 8,577
Other operating expenses	20,147	20,110
Total non-interest expense	\$178,908	184,161

Salaries and other personnel expenses increased \$3.0 million, or 3.3%, for the three months ended March 31, 2015, compared to the same period in 2014 primarily due to annual merit increases and additional variable compensation associated with higher mortgage and brokerage revenue. Additionally, higher deferred compensation expense driven by market-based valuations contributed \$1.0 million to the year over year increase with \$517 thousand of the post-employment benefit expense offset in other income. These increases were somewhat offset by the decrease in salaries and other personnel expense resulting from the decline of 177, or 3.8%, in total headcount at March 31, 2015 vs. March 31, 2014. The decline in headcount was driven by the elimination of positions during 2014 in connection with branch closings, further refinement of our branch staffing model, and other efficiency initiatives.

Net occupancy and equipment expense was essentially flat at \$26.2 million for the three months ended March 31, 2015, compared to \$26.1 million for the same period in 2014. Synovus continues to invest in technology and rationalize its branch network which consists of 258 branches compared to 271 branches at March 31, 2014.

Table of Contents

Third-party processing expense includes all third-party core operating system and processing charges. Third-party processing expense increased \$247 thousand, or 2.4%, for the three months ended March 31, 2015, compared to the same period in 2014.

FDIC insurance costs and other regulatory fees declined \$2.7 million, or 27.9%, for the three months ended March 31, 2015, compared to the same period in 2014, primarily due to the significant improvement in credit metrics.

Professional fees declined \$2.1 million, or 27.1%, for the three months ended March 31, 2015, compared to the same period in 2014. The decline in professional fees was driven by a decrease in attorney fees.

Advertising expense was \$3.4 million for the three months ended March 31, 2015 compared to \$2.5 million for the three months ended March 31, 2014. Advertising expense for the remainder of the year is expected to increase from first quarter levels based on increased levels of advertising spend related to our branding campaign as well as our product campaigns.

Foreclosed real estate costs of \$9.5 million were up \$3.8 million, or 67.2%, for the three months ended March 31, 2015, compared to the same period in 2014. Foreclosed real estate costs during the remainder of 2015 are expected to be lower than first quarter levels. For further discussion of foreclosed real estate, see the section captioned "Other Real Estate" of this Report.

Management currently expects that adjusted non-interest expense for the year ending December 31, 2015 will be approximately the same as in 2014 (\$675 million). See "Non-GAAP Financial Measures" in Synovus' 2014 Form 10-K for applicable reconciliation.

Income Tax Expense

Income tax expense was \$31.8 million and \$28.6 million for the three months ended March 31, 2015 and March 31, 2014, respectively. The effective tax rate was 37.11% for the three months ended March 31, 2015 compared to 37.14% for the same period in 2014. Synovus currently expects an annual effective tax rate of approximately 36%-37% for the full year 2015. The actual effective income tax rate in future periods could be affected by items that are infrequent in nature, such as new legislation and changes in the deferred tax asset valuation allowance.

At March 31, 2015, the net deferred tax asset was \$589.2 million, compared to \$622.5 million at December 31, 2014. The decrease in the net deferred tax asset is primarily driven by the continued generation of taxable income.

Table of Contents

CREDIT QUALITY, CAPITAL RESOURCES AND LIQUIDITY

Credit Quality

Synovus continuously monitors the credit quality of its loan portfolio and maintains an allowance for loan losses that management believes is sufficient to absorb probable losses inherent in its loan portfolio. Credit quality continued to improve during the first quarter of 2015 with non-performing assets declining by 5.8% sequentially to an ending non-performing assets ratio of 1.28%, past dues remaining at low levels, and the net charge-off ratio declining to 0.23%, down 8 basis points from the fourth quarter of 2014. The non-performing loans ratio has also continued to decline, ending the quarter at 0.92%.

The table below includes selected credit quality metrics.

Credit Quality Metrics (dollars in thousands)	As of and for the Three Months Ended,				
	March 31, 2015	December 31, 2014	September 30, 2014	June 30, 2014	March 31, 2014
Provision for loan losses	\$4,397	8,193	3,843	12,284	9,511
Other credit costs	11,273	8,213	11,858	4,635	8,128
Total credit costs	\$15,670	16,406	15,701	16,919	17,639
Non-performing loans	194,232	197,757	242,382	259,547	384,324

Other real estate	74,791	85,472	81,636	101,533	110,757
Non-performing assets	\$270,105	286,835	324,356	363,125	498,201
Non-performing loans as a % of total loans	0.92	% 0.94	1.18	1.27	1.91
Non-performing assets as a % of total loans, other loans held for sale, and ORE	1.28	% 1.35	1.57	1.77	2.46
NPL inflows	\$26,059	32,630	32,988	34,321	35,460
Loans 90 days past due and still accruing	5,025	4,637	4,067	4,798	6,563
As a % of total loans	0.02	% 0.02	0.02	0.02	0.03
Total past due loans and still accruing	\$57,443	51,251	72,712	60,428	75,038
As a % of total loans	0.27	% 0.24	0.35	0.30	0.37
Net charge-offs	\$12,343	16,252	12,250	35,372	15,181
Net charge-offs/average loans	0.23	% 0.31	0.24	0.69	0.30
Allowance for loan losses	\$253,371	261,317	269,376	277,783	300,871
Allowance for loan losses as a % of total loans	1.20	% 1.24	1.31	1.36	1.49

⁽¹⁾ Represent only impaired loans that have been specifically identified to be sold. Impaired loans held for sale are carried at the lower of cost or fair value, less costs to sell, based primarily on estimated sales proceeds net of selling costs.

Total credit costs

Total credit costs (provision for loan losses plus other credit costs which consist primarily of foreclosed real estate expense, net,) for the quarters ended March 31, 2015 and March 31, 2014 were \$15.7 million and \$17.6 million, respectively, including provision for loan losses of \$4.4 million and \$9.5 million, respectively, and expenses related to foreclosed real estate of \$9.5 million and \$5.7 million, respectively. Total credit costs improved 4.5% on a sequential quarter basis and improved 11.2 % from the first quarter of 2014.

Non-performing Assets

Total NPAs were \$270.1 million at March 31, 2015, a \$16.7 million or 5.8% decrease from December 31, 2014 and a \$228.1 million or 45.8% decrease from \$498.2 million at March 31, 2014. The year-over-year decline in non-performing assets was primarily driven by significant balance reductions in legacy non-performing assets, a continued decline in NPL inflows, as well as asset dispositions. Total non-performing assets as a percentage of total loans, other loans held for sale, and other real estate were 1.28% at March 31, 2015 compared to 1.35% at December 31, 2014, and 2.46% at March 31, 2014. Synovus currently expects that NPAs will continue to decline at a

modest pace in 2015.

NPL inflows during the first quarter of 2015 were \$26.1 million, down \$9.4 million or 26.5% from the first quarter of 2014 inflows of \$35.5 million.

53

Table of Contents

NPL Inflows by Loan Type

(in thousands)	Three Months Ended	
	March 31,	
	2015	2014
Investment properties	\$295	2,719
1-4 family properties	917	1,545
Land for future development	176	3,847
Total commercial real estate	1,388	8,111
Commercial, financial and agricultural	9,097	6,731
Owner-occupied	7,449	8,694
Total commercial and industrial	16,546	15,425
Home equity lines	3,978	3,203
Consumer mortgages	3,600	8,050
Credit cards	—	—
Other retail loans	547	671
Total retail	8,125	11,924
Total NPL inflows	\$26,059	35,460

Past Due Loans

As a percentage of total loans outstanding, loans 90 days past due and still accruing interest continue to be at very low levels and were 0.02% at March 31, 2015 and 2014 and December 31, 2014. These loans are in the process of collection, and management believes that sufficient collateral value securing these loans exists to cover contractual interest and principal payments.

Troubled Debt Restructurings

Accruing TDRs were \$313.4 million at March 31, 2015, compared to \$348.4 million at December 31, 2014 and \$495.4 million at March 31, 2014. At March 31, 2015, the allowance for loan losses allocated to these accruing TDRs was \$17.6 million compared to \$21.0 million at December 31, 2014 and \$24.9 million at March 31, 2014. Accruing TDRs are considered performing because they are performing in accordance with the restructured terms. At March 31, 2015, 40.9% or \$128.1 million of accruing TDRs were graded as Pass (24.1%) or Special Mention (16.8%) loans. At March 31, 2015, troubled debt restructurings (accruing and non-accruing) were \$383.2 million, a decrease of \$39.9 million or 9.4% compared to December 31, 2014.

Accruing TDRs by Risk Grade (dollars in thousands)	March 31, 2015		December 31, 2014		
	Amount	%	Amount	%	%
Pass	\$75,451	24.1	% \$86,354	24.8	%
Special Mention	52,658	16.8	65,446	18.8	
Substandard accruing	185,253	59.1	196,627	56.4	
Total accruing TDRs	\$313,362	100.0	% \$348,427	100.0	%

Table of Contents

Non-accruing TDRs may generally be returned to accrual status if there has been a period of performance, consisting usually of at least a six month sustained period of repayment performance in accordance with the terms of the agreement. Consistent with regulatory guidance, a TDR will generally no longer be reported as a TDR after a period of performance which is generally a minimum of six months and after the loan has been reported as a TDR at a year-end reporting date, and if at the time of the modification, the interest rate was at market, considering the credit risk associated with the borrower. Non-accruing TDRs were \$69.8 million at March 31, 2015 compared to \$74.6 million at December 31, 2014.

Non-accruing TDRs by Type

(in thousands)	March 31, 2015	December 31, 2014

Other retail loans	146	66
Total retail	5,082	5,215
Total non-accruing TDRs	\$69,809	\$74,602

Potential Problem Loans

Potential problem loans are defined by management as being certain performing loans with a well-defined weakness where there is known information about possible credit problems of borrowers which causes management to have concerns about the ability of such borrowers to comply with the present repayment terms of such loans. Potential problem commercial loans consist of commercial Substandard accruing loans but exclude loans 90 days past due and still accruing interest and accruing TDRs classified as Substandard. Synovus had \$205.3 million of potential problem commercial loans at March 31, 2015 compared to \$222.5 million and \$225.0 million at December 31, 2014 and March 31, 2014, respectively. Synovus cannot predict at this time whether these potential problem loans ultimately will become non-performing loans or result in losses.

Table of Contents

Net Charge-offs

Net charge-offs for the three months ended March 31, 2015 were \$12.3 million, or 0.23% as a percentage of average loans annualized, a decrease of \$2.8 million or 18.7% compared to \$15.2 million or 0.30% as a percentage of average loans annualized for the three months ended March 31, 2014. The decline in net charge-offs was driven by a decline in NPL inflows and lower impairment charge-offs on existing collateral dependent impaired loans. The net charge-off ratio for 2015 is currently projected to be in the 30 to 40 basis points range.

The following tables show net charge-offs by loan type for the three months ended March 31, 2015 and 2014.

Net Charge-offs (Recoveries) by Loan Type

(in thousands)	Three Months Ended	
	March 31,

Total net charge-offs	\$12,343	\$15,181

Provision for Loan Losses and Allowance for Loan Losses

For the three months ended March 31, 2015, the provision for loan losses was \$4.4 million, a decrease of \$5.1 million or 53.8% compared to the three months ended March 31, 2014. The decrease in the provision for loan losses was primarily a result of continued improvement in credit quality trends, including:

- Reduced net loan charge-offs by \$2.8 million or 18.7% from \$15.2 million for the three months ended March 31, 2014 to \$12.3 million for the three months ended March 31, 2015;

- Reduced NPL inflows by \$9.4 million or 26.5% from \$35.5 million for the three months ended March 31, 2014 to \$26.1 million for the three months ended March 31, 2015;

- Reduced loans rated Special Mention by \$240.8 million or 32.5% from \$740.6 million at March 31, 2014 to \$499.7 million at March 31, 2015;

- Reduced loans rated Substandard accruing by \$92.2 million or 18.5% from \$499.1 million at March 31, 2014 to \$406.9 million at March 31, 2015; and

- Pass rated loans as a percentage of total loans were 94.8% at March 31, 2015 compared to 91.9% at March 31, 2014.

The allowance for loan losses at March 31, 2015 was \$253.4 million or 1.20% of total loans compared to \$261.3 million or 1.24% of total loans at December 31, 2014 and \$300.9 million or 1.49% of total loans at March 31, 2014. The decrease in the allowance for loan losses is primarily due to continued improvement in credit quality trends, which includes lower NPL levels as well as reduced NPL inflows and net charge-offs, improved risk grade migration trends, and stable collateral values.

Capital Resources

Synovus is required to comply with the capital adequacy standards established by the Federal Reserve Board and our subsidiary bank, Synovus Bank, must comply with similar capital adequacy standards established by the FDIC.

Synovus has always placed great emphasis on maintaining a solid capital base and continues to satisfy applicable regulatory capital requirements.

The Basel III capital rules, implemented in the U.S. with certain changes mandated by the Dodd-Frank Act, strengthen the definition of regulatory capital, increase risk-based capital requirements, and make selected changes to the calculation of risk-

57

Table of Contents

weighted assets. The rules became effective January 1, 2015, for Synovus and Synovus Bank, subject to a transition period for several aspects, including the capital conservation buffer and certain regulatory capital adjustments and deductions, as described below. Under the Basel III capital rules, the minimum capital requirements for Synovus and Synovus Bank include a common equity Tier 1 (CET1) ratio of 4.5%; Tier 1 capital ratio of 6%; total capital ratio of 8%; and leverage ratio of 4%. When fully phased-in on January 1, 2019, the Basel III capital rules include a capital conservation buffer of 2.5% that is added on top of each of the minimum risk-based capital ratios. The implementation of the capital conservation buffer will begin on January 1, 2016 at the 0.625% level and be phased-in over a three-year period (increasing by that amount on each subsequent January 1, until it reaches 2.5% on January 1, 2019). As a financial holding company, Synovus and its subsidiary bank, Synovus Bank, are required to maintain capital levels required for a well-capitalized institution as defined by federal banking regulations. Under the Basel III capital rules, Synovus and Synovus Bank are well-capitalized if each has a CET1 ratio of 6.5% or greater, a Tier 1 risk-based capital ratio of 8% or greater, a total risk-based capital ratio of 10% or greater, a leverage ratio of 5% or greater, and are not subject to any written agreement, order, capital directive, or prompt corrective action directive from a federal and/or state banking regulatory agency to meet and maintain a specific capital level for any capital measure. At March 31, 2015, Synovus' and Synovus Bank's capital levels each exceeded well-capitalized requirements currently in effect. The following table presents certain ratios used to measure Synovus and Synovus Bank's capitalization.

Capital Ratios

(dollars in thousands)	March 31, 2015	December 31, 2014
Capital rules in effect:	Basel III	Basel I

Capital ratios at March 31, 2015 were impacted by common stock repurchases of \$59.1 million during the first quarter pursuant to Synovus' \$250 million share repurchase program announced on October 21, 2014 and which expires on October 23, 2015. As of March 31, 2015, Synovus had repurchased a total of \$147.2 million or 5.6 million shares of common stock under the share repurchase program through a combination of share repurchases under the accelerated share repurchase (ASR) agreement described below and open market transactions. Synovus entered into the ASR agreement during October 2014 to purchase \$75.0 million of

Table of Contents

Synovus common stock under the share repurchase program. As of December 31, 2014, Synovus had repurchased 2,510,460 shares under the ASR agreement. During January 2015, Synovus repurchased 391,612 shares upon completion of the ASR agreement. Additionally, since October 2014 through March 31, 2015, Synovus has repurchased \$72.2 million or 2,683,755 shares of common stock through open market transactions including \$59.1 million or 2,179,986 shares of common stock repurchased during the first quarter of 2015.

Additionally, the March 31, 2015 capital ratios were impacted by changes required under Basel III capital rules, which, for Synovus, increased risk-weighted assets by approximately \$420 million with higher risk-weights assigned to certain categories including unfunded lines of credit, non-performing loans, and various other categories. Synovus and Synovus Bank elected to make a permanent election to exclude accumulated other comprehensive income (loss) from regulatory capital, and therefore will retain the same accumulated other comprehensive income (loss) treatment as under the regulatory capital rules in effect prior to January 1, 2015.

As of March 31, 2015, total disallowed deferred tax assets were \$412.9 million or 1.72% of risk weighted assets, compared to \$492.2 million or 2.10% of risk weighted assets at December 31, 2014. Disallowed deferred tax assets for the new Basel III ratio, CET1, were \$287.2 million at March 31, 2015 due to a three-year phase-in of the total disallowed deferred tax asset for the CET1 capital measure. Basel III revised the deferred tax asset limitation criteria effective January 1, 2015 and now includes the component of deferred tax assets arising from temporary timing differences in regulatory capital up to certain levels of CET1. Thus, the disallowed portion of deferred tax assets, under Basel III, is comprised of net operating loss carryforwards and tax credit carryforwards. Under Basel I, there were limitations on the inclusion of deferred tax assets for regulatory capital based on Tier 1 capital levels and projected future earnings. The treatment of deferred tax assets under Basel III had an initial favorable impact on Synovus' regulatory capital ratios. Synovus' deferred tax asset should continue to decrease over time, thus creating additional regulatory capital in future periods.

Synovus' CET1 ratio was 10.80% at March 31, 2015 under Basel III transitional provisions and the estimated fully phased-in CET1 ratio, as of March 31, 2015 was approximately 10.14%, both of which are well in excess of the regulatory requirements prescribed by Basel III.

Management currently believes, based on internal capital analyses and earnings projections, that Synovus and Synovus Bank's capital position is adequate to meet current and future regulatory minimum capital requirements.

Dividends

Synovus has historically paid a quarterly cash dividend to the holders of its common stock. Management closely monitors current and projected capital levels, liquidity (including dividends from subsidiaries), financial markets and other economic trends, as well as regulatory requirements regarding the payment of dividends. During October 2014, Synovus increased the quarterly common stock dividend (which was paid on January 2, 2015) from \$0.07 to \$0.10 per share. Synovus' ability to pay dividends on its capital stock, including the common stock and the Series C Preferred Stock, is primarily dependent upon dividends and distributions that it receives from its bank and non-banking subsidiaries, which are restricted by various regulations administered by federal and state bank regulatory authorities, as further discussed below in the section titled "Liquidity." During 2014, Synovus Bank paid upstream dividends of \$182.0 million to Synovus. During the three months ended March 31, 2015, Synovus Bank paid an upstream dividend of \$75.0 million to Synovus.

Synovus declared dividends of \$0.10 per common share for the three months ended March 31, 2015 and \$0.07 for the three months ended March 31, 2014. Please see "Note 3 - Reverse Stock Split", of this Report for information on Synovus' reverse stock split. In addition to dividends paid on its common stock, Synovus paid dividends of \$2.6 million on its Series C Preferred Stock during both the three months ended March 31, 2015 and March 31, 2014.

Liquidity

Liquidity represents the extent to which Synovus has readily available sources of funding needed to meet the needs of depositors, borrowers and creditors, to support asset growth, and to otherwise sustain operations of Synovus and its subsidiaries, at a reasonable cost, on a timely basis, and without adverse consequences. ALCO monitors Synovus' economic, competitive, and regulatory environment and is responsible for measuring, monitoring, and reporting on liquidity and funding risk, interest rate risk, and market risk and has the authority to establish policies relative to these risks. ALCO, operating under liquidity and funding policies approved by the Board of Directors, actively analyzes

contractual and anticipated cash flows in order to properly manage Synovus' liquidity position. Contractual and anticipated cash flows are analyzed under normal and stressed conditions to determine forward looking liquidity needs and sources. Synovus analyzes liquidity needs under various scenarios of market conditions and operating performance. This analysis includes stress testing and measures expected sources and uses of funds under each scenario. Emphasis

Table of Contents

is placed on maintaining numerous sources of current and potential liquidity to allow Synovus to meet its obligations to depositors, borrowers, and creditors on a timely basis.

Liquidity is generated primarily through maturities and repayments of loans by customers, maturities and sales of investment securities, deposit growth, and access to sources of funds other than deposits. Management continuously monitors and maintains appropriate levels of liquidity so as to provide adequate funding sources to manage customer deposit withdrawals, loan requests, and funding maturities. Liquidity is also enhanced by the acquisition of new deposits. Each of the banking divisions monitors deposit flows and evaluates local market conditions in an effort to retain and grow deposits.

Synovus Bank also generates liquidity through the national deposit markets through the issuance of brokered certificates of deposit and money market accounts. Synovus Bank accesses these funds from a broad geographic base to diversify its sources of funding and liquidity. Access to these deposits could become more limited if Synovus Bank's asset quality and financial performance were to significantly deteriorate. Synovus Bank has the capacity to access funding through its membership in the FHLB System. At March 31, 2015, Synovus Bank had access to incremental funding, subject to available collateral and FHLB credit policies, through utilization of FHLB advances. In addition to bank level liquidity management, Synovus must manage liquidity at the Parent Company for various operating needs including potential capital infusions into subsidiaries, the servicing of debt, the payment of dividends on our common stock and preferred stock, and payment of general corporate expenses. The primary source of liquidity for Synovus consists of dividends from Synovus Bank, which is governed by certain rules and regulations of the GA DBF and FDIC. During 2014, Synovus Bank paid upstream dividends totaling \$182.0 million to Synovus Financial Corp. During the three months ended March 31, 2015, Synovus Bank paid an upstream dividend of \$75.0 million to Synovus. Synovus' ability to receive dividends from Synovus Bank in future periods will depend on a number of factors, including, without limitation, Synovus Bank's future profits, asset quality, liquidity and overall condition. In addition, GA DBF rules and related statutes contain additional restrictions on payments of dividends by Synovus Bank. In particular, the Georgia Financial Institutions Code contains restrictions on the ability of a Georgia bank to pay dividends other than from retained earnings without the approval of the GA DBF. As a result of this restriction, Synovus Bank is currently required to seek approval from the GA DBF to pay dividends to Synovus.

Synovus presently believes that the sources of liquidity discussed above, including existing liquid funds on hand, are sufficient to meet its anticipated funding needs through the near future. However, if economic conditions were to significantly deteriorate, regulatory capital requirements for Synovus or Synovus Bank increase as the result of regulatory directives or otherwise, or Synovus believes it is prudent to enhance current liquidity levels, then Synovus may seek additional liquidity from external sources. See "Part I – Item 1A. Risk Factors - Changes in the cost and availability of funding due to changes in the deposit market and credit market, or the way in which we are perceived in such markets, may adversely affect our capital resources, liquidity and financial results." of Synovus' 2014 Form 10-K.

Earning Assets and Sources of Funds

Average total assets for the three months ended March 31, 2015 increased \$1.00 billion, or 3.8%, to \$27.33 billion as compared to \$26.33 billion for the first three months of 2014. Average earning assets increased \$1.10 billion, or 4.6%, in the first three months of 2015 compared to the same period in 2014 and represented 92.0% of average total assets at March 31, 2015, as compared to 91.3% at March 31, 2014. The increase in average earning assets resulted from a \$1.03 billion increase in average loans, and a \$188.0 million increase in federal funds sold, due from Federal Reserve Bank, and other short-term investments. Average non-interest bearing demand deposits increased \$571.5 million or 10.3%, to \$6.11 billion for the first three months of 2015 compared to the same period in 2014. Average interest bearing liabilities increased \$376.3 million, or 2.1%, to \$17.94 billion for the first three months of 2015 compared to the same period in 2014. The increase in interest bearing liabilities was driven by a \$385.9 million increase in brokered time deposits and a \$133.3 million increase in money market deposit accounts (excluding brokered deposits). Net interest income for the three months ended March 31, 2015 was \$203.3 million, an increase of \$2.7 million, or 1.37%, compared to \$200.5 million for the three months ended March 31, 2014.

The net interest margin for the three months ended March 31, 2015 was 3.28%, down 11 bps from 3.39% for the three months ended March 31, 2014. Earning asset yields decreased by 13 bps compared to the three months ended March

31, 2014 while the effective cost of funds decreased by 2 bps. The primary factor negatively impacting earning asset yields was a 15 bp decline in loan yields.

On a sequential quarter basis, net interest income decreased by \$4.2 million and the net interest margin decreased by 6 bps to 3.28%. The decrease in net interest income for the first quarter was driven by the margin decrease as well as two less calendar days and was partially offset by a \$254.1 million increase in average loans. Yields on earning assets decreased by 5 bps while the effective cost of funds increased by 1 bp. The primary factors negatively impacting earning asset yields were a 3 bp decline in loan yields and an increase in the average balance of lower yielding funds held at the Federal Reserve Bank. The effective cost of

Table of Contents

funds was negatively impacted by a 5 bp increase in the cost of brokered time deposits and a 3 bp increase in money markets (excluding brokered deposits).

Current expectations are for further downward pressure on the net interest margin during the second quarter of 2015. This expectation is primarily due to a projected further decrease in loan yields and the timing of deployment of additional liquidity generated from deposit growth.

Table of Contents

Quarterly yields earned on average interest-earning assets and rates paid on average interest-bearing liabilities for the five most recent quarters are presented below.

(1) Average loans are shown net of unearned income. Non-performing loans are included. Interest income includes fees as follows: 2015 - \$8.2 million, 2014 - \$6.5 million.

(2) Reflects taxable-equivalent adjustments, using the statutory federal income tax rate of 35% in adjusting interest on tax-exempt loans and investment securities to a taxable-equivalent basis.

(3) Includes average net unrealized gains (losses) on investment securities available for sale of \$26.6 million and (\$6.0) million for the three months ended March 31, 2015 and 2014, respectively.

Table of Contents

Market Risk Analysis

Interest rate risk is the primary market risk to which Synovus is potentially exposed. Synovus measures its sensitivity to changes in market interest rates through the use of a simulation model. Synovus uses this simulation model to determine a baseline net interest income forecast and the sensitivity of this forecast to changes in interest rates. These simulations include all of Synovus' earning assets and liabilities. Forecasted balance sheet changes, primarily reflecting loan and deposit growth forecasts, are included in the periods modeled. Anticipated deposit mix changes in each interest rate scenario are also included in the periods modeled.

Synovus has modeled its baseline net interest income forecast assuming a flat interest rate environment with the federal funds rate at the Federal Reserve's current targeted range of 0% to 0.25% and the current prime rate of 3.25%. Due to the targeted federal funds rate being at or near 0% at this time, only rising rate scenarios have been modeled. Synovus has modeled the impact of a gradual increase in short-term rates of 100 and 200 basis points to determine the sensitivity of net interest income for the next twelve months. Synovus continues to maintain a modestly asset sensitive position which would be expected to benefit net interest income in a rising interest rate environment. The following table represents the estimated sensitivity of net interest income to these changes in short term interest rates at March 31, 2015, with comparable information for December 31, 2014.

Change in Short-term Interest Rates (in basis points)	Estimated % Change in Net Interest Income as Compared to Unchanged Rates (for the next twelve months)	
	March 31, 2015	December 31, 2014
+200	7.1%	6.7%
+100	4.5%	4.3%
Flat	—%	—%

Several factors could serve to diminish or eliminate this asset sensitivity. These factors include a higher than projected level of deposit customer migration to higher cost deposits, such as certificates of deposit, which would increase total interest expense and serve to reduce the realized level of asset sensitivity. Another factor which could impact the realized interest rate sensitivity is the repricing behavior of interest bearing non-maturity deposits. Assumptions for repricing are expressed as a beta relative to the change in the prime rate. For instance, a 50% beta would correspond to a deposit rate that would increase 0.5% for every 1% increase in the prime rate. Projected betas for interest bearing non-maturity deposit repricing are a key component of determining the Company's interest rate risk positioning. Should realized betas be higher than projected betas, the expected benefit from higher interest rates would be diminished. The following table presents an example of the potential impact of an increase in repricing betas on Synovus' realized interest rate sensitivity position.

Change in Short-term Interest Rates (in basis points)	As of March 31, 2015	
	Base Scenario	15% Increase in Average Repricing Beta
+200	7.1%	5.6%
+100	4.5%	3.7%

The net interest income simulation model is the primary tool utilized to evaluate potential interest rate risks over a shorter term time horizon. Synovus also evaluates potential longer term interest rate risk through modeling and evaluation of economic value of equity (EVE). Simulation modeling is utilized to measure the economic value of equity and its sensitivity to immediate changes in interest rates. These simulations value only the current balance sheet and do not incorporate growth assumptions used in the net interest income simulation. The economic value of equity is the net fair value of assets, liabilities, and off-balance sheet financial instruments derived from the present value of future cash flows discounted at current market interest rates. From this baseline valuation, Synovus evaluates changes in the value of each of these

items in various interest rate scenarios to determine the net impact on the economic value of equity. As illustrated in the table below, the economic value of equity model indicates that, compared with a valuation assuming stable rates, EVE is projected to increase by 5.4% and 8.4%, assuming an immediate and sustained increase in interest rates of 100 and 200 basis points, respectively.

Immediate Change in Interest Rates (in basis points)	Estimated Change in EVE	
	March 31, 2015	December 31, 2014
+200	8.4%	6.7%
+100	5.4%	4.4%

Table of Contents

ADDITIONAL DISCLOSURES

Recently Issued Accounting Standards

The following ASUs will be implemented effective January 1, 2016 or later:

ASU 2014-09, Revenue from Contracts with Customers. ASU 2014-09 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The standard is intended to increase comparability across industries and jurisdictions. The core principle of the revenue model is that a company will recognize revenue when it transfers control of goods or services to customers at an amount that reflects the consideration to which it expects to be entitled in exchange for those goods or services.

On April 29, 2015, the FASB issued an exposure draft of a proposed ASU that would delay by one year the effective date of ASU 2014-09. Under the proposal, the standard would be effective for annual reporting periods beginning after December 15, 2017, and the interim periods within that year, for public business entities. As such, for Synovus, the ASU will be effective on January 1, 2018. This proposal represents a one-year deferral from the original effective date.

The proposal would permit early adoption for all entities (i.e., both public business entities and other entities) as of the original effective date for public business entities, which was annual reporting periods beginning after December 15, 2016, and the interim periods within that year. Early adoption prior to this date would not be permitted.

Additionally, at a joint meeting of the FASB and IASB, the FASB and IASB tentatively decided to clarify certain aspects of their new revenue recognition standard in response to implementation questions from stakeholders, many of which have been discussed at meetings of the boards' joint transition resource group on revenue recognition. Portions of the standard that would be clarified include those related to licenses of intellectual property and identifying performance obligations. Other potential amendments that have been discussed include the addition of practical expedients related to the presentation of sales tax and the determination of contract modifications, clarifications related to the measurement of noncash consideration, and amendments to the assessment of collectability.

The FASB staff will draft a proposed ASU for possible ratification by the Board at a future meeting. It is possible that the draft may be exposed in June or July of 2015.

Management is currently evaluating the impact of this ASU on Synovus' consolidated financial statements. The standard is expected to potentially impact ORE sales, interchange revenue, credit card loyalty programs, uncollectible credit card interest and fees, asset managers' performance fees, treasury management services revenue, and miscellaneous fees; however the overall financial statement impact for Synovus is not expected to be material.

Extensive new disclosures will be required, including disaggregation of total revenue, information about performance obligations, changes in contract asset and liability account balances between periods, and information about key judgments and estimates and policy decisions regarding revenue recognition.

ASU 2015-02, Amendments to the Consolidation Analysis. ASU 2015-02 was issued by the FASB to modify the analysis that companies must perform to determine whether a legal entity should be consolidated. ASU 2015-02 simplifies current consolidation rules by reducing the number of consolidation models; placing more emphasis on risk of loss when determining a controlling financial interest; reducing the frequency of the application of related-party guidance when determining a controlling financial interest in a variable interest entity (VIE); and changing consolidation conclusions for public and private companies in several industries that typically make use of limited partnerships or VIEs. Although the ASU is expected to result in the deconsolidation of many entities, companies will need to reevaluate all their previous consolidation conclusions. ASU 2015-02 will be effective for annual reporting periods beginning after December 15, 2015. Early adoption is permitted. Management is currently evaluating the impact of the accounting update on Synovus' consolidated financial statements.

ASU 2015-03, Simplifying the Presentation of Debt Issuance Costs. On April 7, 2015, the FASB issued a new ASU that intends to simplify the presentation of debt issuance costs. The new standard will more closely align the presentation of debt issuance costs under U.S. GAAP with the presentation under comparable IFRS standards. Under current accounting standards, debt issuance costs are reported on the balance sheet as assets and amortized as interest expense. The new ASU requires that debt issuance costs be presented on the balance sheet as a direct

deduction from the carrying amount of the related debt liability, which is similar to the presentation of debt discounts or premiums. The costs will continue to be amortized to interest expense using the effective interest method. The cost of issuing debt will no longer be recorded as a separate asset, except when incurred before receipt of the funding from the associated debt liability. The ASU requires retrospective application to all prior periods presented in the financial statements. The ASU is effective for public business entities for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Adoption of ASU 2015-03 will not have a material impact on Synovus' consolidated financial statements.

See Note 1 of the notes to the unaudited interim consolidated financial statements for a discussion of recently issued accounting standards updates.

Table of Contents

Critical Accounting Policies

The accounting and financial reporting policies of Synovus are in accordance with U.S. GAAP and conform to the accounting and reporting guidelines prescribed by bank regulatory authorities. Synovus has identified certain of its accounting policies as “critical accounting policies,” consisting of those related to the allowance for loan losses, deferred tax assets valuation allowance, other real estate, and determining the fair value of financial instruments. In determining which accounting policies are critical in nature, Synovus has identified the policies that require significant judgment or involve complex estimates. It is management's practice to discuss critical accounting policies with the Board of Directors' Audit Committee, including the development, selection, implementation and disclosure of the critical accounting policies. The application of these policies has a significant impact on Synovus' unaudited interim consolidated financial statements. Synovus' financial results could differ significantly if different judgments or estimates are used in the application of these policies. All accounting policies described in Note 1 - Summary of Significant Accounting Policies in Synovus' 2014 Form 10-K should be reviewed for a greater understanding of how we record and report our financial performance. During the three months ended March 31, 2015, there have been no significant changes to Synovus' critical accounting policies, estimates and assumptions, or the judgments affecting the application of these estimates and assumptions from those disclosed in Synovus' 2014 Form 10-K.

Non-GAAP Financial Measures

The measures entitled adjusted pre-tax, pre-credit costs income, adjusted non-interest income, adjusted non-interest expense, average core deposits, average core deposits excluding average SCM deposits, average non-interest bearing demand deposits excluding average SCM deposits, the tangible common equity to tangible assets ratio, Tier 1 common equity and the Tier 1 common equity ratio are not measures recognized under U.S. GAAP and therefore are considered non-GAAP financial measures. The most comparable GAAP measures are income before income taxes, total non-interest income, total non-interest expense, total deposits, the ratio of total shareholders' equity to total assets, Tier 1 capital, and the ratio of Tier 1 capital to risk-weighted assets, respectively.

Management uses these non-GAAP financial measures to assess the performance of Synovus' core business and the strength of its capital position. Synovus believes that these non-GAAP financial measures provide meaningful additional information about Synovus to assist investors in evaluating Synovus' operating results, financial strength and capital position. These non-GAAP financial measures should not be considered as a substitute for operating results determined in accordance with GAAP and may not be comparable to other similarly titled measures at other companies. Adjusted pre-tax, pre-credit costs income is a measure used by management to evaluate core operating results exclusive of credit costs as well as certain revenues and expenses such as investment securities gains, net and restructuring charges. Adjusted non-interest income is a measure used by management to evaluate non-interest income exclusive of net investment securities gains and other non-recurring income items. Adjusted non-interest expense is a measure used by management to gauge the success of expense management initiatives focused on reducing recurring controllable operating costs. Average core deposits, average core deposits excluding average SCM deposits, and average non-interest bearing demand deposits excluding average SCM deposits are measures used by management to evaluate organic growth of deposits and the quality of deposits as a funding source. The tangible common equity to tangible assets ratio, Tier 1 common equity, and the Tier 1 common equity ratio are used by management and investment analysts to assess the strength of Synovus' capital position. The computations of these measures are set forth in the tables below.

⁽²⁾ Consists of litigation settlement expenses with respect to certain legal matters. Amounts for other periods presented herein are not reported separately as amounts are not material.

⁽³⁾ Under Basel I, only one year of projected future taxable income may be applied in calculating deferred tax assets for regulatory capital purposes.

ITEM 3. – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information presented in the Market Risk Analysis section of the Management's Discussion and Analysis of Financial Condition and Results of Operations is incorporated herein by reference.

ITEM 4. – CONTROLS AND PROCEDURES

In connection with the preparation of this Quarterly Report on Form 10-Q, an evaluation was carried out by Synovus' management, with the participation of Synovus' Chief Executive Officer and Chief Financial Officer, of the effectiveness of Synovus' disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Based on that evaluation, Synovus' Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2015, Synovus' disclosure controls and procedures were effective.

There have been no material changes in Synovus' internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2015 that has materially affected, or is reasonably likely to materially affect, Synovus' internal controls over financial reporting.

PART II. – OTHER INFORMATION

ITEM 1. – LEGAL PROCEEDINGS

Synovus and its subsidiaries are subject to various legal proceedings and claims that arise in the ordinary course of its business. Additionally, in the ordinary course of business, Synovus and its subsidiaries are subject to regulatory examinations, information gathering requests, inquiries and investigations. In the wake of the recent financial crisis, Synovus, like many other financial institutions, has been the target of numerous legal actions and other proceedings asserting claims for damages and related relief for losses resulting from the recent financial crisis. These actions include claims and counterclaims asserted by individual borrowers related to their loans and allegations of violations of state and federal laws and regulations relating to banking practices, including several purported putative class action matters. In addition to actual damages if Synovus does not prevail in such asserted legal action, credit-related litigation could result in additional write-downs or charge-offs of assets, which could adversely affect Synovus' results of operations during the period in which the write-down or charge-off occurred.

Based on Synovus' current knowledge and advice of counsel, management presently does not believe that the liabilities arising from these legal matters will have a material adverse effect on Synovus' consolidated financial condition, results of operations or cash flows. However, it is possible that the ultimate resolution of these legal matters could have a material adverse effect on Synovus' results of operations for any particular period. For additional information, see "Part I - Item 1. Financial Statements - Note 14 - Legal Proceedings" of this Report, which Note is incorporated herein by this reference.

ITEM 1A. – RISK FACTORS

In addition to the other information set forth in this Report, you should carefully consider the factors discussed in "Risk Factors" in Part I-Item 1A of Synovus' 2014 Form 10-K which could materially affect its business, financial position, results of operations, cash flows, or future results. Please be aware that these risks may change over time and other risks may prove to be important in the future. New risks may emerge at any time, and we cannot predict such risks or estimate the extent to which they may affect our business, financial condition or results of operations, or the trading price of our securities.

There were no material changes during the period covered by this Report to the risk factors previously disclosed in Synovus' 2014 10-K.

ITEM 2. – UNREGISTERED SALES OF SECURITIES AND USE OF PROCEEDS

(a) None.

(b) None.

(c) Issuer Purchases of Equity Securities:

On October 21, 2014, Synovus announced a \$250 million share repurchase program, which will expire on October 23, 2015. The table below sets forth information regarding repurchases of our common stock during the first quarter of 2015.

Share Repurchases	Total Number of Shares Repurchased	Average Price Paid per Share ⁽¹⁾	Total Number of Shares Repurchased as Part of Publicly Announced Plans or Programs	Maximum Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
January 2015	861,398	\$25.25	861,398	\$150,313,557
February 2015	730,000	27.44	730,000	130,283,496
March 2015	980,200	27.96	980,200	102,874,690
Total	2,571,598	\$26.91	2,571,598	\$102,874,690

⁽¹⁾ The average price paid per share is calculated on a trade date basis for all open market transactions and excludes commissions and other transaction expenses. The average price paid per share for January 2015 excludes \$4.4 million relating to final settlement for 2,510,460 shares repurchased in October 2014 in conjunction with the accelerated share repurchase (ASR) agreement discussed below.

During October 2014, Synovus entered into an accelerated share repurchase (ASR) agreement to purchase \$75.0 million of Synovus common stock, under the share repurchase program. As of December 31, 2014, Synovus had repurchased 2,510,460 shares of common stock under the ASR agreement. During January 2015, Synovus repurchased 391,612 shares of common stock upon completion of the ASR agreement. In total, the average repurchase price pursuant to the ASR agreement was \$25.84 per

71

Table of Contents

share. Additionally, during the first quarter of 2015, Synovus repurchased \$59.1 million, or 2.2 million shares, of common stock through open market transactions under the share repurchase program.
