

IRWIN FINANCIAL CORPORATION
Form 10-Q
November 14, 2002

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended **September 30, 2002**

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-6835

IRWIN FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

INDIANA

(State or other jurisdiction of Incorporation or organization)

35-1286807

(IRS Employer Identification No.)

500 Washington Street, Columbus, IN 47201

(Address or principal executive offices)

(Zip Code)

(812) 376-1909

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year if changed since last report)

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

As of November 6, 2002, there were outstanding 27,760,052 common shares, no par value, of the Registrant.

<i>The accompanying notes are an integral part of the consolidated financial statements.</i>		

NOTES TO THE FINANCIAL STATEMENTS (Unaudited)

NOTE 1 -- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation: Irwin Financial Corporation and its subsidiaries provide financial services throughout the United States and Canada. We are engaged in the mortgage banking, commercial banking, home equity lending, commercial finance, and venture capital lines of business. Intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Derivative Instruments: Effective January 1, 2001, we adopted the provisions of Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended. The adoption of SFAS 133 resulted in a cumulative change in accounting principle, increasing net income by \$175 thousand in 2001. Under the provisions of this standard, all derivative instruments have

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

been recorded at fair value as assets or liabilities in the December 31, 2001 consolidated balance sheet. Unrealized holding gains and losses from all derivative instruments classified as fair value hedges or freestanding derivative instruments have been recorded in the consolidated statement of income. Unrealized gains and losses from derivative instruments classified as cash flow hedges have been recorded in accumulated other comprehensive income in the equity section of the balance sheet.

We utilize certain derivative instruments that do not qualify for hedge accounting treatment under SFAS 133. These derivatives are included in other assets and marked to market on the consolidated statement of income as other income or other expense. While we do not seek GAAP hedge accounting treatment for most of these instruments, their economic purpose is to hedge existing exposures to either interest rate risk or foreign currency risk.

We enter into forward contracts to protect against interest rate fluctuations from the date of conforming first mortgage loan commitment until the loans are sold. At December 31, 2001, we designated the portion of these transactions hedging the closed mortgage loans as hedges that qualify for hedge accounting treatment under SFAS 133. The basis of the hedged closed loans is adjusted for changes in value associated with the risk being hedged. The effect of these hedging activities, which do not have a material impact on our net income, was recorded through earnings as gain from sales of loans. Hedge ineffectiveness recorded in gain from sales of loans related to these hedging activities was immaterial.

Additionally, we enter into commitments to originate loans for which the interest rate is determined prior to funding (rate lock commitments). Rate lock commitments on first mortgage loans intended to be sold are considered to be derivatives. At the time of interest rate lock commitment, no gain or loss is recognized. Any subsequent changes in fair value are recorded in earnings. These derivatives are recorded on the balance sheet at fair value at period end.

We hedge the fixed versus floating component of certain of our residual interests with three interest rate caps. We classify interest rate caps as other assets on the balance sheet and carry them at their fair values. Two of the interest rate caps qualify for hedge accounting treatment under SFAS 133. As a result, adjustments to fair value for these derivatives are recorded through accumulated other comprehensive income. We record adjustments to fair value for the third interest rate cap as other income on the income statement.

Recent Accounting Developments: In September 2000, the FASB issued SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities." SFAS 140, which replaces SFAS 125, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," provides accounting and reporting standards for securitizations and other transfers of assets. SFAS 140 is based on the application of a financial components approach that focuses on control, and provides consistent standards for distinguishing between transfers of financial assets that are sales and transfers that are secured borrowings. The Standard requires disclosure of information about securitized assets, including the principal outstanding of securitized and other managed assets, accounting policies, key assumptions related to the determination of the fair value of residual interests, delinquencies and credit losses. The accounting requirements of SFAS 140 were effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after March 31, 2001. Adoption of this statement did not have a material impact on our financial position or results of operations.

On June 29, 2001 the FASB approved SFAS No. 141, "Business Combinations," and No. 142 "Goodwill and Other Intangible Assets." SFAS 141 eliminated the pooling-of-interests method of accounting - requiring that purchase accounting, with its recognition of intangible assets separately from goodwill, be applied to all business combinations initiated after June 30, 2001.

Under the provisions of SFAS 142, goodwill is no longer amortized against earnings. Instead, goodwill and intangible assets deemed to have an indefinite life are reviewed for impairment at least annually. The amortization period of intangible assets with finite lives is no longer limited to forty years. This standard became effective January 1, 2002. We discontinued the amortization of goodwill with a net carrying value of \$1.8 million on the date of adoption and annual amortization of \$0.2 million that resulted from business combinations prior to the adoption of SFAS 141. In addition, as required by the standard, we wrote off, as a cumulative effect of a change in accounting principle, unamortized negative goodwill totaling \$0.5 million net of tax at the date of adoption arising from a prior business combination at our commercial finance line of business.

The FASB has also issued SFAS No. 143, "Accounting for Asset Retirement Obligations," and SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS 143 addresses accounting for the retirement of tangible long-lived assets and the associated asset retirement costs. The effective date is for fiscal years beginning after June 15, 2002. SFAS 144, effective for fiscal years beginning after December 15, 2001, supersedes FASB No. 121 "Accounting for the Impairment of Long-Lived Assets to Be Disposed Of" and APB Opinion No. 30, "Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions," for the disposal of a segment of a business. Management does not believe the implementation of SFAS 143 or SFAS 144 will have a material effect on our earnings or financial condition.

In June 2002, the FASB issued SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities." This statement improves financial reporting by requiring that a liability for a cost associated with an exit or disposal activity be recognized and measured initially at fair value only when the liability is incurred rather than at the date of an entity's commitment to an exit plan. The provisions of this Statement are effective for exit or disposal activities that are initiated after December 31, 2002. Management does not believe the implementation of SFAS 146 will have a material effect on our earnings or financial position.

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

The FASB issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical corrections" and SFAS No. 147, "Acquisition of Certain Financial Institutions." These Statements rescind the Statements concerning gains and losses from extinguishment of debt and accounting for intangible assets of motor carriers. They also amend the rules for sale-leaseback accounting, require the acquisitions of financial institutions to be accounted for in accordance with business combinations and goodwill and other intangible assets, and make various technical corrections to existing pronouncements. Management believes these Statements will have no impact on our earnings or financial position.

Reclassifications: Certain amounts in the 2001 consolidated financial statements have been reclassified to conform to the 2002 presentation. These changes had no impact on previously reported net income or shareholders' equity.

NOTE 2 - INVESTMENT SECURITIES			
The carrying amounts of investment securities, including a net unrealized gain of \$12 thousand and a net unrealized loss of \$124 thousand on available-for-sale securities at September 30, 2002 and December 31, 2001, respectively, are summarized as follows:			
	September 30,	December 31,	
<i>(In thousands)</i>	2002	2001	
Held-to-maturity, at amortized cost			
Obligations of states and political subdivisions	\$ 4,255	\$ 4,425	
Mortgage-backed securities	1,087	1,507	
Corporate obligations	133	133	
Total held-to-maturity	5,475	6,065	
Available-for-sale, at fair value			
US Treasury and Government obligations	35,843	29,329	
Mortgage-backed securities	1,022	2,717	
Other	-	685	
Total available-for-sale	36,865	32,731	
Total investments	\$ 42,340	\$ 38,796	
Securities that we have a positive intent and ability to hold until maturity are classified as "held-to-maturity" and are stated at cost adjusted for amortization of premium and accretion of discount. Securities that might be sold prior to maturity are classified as "available-for-sale" and are stated at fair value. Unrealized gains and losses on available-for-sale securities, net of the future tax impact, are reported as a separate component of shareholders' equity until realized.			
NOTE 3 - LOANS AND LEASES			
Loans and leases are summarized as follows:			
	September 30,	December 31,	
<i>(In thousands)</i>	2002	2001	
Commercial, financial and agricultural	\$ 1,390,417	\$ 1,055,307	
Real estate-construction	233,327	287,228	
Real estate-mortgage	378,907	490,111	
Real estate-mortgage securitized	418,597	-	
Consumer	37,540	38,489	
Direct financing leases			
Domestic	265,851	232,527	
Canadian	122,969	91,816	
Unearned income			
Domestic	(51,369)	(44,183)	
Canadian	(18,103)	(13,548)	
Total loans and leases, net of unearned income	\$ 2,778,136	\$ 2,137,747	

NOTE 4 - ALLOWANCE FOR LOAN AND LEASE LOSSES

Changes in the allowance for loan and lease losses are summarized as follows:

	September 30,	December 31,		
<i>(In thousands)</i>	2002	2001		
Balance at beginning of period	\$ 22,283	\$ 13,129		
Provision for loan and lease losses	35,409	17,505		
Charge-offs *	(12,493)	(10,441)		
Recoveries	2,089	2,236		
Other	11	(146)		
Balance at end of period	\$ 47,299	\$ 22,283		

* In addition, not included in the caption were charge-offs of \$4.0 million and \$2.3 million at September 30, 2002 and December 31, 2001, respectively, that were charged directly to a valuation allowance at our home equity line of business. This valuation allowance and related expense was recorded when approximately \$38 million of loans held for sale were transferred at market value to loans held for investment in late 2001.

NOTE 5- SERVICING ASSETS

Included on the consolidated balance sheet at September 30, 2002 and December 31, 2001 are \$155.8 million and \$228.6 million, respectively, of servicing assets. The servicing asset recorded represents the discounted cash flows of estimated future servicing income and cost. These amounts relate to the principal balances of loans that we service for investors. Although they are not generally held for sale, there is an active secondary market for servicing assets. We have periodically sold servicing assets.

Mortgage Servicing Asset:

	September 30,	December 31,		
<i>(In thousands)</i>	2002	2001		
Beginning Balance	\$ 228,624	\$ 130,522		
Additions	112,604	151,821		
Amortization	(43,958)	(7,607)		
Impairment	(125,959)	(42,527)		
Reduction for servicing sales	(15,559)	(3,585)		
Total	\$ 155,752	\$ 228,624		

NOTE 6- SHORT-TERM BORROWINGS

Short-term borrowings are summarized as follows:

	September 30,	December 31,		
<i>(In thousands)</i>	2002	2001		
Federal Home Loan Bank borrowings	\$ 212,000	\$ 212,000		
Repurchase agreements and drafts payable related to mortgage loan closings	258,911	154,157		
Lines of credit and other	18,184	75,483		
Federal funds	15,000	35,200		
Commercial paper	15,863	11,123		
Total	\$ 519,958	\$ 487,963		

There were no non-intercompany repurchase agreements at September 30, 2002. Repurchase agreements at December 31, 2001, include \$0.1 million in mortgage loans sold under agreements to repurchase which are used to fund mortgage loans sold prior to sale in the secondary market. These repurchase agreements are collateralized by mortgage loans held for sale.

Drafts payable related to mortgage loan closings totaled \$258.9 million and \$154.0 million at September 30, 2002 and December 31, 2001, respectively. These borrowings are related to mortgage closings at the end of the period which have not been presented for payment. When presented for payment these borrowings will be funded internally or by borrowing from the lines of credit.

We have lines of credit available to fund loan originations and operations. Interest on the lines of credit is payable monthly or quarterly with rates ranging from 2.0% to 3.5% .

NOTE 7- LONG-TERM DEBT

Long-term debt is summarized as follows:

			September 30,	December 31,
<i>(In thousands)</i>	Maturity	Interest rate	2002	2001
Subordinated debt	7/7/2014	7.58%	\$ 30,000	\$ 30,000
2002-1 asset backed notes:				
Variable rate senior note	7/25/2023	2.08	120,811	-
Variable rate senior note	6/25/2029	2.10	220,627	-
Variable rate subordinate note	2/25/2029	2.71	24,964	-
Variable rate subordinate note	2/25/2029	3.31	21,063	-
Variable rate subordinate note	2/25/2029	4.06	26,524	-
Unamortized premium/discount			6,317	-
Total			\$ 450,306	\$ 30,000

Beginning in the second quarter of 2002, we changed the structure of our securitizations resulting in the elimination of transactions accounted for as sales under generally accepted accounting principles. Securitization of loans since this time have been structured as secured financings. This type of securitization structure results in cash being received and debt being recorded. In connection with these transactions, the 2002-1 notes are collateralized by \$0.4 billion in home equity loans and home equity lines of credit.

NOTE 8 -- CONTINGENCIES

Our subsidiary, Irwin Mortgage Corporation, is the defendant in a class action lawsuit in the United States District Court for the Northern District of Alabama alleging that Irwin Mortgage violated the federal Real Estate Settlement Procedures Act (RESPA) relating to Irwin Mortgage's payment of broker fees to mortgage brokers. A second suit was filed in September 2001 seeking consolidation with this case. In July, 2001, the plaintiffs filed a motion for partial summary judgment asking the court to find Irwin Mortgage summarily liable for violating RESPA. Irwin Mortgage filed a motion in opposition and these motions have been pending before the district court.

In November, 2001, by order of the district court, the parties filed supplemental briefs analyzing the impact of a new HUD policy statement that explicitly disagrees with the judicial interpretation of RESPA by the Court of Appeals for the 11th Circuit in its ruling upholding class certification in this case. Irwin Mortgage filed a petition for certiorari with the United States Supreme Court seeking review of the 11th Circuit's class certification ruling and also filed a motion in the district court seeking a stay of further proceedings until the 11th Circuit renders decisions in the three other RESPA cases pending before it. The Supreme Court denied Irwin Mortgage's petition. On March 8, 2002, the district court granted Irwin Mortgage's motion to stay proceedings in this case until the 11th Circuit decides the other RESPA cases pending in that court. On September, 18, 2002, the 11th Circuit reversed the grant of class certification in one of these cases. We believe the reversal provides grounds to decertify the class in our case. However, the stay in the proceedings continues in effect in our case, and the district court has not yet taken action. The second case seeking consolidation has been stayed as well.

If the class is not decertified and the district court finds that Irwin Mortgage violated RESPA, Irwin Mortgage could be liable for damages equal to three times the amount of that portion of payments made to the mortgage brokers that is ruled unlawful. Based on notices sent by the plaintiffs to date to potential class members and additional notices that might be sent, we believe the class in this case is not likely to exceed 32,000 borrowers who meet the class specifications. We also have other class action lawsuits filed against us alleging RESPA violations and other claims based on payments similar to those at issue in this case, but in one case arguing different RESPA violations. These related lawsuits filed against us after this case, some of which are subject to a similar stay of proceedings, seek class certification of additional borrowers on a different basis than that recently overruled by the Court of Appeals for the 11th Circuit.

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

We intend to vigorously defend these lawsuits and believe we have available numerous defenses to the claims. However, we expect that an adverse outcome in this lawsuit or in the one seeking consolidation with it could result in substantial monetary damages that could be material to our financial position. We have not established any reserves for either case or for the other subsequently-filed cases, and at this stage of the litigation we are unable to determine their outcomes or a reasonable estimate of potential loss.

In January, 2001, we and two subsidiaries, Irwin Leasing Corporation (formerly Affiliated Capital Corp.) and Irwin Equipment Finance Corporation, our indirect and direct subsidiaries, respectively (for purposes of this paragraph, the Irwin companies), were served as defendants in an action filed in the U.S. District Court for the Middle District of Pennsylvania. The suit alleges that a manufacturer/importer of certain medical devices made misrepresentations to health care professionals and to government officials to improperly obtain Medicare reimbursement for treatment using the devices, and that the Irwin companies, through Affiliated Capital's financing activities, aided in making the alleged misrepresentations. The Irwin companies filed a motion to dismiss on February 12, 2001. On August 10, 2001, the court granted our motion in part by dismissing us and Irwin Equipment Finance as defendants in the suit. Irwin Leasing remains a defendant. We have not established any reserves for this case. Because the case is in the early stages of litigation, we are unable at this time to form a reasonable estimate of the amount of potential loss, if any, that we could suffer.

In May, 2001, Irwin Union Bank and Trust and Irwin Home Equity, our direct and indirect subsidiaries, respectively (Irwin), received notice that they were named as defendants in a lawsuit filed in the U.S. District Court for the District of Rhode Island. The suit alleged that Irwin's disclosures and closing procedure for certain home equity loans did not comply with certain provisions of the Truth in Lending Act. The suit also requested that the court certify a plaintiff class in this action. On June 18, 2001, Irwin filed a motion with the court to compel arbitration pursuant to the provisions in the home equity loan agreement. On October 20, 2001, the Court entered judgment in favor of Irwin compelling arbitration and dismissing the plaintiffs' complaint. The plaintiffs appealed and in August, 2002, the appeals court upheld the judgment in our favor compelling arbitration and dismissing the case. We consider this case concluded and do not expect to suffer a material loss should arbitration occur.

Our subsidiary Irwin Union Bank and Trust is a defendant in a purported class action lawsuit filed in July, 2001 in the U.S. District Court for the District of Massachusetts. The suit relates to loans purchased by Irwin Union Bank and Trust from an unaffiliated third-party originator. The plaintiffs allege that the loan documents did not comply with certain provisions of the Truth in Lending Act relating to high rate loans. On September 30, 2002, the court granted plaintiffs' motion for certification of a class, subject to certain limitations. Irwin Union Bank and Trust has challenged the grant of class certification. Discovery has not yet commenced and the actual number of class members will be determined only after a review of loan files. We believe that out of approximately 200 loans acquired directly from the third-party originator and approximately 7,800 loans acquired from others through bulk acquisitions, only a portion will qualify for inclusion in the class. Because the case is in the early stages of litigation, we are unable at this time to form a reasonable estimate of the amount of potential loss, if any, that we could suffer. We have not established any reserves for this case.

On January 25, 2002, a jury awarded the plaintiffs damages of \$1.434 million jointly and severally against defendants, including our subsidiary Irwin Mortgage, in a case filed in August 1998 in the Baltimore, Maryland, City Circuit Court. The nine plaintiffs alleged that a home rehabilitation company defrauded them by selling them defective homes at inflated prices and that Irwin Mortgage, which provided the plaintiff borrowers mortgage loans on the home purchases, participated in the fraud. We have reserved for this case based upon advice of our legal counsel. On February 6, 2002, plaintiffs filed a petition for attorney's fees. On the same date, Irwin Mortgage filed post-trial motions for judgment notwithstanding the verdict, new trial and/or remittitur, which is a request for the court to reduce the amount of damages awarded by the jury. In May 2002, the court denied Irwin Mortgage's post-trial motion. In June, 2002, Irwin Mortgage filed a notice of appeal with the Maryland Court of Special Appeals.

We and our subsidiaries are from time to time engaged in various matters of litigation including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position, results of operations, or cash flows, except as described above. Reserves have been established for these various matters of litigation, when appropriate, based upon the advice of legal counsel.

NOTE 9 -- EARNINGS PER SHARE

Earnings per share calculations are summarized as follows:

<i>(In thousands, except share data)</i>	Basic Earnings Per Share	Effect of Stock Options	Effect of Preferred Shares	Effect of Convertible Shares	Diluted Earnings Per Share

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

You should read the following discussion in conjunction with our consolidated financial statements, footnotes, and tables. This discussion and other sections of this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and are including this statement for purposes of invoking these safe harbor provisions. Words such as: "achieve," "anticipate(d)(s)," "as long as," "assume," "assuming," "assumption(s)," "believe(s)," "continue(d)(s)," "could," "estimate(d)(s)," "expect(ed)(s)," "expectation(s)," "forecasts," "future," "intend," "likely," "may," "might," "objectives," "outlook," "potential," "probable," "projected," "projections," "remain," "should," "unlikely," "will," "would," and similar expressions are intended to identify forward-looking statements, which may include, among other things:

- statements and assumptions relating to projected growth, earnings, earnings per share, and other financial performance measures, as well as management's short-term and long-term performance goals;
- statements relating to the anticipated effects on results of operations or financial condition from recent and expected developments or events, including the recently revised regulatory capital rules relating to residual interests;
- statements relating to our business and growth strategies, including potential acquisitions; and
- any other statements, projections or assumptions that are not historical facts.

Forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause our actual results, performance or achievements, or industry results, to differ materially from our expectations of future results, performance or achievements expressed or implied by these forward-looking statements. In addition, our past results of operations do not necessarily indicate our future results. Actual future results may differ materially from what is projected due to a variety of factors, including, but not limited to, potential changes in interest rates, which may affect consumer demand for our products and the valuation of our servicing portfolio; borrowers'

refinancing opportunities, which may affect the prepayment assumptions used in our valuation estimates; unanticipated deterioration in the credit quality of our assets; difficulties in selling residual assets as contemplated; difficulties in delivering loans to the secondary market as planned or in funding loans through securitization transactions as planned; difficulties in establishing commercial finance vendor relationships; difficulties in expanding our business or raising capital and other funding sources as needed; competition from other financial service providers for experienced managers as well as for customers; changes in the value of companies in which we invest; legislative or regulatory changes, including changes in the interpretation of new capital rules; changes in applicable accounting policies or principles or their application to our business; or governmental changes in monetary or fiscal policies. Further, uncertainty in the national economy may negatively impact the financial services industry or cause changes in or exaggerate the effects of the factors described above. We undertake no obligation to update publicly any of these statements in light of future events, except as required in subsequent periodic reports we file with the Securities and Exchange Commission.

Consolidated Overview

	<u>Three Months</u> <u>Ended September</u> <u>30, 2002</u>	<u>Three Months</u> <u>Ended September</u> <u>30, 2001</u>	<u>Nine Months</u> <u>Ended September</u> <u>30, 2002</u>	<u>Nine Months</u> <u>Ended September</u> <u>30, 2001</u>
Net income (millions)	\$8.2	\$11.5	\$26.1	\$33.4
Basic earnings per share ^(1, 2)	0.30	0.54	0.99	1.58
Diluted earnings per share ^(1, 2)	0.29	0.50	0.96	1.47
Return on average equity	9.89%	21.74%	11.25%	22.25%
Return on average assets	0.79	1.30	0.92	1.46

⁽¹⁾ Earnings per share of common stock before cumulative effect of change in accounting principle related to SFAS 142, "Goodwill and Other Intangible Assets," for the nine months ended September 30, 2002 was \$0.97 basic and \$0.94 diluted.

⁽²⁾ Earnings per share of common stock before cumulative effect of change in accounting principle related to SFAS 133, "Accounting for Derivative Instruments and Hedging Activities," for the nine months ended September 30, 2001 was \$1.57 basic and \$1.46 diluted.

We recorded net income of \$8.2 million for the three-month period ended September 30, 2002, down 28.6% from the same period in 2001. Net income per diluted share was \$0.29 during the three-month period ended September 30, 2002, down from \$0.50 during the same period a year earlier. Return on equity for the third quarter totaled 9.89% compared with 21.74% during the same period a year earlier.

For the year to date, we recorded net income of \$26.1 million or \$0.96 per diluted share. This represents decreases of 21.9% and 34.7%, respectively, compared to the same period in 2001. Return on equity for the nine-month period ended September 30, 2002 was 11.25% compared with 22.25% during the same period a year earlier.

The decreased earnings per share and return on equity listed above reflect the elimination of the use of gain-on-sale securitization accounting in our home equity line of business and dilution from a first quarter common stock offering. The accounting change and dilution combined to offset strong performance by our mortgage and commercial banking lines of business.

Irwin Financial Corporation has five principal lines of business:

- Mortgage banking (includes Irwin Mortgage Corporation and the related activities of Irwin Union Bank and Trust Company)
- Commercial banking (includes some of the activities of Irwin Union Bank and Trust and Irwin Union Bank, F.S.B.)
- Home equity lending (includes Irwin Home Equity Corporation, Irwin Residual Holdings Corporation, Irwin Residual Holdings Corporation II, and the related activities of Irwin Union Bank and Trust)

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

- Commercial finance (Irwin Commercial Finance Corporation)
- Venture capital (includes Irwin Ventures LLC and the related activities of Irwin Union Bank and Trust)

The following table summarizes our net income (loss) by line of business for the periods indicated:

	<u>Three Months Ended September 30,</u>		<u>Nine Months Ended September 30,</u>	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
Net income (loss):		(In thousands)		
Mortgage Banking	\$8,041	\$10,818	\$27,563	\$25,305
Commercial Banking	3,493	2,775	11,381	5,917
Home Equity Lending	423	1,212	(7,018)	10,669
Commercial Finance	(663)	(1,016)	(155)	(1,639)
Venture Capital	(1,672)	(92)	(2,532)	(3,099)
Other (including consolidating entries)	<u>(1,429)</u>	<u>(2,230)</u>	<u>(3,114)</u>	<u>(3,707)</u>
	<u>\$8,193</u>	<u>\$11,467</u>	<u>\$26,125</u>	<u>\$33,446</u>

- Our mortgage banking line of business earned \$8.0 million during the third quarter, down 25.7% from a year ago. These results were achieved during a period characterized by declining and volatile interest rate changes due to uncertainty in the capital markets. Compared with the same period a year ago, results in the third quarter of 2002 reflect higher loan originations, increased servicing amortization and impairment and increased derivative gains during the quarter.
- Our commercial banking line of business earned \$3.5 million in the third quarter, a 26% increase compared to the same period in 2001. The line of business continued to grow its loan portfolio during the third quarter of 2002, while its margin increased to 3.98%, up from 3.90% during the same period a year ago.
- Our home equity lending line of business earned \$0.4 million during the quarter, a \$0.8 million decrease as compared to the third quarter of 2001, but a \$5.0 million increase compared with the second quarter of 2002. The 2002 results reflect its transition from gain-on-sale to portfolio treatment for its secured financings as discussed in the following section.
- Our commercial finance line of business lost \$0.7 million during the third quarter of 2002, primarily reflecting deterioration in the credit quality of the broker-based, small ticket portion of the commercial finance portfolio.
- Our venture capital line of business lost \$1.7 million during the quarter reflecting a portfolio valuation adjustment.

Earnings Outlook

Given the current economic climate of a gradual recovery and updating for year-to-date 2002 results, we expect estimated consolidated net income of at least \$36 million or \$1.30 per share in 2002 and approximately \$54 million or \$1.86 per share in 2003¹. As announced in late 2001, changes in federal banking regulations for securitization residual interests have caused us to eliminate the use of securitization structures that require gain-on-sale accounting under SFAS 140. This change in accounting policy will have the effect of delaying income recognition for our home equity line of business in 2002. Despite this change, we expect to remain solidly profitable as we transition off gain-on-sale accounting. In addition, management anticipates that, after 2002, we can again achieve our long-term financial objectives of annual earnings per share growth of at least 12 percent and return on common equity of greater than 15 percent.

¹These estimates include \$2.7 million of after-tax interest expense on convertible trust preferred securities, which would be added back to net income for purposes of calculating fully diluted earnings per share under generally accepted accounting principles and assume approximately 29.7 million and 30.8 million diluted shares in 2002 and 2003, respectively. These estimates are based on various factors and current assumptions that management believes are reasonable that are specific to our business such as loan production levels and credit costs as well as current industry forecasts of a variety of economic and competitive factors. However, projections are inherently uncertain, and actual earnings may differ significantly from these estimates in the future due to uncertainties and risks related to our business and the US and Canadian economies, including those described in this report.

The following section summarizes our recent performance by line of business.

Mortgage Banking

Overview

In our mortgage banking line of business, Irwin Mortgage, in combination with Irwin Union Bank and Trust, originates, purchases, sells and services conventional and government agency-backed residential mortgage loans throughout the United States. Because most of our mortgage originations either are insured by an agency of the federal government, such as the FHA or the VA, or, in the case of conventional mortgages, meet requirements for sale to the FNMA or the FHLMC, we are able to remove substantially all of the credit risk of these loans from our balance sheet. We sell mortgage loans to institutional and private investors but may retain servicing rights to the loans we originate or purchase from correspondents. We believe this balance between mortgage loan originations and mortgage loan servicing provides us a partial natural hedge against interest rate changes, which has helped stabilize our revenue stream.

Our mortgage banking line of business is currently our largest contributor to revenue, comprising 62.8% and 63.7% of our total revenues in the three- and nine-month periods ended September 30, 2002, compared to 60.2% and 55.1%, respectively, in the same periods in 2001. Our mortgage banking line of business contributed 89.6% and 94.3% of our net income for the three months ended September 30, 2002 and 2001, respectively, and 102.4% and 75.7% of our net income during the nine-month periods ended September 30, 2002 and 2001, respectively.

The following table shows selected financial information for our mortgage banking line of business:

Net Income

Net income from mortgage banking for the three months ended September 30, 2002 was \$8.0 million, compared to \$10.8 million during the same period in 2001, a decrease of 25.7%. The third quarter 2002 results were achieved in an interest rate environment characterized by declining and volatile interest rate changes due to uncertainty in the capital markets. The coupon on GNMA securities, which underlies the pricing of a substantial portion of our mortgage loans and the valuation of our mortgage servicing asset, declined 93 basis points during the quarter and ended at 5.15% on September 30, 2002. As compared to the year earlier period, loan origination fees increased substantially, but not enough to offset increased servicing amortization and impairment, net of derivative gains. Year to date, net income was \$27.6 million compared to \$25.3 million in 2001. The following table shows the composition of our originations by loan categories for the periods indicated:

	<u>Three Months ended September 30,</u>		<u>Nine Months ended</u>	
	<u>2002</u>	<u>2001</u>	<u>September 30,</u>	<u>2001</u>
(Dollars in thousands)				
Total originations	\$3,011,673	\$2,028,354	\$6,858,229	\$6,388,294
Percent retail loans	33.1%	37.3%	34.0%	34.7%
Percent wholesale loans	61.2	56.8	59.7	60.4
Percent brokered ⁽¹⁾	5.7	5.9	6.3	4.8
Percent refinances	62.4	45.0	53.2	49.8

⁽¹⁾ Brokered loans are loans we originate for which we receive loan origination fees, but which are funded, closed and owned by unrelated third parties.

Mortgage loan originations for the three months ended September 30, 2002 totaled \$3.0 billion, up 48.5% from the same period in 2001. For the year to date, originations totaled \$6.9 billion, up 7.4% from 2001. Increased production in 2002 was a result of refinanced loans that accounted for 62.4% of loan production for the third quarter of 2002 and 53.2% year to date. This compares to 45.0% and 49.8%, respectively, for 2001.

Net Revenue

Net revenue for the three and nine months ended September 30, 2002 totaled \$61.3 million and \$176.4 million, compared to \$60.7 million and \$159.8 million for the three and nine months ended September 30, 2001.

Net interest income is generated from the interest earned on mortgage loans before they are sold to investors, less the interest expense incurred on borrowings to fund the loans. Net interest income for the third quarter of 2002 totaled \$10.2 million, compared to \$8.4 million for the same period in 2001, an increase of 21.1%. Net interest income year to date increased 44.5% to \$26.1 million. This increase is a result of increased loan volumes due to lower interest rates as well as an increase in spread between short-term warehouse interest rates we pay and longer-term interest rates paid to us by our borrowers while the mortgage loans are on our balance sheet.

Origination fees are recognized when loans are sold. Higher secondary market deliveries caused mortgage loan origination fees to increase 21.8% during the third quarter in 2002 to \$18.8 million, compared to \$15.5 million during the same period in 2001. Year-to-date origination fees were up 12.3% to \$48.3 million.

Gain on sale of loans, including valuation of newly created mortgage servicing rights, is recognized when loans are pooled and sold into the secondary mortgage market. As a result of increased originations and secondary market activity during the third quarter of 2002, gains on the sale of loans during this period increased 19.6% compared to the same period in 2001. Year-to-date, gain on sales of loans increased 19.3% to \$89.0 million.

Servicing fee income is recognized by collecting fees, which range between 25 and 44 basis points base fee, annually on the principal amount of the underlying mortgages. Servicing fee income totaled \$14.5 million and \$43.2 million for the three and nine months ended September 30, 2002, an increase of 11.1% and 13.9%, respectively, compared to the same periods in 2001, primarily reflecting the increasing size of the servicing portfolio.

Amortization expense relates to mortgage servicing rights and is based on the estimated lives of the underlying loans. Amortization expense totaled \$14.5 million for the three months ended September 30, 2002, compared to \$9.5 million for the same period in 2001. Year-to-date amortization expense totaled \$39.1 million and \$23.7 million for 2002 and 2001, respectively. This increase in 2002 relates primarily to the increase in the underlying servicing portfolio and decrease in interest rates.

Impairment expense is recorded when the book value of the mortgage servicing rights exceeds the fair market value on a strata-by-strata basis. Impairment expense totaled \$86.8 million and \$124.0 million during the third quarter and year-to-date 2002, compared to impairment expense of \$41.9 million and \$42.5 million during the same periods in 2001. Generally falling interest rates impacted the impairment expense recorded over these periods.

The impairment recorded in the third quarter of 2002 was largely offset by hedging gains of \$81.2 million during the same period. Hedging gains of \$43.2 million were recorded during the same period in 2001. Year to date hedging gains of \$118.5 million offset impairment of \$124.0 million. Year to date hedging gains for 2001 totaled \$42.5 million. At September 30, 2002, the mortgage banking line of business held a \$22.1 billion notional amount of Eurodollar future contracts and \$3.8 billion notional amount in interest rate swaptions to hedge our mortgage servicing assets economically. The current hedging activities of the mortgage bank related to servicing assets do not satisfy the criteria for "hedge accounting" under SFAS 133. As a result, these derivatives are accounted for as other assets, and changes in fair value are adjusted through earnings as other income, while the underlying servicing asset being hedged

is accounted for at the lower of cost or market.

Our mortgage banking business maintains the flexibility either to sell servicing for current cash flow or to retain servicing for future cash flow, whether through bulk sales or ongoing servicing fees. Total servicing sales represented 8.0% and 33.3% of loan originations for the third quarter and year-to-date 2002, compared to 10.2% and 32.9% of originations for the third quarter and year-to-date 2001. The decision to sell or retain servicing is based on current market conditions for servicing assets, loan origination level and production expenses, and the general level of risk tolerance of the line of business and the Corporation.

Operating Expenses

The following table sets forth operating expenses for our mortgage banking line of business for the periods indicated:

	<u>Three Months Ended September 30,</u>		<u>Nine Months Ended September 30,</u>	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
	(Dollars in thousands)			
Salaries and employee benefits	\$32,748	\$29,316	\$85,781	\$79,170
Other expenses	<u>15,437</u>	<u>13,486</u>	<u>45,296</u>	<u>39,168</u>
Total operating expenses	<u>\$48,185</u>	<u>\$42,802</u>	<u>\$131,077</u>	<u>\$118,338</u>
Number of employees ⁽¹⁾			1,710	1,431

⁽¹⁾ On a full-time equivalent basis.

Operating expenses for the three and nine months ended September 30, 2002 totaled \$48.2 million and \$131.1 million, respectively, an increase of 12.6% and 10.8%, respectively, over the same periods in 2001. Salaries and employee benefits during the third quarter of 2002 increased 11.7% over the same period of 2001. Year to date, salaries and employee benefits increased 8.4% to \$85.8 million. These increases in salaries and employee benefits are reflective of increased headcount as a result of strong production levels over the past few quarters. Other expenses during the third quarter of 2002 increased 14.5% over the same period of 2001. Year to date, other expenses increased 15.6% to \$45.3 million. These increases in other expenses occurred as a result of increased production levels.

Mortgage Servicing

The following table shows information about our mortgage servicing portfolio for the periods indicated:

	<u>Nine Months Ended September 30,</u>	<u>Year Ended December 31,</u>
	<u>2002</u>	<u>2001</u>
	(Portfolio in billions)	
Beginning portfolio	\$12.9	\$9.2
Mortgage loan closings (excludes brokered)	6.4	8.8
Sales of servicing rights	(1.9)	(2.3)
Run-off ⁽¹⁾	<u>(2.2)</u>	<u>(2.8)</u>

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

Ending portfolio	<u>\$15.2</u>	<u>\$12.9</u>
Number of loans (end of period)	130,997	123,291
Average loan size	\$116,234	\$104,432
Percent GNMA and state housing programs	47%	60%
Percent conventional insured and other	47	33
Percent warehouse	6	7
Delinquency ratio (30+ days including nonaccruals)	5.8	7.8
Capitalized servicing to servicing portfolio	0.9	1.6

(1) Run-off is the reduction in principal balance of the servicing portfolio due to regular principal payments made by mortgagees and early repayments of entire loans.

Our mortgage servicing portfolio totaled \$15.2 billion at September 30, 2002, an 18.3% increase from the December 31, 2001 balance of \$12.9 billion. This increase is reflective of the strong mortgage production during 2002 along with greater retention of servicing on loans sold over the past year.

We record mortgage servicing assets at the lower of their cost or market value. We record a valuation allowance for any impairment on a strata-by-strata basis. We determine fair value on a monthly basis based on a discounted cash flow analysis. These cash flows are projected over the life of the servicing using prepayment, default, discount rate and cost to service assumptions that we believe market participants would use to value similar assets. At September 30, 2002, the market value of these assets was estimated to be \$133.0 million in the aggregate, or \$0.5 million greater than the carrying value on the balance sheet. At December 31, 2001, we estimated the market value of these assets to be \$239.7 million in the aggregate, or \$28.5 million greater than the carrying value on the balance sheet.

Commercial Banking

Overview

Our commercial banking line of business focuses on providing credit, cash management and personal banking products to small businesses and business owners. We offer commercial banking services through our banking subsidiaries, Irwin Union Bank and Trust, an Indiana state-chartered commercial bank, and Irwin Union Bank, F.S.B., a federal savings bank. We sell a majority of the commercial loans we originate at Irwin Union Bank, F.S.B. to Irwin Union Bank and Trust.

The following table shows selected financial information for our commercial banking line of business:

Net Income

Commercial banking net income increased to \$3.5 million during the third quarter of 2002, compared to \$2.8 million during the same period in 2001. Year-to-date net income totaled \$11.4 million in 2002 compared to net income of \$5.9 million for the same period in 2001. Results during the first nine months of 2002 reflect year-over-year growth of \$12.4 million in net interest income after provision for loan losses and a \$0.5 million increase in other revenues.

Net Interest Income

The following table provides information about net interest income for our commercial banking line of business:

	<u>Three Months Ended September 30,</u>		<u>Nine Months Ended</u>	
	<u>2002</u>	<u>2001</u>	<u>September 30,</u>	<u>2001</u>
	(Dollars in thousands)			
Net interest income on a taxable equivalent basis ⁽¹⁾	\$17,933	\$13,864	\$51,412	\$36,312
Average interest earning assets	1,787,092	1,409,176	1,697,002	1,273,043
Net interest margin	3.98%	3.90%	4.05%	3.81%

⁽¹⁾ Reflects what net interest income would be if all interest income were subject to federal and state income taxes.

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

Net interest income on a taxable equivalent basis was \$51.4 million for the nine months ended September 30, 2002, an increase of 41.6% over the same period in 2001 of \$36.3 million. The 2002 increase relates to an improvement in net interest margin, as discussed below, and a \$0.4 billion increase in average interest earning assets compared to the same period in 2001.

Net interest margin is computed by dividing annualized net interest income by average interest earning assets. Net interest margin for the third quarter of 2002 was 3.98%, compared to 3.90% for the third quarter of 2001. Year-to-date net interest margin for 2002 was 4.05% compared to 3.81% for 2001. The improvement in 2002 reflects reduced reliance on higher-rate wholesale funding sources. The line of business increased its core deposits to \$1.4 billion, an annual increase of 45.2%, reflecting success in deposit gathering initiatives.

Noninterest Income

The following table shows the components of noninterest income for our commercial banking line of business:

	<u>Three Months Ended September 30,</u>		<u>Nine Months Ended September</u>	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
	(Dollars in thousands)			
Trust fees	\$433	\$521	\$1,496	\$1,671
Service charges on deposit accounts	1,178	1,102	3,532	2,281
Insurance commissions, fees and premiums	383	438	1,263	1,359
Gain from sales of loans	941	657	2,829	1,690
Loan servicing fees, net	(176)	(18)	(194)	(65)
Impairment of servicing assets	(1,300)	0	(1,300)	0
Brokerage fees	261	395	980	1,204
Other	<u>858</u>	<u>903</u>	<u>2,451</u>	<u>2,438</u>
Total noninterest income	<u>\$2,578</u>	<u>\$3,998</u>	<u>\$11,057</u>	<u>\$10,578</u>
Total noninterest income to total net revenues	14.5%	25.1%	20.0%	25.0%

Noninterest income during the nine months ended September 30, 2002 increased 4.5% over 2001. This increase was due primarily to higher gain from sales of loans related to increased mortgage production and increased fee income on deposit accounts related to new fee structures put into place mid-2001. These increases were partially offset by impairment charges recorded against mortgage servicing assets. The commercial banking line of business has a first mortgage servicing portfolio of \$328.1 million, principally as a result of mortgage loan production in its south-central Indiana markets. Those servicing rights are carried on the balance sheet at the lower of cost or market, estimated at September 30, 2002, to be \$1.8 million.

Operating Expenses

The following table shows the components of operating expenses for our commercial banking line of business:

	<u>Three Months Ended September 30</u>		<u>Nine Months Ended September</u>	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
	(Dollars in thousands)			

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

Salaries and employee benefits	\$7,363	\$6,761	\$22,034	\$19,184
Other expenses	<u>4,736</u>	<u>4,664</u>	<u>14,520</u>	<u>13,456</u>
Total operating expenses	<u>\$12,099</u>	<u>\$11,425</u>	<u>\$36,554</u>	<u>\$32,640</u>
Number of employees at period end ⁽¹⁾			450	467

⁽¹⁾ On a full-time equivalent basis.

Operating expenses during the nine months ended September 30, 2002 were \$36.6 million, an increase of 12.0% over the same period of 2001. During the same nine-month period, net revenues increased 33.5%, indicative of improved operating efficiency.

Balance Sheet

Total assets for the quarter ended September 30, 2002 averaged \$1.8 billion compared to \$1.4 billion as of December 31, 2001. Average earning assets for the quarter ended September 30, 2002 were \$1.8 billion compared to \$1.6 billion for the quarter ended December 31, 2001. The most significant component of the increase was an increase in commercial loans as a result of the commercial bank's continued growth and expansion efforts in new markets. Average deposits for the third quarter totaled \$1.6 billion, compared to \$1.4 billion for the fourth quarter 2001.

Credit Quality

The allowance for loan losses and provision for loan losses have increased in the first nine months of 2002 over 2001, reflecting general economic conditions, portfolio growth and increased charge-offs. Nonperforming loans have increased \$7.8 million since year end as a result of continued weakness in the economy. Nonperforming loans are not significantly concentrated in any industry category. The following table shows information about our nonperforming assets in this line of business and our allowance for loan losses:

	<u>September 30,</u> <u>2002</u>	<u>December 31,</u> <u>2001</u>
	(Dollars in thousands)	
Nonperforming loans	\$14,828	\$7,077
Other real estate owned	<u>96</u>	<u>100</u>
Total nonperforming assets	<u>\$14,924</u>	<u>\$7,177</u>
Nonperforming assets to total assets	0.78%	0.44%
Allowance for loan losses	\$19,014	\$14,643
Allowance for loan losses to total loans	1.06%	0.97%
Delinquencies (30+ days excluding nonaccruals)	0.22%	0.43%

Three Months Ended September 30: Nine Months Ended September 30:

	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
	(Dollars in thousands)

Net charge-offs to average loans	0.33%	0.20%	0.22%	0.11%

Home Equity Lending

Overview

Our home equity lending line of business originates, purchases, securitizes, sells and services a variety of home equity lines of credit and fixed-rate home equity loan products nationwide. We market our home equity products through a combination of direct mail, Internet, and wholesale channels. We target creditworthy homeowners who are active credit users. Customers are underwritten using proprietary models based on several criteria, including the customers' previous use of credit. Generally we either sell the loans through whole loan sales or we securitize them. We normally retain the servicing rights for the loans whether we securitize or sell them. To address the new capital rules discussed later in this section, in 2002 we are using on-balance sheet financing and whole loan sales and eliminating our use of securitization structures requiring gain-on-sale accounting and creation of residual interests.

The following table shows selected financial information for the home equity lending line of business:

	<u>Three Months Ended September</u> <u>30,</u> <u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>

⁽¹⁾ Includes \$418.6 million of collateralized loans at September 30, 2002, as part of a secured financing

⁽²⁾ Includes \$96.1 million of residual assets at September 30, 2002 that would be considered credit-enhancing interest-only strips (CEIOS) under new federal banking regulations.

Securitizations

The securitization structures we have used prior to 2002 have involved "true sales" of the loans, transferring them off of our balance sheet, and have been accounted for using gain-on-sale treatment in accordance with SFAS 140 or its predecessor SFAS 125. Although we recognize gains on the sale of loans in the period in which such loans were sold, we expect to receive cash (representing the excess spread, overcollateralization if applicable, and servicing fees) over the lives of the loans. Concurrent with recognizing such gains on sale, we have recorded the future expected receipt of cash flow as a residual interest, which is currently indicated on our consolidated balance sheet as part of "trading assets." We recognized gains on the sale of loans in an amount equal to the difference between proceeds and allocated cost basis of the loans sold. Residual interests are recorded at fair value with the subsequent changes in fair value recorded as unrealized gain or loss in our results of operations in the period of the change. We determine fair value on a monthly basis based on a discounted cash flow analysis. These cash flows are projected over the lives of the receivables using prepayment, default, and discount rate assumptions that we believe market participants would use for similar financial instruments.

Based on changes to our funding practices to adjust to new regulatory capital rules discussed later in this section, we have begun using securitization structures that are not accounted for using gain-on-sale treatment under generally accepted accounting principles, but rather as secured borrowings. For these assets funded on-balance sheet, we are now recording interest income over the life of the loan as it is earned, net of interest expense over the life of the bonds and a provision for credit losses inherent in the portfolio. We do not expect this different accounting treatment to affect cash flows related to the loans, nor do we expect that the ultimate total receipt of revenues and profitability derived from our home equity loans will change materially by these different financing structures.

Net Income

Our home equity lending line of business recorded net income of \$0.4 million during the three months ended September 30, 2002, compared to net income for the same period in 2001 of \$1.2 million. Year to date, a loss of \$7.0 million was recorded in 2002 compared to net income of \$10.7 million during the same period a year earlier. The decline is reflective of the transition this line of business is making away from securitization structures accounted for under SFAS 140 using gain-on-sale accounting treatment.

Net Revenue

Net revenue for the three and nine months ended September 30, 2002 totaled \$19.9 million and \$45.4 million, respectively, compared to net revenue for the same periods in 2001 of \$26.3 million and \$91.3 million. The reduction in revenues is a result of increased provision for loan losses as the line of business begins to build an on-balance sheet loan portfolio and reduced gain-on-sale revenues related to the transition away

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

from gain-on-sale accounting in our securitizations.

During the third quarter of 2002, our home equity lending business produced \$290.8 million of home equity loans, compared to \$350.4 million during the same period of 2001, a 17.0% decrease. For the year to date, loan volume was \$805.2 million in 2002 and \$802.6 million in 2001. Our home equity lending business had \$656.0 million of loans in portfolio at September 30, 2002, compared to loans of \$346.2 million at December 31, 2001. Included in the loan balance at September 30, 2002 were \$418.6 million of collateralized loans as part of a secured financing.

Net interest income increased to \$27.1 million for the three months ended September 30, 2002, compared to the third quarter of 2001 net interest income of \$18.2 million. Net interest income during 2002 year to date totaled \$65.7 million compared to \$47.3 million year to date in 2001. This line of business earns interest income on loans held on the balance sheet and the accretion of the discount applied to its residual interests. Interest income on the residual interests totaled \$8.5 million and \$26.6 million, respectively, during the three- and nine-month periods ended September 30, 2002, up 7.6% and 17.6%, respectively, from the same periods in 2001, reflecting larger residual balances and a higher discount rate on all residuals.

Gains on sale of loans for the three months ended September 30, 2002 totaled \$9.2 million, compared to \$37.4 million during the same period in 2001. Gains on sale of loans totaled \$16.5 million for the nine-month period ended September 30, 2002, a decrease from \$70.7 million during the same period a year earlier. This significant decline in gains compared to 2001 relates to the transition away from securitization structures requiring gain-on-sale accounting. We reported gain on sales during the first quarter of 2002 as a result of making a final delivery of \$31.7 million of loans to complete a third quarter 2001 securitization transaction. We also had a securitization of \$439.1 million of loans during the second quarter that we accounted for as a secured financing. See further discussion of this subject in the section titled, "Securitizations." We completed a whole loan sale in the third quarter of \$189.7 million resulting in a gain of \$9.2 million. Year to date, we have had whole loan sales of \$338.8 million resulting in a gain of \$14.0 million. We do not record a residual asset as a result of these whole loan sales. These are cash sales for which we receive a premium, record an MSR, and monetize any points and fees at the time of sale.

Under a portfolio accounting model, loan origination fees are deferred and accreted into income as an adjustment to net interest income over the life of the underlying loans. Previously, loan origination fees had been recognized as income when the related loans were securitized. As a result of our transition to a portfolio model, loan origination fees were lower in 2002 compared to 2001.

Amortization and impairment of servicing assets includes amortization expense and valuation adjustments relating to the carrying value of servicing assets. Our home equity lending business recognizes on its balance sheet a servicing asset equal to the discounted cash flows of estimated future servicing income and cost. At September 30, 2002, net servicing assets totaled \$21.5 million, compared to a balance of \$15.3 million at December 31, 2001. Servicing asset amortization and impairment expense totaled \$1.4 million for the three months ended September 30, 2002, compared to \$0.8 million for the same period in 2001.

Trading losses represent unrealized losses as a result of downward adjustments to the carrying values of our residual assets. Trading losses totaled \$9.6 million during the third quarter of 2002, compared to losses of \$27.9 million during the same period a year earlier. Trading losses for the year to date 2002 were \$22.6 million compared to losses of \$30.5 million during the same period in 2001. These unrealized trading losses during late 2001 and year-to-date 2002 principally reflect higher allowances for future losses due to the continued recessionary economic environment. Residual interests had a balance of \$168.1 million at September 30, 2002 and \$199.1 million at December 31, 2001. Included in the market valuation assumptions are estimated lives of the loans, expected losses and discount rates. Management continually evaluates these assumptions to determine the proper carrying values of these items on the balance sheet.

Operating Expenses

The following table shows operating expenses for our home equity lending line of business for the periods indicated:

	<u>Three Months Ended September</u>		<u>Nine Months Ended</u>	
	<u>30,</u>		<u>September 30,</u>	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
	(Dollars in thousands)			
Salaries and employee benefits	\$11,078	\$14,519	\$33,706	\$44,914
Other	<u>8,090</u>	<u>9,726</u>	<u>23,363</u>	<u>28,651</u>
Total operating expenses	<u>\$19,168</u>	<u>\$24,245</u>	<u>\$57,069</u>	<u>\$73,565</u>
Number of employees at period end			709	786

Operating expenses were \$19.2 million and \$57.1 million for the three and nine months ended September 30, 2002, respectively, compared to \$24.2 million and \$73.6 million for the same periods in 2001. These decreases relate

primarily to decreased salaries and employee benefits related to minority interest compensation.

Credit Quality

Our home equity lending line of business blends aspects of the credit card and mortgage banking industries. The home equity products are designed to appeal to homeowners who have high levels of unsecured (credit card) debt, who through the use of a debt-consolidating mortgage loan can meaningfully reduce their after-tax monthly cash outflows. We underwrite our loans as if the credit is unsecured, but we believe that the mortgage lien associated with the loan has a meaningful, positive influence on the payment priority of our customers.

A provision for loan losses of \$9.2 million was recorded during the third quarter. This provision increases the allowance for loan losses to \$20.4 million. The allowance represents our estimate of inherent losses in the \$656.0 million on-balance sheet loan portfolio at this line of business. There was a \$0.3 million provision on a \$37.4 million loan portfolio in the third quarter of 2001. Nearly all of the home equity line of business loans were classified as held for sale at September 30, 2001, and were carried at lower of cost or market.

The following table shows information about our nonperforming assets in this line of business and our allowance for loan losses:

	<u>September 30,</u> <u>2002</u>	<u>December 31,</u> <u>2001</u>		
	(Dollars in thousands)			
Nonperforming loans	\$7,848	\$7,210		
Other real estate owned	<u>2,967</u>	<u>1,904</u>		
Total nonperforming assets	<u>\$10,815</u>	<u>\$9,114</u>		
Nonperforming assets to total assets	1.13%	1.51%		
Allowance for loan losses	\$20,400	\$2,220		
Allowance for loan losses to total loans (on-balance sheet)	3.11%	0.64%		
	For the Three Months Ended September 30:		For the Nine Months Ended September 30:	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
Provision for loan losses	\$9,221	\$284	\$21,681	\$584
Net charge-offs	2,421	N/A	7,476	N/A
Net charge-offs to average loans (annualized)	1.32%	N/A	1.79%	N/A

As mentioned earlier, the home equity business began recognizing a provision for loan losses and recording an allowance for loan losses in late 2001 and into 2002 as the line of business moved away from the use of securitization structures involving gain-on-sale accounting and began to build a loan portfolio on its balance sheet. Included in charge-offs for the three months and nine months ended September 30, 2002, were approximately \$0.3 million and \$4.0 million, respectively, of charge-offs at the home equity lending line of business that were not charged against the allowance for loan and lease losses account. Instead, these charge-offs were made directly to a lower of cost or market allowance that was established in late 2001 when we transferred approximately \$38 million of home equity loans held for sale to the held for investment category. This valuation allowance account was depleted during the third quarter of this year.

In addition to on-balance sheet charge-offs listed above, the home equity line of business also recognizes charge-offs on its off-balance sheet securitized portfolio through adjustments to its residual interests. The table below lists charge-offs for the line of business, both on- and off-balance sheet. The annualized net charge-offs to managed portfolio increased to 3.01% for the three-month period ended September 30, 2002, compared to 1.95% during the

same period in 2001.

	For the Three Months Ended		For the Nine Months Ended	
	September 30:		September 30:	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>
Net charge-offs (on- and off-balance sheet)	16,011	9,462	43,715	23,607
Net charge-offs to average managed portfolio (annualized)	3.01%	1.95%	2.86%	1.76%

Servicing Mix

The following table shows the geographic composition of our home equity managed portfolio, including subserviced portfolio, on a percentage basis as of September 30, 2002 and December 31, 2001:

<u>State</u>	September 30, <u>2002</u>	December 31, <u>2001</u>
California	22.0%	23.6%
Florida	7.6	7.5
Virginia	5.6	5.7
Ohio	4.9	5.0
Maryland	4.9	4.3
All other states	<u>55.0</u>	<u>53.9</u>
Total	<u>100%</u>	<u>100</u>

	%	
Total managed portfolio, including subserviced portfolio (in thousands)		\$J,317,975
	\$2,489,240	

The following table provides a breakdown of our home equity lending managed portfolio, by product type, outstanding principal balance and weighted average coupon as of September 30, 2002:

	<u>Amount</u>	<u>% of Total</u>	Weighted <u>Average Coupon</u>
	(In thousands)		
Home equity loans <= 100% CLTV	\$305,191	15.12%	11.75%
Home equity lines of credit <= 100% CLTV	<u>465,480</u>	<u>23.06</u>	<u>9.58</u>
Total <= 100% CLTV	<u>770,671</u>	<u>38.18</u>	<u>10.44</u>
Home equity loans > 100% CLTV	786,410	38.96	14.72

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

Home equity lines of credit > 100% CLTV	<u>364,131</u>	<u>18.04</u>	<u>12.28</u>
Total > 100% CLTV	<u>1,150,541</u>	<u>57.00</u>	<u>13.94</u>
First mortgages	39,093	1.94	8.70
Other (Immediate Credit and Visa Platinum Product)	<u>58,328</u>	<u>2.88</u>	<u>13.97</u>
Total	<u>\$2,018,633</u>	<u>100.00%</u>	<u>12.50%</u>

At September 30, 2002, key economic assumptions and the sensitivity of the current fair value of residuals based on projected cash flows to immediate 10% and 25% adverse changes in those assumptions are as follows:

	September 30, 2002 (dollars in thousands)
Balance sheet carrying value of residual interests - fair value	\$168,119
Weighted-average life (in years)	2.35
Prepayment speed assumptions (annual rate)	28.05%
Impact on fair value of 10% adverse change (30.85%)	(\$2,224)
Impact on fair value of 25% adverse change (35.06%)	(5,027)
Expected credit losses (annual rate)	3.64%
Impact on fair value of 10% adverse change (4.00%)	(\$8,276)
Impact on fair value of 25% adverse change (4.55%)	(19,648)
Residual cash flows discount rate (average annual rate)	18.57%
Impact on fair value of 10% adverse change (20.43%)	(\$5,708)
Impact on fair value of 25% adverse change (23.21%)	(13,633)

These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in fair value of residuals based on a variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also in the above table, the effect of a variation in

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

a particular assumption on the fair value of the residual interest is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments but increased credit losses), which might magnify or counteract the sensitivities.

Securitization Transactions and Assumptions

The table below details information with respect to pool sizes and age for the entire portfolio we service, including products for which we no longer retain credit risk. The underlying assumptions included in this table are consistent with the underlying assumptions for the portfolio for which we continue to retain credit risk:

					Actual	Actual	Projected	Projected	Projected		
					Annualized	Cumulative	Cumulative	Lifetime	Remaining	Weighted	
					Loss Rate	Losses	Losses	Cumulative	Cumulative	Average	
	Original		Age of	as a % of	as a % of	as a % of	as a % of	as a % of	as a % of	Prepayment	Weighted

Home Equity Servicing

Our home equity lending business continues to service the majority of the loans it has securitized and sold. We earn a servicing fee of approximately 75 to 100 basis points of the outstanding principal balance of the securitized loans treated as sales under generally accepted accounting principles. For loans treated as secured financings, the servicing fee is implicit in the yield of the underlying loans and therefore is not capitalized. For whole loans sold with servicing retained, we do capitalize these servicing fees that also include rights to future early repayment fees. In addition, where applicable, we have the opportunity to earn additional future servicing incentive fees, although we are not recognizing any revenue or balance sheet asset to reflect this potential. The following table shows certain information about our home equity portfolio, which includes loans held on the balance sheet as well as securitized loans:

	<u>September 30, 2002</u>	<u>December 31, 2001</u>
	(In thousands)	
Managed portfolio		
including subservicing	\$2,489,240	\$1,317,975
Managed portfolio	2,018,633	2,064,542
Delinquency ratio (30+ days		
including nonaccruals)	5.01%	5.07%

In our home equity lending business, we generally retain credit risk on loans we originate, whether funded on- or off-balance sheet. Delinquency rates and losses on our managed portfolio result from a variety of factors, including loan seasoning, portfolio mix and general economic conditions. The 30-day and greater delinquency ratio was 5.01% at September 30, 2002, and 5.07% at December 31, 2001. The credit quality of the home equity loans underlying previous securitizations continues to perform within management's long-term expectations, despite the current economic conditions.

Impact of Recent Change to Regulatory Capital Rules

The federal banking regulators, including our principal regulator, the Federal Reserve, have adopted revised regulatory capital standards regarding the treatment of certain recourse obligations, direct credit substitutes, residual interests in asset securitizations and other securitized transactions. In general, the new rules require a banking institution that has certain credit-enhancing interest-only strips ("CEIOS") in an amount that exceeds 25% of its Tier 1 capital to deduct the after-tax excess amount of these CEIOS from Tier 1 capital for purposes of computing risk-based capital ratios.

The new capital standards became effective on January 1, 2002, for new residual interests related to any transaction covered by the revised rules that settles after December 31, 2001. For transactions settled before January 1, 2002, application of the new capital treatment to the residuals created can be delayed until December 31, 2002. During the first quarter of 2002, our home equity lending line of business completed the collateral delivery required as part of a third quarter 2001 securitization transaction. For purposes of these new rules, this delivery is considered settled prior to January 1, 2002.

We believe these new rules apply to many, if not all, of the securitization transactions done by our home equity line of business prior to 2002 to fund loan production. The residual assets we now own do not exceed the 25% concentration limit in the new capital treatment rules. The CEIOS included in our residual assets as of September 30, 2002 comprised 22.3% of our consolidated Tier 1 capital. By the end of 2002, we expect our CEIOS to have declined even more.

We financed the significant growth in our home equity lending line of business through the first quarter of 2002

using securitization transaction structures that create residual interests through gain-on-sale accounting -- transactions accounted for as sales under SFAS 140. To mitigate the impact of the new capital rules, beginning in 2002 we have eliminated our use of securitization structures that require gain-on-sale accounting. We believe using securitization structures that require on-balance sheet financing treatment or whole loan sale transactions rather than using securitization structures that require off-balance sheet gain-on-sale treatment under SFAS 140 will allow continued access to the capital markets for cost-effective, matched funding of our loan assets, while not meaningfully affecting or changing our cash flows, nor changing the longer term economic profitability of our home equity lending operation.

Changing our securitization practices has significantly affected the reported financial results of our home equity line of business in 2002. The key financial impacts have included:

- By using on-balance sheet financing structures to fund our home equity loan originations, we are required to change the timing of revenue recognition on these assets under generally accepted accounting principles. For assets funded on-balance sheet, we record interest income over the life of the loans, as it is earned, net of interest expense over the life of the bonds and a provision for credit losses inherent in the portfolio. For assets funded through securitization transactions accounted for as a sale under SFAS 140, we have recorded revenue as gain-on-sale at the time of loan sale based on the difference between proceeds and allocated cost basis of the loans sold. We have also recognized residual interests based on the discounted present value of anticipated revenue streams over the expected lives of the loans. This different accounting treatment does not, however, affect cash flows related to the loans, and management expects that the ultimate total receipt of revenues and profitability derived from our home equity loans will be relatively unchanged by these different financing structures.
- Due to the extension of the period during which revenue is recognized under the new financing structures we are pursuing, we are reducing the rate of growth in production and related expenses in the home equity lending line of business to more closely align anticipated revenue recognition and expenses under this new model. This process is now under way. However, while we anticipate continued profitability on a consolidated basis, we currently expect to report a loss in 2002 in our home equity lending line of business as we make this transition.
- After the initial transition period, as the portfolio of on-balance sheet home equity loans continues to grow, we should record increased levels of net interest income sufficient to cover ongoing expenses and credit losses. We would then expect to be in a position to resume profitable growth in this line of business. We may also pursue selective opportunities to sell whole loans in cash sale transactions if attractive terms can be negotiated. We completed one such transaction during the first quarter and another in the third quarter of 2002.

Commercial Finance

Overview

In our commercial finance line of business, we originate transactions through established US and Canadian relationships with vendors and manufacturers, some select brokers, and direct relationships with franchisees. The majority of our loans and leases in the vendor and broker channels are full payout (i.e., no residual), small-ticket assets secured by commercial equipment. Within the franchise channel, our loans and leases are also full payout with higher transaction sizes than our small-ticket channel and include some real estate financing. We finance a variety of types of commercial and office equipment and try to limit the industry and geographic concentrations in our loan and lease portfolio.

The following table shows selected financial information for our commercial finance line of business for the periods indicated:

Number of employees at period end			133	97
Selected Balance Sheet Data at End of Period:				
			September 30,	December 31,
			<u>2002</u>	<u>2001</u>
			(Dollars in thousands)	
Total assets			\$315,011	\$266,670
Leases			318,251	264,827
Allowance for lease losses			(7,050)	(4,587)
Shareholders' equity			26,856	17,819
Net interest margin			5.07%	4.64%

During the three and nine months ended September 30, 2002, our commercial finance line of business had net losses of \$0.7 million and \$0.2 million, compared to losses of \$1.0 million and \$1.6 million for the same periods of 2001. Prior to a cumulative effect of an accounting change related to the reversal of unamortized negative goodwill related to a 2000 acquisition, the line of business had a net loss of \$0.7 million for the year to date 2002. The one-time accounting change was required under SFAS 142, "Goodwill and Other Intangible Assets," a new accounting standard effective January 1, 2002.

Our commercial finance line of business originated \$58.4 million in loans and leases during the third quarter of 2002, and \$144.3 million year to date, compared to \$70.7 million for the third quarter of 2001 and \$144.4 million year to date. The line of business portfolio at quarter end was \$318.3 million, compared to its portfolio at December 31, 2001 that totaled \$264.8 million.

Credit Quality

We had nonperforming loans and leases at September 30, 2002 totaling \$3.6 million, compared to non-performing

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

loans and leases at December 31, 2001 totaling \$3.9 million. Allowance for loan and lease losses at September 30, 2002 was \$7.1 million, representing 2.22% of total loans and leases, compared to a balance at December 31, 2001 of \$4.6 million, representing 1.73% of total loans and leases. Net charge-offs recorded by the commercial finance line of business year to date in 2002 were \$4.1 million. Net charge-offs for the same period of 2001 were \$2.9 million. The increased nonperformings, charge-offs and allowance was principally the result of deterioration in the credit quality of the broker-based, small ticket portion of our domestic portfolio. We have taken steps to reduce our concentration in this portion of our portfolio and we have made substantial underwriting changes in this portfolio over the past year. In the future, we expect our concentration in vendor-based small ticket (both domestically and in Canada) and franchise finance to grow as a proportion of the line of business' portfolio. The following table shows information about our nonperforming assets in this line of business and our allowance for loan and lease losses:

	<u>September 30,</u> <u>2002</u>	<u>December 31,</u> <u>2001</u>
	(Dollars in thousands)	
Nonperforming loans and leases	\$3,564	\$3,923
Nonperforming assets to total assets	1.13%	1.47%

Venture Capital

Overview

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

In our venture capital line of business, we make minority investments in early stage companies in the financial services industry and related fields that intend to use technology as a key component of their competitive strategy. We provide Irwin Ventures' portfolio companies the benefit of our management experience in the financial services industry. In addition, we expect that contacts made through venture activities may benefit management of our other lines of business through the sharing of technologies and market opportunities. Our venture capital line of business had investments in six private companies as of September 30, 2002, with an aggregate investment cost of \$11.9 million and a carrying value of \$3.6 million.

The following table shows selected financial information for our venture capital line of business for the periods indicated:

	<u>Three Months Ended September 30,</u>		<u>Nine Months Ended September</u>	
	<u>2002</u>	<u>2001</u>	<u>2002</u>	<u>2001</u>

Selected Balance Sheet Data at End of Period:			September 30,	December 31,
			<u>2002</u>	<u>2001</u>
			(In thousands)	
Investment in portfolio companies (cost)			\$11,865	\$10,696
Mark-to-market adjustment			<u>(8,252)</u>	<u>(3,936)</u>
Carrying value of portfolio companies			<u>\$3,613</u>	<u>\$6,760</u>

During the three months ended September 30, 2002, the venture capital line of business reported a net loss of \$1.7 million compared to a net loss of \$0.1 million during the same period a year ago. This line of business recorded a net loss of \$2.5 million during the nine months ended September 30, 2002 compared to a net loss of \$3.1 million during the same period in 2001. These losses reflect portfolio valuation adjustments due to effects of the recession on the sales cycles of development stage companies.

Other

Results at our parent and other businesses totaled a net loss of \$1.4 million and \$3.1 million for the three and nine months ended September 30, 2002, compared to a net loss of \$2.2 million and \$3.7 million during the same periods in 2001. These losses at the parent company relate primarily to operating expenses in excess of management fees

charged to the lines of business.

Consolidated Income Statement Analysis

Net Income

We recorded net income of \$8.2 million for the three months ended September 30, 2002, down 28.6% from net income of \$11.5 million for the third quarter of 2001. Year to date we recorded net income of \$26.1 million in 2002 compared to net income in 2001 of \$33.4 million for the same period. Net income per share (diluted) was \$0.29 for the third quarter of 2002, down from \$0.50 per share in 2001. Year to date, net income per share (diluted) was \$0.96 for 2002, down from \$1.47 per share in 2001. These results reflect the elimination of the use of gain-on-sale accounting for securitizations in our home equity lending business as well as dilution from our February 2002 common stock offering. Return on equity was 9.89% for the three months ended September 30, 2002 and 21.74% for the same period in 2001. Year-to-date return on equity was 11.25% for 2002 and 22.25% for 2001.

Net Interest Income

Net interest income on a fully tax equivalent basis for the nine months ended September 30, 2002 totaled \$149.5 million, up 43.3% from 2001 net interest income of \$104.3 million for the same period. Net interest margin for the year to date ended September 30, 2002 was 5.99% compared to 5.21% for the same period in 2001.

The following tables show our daily average consolidated balance sheet, interest rates and interest differential at the dates indicated:

	<u>September 30, 2002</u>			<u>September 30, 2001</u>

--	--------------------	--	--	--------------------	--	--

Net interest income		<u>\$149,529</u>			<u>\$104,325</u>	
Net interest income to average interest-earning assets			<u>5.99%</u>			<u>5.21%</u>

(1) Interest is reported on a fully taxable equivalent basis using a federal income tax rate of 35%.

(2) For purposes of these computations, nonaccrual loans are included in daily average loan amounts outstanding.

(3) Annualized for interim periods.

Provision for Loan and Lease Losses

The consolidated provision for loan and lease losses for the third quarter of 2002 was \$15.6 million, compared to \$5.0 million for the same period in 2001. Year to date, the provision for 2002 was \$35.4 million, compared to \$9.4 million in 2001. More information on this subject is contained in the section on credit risk.

Noninterest Income

Noninterest income during the three months ended September 30, 2002 totaled \$54.4 million, compared to \$64.7 million for the third quarter of 2001. Noninterest income of \$161.4 million was recorded for the nine months ended September 30, 2002 and \$194.7 million for the same period in 2001. The decrease was primarily a result of our move away from gain-on-sale accounting for securitizations at the home equity lending line of business. For further discussion, see the "Home Equity Lending" section.

Noninterest Expense

Noninterest expenses for the three and nine months ended September 30, 2002 totaled \$82.9 million and \$233.6 million, respectively, relatively unchanged compared to \$81.9 million and \$234.9 million for the same periods in 2001.

Consolidated Balance Sheet Analysis

Total assets at September 30, 2002 were \$4.2 billion, up 23.1% from December 31, 2001. However, we believe

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

that changes in the average balance sheet are a more accurate reflection of the actual changes in the level of activity on the balance sheet. Year-to-date average assets for the period ended September 30, 2002 were \$3.8 billion, up 20.9% from December 31, 2001. The growth in the consolidated balance sheet reflects increases in portfolio loans and leases at the commercial banking, home equity lending and commercial finance lines of business.

Loans

Our commercial loans are extended primarily to Midwest regional businesses and our leases are originated throughout the United States and Canada. We also extend credit to consumers nationally through mortgages, installment loans and revolving credit arrangements. The majority of the remaining portfolio consists of residential mortgage loans (1-4 family dwellings) and mortgage loans on commercial property. Loans by major category for the periods presented were as follows:

	<u>September 30,</u> <u>2002</u>	<u>December 31,</u> <u>2001</u>
	(In thousands)	
Commercial, financial and agricultural	\$1,390,417	\$1,055,307
Real estate construction	233,327	287,228
Real estate mortgage	378,907	490,111
Real estate mortgage securitized	418,597	--
Consumer	37,540	38,489
Direct lease financing:		
Domestic	265,851	232,527
Canadian	122,969	91,816
Unearned income:		
Domestic	(51,369)	(44,183)
Canadian	<u>(18,103)</u>	<u>(13,548)</u>
)	
Total	<u>\$2,778,136</u>	<u>\$2,137,747</u>

Investment Securities

The following table shows the composition of our investment securities at the dates indicated:

	<u>September 30,</u> <u>2002</u>	<u>December 31,</u> <u>2001</u>
	(In thousands)	
U.S. Treasury and government obligations	\$35,843	\$29,329
Obligations of states and political subdivisions	4,255	4,425
Mortgage-backed securities	2,109	4,224
Other	<u>133</u>	<u>818</u>
Total	<u>\$42,340</u>	<u>\$38,796</u>

Deposits

Total deposits as of September 30, 2002 averaged \$2.3 billion year to date compared to average deposits as of December 31, 2001 of \$2.0 billion. Demand deposits at September 30, 2002 averaged \$490.0 million, a 16.8% increase over December 31, 2001. A significant portion of demand deposits is related to deposits at Irwin Union Bank and Trust, which are associated with escrow accounts held on loans in the servicing portfolio at the mortgage banking line of business. During 2002, these escrow accounts averaged \$333.3 million year to date compared to an average of \$294.8 million at year end. Irwin Union Bank and Trust utilizes institutional broker-sourced deposits as funding from time to time to supplement deposits solicited through branches and other wholesale funding sources. At September 30, 2002, institutional broker-sourced deposits totaled \$420.5 million compared to a balance of \$577.3 million at December 31, 2001.

Short-Term Borrowings

Short-term borrowings year to date in 2002 averaged \$581.6 million compared to an average of \$594.8 million during the fourth quarter in 2001, a decrease of 2.2%. The decrease is primarily a result of timing of secondary market activities.

Long-Term Debt

Long-term debt increased \$420.3 million compared to December 31, 2001. This increase relates to the change we have made at the home equity lending line of business away from securitization structures requiring gain-on-sale accounting. The new securitization structures result in loans and securitized borrowings being recorded on the balance sheet.

Capital

Shareholders' equity averaged \$310.5 million year to date in 2002, up 48.8% compared to the year ended December 31, 2001. Shareholders' equity balance of \$335.5 million at September 30, 2002 represented \$12.09 per common share, compared to \$10.84 per common share at December 31, 2001. The majority of this increase is reflective of our sale in the first quarter of 6.2 million shares of common stock, resulting in net proceeds of approximately \$82 million. We paid \$1.9 million in dividends the third quarter of 2002, or \$5.6 million year to date, reflecting an increase of \$0.0075 per share from last year.

The following table sets forth our capital and capital ratios at the dates indicated:

	<u>September 30,</u> <u>2002</u>	<u>December 31,</u> <u>2001</u>
	(In thousands)	
Tier 1 capital	\$429,707	\$295,021
Tier 2 capital	<u>165,979</u>	<u>173,316</u>
Total risk-based capital	<u>\$595,686</u>	<u>\$468,337</u>
Risk-weighted assets	\$4,424,521	\$4,329,973
Risk-based ratios:		
Tier 1 capital	9.71%	6.81%
Total capital	13.46	10.82
Tier 1 leverage ratio	10.17	8.45
Ending shareholders' equity to assets	7.91	6.75
Average shareholders' equity to assets	8.19	6.65

At September 30, 2002, our total risk-adjusted capital ratio was 13.46% compared to 10.0%, which is considered "well-capitalized" by the regulators, and the 11.0% minimum target established by our Board of Directors. At December 31, 2001, our total risk-adjusted capital ratio was 10.82%. Our ending equity to assets ratio at September 30, 2002 was 7.91% compared to 6.75% at December 31, 2001. However, as previously discussed, temporary conditions that existed at year end make the average balance sheet ratio a more accurate measure of capital. Our average equity to assets for the nine-month period ended September 30, 2002 was 8.19% compared to 6.65% for the year 2001. The increase in our capital ratios is primarily the result of our February 2002 common stock offering mentioned above.

Inflation

Since substantially all of our assets and liabilities are monetary in nature, such as cash, securities, loans and deposits, their values are less sensitive to the effects of inflation than to changes in interest rates. We attempt to control the impact of interest rate fluctuations by managing the relationship between interest rate sensitive assets and liabilities.

Risk Management

We are engaged in businesses that involve the assumption of risks including:

- Credit risk
- Liquidity risk
- Interest rate risk
- Operational risk (including regulatory, reputational and legal)

Each line of business that assumes risk uses a formal process to manage these risks. In all cases, the objectives are to ensure that risk is contained within prudent levels and that we are adequately compensated for the level of risk assumed. Our Chairman, President, and Chief Financial Officer participate in each of our subsidiaries' risk management process. We have recently implemented certain steps designed to enhance our consolidated risk management function. We have instituted a company-wide risk management system at the holding company level and have adopted board policies that establish specified growth and residual asset concentration limits. In addition to strengthening our overall operational and financial risk management, these changes are designed to provide independent review and enhancement of our home equity residual valuation models, ensure consistency in the business modeling methodologies we use relating to our different lines of business, and establish independent control of our risk reporting, surveillance and model parameter changes.

Credit Risk. The assumption of credit risk is a key source of earnings for the home equity lending, commercial banking and commercial finance lines of business. In addition, the mortgage banking line of business assumes some credit risk, although its mortgages typically are insured.

The credit risk in the loan portfolios of the home equity lending line of business and commercial bank has the most potential to have a significant effect on our consolidated financial performance. These lines of business manage credit risk through the use of lending policies, credit analysis and approval procedures, periodic loan reviews, and personal contact with borrowers. Loans over a certain size are reviewed by a loan committee prior to approval.

The allowance for loan and lease losses is an estimate based on our judgement applying the principles of SFAS 5, "Accounting for Contingencies," SFAS 114, "Accounting by Creditors for Impairment of a Loan," and SFAS 118, "Accounting by Creditors for Impairment of a Loan -- Income Recognition and Disclosures." The allowance is maintained at a level we believe is adequate to absorb probable losses inherent in the loan and lease portfolio. We

compute the allowance based on an analysis that incorporates both a quantitative and qualitative element. The quantitative component of the allowance reflects expected losses resulting from analysis developed through specific credit allocations for individual loans and historical loss experience for each loan category. The specific credit allocations are based on a regular analysis of all loans over a fixed-dollar amount where the internal credit rating is at or below a predetermined classification. The historical loan loss component is applied to all loans that do not have a specific reserve allocated to them. Loans are segregated by major product type, with an estimated loss ratio applied against each. The loss ratio is generally based upon the previous three years' loss experience for each loan type.

The qualitative portion of the allowance reflects management's estimate of probable inherent but undetected losses within the portfolio. This assessment is performed via the evaluation of eight specific qualitative factors as outlined in regulatory guidance. We perform the quantitative and qualitative assessments on a quarterly basis. Loans and leases that are determined by management to be uncollectible are charged against the allowance. The allowance is increased by provisions against income and recoveries of loans and leases previously charged off. Qualitative reserves are allocated to individual loan categories in the table.

Net charge-offs for the three months ended September 30, 2002 were \$5.8 million, or 0.82% of average loans, compared to \$2.4 million, or 0.58% of average loans during the third quarter of 2001. Net charge-offs for the nine-month period ended September 30, 2002, were \$14.4 million compared to \$4.7 million during the same period in 2001. At September 30, 2002, the allowance for loan and lease losses was 1.70% of outstanding loans and leases, compared to 1.04% at year-end 2001. The increase in charge-offs and allowance is a result of loan growth, deteriorating credit quality, as well as the new balance sheet treatment of home equity loans. As mentioned earlier, the home equity business began recognizing charge-offs and recording an allowance for loan losses in late 2001 and into 2002 as the line of business moved away from gain-on-sale accounting and recorded its loans on the balance sheet. Included in the third quarter charge-offs were approximately \$0.3 million of charge-offs at the home equity lending line of business not charged against the allowance for loan and lease losses account. Instead, these charge-offs were made directly to a lower of cost or market allowance that was established in late 2001 when we transferred approximately \$38 million of home equity loans held for sale to the held for investment category. This valuation allowance account depleted during the third quarter of this year.

Total nonperforming loans and leases at September 30, 2002, were \$27.3 million, compared to \$19.2 million at December 31, 2001. Nonperforming loans and leases as a percent of total loans and leases at September 30, 2002 were 0.98%, compared to 0.90% at December 31, 2001. The majority of the increase in nonperformings was at the commercial banking line of business where nonperforming loans increased to \$14.8 million, an increase of 109.5% compared to year end.

Other real estate owned totaled \$6.1 million at September 30, 2002, up from \$4.4 million at December 31, 2001. The increase in 2002 was primarily attributable to the mortgage banking and home equity lending lines of business. Total nonperforming assets at September 30, 2002 were \$33.3 million, or 0.79% of total assets. Nonperforming assets at December 31, 2001, totaled \$23.5 million, or 0.68% of total assets.

The following table shows information about our nonperforming assets at the dates shown:

	<u>September 30,</u> <u>2002</u>	<u>December 31,</u> <u>2001</u>
	(In thousands)	
Accruing loans past due 90 days or more:		
Commercial, financial and agricultural loans	\$--	\$1,146
Real estate mortgages	--	--
Consumer loans	269	157
Lease financing:		
Domestic	658	1,624
Canadian	<u>81</u>	<u>68</u>

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

	<u>1,008</u>	<u>2,995</u>
Nonaccrual loans and leases:		
Commercial, financial and agricultural loans	13,880	5,066
Real estate mortgages	8,875	8,115
Consumer loans	679	708
Lease financing:		
Domestic	1,807	1,180
Canadian	<u>1,026</u>	<u>1,088</u>
	<u>26,267</u>	<u>16,157</u>
Total nonperforming loans and leases	27,275	19,152
Other real estate owned:		
Other real estate owned	<u>6,054</u>	<u>4,388</u>
Total nonperforming assets	<u>\$33,329</u>	<u>\$23,540</u>
Nonperforming loans and leases to total loans and leases	<u>0.98</u>	<u>0.90</u>
	%	%
Nonperforming assets to total assets	<u>0.79</u>	<u>0.68</u>
	%	%

Loans that are past due 90 days or more are placed on nonaccrual status unless, in management's opinion, there is sufficient collateral value to offset both principal and interest. The \$33.3 million of nonperforming assets at September 30, 2002, were concentrated at our lines of business as follows:

• Mortgage banking	\$4.0 million
• Home equity lending	10.8 million
• Commercial banking	14.9 million
• Commercial finance	3.6 million

For the periods presented, the year-end balances of any restructured loans are reflected in the table above either in the amounts shown for "accruing loans past due 90 days or more" or in the amounts shown for "nonaccrual loans and leases."

No loan concentrations existed of more than 10% of total loans to borrowers engaged in similar activities that would be similarly affected by economic or other conditions.

Generally, the accrual of income is discontinued when the full collection of principal or interest is in doubt, or when the payment of principal or interest has become contractually 90 days past due unless the obligation is both well secured and in the process of collection.

An asset/liability management committee (ALMC) at each of our lines of business monitors the repricing structure of assets, liabilities and off-balance sheet items and uses a financial simulation model to measure interest rate risk over multiple interest rate scenarios. Our parent company ALMC oversees the interest rate risk profile of all of our lines of business as a whole and is represented on each line of business ALMC. We incorporate many factors into the financial

model, including prepayment speeds, net interest margin, fee income and a comprehensive mark-to-market valuation process. We reevaluate risk measures and assumptions regularly and enhance modeling tools as needed.

Liquidity Risk. Liquidity is the availability of funds to meet the daily requirements of our business. For financial institutions, demand for funds results principally from extensions of credit and withdrawal of deposits. Liquidity is provided by asset maturities or sales and through deposits and short-term and long-term borrowings.

The objectives of liquidity management are to ensure that funds will be available to meet current and future demands and that funds are available at a reasonable cost. We manage liquidity via daily interaction with the lines of business and periodic liquidity planning sessions. Since loans are less marketable than securities, the ratio of total loans to total deposits is a traditional measure of liquidity for banks and bank holding companies. At September 30, 2002, the ratio of loans and loans held for sale to total deposits was 139.3%. We are comfortable with this relatively high level due to our position in first mortgage loans held for sale and second mortgage loans financed through matched-term secured financing. The first mortgage loans carry an interest rate at or near current market rates for first mortgage loans. Since we sell a high percentage of these first mortgage loans within a 30-day period, our liquidity is significantly higher than the ratio would suggest by traditional standards. In addition, we have a total of \$0.4 billion of matched-term secured funding for our second mortgage loans. Excluding first mortgage loans held for sale and second mortgage loans funded with secured financing, the loan-to-deposit ratio was 92.6% at September 30, 2002.

Interest Rate Risk. Because not all our assets are perfectly match funded with like-term liabilities, our earnings are affected by interest rate changes. Interest rate risk is measured by the sensitivity of both net interest income and fair market value of net interest sensitive assets to changes in interest rates.

Our commercial banking, home equity lending, and commercial finance lines of business assume interest rate risk in the pricing of their loans and leases, and manage this risk by adjusting the duration of their interest sensitive liabilities and through the use of off-balance sheet hedging.

Our mortgage banking line of business assumes interest rate risk by entering into commitments to extend loans to borrowers at a fixed rate for a limited period of time. We hold closed loans only temporarily until a pool is formed and sold in a securitization or under a flow sale arrangement. To mitigate the risk that interest rates will rise between loan origination and sale, the mortgage bank buys commitments to deliver loans at a fixed price.

Our mortgage, commercial banking and home equity lending lines of business also are exposed to the risk that interest rates will decline, increasing prepayment speeds on loans and decreasing the value of servicing assets and residual interests. Some offsets to these exposures exist in the form of strong production operations, selective sales of servicing rights, match-funded asset-backed securities sales and the use of financial instruments to hedge the economic performance of the assets. The level and degree to which we hedge depends on a variety of factors, including:

- the type of risk we are trying to mitigate;
- offsetting factors elsewhere in the Corporation;
- time in the quarter (i.e., days until quarter-end);
- current level of hedging gain or loss relative to accounting and economic basis; and
- convexity and basis risk.

The following tables reflect our estimate of the present value of interest sensitive assets, liabilities, and off-balance sheet items at September 30, 2002. In addition to showing the estimated fair market value at current rates, they also provide estimates of the fair market values of interest sensitive items based upon a hypothetical move both up and down 100 and 200 basis points in the entire yield curve.

The first table is an economic analysis showing the present value impact of changes in interest rates, assuming a

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

comprehensive mark-to-market environment. The second table is an accounting analysis showing the same net present value impact, adjusted for expected GAAP treatment. Neither analysis takes into account the book values of the noninterest sensitive assets and liabilities (such as cash, accounts receivable, and fixed assets), the values of which are not directly determined by interest rates.

The analyses are based on discounted cash flows over the remaining estimated lives of the financial instruments. The interest rate sensitivities apply only to transactions booked as of September 30, 2002, although certain accounts such as "Official Checks and Due From" are "normalized" whereby the three- or six-month average balance is included rather than the quarter-end balance in order to avoid having the analysis skewed by a significant increase or decrease to an account balance at quarter-end.

The net asset value sensitivities do not necessarily represent the changes in the lines of business' net asset value that would actually occur under the given interest rate scenarios, as sensitivities do not reflect changes in value of the companies as a going concern, nor consider potential rebalancing or other hedging actions that might be taken in the future under asset/liability management.

Specifically, the volume of derivative contracts entered into to hedge mortgage servicing rights (MSRs) economically fluctuates from quarter to quarter, depending upon market conditions. We monitor hedge positions frequently and rebalance them as needed. It is unlikely that the volume of hedge positions would remain constant over large fluctuations in interest rates. MSR hedge contracts appear under the category "Interest Sensitive Financial Derivatives" in the tables below.

Also note a categorization change that first appeared last quarter whereby all non-interest bearing escrow deposits related to our first mortgage business are now being classified under the category "Deposits" in the Economic Value table below. Previously, some of these deposits were excluded from the table since they are non-interest bearing. While escrow deposits remain non-interest bearing, we believe the reclassification to be more consistent with our overall approach. The interest sensitivity of these deposits has been, and will continue to be, reported under the category "Mortgage Servicing Rights." For the September 30, 2002 Economic Value table, approximately \$470.9 million of such escrow deposits, which would have been excluded from the table prior to last quarter, are included under the category "Deposits." The change has no impact on the GAAP-Based Value table below.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Irwin Financial, like other financial services organizations, is exposed to a variety of operational risks. These risks include regulatory, reputational and legal risks as well as the potential for processing errors, internal or external fraud, failure of computer systems, and external events that are beyond the control of the corporation, such as natural disasters.

The Board of Directors of Irwin Financial Corporation has ultimate accountability for the level of operational risk assumed by the Corporation. The Board guides management by approving the business strategy and significant policies of the Corporation. Management and the Board have also established a control environment that encourages a high degree of control consciousness and raising of potential problems to senior management and the Board on a timely basis.

Pursuant to the direction from the Board, primary responsibility for the management of operational risk rests with the managers of our business units, who are responsible for establishing and maintaining internal control procedures that are appropriate for their operations. In 2002, we have started implementing a multi-year program to provide a more integrated firm-wide approach for the identification, measurement, monitoring and mitigation of operational risk. The new enterprise-wide operational risk oversight function reports to the Audit Committee of the

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

Board of Directors and to the Executive Risk Management Committee of the Corporation, which is led by the Chairman of the Board of Directors.

The financial services business is highly regulated. Statutes and regulations may change in the future, and we cannot predict what effect these changes, if made, will have on our operations. It should be noted that the supervision, regulation and examination of banks, thrifts and mortgage companies by regulatory agencies are intended primarily for the protection of depositors and other customers rather than shareholders of these institutions.

We are registered as a "bank holding company" with the Board of Governors of the Federal Reserve System under the Bank Holding Company Act of 1956, as amended and the related regulations, referred to as the BHC act. We are subject to regulation, supervision and examination by the Federal Reserve and as part of this process we must file reports and additional information with the Federal Reserve. The regulation, supervision and examinations occur at the local, state and federal levels and involve, but are not limited to, the following areas:

- minimum capital requirements
- consumer protection
- community reinvestment
- deposit insurance

Derivative Financial Instruments

We utilize certain derivative instruments that do not qualify for hedge accounting treatment under SFAS No. 133. These derivatives are accounted for as trading securities and marked to market on the income statement. While we do not seek GAAP hedge accounting treatment for the assets that these instruments are hedging, the economic purpose of these instruments is to hedge existing exposures to either interest rate risk or foreign currency risk.

We enter into forward contracts to protect against interest rate fluctuations from the date of mortgage loan commitment until the loans are sold. At December 31, 2001, we designated the portion of these transactions hedging the closed mortgage loans as hedges that qualify for hedge accounting treatment under SFAS 133. The basis of the hedged closed loans is adjusted for change in value associated with the risk being hedged. The effect of these hedging activities, which did not have a material impact on our net income, was recorded through earnings as gain from sale of loans. Hedge ineffectiveness recorded in gains from sale of loans related to these hedging activities was immaterial. Additionally, we enter into commitments to originate loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on loans intended to be sold are considered to be derivatives. At the time interest rate lock commitments are originally recorded on the balance sheet, no gain or loss is recognized. Any subsequent changes in fair value are recorded in earnings. These derivatives are recorded on the balance sheet at fair value at period end.

We hedge the fixed versus floating component of certain of our residual interests with three interest rate caps, which had a fair value of \$0.7 million and a notional amount of \$61.1 million at September 30, 2002. We classify interest rate caps as other assets on the balance sheet and carry them at their fair values. Two of the interest rate caps qualify for hedge accounting treatment under SFAS 133. As a result, adjustments to fair value for these derivatives are recorded through accumulated other comprehensive income. We record adjustments to fair value for the third interest rate cap as other income on the income statement. For the nine months ended September 30, 2002, we recorded a \$79 thousand loss in other income and \$89 thousand loss in accumulated other comprehensive income related to these derivative products.

We hedged our mortgage servicing rights through the use of Eurodollar futures contracts and interest rate options. For the three- and nine-month periods ended September 30, 2002, we recorded gains of \$81.2 million and \$118.5 million, respectively, on these hedges. Both the futures contracts and options were marked-to-market and included in other assets with changes in value recorded in the income statement as other income. At September 30, 2002, we held \$22.1 billion in notional amount of Eurodollar contracts, with expirations ranging from the fourth quarter of 2002 to the first quarter of 2009. The indices underlying these Eurodollar futures contracts are the current and future

three-month LIBOR rates. We also held open swaption positions with a notional value totaling \$3.8 billion at September 30, 2002, with a final maturity of October 1, 2002. These instruments are traded throughout the quarter so period-end positions may or may not be indicative of our near-term net risk exposure.

Onset Capital Corporation uses two interest rate swaps to reduce repricing risk associated with one of its funding sources. The interest rate risk is created due to a repricing mismatch between the fixed-rate payment stream from leasing assets and floating rate funding. The notional amounts of the swaps were \$7.0 million and \$5.3 million as of September 30, 2002. The notional values of both interest rate swaps amortize on a schedule designed to approximate the principal pay down of the lease portfolio, and have an average remaining maturity of approximately seven months.

We own foreign currency forward contracts to protect the US dollar value of intercompany loans made to Onset Capital Corporation that are denominated in Canadian dollars. We had a notional amount of \$73.3 million in forward contracts outstanding as of September 30, 2002. For the nine months ended September 30, 2002, we recognized gains on these contracts of \$0.1 million. These contracts are marked-to-market with gains and losses included in other expense on the income statement. The foreign currency transaction gain was \$0.2 million during the nine-month period ended September 30, 2002.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The quantitative and qualitative disclosures about market risk are reported in the Risk Management section of Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, found on pages 44 through 50.

Item 4. Controls and Procedures.

As of September 30, 2002, we performed an evaluation under the supervision and with the participation of our management, including the CEO and CFO, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-14(c)). Based on that evaluation, our management, including the CEO and CFO, concluded that our disclosure controls and procedures were effective as of September 30, 2002, to ensure that material information relating to the Corporation would be made known to them by others within the Corporation, particularly during the period in which the Form 10-Q was being prepared. While we have concluded that our disclosure controls and procedures are adequate in all material respects for SEC reporting purposes, we are addressing ways to improve the time frame in which we complete the quarterly analysis of mortgage servicing impairment at our commercial banking subsidiary to reduce the likelihood of changes after we have publicly released quarterly results, as discussed below.

As noted in our Form 8-K filing dated November 14, 2002, we discovered during the preparation of our third quarter Form 10-Q that certain mortgage servicing rights valuation testing procedures for our commercial banking line of business' residential mortgage servicing portfolio had not been performed in a manner consistent with the method utilized at our mortgage banking line of business. As a result, we determined it was appropriate to file the 8-K reporting the revision of third quarter net income prior to the filing of the third quarter 10-Q. We have put into place additional control procedures to address the fact that the appropriate impairment testing was not completed in adequate time to be analyzed as part of our earnings release announcement. With this exception, there have been no significant changes in our internal controls or in other factors that could significantly affect internal controls subsequent to our most recent evaluation of internal controls, nor any significant deficiencies or material weaknesses in such controls requiring corrective actions. As a result, no other corrective actions were required or taken.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

Culpepper v. Inland Mortgage Corporation

Our subsidiary, Irwin Mortgage Corporation, formerly known as Inland Mortgage Corporation, is the defendant in this class action lawsuit in the United States District Court for the Northern District of Alabama. The suit alleges that Irwin Mortgage violated the federal Real Estate Settlement Procedures Act (RESPA) relating to Irwin Mortgage's payment of broker fees to mortgage brokers. A second suit, *Beggs v. Irwin Mortgage*, was filed September 2001 seeking consolidation with this case. In July 2001, the plaintiffs filed a motion for partial summary judgment in *Culpepper* asking the court to find Irwin Mortgage summarily liable for violating RESPA. Irwin Mortgage filed a motion in opposition and these motions have been pending before the district court.

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

In November, 2001, by order of the district court, the parties filed supplemental briefs analyzing the impact of a new HUD policy statement that explicitly disagrees with the judicial interpretation of RESPA by the Court of Appeals for the 11th Circuit in its ruling upholding class certification in this case. Irwin Mortgage filed a petition for certiorari with the United States Supreme Court seeking review of the 11th Circuit's class certification ruling and also filed a motion in the district court seeking a stay of further proceedings until the 11th Circuit renders decisions in the three other RESPA cases pending before it. The Supreme Court denied Irwin Mortgage's petition. On March 8, 2002, the district court granted Irwin Mortgage's motion to stay proceedings in this case until the 11th Circuit decides the other RESPA cases pending in that court. On September 18, 2002, the 11th Circuit reversed the grant of class certification in one of these cases. We believe the reversal provides grounds to decertify the class in *Culpepper*. However, the stay in the proceedings continues in effect in *Culpepper*, and the district court has not yet taken action. The *Beggs* case has been stayed as well.

If the class is not decertified and the district court finds that Irwin Mortgage violated RESPA, Irwin Mortgage could be liable for damages equal to three times the amount of that portion of payments made to the mortgage brokers that is ruled unlawful. Based on notices sent by the *Culpepper* plaintiffs to date to potential class members and additional notices that might be sent, we believe the *Culpepper* class is not likely to exceed 32,000 borrowers who meet the class specifications. We also have other class action lawsuits filed against us alleging RESPA violations and other claims based on payments similar to those at issue in the *Culpepper* case, but in one case arguing different RESPA violations. These related lawsuits filed against us after *Culpepper*, some of which are subject to a similar stay of proceedings, seek class certification of additional borrowers on a different basis than that recently overruled by the Court of Appeals for the 11th Circuit.

We intend to vigorously defend these lawsuits and believe we have available numerous defenses to the claims. However, we expect that an adverse outcome in *Culpepper* or *Beggs* could result in substantial monetary damages that could be material to our financial position. We have not established any reserves for *Culpepper* or *Beggs* or for the other subsequently-filed cases, and at this stage of the litigation we are unable to determine their outcomes or a reasonable estimate of potential loss.

Thompson v. Irwin Union Bank and Trust Company and Irwin Home Equity Corporation

On May 9, 2001, Irwin Union Bank and Trust Company and Irwin Home Equity Corporation (Irwin), received notice that they were named as defendants in a lawsuit filed in the U.S. District Court for the District of Rhode Island. The suit alleged that Irwin's disclosures and closing procedure for certain home equity loans did not comply with certain provisions of the Truth in Lending Act. The suit also requested that the court certify a plaintiff class in this action. On June 18, 2001, Irwin filed a motion to compel arbitration pursuant to the provisions in the home equity loan agreement. On October 20, 2001 the district court entered judgment in favor of Irwin compelling arbitration and dismissing the plaintiffs' complaint. The plaintiffs appealed and in August, 2002, the appeals court upheld the judgment in our favor compelling arbitration and dismissing the case. The time has expired for plaintiffs to file a petition for rehearing with the court of appeals, and we consider this case concluded. Should arbitration occur, we do not expect to suffer a material loss in connection with this matter.

McIntosh v. Irwin Home Equity Corporation

Our subsidiary, Irwin Union Bank and Trust Company, is a defendant in a purported class action lawsuit filed in the U.S. District Court in Massachusetts in July 2001. The case involves loans purchased by Irwin Union Bank from FirstPlus, an unaffiliated third-party lender, and alleges a failure to comply with certain truth in lending disclosure requirements in making second mortgage home equity loans to the plaintiff borrowers. The complaint seeks rescission of the loans and other damages.

On September 30, 2002, the court granted plaintiffs' motion for certification of a class, subject to certain limitations. We filed a motion for reconsideration with the district court and a petition for permission to appeal the class certification decision with the Court of Appeals for the 1st Circuit.

If the class is ultimately upheld, the actual number of plaintiff borrowers will be determined only after a review of loan files. As specified, the plaintiff class is limited to those borrowers who obtained a mortgage loan originated with prepayment penalty provisions by FirstPlus during the three-year period prior to the filing of the suit. Only high-rate loans that are subject to the provisions of the Home Ownership and Equity Protection Act of 1994 would be included in the class. Although discovery has not yet commenced, we believe that out of approximately 200 loans acquired directly from FirstPlus through our correspondent lending channel and approximately 7,800 loans acquired from other parties in certain bulk acquisitions that may include FirstPlus originations, only a portion of these loans will satisfy all of the criteria for inclusion in the class.

We believe we have available numerous defenses to the allegations and intend to vigorously defend this lawsuit. Because this case is in the early stages of litigation, we are unable to form a reasonable estimate of potential loss, if any, and have not established any reserves related to this case.

We and our subsidiaries are from time to time engaged in various matters of litigation including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims to the ownership of funds in

Edgar Filing: IRWIN FINANCIAL CORPORATION - Form 10-Q

particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position, results of operations, or cash flows, except as described above. Reserves have been established for these various matters of litigation, when appropriate, based upon the advice of legal counsel.

Item 2. Changes in Securities and Use of Proceeds.

(c) The Corporation issued shares of common stock pursuant to elections made by six out of eight of our outside directors to receive board compensation under the 1999 Outside Director Restricted Stock Compensation Plan in lieu of cash fees as indicated in the table below. All of these shares were issued in reliance on the private placement exemption from registration provided in Section 4(2) of the Securities Act.

Date Issued	Number of Shares
September 30, 2002	1,086

Item 6. Exhibits and Reports on Form 8-K.

(a) Exhibits.

Exhibit

<u>Number</u>	<u>Description of Exhibit</u>
3.1	Restated Articles of Incorporation of Irwin Financial Corporation. (Incorporated by reference to Exhibit 3(a) to Form 10-K Report for year ended December 31, 2000, File No. 0-06835.)
3.2	Articles of Amendment to Restated Articles of Incorporation of Irwin Financial Corporation dated March 2, 2001. (Incorporated by reference to Exhibit 3(b) to Form 10-K Report for year ended December 31, 2000, File No. 0-06835.)

CERTIFICATIONS

I, William I. Miller, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Irwin Financial Corporation;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
