FORM 10-K

✓ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the Fiscal Year Ended September 30, 2016

OR

..TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the Transition Period From To

Commission File Number: 001-32431

DOLBY LABORATORIES, INC.

(Exact name of registrant as specified in its charter)

Delaware

90-0199783

(State or other jurisdiction of incorporation or
organization)

(I.R.S. Employer Identification No.)

1275 Market Street
San Francisco, CA

94103-1410(415) 558-0200

(Address of principal executive offices)

(Zip Code) (Registrant's telephone number, including area
code)

Securities registered pursuant to Section 12(b) of the Act:

Class A common stock, \$0.001 par value The New York Stock Exchange

(Title of class)

(Name of each exchange on which registered)

Securities registered pursuant to

Section 12(g) of the Act:

Class B common stock, \$0.001 par value

(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the

Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any,
every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section
232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to
submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of
this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive
proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this
Form 10-K.

Indicate by a check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer,
or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting
company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The aggregate market value of the voting common equity held by non-affiliates of the registrant as of April 1, 2016 was \$1.7 billion. This calculation excludes the shares of Class A and Class B common stock held by executive officers, directors and stockholders whose ownership exceeds 5% of the combined shares of Class A and Class B common stock outstanding at April 1, 2016. This calculation does not reflect a determination that such persons are affiliates for any other purposes. On October 28, 2016, the registrant had 57,079,744 shares of Class A common stock, par value \$0.001 per share, and 44,403,847 shares of Class B common stock, par value \$0.001 per share, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Definitive Proxy Statement to be filed with the Commission pursuant to Regulation 14A in connection with the registrant's 2017 Annual Meeting of Stockholders, to be filed subsequent to the date hereof, are incorporated by reference into Part III of this Report. Such Definitive Proxy Statement will be filed with the Securities and Exchange Commission not later than 120 days after the conclusion of the registrant's fiscal year ended September 30, 2016. Except with respect to information specifically incorporated by reference in this Form 10-K, the Definitive Proxy Statement is not deemed to be filed as part of this Form 10-K.

GLOSSARY OF TERMS

The following table summarizes certain terms and abbreviations that may be used within the text of this report:

Abbreviation	Term
AAC	Advanced Audio Coding
AFS	Available-For-Sale (Securities)
AOCI	Accumulated Other Comprehensive Income
APIC	Additional-Paid In-Capital
ASP	Average Selling Price
ASU	Accounting Standards Update
ATSC	Advanced Television Systems Committee
AVR	Audio/Video Receiver
CE	Consumer Electronics
CODM	Chief Operating Decision Maker
COGS	Cost Of Goods Sold
COSO	Committee Of Sponsoring Organizations (Of The Treadway Commission)
DCI	Digital Cinema Initiative
DD	Dolby Digital®
DD+	Dolby Digital Plus™
DMA	Digital Media Adapter
DTV	Digital Television
DVB	Digital Video Broadcasting
DVD	Digital Versatile Disc
EPS	Earnings Per Share
ESP	Estimated Selling Price
ESPP	Employee Stock Purchase Plan
FASB	Financial Accounting Standards Board
FCPA	Foreign Corrupt Practices Act
G&A	General & Administrative
GAAP	Generally Accepted Accounting Principles
HDR	High-Dynamic Range
HDTV	High Definition Television
HE AAC	High Efficiency Advanced Audio Coding
HEVC	High Efficiency Video Coding
HFR	High Frame Rate
HTIB	Home Theater In-A-Box
IC	Integrated Circuit
IMB	Integrated Media Block
IP	Intellectual Property
IPO	Initial Public Offering
IPTV	Internet Protocol Television
ISO	Incentive Stock Option
ISV	Independent Software Vendor
IT	Information Technology
LCD	Liquid Crystal Display
LP	Limited Partner/Partnership
ME	Multiple Element
NATO	North American Theatre Owners
NOL	Net Operating Loss

NQ	Non-Qualified/Non-Statutory Stock Option
OCI	Other Comprehensive Income
ODD	Optical Disc Drive
OECD	Organization For Economic Co-Operation & Development
OEM	Original Equipment Manufacturer
OLED	Organic Light-Emitting Diode
OTT	Over-The-Top
PC	Personal Computer
PCS	Post-Contract Support
PP&E	Property, Plant And Equipment
PSO	Performance-Based Stock Option
R&D	Research & Development
RSU	Restricted Stock Unit
S&M	Sales & Marketing
SAR	Stock Appreciation Rights
SERP	Supplemental Executive Retirement Plan
SoC	System(s)-On-A-Chip
STB	Set-Top Box
TAM	Total Available Market
TPE	Third Party Evidence
TSR	Total Stockholder Return
UHD	Ultra High Definition
U.S. GAAP	Generally Accepted Accounting Principles In The United States
VSOE	Vendor Specific Objective Evidence

Forward Looking Statements

This Annual Report on Form 10-K contains forward-looking statements including, but not limited to statements regarding: operating results and underlying measures; demand and acceptance for our technologies and products; market growth opportunities and trends; our plans, strategies and expected opportunities; and future competition. Use of words such as “may,” “will,” “should,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “potential,” “continue” expressions indicates a forward-looking statement. Such forward-looking statements are based on management’s reasonable and current assumptions and expectations. Actual results may differ materially from those discussed in these forward-looking statements due to a number of factors, including the risks set forth in Item 1A, “Risk Factors.” Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We disclaim any duty to update any of the forward-looking statements to conform our prior statements to actual results.

Table of Contents

PART I

ITEM 1. BUSINESS

OVERVIEW

Dolby Laboratories creates audio and imaging technologies that transform entertainment and communications at the cinema, at home, at work and on mobile devices. Founded in 1965, our strengths stem from expertise in digital signal processing and compression technologies that have transformed the ability of artists to convey entertainment experiences to their audiences through recorded media. Such technologies led to the development of our noise-reduction systems for analog tape recordings, and have since evolved into multiple offerings that enable more immersive sound for cinema, digital television transmissions and devices, OTT video services, DVD and Blu-ray Discs, gaming consoles, and mobile devices. Today, we derive the majority of our revenue from licensing our audio technologies. We also derive revenue from licensing our consumer imaging and communication technologies, as well as audio and imaging technologies for premium cinema offerings in collaboration with exhibitors. Finally, we provide products and services for a variety of applications in the cinema, broadcast and communications markets.

OUR STRATEGY

Key elements of our strategy include:

Advancing the Science of Sight and Sound. We apply our understanding of the human senses, audio and imaging engineering to develop technologies aimed at improving how people experience and interact with their entertainment and communications content.

Providing Creative Solutions. We promote the use of our solutions as creative tools, and provide our products, services and technologies to filmmakers, sound mixers and other production teams in their creative processes. Our tools help showcase the quality and impact of their efforts and intent, and this may generate market demand.

Delivering Superior Experiences. Our technologies and solutions optimize playback and communications so that users may enjoy sound and sight in Dolby by providing a more rich, clear, and immersive experience.

REVENUE GENERATION

The following table presents a summary of the composition of our revenue for all periods presented:

Revenue	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Licensing	89%	89%	92%
Products	9%	9%	6%
Services	2%	2%	2%
Total	100%	100%	100%

We license our technologies in approximately 50 countries, and our licensees distribute products that incorporate our technologies throughout the world. As shown in the table below, we generate a significant portion of our revenue from outside the United States. Geographic data for our licensing revenue is based on the location of our licensees' headquarters, products revenue is based on the destination to which we ship our products, and services revenue is based on the location where services are performed.

Revenue By Geographic Location	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
United States	31%	29%	33%
International	69%	71%	67%

We have licensing arrangements with over 550 electronics product OEMs and software developer licensees.

Table of Contents

Licensing

We license our technologies and IP to a range of customers who incorporate them into their products for enhanced audio and imaging functionality whether it be at home, at work, on mobile devices, or at the cinema. Our key technologies and IP are as follows:

Technology	Description
AAC & HE-AAC	An advanced digital audio codec solution with higher bandwidth efficiency used for a wide range of media applications such as TVs, STBs, PCs, gaming consoles, mobile devices and digital radio.
Dolby® AC-4	A next-generation digital audio coding technology that maximizes transmission efficiency while delivering new audio experiences to every playback device, including TVs, PCs, and mobile devices.
Dolby Atmos®	An object-oriented audio technology for home theaters, cinema, device speakers, and headphones that allows sound to be precisely placed and moved anywhere in the listening environment including the overhead dimension. The Dolby Atmos experience can be provided via multiple Dolby audio coding technologies.
Dolby Digital®	A digital audio coding technology that provides multichannel sound to applications such as DVD players, TVs and STBs.
Dolby Digital Plus™	An advanced digital audio coding technology that offers more efficient audio transmission for a wide range of media applications such as TVs, Blu-ray Discs, PCs, and mobile devices.
Dolby® TrueHD	A digital audio coding technology providing lossless encoding for premium quality media applications such as Blu-ray Discs and home theaters.
Dolby Vision™	An imaging technology combining HDR and an expanded color spectrum to deliver higher contrast, brighter highlights, and improved details for TV, cinema, and other consumer devices.
Dolby Voice®	An audio conferencing technology with superior spatial perception, voice clarity and background noise reduction that emulates the in-person meeting experience.
HEVC	An advanced digital video codec with higher bandwidth efficiency used in a wide range of media devices.

The following table presents the composition of our licensing business and revenue for all periods presented:

Market	Fiscal Year Ended			Main Offerings Incorporating Our Technologies
	September 30, 2016	September 25, 2015	September 26, 2014	
Broadcast	46%	44%	43%	STBs & Televisions
PC	16%	17%	19%	Windows and macOS operating systems
Mobile	12%	13%	13%	Smartphones & tablets
CE	13%	14%	15%	DMAs, Blu-ray Disc devices, AVRs, soundbars, DVDs & HTIBs
Other	13%	12%	10%	Gaming consoles, Auto DVD, Dolby Cinema, Dolby Voice
Total	100%	100%	100%	

We have various licensing models: a two-tier model, an integrated licensing model, a patent licensing model, and more recently, collaboration arrangements.

Two-Tier Licensing Model. Most of our consumer entertainment licensing business consists of a two-tier licensing model whereby our decoding technologies, included in reference software and firmware code, are first provided under license to semiconductor manufacturers whom we refer to as “implementation licensees.” Implementation licensees incorporate our technologies in ICs which they sell to OEMs of consumer entertainment products, whom we refer to as “system licensees.” System licensees separately obtain licenses from us that allow them to make and sell end-user products using ICs that incorporate our technologies.

Implementation licensees pay us a one-time, up-front fee per license. In exchange, the licensee receives a licensing package which includes information useful in implementing our technologies into their chipsets. Once implemented, the licensee sends us a sample chipset for quality control evaluation, and following our validation of the design, the licensee is permitted to sell the chipset for use solely to our network of system licensees.

System licensees provide us with prototypes of products, or self-test results of products that incorporate our technologies. Upon our confirmation that our technologies are optimally and consistently incorporated, the system licensee may buy ICs under a license for the same Dolby technology from our network of implementation licensees, and may further sell approved products to retailers, distributors, and consumers. For the use of our technologies, our system licensees pay an initial licensing fee as well as royalties, which represent the majority of the revenue recognized from these arrangements. The amount of royalties we collect on a particular product depends on several factors including the nature of the implementations, the mix of Dolby technologies used, and the volume of products using our technologies that are shipped by the system licensee.

Table of Contents

Integrated Licensing Model. We also license our technologies to software operating system vendors and ISVs, and to certain other OEMs that act as combined implementation and system licensees. These licensees incorporate our technologies in their software used on PCs, in mobile applications, or in ICs they manufacture and incorporate into their products. As with the two-tier licensing model, the combined implementation and system licensee pays us an initial licensing fee in addition to royalties as determined by the mix of Dolby technologies used, the nature of the implementations, and the volume of products using our technologies that are shipped, and is subject to the same quality control evaluation process.

Patent Licensing Model. We license our patents through patent pools which are arrangements between multiple patent owners to jointly offer and license pooled patents to licensees. We also license our patents directly to manufacturers that use our IP in their products. Finally, we generate service fees for managing patent pools on behalf of third party patent owners through our wholly-owned subsidiary, Via Licensing Corporation. By aggregating and offering pooled IP, patent pools deliver efficiencies that reduce transactional costs for both IP owners and licensees. The Via Licensing patent pools enable product manufacturers to efficiently and transparently secure patent licenses for audio coding, interactive television, digital radio and wireless technologies. We offer our AAC, AVC, HE-AAC, HEVC and other IP through patent licensing. Currently, most of our revenue earned from patent licensing relates to the licensing of AAC and HE-AAC technologies.

Collaboration Arrangements.

Dolby Cinema: We partner with exhibitors to create a premium cinema offering with Dolby Vision and Dolby Atmos at new and pre-existing venues that are optimized for an immersive entertainment experience. We receive a portion of box-office receipts from the installed theaters.

Dolby Voice: We enter into arrangements with audio and video conferencing providers where, in return for licensing our IP and know-how, we earn revenue based on access to our technology and services as well as on sales of the Dolby Voice Conference Phone (see "Products" below).

Settlements & Back Payments From Licensees: Licensing revenue recognized in any given quarter may include back payments and/or settlements with licensees. Within the Results of Operations section of Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations," settlements and back payments are collectively referred to as "recoveries." Such recoveries have become a recurring element of our business which we cannot predict with certainty.

Products

We design and manufacture audio and imaging products for the cinema, television, broadcast, and entertainment industries. Distributed in over 80 countries, these products are used in content creation, distribution, and playback to enhance image and sound quality, and improve transmission and playback. We also market and sell the Dolby Conference Phone which optimizes the conference call experience when using Dolby Voice.

The following table presents the composition of our products revenue for all periods presented:

Market	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Cinema	98%	89%	86%
Broadcast & Other	2%	11%	14%
Total	100%	100%	100%

Products revenue is derived primarily from sales of the following:

Product	Description
Cinema Digital Cinema Servers	Our Digital Cinema Server products are used to load, store, decrypt, decode and watermark digital film files for presentation on digital cinema projectors. We also provide products that encrypt, encode and package digital film data for distribution.
Cinema Cinema Audio Products	Our Cinema Processors decode and render digital cinema soundtracks including those using Dolby Atmos. We also provide products that author, encrypt, encode and package Dolby Atmos sound tracks.

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Dolby	An integral hardware component of the Dolby Voice conferencing solution that
Conference	enhances productivity through superior sound, full-room voice capture, spatial voice
Broadcast & Phone	separation and touch-screen interface.
Other	3-D glasses and kits, broadcast hardware and software used to encode, transmit, and
Other Products	decode multiple channels of high quality audio for DTV and HDTV distribution, monitors, and accessibility solutions for hearing and visually impaired consumers.

6

Table of Contents

Services

We offer various services to support theatrical and television production for cinema exhibition, broadcast, and home entertainment, including equipment training and maintenance, mixing room alignment, equalization, as well as audio, color and light image calibration.

INTELLECTUAL PROPERTY

We have a substantial base of IP assets, including patents, trademarks, copyrights, and trade secrets developed based on our technical expertise.

As of September 30, 2016, we had approximately 6,600 issued patents and approximately 4,200 pending patent applications in more than 90 jurisdictions throughout the world. Our currently issued patents expire at various times through September 2040.

Some of our patents relating to DD technologies, from which we derive a significant, but declining portion of our licensing revenue, have expired and others will expire over the next several years. The primary products where DD is widely used include DVD players (but not Blu-ray players), TVs, and STBs. We have transitioned a number of our DD licensees to DD+ technologies, an extension of our DD technologies, whose patents generally expire later than the DD patents. We are continuing to make progress in transitioning other DD licensees to DD+, technologies from which we derive the majority of our licensing revenue.

We pursue a general practice of filing patent applications for our technologies in the U.S. and foreign countries where our customers manufacture, distribute, or sell licensed products. We actively pursue new applications to expand our patent portfolio to address new technological innovations. We have multiple patents covering aspects and improvements for many of our technologies.

We have approximately 1,000 trademark registrations throughout the world for a variety of wordmarks, logos, and slogans. Our trademarks cover our various products, technologies, improvements, and features, as well as the services that we provide. These trademarks are an integral part of our technology licensing program, and licensees typically elect to place our trademarks on their products to inform consumers that their products incorporate our technology and meet our quality specifications.

We protect our IP rights both domestically and internationally. From time to time, we experience problems with OEMs of consumer entertainment products in emerging economies. OEMs have failed to report or have underreported shipments of their products that incorporate our technologies. We have also had problems with implementation licensees selling ICs with our technologies to third parties that are not system licensees. We anticipate that such problems will continue to occur. We have taken steps in the past to enforce our IP rights and expect to do so in the future.

Moreover, we have relatively few or no issued patents in certain countries. For example, in China, Taiwan, and India, we have only limited patent protection for our Dolby technologies. Consequently, we may realize less revenue for DD technologies from those regions in the future. Maintaining or growing our licensing revenue in developing countries such as China, Taiwan, and India will depend in part, on our ability to obtain patent rights in these countries, which is uncertain. Further, because of the limitations of the legal systems in many countries, the effectiveness of patents obtained or that may in the future be obtained, if any, is uncertain.

INDUSTRY STANDARDS

Several Dolby technologies have been adopted as the explicit or de facto industry standard for broadcast, discrete media and online delivery in various markets worldwide.

Explicit industry standards are adopted through a standardization process whereby government entities, industry standards-setting bodies, trade associations, and others evaluate, and then prescribe the use of a technology. For example, as global broadcast standards for digital, HD and UHD television have developed, Dolby audio technologies have been adopted or mandated in various regions of the world, highlights of which are as follows:

DD+ and HE-AAC are mandated for use in terrestrial broadcast across many countries including France, Italy, the United Kingdom, Sweden, Germany, Poland, Turkey and Russia. In addition, DD+ and HE-AAC are included in the digital terrestrial television specifications of emerging digital TV markets in Africa, South-East Asia and India while China has selected DD and DD+ as optional technologies for the country's digital terrestrial television specification.

Table of Contents

- DD+ is the de facto technology used by a wide range of pay-TV operators and streaming services worldwide, such as Netflix, and is included in popular operating systems such as iOS and Windows.

DD is mandated for HD broadcast in multiple regions including North America and South Korea, and for DVD players on a global basis.

AC-4 is Dolby's next generation of audio technology that is in the process of being adopted by worldwide standards organizations.

In addition, Dolby technologies have become de facto industry standards in many consumer entertainment products. De facto industry standards are adopted by industry participants when technologies are introduced to the marketplace and become widely used. For example, prior to the adoption of HD terrestrial broadcast standards mandating Dolby technologies, many European HD broadcasters began broadcasting in DD or DD+, leading OEMs to include these technologies in their televisions and STBs for the European market.

RESEARCH AND DEVELOPMENT

We conduct R&D activities at numerous locations both in the U.S. and internationally. Dolby's history of producing innovative technology has created many forms of IP. When licensed from us, this IP generates revenue that enables further innovation.

For much of the Company's history, we focused the majority of our R&D resources on audio technologies. In recent years, we have expanded our efforts to identify and develop new technologies beyond the strong audio platform that comprises most of our revenue to include audio conferencing and imaging technologies. Each of these technologies can support many offerings, and we anticipate bringing new products to market using these platforms in the future. R&D expenses included in our consolidated statements of operations were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Research & Development	\$ 219,607	\$ 201,324	\$ 183,128

PRODUCT MANUFACTURING

Our product quality is enabled through the use of well-established, and in some cases, highly automated, assembly processes along with rigorous testing of our products. Although we have some manufacturing facilities, we rely primarily upon contract manufacturers for the majority of our production capacity. We purchase components and fabricated parts from multiple suppliers; however, we rely on sole source suppliers for certain components used to manufacture our products. We source components and fabricated parts both locally and globally.

SALES AND MARKETING

Our marketing efforts focus on demonstrating how our solutions improve entertainment and communications. We sell our solutions primarily using an internal sales organization to various customers in the markets where we operate. We promote our solutions and our brand through industry events such as trade-shows, film festivals, movie premieres, product launches, as well as through our website, public relations, direct marketing, co-marketing programs and social media. In addition, we hold the naming rights to the Dolby Theatre, home to the Academy Awards® in Hollywood, California, where we showcase our technology and host high-profile events.

We maintain more than twenty sales offices in key regions around the globe. S&M expenses included in our consolidated statements of operations were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Sales & Marketing	\$ 295,267	\$ 279,174	\$ 252,647

CUSTOMERS

We license our technologies and IP to a broad set of customers that operate in a wide range of industries, and we sell our professional products either directly to the end user or, more commonly, through dealers and distributors. Users of our professional products and services include film studios, content creators, post-production facilities, cinema operators, broadcasters, and video game designers.

Table of Contents

In fiscal 2016, we did not have any individual customers whose revenue exceeded 10% of our total revenue. One of our licensees, Samsung, accounted for approximately 12% and 11% of our total revenue in fiscal 2015 and 2014, respectively, and primarily consisted of licensing revenue from our mobile and broadcast markets.

COMPETITION

The markets for entertainment industry technologies are highly competitive, and we face competitive threats and pricing pressure in our markets. Competitors in our respective fields include:

Licensing	Products	Services
DTS, Inc.	Barco NV	Deluxe Entertainment Services Group Inc.
Fraunhofer Institut Integrierte Schaltungen	Christie Digital Systems USA, Inc.	DTS, Inc.
Koninklijke Philips Electronics NV	DTS, Inc.	Sony Corporation
Qualcomm, Inc.	GDC Technology Limited	Technicolor
Samsung	Harman Group	
Sony Corporation	IMAX Corporation	
Technicolor	MasterImage 3D, Inc.	
Thomson Video Networks	QSC Audio Products, LLC	
	Qube Cinema, Inc.	
	RealD, Inc.	
	Sony Corporation	
	Technicolor	
	Ultra Stereo Labs, Inc. (USL)	
	XpanD, Inc.	

Some of our current and future competitors may have significantly greater financial, technical, marketing, and other resources than we do, or may have more experience or advantages in the markets in which they compete. For example, some of our current or potential competitors may have an advantage over us based on greater experience in certain technology markets. In addition, some of our current or potential competitors may be able to offer integrated systems in certain markets for entertainment technologies, including audio, imaging, and digital rights management technologies, which could make competing technologies that we develop or acquire obsolete. By offering an integrated system solution, these potential competitors may also be able to offer competing technologies at lower prices than we can, which could adversely affect our operating results.

Many products that include our audio and imaging technologies also include technologies developed by our competitors. We believe that the principal competitive factors in our markets include some or all of the following:

- Degree of access and inclusion in industry standards;
- Technological performance, flexibility, and range of application;
- Brand recognition and reputation;
- Timeliness and relevance of new product introductions;
- Quality and reliability of products and services;
- Relationships with producers, directors, and distributors in the film industry, with television broadcast industry leaders, and with the management of semiconductor and consumer electronics OEMs;
- Availability of compatible high quality audio content; and
- Price.

Our technologies, products and services span the audio and imaging sectors of several distinct and diverse industries, including the broadcasting, personal computer, mobile, consumer entertainment, cinema and communications industries. The lack of a clear definition of the markets in which our products, services, and technologies are sold or licensed, the nature of our technologies, their potential use for various commercial applications, and the diverse nature of and lack of detailed reporting by our competitors, make it impracticable to quantify our position.

EMPLOYEES

As of September 30, 2016, we had 2,030 employees worldwide, of which 793 employees were based outside of the U.S. None of our employees are subject to a collective bargaining agreement.

Table of Contents

CORPORATE AND AVAILABLE INFORMATION

We were founded in London, England in 1965 and incorporated in the State of New York in 1967. We reincorporated in California in 1976 and reincorporated in Delaware in September 2004. Our principal corporate offices are located at 1275 Market Street, San Francisco, California 94103. Our telephone number is (415) 558-0200.

Our Internet address is www.dolby.com. We make available on our website, free of charge, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Our SEC reports can be accessed through the Investor Relations section of our Internet website. The information found on our Internet website is not part of this or any other report we file with or furnish to the SEC.

Table of Contents

ITEM 1A. RISK FACTORS

The following risk factors and other information included in this Annual Report on Form 10-K should be carefully considered. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not currently known to us or that we currently deem less significant may also affect our business operations or financial results. If any of the following risks actually occur, our business, operating results and financial condition could be materially adversely affected.

REVENUE GENERATION

Markets We Target

Dependence on Sales by Licensees. Our licensing businesses depend on OEMs and other licensees to incorporate our technologies and IP into their products. Our license agreements generally do not have minimum purchase commitments, are typically non-exclusive, and frequently do not require incorporation or use of our technologies. Our revenue will decline if our licensees choose not to incorporate our technologies in their products or they sell fewer products incorporating our technologies.

Impact of PC Sales. Revenue from our PC market depends on several factors, including underlying PC unit shipment growth, the extent to which our technologies are included on computers, through operating systems or otherwise, and the terms of any royalties or other payments we receive. We face challenges in the PC market, including:

- Purchasing trends away from traditional PCs and toward computing devices without optical disc drives, such as ultrabooks and tablets;

- Because PC OEMs are required to pay us a higher per-unit royalty for Windows 8 and Windows 10 PCs that include optical disc playback functionality than Windows 8 or Windows 10 PCs that do not include such functionality, the continued decreasing inclusion of optical disc drives in Windows 8 or Windows 10 PCs will result in lower per-unit royalties;

- PC software that includes our technologies on an unauthorized and infringing basis, for which we receive no royalty payments; and

- Continued decreasing inclusion of independent software vendor media applications by PC OEMs.

Declines in Optical Disc Media. For many years, movies have been distributed, purchased, and consumed through optical disc media, such as DVD and Blu-ray Disc. However, the rapid advancement of online and mobile content delivery has resulted in a trend toward movie downloading and streaming services. We expect the shift away from optical disc media to online and mobile media content consumption to continue, resulting in decreased revenue from DVD and Blu-ray Disc players.

Mobile Industry Risks. Successful penetration of the mobile device market is important to our future growth. The mobile device market, particularly smartphones and tablets, is characterized by rapidly changing market conditions, frequent product introductions and intense competition based on features and price. Our DD and DD+ technologies are not mandated as an industry standard for mobile devices. We must continually convince mobile device OEMs and end users of mobile devices of the value of our technologies. With shorter product lifecycles, it is easier for mobile device OEMs to add or remove our technologies from mobile devices than it was for PC OEMs.

In order to increase the value of our technologies in the mobile market, we have worked with online and mobile media content service providers to encode their content with our technologies, which could affect OEM and software vendor demand for our decoding technologies. However, the online and mobile media content services markets are also characterized by intense competition, evolving industry standards and business and distribution models, disruptive software and hardware technology developments, frequent product and service introductions and short life cycles, and price sensitivity on the part of consumers, all of which may result in downward pressure on pricing or the removal of our technologies by these providers.

Cinema Industry Risks. Revenue from Dolby Cinema and cinema product sales is subject to the pace of construction or upgrade of screens, the advent of new or competing technologies, consumer trends, and events or

conditions in the cinema industry. Although we have invested, and expect to continue to invest, a substantial amount of time and resources developing Dolby Cinema and building our partnerships in connection with the launch of Dolby Cinema locations, this is a new market for us and we may not recognize a meaningful amount of revenue from these efforts in the near future, or at all, if Dolby Cinema is not ultimately successful. Additionally, we have a collaboration with Wanda Cinema Line to open 100 Dolby Cinema locations in China, and we may face a number of risks in

Table of Contents

expanding Dolby Cinema in China and other new international markets. The royalties we receive from Dolby Cinema exhibitors are based on a portion of box-office receipts from the installed theaters, and the timing of such theater installations is dependent upon a number of factors beyond our control. In addition, the success of our Dolby Cinema offering will be tied to the pipeline and success of motion pictures available at Dolby Cinema locations generally. The success of Dolby Cinema depends in large part on our ability to differentiate our offering, deploy new sites in accordance with plans, provide a compelling experience, and attract and retain a viewing audience. In addition, a decrease in our ability to develop and introduce new cinema products and services successfully could affect licensing of our consumer technologies, because the strength of our brand and our ability to use professional product developments to introduce new consumer technologies would be negatively impacted.

Our revenue from cinema product sales is also tied to the number of movies produced and distributed by studios and independent filmmakers. A number of factors outside of our control can affect the number of movies that are produced, including strikes and work stoppages within the cinema industry and budgetary constraints and changes in cinema industry business models.

Maturity of Digital Cinema Market. The industry transition to digital cinema is essentially complete, and the demand for new digital cinema screens has dropped significantly, leading to lower sales volumes of our cinema products. Future cinema product growth depends on a number of factors, including new theater construction, the introduction of new technologies, such as Dolby Atmos and Dolby Vision, and entering into a replacement cycle where previously purchased cinema products are upgraded or replaced. We face a number of challenges relating to the maturity of the digital cinema market, including:

• Exhibitors may choose competing products with different features or lower prices; and

• Pricing and other competitive pressures have caused us to implement pricing strategies which have adversely affected gross margins of our cinema products.

Customers and Distributors

Loss of Key Licensee or Customer. A small number of our licensees or customers may represent a significant percentage of our licensing, products, or services revenue. Although we generally have agreements with these licensees or customers, these agreements typically do not require any minimum purchases or minimum royalty fees and do not prohibit licensees from using competing technologies or customers from purchasing products and services from competitors. Because many of our markets are rapidly evolving, customer demand for our technologies and products can shift quickly. Because of our increased presence in the mobile market where our DD and DD+ technologies are not mandated as industry standards, the risk that a large licensee may reduce or eliminate its use of our technologies has increased.

Reliance on Semiconductor Manufacturers. Our licensing revenue from system licensees depends in large part upon the availability of ICs that implement our technologies. IC manufacturers incorporate our technologies into these ICs, which are then incorporated in consumer entertainment products. We do not manufacture these ICs, but rather depend on IC manufacturers to develop, produce, and then sell them to system licensees in accordance with their agreements. We do not control the IC manufacturers' decisions whether or not to incorporate our technologies into their ICs, and we do not control their product development or commercialization efforts.

Consumer Spending Weakness. Weakness in general economic conditions may suppress consumer demand in our markets. Many of the products in which our technologies are incorporated are discretionary goods, such as PCs, televisions, STBs, Blu-ray Disc players, video game consoles, AVRs, mobile devices, in-car entertainment systems, and home-theater systems. Weakness in general economic conditions may also lead to licensees and customers becoming delinquent on their obligations to us or being unable to pay, resulting in a higher level of write-offs. Economic conditions may increase underreporting and non-reporting of royalty-bearing revenue by our licensees as well as increase the unauthorized use of our technologies.

Reliance on Distributors. We rely significantly on a global network of independent, regional distributors to market and distribute our cinema and broadcast products. Our distributor arrangements are non-exclusive and our distributors are not obligated to buy our products and can represent competing products, and they may be unwilling or unable to

dedicate the resources necessary to promote our portfolio of products. Our distributors could retain product channel inventory levels that exceed future anticipated sales, which could affect future sales to those distributors. In addition, failure of our distributors to adhere to our policies designed to promote compliance with global anticorruption laws, export controls, and local laws, could subject us to criminal or civil penalties and stockholder litigation.

Table of Contents

Marketing and Branding

Importance of Brand Strength. Maintaining and strengthening the Dolby brand is critical to maintaining and expanding our licensing, products, and services business, as well as our ability to offer technologies for new markets, including Dolby Voice for the communications market, Dolby Cinema, Dolby Vision and other imaging offerings for the consumer market, and others. Our continued success depends on our reputation for providing high quality technologies, products, and services across a wide range of entertainment markets, including the consumer entertainment, PC, broadcast, and gaming markets. If we fail to promote and maintain the Dolby brand successfully in licensing, products or services, our business will suffer. Furthermore, we believe that the strength of our brand may affect the likelihood that our technologies are adopted as industry standards in various markets and for various applications. Our ability to maintain and strengthen our brand will depend heavily on our ability to develop innovative technologies for the entertainment industry, to enter into new markets successfully, and to provide high quality products and services in these new markets.

Industry Standards

The entertainment industry depends upon industry standards to ensure compatibility across delivery platforms and a wide variety of consumer entertainment products. We make significant efforts to design our products and technologies to address capability, quality, and cost considerations so that they either meet, or more importantly, are adopted as industry standards across the broad range of entertainment industry markets in which we participate, as well as the markets in which we hope to compete in the future. To have our products and technologies adopted as industry standards, we must convince a broad spectrum of standards-setting organizations throughout the world, as well as our major customers and licensees who are members of such organizations, to adopt them as such. The market for broadcast technologies has traditionally been heavily based on industry standards, often mandated by governments choosing from among alternative standards, and we expect this to be the case in the future.

Difficulty Becoming Incorporated in an Industry Standard. Standards-setting organizations establish technology standards for use in a wide range of consumer entertainment products. It can be difficult for companies to have their technologies adopted as an industry standard, as multiple companies, including ones that typically compete against one another, are involved in the development of new technology standards for use in entertainment-oriented products. Furthermore, some standards-setting organizations choose to adopt a set of optional standards or a combination of mandatory and optional standards; in such cases, our technologies may be adopted only as an optional standard and not a mandatory standard. Standards may also change in ways that are unfavorable to Dolby.

Participants May Choose Among Alternative Technologies within Standards. Even when a standards-setting organization incorporates our technologies in an industry standard for a particular market, our technologies may not be the sole technologies adopted for that market. Furthermore, different standards may be adopted for different markets. Our operating results depend upon participants in that market choosing to adopt our technologies instead of competitive technologies that also may be acceptable under such standard. For example, the continued growth of our revenue from the broadcast market will depend upon both the continued global adoption of digital television generally and the choice to use our technologies where it is one of several accepted industry standards.

Being Part of a Standard May Limit Our Licensing Practices. When a standards-setting organization mandates our technologies, we generally must agree to license such technologies on a fair, reasonable, and non-discriminatory basis, which could limit our control over the use of these technologies. In these situations, we must often limit the royalty rates we charge for these technologies and we may be unable to limit to whom we license such technologies or to restrict many terms of the license. We have in the past, and may in the future, be subject to claims that our licensing of industry standard technologies may not conform to the requirements of the standards-setting organization. Allegations such as these could be asserted in private actions seeking monetary damages and injunctive relief, or in regulatory actions. Claimants in such cases could seek to restrict or change our licensing practices or our ability to license our technologies.

Royalty Reporting

Our operating results fluctuate based on the risks set forth in this section, as well as on:

- Timing of royalty reports from our licensees and meeting revenue recognition criteria;
- Royalty reports including positive or negative corrective adjustments;
- Retroactive royalties that cover extended periods of time; and
- Timing of revenue recognition under licensing agreements and other contractual arrangements, including

Table of Contents

recognition of unusually large amounts of revenue in any given quarter because not all of our revenue recognition criteria were met in prior periods.

Inaccurate Licensee Royalty Reporting. We generate licensing revenue primarily from OEMs who license our technologies and incorporate those technologies in their products. Our license agreements generally obligate our licensees to pay us a specified royalty for every product they ship that incorporates our technologies, and we rely on our licensees to report their shipments accurately. However, we have difficulty independently determining whether our licensees are reporting shipments accurately, particularly with respect to software incorporating our technologies because unauthorized copies of such software can be made relatively easily. A third party may disagree with our interpretation of the terms of a license agreement or, as a result of an audit, a third party could challenge the accuracy of our calculation. We are regularly involved in discussions with third party technology licensees regarding license terms. Most of our license agreements permit us to audit our licensees' records, and we routinely exercise these rights, but audits are generally expensive, time-consuming, and potentially detrimental to our ongoing business relationships with our licensees. In the past, licensees have understated or failed to report the number of products incorporating our technologies that they shipped, and we have not been able to collect and recognize revenue to which we were entitled. We expect that we will continue to experience understatement and non-reporting of royalties by our licensees. We have been able to obtain certain recovery payments from licensees (either in the form of back payments or settlements), and such recoveries have become a recurring element of our business; however, we are unable to predict with certainty the revenue that we may recover in the future or if we will be able to continue to obtain such recoveries at all.

Royalties We Owe Others. In some cases, the products we sell and the technologies we license to our customers include IP that we have licensed from third parties. Our agreements with these third parties generally require us to pay them royalties for that use, and give the third parties the right to audit our calculation of those royalties. A third party may disagree with our interpretation of the terms of a license agreement or, as a result of an audit, a third party could challenge the accuracy of our calculation. We are regularly involved in discussions with third party technology licensors regarding license terms. A successful challenge by a third party could result in the termination of a license agreement or an increase in the amount of royalties we have to pay to the third party.

TECHNOLOGY TRENDS AND DEVELOPMENTS

Technology Innovation. Our revenue growth will depend upon our success in new and existing markets for our technologies, such as digital broadcast, mobile devices, online and mobile media distribution, cinema, consumer imaging and communications. The markets for our technologies and products are defined by:

- Rapid technological change;
- New and improved technology and frequent product introductions;
- Changing consumer and licensee demands;
- Evolving industry standards; and
- Technology and product obsolescence.

Our future success depends on our ability to enhance our technologies and products and to develop new technologies and products that address the market needs in a timely manner. Technology development is a complex, uncertain process requiring high levels of innovation, highly-skilled engineering and development personnel, and the accurate anticipation of technological and market trends. We may not be able to identify, develop, acquire, market, or support new or enhanced technologies or products on a timely basis, if at all.

Experience with New Markets and Business Models. Our future growth will depend, in part, upon our expansion into areas beyond our audio licensing business. Over the past few years, we have introduced Dolby Voice technology for the communications market, Dolby Vision for the home and cinema markets, and our branded-theater experience, Dolby Cinema. In connection with entering into these new markets, we face new sources of competition, new business models, and new customer relationships. In order to be successful in these markets, we will need to cultivate new industry relationships to bring our products, services, and technologies to market. Our inexperience in one or more of these markets could limit our ability to successfully execute on our growth strategy.

Incorporation of Dolby Formats into New Products & Availability of Content in Dolby Formats. The success of many of our newer initiatives, such as Dolby Atmos, Dolby Vision, and Dolby Cinema, is dependent upon the availability and success of (i) products that incorporate Dolby formats and (ii) content produced in Dolby formats. However, there is no guarantee that device makers will continue to incorporate Dolby formats into their products, that content creators will continue to release content in Dolby formats, or that either those products or that content will be

Table of Contents

commercially successful.

For instance, to successfully establish Dolby Vision and Dolby Atmos, we will need to continue to expand the array of products and consumer devices that incorporate Dolby Atmos and Dolby Vision, expand the pipeline of Dolby Atmos and Dolby Vision content available from content creators, and encourage consumer adoption in the face of competing products and technologies. Similarly, the success of Dolby Cinema is dependent upon our ability to partner with movie theater exhibitors to launch new Dolby Cinema sites and deploy new sites in accordance with plans, as well as the continued release and box-office success of new films in the Dolby Vision and Dolby Atmos formats released through Dolby Cinemas.

Further, the commercial success of products incorporating Dolby formats, content released in Dolby formats, and Dolby Cinemas generally, depends upon a number of factors outside of our control, including, but not limited to, consumer preferences, critical reception, timing of release, marketing efforts of third-parties, and general market conditions. Moreover, release and distribution of such products and content can be subject to delays in production or changes in release schedule, which can negatively impact the quantity, timing and quality of such products and content released in Dolby formats and available at Dolby Cinema theaters.

INTELLECTUAL PROPERTY

Our business is dependent upon protecting our patents, trademarks, trade secrets, copyrights, and other IP rights. Effective IP rights protection, however, may not be available under the laws of every country in which our products and services and those of our licensees are distributed. The efforts we have taken to protect our proprietary rights may not be sufficient or effective. We also seek to maintain select IP as trade secrets, and third parties or our employees could intentionally or accidentally compromise the IP that we maintain as trade secrets. In addition, protecting our IP rights is costly and time consuming. We have taken steps in the past to enforce our IP rights and expect to do so in the future. However, it may not be practicable or cost effective for us to enforce our IP rights fully, particularly in some countries or where the initiation of a claim might harm our business relationships.

We generally seek patent protection for our innovations. However, our patent program faces a number of challenges, including:

- Possibility that innovations may not be protectable;
- Failure to protect innovations that later turn out to be important;
- Insufficient patent protection to prevent third parties from designing around our patent claims;
- Our pending patent applications may not be approved; and
- Possibility that an issued patent may later be found to be invalid or unenforceable.

Patent Royalties and Expiration. Many of the technologies that we license to our system licensees are covered by patents, and the licensing revenue that we receive from those licenses depends in large part upon the life of such patents. In general, our agreements with our licensees require them to pay us a full royalty with respect to a particular technology only until the last patent covering that technology expires in a particular country. As of September 30, 2016, we had approximately 6,600 issued patents in addition to approximately 4,200 pending patent applications in more than 90 jurisdictions throughout the world. Our currently issued patents expire at various times through September 2040.

We seek to mitigate this risk in a variety of ways. We regularly look for opportunities to expand our patent portfolio through organic development and acquisitions. We develop proprietary technologies to replace licensing revenue from technologies covered by expiring patents with licensing revenue supported by patents with a longer remaining life. And we develop and license our technologies in a manner designed to minimize the chance that a system licensee would develop competing technologies that do not include any Dolby IP.

Some of our patents relating to DD technologies, from which we derive a significant, but declining portion of our licensing revenue, have expired and others will expire over the next several years. The primary products that incorporate DD include DVD players (but not Blu-ray players) and some TVs, STBs and soundbars. We have transitioned a number of our DD licensees, and continue to make progress in transitioning other DD licensees, to DD+ technologies, an extension of our DD technologies, whose patents generally expire later than the DD patents. To be

successful, we must continue to transition licensees to DD+, and discourage licensees of DD+ to transition back to DD as our original patents covering this technology expire.

Unauthorized Use of Our Intellectual Property. We have often experienced, and expect to continue to

Table of Contents

experience, problems with non-licensee OEMs and software vendors, particularly in China and certain emerging economies, incorporating our technologies and trademarks into their products without our authorization and without paying us any licensing fees. Manufacturers of ICs containing our technologies occasionally sell these ICs to third parties who are not our system licensees. These sales, and the failure of such manufacturers to report the sales, facilitate the unauthorized use of our IP. As emerging economies transition from analog to digital content, such as the transition from analog to digital broadcast, we expect to experience increased problems with this form of piracy.

Intellectual Property Litigation. Companies in the technology and entertainment industries frequently engage in litigation based on allegations of infringement or other violations of IP rights. We have faced such claims in the past, and we expect to face similar claims in the future. Any IP claims, with or without merit, could be time-consuming, expensive to litigate or settle, and could divert management resources and attention. In the past, we have settled claims relating to infringement allegations and agreed to make payments in connection with such settlements. An adverse determination in any IP claim could require that we pay damages or stop using technologies found to be in violation of a third party's rights and could prevent us from offering our products and services to others. In order to avoid these restrictions, we may have to seek a license for the technology, which may not be available on reasonable terms or at all. Licensors could also require us to pay significant royalties. As a result, we may be required to develop alternative non-infringing technologies, which could require significant effort and expense. If we cannot license or develop technologies for any aspects of our business found to be infringing, we may be forced to limit our product and service offerings and may be unable to compete effectively.

In some instances, we have contractually agreed to provide indemnifications to licensees relating to our IP. Additionally, at times we have chosen to defend our licensees from third party IP infringement claims even where such defense was not contractually required, and we may choose to take on such defense in the future.

Licensee Disputes. At times, we are engaged in disputes regarding the licensing of our IP rights, including matters related to our royalty rates and other terms of our licensing arrangements. These types of disputes can be asserted by our customers or prospective customers or by other third parties as part of negotiations with us or in private actions seeking monetary damages or injunctive relief, or in regulatory actions. In the past, licensees have threatened to initiate litigation against us based on potential antitrust claims or regarding our licensing royalty rate practices. Damages and requests for injunctive relief asserted in claims like these could be significant, and could be disruptive to our business.

U.S. and Foreign Patent Rights. Our licensing business depends in part on the uniform and consistent treatment of patent rights in the U.S. and abroad. Changes to the patent laws and regulations in the U.S. and abroad may limit our ability to obtain, license, and enforce our rights. Additionally, court and administrative rulings may interpret existing patent laws and regulations in ways that hurt our ability to obtain, license, and enforce our patents. We face challenges protecting our IP in foreign jurisdictions, including:

Our ability to enforce our contractual and IP rights, especially in countries that do not recognize and enforce IP rights to the same extent as the U.S., Japan, Korea, and European countries do, which increases the risk of unauthorized use of our technologies;

Limited or no patent protection for our DD technologies in countries such as China, Taiwan, and India, which may require us to obtain patent rights for new and existing technologies in order to grow or maintain our revenue; and

Because of limitations in the legal systems in many countries, our ability to obtain and enforce patents in many countries is uncertain, and we must strengthen and develop relationships with entertainment industry participants worldwide to increase our ability to enforce our IP and contractual rights without relying solely on the legal systems in the countries in which we operate.

OPERATIONS

Reliance on Key Suppliers. Our reliance on suppliers for some of the key materials and components we use in manufacturing our products involves risks, including limited control over the price, timely delivery, and quality of such components. We generally have no formal agreements in place with our suppliers for the continued supply of materials and components. Although we have identified alternate suppliers for most of our key materials and

components, any required changes in our suppliers could cause delays in our operations and increase our production costs. In addition, our suppliers may not be able to meet our production demands as to volume, quality, or timeliness. Moreover, we rely on sole source suppliers for some of the components that we use to manufacture our products, including specific charged coupled devices, light emitting diodes, and digital signal processors. These sole

Table of Contents

source suppliers may become unable or unwilling to deliver these components to us at an acceptable cost or at all, which could force us to redesign those specific products. Our inability to obtain timely delivery of key components of acceptable quality, any significant increases in the prices of components, or the redesign of our products could result in production delays, increased costs, and reductions in shipments of our products.

Product Quality. Our products, and products that incorporate our technologies, are complex and sometimes contain undetected software or hardware errors, particularly when first introduced or when new versions are released. In addition, we have limited control over manufacturing performed by contract manufacturers, which could result in quality problems. Furthermore, our products and technologies are sometimes combined with or incorporated into products from other vendors, sometimes making it difficult to identify the source of a problem. Any negative publicity or impact relating to these product problems could affect the perception of our brand and market acceptance of our products or technologies. These errors could result in a loss of or delay in market acceptance of our products or cause delays in delivering them and meeting customer demands, any of which could reduce our revenue and raise significant customer relations issues. In addition, if our products or technologies contain errors we could be required to replace or reengineer them, which would increase our costs. Moreover, if any such errors cause unintended consequences, we could incur substantial costs in defending and settling product liability claims. Although we generally attempt to contractually limit our liability, if these contract provisions are not enforced, or are unenforceable for any reason, or if liabilities arise that are not effectively limited, we could incur substantial costs in defending and settling product liability claims.

Production Processes and Production. Production difficulties or inefficiencies can interrupt production, resulting in our inability to deliver products on time in a cost effective manner, which could harm our competitive position. While we have three production facilities, we increasingly use contract manufacturers for a significant portion of our production capacity. Our reliance on contract manufacturers for the manufacture of our products involves risks, including limited control over timely delivery and quality of such products. If production of our products is interrupted, we may not be able to manufacture products on a timely basis. A shortage of manufacturing capacity for our products could reduce our operating results and damage our customer relationships. We may be unable to quickly adapt our manufacturing capacity to rapidly changing market conditions and a contract manufacturer may encounter similar difficulties. Likewise, we may be unable to quickly respond to fluctuations in customer demand or contract manufacturer interruptions. At times we underutilize our manufacturing facilities as a result of reduced demand for some of our products.

Data Security. We rely on information technology systems in the conduct of our business, including systems designed and managed by third parties. Many of these systems contain sensitive and confidential information, including our trade secrets and proprietary business information, personal data, and information of or pertaining to our customers, suppliers and business partners. The secure maintenance of this information is critical to our operations and business strategy. Increasingly, companies are subject to a wide variety of attacks on their networks and systems on an ongoing basis. Our information technology and infrastructure may be vulnerable to penetration or attacks by computer programmers and hackers, software bugs or other technical malfunctions, or other disruptions.

While we have taken a number of steps to protect our information technology systems, the number and sophistication of malicious attacks that companies have experienced from third parties has increased over the past few years. In addition, because techniques used by computer programmers and hackers (many of whom are highly sophisticated and well-funded) to access or sabotage networks and computer systems change frequently and often are not recognized until after they are used, we may be unable to anticipate or immediately detect these techniques. This could delay our response or the effectiveness of our response and impede our operations and ability to limit our exposure to third-party claims and potential liability. Attacks on our systems are sometimes successful, and, in some instances, we might be unaware of an incident or its magnitude and effects. We also may suffer data security breaches and the unauthorized access to, misuse or acquisition of, personal data or other sensitive and confidential information as the result of intentional or inadvertent breaches by our employees or service providers. Any data security breach, whether external or internal in origin, could compromise our networks and systems, creating system disruptions or slowdowns and exploiting security vulnerabilities of our products. Any such breach can result in the information stored on our

networks and systems being improperly accessed, publicly disclosed, lost, or stolen, which could subject us to liability to our customers, suppliers, business partners and others. We seek to detect and investigate such attempts and incidents and to prevent their recurrence where practicable through changes to our internal processes and tools, but in some cases preventive and remedial action might not be successful. In addition, despite the implementation of network security measures, our networks also may be vulnerable to computer viruses, break-ins, denial of service attacks, and similar other disruptions.

Table of Contents

Disruptions to our information technology systems, due to outages, security breaches or other causes, can have severe consequences to our business, including financial loss and reputational damage.

Recent Political Developments in the United Kingdom. On June 23, 2016, a referendum was held on the U.K.'s membership in the European Union, the outcome of which was a vote in favor of leaving the European Union. The U.K.'s vote to leave the European Union creates an uncertain political and economic environment in the U.K. and potentially across other European Union member states, which may last for a number of months or years. As a result, there is a risk of instability for both the U.K. and the European Union, which could adversely affect our results, financial condition and prospects.

Further, it is uncertain what the effect of the referendum will be on immigration and employment rules, including the right of European Union nationals to remain in the U.K., or the ability of companies with operations in the U.K. to hire or retain European Union nationals (or conversely, the right of U.K. nationals to remain in European Union member states, or the ability of companies with operations in the European Union to hire or retain U.K. nationals). The political and economic instability created by the U.K.'s vote to leave the European Union has caused and may continue to cause significant volatility in global financial markets and the value of the Pound Sterling currency or other currencies, including the Euro. Depending on the terms reached regarding any exit from the European Union, it is possible that there may be adverse practical and/or operational implications on our business. The outcome of the referendum has also created uncertainty with regard to the regulation of data protection in the U.K. In particular, it is unclear whether following the exit of the U.K. from the European Union, the U.K. will enact its own form of the pending European General Data Protection Regulation that will apply to the personal data of U.K. citizens. In addition, it is unclear how data transfers to and from the U.K. will be regulated.

COMPETITION

The markets for our technologies are highly competitive, and we face competitive threats and pricing pressure in our markets. Consumers may perceive the quality of the visual and audio experiences produced by some of our competitors' technologies to be equivalent or superior to the sight and sound experiences produced by our technologies. Some of our current or future competitors may have significantly greater financial, technical, marketing, and other resources than we do, or may have more experience or advantages in the markets in which they compete. These competitors may also be able to offer integrated systems in markets for entertainment technologies on a royalty-free basis or at a lower price than our technologies, including audio, imaging, and other technologies, which could make competing technologies that we develop less attractive.

Pricing Pressures. The markets for the consumer entertainment products in which our technologies are incorporated are intensely competitive and price sensitive. We expect to face increased royalty pricing pressure for our technologies as we seek to drive the adoption of our technologies into online content and portable devices, such as tablets and smartphones. Retail prices for consumer entertainment products that include our sound technologies, such as DVD and Blu-ray players and home theater systems, have decreased significantly, and we expect prices to decrease for the foreseeable future. In response, OEMs have sought to reduce their product costs, which can result in downward pressure on the licensing fees we charge.

Customers as Competitors. We face competitive risks in situations where our customers are also current or potential competitors. For example, Sony and Technicolor are significant licensee customers, but are also competitors with respect to some of our consumer, broadcast, and cinema technologies. Our customers may choose to use competing technologies they have developed or in which they have an interest rather than use our technologies. The existence of important customer relationships may influence which strategic opportunities we pursue, as we may forgo some opportunities in the interests of preserving a critical customer relationship.

Competition from Other Audio Formats and Imaging Solutions. We believe that the success we have had licensing our audio technologies to system licensees is due, in part, to the strength of our brand and the perception that our technologies provide a high quality solution for multichannel audio. However, both free and proprietary sound technologies are becoming increasingly prevalent, and we expect competitors to continue to enter this field with other offerings. Furthermore, to the extent that customers perceive our competitors' products as providing the same

advantages as our technologies at a lower or comparable price, there is a risk that these customers may treat sound encoding technologies as commodities, resulting in loss of status of our technologies, decline in their use, and significant pricing pressure. In addition, more recently we introduced our HDR imaging technology, Dolby Vision, and we expect to face intense competition from existing and more well-established competitors. Moreover, there can be no assurance that consumers will adopt Dolby Vision in the near future, or at all.

Table of Contents

Competition for Employees. In order to be successful, we must attract, develop, and retain employees, including employees to work on our growth initiatives where our current employees may lack experience with the business models and markets we are pursuing. Competition for experienced employees in our markets can be intense. In order to attract and retain employees, we must provide a competitive compensation package, including cash and equity compensation. Our equity awards include stock options and restricted stock units. The future value of these awards is uncertain, and depends on our stock price performance over time. In order for our compensation packages to be viewed as competitive, prospective employees must perceive our equity awards to be a valuable benefit.

STRATEGIC ACTIVITIES

Importance of Relationships with Entertainment Industry. To be successful, we must maintain and grow our relationships with a broad range of entertainment industry participants, including:

• Content creators, such as film directors, studios, music producers and mobile and online content producers;

• Content distributors, such as film exhibitors, broadcasters, operators, and OTT video service providers and video game publishers; and

• Device manufacturers.

Relationships have historically played an important role in the entertainment markets that we serve. For example, sales of our products and services are particularly dependent upon our relationships with major film studios and broadcasters, and licensing of our technologies is particularly dependent upon our relationships with system licensees and IC manufacturers. If we fail to maintain and strengthen these relationships, these entertainment industry participants may be less likely to purchase and use our technologies, products, and services, or create content incorporating our technologies.

Consequences of M&A Activity. We evaluate a wide array of possible strategic transactions, including acquisitions. We consider these types of transactions in connection with, among other things, our efforts to strengthen our audio and cinema businesses and expand beyond sound technologies. Although we cannot predict whether or not we will complete any such acquisitions or other transactions in the future, any of these transactions could be significant in relation to our market capitalization, financial condition, or results of operations. The process of integrating an acquired company, business, or technology may create unforeseen difficulties and expenditures. Foreign acquisitions involve unique risks in addition to those mentioned above, including those related to integration of operations across different geographies, cultures, and languages; currency risks; and risks associated with the economic, political, and regulatory environment in specific countries. Future acquisitions could result in potentially dilutive issuances of our equity securities, the incurrence of debt, contingent liabilities, amortization expenses, and write-offs of goodwill. Future acquisitions may also require us to obtain additional equity or debt financing, which may not be available on favorable terms or at all. Also, the anticipated benefits of our acquisitions may not materialize.

We face various risks in integrating acquired businesses, including:

• Diversion of management time and focus from operating our business to acquisition integration challenges;

• Cultural and logistical challenges associated with integrating employees from acquired businesses into our organization;

• Retaining employees, suppliers and customers from businesses we acquire;

• The need to implement or improve internal controls, procedures, and policies appropriate for a public company at businesses that prior to the acquisition may have lacked effective controls, procedures, and policies;

• Possible write-offs or impairment charges resulting from acquisitions;

• Unanticipated or unknown liabilities relating to acquired businesses; and

• The need to integrate acquired businesses' accounting, management information, manufacturing, human resources, and other administrative systems to permit effective management.

LEGAL AND REGULATORY COMPLIANCE

International Business and Compliance. We are dependent on international sales for a substantial amount of our total revenue. Approximately 69%, 71% and 67% of our revenue was derived outside of the United States in fiscal 2016, 2015 and 2014, respectively. We are subject to a number of risks related to conducting business internationally, including:

19

Table of Contents

U.S. and foreign government trade restrictions, including those which may impose restrictions on importation of programming, technology, or components to or from the U.S.;

Compliance with applicable international laws and regulations, including antitrust laws, that may change unexpectedly, differ, or conflict with laws in other countries where we conduct business, or are otherwise not harmonized with one another;

Foreign government taxes, regulations, and permit requirements, including foreign taxes that we may not be able to offset against taxes imposed upon us in the U.S., and other laws limiting our ability to repatriate funds to the U.S.;

Changes in diplomatic and trade relationships, including new tariffs, trade protection measures, import or export licensing requirements, trade embargoes and other trade barriers;

Difficulty in establishing, staffing, and managing foreign operations;

Adverse fluctuations in foreign currency exchange rates and interest rates, including risks related to any interest rate swap or other hedging activities we undertake;

Poor recognition of IP rights;

Difficulties in enforcing contractual rights;

Political or social instability, natural disasters, war or events of terrorism; and

The strength of international economies.

Certain foreign governments, particularly in China, have advanced arguments under their competition laws that exert downward pressure on royalties for IP. The regulatory enforcement activities in such jurisdictions can be unpredictable, in some cases because these jurisdictions have only recently implemented competition laws. For instance, in March 2014, the National Development and Reform Commission of China (“NDRC”) initiated a review of our business practices under the Chinese competition laws and requested information relating to our business practices in China. In early May 2015, the NDRC confirmed that the matters under review have been resolved on mutually agreeable terms. The implementation of these terms remains ongoing. Additionally, in December 2013, the Korean Fair Trade Commission (“KFTC”) initiated a review of the Company under Korean competition law. The KFTC requested information relating to our business practices in Korea and we cooperated during its review. As a result of this review, in July 2015, the KFTC issued an order and we agreed to modify certain terms in our standard licensing agreements going forward without admitting to any liability or wrongdoing.

In many foreign countries, particularly in those with developing economies, it is common to engage in business practices that are prohibited by U.S. regulations applicable to us such as the FCPA and U.S. export controls. Although we implement policies and procedures designed to ensure compliance with the FCPA and U.S. export controls, there can be no assurance that all of our employees, distributors, dealers, and agents will not take actions in violation of our policies or these regulations.

Costs of Environmental Laws and Regulation. Our operations use substances regulated under federal, state, local, and international laws governing the environment, including those governing the discharge of pollutants into the air and water, the management, disposal, and labeling of hazardous substances and wastes, and the cleanup of contaminated sites. In addition, future environmental laws and regulations have the potential to affect our operations, increase our costs, decrease our revenue, or change the way we design or manufacture our products. We face increasing complexity in our product design as we adjust to requirements relating to the materials composition of our products. For some products, substituting particular components containing regulated hazardous substances is more difficult or costly, and additional redesign efforts could result in production delays. We could incur costs, fines, and civil or criminal sanctions, third party property damage or personal injury claims, or could be required to incur substantial investigation or remediation costs, if we were to violate or become liable under environmental laws.

Conflict Minerals. The SEC has adopted rules regarding disclosure of the use of conflict minerals (commonly referred to as tantalum, tin, tungsten, and gold), which are sourced from the Democratic Republic of the Congo and surrounding countries. This requirement could affect the sourcing, availability and pricing of materials used in our products as well as the companies we use to manufacture our products. In circumstances where sources of conflict minerals from the Democratic Republic of the Congo or surrounding countries are not validated as conflict free, Dolby may take actions to change materials, designs or manufacturers to reduce the possibility that Dolby's contracts

to manufacture products that contain conflict minerals finance or benefit local armed groups in the region. The implementation of these rules could adversely affect the sourcing, supply and pricing of materials used in our products. As there may be only a limited number of suppliers that can certify to us that they are offering “conflict free” conflict minerals, we cannot be sure that we will be able to obtain necessary conflict minerals from such suppliers in sufficient quantities or at competitive prices. These actions could also add engineering and other costs in connection with the manufacturing of our products.

Table of Contents

We may not be able to sufficiently verify the origins for the minerals used in our products. Our reputation may suffer if we determine that our products contain conflict minerals that are not determined to be conflict free or if we are unable to sufficiently verify the origins for all conflict minerals used in our products. In addition, some customers may require that all of our products are certified to be conflict free and if we cannot satisfy these customers, they may choose a competitor's products.

Tax Rates and Liabilities. Changes in the valuation of our deferred tax assets and liabilities, the geographic mix of our revenue, or changes in tax laws or their interpretation could affect our future effective tax rates. We file income tax returns in the U.S. and in several U.S. state and foreign jurisdictions, and must use judgment in determining our worldwide provision for income taxes. For example, the following could affect our income taxes:

• Earnings being lower than anticipated in countries that have lower tax rates and higher than anticipated in countries that have higher tax rates;

• Changes in the valuation of our deferred tax assets and liabilities;

• Transfer pricing adjustments;

• Tax effects of nondeductible compensation;

• Tax costs related to intercompany realignments;

• Any obligations or decisions to repatriate earnings from abroad earlier than anticipated;

• Changes in accounting principles; or

• Changes in tax laws and regulations in the countries in which we operate, including U.S. legislative changes to the taxation of earnings of our foreign subsidiaries.

A number of international legislative and regulatory bodies have proposed draft legislation and begun investigations on the tax practices of multinational companies. One of these efforts has been led by the OECD, an international association of 34 countries including the United States, which has finalized recommendations to revise many corporate taxes, transfer pricing, and tax treaty provisions in member countries. In addition, the European Union and its European Commission has begun to review and opine on the appropriateness of agreements between various member countries and companies that might be in violation of European Union competition rules against unjustified state aid. In addition, the OECD, European Union and European Commission could conceivably make competing jurisdictional claims over the taxes owed on earnings of multinational companies in their respective countries or regions. While none of these bodies has identified Dolby as a potential target of its actions, it is possible that these efforts may in the future have an adverse impact on our income tax liabilities.

We are subject to the periodic examination of our income tax returns by tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes, but an adverse decision by tax authorities could significantly impact our financial results. Additionally, due to the evolving nature of tax rules combined with the large number of jurisdictions in which we operate, it is possible that our estimates of our tax liability and the realizability of our deferred tax assets could change in the future, which may result in additional tax liabilities.

STOCK-RELATED ISSUES

Controlling Stockholder. At September 30, 2016, the Dolby family and their affiliates owned 2,915,765 shares of our Class A common stock and 44,302,210 shares of our Class B common stock. As of September 30, 2016, the Dolby family and their affiliates had voting power of 99.8% of our outstanding Class B common stock, which combined with their shares of our Class A common stock, represented 89.0% of the combined voting power of our outstanding Class A and Class B common stock. Under our certificate of incorporation, holders of Class B common stock are entitled to ten votes per share while holders of Class A common stock are entitled to one vote per share. Generally, shares of Class B common stock automatically convert into shares of Class A common stock upon transfer of such Class B common stock, other than transfers to certain specified persons and entities, including the spouse and descendants of Ray Dolby and the spouses and domestic partners of such descendants.

Because of this dual class structure, the Dolby family and their affiliates will, for the foreseeable future, have significant influence over our management and affairs, and will be able to control virtually all matters requiring stockholder approval, including the election of directors and significant corporate transactions such as mergers or other sales of our company or assets, even if they come to own considerably less than 50% of the total number of outstanding shares of our Class A and Class B common stock.

Moreover, these persons may take actions in their own interests that our other stockholders do not view as beneficial. Absent a transfer of Class B common stock that would trigger an automatic conversion as described above,

Table of Contents

there is no threshold or time deadline at which the shares of Class B common stock will automatically convert into shares of Class A common stock.

Insider Sales of Common Stock. If our large shareholders, officers, directors or employees sell, or indicate an intention to sell, substantial amounts of our Class A common stock in the public market, including shares of Class A common stock issuable upon conversion of shares of Class B common stock, the trading price of our Class A common stock could decline.

Stock Repurchase Program. Our stock repurchase program may reduce the public float of shares available for trading on a daily basis. Such purchases may be limited, suspended, or terminated at any time without prior notice. There can be no assurance that we will buy additional shares of our Class A common stock under our stock repurchase program or that any future repurchases will have a positive impact on our stock price or earnings per share. Important factors that could cause us to discontinue or decrease our share repurchases include, among others, unfavorable market conditions, the market price of our Class A common stock, the nature of other investment or strategic opportunities presented to us, the rate of dilution of our equity compensation programs, our ability to make appropriate, timely, and beneficial decisions as to when, how, and whether to purchase shares under the stock repurchase program, and the availability of funds necessary to continue purchasing stock. If we curtail our repurchase program, our stock price may be negatively affected.

ITEM 2. PROPERTIES

Dolby Wootton Bassett, LLC, of which Dagmar Dolby as Trustee of the Dolby Family Trust Instrument dated May 7, 1999 is the sole member, and the Dagmar Dolby Trust established under the Dolby Family Trust Instrument dated May 7, 1999, own a majority financial interest in real estate entities that own or from whom we lease certain facilities located in California and the U.K. We own the remaining financial interests in these real estate entities. Our ownership interest in these consolidated affiliated entities, in addition to information regarding the location of the property leased to Dolby Laboratories as of September 30, 2016 is summarized within the table below. The leases for these facilities expire at various times through 2020.

Entity Name	Minority Ownership Interest	Location Of Properties	Approximate Square Footage
Dolby Properties Brisbane, LLC	49.0%	Brisbane, California	43,500
Dolby Properties Burbank, LLC	49.0%	Burbank, California	28,000
Dolby Properties UK, LLC	49.0%		
Dolby Properties, LP	10.0%	Wootton Bassett, England	33,000

Our principal corporate office and worldwide headquarters are at 1275 Market Street, San Francisco California. Previously, our principal corporate offices were at 100 Potrero Avenue, and we have also ceased to maintain our principal administrative offices at 999 Brannan Street, San Francisco.

1275 Market Street, San Francisco, California

During the first quarter of fiscal 2015, we began occupying the commercial office building located at 1275 Market Street, San Francisco, California that we purchased in fiscal 2012 for \$109.8 million. Following this partial occupation, we continued to make certain improvements for its use as our principal corporate office and worldwide headquarters, and fully occupied the building in fiscal 2016. For additional information regarding this transaction, see Note 5 “Property, Plant & Equipment” to our consolidated financial statements.

100 Potrero Avenue, San Francisco, California

Since 1980, we have leased a corporate office, warehouse space and additional parking located at 100, 130, and 140 Potrero Avenue, San Francisco, California from the various Dolby family trusts. The lease for this office expires on October 31, 2024, and provides approximately 70,000 square feet of space. The Dolby family trusts retain the right to sublease approximately 1,099 square feet of office space in the premises with prior notice to us, at a rental rate equal to the then current base rent per square foot paid by us plus \$14 per square foot per year (reflecting estimated costs payable by us for the operation and maintenance of the premises, subject to an annual increase of 1.5% per year during each year of the sublease term). We are generally responsible for operating expenses, taxes, and the condition, operation, repair, maintenance, security and management of the premises. We have also agreed to indemnify and hold the Dolby family trusts, as landlord, harmless from and against certain liabilities, damages, claims, costs, penalties and expenses arising from our conduct related to the premises.

In the fourth quarter of fiscal 2016, we began making leasehold improvements to facilitate our continued use of 100 Potrero as an extension of our 1275 Market Street headquarters.

999 Brannan Street, San Francisco, California

We previously leased 999 Brannan from a real estate entity we jointly owned with entities affiliated with the Dolby family; however, during the fourth quarter of fiscal 2015, our lease expired, and we also sold our 37.5% ownership interest in that entity to various entities affiliated with the Dolby family. For additional information regarding this transaction, see Note 16 “Related Parties” to our consolidated financial statements.

Other Properties

We also lease additional R&D, sales, product testing, and administrative facilities from third parties in California, New York, and internationally, including in Asia, Europe, Australia, Dubai and Brazil. We believe that our current

Table of Contents

facilities are adequate to meet our needs for the near future, and that suitable additional or alternative space will be available on commercially reasonable terms to accommodate our foreseeable future operations.

ITEM 3. LEGAL PROCEEDINGS

We are involved in various legal proceedings from time to time arising from the normal course of business activities, including claims of alleged infringement of IP rights, commercial, employment, and other matters. In our opinion, resolution of these pending matters is not expected to have a material adverse impact on our operating results or financial condition. Given the unpredictable nature of legal proceedings, it is possible that an unfavorable resolution of one or more such proceedings could materially affect our future operating results or financial condition in a particular period; however, based on the information known by us as of the date of this filing and the rules and regulations applicable to the preparation of our consolidated financial statements, any such amount is either immaterial or it is not possible to provide an estimated amount of any such potential loss.

ITEM 4. MINE SAFETY DISCLOSURES

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our Class A common stock is traded on the New York Stock Exchange ("NYSE") under the symbol "DLB." Our Class B common stock is neither listed nor publicly traded. As of October 28, 2016, there were 13 holders of record of our Class A common stock and 43 holders of record of our Class B common stock. The number of Class A beneficial stockholders is substantially greater than the number of holders of record since a large portion of our common stock is held through brokerage firms. The following table sets forth the range of high and low sales prices on the NYSE of the Class A common stock for the periods indicated, as reported by the NYSE.

	Fiscal Year		Fiscal Year	
	2016		2015	
	High	Low	High	Low
First Quarter (Q1)	\$35.86	\$31.52	\$45.99	\$38.40
Second Quarter (Q2)	43.52	30.50	43.87	37.97
Third Quarter (Q3)	49.01	42.15	41.19	37.53
Fourth Quarter (Q4)	54.54	47.03	39.77	30.91

Dividend Policy

In October 2014, we announced a quarterly cash dividend program for our stockholders that was initiated by our Board of Directors. Under the program, a quarterly dividend of \$0.10 per share on our Class A and Class B common stock was declared and paid to all eligible stockholders of record for each quarter during fiscal 2015. On October 21, 2015, we announced an increase in the dividend amount to \$0.12 per share, and a dividend in that amount was declared and paid to all eligible stockholders of record for each quarter during fiscal 2016. On October 26, 2016, we announced an increase in the dividend amount to \$0.14 per share, payable on November 16, 2016, to stockholders of record as of the close of business on November 7, 2016.

Dividend declarations and the establishment of future record and payment dates are subject to the Board of Directors' continuing determination that the dividend policy is in the best interests of our stockholders. The dividend policy may be changed or canceled at the discretion of the Board of Directors at any time. See Note 7 "Stockholders' Equity & Stock-Based Compensation" to our consolidated financial statements for additional information related to the quarterly dividend. Further discussion of our recurring quarterly dividend is included within Shareholder Return in Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Sales of Unregistered Securities

None.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

In November 2009, our Board of Directors announced a stock repurchase program ("program"), providing for the repurchase of our Class A common stock. Stock repurchases under the program may be made through open market transactions, negotiated purchases, or otherwise, at times and in amounts that we consider appropriate. The timing of repurchases and the number of shares repurchased depend upon a variety of factors, including price, regulatory requirements, the rate of dilution from our equity compensation plans and other market conditions. The program does not have a specified expiration date, and can be limited, suspended or terminated at our discretion at any time without prior notice. Shares repurchased under the program will be returned to the status of authorized but unissued shares of Class A common stock.

The following table summarizes the initial amount of authorized repurchases as well as additional repurchases approved by our Board of Directors as of September 30, 2016 (in thousands):

Authorization Period	Authorization Amount
Fiscal 2010: November 2009	\$ 250,000
Fiscal 2010: July 2010	300,000

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Fiscal 2011: July 2011	250,000
Fiscal 2012: February 2012	100,000
Fiscal 2015: October 2014	200,000
Total	\$ 1,100,000

25

Table of Contents

The following table provides information regarding our share repurchases made under this program during the fourth quarter of fiscal 2016:

Repurchase Activity	Total Shares Purchased	Average Price Paid Per Share (1)	Total Shares Purchased As Part Of Publicly Announced Programs (2)	Remaining Authorized Repurchases
July 2, 2016 - July 29, 2016	—	\$	—	\$67.9 million
July 30, 2016 - August 26, 2016	323,085	49.51	323,085	\$51.9 million
August 27, 2016 - September 30, 2016	—	—	—	\$51.9 million
Total	323,085		323,085	

(1) Average price paid per share excludes commission costs.

(2) Amounts represent the approximate dollar value of the maximum remaining number of shares that may yet be purchased under the stock repurchase program, and excludes commission costs.

Stock Price Performance Graph

The following graph compares the total cumulative return of our Class A common stock with the total cumulative return for the New York Stock Exchange Composite Index (“NYSE Composite”) and the Russell 3000 Index (“Russell 3000”) for the five fiscal years ended September 30, 2016. The figures represented below assume an investment of \$100 in our Class A common stock at the closing price of \$27.44 on September 30, 2011, and in the NYSE Composite and Russell 3000 on the same date and the reinvestment of dividends into shares of common stock. The comparisons in the table are required by the Securities and Exchange Commission and are not intended to forecast or be indicative of possible future performance of our Class A common stock. This graph shall not be deemed “filed” for purposes of Section 18 of Securities Exchange Act of 1934, as amended (“Exchange Act”) or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any of our filings under the Securities Act or the Exchange Act.

Table of Contents

ITEM 6. SELECTED FINANCIAL DATA

The following selected consolidated financial data should be read in conjunction with Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and our audited consolidated financial statements and the accompanying notes included within this filing. The consolidated balance sheet data for the fiscal years ended September 30, 2016 and September 25, 2015, and consolidated statements of operations data for the fiscal years ended September 30, 2016, September 25, 2015 and September 26, 2014 were derived from our audited consolidated financial statements included in this report. The consolidated statements of operations and balance sheet data for the fiscal years ended September 26, 2014, September 27, 2013 and September 28, 2012 were derived from our audited consolidated financial statements not included in this report. The historical financial results presented below are not necessarily indicative of results to be achieved in future periods. Note that fiscal 2016 consisted of 53 weeks, while all other fiscal years presented consisted of 52 weeks. All amounts presented below are displayed in thousands, except per share amounts.

	Fiscal Year Ended				
	September 30, 2016	September 25, 2015	September 26, 2014	September 27, 2013	September 28, 2012
Reclassified implementation licensee settlements	N/A	N/A	N/A	N/A	\$ 6,750
	Fiscal Year Ended				
	September 30, 2016	September 25, 2015	September 26, 2014	September 27, 2013	September 28, 2012
Operations:

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion contains forward-looking statements that are subject to risks and uncertainties. Actual results may differ substantially from those referred to herein due to a number of factors, including but not limited to risks described in Item 1A, "Risk Factors" and elsewhere in this Annual Report on Form 10-K. We disclaim any duty to update any of the forward-looking statements to conform our prior statements to actual results.

EXECUTIVE SUMMARY

We are focused on expanding our leadership in audio solutions for entertainment content and delivering dynamic new audio and visual technologies to the market. The following are highlights of fiscal 2016 as well as challenges in key areas:

AUDIO LICENSING

Broadcast

Highlights: This year, our broadcast market experienced continued growth, and reinforced the standing of Dolby Audio as an established format in developed markets like North America and Western Europe. This reflects our strategy of working with country-specific operators and standards bodies to encourage adoption of our technologies. In that vein, we believe we are well positioned for further adoption in emerging markets such as Africa, India and China. During this past year, China Telecom and China Unicom launched services in Dolby as did Multichoice, the largest satellite operator in Africa. We believe that future growth in broadcast will come from the continued migration of emerging markets to digital televisions, and the roll-out of HD and 4K STBs with Dolby Audio in both developed and emerging markets.

Challenges: In fiscal 2016, broadcast revenues included recoveries that exceeded our expectations and we anticipate a decline in these recoveries in fiscal 2017. We expect additional challenges going forward including those related to continued growth and adoption in emerging markets which will be impacted by, among other factors, regional fragmentation of operators and regulators and the pace of their decision-making and implementation. Further, in some emerging growth countries such as China, we face difficulties enforcing our contractual and IP rights, including instances in which our licensees fail to accurately report the shipment of products using our technologies.

Consumer Electronics

Highlights: Dolby Audio is included in a wide range of devices including, this year, an increasing number of DMAs such as Apple TV, Amazon's Fire TV and Fire Stick, as well as Roku's Ultra player. During the year, a broader array of content in Dolby also became available via new OTT services such as Apple TV and Google Play. In addition, we made progress in expanding the presence of Dolby Atmos in the home. Dolby Atmos soundbars were launched from Samsung, Philips and Yamaha, and five additional Dolby Atmos soundbars are scheduled to reach the market in late 2016 and early 2017. Dolby Atmos is now also supported by all major AVR manufacturers and is included in selected speakers. These hardware offerings are paired with a growing array of content via Blu-ray Discs and OTT services. We will continue to work with OEMs to expand the range of Dolby Audio-enabled hardware, and with content developers and distributors to expand the range of entertainment selections using our audio technologies.

Challenges: We must continue to present compelling reasons for consumers to demand our audio technologies wherever they consume and enjoy premium content. To the extent that OEMs do not incorporate our technologies in current and developing products, our future revenue could be impacted.

Mobile

Highlights: This year, we achieved a major milestone with the inclusion of DD+ in iOS and iTunes so customers can access enhanced content on the iPad and iPhone. DD+ is also integrated in various mobile devices from Lenovo, LG and ZTE. Separately, Dolby Atmos continues to expand its use case beyond existing phones and tablets from Lenovo and Amazon with an announcement in the current fiscal quarter from LeEco that its flagship mobile phone will include Dolby Atmos as well.

Table of Contents

During the year, Netflix, which was already streaming content in Dolby Audio to PCs and a broad range of home entertainment and gaming devices, began streaming in Dolby Audio to mobile devices. In addition to Netflix, services from Apple, Tencent and iQiyi are also making Dolby Audio content available to mobile devices. We continue to focus on driving further adoption of our technologies across all the major mobile ecosystems - Apple, Android, Windows and Amazon - as these platforms facilitate delivery and enhanced consumption of Dolby-enabled content from a multitude of OTT services.

Challenges: Growth in this market is dependent on several factors, including our success in collaborating with manufacturers of mobile devices to incorporate our technologies, the development of various ecosystems including the availability and appeal of content in Dolby formats, and the performance of the mobile device market as a whole. The rate of new product development in this sector continues to be rapid and can result in dramatic swings in consumer trends as well as design changes that may exclude our technologies.

Personal Computers

Highlights: Our technologies enhance playback in both Mac and Windows operating systems including native support in their respective Safari and Microsoft Edge browsers. Dolby's presence in these browsers enables us to reach more users through new types of content, including streaming video entertainment.

Challenges: In recent years, unit demand for PCs has been in secular decline as consumer choices have shifted towards other devices such as tablets and mobile phones. Furthermore, a decline in the portion of PCs that have optical disc functionality will have a negative impact on our ASPs.

PRODUCTS

Highlights: We offer servers and audio processors to enable the playback of content in cinemas. Our product revenue base expanded primarily from shipments of Dolby Atmos due to continued adoption by studios, content creators, post-production facilities and exhibitors. As of the end of our current fiscal quarter, there were approximately 2,400 Dolby Atmos-enabled screens installed or committed to be installed, and approximately 600 Dolby Atmos theatrical titles announced or released.

Challenges: Demand for our cinema products is dependent upon industry and economic cycles along with our ability to develop and introduce new technologies, further our relationships with content creators, and promote new consumer audio and imaging experiences. To the extent that we do not make progress in these areas, and are faced with pricing pressures or competing technologies, our revenue may be adversely affected.

NEW GROWTH INITIATIVES

Dolby Cinema™

Highlights: In fiscal 2015, and in partnership with established movie theater exhibitors, we launched Dolby Cinema, our premium cinema offering for moviegoers that combines Dolby Vision and Dolby Atmos at new and pre-existing venues that are optimized for an immersive entertainment experience. Exhibitors who feature Dolby Cinema include AMC in the U.S., Wanda in China, Cineplexx in Austria, and Vue (previously JT Bioscopen) in the Netherlands. Over the last fiscal year, we have added approximately 30 Dolby Cinema locations, with just over 40 operating today. The majority of these are with our largest exhibitor partner, AMC, with whom we have plans to open 160 Dolby Cinema at AMC sites by the end of calendar 2018.

Our second largest exhibitor partner, Wanda, has now opened four Dolby Cinema locations in China, and plans to open 100 locations. Just a few months ago, Jackie Chan Cinemas opened its first Dolby Cinema at the highest grossing complex in China. Jackie Chan Cinemas plans on opening ten more Dolby Cinema sites within the next two years.

In total, we have about 300 Dolby Cinema locations open or committed around the world with our current exhibitor partners.

Dolby Cinema has also attracted strong support from the creative community as every major studio has announced their support for Dolby Cinema. In just over a year, there are over 50 theatrical titles with Dolby

Table of Contents

Vision and Dolby Atmos announced or released, and in the past two fiscal quarters, the first Chinese movies optimized for Dolby Cinema were released.

Challenges: Although the premium large format sector of the cinema industry is currently growing, Dolby Cinema is in competition with other existing solutions. Our success with this initiative depends on our ability to differentiate our offering, deploy new sites in accordance with plans, and attract and retain a global viewing audience.

Dolby Vision™

Highlights: By partnering with key players in the market, Dolby Vision TVs are now available globally. LG, the world's second largest TV manufacturer, includes Dolby Vision on their full 2016 lineup of OLED and Super UHD LCD TVs; Vizio, the second largest TV manufacturer in the U.S., includes Dolby Vision on their R, P, and M series; and TCL, the world's third largest TV manufacturer is shipping Dolby Vision TVs in China. Furthermore, Skyworth is shipping Dolby Vision TVs in China, LeEco announced that its first Dolby Vision TV will be available in both China and the U.S. in the first quarter of fiscal 2017, and Google announced that the Chromecast Ultra will include support for Dolby Vision, making it the first DMA with this functionality.

Entertainment content in Dolby Vision has also expanded during the year. Warner Bros. Home Entertainment Inc., Sony Pictures, MGM, Universal Pictures, Lionsgate, Netflix and Amazon Studios have all released or committed to release titles in Dolby Vision, many of which will be made available through streaming services such as Netflix, Vudu and Amazon.

Challenges: To successfully establish and grow Dolby Vision, we will need to continue to expand the array of consumer devices that incorporate the technology, increase the pipeline of Dolby Vision content, and encourage consumer adoption in the face of competing HDR offerings.

Dolby Voice®

Highlights: BT MeetMe with Dolby Voice, the premium audio conferencing solution we launched in global partnership with BT, expanded its functionality. In the third quarter of fiscal 2016, we launched Dolby Voice with Highfive, a cloud-based collaboration and video conferencing solution that is easy to install and use. And in the fourth fiscal quarter, PGi, one of the largest providers of audio conferencing software and services, launched availability of Dolby Voice on its iMeet offering, a full video and screen sharing chat solution. In concert with these partners, we are focused on driving adoption of Dolby Voice and the Dolby Conference Phone.

Challenges: Our success in this market will depend on the number of service providers and enterprise customers we are able to attract, and on the volume of usage and Dolby Conference Phones that we are able to sell.

Revenue From Significant Customers

In fiscal 2016, we did not have any individual customers whose revenue exceeded 10% of our total revenue. In fiscal 2015 and 2014, revenue from Samsung represented approximately 12% and 11% of our total revenue, respectively, and consisted primarily of licensing revenue from our mobile and broadcast markets.

Table of Contents

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our consolidated financial statements and accompanying notes are prepared in accordance with U.S. GAAP, and pursuant to SEC rules and regulations. The preparation of these financial statements requires us to establish accounting policies and make certain estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expenses. The SEC considers an accounting policy and estimate to be critical if it is both important to a company's financial condition or results of operations, and requires significant judgment by management in its application. If actual results or events differ materially from our judgments and estimates, our reported financial condition and results of operation for future periods could be materially affected. Historically, actual results have not differed significantly from our estimates and assumptions. On a regular basis, we evaluate our assumptions, judgments, and estimates and these have not changed notably in recent years nor do we anticipate them to change notably in the future. We have reviewed the selection and development of the critical accounting policies and estimates discussed below with the Audit Committee of our Board of Directors.

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, we have delivered the product or performed the service, the fee is fixed or determinable, and collection is probable. Determining whether and when these criteria have been satisfied may involve assumptions and judgments that can have a significant impact on the timing and amount of revenue we report.

Revenue recognition for transactions may include multiple elements such as hardware and accompanying software, upgrade rights, support, maintenance and extended warranty services, and rights to receive commissioning services in connection with certain digital servers. For these transactions, we may also have to exercise judgment in performing the following:

Identifying the significant deliverables within the arrangements and determining whether the significant deliverables constitute separate units of accounting. We evaluate each element in a multiple-element arrangement to determine whether it represents a separate unit of accounting. An element constitutes a separate unit of accounting when it has standalone value and delivery of an undelivered element is both probable and within our control. When these criteria are not met, the delivered and undelivered elements are combined and the arrangement fees are allocated to this combined single unit;

Assessing inputs used to determine selling price (whether VSOE, TPE, or ESP) for the significant deliverables. We determine our ESP for an individual element within a ME revenue arrangement using the same methods used to determine the selling price of an element sold on a standalone basis. If we sell the element on a standalone basis, we estimate the selling price by considering actual sales prices. Otherwise, we estimate the selling price by considering internal factors such as pricing practices and margin objectives. Consideration is also given to market conditions such as competitor pricing strategies, customer demands and industry technology lifecycles. Management applies judgment to establish margin objectives, pricing strategies and technology lifecycles;

Estimating, as necessary, the period of time over which customers receive certain elements of the arrangement following initial delivery so as to assess the period over which revenue should be recognized.

Goodwill, Intangible Assets, and Long-Lived Assets

As part of our annual goodwill impairment test, we first evaluate goodwill to determine if it is more likely than not that the occurrence of an event or change in circumstances has reduced the fair value of a reporting unit below its carrying value. This qualitative assessment requires that we consider events or circumstances that may include macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, changes in management or key personnel, changes in strategy and changes in customers.

If the qualitative assessment indicates that the two-step quantitative analysis should be performed, we exercise judgment at various steps, including the identification of reporting units, assignment of goodwill to reporting units, and determination of the fair value of each reporting unit. We assess the fair value of each reporting unit using expected cash flows that reflect our best estimate of future revenue using our historical information, third-party industry data, and review of our internal operations. We also estimate operating costs using these sources. We adjust

expected future cash flows by discount rates based on our weighted average cost of capital and related considerations. The estimates used to calculate the fair value of a reporting unit may change from year to year based on operating results, market conditions, and other factors. Changes in these estimates and assumptions could materially affect the determination of fair value and goodwill impairment, if any, for each reporting unit.

Table of Contents

Intangible assets and long-lived assets subject to amortization and depreciation, respectively, are only evaluated for impairment upon a significant change in the operating or macroeconomic environment. If an asset's undiscounted future cash flows are lower than its carrying value, the asset is written down to its estimated fair value, which is based on its discounted future cash flows. Assessing discounted future cash flows requires management to make assumptions and exercise judgment in forecasting revenues, operating costs, and the useful lives of assets, as well as selecting the discount rate that reflects the risk inherent in our future cash flows.

Stock-Based Compensation

To determine the fair value of a stock-based award using the Black-Scholes option pricing model, we make assumptions regarding the expected term of the award, the expected future volatility of our stock price over the expected term of the award, the risk-free interest rate over the expected term of the award and the anticipated dividend payout over the expected term of the award. We estimate the expected term of our stock-based awards by evaluating historical exercise patterns of our employees. We use a blend of the historical volatility of our common stock and the implied volatility of our traded options as an estimate of the expected volatility of our stock price over the expected term of the awards. We use an average interest rate based on U.S. Treasury instruments with terms consistent with the expected term of our awards to estimate the risk-free interest rate. We reduce the stock-based compensation expense for estimated forfeitures based on our historical experience. We are required to estimate forfeitures at the time of the grant and revise our estimate, if necessary, in subsequent periods if actual forfeitures differ from our estimate.

Income Taxes

We make estimates and judgments that affect our accounting for income taxes. This includes estimating temporary differences from differing treatment of items for tax and accounting purposes, future taxable income and actual tax exposure, possible or likely changes in current tax laws, and uncertainties in tax positions. These differences result in deferred tax assets and liabilities which are included in our consolidated balance sheets. We recognize tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. We also assess the likelihood that our deferred tax assets will be recovered from future taxable income, and to the extent that we believe that recovery is not likely, we establish a valuation allowance. Lastly, we are subject to the review of our income tax returns by the IRS and other tax authorities here in the U.S. and abroad. We periodically assess the likelihood of adverse outcomes from these examinations to determine the adequacy of our provision for income taxes.

Table of Contents

RESULTS OF OPERATIONS

For each line item included on our consolidated statements of operations described and analyzed below, the significant factors identified as the leading drivers contributing to the overall fluctuation are presented in descending order according to the quantitative magnitude of their impact on the overall change (from an absolute value perspective).

Note that recovery payments received from licensees either in the form of back payments or settlements are collectively referred to as "recoveries."

Our annual fiscal reporting periods generally consist of 52 weeks. However, our fiscal year ended September 30, 2016 consisted of 53 weeks. The occurrence of an additional week during the current fiscal period results in proportionately higher operating expenses related to compensation, depreciation and amortization that are not entirely offset by incremental revenue that may have been earned during the additional week.

Revenue and Gross Margin

Licensing

Licensing revenue consists of fees earned from licensing our technologies and IP to customers who incorporate them into their products and services to enable and enhance audio, imaging and communications capabilities. The technologies and IP that we license are either internally developed, acquired, or licensed from third parties. Our cost of licensing consists mainly of amortization of purchased intangible assets and intangible assets acquired in business combinations, third party royalty obligations paid to license IP and certain legal costs.

	Fiscal Year Ended			2016 vs. 2015		2015 vs. 2014	
	September 30, 2016	September 25, 2015	September 26, 2014	\$	%	\$	%
Licensing							
Revenue	\$917,032	\$868,111	\$878,844	\$48,921	6%	\$(10,733)	(1)%
Percentage of total revenue	89%	89%	92%				
Cost of licensing	28,333	10,879	10,814	17,454	160%	65	1%
Gross margin	888,699	857,232	868,030	31,467	4%	(10,798)	(1)%
Gross margin percentage	97%	99%	99%				

2016 vs. 2015

Factor	Revenue	Gross Margin
Broadcast	Higher revenue from recoveries, patent licensing, and higher volume of TVs, partially offset by lower volume of STBs	
Other	Higher revenue from Dolby Cinema and administrative fees from Via Licensing patent pools	
CE	Higher volume of DMAs and patent licensing, partially offset by lower volume of DVDs, HTIBs and Blu-ray and to a lesser extent, lower recoveries	Increase in cost of licensing primarily due to amortization on newly-acquired assets
Mobile	Decrease due to timing of revenue under contractual arrangements, partially offset by higher penetration into mobile platforms	
PC	Increase due to timing of revenue under contractual arrangements, offset by declines in PC market volumes and lower recoveries	

2015 vs. 2014

Factor	Revenue	Gross Margin
PC	Lower ASPs from product mix as fewer PCs included optical disc drives, and lower shipments, partially offset by an increase in recoveries	

No significant fluctuations

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Other á Higher automotive DVD shipments and recovery activity, new revenue from Dolby Voice, and higher shipments of gaming consoles

CE â Lower shipments of DVDs, AVRs, HTIBs and Blu-ray Discs, partially offset by higher shipments of soundbars and an increase in recoveries

Broadcast á Increase in patent licensing and higher shipments of STBs, partially offset by lower recoveries as fiscal 2014 included a payment of \$24.7 million from a large licensee

Mobile ßâ No significant fluctuations

Table of Contents

Products

Products revenue is generated from the sale of audio and imaging products for the cinema, broadcast, and communications industries. Cost of products consists of materials, labor and manufacturing overhead, amortization of certain intangible assets as well as third party royalty obligations paid to license IP.

	Fiscal Year Ended			2016 vs. 2015		2015 vs. 2014	
	September 30, 2016	September 25, 2015	September 26, 2014	\$	%	\$	%
Products							
Revenue	\$90,543	\$83,904	\$59,219	\$6,639	8%	\$24,685	42%
Percentage of total revenue	9%	9%	6%				
Cost of products	64,853	70,490	45,132	(5,637)	(8)%	25,358	56%
Gross margin	25,690	13,414	14,087	12,276	92%	(673)	(5)%
Gross margin percentage	28%	16%	24%				

2016 vs. 2015

Factor	Revenue	Gross Margin
Cinema	Higher sales from extended warranty programs, Dolby Atmos equipment and 3D glasses, partially offset by lower volume of digital cinema video products	Lower charges from excess & obsolete inventory
Broadcast & Other	No significant fluctuations	

2015 vs. 2014

Factor	Revenue	Gross Margin
Cinema	Inclusion of digital server shipments from our acquisition of Doremi and higher sales of Dolby Atmos products	Less favorable product mix of digital servers, lower ASPs of Dolby audio products, higher charges from excess & obsolete inventory and higher manufacturing costs
Broadcast & Other	No significant fluctuations	Higher amortization on newly-acquired intangible assets

Services

Services revenue consists of fees for equipment training and maintenance, mixing room alignment, equalization, as well as audio, color and light image calibration. Cost of services consists of personnel and personnel-related costs for providing our professional services, software maintenance and support, external consultants, and other direct expenses incurred on behalf of customers.

	Fiscal Year Ended			2016 vs. 2015		2015 vs. 2014	
	September 30, 2016	September 25, 2015	September 26, 2014	\$	%	\$	%
Services							
Revenue	\$18,163	\$18,623	\$22,113	\$(460)	(2)%	\$(3,490)	(16)%
Percentage of total revenue	2%	2%	2%				
Cost of services	15,796	13,447	14,230	2,349	17%	(783)	(6)%
Gross margin	2,367	5,176	7,883	(2,809)	(54)%	(2,707)	(34)%
Gross margin percentage	13%	28%	36%				

2016 vs. 2015

Factor	Revenue	Gross Margin
	â	â

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Configuration & Post-Production	Lower film mastering and other activities	Lower utilization of available services capacity
Support & Other	á Increased support and maintenance services	No significant fluctuations
2015 vs. 2014		
Factor	Revenue	Gross Margin
Configuration & Post-Production	á Lower film mastering and other services	á Prior fiscal comparative period includes the recognition of previously deferred revenue with no associated COGS
Support & Other	á Increased support and maintenance services	á Lower labor and other related costs

Table of Contents

Operating Expenses

Research and Development

R&D expenses consist primarily of employee compensation and benefits, stock-based compensation, consulting and contract labor costs, depreciation and amortization, facilities costs, costs for outside materials and services, and information technology expenses.

	Fiscal Year Ended			2016 vs.	2015 vs.
				2015	2014
	September 30, 2016	September 25, 2015	September 26, 2014	\$ %	\$ %
Research and development	\$219,607	\$201,324	\$183,128	\$18,2839%	\$18,19610%
Percentage of total revenue	21%	21%	19%		

2016 vs. 2015

Category	Key Drivers
Compensation & Benefits	á Higher headcount on new or existing R&D projects along with merit increases across the employee base
Facilities	á Higher costs as R&D personnel had not yet fully occupied our new worldwide headquarters in the prior year
Product Development	â Lower prototype costs
Depreciation & Amortization	á Higher depreciation primarily from assets placed into service

2015 vs. 2014

Category	Key Drivers
Compensation & Benefits	á Higher headcount including personnel from the acquisition of Doremi along with merit increases
Product Development	á Higher costs related primarily to the funding of various research projects and initiatives aimed at developing new products and technologies
Depreciation & Amortization	á Higher depreciation primarily from assets placed into service including the occupation of our new worldwide headquarters which includes a significant number of R&D labs

Sales and Marketing

S&M expenses consist primarily of employee compensation and benefits, stock-based compensation, marketing and promotional expenses associated with growth initiatives such as Dolby Cinema and other events such as trade shows and conferences, travel-related expenses for our sales and marketing personnel, consulting fees, facilities costs, depreciation and amortization, information technology expenses, and certain legal costs.

	Fiscal Year Ended			2016 vs.	2015 vs.
				2015	2014
	September 30, 2016	September 25, 2015	September 26, 2014	\$ %	\$ %
Sales and marketing	\$295,267	\$279,174	\$252,647	\$16,0936%	\$26,52710%
Percentage of total revenue	29%	29%	26%		

2016 vs. 2015

Category	Key Drivers
Compensation & Benefits	á Higher headcount primarily for programs to drive new revenue initiatives, along with merit increases across the existing employee base
Facilities	á Higher costs as S&M personnel had not yet fully occupied our new worldwide headquarters in the prior year

Stock-Based Compensation	áHigher headcount and an increase in award grants
Marketing Programs	âLower costs associated with selected marketing efforts
Legal, Professional & Consulting	âLower costs associated with IP related activities

Table of Contents

2015 vs. 2014

Category	Key Drivers
Compensation & Benefits	á Higher headcount including personnel from the acquisition of Doremi along with total company merit increases
Marketing Programs	á Higher costs associated with the launch of Dolby Cinema as well as industry trade shows and other marketing events
Depreciation & Amortization	á Higher amortization for newly-acquired intangible assets and higher depreciation from assets placed into service
Legal, Professional & Consulting	â Lower consulting and other costs, partially offset by higher professional fees for IP related activities

General and Administrative

G&A expenses consist primarily of employee compensation and benefits, stock-based compensation, depreciation, facilities and information technology costs, as well as professional fees and other costs associated with external consulting and contract labor.

	Fiscal Year Ended			2016 vs. 2015	2015 vs. 2014
	September 30, 2016	September 25, 2015	September 26, 2014	\$ %	\$ %
General and administrative	\$168,854	\$182,176	\$178,104	\$(13,322)(7)%	\$4,0722%
Percentage of total revenue	16%	19%	19%		

2016 vs. 2015

Category	Key Drivers
Facilities	â Lower costs as our new worldwide headquarters now include R&D and S&M departments beyond only corporate personnel
Stock-Based Compensation	â Decrease in award grants
Legal, Professional & Consulting	á Higher costs associated with IP and various other legal activities
Depreciation & Amortization	â Lower depreciation as assets that became fully-depreciated were only partially offset by new assets placed in service

2015 vs. 2014

Category	Key Drivers
Depreciation & Amortization	á Higher depreciation primarily from assets placed into service including occupation of our new worldwide headquarters
Legal, Professional & Consulting	â Lower costs incurred in connection with our acquisition of Doremi relative to fiscal 2014 along with a decrease in costs associated with patent filings and other legal activities
Technology & Communications	á Higher costs associated with our new worldwide headquarters and new office locations
Compensation & Benefits	á Higher headcount along with merit increases

Restructuring

Restructuring charges recorded in our statements of operations, including changes between periods, are based on the nature of activities associated with the individual restructuring plan implemented within those fiscal years.

	Fiscal Year Ended			2016 vs. 2015	2015 vs. 2014
	September 30, 2016	September 25, 2015	September 26, 2014	\$ %	\$ %

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Restructuring	\$1,233	\$(80)	\$2,403	\$1,313(1,641)%	\$(2,483)(103)%
Percentage of total revenue	—%	—%	—%		

Restructuring charges recorded in fiscal 2016 were incurred in relation to our fiscal 2016 restructuring plan implemented and completed within the fiscal year, and represent costs to reorganize and consolidate certain activities and positions within our global business infrastructure. These charges primarily related to severance and other related benefits provided to employees that were affected as a result of this action.

Restructuring charges recorded in fiscal 2014 were incurred in relation to our fiscal 2014 restructuring plan implemented during the first quarter of fiscal 2014, and represent costs to reorganize and consolidate certain activities and positions within our global business infrastructure. These charges primarily related to severance and other related

Table of Contents

benefits provided to employees that were affected as a result of this action. Note that a restructuring credit of \$0.1 million was recorded during fiscal 2015 in connection with the completion of activity under this Plan.

Other Income/Expense

Other income/(expense) primarily consists of interest income earned on cash and investments and the net gains/(losses) from foreign currency transactions, derivative instruments, and sales of marketable securities.

Other Income/Expense	Fiscal Year Ended			2016 vs. 2015		2015 vs. 2014	
	September 30, 2016	September 25, 2015	September 26, 2014	\$	%	\$	%
Interest income	\$5,684	\$4,544	\$3,344	\$1,140	25%	\$1,200	36%
Interest expense	(125)	(183)	183	58	(32)%	(366)	(200)%
Other income/(expense), net	(1,450)	28,193	(1,146)	(29,643)	(105)%	29,339	(2,560)%
Total	\$4,109	\$32,554	\$2,381	\$(28,445)	(87)%	\$30,173	1,267%

2016 vs. 2015

Category	Key Drivers
Other Income/(Expense)	Decrease in other income due to a pre-tax gain of \$26.2 million from the sale of our ownership interest in a jointly-owned real estate entity in the prior fiscal year (refer to footnote 16 for additional information)
Interest Income	Decrease in other income as the prior fiscal year included the receipt of a non-recurring governmental grant Increase due to higher yields on our investment balances during fiscal 2016 relative to fiscal 2015

2015 vs. 2014

Category	Key Drivers
Other Income/(Expense)	Increase in other income primarily due to a pre-tax gain of \$26.2 million from the sale of our ownership interest in a jointly-owned real estate entity (refer to footnote 16 for additional information)
Interest Income	Decrease in other expense as fiscal 2014 included a \$3.0 million impairment charge on a cost method investment, partially offset by losses attributed to foreign exchange rate fluctuations Increase due to higher overall investment balances and higher yields during fiscal 2015 relative to fiscal 2014

Income Taxes

Our effective tax rate is based on a projection of our annual fiscal year results, and is affected each period-end by several factors. These include changes in our projected fiscal year results, recurring items such as tax rates and relative income earned in foreign jurisdictions as well as discrete items that may occur in, but are not necessarily consistent between periods. For additional information related to effective tax rates, see Note 10 "Income Taxes" to our consolidated financial statements.

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Provision for income taxes	\$(49,502)	\$(62,542)	\$(67,379)
Effective tax rate	21%	25%	24%

2016 vs. 2015

Factor	Key Drivers
Tax Contingencies	Increase due to the benefit from the settlement of a multi-year California tax audit
Federal R&D Credits	Increased benefit from federal R&D credits

2015 vs. 2014

Factor

Key Drivers

Real Estate

á Increase as taxes attributed to the sale of our ownership interest in a jointly-owned real estate entity had a higher marginal tax rate than our entity-wide blended average

Interest Sale

U.S. Manufacturing Tax

á Reduced benefits attributed to a decrease in U.S. manufacturing tax incentive deductions

Incentives

Federal R&D Credits

á Increase in discrete benefits from federal R&D credits that were retroactively reinstated for the 2014 calendar year

37

Table of Contents**LIQUIDITY, CAPITAL RESOURCES, AND FINANCIAL CONDITION**

Our principal sources of liquidity are cash, cash equivalents, and investments, as well as cash flows from operations. We believe that these sources will be sufficient to satisfy our currently anticipated cash requirements through at least the next twelve months. As of September 30, 2016, we had cash and cash equivalents of \$516.1 million, which consisted of cash and highly-liquid money market funds. In addition, we had short and long-term investments of \$515.5 million, which consisted primarily of municipal debt securities, commercial paper, corporate bonds, and U.S. agency securities.

Our policy is to indefinitely reinvest a portion of our undistributed earnings in certain foreign subsidiaries to support the operations and growth of these subsidiaries. Of our total cash, cash equivalents, and investments held as of September 30, 2016, approximately \$654 million, or 63%, was held by our foreign subsidiaries. This represented a \$108 million increase from the \$546 million that was held by our foreign subsidiaries as of September 25, 2015. If these undistributed earnings held by foreign subsidiaries are repatriated to the U.S., they may be subject to U.S. federal income taxes and foreign withholding taxes, less the applicable foreign tax credits.

The following table presents selected financial information as of the fiscal years ended September 30, 2016 and September 25, 2015 (amounts displayed are in thousands):

	September 30, 2016	September 25, 2015
Cash and cash equivalents	\$ 516,112	\$ 531,926
Short-term investments	121,629	138,901
Long-term investments	393,904	321,015
Accounts receivable, net	75,688	101,563
Accounts payable and accrued liabilities	186,599	190,017
Working capital	546,647	611,548

Capital Expenditures and Uses of Capital

Our capital expenditures consist of purchases of land, building, building fixtures, leasehold improvements, computer hardware and software, production and test equipment as well as audio, video, laboratory and office equipment. We continue to invest in R&D to promote overall growth of our business and technological innovation.

Business Combinations. During fiscal 2015, we completed the business combination of Doremi and the Doremi-related assets for total purchase consideration of \$98.4 million, net of cash acquired. For additional details, see Note 13 "Business Combinations" to our consolidated financial statements.

Asset Acquisition. During the first quarter of fiscal 2016, we completed an asset purchase of a patent portfolio that fits within our existing patent licensing programs for total consideration of \$105.0 million.

We retain sufficient cash holdings to support our operations, and we also purchase investment grade securities diversified among security types, industries, and issuers. We have used cash generated from our operations to fund a variety of activities related to our business in addition to our ongoing operations, including business expansion and growth, acquisitions, and repurchases of our Class A common stock. We have historically generated significant cash from operations, however these cash flows and the value of our investment portfolio could be affected by various risks and uncertainties, as described in Part I, Item 1A "Risk Factors."

Shareholder Return

We return cash to stockholders through repurchases of Class A common stock under our repurchase program and our quarterly dividend program. Refer to Note 7 "Stockholders' Equity & Stock-Based Compensation" of our consolidated financial statements for a summary of dividend payments made under the program during fiscal 2016 and additional information regarding our stock repurchase program.

Stock Repurchase Program. Our stock repurchase program was initiated in fiscal 2009, and in October 2014, we announced that our Board of Directors approved an increase to the size of our stock repurchase program by an additional \$200.0 million.

Quarterly Dividend Program. During the first quarter of fiscal 2015, we initiated a recurring quarterly cash dividend program for our stockholders. Under the program, quarterly dividends are paid on our Class A and Class B

Table of Contents

common stock to eligible stockholders of record for each respective dividend record date. On October 26, 2016, we announced an increase in the dividend amount to \$0.14 per share, payable on November 16, 2016, to stockholders of record as of the close of business on November 7, 2016.

Cash Flows Analysis

For the following comparative analysis performed for each of the sections of the statement of cash flows, the significant factors identified as the leading drivers contributing to the fluctuation are presented in descending order according to the magnitude of their impact relative to the overall change (amounts displayed in thousands, except as otherwise noted).

Operating Activities

	Fiscal Year Ended	
	September 30, 2016	September 25, 2015

Net cash provided by operating activities	\$356,839	\$ 309,377
---	-----------	------------

Net cash provided by operating activities increased \$47.5 million in fiscal 2016 compared to fiscal 2015, primarily due to the following:

Factor	Impact On Cash Flows
--------	----------------------

Working Capital	Higher inflows primarily due to decrease in accounts receivable
-----------------	---

Investing Activities

	Fiscal Year Ended	
	September 30, 2016	September 25, 2015

Net cash used in investing activities	\$(282,497)	\$(203,595)
---------------------------------------	-------------	--------------

Capital expenditures	(100,762)	(157,526)
----------------------	------------	------------

Net cash used in investing activities was \$78.9 million higher in fiscal 2016 compared to fiscal 2015, primarily due to the following:

Factor	Impact On Cash Flows
--------	----------------------

Business Combinations	Lower outflows as the comparable period included our acquisition of Doremi
-----------------------	--

Proceeds From Investments	Lower inflows from the sale & maturity of marketable investment securities
---------------------------	--

Purchase of Intangible Assets	Higher outflows for purchases of patents (refer to Note 6 for additional information)
-------------------------------	---

Capital Expenditures	Lower expenditures for PP&E
----------------------	-----------------------------

Purchase Of Investments	Higher outflows for purchases of marketable investment securities
-------------------------	---

Financing Activities

	Fiscal Year Ended	
	September 30, 2016	September 25, 2015

Net cash used in financing activities	\$(88,761)	\$(138,519)
---------------------------------------	------------	--------------

Repurchase of common stock	(100,854)	(107,349)
----------------------------	-----------	------------

Net cash used in financing activities was \$49.8 million lower in fiscal 2016 compared to fiscal 2015, primarily due to the following:

Factor	Impact On Cash Flows
--------	----------------------

Common Stock Issuance	Higher inflows from increased employee stock option exercises and shares issued under our ESPP
-----------------------	--

Dividend Payments	Higher outflows for payments of our quarterly cash dividend to common stockholders primarily as a result of a \$0.02 per share increase compared to the prior fiscal year
-------------------	---

Share Repurchases	Lower outflows resulting from decreased volumes of common stock repurchases
-------------------	---

Partnership
Distribution

• Lower distributions to our controlling interest for commercial property leasing fees

39

Table of Contents

Off-Balance Sheet Arrangements and Contractual Obligations

As of September 30, 2016, we did not engage in off-balance sheet financing arrangements other than operating leases for office space and computer equipment, and the following table presents a summary of our contractual obligations and commitments as of that date (in thousands):

	Payments Due By Fiscal Period				Total
	1 Year	2 - 3 Years	4 - 5 Years	More Than 5 Years	
Naming rights	\$7,619	\$15,526	\$15,917	\$94,972	\$134,034
Operating leases	13,261	18,839	13,922	24,282	70,304
Purchase obligations	6,936	3,814	—	—	10,750
Donation commitments	320	6,622	444	1,013	8,399
Total	\$28,136	\$44,801	\$30,283	\$120,267	\$223,487

Naming Rights. In fiscal 2012, we entered into an agreement for naming rights and related benefits with respect to the Dolby Theatre in Hollywood, California, the location of the Academy Awards. The term of the agreement is twenty years, over which we will make payments on a semi-annual basis. Our payment obligations are conditioned in part on the Academy Awards being held and broadcast from the Dolby Theatre.

Donation Commitments. Our donation commitments relate to non-cancelable obligations to the Museum of the Academy of Motion Picture Arts and Sciences in Los Angeles, California. We will make a one-time donation of installing imaging and audio products in its theaters, and provide maintenance services for fifteen years from its expected opening date in 2018.

Operating Leases. Operating lease payments include future minimum rental commitments, including those payable to our principal stockholder and portions attributable to the controlling interests in our wholly owned subsidiaries, for non-cancelable operating leases of office space as of September 30, 2016.

Purchase Obligations. Our purchase obligations consist of agreements to purchase goods and services, entered into in the ordinary course of business. These represent non-cancelable commitments for which a penalty would be imposed if the agreement was canceled for any reason other than an event of default as described by the agreement.

Unrecognized Tax Benefits. As of September 30, 2016, we had an accrued liability for unrecognized tax benefits and related interest and penalties, net of related deferred tax assets, totaling \$75.2 million. We are unable to estimate when any cash settlement with a taxing authority might occur.

For additional details regarding our contractual obligations, see Note 12 “Commitments & Contingencies” to our consolidated financial statements.

Indemnification Clauses

We are party to certain contractual agreements under which we have agreed to provide indemnification of varying scope and duration to the other party relating to our licensed IP. Historically, we have not made any payments for these indemnification obligations and no amounts have been accrued in our consolidated financial statements with respect to these obligations. Since the terms and conditions of the indemnification clauses do not explicitly specify our obligations, we are unable to reasonably estimate the maximum potential exposure for which we could be liable. In addition, we have entered into indemnification agreements with our officers, directors, and certain employees, and our certificate of incorporation and bylaws contain similar indemnification obligations. For additional details regarding indemnification clauses within our contractual agreements, see Note 12 “Commitments & Contingencies” to our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**Interest Rate Sensitivity**

As of September 30, 2016, we had cash and cash equivalents of \$516.1 million, which consisted of cash and highly liquid money market funds. In addition, we had both short and long-term investments of \$515.5 million, which consisted primarily of municipal debt securities, corporate bonds, commercial paper and U.S. agency securities. Our investment policy is focused on the preservation of capital and support for our liquidity requirements. Under the

policy, we invest in highly rated securities with a minimum credit rating of A- while limiting the amount of credit exposure to any one issuer other than the U.S. government. At September 30, 2016, the weighted-average credit quality of our investment portfolio was AA-, with a weighted-average maturity of approximately eighteen months. We do not invest in financial instruments for trading or speculative purposes, nor do we use leveraged financial instruments. We utilize external investment managers who adhere to the guidelines of our investment policy. The investments within our fixed-income portfolio are subject to fluctuations in interest rates, which could affect our financial position, and to a lesser extent, results of operations. Based on our investment portfolio balance as of September 30, 2016, hypothetical changes in interest rates of 1% and 0.5% would have an impact on the carrying value of our portfolio of approximately \$6.7 million and \$3.3 million, respectively.

Foreign Currency Exchange Risk

We maintain business operations in foreign countries, most significantly in Australia, China, Germany, the Netherlands, Poland and the United Kingdom. Additionally, a growing portion of our business is conducted outside of the U.S. through subsidiaries with functional currencies other than the U.S. dollar, most notably:

• Australian Dollar

• British Pound

• Chinese Yuan

• Euro

• Indian Rupee

• Japanese Yen

• Korean Won

• Polish Zloty

• Russian Ruble

• Swedish Krona

As a result, we face exposure to adverse movements in currency exchange rates as the financial results of our international operations are translated from local currency into U.S. dollars upon consolidation. The majority of our revenue generated from international markets is denominated in U.S. dollars, while the operating expenses of our foreign subsidiaries are predominantly denominated in local currencies. Therefore, our operating expenses will increase when the U.S. dollar weakens against the local currency and decrease when the U.S. dollar strengthens against the local currency. Additionally, foreign exchange rate fluctuations on transactions denominated in currencies other than the functional currency result in gains or losses that are reflected in our consolidated statements of operations. Our foreign operations are subject to the same risks present when conducting business internationally, including, but not limited to, differing economic conditions, changes in political climate, differing tax structures, foreign exchange rate volatility and other regulations and restrictions.

Table of Contents

In an effort to reduce the risk that our earnings will be adversely affected by foreign currency exchange rate fluctuations, we enter into foreign currency forward contracts to hedge against assets and liabilities for which we have foreign currency exchange rate exposure. These derivative instruments are carried at fair value with changes in the fair value recorded to other income, net, in our consolidated statements of operations. While not designated as hedging instruments, these foreign currency forward contracts are used to reduce the exchange rate risk associated primarily with intercompany receivables and payables. These contracts do not subject us to material balance sheet risk due to exchange rate movements as gains and losses on these derivatives are intended to offset gains and losses on the related receivables and payables for which we have foreign currency exchange rate exposure. As of September 30, 2016 and September 25, 2015, the outstanding derivative instruments had maturities of equal to or less than 31 and 38 days, respectively, and the total notional amounts of outstanding contracts were \$18.3 million and \$22.3 million, respectively. The fair values of these contracts were nominal as of September 30, 2016 and September 25, 2015, and were included within prepaid expenses and other current assets and within accrued liabilities in our consolidated balance sheets. For additional information related to our foreign currency forward contracts, see Note 2 "Summary of Significant Accounting Policies" to our consolidated financial statements.

A sensitivity analysis was performed on all of our foreign currency forward contracts as of September 30, 2016. This sensitivity analysis was based on a modeling technique that measures the hypothetical market value resulting from a 10% shift in the value of exchange rates relative to the U.S. dollar. For these forward contracts, duration modeling was used where hypothetical changes are made to the spot rates of the currency. A 10% increase in the value of the U.S. dollar would lead to an increase in the fair value of our financial instruments by \$0.6 million. Conversely, a 10% decrease in the value of the U.S. dollar would result in a decrease in the fair value of these financial instruments by \$0.6 million.

Report of Independent Registered Public Accounting Firm
The Board of Directors and Stockholders
Dolby Laboratories, Inc.

We have audited the accompanying consolidated balance sheets of Dolby Laboratories, Inc. and subsidiaries as of September 30, 2016 and September 25, 2015, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended September 30, 2016. We also have audited Dolby Laboratories, Inc.'s internal control over financial reporting as of September 30, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Dolby Laboratories, Inc.'s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Controls over Financial Reporting in Item 9A. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Dolby Laboratories, Inc. and subsidiaries as of September 30, 2016 and September 25, 2015, and the results of its operations and its cash flows for each of the years in the three-year period ended September 30, 2016, in conformity with U.S. generally accepted accounting principles.

Also in our opinion, Dolby Laboratories, Inc. maintained, in all material respects, effective internal control over financial reporting as of September 30, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

DOLBY LABORATORIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

Principles of Consolidation

The consolidated financial statements include the accounts of Dolby Laboratories, Inc. and our wholly owned subsidiaries. In addition, we have consolidated the financial results of jointly-owned affiliated companies in which our principal stockholder has a controlling interest. We report these controlling interests as a separate line in our consolidated statements of operations as net income attributable to controlling interest, and in our consolidated balance sheets as a controlling interest. We eliminate all intercompany accounts and transactions upon consolidation.

Use of Estimates

The preparation of our financial statements in accordance with U.S. GAAP requires management to make certain estimates and assumptions that affect the amounts reported and disclosed in our consolidated financial statements and accompanying notes. Actual results could differ from our estimates. Significant items subject to such estimates and assumptions include:

- Estimated selling prices for elements sold in ME revenue arrangements
- Valuation allowances for accounts receivable
- Carrying values of inventories and certain PP&E, goodwill and intangible assets
- Fair values of investments
- Accrued liabilities, including liabilities for unrecognized tax benefits
- Deferred income tax assets and liabilities
- Stock-based compensation

Fiscal Year

Our fiscal year is a 52 or 53 week period ending on the last Friday in September. The fiscal years presented herein include the 53 week period ended September 30, 2016 (fiscal 2016) and the 52 week periods ended September 25, 2015 (fiscal 2015) and September 26, 2014 (fiscal 2014).

Reclassifications

We have reclassified certain prior period amounts within our consolidated financial statements and accompanying notes to conform to our current period presentation. These reclassifications did not affect total revenue, operating income, operating cash flows or net income.

2. Summary of Significant Accounting Policies

Concentration of Credit Risk

Our financial instruments that are exposed to concentrations of credit risk principally consist of cash, cash equivalents, investments, and accounts receivable. Our investment portfolio consists of investment grade securities diversified amongst security types, industries, and issuers. All our securities are held in custody by a recognized financial institution. Our policy limits the amount of credit exposure to a maximum of 5% to any one issuer, except for the U.S. Treasury, and we believe no significant concentration risk exists with respect to these investments. Our products are sold to businesses primarily in the Americas and Europe, and the majority of our licensing revenue is generated from customers outside of the U.S. We manage this risk by evaluating in advance the financial condition and creditworthiness of our products and services customers and performing regular evaluations of the creditworthiness of our licensing customers. In fiscal 2016, we did not have any individual customers whose revenue exceeded 10% of our total revenue. In fiscal 2015 and 2014, revenue from one customer, Samsung, accounted for approximately 12% and 11% of our total revenue, respectively, and consisted primarily of licensing revenue from our mobile and broadcast markets.

Cash and Cash Equivalents

We consider all short-term highly liquid investments with original maturities of 90 days or less from the date of purchase to be cash equivalents. Cash and cash equivalents primarily consist of funds held in general checking

accounts, money market accounts, commercial paper, and U.S. agency notes.

Table of Contents**Restricted Cash**

Restricted cash on our consolidated balance sheets consist of cash contributed by Dolby and third-party licensors to Via Licensing Corporation, our wholly-owned subsidiary, that may only be used in defending patent pools administered by Via.

Investments

All of our investments are classified as available-for-sale securities, with the exception of our mutual fund investments held in our supplemental retirement plan, which are classified as trading securities. Investments that have an original maturity of 91 days or more at the date of purchase and a current maturity of less than one year are classified as short-term investments, while investments with a current maturity of more than one year are classified as long-term investments. Our investments are recorded at fair value in our consolidated balance sheets. Unrealized gains and losses on our AFS securities are reported as a component of AOCI, while realized gains and losses, other-than-temporary impairments, and credit losses are reported as a component of net income. Upon sale, gains and losses are reclassified from AOCI into earnings, and are determined based on specific identification of securities sold. We evaluate our investment portfolio for credit losses and other-than-temporary impairments by comparing the fair value with the cost basis for each of our investment securities. An investment is impaired if the fair value is less than its cost basis. If any portion of the impairment is deemed to be the result of a credit loss, the credit loss portion of the impairment is included as a component of net income. If we deem it probable that we will not recover the full cost basis of the security, the security is other-than-temporarily impaired and the impairment loss is recognized as a component of net income.

Allowance for Doubtful Accounts

We continually monitor customer payments and maintain a reserve for estimated losses resulting from our customers' inability to make required payments. In determining the reserve, we evaluate the collectibility of our accounts receivable based upon a variety of factors. In cases where we are aware of circumstances that may impair a specific customer's ability to meet its financial obligations, we record a specific allowance against amounts due, and thereby reduce the net recognized receivable to the amount reasonably believed to be collectible. For all other customers, we recognize allowances for doubtful accounts based on our actual historical write-off experience in conjunction with the length of time the receivables are past due, the creditworthiness of the customer, geographic risk and the current business environment. Actual future losses from uncollectible accounts may differ from our estimates.

Inventories

Inventories are stated at the lower of cost or market (net realizable value). We evaluate our ending inventories for estimated excess quantities and obsolescence. Our evaluation includes the analysis of future sales demand by product within specific time horizons. Inventories in excess of projected future demand are written down to their net realizable value. In addition, we assess the impact of changing technology on our inventory balances and write-off inventories that are considered obsolete. Write-downs and write-offs of inventory are recorded as a cost of products in our consolidated statements of operations. We classify inventory that we do not expect to sell within twelve months as other non-current assets in our consolidated balance sheets.

Property, Plant and Equipment

PP&E is stated at cost less accumulated depreciation. Depreciation expense is recognized on a straight-line basis according to estimated useful lives assigned to each of our different categories of PP&E as summarized within the following table:

PP&E Category	Useful Life (Depreciable Base)
Computer equipment and software	3 to 5 years
Machinery and equipment	3 to 8 years
Furniture and fixtures	5 to 8 years
Leasehold improvements	Lesser of useful life or related lease term
Equipment provided under operating leases	15 years
Buildings and building improvements	20 to 40 years

We capitalize certain costs incurred during the construction phase of a project or asset into construction-in-progress until the construction process is complete. Once the related asset is placed into service, we transfer its carrying value into the appropriate fixed asset category and begin depreciating the value over its useful life.

Table of Contents

Equipment Provided Under Operating Leases. We account for our cinema equipment installed at third party sites under collaborative or other arrangements as operating leases, and depreciate these assets on a straight-line basis over their estimated useful life.

Internal Use Software. We account for the costs of computer software developed for internal use by capitalizing costs of materials and external consultants. These costs are included in PP&E, net of accumulated amortization in our consolidated balance sheets. Our capitalized internal use software costs are typically amortized on a straight-line basis over estimated useful lives of three to five years. Costs incurred during the preliminary project and post-implementation stages are charged to expense.

Goodwill, Intangible Assets, and Long-Lived Assets

We test goodwill for impairment annually during our third fiscal quarter and whenever events or changes in circumstances indicate that the carrying amount may be impaired. We perform a qualitative assessment as a determinant for whether the two-step annual goodwill impairment test should be performed.

In performing the qualitative assessment, we consider events and circumstances, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, changes in management or key personnel, changes in strategy, changes in customers, changes in the composition or carrying amount of a reporting unit's net assets, and changes in the price of our common stock. If, after assessing the totality of events or circumstances, we determine that it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then the two-step goodwill impairment test is not performed.

If the two-step goodwill test is performed, we evaluate and test our goodwill for impairment at a reporting-unit level using expected future cash flows to be generated by the reporting unit. If the carrying amount of a reporting unit exceeds its fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the calculated fair value of the goodwill. A reporting unit is an operating segment or one level below. Our operating segment is aligned with the management principles of our business.

We completed our annual goodwill impairment assessment for fiscal 2016 in the fiscal quarter ended July 1, 2016. We determined, after performing a qualitative review for each of our separate reporting units, that it is more likely than not that the fair value of each of our reporting units that have goodwill substantially exceeds their respective carrying amounts. Accordingly, there was no indication of impairment, and the two-step goodwill impairment test was not required. We did not incur any goodwill impairment losses in any of the periods presented.

Intangible assets are stated at their original cost less accumulated amortization, and those with definite lives are amortized over their estimated useful lives. Our intangible assets principally consist of acquired technology, patents, trademarks, customer relationships and contracts, the majority of which are amortized on a straight-line basis over their useful lives using a range from three to eighteen years.

We review long-lived assets, including intangible assets, for impairment whenever events or a change in circumstances indicate an asset's carrying value may not be recoverable. Recoverability of an asset is measured by comparing its carrying value to the total future undiscounted cash flows that the asset is expected to generate. If it is determined that an asset is not recoverable, an impairment loss is recorded in the amount by which the carrying value of the asset exceeds its estimated fair value.

Revenue Recognition

We enter into revenue arrangements with our customers to license technologies, trademarks and other aspects of our technological expertise and to sell products and services. We recognize revenue when all of the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred or services have been completed, our price to the buyer is fixed or determinable, and collectability is probable.

Multiple Element Arrangements. Some of our revenue arrangements include ME, such as hardware, software, maintenance and other services. We evaluate each element in a multiple-element arrangement to determine whether it represents a separate unit of accounting. An element constitutes a separate unit of accounting when it has standalone value and delivery of an undelivered element is both probable and within our control. When these criteria are not met, the delivered and undelivered elements are combined and the arrangement fees are allocated to this combined single unit. If the unit separation criteria are met, we account for each element within a ME arrangement separately, whereby

the total arrangement fees are allocated to each element based on its relative selling price, which we establish using a selling price hierarchy. We determine the selling price of each element based on its VSOE, if available, TPE, if VSOE is not available, or ESP, if neither VSOE nor TPE is available.

Table of Contents

For some arrangements, customers receive certain elements over a period of time, after delivery of the initial product. These elements may include support and maintenance or the right to receive upgrades. Revenue allocated to the undelivered element is recognized either over its estimated service period or when the upgrade is delivered. We do not recognize revenue that is contingent upon the future delivery of products or services or upon future performance obligations. We recognize revenue for delivered elements only when we have completed all contractual obligations. We determine our ESP for an individual element within a ME revenue arrangement using the same methods used to determine the selling price of an element sold on a standalone basis. If we sell the element on a standalone basis, we estimate the selling price by considering actual sales prices. Otherwise, we estimate the selling price by considering internal factors such as pricing practices and margin objectives. Consideration is also given to market conditions such as competitor pricing strategies, customer demands and industry technology lifecycles. Management applies judgment to establish margin objectives, pricing strategies and technology lifecycles.

We account for the majority of our digital cinema server and processor sales as ME arrangements that may include up to four separate units, or elements, of accounting.

The first element consists of our digital cinema server hardware and the accompanying software, which is essential to the functionality of the hardware. This element is typically delivered at the time of sale.

The second element is the right to receive support and maintenance, which is included with the purchase of the hardware element and is typically delivered over a service period subsequent to the initial sale.

The third element is the right to receive specified upgrades, which is included with the purchase of the hardware element and is typically delivered when a specified upgrade is available, subsequent to the initial sale. Under revenue recognition accounting standards, sales of our digital cinema servers typically result in the allocation of a substantial majority of the arrangement fees to the delivered hardware element based on its ESP, which we recognize as revenue at the time of sale once delivery has occurred. A small portion of the arrangement fee is allocated to the undelivered support and maintenance element, and when applicable, to the undelivered specified upgrade element based on the VSOE or ESP of each element. The portion of the arrangement fees allocated to the support and maintenance element are recognized as revenue ratably over the estimated service period, and the portion of the arrangement fees allocated to specified upgrades are recognized as revenue upon delivery of the upgrade.

The fourth element is the right to receive commissioning services performed solely in connection with our digital servers necessary for the installation of Dolby Atmos-enabled theaters. These services consist of the review of venue designs specifying proposed speaker placement, as well as calibration services performed for installed speakers to ensure optimal playback. A small portion of the arrangement fee is allocated to these services based on their ESP which we recognize as revenue once the services have been completed.

Software Arrangements. Revenue recognition for transactions that involve software, such as fees we earn from certain system licensees, may include multiple elements. For some of our ME arrangements that involve software, customers receive certain elements over a period of time or after delivery of the initial software. These elements may include support and maintenance. The fair values of these elements are recognized over the estimated period for which these elements will be delivered, which is sometimes the estimated life of the software. If we do not have VSOE of fair value for any undelivered element included in these ME arrangements for software, we defer revenue until all elements are delivered or services have been performed, or until we have VSOE of fair value for all remaining undelivered elements. If the undelivered element is support and we do not have fair value for the support element, revenue for the entire arrangement is bundled and recognized ratably over the support period.

In certain cases, our arrangements require the licensee to pay a fixed fee for the right to distribute units in the future. These fees are generally recognized upon contract execution, unless the arrangement includes contingency terms wherein we assess the totality of the existing facts and circumstances and conclude upon an accounting treatment thereon, or is considered a ME arrangement.

Licensing. Our licensing revenue is primarily derived from royalties paid to us by licensees of our IP rights, including patents, trademarks, and trade secrets. Royalties are recognized when all revenue recognition criteria have been met. We determine that there is persuasive evidence of an arrangement upon the execution of a license agreement or upon the receipt of a licensee's royalty report and payment. Generally, royalties are deemed fixed or determinable upon

receipt of a licensee's royalty report in accordance with the terms of the underlying executed agreement. We determine collectibility based on an evaluation of the licensee's recent payment history, the existence of a standby letter-of-credit between the licensee's financial institution and our financial institution, and other factors. If we cannot determine that collectibility is probable, we recognize revenue upon receipt of cash, provided that all other

Table of Contents

revenue recognition criteria have been met. Corrective royalty statements generally comprise less than 1% of our net licensing revenue and are recognized when received, or earlier if a reliable estimate can be made of an anticipated reduction in revenue from a prior royalty statement. An estimate of anticipated reduction in revenue based on historical negative correction royalty statements is also recorded. Deferred revenue represents amounts that we have already collected that are ultimately expected to be recognized as revenue, but for which not all revenue recognition criteria have been met. Licensing revenue also includes fees we earn for administering joint patent licensing programs (“patent pools”) containing patents owned by us and/or other companies. Royalties related to patent pools are recorded net of royalties payable to third party patent pool members and are recognized when all revenue recognition criteria have been met.

We generate the majority of our licensing revenue through our licensing contracts with OEMs (“system licensees”) and implementation licensees. Our revenue recognition policies for each of these arrangements are summarized below.

Licensing to system licensees. We license our technologies to system licensees who manufacture consumer electronics products and, in return, the system licensee pays us a royalty generally for each unit shipped that incorporates our technologies. Royalties from system licensees are generally recognized upon receipt of a royalty report from the licensee and when all other revenue recognition criteria have been met. In certain cases, our arrangements require the licensee to pay up-front, non-refundable royalties for units they may distribute in the future. These up-front fees are generally recognized upon contract execution, unless the arrangement includes extended payment terms or is considered a ME arrangement. In addition, in some cases we receive initial license fees for our technologies and provide post-contract support. In these cases we recognize the initial fees ratably over the expected support term.

Licensing to software vendors. We license our technologies for resale to software vendors and, in return, the software vendor pays us a royalty for each unit of software distributed that incorporates our technologies. Royalties from software vendors are generally recognized upon receipt of a royalty report from the licensee and when all other revenue recognition criteria have been met. In addition, in some cases we receive initial license fees for our technologies and provide post-contract upgrades and support. In these cases, we recognize the initial fees ratably over the expected support term, as VSOE of fair value typically does not exist for the upgrade and support elements of the contract.

Recovery Payments from Licensees. Licensing revenue recognized in any given quarter may include recovery payments representing back payments and/or settlements from licensees. These payments arise as a result of ongoing collection efforts as well as activities aimed at identifying potential unauthorized uses of our technologies. Although such collections have become a recurring part of our business, we cannot predict the timing or magnitude of such payments with certainty.

Back payments represent incremental royalties that relate to amounts not previously reported by licensees under existing licensing agreements. Consistent with the manner in which royalty revenue is recognized, we recognize reported back payments as revenue in either the period the fee becomes due and payable, or when collectability is deemed probable, whichever is later.

Settlements represent new agreements under which a third party has agreed to remit payments to us based on past use of our technology. We recognize settlements as revenue in the period in which all revenue recognition criteria have been met. Generally, settlement fees are deemed to be fixed or determinable upon execution of the settlement agreement, provided such agreement contains no contingency terms. If we are unable to determine that collectability is probable based on an evaluation of a customer's creditworthiness, we recognize revenue upon the receipt of cash, provided the other revenue recognition criteria have been met.

In general, we classify legal costs associated with activities aimed at identifying potential unauthorized uses of our technologies, auditing existing licensees, and on occasion, pursuing litigation as S&M in our consolidated statements of operations.

Product Sales. Revenue from the sale of products is recognized when the risk of ownership has transferred to our customer, as provided under the terms of the governing purchase agreement, and when all other revenue recognition criteria have been met. Generally, these purchase agreements provide that the risk of ownership is transferred to the

customer when the product is shipped, except in specific instances in which certain foreign regulations stipulate that the risk of ownership is transferred to the customer upon their receipt of the shipment. In these instances, we recognize revenue when the product is received by the customer.

Table of Contents

Services. Services revenue is recognized as the related services are performed and when all other revenue recognition criteria have been met.

Collaborative Arrangements. In partnership with established cinema exhibitors, we launched Dolby Cinema, a branded premium cinema offering for movie audiences. Under such collaborations, Dolby and the exhibitor are both active participants, and share the significant risks and rewards associated with the business. Accordingly, these collaborations are governed by revenue sharing arrangements under which Dolby receives a portion of the theatrical box-office revenues in exchange for the use of our imaging and sound technologies, the use of our equipment at the exhibitor's venue, as well as the use of our proprietary designs and corporate branding. Dolby's share of revenue, which is contingent upon ticket sales, is recognized when all revenue recognition criteria are met, which is generally upon receipt of quarterly box office reports from exhibitors, and on determining that collectability is probable. We recognize our share of ticket sales as licensing revenue in our consolidated statements of operations.

Cost of Revenue

Cost of licensing. Cost of licensing primarily consists of amortization expenses associated with purchased intangible assets and intangible assets acquired in business combinations. Cost of licensing also includes royalty obligations to third parties for licensing IP rights as part of arrangements with our customers as well as depreciation of our Dolby Cinema equipment provided under operating leases in collaborative arrangements.

Cost of products. Cost of products primarily consists of the cost of materials related to products sold, applied labor, and manufacturing overhead. Our cost of products also includes third party royalty obligations paid to license IP that we include in our products.

Cost of services. Cost of services primarily consists of the personnel and personnel-related costs of employees performing our professional services, and those of outside consultants, and reimbursable expenses incurred on behalf of customers.

Stock-Based Compensation

We measure expenses associated with all employee stock-based compensation awards using a fair-value method and record such expense in our consolidated financial statements on a straight-line basis over the requisite service period.

Advertising and Promotional Costs

Advertising and promotional costs are charged to S&M expense as incurred. Our advertising and promotional costs were as follows (in thousands):

	Fiscal Year Ended	
	September 30, 2016	September 25, September 26, 2015 2014
Advertising and promotional costs	\$44,221	\$ 46,202 \$ 37,895

Foreign Currency Activities

Foreign Currency Translation. We maintain business operations in foreign countries. We translate the assets and liabilities of our international subsidiaries, the majority of which are denominated in non-U.S. dollar functional currencies, into U.S. dollars using exchange rates in effect at the end of each period. Revenues and expenses of these subsidiaries are translated using the average rates for the period. Gains and losses from these translations are included in AOCI within stockholders' equity.

Foreign Currency Transactions. Certain of our foreign subsidiaries transact in currencies other than their functional currency. Therefore, we re-measure non-functional currency assets and liabilities of these subsidiaries using exchange rates at the end of each period. As a result, we recognize foreign currency transaction and re-measurement gains and losses, which are recorded within other income, net in our consolidated statements of operations. These gains/(losses) were as follows (in thousands):

	Fiscal Year Ended	
	September 30, 2016	September 25, September 26, 2015 2014

Foreign currency transaction gains/(losses) \$(474)\$ (142) \$ 498

54

Table of Contents

Foreign Currency Exchange Risk. In an effort to reduce the risk that our earnings will be adversely affected by foreign currency exchange rate fluctuations, we enter into foreign currency forward contracts to hedge against assets and liabilities for which we have foreign currency exchange rate exposure. These derivative instruments are carried at fair value with changes in the fair value recorded to other income/(expense), net, in our consolidated statements of operations. While not designated as hedging instruments, these foreign currency forward contracts are used to reduce the exchange rate risk associated primarily with intercompany receivables and payables. These contracts do not subject us to material balance sheet risk due to exchange rate movements as gains and losses on these derivatives are intended to offset gains and losses on the related receivables and payables for which we have foreign currency exchange rate exposure. As of September 30, 2016 and September 25, 2015, the outstanding derivative instruments had maturities of equal to or less than 31 and 38 days, respectively, and the total notional amounts of outstanding contracts were \$18.3 million and \$22.3 million, respectively. The fair values of these contracts were nominal as of September 30, 2016 and September 25, 2015, and were included within prepaid expenses and other current assets and within accrued liabilities in our consolidated balance sheets.

Income Taxes

We use the asset and liability method, under which deferred income tax assets and liabilities are determined based upon the difference between the financial statement carrying amounts and the tax bases of assets and liabilities, and NOL carryforwards are measured using the enacted tax rate expected to apply to taxable income in the years in which the differences are expected to be reversed. In assessing the realizability of deferred tax assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The realization of deferred tax assets is additionally dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. We consider the scheduled reversal of deferred tax liabilities and projected future taxable income in making this assessment, and record a valuation allowance to reduce our deferred tax assets when uncertainty regarding their realizability exists.

We record an unrecognized tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained upon examination by the tax authorities. We include interest and penalties related to gross unrecognized tax benefits within our provision for income taxes. To the extent accrued interest and penalties do not ultimately become payable, amounts accrued are reduced in the period that such determination is made and are reflected as a reduction of the overall income tax provision.

Repatriation of Undistributed Foreign Earnings. Beginning in fiscal 2010, we initiated a policy election to indefinitely reinvest a portion of the undistributed earnings of certain foreign subsidiaries with operations outside of the U.S. We consider the earnings of these foreign subsidiaries to be indefinitely invested outside the U.S. on the basis of estimates that future domestic cash generation will be sufficient to meet future domestic cash needs, and our specific plans for reinvestment of those subsidiary earnings. A majority of the amounts held outside of the U.S. are generally utilized to support non-U.S. liquidity needs in order to fund operations and other growth of our foreign subsidiaries and acquisitions.

Sales Tax. We account for sales tax on a net basis by excluding sales tax from our revenue.

Withholding Taxes. We recognize licensing revenue gross of withholding taxes, which our licensees remit directly to their local tax authorities, and for which we receive a partial foreign tax credit in our income tax provision. The foreign current tax includes this withholding tax expense while the appropriate foreign tax credit benefit is included in current federal and foreign taxes.

Recently Issued Accounting Standards

We continually assess any ASUs or other new accounting pronouncements issued by the FASB to determine their applicability and impact on us. Where it is determined that a new accounting pronouncement will result in a change to our financial reporting, we take the appropriate steps to ensure that such changes are properly reflected in our consolidated financial statements or notes thereto.

Adopted Standards

Balance Sheet Classification - Deferred Taxes. During the first quarter of fiscal 2016, we elected to early-adopt ASU 2015-17, Balance Sheet Classification of Deferred Taxes. The new standard requires classification of all deferred tax

assets and liabilities as non-current, which represented a change from our historical presentation whereby certain of our deferred tax assets and liabilities were classified as current, and the remainder were classified as non-current. We elected a transition method to apply the changes from the new standard on a retrospective basis, and upon

Table of Contents

adoption, reclassified \$97.1 million of deferred tax assets from current assets to non-current assets on our consolidated balance sheet as of September 25, 2015.

With the exception of the impact from the adoption of ASU 2015-17 discussed above, there have not been any changes to our significant accounting policies from those that were described in our Form 10-K for the prior fiscal year ended September 25, 2015.

Standards Not Yet Effective

Consolidation. In February 2015, the FASB issued ASU 2015-02, Consolidation: Amendments to the Consolidation Analysis, which amends the consolidation requirements in ASC 810 and significantly changes the consolidation analysis required under U.S. GAAP. Among others, the ASU significantly amends how variable interests held by a reporting entity's related parties or de facto agents affect its consolidation conclusion. The amendments are effective for us on October 1, 2016 when we will adopt them. We do not anticipate any changes to the entities currently consolidated by the Company and accordingly, do not anticipate that the adoption will have any impact on our consolidated financial statements.

Inventory. In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory, which affects reporting entities that measure inventory using first-in, first-out (FIFO) or average cost. Specifically, ASU 2015-11 requires that inventory be measured at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is unchanged for inventory measured using LIFO or the retail inventory method. The ASU is effective for us beginning September 30, 2017. Early adoption is permitted, and we are currently evaluating the timing and impact of the standard on our consolidated financial statements.

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This new standard will replace existing revenue recognition guidance in U.S. GAAP when it becomes effective, and may also impact the accounting for certain direct costs associated with revenues and contract acquisition costs such as sales commissions. The new standard permits the use of either the retrospective or cumulative effect transition method.

In April 2016, the FASB issued ASU 2016-10, Revenue from Contracts with Customers (Topic 606), Identifying Performance Obligations and Licensing, which clarifies guidance related to identifying performance obligations and licensing implementation guidance contained in the new revenue recognition standard, ASU 2014-09. The effective date for this ASU coincides with the effective date for ASU 2014-09.

We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures, and have yet to select a transition method or determine the effect of the standard on our ongoing financial reporting. Although permitted, we do not intend to early-adopt the new standard, but we will adopt it beginning September 29, 2018.

Leases. In February 2016, the FASB issued ASU 2016-02, Leases, which amends the existing accounting standards for leases. Under the new guidance, a lessee will be required to recognize a lease liability and right-of-use asset for all leases with terms in excess of twelve months. The new guidance also modifies the classification criteria and accounting for sales-type and direct financing leases, and requires additional disclosures to enable users of financial statements to understand the amount, timing, and uncertainty of cash flows arising from leases. Consistent with current guidance, a lessee's recognition, measurement, and presentation of expenses and cash flows arising from a lease will continue to depend primarily on its classification. The ASU is effective for us beginning September 28, 2019, and must be applied using a modified retrospective approach. Early adoption is permitted, including adoption in an interim period. Upon adoption, we will recognize a lease liability and right-of-use asset for each of our long-term lease arrangements, and we are currently evaluating the timing and impact of the standard on our consolidated financial statements.

Share-Based Compensation. In March 2016, the FASB issued ASU 2016-09, Improvements to Employee Share-Based Payment Accounting, which simplifies several aspects of the accounting for employee share-based

payment transactions including the accounting for income taxes, forfeitures, and statutory withholding requirements, as well as classification in the statement of cash flows. The ASU is effective for us beginning September 30, 2017. Early adoption is permitted, including adoption in an interim period, and we are currently evaluating the timing and impact of the standard on our consolidated financial statements.

Table of Contents

Cash Flow Classification. In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. The new guidance addresses eight specific cash flow issues, with the objective of reducing an existing diversity in practices regarding the manner in which certain cash receipts and payments are presented and classified in the statement of cash flows. The ASU is effective for us beginning September 29, 2018. Early adoption is permitted, including adoption in an interim period, and we are currently evaluating the timing and impact of the standard on our consolidated financial statements.

Income Taxes: Intra-Entity Asset Transfers. In October 2016, the FASB issued ASU No. 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory. The new guidance requires the recognition of the income tax consequences of an intercompany asset transfer, other than transfers of inventory, when the transfer occurs. For intercompany transfers of inventory, the income tax effects will continue to be deferred until the inventory has been sold to a third party. The ASU is effective for us beginning September 29, 2018. Early adoption is permitted, including adoption in an interim period, and we are currently evaluating the timing and impact of the standard on our consolidated financial statements.

3. Composition of Certain Financial Statement Captions

The following tables present detailed information from our consolidated balance sheets as of September 30, 2016 and September 25, 2015 (amounts displayed in thousands, except as otherwise noted).

Accounts Receivable

Accounts Receivable, Net	September 30, 2016	September 25, 2015
Trade accounts receivable	\$ 66,229	\$ 94,559
Accounts receivable from patent administration program customers	11,829	8,546
Accounts receivable, gross	78,058	103,105
Less: allowance for doubtful accounts	(2,370)	(1,542)
Total	\$ 75,688	\$ 101,563

Allowance for Doubtful Accounts	Beginning Balance	Charged to Operations	Deductions	Ending Balance
For fiscal year ended:				
September 26, 2014	\$ 514	\$ 1,119	\$ (18)	\$ 1,615
September 25, 2015	1,615	33	(106)	1,542
September 30, 2016	1,542	1,017	(189)	2,370

Inventories

Inventories	September 30, 2016	September 25, 2015
Raw materials	\$ 3,526	\$ 3,246
Work in process	4,020	3,279
Finished goods	8,808	7,347
Total	\$ 16,354	\$ 13,872

Inventories are stated at the lower of cost or market (net realizable value). Inventory with a consumption period expected to exceed twelve months is recorded within other non-current assets in our consolidated balance sheets. We have included \$1.6 million and \$1.4 million of raw materials inventory within other non-current assets in our consolidated balance sheets as of September 30, 2016 and September 25, 2015, respectively. Based on anticipated inventory consumption rates, and aside from existing write-downs due to excess inventory, we do not believe that material risk of obsolescence exists prior to ultimate sale.

Table of Contents

Prepaid Expenses And Other Current Assets

Prepaid Expenses And Other Current Assets	September 30, 2016	September 25, 2015
Prepaid expenses	\$ 13,440	\$ 13,680
Other current assets	11,578	7,525
Income tax receivable	1,284	10,826
Total	\$ 26,302	\$ 32,031

Accrued Liabilities

Accrued Liabilities	September 30, 2016	September 25, 2015
Accrued royalties	\$ 1,939	\$ 1,951
Amounts payable to patent administration program partners	34,472	40,466
Accrued compensation and benefits	71,261	70,317
Accrued professional fees	6,528	6,523
Other accrued liabilities	54,855	50,050
Total	\$ 169,055	\$ 169,307

Other accrued liabilities include the accrual for unpaid PP&E additions of \$17.1 million and \$20.5 million as of September 30, 2016 and September 25, 2015, respectively.

Other Non-Current Liabilities

Other Non-Current Liabilities	September 30, 2016	September 25, 2015
Supplemental retirement plan obligations	\$ 2,540	\$ 2,400
Non-current tax liabilities	68,254	62,843
Other liabilities	12,128	11,781
Total	\$ 82,922	\$ 77,024

Refer to Note 10 "Income Taxes" for additional information related to tax liabilities.

4. Investments & Fair Value Measurements

We use cash holdings to purchase investment grade securities diversified among security types, industries and issuers. All investments are measured at fair value, and are recorded within cash equivalents and both short and long-term investments in our consolidated balance sheets. With the exception of our mutual fund investments held in our SERP which are classified as trading securities, all of our investments are classified as AFS securities.

Our investments primarily consist of municipal debt securities, corporate bonds, U.S. agency securities and commercial paper. In addition, our cash and cash equivalents also consist of highly-liquid money market funds. Consistent with our investment policy, none of our municipal debt investments are supported by letters of credit or standby purchase agreements. Our cash and investment portfolio consisted of the following (in thousands):

Table of Contents

	September 30, 2016			Estimated Fair Value			
	Cost	Unrealized Gains	Losses	Total	Level 1	Level 2	Level 3

Other long-term investments as of September 25, 2015 include a marketable equity security of \$0.7 million, and (1) other investments that are not carried at fair value including an equity method investment of \$0.5 million and two cost method investments of \$2.0 million and \$0.5 million.

Fair Value Hierarchy. Fair value is the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability, in an orderly transaction between market participants at the measurement date. We minimize the use of unobservable inputs and use observable market data, if available, when determining fair value. We classify our inputs to measure fair value using the following three-level hierarchy:

Level 1: Quoted prices in active markets at the measurement date for identical assets and liabilities. We base the fair value of our Level 1 financial instruments, which are traded in active markets, using quoted market prices for identical instruments.

Level 2: Prices may be based upon quoted prices in active markets or inputs not quoted on active markets but are corroborated by market data. We obtain the fair value of our Level 2 financial instruments from a professional pricing service, which may use quoted market prices for identical or comparable instruments, or model driven valuations using observable market data or inputs corroborated by observable market data. To validate the fair value determination provided by our primary pricing service, we perform quality controls over values received which include comparing our pricing service provider's assessment of the fair values of our investment securities against the fair values of our investment securities obtained from another independent source, reviewing the pricing movement in the context of overall market trends, and reviewing trading information from our investment managers. In addition, we assess the inputs and methods used in determining the fair value in order to determine the classification of securities in the fair value hierarchy.

Level 3: Unobservable inputs are used when little or no market data is available and reflect management's estimates of assumptions that market participants would use in pricing the asset or liability.

Table of Contents

The following table describes the valuation techniques and inputs applicable to each class of security held within our investment portfolio as of September 30, 2016:

Asset Type	Primary Source	Update Frequency	Fair Value Methodology	Secondary Source
Level 1				
Money Market Funds	Not Applicable	Daily	\$1 per share	Not Applicable
U.S. Agency Securities	FT Interactive Data	Daily	Institutional Bond Quotes - evaluations based on various market and industry inputs	Standard & Poor's Bloomberg
U.S. Government Bonds	FT Interactive Data	Daily	Institutional Bond Quotes - evaluations based on various market and industry inputs	Standard & Poor's Bloomberg
Level 2				
Certificates Of Deposit	FT Interactive Data	Monthly	Market Prices	Standard & Poor's Bloomberg
Commercial Paper	U.S. Bank Pricing Unit	Daily	Matrix Pricing	Not Applicable
Corporate Bonds	FT Interactive Data	Daily	Institutional Bond Quotes - evaluations based on various market and industry inputs	Standard & Poor's Bloomberg
Municipal Debt Securities	Standard & Poor's	Daily	Evaluations based on various market and industry inputs	FT Interactive Data Bloomberg

Securities In Gross Unrealized Loss Position. We periodically evaluate our investments for other-than-temporary declines in fair value. The unrealized losses on our AFS securities were primarily the result of unfavorable changes in interest rates subsequent to the initial purchase of these securities. The following table presents the gross unrealized losses and fair value for those AFS securities that were in an unrealized loss position as of September 30, 2016 and September 25, 2015 (in thousands):

Investment Type	September 30, 2016				September 25, 2015	
	Less Than 12 Months		Greater Than 12 Months		Less Than 12 Months	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses (1)
U.S. agency securities	\$22,988	\$ (38)	\$—	\$ —	\$19,005	\$ (17)
Commercial paper	11,479	(10)	—	—	—	—
Corporate bonds	153,491	(280)	1,000	—	148,034	(403)
Municipal debt securities	35,625	(42)	4,615	(5)	35,476	(60)
Total	\$223,583	\$ (370)	\$5,615	\$ (5)	\$202,515	\$ (480)

(1) As of September 25, 2015, no AFS securities were in an unrealized loss position for 12 months or greater.

Although we had certain securities that were in an unrealized loss position as of September 30, 2016, we expect to recover the full carrying value of these securities as we do not intend to, nor do we currently anticipate a need to sell these securities prior to recovering the associated unrealized losses. As a result, we do not consider any portion of the unrealized losses at either September 30, 2016 or September 25, 2015 to represent an other-than-temporary

impairment, nor do we consider any of the unrealized losses to be credit losses.

Investment Maturities. The following table summarizes the amortized cost and estimated fair value of the AFS securities within our investment portfolio based on stated maturities as of September 30, 2016 and September 25, 2015, which are recorded within cash equivalents and both short and long-term investments in our consolidated balance sheets (in thousands):

Range of maturity	September 30, 2016		September 25, 2015	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due within 1 year	\$135,886	\$135,884	\$158,957	\$159,090
Due in 1 to 2 years	225,679	225,953	173,571	173,577
Due in 2 to 3 years	164,339	164,583	143,879	143,752
Total	\$525,904	\$526,420	\$476,407	\$476,419

5. Property, Plant & Equipment

PP&E are recorded at cost, with depreciation expense included in cost of products, cost of services, R&D, S&M and G&A expenses in our consolidated statements of operations. Depreciation expense was \$52.0 million, \$48.2 million and \$38.1 million in fiscal 2016, 2015 and 2014, respectively.

Table of Contents

As of September 30, 2016 and September 25, 2015, PP&E consisted of the following (in thousands):

Property, Plant And Equipment	September 30, 2016	September 25, 2015
Land	\$43,325	\$ 43,537
Buildings and building improvements	251,700	248,390
Leasehold improvements	60,480	61,455
Machinery and equipment	88,943	70,143
Computer equipment and software	154,291	136,666
Furniture and fixtures	26,900	25,489
Equipment provided under operating leases	35,968	7,638
Construction-in-progress	32,576	11,448
Property, plant and equipment, gross	694,183	604,766
Less: accumulated depreciation	(250,527)	(201,675)
Property, plant and equipment, net	\$443,656	\$ 403,091

Purchase Of 1275 Market Commercial Office Building In San Francisco, CA. In the fourth quarter of fiscal 2015, we completed the occupation of our new worldwide headquarters in San Francisco, California following the purchase of commercial office property for \$109.8 million in fiscal 2012. As of September 30, 2016, construction-in-progress relates to costs for ongoing construction on ancillary facilities.

6. Goodwill & Intangible Assets

Goodwill

The following table outlines changes to the carrying amount of goodwill (in thousands):

	Goodwill
Balance at September 26, 2014	\$277,574
Acquired goodwill (1)	37,094
Translation adjustments	(6,960)
Balance at September 25, 2015	\$307,708
Translation adjustments	1,908
Balance at September 30, 2016	\$309,616

(1) Total initial acquired goodwill recorded during fiscal 2015 consists of \$36.4 million from the acquisition of Doremi and \$0.7 million from an immaterial acquisition.

Intangible Assets

Intangible assets are stated at their original cost less accumulated amortization. Intangible assets subject to amortization consisted of the following (in thousands):

Intangible Assets, Net	September 30, 2016			September 25, 2015		
	Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
Acquired patents and technology	\$293,824	\$(101,711)	\$192,113	\$172,787	\$(74,398)	\$98,389
Customer relationships	56,821	(34,113)	22,708	56,933	(28,275)	28,658
Other intangibles	22,716	(22,195)	521	22,564	(22,104)	460
Total	\$373,361	\$(158,019)	\$215,342	\$252,284	\$(124,777)	\$127,507

During fiscal 2016 and 2015, we purchased various patents and developed technology for cash consideration of \$121.0 million and \$37.4 million, and upon acquisition, these intangible assets had a weighted-average useful life of 10.1 years and 18.0 years, respectively. These acquisitions facilitate our R&D efforts, technologies and potential product offerings. Included within the total patent purchases made during fiscal 2016 was the acquisition of a large individual patent portfolio that fits within our existing patent licensing programs in exchange for consideration of \$105.0 million. These assets are categorized within the "Acquired patents and technology" intangible asset class, and

are being amortized over their weighted-average useful life of 9.0 years.

Amortization expense for our intangible assets is included in cost of licensing, cost of products, R&D and S&M expenses in our consolidated statements of operations. Amortization expense was \$33.2 million, \$21.0 million and \$15.1 million in fiscal 2016, 2015 and 2014, respectively. As of September 30, 2016, expected amortization expense of our intangible assets in future periods was as follows (in thousands):

62

Table of Contents

Fiscal Year	Amortization Expense
2017	\$ 30,725
2018	25,300
2019	24,717
2020	24,253
2021	24,226
Thereafter	86,121
Total	\$ 215,342

7. Stockholders' Equity & Stock-Based Compensation

We provide stock-based awards as a form of compensation for employees, officers and directors. We have issued stock-based awards in the form of stock options and RSUs under our equity incentive plans, as well as shares under our ESPP.

Common Stock - Class A and Class B

Our Board of Directors has authorized two classes of common stock, Class A and Class B. At September 30, 2016, we had authorized 500,000,000 Class A shares and 500,000,000 Class B shares. At September 30, 2016, we had 57,018,362 shares of Class A common stock and 44,403,847 shares of Class B common stock issued and outstanding. Holders of our Class A and Class B common stock have identical rights, except that holders of our Class A common stock are entitled to one vote per share and holders of our Class B common stock are entitled to ten votes per share. Shares of Class B common stock can be converted to shares of Class A common stock at any time at the option of the stockholder and automatically convert upon sale or transfer, except for certain transfers specified in our amended and restated certificate of incorporation.

2005 Stock Incentive Plan

Following shareholder approval in January 2005, our 2005 Stock Plan was adopted by our Board of Directors adopted on February 16, 2005, the day prior to the completion of our IPO. Our 2005 Stock Plan, as amended and restated, provides for the ability to grant ISOs, NQs, restricted stock, RSUs, SARs, deferred stock units, performance units, performance bonus awards and performance shares. A total of 38.0 million shares of our Class A common stock is authorized for issuance under the 2005 Stock Plan. For awards granted prior to February 2011, any shares subject to an award with a per share price less than the fair market value of our Class A common stock on the date of grant and any shares subject to an outstanding RSU award will be counted against the authorized share reserve as two shares for every one share subject to the award, and if returned to the 2005 Stock Plan, such shares will be counted as two shares for every one share returned. For those awards granted from February 2011 onward, any shares subject to an award with a per share price less than the fair market value of our Class A common stock on the date of grant and any shares subject to an outstanding RSU award will be counted against the authorized share reserve as 1.6 shares for every one share subject to the award, and if returned to the 2005 Stock Plan, such shares will be counted as 1.6 for every one share returned.

Stock Options. Stock options are generally granted at fair market value on the date of grant. Options granted to employees and officers prior to June 2008 generally vest over four years, with equal annual cliff-vesting and expire on the earlier of ten years after the date of grant or three months after termination of service. Options granted to employees and officers from June 2008 onward generally vest over four years, with 25% of the shares subject to the option becoming exercisable on the one-year anniversary of the date of grant and the balance of the shares vesting in equal monthly installments over the following 36 months. These options expire on the earlier of ten years after the date of grant or three months after termination of service. All options granted vest over the requisite service period and upon the exercise of stock options, we issue new shares of Class A common stock under the 2005 Stock Plan. Our 2005 Stock Plan also allows us to grant stock awards which vest based on the satisfaction of specific performance criteria.

Performance-Based Stock Options. On December 15, 2015, we granted PSOs exercisable for an aggregate of up to 419,623 shares of our Class A common stock to our senior executives, 397,748 of which were outstanding as of September 30, 2016. The contractual term for the PSOs is seven years, with vesting contingent upon market-based performance conditions, representing the achievement of specified Dolby annualized TSR targets at the end of a three-year measurement period ending December 15, 2018. If the minimum conditions are met, the PSOs earned will cliff vest on the third anniversary of the grant date, upon certification of achievement of the performance conditions by

63

Table of Contents

our Compensation Committee. Anywhere from 0% to 125% of the shares subject to a PSO may vest based on achievement of the performance conditions at the end of the three-year performance period.

In valuing the PSOs which will be recognized as compensation cost, we used a Monte Carlo valuation model. Aside from the use of an expected term for the PSOs commensurate with their shorter contractual term, the nature of the valuation inputs used in the Monte Carlo valuation model were consistent with those used to value our non-performance based options granted under the 2005 Plan. Compensation cost is being amortized on a straight-line basis over the requisite service period.

The following table summarizes information about stock options issued under our 2005 Stock Plan:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (1) (in thousands)
Options outstanding at September 25, 2015	8,835	\$ 35.85		
Grants	2,220	33.42		
Exercises	(1,930)	31.81		
Forfeitures and cancellations	(435)	37.33		
Options outstanding at September 30, 2016	8,690	35.98	7.1	\$ 159,230
Options vested and expected to vest at September 30, 2016	8,172	35.97	7.0	149,856
Options exercisable at September 30, 2016	4,638	\$ 35.08	6.0	88,040

(1) Aggregate intrinsic value is based on the closing price of our Class A common stock on September 30, 2016 of \$54.29 and excludes the impact of options that were not in-the-money.

The following table summarizes information about stock options outstanding and exercisable at September 30, 2016:

Range of Exercise Price	Outstanding Options			Options Exercisable		
	Shares	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price	
	(in thousands)	(in years)	(in thousands)	(in thousands)		
\$24.60 - \$28.90	1,153	4.4	\$ 28.22	1,153	\$ 28.22

	8,690			4,638		

Restricted Stock Units. Beginning in fiscal 2008, we began granting RSUs to certain directors, officers and employees under our 2005 Stock Plan. Awards granted to employees and officers generally vest over four years, with equal annual cliff-vesting. Awards granted to directors prior to November 2010 generally vest over three years, with equal annual cliff-vesting. Awards granted after November 2010 and prior to fiscal 2014 to new directors vest over approximately two years, with 50% vesting per year, while awards granted from November 2010 onward to ongoing directors generally vest over approximately one year. Awards granted to new directors from fiscal 2014 onward vest on the earlier of the first anniversary of the award's date of grant, or the day immediately preceding the date of the next annual meeting of stockholders that occurs after the award's date of grant. Our 2005 Stock Plan also allows us to grant RSUs that vest based on the satisfaction of specific performance criteria, although no such awards had been granted as of September 30, 2016. At each vesting date, the holder of the award is issued shares of our Class A common stock. Compensation expense from these awards is equal to the fair market value of our Class A common stock on the date

of grant and is recognized on a straight-line basis over the requisite service period.

64

Table of Contents

The following table summarizes information about RSUs issued under our 2005 Stock Plan:

	Shares	Weighted-Average Grant Date Fair Value
	(in thousands)	
Non-vested at September 25, 2015	2,830	\$ 40.73
Granted	1,407	35.04
Vested	(1,122)	35.82
Forfeitures	(243)	37.16
Non-vested at September 30, 2016	2,872	\$ 40.16

The fair value as of the respective vesting dates of RSUs were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Restricted stock units - vest date fair value	\$40,283	\$ 45,175	\$ 40,810

Employee Stock Purchase Plan. Our plan allows eligible employees to have up to 10 percent of their eligible compensation withheld and used to purchase Class A common stock, subject to a maximum of \$25,000 worth of stock purchased in a calendar year or no more than 1,000 shares in an offering period, whichever is less. An offering period consists of successive six-month purchase periods, with a look back feature to our stock price at the commencement of a one-year offering period. The plan provides for a discount equal to 15 percent of the lower of the closing price of our Class A common stock on the New York Stock Exchange on the first and last day of the offering periods. The plan also includes an automatic reset feature that provides for an offering period to be reset and recommenced to a new lower-priced offering if the offering price of a new offering period is less than that of the immediately preceding offering period.

Stock Option Valuation Assumptions

We use the Black-Scholes option pricing model to determine the estimated fair value of employee stock options at the date of the grant. The Black-Scholes model includes inputs that require us to make certain estimates and assumptions regarding the expected term of the award, as well as the future risk-free interest rate, and the volatility of our stock price over the expected term of the award.

Expected Term. The expected term of an award represents the estimated period of time that options granted will remain outstanding, and is measured from the grant date to the date at which the option is either exercised or canceled. Our determination of the expected term involves an evaluation of historical terms and other factors such as the exercise and termination patterns of our employees who hold options to acquire our Class A common stock, and is based on certain assumptions made regarding the future exercise and termination behavior.

Risk-Free Interest Rate. The risk-free interest rate is based on the yield curve of United States Treasury instruments in effect on the date of grant. In determining an estimate for the risk-free interest rate, we use average interest rates based on these instruments' constant maturities with a term that approximates and corresponds with the expected term of our awards.

Expected Stock Price Volatility. The expected volatility represents the estimated volatility in the price of our Class A common stock over a time period that approximates the expected term of the awards, and is determined using a blended combination of historical and implied volatility. Historical volatility is representative of the historical trends in our stock price for periods preceding the measurement date for a period that is commensurate with the expected term. Implied volatility is based upon externally traded option contracts of our Class A common stock.

Dividend Yield. The dividend yield is based on our anticipated dividend payout over the expected term of our option awards. Dividend declarations and the establishment of future record and payment dates are subject to the Board of Directors' continuing determination that the dividend policy is in the best interests of our stockholders. The dividend policy may be changed or canceled at the discretion of the Board of Directors at any time.

Table of Contents

The weighted-average assumptions used in the determination of the fair value of our stock options were as follows:

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Expected term (in years)	5.24	4.64	4.58
Risk-free interest rate	1.7 %	1.5 %	1.4 %
Expected stock price volatility	29.8 %	29.6 %	32.0 %
Dividend yield	1.4 %	0.9 %	— %

The following table summarizes the weighted-average fair value (per share) of stock options granted and the total intrinsic value of stock options exercised (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Stock options granted - weighted-average grant date fair value	\$ 8.49	\$ 10.54	\$ 11.11
Stock options exercised - intrinsic value	27,483	3,546	15,300

Stock-Based Compensation Expense

Stock-based compensation expense for equity awards granted to employees is determined by estimating their fair value on the date of grant, and recognizing that value as an expense on a straight-line basis over the requisite service period in which our employees earn the awards. Compensation expense related to these equity awards is recognized net of estimated forfeitures, which reduce the expense recorded in the consolidated statements of operations. Our methodology under which estimated forfeiture rates are derived is based on an evaluation of trends in our historical forfeiture data with consideration for other potential driving factors. If in subsequent periods actual forfeitures significantly differ from our estimates, we will revise such estimates accordingly. Beginning in fiscal 2015, we revised the method under which we estimate forfeitures. The impact of this change in estimate was not material. The estimated forfeiture rates used for awards granted were 10.49%, 9.98% and 6.13% in fiscal 2016, 2015 and 2014, respectively.

The following tables separately present stock-based compensation expense both by award type and classification within our consolidated statements of operations (in thousands):

Expense - By Award Type

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Stock options	\$ 21,311	\$ 22,972	\$ 19,680
Restricted stock units	42,201	40,332	42,221
Employee stock purchase plan	3,473	3,765	3,779
Total stock-based compensation	66,985	67,069	65,680
Benefit from income taxes	(19,627)	(19,606)	(19,315)
Total stock-based compensation, net of tax	\$ 47,358	\$ 47,463	\$ 46,365

Expense - By Income Statement Classification

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Compensation Expense - By Classification			
Cost of products	\$ 859	\$ 949	\$ 812

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Cost of services	547	457	402
Research and development	17,771	18,682	18,510
Sales and marketing	27,579	24,283	23,236
General and administrative	20,229	22,698	22,720
Total stock-based compensation	66,985	67,069	65,680
Benefit from income taxes	(19,627)	(19,606)	(19,315)
Total stock-based compensation, net of tax	\$47,358	\$47,463	\$46,365

66

Table of Contents

The tax benefit that we recognize from certain exercises of ISOs and shares issued under our ESPP are excluded from the tables above. This benefit was as follows (in thousands):

	Fiscal Year Ended	
	September 30, 2016	September 25, 2015
Tax benefit - stock option exercises & shares issued under ESPP	\$ 550	\$ 328
Unrecognized Compensation Expense	\$ 328	\$ 538

At September 30, 2016, total unrecorded compensation expense associated with employee stock options expected to vest was approximately \$32.3 million, which is expected to be recognized over a weighted-average period of 2.2 years. At September 30, 2016, total unrecorded compensation expense associated with RSUs expected to vest was approximately \$70.8 million, which is expected to be recognized over a weighted-average period of 2.5 years.

Common Stock Repurchase Program

In November 2009, we announced a stock repurchase program ("program"), providing for the repurchase of up to \$250.0 million of our Class A common stock. The following table summarizes the initial amount of authorized repurchases as well as additional repurchases approved by our Board of Directors as of September 30, 2016 (in thousands):

Authorization Period	Authorization Amount
Fiscal 2010: November 2009	\$ 250,000
Fiscal 2010: July 2010	300,000
Fiscal 2011: July 2011	250,000
Fiscal 2012: February 2012	100,000
Fiscal 2015: October 2014	200,000
Total	\$ 1,100,000

Stock repurchases under the program may be made through open market transactions, negotiated purchases, or otherwise, at times and in amounts that we consider appropriate. The timing of repurchases and the number of shares repurchased depend upon a variety of factors, including price, regulatory requirements, the rate of dilution from our equity compensation plans and other market conditions. The program does not have a specified expiration date, and can be limited, suspended or terminated at our discretion at any time without prior notice. Shares repurchased under the program will be returned to the status of authorized but unissued shares of Class A common stock. As of September 30, 2016, the remaining authorization to purchase additional shares is approximately \$51.9 million. The following table provides information regarding share repurchase activity under the program in fiscal 2016:

Quarterly Repurchase Activity	Shares Repurchased	Cost (1)	Average Price Paid Per Share (2)
		(in thousands)	
Q1 - Quarter ended January 1, 2016	1,140,700	\$ 39,449	\$ 34.57
Q2 - Quarter ended April 1, 2016	975,745	37,407	38.32
Q3 - Quarter ended July 1, 2016	176,854	7,998	45.22
Q4 - Quarter ended September 30, 2016	323,085	16,000	49.51
Total	2,616,384	\$ 100,854	

(1) Cost of share repurchases includes the price paid per share and applicable commissions.

(2) Average price paid per share excludes commission costs.

Dividend Program

In October 2014, our Board of Directors initiated a quarterly cash dividend program for our stockholders. The following table summarizes dividend payments made under the program during fiscal 2016:

Table of Contents

Fiscal Period	Declaration Date	Record Date	Payment Date	Cash Dividend Per Common Share	Dividend Payment
Fiscal 2016					
Q1 - Quarter ended January 1, 2016	January 25, 2016	February 8, 2016	February 17, 2016	\$ 0.12	\$12.1 million
Q2 - Quarter ended April 1, 2016	April 25, 2016	May 9, 2016	May 18, 2016	\$ 0.12	\$12.0 million
Q3 - Quarter ended July 1, 2016	July 25, 2016	August 8, 2016	August 17, 2016	\$ 0.12	\$12.1 million
Q4 - Quarter ended September 30, 2016	October 24, 2016	November 7, 2016	November 16, 2016	\$ 0.14	\$14.2 million (1)

(1) The dividend payment amount is estimated based on the number of shares of our Class A and Class B common stock that we estimate will be outstanding as of the Record Date.

8. Accumulated Other Comprehensive Income

OCI consists of two components: unrealized gains or losses on our AFS marketable investment securities and the gain or loss from foreign currency translation adjustments. Until realized and reported as a component of net income, these comprehensive income items accumulate and are included within AOCI, a subsection within stockholders' equity in our consolidated balance sheets. Unrealized gains and losses on our investment securities are reclassified from AOCI into earnings when realized upon sale, and are determined based on specific identification of securities sold. Gains and losses from the translation of assets and liabilities denominated in non-U.S. dollar functional currencies are included in AOCI.

The following table summarizes the changes in the accumulated balances during the period, and includes information regarding the manner in which the reclassifications out of AOCI into earnings affect our consolidated statements of operations (in thousands):

	Fiscal Year Ended September 30, 2016			Fiscal Year Ended September 25, 2015		
	Investment Securities	Currency Translation Adjustments	Total	Investment Securities	Currency Translation Adjustments	Total
Beginning Balance	\$350	\$(11,812)	\$(11,462)	\$505	\$2,509	\$3,014
Other comprehensive income before reclassifications:						
Unrealized gains/(losses) - investment securities	(220)		(220)	290		290
Foreign currency translation gains/(losses) (1)		287	287		(15,185)	(15,185)
Income tax effect - benefit/(expense)	188	586	774	(87)	864	777
Net of tax	(32)	873	841	203	(14,321)	(14,118)
Amounts reclassified from AOCI into earnings:						
Realized gains/(losses) - investment securities (1)	563		563	(446)		(446)
Income tax effect - benefit/(expense) (2)	(139)		(139)	88		88
Net of tax	424	—	424	(358)	—	(358)
Net current-period other comprehensive income/(loss)	392	873	1,265	(155)	(14,321)	(14,476)
Ending Balance	\$742	\$(10,939)	\$(10,197)	\$350	\$(11,812)	\$(11,462)

(1) Realized gains or losses from the sale of our AFS investment securities or from foreign currency translation adjustments are included within other income/expense, net in our consolidated statements of operations.

(2) The income tax benefit or expense is included within provision for income taxes in our consolidated statements of operations.

9. Earnings Per Share

Basic EPS is computed by dividing net income attributable to Dolby Laboratories, Inc. by the number of weighted-average shares of Class A and Class B common stock outstanding during the period. Through application of the treasury stock method, diluted EPS is computed in the same manner, except that the number of weighted-average shares outstanding is increased by the number of potentially dilutive shares from employee incentive plans during the period. Potentially dilutive shares include the hypothetical number of shares issued under the assumed exercise of outstanding stock options, vesting of outstanding RSUs and shares issued under our ESPP.

Basic and diluted EPS are computed independently for each fiscal quarter and year-to-date period presented, which involves the use of different weighted-average share count figures relating to quarterly and annual periods. As a result, and after factoring the effect of rounding to the nearest cent per share, the sum of all four quarter-to-date EPS figures may not equal year-to-date EPS.

Table of Contents

The following table sets forth the computation of basic and diluted EPS attributable to Dolby Laboratories, Inc. (in thousands, except per share amounts):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Numerator:			
Net income attributable to Dolby Laboratories, Inc.	\$ 185,860	\$ 181,390	\$ 206,103
Denominator:			
Weighted-average shares outstanding—basic	100,717	102,354	102,151
Potential common shares from options to purchase common stock	1,013	811	582
Potential common shares from restricted stock units	694	697	899
Weighted-average shares outstanding—diluted	102,424	103,862	103,632
Net income per share attributable to Dolby Laboratories, Inc.:			
Basic	\$ 1.85	\$ 1.77	\$ 2.02
Diluted	\$ 1.81	\$ 1.75	\$ 1.99
Antidilutive awards excluded from calculation:			
Stock options	2,971	4,270	3,987
Restricted stock units	30	127	1,835

10. Income Taxes

Our income tax expense, deferred tax assets and liabilities, and reserves for unrecognized tax benefits reflect management's best assessment of estimated current and future taxes to be paid. We are subject to income taxes in both the U.S. and numerous foreign jurisdictions. Significant judgments and estimates are required in determining the consolidated income tax expense.

Income Tax Provision

The following two tables present the components of our income before provision for income taxes by geographic region and the portion of our provision for income taxes classified as current and deferred (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
United States	\$ 37,223	\$ 17,091	\$ 160,839
Foreign	198,681	228,691	115,260
Total	\$ 235,904	\$ 245,782	\$ 276,099

Total deferred	(22,737)	(14,311)	(6,696))
Provision for income taxes	\$49,502	\$ 62,542	\$ 67,379)

69

Table of Contents

Repatriation of Undistributed Foreign Earnings

Beginning in fiscal 2010, we initiated a policy election to indefinitely reinvest a portion of the undistributed earnings of certain foreign subsidiaries with operations outside of the U.S. We consider the earnings of these foreign subsidiaries to be indefinitely invested outside the U.S. on the basis of estimates that future domestic cash generation will be sufficient to meet future domestic cash needs and our specific plans for reinvestment of those subsidiary earnings. A majority of the amounts held outside of the U.S. are generally utilized to support non-U.S. liquidity needs in order to fund operations and other growth of our foreign subsidiaries and acquisitions.

As a result, we have not recorded a deferred tax liability on undistributed earnings of foreign subsidiaries of approximately \$678.1 million, which are permanently reinvested outside the U.S. If these undistributed earnings held by foreign subsidiaries are repatriated to the U.S., they may be subject to federal and state income taxes, less any applicable foreign tax credits and withholding taxes, estimated at approximately \$173.0 million as of September 30, 2016. Accordingly, if a determination is made to repatriate some or all of these foreign earnings, we would need to adjust our income tax provision in the period that the determination is made to accrue for taxes payable on earnings that will no longer be indefinitely invested outside the U.S.

Withholding Taxes

We recognize licensing revenue gross of withholding taxes, which our licensees remit directly to their local tax authorities, and for which we receive a partial foreign tax credit in our income tax provision. The foreign current tax provision includes this withholding tax expense while the appropriate foreign tax credit benefit is included in current federal and foreign tax provision. Withholding taxes were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Withholding taxes	\$45,151	\$ 45,372	\$ 47,131

Deferred Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, using enacted tax rates in effect for the year in which the differences are expected to reverse. Based upon the level of historical taxable income and projections for future taxable income over periods in which the deferred tax assets are deductible, we believe it is more likely than not that the benefits of these deductible differences will be realized; therefore, a valuation allowance is not required.

Table of Contents

A summary of the tax effects of the temporary differences were as follows (in thousands):

	Fiscal Year Ended	
	September 30, 2016	September 25, 2015
Deferred income tax assets:		
Investments	\$972	\$ 977
Inventories	7,855	8,800

Other	9,473	9,092
Total gross deferred income tax assets	173,206	148,418
Less: valuation allowance	—	—
Total deferred income tax assets	173,206	148,418

Deferred income tax liabilities:

Intangibles	(2,014)—
International earnings	(4,097)(4,646
Unrealized gain on investments	(305)(493
Deferred income tax assets, net (non-current)	\$ 166,790	\$ 143,279

NOL and Tax Credit Carryforwards

At September 30, 2016, the NOL carried forward for federal and California tax purposes were \$3.0 million and \$9.7 million, respectively, and will expire in fiscal 2029 if unused. Additionally, we had a total foreign NOL carryforward of \$6.8 million as of September 30, 2016, an amount which is not subject to expiration. At September 30, 2016, we also had foreign tax credit and federal R&D tax credit carryforwards of \$7.0 million and \$4.9 million, respectively, which will expire between fiscal 2025 and fiscal 2035, and California and foreign R&D tax credits of \$16.5 million and \$1.0 million, respectively, which will be carried forward indefinitely.

Effective Tax Rate

Each period, the combination of multiple different factors can impact our effective tax rate. These factors include both recurring items such as tax rates and the relative amount of income earned in foreign jurisdictions, as well as discrete items that may occur in, but are not necessarily consistent between periods. The benefit associated with the foreign rate differential shown below is net of the impact of uncertain tax positions affecting the amount of income subject to foreign taxation. A reconciliation of the federal statutory tax rate to our effective tax rate on income from continuing operations was as follows:

	Fiscal Year Ended			
	September 30, 2016	September 25, 2015	September 26, 2014	
Federal statutory rate	35.0	% 35.0	%	35.0
State income taxes, net of federal effect	0.7	0.7		0.6
Stock-based compensation expense rate	1.5	1.7		1.4

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

Research and development tax credits	(5.2)	(3.0))	(1.6))
Tax exempt interest	(0.1)	(0.2))	(0.2))
U.S. manufacturing tax incentives	(1.1)	(0.3))	(2.0))
Foreign rate differential	(9.5)	(9.1))	(8.9))
Audit settlements	(2.3)	—		—	
Other	2.0	0.6		0.1	
Effective tax rate	21.0	% 25.4	%	24.4	%

Our effective tax rate decreased from 25.4% in fiscal 2015 to 21.0% in fiscal 2016. The decrease was primarily due to benefits from the settlement of a multi-year state audit and federal R&D tax credits that were retroactively reinstated in fiscal 2015.

Table of Contents

Our effective tax rate increased from 24.4% in fiscal 2014 to 25.4% in fiscal 2015. Our effective tax rate in fiscal 2015 reflects an increase from taxes associated with the sale of our ownership interest in a U.S.-based jointly-owned real estate entity whose primary asset was a building. This sale had a higher marginal tax rate than our entity-wide blended average. In addition, our effective tax rate in fiscal 2015 reflects a benefit from a higher proportion of our overall earnings being attributable to lower tax-rate jurisdictions, and was also increased as a result of reduced benefits from U.S. manufacturing tax incentive deductions. The overall increase in the rate was partially offset by a discrete benefit from federal R&D tax credits that were retroactively reinstated for the 2014 calendar year only.

Uncertain Tax Positions

As of September 30, 2016, the total amount of gross unrecognized tax benefits was \$75.2 million, of which \$62.1 million, if recognized, would reduce our effective tax rate. Our liability for unrecognized tax benefits is classified within other non-current liabilities in our consolidated balance sheets. Over the next twelve months, we estimate that this amount will be reduced by \$2.7 million and \$1.1 million as a result of the expiration of certain statute of limitations and the expected settlement of ongoing audits, respectively. Aggregate changes in the balance of gross unrecognized tax benefits, excluding interest and penalties, were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Beginning Balance	\$ 65,161	\$ 31,351	\$ 32,468
Gross increases			
- tax positions taken during prior years	4,343	507	333
Gross increases - tax positions taken during current year	26,585	34,293	2,916
Gross decreases			
- settlements with tax authorities during current year	(20,086)	—	—
Lapse of statute of limitations	(835)	(990)	(4,366)
Ending Balance	\$ 75,168	\$ 65,161	\$ 31,351

Classification of Interest and Penalties

We include interest and penalties related to gross unrecognized tax benefits within our provision for income taxes. To the extent accrued interest and penalties do not ultimately become payable, amounts accrued are reduced in the period that such determination is made and are reflected as a reduction of the overall income tax provision. In fiscal 2016, our current tax provision was increased by interest expense of \$0.4 million and reduced by penalties of \$0.5 million, while in fiscal 2015, our current tax provision was increased by interest expense of \$0.6 million and reduced by penalties of \$0.4 million. Accrued interest and penalties are included within the related tax liability line item in our consolidated balance sheets. Our accrued interest and penalties on unrecognized tax benefits as of September 30, 2016 and September 25, 2015 were as follows (in thousands):

	Fiscal Year Ended
	September 30, 2016
	September 25, 2015

	2016
Accrued interest	\$1,936\$ 2,977
Accrued penalties	53 589
Total	\$1,989\$ 3,566

We continue to monitor the progress of ongoing income tax controversies and the impact, if any, of the expected tolling of the statute of limitations in various taxing jurisdictions. We file income tax returns in the U.S. federal jurisdiction and in many state and foreign jurisdictions. The material income tax jurisdictions are the United States (Federal), California, New York and the Netherlands. Our tax filings remain subject to examination by applicable tax authorities for a certain length of time following the tax year to which those filings relate.

During fiscal 2016, we settled two multi-year examinations of our tax filings by taxing authorities, and as a result, recognized a total net tax benefit of \$5.5 million related to the settlement of these audits. During the first quarter of fiscal 2016, we settled the examination of our tax filings by the Internal Revenue Service (“IRS”) for the 2011 and 2012 fiscal years, and during the second quarter of fiscal 2016 settled the examination of our tax filings with the State of California for the 2007 and 2008 fiscal years.

We are currently under audit by the State of California for the 2009 through 2011 fiscal years and by the State of New York for the 2012 through 2013 fiscal years. In other major states and major foreign jurisdictions, the fiscal years subsequent to 2012 and 2009, respectively, remain open and could be subject to examination by the taxing authorities.

Table of Contents

Management does not believe that the outcome of any ongoing examination will have a material impact on our consolidated financial statements. We believe that an adequate provision has been made for any adjustments that may result from tax examinations. However, the outcome of tax audits cannot be predicted with certainty. If resolution of any tax issues addressed in our current audits are done in a manner inconsistent with management's expectations, we could be required to adjust our tax provision for income taxes in the period such resolution occurs.

11. Restructuring

Restructuring charges recorded in our statements of operations represent costs associated with separate individual restructuring plans implemented in various fiscal periods. Accruals for restructuring charges are included within accrued liabilities in our consolidated balance sheets while restructuring charges are included within restructuring charges in our consolidated statements of operations.

Fiscal 2016 Restructuring Plan. In January 2016, we implemented a plan to reorganize and consolidate certain activities and positions within our global business infrastructure. As a result, we recorded \$1.3 million in restructuring costs during fiscal 2016, representing severance and other related benefits offered to approximately 30 employees that were affected by this action. The table presented below summarizes changes in restructuring accruals under this plan, and reflects the completion of activity during the second quarter of fiscal 2016 (in thousands):

	Severance and associated costs
Restructuring charges	\$ 1,294
Cash payments	(1,233)
Non-cash and other adjustments	(61)
Balance at September 30, 2016	\$ —

Fiscal 2014 Restructuring Plan. In October 2013, we implemented a plan to reorganize and consolidate certain activities and positions within our global business infrastructure. As a result, we recorded \$3.3 million in restructuring costs during fiscal 2014, representing severance and other related benefits offered to approximately 50 employees that were affected as a result of this action. The table presented below summarizes changes in restructuring accruals under this plan, and reflects the completion of activity during the first quarter of fiscal 2015 (in thousands):

	Severance and associated costs
Restructuring charges	\$ 3,301
Cash payments	(3,164)
Non-cash and other adjustments	9
Balance at September 26, 2014	\$ 146
Restructuring (credits)	(39)
Cash payments	(10)
Non-cash and other adjustments	(97)
Balance at September 25, 2015	\$ —

During fiscal 2014, we recognized a \$0.7 million credit representing the release of a facility exit obligation accrued under this plan following the sale of certain property located in Wootton Bassett, U.K.

12. Commitments & Contingencies

In the ordinary course of business, we enter into contractual agreements with third parties that include non-cancelable payment obligations, for which we are liable in future periods. These arrangements can include terms binding us to minimum payments and/or penalties if we terminate the agreement for any reason other than an event of default as

Edgar Filing: Dolby Laboratories, Inc. - Form 10-K

described by the agreement. The following table presents a summary of our contractual obligations and commitments as of September 30, 2016 (in thousands):

	Payments Due By Fiscal Period						Total
	Fiscal 2017	Fiscal 2018	Fiscal 2019	Fiscal 2020	Fiscal 2021	Thereafter	
Naming rights	\$7,619	\$7,715	\$7,811	\$7,909	\$8,008	\$94,972	\$134,034
Donation commitments	320	6,300	322	322	122	1,013	8,399
Operating leases	13,261	10,653	8,186	7,521	6,401	24,282	70,304
Purchase obligations	6,936	2,615	1,199	—	—	—	10,750
Total	\$28,136	\$27,283	\$17,518	\$15,752	\$14,531	\$120,267	\$223,487

73

Table of Contents

Naming Rights. In fiscal 2012, we entered into an agreement for naming rights and related benefits with respect to the Dolby Theatre in Hollywood, California, the location of the Academy Awards. The term of the agreement is 20 years, over which we will make payments on a semi-annual basis. Our payment obligations are conditioned in part on the Academy Awards being held and broadcast from the Dolby Theatre.

Donation Commitments. During fiscal 2014, we entered into a non-cancelable obligation to donate and install imaging and audio products to the Museum of the Academy of Motion Picture Arts and Sciences in Los Angeles, California, and provide maintenance services for fifteen years from its expected opening date in fiscal 2018.

Operating Leases. Operating lease payments represent our commitments for future minimum rent made under non-cancellable leases for office space, including those payable to our principal stockholder and portions attributable to the controlling interests in our wholly owned subsidiaries. The following table summarizes information about our total rental expenses under operating leases, including the portion of this total rent expense which is payable to our principal stockholder (in thousands):

	Fiscal Year Ended	
	September 30, 2015	September 26, 2014
Total rent expense	\$ 13,288	\$ 15,349
		\$ 14,278

Total rent expense \$ 13,288 \$ 15,349 \$ 14,278

Purchase Obligations. Purchase obligations primarily consist of our commitments made under agreements to purchase goods and services for purposes that include IT and telecommunications, marketing and professional services, and manufacturing and other R&D activities.

Indemnification Clauses. On a limited basis, our contractual agreements will contain a clause under which we have agreed to provide indemnification to the counterparty, most commonly to licensees in connection with licensing arrangements that include our IP. We have also entered into indemnification agreements with our officers, directors, and certain employees, and our certificate of incorporation and bylaws contain similar indemnification obligations. Additionally, and although not a contractual requirement, we have at times elected to defend our licensees from third party IP infringement claims. Since the terms and conditions of our contractual indemnification clauses do not explicitly specify our obligations, we are unable to reasonably estimate the maximum potential exposure for which we could be liable. Furthermore, we have not historically made any payments in connection with any such obligation and believe there to be a remote likelihood that any potential exposure in future periods would be of a material amount. As a result, no amounts have been accrued in our consolidated financial statements with respect to the contingent aspect of these indemnities.

13. Business Combinations

Doremi Technologies

On October 31, 2014 ("acquisition date"), we completed our acquisition of all outstanding interests of Doremi Technologies, LLC ("Doremi"), a privately held company, and certain assets related to the business of Doremi from Doremi Labs, Inc. and Highlands Technologies SAS (the "Doremi-related assets") for cash consideration of \$98.4 million and up to an additional \$20.0 million in contingent consideration that may be earned over a four-year period following the closing of the acquisition. Upon acquisition, the fair value of the contingent consideration liability was estimated to be \$0.7 million, and based on revisions to initial estimates, the fair value of this liability was remeasured to \$0.1 million as of September 25, 2015 and to zero as of September 30, 2016.

The following table summarizes the purchase price allocation made to the net tangible and intangible assets acquired (including cash of \$8.4 million), and liabilities assumed based on their acquisition date fair values, with the excess amount recorded as goodwill, which is representative of the expected benefits from the integration of Doremi's technologies and assembled workforce (in thousands):

Table of Contents

Purchase Price Allocation

Current assets	\$17,231
Inventories	16,372
Intangible assets	45,600
Goodwill	39,672
Current liabilities	(11,653)
Non-current liabilities	(8,820)
Cash consideration paid to sellers	98,402
Add: contingent consideration	740
Total purchase consideration	\$99,142

The following table summarizes the fair values allocated to the various intangible assets acquired (in thousands), the weighted-average useful lives over which they will be amortized using the straight-line method, and the classification of their amortized expense in our consolidated statements of operations. The value of these acquired intangibles was determined based on the present value of estimated future cash flows under various valuation techniques and inputs.

Intangible Assets Acquired	Purchase Price Allocation	Weighted-Average Useful Life (Years)	Income Statement Classification: Amortization Expense
Customer relationships	\$ 25,600	10	Sales & Marketing
Developed technology	17,500	7.5	Cost of Sales
Trade name	1,300	1	Sales & Marketing
Backlog	1,200	1	Cost of Sales
Total	\$ 45,600		

Total acquisition-related costs incurred in connection with the transaction were \$0.4 million and \$5.9 million during fiscal 2015 and 2014, respectively. These costs were included in G&A expenses in our consolidated statements of operations. Pro forma financial information has not been presented for any period since the impact of the Doremi acquisition was not material.

14. Operating Segments & Geographic Information

Operating Segments

Operating segments are defined as components of an enterprise for which separate financial information is available, and which are evaluated regularly by the chief operating decision maker, or decision-making group, in deciding how to allocate resources and assess performance. Our CODM is our Chief Executive Officer. Reporting segments are operating segments exceeding specified revenue, profit or loss, or asset thresholds for which separate disclosure of information is necessary.

We operate as a single reporting segment. This reflects the fact that our CODM evaluates the Company's financial information and resources, and assesses the performance of these resources on a consolidated basis. Since the Company operates as one reporting segment, all required financial segment information is included in our consolidated financial statements. Subsequent to September 30, 2016, we reorganized certain aspects of our internal business infrastructure primarily to integrate and align sales support more directly with our business units. During the first quarter of fiscal 2017, we will determine whether this results in any change to the composition of reporting segments.

Geographic Information

The method to determine revenue by geographic region for each of the three categories included within total revenue in our consolidated statements of operations are described within the table presented below.

Revenue Category Basis For Determining Geographic Location

Licensing	Region in which our licensees' headquarters are located
Products	Destination to which our products are shipped

Services Location in which the relevant services are performed

75

Table of Contents

The following tables present selected information regarding total revenue by geographic location (amounts presented in thousands).

Revenue Composition - Domestic & Foreign

Location	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
United States	\$320,129	\$ 276,733	\$ 316,256
International	705,609	693,905	643,920
Total revenue	\$ 1,025,738	\$ 970,638	\$ 960,176

Revenue Concentration - Significant Individual Geographic Regions

Location	Fiscal Year Ended				
	September 30, 2016	September 25, 2015	September 26, 2014		
United States	31 %	29 %	33 %		
South Korea	17 %	21 %	20 %		
China	14 %	7 %	12 %		
Europe	14 %	13 %	12 %		
Japan	12 %	13 %	13 %		
Taiwan	4 %	10 %	3 %		
Other	8 %	7 %	7 %		
Total	100 %	100 %	100 %		

Long-lived tangible assets, net of accumulated depreciation, by geographic region were as follows (in thousands):

Location	September	
	30, 2016	September 25, 2015
United States	\$ 412,447	\$ 374,203
International	31,209	28,888
Total long-lived tangible assets, net of accumulated depreciation	\$ 443,656	\$ 403,091

15. Legal Matters

We are involved in various legal proceedings that occasionally arise in the normal course of business. These can include claims of alleged infringement of IP rights, commercial, employment and other matters. In our opinion, resolution of these proceedings is not expected to have a material adverse impact on our operating results or financial condition. Given the unpredictable nature of legal proceedings, it is possible that an unfavorable resolution of one or more such proceedings could materially affect our future operating results or financial condition in a particular period, including as a result of required changes to our licensing terms, monetary penalties and other potential consequences. However, based on the information known by us as of the date of this filing and the rules and regulations applicable to the preparation of our consolidated financial statements, any such amounts are either immaterial, or it is not possible to provide an estimated amount of any such potential losses.

16. Related Parties

We maintain contractual agreements relating to certain entities affiliated with the Dolby family, who is considered a related party as our principal stockholder. These jointly-owned entities were established for the purpose of acquiring and leasing commercial property in the U.S. and U.K. primarily for our operational use. Although the entities affiliated with the Dolby family are the limited member or LP in each of these entities, they have a controlling interest based on holding majority economic ownership. We are the managing member or general partner in each of these

affiliated entities, and with the exception of isolated instances where portions of these facilities are leased to third parties, we occupy the majority of the space. Therefore, since these affiliated entities are an integrated part of our operations, we have consolidated the entities' assets and liabilities and results of operations in our consolidated financial statements. The share of earnings and net assets of the entities attributable to the limited member or LP, as the case may be, is reflected as controlling interest in our consolidated financial statements.

Table of Contents

Our interests in these consolidated affiliated entities and the location of the property leased to Dolby Laboratories as of September 30, 2016 were as follows:

Entity Name	Minority Ownership Interest	Location Of Properties
Dolby Properties Brisbane, LLC	49.0 %	Brisbane, California
Dolby Properties Burbank, LLC	49.0 %	Burbank, California
Dolby Properties UK, LLC	49.0 %	Wootton Bassett, England
Dolby Properties, LP	10.0 %	Wootton Bassett, England

Jointly-Owned Real Estate Entities. We lease from our principal stockholder a commercial office building located at 100 Potrero Avenue in San Francisco, California under a term that expires on October 31, 2024, and we lease additional facilities located in California and the U.K. from the jointly-owned real estate entities described above. Related party rent expense included in operating expenses in our consolidated statements of operations were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Related party rent expense included in operating expenses	\$3,097	\$ 3,136	\$ 2,125

Distributions. Distributions made by the jointly-owned real estate entities to our principal stockholder were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Distributions to principal stockholder	\$214	\$ 5,615	\$ —

Related Party Transaction: Sale of interests in Affiliated Entity. During fiscal 2015, we entered into an Agreement with entities affiliated with the Dolby family to sell our 37.5% ownership interest in Dolby Properties, LLC, a jointly-owned real estate entity. As a result of this related party transaction, we no longer have a continuing involvement with, nor retain the rights previously held to control the operations of this entity, and it was therefore deconsolidated from our consolidated financial statements for the fiscal year ended September 25, 2015.

Upon deconsolidation, we recognized a pre-tax gain on sale of \$26.2 million, which is included within other income/(expense), net in our consolidated statements of operations. As shown within the table presented below, the gain on sale was measured as the cash consideration received in exchange for our interests of \$31.3 million, less the net book value of Dolby Properties, LLC as of the August 5, 2015 transaction date (in thousands). Dolby Properties, LLC was established for operating the commercial office building and approximate 122,000 square feet of space located at 999 Brannan Street in San Francisco, California, and its primary assets represented the land, building and capital improvements made to the property. Determination of the fair value of the interests sold was based upon an independent appraisal completed by real estate valuation experts.

Deconsolidation of Subsidiary

Cash consideration received (1)	\$31,263
Less: net book value of Dolby, Properties, LLC	(5,042)
Gain on sale (pre-tax)	\$26,221

Net cash proceeds from the sale of \$27.2 million as disclosed within our consolidated statements of cash flows is (1) derived by deducting cash balances of \$4.1 million held by the Subsidiary and acquired by the Purchaser from gross cash consideration received of \$31.3 million.

The arrangements and nature of our involvement in the four other real estate entities jointly-owned with Dolby family-affiliated entities were unaffected by this transaction.

17. Retirement Plans

We maintain a tax-qualified Section 401(k) retirement plan for employees in the United States and similar plans in foreign jurisdictions. Under the plan, employees are eligible to receive matching contributions and profit-sharing contributions.

77

Table of Contents

We also maintain a SERP, a non-qualified, employer-funded retirement plan for certain senior executives employed in the United States. The plan was adopted in October 2004 prior to our IPO and was terminated in fiscal 2005. We have not made any contributions to the SERP since fiscal 2006. The purpose of the plan was to provide these executives with the opportunity to receive retirement income benefits in addition to the benefits generally available to all employees. The benefits provided to participants were based on defined contributions that we made to the plan and the gains and losses on the investment of those contributions. At September 30, 2016, the balance in the SERP account represents amounts contributed prior to the plan's termination, with the underlying plan investments consisting primarily of mutual fund investments. SERP assets are included within prepaid expenses and other current assets and within other non-current assets, while SERP liabilities are included within accrued liabilities and within other non-current liabilities in our consolidated balance sheets.

Retirement plan expenses, which are included in cost of products, cost of services, R&D, S&M and G&A expense in our consolidated statements of operations, were as follows (in thousands):

	Fiscal Year Ended		
	September 30, 2016	September 25, 2015	September 26, 2014
Retirement plan expenses	\$20,471	\$ 19,431	\$ 17,369

18. Selected Quarterly Financial Data

The following table presents selected unaudited quarterly financial information from fiscal 2016 and 2015 (in thousands, except per share amounts):

	Fiscal Year 2016				Fiscal Year 2015			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
Revenue:								
Licensing	\$211,129	\$249,336	\$253,026	\$203,541	\$216,598	\$243,333	\$204,855	\$203,325
Products	24,809	20,063	20,638	25,033	13,263	22,985	22,596	25,060
Services	4,876	4,941	3,923	4,423	4,377	5,632	4,251	4,363
Total revenue	240,814	274,340	277,587	232,997	234,238	271,950	231,702	232,748
Cost of revenue	29,766	24,373	24,621	30,222	19,410	25,149	24,880	25,377
Gross margin	211,048	249,967	252,966	202,775	214,828	246,801	206,822	207,371
Income before taxes and controlling interest	39,484	83,823	81,784	30,813	54,316	79,885	47,378	64,203
Net income attributable to Dolby Laboratories	\$30,901	\$67,398	\$63,628	\$23,933	\$41,357	\$57,974	\$35,506	\$46,553
Earnings per share:								
Basic	\$0.31	\$0.67	\$0.63	\$0.24	\$0.40	\$0.57	\$0.35	\$0.46
Diluted	\$0.30	\$0.66	\$0.62	\$0.23	\$0.40	\$0.56	\$0.34	\$0.45
Weighted-average shares outstanding:

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain “disclosure controls and procedures,” as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (“Exchange Act”), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Subject to the limitations noted above, our management, with the participation of our CEO and CFO, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the fiscal year covered by this Annual Report on Form 10-K. Based on that evaluation, the CEO and CFO have concluded that, as of such date, our disclosure controls and procedures were effective to meet the objective for which they were designed and operate at the reasonable assurance level.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company as defined in Rule 13a-15(f) or 15d-15(f) of the Exchange Act. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, and includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of the Company’s internal control over financial reporting as of September 30, 2016 using the criteria established in Internal Control - Integrated Framework (2013) issued by the COSO. Based on this assessment and those criteria, management concluded that our internal control over financial reporting was effective as of September 30, 2016. Our internal control over financial reporting has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report, which appears in Part II, Item 8 of this Form 10-K.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the fiscal quarter ended September 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

79

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this item concerning our directors, compliance with Section 16 of the Securities Exchange Act of 1934, as amended (“Exchange Act”), our code of business conduct and ethics, our Compensation Committee, Nominating and Governance Committee and Audit Committee is incorporated by reference from the information set forth in the sections under the headings “Election of Directors,” “Section 16(a) Beneficial Ownership Reporting Compliance” and “Corporate Governance Matters” in our Definitive Proxy Statement to be filed with the Securities and Exchange Commission in connection with the Annual Meeting of Stockholders to be held in 2017 (“2017 Proxy Statement”).

Executive Officers of the Registrant

Our executive officers serve at the discretion of the Board of Directors. The names of our executive officers and their ages, titles, and biographies as of October 28, 2016 are set forth below:

Executive Officers Age Position(s)

Kevin Yeaman	50	President and Chief Executive Officer
Lewis Chew	53	Executive Vice President and Chief Financial Officer
Andy Sherman	49	Executive Vice President, General Counsel and Corporate Secretary
Robert Borchers	51	Senior Vice President, Chief Marketing Officer
Steven Forshay	62	Senior Vice President, Advanced Technology Group

Kevin Yeaman joined us as Chief Financial Officer and Vice President in October 2005 and became our President and CEO in March 2009. Prior to joining us, Mr. Yeaman worked for seven years at E.piphany, Inc., a publicly traded enterprise software company, most recently as Chief Financial Officer from August 1999 to October 2005. Previously, Mr. Yeaman served as Worldwide Vice President of Field Finance Operations for Informix Software, Inc., a provider of relational database software, from February 1998 to August 1998. From September 1988 to February 1998, Mr. Yeaman served in Silicon Valley and London in various positions at KPMG LLP, an accounting firm, serving most recently as a senior manager. Mr. Yeaman holds a B.S. degree in commerce from Santa Clara University.

Lewis Chew joined us as Executive Vice President and Chief Financial Officer in June 2012. Mr. Chew leads the worldwide finance organization and is responsible for the financial and infrastructure support for our business, which includes all finance functions, information technology, real estate and facilities, manufacturing, supply chain and investor relations. Mr. Chew comes to us with decades of financial and strategic business management experience. Mr. Chew is the former Senior Vice President of Finance and Chief Financial Officer of National Semiconductor Corporation, a manufacturer of electronic components, where he was responsible for all finance functions as well as information systems and investor relations. Prior to joining National Semiconductor, Mr. Chew was a partner at KPMG LLP, an accounting firm, serving numerous technology and financial institution clients. Mr. Chew serves as a member of the Board of Directors at PG&E Corporation, an energy-based holding company. Mr. Chew holds a B.S. degree in accounting from Santa Clara University.

Andy Sherman joined us as Executive Vice President, General Counsel and Corporate Secretary in January 2011. Mr. Sherman oversees Dolby’s patent licensing businesses and government relations, and Dolby’s worldwide legal affairs, including all corporate, regulatory, IP, litigation, and licensing activities. Prior to joining us, from June 2008 to January 2011, Mr. Sherman served as Senior Vice President and General Counsel at CBS Interactive, an online content network, where he led the legal group advising CBS’s online entertainment, mobile, technology, sports, news, games, lifestyle and international business units. Mr. Sherman joined CBS Interactive following CBS’s acquisition of CNET Networks, an online content network, where from June 2007 to June 2008 he was Senior Vice President, General Counsel and Secretary. Before CNET, Mr. Sherman served as Vice President, Legal at Sybase, an enterprise software and services company, from November 2006 to May 2007, following Sybase’s acquisition of Mobile 365, where he was Vice President, General Counsel and Secretary. Prior to joining Mobile 365, he held senior legal positions with global responsibility at a variety of public technology companies including PeopleSoft and E.piphany.

Earlier in his career, Mr. Sherman worked in private practice with Gray Cary Ware & Freidenrich (now DLA Piper), focusing on the representation of emerging technology companies. Mr. Sherman holds a J.D. from the University of the Pacific, as well as a B.S. degree in business administration from the University of Southern California.

Table of Contents

Robert Borchers joined us as Senior Vice President, Chief Marketing Officer in January 2014. Mr. Borchers has more than 20 years of experience bringing products and services to consumers. Prior to joining us, from June 2009 to January 2014, Mr. Borchers served as general partner at Opus Capital, a venture capital firm, making early stage investments in mobile software and service platforms. From August 2004 to June 2009, Mr. Borchers worked for Apple Inc., most recently as Senior Director Worldwide Product Marketing. As part of the original iPhone® team at Apple, Mr. Borchers was instrumental in the development, launch, and global expansion of the iPhone, iOS, and App Store™. From May 2003 to August 2004, Mr. Borchers worked at FusionOne, Inc., a provider of synchronization products and solutions for mobile devices, as its Vice President of Marketing. Prior to FusionOne, he spent six years at Nokia Corporation, where he cofounded and served as Vice President of Sales and Marketing for the Vertu business unit, a luxury mobile phone brand. Mr. Borchers holds a B.S. degree in mechanical engineering from Stanford University and an S.M. degree in mechanical engineering from the Massachusetts Institute of Technology. Mr. Borchers serves on the board of directors of Bank of the West.

Steven Forshay joined us in July 1982 and has served since in a variety of positions advancing our technologies, including Senior Vice President, Research; Senior Vice President of Research for Image and Sound; Senior Vice President, Sound Technology R&D; and since January 2015, Senior Vice President, Advanced Technology Group. Mr. Forshay is a member of the Audio Engineering Society, the Institute of Electrical and Electronics Engineers, and the Society of Motion Picture and Television Engineers. Mr. Forshay holds a B.S.E.E. degree in electrical engineering from the New Jersey Institute of Technology and a M.B.A. from Saint Mary's College of California.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item concerning executive compensation is incorporated by reference from the information in the 2017 Proxy Statement under the headings “Compensation Discussion and Analysis,” “Report of the Compensation Committee of the Board of Directors,” “Executive Compensation Tables and Related Matters,” “Compensation of Directors” and “Corporate Governance Matters-Compensation Committee Interlocks and Insider Participation.”

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item concerning securities authorized for issuance under equity compensation plans and security ownership of certain beneficial owners and management is incorporated by reference from the information in the 2017 Proxy Statement under the headings “Executive Compensation Tables and Related Matters—Equity Compensation Plan Information” and “Security Ownership of Certain Beneficial Owners and Management.”

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item concerning transactions with related persons and director independence is incorporated by reference from the information in the 2017 Proxy Statement under the headings “Certain Relationships and Related Transactions” and “Corporate Governance Matters.”

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this item is incorporated by reference from the information in the 2017 Proxy Statement under the heading “Ratification of Independent Registered Public Accounting Firm.”
