Form 10-Q
November 09, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM
10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the quarterly period ended September 30, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____
Commission File Number: 001-31566
PROVIDENT FINANCIAL SERVICES, INC.
(Exact Name of Registrant as Specified in Its Charter)

Delaware 42-1547151
(State or Other Jurisdiction of Incorporation or Organization) (I.R.S. Employer Identification No.)

239 Washington Street, Jersey City, New Jersey 07302
(Address of Principal Executive Offices) (Zip Code)

(732) 590-9200
(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding twelve months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding twelve months (or for such shorter period that the Registrant was required to submit and post such files). YES NO

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer

Non-Accelerated Filer Smaller Reporting Company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

As of November 1, 2016 there were 83,209,293 shares issued and 66,377,471 shares outstanding of the Registrant's Common Stock, par value \$0.01 per share, including 334,433 shares held by the First Savings Bank Directors' Deferred Fee Plan not otherwise considered outstanding under U.S. generally accepted accounting principles.

PROVIDENT FINANCIAL SERVICES, INC. AND SUBSIDIARY
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

A. Basis of Financial Statement Presentation

The accompanying unaudited consolidated financial statements include the accounts of Provident Financial Services, Inc. and its wholly owned subsidiary, Provident Bank (the “Bank,” together with Provident Financial Services, Inc., the “Company”).

In preparing the interim unaudited consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated statements of financial condition and the consolidated statements of income for the periods presented. Actual results could differ from these estimates. The allowance for loan losses, the valuation of securities available for sale and the valuation of deferred tax assets are material estimates that are particularly susceptible to near-term change.

The interim unaudited consolidated financial statements reflect all normal and recurring adjustments, which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three and nine months ended September 30, 2016 are not necessarily indicative of the results of operations that may be expected for all of 2016.

Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission.

These unaudited consolidated financial statements should be read in conjunction with the December 31, 2015 Annual Report to Stockholders on Form 10-K.

B. Earnings Per Share

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share calculations for the three and nine months ended September 30, 2016 and 2015 (dollars in thousands, except per share amounts):

	Three months ended September 30,					
	2016			2015		
	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount
Net income	\$22,906			\$20,609		
Basic earnings per share:						
Income available to common stockholders	\$22,906	63,728,393	\$ 0.36	\$20,609	63,034,185	\$ 0.33
Dilutive shares		206,493			164,114	
Diluted earnings per share:						
Income available to common stockholders	\$22,906	63,934,886	\$ 0.36	\$20,609	63,198,299	\$ 0.33

	Nine months ended September 30,			2015		
	2016	Weighted Average Common Shares Outstanding	Per Share Amount	Net Income	Weighted Average Common Shares Outstanding	Per Share Amount
Net income	\$65,235			\$62,207		
Basic earnings per share:						
Income available to common stockholders	\$65,235	63,545,065	\$ 1.03	\$62,207	62,868,745	\$ 0.99
Dilutive shares		182,658			160,644	
Diluted earnings per share:						
Income available to common stockholders	\$65,235	63,727,723	\$ 1.02	\$62,207	63,029,389	\$ 0.99

Anti-dilutive stock options and awards at September 30, 2016 and 2015, totaling 528,205 shares and 518,433 shares, respectively, were excluded from the earnings per share calculations.

Note 2. Business Combinations

On April 1, 2015, Beacon Trust Company ("Beacon"), a wholly owned subsidiary of Provident Bank, completed its acquisition of certain assets and liabilities of The MDE Group, Inc. and the equity interests of Acertus Capital Management, LLC (together "MDE"), both Morristown, New Jersey-based registered investment advisory firms that manage assets for affluent and high net-worth clients. MDE was acquired with both cash and contingent consideration.

The Company recognized goodwill of \$18.3 million and a customer relationship intangible of \$7.0 million related to the MDE acquisition. The Company recognized a contingent consideration liability at its fair value of \$338,000. The contingent consideration arrangement requires the Company to pay additional cash consideration to MDE's former stakeholders four years after the closing of the acquisition if certain revenue targets are met. The fair value of the contingent consideration was estimated using a discounted cash flow model. The acquisition agreement limits the total payment to a maximum of \$12.5 million, to be determined based on actual future results. In accordance with the acquisition agreement and based upon the Company's projection of future revenue, no contingent consideration liability was required at September 30, 2016.

Note 3. Investment Securities

At September 30, 2016, the Company had \$1.03 billion and \$476.4 million in available for sale and held to maturity investment securities, respectively. Many factors, including lack of liquidity in the secondary market for certain securities, variations in pricing information, regulatory actions, changes in the business environment or any changes in the competitive marketplace could have an adverse effect on the Company's investment portfolio which could result in other-than-temporary impairment ("OTTI") on certain investment securities in future periods. The total number of held to maturity and available for sale securities in an unrealized loss position as of September 30, 2016 totaled 76, compared with 163 at December 31, 2015. All securities with unrealized losses at September 30, 2016 were analyzed for other-than-temporary impairment. Based upon this analysis, the Company believes that as of September 30, 2016, such securities with unrealized losses do not represent impairments that are other-than-temporary.

Securities Available for Sale

The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the fair value for securities available for sale at September 30, 2016 and December 31, 2015 (in thousands):

	September 30, 2016			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
US Treasury obligations	\$7,998	33	—	8,031
Agency obligations	69,169	221	—	69,390
Mortgage-backed securities	915,693	20,275	(187)	935,781
State and municipal obligations	4,162	191	—	4,353
Corporate obligations	14,014	127	(9)	14,132
Equity securities	397	151	—	548
	\$1,011,433	20,998	(196)	1,032,235
	December 31, 2015			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
US Treasury obligations	\$8,006	—	(2)	8,004
Agency obligations	82,396	82	(148)	82,330
Mortgage-backed securities	857,430	9,828	(3,397)	863,861
State and municipal obligations	4,193	115	—	4,308
Corporate obligations	5,516	6	(10)	5,512
Equity securities	397	122	—	519
	\$957,938	10,153	(3,557)	964,534

The amortized cost and fair value of securities available for sale at September 30, 2016, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	September 30, 2016	
	Amortized cost	Fair value
Due in one year or less	\$43,489	43,565
Due after one year through five years	35,924	36,103
Due after five years through ten years	15,930	16,238
Due after ten years	—	—
	\$95,343	95,906

Mortgage-backed securities totaling \$915.7 million at amortized cost and \$935.8 million at fair value are excluded from the table above as their expected lives are likely to be shorter than the contractual maturity date due to principal prepayments. Also excluded from the table above are equity securities of \$397,000 at amortized cost and \$548,000 at fair value.

For the three months ended September 30, 2016, proceeds from sales on securities available for sale totaled \$1.2 million resulting in no gross gains and \$45,000 of gross losses. No securities were sold from the available for sale portfolio during the three months ended September 30, 2015.

For the nine months ended September 30, 2016, proceeds from the sale of securities available for sale were \$3.4 million, resulting in gross gains of \$95,000 and gross losses of \$45,000. For the same period last year, proceeds from the sale of securities available for sale were \$14.0 million, resulting in gross gains of \$643,000 and no gross losses. For the nine months ended September 30, 2016, there were no calls of securities in the available for sale portfolio. For the same period last year, proceeds from calls on securities available for sale totaled \$465,000, resulting in gross gains of \$2,000 and no gross losses.

The Company did not incur an OTTI charge on securities in the available for sale portfolio for the three and nine months ended September 30, 2016 and 2015.

The following tables represent the Company's disclosure regarding securities available for sale with temporary impairment at September 30, 2016 and December 31, 2015 (in thousands):

	September 30, 2016 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Mortgage-backed securities	\$61,786	(181)	398	(6)	62,184	(187)
Corporate obligations	—	—	992	(9)	992	(9)
	\$61,786	(181)	1,390	(15)	63,176	(196)
	December 31, 2015 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
U.S. Treasury obligations	\$8,004	(2)	—	—	8,004	(2)
Agency obligations	59,197	(148)	—	—	59,197	(148)
Mortgage-backed securities	327,263	(2,427)	47,911	(970)	375,174	(3,397)
Corporate obligations	500	—	992	(10)	1,492	(10)
	\$394,964	(2,577)	48,903	(980)	443,867	(3,557)

The temporary loss position associated with certain securities available for sale was the result of changes in market interest rates relative to the coupon of the individual security and changes in credit spreads. The Company does not have the intent to sell securities in a temporary loss position at September 30, 2016, nor is it more likely than not that the Company will be required to sell the securities before their prices recover.

The number of available for sale securities in an unrealized loss position at September 30, 2016 totaled 16, compared with 64 at December 31, 2015. At September 30, 2016, there were three private label mortgage-backed securities in an unrealized loss position, with an amortized cost of \$523,000 and an unrealized loss of \$6,000. None of these private label mortgage-backed securities were below investment grade at September 30, 2016.

The Company estimates the loss projections for each security by stressing the individual loans collateralizing the security and applying a range of expected default rates, loss severities, and prepayment speeds in conjunction with the underlying credit enhancement for each security. Based on specific assumptions about collateral and vintage, a range of possible cash flows was identified to determine whether OTTI existed during the nine months ended September 30, 2016. The Company believes that no OTTI of the securities available for sale portfolio existed for the three and nine months ended September 30, 2016.

Investment Securities Held to Maturity

The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the estimated fair value for investment securities held to maturity at September 30, 2016 and December 31, 2015 (in thousands):

	September 30, 2016			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	\$2,688	3	(3)	2,688
Mortgage-backed securities	1,037	42	—	1,079
State and municipal obligations	462,603	19,411	(320)	481,694
Corporate obligations	10,031	31	(7)	10,055
	\$476,359	19,487	(330)	495,516

	December 31, 2015			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
Agency obligations	\$4,096	9	(8)	4,097
Mortgage-backed securities	1,597	61	—	1,658
State and municipal obligations	458,062	15,094	(495)	472,661
Corporate obligations	9,929	11	(25)	9,915
	\$473,684	15,175	(528)	488,331

The Company generally purchases securities for long-term investment purposes, and differences between amortized cost and fair values may fluctuate during the investment period. There were no sales of securities from the held to maturity portfolio for the three and nine months ended September 30, 2016 and 2015. For the three and nine months ended September 30, 2016, proceeds from calls on certain securities in the held to maturity portfolio totaled \$20.3 million and \$35.2 million, respectively, with gross gains recognized of \$2,000 and \$4,000, respectively and no gross losses in either period. For the three and nine months ended September 30, 2015, proceeds from calls of certain securities in the held to maturity portfolio totaled \$8.0 million and \$21.2 million, respectively, with gross gains totaling \$5,000 and no gross losses recognized in either period.

The amortized cost and fair value of investment securities in the held to maturity portfolio at September 30, 2016 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

	September 30, 2016	
	Amortized cost	Fair value
Due in one year or less	\$14,256	14,296
Due after one year through five years	50,309	51,462
Due after five years through ten years	238,948	250,709
Due after ten years	171,809	177,970
	\$475,322	494,437

Mortgage-backed securities totaling \$1.0 million at amortized cost and \$1.1 million at fair value are excluded from the table above as their expected lives are likely to be shorter than the contractual maturity date due to principal prepayments.

The following tables represent the Company's disclosure on investment securities held to maturity with temporary impairment at September 30, 2016 and December 31, 2015 (in thousands):

	September 30, 2016 Unrealized Losses					
	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses

Agency obligations	\$1,244	(6)	278	(2)	1,522	(8)
State and municipal obligations	24,266	(165)	17,746	(330)	42,012	(495)
Corporate obligations	5,840	(18)	744	(7)	6,584	(25)
	\$31,350	(189)	18,768	(339)	50,118	(528)

14

Based upon the review of the held to maturity securities portfolio, the Company believes that as of September 30, 2016, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary. The review of the portfolio for OTTI considers the percentage and length of time the fair value of an investment is below book value, as well as general market conditions, changes in interest rates, credit risks, whether the Company has the intent to sell the securities and whether it is more likely than not that the Company would be required to sell the securities before their prices recover.

The number of held to maturity securities in an unrealized loss position at September 30, 2016 totaled 60, compared with 99 at December 31, 2015. The decrease in the number of securities in an unrealized loss position at September 30, 2016, was largely due to a decrease in market interest rates from December 31, 2015. All temporarily impaired investment securities were investment grade at September 30, 2016.

Note 4. Loans Receivable and Allowance for Loan Losses

Loans receivable at September 30, 2016 and December 31, 2015 are summarized as follows (in thousands):

	September 30, 2016	December 31, 2015
Mortgage loans:		
Residential	\$1,213,507	1,254,036
Commercial	1,884,155	1,714,923
Multi-family	1,384,428	1,233,792
Construction	316,803	331,649
Total mortgage loans	4,798,893	4,534,400
Commercial loans	1,553,606	1,433,447
Consumer loans	538,061	566,175
Total gross loans	6,890,560	6,534,022
Purchased credit-impaired ("PCI") loans	1,691	3,435
Premiums on purchased loans	5,330	5,740
Unearned discounts	(39)	(41)
Net deferred fees	(6,956)	(5,482)
Total loans	\$6,890,586	6,537,674

The following tables summarize the aging of loans receivable by portfolio segment and class of loans, excluding PCI loans (in thousands):

September 30, 2016

	30-59 Days	60-89 Days	Non-accrual	Recorded Investment > 90 days accruing	Total Past Due	Current	Total Loans Receivable
Mortgage loans:							
Residential	\$7,147	7,579	11,317	—	26,043	1,187,464	1,213,507
Commercial	1,574	—	5,679	—	7,253	1,876,902	1,884,155
Multi-family	—	—	1,113	—	1,113	1,383,315	1,384,428
Construction	—	—	2,692	—	2,692	314,111	316,803
Total mortgage loans	8,721	7,579	20,801	—	37,101	4,761,792	4,798,893
Commercial loans	1,754	297	16,436	—	18,487	1,535,119	1,553,606
Consumer loans	2,388	1,000	2,779	—	6,167	531,894	538,061
Total gross loans	\$12,863	8,876	40,016	—	61,755	6,828,805	6,890,560

December 31, 2015

	30-59 Days	60-89 Days	Non-accrual	Recorded Investment > 90 days accruing	Total Past Due	Current	Total Loans Receivable
Mortgage loans:							
Residential	\$8,983	5,434	12,031	—	26,448	1,227,588	1,254,036
Commercial	1,732	543	1,263	—	3,538	1,711,385	1,714,923
Multi-family	763	506	742	—	2,011	1,231,781	1,233,792
Construction	—	—	2,351	—	2,351	329,298	331,649
Total mortgage loans	11,478	6,483	16,387	—	34,348	4,500,052	4,534,400
Commercial loans	632	801	23,875	165	25,473	1,407,974	1,433,447
Consumer loans	3,603	1,194	4,109	—	8,906	557,269	566,175
Total gross loans	\$15,713	8,478	44,371	165	68,727	6,465,295	6,534,022

Included in loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The principal amounts of these non-accrual loans were \$40.0 million and \$44.4 million at September 30, 2016 and December 31, 2015, respectively. Included in non-accrual loans were \$5.4 million and \$18.3 million of loans which were less than 90 days past due at September 30, 2016 and December 31, 2015, respectively. There were no loans 90 days or greater past due and still accruing interest at September 30, 2016. At December 31, 2015, there was one commercial loan for \$165,000 which was ninety days or greater past due and still accruing interest. This loan was past due for maturity and well secured at December 31, 2015, and subsequent to the end of the year was renewed by the Company.

The Company defines an impaired loan as a non-homogeneous loan greater than \$1.0 million for which it is probable, based on current information, all amounts due under the contractual terms of the loan agreement will not be collected. Impaired loans also include all loans modified as troubled debt restructurings (“TDRs”). A loan is deemed to be a TDR when a loan modification resulting in a concession is made in an effort to mitigate potential loss arising from a borrower’s financial difficulty. Smaller balance homogeneous loans, including residential mortgages and other consumer loans, are evaluated collectively for impairment and are excluded from the definition of impaired loans, unless modified as TDRs. The Company separately calculates the reserve for loan losses on impaired loans. The Company may recognize impairment of a loan based upon: (1) the present value of expected cash flows discounted at the effective interest rate; (2) if a loan is collateral dependent, the fair value of collateral; or (3) the fair value of the loan. Additionally, if impaired loans have risk characteristics in common, those loans may be aggregated and historical statistics may be used as a means of measuring those impaired loans.

The Company uses third-party appraisals to determine the fair value of the underlying collateral in its analyses of collateral dependent impaired loans. A third-party appraisal is generally ordered as soon as a loan is designated as a collateral dependent impaired loan and is updated annually or more frequently, if required.

A specific allocation of the allowance for loan losses is established for each collateral dependent impaired loan with a carrying balance greater than the collateral’s fair value, less estimated costs to sell. Charge-offs are generally taken for the amount of the specific allocation when operations associated with the respective property cease and it is determined that collection of amounts due will be derived primarily from the disposition of the collateral. At each quarter end, if a loan is designated as a collateral dependent impaired loan and the third party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management’s knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value. The Company believes there have been no significant time lapses as a result of this process.

At September 30, 2016, there were 139 impaired loans totaling \$44.4 million. Included in this total were 115 TDRs related to 114 borrowers totaling \$21.1 million that were performing in accordance with their restructured terms and which continued to accrue interest at September 30, 2016. At December 31, 2015, there were 148 impaired loans totaling \$50.9 million. Included in this total were 122 TDRs to 120 borrowers totaling \$26.0 million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2015. The following table summarizes loans receivable by portfolio segment and impairment method, excluding PCI loans (in thousands):

	September 30, 2016			
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments
Individually evaluated for impairment	\$28,694	13,472	2,249	44,415
Collectively evaluated for impairment	4,770,199	1,540,134	535,812	6,846,145
Total gross loans	\$4,798,893	1,553,606	538,061	6,890,560
	December 31, 2015			
	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Individually evaluated for impairment	\$26,743	21,756	2,368	50,867
Collectively evaluated for impairment	4,507,657	1,411,691	563,807	6,483,155
Total gross loans	\$4,534,400	1,433,447	566,175	6,534,022

17

The allowance for loan losses is summarized by portfolio segment and impairment classification as follows (in thousands):

	September 30, 2016			
	Mortgage loans	Commercial loans	Consumer loans	Total
Individually evaluated for impairment	\$1,963	81	83	2,127
Collectively evaluated for impairment	27,691	28,158	3,112	58,961
Total gross loans	\$29,654	28,239	3,195	61,088
	December 31, 2015			
	Mortgage loans	Commercial loans	Consumer loans	Total
Individually evaluated for impairment	\$2,086	91	94	2,271
Collectively evaluated for impairment	30,008	25,738	3,407	59,153
Total gross loans	\$32,094	25,829	3,501	61,424

Loan modifications to borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, the Company attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.

The following tables present the number of loans modified as TDRs during the three and nine months ended September 30, 2016 and 2015, along with their balances immediately prior to the modification date and post-modification as of September 30, 2016 and 2015. There were no loans modified as TDRs during the three and nine months ended September 30, 2016.

Total restructured loans	— \$	— \$	13	\$ 11,574

All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. Estimated collateral values of collateral dependent impaired loans modified during the three and nine months ended September 30, 2015 exceeded the carrying amounts of such loans. There were charge-offs recorded on two collateral dependent impaired loans of \$312,000 for the three and nine months ended September 30, 2015, which are included in the preceding tables. For the three and nine months ended September 30, 2015, the allowance for loan losses associated with the TDRs presented in the preceding tables totaled \$0 and \$82,000, respectively and were included in the allowance for loan losses for loans individually evaluated for impairment.

For the three and nine months ended September 30, 2015, the TDRs presented in the preceding tables had a weighted average modified interest rate of approximately 3.00% and 5.26%, respectively, compared to a rate of 3.00% and 5.71% prior to modification, respectively.

There were no payment defaults (90 days or more past due) for loans modified as TDRs within the 12 month periods ending September 30, 2016 and 2015. TDRs that subsequently default are considered collateral dependent impaired loans and are evaluated for impairment based on the estimated fair value of the underlying collateral less expected selling costs.

PCI loans are loans acquired at a discount primarily due to deteriorated credit quality. As part of the May 30, 2014 acquisition of Team Capital, \$5.2 million of the loans acquired were determined to be PCI loans. At the date of acquisition, PCI loans were accounted for at fair value, based upon the then present value of expected future cash flows, with no related allowance for loan losses.

PCI loans declined \$1.7 million to \$1.7 million at September 30, 2016, from \$3.4 million at December 31, 2015. The decrease from December 31, 2015, was largely due to the full repayment and greater than projected cash flows on certain PCI loans. This resulted in a \$179,000 and a \$682,000 increase in interest income for the three and nine months ended September 30, 2016, respectively, largely due to the acceleration of accretable and non-accretable discounts on these loans. For the three and nine months ended September 30, 2015, \$129,000 and \$349,000, respectively, of accretable and non-accretable discounts were similarly accelerated and recognized in interest income. The following table summarizes the changes in the accretable yield for PCI loans during the three and nine months ended September 30, 2016 and 2015 (in thousands):

	Three months ended September 30, 2016		Nine months ended September 30, 2015	
	2016	2015	2016	2015
Beginning balance	\$328	609	676	695
Accretion	(225)	(220)	(1,065)	(683)

Reclassification from non-accretable discount	209	172	701	549
Ending balance	\$312	561	312	561

The activity in the allowance for loan losses by portfolio segment for the three and nine months ended September 30, 2016 and 2015 was as follows (in thousands):

Three months ended September 30, 2016	Mortgage loans	Commercial loans	Consumer loans	Total Portfolio Segments	Unallocated (1)	Total
Balance at beginning of period	\$31,634	26,299	3,000	60,933	—	60,933
Provision charged to operations	(1,599)	2,378	221	1,000	—	1,000
Recoveries of loans previously charged-off	2	68	160	230	—	230
Loans charged-off	(383)	(506)	(186)	(1,075)	—	(1,075)
Balance at end of period	\$29,654	28,239	3,195	61,088	—	61,088
2015						
Balance at beginning of period	\$31,824	22,840	4,570	59,234	390	59,624

Balance at end of period	\$31,622	25,076	3,739	60,437	27	60,464

(1) For the year ended December 31, 2015, the Company enhanced its allowance for loan losses process and allocated the previously unallocated allowance using both qualitative and quantitative factors.

The following table presents loans individually evaluated for impairment by class and loan category, excluding PCI loans (in thousands):

	September 30, 2016					December 31, 2015				
	Unpaid Principal Balance	Recorded Investment	Related Allowance	Average Recorded Investment	Interest Income Recognized	Unpaid Principal Balance	Recorded Investment	Related Allowance	Average Recorded Investment	Interest Income Recognized
Loans with no related allowance

Specific allocations of the allowance for loan losses attributable to impaired loans totaled \$2.1 million at September 30, 2016 and \$2.3 million at December 31, 2015. At September 30, 2016 and December 31, 2015, impaired loans for which there was no related allowance for loan losses totaled \$28.5 million and \$33.4 million, respectively. The average balance of impaired loans for the nine months ended September 30, 2016 was \$45.5 million.

The Company utilizes an internal nine-point risk rating system to summarize its loan portfolio into categories with similar risk characteristics. Loans deemed to be “acceptable quality” are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to be of “questionable quality” are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial, multi-family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and by the Credit Administration Department. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party. Reports by the independent third party are presented directly to the Audit Committee of the Board of Directors. Loans receivable by credit quality risk rating indicator, excluding PCI loans, are as follows (in thousands):

At September 30, 2016

	Residential	Commercial mortgage	Multi-family	Construction	Total mortgages	Commercial	Consumer	Total loans
Special mention	\$7,579	21,595	—	—	29,174	18,035	1,000	48,209
Substandard	12,549	25,046	1,237	2,517	41,349	34,943	2,728	79,020

Note 5. Deposits

Deposits at September 30, 2016 and December 31, 2015 are summarized as follows (in thousands):

	September 30, 2016	December 31, 2015
Savings	\$1,074,708	985,478
Money market	1,586,397	1,468,352
NOW	1,908,250	1,540,894
Non-interest bearing	1,289,713	1,189,542
Certificates of deposit	668,430	739,721
Total deposits	\$6,527,498	5,923,987

Note 6. Components of Net Periodic Benefit Cost

The Bank has a noncontributory defined benefit pension plan covering its full-time employees who had attained age 21 with at least one year of service as of April 1, 2003. The pension plan was frozen on April 1, 2003. All participants in the Plan are 100% vested. The pension plan's assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial.

In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank's retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen as to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen as to new entrants and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006.

Net periodic benefit (increase) cost for pension benefits and other post-retirement benefits for the three and nine months ended September 30, 2016 and 2015 includes the following components (in thousands):

	Three months ended September 30,		Other post- retirement benefits		Nine months ended September 30,		Other post- retirement benefits	
	Pension benefits	2016 2015	2016 2015	2016 2015	Pension benefits	2016 2015	2016 2015	2016 2015
Service cost	\$—	—	37	42	\$—	—	112	126
Interest cost	312	284	285	280	936	852	854	842
Expected return on plan assets	(612)	(632)	—	—	(1,836)	(1,898)	—	—
Amortization of prior service cost	—	—	—	—	—	—	—	—
Amortization of the net loss	236	193	—	—	708	581	—	—
Net periodic benefit (increase) cost	\$(64)	(155)	322	322	\$(192)	(465)	966	968

In its consolidated financial statements for the year ended December 31, 2015, the Company previously disclosed that it does not expect to contribute to the pension plan in 2016. As of September 30, 2016, no contributions have been made to the pension plan.

The net periodic benefit (increase) cost for pension benefits and other post-retirement benefits for the three and nine months ended September 30, 2016 were calculated using the actual January 1, 2016 pension and other post-retirement benefits valuations.

Note 7. Impact of Recent Accounting Pronouncements

In June 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-13, "Measurement of Credit Losses on Financial Instruments." The main objective of this ASU is to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments by a reporting entity at each reporting date. The amendments in this ASU require financial assets measured at amortized cost to be presented at the net amount expected to be collected. The allowance for credit losses would represent a valuation account that would be deducted from the amortized cost basis of the financial asset(s) to present the net carrying value at the amount expected to be collected on the financial asset. The income statement would reflect the measurement of credit losses for newly recognized financial assets, as well as the expected increases or decreases of expected credit losses that have taken place during the period. The measurement of expected credit losses would be based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. An entity will be required to use judgment in determining the relevant information and estimation methods that are appropriate in its circumstances. The amendments in ASU 2016-13 are effective for fiscal years, including interim periods, beginning after December 15, 2019. Early adoption of this ASU is permitted for fiscal years beginning after December 15, 2018. The Company is currently assessing the impact that the guidance will have on the Company's consolidated financial

statements.

In March 2016, the FASB issued ASU No. 2016-09, "Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting." ASU No. 2016-09 simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, classification on the statement of cash flows, and accounting for forfeitures. The Company adopted ASU No. 2016-09 prospectively, effective for the third quarter of 2016. Upon adoption, the Company recorded an immaterial cumulative-effect adjustment to the opening balance

23

of retained earnings. In addition, ASU No. 2016-09 requires that excess tax benefits and shortfalls be recorded as income tax benefit or expense in the income statement, rather than as equity. This resulted in an immaterial benefit to income tax expense in the third quarter of 2016. Relative to forfeitures, ASU No. 2016-09 allows an entity's accounting policy election to either continue to estimate the number of awards that are expected to vest, or account for forfeitures when they occur. The Company has elected to account for forfeitures when they occur. The income tax effects of ASU No. 2016-09 on the statement of cash flows are now classified as cash flows from operating activities. The Company elected to apply this cash flow classification guidance prospectively and, therefore, prior periods have not been adjusted. ASU No. 2016-09 also requires the presentation of certain employee withholding taxes as a financing activity on the Consolidated Statement of Cash Flows.

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)." This ASU requires all lessees to recognize a lease liability and a right-of-use asset, measured at the present value of the future minimum lease payments, at the lease commencement date. Lessor accounting remains largely unchanged under the new guidance. The guidance is effective for fiscal years beginning after December 15, 2018, including interim reporting periods within that reporting period, with early adoption permitted. A modified retrospective approach must be applied for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The Company is currently assessing the impact that the guidance will have on the Company's consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, "Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Liabilities." This ASU addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This amendment supersedes the guidance to classify equity securities with readily determinable fair values into different categories, requires equity securities to be measured at fair value with changes in the fair value recognized through net income, and simplifies the impairment assessment of equity investments without readily determinable fair values. The amendment requires public business entities that are required to disclose the fair value of financial instruments measured at amortized cost on the balance sheet to measure that fair value using the exit price notion. The amendment requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option. The amendment requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or in the accompanying notes to the financial statements. The amendment reduces diversity in current practice by clarifying that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available for sale securities in combination with the entity's other deferred tax assets. This amendment is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Entities should apply the amendment by means of a cumulative-effect adjustment as of the beginning of the fiscal year of adoption, with the exception of the amendment related to equity securities without readily determinable fair values, which should be applied prospectively to equity investments that exist as of the date of adoption. The Company is currently evaluating the impact that the guidance will have on the Company's consolidated financial statements.

In September 2015, the FASB issued ASU No. 2015-16, "Business Combinations, Simplifying the Accounting for Measurement - Period Adjustments." The amendments in this update apply to all entities that have reported provisional amounts for items in a business combination for which the accounting is incomplete by the end of the reporting period in which the combination occurs and during the measurement period have an adjustment to provisional amounts recognized. In these cases, the acquirer must record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The amendments in this update are effective for fiscal years beginning after December 15, 2015 including interim periods within those fiscal years. The Company's adoption of this ASU did not have a material impact on its consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period," which requires that

a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. This update is effective for interim and annual periods beginning after December 15, 2015. The amendments can be applied prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented and to all new or modified awards thereafter. Early adoption is permitted. The adoption of this guidance did not have a significant impact on the Company's consolidated financial statements.

Also in June 2014, the FASB issued ASU No. 2014-11, "Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures" which aligns the accounting for repurchase to maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements. Going forward, these transactions would all be accounted for as secured borrowings. This update is effective for the first interim or annual period beginning after December 15, 2014. In addition the disclosure of certain transactions accounted for as a sale is effective for the first interim or annual period beginning on or after December 15, 2014, and the disclosure for transactions accounted for as secured borrowings is required for

annual periods beginning after December 15, 2014, and interim periods beginning after March 15, 2015. Early adoption was prohibited. The Company's adoption of this ASU did not have an impact on its consolidated financial statements.

Note 8. Fair Value Measurements

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value.

Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument.

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of September 30, 2016 and December 31, 2015.

Securities Available for Sale

For securities available for sale, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also may hold equity securities and debt instruments issued by the U.S. government and U.S. government-sponsored agencies that are traded in active markets with readily accessible

quoted market prices that are considered Level 1 inputs.

Derivatives

The Company records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship

25

and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The existing interest rate derivatives result from a service provided to certain qualifying borrowers in a loan related transaction and, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. As such, all changes in fair value of the Company's derivatives are recognized directly in earnings.

The Company also uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges, and which satisfy hedge accounting requirements, involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without the exchange of the underlying notional amount. These derivatives were used to hedge the variable cash outflows associated with Federal Home Loan Bank borrowings. The effective portion of changes in the fair value of these derivatives are recorded in accumulated other comprehensive income, and are subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The ineffective portion of the change in fair value of these derivatives are recognized directly in earnings.

The fair value of the Company's derivatives are determined using discounted cash flow analysis using observable market-based inputs, which are considered Level 2 inputs.

Assets Measured at Fair Value on a Non-Recurring Basis

The valuation techniques described below were used to estimate fair value of financial instruments measured on a non-recurring basis as of September 30, 2016 and December 31, 2015.

Collateral Dependent Impaired Loans

For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case-by-case basis, to comparable assets based on the appraisers' market knowledge and experience, as well as adjustments for estimated costs to sell between 6% and 10%. The Company classifies these loans as Level 3 within the fair value hierarchy.

Foreclosed Assets

Assets acquired through foreclosure or deed in lieu of foreclosure are carried at fair value, less estimated selling costs, which range between 6% and 10%. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value, less estimated selling costs, is charged to the allowance for loan losses. A reserve for foreclosed assets may be established to provide for possible write-downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred.

There were no changes to the valuation techniques for fair value measurements as of September 30, 2016 and December 31, 2015.

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair values as of September 30, 2016 and December 31, 2015, by level within the fair value hierarchy:

Fair Value Measurements at Reporting Date Using:

(In thousands)	September 30, 2016	Quoted Prices in		
		Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Other Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:

	\$20,027	—	—	20,027

There were no transfers between Level 1, Level 2 and Level 3 during the three and nine months ended September 30, 2016.

27

Other Fair Value Disclosures

The Company is required to disclose the estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. The following is a description of valuation methodologies used for those assets and liabilities.

Cash and Cash Equivalents

For cash and due from banks, federal funds sold and short-term investments, the carrying amount approximates fair value.

Investment Securities Held to Maturity

For investment securities held to maturity, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U.S. government and U.S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy.

Federal Home Loan Bank of New York ("FHLBNY") Stock

The carrying value of FHLBNY stock was its cost. The fair value of FHLBNY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non-performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflects the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date. The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3.

The fair value for significant non-performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows and estimated selling costs. The Company classifies the estimated fair value of its non-performing loan portfolio as Level 3.

Deposits

The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2.

Borrowed Funds

The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy.

Commitments to Extend Credit and Letters of Credit

The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value estimates of commitments to extend credit and letters of credit are deemed immaterial.

28

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing on- and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

The following tables present the Company's financial instruments at their carrying and fair values as of September 30, 2016 and December 31, 2015. Fair values are presented by level within the fair value hierarchy.

(Dollars in thousands)	Carrying value	Fair value	Fair Value Measurements at September 30, 2016 Using:

Note 10. Derivative and Hedging Activities

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk, primarily by managing the amount, sources, and duration of its assets and liabilities.

Non-designated Hedges. Derivatives not designated in qualifying hedging relationships are not speculative and result from a service the Company provides to certain qualifying commercial borrowers in loan related transactions and, therefore, are not used to manage interest rate risk in the Company's assets or liabilities. The Company executes interest rate swaps with commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting interest rate swaps that the Company executes with a third party, such that the Company minimizes its net risk exposure resulting from such transactions. The interest rate swap agreement which the Company executes with the commercial borrower is collateralized by the borrower's property financed by the Company. As the interest rate swaps associated with this program do not meet the hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. At September 30, 2016 and December 31, 2015, the Company had 34 interest rate swaps with an aggregate notional amount of \$549.5 million and 23 interest rate swaps with an aggregate notional amount of \$391.4 million, respectively, related to this program. The Company has credit derivatives resulting from participations in interest rate swaps provided to external lenders as part of loan participation arrangements, therefore, are not used to manage interest rate risk in the Company's assets or liabilities.

Cash Flow Hedges of Interest Rate Risk. The Company's objective in using interest rate derivatives is to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, the Company primarily uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges are recorded in accumulated other comprehensive income and are subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. During the three and nine months ended September 30, 2016, such derivatives were used to hedge the variable cash outflows associated with Federal Home Loan Bank borrowings. The ineffective portion of the change in fair value of the derivatives is recognized directly in earnings. The Company implemented this program during the quarter ended September 30, 2015. During the three and nine months ended September 30, 2016 and 2015, the Company did not record any hedge ineffectiveness.

Amounts reported in accumulated other comprehensive income related to derivatives will be reclassified to interest expense as interest payments are made on the Company's debt. During the next twelve months, the Company estimates that \$255,000 will be reclassified as an increase to interest expense. As of September 30, 2016, the Company had one outstanding interest rate derivative with a notional amount of \$40.0 million that was designated as a cash flow hedge of interest rate risk.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the Consolidated Statements of Financial Condition at September 30, 2016 and December 31, 2015 (in thousands):

The Company has agreements with certain of its derivative counterparties that contain a provision that if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations.

In addition, the Company has agreements with certain of its derivative counterparties that contain a provision that if the Company fails to maintain its status as a well/adequate capitalized institution, then the counterparty could terminate the derivative positions and the Company would be required to settle its obligations under the agreements.

35

As of September 30, 2016, the termination value of derivatives in a net liability position, which includes accrued interest, was \$20.4 million. The Company has minimum collateral posting thresholds with certain of its derivative counterparties, and has posted collateral of \$21.1 million against its obligations under these agreements. If the Company had breached any of these provisions at September 30, 2016, it could have been required to settle its obligations under the agreements at the termination value.

Item 2. **MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

Forward Looking Statements

Certain statements contained herein are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods, or by the use of forward-looking terminology, such as "may," "will," "believe," "expect," "estimate," "anticipate," "continue," or similar terms or variations on those terms, or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those set forth in Item 1A of the Company's Annual Report on Form 10-K or supplemented by its Quarterly Reports on Form 10-Q, and those related to the economic environment, particularly in the market areas in which the Company operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations affecting financial institutions, including regulatory fees and capital requirements, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity. The Company cautions readers not to place undue reliance on any such forward-looking statements which speak only as of the date made. The Company also advises readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not have any obligation to update any forward-looking statements to reflect any subsequent events or circumstances after the date of this statement.

Acquisitions

On April 1, 2015, Beacon Trust Company ("Beacon"), a wholly owned subsidiary of Provident Bank, completed its acquisition of certain assets and liabilities of The MDE Group, Inc. and the equity interests of Acertus Capital Management, LLC (together "MDE"), both Morristown, New Jersey-based registered investment advisory firms that manage assets for affluent and high net-worth clients. MDE was acquired with both cash and contingent consideration.

The Company recognized goodwill of \$18.3 million and a customer relationship intangible of \$7.0 million related to the MDE acquisition. The Company recognized a contingent consideration liability at its fair value of \$338,000. The contingent consideration arrangement requires the Company to pay additional cash consideration to MDE's former stakeholders four years after the closing of the acquisition if certain revenue targets are met. The fair value of the contingent consideration was estimated using a discounted cash flow model. The acquisition agreement limits the total payment to a maximum of \$12.5 million, to be determined based on actual future results. In accordance with the acquisition agreement and based upon the Company's projection of future revenue, no contingent consideration liability was required at September 30, 2016.

Critical Accounting Policies

The Company considers certain accounting policies to be critically important to the fair presentation of its financial condition and results of operations. These policies require management to make complex judgments on matters which by their nature have elements of uncertainty. The sensitivity of the Company's consolidated financial statements to these critical accounting policies, and the assumptions and estimates applied, could have a significant impact on its financial condition and results of operations. These assumptions, estimates and judgments made by management can be influenced by a number of factors, including the general economic environment. The Company has identified the following as critical accounting policies:

- Adequacy of the allowance for loan losses
- Goodwill valuation and analysis for impairment

•Valuation of securities available for sale and impairment analysis

•Valuation of deferred tax assets

The calculation of the allowance for loan losses is a critical accounting policy of the Company. The allowance for loan losses is a valuation account that reflects management's evaluation of the probable losses in the loan portfolio. The Company maintains

36

the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses. The Company's evaluation of the adequacy of the allowance for loan losses includes a review of all loans on which the collectability of principal may not be reasonably assured. For residential mortgage and consumer loans, this is determined primarily by delinquency and collateral values. For commercial real estate and commercial loans, an extensive review of financial performance, payment history and collateral values is conducted on a quarterly basis. As part of the evaluation of the adequacy of the allowance for loan losses, each quarter management prepares an analysis that categorizes the entire loan portfolio by certain risk characteristics such as loan type (residential mortgage, commercial mortgage, construction, commercial, etc.) and loan risk rating. When assigning a risk rating to a loan, management utilizes a nine point internal risk rating system. Loans deemed to be "acceptable quality" are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans deemed to be of "questionable quality" are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial and construction loans are rated individually and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and the Credit Administration Department. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party, and periodically by the Credit Committee in the credit renewal or approval process. In addition, the Bank requires an annual review be performed for commercial and commercial real estate loans above certain dollar thresholds, depending on loan type, to help determine the appropriate risk rating. Management estimates the amount of loan losses for groups of loans by applying quantitative loss factors to loan segments at the risk rating level, and applying qualitative adjustments to each loan segment at the portfolio level. Quantitative loss factors give consideration to historical loss experience by loan type based upon an appropriate look back period and adjusted for a loss emergence period. Quantitative loss factors are evaluated at least annually. Management completed its annual evaluation of the quantitative loss factors for the quarter ended September 30, 2016. Qualitative adjustments give consideration to other qualitative or environmental factors such as trends and levels of delinquencies, impaired loans, charge-offs, recoveries and loan volumes, as well as national and local economic trends and conditions. Qualitative adjustments reflect risks in the loan portfolio not captured by the quantitative loss factors and, as such, are evaluated from a risk level perspective relative to the risk levels present over the look back period. Qualitative adjustments are evaluated at least quarterly. The reserves resulting from the application of both of these sets of loss factors are combined to arrive at the allowance for loan losses. Management believes the primary risks inherent in the portfolio are a general decline in the economy, a decline in real estate market values, rising unemployment or a protracted period of elevated unemployment, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers' ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Company has provided for loan losses at the current level to address the current risk in its loan portfolio. Management considers it important to maintain the ratio of the allowance for loan losses to total loans at an acceptable level given current economic conditions, interest rates and the composition of the portfolio. Although management believes that the Company has established and maintained the allowance for loan losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets, volatile securities markets, and declines in the housing and commercial real estate markets and the economy generally have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies

periodically review the adequacy of the Company's allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write-downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

Additional critical accounting policies relate to judgments about other asset impairments, including goodwill, investment securities and deferred tax assets. Goodwill is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates.

Management qualitatively determines whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before performing Step 1 of the goodwill impairment test. If an entity concludes that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the entity would be required to perform Step 1 of the assessment and then, if needed, Step 2 to determine whether goodwill is impaired. However, if it is more likely than not that the fair value of the reporting unit is more than its carrying amount, the entity does not need to apply the two-step impairment test. For this analysis, the Reporting Unit is defined as the Bank, which includes all core and retail banking operations of the Company but excludes the assets, liabilities, equity, earnings and operations held exclusively at the Company level. The guidance provides certain factors an entity should consider in its qualitative assessment in determining whether it is more likely than not that a reporting unit's fair value is less than its carrying amount. The factors include:

- Macroeconomic conditions, such as deterioration in economic condition and limited access to capital.

- Industry and market considerations, such as increased competition, regulatory developments and decline in market-dependent multiples.

- Cost factors, such as increased labor costs, cost of materials and other operating costs.

- Overall financial performance, such as declining cash flows and decline in revenue or earnings.

- Other relevant entity-specific events, such as changes in management, strategy or customers, litigation and contemplation of bankruptcy.

- Reporting unit events, such as selling or disposing a portion of a reporting unit and a change in composition of assets.

The Company may, based upon its qualitative assessment, or at its option, perform the two-step process to evaluate the potential impairment of goodwill. If, based upon Step 1, the fair value of the Reporting Unit exceeds its carrying amount, goodwill of the Reporting Unit is considered not impaired. However, if the carrying amount of the Reporting Unit exceeds its fair value, an additional test must be performed. The second step test compares the implied fair value of the Reporting Unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

The Company completed its annual goodwill impairment test as of September 30, 2016. Based upon its qualitative assessment of goodwill, the Company concluded it is more likely than not that the fair value of the reporting unit exceeds its carrying amount, goodwill was not impaired and no further quantitative analysis (Step 1) was warranted. The Company's available for sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are based on market quotations or matrix pricing as discussed in Note 8 to the consolidated financial statements. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost. Management conducts a periodic review and evaluation of the securities portfolio to determine if any declines in the fair values of securities are other-than-temporary. In this evaluation, if such a decline were deemed other-than-temporary, Management would measure the total credit-related component of the unrealized loss, and recognize that portion of the loss as a charge to current period earnings. The remaining portion of the unrealized loss would be recognized as an adjustment to accumulated other comprehensive income. The fair value of the securities portfolio is significantly affected by changes in interest rates. In general, as interest rates rise, the fair value of fixed-rate securities decreases and as interest rates fall, the fair value of fixed-rate securities increases. The Company determines if it has the intent to sell these securities or if it is more likely than not that the Company would be required to sell the securities before the anticipated recovery. If either exists, the decline in value is considered other-than-temporary. In its evaluations, the Company did not recognize an other-than-temporary impairment charge on securities for the three and nine months ended September 30, 2016 and 2015.

The determination of whether deferred tax assets will be realizable is predicated on the reversal of existing deferred tax liabilities, utilization against carryback years and estimates of future taxable income. Such estimates are subject to management's judgment. A valuation allowance is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. The Company did not require a valuation allowance at September 30, 2016.

COMPARISON OF FINANCIAL CONDITION AT SEPTEMBER 30, 2016 AND DECEMBER 31, 2015

Total assets increased \$478.3 million to \$9.39 billion at September 30, 2016, from \$8.91 billion at December 31, 2015, primarily due to a \$352.9 million increase in total loans and a \$63.2 million increase in total investments.

Total loans increased \$352.9 million, or 5.4%, to \$6.89 billion at September 30, 2016, from \$6.54 billion at December 31, 2015. Loan originations totaled \$2.25 billion and loan purchases totaled \$28.6 million for the nine months ended September 30, 2016. The loan portfolio had net increases of \$168.6 million in commercial mortgage loans, \$150.5 million in multi-family mortgage loans and \$119.8 million in commercial loans, partially offset by net decreases of \$41.1 million in residential mortgage loans, \$28.1 million in consumer loans and \$14.8 million in construction loans. Commercial real estate, commercial and construction loans represented 74.6% of the loan portfolio at September 30, 2016, compared to 72.1% at December 31, 2015.

The Company participates in loans originated by other banks, including participations designated as Shared National Credits (“SNCs”). The Company’s gross commitments and outstanding balances as a participant in SNCs were \$304.1 million and \$209.6 million, respectively, at September 30, 2016. No SNCs were 90 days or more delinquent at September 30, 2016.

The Company had outstanding junior lien mortgages totaling \$234.5 million at September 30, 2016. Of this total, 19 loans totaling \$1.3 million were 90 days or more delinquent. These loans were allocated total loss reserves of \$252,000.

The following table sets forth information regarding the Company’s non-performing assets as of September 30, 2016 and December 31, 2015 (in thousands):

	September 30, 2016	December 31, 2015
Mortgage loans:		
Residential	\$ 11,317	12,031
Commercial	5,679	1,263
Multi-family	1,113	742
Construction	2,692	2,351
Total mortgage loans	20,801	16,387
Commercial loans	16,436	23,875
Consumer loans	2,779	4,109
Total non-performing/non-accrual loans	40,016	44,371
Total non-performing/accruing loans - 90 days or more delinquent	—	165
Total non-performing loans	40,016	44,536
Foreclosed assets	10,087	10,546
Total non-performing assets	\$ 50,103	55,082

The following table sets forth information regarding the Company’s 60-89 day delinquent loans as of September 30, 2016 and December 31, 2015 (in thousands):

	September 30, 2016	December 31, 2015
Mortgage loans:		
Residential	\$ 7,579	5,434
Commercial	—	543
Multi-family	—	506
Total mortgage loans	7,579	6,483
Commercial loans	297	801
Consumer loans	1,000	1,194
Total 60-89 day delinquent loans	\$ 8,876	8,478

At September 30, 2016, the allowance for loan losses totaled \$61.1 million, or 0.89% of total loans, compared with \$61.4 million, or 0.94% of total loans at December 31, 2015. Total non-performing loans were \$40.0 million, or 0.58% of total loans at September 30, 2016, compared to \$44.5 million, or 0.68% of total loans at December 31, 2015. The \$4.5 million decrease in non-performing loans consisted of a \$7.4 million decrease in non-performing commercial loans, a \$1.3 million decrease in non-performing consumer loans and a \$714,000 decrease in non-performing residential mortgage loans, partially offset by a \$4.4 million increase in non-performing commercial mortgage loans

and a \$371,000 increase in non-performing multi-family loans. Non-performing loans do not include \$1.7 million of purchased credit impaired ("PCI") loans acquired from Team Capital.

At September 30, 2016 and December 31, 2015, the Company held \$10.1 million and \$10.5 million of foreclosed assets, respectively. During the nine months ended September 30, 2016, there were 19 additions to foreclosed assets with a carrying

value of \$3.1 million and 21 properties sold with a carrying value of \$2.9 million. Foreclosed assets at September 30, 2016 consisted of \$5.5 million of residential real estate, \$4.4 million of commercial real estate and \$139,000 of marine vessels.

Non-performing assets totaled \$50.1 million, or 0.53% of total assets at September 30, 2016, compared to \$55.1 million, or 0.62% of total assets at December 31, 2015.

Total investments increased \$63.2 million, or 4.2%, to \$1.58 billion at September 30, 2016, from \$1.52 billion at December 31, 2015, largely due to purchases of mortgage-backed and municipal securities and an increase in unrealized gains on securities available for sale, partially offset by principal repayments on mortgage-backed securities, maturities of municipal and agency bonds and sales of certain mortgage-backed securities.

Total deposits increased \$603.5 million, or 10.2%, during the nine months ended September 30, 2016, to \$6.53 billion.

Deposit growth for the period reflected funding from several new municipal relationships, as well as new and deepening commercial deposit relationships. Total core deposits, which consist of savings and demand deposit accounts, increased \$674.8 million to \$5.86 billion at September 30, 2016, while time deposits decreased \$71.3 million to \$668.4 million at September 30, 2016. The increase in core deposits was largely attributable to a \$367.4 million increase in interest bearing demand deposits, a \$118.0 million increase in money market deposits, a \$100.2 million increase in non-interest bearing demand deposits and a \$89.2 million increase in savings deposits. Core deposits represented 89.8% of total deposits at September 30, 2016, compared to 87.5% at December 31, 2015.

Borrowed funds decreased \$185.3 million, or 10.8%, during the nine months ended September 30, 2016, to \$1.52 billion, as shorter-term wholesale funding was replaced by net inflows of deposits for the period. Borrowed funds represented 16.2% of total assets at September 30, 2016, a decrease from 19.2% at December 31, 2015.

Stockholders' equity increased \$48.2 million, or 4.0%, during the nine months ended September 30, 2016, to \$1.24 billion, due to net income earned for the period and an increase in unrealized gains on securities available for sale, partially offset by cash dividends paid to stockholders. For the nine months ended September 30, 2016, 147,237 shares of common stock were repurchased at an average cost of \$18.46 per share, a portion of which were made in connection with withholding to cover income taxes on the vesting of stock-based compensation. At September 30, 2016, 3.2 million shares remained eligible for repurchase under the current authorization. Book value per share and tangible book value per share at September 30, 2016 were \$18.84 and \$12.43, respectively, compared with \$18.26 and \$11.75, respectively, at December 31, 2015.

Liquidity and Capital Resources. Liquidity refers to the Company's ability to generate adequate amounts of cash to meet financial obligations to its depositors, to fund loans and securities purchases, deposit outflows and operating expenses. Sources of funds include scheduled amortization of loans, loan prepayments, scheduled maturities of investments, cash flows from mortgage-backed securities and the ability to borrow funds from the FHLBNY and approved broker-dealers.

Cash flows from loan payments and maturing investment securities are fairly predictable sources of funds. Changes in interest rates, local economic conditions and the competitive marketplace can influence loan prepayments, prepayments on mortgage-backed securities and deposit flows.

In July 2013, the Federal Deposit Insurance Corporation and the other federal bank regulatory agencies issued a final rule that revised the leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. The rule became effective January 1, 2015. Among other things, the rule establishes a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), adopts a uniform minimum leverage capital ratio at 4%, increases the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets) and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The rule also requires unrealized gains and losses on certain "available-for-sale" securities holdings to be included for purposes of calculating regulatory capital unless a one-time opt-out is exercised. The Company exercised the option to exclude unrealized gains and losses from the calculation of regulatory capital. Additional constraints were also imposed on the inclusion in regulatory capital of mortgage-servicing assets, deferred tax assets and minority interests. The rule limits a banking organization's capital

distributions and certain discretionary bonus payments if the banking organization does not hold a “capital conservation buffer,” which when fully phased in will consist of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The capital conservation buffer was effective on January 1, 2016, with a 0.625% requirement, and will continue to be phased in through January 1, 2019, when the full capital requirement will be effective.

40

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

As of September 30, 2016, the Bank and the Company exceeded all current minimum regulatory capital requirements as follows:

	September 30, 2016					
	Required		Required with Capital Conservation Buffer		Actual	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(Dollars in thousands)						
Bank: ⁽¹⁾						
Tier 1 leverage capital	\$356,336	4.000%	\$356,336	4.000%	\$744,449	8.357%
Common equity Tier 1 risk-based capital	313,219	4.500	356,722	5.125	744,449	10.695
Tier 1 risk-based capital	417,626	6.000	461,128	6.625	744,449	10.695
Total risk-based capital	556,834	8.000	600,337	8.625	805,689	11.575
Company:						
Tier 1 leverage capital	\$356,343	4.000%	\$356,343	4.000%	\$817,929	9.181%
Common equity Tier 1 risk-based capital	313,233	4.500	356,737	5.125	817,929	11.751
Tier 1 risk-based capital	417,644	6.000	461,148	6.625	817,929	11.751
Total risk-based capital	556,858	8.000	600,363	8.625	879,017	12.628

(1) Under the FDIC's prompt corrective action provisions, the Bank is considered well capitalized if it has: a leverage (Tier 1) capital ratio of at least 5.00%; a common equity Tier 1 risk-based capital ratio of 6.50%; a Tier 1 risk-based capital ratio of at least 8.00%; and a total risk-based capital ratio of at least 10.00%.

COMPARISON OF OPERATING RESULTS FOR THE THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2016 AND 2015

General. The Company reported net income of \$22.9 million, or \$0.36 per basic and diluted share for the three months ended September 30, 2016, compared to net income of \$20.6 million, or \$0.33 per basic and diluted share for the three months ended September 30, 2015. For the nine months ended September 30, 2016, the Company reported net income of \$65.2 million, or \$1.03 per basic share and \$1.02 per diluted share, compared to net income of \$62.2 million, or \$0.99 per basic and diluted share for the same period last year.

Results of operations for the three and nine months ended September 30, 2016 were favorably impacted by growth in average loans outstanding, growth in both average non-interest bearing and interest bearing core deposits, along with growth in non-interest income. These factors helped mitigate the impact of compression in the net interest margin.

Net Interest Income. Total net interest income increased \$2.4 million to \$65.0 million for the quarter ended September 30, 2016, from \$62.5 million for the quarter ended September 30, 2015. For the nine months ended September 30, 2016, total net interest income increased \$5.8 million, or 3.1%, to \$192.0 million, from \$186.1 million for the same period in 2015. Interest income for the quarter ended September 30, 2016 increased \$3.0 million to \$76.0 million, from \$73.0 million for the same period in 2015. For the nine months ended September 30, 2016, interest income increased \$7.4 million to \$224.8 million, from \$217.4 million for the nine months ended September 30, 2015. Interest expense increased \$608,000, or 5.8%, to \$11.1 million for the quarter ended September 30, 2016, from \$10.5 million for the quarter ended September 30, 2015. For the nine months ended September 30, 2016, interest expense increased \$1.6 million to \$32.9 million, from \$31.3 million for the nine months ended September 30, 2015. The improvement in net interest income was due to growth in average loans outstanding resulting from organic originations and increases in both average non-interest bearing demand deposits and average interest bearing core deposits, partially offset by period-over-period compression in the net interest margin. The growth in average core deposits mitigated the Company's need to utilize higher-cost sources to fund loan growth.

The net interest margin decreased eight basis points to 3.05% for the quarter ended September 30, 2016, compared with 3.13% for the quarter ended September 30, 2015. The weighted average yield on interest-earning assets decreased nine basis points to 3.57% for the quarter ended September 30, 2016, compared with 3.66% for the quarter

ended September 30, 2015, while the weighted average cost of interest bearing liabilities remained unchanged at 0.65% for the quarter ended September 30, 2016, compared to the third quarter of 2015. The average cost of interest bearing deposits for the quarter ended September 30, 2016 was 0.34%, compared with 0.31% for the same period last year. Average non-interest bearing demand deposits totaled \$1.25 billion for the quarter ended September 30, 2016, compared with \$1.15 billion for the quarter ended September 30, 2015. The

average cost of borrowed funds for the quarter ended September 30, 2016 was 1.70%, compared with 1.61% for the same period last year.

For the nine months ended September 30, 2016, the net interest margin decreased eight basis points to 3.10%, compared with 3.18% for the nine months ended September 30, 2015. The weighted average yield on interest earning assets declined nine basis points to 3.63% for the nine months ended September 30, 2016, compared with 3.72% for the nine months ended September 30, 2015, while the weighted average cost of interest bearing liabilities remained unchanged at 0.66% for the nine months ended September 30, 2016, as compared to the nine months ended September 30, 2015. The average cost of interest bearing deposits for the nine months ended September 30, 2016 was 0.33%, compared with 0.31% for the same period last year. Average non-interest bearing demand deposits totaled \$1.22 billion for the nine months ended September 30, 2016, compared with \$1.10 billion for the nine months ended September 30, 2015. The average cost of borrowings for the nine months ended September 30, 2016 was 1.71%, compared with 1.73% for the same period last year.

Interest income on loans secured by real estate increased \$721,000 to \$45.3 million for the three months ended September 30, 2016, from \$44.5 million for the three months ended September 30, 2015. Commercial loan interest income increased \$2.3 million to \$16.1 million for the three months ended September 30, 2016, from \$13.8 million for the three months ended September 30, 2015. Consumer loan interest income decreased \$19,000 to \$5.6 million for the three months ended September 30, 2016, compared to the three months ended September 30, 2015. For the three months ended September 30, 2016, the average balance of total loans increased \$448.8 million to \$6.73 billion, from \$6.28 billion for the same period in 2015. The average loan yield for the three months ended September 30, 2016 decreased nine basis points to 3.93%, from 4.02% for the same period in 2015.

Interest income on loans secured by real estate increased \$3.0 million to \$134.4 million for the nine months ended September 30, 2016, from \$131.4 million for the nine months ended September 30, 2015. Commercial loan interest income increased \$5.5 million to \$46.4 million for the three months ended September 30, 2016, from \$40.9 million for the nine months ended September 30, 2016. Consumer loan interest income decreased \$577,000 to \$16.7 million for the nine months ended September 30, 2016, from \$17.2 million for the nine months ended September 30, 2015. For the nine months ended September 30, 2016, the average balance of total loans increased \$453.7 million to \$6.61 billion, from \$6.15 billion for the same period in 2015. The average loan yield for the nine months ended September 30, 2016 decreased 13 basis points to 3.96%, from 4.09% for the same period in 2015.

Interest income on investment securities held to maturity decreased \$19,000, or 0.6%, to \$3.3 million for the quarter ended September 30, 2016, compared to the same period last year. Average investment securities held to maturity increased \$8.6 million to \$482.0 million for the quarter ended September 30, 2016, from \$473.4 million for the same period last year. Interest income on investment securities held to maturity decreased \$139,000, or 1.4%, to \$10.0 million for the nine months ended September 30, 2016, compared to the same period in 2015. Average investment securities held to maturity increased \$4.0 million to \$477.6 million for the nine months ended September 30, 2016, from \$473.6 million for the same period last year.

Interest income on securities available for sale and FHLB NY stock decreased \$96,000, or 1.7%, to \$5.6 million for the quarter ended September 30, 2016, from \$5.7 million for the quarter ended September 30, 2015. The average balance of securities available for sale and FHLB NY stock decreased \$6.2 million to \$1.10 billion for the three months ended September 30, 2016, compared to the same period in 2015. Interest income on securities available for sale and FHLB NY stock decreased \$634,000, or 3.6%, to \$17.1 million for the nine months ended September 30, 2016, from \$17.7 million for the nine months ended September 30, 2015. The average balance of securities available for sale and FHLB NY stock decreased \$47.4 million to \$1.07 billion for the nine months ended September 30, 2016, from \$1.12 billion for the same period in 2015.

The average yield on total securities decreased to 2.14% for the three months ended September 30, 2016, compared with 2.26% for the same period in 2015. For the nine months ended September 30, 2016, the average yield on total securities was 2.28%, compared with 2.33% for the same period in 2015.

Interest expense on deposit accounts increased \$802,000, or 22.0%, to \$4.4 million for the quarter ended September 30, 2016, from \$3.6 million for the quarter ended September 30, 2015. For the nine months ended September 30, 2016, interest expense on deposit accounts increased \$1.5 million, or 14.2%, to \$12.4 million, from

\$10.9 million for the same period last year. The average cost of interest bearing deposits increased to 0.34% for the third quarter of 2016 and 0.33% for the nine months ended September 30, 2016, from 0.31% for both the three and nine months ended September 30, 2015. The average balance of interest bearing core deposits for the quarter ended September 30, 2016 increased \$575.1 million to \$4.49 billion, from \$3.92 billion for the same period in 2015. For the nine months ended September 30, 2016, average interest bearing core deposits increased \$334.6 million, to \$4.26 billion, from \$3.93 billion for the same period in 2015. Average time deposit account balances decreased \$70.4 million, to \$703.0 million for the quarter ended September 30, 2016, from \$773.5 million for the quarter ended September 30, 2015. For the nine months ended September 30, 2016, average time deposit account balances decreased \$46.2 million, to \$746.1 million, from \$792.2 million for the same period in 2015.

Interest expense on borrowed funds decreased \$194,000, or 2.8%, to \$6.6 million for the quarter ended September 30, 2016, from \$6.8 million for the quarter ended September 30, 2015. For the nine months ended September 30, 2016, interest expense on borrowed funds increased \$45,000 to \$20.5 million, from \$20.4 million for the nine months ended September 30, 2015. The average cost of borrowings increased to 1.70% for the three months ended September 30, 2016, from 1.61% for the three months ended September 30, 2015. The average cost of borrowings decreased to 1.71% for the nine months ended September 30, 2016, from 1.73% for the same period last year. Average borrowings decreased \$134.5 million, or 8.0%, to \$1.55 billion for the quarter ended September 30, 2016, from \$1.68 billion for the quarter ended September 30, 2015. For the nine months ended September 30, 2016, average borrowings increased \$19.9 million to \$1.60 billion, compared to \$1.58 billion for the nine months ended September 30, 2015.

Provision for Loan Losses. Provisions for loan losses are charged to operations in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable credit losses inherent in the loan portfolio. In determining the level of the allowance for loan losses, management considers past and current loss experience, evaluations of real estate collateral, current economic conditions, volume and type of lending, adverse situations that may affect a borrower's ability to repay the loan and the levels of non-performing and other classified loans. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or later events change. Management assesses the adequacy of the allowance for loan losses on a quarterly basis and makes provisions for loan losses, if necessary, in order to maintain the adequacy of the allowance.

The Company recorded provisions for loan losses of \$1.0 million and \$4.2 million for the three and nine months ended September 30, 2016, respectively. This compared with provisions for loan losses of \$1.4 million and \$3.1 million recorded for the three and nine months ended September 30, 2015, respectively. For the three and nine months ended September 30, 2016, the Company had net charge-offs of \$845,000 and \$4.5 million, respectively, compared with net charge-offs of \$560,000 and \$4.4 million, respectively, for the same periods in 2015. At September 30, 2016, the Company's allowance for loan losses was \$61.1 million, or 0.89% of total loans, compared with \$61.4 million, or 0.94% of total loans at December 31, 2015.

Non-Interest Income. Non-interest income totaled \$14.1 million for the quarter ended September 30, 2016, an increase of \$2.0 million, or 16.2%, compared to the same period in 2015. Other income increased \$2.5 million for the three months ended September 30, 2016, compared to the same period in 2015, largely due to a \$1.2 million increase in net gains on loan sales, an \$876,000 increase in net fees on loan-level interest rate swap transactions and a \$354,000 increase in net gains on the sale of foreclosed real estate. Wealth management income decreased \$488,000 to \$4.3 million for the three months ended September 30, 2016, compared to \$4.8 million for the same period in 2015. The decrease in wealth management income was primarily due to a shift in the mix of assets under management which negatively impacted fees earned, along with a reduction in income associated with the licensing of indices exchange traded fund ("ETF") providers. Fee income decreased \$93,000 to \$6.1 million for the three months ended September 30, 2016, compared to \$6.2 million for the same period in 2015, largely due to a \$191,000 decrease in commercial loan prepayment fee income, partially offset by a \$96,000 increase in deposit related fee income. Net gains on securities transactions decreased \$48,000 for the three months ended September 30, 2016, compared to the same period in 2015.

For the nine months ended September 30, 2016, non-interest income totaled \$40.9 million, an increase of \$1.6 million, compared to the same period in 2015. Other income increased \$1.5 million to \$4.4 million for the nine months ended September 30, 2016, compared with the same period in 2015, largely due to a \$1.4 million increase in net gains on loan sales, a \$432,000 increase in net gains on the sale of foreclosed real estate, and a \$335,000 gain recognized on the sale of deposits resulting from a strategic branch divestiture, partially offset by a \$1.4 million decrease in net fees on loan-level interest rate swap transactions. Also contributing to the increase in non-interest income, wealth management income increased \$679,000 to \$13.1 million for the nine months ended September 30, 2016, largely due to fees from assets under management acquired in the MDE acquisition, which closed April 1, 2015. This increase in wealth management income was offset in part by a reduction in income associated with the licensing of indices to ETF providers. Partially offsetting these increases in non-interest income, net gains on securities transactions and fee income decreased \$596,000 and \$156,000, respectively, for the nine months ended September 30, 2016, compared to

the same period in 2015. The decrease in fee income was largely due to a \$1.1 million decrease in commercial loan prepayment fee income, partially offset by increases in both deposit and loan-related fee income.

Non-Interest Expense. For the three months ended September 30, 2016, non-interest expense increased \$2.2 million to \$45.9 million, compared to the three months ended September 30, 2015. Compensation and benefits expense increased \$1.9 million to \$26.7 million for the three months ended September 30, 2016, compared to \$24.8 million for the same period in 2015. This increase was principally due to additional salary expense related to annual merit increases, and an increase in the accrual for incentive compensation, partially offset by a decrease in stock-based compensation. Other operating expenses increased \$377,000 to \$6.9 million for the three months ended September 30, 2016, compared to the same period in 2015, largely due to an increase in legal expense and an increase in debit card expense related to the Company's issuance of chip-enabled debit cards. In addition, advertising and promotion expenses increased \$189,000 to \$787,000 for the three months ended September 30, 2016, compared to the same period in 2015, largely due to the timing of the Company's advertising campaigns. Partially offsetting these increases

in non-interest expense, the amortization of intangibles decreased \$245,000 for the three months ended September 30, 2016, compared with the same period in 2015, as a result of scheduled reductions in amortization. Additionally, FDIC insurance expense decreased \$156,000 to \$1.1 million for three months ended September 30, 2016, compared to \$1.3 million for the same period in 2015. This decrease was due to the FDIC's reduction of assessment rates for depository institutions with less than \$10.0 billion in assets, effective for the quarter ended September 30, 2016. The decrease in the FDIC assessment rate was partially offset by an increase in the Company's total assets subject to assessment. Non-interest expense for the nine months ended September 30, 2016 was \$136.6 million, an increase of \$3.5 million from \$133.2 million for the nine months ended September 30, 2015. Compensation and benefits expense increased \$5.1 million to \$78.5 million for the nine months ended September 30, 2016, compared to \$73.4 million for the nine months ended September 30, 2015, due to increased salary expense associated with new employees from MDE, additional salary expense associated with annual merit increases, an increase in the accrual for incentive compensation and an increase in employee medical and retirement benefit costs. In addition, data processing expense increased \$420,000 to \$9.8 million for the nine months ended September 30, 2016, compared to \$9.4 million for the same period in 2015, principally due to an increase in software maintenance costs. Net occupancy costs decreased \$1.2 million, to \$18.7 million for the nine months ended September 30, 2016, compared to the same period in 2015, principally due to a decrease in seasonal expenses resulting from a milder winter, combined with decreases in facilities and equipment maintenance expenses. The amortization of intangibles decreased \$435,000 for the nine months ended September 30, 2016, compared with the same period in 2015, as a result of scheduled reductions in amortization. In addition, other operating expenses decreased \$217,000 to \$20.6 million for the nine months ended September 30, 2016, compared to the same period in 2015, largely due to \$413,000 of non-recurring professional services costs associated with the MDE transaction for the nine months ended September 30, 2015, partially offset by increases in debit card maintenance costs, foreclosed real estate expense and non-performing asset-related expenses, while advertising and promotion expenses decreased \$173,000 to \$2.6 million for the nine months ended September 30, 2016, compared to the same period in 2015, largely due to the timing of the Company's advertising campaigns. Income Tax Expense. For the three and nine months ended September 30, 2016, the Company's income tax expense was \$9.3 million and \$26.8 million, respectively, compared with \$9.0 million and \$27.0 million, for the three and nine months ended September 30, 2015, respectively. The Company's effective tax rates were 28.8% and 29.1% for the three and nine months ended September 30, 2016, respectively, compared with 30.5% and 30.3% for the three and nine months ended September 30, 2015, respectively, as a greater proportion of income was derived from non-taxable sources in the current year periods. Also, in the third quarter of 2016, the Company adopted Accounting Standards Update ("ASU") No. 2016-09, "Compensation - Stock Compensation (Topic 718)." The adoption of this ASU resulted in a \$158,000 decrease in income tax expense and a 17 basis point reduction in the effective tax rate for the nine months ended September 30, 2016.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20- and 30-year fixed-rate mortgage loans at origination. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines of credit reset with changes in the Prime rate, the Federal Funds rate or LIBOR. Investment securities purchases generally have maturities of five years or less, and mortgage-backed securities have weighted average lives between three and five years.

The Asset/Liability Committee meets on at least a monthly basis to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset/Liability Committee reviews a variety of strategies that project changes in asset or liability mix and the impact of those changes on projected net interest income and net income.

The Company's strategy for liabilities has been to maintain a stable core-funding base by focusing on core deposit account acquisition and increasing products and services per household. The Company's ability to retain maturing time deposit accounts is the result of its strategy to remain competitively priced within its marketplace. The Company's

pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short-term lines of credit with the FHLB NY during periods of pricing dislocation.

Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analysis captures changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty-four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re-pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the

sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the predictions presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes.

Specific assumptions used in the simulation model include:

• Parallel yield curve shifts for market rates;

• Current asset and liability spreads to market interest rates are fixed;

• Traditional savings and interest-bearing demand accounts move at 10% of the rate ramp in either direction;

• Retail Money Market and Business Money Market accounts move at 25% and 75% of the rate ramp in either direction respectively; and

• Higher-balance demand deposit tiers and promotional demand accounts move at 50% to 75% of the rate ramp in either direction

The following table sets forth the results of a twelve-month net interest income projection model as of September 30, 2016 (dollars in thousands):

Change in Interest Rates in Basis Points (Rate Ramp)	Net Interest Income		
	Dollar Amount	Dollar Change	Percent Change
-100	\$249,650	\$(8,610)	(3.3)%
Static	258,260	—	—
+100	257,072	(1,188)	(0.5)
+200	255,116	(3,144)	(1.2)
+300	254,202	(4,058)	(1.6)

The preceding table indicates that, as of September 30, 2016, in the event of a 300 basis point increase in interest rates, whereby rates ramp up evenly over a twelve-month period, net interest income would decrease 1.6%, or \$4.1 million. In the event of a 100 basis point decrease in interest rates, net interest income would decrease 3.3%, or \$8.6 million over the same period.

Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the result of the economic value of equity model as of September 30, 2016 (dollars in thousands):

Change in Interest Rates (Basis Points)	Present Value of Equity			Present Value of Equity as Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change	Present Value Ratio	Percent Change
-100	\$1,293,406	\$(7,832)	(0.6)%	13.6%	(0.9)%
Flat	1,301,238	—	—	13.7	
+100	1,276,964	(24,274)	(1.9)	13.6	(1.2)
+200	1,238,773	(62,465)	(4.8)	13.3	(3.5)
+300	1,185,511	(115,727)	(8.9)	12.8	(6.8)

The preceding table indicates that as of September 30, 2016, in the event of an immediate and sustained 300 basis point increase in interest rates, the present value of equity is projected to decrease 8.9%, or \$115.7 million. If rates were to decrease 100 basis points, the model forecasts a 0.6%, or \$7.8 million, decrease in the present value of equity. Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the

net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an

indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results.

Item 4. CONTROLS AND PROCEDURES.

Under the supervision and with the participation of management, including the Principal Executive Officer and the Principal Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) were evaluated at the end of the period covered by this report. Based upon that evaluation, the Principal Executive Officer and the Principal Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective. There has been no change in the Company's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in various legal actions and claims arising in the normal course of business. In the opinion of management, these legal actions and claims are not expected to have a material adverse impact on the Company's financial condition.

Item 1A. Risk Factors

There have been no material changes to the risk factors that were previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	(d) Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs (1)(2)
July 1, 2016 through July 31, 2016	—	\$ —	—	3,194,835

Item 6. Exhibits.

The following exhibits are filed herewith:

3.1 Certificate of Incorporation of Provident Financial Services, Inc. (Filed as an exhibit to the Company's Registration Statement on Form S-1, and any amendments thereto, with the Securities and Exchange Commission/Registration No. 333-98241.)

3.2 Amended and Restated Bylaws of Provident Financial Services, Inc. (Filed as an exhibit to the Company's December 31, 2011 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on February 29, 2012/File No. 001-31566.)

4.1 Form of Common Stock Certificate of Provident Financial Services, Inc. (Filed as an exhibit to the Company's Registration Statement on Form S-1, and any amendments thereto, with the Securities and Exchange Commission/Registration No. 333-98241.)

10.1 Employment Agreement by and between Provident Financial Services, Inc and Christopher Martin dated September 23, 2009. (Filed as an exhibit to the Company's September 30, 2009 Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission on November 9, 2009/ File No. 001-31566.)

10.2 Change in Control Agreement by and between Provident Financial Services, Inc. and Christopher Martin dated as of December 16, 2015. (Filed as an exhibit to the Company's December 31, 2015 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on February 29, 2016/File No. 001-31566.)

10.3 Form of Three-Year Change in Control Agreement between Provident Financial Services, Inc. and each of Messrs. Blum, Kuntz, Lyons and Nesci dated as of December 16, 2015. (Filed as an exhibit to the Company's December 31, 2015 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on February 29, 2016/File No. 001-31566.)

10.4 Form of Two-Year Change in Control Agreement between Provident Financial Services, Inc. and certain senior officers. (Filed as an exhibit to the Company's December 31, 2015 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on February 29, 2016/File No. 001-31566.)

10.5 Form of One-Year Change in Control Agreement between Provident Financial Services, Inc. and certain senior officers. (Filed as an exhibit to the Company's December 31, 2015 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on February 29, 2016/File No. 001-31566.)

10.6 Supplemental Executive Retirement Plan of The Provident Bank. (Filed as Exhibit 10.5 to the Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009/File No. 001-31566.)

10.7

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Retirement Plan for the Board of Managers of The Provident Bank. (Filed as Exhibit 10.7 to the Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009 /File No. 001-31566.)

Provident Financial Services, Inc. Board of Directors Voluntary Fee Deferral Plan. (Filed as Exhibit 10.9 to the 10.8 Company's December 31, 2008 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on March 2, 2009/File No. 001-31566.)

First Savings Bank Directors' Deferred Fee Plan, as amended. (Filed as Exhibit 10.10 to the Company's September 10.9 30, 2004 Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission /File No. 001-31566.)

10.10 The Provident Bank Non-Qualified Supplemental Defined Contribution Plan. (Filed as an exhibit to the Company's May 27, 2010 Current Report on Form 8-K filed with the Securities and Exchange Commission on June 3, 2010/File No. 001-31566.)

10.11 Provident Financial Services, Inc. Amended and Restated the Long-Term Equity Incentive Plan. (Filed as an appendix to the Company's Proxy Statement for the 2014 Annual Meeting of Stockholders filed with the Securities and Exchange Commission on March 14, 2014/File No. 001-31566.)

10.12 Omnibus Incentive Compensation Plan. (Filed as Exhibit 10.19 to the Company's December 31, 2011 Annual Report to Stockholders on Form 10-K filed with the Securities and Exchange Commission on February 29, 2012/File No. 001-31566.)

10.13 Provident Financial Services, Inc. Executive Annual Incentive Plan (filed as an appendix to the Company's Proxy Statement for the Annual Meeting of Stockholders filed with the Securities and Exchange Commission on March 13, 2015/File No. 001-31566.)

31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32 Certification of Chief Executive Officer and Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

101 The following materials from the Company's Quarterly Report to Stockholders on Form 10-Q for the quarter ended September 30, 2016, formatted in XBRL (Extensible Business Reporting Language): (i) the Consolidated Statements of Financial Condition, (ii) the Consolidated Statements of Operations, (iii) the Consolidated Statements of Comprehensive Income, (iv) the Consolidated Statements of Changes in Stockholder's Equity, (v) the Consolidated Statements of Cash Flows and (vi) the Notes to Consolidated Financial Statements.
