UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-K

x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2012,

or

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 0-10587

FULTON FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

PENNSYLVANIA

23-2195389

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

One Penn Square, P. O. Box 4887, Lancaster, Pennsylvania

17604

(Address of principal executive offices)
(717) 291-2411

(Zip Code)

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of exchange on which registered

Common Stock, \$2.50 par value

The NASDAQ Stock Market, LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes x No ..

Indicate by check mark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes .. No x

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No ..

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes x No ..

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. x

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer x

Accelerated filer ..

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting Common Stock held by non-affiliates of the registrant, based on the average bid and asked prices on June 30, 2012, the last business day of the registrant's most recently completed second fiscal quarter, was approximately \$2.0 billion. The number of shares of the registrant's Common Stock outstanding on January 31, 2013 was 198,437,000.

Portions of the Definitive Proxy Statement of the Registrant for the Annual Meeting of Shareholders to be held on April 29, 2013 are incorporated by reference in Part III.

PART I

Item 1. Business

General

Fulton Financial Corporation (the Corporation) was incorporated under the laws of Pennsylvania on February 8, 1982 and became a bank holding company through the acquisition of all of the outstanding stock of Fulton Bank on June 30, 1982. In 2000, the Corporation became a financial holding company as defined in the Gramm-Leach-Bliley Act (GLB Act), which allowed the Corporation to expand its financial services activities under its holding company structure (See "Competition" and "Supervision and Regulation"). The Corporation directly owns 100% of the common stock of six community banks and ten non-bank entities. As of December 31, 2012, the Corporation had approximately 3,570 full-time equivalent employees.

The common stock of Fulton Financial Corporation is listed for quotation on the Global Select Market of The NASDAQ Stock Market under the symbol FULT. The Corporation's internet address is www.fult.com. Electronic copies of the Corporation's 2012 Annual Report on Form 10-K are available free of charge by visiting "Investor Relations" at www.fult.com. Electronic copies of quarterly reports on Form 10-Q and current reports on Form 8-K are also available at this Internet address. These reports are posted as soon as reasonably practicable after they are electronically filed with the Securities and Exchange Commission (SEC).

Bank and Financial Services Subsidiaries

The Corporation's six subsidiary banks are located primarily in suburban or semi-rural geographical markets throughout a five-state region (Pennsylvania, Delaware, Maryland, New Jersey and Virginia). Each of these banking subsidiaries delivers financial services in a highly personalized, community-oriented style, and decisions are generally made by the local management team in each market. Where appropriate, operations are centralized through common platforms and back-office functions.

From time to time, in some markets and in certain circumstances, merging subsidiary banks allows the Corporation to leverage one bank's stronger brand recognition over a larger market. It also enables the Corporation to create operating and marketing efficiencies and avoid direct competition among subsidiary banks. For example, in October 2011, the former Skylands Community Bank subsidiary consolidated with the former The Bank subsidiary to become Fulton Bank of New Jersey. In 2010, the former Delaware National Bank subsidiary consolidated into Fulton Bank, N.A. The Corporation's subsidiary banks are located in areas that are home to a wide range of manufacturing, distribution, health care and other service companies. The Corporation and its banks are not dependent upon one or a few customers or any one industry, and the loss of any single customer or a few customers would not have a material adverse impact on any of the subsidiary banks.

Each of the subsidiary banks offers a full range of consumer and commercial banking products and services in its local market area. Personal banking services include various checking account and savings deposit products, certificates of deposit and individual retirement accounts. The subsidiary banks offer a variety of consumer lending products to creditworthy customers in their market areas. Secured consumer loan products include home equity loans and lines of credit, which are underwritten based on loan-to-value limits specified in the Corporation's lending policy. Subsidiary banks also offer a variety of fixed and variable-rate products, including construction loans and jumbo loans.

Residential mortgages are offered through Fulton Mortgage Company, which operates as a division of each subsidiary bank. Consumer loan products also include automobile loans, automobile and equipment leases, personal lines of credit and checking account overdraft protection.

Commercial banking services are provided to small and medium sized businesses (generally with sales of less than \$100 million) in the subsidiary banks' market areas. The maximum total lending commitment to an individual borrower was \$39.0 million as of December 31, 2012, which is below the Corporation's regulatory lending limit. Commercial lending options include commercial, financial, agricultural and real estate loans. Floating, adjustable and fixed rate loans are provided, with floating and adjustable rate loans generally tied to an index such as the Prime Rate or the London Interbank Offered Rate. The Corporation's commercial lending policy encourages relationship banking and provides strict guidelines related to customer creditworthiness and collateral requirements. In addition, equipment leasing, letters of credit, cash management services and traditional deposit products are offered to commercial customers.

The Corporation also offers investment management, trust, brokerage, insurance and investment advisory services to consumer and commercial banking customers in the market areas serviced by the subsidiary banks.

The Corporation's subsidiary banks deliver their products and services through traditional branch banking, with a network of full service branch offices. Electronic delivery channels include a network of automated teller machines, telephone banking, mobile banking and online banking. The variety of available delivery channels allows customers to access their account information and perform certain transactions, such as transferring funds and paying bills, at virtually any hour of the day.

The following table provides certain information for the Corporation's banking subsidiaries as of December 31, 2012:

Subsidiary	Main Office Location	Total Assets (dollars in millions)	Total Deposits	Branches (1)
Fulton Bank, N.A.	Lancaster, PA	\$9,194	\$6,717	119
Fulton Bank of New Jersey	Mt. Laurel, NJ	3,335	2,746	71
The Columbia Bank	Columbia, MD	1,997	1,541	39
Lafayette Ambassador Bank	Bethlehem, PA	1,406	1,105	23
FNB Bank, N.A.	Danville, PA	360	289	8
Swineford National Bank	Middleburg, PA	299	251	7
				267

(1) Remote service facilities (mainly stand-alone automated teller machines) are excluded. See additional information in "Item 2. Properties."

Non-Bank Subsidiaries

The Corporation owns 100% of the common stock of six non-bank subsidiaries which are consolidated for financial reporting purposes: (i) Fulton Reinsurance Company, LTD, which engages in the business of reinsuring credit life and accident and health insurance directly related to extensions of credit by the banking subsidiaries of the Corporation; (ii) Fulton Financial Realty Company, which holds title to or leases certain properties upon which Corporation branch offices and other facilities are located; (iii) Central Pennsylvania Financial Corp., which owns certain limited partnership interests in partnerships invested primarily in low and moderate income housing projects; (iv) FFC Management, Inc., which owns certain investment securities and other passive investments; (v) FFC Penn Square, Inc., which owns trust preferred securities issued by a subsidiary of Fulton Bank, N.A; and (vi) Fulton Insurance Services Group, Inc., which engages in the sale of various life insurance products.

The Corporation owns 100% of the common stock of four non-bank subsidiaries which are not consolidated for financial reporting purposes. The following table provides information for these non-bank subsidiaries, whose sole assets consist of junior subordinated deferrable interest debentures issued by the Corporation, as of December 31, 2012 (dollars in thousands):

Subsidiary	State of Incorporation	Total Assets
Fulton Capital Trust I	Pennsylvania	\$ 154,640
Columbia Bancorp Statutory Trust	Delaware	6,186
Columbia Bancorp Statutory Trust II	Delaware	4,124
Columbia Bancorp Statutory Trust III	Delaware	6,186

Competition

The banking and financial services industries are highly competitive. Within its geographical region, the Corporation's subsidiaries face direct competition from other commercial banks, varying in size from local community banks to larger regional and national

banks, credit unions and non-bank entities. With the growth in electronic commerce, the banks also face competition from financial institutions that do not have a physical presence in the Corporation's geographical markets.

The industry is also highly competitive due to the GLB Act. Under the GLB Act, banks, insurance companies or securities firms may affiliate under a financial holding company structure, allowing expansion into non-banking financial services activities that were previously restricted. These include a full range of banking, securities and insurance activities, including securities and insurance underwriting, issuing and selling annuities and merchant banking activities. While the Corporation does not currently engage in all of these activities, the ability to do so without separate approval from the Federal Reserve Board (FRB) enhances the ability of the Corporation – and financial holding companies in general – to compete more effectively in all areas of financial services.

As a result of the GLB Act, there is a great deal of competition for customers that were traditionally served by the banking industry. While the GLB Act increased competition, it also provided opportunities for the Corporation to expand its financial services offerings. The Corporation competes through the variety of products that it offers and the quality of service that it provides to its customers. However, there is no guarantee that these efforts will insulate the Corporation from competitive pressure, which could impact its pricing decisions for loans, deposits and other services and could ultimately impact financial results.

Market Share

Although there are many ways to assess the size and strength of banks, deposit market share continues to be an important industry statistic. This publicly available information is compiled as of June 30 of each year by the Federal Deposit Insurance Corporation (FDIC). The Corporation's banks maintain branch offices in 53 counties across five states. In eight of these counties, the Corporation ranked in the top three in deposit market share (based on deposits as of June 30, 2012). The following table summarizes information about the counties in which the Corporation has branch offices and its market position in each county.

County	State	Population (2012 Est.)	Banking Subsidiary	No. of Financial Institutions		Deposit Market Share (June 30, 2012)		
				Banks/ Thrifts	Credit Unions	Rank	%	
Lancaster	PA	528,000	Fulton Bank, N.A.	18	11	2	24.3	%

Supervision and Regulation

The Corporation operates in an industry that is subject to various laws and regulations that are enforced by a number of federal and state agencies. Changes in these laws and regulations, including interpretation and enforcement activities, could impact the cost of operating in the financial services industry, limit or expand permissible activities or affect competition among banks and other financial institutions.

The following discussion summarizes the current regulatory environment for financial holding companies and banks, including a summary of the more significant laws and regulations.

Regulators – The Corporation is a registered financial holding company, and its subsidiary banks are depository institutions whose deposits are insured by the FDIC. The Corporation and its subsidiaries are subject to various regulations and examinations by regulatory authorities. The following table summarizes the charter types and primary regulators for each of the Corporation’s subsidiary banks:

Subsidiary	Charter	Primary Regulator(s)
Fulton Bank, N.A.	National	OCC
Fulton Bank of New Jersey	NJ	NJ/FDIC
The Columbia Bank	MD	MD/FDIC
Lafayette Ambassador Bank	PA	PA/FRB
FNB Bank, N.A.	National	OCC

Swineford National Bank	National	OCC
Fulton Financial (Parent Company)	N/A	FRB

OCC - Office of the Comptroller of the Currency.

Federal statutes that apply to the Corporation and its subsidiaries include the GLB Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), the Bank Holding Company Act (BHCA), the Federal Reserve Act and the Federal Deposit Insurance Act, among others. In general, these statutes and related interpretations establish the eligible business activities of the Corporation, certain acquisition and merger restrictions, limitations on intercompany transactions, such as loans and dividends, and capital adequacy requirements, among other statutes and regulations.

6

The Corporation is subject to regulation and examination by the FRB, and is required to file periodic reports and to provide additional information that the FRB may require. In addition, the FRB must approve certain proposed changes in organizational structure or other business activities before they occur. The BHCA imposes certain restrictions upon the Corporation regarding the acquisition of substantially all of the assets of or direct or indirect ownership or control of any bank for which it is not already the majority owner.

Regulatory Reforms – The Dodd-Frank Act was enacted in July 2010 and resulted in significant financial regulatory reform. The Dodd-Frank Act also changed the responsibilities of the current federal banking regulators. Among other things, the Dodd-Frank Act created the Financial Stability Oversight Council, with oversight authority for monitoring and regulating systemic risk, and the Consumer Financial Protection Bureau (CFPB), which will have broad regulatory and enforcement powers over consumer financial products and services. The scope of the Dodd-Frank Act impacts many aspects of the financial services industry, and it requires the development and adoption of numerous regulations, many of which have not yet been issued. The effects of the Dodd-Frank Act on the financial services industry will depend, in large part, upon the extent to which regulators exercise the authority granted to them under the Dodd-Frank Act and the approaches taken in implementing regulations. Additional uncertainty regarding the effects of the Dodd-Frank Act exists due to court decisions and the potential for additional legislative changes to the Dodd-Frank Act. The Corporation is continuing to assess the potential impact of the Dodd-Frank Act.

The Dodd-Frank Act's provisions that have received the most public attention have generally been those which have, or will apply only to larger institutions with total consolidated assets of \$50 billion or more. However, the Dodd-Frank Act contains numerous other provisions that affect all bank holding companies, including the Corporation.

The following is a listing of significant provisions of the Dodd-Frank Act, and, if applicable, the resulting regulatory rules adopted, that have, or will, most directly affect the Corporation and its subsidiaries:

Federal deposit insurance – On April 1, 2011, the FDIC's revised deposit insurance assessment base changed from total domestic deposits to average total assets, minus average tangible equity. In addition, the Dodd-Frank Act created a two scorecard system, one for large depository institutions that have more than \$10 billion in assets and another for highly complex institutions that have over \$50 billion in assets. See details under the heading "Federal Deposit Insurance" below.

Debit card interchange fees – In June 2011, the FRB adopted regulations which became effective on October 1, 2011 and set maximum permissible interchange fees issuers can receive or charge on debit card transactions.

Interest on demand deposits – Beginning in July 2011, depository institutions were no longer prohibited from paying interest on business transaction and other accounts.

Stress testing – In October 2012, the FRB issued final rules regarding company-run stress testing. The rules will require institutions with average total consolidated assets in excess of \$10 billion, but less than \$50 billion, to conduct an annual stress test in the manner specified, and using assumptions for baseline, adverse and severely adverse scenarios announced by the FRB. The stress test is designed to assess the potential impact of the various scenarios on the Corporation's earnings, capital levels and capital ratios over at least a nine-quarter time horizon. The Corporation's board of directors and its senior management will be required to consider the results of the stress test in the normal course of business, including as part of its capital planning process and the evaluation of the adequacy of its capital. As required, the Corporation will use data as of September 30, 2013 to conduct the stress test, using scenarios that are to be released in November 2013. Stress test results must be reported to the FRB in March 2014. Public disclosure of summary stress test results under the severely adverse scenario will begin in June 2015 for stress tests commencing in the fall of 2014. While the Corporation believes that both the quality and magnitude of its capital base are sufficient to support its current operations given its risk profile, the results of the stress testing process may lead the Corporation to retain additional capital or alter the mix of its capital components.

Qualified mortgages - As required by the Dodd-Frank Act, the CFPB issued a series of final rules in January 2013 related to mortgage loan origination and mortgage loan servicing. These final rules, most provisions of which became effective January 10, 2014, prohibit creditors, such as the Corporation and its subsidiaries, from extending mortgage loans without regard for the consumer's ability to repay and add restrictions and requirements to mortgage origination and servicing practices. In addition, these rules restrict the imposition of prepayment penalties and compensation practices relating to mortgage loan origination. Compliance with these rules will likely increase the Corporation's

overall regulatory compliance costs and may require changes to the underwriting practices of the Corporation's subsidiaries with respect to mortgage loans. Moreover, these rules may adversely affect the volume of mortgage loans that are underwritten by the Corporation's subsidiaries and may subject the Corporation and/or its subsidiaries to increased potential liability related to such residential loan origination activities.

7

Incentive compensation – As required by the Dodd-Frank Act, a joint interagency proposed regulation was issued in April 2011. The proposed rule would require the reporting of incentive-based compensation arrangements by a covered financial institution and prohibit incentive-based compensation arrangements at a covered financial institution that provides excessive compensation or that could expose the institution to inappropriate risks that could lead to material financial loss. The proposed rule, if adopted as currently proposed, could limit the manner in which the Corporation structures incentive compensation for its executives.

In addition to the above provisions, the Dodd-Frank Act also requires regulatory agencies to adopt the following other significant rules that, because of its business practices and size, are not likely to impact the Corporation, as follows: CFPB – Effective July 21, 2011, the CFPB became responsible for administering and enforcing numerous federal consumer financial laws enumerated in the Dodd-Frank Act. The Dodd-Frank Act also provided that for banks with total assets of more than \$10 billion, the CFPB would have exclusive or primary authority to examine those banks for, and enforce compliance with, the federal consumer financial laws. As of December 31, 2012, none of the Corporation's subsidiary banks had total assets of more than \$10 billion, however, its largest subsidiary bank, Fulton Bank, N. A., had \$9.2 billion in assets as of December 31, 2012. The Corporation's subsidiary banks, however, remain subject to the review and supervision of other applicable regulatory authorities and such authorities may enforce compliance with regulations issued by the CFPB.

Comprehensive Capital Analysis and Review Rules (CCAR Rules) – In November 2011, the FRB adopted rules requiring bank holding companies with total consolidated assets of \$50 billion or more to submit annual capital plans to the FRB. The payment of dividends and the repurchase of stock may only be permitted under capital plans approved by the FRB. Based on its current asset size of \$16.5 billion, the Corporation is well below the \$50 billion threshold which would require compliance with the proposed CCAR Rules. However, while these rules would not be applicable to the Corporation, regulators could evaluate whether proposed dividend payments or stock repurchases by the Corporation represent unsafe or unsound practices in the future.

Volcker Rule – As required by the Dodd-Frank Act, a joint interagency proposed regulation was issued in October 2011 that prohibits a banking entity and nonbank financial company supervised by the FRB from engaging in proprietary trading or having certain ownership interests in, or relationships with, a hedge fund or private equity fund. The Corporation believes that it does not currently engage in the activities or have any interests or relationships, as defined in the proposed regulation, which are prohibited. However, the proposed regulation, if adopted, would place further compliance burdens on the Corporation to develop policies and procedures that ensure the Corporation, on an ongoing basis, does not engage in any activities or relationships which are prohibited.

Capital Requirements – There are a number of restrictions on financial and bank holding companies and FDIC-insured depository subsidiaries that are designed to minimize potential loss to depositors and the FDIC insurance funds. If an FDIC-insured depository subsidiary is "undercapitalized," the bank holding company is required to ensure (subject to certain limits) the subsidiary's compliance with the terms of any capital restoration plan filed with its appropriate banking agency. Also, a bank holding company is required to serve as a source of financial strength to its depository institution subsidiaries and to commit resources to support such institutions in circumstances where it might not do so absent such policy. Under the BHCA, the FRB has the authority to require a bank holding company to terminate any activity or to relinquish control of a non-bank subsidiary upon the FRB's determination that such activity or control constitutes a serious risk to the financial soundness and stability of a depository institution subsidiary of the bank holding company.

Bank holding companies are required to comply with the FRB's risk-based capital guidelines that require a minimum ratio of total capital to risk-weighted assets of 8.00%. At least half of the total capital is required to be Tier 1 capital. In addition to the risk-based capital guidelines, the FRB has adopted a minimum leverage capital ratio under which a bank holding company must maintain a level of Tier 1 capital to average total consolidated assets of at least 3.00% in the case of a bank holding company which has the highest regulatory examination rating and is not contemplating significant growth or expansion. For all other bank holding companies, the minimum ratio of Tier 1 capital to total assets is 4.00%. Banking organizations with supervisory, financial, operational, or managerial weaknesses, as well as organizations that are anticipating or experiencing significant growth, are expected to maintain capital ratios well above the minimum levels. Moreover, higher capital ratios may be required for any bank holding company if warranted by its particular circumstances or risk profile. In all cases, bank holding companies should hold capital

commensurate with the level and nature of the risks, including the volume and severity of problem loans, to which they are exposed.

The Basel Committee on Banking Supervision (Basel) is a committee of central banks and bank regulators from major industrialized countries that develops broad policy guidelines for use by each country's regulators with the purpose of ensuring that financial institutions have adequate capital given the risk levels of assets and off-balance sheet financial instruments.

In December 2010, Basel released a framework for strengthening international capital and liquidity regulations, referred to as Basel III. Basel III includes defined minimum capital ratios, which must be met when implementation occurs. An additional "capital conservation buffer" will increase the minimum rates by 2.50%, when fully phased-in. Fully phased-in capital standards under Basel III will require banks to maintain more capital than the minimum levels required under current regulatory capital standards. As Basel III is only a framework, the specific changes in capital requirements are to be determined by each country's banking regulators.

In June 2012, U.S. Federal banking regulators released two notices of proposed rulemaking (NPRs) that would implement the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act. A third NPR related to banks that are internationally active or that are subject to market risk rules is not applicable to the Corporation.

The first NPR, "Regulatory Capital Rules: Regulatory Capital, Implementation of Basel III, Minimum Regulatory Capital Ratios, Capital Adequacy, Transition Provisions, and Prompt Corrective Action," would come into effect on January 1, 2013 and the new minimum regulatory capital requirements would be fully phased in on January 1, 2019. However, the final rules have not yet been issued and are not yet applicable to the Corporation.

This NPR would apply to all depository institutions, bank holding companies with total consolidated assets of \$500 million or more, and savings and loan holding companies (collectively, banking organizations). Consistent with the international Basel framework, this NPR would:

- Increase the quantity and quality of capital required by proposing a new minimum Common Equity Tier 1 capital ratio of 4.50% of risk-weighted assets and raising the minimum Tier 1 capital ratio from 4.00% to 6.00% of risk-weighted assets;

- Retain the current minimum Total capital ratio of 8.00% of risk-weighted assets and the minimum Tier 1 leverage capital ratio at 4.00% of average assets;

- Introduce a "capital conservation buffer" of 2.50% above the minimum risk-based capital requirements, which must be maintained to avoid restrictions on capital distributions and certain discretionary bonus payments; and

- Revise the definition of capital to improve the ability of regulatory capital instruments to absorb losses.

The second NPR, "Regulatory Capital Rules: Standardized Approach for Risk-weighted Assets; Market Discipline and Disclosure Requirements," also would apply to all banking organizations. This NPR would revise and harmonize the rules for calculating risk-weighted assets to enhance risk sensitivity and address weaknesses that have been identified over the past several years. Banks and regulators use risk weighting to assign different levels of risk to different classes of assets and off-balance sheet exposures - riskier items require higher capital cushions and less risky items require smaller capital cushions. As proposed, this NPR would come into effect on January 1, 2015; however, final rules have not been issued.

As of December 31, 2012, the Corporation believes its current capital levels would meet the fully-phased in minimum capital requirements, including capital conservation buffers, as proposed in the NPRs.

The Basel III framework also includes new liquidity requirements which, when implemented by U.S. bank regulators, may require the Corporation to maintain increased levels of liquid assets or alter its strategies for liquidity management. The Basel III liquidity framework requires banks and bank holding companies to measure their liquidity against specific ratios. One ratio, referred to as the Liquidity Coverage Ratio, or LCR, is designed to ensure that sufficient high quality liquid resources are available for a one month survival in case of a stress scenario. A second ratio, referred to as the Net Stable Funding Ratio (NSFR), is designed to promote resiliency over longer-term time horizons by creating additional incentives for banks to fund their activities with more stable sources of funding on an ongoing structural basis. These new liquidity standards are subject to further rulemaking and their terms may change before implementation. U.S. bank regulators have not proposed rules implementing the Basel III liquidity framework and have not determined to what extent they will apply to U.S. banks that are not large, internationally active banks. Loans and Dividends from Subsidiary Banks – There are also various restrictions on the extent to which the Corporation and its non-bank subsidiaries can receive loans from its banking subsidiaries. In general, these restrictions require that such loans be secured by designated amounts of specified collateral and are limited, as to any one of the Corporation or its non-bank subsidiaries, to 10% of the lending bank's regulatory capital (20% in the aggregate to all such entities).

Liquidity must also be managed at the Fulton Financial Corporation Parent Company level. For safety and soundness reasons, banking regulations limit the amount of cash that can be transferred from subsidiary banks to the Parent

Company in the form of loans and dividends. Dividend limitations vary, depending on the subsidiary bank's charter and whether or not it is a member of the Federal Reserve System. Generally, subsidiaries are prohibited from paying dividends when doing so would cause them to fall below the regulatory minimum capital levels. Additionally, limits may exist on paying dividends in excess of net income for

9

specified periods. See Note K, "Regulatory Matters," in the Notes to Consolidated Financial Statements for additional information regarding regulatory capital and dividend and loan limitations.

Federal Deposit Insurance – Substantially all of the deposits of the Corporation's subsidiary banks are insured up to the applicable limits by the Deposit Insurance Fund (DIF) of the FDIC, generally up to \$250,000 per insured depositor.

The Corporation's subsidiary banks are subject to deposit insurance assessments to maintain the DIF.

The subsidiary banks pay deposit insurance premiums based on assessment rates established by the FDIC. The FDIC has established a risk-based assessment system under which institutions are classified and pay premiums according to their perceived risk to the Federal deposit insurance funds. The FDIC is not required to charge deposit insurance premiums when the ratio of deposit insurance reserves to insured deposits is maintained above specified levels.

In November 2009, the FDIC issued a ruling requiring insured depository institutions to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. As of

December 31, 2012, the balance of prepaid FDIC assessments included in other assets on the Corporation's consolidated balance sheet was \$23.6 million.

On April 1, 2011, as required by the Dodd-Frank Act, the deposit insurance assessment base changed from total domestic deposits to average total assets, minus average tangible equity. In addition, the FDIC also created a two scorecard system, one for large depository institutions that have \$10 billion or more in assets and another for highly complex institutions that have \$50 billion or more in assets. As of December 31, 2012, none of the Corporation's individual subsidiary banks had assets of \$10 billion or more and would, therefore, not meet the classification of large depository institutions.

USA Patriot Act – Anti-terrorism legislation enacted under the USA Patriot Act of 2001 (Patriot Act) expanded the scope of anti-money laundering laws and regulations and imposed significant new compliance obligations for financial institutions, including the Corporation's subsidiary banks. These regulations include obligations to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing.

Failure to comply with the Patriot Act's requirements could have serious legal, financial and reputational consequences. The Corporation has adopted policies, procedures and controls to address compliance with the Patriot Act and will continue to revise and update its policies, procedures and controls to reflect required changes.

Sarbanes-Oxley Act of 2002 – The Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley), which was signed into law in July 2002, impacts all companies with securities registered under the Securities Exchange Act of 1934, including the Corporation. Sarbanes-Oxley created new requirements in the areas of corporate governance and financial disclosure including, among other things, (i) increased responsibility for Chief Executive Officers and Chief Financial Officers with respect to the content of filings with the SEC; (ii) enhanced requirements for audit committees, including independence and disclosure of expertise; (iii) enhanced requirements for auditor independence and the types of non-audit services that auditors can provide; (iv) accelerated filing requirements for SEC reports; (v) disclosure of a code of ethics; (vi) increased disclosure and reporting obligations for companies, their directors and their executive officers; and (vii) new and increased civil and criminal penalties for violations of securities laws. Many of the provisions became effective immediately, while others became effective as a result of rulemaking procedures delegated by Sarbanes-Oxley to the SEC.

Section 404 of Sarbanes-Oxley requires management to issue a report on the effectiveness of its internal controls over financial reporting. In addition, the Corporation's independent registered public accountants are required to issue an opinion on the effectiveness of the Corporation's internal control over financial reporting. These reports can be found in Item 8, "Financial Statements and Supplementary Data." Certifications of the Chief Executive Officer and the Chief Financial Officer as required by Sarbanes-Oxley and the resulting SEC rules can be found in the "Signatures" and "Exhibits" sections.

Executive Officers

As of December 31, 2012, the executive officers of the Corporation are as follows:

Name	Age	Office Held and Term of Office
R. Scott Smith, Jr.	65	Director of Fulton since 2001. Mr. Smith retired as Chairman of the Board and Chief Executive Officer of Fulton as of January 1, 2013. He served as Chairman of the Board and Chief Executive Officer from January 2006 to December 2012 and also served as a Director of Fulton Bank from 1993 to 2002. He has been a Director of The Federal Reserve Bank of Philadelphia from 2010 to present and a member of the Federal Advisory Council to the Federal Reserve Board, Washington, DC from 2008 to 2010. Mr. Smith was a Director of the American Bankers Association from 2006 to 2009, was employed by Fulton from 1978 to 2012 in various positions and worked in financial services since 1969.
E. Philip Wenger	55	Director of Fulton since 2009. Mr. Wenger was appointed Chairman of the Board, President and Chief Executive Officer of Fulton Financial Corporation on January 1, 2013. He previously served as President and Chief Operating Officer of Fulton Financial Corporation from 2008 to 2012, a Director of Fulton Bank from 2003 to 2009, Chairman of Fulton Bank from 2006 to 2009 and has been employed by Fulton in a number of positions since 1979.
Charles J. Nugent	64	Senior Executive Vice President and Chief Financial Officer of Fulton Financial Corporation since January 2001; and Executive Vice President and Chief Financial Officer of Fulton Financial Corporation from 1992 to 2001. Mr. Nugent has served as a director of the Federal Home Loan Bank of Pittsburgh since 2010.
Craig H. Hill	57	Senior Executive Vice President of Fulton Financial Corporation since January 2006 and Executive Vice President/Director of Human Resources from 1999 through 2005. Mr. Hill serves as the Corporation's Senior Human Resources Officer.
Craig A. Roda	56	Senior Executive Vice President of Community Banking of Fulton Financial Corporation since July 2011; and Chairman and Chief Executive Officer of Fulton Bank, N.A., since February 2009. Chief Executive Officer and President of Fulton Bank, N.A. from 2006 to 2009.
Philmer H. Rohrbaugh	60	Senior Executive Vice President and Chief Risk Officer, effective November 1, 2012. Managing partner of KPMG, LLP's Chicago office from 2009 to 2012. He originally joined KPMG in 2002 where he has held various management positions and also has more than 25 years of experience in various positions at Arthur Andersen. Mr. Rohrbaugh, who is a Certified Public Accountant, also serves on the Board of Directors of Burnham Holdings, Inc. and Ann & Robert H. Lurie's Children's Hospital of Chicago.
James E. Shreiner	63	Senior Executive Vice President of Administrative Services of Fulton Financial Corporation since January 2006; and Executive Vice President of Fulton Financial Corporation and Executive Vice President of Fulton Bank from 2000 to 2005.

Item 1A. Risk Factors

An investment in the Corporation's common stock involves certain risks, including, among others, the risks described below. In addition to the other information contained in this report, you should carefully consider the following risk factors.

While economic conditions have been improving, the Corporation continues to operate in a challenging business environment.

Since emerging from a recession during the second half of 2009, the U.S. economy has generally been improving; however, the pace of economic growth has been somewhat sluggish and uneven. There can be no assurance that this improvement will continue and certain sectors, such as real estate and manufacturing, remain weak and unemployment remains high. Some state and local governments and many businesses are still experiencing serious financial difficulty.

The current challenges affecting the Corporation, many of which are addressed in more detail below, include the following:

Low market interest rates, which have been projected by many to continue for some time, have pressured net interest margins as interest-earning assets, such as loans and investments, have been originated, acquired or repriced at lower rates. Banks are also reluctant to invest in longer-term assets at historically low interest rates;

Loan demand remains sluggish, as consumers continue to reduce debt levels and increase savings and many businesses are reluctant to expand their operations, and intense competition among lenders is contributing to downward pressure on loan yields. Confidence levels of both individuals and businesses in the economy appear to be improving, but their confidence remains fragile;

The time and expense associated with regulatory compliance and risk management efforts continues to increase. Thus, balancing the need to address regulatory expectations and to implement additional enterprise risk management practices against the need to effectively manage growth in non-interest expenses has become more challenging than it has been in the past;

- Bank regulators are scrutinizing banks through longer and more extensive bank examinations in both the safety and soundness and the compliance areas;

The bank regulatory agencies have been challenged in implementing many of the regulations mandated by the Dodd-Frank Act on the timelines contemplated by such legislation, resulting in a lack of clear regulatory guidance to banks. The resulting uncertainty has caused banks to take a cautious approach to business initiatives and planning;

The reputation of, and public confidence in, the banking industry appears to have suffered as a result of continuing criticisms of the industry by politicians and the media. In many cases, these criticisms have not differentiated community banking organizations, such as the Corporation, from larger, more diverse organizations that engaged in certain practices that many observers believe helped contribute to the recent difficulties in the financial markets and the economy generally;

Some traditional sources of non-interest income for banks, such as interchange fees assessed on debit card transactions and fees for overdraft services, have become the subject of increased regulation;

Merger and acquisition activity in the banking industry has been restrained due to factors such as market volatility, lower market prices of the stock of potential buyers, lingering credit concerns, regulatory uncertainty and a disparity in price expectations between potential buyers and potential sellers. As a result, supplementing internal growth through acquisitions has been more difficult than in the past; and

Concerns about political and financial uncertainties, such as the European Union sovereign debt crisis and the potential impact of the inability of the U.S. federal government to effectively resolve the negotiations relating to the so-called "fiscal cliff," budget sequestration and debt ceiling, have caused uncertainty for financial markets globally.

Difficult conditions in the economy and the capital markets may materially adversely affect the Corporation's business and results of operations.

The Corporation's results of operations and financial condition are affected by conditions in the capital markets and the economy generally. The Corporation's financial performance is highly dependent upon the business environment in the markets where the Corporation operates and in the U.S. as a whole. The business environment impacts the ability of borrowers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services the Corporation offers. A favorable business environment is generally characterized by, among other factors, economic growth, efficient capital markets, low inflation, low unemployment, high business and investor confidence, and strong business earnings. Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity or investor or business confidence, limitations on the availability or increases in the cost of credit and capital, increases in inflation or interest rates, high unemployment, natural disasters or a combination of these or other factors.

Included among the potential adverse effects of economic downturns on the Corporation are the following:

Economic downturns and the composition of the Corporation's loan portfolio could impact the level of loan charge-offs and the provision for credit losses and may affect the Corporation's net income. National, regional and local economic conditions can impact the Corporation's loan portfolio. For example, an increase in unemployment, a decrease in real estate values or increases in interest rates, as well as other factors, could weaken the economies of the communities the Corporation serves. Weakness in the market areas served by the Corporation may depress the Corporation's earnings and consequently its financial condition because:

borrowers may not be able to repay their loans;

the value of the collateral securing the Corporation's loans to borrowers may decline; and

the quality of the Corporation's loan portfolio may decline.

Any of these scenarios could require the Corporation to increase its provision for credit losses, which would negatively impact its results of operations and could result in charge-offs of a higher percentage of its loans.

Approximately \$5.2 billion, or 43.2%, of the Corporation's loan portfolio was in commercial mortgage and construction loans at December 31, 2012. The Corporation did not have a concentration of credit risk with any single borrower, industry or geographical location. However, the performance of real estate markets and the weak economic conditions in general may adversely impact the performance of these loans.

In 2012, the Corporation's provision for credit losses was \$94.0 million. While the Corporation believes that its allowance for credit losses as of December 31, 2012 is sufficient to cover losses inherent in the loan portfolio on that date, the Corporation may be required to increase its provision for credit losses due to changes in the risk characteristics of the loan portfolio, thereby negatively impacting its results of operations.

Economic downturns or a protracted low-growth environment, particularly when these conditions affect the Corporation's geographic market areas, could reduce the demand for the Corporation's financial products, such as loans and deposits. The Corporation's success depends significantly upon the growth in population, employment and income levels, deposits, loans and housing starts in its geographic markets. Unlike large, national institutions, the Corporation is not able to spread the risks of unfavorable local economic conditions across a large number of diversified economies and geographic locations. If the communities in which the Corporation operates do not grow, or if prevailing economic conditions locally or nationally are unfavorable, its business could be adversely affected. In addition, increased market competition in a lower demand environment could adversely affect the profit potential of the Corporation; for example, in order to remain competitive, the Corporation may be required to offer interest rates on loans and deposits that might not be offered in different business conditions.

Negative developments in the financial industry and the credit markets may subject the Corporation to additional regulation. The Corporation and its subsidiaries are subject to regulation and examinations by various regulatory authorities. Negative developments in the financial industry and the domestic and international credit markets, and the impact of legislation in response to those developments, may negatively impact the Corporation's operations and financial condition. The potential exists for new federal or state regulations regarding lending and funding practices, capital requirements, deposit insurance premiums, other bank-focused special assessments and liquidity standards. Bank regulatory agencies have been active in responding to concerns and trends identified in examinations, which may result in the issuance of formal enforcement orders, assessment of civil money penalties or informal restrictions on activities or proposed activities of regulated entities.

Changes in interest rates may have an adverse effect on the Corporation's net income.

The Corporation is affected by fiscal and monetary policies of the federal government, including those of the Federal Reserve Board, which regulates the national money supply and engages in other lending and investment activities in order to manage recessionary and inflationary pressures. Among the techniques available to the Federal Reserve Board are engaging in open market transactions of U.S. Government securities, changing the discount rate and changing reserve requirements against bank deposits. The use of these techniques may also affect interest rates charged on loans and paid on deposits.

Net interest income is the most significant component of the Corporation's net income, accounting for approximately 72% of total revenues in 2012. The narrowing of interest rate spreads, the difference between interest rates earned on loans and investments and interest rates paid on deposits and borrowings, could adversely affect the Corporation's net interest income and financial condition. Regional and local economic conditions, as well as fiscal and monetary policies of the federal government, including those of the Federal Reserve Board, may affect prevailing interest rates. The Corporation cannot predict or control changes in interest rates.

Price fluctuations in securities markets, as well as other market events, such as a disruption in credit and other markets and the abnormal functioning of markets for securities, could have an impact on the Corporation's results of

operations.

Price fluctuations in securities markets, as well as other market events, such as a disruption in credit and other markets and the abnormal functioning of markets for securities, could have an impact on the Corporation's results of operations. As described below, the Corporation's holdings of certain securities and the revenues the Corporation earns from its trust and investment management services business are particularly sensitive to those events:

Equity Investments. As of December 31, 2012, the Corporation's equity investments included common stocks of publicly traded financial institutions (totaling \$44.2 million). The value of the securities in the Corporation's equity portfolio may be affected by a number of factors, including factors that impact the performance of the U.S. securities market in general and specific risks associated with the financial institution sector. General economic conditions and uncertainty surrounding

13

the financial institution sector as a whole has impacted the value of these securities. Declines in bank stock values, in general, as well as deterioration in the performance of specific banks, could result in other-than-temporary impairment charges. The Corporation's holdings of publicly traded financial institutions include shares of a single financial institution which, as of December 31, 2012, had a fair value of \$21.6 million. The Corporation's holdings of this financial institution constituted approximately 50% of the fair value of the Corporation's aggregate holdings of publicly traded financial institutions as of that date.

Corporate Debt Securities. As of December 31, 2012, the Corporation had \$110.3 million of corporate debt securities issued by financial institutions. As with stocks of financial institutions, declines in the values of these securities, combined with adverse changes in the expected cash flows from these investments, could result in other-than-temporary impairment charges.

Municipal Securities. As of December 31, 2012, the Corporation had \$315.5 million of municipal securities issued by various municipalities in its investment portfolio. Ongoing uncertainty with respect to the financial viability of municipal insurers places greater emphasis on the underlying strength of issuers. Increasing pressure on local tax revenues of issuers due to adverse economic conditions could also have a negative impact on the underlying credit quality of issuers. The Corporation evaluates existing and potential holdings primarily on the underlying credit-worthiness of the issuing municipality and then, to a lesser extent, on the credit enhancement corresponding to the individual issuance. As of December 31, 2012, approximately 95% of municipal securities were supported by the general obligation of corresponding municipalities. In addition, approximately 79% of these securities were school district issuances that are supported by the general obligation of the corresponding municipalities as of December 31, 2012.

Auction Rate Securities. The investment management and trust services division of Fulton Bank, N.A., Fulton Financial Advisors, previously held student loan auction rate securities, also known as auction rate certificates (ARCs), for some of its customers' accounts. During 2008 and 2009, the Corporation purchased illiquid ARCs from customers of Fulton Financial Advisors. As of December 31, 2012 the Corporation had \$149.3 million of investments in ARCs. ARCs are long-term securities that were structured to allow their sale in periodic auctions, resulting in both the treatment of ARCs as short-term instruments in normal market conditions and fair values that could be derived based on periodic auction prices. However, beginning, in 2008, market auctions for these securities began to fail due to an insufficient number of buyers, resulting in an illiquid market. This illiquidity has resulted in recent market prices that represent forced liquidations or distressed sales and do not provide an accurate basis for fair value. Therefore, as of December 31, 2012, the fair values of the ARCs were derived using significant unobservable inputs based on an expected cash flows model which produced fair values which were materially different from those that would be expected from settlement of these investments in the illiquid market that presently exists. The Corporation believes that the trusts underlying the ARCs will self-liquidate as student loans are repaid.

Investment Management and Trust Services Revenue. The Corporation's investment management and trust services revenue can also be impacted by fluctuations in the securities markets. A portion of this revenue is based on the value of the underlying investment portfolios. If the values of those investment portfolios decrease, whether due to factors influencing U.S. securities markets, in general or otherwise, the Corporation's revenue could be negatively impacted. In addition, the Corporation's ability to sell its brokerage services is dependent, in part, upon consumers' level of confidence in securities markets.

The supervision and regulation to which the Corporation is subject is increasing and can be a competitive disadvantage.

The time, expense and internal and external resources associated with regulatory compliance continue to increase. Thus, balancing the need to address regulatory changes and effectively manage growth in non-interest expenses has become more challenging than it has been in the past.

The Corporation is a registered financial holding company, and its subsidiary banks are depository institutions whose deposits are insured by the Federal Deposit Insurance Corporation (FDIC). The Corporation and its bank subsidiaries are extensively regulated under federal and state banking laws and regulations that are intended primarily for the protection of depositors, federal deposit insurance funds and the banking system as a whole. In general, these laws and regulations establish: the eligible business activities for the Corporation; certain acquisition and merger restrictions; limitations on intercompany transactions such as loans and dividends; capital adequacy requirements; requirements for anti-money laundering programs; consumer lending and other compliance matters. While these statutes and regulations are generally designed to minimize potential loss to depositors and the FDIC insurance funds, they do not eliminate risk, and compliance with such statutes and regulations increases the Corporation's expense, requires management's attention and can be a disadvantage from a competitive standpoint with respect to non-regulated competitors and larger bank competitors.

Compliance with banking statutes and regulations is important to the Corporation's ability to engage in new activities and to consummate additional acquisitions. Bank regulators are scrutinizing banks through longer and more extensive bank examinations in both the safety and soundness and compliance areas. The results of such examinations could result in a delay in receiving required regulatory approvals for potential new activities and transactional matters. In the event that the Corporation's compliance record would be determined to be unsatisfactory, such approvals may not be able to be obtained. Federal and state banking regulators also possess broad powers to take supervisory actions, as they deem appropriate. These supervisory actions may result in higher capital requirements, higher deposit insurance premiums and limitations on the Corporation's operations and expansion activities that could have a material adverse effect on its business and profitability.

The federal government, the Federal Reserve Board and other governmental and regulatory bodies have taken, and may in the future take other actions, in response to the stress on the financial system. For example, the Federal Reserve Board recently announced its intention to maintain short-term interest rates near zero at least until certain unemployment and inflation targets are reached, which the Federal Reserve Board currently believes will not occur until at least mid-2015. Such actions, although intended to aid the financial markets, and continued volatility in the markets, could materially and adversely affect the Corporation's business, financial condition and results of operations, or the trading price of the Corporation's common stock.

In addition, the Corporation is subject to changes in federal and state tax laws as well as changes in banking and credit regulations, accounting principles, governmental economic and monetary policies and collection efforts by taxing authorities.

Financial reform legislation is likely to have a significant impact on the Corporation's business and results of operations; however, until more implementing regulations are adopted, the extent to which the legislation will impact the Corporation is uncertain.

On July 21, 2010, the President of the United States signed into law the Dodd-Frank Act. Among other things, the Dodd-Frank Act created the Financial Stability Oversight Council, with oversight authority for monitoring and regulating systemic risk, and the Consumer Financial Protection Bureau (CFPB), which has broad regulatory and enforcement powers over consumer financial products and services. The Dodd-Frank Act also changed the responsibilities of the current federal banking regulators, imposed additional corporate governance and disclosure requirements in areas such as executive compensation and proxy access, and limited or prohibited proprietary trading and hedge fund and private equity activities of banks.

The scope of the Dodd-Frank Act impacted many aspects of the financial services industry, and it requires the development and adoption of many regulations, a significant number of which have not yet been adopted or fully implemented. The effects of the Dodd-Frank Act on the financial services industry will depend, in large part, upon the extent to which regulators exercise the authority granted to them under the Dodd-Frank Act and the approaches taken in implementing regulations. Additional uncertainty regarding the effect of the Dodd-Frank Act exists due to court decisions and the potential for additional legislative changes to the Dodd-Frank Act. The Corporation, as well as the broader financial services industry, is continuing to assess the potential impact of the Dodd-Frank Act (and its possible impact on customers' behaviors) on its business and operations but, at this stage, the extent of the impact cannot be fully determined with any degree of certainty. However, the Corporation has been impacted, and will likely continue to be in the future, by the so-called Durbin Amendment to the Dodd-Frank Act, which reduced debit card interchange revenue of banks; and revised deposit insurance assessments. It also is likely to be impacted by the Dodd-Frank Act in the areas of corporate governance, capital requirements, risk management, stress testing and regulation under consumer protection laws.

The Dodd-Frank Act established the CFPB. Among other things, the CFPB was given rulemaking authority over most providers of consumer financial services in the U.S., examination and enforcement authority over the consumer operations of large banks, as well as interpretive authority with respect to numerous existing consumer financial services regulations. The CFPB began exercising these oversight authorities over the largest banks during 2011. Because this is an entirely new agency, the impact on the Corporation, including its retail banking and mortgage businesses, is largely uncertain. However, any new regulatory requirements, or modified interpretations of existing regulations, will affect the Corporation's consumer business practices and operations, potentially resulting in increased compliance costs. Furthermore, the CFPB represents an additional source of potential enforcement or litigation against the Corporation and, as an entirely new agency with a focus on consumer protection, the CFPB may have new or different enforcement or litigation strategies than those typically utilized by other regulatory agencies. Such actions could further increase the Corporation's costs.

The delay in the implementation of many of the regulations mandated by the Dodd-Frank Act on the timelines contemplated by such legislation has resulted in a lack of clear regulatory guidance to banks. The resulting uncertainty has caused banks to take a cautious approach to business initiatives and planning.

The Corporation may incur fines, penalties and other negative consequences from regulatory violations, including inadvertent or unintentional violations.

Virtually every aspect of the Corporation's operations is subject to extensive regulation and, in the current economic, political and regulatory climate, the Corporation and its bank subsidiaries are subject to heightened regulatory scrutiny, especially given the Corporation's size and complexity. The Corporation maintains a system of internal controls designed to achieve compliance with applicable laws and regulations for itself and its bank subsidiaries. Weaknesses in the design or effectiveness of this system, however, may expose the Corporation and its bank subsidiaries to fines and penalties for non-compliance, in some cases, even though the noncompliance was inadvertent or unintentional. Through the Corporation's compliance and internal audit functions, potential areas of regulatory non-compliance are evaluated and, if identified, are corrected with ongoing action plans developed, implemented and routinely monitored. In addition, through regular examinations, the Corporation's and its bank subsidiaries' primary bank regulators identify areas of regulatory non-compliance or weakness and require or suggest corrective actions, which are similarly corrected through ongoing corrective action plans which are developed, implemented and routinely monitored.

The failure of the Corporation to comply with applicable regulations, or the failure to develop, implement and comply with corrective action plans to address any identified areas of noncompliance, may result in the assessment of fines and penalties and the commencement of informal or formal regulatory enforcement actions against the Corporation or its bank subsidiaries. Other negative consequences also can result from such failures, including regulatory restrictions on the Corporation's activities, reputational damage (see below), restrictions on the ability of institutional investment managers to invest in the Corporation's securities and increases in the Corporation's costs of doing business. Increases in the Corporation's costs of doing business may include increased salaries and benefits expenses associated with hiring additional employees, incurring fees and expenses for outside services, such as consulting and legal advice, and costs associated with enhancing, or acquiring systems and technological infrastructure to strengthen the Corporation's regulatory compliance program. The occurrence of one or more of these events may have a material adverse effect on the Corporation's business, financial condition or results of operations.

Three of the Corporation's bank subsidiaries have been informed by their federal banking regulator that they may become subject to civil money penalties for certain alleged failures to comply with The Flood Disaster Protection Act, referred to as the Flood Act. Any such civil money penalties have yet to be finalized, but are subject to a statutory maximum of \$135,000 per institution. Each such bank subsidiary, as well as the Corporation, has taken corrective actions, including enhancing policies and procedures related to compliance with the Flood Act, allocating additional resources to the compliance and internal audit functions and affected business units, and providing appropriate training of employees, and adopted a comprehensive action plan that will be administered by such banks and by the Corporation through its central regulatory compliance function. In the event the Corporation and the affected bank subsidiaries do not implement the corrective actions and comply with their actions plans, then the Corporation and such banks may be subject to further enforcement action. The terms of any such further enforcement action, or the failure to comply with same, may have a material adverse effect on the Corporation's business, financial condition or results of operations.

The heightened, industry-wide attention associated with the processing of residential mortgage foreclosures may adversely affect the Corporation's business.

As a result of the economic downturn which began in December, 2007, larger banks and mortgage servicing companies have been challenged with processing tens of thousands of foreclosures nationwide. In late 2010, the media began reporting on possible processing errors and documentation problems in mortgage foreclosures at several of the nation's largest banks and mortgage servicing businesses. It was reported that, in some foreclosures, the procedural steps (which often vary by state and in some cases by local jurisdictions within a state) required to complete a foreclosure had not been followed. As a result, there were questions concerning the validity of some foreclosures. Since 2010 the foreclosure procedures used by banks and servicing companies have continued to come under scrutiny

by consumer advocates, attorneys representing borrowers, state Attorney Generals and banking regulators. In April 2011, federal banking regulators announced formal enforcement actions against 14 of the largest mortgage servicing firms related to deficiencies in their residential mortgage loan servicing and foreclosure processing practices. In January 2013, federal banking regulators announced that they had reached agreements in principle with 13 of those mortgage servicing firms to provide \$9.3 billion in cash compensation and mortgage assistance to residential mortgage borrowers affected by deficiencies in their residential mortgage loan servicing and foreclosure processing practices.

As a financial institution, the Corporation offers a variety of residential mortgage loan products. A majority of the mortgage loans originated by the Corporation are made in the Corporation's five-state market. The Corporation also services loans owned by investors in accordance with the investors' guidelines. A small percentage of the Corporation's residential mortgage borrowers default on their mortgage loans. When this occurs, the Corporation attempts to resolve the default in a way that provides the greatest return to the Corporation or is in accordance with investor guidelines; typically, options are pursued that allow the borrower to remain the owner of their home. However, when these efforts are not successful, it becomes necessary for the Corporation to foreclose on the loan. The Corporation analyzes whether foreclosure is necessary on a case-by-case basis and the number of

residential foreclosures undertaken by the Corporation is not substantial. The Corporation initiated approximately 325, 300 and 400 residential foreclosure actions during 2012, 2011 and 2010, respectively, for residential loans the Corporation owned or serviced for investors.

Although the number of foreclosures undertaken by the Corporation on residential mortgage loans in its portfolio or that the Corporation services for others is substantially less than those of larger banks and mortgage servicers, the Corporation has received inquiries from banking regulators, title insurance companies and others regarding its foreclosure procedures. As a result of these inquiries and the publicity surrounding the mortgage foreclosure area nationally, the Corporation has reviewed the requirements for foreclosures in each of the states where most of its foreclosures occur and its own foreclosure procedures. The Corporation has also consulted with the law firms it uses to undertake foreclosures in each of the states in its primary markets and in other states where it has substantial mortgage lending activities regarding foreclosure procedures.

In addition, in 2011, banking regulators required financial institutions to perform a self-assessment of their foreclosure management process to identify any weaknesses in their processes and to determine whether these weaknesses resulted in any financial harm to borrowers. The Corporation performed such a self-assessment in 2011. The Corporation does not expect any deficiencies that it has discovered, or which it might discover in the future, as a result of these self-assessments and consultations will have a material impact on the financial position or results of operations of the Corporation. The Corporation will continue to monitor its foreclosure procedures, and other areas of the foreclosure process, as well as future legal and regulatory developments concerning mortgage foreclosure processes in general.

The Corporation is exposed to many types of operational risk.

The Corporation is exposed to many types of operational risk, including the risk of fraud by employees and outsiders, unsatisfactory performance by employees and vendors, clerical and record-keeping errors, and computer and telecommunications systems malfunctions. The Corporation's businesses are dependent on its ability to process a large number of increasingly complex transactions. If any of the Corporation's financial, accounting, compliance or other data processing controls or systems fail or have other significant shortcomings, the Corporation could be materially adversely affected. The Corporation is similarly dependent on its employees. The Corporation could be materially adversely affected if one of its employees causes a significant operational break-down or failure, either as a result of human error or where an individual purposefully sabotages or fraudulently manipulates our operations or systems. Third parties with which the Corporation does business could also be sources of operational risk to it, including the possibilities of breakdowns or failures of such parties' systems or employees. Any of these occurrences could result in the Corporation's diminished ability to operate one or more of its businesses, financial loss, potential liability to customers, inability to secure insurance, reputational damage and regulatory intervention, which could materially adversely affect the Corporation.

The Corporation's framework for managing risks may not be effective in mitigating risk and loss to the Corporation.

The Corporation has historically considered its management of risks to be an important aspect of its operations. The Corporation's risk management framework seeks to mitigate risk and loss. The Corporation has established processes, procedures and controls intended to identify, measure, monitor, report and analyze the types of risk to which the Corporation is subject, including liquidity risk, credit risk, market risk, operational risk, compliance and regulatory risk, legal risk and reputational risk, among others. As with any risk management framework, however, there are inherent limitations to the Corporation's risk management strategies and controls, and there may exist, or develop in the future, risks that the Corporation has not anticipated or identified. If the Corporation's risk management framework proves to be ineffective, the Corporation could suffer unexpected losses and could be materially adversely affected.

The Corporation historically has followed a “super-community” banking strategy under which the Corporation has operated its subsidiary banks autonomously to maximize the advantage of community banking and service to its customers. This banking strategy challenges the Corporation's efforts to manage risk efficiently and effectively through a centralized risk management and compliance function. The evolving need for organization-wide risk management procedures may require changes in the Corporation's historical de-centralized operating approach.

Negative publicity could damage the Corporation's reputation.

Reputation risk, or the risk to the Corporation's earnings and capital from negative public opinion, is inherent in the Corporation's business. Negative public opinion could adversely affect the Corporation's ability to keep and attract customers and expose it to adverse legal and regulatory consequences. Negative public opinion could result from the Corporation's actual or alleged conduct in any number of activities, including lending practices, corporate governance, regulatory, compliance, mergers and acquisitions, and disclosure, sharing or inadequate protection of customer information and from actions taken by government regulators and

community organizations in response to that conduct. Because the Corporation conducts the majority of its businesses under the "Fulton" brand, negative public opinion about one business could affect the Corporation's other businesses.

In addition to the reputation risk of the Corporation, the reputation of, and public confidence in, the banking industry appears to have suffered as a result of continuing criticisms of the industry by politicians and the media. In many cases, these criticisms have not differentiated community banking organizations, such as the Corporation, from larger, more diverse organizations that engaged in certain practices that many observers believe helped contribute to the recent difficulties in the financial markets and the economy generally.

Loss of, or failure to adequately safeguard, confidential or proprietary information may adversely affect the Corporation's operations, net income or reputation.

The Corporation regularly collects, processes, transmits and stores significant amounts of confidential information regarding its customers, employees and others. This information is necessary for the conduct of the Corporation's business activities, including the ongoing maintenance of deposit, loan, investment management and other account relationships for the Corporation's customers, and receiving instructions and affecting transactions for those customers and other users of the Corporation's products and services. In addition to confidential information regarding its customers, employees and others, the Corporation compiles, processes, transmits and stores proprietary, non-public information concerning its own business, operations, plans and strategies. In some cases, this confidential or proprietary information is collected, compiled, processed, transmitted or stored by third parties on behalf of the Corporation.

Information security risks have generally increased in recent years because of the proliferation of new technologies and the increased sophistication and activities of perpetrators of cyber-attacks. A failure in or breach of the Corporation's operational or information security systems, or those of the Corporation's third-party service providers, as a result of cyber-attacks or information security breaches or due to employee error, malfeasance or other disruptions could adversely affect our business, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs and/or cause losses. As a result, cyber security and the continued development and enhancement of the controls and processes designed to protect the Corporation's systems, computers, software, data and networks from attack, damage or unauthorized access remain a priority for the Corporation.

If this confidential or proprietary information were to be mishandled, misused or lost the Corporation could be exposed to significant regulatory consequences, reputational damage, civil litigation and financial loss. Mishandling, misuse or loss of this confidential or proprietary information could occur, for example, if the confidential or proprietary information were erroneously provided to parties who are not permitted to have the information, either by fault of the systems or employees of the Corporation, or the systems or employees of third parties which have collected, compiled, processed, transmitted or stored the information on the Corporation's behalf, where the information is intercepted or otherwise inappropriately taken by third parties or where there is a failure or breach of the network, communications or information systems which are used to collect, compile, process, transmit or store the information.

Although the Corporation employs a variety of physical, procedural and technological safeguards to protect this confidential and proprietary information from mishandling, misuse or loss, these safeguards do not provide absolute assurance that mishandling, misuse or loss of the information will not occur, and that if mishandling, misuse or loss of the information did occur, those events will be promptly detected and addressed. Similarly, when confidential or proprietary information is collected, compiled, processed, transmitted or stored by third parties on behalf of the Corporation, the Corporation's policies and procedures require that the third party agree to maintain the confidentiality of the information, establish and maintain policies and procedures designed to preserve the confidentiality of the information, and permit the Corporation to confirm the third party's compliance with the terms of the agreement. Although the Corporation believes that it has adequate information security procedures and other safeguards in place,

as information security risks and cyber threats continue to evolve, the Corporation may be required to expend additional resources to continue to enhance its information security measures and/or to investigate and remediate any information security vulnerabilities.

The Corporation will be completing a transition to a new core processing system. If the Corporation is not able to complete the transition as planned, or unanticipated events occur during the transition, the Corporation's operations, net income, or reputation could be adversely affected.

The Corporation expects to complete its transition to a new core processing system during 2013. The core processing system is used to maintain customer and account records, reflect account transactions and activity, and support the Corporation's customer relationship management systems for substantially all of the Corporation's deposit and loan customers. The Corporation has assembled a team of officers and employees representing key business units and functional areas throughout the Corporation to plan and oversee the transition process. This team, working with the vendor for the core processing system and outside project management consultants, has developed a comprehensive work plan for completing the transition. The transition will be completed

in several phases, with between one and three of the Corporation's six subsidiary banks being transitioned to the new system in each phase. Extensive pre-transition testing of, and employee training in, processing routines and new core processing system operation will be conducted before each of the Corporation's subsidiary banks are transitioned to the new core processing system. The phased approach is expected to facilitate pre-transition system testing and employee training, reduce the potential impact of any unanticipated events that may arise during the conversion and enable the Corporation to allocate sufficient resources to both transition-related tasks and routine processing and customer service activities.

If the Corporation is not able to complete the transition to the new core processing system as expected in accordance with the work plan, or if unanticipated events occur during or following the transition, the Corporation may not be able to timely process transactions for its customers, those customers may not be able to complete transactions in or affecting their accounts that are maintained on the core processing system, or the Corporation may not be able to perform contractual and other obligations to its customers or other parties, such as payment networks in which the Corporation participates. Should any of these consequences occur, the Corporation may incur additional expense in its financial and regulatory reporting, in processing or re-processing transactions, and the Corporation may not be able to meet customer expectations for transaction processing and customer service, customers may lose confidence in the Corporation and close their accounts with the Corporation, and the Corporation may incur liability under contractual or other arrangements with customers or other parties. Any of these events, should they occur, could have a material and adverse impact on the Corporation's operations, net income, reputation or the trading price of the Corporation's common stock, as well as expose the Corporation to civil liability or regulatory sanctions.

The Corporation's business is dependent on its network and information processing systems, and, in some cases, those of the Corporation's third-party vendors, and the disruption or failure of those systems may adversely affect the Corporation's operations, net income, or reputation.

The Corporation's business activities are dependent on its ability to accurately and timely process, record and monitor a large number of transactions. If any of its financial, accounting, network or other information processing systems fail or have other significant shortcomings, the Corporation could be materially adversely affected. Third parties with which the Corporation does business could also be sources of operational risk to the Corporation, including the risk that the third parties' own network and information processing systems could fail. Any of these occurrences could materially diminish the Corporation's ability to operate one or more of the Corporation's businesses, or result in potential liability to clients, reputational damage and regulatory intervention, any of which could materially adversely affect the Corporation.

The Corporation may be subject to disruptions or failures of the Corporation's financial, accounting, network and information processing systems arising from events that are wholly or partially beyond the Corporation's control, which may include, for example, computer viruses or electrical or telecommunications outages, denial of service attacks or hacking targeting the Corporation's network or information processing systems or the Corporation's websites, natural disasters, disease pandemics or other damage to property or physical assets or terrorist acts. The Corporation has developed a comprehensive emergency recovery program, which includes plans to maintain or resume operations in the event of an emergency, such as a power outage or disease pandemic, and contingency plans in the event that operations or systems cannot be resumed or restored. The emergency recovery program is periodically reviewed and updated, and components of the emergency recovery program are regularly tested and validated. The Corporation also reviews and evaluates the emergency recovery programs of vendors which provide certain third-party systems that the Corporation considers critical. Nevertheless, disruptions or failures affecting any of these systems may give rise to interruption in service to customers, damage to the Corporation's reputation and loss or liability to the Corporation.

Merger and acquisition activity in the banking industry has been restrained, and may continue to be restrained, by market factors. Regulatory factors could also be an impediment to growth through acquisitions.

The Corporation has historically supplemented its internal growth with strategic acquisitions of banks, branches and other financial services companies. However, merger and acquisition activity in the banking industry has been restrained in recent years due to factors such as market volatility, lower market prices of the stock of potential buyers, lingering credit concerns, increased regulatory scrutiny and a disparity in price expectations between potential buyers and potential sellers. As a result, supplementing internal growth through acquisitions has been more difficult.

If the goodwill that the Corporation has recorded in connection with its acquisitions becomes impaired, it could have a negative impact on the Corporation's results of operations.

If the purchase price of an acquired company exceeds the fair value of the company's net assets, the excess is carried on the acquirer's balance sheet as goodwill. Companies must evaluate goodwill for impairment at least annually. A more frequent evaluation could be triggered by, for example, a broad price decline in the shares of comparable publicly traded financial institutions. Write-downs of the amount of any impairment, if necessary, are to be charged to earnings in the period in which the impairment occurs.

Based on its annual goodwill impairment tests, the Corporation determined that no impairment charges were necessary in 2012, 2011, 2010, or 2009. During 2008, the Corporation recorded a \$90.0 million goodwill impairment charge. As of December 31, 2012, the Corporation had \$530.7 million of goodwill on its consolidated balance sheet. There can be no assurance that future evaluations of goodwill will not result in additional impairment charges.

Increases in FDIC insurance premiums may adversely affect the Corporation's earnings.

In response to the impact of economic conditions since December 2007 on banks generally and on the FDIC deposit insurance fund (DIF), the FDIC changed its risk-based assessment system and increased base assessment rates. On November 12, 2009, the FDIC adopted a rule requiring banks to prepay three years' worth of premiums to replenish the depleted insurance fund.

In February 2011, as required under the Dodd-Frank Act, the FDIC issued a ruling pursuant to which the assessment base against which FDIC assessments for deposit insurance are made was changed. Instead of FDIC insurance assessments being based upon an insured bank's deposits, FDIC insurance assessments are now generally based on an insured bank's total average assets, minus average tangible equity. With this change, the Corporation's overall FDIC insurance cost has declined. However, a change in the risk categories applicable to the Corporation's bank subsidiaries, further adjustments to base assessment rates and any special assessments could have a material adverse effect on the Corporation. In addition, should one of the Corporation's subsidiary banks have assets above \$10 billion for four consecutive quarters, a higher assessment could apply to that subsidiary for the purposes of calculating its FDIC insurance premium. The Corporation's largest subsidiary bank, Fulton Bank, N. A., had \$9.2 billion in assets as of December 31, 2012. Based on current regulations, the Corporation has estimated that Fulton Bank, N. A., would pay approximately \$1 million in additional annual FDIC insurance premiums if it were to reach the \$10 billion threshold.

The Dodd-Frank Act also requires that the FDIC take steps necessary to increase the level of the DIF to 1.35% of total insured deposits by September 30, 2020. In October 2010, the FDIC adopted a Restoration Plan to achieve that goal. Certain elements of the Restoration Plan are left to future FDIC rulemaking, as are the potential for increases to the assessment rates, which may become necessary to achieve the targeted level of the DIF. Future FDIC rulemaking in this regard may have a material adverse effect on the Corporation.

The competition the Corporation faces is significant and may reduce the Corporation's customer base and negatively impact the Corporation's results of operations.

There is significant competition among commercial banks in the market areas served by the Corporation. In addition, as a result of the deregulation of the financial services industry, the Corporation also competes with other providers of financial services such as savings and loan associations, credit unions, consumer finance companies, securities firms, insurance companies, commercial finance and leasing companies, the mutual funds industry, full service brokerage firms and discount brokerage firms, some of which are subject to less extensive regulations than the Corporation is with respect to the products and services they provide and have different cost structures. Some of the Corporation's competitors, including certain super-regional and national bank holding companies that have made acquisitions in its market area, have greater resources than the Corporation has and, as such, may have higher lending limits, lower cost of funds and may offer other services not offered by the Corporation.

The Corporation also experiences competition from a variety of institutions outside its market areas. Some of these institutions conduct business primarily over the Internet and may thus be able to realize certain cost savings and offer products and services at more favorable rates and with greater convenience to the customer.

Competition may adversely affect the rates the Corporation pays on deposits and charges on loans, thereby potentially adversely affecting the Corporation's profitability. The Corporation's profitability depends upon its continued ability to

successfully compete in the market areas it serves. Further, intense competition among lenders is contributing to downward pressure on loan yields.

The Corporation's mortgage banking line of business is cyclical, and may present specific risks.

Demand for residential mortgage loans has historically tended to increase during periods when interest rates were declining, and to decrease during periods when interest rates were rising.

Residential mortgage lending activity affects the Corporation's results of operations in a number of ways. When the Corporation originates and then sells a residential mortgage loan to investors in the secondary market, the Corporation typically recognizes an immediate gain on the sale of the residential mortgage loan, and if the Corporation continues to provide loan servicing in connection with the sold residential mortgage loan, the Corporation realizes mortgage servicing income during the life of the loan. When the Corporation originates a residential mortgage loan and retains that residential mortgage loan in its loan portfolio, the Corporation recognizes interest income as the borrower makes periodic payments.

During 2012, long-term interest rates in general, and those for residential mortgage loans in particular, were at or near historic lows. This low level of interest rates contributed to a significant increase in the volume of residential mortgage loans originated by the Corporation, a significant increase in gains realized on the sale of some of those loans to investors in the secondary market, and significant growth in the Corporation's residential mortgage loans held in its loan portfolio during 2012. This level of growth is unlikely to be repeated in 2013.

The Corporation provides customary representations and warranties to investors in the secondary mortgage market. These representations and warranties specify that, among other things, the loans sold have been underwritten to the standards established by the investor. The Corporation may be required to repurchase a loan or reimburse the investor for a credit loss incurred on a loan if it is determined that the representations and warranties have not been met. As of December 31, 2012 and 2011, the reserve for losses on residential mortgage loans sold was \$6.0 million and \$1.6 million, respectively.

The estimated fair value of mortgage servicing rights (MSRs) related to residential mortgage loans sold and serviced by the Corporation is recorded as an asset upon the sale of such loans. MSRs are amortized as a reduction to servicing income over the estimated lives of the underlying loans. MSRs are also evaluated for impairment. As interest rates decline, the rate of prepayment of residential mortgage loans typically increases, which can result in increased amortization of MSRs. The fair value of MSRs can decrease based on a number of factors, most notably an increase in prepayment speed projections. A reduction in the fair value of mortgage servicing rights is recorded as a valuation allowance and is recognized as a reduction in mortgage servicing income.

The Corporation's future growth and liquidity needs may require the Corporation to raise additional capital in the future, but that capital may not be available when it is needed or may be available at an excessive cost.

The Corporation is required by regulatory authorities to maintain adequate levels of capital to support its operations. The Corporation anticipates that current capital levels will satisfy regulatory requirements for the foreseeable future.

The Corporation, however, may at some point choose to raise additional capital to support its continued growth. The Corporation's ability to raise additional capital will depend, in part, on conditions in the capital markets at that time, which are outside of the Corporation's control. Accordingly, the Corporation may be unable to raise additional capital, if and when needed, on terms acceptable to the Corporation, or at all. If the Corporation cannot raise additional capital when needed, its ability to further expand operations through internal growth and acquisitions could be materially impacted. In the event of a material decrease in the Corporation's stock price, future issuances of equity securities could result in dilution of existing shareholder interests.

Capital planning has taken on more importance due to regulatory requirements and the proposed Basel III capital standards.

Consistent with current regulatory guidance, the Corporation prepares an internal capital plan, which is updated at least annually, and consults with the Federal Reserve in advance of undertaking any significant capital-related actions, such as declaring an increased cash dividend or approving a share repurchase program. Beginning in the fall of 2013 and annually thereafter, the Corporation, like other banking organizations with consolidated assets in excess of \$10 billion, but less than \$50 billion, will be required to conduct a stress test in the manner specified, and using assumptions for baseline, adverse and severely adverse scenarios announced by the Federal Reserve. The stress test is designed to assess the potential impact of the various scenarios on the Corporation's earnings, capital levels and capital ratios over at least a nine-quarter time horizon. The Corporation's board of directors and its senior management will be required to consider the results of the stress test in the normal course of business, including as part of its capital planning process and the evaluation of the adequacy of its capital. The Corporation will also be required to report the results of the annual stress test to the Federal Reserve, and beginning with the stress test conducted in the fall of 2014,

publicly disclose a summary of the results of the stress test completed under the severely adverse scenario. While the Corporation believes that both the quality and magnitude of its capital base are sufficient to support its current operations given its risk profile, the results of the stress testing process may lead the Corporation to retain additional capital or alter the mix of its capital components. In addition, the implementation of certain regulations with regard to regulatory capital could disproportionately affect the Corporation's regulatory capital position relative to that of its competitors, including those who may not be subject to the same regulatory requirement, which could put further pressure on the price of the Corporation's common stock.

The federal banking regulatory agencies have proposed regulations implementing the Basel III capital standards. The Basel III proposals would change required levels of capital and how banks calculate their regulatory capital and revise and harmonize the rules for calculating risk-weighted assets to enhance risk sensitivity and address weaknesses that have been identified over the past several years. The proposals would increase the minimum levels of required capital, narrow the definition of capital, and increase the risk weights for various asset classes.

Specifically, fully phased-in capital standards under Basel III would require banks to maintain more capital than the minimum levels required under current regulatory capital standards. The new requirements would (i) include a new minimum common equity tier 1 capital ratio of 4.5% of risk-weighted assets, (ii) raise the minimum tier 1 capital ratio from 4.0% to 6.0% of risk-weighted assets, (iii) retain the current minimum total capital ratio of 8.0% of risk-weighted assets and the minimum tier 1 leverage capital ratio at 4.0% of average assets and (iv) introduce a "capital conservation buffer" of 2.5% above the minimum risk-based capital requirements; the capital conservation buffer must be maintained to avoid restrictions on capital distributions and certain discretionary bonus payments.

The new minimum regulatory capital requirements would be fully phased in on January 1, 2019. However, the final rules have not yet been issued and are not yet applicable to the Corporation. As of December 31, 2012, the Corporation believes its current capital levels would meet the fully-phased in minimum capital requirements, including capital conservation buffers, as proposed in the Basel III capital standards.

Liquidity planning at both the holding company and the bank levels has become an area of increased regulatory emphasis.

In addition to primary sources of liquidity in the form of principal and interest payments on outstanding loans and investments and deposits, the Corporation maintains secondary sources that provide it with additional liquidity. These secondary sources may include secured and unsecured borrowings from sources such as the Federal Reserve Bank and Federal Home Loan Bank and third-party commercial banks. The Corporation believes that it maintains a strong liquidity position and that it is well positioned to withstand current market conditions. However, market conditions have been negatively impacted by disruptions in the liquidity markets in the past and such disruptions or an adverse change in the Corporation's results of operations or financial condition could, in the future, have a negative impact on secondary sources of liquidity.

The Basel III proposals, in addition to new capital standards, also include new liquidity requirements which, when implemented by U.S. bank regulators, may require the Corporation to maintain increased levels of liquid assets or alter its strategies for liquidity management.

Liquidity must also be managed at the parent company level. Banking regulators are paying close attention to liquidity at the holding company level, in addition to consolidated and bank liquidity levels. This focus has affected some institutions' ability to pay dividends and has required some institutions to establish borrowing facilities at the holding company level. For safety and soundness reasons, banking regulations limit the amount of cash that can be transferred from subsidiary banks to the parent company in the form of loans and dividends. Generally, these limitations are based on the subsidiary banks' regulatory capital levels and their net income. The Corporation continues to monitor the liquidity and capital needs of the parent company and will implement appropriate strategies, as necessary, to remain adequately capitalized and to meet its cash needs.

The Corporation is a holding company and relies on dividends from its subsidiaries for substantially all of its revenue and its ability to make dividends, distributions and other payments.

The Corporation is a separate and distinct legal entity from its banking and nonbanking subsidiaries, and depends on the payment of dividends from its subsidiaries, principally its banking subsidiaries, for substantially all of its revenues. As a result, the Corporation's ability to make dividend payments on its common stock depends primarily on certain federal and state regulatory considerations and the receipt of dividends and other distributions from its subsidiaries. There are various regulatory and prudential supervisory restrictions, which may change from time to time, that impact the ability of its banking subsidiaries to pay dividends or make other payments to it. For additional information regarding the regulatory restrictions on the Corporation and its subsidiaries, see Item 1, "Business - Supervision and Regulation."

If, in the opinion of the applicable regulatory authority, a bank under its jurisdiction is engaged in or is about to engage in an unsafe or unsound practice, such authority may require, after notice and hearing, that such bank cease and desist from such practice. Depending on the financial condition and results of operations of the Corporation's banking subsidiaries, the applicable regulatory authority might deem the Corporation to be engaged in an unsafe or unsound practice if its banking subsidiaries were to pay dividends. The Federal Reserve Board and the Office of the Comptroller of the Currency have issued policy statements generally requiring insured banks and bank holding companies only to pay dividends out of current operating earnings. In 2009, the Federal Reserve Board released a supervisory letter advising bank holding companies, among other things, that as a general matter a bank holding company should inform its Federal Reserve Bank and should eliminate, defer or significantly reduce its dividends if (1) the bank holding company's net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends, (2) the bank holding company's prospective rate of earnings is not consistent with the bank holding company's capital needs and overall current and prospective financial condition, or (3) the bank holding company will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios.

A downgrade in the credit ratings of the Corporation or its bank subsidiaries could have a material adverse impact on the Corporation.

Fitch, Inc. and Moody's Investors Service, Inc. continuously evaluate the Corporation and our subsidiaries, and their ratings of the Corporation and its subsidiary's long-term and short-term debt are based on a number of factors, including financial strength, as well as factors not entirely within its and its subsidiaries' control, such as conditions affecting the financial services industry generally. Moreover, Fitch and Moody's have indicated that they are evaluating the impact of the Dodd-Frank Act on the rating support assumptions currently included in their methodologies. In light of these reviews and the continued focus on the financial services industry generally, the Corporation and its subsidiaries may not be able to maintain their current respective ratings. Ratings downgrades by Fitch or Moody's could have a significant and immediate impact on the Corporation's funding and liquidity through cash obligations, reduced funding capacity and collateral triggers. A reduction in the Corporation's or its subsidiaries' credit ratings could also increase the Corporation's borrowing costs and limit its access to the capital markets.

Downgrades in the credit or financial strength ratings assigned to the counterparties with whom the Corporation transact, could create the perception that the Corporation's financial condition will be adversely impacted as a result of potential future defaults by such counterparties. Additionally, the Corporation could be adversely affected by a general, negative perception of financial institutions caused by the downgrade of other financial institutions. Accordingly, ratings downgrades for other financial institutions could affect the Corporation's market capitalization and could limit access to or increase its cost of capital.

Many aspects of the Corporation's operations are dependent upon the soundness of other financial institutions.

The commercial soundness of many financial institutions may be closely interrelated as a result of credit, trading, execution of transactions or other relationships between the institutions. As a result, concerns about, or a default or threatened default by, one institution could lead to significant market-wide liquidity and credit problems, losses or defaults by other institutions. This is sometimes referred to as "systemic risk" and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which we interact on a daily basis, and therefore could adversely affect the Corporation.

Anti-takeover provisions could negatively impact the Corporation's shareholders.

Provisions of Pennsylvania law and of the Corporation's Amended and Restated Articles of Incorporation and Bylaws could make it more difficult for a third party to acquire control of the Corporation or have the effect of discouraging a third party from attempting to acquire control of the Corporation. The Corporation's Amended and Restated Articles of Incorporation and Bylaws include certain provisions which may be considered to be "anti-takeover" in nature because they may have the effect of discouraging or making more difficult the acquisition of control over the Corporation by means of a hostile tender offer, exchange offer, proxy contest or similar transaction. These provisions are intended to protect the Corporation's shareholders by providing a measure of assurance that the Corporation's shareholders will be treated fairly in the event of an unsolicited takeover bid and by preventing a successful takeover bidder from exercising its voting control to the detriment of the other shareholders. However, the anti-takeover provisions set forth in the Corporation's Amended and Restated Articles of Incorporation and Bylaws, taken as a whole, may discourage a hostile tender offer, exchange offer, proxy solicitation or similar transaction relating to the Corporation's common stock. To the extent that these provisions actually discourage such a transaction, holders of the Corporation's common stock may not have an opportunity to dispose of part or all of their stock at a higher price than that prevailing in the market. In addition, some of these provisions make it more difficult to remove, and thereby may serve to entrench, the Corporation's incumbent directors and officers, even if their removal would be regarded by some shareholders as desirable.

Item 1B. Unresolved Staff Comments
None.

23

Item 2. Properties

The following table summarizes the Corporation's full-service branch properties, by subsidiary bank, as of December 31, 2012. Remote service facilities (mainly stand-alone automated teller machines) are excluded.

Subsidiary Bank	Owned	Leased	Total Branches
Fulton Bank, N.A.	47	72	119
Fulton Bank of New Jersey	39	32	71
The Columbia Bank	9	30	39
Lafayette Ambassador Bank	5	18	23
FNB Bank, N.A.	6	2	8
Swineford National Bank	5	2	7
Total	111	156	267

The following table summarizes the Corporation's other significant administrative properties. Banking subsidiaries also maintain administrative offices at their respective main banking branches, which are included within the preceding table.

Entity	Property	Location	Owned/Leased
Fulton Bank, N.A./Fulton Financial Corporation	Corporate Headquarters	Lancaster, PA	(1)
Fulton Financial Corporation	Operations Center	East Petersburg, PA	Owned
Fulton Bank, N.A.	Operations Center	Mantua, NJ	Owned

Includes approximately 100,000 square feet which is owned by an independent third-party who financed the construction through a loan from Fulton Bank, N.A. The Corporation is leasing this space from the third-party in (1) an arrangement accounted for as a capital lease. The lease term expires in 2027. The Corporation owns the remainder of the Corporate Headquarters location. This property also includes a Fulton Bank, N.A. branch, which is included in the preceding table.

Item 3. Legal Proceedings

The Corporation and its subsidiaries are involved in various legal proceedings in the ordinary course of business. The Corporation evaluates the possible impact of pending litigation matters based on, among other factors, the advice of counsel, available insurance coverage and recorded liabilities and reserves for probable legal liabilities and costs. As of the date of this report, the Corporation believes that any liabilities, individually or in the aggregate, which may result from the final outcomes of pending proceedings are not expected to have a material adverse effect on the financial position, the operating results and/or the liquidity of the Corporation. However, litigation is often unpredictable and the actual results of litigation cannot be determined with certainty.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock

As of December 31, 2012, the Corporation had 199.2 million shares of \$2.50 par value common stock outstanding held by approximately 42,000 holders of record. The closing price per share of the Corporation's common stock on December 31, 2012 was \$9.61. The common stock of the Corporation is traded on the Global Select Market of The NASDAQ Stock Market under the symbol FULT.

The following table presents the quarterly high and low prices of the Corporation's common stock and per common share cash dividends declared for each of the quarterly periods in 2012 and 2011:

	Price Range		Per Common Share Dividend
	High	Low	
2012			
First Quarter	\$10.80	\$9.18	\$0.07
Second Quarter	10.68	9.32	0.07
Third Quarter	10.72	8.75	0.08
Fourth Quarter	10.49	9.22	0.08
2011			
First Quarter	\$11.54	\$9.81	\$0.04
Second Quarter	11.91	10.17	0.05
Third Quarter	11.27	7.44	0.05
Fourth Quarter	10.24	7.18	0.06

Restrictions on the Payments of Dividends

The Corporation is a separate and distinct legal entity from its banking and nonbanking subsidiaries, and depends on the payment of dividends from its subsidiaries, principally its banking subsidiaries, for substantially all of its revenues. As a result, the Corporation's ability to make dividend payments on its common stock depends primarily on certain federal and state regulatory considerations and the receipt of dividends and other distributions from its subsidiaries. There are various regulatory and prudential supervisory restrictions, which may change from time to time, that impact the ability of its banking subsidiaries to pay dividends or make other payments to it. For additional information regarding the regulatory restrictions applicable to the Corporation and its subsidiaries, see Part I - Item 1, "Business - Supervision and Regulation," Part I - Item 1A, "Risk Factors - The Corporation is a holding company and relies on dividends from its subsidiaries for substantially all of its revenue and its ability to make dividends, distributions and other payments" and Part II - Item 8, "Financial Statements and Supplementary Data - Notes to Consolidated Financial Statements - Note K - Regulatory Matters" of this Report.

Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information about options outstanding under the Corporation's 2004 Stock Option and Compensation Plan and the number of securities remaining available for future issuance under the Corporation's 2004 Stock Option and Compensation Plan, the 2011 Directors' Equity Participation Plan and the Employee Stock Purchase Plan as of December 31, 2012:

Plan Category	Equity compensation plans approved by security holders	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first column) (1)
Equity compensation plans approved by security holders	6,076,121	\$ 13.17	12,755,480
Equity compensation plans not approved by security holders	—	N/A	—
Total	6,076,121	\$ 13.27	12,755,480

(1) Consists of 11,811,046 shares that may be awarded under the 2004 Stock Option and Compensation Plan, 468,907 shares that may be awarded under the 2011 Directors' Equity Participation Plan and 475,527 of shares that may be purchased under the Employee Stock Purchase Plan. Excludes accrued purchase rights under the Employee Stock Purchase Plan as of December 31, 2012 as the number of shares to be purchased is indeterminable until the time shares are issued.

Performance Graph

The graph below shows cumulative investment returns to shareholders based on the assumptions that (A) an investment of \$100.00 was made on December 31, 2007, in each of the following: (i) Fulton Financial Corporation common stock; (ii) the stock of all U. S. companies traded on the NASDAQ Stock Market; (iii) the stock of all companies on the NASDAQ Bank Stock Index; (iv) the stock all companies on the Standard and Poor's 500 index (S&P 500); (v) common stock of the peer group approved by the Board of Directors on September 21, 2010 consisting of bank and financial holding companies located throughout the United States selected based on their asset size, loan distribution, revenue composition, geographic focus, business model, ownership and market capitalization and which were not a party to a merger agreement as of the end of the period and (B) all dividends were reinvested in such securities over the past five years. The graph is not indicative of future price performance.

In 2012, the Human Resources Committee of the Board of Directors made a decision to revise the comparable indices presented in the graph below. The revisions include the addition of the NASDAQ Bank Stock Index and the S&P 500 Index and the future exclusion of the complete NASDAQ Stock Market index and the Fulton Financial Peer Group index. However, the graph below includes all indices, including those that are being deleted. The reason for this revision in the Corporation's comparable indices is to provide a more transparent and generally accepted market comparison of the Corporation's stock, in the form of the NASDAQ Bank Stock Index, while also providing a better broad market stock performance index in the form of the S&P 500.

The graph below is furnished under this Part II, Item 5 of this Form 10-K and shall not be deemed to be "soliciting material" or to be "filed" with the Commission or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act of 1934, as amended.

Index	Year Ending December 31					
	2007	2008	2009	2010	2011	2012
Fulton Financial Corporation	100.00	90.36	83.39	100.08	96.93	97.84
NASDAQ Composite	100.00	60.02	87.24	103.08	102.26	120.42

Net income (loss) available to common shareholders, as adjusted for intangible amortization (net of tax) and (1) goodwill impairment charges, divided by average common shareholders' equity, net of goodwill and intangible assets.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations (Management's Discussion) concerns Fulton Financial Corporation (the Corporation), a financial holding company registered under the Bank Holding Company Act and incorporated under the laws of the Commonwealth of Pennsylvania in 1982, and its wholly owned subsidiaries. Management's Discussion should be read in conjunction with the consolidated financial statements and other financial information presented in this report.

FORWARD-LOOKING STATEMENTS

The Corporation has made, and may continue to make, certain forward-looking statements with respect to its financial condition and results of operations. Do not unduly rely on forward-looking statements. Forward-looking statements can be identified by the use of words such as "may," "should," "will," "could," "estimates," "predicts," "potential," "continue," "anticipates," "believes," "plans," "expects," "future," "intends" and similar expressions which are intended to identify forward-looking statements.

These forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties, some of which are beyond the Corporation's control and ability to predict, that could cause actual results to differ materially from those expressed in the forward-looking statements. The Corporation undertakes no obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Many factors could affect future financial results including, without limitation:

- the impact of adverse changes in the economy and real estate markets, including protracted periods of low-growth and sluggish loan demand;
- the effect of market interest rates, particularly a continuing period of low market interest rates, and relative balances of rate-sensitive assets to rate-sensitive liabilities, on net interest margin and net interest income;
- the effect of competition on rates of deposit and loan growth and net interest margin;
- increases in non-performing assets, which may require the Corporation to increase the allowance for credit losses, charge-off loans and incur elevated collection and carrying costs related to such non-performing assets;
- non-interest income growth, including the impact of potential regulatory changes;
- investment securities gains and losses, including other-than-temporary declines in the value of securities which may result in charges to earnings;
- the level of non-interest expenses, including salaries and employee benefits expenses, operating risk losses, amortization of intangible assets and goodwill impairment;
- the impact of increased regulatory scrutiny of the banking industry;
- the increasing time and expense associated with regulatory compliance and risk management;
- the uncertainty and lack of clear regulatory guidance associated with the delay in implementing many of the regulations mandated by the Dodd-Frank Act;
- capital and liquidity strategies, including the expected impact of the capital and liquidity requirements proposed by the Basel III standards;
- operational risk, i.e. the risk of loss resulting from human error, inadequate or failed internal processes and systems, outsourcing arrangements, compliance and legal risk and external events;
- acquisition and growth strategies, including the impact of a less robust merger and acquisition environment in the banking industry and increased regulatory scrutiny; and
- the potential impact of the inability of the federal government to effectively address the so-called "fiscal cliff," budget sequestration and the federal debt ceiling.

OVERVIEW

Fulton Financial Corporation is a financial holding company comprised of six wholly owned banking subsidiaries which provide a full range of retail and commercial financial services in Pennsylvania, Delaware, Maryland, New Jersey and Virginia. The Corporation generates the majority of its revenue through net interest income, or the difference between interest earned on loans and investments and interest paid on deposits and borrowings. Growth in

net interest income is dependent upon balance sheet growth and/or maintaining or increasing the net interest margin, which is net interest income (fully taxable-equivalent, or FTE) as a percentage of average interest-earning assets. The Corporation also generates revenue through fees earned on the various services and products offered to its customers and through gains on sales of assets, such as loans, investments, lines of business or properties. Offsetting these revenue sources are provisions for credit losses on loans, non-interest expenses and income taxes.

The following table presents a summary of the Corporation's earnings and selected performance ratios:

	2012	2011	
Net income (in thousands)	\$159,845	\$145,573	
Diluted net income per common share	\$0.80	\$0.73	
Return on average assets	0.98	% 0.90	%
Return on average common equity	7.79	% 7.45	%
Return on average tangible common equity	10.73	% 10.54	%
Net interest margin (1)	3.76	% 3.90	%
Efficiency ratio	57.63	% 54.28	%

(1) Presented on an FTE basis, using a 35% Federal tax rate and statutory interest expense disallowances. See also the (1) "Net Interest Income" section of Management's Discussion.

Net income increased \$14.3 million, or 9.8%, to \$159.8 million in 2012. During 2012, the Corporation continued to focus on its relationship banking strategy, built upon a foundation of dedicated people and a commitment to superior customer service. This focus and general, albeit slow, economic improvement allowed the Corporation to make progress on its 2012 corporate objectives, which included the following:

Net Income Per Share Growth - Net income per share increased \$0.07, or 9.6%, in comparison to 2011. This increase was driven largely by a decrease in the provision for credit losses and an increase in mortgage banking income due to higher volumes of residential mortgage loan sales and higher spreads earned on sales, partially offset by a decrease in net interest income and higher non-interest expenses.

Return on Average Assets Improvement - Return on average assets improves when net income increases at a higher rate than average assets. In 2012, return on average assets increased eight basis points, or 8.9%, in comparison to 2011, due to the 9.6% increase in net income, which exceeded a 0.9% increase in average assets. Average asset growth included a 4.5% increase in investment securities and a 0.5% increase in loans.

Net Interest Margin Management - The Corporation's net interest margin decreased 14 basis points, or 3.6%, in comparison to 2011. Prior to 2012, the low interest rate environment had a positive effect on the Corporation's net interest margin as rates on interest-bearing liabilities decreased more quickly than yields on interest-earning assets, as the repricing of the loan portfolio lagged the repricing of deposits. Over time, as the low interest rate environment persisted, the downward repricing of interest bearing liabilities slowed as rates approached their implied floors. In 2012, the decrease in yields on interest-earning assets exceeded the decrease in rates in interest bearing liabilities, leading to net interest margin compression for the first time since 2009.

Asset Quality Improvement - Overall asset quality improved in 2012 with decreases in non-performing loans and overall delinquency levels resulting in a decrease in the provision for credit losses of \$41.0 million, or 30.4%.

Prudent Capital Deployment - Total shareholders' equity increased \$89.1 million, or 4.5%, to \$2.1 billion, or 12.6% of total assets, as of December 31, 2012. During 2012, the Corporation deployed capital for organic growth, increased its quarterly cash dividend and initiated a common stock repurchase program, resulting in the repurchase of 2.1 million outstanding shares of common stock through the expiration of the plan on December 31, 2012. In January 2013, the Corporation's board of directors approved a share repurchase program for the repurchase of up to eight million shares, or approximately 4.0% of its outstanding shares, through June 30, 2013.

Leverage Market Opportunities - During 2012, the Corporation added new retail and small business relationships, contributing to strong growth in demand and savings accounts. The Corporation also expanded its branch network through the addition of six new branches. If economic conditions continue to improve, the Corporation believes that it is well positioned for growth.

The challenges facing the Corporation in 2013 will include achieving quality earning asset growth, effectively managing the net interest margin and controlling the level of non-interest expenses in light of increased compliance and regulatory demands. The Corporation anticipates higher loan growth and further improvement in asset quality if the economy continues to expand and consumer and business confidence increases. The Corporation's primary focus in 2013 will be quality earning asset growth. In keeping with this focus, the Corporation's affiliate and departmental business plans will continue to place tactical priority not only

30

on loan growth, which will be critical in mitigating the impact of net interest margin compression, but also on growth in savings and demand deposits and non-interest income growth.

CRITICAL ACCOUNTING POLICIES

The following is a summary of those accounting policies that the Corporation considers to be most important to the presentation of its financial condition and results of operations, as they require management's most difficult judgments as a result of the need to make estimates about the effects of matters that are inherently uncertain. For a more detailed description of the Corporation's accounting policies related to each of the critical accounting estimates below see Note A, "Summary of Significant Accounting Policies," in the Notes to the Consolidated Financial Statements.

Allowance for Credit Losses - The allowance for credit losses consists of the allowance for loan losses and the reserve for unfunded lending commitments. The allowance for loan losses represents management's estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. The reserve for unfunded lending commitments represents management's estimate of losses inherent in its unfunded loan commitments and is recorded in other liabilities on the consolidated balance sheet.

The Corporation's allowance for credit losses includes: 1) specific allowances allocated to impaired loans evaluated for impairment under the Financial Accounting Standards Board's Accounting Standards Codification (FASB ASC) Section 310-10-35; and 2) allowances calculated for pools of loans evaluated for impairment under FASB ASC Subtopic 450-20.

Management's estimate of losses inherent in the loan portfolio is dependent on the proper application of its methodology for determining its allowance needs. The most critical judgments inherent in that methodology include: The ability to identify potential problem loans in a timely manner. For commercial loans, commercial mortgages and construction loans to commercial borrowers, an internal risk rating process is used. Risk ratings are initially assigned to loans by loan officers and are reviewed on a regular basis by credit administration staff. The Corporation's loan review officers provide an independent assessment of risk rating accuracy. Ratings change based on the ongoing monitoring procedures performed by credit administration staff, or if specific loan review activities identify a deterioration or an improvement in the loan. While assigning risk ratings involves judgment, the risk rating process allows management to identify riskier credits in a timely manner and to properly allocate resources to managing troubled accounts.

The Corporation does not assign internal risk ratings for residential mortgages, home equity loans, consumer loans, installment loans and lease receivables and construction loans to individuals because these portfolios consist of a larger number of loans with smaller balances. Instead, these portfolios are evaluated for risk through the monitoring of delinquency status.

Proper collateral valuation of impaired loans evaluated for impairment under FASB ASC Section 310-10-35.

Substantially all of the Corporation's impaired loans with balances greater than \$1.0 million are measured based on the estimated fair value of each loan's collateral. Collateral could be in the form of real estate, in the case of impaired commercial mortgages and construction loans, or business assets, such as accounts receivable or inventory, in the case of commercial and industrial loans. Commercial and industrial loans may also be secured by real property.

For loans secured by real estate, estimated fair values are determined primarily through certified third-party appraisals, discounted to arrive at expected sale prices, net of estimated selling costs. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including: the age of the most recent appraisal; the loan-to-value ratio based on the original appraisal; the condition of the property; the Corporation's experience and knowledge of the market; the purpose of the loan; environmental factors; payment status; the strength of any guarantors; and the existence and age of other indications of value such as broker price opinions, among others. The Corporation generally obtains updated certified third-party appraisals for impaired loans secured predominately by real estate every 12 months.

When updated certified appraisals are not obtained for loans evaluated for impairment under FASB ASC Section 310-10-35 that are secured by real estate, fair values are estimated based on the original appraisal values, as long as the original appraisal indicated a very strong loan to value position and, in the opinion of the Corporation's internal loan evaluation staff, there has not been a significant deterioration in the collateral value since the original appraisal

was performed. Original appraisals are typically used only when the estimated collateral value, as adjusted appropriately for age of appraisal, results in a current loan to value ratio that is lower than the Corporation's loan-to-value requirements for new loans, generally less than 70%.

Proper measurement of allowance needs for pools of loans measured for impairment under FASB ASC Subtopic 450-20. For loan loss allocation purposes, loans are segmented into pools with similar characteristics. These pools are by general loan type, or "portfolio segments," as presented in the table under the heading, "Loans, Net of Unearned Income," within Note D, "Loans and Allowance for Credit Losses," in the Notes to Consolidated Financial Statements. Certain portfolio segments are further disaggregated and evaluated collectively for impairment based on "class segments," which are largely based on the type of collateral underlying each loan. For commercial loans, class segments include loans secured by collateral and unsecured loans. Construction loan class segments include loans secured by commercial real estate, loans to commercial borrowers secured by residential real estate and loans to individuals secured by residential real estate. Consumer loan class segments are based on collateral types and include direct consumer installment loans and indirect automobile loans.

Commercial loans, commercial mortgages and certain construction loans are further segmented into separate pools based on internally assigned risk ratings. Residential mortgages, home equity loans, consumer loans, and lease receivables are further segmented into separate pools based on delinquency status.

A loss rate is calculated for each pool through a regression analysis based on historical losses as loans migrate through the various risk rating or delinquency categories. Estimated loss rates are based on a probability of default (PD) and a loss given default (LGD). The loss rate is adjusted to consider qualitative factors, such as economic conditions and trends.

Overall assessment of the risk profile of the loan portfolio. The allocation of the allowance for credit losses is reviewed to evaluate its appropriateness in relation to the overall risk profile of the loan portfolio. The Corporation considers risk factors such as: local and national economic conditions; trends in delinquencies and non-accrual loans; the diversity of borrower industry types; and the composition of the portfolio by loan type. An unallocated allowance is maintained for factors and conditions that exist at the balance sheet date, but are not specifically identifiable, and to recognize the inherent imprecision in estimating and measuring loss exposure.

For additional details related to the allowance for credit losses, see Note D, "Loans and Allowance for Credit Losses," in the Notes to Consolidated Financial Statements.

Goodwill - Goodwill recorded in connection with acquisitions is not amortized to expense, but is tested at least annually for impairment. A quantitative annual impairment test is not required if, based on a qualitative analysis, the Corporation determines that the existence of events and circumstances indicate that it is more likely than not that goodwill is not impaired. The Corporation completes its annual goodwill impairment test as of October 31st of each year. The Corporation tests for impairment by first allocating its goodwill and other assets and liabilities, as necessary, to defined reporting units. A fair value is then determined for each reporting unit. If the fair values of the reporting units exceed their book values, no write-down of the recorded goodwill is necessary. If the fair values are less than the book values, an additional valuation procedure is necessary to assess the proper carrying value of the goodwill.

Reporting unit valuation is inherently subjective, with a number of factors based on assumptions and management judgments. Among these are future growth rates for the reporting units, selection of comparable market transactions, discount rates and earnings capitalization rates. Changes in assumptions and results due to economic conditions, industry factors and reporting unit performance and cash flow projections could result in different assessments of the fair values of reporting units and could result in impairment charges.

If an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount, an interim impairment test is required. Such events may include adverse changes in legal factors or in the business climate, adverse actions by a regulator, unanticipated competition, the loss of key employees, or similar events.

For additional details related to the annual goodwill impairment test, see Note F, "Goodwill and Intangible Assets," in the Notes to Consolidated Financial Statements.

Income Taxes – The provision for income taxes is based upon income before income taxes, adjusted for the effect of certain tax-exempt income, non-deductible expenses and credits. In addition, certain items of income and expense are reported in different periods for financial reporting and tax return purposes. The tax effects of these temporary differences are recognized currently in the deferred income tax provision or benefit. Deferred tax assets or liabilities are computed based on the difference between the financial statement and income tax bases of assets and liabilities using the applicable enacted marginal tax rate.

The Corporation must also evaluate the likelihood that deferred tax assets will be recovered through future taxable income. If any such assets are more likely than not to not be recovered, a valuation allowance must be recognized. The assessment of the carrying value of deferred tax assets is based on certain assumptions, changes in which could have a material impact on the Corporation's consolidated financial statements.

The Corporation accounts for uncertain tax positions by applying a recognition threshold and measurement attribute for tax positions taken or expected to be taken in a tax return. Recognition and measurement of tax positions is based on management's evaluations of relevant tax code and appropriate industry information about audit proceedings for comparable positions at other organizations. Virtually all of the Corporation's unrecognized tax benefits are for positions that are taken on an annual basis on state tax returns. Increases to unrecognized tax benefits will occur as a result of accruing for the nonrecognition of the position for the current year. Decreases will occur as a result of the lapsing of the statute of limitations for the oldest outstanding year which includes the position or through settlements of positions with the tax authorities.

See also Note L, "Income Taxes," in the Notes to Consolidated Financial Statements.

Fair Value Measurements – FASB ASC Topic 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into the following three categories (from highest to lowest priority):

Level 1 – Inputs that represent quoted prices for identical instruments in active markets.

Level 2 – Inputs that represent quoted prices for similar instruments in active markets, or quoted prices for identical instruments in non-active markets. Also includes valuation techniques whose inputs are derived principally from observable market data other than quoted prices, such as interest rates or other market-corroborated means.

Level 3 – Inputs that are largely unobservable, as little or no market data exists for the instrument being valued.

The Corporation has categorized all assets and liabilities measured at fair value both on a recurring and nonrecurring basis into the above three levels.

The determination of fair value for assets categorized as Level 3 items involves a great deal of subjectivity due to the use of unobservable inputs. In addition, determining when a market is no longer active and placing little or no reliance on distressed market prices requires the use of management's judgment. The Corporation's Level 3 assets include available for sale debt securities in the form of pooled trust preferred securities, certain single-issuer trust preferred securities issued by financial institutions and auction rate securities. The Corporation also categorizes impaired loans, net of allowance allocations, other real estate owned (OREO) and mortgage servicing rights as Level 3 assets measured at fair value on a non-recurring basis.

The Corporation engages third-party valuation experts to assist in valuing most available-for-sale investment securities measured at fair value on a recurring basis which are classified as Level 2 or Level 3 items. The pricing data and market quotes the Corporation obtains from outside sources are reviewed internally for reasonableness.

See Note R, "Fair Value Measurements," in the Notes to Consolidated Financial Statements for the disclosures required by FASB ASC Topic 820.

New Accounting Standard

In February 2013, the FASB issued ASC Update 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income." ASC Update 2013-02 clarifies the requirements for the reporting of reclassifications out of accumulated other comprehensive income. For items reclassified out of accumulated other comprehensive income and into net income in their entirety, companies must disclose the effect of the reclassification on each affected statement of income line item. For all other reclassifications, companies must cross reference to other required accounting principles generally accepted in the United States (U.S. GAAP) disclosures. This standards update is effective for the first interim period beginning on or after December 15, 2012. For the Corporation, this standards update is effective in connection with its March 31, 2013 interim filing on Form 10-Q. The adoption of ASC Update 2013-02 will not materially impact the Corporation's financial statements.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income is the most significant component of the Corporation's net income. The Corporation manages the risk associated with changes in interest rates through the techniques described within Item 7A, "Quantitative and Qualitative Disclosures About Market Risk."

The following table provides a comparative average balance sheet and net interest income analysis for 2012 compared to 2011 and 2010. Interest income and yields are presented on an FTE basis, using a 35% federal tax rate and statutory interest expense disallowances. The discussion following this table is based on these tax-equivalent amounts.

	2012			2011			2010

Changes which are partially attributable to both volume and rate are allocated to the volume and rate

Note: components presented above based on the percentage of the direct changes that are attributable to each component.

Comparison of 2012 to 2011

FTE net interest income decreased \$15.0 million, or 2.6%, to \$561.2 million in 2012. Net interest margin decreased 14 basis points, or 3.6%, from 3.90% in 2011 to 3.76% in 2012.

FTE interest income decreased \$45.4 million, or 6.4%. A 35 basis point, or 7.3%, decrease in yields on interest-earning assets resulted in a \$52.2 million decrease in interest income, while a \$164.3 million, or 1.1%, increase in average interest-earning assets resulted in a \$6.8 million increase in interest income.

The increase in average interest-earning assets was primarily due to a \$121.3 million, or 4.5%, increase in average investments. The average yield on investment securities decreased 71 basis points, or 18.7%, from 3.80% in 2011 to 3.09% in 2012, as the reinvestment of cash flows and purchases of mortgage-backed securities and collateralized mortgage obligations were at yields that were lower than the overall portfolio yield. A \$6.1 million, or 101.7%, increase in net premium amortization, due primarily to higher prepayments on mortgage-backed securities and collateralized mortgage obligations, contributed 21 basis points to the decrease in average investment yields and four basis points to the decrease in net interest margin.

Average loans increased \$61.8 million, or 0.5%, due to a slight increase in demand for commercial mortgages and the Corporation's decision to retain certain residential mortgages in portfolio instead of selling them to investors.

The following table summarizes the changes in average loans by type:

	2012	2011	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Real estate - commercial mortgage	\$4,619,587	\$4,458,205	\$161,382	3.6	%
Commercial - industrial, financial and agricultural	3,551,056	3,681,321	(130,265)	(3.5))
Real estate - home equity	1,605,088	1,627,308	(22,220)	(1.4))
Real estate - residential mortgage	1,185,516	1,036,474	149,042	14.4	
Real estate - construction	620,166	700,071	(79,905)	(11.4))
Consumer	307,154	332,613	(25,459)	(7.7))
Leasing and other	77,780	68,537	9,243	13.5	
Total	\$11,966,347	\$11,904,529	\$61,818	0.5	%

The average yield on loans during 2012 of 4.81% represented a 28 basis point, or 5.5%, decrease in comparison to 2011, despite the average prime rate remaining at 3.25% for both 2012 and 2011. The decrease in average yields on loans was attributable to increased refinancing activity, repayments of higher-yielding loans and new loan production at rates lower than the overall portfolio yield.

Interest expense decreased \$30.4 million, or 22.7%, to \$103.2 million in 2012 from \$133.5 million in 2011. Interest expense decreased \$17.9 million due to a 23 basis point, or 20.0%, decrease in the average cost of total interest-bearing liabilities. Interest expense decreased an additional \$12.5 million as a result of a \$326.9 million, or 2.8%, decrease in average interest-bearing liabilities.

Average total deposits decreased \$64.7 million, or 0.5%, due to a decrease in certificates of deposit being partially offset by an increase in core demand and savings accounts. The following table summarizes the changes in average deposits, by type:

	2012	2011	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Noninterest-bearing demand	\$2,756,826	\$2,400,293	\$356,533	14.9	%
Interest-bearing demand	2,560,831	2,391,043	169,788	7.1	
Savings	3,347,606	3,359,109	(11,503)	(0.3))
Total demand and savings	8,665,263	8,150,445	514,818	6.3	
Time deposits	3,717,556	4,297,106	(579,550)	(13.5))
Total deposits	\$12,382,819	\$12,447,551	\$(64,732)	(0.5))%

The average cost of interest-bearing deposits decreased 24 basis points, or 28.9%, from 0.83% in 2011 to 0.59% in 2012 due primarily to the repricing of certificates of deposit to lower rates and, to a lesser degree, a reduction in average rates paid on interest-bearing demand and savings deposits. Excluding early redemptions, \$3.0 billion of time deposits matured during 2012 at a weighted average rate of 0.96%, while \$2.6 billion of time deposits were issued at a weighted average rate of 0.41%.

Average short-term borrowings increased \$195.1 million, or 39.3%, due to an increase in Federal funds purchased. Average long-term debt decreased \$100.7 million, or 9.7%, due to maturities of Federal Home Loan Bank (FHLB) advances, which were not replaced with new long-term borrowings.

The following table summarizes the changes in average borrowings, by type:

	2012	2011	Increase (Decrease)		
			\$	%	
	(dollars in thousands)				
Short-term borrowings:					
Customer repurchase agreements	\$206,842	\$208,144	\$(1,302)	(0.6))%
Customer short-term promissory notes	138,632	174,624	(35,992)	(20.6))
Total short-term customer funding	345,474	382,768	(37,294)	(9.7))
Federal funds purchased	335,205	113,023	222,182	196.6	
Other short-term borrowings	10,204	—	10,204	100.0	
Total short-term borrowings	690,883	495,791	195,092	39.3	
Long-term debt:					
FHLB Advances	563,905	651,268	(87,363)	(13.4))
Other long-term debt	369,822	383,207	(13,385)	(3.5))
Total long-term debt	933,727	1,034,475	(100,748)	(9.7))
Total	\$1,624,610	\$1,530,266	\$94,344	6.2)%

The average cost of short-term borrowings was 0.15% in both 2012 and 2011, while the average cost of long-term debt increased slightly, to 4.84% in 2012 from 4.81% in 2011. In December 2012, the Corporation prepaid approximately \$20 million of FHLB advances, with a weighted average interest rate of 4.38% and maturing in January 2017. The Corporation incurred a \$3.0 million penalty in connection with prepaying these FHLB advances, recorded as a component of other non-interest expense. The 2013 interest expense savings from the prepayment of the FHLB advances is expected to be approximately \$825,000, assuming replacement with overnight borrowings.

Comparison of 2011 to 2010

FTE net interest income increased \$2.0 million, or 0.3%, to \$576.2 million in 2011. Net interest margin increased 10 basis points, or 2.6%, from 3.80% in 2010 to 3.90% in 2011.

FTE interest income decreased \$51.1 million, or 6.7%. A 24 basis point, or 4.8%, decrease in average rates resulted in a \$38.3 million decrease in interest income, while a \$331.5 million, or 2.2%, decrease in average interest-earning assets resulted in an additional \$12.8 million decrease in interest income.

The following table summarizes the changes in average loans by type:

	2011	2010	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Real estate - commercial mortgage	\$4,458,205	\$4,333,371	\$124,834	2.9)%
Commercial - industrial, financial and agricultural	3,681,321	3,681,692	(371)	—)
Real estate - home equity	1,627,308	1,642,999	(15,691)	(1.0))
Real estate - residential mortgage	1,036,474	977,909	58,565	6.0	
Real estate - construction	700,071	889,267	(189,196)	(21.3))
Consumer	332,613	363,066	(30,453)	(8.4))
Leasing and other	68,537	70,131	(1,594)	(2.3))
Total	\$11,904,529	\$11,958,435	\$(53,906)	(0.5))%

The average yield on loans during 2011 of 5.09% represented a 24 basis point, or 4.5%, decrease in comparison to 2010. The decrease in average yields on loans was attributable to repayments of higher-yielding loans and declining average rates on fixed and adjustable rate loans which, unlike floating rate loans, have a lagged repricing effect. In addition, approximately one-third of the floating rate portfolio was based on an index rate other than prime, such as the one-month London Interbank Offered Rate, or LIBOR, which decreased slightly, on average, from 2010 to 2011. Average investments decreased \$219.7 million, or 7.6%, due largely to maturities or calls of collateralized mortgage obligations and state and municipal securities and redemptions of student loan auction rate securities. During 2011, the proceeds from the maturities and sales of securities were not fully reinvested into the portfolio because current

rates on many investment options were not attractive.

37

The average yield on investments decreased 33 basis points, or 8.0%, from 4.13% in 2010 to 3.80% in 2011, as the reinvestment of cash flows and purchases of taxable investment securities were at yields that were lower than the overall portfolio yield.

Interest expense decreased \$53.1 million, or 28.4%, to \$133.5 million in 2011 from \$186.6 million in 2010. Interest expense decreased \$28.6 million due to a 39 basis point, or 25.3%, decrease in the average cost of total interest-bearing liabilities. Interest expense decreased an additional \$24.5 million as a result of a \$576.4 million, or 4.7%, decrease in average interest-bearing liabilities.

Average deposits increased \$103.7 million, or 0.8%, due to increases in core demand and savings accounts being partially offset by a decrease in time deposits. The following table summarizes the changes in average deposits, by type:

	2011	2010	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Noninterest-bearing demand	\$2,400,293	\$2,104,016	\$296,277	14.1	%
Interest-bearing demand	2,391,043	2,099,026	292,017	13.9	
Savings	3,359,109	3,124,157	234,952	7.5	
Total demand and savings	8,150,445	7,327,199	823,246	11.2	
Time deposits	4,297,106	5,016,645	(719,539)	(14.3))
Total deposits	\$12,447,551	\$12,343,844	\$103,707	0.8	%

The average cost of interest-bearing deposits decreased 36 basis points, or 30.3%, from 1.19% in 2010 to 0.83% in 2011 due to a reduction in rates paid on all categories of deposits and the repricing of certificates of deposit to lower rates. Excluding early redemptions, \$3.5 billion of time deposits matured during 2011 at a weighted average rate of 1.20%, while \$3.2 billion of time deposits were issued at a weighted average rate of 0.66%.

Average short-term borrowings decreased \$91.8 million, or 15.6%, primarily due to a decrease in short-term customer funding as customers transferred funds from the cash management program to deposits due to the low interest rate environment. Average long-term debt decreased \$292.0 million, or 22.0%, due to maturities of FHLB advances, which were generally not replaced with new advances. The following table summarizes the decreases in average borrowings, by type:

	2011	2010	Decrease		
			\$	%	
	(dollars in thousands)				
Short-term borrowings:					
Customer repurchase agreements	\$208,144	\$252,634	\$(44,490)	(17.6))%
Customer short-term promissory notes	174,624	209,766	(35,142)	(16.8))
Total short-term customer funding	382,768	462,400	(79,632)	(17.2))
Federal funds purchased	113,023	125,202	(12,179)	(9.7))
Total short-term borrowings	495,791	587,602	(91,811)	(15.6))
Long-term debt:					
FHLB Advances	651,268	943,118	(291,850)	(30.9))
Other long-term debt	383,207	383,331	(124)	—)
Total long-term debt	1,034,475	1,326,449	(291,974)	(22.0))
Total	\$1,530,266	\$1,914,051	\$(383,785)	(20.1))%

Provision for Credit Losses

The provision for credit losses was \$94.0 million for 2012, a decrease of \$41.0 million, or 30.4%, in comparison to 2011. The provision for credit losses for 2011 decreased \$25.0 million, or 15.6%, in comparison to 2010.

The provision for credit losses is recognized as an expense in the consolidated statements of income and is the amount necessary to adjust the allowance for credit losses to its appropriate balance, as determined through the Corporation's allowance methodology. The Corporation determines the appropriate level of the allowance for credit losses based on many quantitative and qualitative factors, including, but not limited to: the size and composition of the loan portfolio,

changes in risk ratings, changes in collateral values, delinquency levels, historical losses and economic conditions. See further discussion of the Corporation's allowance methodology under the heading "Critical Accounting Policies." For details related to the Corporation's allowance and provision for credit losses, see the "Financial Condition" section of Management's Discussion under the heading "Allowance for Credit Losses."

Non-Interest Income and Expense

Comparison of 2012 to 2011

Non-Interest Income

The following table presents the components of non-interest income for the past two years:

	2012	2011	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Overdraft fees	\$33,329	\$32,062	\$1,267	4.0	%
Cash management fees	11,004	10,590	414	3.9	
Other	17,169	15,426	1,743	11.3	
Service charges on deposit accounts	61,502	58,078	3,424	5.9	
Mortgage banking income	44,600	25,674	18,926	73.7	
Merchant fees	12,472	10,126	2,346	23.2	
Foreign currency processing income	10,431	9,400	1,031	11.0	
Debit card income	8,716	15,535	(6,819)	(43.9))
Letter of credit fees	5,052	5,038	14	0.3	
Other	7,674	7,383	291	3.9	
Other service charges and fees	44,345	47,482	(3,137)	(6.6))
Investment management and trust services	38,239	36,483	1,756	4.8	
Credit card income	7,944	7,004	940	13.4	
Gain on sale of Global Exchange	6,215	—	6,215	100.0	
Other income	10,753	8,445	2,308	27.3	
Total, excluding investment securities gains	213,598	183,166	30,432	16.6	
Investment securities gains	3,026	4,561	(1,535)	(33.7))
Total	\$216,624	\$187,727	\$28,897	15.4	%

The \$1.3 million, or 4.0%, increase in overdraft fees was due to an increase in the per-item fee charged. Commercial account overdraft fees increased \$634,000, or 7.3%, while fees on personal accounts increased \$633,000, or 2.7%.

The \$6.8 million, or 43.9%, decrease in debit card income was the result of new regulations, effective October 2011, that established maximum interchange fees that issuers could charge on debit card transactions, as required under the Dodd-Frank Act. During 2011, changes to various fee pricing structures were made to mitigate the negative effect of the reduction in debit card interchange fees. These fee changes had a positive impact on cash management fees (\$414,000, or 3.9%, increase), other service charges on deposit accounts (\$1.7 million, or 11.3%, increase) and merchant fees (\$2.3 million, or 23.2%, increase). Also contributing to the increase in other service charges on deposit accounts was an increase in the number of accounts, while higher transaction volumes also contributed to the growth in merchant fees.

Mortgage banking income increased \$18.9 million, or 73.7%. Gains on sales of mortgage loans increased \$24.1 million, or 108.5%, due to a \$918.5 million, or 58.0%, increase in new loan commitments and a 32.1% increase in pricing spreads during 2012. The increase in new loan commitments was largely driven by an increase in refinancing volume resulting from historically low interest rates. The increase in gains on sales of mortgage loans was partially offset by a \$4.5 million increase in MSR amortization due to prepayments of serviced loans and a \$2.1 million impairment charge for MSRs recorded in the third quarter of 2012. The impairment charge was the result of an increase in forecasted mortgage prepayments, which caused a decline in the fair value of the MSR asset.

Foreign currency processing income increased \$1.0 million, or 11.0%, due primarily to an increase in volumes. In December 2012, the Corporation's Fulton Bank, N.A. subsidiary sold its Global Exchange Group division (Global Exchange) for a gain of \$6.2 million. Global Exchange provided international payment solutions to meet the needs of companies, law firms and professionals. As a result of the Global Exchange sale, the Corporation expects a reduction in foreign currency processing income in 2013. In 2012, Global Exchange generated revenues of \$9.3 million, expenses of \$4.8 million and net income of approximately \$2.9 million.

The \$1.8 million, or 4.8%, increase in investment management and trust services was due primarily to a \$1.5 million, or 10.5%, increase in brokerage revenue and a \$421,000, or 2.0%, increase in trust commissions. These increases resulted from the Corporation's expanded focus on generating recurring revenue in the brokerage business, increased sales of new trust business, and an improvement in the market values of existing assets under management.

The \$940,000, or 13.4%, increase in credit card income was due to an increase in the volume of transactions on previously issued cards and an increase in average balances, which generate fees under a joint marketing agreement with an independent third-party issuer. The \$2.3 million, or 27.3%, increase in other income was primarily due to gains on the sales of two branches and one operations facility and gains on investments in corporate owned life insurance.

Investment securities gains of \$3.0 million for 2012 included \$3.8 million of net realized gains on sales of securities, partially offset by other-than-temporary impairment charges of \$809,000. During 2012, the Corporation recorded other-than-temporary impairment charges of \$356,000 for financial institutions stocks, \$434,000 for auction rate securities and \$19,000 for pooled trust preferred securities issued by financial institutions. The \$4.6 million of net gains in 2011 included \$7.5 million of net realized gains on sales of securities, partially offset by other-than-temporary impairment charges of \$2.9 million. During 2011, the Corporation recorded other-than-temporary impairment charges of \$1.4 million for pooled trust preferred securities issued by financial institutions, \$1.2 million for financial institutions stocks and \$292,000 for auction rate securities. See Note C, "Investment Securities," in the Notes to Consolidated Financial Statements for additional details.

Non-Interest Expense

The following table presents the components of non-interest expense for each of the past two years:

	2012	2011	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Salaries and employee benefits	\$243,915	\$227,435	\$16,480	7.2	%
Net occupancy expense	44,663	44,003	660	1.5	
Other outside services	15,310	7,851	7,459	95.0	
Data processing	14,936	13,541	1,395	10.3	
Equipment expense	14,243	12,870	1,373	10.7	
FDIC insurance premiums	11,996	14,480	(2,484)	(17.2))
Professional fees	11,522	12,159	(637)	(5.2))
OREO and repossession expense	10,196	8,366	1,830	21.9	
Software	9,520	8,400	1,120	13.3	
Operating risk loss	9,454	1,328	8,126	611.9	
Marketing	8,240	9,667	(1,427)	(14.8))
Telecommunications	6,884	8,119	(1,235)	(15.2))
Supplies	4,891	5,507	(616)	(11.2))
Postage	4,625	5,065	(440)	(8.7))
Intangible amortization	3,031	4,257	(1,226)	(28.8))
FHLB prepayment penalty	3,007	—	3,007	100.0	
Other	33,073	33,428	(355)	(1.1))
Total	\$449,506	\$416,476	\$33,030	7.9	%

Salaries and employee benefits increased \$16.5 million, or 7.2%, with salaries increasing \$12.6 million, or 6.6%, and employee benefits increasing \$3.9 million, or 10.4%. The increase in salaries expense was largely due to annual merit increases in 2012, overtime and temporary employee expense to support residential lending, a \$6.9 million increase in employee bonus and incentive compensation expense and a \$585,000 increase in stock-based compensation expense. The \$3.9 million increase in employee benefits was primarily due to a \$2.3 million increase in healthcare costs and a \$1.4 million increase in defined benefit pension plan expense.

Other outside services increased \$7.5 million, or 95.0%, due primarily to a \$5.9 million increase in consulting services related to compliance and risk management, an increase in employment agency fees and the outsourcing of certain functions. Data processing increased \$1.4 million, or 10.3%, primarily due to increased transaction volumes. The \$1.4 million, or 10.7%, increase in equipment expense was largely due to depreciation expense related to the addition of assets supporting the Corporation's information technology infrastructure.

The \$2.5 million, or 17.2%, decrease in FDIC insurance expense was due, in part, to a change in how the insurance assessment is calculated. Effective April 1, 2011, the assessment was based on total average assets minus average tangible equity, as compared to the previous calculation, which was based on average domestic deposits. 2011 included three months of expense assessed under the FDIC's prior methodology. Also contributing to the decrease was lower assessment rates based on improvements in subsidiary bank impaired asset levels.

OREO and repossession expense increased \$1.8 million, or 21.9%, due to a \$2.2 million increase in valuation provisions and a \$1.4 million decrease in net gains on sales, partially offset by a \$1.8 million increase in repossession and other OREO expenses. This expense category is expected to be volatile as the Corporation continues to work through its non-performing assets. Software expense increased \$1.1 million, or 13.3%, due to additional maintenance costs related to the addition of assets supporting the Corporation's information technology infrastructure and additional maintenance and repair costs.

The \$8.1 million increase in operating risk loss was largely due to estimated losses associated with previously sold residential mortgages. Provisions for such losses were \$4.9 million in 2012, as compared to a credit of \$1.1 million in 2011. The charges in 2012 included \$3.4 million related to a specific investor program with the FHLB and \$1.5 million related to alleged breaches of representations and warranties made in connection with previously sold residential mortgages. The remaining increase in operating risk loss was primarily due to a \$1.2 million increase in debit card fraud losses. See Note Q, "Commitments and Contingencies," in the Notes to Consolidated Financial Statements for additional details about residential loss contingencies.

Marketing expense decreased \$1.4 million, or 14.8%, largely due to \$1.3 million of expense related to the merger of the Corporation's New Jersey banks in the fourth quarter of 2011. Telecommunications expense decreased \$1.2 million, or 15.2%, largely due to a renegotiated contract for data lines. The \$1.2 million, or 28.8%, decrease in intangible amortization was primarily due to core deposit intangible assets, which are amortized on an accelerated basis.

The proceeds from the sale of Global Exchange and short-term borrowings were used to prepay approximately \$20 million of FHLB advances. The Corporation incurred a \$3.0 million penalty in connection with prepaying these FHLB advances.

In 2012, the Corporation also incurred expenses of \$1.3 million related to its core processing system conversion, which is expected to occur in 2013. These expenses are included in various categories, including other outside services (\$528,000) and salaries and employee benefits (\$300,000).

Comparison of 2011 to 2010

Non-Interest Income

The following table presents the components of non-interest income:

	2011	2010	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Overdraft fees	\$32,062	\$35,612	\$(3,550)	(10.0))%
Cash management fees	10,590	9,775	815	8.3	
Other	15,426	13,205	2,221	16.8	
Service charges on deposit accounts	58,078	58,592	(514)	(0.9))
Debit card income	15,535	15,870	(335)	(2.1))
Merchant fees	10,126	8,509	1,617	19.0	
Foreign currency processing income	9,400	8,193	1,207	14.7	
Letter of credit fees	5,038	5,364	(326)	(6.1))
Other	7,383	7,087	296	4.2	
Other service charges and fees	47,482	45,023	2,459	5.5	
Investment management and trust services	36,483	34,173	2,310	6.8	
Mortgage banking income	25,674	29,304	(3,630)	(12.4))
Credit card income	7,004	6,115	889	14.5	
Other income	8,445	8,412	33	0.4	
Total, excluding investment securities gains	183,166	181,619	1,547	0.9	
Investment securities gains	4,561	701	3,860	550.6	
Total	\$187,727	\$182,320	\$5,407	3.0	%

The \$3.6 million, or 10.0%, decrease in overdraft fees was a result of changes in regulations, which took effect in August of 2010, that require customers to affirmatively consent to the payment of certain types of overdrafts. The \$815,000, or 8.3%, increase in cash management fees was primarily due to an increase in certain fees which were implemented in 2011. Other service charges on deposit accounts increased \$2.2 million, or 16.8%, primarily due to the implementation of fee structure changes for certain products that occurred in 2011, and partially due to an increase in demand and savings account balances.

The \$335,000, or 2.1%, decrease in debit card income was due to new Federal Reserve pricing rules that became effective on October 1, 2011 which established maximum interchange fees an issuer can charge on debit card transactions, partially offset by volume growth. The \$1.6 million, or 19.0%, increase in merchant fees and the \$1.2 million, or 14.7%, increase in foreign currency processing income were both due to increases in transaction volumes. The \$2.3 million, or 6.8%, increase in investment management and trust services was due primarily to a \$1.5 million, or 12.0%, increase in brokerage revenue and a \$534,000, or 2.5%, increase in trust commissions. These increases resulted from the Corporation's expanded focus on generating recurring revenue in the brokerage business, increased sales of new trust business, and an improvement in the market values of existing assets under management.

Mortgage banking income decreased \$3.6 million, or 12.4%. During 2010, the Corporation recorded \$3.3 million of mortgage sale gains resulting from a change in its methodology for determining the fair value of its commitments to originate fixed-rate residential mortgage loans for sale, also referred to as interest rate locks. See Note A, "Summary of Significant Accounting Policies," in the Notes to Consolidated Financial Statements for additional details.

Adjusting for the impact of this change, mortgage banking income decreased due to a decrease in volumes, partially offset by an increase in pricing spreads. Total loans sold in 2011 were \$1.2 billion, compared to \$1.6 billion of loans sold in 2010. The \$361.8 million, or 23.2%, decrease in loans sold was due to a decrease in refinance volumes.

Refinances accounted for 54% of sale volumes in 2011, compared to 60% in 2010. Mortgage sales volumes and related gains were also impacted by a decision to retain certain 15 year fixed rate mortgages in portfolio.

The \$889,000, or 14.5%, increase in credit card income was primarily due to an increase in transactions and interest on credit cards previously originated, which generate fees under a joint marketing agreement with an independent third party.

Investment securities gains of \$4.6 million for 2011 included \$7.5 million of net gains on the sales of securities, partially offset by other-than-temporary impairment charges of \$2.9 million. During 2011, the Corporation recorded other-than-temporary impairment charges of \$1.4 million for pooled trust preferred securities issued by financial institutions, \$1.2 million for financial institutions stocks and \$292,000 for auction rate securities. The \$701,000 of investment securities gains for 2010 resulted from \$14.7 million of net gains on the sales of securities, partially offset by other-than-temporary impairment charges of \$12.0 million for pooled trust preferred securities issued by financial institutions and \$2.0 million for financial institutions stocks.

Non-Interest Expense

The following table presents the components of non-interest expense:

	2011	2010	Increase (decrease)		
			\$	%	
	(dollars in thousands)				
Salaries and employee benefits	\$227,435	\$216,487	\$10,948	5.1	%
Net occupancy expense	44,003	43,533	470	1.1	
FDIC insurance premiums	14,480	19,715	(5,235)	(26.6))
Data processing	13,541	13,263	278	2.1	
Equipment expense	12,870	11,692	1,178	10.1	
Professional fees	12,159	11,523	636	5.5	
Marketing	9,667	11,163	(1,496)	(13.4))
OREO and repossession expense	8,366	7,441	925	12.4	
Telecommunications	8,119	8,543	(424)	(5.0))
Supplies	5,507	5,633	(126)	(2.2))
Postage	5,065	5,306	(241)	(4.5))
Intangible amortization	4,257	5,240	(983)	(18.8))
Operating risk loss	1,328	3,025	(1,697)	(56.1))
Other	49,679	45,761	3,918	8.6	
Total	\$416,476	\$408,325	\$8,151	2.0	%

Salaries and employee benefits increased \$10.9 million, or 5.1%, with salaries increasing \$11.4 million, or 6.4%, and employee benefits decreasing \$405,000, or 1.1%. The increase in salaries expense was largely due to annual merit increases in 2011, a \$2.3 million increase in stock-based compensation expense and a \$2.2 million increase in incentive compensation expense.

The decrease in employee benefits was primarily due to a \$329,000 decrease in defined benefit pension plan expense and a \$262,000 decrease in profit sharing expense, partially offset by an increase in severance expense.

The \$5.2 million, or 26.6%, decrease in FDIC insurance expense was primarily due to a change in how the insurance assessment is calculated. Effective April 1, 2011, the assessment was based on total average assets minus average tangible equity, as compared to the previous calculation, which was based on average domestic deposits.

The \$1.2 million, or 10.1%, increase in equipment expense was largely due to a \$700,000, or 9.6%, increase in depreciation expense, primarily related to the addition of assets supporting the Corporation's information technology infrastructure, and increased maintenance costs. The \$636,000, or 5.5%, increase in professional fees was due to increased legal costs associated with the collection and workout efforts for non-performing loans, in addition to an increase in regulatory fees. The \$1.5 million, or 13.4%, decrease in marketing expenses was due to efforts to control expenditures and the timing of promotional campaigns in 2011. The \$925,000, or 12.4%, increase in OREO and repossession expense was due to increased costs associated with the repossession of foreclosed assets, partially offset by a net increase in gains on sales of OREO. Total net gains on sales of OREO were \$762,000 in 2011 compared to net losses of \$452,000 in 2010.

The \$983,000, or 18.8%, decrease in intangible amortization was due to certain core deposit intangible assets becoming fully amortized during 2011. The \$1.7 million, or 56.1%, decrease in operating risk loss was primarily due to a \$1.1 million reduction in accruals for potential repurchases of previously sold residential mortgage and home equity loans.

The \$3.9 million, or 8.6%, increase in other expenses included a \$1.0 million increase in software maintenance costs. In mid-2010, the Corporation entered into a three-year desktop software licensing agreement, thereby resulting in a full-year of costs for this maintenance agreement in 2011 compared to a partial year impact in 2010. Also contributing to the increase in other expenses was a \$528,000 increase in merchant and debit cardholder assessment fees, a \$448,000 increase in losses on the sale of fixed assets, \$296,000 of consulting services related to the Corporation's planned core technology platform upgrade and a \$300,000 loss upon redemption of a junior subordinated deferrable interest debenture in 2011.

Income Taxes

Income tax expense for 2012 was \$57.6 million, an increase of \$6.8 million, or 13.3%, from 2011. Income tax expense for 2011 increased \$6.4 million, or 14.5%, from 2010. The Corporation's effective tax rate (income taxes divided by income before income taxes) was 26.5%, 25.9% and 25.7% in 2012, 2011 and 2010, respectively.

The Corporation's effective tax rates are generally lower than the 35% Federal statutory rate due to investments in tax-free municipal securities and credits earned from investments in partnerships that generate such credits under various federal programs (Tax Credit Investments). Net credits associated with Tax Credit Investments were \$9.6 million, \$8.5 million and \$5.7 million in 2012, 2011 and 2010, respectively.

For additional information regarding income taxes, see Note L, "Income Taxes," in the Notes to Consolidated Financial Statements.

FINANCIAL CONDITION

The table below presents condensed consolidated ending balance sheets for the Corporation.

	December 31		Increase (decrease)		
	2012	2011	\$	%	
	(dollars in thousands)				
Assets					
Cash and due from banks	\$256,300	\$292,598	\$(36,298)	(12.4))%
Interest-bearing deposits with other banks	173,257	175,336	(2,079)	(1.2))
Loans held for sale	67,899	47,009	20,890	44.4	
Investment securities	2,794,017	2,679,967	114,050	4.3	
Loans, net of allowance	11,920,701	11,712,499	208,202	1.8	
Premises and equipment	227,723	212,274	15,449	7.3	
Goodwill and intangible assets	535,563	544,209	(8,646)	(1.6))
Other assets	552,693	706,616	(153,923)	(21.8))
Total Assets	\$16,528,153	\$16,370,508	\$157,645	1.0)%
Liabilities and Shareholders' Equity					
Deposits	\$12,473,091	\$12,525,739	\$(52,648)	(0.4))%
Short-term borrowings	868,399	597,033	271,366	45.5	
Long-term debt	894,253	1,040,149	(145,896)	(14.0))
Other liabilities	210,754	215,048	(4,294)	(2.0))
Total Liabilities	14,446,497	14,377,969	68,528	0.5	
Total Shareholders' Equity	2,081,656	1,992,539	89,117	4.5	
Total Liabilities and Shareholders' Equity	\$16,528,153	\$16,370,508	\$157,645	1.0)%

Loans held for sale

Loans held for sale represent residential mortgage loans which the Corporation intends to sell to third-party investors as part of its mortgage banking activities. The \$20.9 million, or 44.4%, increase in loans held for sale was primarily due to a \$32.8 million, or 18.0%, increase in loans originated for sale in December 2012 as compared to December 2011.

As noted within the "Non-Interest Income" section of Management's Discussion, the Corporation's mortgage banking income in 2012 increased in comparison to 2011 due to an increase in both volumes of new loan commitments and an increase in spreads on loans sold.

Investment Securities

The following table presents the carrying amount of investment securities held to maturity (HTM) and available for sale (AFS) as of the dates shown:

	December 31 2012			2011			2010		
	HTM	AFS	Total	HTM	AFS	Total	HTM	AFS	Total
	(in thousands)								
U.S. Government securities	\$—	\$325	\$325	\$—	\$334	\$334	\$—	\$1,649	\$1,649
U.S. Government sponsored agency securities	—	2,397	2,397	5,987	4,073	10,060	6,339	5,058	11,397
State and municipal securities	—	315,519	315,519	179	322,018	322,197	346	349,563	349,909
Corporate debt securities	—	112,842	112,842	—	123,306	123,306	—	124,786	124,786
Collateralized mortgage obligations	—	1,211,119	1,211,119	—	1,001,209	1,001,209	—	1,104,058	1,104,058
Mortgage-backed securities	292	879,621	879,913	503	880,097	880,600	1,066	871,472	872,538
Auction rate securities	—	149,339	149,339	—	225,211	225,211	—	260,679	260,679
Total debt securities	292	2,671,162	2,671,454	6,669	2,556,248	2,562,917	7,751	2,717,265	2,725,016
Equity securities	—	122,563	122,563	—	117,050	117,050	—	136,468	136,468
Total	\$292	\$2,793,725	\$2,794,017	\$6,669	\$2,673,298	\$2,679,967	\$7,751	\$2,853,733	\$2,861,484

Total investment securities increased \$114.1 million, or 4.3%, to \$2.8 billion at December 31, 2012, due mainly to an increase in collateralized mortgage obligations. During 2012, the Corporation purchased mortgage-backed securities and collateralized mortgage obligations in anticipation of a continued low interest rate environment. The additional securities purchased were primarily collateralized mortgage obligations with an average life of approximately four years to provide for more structured cash flows, thereby limiting price and extension risk.

Equity securities, consisting of \$71.7 million of FHLB and Federal Reserve Bank stock, \$44.2 million of common stocks of publicly traded financial institutions and \$6.7 million of other equity investments, increased \$5.5 million, or 4.7%. During 2012, the Corporation entered into an agreement with a private investor to purchase approximately 7% of the outstanding common shares in a single financial institution as a passive investment. As of December 31, 2012, the Corporation's total investment in the common stock of that financial institution had a cost basis of \$20.0 million and a fair value of \$21.6 million. This investment accounted for approximately 50% of the Corporation's investments in common stocks of publicly traded financial institutions. No other investment within the financial institutions stock portfolio exceeded 5% of the portfolio's fair value.

The net unrealized gain on available for sale investment securities was \$41.5 million as of December 31, 2012, compared to \$40.1 million as of December 31, 2011. During 2012, improvements in the fair values of corporate debt securities and equity securities were partially offset by declines in fair values of auction rate securities, collateralized mortgage obligations and state and municipal securities. See additional details regarding investment security price risk within Item 7A, "Quantitative and Qualitative Disclosures About Market Risk."

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

Loans

The following table presents loans outstanding, by type, as of the dates shown, and the change in loans for the most recent year:

	December 31					2012 vs. 2011		
	2012	2011	2010	2009	2008	Increase (decrease)		
	(dollars in thousands)					\$	%	
Real estate – commercial mortgage	\$4,664,426	\$4,602,596	\$4,375,980	\$4,292,300	\$4,016,700	\$61,830	1.3	%
Commercial – industrial, financial and agricultural	3,612,065	3,639,368	3,704,384	3,699,198	3,635,544	(27,303)	(0.8))

Real estate – residential mortgage	1,256,991	1,097,192	995,990	921,741	972,797	159,799	14.6	
Real estate – construction	584,118	615,445	801,185	978,267	1,269,330	(31,327)	(5.1))
Consumer	309,220	318,101	350,161	360,698	365,692	(8,881)	(2.8))
Leasing and other	92,632	78,700	71,028	83,675	97,687	13,932	17.7	
Gross loans	12,151,842	11,975,964	11,940,505	11,980,139	12,053,148	175,878	1.5	
Unearned income	(7,238)	(6,994)	(7,198)	(7,715)	(10,528)	(244)	3.5	
Loans, net of unearned income	\$12,144,604	\$11,968,970	\$11,933,307	\$11,972,424	\$12,042,620	\$175,634	1.5	%

The Corporation does not have a concentration of credit risk with any single borrower, industry or geographical location. The maximum total lending commitment to an individual borrower was \$39.0 million at December 31, 2012, which is below the Corporation's maximum lending limit. As of December 31, 2012, the Corporation had 58 relationships with borrowing commitments of \$20.0 million or more.

Approximately \$5.2 billion, or 43.2%, of the Corporation's loan portfolio was in commercial mortgage and construction loans as of December 31, 2012. The performance of these loans can be adversely impacted by fluctuations in real estate values. The Corporation limits its maximum exposure to any builder or developer to \$28.0 million, and limits its exposure to any one development project to \$15.0 million.

Geographically, the \$61.8 million, or 1.3%, increase in commercial mortgages was primarily in the Corporation's Pennsylvania (\$63.2 million, or 2.6%) and Delaware (\$28.2 million, or 20.3%) markets, offset by a decline in the New Jersey (\$28.0 million, or 2.3%) market.

The Corporation's outstanding construction loans include loans to commercial borrowers that are secured by commercial real estate, loans to commercial borrowers secured by residential real estate and other construction loans, which represent loans to individuals secured by residential real estate. The following table presents outstanding construction loans and their delinquency rates by these class segments, as of December 31:

	2012			2011		
	\$	Delinquency Rate	% of Total	\$	Delinquency Rate	% of Total
	(dollars in thousands)					
Commercial	\$288,552	8.2	% 49.4	% \$352,937	17.6	% 57.4
Commercial - residential	226,350	3.6	38.8	209,381	2.2	34.0
Other	69,216	2.6	11.8	53,127	6.7	8.6
Total Real estate - Construction	\$584,118	5.7	% 100.0	% \$615,445	11.4	% 100.0

Construction loans decreased \$31.3 million, or 5.1%, primarily due to a \$27.5 million, or 46.6%, decrease in non-accrual loans, as the Corporation continued to reduce its exposure to problem assets. Geographically, the decrease in construction loans was in the Corporation's New Jersey (\$31.6 million, or 32.7%) and Maryland (\$27.0 million, or 28.5%) markets, partially offset by an increase in the Pennsylvania (\$30.2 million, or 10.6%) market.

Commercial loan demand during 2012 remained somewhat weak, largely a result of small business customers remaining tentative about spending due to uncertain economic conditions. Geographically, the \$27.3 million, or 0.8%, decrease in commercial loans was primarily in the Virginia (\$35.4 million, or 17.5%), New Jersey (\$27.9 million, or 5.3%) and Maryland (\$16.6 million, or 5.0%) markets, partially offset by an increase in the Pennsylvania (\$29.0 million, or 1.1%) and Delaware (\$23.5 million, or 73.0%) markets.

The following table summarizes the industry concentrations of the Corporation's commercial loan portfolio as of December 31:

	2012	2011	
Services	17.4	% 17.5	%
Manufacturing	14.7	15.4	
Wholesale	10.5	9.7	
Construction	10.3	12.3	
Retail	10.1	8.7	
Health care	8.2	7.9	
Real estate (1)	7.4	7.6	
Agriculture	5.7	5.8	
Transportation	3.0	2.7	
Arts & entertainment	2.6	2.3	
Financial services	2.2	2.4	
Other	7.9	7.7	
Total	100.0	% 100.0	%

(1) Includes borrowers engaged in the business of: renting, leasing or managing real estate for others; selling, renting and/or buying real estate for others; and appraising real estate.

The Corporation's average commercial lending relationship as of December 31, 2012 was approximately \$480,000. Commercial loans and commercial mortgage loans also include shared national credits, which are participations in loans or loan commitments of at least \$20 million that are shared by three or more banks. Below is a summary of the Corporation's outstanding purchased shared national credits as of December 31:

	2012	2011	
	(dollars in thousands)		
Commercial - industrial, financial and agricultural	\$81,978	\$83,307	
Real estate - commercial mortgage	47,637	72,829	
Total	\$129,615	\$156,136	
Delinquency rate	2.7	% 2.8	%

The \$159.8 million, or 14.6%, increase in residential mortgages was due to a \$167.0 million, or 45.3%, increase in fixed rate mortgages, partially offset by a decline in non-accrual residential mortgages. During 2012, in an effort to increase interest-earning assets, the Corporation elected to retain certain residential mortgages in portfolio instead of selling them to third-party investors. Residential mortgages retained in portfolio included up to approximately \$15 million per month of 15 year fixed rate mortgages. In addition and similar to prior years, all 10 year mortgages and adjustable rate mortgages were retained in portfolio.

Provision and Allowance for Credit Losses

The Corporation accounts for the credit risk associated with lending activities through the allowance for credit losses and the provision for credit losses.

A summary of the Corporation's loan loss experience follows:

	2012	2011	2010	2009	2008	
	(dollars in thousands)					
Loans, net of unearned income outstanding at end of year	\$ 12,144,604	\$ 11,968,970	\$ 11,933,307	\$ 11,972,424	\$ 12,042,620

(1) Reserve for unfunded lending commitments recorded within other liabilities on the consolidated balance sheets.

(2) Includes accruing loans past due 90 days or more.

The provision for credit losses decreased \$41.0 million, or 30.4%, in comparison to 2011 due to improvements in the Corporation's credit quality metrics, including a reduction in the level of non-performing loans and overall delinquency.

Net charge-offs decreased \$25.6 million, or 16.8%, to \$126.7 million in 2012 from \$152.3 million in 2011. This decrease was primarily due to a \$28.2 million, or 87.4%, decrease in residential mortgage net charge-offs, a \$13.4 million, or 36.4%, decrease in construction loan net charge-offs and a \$12.2 million, or 24.5%, decrease in commercial loan net charge-offs, partially offset by a \$24.6 million, or 102.6%, increase in commercial mortgage net charge-offs.

During 2012 and 2011, the Corporation sold certain pools of non-accrual loans to third-party investors. When an appropriate price can be obtained, these sales can be advantageous as they reduce the cost of resolving problem credits and enable the Corporation to redeploy resources to other work-out and collection efforts. During 2012, the Corporation sold \$50.5 million of non-accrual commercial mortgage, commercial and construction loans, resulting in a total increase to charge-offs of \$24.6 million in 2012. Because the existing allowance for credit losses on the loans sold exceeded the charge-off amount, no additional provision for credit losses was required. In December 2011, the Corporation sold \$34.7 million of non-performing residential mortgages and \$152,000 of non-performing home equity loans, resulting in a total increase to charge-offs of \$17.4 million in 2011 and, because the existing allowance for credit losses on the loans sold was less than the charge-off amount, a \$5.0 million increase to the provision for credit losses was recorded. Below is a summary of these transactions:

	2012			2011	
	Real Estate - Commercial Mortgage	Commercial - Industrial, Financial and Agricultural	Real Estate - Construction	Total	Real Estate - Residential Mortgage & Real Estate - Home Equity
	(in thousands)				
Unpaid principal balance of loans sold	\$43,960	\$19,990	\$7,720	\$71,670	\$39,310
Charge-offs prior to sale	(10,780)	(6,130)	(4,300)	(21,210)	(4,500)
Net recorded investment in loans sold	33,180	13,860	3,420	50,460	34,810
Proceeds from sale, net of selling expenses	17,620	6,020	2,270	25,910	17,420
Total charge-off upon sale	\$(15,560)	\$(7,840)	\$(1,150)	\$(24,550)	\$(17,390)
Existing allocation for credit losses on sold loans	\$(16,780)	\$(8,910)	\$(1,920)	\$(27,610)	\$(12,360)

Of the \$126.7 million of net charge-offs recorded in 2012, 38.1% were for loans originated by the Corporation's banks in Pennsylvania, 36.7% in New Jersey, 12.0% in Virginia, 11.7% in Maryland and 1.5% in Delaware. During 2012, individual charge-offs of \$1.0 million or greater totaled approximately \$38 million, of which approximately \$16 million were for commercial mortgages, approximately \$15 million were for construction loans, and approximately \$7 million were for commercial loans. For 2011, individual charge-offs of \$1.0 million or greater totaled approximately \$44 million, of which approximately \$21 million were for commercial loans, approximately \$16 million were for construction loans, approximately \$6 million were for commercial mortgages and approximately \$1 million was for a residential mortgage.

The following table presents the aggregate amounts of non-accrual and past due loans and OREO as of December 31:

	2012	2011	2010	2009	2008
	(in thousands)				
Non-accrual loans (1) (2) (3)	\$184,832	\$257,761	\$280,688	\$238,360	\$161,962
Accruing loans past due 90 days or more (2)	26,221	28,767	48,084	43,359	35,177
Total non-performing loans	211,053	286,528	328,772	281,719	197,139
OREO	26,146	30,803	32,959	23,309	21,855
Total non-performing assets	\$237,199	\$317,331	\$361,731	\$305,028	\$218,994

(1) In 2012, the total interest income that would have been recorded if non-accrual loans had been current in accordance with their original terms was approximately \$13.4 million. The amount of interest income on non-accrual loans that was included in 2012 income was approximately \$1.8 million.

(2) Accrual of interest is generally discontinued when a loan becomes 90 days past due as to principal and interest.

When interest accruals are discontinued, interest credited to income is reversed. Non-accrual loans may be restored to accrual status when all delinquent principal and interest has been paid currently for six consecutive months or

the loan is considered secured and in the process of collection. Certain loans, primarily adequately collateralized mortgage loans, may continue to accrue interest after reaching 90 days past due.

Excluded from the amounts presented as of December 31, 2012 were \$85.5 million of loans, modified under TDRs.

- (3) These loans were reviewed for impairment under FASB ASC Section 310-10-35, but continue to accrue interest and are, therefore, not included in non-accrual loans. All non-accrual loans as of December 31, 2012 were reviewed for impairment under FASB ASC Section 310-10-35.

During 2012, new interpretative regulatory guidance was issued addressing the accounting for loans to individuals discharged through bankruptcy proceedings pursuant to Chapter 7 of the U.S. Bankruptcy Code. In accordance with this guidance, the Corporation classifies loans where borrowers have been discharged in bankruptcy, and have not reaffirmed their loan obligation, as troubled debt restructurings (TDRs), even if the repayment terms of such loans have not otherwise been modified. Additionally, the Corporation places such loans on non-accrual status, regardless of delinquency status, and charges off the difference between the fair value, less selling costs, of the loan's collateral and its recorded investment. As a result of implementing this new regulatory guidance, \$10.6 million (net of \$3.4 million in charge-offs recorded in 2012) of loans were placed on non-accrual status as of December 31, 2012. As of December 31, 2012, approximately 84% of these loans were current on their contractual payments.

The following table presents loans whose terms were modified under TDRs as of December 31:

	2012	2011	2010	2009
	(in thousands)			
Real estate – commercial mortgage	\$34,672	\$22,425	\$18,778	\$15,997
Real estate – residential mortgage	32,993	32,331	37,826	24,639
Real estate – construction	10,564	7,645	5,440	—
Commercial – industrial, financial and agricultural	5,744	3,581	5,502	1,459
Real estate - home equity and consumer	1,535	193	263	—
Total accruing TDRs	85,508	66,175	67,809	42,095
Non-accrual TDRs (1)	31,245	32,587	51,175	15,875
Total TDRs	\$116,753	\$98,762	\$118,984	\$57,970

(1) Included within non-accrual loans in the preceding table.

Total TDRs modified during 2012 and still outstanding as of December 31, 2012 totaled \$61.9 million. Of these loans, \$21.2 million, or 34.2%, had a payment default subsequent to modification during 2012. Total TDRs modified during 2011 and still outstanding as of December 31, 2011 totaled \$35.0 million. Of these loans, \$20.0 million, or 57.2%, had a payment default subsequent to modification during 2011.

The following table presents the changes in non-accrual loans for the year ended December 31, 2012:

	Commercial - Real Industrial, Financial and Agricultural	Real Estate - Commercial Mortgage	Real Estate Construction	Real Estate - Residential Mortgage	Real Estate - Home Equity	Consumer	Leasing	Total
	(in thousands)							
Balance of non-accrual loans at December 31, 2011	\$ 75,704	\$109,412	\$58,894	\$7,834	\$5,493	\$368	\$56	\$257,761

Balance of non-accrual loans at December 31, 2012	\$ 65,695	\$54,960	\$31,426	\$21,103	\$9,940	\$1,698	\$10	\$184,832

(1) Excludes charge-offs of loans on accrual status.

Non-accrual loans decreased \$72.9 million, or 28.3%, in 2012. As noted previously, \$50.5 million of the decrease was attributed to the Corporation's 2012 loan sales. Also contributing to the decrease was a lower rate of non-accrual loan additions. Total non-accrual additions for 2012 were \$185.9 million, compared to 2011 additions of \$279.8 million and 2010 additions of \$256.2 million.

The following table summarizes the Corporation's non-performing loans as of December 31 and the changes in non-performing loans for the most recent year:

	December 31					2012 vs. 2011 Increase (decrease)	
	2012	2011	2010	2009	2008	\$	%
	(dollars in thousands)						
Commercial – industrial, financial and agricultural	\$66,954	\$80,944	\$87,455	\$69,604	\$40,294	\$(13,990)	(17.3)%
Real estate – commercial mortgage	57,120	113,806	93,720	61,052	41,745	(56,686)	(49.8)%
Real estate – residential mortgage	34,436	16,336	50,412	45,748	26,304	18,100	110.8%
Real estate – construction	32,005	60,744	84,616	92,841	80,083	(28,739)	(47.3)%
Real estate – home equity	15,519	11,207	10,188	10,790	6,766	4,312	38.5%
Consumer	5,000	3,384	2,154	1,529	1,608	1,616	47.8%
Leasing	19	107	227	155	339	(88)	(82.2)%
Total non-performing loans	\$211,053	\$286,528	\$328,772	\$281,719	\$197,139	\$(75,475)	(26.3)%

Non-performing commercial loans decreased \$14.0 million, or 17.3%, primarily due to the 2012 loan sales, which contributed \$13.9 million to the decrease. Geographically, the decrease was primarily in the Corporation's New Jersey (\$5.3 million, or 30.6%), Maryland (\$4.9 million, or 50.5%), Pennsylvania (\$1.9 million, or 3.9%) and Virginia (\$1.4 million, or 29.7%) markets.

Non-performing commercial mortgages decreased \$56.7 million, or 49.8%, to \$57.1 million as of December 31, 2012, primarily due to the 2012 loan sales, which contributed \$33.2 million to the decrease, as well as charge-offs and repayments. Geographically, the decrease was primarily in the Corporation's New Jersey (\$30.5 million, or 53.3%), Maryland (\$10.9 million, or 79.6%), Pennsylvania (\$7.4 million, or 26.2%) and Virginia (\$6.5 million, or 54.6%) markets.

The \$18.1 million, or 110.8%, increase in non-performing residential mortgages was primarily in the Corporation's Pennsylvania (\$7.3 million, or 137.6%), New Jersey (\$5.1 million, or 147.0%) and Virginia (\$4.1 million, or 87.3%) markets. During 2012, \$10.6 million of non-accrual additions were a result of the Corporation implementing the new regulatory guidance, as noted previously.

Geographically, the \$28.7 million decrease in non-performing construction loans was in the Corporation's Virginia (\$12.3 million, or 78.4%), Maryland (\$10.1 million, or 60.4%), New Jersey (\$3.6 million, or 22.5%) and Pennsylvania (\$2.4 million, or 20.5%) markets.

The following table summarizes OREO, by property type, as of December 31:

	2012	2011
	(in thousands)	
Commercial properties	\$15,482	\$15,184
Residential properties	6,788	10,499
Undeveloped land	3,876	5,120
Total OREO	\$26,146	\$30,803

As noted under the heading "Critical Accounting Policies" within Management's Discussion, the Corporation's ability to identify potential problem loans in a timely manner is key to maintaining an adequate allowance for credit losses. For commercial loans, commercial mortgages and construction loans to commercial borrowers, an internal risk rating process is used to monitor credit quality. For a complete description of the Corporation's risk ratings, refer to the heading "Allowance for Credit Losses" within Note A, "Summary of Significant Accounting Policies," in the Notes to Consolidated Financial Statements. The evaluation of credit risk for residential mortgages, home equity loans, construction loans to individuals, consumer loans and lease receivables is based on aggregate payment history, through the monitoring of delinquency levels and trends.

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

The following table presents internal risk ratings for commercial loans, commercial mortgages and construction loans to commercial borrowers, by class segment, as of December 31:

	Special Mention		2012 vs. 2011 Increase (decrease)		Substandard or Lower		2012 vs. 2011 Increase (decrease)		Total Criticized Loans	
	2012	2011	\$	%	2012	2011	\$	%	2012	2011
	(dollars in thousands)									
Real estate - commercial mortgage	\$157,640	\$160,935	\$(3,295)	(2.0)%	\$251,452	\$342,558	\$(91,106)	(26.6)%	\$409,092	\$503,452
Commercial - secured	137,277	166,588	(29,311)	(17.6)	194,952	249,014	(54,062)	(21.7)	332,229	415,600
Commercial - unsecured	5,421	6,066	(645)	(10.6)	6,000	8,781	(2,781)	(31.7)	11,421	14,847
Total commercial - industrial, financial and agricultural	142,698	172,654	(29,956)	(17.4)	200,952	257,795	(56,843)	(22.0)	343,650	430,447
Construction - commercial residential	52,434	50,854	1,580	3.1	79,581	126,378	(46,797)	(37.0)	132,015	177,200
Construction - commercial	2,799	7,022	(4,223)	(60.1)	12,081	16,309	(4,228)	(25.9)	14,880	23,330
Total real estate - construction (excluding construction - other)	55,233	57,876	(2,643)	(4.6)	91,662	142,687	(51,025)	(35.8)	146,895	200,530
Total	\$355,571	\$391,465	\$(35,894)	(9.2)%	\$544,066	\$743,040	\$(198,974)	(26.8)%	\$899,637	\$1,133,977
% of total loans	4.0	% 4.5	%		6.2	% 8.4	%		10.2	% 12.9

As of December 31, 2012, total loans with risk ratings of substandard or lower decreased \$199.0 million, or 26.8%, in comparison to 2011, with decreases throughout all loan types. Special mention loans decreased \$35.9 million, or 9.2%, in comparison to 2011. Overall reductions in criticized loans, while not the sole factor for measuring allocations on the above loan types, contributed to a decrease in allocations for impaired loans of \$17.4 million, or 18.0%, in 2012.

The following table presents a summary of delinquency status and rates, as a percentage of total loans, for loans that do not have internal risk ratings, by class segment, as of December 31:

	Delinquent (1)		Non-performing (2)				Total Past Due					
	2012	2011	2012	2011	2012	2011	2012	2011	2012	2011

(1)Includes all accruing loans 30 days to 89 days past due.

(2)Includes all accruing loans 90 days or more past due and all non-accrual loans.

As of December 31, 2012, delinquency rates for the above class segments increased slightly, primarily due to an increase in non-performing residential mortgages. As noted above, this increase was primarily due to the Corporation's implementation of new regulatory guidance which required any loans to individuals which were discharged through bankruptcy proceedings to be placed on non-accrual status if the debt was not reaffirmed with the Corporation. As of December 31, 2012, approximately 84% of these loans were current on their contractual payments.

The total past due rate for all loans at December 31, 2012 was 2.49%, compared to 3.28% for 2011 and 3.59% for 2010.

The following table summarizes the allocation of the allowance for loan losses:

	2012		2011		2010		2009		2008	
	Allowance	% of	Allowance	% of	Allowance	% of	Allowance	% of	Allowance	% of

N/A – Not applicable.

In October 2012, Hurricane Sandy caused damage across large portions of the mid-Atlantic and northeast United States, including areas serviced by the Corporation's branches located in northern New Jersey. The Corporation did not experience any significant property damage. In addition, based on its assessments, the effect of the hurricane on the Corporation's customers did not result in a significant negative financial impact to the Corporation.

Management believes that the allowance for loan losses balance of \$223.9 million as of December 31, 2012 is sufficient to cover losses inherent in the loan portfolio. See additional disclosures in Note A, "Summary of Significant Accounting Policies," and Note D, "Loans and Allowance for Credit Losses," in the Notes to Consolidated Financial Statements and "Critical Accounting Policies," in Management's Discussion.

Other Assets

Other assets decreased \$153.9 million, or 21.8%, to \$552.7 million as of December 31, 2012. Other assets included \$181.6 million of receivables related to investment securities sales that had not settled as of December 31, 2011. Other assets included \$53.2 million of such receivables as of December 31, 2012. Also contributing to the decrease in other assets was a \$15.1 million decrease in net deferred tax assets, primarily due to the reduction in the allowance for credit losses, and an \$11.0 million decrease in prepaid FDIC insurance assessments which were amortized to expense in 2012.

Deposits and Borrowings

The following table summarizes the changes in ending deposits, by type:

	2012	2011	Increase (decrease)	
			\$	%
	(dollars in thousands)			
Noninterest-bearing demand	\$3,008,675	\$2,588,034	\$420,641	16.3 %
Interest-bearing demand	2,755,603	2,529,388	226,215	8.9
Savings	3,325,475	3,394,367	(68,892)	(2.0)

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

Total demand and savings	9,089,753	8,511,789	577,964	6.8
Time deposits	3,383,338	4,013,950	(630,612)	(15.7)
Total deposits	\$12,473,091	\$12,525,739	\$(52,648)	(0.4)%

Non-interest bearing demand deposits increased \$420.6 million, or 16.3%, due primarily to a \$299.7 million, or 16.2%, increase in business account balances and a \$69.8 million, or 11.2%, increase in personal account balances.

Interest-bearing demand accounts increased \$226.2 million, or 8.9%, due to a \$170.3 million, or 11.7%, increase in personal account balances and an \$89.0 million, or 9.7%, increase in municipal account balances, partially offset by a \$33.1 million, or 21.3%, decrease in business account balances.

The \$68.9 million, or 2.0%, decrease in savings account balances was due to a \$113.2 million, or 16.9%, decrease in municipal account balances and a \$58.4 million, or 7.4%, decrease in business account balances, partially offset by a \$102.7 million, or 5.3%, increase in personal account balances.

The increase in interest and noninterest-bearing demand and savings personal account balances resulted from a combination of factors, including the Corporation's promotional efforts, customers' migration away from certificates of deposit and increased savings by customers.

The \$630.6 million decrease in time deposits was primarily in accounts with original maturity terms of less than three years (\$519.2 million, or 18.3%) and jumbo certificates of deposit (\$54.3 million, or 27.4%). The decrease in certificates of deposit was primarily due to customers not reinvesting maturing funds in certificates of deposit in the current low interest rate environment and migration to non-maturing products.

The following table summarizes the changes in ending borrowings, by type:

	2012	2011	Increase (Decrease)		
			\$	%	
	(dollars in thousands)				
Short-term borrowings:					
Customer repurchase agreements	\$ 156,238	\$ 186,735	(30,497)	(16.3)	%
Customer short-term promissory notes	119,691	156,828	(37,137)	(23.7))
Total short-term customer funding	275,929	343,563	(67,634)	(19.7))
Federal funds purchased	592,470	253,470	339,000	133.7	
Total short-term borrowings	868,399	597,033	271,366	45.5	
Long-term debt:					
FHLB Advances	524,817	666,565	(141,748)	(21.3))
Other long-term debt	369,436	373,584	(4,148)	(1.1))
Total long-term debt	894,253	1,040,149	(145,896)	(14.0))
Total	\$ 1,762,652	\$ 1,637,182	125,470	7.7	%

The \$67.6 million, or 19.7%, decrease in short-term customer funding was primarily due to customers transferring funds from the cash management program to deposits due to the low interest rate environment. The \$339.0 million, or 133.7%, increase in Federal funds purchased was due to the change in the Corporation's net funding position, as short-term borrowings were used to meet the funding needs caused by an increase in investment securities and loans, in addition to the decrease in total deposits and long-term debt. The \$141.7 million, or 21.3%, decrease in FHLB advances was a result of FHLB maturities, which were not replaced with new long-term borrowings. In addition, in December 2012, the Corporation prepaid approximately \$20 million of FHLB advances.

Shareholders' Equity

Total shareholders' equity increased \$89.1 million, or 4.5%, to \$2.1 billion, or 12.6% of total assets as of December 31, 2012. The increase was primarily due to \$159.8 million of net income, partially offset by \$60.0 million of dividends on common shares outstanding. Due to the earnings improvement achieved throughout 2012 and the strength of its capital, the Corporation increased its dividend to common shareholders to \$0.30 per share in 2012, compared to \$0.20 per share in 2011.

The Corporation and its subsidiary banks are subject to regulatory capital requirements administered by various banking regulators. Failure to meet minimum capital requirements can initiate certain actions by regulators that could have a material effect on the Corporation's financial statements. The regulations require that banks maintain minimum amounts and ratios of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and Tier I capital to average assets (as defined). As of December 31, 2012, the Corporation and each of its bank subsidiaries met the minimum capital requirements. In addition, all of the Corporation's bank subsidiaries' capital ratios exceeded the amounts required to be considered "well capitalized" as defined in the regulations. See also Note K, "Regulatory Matters," in the Notes to Consolidated Financial Statements.

The following table summarizes the Corporation's capital ratios in comparison to regulatory requirements at December 31:

	2012	2011	Regulatory Minimum for Capital Adequacy
Total capital (to risk weighted assets)	15.6%	15.2%	8.0%
Tier I capital (to risk weighted assets)	13.4%	12.7%	4.0%
Tier I capital (to average assets)	11.0%	10.3%	4.0%

The Basel Committee on Banking Supervision (Basel) is a committee of central banks and bank regulators from major industrialized countries that develops broad policy guidelines for use by each country's regulators with the purpose of ensuring that financial institutions have adequate capital given the risk levels of assets and off-balance sheet financial instruments.

In December 2010, Basel released a framework for strengthening international capital and liquidity regulations, referred to as Basel III. Basel III includes defined minimum capital ratios, which must be met when implementation occurs. An additional "capital conservation buffer" will increase the minimum ratios by 2.5%, when fully phased-in. Fully phased-in capital standards under Basel III will require banks to maintain more capital than the minimum levels required under current regulatory capital standards. As Basel III is only a framework, the specific changes in capital requirements are to be determined by each country's banking regulators.

In June 2012, U.S. Federal banking regulators released two notices of proposed rulemaking (NPRs) that would implement the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act. A third NPR related to banks that are internationally active or that are subject to market risk rules is not applicable to the Corporation. The first NPR, "Regulatory Capital Rules: Regulatory Capital, Implementation of Basel III, Minimum Regulatory Capital Ratios, Capital Adequacy, Transition Provisions, and Prompt Corrective Action," would apply to all depository institutions, bank holding companies with total consolidated assets of \$500 million or more, and savings and loan holding companies (collectively, banking organizations). Consistent with the international Basel framework, this NPR would:

- Increase the quantity and quality of capital required by proposing a new minimum Common Equity Tier 1 capital ratio of 4.50% of risk-weighted assets and raising the minimum Tier 1 capital ratio from 4.00% to 6.00% of risk-weighted assets;

- Retain the current minimum Total capital ratio of 8.00% of risk-weighted assets and the minimum Tier 1 leverage capital ratio at 4.00% of average assets;

- Introduce a "capital conservation buffer" of 2.50% above the minimum risk-based capital requirements, which must be maintained to avoid restrictions on capital distributions and certain discretionary bonus payments; and

- Revise the definition of capital to improve the ability of regulatory capital instruments to absorb losses.

As proposed, this NPR would come into effect on January 1, 2013 and the new minimum regulatory capital requirements would be fully phased in on January 1, 2019. However, the final rules have not yet been issued and are not yet applicable to the Corporation.

The second NPR, "Regulatory Capital Rules: Standardized Approach for Risk-weighted Assets; Market Discipline and Disclosure Requirements," also would apply to all banking organizations. This NPR would revise and harmonize the rules for calculating risk-weighted assets to enhance risk sensitivity and address weaknesses that have been identified over the past several years. Banks and regulators use risk weighting to assign different levels of risk to different classes of assets and off-balance sheet exposures - riskier items require higher capital cushions and less risky items require smaller capital cushions. As proposed, this NPR would come into effect on January 1, 2015; however, final rules have not been issued.

As of December 31, 2012, the Corporation believes its current capital levels would meet the fully-phased in minimum capital requirements, including capital conservation buffers, as proposed in the NPRs.

Contractual Obligations and Off-Balance Sheet Arrangements

The Corporation has various financial obligations that require future cash payments. These obligations include the payment of liabilities recorded on the Corporation's consolidated balance sheet as well as contractual obligations for

purchased services or for operating leases.

55

The following table summarizes significant contractual obligations to third parties, by type, that were fixed and determinable as of December 31, 2012:

	Payments Due In				Total
	One Year or Less (in thousands)	One to Three Years	Three to Five Years	Over Five Years	
Deposits with no stated maturity (1)	\$9,089,753	\$—	\$—	\$—	\$9,089,753
Time deposits (2)	2,289,386	830,530	178,405	85,017	3,383,338
Short-term borrowings (3)	868,399	—	—	—	868,399
Long-term debt (3)	5,511	156,466	551,179	181,097	894,253
Operating leases (4)	15,727	27,041	22,172	61,104	126,044
Purchase obligations (5)	16,085	34,504	15,405	—	65,994
Uncertain tax positions (6)	1,453	—	—	—	1,453

(1) Includes demand deposits and savings accounts, which can be withdrawn by customers at any time.

(2) See additional information regarding time deposits in Note H, "Deposits," in the Notes to Consolidated Financial Statements.

(3) See additional information regarding borrowings in Note I, "Short-Term Borrowings and Long-Term Debt," in the Notes to Consolidated Financial Statements.

(4) See additional information regarding operating leases in Note P, "Leases," in the Notes to Consolidated Financial Statements.

(5) Includes information technology, telecommunication and data processing outsourcing contracts.

(6) Includes accrued interest. See additional information related to uncertain tax positions in Note L, "Income Taxes," in the Notes to Consolidated Financial Statements.

In 2013, the Corporation will begin construction that will expand its Fulton Bank, N.A. subsidiary and the Corporation's headquarters. The total cost of the project is expected to be approximately \$50 million, with a planned completion in the summer of 2015. The Corporation expects to incur construction costs of approximately \$10 million associated with this project in 2013.

In addition to the contractual obligations listed in the preceding table, the Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit and interest rate risk that are not recognized on the consolidated balance sheets. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Standby letters of credit are conditional commitments issued to guarantee the financial or performance obligation of a customer to a third party. Commitments and standby letters of credit do not necessarily represent future cash needs as they may expire without being drawn.

The following table presents the Corporation's commitments to extend credit and letters of credit as of December 31, 2012 (in thousands):

Commercial mortgage and construction	\$335,830
Home equity	964,145
Commercial and other	2,711,766
Total commitments to extend credit	\$4,011,741
Standby letters of credit	\$425,095
Commercial letters of credit	26,191
Total letters of credit	\$451,286

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the exposure to economic loss that arises from changes in the values of certain financial instruments. The types of market risk exposures generally faced by financial institutions include interest rate risk, equity market price risk, debt security market price risk, foreign currency price risk and commodity price risk. Due to the nature of its operations, only equity market price risk, debt security market price risk and interest rate risk are significant to the Corporation.

Equity Market Price Risk

Equity market price risk is the risk that changes in the values of equity investments could have a material impact on the financial position or results of operations of the Corporation. As of December 31, 2012, the Corporation's equity investments consisted of \$71.7 million of Federal Home Loan Bank (FHLB) and Federal Reserve Bank stock, \$44.2 million of common stocks of publicly traded financial institutions and \$6.7 million of other equity investments. The equity investments most susceptible to market price risk are the financial institutions stocks, which had a cost basis of \$40.1 million and a fair value of \$44.2 million as of December 31, 2012. Gross unrealized gains and gross unrealized losses in this portfolio were approximately \$4.9 million and \$906,000, respectively, as of December 31, 2012. Management continuously monitors the fair value of its equity investments and evaluates current market conditions and operating results of the issuers. Periodic sale and purchase decisions are made based on this monitoring process. None of the Corporation's equity securities are classified as trading. During 2012, the Corporation entered into an agreement with a private investor to purchase approximately 7% of the outstanding common shares in a single financial institution as a passive investment. As of December 31, 2012, the Corporation's total investment in the common stock of that financial institution had a cost basis of \$20.0 million and a fair value of \$21.6 million, accounting for approximately 50% of the Corporation's investments in the common stocks of publicly traded financial institutions. No other investment within the Corporation's financial institutions stock portfolio exceeded 5% of the portfolio's fair value.

Another source of equity market price risk is the Corporation's \$52.5 million investment in FHLB stock, which the Corporation is required to own in order to borrow funds from the FHLB. FHLBs obtain funding primarily through the issuance of consolidated obligations of the FHLB system. The U.S. government does not guarantee these obligations, and each of the FHLB banks is, generally, jointly and severally liable for repayment of each other's debt. The financial stress on the FHLB system appears to be easing and the New York, Pittsburgh and Atlanta regional banks within the FHLB system, to which the Corporation is a member, have resumed redemptions of capital stock. However, the Corporation's FHLB stock and its ability to obtain FHLB funds could be adversely impacted if the financial health of the FHLB system worsens.

In addition to its equity portfolio, the Corporation's investment management and trust services income may be impacted by fluctuations in the equity markets. A portion of this revenue is based on the value of the underlying investment portfolios, many of which include equity investments. If the values of those investment portfolios decrease, whether due to factors influencing U.S. securities markets in general or otherwise, the Corporation's revenue would be negatively impacted. In addition, the Corporation's ability to sell its brokerage services in the future will be dependent, in part, upon consumers' level of confidence in financial markets.

Debt Security Market Price Risk

Debt security market price risk is the risk that changes in the values of debt securities, unrelated to interest rate changes, could have a material impact on the financial position or results of operations of the Corporation. The Corporation's debt security investments consist primarily of mortgage-backed securities and collateralized mortgage obligations, state and municipal securities, U.S. government sponsored agency securities, U.S. government debt securities, auction rate securities and corporate debt securities. All of the Corporation's investments in mortgage-backed securities and collateralized mortgage obligations have principal payments that are guaranteed by U.S. government sponsored agencies.

Municipal Securities

As of December 31, 2012, the Corporation had \$315.5 million of municipal securities issued by various municipalities in its investment portfolio. Ongoing uncertainty with respect to the financial viability of municipal issuers places much greater emphasis on the underlying strength of issuers. Continued pressure on local tax revenues of issuers due to adverse economic conditions could also have an adverse impact on the underlying strength of issuers. The

Corporation evaluates existing and potential holdings primarily on the creditworthiness of the issuing municipality and then, to a lesser extent, on the underlying credit enhancement. Municipal securities can be supported by the general obligation of the issuing municipality, meaning they can be repaid by any means available to the issuing municipality. As of December 31, 2012, approximately 95% of municipal securities were supported by the general obligation of corresponding municipalities. Approximately 79% of these securities were school district issuances, which are also supported by the respective states of the issuing municipalities.

Auction Rate Securities

As of December 31, 2012, the Corporation's investments in student loan auction rate securities, also known as auction rate certificates (ARCs), had a cost basis of \$174.0 million and a fair value of \$149.3 million.

ARCs are long-term securities that were structured to allow their sale in periodic auctions, resulting in both the treatment of ARCs as short-term instruments in normal market conditions and fair values that could be derived based on periodic auction prices. However, beginning in 2008, market auctions for these securities began to fail due to an insufficient number of buyers, resulting in an illiquid market. This illiquidity has resulted in recent market prices that represent forced liquidations or distressed sales and do not provide an accurate basis for fair value. Therefore, as of December 31, 2012, the fair values of the ARCs were derived using significant unobservable inputs based on an expected cash flows model which produced fair values which were materially different from those that would be expected from settlement of these investments in the illiquid market that presently exists. The expected cash flow model, prepared by a third-party valuation expert, produced fair values which assumed a return to market liquidity sometime within the next five years. Expected cash flows models performed prior to June 2012 assumed a return to market liquidity sometime within the next three years. The three year expected term was based on the Corporation's assumption that market liquidity would resume, in some form, within a relatively short period of time. Although there has been a significant reduction in the Corporation's outstanding ARCs due to redemptions in 2011 and 2012, a more protracted period of sporadic trust refinancing and periodic tenders of bonds is expected. The Corporation believes that the trusts underlying the ARCs will self-liquidate as student loans are repaid.

The credit quality of the underlying debt associated with the ARCs is also a factor in the determination of their estimated fair value. As of December 31, 2012, approximately \$138 million, or 93%, of the ARCs were rated above investment grade, with approximately \$8 million, or 5%, AAA rated and \$96 million, or 64%, AA rated.

Approximately \$11 million, or 7%, of ARCs were either not rated or rated below investment grade by at least one ratings agency. Of this amount, approximately \$8 million, or 73%, of the loans underlying these ARCs have principal payments which are guaranteed by the federal government. In total, approximately \$145 million, or 98%, of the loans underlying the ARCs have principal payments which are guaranteed by the federal government. At December 31, 2012, all ARCs were current and making scheduled interest payments. During 2012, ARCs with a par value of \$70.5 million were called by their issuers at par value.

During the year ended December 31, 2012, the Corporation recorded \$434,000 of other-than-temporary impairment charges for two individual ARCs from the same issuer based on an expected cash flow model. As of December 31, 2012, after other-than-temporary impairment charges, the two other-than-temporarily impaired ARCs had a cost basis of \$2.0 million and a fair value of \$688,000. These other-than-temporarily impaired ARCs have principal payments supported by non-guaranteed private student loans, as opposed to federally guaranteed student loans. In addition, the student loans underlying these other-than-temporarily impaired ARCs had actual defaults of approximately 24%, resulting in an erosion of parity levels, or the ratio of total underlying ARC collateral to total bond values, to approximately 77% as of December 31, 2012. Additional impairment charges for ARCs may be necessary depending upon the performance of the individual investments held by the Corporation.

Corporate Debt Securities

The Corporation holds corporate debt securities in the form of pooled trust preferred securities, single-issuer trust preferred securities and subordinated debt issued by financial institutions, as presented in the following table as of December 31, 2012:

	Amortized Cost (in thousands)	Estimated Fair Value
Single-issuer trust preferred securities	\$56,834	\$51,656
Subordinated debt	47,286	51,747
Pooled trust preferred securities	5,530	6,927
Corporate debt securities issued by financial institutions	\$109,650	\$110,330

The fair values for pooled trust preferred securities and certain single-issuer trust preferred securities were based on quotes provided by third-party brokers who determined fair values based predominantly on internal valuation models

which were not indicative prices or binding offers.

The Corporation's investments in single-issuer trust preferred securities had an unrealized loss of \$5.2 million as of December 31, 2012. The Corporation did not record any other-than-temporary impairment charges for single-issuer trust preferred securities in 2012, 2011 or 2010. The Corporation held eight single-issuer trust preferred securities that were rated below investment grade by at least one ratings agency, with an amortized cost of \$22.9 million and an estimated fair value of \$22.3 million as of December 31, 2012. The majority of the single-issuer trust preferred securities rated below investment grade were rated BB or Ba. Single-issuer

trust preferred securities with an amortized cost of \$4.7 million and an estimated fair value of \$3.4 million as of December 31, 2012 were not rated by any ratings agency.

The Corporation held ten pooled trust preferred securities as of December 31, 2012. Nine of these securities, with an amortized cost of \$5.4 million and an estimated fair value of \$6.8 million, were rated below investment grade by at least one ratings agency, with ratings ranging from C to Ca. For each of the nine pooled trust preferred securities rated below investment grade, the class of securities held by the Corporation was below the most senior tranche, with the Corporation's interests being subordinate to other investors in the pool.

The amortized cost of pooled trust preferred securities is the purchase price of the securities, net of cumulative credit related other-than-temporary impairment charges, determined using an expected cash flow model. The most significant input to the expected cash flow model is the expected payment deferral rate for each pooled trust preferred security. The Corporation evaluates the financial metrics, such as capital ratios and non-performing asset ratios, of the individual financial institution issuers that comprise each pooled trust preferred security to estimate its expected deferral rate.

During 2012, the Corporation recorded \$19,000 of other-than-temporary impairment charges for pooled trust preferred securities. Additional impairment charges for corporate debt securities issued by financial institutions may be necessary in the future depending upon the performance of the individual investments held by the Corporation. See Note C, "Investment Securities," in the Notes to Consolidated Financial Statements for further discussion related to the Corporation's other-than-temporary impairment evaluations for debt securities and see Note R, "Fair Value Measurements," in the Notes to Consolidated Financial Statements for further discussion related to the fair values of debt securities.

Interest Rate Risk, Asset/Liability Management and Liquidity

Interest rate risk creates exposure in two primary areas. First, changes in rates have an impact on the Corporation's liquidity position and could affect its ability to meet obligations and continue to grow. Second, movements in interest rates can create fluctuations in the Corporation's net interest income and changes in the economic value of its equity. The Corporation employs various management techniques to minimize its exposure to interest rate risk. An Asset/Liability Management Committee (ALCO), consisting of key financial and senior management personnel, meets on a regular basis. The ALCO is responsible for reviewing the interest rate sensitivity position of the Corporation, approving asset and liability management policies, and overseeing the formulation and implementation of strategies regarding balance sheet positions and earnings.

From a liquidity standpoint, the Corporation must maintain a sufficient level of liquid assets to meet the cash needs of its customers, who, as depositors, may want to withdraw funds or who, as borrowers, need credit availability.

Liquidity is provided on a continuous basis through scheduled and unscheduled principal and interest payments on outstanding loans and investments and through the availability of deposits and borrowings. The Corporation also maintains secondary sources that provide liquidity on a secured and unsecured basis to meet short-term and long-term needs.

The consolidated statements of cash flows provide details related to the Corporation's sources and uses of cash. The Corporation generated \$296.3 million in cash from operating activities during 2012, mainly due to net income, as adjusted for non-cash charges, most notably the provision for credit losses. Investing activities resulted in a net cash outflow of \$320.1 million in 2012 due mainly to a net increase in loans. Financing activities resulted in a net cash outflow of \$12.5 million in 2012 due to a decrease in time deposits, repayments of long-term debt, dividends paid on common shares outstanding and acquisitions of treasury stock exceeding cash inflows from a net increase in demand and savings deposits and short-term borrowings.

Liquidity must also be managed at the Fulton Financial Corporation parent company level. For safety and soundness reasons, banking regulations limit the amount of cash that can be transferred from subsidiary banks to the parent company in the form of loans and dividends. Generally, these limitations are based on the subsidiary banks' regulatory capital levels and their net income. The Corporation meets its cash needs through dividends and loans from subsidiary banks, and through external borrowings, if necessary. Management continuously monitors the liquidity and capital needs of the Corporation at the parent company level and will implement appropriate strategies, as necessary, to meet regulatory capital requirements and to meet its cash needs.

As of December 31, 2012, liquid assets (defined as cash and due from banks, short-term investments, deposits in other financial institutions, Federal funds sold, loans held for sale and securities available for sale) totaled \$3.1 billion, or 18.9% of total assets, as compared to \$3.0 billion, or 18.4% of total assets, as of December 31, 2011.

The following table presents the expected maturities of available for sale investment securities, at estimated fair value, as of December 31, 2012 and the weighted average yields of such securities (calculated based on historical cost):

	MATURING									
	Within One Year		After One But Within Five Years			After Five But Within Ten Years		After Ten Years		
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
	(dollars in thousands)									
U.S. Government securities	\$325	0.17 %	\$—	— %	\$—	— %	\$—	— %	\$—	— %
U.S. Government sponsored agency securities (1)	1,963	3.72	108	1.54	157	1.50	169	3.06		
State and municipal (2)	37,778	1.94	25,812	4.92	173,860	5.65	78,069	6.27		
Auction rate securities (3)	—	—	—	—	—	—	149,339	1.68		
Corporate debt securities	—	—	39,086	4.28	13,316	4.34	60,440	3.46		
Total	\$40,066	2.01 %	\$65,006	4.54 %	\$187,333	5.55 %	\$288,017	3.15 %		
Collateralized mortgage obligations (4)	\$1,211,119	1.86 %								
Mortgage-backed securities (4)	\$879,621	2.62 %								

(1) Includes Small Business Administration securities, whose maturities are dependent upon prepayments on the underlying loans. For the purpose of this table, amounts are based upon contractual maturities.

(2) Weighted average yields on tax-exempt securities have been computed on a fully taxable-equivalent basis assuming a tax rate of 35% and statutory interest expense disallowances.

(3) Maturities of auction rate securities are based on contractual maturities.

(4) Maturities for mortgage-backed securities and collateralized mortgage obligations are dependent upon the interest rate environment and prepayments on the underlying loans. For the purpose of this table, the entire balances and weighted average rates are shown in one period.

The Corporation's weighted average yield on its \$292,000 of held to maturity mortgage-backed securities outstanding as of December 31, 2012 was 6.27%.

The Corporation's investment portfolio consists mainly of mortgage-backed securities and collateralized mortgage obligations which have stated maturities that may differ from actual maturities due to borrowers' ability to prepay obligations. Cash flows from such investments are dependent upon the performance of the underlying mortgage loans and are generally influenced by the level of interest rates. As rates increase, cash flows generally decrease as prepayments on the underlying mortgage loans decrease. As rates decrease, cash flows generally increase as prepayments increase.

The following table presents the approximate contractual maturity and interest rate sensitivity of certain loan types subject to changes in interest rates as of December 31, 2012:

	One Year or Less	One Through Five Years	More Than Five Years	Total
	(in thousands)			
Commercial, financial and agricultural:				
Adjustable and floating rate	\$634,143	\$1,921,880	\$373,198	\$2,929,221

(1) Includes commercial mortgages, residential mortgages and home equity loans.

60

Contractual maturities of time deposits of \$100,000 or more outstanding as of December 31, 2012 were as follows (in thousands):

Three months or less	\$222,614
Over three through six months	233,718
Over six through twelve months	406,376
Over twelve months	366,881
Total	\$1,229,589

The Corporation maintains liquidity sources in the form of "core" demand and savings deposits, time deposits in various denominations, including jumbo time deposits, repurchase agreements and short-term promissory notes. The Corporation can access additional liquidity from these sources, if necessary, by increasing interest rates.

Borrowing availability with the FHLB and Federal Reserve Bank, along with Federal funds lines at various correspondent banks, provides the Corporation with additional liquidity.

Each of the Corporation's subsidiary banks is a member of the FHLB and has access to FHLB overnight and term credit facilities. As of December 31, 2012, the Corporation had \$524.8 million of term advances outstanding from the FHLB with an additional borrowing capacity of approximately \$1.4 billion under these facilities.

As of December 31, 2012, the Corporation had aggregate availability under Federal funds lines of \$1.8 billion, with \$592.5 million outstanding. A combination of commercial real estate loans, commercial loans and securities are pledged to the Federal Reserve Bank of Philadelphia to provide access to Federal Reserve Bank Discount Window borrowings. As of December 31, 2012 and 2011, the Corporation had \$1.9 billion and \$1.7 billion, respectively, of collateralized borrowing availability at the Discount Window, and no outstanding borrowings.

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

The following table provides information about the Corporation's interest rate sensitive financial instruments as of December 31, 2012. The table presents expected cash flows and weighted average rates for each of the Corporation's significant interest rate sensitive financial instruments, by expected maturity period. None of the Corporation's financial instruments are classified as trading. All dollars amounts are in thousands.

	Expected Maturity Period						Total	Estimated Fair Value
	2013	2014	2015	2016	2017	Beyond

(1) Amounts are based on contractual payments and maturities, adjusted for expected prepayments. Excludes \$18.4 million of overdraft balances.

(2) Line of credit amounts are based on historical cash flow assumptions, with an average life of approximately 5 years.

(3) Amounts are based on contractual maturities; adjusted for expected prepayments on mortgage-backed securities and collateralized mortgage obligations and expected calls on agency and municipal securities. Excludes equity securities as such investments do not have maturity dates.

(4) Amounts are based on contractual maturities of time deposits.

(5) Estimated based on history of deposit flows.

(6)

Amounts are based on contractual maturities of debt instruments, adjusted for possible calls. Amounts also include junior subordinated deferrable interest debentures.

(7) Amounts include Federal funds purchased, short-term promissory notes and securities sold under agreements to repurchase, which mature in less than 90 days, in addition to junior subordinated deferrable interest debentures. The preceding table and discussion addressed the liquidity implications of interest rate risk and focused on expected cash flows from financial instruments. Expected maturities, however, do not necessarily reflect the net interest income impact of interest rate changes. Certain financial instruments, such as adjustable rate loans, have repricing periods that differ from expected cash flow periods.

Included within the \$9.2 billion of floating rate loans above are \$3.9 billion of loans, or 42.4% of the total, that float with the prime interest rate, \$1.5 billion, or 16.3%, of loans which float with other interest rates, primarily the London Interbank Offered Rate (LIBOR), and \$3.8 billion, or 41.3%, of adjustable rate loans. The \$3.8 billion of adjustable rate loans include loans that are fixed rate instruments for a certain period of time, and then convert to floating rates.

The following table presents the percentage of adjustable rate loans, at December 31, 2012, stratified by the period until their next repricing:

Fixed Rate Term	Percent of Total Adjustable Rate Loans
One year	34.0%
Two years	19.1
Three years	14.8
Four years	14.9
Five years	11.4
Greater than five years	5.8

As of December 31, 2012, approximately \$5.8 billion of loans had interest rate floors, with approximately \$3.3 billion priced at their interest rate floor. Of this total, approximately \$2.5 billion are scheduled to reprice during the next twelve months. The weighted average interest rate increase that would be necessary for these loans to begin repricing to higher rates was approximately 0.70%.

The Corporation uses three complementary methods to measure and manage interest rate risk. They are static gap analysis, simulation of earnings, and estimates of economic value of equity. Using these measurements in tandem provides a reasonably comprehensive summary of the magnitude of the Corporation's interest rate risk, level of risk as time evolves, and exposure to changes in interest rates.

Static gap provides a measurement of repricing risk in the Corporation's balance sheet as of a point in time. This measurement is accomplished through stratification of the Corporation's assets and liabilities into repricing periods. The sum of assets and liabilities in each of these periods are compared for mismatches within that maturity segment. Core deposits having no contractual maturities are placed into repricing periods based upon historical balance performance. Repricing for mortgage loans, mortgage-backed securities and collateralized mortgage obligations are based upon industry projections for prepayment speeds. The Corporation's policy limits the cumulative six-month ratio of rate sensitive assets to rate sensitive liabilities (RSA/RSL) to a range of 0.85 to 1.15. As of December 31, 2012, the cumulative six-month ratio of RSA/RSL was 1.10.

Simulation of net interest income and net income is performed for the next twelve-month period. A variety of interest rate scenarios are used to measure the effects of sudden and gradual movements upward and downward in the yield curve. These results are compared to the results obtained in a flat or unchanged interest rate scenario. Simulation of earnings is used primarily to measure the Corporation's short-term earnings exposure to interest rate movements. The Corporation's policy limits the potential exposure of net interest income, in a non-parallel instantaneous shock, to 10% of the base case net interest income for a 100 basis point shock, 15% for a 200 basis point shock and 20% for a 300 basis point shock. A "shock" is an immediate upward or downward movement of interest rates across the yield curve. The shocks do not take into account changes in customer behavior that could result in changes to mix and/or volumes in the balance sheet, nor do they account for competitive pricing over the forward 12-month period.

The following table summarizes the expected impact of interest rate shocks on net interest income (due to the current level of interest rates, the 200 and 300 basis point downward shock scenarios are not shown):

Rate Shock (1)	Annual change in net interest income	% Change
+300 bp	+\$45.9 million	+ 8.8%
+200 bp	+\$26.8 million	+ 5.1%
+100 bp	+\$ 8.0 million	+ 1.5%
-100 bp	-\$19.6 million	- 3.8%

(1) These results include the effect of implicit and explicit floors that limit further reduction in interest rates. Economic value of equity estimates the discounted present value of asset and liability cash flows. Discount rates are based upon market prices for like assets and liabilities. Upward and downward shocks of interest rates are used to determine the effect of such interest rate movements relative to the unchanged environment. This measurement tool is used primarily to evaluate the longer-term repricing risks and options in the Corporation's balance sheet. For a

non-parallel instantaneous shock, the policy limit for economic value of equity at risk for every 100 basis point shock movement is 10% of the economic value of equity. As of December 31, 2012, the Corporation was within economic value of equity policy limits for every 100 basis point shock.

Item 8. Financial Statements and Supplementary Data

CONSOLIDATED BALANCE SHEETS

(dollars in thousands, except per-share data)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE A – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business: Fulton Financial Corporation (Parent Company) is a multi-bank financial holding company which provides a full range of banking and financial services to businesses and consumers through its six wholly owned banking subsidiaries: Fulton Bank, N.A., Fulton Bank of New Jersey, The Columbia Bank, Lafayette Ambassador Bank, FNB Bank, N.A. and Swineford National Bank. In addition, the Parent Company owns the following non-bank subsidiaries: Fulton Reinsurance Company, LTD, Fulton Financial Realty Company, Central Pennsylvania Financial Corp., FFC Management, Inc., FFC Penn Square, Inc. and Fulton Insurance Services Group, Inc. Collectively, the Parent Company and its subsidiaries are referred to as the Corporation.

The Corporation's primary sources of revenue are interest income on loans and investment securities and fee income on its products and services. Its expenses consist of interest expense on deposits and borrowed funds, provision for credit losses, other operating expenses and income taxes. The Corporation's primary competition is other financial services providers operating in its region. Competitors also include financial services providers located outside the Corporation's geographical market as a result of the growth in electronic delivery systems. The Corporation is subject to the regulations of certain Federal and state agencies and undergoes periodic examinations by such regulatory authorities.

The Corporation offers, through its banking subsidiaries, a full range of retail and commercial banking services in Pennsylvania, Delaware, Maryland, New Jersey and Virginia. Industry diversity is the key to the economic well-being of these markets, and the Corporation is not dependent upon any single customer or industry.

In December 2012, the Corporation's Fulton Bank, N.A. subsidiary sold its Global Exchange Group division (Global Exchange) for a gain of \$6.2 million. Global Exchange provided international payment solutions to meet the needs of companies, law firms and professionals. The federal tax expense associated with this transaction was \$4.0 million due to the write-off of non-deductible goodwill and intangible assets, resulting in an after tax gain on the transaction of \$2.2 million.

Basis of Financial Statement Presentation: The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States (U.S. GAAP) and include the accounts of the Parent Company and all wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. The Corporation evaluates subsequent events through the date of filing with the Securities and Exchange Commission (SEC).

Investments: Debt securities are classified as held to maturity at the time of purchase when the Corporation has both the intent and ability to hold these investments until they mature. Such debt securities are carried at cost, adjusted for amortization of premiums and accretion of discounts using the effective yield method. The Corporation does not engage in trading activities, however, since the investment portfolio serves as a source of liquidity, most debt securities and all marketable equity securities are classified as available for sale. Securities available for sale are carried at estimated fair value with the related unrealized holding gains and losses reported in shareholders' equity as a component of other comprehensive income, net of tax. Realized securities gains and losses are computed using the specific identification method and are recorded on a trade date basis.

Securities are evaluated periodically to determine whether declines in value are other-than-temporary. For its investments in equity securities, most notably its investments in stocks of financial institutions, the Corporation evaluates the near-term prospects of the issuers in relation to the severity and duration of the impairment. Equity securities with fair values less than cost are considered to be other-than-temporarily impaired if the Corporation does not have the ability and intent to hold the investments for a reasonable period of time that would be sufficient for a recovery of fair value.

Impaired debt securities are determined to be other-than-temporarily impaired if the Corporation concludes at the balance sheet date that it has the intent to sell, or believes it will more likely than not be required to sell, an impaired debt security before a recovery of its amortized cost basis. Credit losses on other-than-temporarily impaired debt securities are recorded through earnings, regardless of the intent or the requirement to sell. Credit loss is measured as the difference between the present value of an impaired debt security's expected cash flows and its amortized cost basis. Non-credit related other-than-temporary impairment charges are recorded as decreases to accumulated other comprehensive income as long as the Corporation has no intent or expected requirement to sell the impaired debt security before a recovery of its amortized cost basis.

Loans and Revenue Recognition: Loan and lease financing receivables are stated at their principal amount outstanding, except for mortgage loans held for sale, which the Corporation has elected to carry at fair value. Interest income on loans is accrued as earned. Unearned income on lease financing receivables is recognized on a basis which approximates the effective yield method. Premiums and discounts on purchased loans are amortized as adjustments to interest income using the effective yield method.

In general, a loan is placed on non-accrual status once it becomes 90 days delinquent as to principal or interest. In certain cases a loan may be placed on non-accrual status prior to being 90 days delinquent if there is an indication that the borrower is having difficulty making payments, or the Corporation believes it is probable that all amounts will not be collected according to the contractual terms of the loan agreement. When interest accruals are discontinued, unpaid interest previously credited to income is reversed. Non-accrual loans may be restored to accrual status when all delinquent principal and interest has been paid currently for six consecutive months or the loan is considered secured and in the process of collection. The Corporation generally applies payments received on non-accruing loans to principal until such time as the principal is paid off, after which time any payments received are recognized as interest income. If the Corporation believes that all amounts outstanding for non-accrual loans will ultimately be collected, payments received subsequent to their classification as non-accrual loans are allocated between interest income and principal.

A loan that is 90 days delinquent may continue to accrue interest if the loan is both adequately secured and is in the process of collection. An adequately secured loan is one that has collateral with a supported fair value that is sufficient to discharge the debt, and/or has an enforceable guarantee from a financially responsible party. A loan is considered to be in the process of collection if collection is proceeding through legal action or through other activities that are reasonably expected to result in repayment of the debt or restoration to current status in the near future.

Loans and lease financing receivables deemed to be a loss are written off through a charge against the allowance for credit losses. Closed-end consumer loans are generally charged off when they become 120 days past due (180 days for open-end consumer loans) if they are not adequately secured by real estate. All other loans are evaluated for possible charge-off when it is probable that the balance will not be collected, based on the ability of the borrower to pay and the value of the underlying collateral. Recoveries of loans previously charged off are recorded as increases to the allowance for credit losses. Past due status is determined based on contractual due dates for loan payments.

Loan Origination Fees and Costs: Loan origination fees and the related direct origination costs are offset and the net amount is deferred and amortized over the life of the loan as an adjustment to interest income using the effective interest method. For mortgage loans sold, the net amount is included in gain or loss upon the sale of the related loan.

Troubled Debt Restructurings (TDRs): Loans whose terms are modified are classified as TDRs if the Corporation grants the borrowers concessions and it is determined that those borrowers are experiencing financial difficulty. Concessions granted under a TDR typically involve a temporary deferral of scheduled loan payments, an extension of a loan's stated maturity date or a reduction in the interest rate. As noted above, TDRs as of December 31, 2012 also included loans where the borrower has been discharged in bankruptcy, and have not reaffirmed their loan obligation. Non-accrual TDRs can be restored to accrual status if principal and interest payments, under the modified terms, are current for six consecutive months after modification.

Allowance for Credit Losses: The allowance for credit losses consists of the allowance for loan losses and the reserve for unfunded lending commitments. The allowance for loan losses represents management's estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. The reserve for unfunded lending commitments represents management's estimate of losses inherent in its unfunded loan commitments and is recorded in other liabilities on the consolidated balance sheet. The allowance for credit losses is increased by charges to expense, through the provision for credit losses, and decreased by charge-offs, net of recoveries. Management believes that the allowance for loan losses and the reserve for unfunded lending commitments are adequate as of the balance sheet date; however, future changes to the allowance or reserve may be necessary based on changes in any of the factors discussed in the following paragraphs.

Maintaining an adequate allowance for credit losses is dependent upon various factors, including the ability to identify potential problem loans in a timely manner. For commercial loans, commercial mortgages and construction loans to commercial borrowers, an internal risk rating process is used. The Corporation believes that internal risk ratings are

the most relevant credit quality indicator for these types of loans. The migration of loans through the various internal risk rating categories is a significant component of the allowance for credit loss methodology, which bases the probability of default on this migration. Risk ratings are initially assigned to loans by loan officers and are reviewed on a regular basis by credit administration staff. The Corporation's loan review officers provide an independent assessment of risk rating accuracy. Ratings change based on the ongoing monitoring procedures performed by credit administration staff, or if specific loan review activities identify a deterioration or an improvement in the loan. While assigning risk ratings involves judgment, the risk rating process allows management to identify riskier credits in a timely manner and to allocate resources to managing troubled accounts.

The following is a summary of the Corporation's internal risk rating categories:

• **Pass:** These loans do not currently pose any identified risk and can range from the highest to average quality, depending on the degree of potential risk.

• **Special Mention:** These loans constitute an undue and unwarranted credit risk, but not to a point of justifying a classification of substandard. Loans in this category are currently acceptable, but are nevertheless potentially weak.

• **Substandard or Lower:** These loans are inadequately protected by current sound worth and paying capacity of the borrower. There exists a well-defined weakness or weaknesses that jeopardize the normal repayment of the debt.

The Corporation does not assign internal risk ratings for smaller balance, homogeneous loans, such as home equity, residential mortgage, consumer, leasing, other and construction loans to individuals secured by residential real estate. For these loans, the most relevant credit quality indicator is delinquency status. The migration of loans through the delinquency status is a significant component of the allowance for credit loss methodology, which bases the probability of default on this migration.

The Corporation's allowance for credit losses includes: 1) specific allowances allocated to impaired loans evaluated for impairment under the Financial Accounting Standards Board's Accounting Standards Codification (FASB ASC) Section 310-10-35; and 2) allowances calculated for pools of loans measured for impairment under FASB ASC Subtopic 450-20.

A loan is considered to be impaired if the Corporation believes it is probable that all amounts will not be collected according to the contractual terms of the loan agreement. Impaired loans consist of all loans on non-accrual status and accruing TDRs. An allowance for loan losses is established for an impaired loan if its carrying value exceeds its estimated fair value. Impaired loans with balances greater than \$1.0 million are evaluated individually for impairment. Impaired loans with balances less than \$1.0 million are pooled and measured for impairment collectively.

All loans evaluated for impairment under FASB ASC Section 310-10-35 are measured for losses on a quarterly basis. As of December 31, 2012 and 2011, substantially all of the Corporation's impaired loans with balances greater than \$1.0 million were measured based on the estimated fair value of each loan's collateral. Collateral could be in the form of real estate, in the case of impaired commercial mortgages and construction loans, or business assets, such as accounts receivable or inventory, in the case of commercial and industrial loans. Commercial and industrial loans may also be secured by real property.

For loans secured by real estate, estimated fair values are determined primarily through certified third-party appraisals, discounted to arrive at expected sale prices, net of estimated selling costs. When a real estate-secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including: the age of the most recent appraisal; the loan-to-value ratio based on the original appraisal; the condition of the property; the Corporation's experience and knowledge of the market; the purpose of the loan; environmental factors; payment status; the strength of any guarantors; and the existence and age of other indications of value such as broker price opinions, among others. The Corporation generally obtains updated certified third-party appraisals for impaired loans secured predominately by real estate every 12 months.

As of December 31, 2012 and 2011, approximately 68% and 78%, respectively, of impaired loans with principal balances greater than \$1.0 million, whose primary collateral is real estate, were measured at estimated fair value using certified third-party appraisals that had been updated within the preceding 12 months.

When updated certified appraisals are not obtained for loans evaluated for impairment under FASB ASC Section 310-10-35 that are secured by real estate, fair values are estimated based on the original appraisal values, as long as the original appraisal indicated a very strong loan to value position and, in the opinion of the Corporation's internal loan evaluation staff, there has not been a significant deterioration in the collateral value since the original appraisal was performed. Original appraisals are typically used only when the estimated collateral value, as adjusted appropriately for age of appraisal, results in a current loan to value ratio that is lower than the Corporation's loan-to-value requirements for new loans, generally less than 70%.

For impaired loans with principal balances greater than \$1.0 million secured by non-real estate collateral, such as accounts receivable or inventory, estimated fair values are determined based on borrower financial statements,

inventory listings, accounts receivable agings or borrowing base certificates. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets. Liquidation or collection discounts are applied to these assets based upon existing loan evaluation policies.

All loans not evaluated for impairment under FASB ASC Section 310-10-35 are evaluated for impairment under FASB ASC Subtopic 450-20, using a pooled loss evaluation approach. In general, these loans include residential mortgages, home equity loans, consumer loans, and lease receivables. Accruing commercial loans, commercial mortgages and construction loans are also evaluated for impairment under FASB ASC Subtopic 450-20.

The Corporation segments its loan portfolio by general loan type, or "portfolio segments," as presented in the table under the heading, "Loans, Net of Unearned Income," within Note D, "Loans and Allowance for Credit Losses." Certain portfolio segments are further disaggregated and evaluated collectively for impairment based on "class segments," which are largely based on the type of collateral underlying each loan. For commercial loans, class segments include loans secured by collateral and unsecured loans. Construction loan class segments include loans secured by commercial real estate, loans to commercial borrowers secured by residential real estate and loans to individuals secured by residential real estate. Consumer loan class segments are based on collateral types and include direct consumer installment loans and indirect automobile loans.

The Corporation calculates allowance allocation needs for loans measured under FASB ASC Subtopic 450-20 through the following procedures:

The loans are segmented into pools with similar characteristics, as noted above. Commercial loans, commercial mortgages and certain construction loans are further segmented into separate pools based on internally assigned risk ratings. Residential mortgages, home equity loans, consumer loans, and lease receivables are further segmented into separate pools based on delinquency status.

A loss rate is calculated for each pool through a regression analysis based on historical losses as loans migrate through the various risk rating or delinquency categories. Estimated loss rates are based on a probability of default (PD) and a loss given default (LGD).

- The loss rate is adjusted to consider qualitative factors, such as economic conditions and trends.

The resulting adjusted loss rate is applied to the balance of the loans in the pool to arrive at the allowance allocation for the pool.

The allocation of the allowance for credit losses is reviewed to evaluate its appropriateness in relation to the overall risk profile of the loan portfolio. The Corporation considers risk factors such as: local and national economic conditions; trends in delinquencies and non-accrual loans; the diversity of borrower industry types; and the composition of the portfolio by loan type. An unallocated allowance is maintained for factors and conditions that exist at the balance sheet date, but are not specifically identifiable, and to recognize the inherent imprecision in estimating and measuring loss exposure.

Effective April 1, 2011, the Corporation revised and enhanced its allowance for credit loss methodology. The significant revisions to the methodology included: a change in the identification of impaired loans to include only non-accrual loans and TDRs, as opposed to also including certain accruing loans with risk ratings of substandard or worse; more frequent quarterly evaluations of impaired loans; and a change in the determination of allocation needs for non-impaired loans through the use of a regression analysis, as opposed to a computation based solely on historical weighted average charge-off rates.

The Corporation's total allowance for credit losses did not change as a result of implementing its new allowance for credit loss methodology. The change in methodology increased the number of loans evaluated for impairment under FASB ASC Section 450-20 and reduced the number of loans evaluated for impairment under FASB ASC Section 310-10-35. In addition, the change in methodology resulted in shifts in allocations by loan type. See Note D, "Loans and Allowance for Credit Losses," for additional details.

Premises and Equipment: Premises and equipment are stated at cost, less accumulated depreciation and amortization. The provision for depreciation and amortization is generally computed using the straight-line method over the estimated useful lives of the related assets, which are a maximum of 50 years for buildings and improvements, eight years for furniture and five years for equipment. Leasehold improvements are amortized over the shorter of the useful life or the non-cancelable lease term. Interest costs incurred during the construction of major bank premises are capitalized.

Other Real Estate Owned: Assets acquired in settlement of mortgage loan indebtedness are recorded as other real estate owned (OREO) and are included in other assets on the consolidated balance sheets, initially at the lower of the estimated fair value of the asset less estimated selling costs or the carrying amount of the loan. Costs to maintain the assets and subsequent gains and losses on sales are included in OREO and repossession expense on the consolidated statements of income.

Mortgage Servicing Rights: The estimated fair value of mortgage servicing rights (MSRs) related to residential mortgage loans sold and serviced by the Corporation is recorded as an asset upon the sale of such loans. MSRs are amortized as a reduction to servicing income over the estimated lives of the underlying loans.

MSRs are stratified and evaluated for impairment by comparing each stratum's carrying amount to its estimated fair value. Fair values are determined through a discounted cash flows valuation. Significant inputs to the valuation include expected net servicing income, the discount rate and the expected life of the underlying loans. Expected life is based on the contractual terms of the loans, as adjusted for prepayment projections for mortgage-backed securities with rates and terms comparable to the loans underlying the MSRs. To the extent the amortized cost of the MSRs exceeds their estimated fair value, a valuation allowance is established through a charge against servicing income, included as a component of mortgage banking income on the consolidated statements

of income. If the Corporation determines, based on subsequent valuations, that impairment no longer exists, then the valuation allowance is reduced through an increase to servicing income.

Derivative Financial Instruments: The Corporation manages its exposure to certain interest rate and foreign currency risks through the use of derivatives. None of the Corporation's outstanding derivative contracts are designated as hedges and are not entered into for speculative purposes. Derivative instruments are carried at fair value, with changes in fair values recognized directly in earnings as components of non-interest income and non-interest expense on the Corporation's consolidated statements of income.

Derivative contracts create counterparty credit risk with both the Corporation's customers and with institutional derivative counterparties. The Corporation manages this credit risk through its credit approval processes, monitoring procedures and obtaining adequate collateral, when appropriate.

Mortgage Banking Derivatives

In connection with its mortgage banking activities, the Corporation enters into commitments to originate certain fixed-rate residential mortgage loans for customers, also referred to as interest rate locks. In addition, the Corporation enters into forward commitments for the future sales or purchases of mortgage-backed securities to or from third-party counterparties to hedge the effect of changes in interest rates on the values of both the interest rate locks and mortgage loans held for sale. Forward sales commitments may also be in the form of commitments to sell individual mortgage loans at a fixed price at a future date. The amount necessary to settle each interest rate lock is based on the price that secondary market investors would pay for loans with similar characteristics, including interest rate and term, as of the date fair value is measured. Gross derivative assets and liabilities are recorded within other assets and other liabilities, respectively, on the consolidated balance sheets, with changes in fair value during the period recorded within mortgage banking income on the consolidated statements of income.

During 2010, the Corporation recorded a \$3.3 million increase in mortgage banking income resulting from the correction of its methodology for determining the fair values of its interest rate locks. Previously, the fair values of interest rate locks included only the value related to the change in interest rates between the date the rate was locked and the reporting date and excluded the value of the expected gain on sale as of the lock date. This change in methodology did not result in a material difference in reported mortgage banking income in prior periods.

Interest Rate Swaps

The Corporation enters into interest rate swaps with certain qualifying commercial loan customers to meet their interest rate risk management needs. The net result of these interest rate swaps is that the customer pays a fixed rate of interest and the Corporation receives a floating rate. The Corporation simultaneously enters into interest rate swaps with dealer counterparties, with identical notional amounts and terms. These interest rate swaps are derivative financial instruments that are recorded at their fair values within other assets and liabilities on the consolidated balance sheets. Changes in fair value during the period are recorded within other service charges and fees on the consolidated statements of income.

Foreign Exchange Contracts

The Corporation enters into foreign exchange contracts to accommodate the needs of its customers. Foreign exchange contracts are commitments to buy or sell foreign currency on a future date at a contractual price. The Corporation offsets its foreign exchange contract exposure with customers by entering into contracts with third-party correspondent financial institutions to mitigate its exposure to fluctuations in foreign currency exchange rates. The Corporation also holds certain amounts of foreign currency with international correspondent banks. At any given time, the total net foreign currency open positions, which include all outstanding contracts and foreign account balances, is less than \$500,000. Gross derivative assets and liabilities are recorded within other assets and other liabilities, respectively, on the consolidated balance sheets, with changes in fair value during the period recorded within other service charges and fees on the consolidated statements of income.

Fair Value Option: FASB ASC Subtopic 825-10 permits entities to measure many financial instruments and certain other items at fair value and requires certain disclosures for items for which the fair value option is applied.

The Corporation has elected to record mortgage loans held for sale at fair value to more accurately reflect the results of its mortgage banking activities in its consolidated financial statements. Derivative financial instruments related to these activities are also recorded at fair value, as detailed under the heading "Derivative Financial Instruments" above. The Corporation determines fair value for its mortgage loans held for sale based on the price that secondary market

investors would pay for loans with similar characteristics, including interest rate and term, as of the date fair value is measured. Changes in fair value during the period are recorded as components of mortgage banking income on the consolidated statements of income. Interest income earned on mortgage loans held for sale is classified within interest income on the consolidated statements of income.

Income Taxes: The provision for income taxes is based upon income before income taxes, adjusted primarily for the effect of tax-exempt income, non-deductible expenses and credits received from investments in partnerships that generate such credits under various Federal programs (Tax Credit Investments). Certain items of income and expense are reported in different periods for financial reporting and tax return purposes. The tax effects of these temporary differences are recognized currently in the deferred income tax provision or benefit. Deferred tax assets or liabilities are computed based on the difference between the financial statement and income tax bases of assets and liabilities using the applicable enacted marginal tax rate. The deferred income tax provision or benefit is based on the changes in the deferred tax asset or liability from period to period.

The Corporation accounts for uncertain tax positions by applying a recognition threshold and measurement attribute for tax positions taken or expected to be taken on a tax return. Recognition and measurement of tax positions is based on management's evaluations of relevant tax code and appropriate industry information about audit proceedings for comparable positions at other organizations. Virtually all of the Corporation's unrecognized tax benefits are for positions that are taken on an annual basis on state tax returns. Increases to unrecognized tax benefits will occur as a result of accruing for the nonrecognition of the position for the current year. Decreases will occur as a result of the lapsing of the statute of limitations for the oldest outstanding year which includes the position or through settlements of positions with the tax authorities.

Stock-Based Compensation: The Corporation grants equity awards to employees, consisting of stock options and restricted stock, under its 2004 Stock Option and Compensation Plan (Employee Option Plan). In addition, employees may purchase shares of the Corporation's common stock under the Corporation's Employee Stock Purchase Plan (ESPP).

The Corporation also grants restricted stock to non-employee members of the board of directors under its 2011 Directors' Equity Participation Plan (Directors' Plan). Under the Directors' Plan, the Corporation can grant equity awards to non-employee holding company and subsidiary bank directors in the form of stock options, restricted stock or common stock.

Compensation expense is equal to the fair value of the stock-based compensation awards, net of estimated forfeitures, and is recognized over the vesting period of such awards. The vesting period represents the period during which employees are required to provide service in exchange for such awards.

Stock option fair values are estimated through the use of the Black-Scholes valuation methodology as of the date of grant. Stock options carry terms of up to ten years. Restricted stock fair values are equal to the average trading price of the Corporation's stock on the date of grant. Restricted stock awards earn dividends during the vesting period, which are forfeitable if the awards do not vest. Stock options and restricted stock under the Employee Option Plan have historically been granted annually and become fully vested over or after a three year period. Restricted stock awards granted under the Directors' Plan generally vest one year from the date of grant. Certain events, as defined in the Employee Option Plan and the Directors' Plan, result in the acceleration of the vesting of both stock options and restricted stock.

Net Income Per Common Share: The Corporation's basic net income per common share is calculated as net income available to common shareholders divided by the weighted average number of common shares outstanding. Net income available to common shareholders is calculated as net income less accrued dividends and discount accretion related to preferred stock.

For diluted net income per common share, net income available to common shareholders is divided by the weighted average number of common shares outstanding plus the incremental number of shares added as a result of converting common stock equivalents, calculated using the treasury stock method. The Corporation's common stock equivalents consist of outstanding stock options and restricted stock.

A reconciliation of weighted average common shares outstanding used to calculate basic net income per common share and diluted net income per common share follows.

	2012	2011	2010
	(in thousands)		
Weighted average common shares outstanding (basic)	199,067	198,912	190,860
Impact of common stock equivalents	972	746	537

Weighted average common shares outstanding (diluted)	200,039	199,658	191,397
--	---------	---------	---------

In 2012, 2011 and 2010, 5.2 million, 5.2 million and 5.5 million stock options, respectively, were excluded from the diluted earnings per share computation as their effect would have been anti-dilutive.

Disclosures about Segments of an Enterprise and Related Information: The Corporation does not have any operating segments which require disclosure of additional information. While the Corporation owns six separate banks, each engages in similar

activities, provides similar products and services, and operates in the same general geographical area. The Corporation's non-banking activities are immaterial and, therefore, separate information has not been disclosed. Financial Guarantees: Financial guarantees, which consist primarily of standby and commercial letters of credit, are accounted for by recognizing a liability equal to the fair value of the guarantees and crediting the liability to income over the term of the guarantee. Fair value is estimated based on the fees currently charged to enter into similar agreements with similar terms.

Business Combinations and Intangible Assets: The Corporation accounts for its acquisitions using the purchase accounting method. Purchase accounting requires that all assets acquired and liabilities assumed, including certain intangible assets that must be recognized, be recorded at their estimated fair values as of the acquisition date. Any purchase price exceeding the fair value of net assets acquired is recorded as goodwill.

Goodwill is not amortized to expense, but is tested for impairment at least annually. A quantitative annual impairment test is not required if, based on a qualitative analysis, the Corporation determines that the existence of events and circumstances indicate that it is more likely than not that goodwill is not impaired. Write-downs of the balance, if necessary as a result of the impairment test, are charged to expense in the period in which goodwill is determined to be impaired. The Corporation performs its annual test of goodwill impairment as of October 31st of each year. If certain events occur which indicate goodwill might be impaired between annual tests, goodwill must be tested when such events occur. Based on the results of its annual impairment test, the Corporation concluded that there was no impairment in 2012, 2011 or 2010. See Note F, "Goodwill and Intangible Assets," for additional details.

Intangible Assets are amortized over their estimated lives. Some intangible assets have indefinite lives and are, therefore, not amortized. All intangible assets must be evaluated for impairment if certain events occur. Any impairment write-downs are recognized as expense on the consolidated statements of income.

Variable Interest Entities: FASB ASC Topic 810 provides guidance on when to consolidate certain Variable Interest Entities(VIE's) in the financial statements of the Corporation. VIE's are entities in which equity investors do not have a controlling financial interest or do not have sufficient equity at risk for the entity to finance activities without additional financial support from other parties. VIEs are assessed for consolidation under ASC Topic 810 when the Corporation holds variable interests in these entities. The Corporation consolidates VIEs when it is deemed to be the primary beneficiary. The primary beneficiary of a VIE is determined to be the party that has the power to make decisions that most significantly affect the economic performance of the VIE and has the obligation to absorb losses or the right to receive benefits that in either case could potentially be significant to the VIE.

The Parent Company owns all of the common stock of four subsidiary trusts, which have issued securities (Trust Preferred Securities) in conjunction with the Parent Company issuing junior subordinated deferrable interest debentures to the trusts. The terms of the junior subordinated deferrable interest debentures are the same as the terms of the Trust Preferred Securities. The Parent Company's obligations under the debentures constitute a full and unconditional guarantee by the Parent Company of the obligations of the trusts. The provisions of FASB ASC Topic 810 related to subsidiary trusts, as interpreted by the SEC, disallow consolidation of subsidiary trusts in the financial statements of the Corporation. As a result, Trust Preferred Securities are not included on the Corporation's consolidated balance sheets. The junior subordinated debentures issued by the Parent Company to the subsidiary trusts, which have the same total balance and rate as the combined equity securities and Trust Preferred Securities issued by the subsidiary trusts, remain in long-term debt. See Note I, "Short-Term Borrowings and Long-Term Debt," for additional information.

The Corporation has made certain Tax Credit Investments under various Federal programs that promote investment in low and moderate income housing and local economic development. Tax Credit Investments are amortized under the effective yield method over the life of the Federal income tax credits generated as a result of such investments, generally six to ten years. As of December 31, 2012 and 2011, the Corporation's Tax Credit Investments, included in other assets on the consolidated balance sheets, totaled \$119.4 million and \$118.4 million, respectively. The net income tax benefit associated with these investments was \$9.6 million, \$8.5 million and \$5.7 million in 2012, 2011 and 2010, respectively. None of the Corporation's Tax Credit Investments were consolidated based on FASB ASC Topic 810 as of December 31, 2012 or 2011.

Fair Value Measurements: FASB ASC Topic 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into the following three categories (from highest to lowest priority):

Level 1 – Inputs that represent quoted prices for identical instruments in active markets.

Level 2 – Inputs that represent quoted prices for similar instruments in active markets, or quoted prices for identical instruments in non-active markets. Also includes valuation techniques whose inputs are derived principally from observable market data other than quoted prices, such as interest rates or other market-corroborated means.

Level 3 – Inputs that are largely unobservable, as little or no market data exists for the instrument being valued.

The Corporation has categorized all assets and liabilities required to be measured at fair value on both a recurring and nonrecurring basis into the above three levels. See Note R, "Fair Value Measurements," for additional details.

New Accounting Standard: In February 2013, the FASB issued ASC Update 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income." ASC Update 2013-02 clarifies the requirements for the reporting of reclassifications out of accumulated other comprehensive income. For items reclassified out of accumulated other comprehensive income and into net income in their entirety, companies must disclose the effect of the reclassification on each affected statement of income line item. For all other reclassifications, companies must cross reference to other required U.S. GAAP disclosures. This standards update is effective for the first interim period beginning on or after December 15, 2012. For the Corporation, this standards update is effective in connection with its March 31, 2013 interim filing on Form 10-Q. The adoption of ASC Update 2013-02 will not materially impact the Corporation's financial statements.

Reclassifications: Certain amounts in the 2011 and 2010 consolidated financial statements and notes have been reclassified to conform to the 2012 presentation.

NOTE B – RESTRICTIONS ON CASH AND DUE FROM BANKS

The Corporation's subsidiary banks are required to maintain reserves, in the form of cash and balances with the Federal Reserve Bank, against their deposit liabilities. The amounts of such reserves as of December 31, 2012 and 2011 were \$101.8 million and \$120.8 million, respectively.

NOTE C – INVESTMENT SECURITIES

The following tables present the amortized cost and estimated fair values of investment securities as of December 31:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(in thousands)			
2012 Held to Maturity				
Mortgage-backed securities	\$292	\$27	\$—	\$319
2012 Available for Sale				
Equity securities	\$118,465	\$5,016	\$(918)	\$122,563
U.S. Government securities	325	—	—	325
U.S. Government sponsored agency securities	2,376	21	—	2,397
State and municipal securities	301,842	13,763	(86)	315,519
Corporate debt securities	112,162	7,858	(7,178)	112,842
Collateralized mortgage obligations	1,195,234	16,008	(123)	1,211,119
Mortgage-backed securities	847,790	31,831	—	879,621
Auction rate securities	174,026	—	(24,687)	149,339
	\$2,752,220	\$74,497	\$(32,992)	\$2,793,725
2011 Held to Maturity				
U.S. Government sponsored agency securities	\$5,987	\$—	\$(14)	\$5,973
State and municipal securities	179	—	—	179
Mortgage-backed securities	503	44	—	547
	\$6,669	\$44	\$(14)	\$6,699
2011 Available for Sale				
Equity securities	\$117,486	\$2,383	\$(2,819)	\$117,050
U.S. Government securities	334	—	—	334
U.S. Government sponsored agency securities	3,987	87	(1)	4,073
State and municipal securities	306,186	15,832	—	322,018
Corporate debt securities	132,855	4,979	(14,528)	123,306
Collateralized mortgage obligations	982,851	19,186	(828)	1,001,209
Mortgage-backed securities	848,675	31,837	(415)	880,097
Auction rate securities	240,852	120	(15,761)	225,211
	\$2,633,226	\$74,424	\$(34,352)	\$2,673,298

Securities carried at \$1.8 billion as of December 31, 2012 and December 31, 2011 were pledged as collateral to secure public and trust deposits and customer repurchase agreements.

Available for sale equity securities include restricted investment securities issued by the Federal Home Loan Bank (FHLB) and the Federal Reserve Bank totaling \$71.7 million and \$82.5 million as of December 31, 2012 and 2011, respectively, common stocks of financial institutions (\$44.2 million at December 31, 2012 and \$27.9 million at December 31, 2011) and other equity investments (\$6.7 million at December 31, 2012 and 2011).

As of December 31, 2012, the financial institutions stock portfolio had a cost basis of \$40.1 million and a fair value of \$44.2 million. During 2012, the Corporation entered into an agreement with a private investor to purchase approximately 7% of the outstanding common shares in a single financial institution as a passive investment. As of December 31, 2012, the Corporation's total investment in the common stock of that financial institution had a cost basis of \$20.0 million and a fair value of \$21.6 million. This investment accounted for approximately 50% of the Corporation's investments in the common stocks of publicly traded financial institutions. No other investment within the Corporation's financial institutions stock portfolio exceeded 5% of the portfolio's fair value.

The amortized cost and estimated fair value of debt securities as of December 31, 2012, by contractual maturity, are shown in the following table. Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Held to Maturity		Available for Sale	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
	(in thousands)			
Due in one year or less	\$—	\$—	\$40,009	\$40,066
Due from one year to five years	—	—	60,710	65,006
Due from five years to ten years	—	—	176,212	187,333
Due after ten years	—	—	313,800	288,017
	—	—	590,731	580,422
Collateralized mortgage obligations	—	—	1,195,234	1,211,119
Mortgage-backed securities	292	319	847,790	879,621
	\$292	\$319	\$2,633,755	\$2,671,162

The following table presents information related to gains and losses on the sales of equity and debt securities, and losses recognized for other-than-temporary impairment of investments:

	Gross Realized Gains	Gross Realized Losses	Other-than-temporary Impairment Losses	Net Gains (Losses)
		(in thousands)		
2012:				
Equity securities	\$1,215	\$—	\$(356)) \$859
Debt securities	2,620	—	(453)) 2,167
Total	\$3,835	\$—	\$(809)) \$3,026
2011:				
Equity securities	\$835	\$—	\$(1,212)) \$(377)
Debt securities	6,655	(19)) (1,698)) 4,938
Total	\$7,490	\$(19)) \$(2,910)) \$4,561
2010:				
Equity securities	\$2,424	\$(706)) \$(1,982)) \$(264)
Debt securities	13,005	(71)) (11,969)) 965
Total	\$15,429	\$(777)) \$(13,951)) \$701

The following table presents a summary of other-than-temporary impairment charges recorded as components of investment securities gains on the consolidated statements of income, by investment security type:

	2012	2011	2010
	(in thousands)		
Equity securities - financial institution stocks	\$356	\$1,212	\$1,982
Pooled trust preferred securities	19	1,406	11,969
Auction rate securities	434	292	—
Total debt securities	453	1,698	11,969
Total other-than-temporary impairment charges	\$809	\$2,910	\$13,951

The \$356,000 other-than-temporary impairment charge related to financial institutions stocks in 2012 was due to the severity and duration of the declines in fair values of certain bank stock holdings, in conjunction with management's evaluation of the near-term prospects of each specific issuer. As of December 31, 2012, after other-than-temporary impairment charges, the financial institution stock portfolio had an adjusted cost basis of \$40.1 million and a fair

value of \$44.2 million.

78

The credit related other-than-temporary impairment charges for debt securities during 2012 included \$19,000 for investments in pooled trust preferred securities issued by financial institutions and \$434,000 for investments in student loan auction rate securities, also known as auction rate certificates (ARCs). The credit related other-than-temporary impairment charges for debt securities were determined based on expected cash flows models.

The following table presents a summary of the cumulative credit related other-than-temporary impairment charges, recognized as components of earnings, for debt securities still held by the Corporation at December 31:

	2012	2011	2010
	(in thousands)		
Balance of cumulative credit losses on debt securities, beginning of year	\$(22,781)	\$(27,560)	\$(15,612)
Additions for credit losses recorded which were not previously recognized as components of earnings	(453)	(1,698)	(11,969)
Reductions for securities sold	—	6,400	—
Reductions for increases in cash flows expected to be collected that are recognized over the remaining life of the security	155	77	21
Balance of cumulative credit losses on debt securities, end of year	\$(23,079)	\$(22,781)	\$(27,560)

The following table presents the gross unrealized losses and estimated fair values of investments, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, as of December 31, 2012:

	Less Than 12 months		12 Months or Longer		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
	(in thousands)					
State and municipal securities	\$9,441	\$(86)	\$—	\$—	\$9,441	\$(86)
Corporate debt securities	—	—	44,877	(7,178)	44,877	(7,178)
Collateralized mortgage obligations	50,274	(67)	13,058	(56)	63,332	(123)
Auction rate securities	12,303	(717)	137,035	(23,970)	149,338	(24,687)
Total debt securities	72,018	(870)	194,970	(31,204)	266,988	(32,074)
Equity securities	2,146	(199)	5,508	(719)	7,654	(918)
	\$74,164	\$(1,069)	\$200,478	\$(31,923)	\$274,642	\$(32,992)

The Corporation's mortgage-backed securities and collateralized mortgage obligations have contractual terms that generally do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Because the decline in market value of collateralized mortgage obligations is attributable to changes in interest rates and not credit quality, and because the Corporation does not have the intent to sell and does not believe it will more likely than not be required to sell any of these securities prior to a recovery of their fair value to amortized cost, the Corporation does not consider those investments to be other-than-temporarily impaired as of December 31, 2012. The unrealized holding losses on ARCs are attributable to liquidity issues resulting from the failure of periodic auctions. Fulton Financial Advisors (FFA), the investment management and trust division of the Corporation's Fulton Bank, N.A. subsidiary, held ARCs for some of its customers' accounts. FFA had previously purchased ARCs for customers as short-term investments with fair values that could be derived based on periodic auctions under normal market conditions. During 2009 and 2010, the Corporation purchased ARCs from customers due to the failure of these periodic auctions, which made these previously short-term investments illiquid.

As of December 31, 2012, approximately \$138 million, or 93%, of the ARCs were rated above investment grade, with approximately \$8 million, or 5%, AAA rated and \$96 million, or 64%, AA rated. Approximately \$11 million, or 7%, of ARCs were either not rated or rated below investment grade by at least one ratings agency. Of this amount, approximately \$8 million, or 73%, of the loans underlying these ARCs have principal payments which are guaranteed by the federal government. In total, approximately \$145 million, or 98%, of the loans underlying the ARCs have

principal payments which are guaranteed by the federal government. At December 31, 2012, all ARCs were current and making scheduled interest payments. Because the Corporation does not have the intent to sell and does not believe it will more likely than not be required to sell any of these securities prior to a recovery of their fair value to amortized cost, the Corporation does not consider these investments to be other-than-temporarily impaired as of December 31, 2012.

During the year ended December 31, 2012, the Corporation recorded \$434,000 of other-than-temporary impairment charges for two individual ARCs by the same issuer based on an expected cash flow model. These other-than-temporarily impaired ARCs have principal payments supported by non-guaranteed private student loans, as opposed to federally guaranteed student loans.

As noted above, for its investments in stocks of financial institutions, management evaluates the near-term prospects of the issuers in relation to the severity and duration of the impairment. Based on that evaluation and the Corporation's ability and intent to hold those investments for a reasonable period of time sufficient for a recovery of fair value, the Corporation does not consider those investments with unrealized holding losses as of December 31, 2012 to be other-than-temporarily impaired.

The majority of the Corporation's available for sale corporate debt securities are issued by financial institutions. The following table presents the amortized cost and estimated fair values of corporate debt securities as of December 31:

	2012		2011	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
	(in thousands)			
Single-issuer trust preferred securities	\$56,834	\$51,656	\$83,899	\$74,365
Subordinated debt	47,286	51,747	40,184	41,296
Pooled trust preferred securities	5,530	6,927	6,236	5,109
Corporate debt securities issued by financial institutions	109,650	110,330	130,319	120,770
Other corporate debt securities	2,512	2,512	2,536	2,536
Available for sale corporate debt securities	\$112,162	\$112,842	\$132,855	\$123,306

The Corporation's investments in single-issuer trust preferred securities had an unrealized loss of \$5.2 million as of December 31, 2012. The Corporation did not record any other-than-temporary impairment charges for single-issuer trust preferred securities in 2012, 2011 or 2010. The Corporation held eight single-issuer trust preferred securities that were rated below investment grade by at least one ratings agency, with an amortized cost of \$22.9 million and an estimated fair value of \$22.3 million as of December 31, 2012. The majority of the single-issuer trust preferred securities rated below investment grade were rated BB or Ba. Single-issuer trust preferred securities with an amortized cost of \$4.7 million and an estimated fair value of \$3.4 million as of December 31, 2012 were not rated by any ratings agency.

The Corporation held ten pooled trust preferred securities as of December 31, 2012. Nine of these securities, with an amortized cost of \$5.4 million and an estimated fair value of \$6.8 million, were rated below investment grade by at least one ratings agency, with ratings ranging from C to Ca. For each of the nine pooled trust preferred securities rated below investment grade, the class of securities held by the Corporation was below the most senior tranche, with the Corporation's interests being subordinate to other investors in the pool. The Corporation determines the fair value of pooled trust preferred securities based on quotes provided by third-party brokers.

The amortized cost of pooled trust preferred securities is the purchase price of the securities, net of cumulative credit related other-than-temporary impairment charges, determined using an expected cash flow model. The most significant input to the expected cash flow model is the expected payment deferral rate for each pooled trust preferred security. The Corporation evaluates the financial metrics, such as capital ratios and non-performing asset ratios, of the individual financial institution issuers that comprise each pooled trust preferred security to estimate its expected deferral rate.

Based on management's evaluations, corporate debt securities with a fair value of \$112.8 million were not subject to any additional other-than-temporary impairment charges as of December 31, 2012. The Corporation does not have the intent to sell and does not believe it will more likely than not be required to sell any of these securities prior to a recovery of their fair value to amortized cost, which may be maturity.

NOTE D – LOANS AND ALLOWANCE FOR CREDIT LOSSES

Loans, net of unearned income

Loans, net of unearned income are summarized as follows as of December 31:

	2012	2011
	(in thousands)	
Real estate – commercial mortgage	\$4,664,426	\$4,602,596
Commercial – industrial, financial and agricultural	3,612,065	3,639,368
Real estate – home equity	1,632,390	1,624,562
Real estate – residential mortgage	1,256,991	1,097,192
Real estate – construction	584,118	615,445
Consumer	309,220	318,101
Leasing and other	74,239	63,254
Overdrafts	18,393	15,446
Loans, gross of unearned income	12,151,842	11,975,964
Unearned income	(7,238)	(6,994)
Loans, net of unearned income	\$12,144,604	\$11,968,970

The Corporation has extended credit to the officers and directors of the Corporation and to their associates. These related-party loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated persons and do not involve more than the normal risk of collectability. The aggregate dollar amount of these loans, including unadvanced commitments, was \$118.8 million and \$167.4 million as of December 31, 2012 and 2011, respectively. During 2012, additions totaled \$23.1 million and repayments and other changes in related-party loans totaled \$71.7 million.

The total portfolio of mortgage loans serviced by the Corporation for unrelated third parties was \$4.5 billion and \$3.9 billion as of December 31, 2012 and 2011, respectively.

Allowance for Credit Losses

The following table presents the components of the allowance for credit losses as of December 31:

	2012	2011	2010
	(in thousands)		
Allowance for loan losses	\$223,903	\$256,471	\$274,271
Reserve for unfunded lending commitments	1,536	1,706	1,227
Allowance for credit losses	\$225,439	\$258,177	\$275,498

The following table presents the activity in the allowance for credit losses for the years ended December 31:

	2012	2011	2010
	(in thousands)		
Balance at beginning of year	\$258,177	\$275,498	\$257,553
Loans charged off	(140,366)	(161,333)	(151,425)
Recoveries of loans previously charged off	13,628	9,012	9,370
Net loans charged off	(126,738)	(152,321)	(142,055)
Provision for credit losses	94,000	135,000	160,000
Balance at end of year	\$225,439	\$258,177	\$275,498

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

The following table presents the activity in the allowance for loan losses, by portfolio segment, for the years ended December 31 and loans, net of unearned income, and their related allowance for loan losses, by portfolio segment, as of December 31:

(1) The Corporation's unallocated allowance, which was approximately 9% and 10% as of December 31, 2012 and December 31, 2011, respectively, was, in the opinion of the Corporation's management, reasonable and appropriate given that the estimates used in the allocation process are inherently imprecise.

(2) For the year ended ended December 31, 2012, the provision for loan losses excludes a \$170,000 reduction in provision applied to unfunded commitments. The total provision for credit losses, comprised of allocations for both funded and unfunded loans, was \$94.0 million for the year ended ended December 31, 2012. For the year ended ended December 31, 2011, the provision for loan losses excludes a \$479,000 provision applied to unfunded commitments. The total provision for credit losses, comprised of allocations for both funded and unfunded loans, was \$135.0 million for the year ended ended December 31, 2011.

N/A – Not applicable.

During 2012, the Corporation sold \$50.5 million of non-accrual commercial mortgage, commercial and construction loans to third-party investors, resulting in a total increase to charge-offs of \$24.6 million. Because the existing allowance for credit losses on the loans sold exceeded the charge-off amount, no additional provision for credit losses

was required. In December 2011, the Corporation sold \$34.7 million of non-performing residential mortgages and \$152,000 of non-performing home equity loans to a third-party investor, resulting in a total increase to charge-offs of \$17.4 million during 2011 and, because the existing allowance

for credit losses on the loans sold was less than the charge-off amount, a \$5.0 million increase to the provision for credit losses was recorded. Below is a summary of these transactions:

	2012			Total	2011	
	Real Estate - Commercial mortgage	Commercial - industrial, financial and agricultural	Real Estate - Construction		Real Estate - Residential Mortgage & Real Estate - Home Equity	
	(in thousands)

As of December 31, 2012 and 2011, there were \$94.5 million and \$109.9 million, respectively, of impaired loans that did not have a related allowance for loan loss. The estimated fair values of the collateral for these loans exceeded their carrying amount and, accordingly, no specific valuation allowance was considered to be necessary.

The following table presents average impaired loans, by class segment, for the years ended December 31:

	2012		2011	
	Average Recorded Investment	Interest Income Recognized (1)	Average Recorded Investment	Interest Income Recognized (1)
	(in thousands)			
With no related allowance recorded:

Total	\$288,371	\$3,320	\$375,177	\$5,562

(1) All impaired loans, excluding accruing TDRs, were non-accrual loans. Interest income recognized for the years ended December 31, 2012 and 2011 primarily represent amounts earned on accruing TDRs.

N/A – Not applicable.

The average recorded investment in impaired loans during 2010 was approximately \$772.3 million. The Corporation recognized interest income of approximately \$27.4 million on impaired loans in 2010.

Credit Quality Indicators and Non-performing Assets

(1)Includes all accruing loans 30 days to 89 days past due.

(2)Includes all accruing loans 90 days or more past due and all non-accrual loans.

The following table presents non-performing assets as of December 31:

	2012	2011
	(in thousands)	
Non-accrual loans	\$184,832	\$257,761
Accruing loans greater than 90 days past due	26,221	28,767
Total non-performing loans	211,053	286,528
Other real estate owned	26,146	30,803
Total non-performing assets	\$237,199	\$317,331

The following table presents loans whose terms were modified under TDRs as of December 31:

	2012	2011
	(in thousands)	
Real-estate - commercial mortgage	\$34,672	\$22,425
Real-estate - residential mortgage	32,993	32,331
Construction - commercial residential	10,564	7,645
Commercial - secured	5,623	3,449
Real estate - home equity	1,518	183
Commercial - unsecured	121	132
Consumer - direct	17	10
Total accruing TDRs	85,508	66,175
Non-accrual TDRs (1)	31,245	32,587
Total TDRs	\$116,753	\$98,762

(1)Included within non-accrual loans in the preceding table.

As of December 31, 2012 and 2011, there were \$7.4 million and \$1.7 million, respectively, of commitments to lend additional funds to borrowers whose loans were modified under TDRs.

The following table presents loans modified as TDRs during the years ended December 31, 2012 and 2011 that remain classified as TDRs as of December 31:

	2012		2011	
	Number	Recorded	Number	Recorded
	of Loans Investment			
	(dollars in thousands)			
Real estate - commercial mortgage	29	\$23,980	20	\$18,821

Commercial - secured	28	6,199	11	3,150
Real estate - home equity	118	5,477	—	—
Construction - commercial	1	944	—	—
Consumer - direct	22	23	—	—
Commercial - unsecured	—	—	1	132
	290	\$61,869	53	\$35,006

During 2012, new interpretative regulatory guidance was issued addressing the accounting for loans to individuals discharged through bankruptcy proceedings pursuant to Chapter 7 of the U.S. Bankruptcy Code. In accordance with this guidance, the Corporation classifies loans where borrowers have been discharged in bankruptcy, and have not reaffirmed their loan obligation, as troubled debt restructurings (TDRs), even if the repayment terms of such loans have not otherwise been modified. Additionally, the Corporation places such loans on non-accrual status, regardless of delinquency status, and charges off the difference between the fair value, less selling costs, of the loan's collateral and its recorded investment. As a result of implementing this new regulatory guidance, \$10.6 million (net of \$3.4 million in charge-offs recorded in 2012) of loans were placed on non-accrual status as of December 31, 2012. As of December 31, 2012, approximately 84% of these loans were current on their contractual payments. Because the Corporation believes that all amounts outstanding for these loans will ultimately be collected, payments received subsequent to their classification as non-accrual loans were allocated between interest income and principal.

The following table presents loans, by class segment, modified during the years ended December 31, 2012 and 2011 which had a payment default during their respective year of modification and remain classified as TDRs as of December 31:

	2012		2011	
	Number of Loans	Recorded Investment (dollars in thousands)	Number of Loans	Recorded Investment
Real estate - residential mortgage	34	\$8,151	10	\$2,032

NOTE E – PREMISES AND EQUIPMENT

The following is a summary of premises and equipment as of December 31:

	2012	2011
	(in thousands)	
Land	\$37,245	\$37,669
Buildings and improvements	270,480	258,653
Furniture and equipment	172,263	160,424
Construction in progress	17,098	12,064
	497,086	468,810
Less: Accumulated depreciation and amortization	(269,363)	(256,536)
	\$227,723	\$212,274

NOTE F – GOODWILL AND INTANGIBLE ASSETS

The following table summarizes the changes in goodwill:

	2012	2011	2010
	(in thousands)		
Balance at beginning of year	\$536,005	\$535,518	\$534,862
Sale of Global Exchange	(5,295)	—	—
Other goodwill additions, net	(54)	487	656
Balance at end of year	\$530,656	\$536,005	\$535,518

The Corporation did not complete any acquisitions during the years ended December 31, 2012, 2011 and 2010. The other goodwill additions were primarily due to additional purchase price incurred for prior acquisitions as a result of contingencies being met, offset by tax benefits realized on the exercises of stock options assumed in acquisitions. As noted in Note A, "Summary of Significant Accounting Policies," under the heading "Business," the Corporation divested Global Exchange in December 2012. As a result of this divestiture, \$5.3 million of goodwill allocated to Global Exchange was written-off and included as a reduction to the gain on sale recorded in non-interest income on the consolidated statements of income.

The Corporation tests for impairment by first allocating its goodwill and other assets and liabilities, as necessary, to defined reporting units, generally represented as its subsidiary banks. After this allocation is completed, a two-step valuation process is applied, as required by FASB ASC Topic 805. In Step 1, each reporting unit's fair value is determined based on three metrics: (1) a primary market approach, which measures fair value based on trading multiples of independent publicly traded financial institutions of comparable size and character to the reporting units, (2) a secondary market approach, which measures fair value based on acquisition multiples of publicly traded financial institutions of comparable size and character which were recently acquired, and (3) an income approach, which estimates fair value based on discounted cash flows. If the fair value of any reporting unit exceeds its adjusted net book value, no write-down of goodwill is necessary. If the fair value of any reporting unit is less than its adjusted net book value, a Step 2 valuation procedure is required to assess the proper carrying value of the goodwill allocated to that reporting unit. The valuation procedures applied in a Step 2 valuation are similar to those that would be performed upon an acquisition, with the Step 1 fair value representing a hypothetical reporting unit purchase price. Based on its 2012 annual goodwill impairment test, the Corporation determined that its Fulton Bank of New Jersey (FBNJ), The Columbia Bank (Columbia) and FNB Bank, N.A. (FNB), reporting units failed the Step 1 impairment test. As a result of the Step 1 test, FBNJ's adjusted net book value exceeded its fair value by approximately \$54.2 million, or 12%, Columbia's adjusted net book value exceeded its fair value by approximately \$25.1 million, or 8%, and FNB's adjusted net book value exceeded its fair value by approximately \$190,000, or 1%. Based on the results of its Step 2 valuation procedures, the Corporation determined that the carrying value of the goodwill allocated to each of these reporting units was not impaired. The goodwill allocated to FBNJ, Columbia and FNB at December 31, 2012 was \$167.6 million, \$112.6 million and \$4.5 million, respectively.

All of the Corporation's remaining reporting units passed the Step 1 goodwill impairment test, resulting in no goodwill impairment charges in 2012. Two reporting units, with total allocated goodwill of \$16.6 million, had fair values that exceeded adjusted net book values by less than 5%. The remaining two reporting units, with total allocated goodwill of \$229.4 million, had fair values that exceeded net book values by approximately 21% in the aggregate.

The estimated fair values of the Corporation's reporting units are subject to uncertainty, including future changes in the trading and acquisition multiples of comparable financial institutions and future operating results of reporting units which could differ significantly from the assumptions used in the discounted cash flow analysis under the income approach.

The following table summarizes intangible assets as of December 31:

	2012			2011		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
	(in thousands)					
Amortizing:						
Core deposit	\$50,279	\$(46,766)) \$3,513	\$50,279	\$(44,134)) \$6,145
Other	9,123	(8,992)) 131	11,403	(10,607)) 796
Total amortizing	59,402	(55,758)) 3,644	61,682	(54,741)) 6,941
Non-amortizing	1,263	—) 1,263	1,263	—) 1,263
	\$60,665	\$(55,758)) \$4,907	\$62,945	\$(54,741)) \$8,204

As a result of the divestiture of Global Exchange, gross intangible assets totaling \$2.3 million (\$266,000, net of accumulated amortization) that were allocated to Global Exchange were written-off and included as a reduction to the gain on sale recorded in non-interest income on the consolidated statements of income.

Core deposit intangible assets are amortized using an accelerated method over the estimated remaining life of the acquired core deposits. As of December 31, 2012, these assets had a weighted average remaining life of approximately three years. Other amortizing intangible assets, consisting primarily of premiums paid on branch acquisitions in prior years that did not qualify for business combinations accounting under FASB ASC Topic 810, had a weighted average remaining life of two years. Amortization expense related to intangible assets totaled \$3.0 million, \$4.3 million and \$5.2 million in 2012, 2011 and 2010, respectively.

Future amortization expense is expected to be as follows (in thousands):

Year	
2013	\$2,138
2014	1,259
2015	247
Total	\$3,644

NOTE G – MORTGAGE SERVICING RIGHTS

The following table summarizes the changes in MSR, which are included in other assets on the consolidated balance sheets:

	2012	2011
	(in thousands)	
Amortized cost:		
Balance at beginning of year	\$34,666	\$30,700
Originations of mortgage servicing rights	15,451	9,884
Amortization expense	(10,380)	(5,918)
Balance at end of year	\$39,737	\$34,666
Valuation allowance:		
Balance at beginning of year	\$(1,550)	\$(1,550)
Additions	(2,130)	—
Balance at end of year	\$(3,680)	\$(1,550)
Net MSR at end of year	\$36,057	\$33,116

MSRs represent the economic value of existing contractual rights to service mortgage loans that have been sold. Accordingly, actual and expected prepayments of the underlying mortgage loans can impact the value of MSRs. The Corporation estimates the fair value of its MSRs by discounting the estimated cash flows from servicing income, net of expense, over the expected life of the underlying loans at a discount rate commensurate with the risk associated with these assets. Expected life is based on the contractual terms of the loans, as adjusted for prepayment projections for mortgage-backed securities with rates and terms comparable to the loans underlying the MSRs.

The Corporation determined that the estimated fair value of MSRs was \$36.1 million as of December 31, 2012 and \$33.1 million as of December 31, 2011. The estimated fair value of MSRs was equal to their book value, net of the valuation allowance, at December 31, 2012. Therefore, no further adjustment to the valuation allowance was necessary as of December 31, 2012.

Estimated MSR amortization expense for the next five years, based on balances as of December 31, 2012 and the contractual remaining lives of the underlying loans, follows (in thousands):

Year	
2013	\$8,518
2014	7,694
2015	6,782
2016	5,777
2017	4,673

NOTE H – DEPOSITS

Deposits consisted of the following as of December 31:

	2012	2011
	(in thousands)	
Noninterest-bearing demand	\$3,008,675	\$2,588,034
Interest-bearing demand	2,755,603	2,529,388
Savings and money market accounts	3,325,475	3,394,367
Time deposits	3,383,338	4,013,950
	\$12,473,091	\$12,525,739

Included in time deposits were certificates of deposit equal to or greater than \$100,000 of \$1.2 billion and \$1.5 billion as of December 31, 2012 and 2011, respectively. The scheduled maturities of time deposits as of December 31, 2012 were as follows (in thousands):

Year	
2013	\$2,289,386
2014	548,192
2015	282,338
2016	99,289
2017	79,116
Thereafter	85,017
	\$3,383,338

NOTE I – SHORT-TERM BORROWINGS AND LONG-TERM DEBT

Short-term borrowings as of December 31, 2012, 2011 and 2010 and the related maximum amounts outstanding at the end of any month in each of the three years then ended are presented below. The securities underlying the repurchase agreements remain in available for sale investment securities.

	December 31			Maximum Outstanding		
	2012	2011	2010	2012	2011	2010
	(in thousands)					
Federal funds purchased	\$592,470	\$253,470	\$267,844	\$636,562	\$381,093	\$506,567
Customer repurchase agreements	156,238	186,735	204,800	258,734	235,780	279,414
Customer short-term promissory notes	119,691	156,828	201,433	152,570	196,562	243,637
Other	—	—	—	25,000	—	—
	\$868,399	\$597,033	\$674,077			

As of December 31, 2012, the Corporation had aggregate availability under Federal funds lines of \$1.8 billion, with \$592.5 million outstanding. A combination of commercial real estate loans, commercial loans and securities are pledged to the Federal Reserve Bank of Philadelphia to provide access to Federal Reserve Bank Discount Window borrowings. As of December 31, 2012 and 2011, the Corporation had \$1.9 billion and \$1.7 billion, respectively, of collateralized borrowing availability at the Discount Window, and no outstanding borrowings.

The following table presents information related to customer repurchase agreements:

	2012	2011	2010		
	(dollars in thousands)				
Amount outstanding as of December 31	\$156,238	\$186,735	\$204,800		
Weighted average interest rate at year end	0.16	% 0.12	% 0.28	%	%
Average amount outstanding during the year	\$206,842	\$208,144	\$252,633		
Weighted average interest rate during the year	0.12	% 0.13	% 0.31	%	%

FHLB advances and long-term debt included the following as of December 31:

	2012	2011
	(in thousands)	
FHLB advances	\$524,817	\$666,565
Subordinated debt	200,000	200,000
Junior subordinated deferrable interest debentures	171,136	175,260
Other long-term debt	1,264	1,585
Unamortized issuance costs	(2,964) (3,261
	\$894,253	\$1,040,149

Excluded from the preceding table is the Parent Company's revolving line of credit with its subsidiary banks. As of December 31, 2012 and 2011, there were no amounts outstanding under this line of credit. This line of credit, with a total commitment of \$100.0 million, is secured by equity securities and insurance investments and bears interest at the prime rate minus 1.50%. Although the line of credit and related interest are eliminated in the consolidated financial statements, this borrowing arrangement is senior to the subordinated debt and the junior subordinated deferrable interest debentures.

FHLB advances mature through March 2027 and carry a weighted average interest rate of 4.14%. As of December 31, 2012, the Corporation had an additional borrowing capacity of approximately \$1.4 billion with the FHLB. Advances from the FHLB are secured by FHLB stock, qualifying residential mortgages, investments and other assets.

The following table summarizes the scheduled maturities of FHLB advances and long-term debt as of December 31, 2012 (in thousands):

Year	
2013	\$5,511
2014	5,669
2015	150,797
2016	236,291
2017	314,888
Thereafter	181,097
	\$894,253

In May 2007, the Corporation issued \$100 million of ten-year subordinated notes, which mature on May 1, 2017 and carry a fixed rate of 5.75% and an effective rate of approximately 5.96% as a result of issuance costs. Interest is paid semi-annually in May and November. In March 2005, the Corporation issued \$100 million of ten-year subordinated notes, which mature April 1, 2015 and carry a fixed rate of 5.35% and an effective rate of approximately 5.49% as a result of issuance costs. Interest is paid semi-annually in October and April.

The Parent Company owns all of the common stock of four subsidiary trusts, which have issued Trust Preferred Securities in conjunction with the Parent Company issuing junior subordinated deferrable interest debentures to the trusts. The Trust Preferred Securities are redeemable on specified dates, or earlier if the deduction of interest for federal income taxes is prohibited, the Trust Preferred Securities no longer qualify as Tier I regulatory capital, or if certain other events arise.

The following table provides details of the debentures as of December 31, 2012 (dollars in thousands):

Debentures Issued to	Fixed/ Variable	Interest Rate	Amount	Maturity	Callable	Callable Price
Columbia Bancorp Statutory Trust	Variable	2.96	% \$6,186	06/30/34	03/31/13	100.0
Columbia Bancorp Statutory Trust II	Variable	2.20	% 4,124	03/15/35	03/15/13	100.0
Columbia Bancorp Statutory Trust III	Variable	2.08	% 6,186	06/15/35	03/15/13	100.0
Fulton Capital Trust I	Fixed	6.29	% 154,640	02/01/36	N/A	N/A

NOTE J – DERIVATIVE FINANCIAL INSTRUMENTS

The following table presents a summary of the notional amounts and fair values of derivative financial instruments as of December 31:

	2012		2011	
	Notional Amount	Asset (Liability) Fair Value	Notional Amount	Asset (Liability) Fair Value
	(in thousands)			
Interest Rate Locks with Customers				
Positive fair values	\$314,416	\$6,912	\$181,583	\$3,888
Negative fair values	9,714	(155)	1,593	(10)
Net interest rate locks with customers		6,757		3,878
Forward Commitments				
Positive fair values	79,152	707	3,178	13
Negative fair values	236,500	(915)	173,208	(2,724)
Net forward commitments		(208)		(2,711)
Interest Rate Swaps				
Interest rate swaps with customers	130,841	7,090	33,846	2,744
Interest rate swaps with counterparties	130,841	(7,090)	33,846	(2,744)
Foreign Exchange Contracts with Customers				
Positive fair values	1,941	137	45,143	1,413
Negative fair values	10,199	(348)	13,984	(137)
Net foreign exchange contracts with customers		(211)		1,276
Foreign Exchange Contracts with Correspondent Banks				
Positive fair values	60,106	1,064	37,678	749
Negative fair values	37,557	(1,121)	68,081	(2,454)
Net foreign exchange contracts with correspondent banks		(57)		(1,705)
Net derivative fair value asset		\$6,281		\$738

The following table presents a summary of the fair value gains and losses on derivative financial instruments:

	2012	2011	2010	Statements of Income Classification
	(in thousands)			
Interest rate locks with customers	\$2,879	\$3,861	\$428	Mortgage banking income
Forward commitments	2,503	(11,190)	7,195	Mortgage banking income
Interest rate swaps with customers	4,346	2,744	—	Other service charges and fees
Interest rate swaps with counterparties	(4,346)	(2,744)	—	Other service charges and fees
Foreign exchange contracts with customers	(1,487)	1,295	(535)	Other service charges and fees
Foreign exchange contracts with correspondent banks	1,648	(2,133)	268	Other service charges and fees
Net fair value gains (losses) on derivative financial instruments	\$5,543	\$(8,167)	\$7,356	

The Corporation has elected to record mortgage loans held for sale at fair value to more accurately reflect the results of its mortgage banking activities in its consolidated financial statements. The following table presents a summary of the Corporation's mortgage loans held for sale and the impact of the fair value election on the consolidated financial statements as of and for the years ended December 31, 2012 and 2011:

	Cost (1) (in thousands)	Fair Value	Balance Sheet Classification	Fair Value Gain	Statements of Income Classification
December 31, 2012:					
Mortgage loans held for sale	\$65,745	\$67,899	Loans held for sale	\$469	Mortgage banking income
December 31, 2011:					
Mortgage loans held for sale	45,324	47,009	Loans held for sale	2,349	Mortgage banking income

(1) Cost basis of mortgage loans held for sale represents the unpaid principal balance.

NOTE K – REGULATORY MATTERS

Regulatory Capital Requirements

The Corporation's subsidiary banks are subject to various regulatory capital requirements administered by banking regulators. Failure to meet minimum capital requirements can initiate certain mandatory – and possibly additional discretionary – actions by regulators that, if undertaken, could have a direct material effect on the Corporation's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the subsidiary banks must meet specific capital guidelines that involve quantitative measures of the subsidiary banks' assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The subsidiary banks' capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the subsidiary banks to maintain minimum amounts and ratios of total and Tier I capital to risk-weighted assets, and of Tier I capital to average assets (as defined in the regulations). Management believes, as of December 31, 2012, that all of its bank subsidiaries meet the capital adequacy requirements to which they were subject.

As of December 31, 2012 and 2011, the Corporation's four significant subsidiaries, Fulton Bank, N.A., Fulton Bank of New Jersey, The Columbia Bank and Lafayette Ambassador Bank, were well capitalized under the regulatory framework for prompt corrective action based on their capital ratio calculations. To be categorized as well capitalized, these banks must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the following table. There are no conditions or events since December 31, 2012 that management believes have changed the institutions' categories.

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

The following tables present the total risk-based, Tier I risk-based and Tier I leverage requirements for the Corporation and its significant subsidiaries with total assets in excess of \$1 billion.

	2012							
	Actual		For Capital		Well Capitalized			
	Amount	Ratio	Amount	Ratio	Amount	Ratio		
	(dollars in thousands)

N/A – Not applicable as "well capitalized" applies to banks only.						

95

Dividend and Loan Limitations

The dividends that may be paid by subsidiary banks to the Parent Company are subject to certain legal and regulatory limitations. Dividend limitations vary, depending on the subsidiary bank's charter and whether or not it is a member of the Federal Reserve System. Generally, subsidiaries are prohibited from paying dividends when doing so would cause them to fall below the regulatory minimum capital levels. Additionally, limits exist on paying dividends in excess of net income for specified periods. The total amount available for payment of dividends by subsidiary banks was approximately \$329 million as of December 31, 2012, based on the subsidiary banks maintaining enough capital to be considered well capitalized, as defined above.

Under current Federal Reserve regulations, the subsidiary banks are limited in the amount they may loan to their affiliates, including the Parent Company. Loans to a single affiliate may not exceed 10%, and the aggregate of loans to all affiliates may not exceed 20% of each bank subsidiary's regulatory capital.

NOTE L – INCOME TAXES

The components of the provision for income taxes are as follows:

	2012	2011	2010
	(in thousands)		
Current tax expense (benefit):			
Federal	\$41,151	\$40,141	\$38,333
State	(557) 6,319	532
	40,594	46,460	38,865
Deferred tax expense (benefit):			
Federal	17,007	8,662	5,544
State	—	(4,284) —
	17,007	4,378	5,544
Income tax expense	\$57,601	\$50,838	\$44,409

The differences between the effective income tax rate and the federal statutory income tax rate are as follows:

	2012		2011		2010	
Statutory tax rate	35.0	%	35.0	%	35.0	%
Tax-exempt income	(5.0)	(5.3)	(5.8)
Low income housing investments	(4.4)	(4.3)	(3.3)
Non-deductible goodwill	0.9		—		—	
Bank owned life insurance	(0.8)	(0.6)	(0.6)
Valuation allowance	(0.6)	4.6		0.2	
Executive compensation	0.5		0.1		0.1	
State income taxes, net of Federal benefit	0.6		(4.0)	—	
Other, net	0.3		0.4		0.1	
Effective income tax rate	26.5	%	25.9	%	25.7	%

The net deferred tax asset recorded by the Corporation is included in other assets and consists of the following tax effects of temporary differences as of December 31:

	2012	2011
	(in thousands)	
Deferred tax assets:		
Allowance for credit losses	\$83,657	\$95,788
Postretirement and defined benefit plans	14,034	11,527
Other-than-temporary impairment of investments	13,951	15,490
State loss carryforwards	13,811	12,405
Deferred compensation	11,546	9,568
Other accrued expenses	9,542	10,415
Other	13,477	16,262
Total gross deferred tax assets	160,018	171,455
Deferred tax liabilities:		
Unrealized holding gains on securities available for sale	14,527	14,025
Mortgage servicing rights	12,856	11,776
Premises and equipment	9,893	6,919
Acquisition premiums/discounts	6,802	6,174
Direct leasing	5,958	7,561
Other	7,218	5,885
Total gross deferred tax liabilities	57,254	52,340
Net deferred tax asset, before valuation allowance	102,764	119,115
Valuation allowance	(16,107)	(17,321)
Net deferred tax asset	\$86,657	\$101,794

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income and/or capital gain income during periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies, such as those that may be implemented to generate capital gains, in making this assessment.

The valuation allowance relates to state deferred tax assets and net operating loss carryforwards for which realizability is uncertain. As of December 31, 2012 and 2011, the Corporation had state net operating loss carryforwards of approximately \$453 million and \$441 million, respectively, which are available to offset future state taxable income, and expire at various dates through 2032.

The Corporation has \$13.4 million of deferred tax assets resulting from other-than-temporary impairment losses on investment securities, which would be characterized as capital losses for tax purposes. If realized, the income tax benefits of these potential capital losses can only be recognized for tax purposes to the extent of capital gains generated during carryback and carryforward periods. The Corporation has the ability to generate sufficient offsetting capital gains in future periods through the execution of certain tax planning strategies, which may include the sale and leaseback of some or all of its branch and office properties.

Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that the Corporation will realize the benefits of its deferred tax assets, net of the valuation allowance, as of December 31, 2012. As of December 31, 2012, the Corporation has capital loss carry forwards of approximately \$1.3 million, which are only available to offset future net capital gains, and expire in 2016 if utilized.

Uncertain Tax Positions

The following summarizes the changes in unrecognized tax benefits for the years ended December 31:

	2012	2011	2010
	(in thousands)		
Balance at beginning of year	\$9,438	\$4,083	\$4,481
Prior period tax positions	(378)) 4,492	—
Current period tax positions	203	1,958	582
Settlement with taxing authority	(7,171)) —	—
Lapse of statute of limitations	(639)) (1,095)) (980)
Balance at end of year	\$1,453	\$9,438	\$4,083

Virtually all of the Corporation's unrecognized tax benefits are for positions that are taken on an annual basis on state tax returns. Increases to unrecognized tax benefits will occur as a result of accruing for the nonrecognition of the position for the current year. Decreases generally occur as a result of the lapsing of the statute of limitations for the oldest outstanding year which includes the position. These offsetting increases and decreases are likely to continue in the future, including over the next twelve months. While the net effect on total unrecognized tax benefits during this period cannot be reasonably estimated, approximately \$120,000 is expected to reverse in 2013 due to lapsing of the statute of limitations. Decreases can also occur through the settlement of a position with the taxing authority.

The \$378,000 decrease for prior period tax positions in 2012 resulted from changes in state tax regulations, which impacted the amount of positions taken in prior years that will ultimately be recognized. The Corporation settled a portion of its uncertain tax positions with the applicable state taxing authority in 2012 for approximately \$7.2 million (\$5.2 million including interest and penalties, and net of federal tax benefit).

Recognition and measurement of tax positions is based on management's evaluations of relevant tax code and appropriate industry information about audit proceedings for comparable positions at other organizations.

As of December 31, 2012, if recognized, all of the Corporation's unrecognized tax benefits would impact the effective tax rate. Not included in the table above is \$442,000 of federal tax expense on unrecognized state tax benefits which, if recognized, would also impact the effective tax rate. Interest accrued related to unrecognized tax benefits is recorded as a component of income tax expense. Penalties, if incurred, would also be recognized in income tax expense. The Corporation recognized as a benefit approximately \$84,000 and \$25,000 for interest and penalties in income tax expense related to unrecognized tax positions in 2012 and 2010, respectively, as a result of reversals exceeding current period expenses. The Corporation recognized approximately \$563,000 of interest and penalty expense, net of reversals, in income tax expense related to unrecognized tax positions in 2011. As of December 31, 2012 and 2011, total accrued interest and penalties related to unrecognized tax positions were approximately \$442,000 and \$1.4 million, respectively.

The Corporation and its subsidiaries file income tax returns in the federal jurisdiction and various states. In most cases, unrecognized tax benefits are related to tax years that remain subject to examination by the relevant taxable authorities. With few exceptions, the Corporation is no longer subject to federal, state and local examinations by tax authorities for years before 2009.

NOTE M – EMPLOYEE BENEFIT PLANS

The following summarizes the Corporation's expense under its retirement plans for the years ended December 31:

	2012	2011	2010
	(in thousands)		
Fulton Financial Corporation 401(k) Retirement Plan	\$11,983	\$11,271	\$11,378
Pension Plan	1,834	413	742
	\$13,817	\$11,684	\$12,120

Fulton Financial Corporation 401(k) Retirement Plan – A defined contribution plan that includes two contribution features:

-

Employer Profit Sharing – elective contributions based on a formula providing for an amount not to exceed 5% of each eligible employee’s covered compensation. During an eligible employee’s first five years of employment, employer

contributions vest over a five-year graded vesting schedule. Employees hired after July 1, 2007 are not eligible for this contribution.

401(k) Contributions – eligible employees may defer a portion of their pre-tax covered compensation on an annual basis, with employer matches of up to 5% of employee contributions. Employee and employer contributions under these features are 100% vested.

Defined Benefit Pension Plan – Contributions to the Corporation’s defined benefit pension plan (Pension Plan) are actuarially determined and funded annually, if necessary. Effective January 1, 2008, the Pension Plan was curtailed. The Corporation recognizes the funded status of its Pension Plan and postretirement benefits plan on the consolidated balance sheets and recognizes the changes in that funded status through other comprehensive income. See the heading “Postretirement Benefits” below for a description of the Corporation’s postretirement benefits plan.

Pension Plan

The net periodic pension cost for the Pension Plan, as determined by consulting actuaries, consisted of the following components for the years ended December 31:

	2012	2011	2010
	(in thousands)		
Service cost (1)	\$157	\$60	\$104
Interest cost	3,223	3,412	3,367
Expected return on assets	(3,230) (3,348) (3,206
Net amortization and deferral	1,684	289	477
Net periodic pension cost	\$1,834	\$413	\$742

(1) Pension plan service cost for all years presented was related to administrative costs associated with the plan and not due to the accrual of additional participant benefits.

The following table summarizes the changes in the projected benefit obligation and fair value of plan assets for the plan years ended December 31:

	2012	2011
	(in thousands)	
Projected benefit obligation, December 31, 2011	\$77,055	\$63,460
Service cost	157	60
Interest cost	3,223	3,412
Benefit payments	(2,522) (2,309
Change due to change in assumptions	6,070	12,652
Experience (gain) loss	49	(220
Projected benefit obligation, December 31, 2012	\$84,032	\$77,055
Fair value of plan assets, December 31, 2011	\$55,102	\$57,011
Actual return on assets	2,192	400
Benefit payments	(2,522) (2,309
Fair value of plan assets, December 31, 2012	\$54,772	\$55,102

The following table presents the funded status of the Pension Plan, included in other liabilities on the consolidated balance sheets, as of December 31:

	2012	2011
	(in thousands)	
Projected benefit obligation	\$(84,032) \$(77,055
Fair value of plan assets	54,772	55,102
Funded status	\$(29,260) \$(21,953

The following table summarizes the changes in the unrecognized net loss included as a component of accumulated other comprehensive loss:

	Unrecognized Net Loss	
	Gross of tax	Net of tax
	(in thousands)	
Balance as of December 31, 2010	\$9,425	\$6,126
Recognized as a component of 2011 periodic pension cost	(289) (188
Unrecognized losses arising in 2011	15,377	9,995
Balance as of December 31, 2011	24,513	15,933
Recognized as a component of 2012 periodic pension cost	(1,684) (1,095
Unrecognized losses arising in 2012	7,155	4,652
Balance as of December 31, 2012	\$29,984	\$19,490

The total amount of unrecognized net loss that will be amortized as a component of net periodic pension cost in 2013 is expected to be \$2.2 million.

The following rates were used to calculate net periodic pension cost and the present value of benefit obligations as of December 31:

	2012	2011	2010	
Discount rate-projected benefit obligation	3.75	% 4.25	% 5.50	%
Expected long-term rate of return on plan assets	6.00	% 6.00	% 6.00	%

As of December 31, 2012, 2011 and 2010, the discount rate used to calculate the present value of benefit obligations was determined using the Citigroup Average Life discount rate table, as adjusted based on the Pension Plan's expected benefit payments and rounded to the nearest 0.25%.

The 6.00% long-term rate of return on plan assets used to calculate the net periodic pension cost was based on historical returns, adjusted for expectations of long-term asset returns based on the December 31, 2012 weighted average asset allocations. The expected long-term return is considered to be appropriate based on the asset mix and the historical returns realized.

The following table presents a summary of the fair values of the Pension Plan's assets as of December 31:

	2012		2011		
	Estimated Fair Value	% of Total Assets	Estimated Fair Value	% of Total Assets	
	(dollars in thousands)				
Equity mutual funds	\$7,318		\$9,706		
Equity common trust funds	4,750		6,002		
Equity securities	12,068	22.0	% 15,708	28.5	%
Cash and money market funds	9,422		8,115		
Fixed income mutual funds	9,599		7,983		
Corporate debt securities	7,345		6,813		
U.S. Government agency securities	5,474		5,716		
Fixed income securities and cash	31,840	58.2	% 28,627	52.0	%
Other alternative investment funds	10,864	19.8	% 10,767	19.5	%
	\$54,772	100.0	% \$55,102	100.0	%

Investment allocation decisions are made by a retirement plan committee, which meets periodically. The goal of the investment allocation strategy is to match certain benefit obligations with maturities of fixed income securities. Pension Plan assets are invested with a conservative growth objective, with target asset allocations of approximately 25% in equities, 55% in fixed income securities and cash and 20% in alternative investments. Alternative investments may include managed futures, commodities, real estate investment trusts, master limited partnerships, long-short

strategies with traditional stocks and bonds. All alternative investments are in the form of mutual funds, not individual contracts, to enable daily liquidity.

The fair values for all assets held by the Pension Plan, excluding equity common trust funds, are based on quoted prices for identical instruments and would be categorized as Level 1 assets under FASB ASC Topic 810. Equity common trust funds would be categorized as Level 2 assets under FASB ASC Topic 810.

Estimated future benefit payments are as follows (in thousands):

Year	
2013	\$2,489
2014	2,584
2015	2,830
2016	3,078
2017	3,408
2018 – 2022	20,944
	\$35,333

Postretirement Benefits

The Corporation currently provides medical benefits and life insurance benefits under a postretirement benefits plan (Postretirement Plan) to certain retired full-time employees who were employees of the Corporation prior to January 1, 1998. Certain full-time employees may become eligible for these discretionary benefits if they reach retirement age while working for the Corporation. Early retirees receive no benefits for the time between their retirement date to the date they attain age 65. Benefits are based on a graduated scale for years of service after attaining the age of 40.

The components of the expense for postretirement benefits other than pensions are as follows:

	2012	2011	2010
	(in thousands)		
Service cost	\$211	\$201	\$190
Interest cost	346	428	441
Expected return on plan assets	(2) (3) (3
Net amortization and deferral	(363) (363) (363
Net postretirement benefit cost	\$192	\$263	\$265

The following table summarizes the changes in the accumulated postretirement benefit obligation and fair value of plan assets for the years ended December 31:

	2012	2011
	(in thousands)	
Accumulated postretirement benefit obligation, December 31, 2011	\$9,651	\$8,345
Service cost	211	201
Interest cost	346	428
Benefit payments	(249) (363
Experience loss	—	(305
Change due to change in assumptions	(687) 1,345
Accumulated postretirement benefit obligation, December 31, 2012	\$9,272	\$9,651
Fair value of plan assets, December 31, 2011	\$75	\$105
Employer contributions	219	333
Benefit payments	(249) (363
Fair value of plan assets, December 31, 2012	\$45	\$75

The funded status of the Postretirement Plan, included in other liabilities on the consolidated balance sheets as of December 31, 2012 and 2011 was as follows:

	2012	2011
	(in thousands)	
Accumulated postretirement benefit obligation	\$(9,272)	\$(9,651)
Fair value of plan assets	45	75
Funded status	\$(9,227)	\$(9,576)

The following table summarizes the changes in items recognized as a component of accumulated other comprehensive loss:

	Gross of tax Unrecognized Prior Service Cost (in thousands)	Unrecognized Net Loss (Gain)	Total	Net of tax
Balance as of December 31, 2010	\$(2,573)	\$(60)	\$(2,633)	\$(1,712)
Recognized as a component of 2011 postretirement benefit cost	363	—	363	236
Unrecognized losses arising in 2011	—	1,042	1,042	677
Balance as of December 31, 2011	\$(2,210)	\$982	\$(1,228)	\$(799)
Recognized as a component of 2012 postretirement benefit cost	363	—	363	236
Unrecognized gains arising in 2012	—	(685)	(685)	(445)
Balance as of December 31, 2012	\$(1,847)	\$297	\$(1,550)	\$(1,008)

The total amount of unrecognized prior service cost that will be recognized as a reduction to net periodic postretirement cost in 2013 is expected to be \$363,000.

For measuring the postretirement benefit obligation, the annual increase in the per capita cost of health care benefits was assumed to be 7.5% in year one, declining to an ultimate rate of 5.5% by year four. This health care cost trend rate has a significant impact on the amounts reported. Assuming a 1.0% increase in the health care cost trend rate above the assumed annual increase, the accumulated postretirement benefit obligation would increase by approximately \$1.2 million and the current period expense would increase by approximately \$89,000. Conversely, a 1.0% decrease in the health care cost trend rate would decrease the accumulated postretirement benefit obligation by approximately \$953,000 and the current period expense by approximately \$71,000.

The following rates were used to calculate net periodic postretirement benefit cost and the present value of benefit obligations as of December 31:

	2012	2011	2010	
Discount rate-projected benefit obligation	3.75	% 4.25	% 5.50	%
Expected long-term rate of return on plan assets	3.00	% 3.00	% 3.00	%

As of December 31, 2012 and 2011, the discount rate used to calculate the accumulated postretirement benefit obligation was determined using the Citigroup Average Life discount rate table, as adjusted based on the Postretirement Plan's expected benefit payments and rounded to the nearest 0.25%.

Estimated future benefit payments are as follows (in thousands):

Year	
2013	\$446
2014	440
2015	457
2016	473
2017	478
2018 – 2022	2,539

NOTE N – SHAREHOLDERS' EQUITY

Effective March 31, 2012, the Corporation adopted ASC Update 2011-05, "Presentation of Other Comprehensive Income." As a result, the Corporation has presented a consolidated statement of comprehensive income and details related to the change in accumulated other comprehensive income, as shown in the tables below.

Accumulated Other Comprehensive Income

The following table presents changes in other comprehensive income for the years ended December 31:

	Before-Tax Amount (in thousands)	Tax Effect	Net of Tax Amount
2012:			
Unrealized gain (loss) on securities	\$2,414	\$(845)	\$1,569
Reclassification adjustment for securities (gains) losses included in net income	(3,026)	1,059	(1,967)
Non-credit related unrealized gain (loss) on other-than-temporarily impaired debt securities	2,046	(716)	1,330
Unrealized gain on derivative financial instruments	209	(73)	136
Unrecognized pension and postretirement (cost) income	(6,470)	2,263	(4,207)
Amortization (accretion) of net unrecognized pension and postretirement income (cost)	1,321	(462)	859
Total Other Comprehensive Income (Loss)	\$(3,506)	\$1,226	\$(2,280)
2011:			
Unrealized gain (loss) on securities	\$13,489	\$(4,721)	\$8,768
Reclassification adjustment for securities (gains) losses included in net income	(4,560)	1,596	(2,964)
Non-credit related unrealized gain (loss) on other-than-temporarily impaired debt securities	369	(129)	240
Unrealized gain on derivative financial instruments	209	(73)	136
Unrecognized pension and postretirement (cost) income	(16,418)	5,746	(10,672)
Amortization (accretion) of net unrecognized pension and postretirement income (cost)	(74)	26	(48)
Total Other Comprehensive Income (Loss)	\$(6,985)	\$2,445	\$(4,540)
2010:			
Unrealized gain (loss) on securities	\$6,145	\$(2,151)	\$3,994
Reclassification adjustment for securities (gains) losses included in net income	(700)	245	(455)
Non-credit related unrealized gain (loss) on other-than-temporarily impaired debt securities	(255)	89	(166)
Unrealized gain on derivative financial instruments	209	(73)	136
Unrecognized pension and postretirement (cost) income	2,237	(783)	1,454
Amortization (accretion) of net unrecognized pension and postretirement income (cost)	114	(40)	74
Total Other Comprehensive Income (Loss)	\$7,750	\$(2,713)	\$5,037

The following table presents changes in each component of accumulated other comprehensive income, net of tax, for the for the years ended December 31:

	Unrealized Gain (Losses) on Investment Securities Not Other-Than-Temporarily Impaired (in thousands)	Unrealized Non-Credit Gains (Losses) on Other-Than-Temporarily Impaired Debt Securities	Unrecognized Pension and Postretirement Plan Income (Cost)	Unrealized Effective Portions of Losses on Forward-Starting Interest Rate Swaps	Total
Balance at December 31, 2009	\$24,975	\$ (8,349)	\$ (5,942)	\$ (3,226)	\$7,458
Current-period other comprehensive income (loss)	(2,621)	5,994	1,528	136	5,037
Balance at December 31, 2010	\$22,354	\$ (2,355)	\$ (4,414)	\$ (3,090)	\$12,495
Current-period other comprehensive income (loss)	4,700	1,344	(10,720)	136	(4,540)
Balance at December 31, 2011	\$27,054	\$ (1,011)	\$ (15,134)	\$ (2,954)	\$7,955
Current-period other comprehensive income (loss)	(692)	1,624	(3,348)	136	(2,280)
Balance at December 31, 2012	\$26,362	\$ 613	\$ (18,482)	\$ (2,818)	\$5,675

Common Stock Repurchase Plans

In June 2012, the Corporation's board of directors approved a share repurchase program for the repurchase of up to five million shares of common stock. The program expired on December 31, 2012. Approximately 2.1 million shares were repurchased during the year ended December 31, 2012 under this program.

In January 2013, the Corporation's board of directors approved a share repurchase program for the repurchase of up to eight million shares, or approximately 4.0% of its outstanding common shares, through June 30, 2013. Repurchased shares will be added to treasury stock, at cost, and will be used for general corporate purposes. As permitted by securities laws and other legal requirements and subject to market conditions and other factors, purchases may be made from time to time in the open market at prevailing prices. The program may be discontinued at any time.

Series A Preferred Stock, Common Stock Warrant and Common Stock Issuance

In connection with the Emergency Economic Stabilization Act of 2008 (EESA), the U.S. Treasury Department (UST) initiated a Capital Purchase Program (CPP) which allowed for qualifying financial institutions to issue preferred stock to the UST, subject to certain limitations and terms. The CPP was developed to attract broad participation by strong financial institutions, to stabilize the financial system and to increase lending to benefit the national economy and citizens of the U.S.

On December 23, 2008, the Corporation entered into a Securities Purchase Agreement with the UST pursuant to which the Corporation sold to the UST, for an aggregate purchase price of \$376.5 million, 376,500 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series A (preferred stock), par value \$1,000 per share, and a warrant to purchase up to 5.5 million shares of common stock, par value \$2.50 per share. The preferred stock carried a dividend rate of 5.00%.

On May 5, 2010, the Corporation issued 21.8 million shares of its common stock, in an underwritten public offering, for net proceeds of \$226.3 million, net of underwriting discounts and commissions. On July 14, 2010 the Corporation redeemed all 376,500 outstanding shares of its preferred stock with a total payment to the UST of \$379.6 million, consisting of \$376.5 million of principal and \$3.1 million of dividends. The preferred stock had a carrying value of \$371.0 million on the redemption date. Upon redemption, the remaining \$5.5 million preferred stock discount was recorded as a reduction to net income available to common shareholders.

On September 8, 2010, the Corporation repurchased the outstanding common stock warrant for the purchase of 5.5 million shares of its common stock for \$10.8 million, completing the Corporation's participation in the UST's CPP. Upon repurchase, the common stock warrant had a carrying value of \$7.6 million. The repurchase price of \$10.8 million was recorded as a reduction to additional paid-in capital on the statement of shareholders' equity and comprehensive income.

NOTE O – STOCK-BASED COMPENSATION PLANS

Stock-based Compensation Plans

The following table presents compensation expense and related tax benefits for equity awards recognized in the consolidated statements of income:

	2012	2011	2010
	(in thousands)		
Compensation expense	\$4,834	\$4,249	\$1,996
Tax benefit	(1,253)	(1,192)	(456)
Stock-based compensation, net of tax	\$3,581	\$3,057	\$1,540

The tax benefit shown in the preceding table is less than the benefit that would be calculated using the Corporation's 35% statutory federal tax rate. Tax benefits are only recognized over the vesting period for awards that ordinarily will generate a tax deduction when exercised, in the case of non-qualified stock options, or upon vesting, in the case of restricted stock. The Corporation granted 15,000 and 1,000 non-qualified stock options in 2012 and 2011, respectively. The Corporation did not grant any non-qualified stock options in 2010.

The following table presents compensation expense and related tax benefits for restricted stock awards recognized in the consolidated statements of income, and included as a component of total stock-based compensation within the preceding table:

	2012	2011	2010
	(in thousands)		
Compensation expense	\$3,506	\$3,194	\$1,172
Tax benefit	(1,227)	(1,119)	(412)
Restricted stock compensation, net of tax	\$2,279	\$2,075	\$760

The following table provides information about stock option activity for the year ended December 31, 2012:

	Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in millions)
Outstanding as of December 31, 2011	6,382,158	\$13.27		
Granted	470,528	10.48		
Exercised	(141,305)	6.98		
Forfeited	(292,493)	13.16		
Expired	(342,767)	12.98		
Outstanding as of December 31, 2012	6,076,121	\$13.17	4.4 years	\$1.7
Exercisable as of December 31, 2012	5,051,953	\$13.72	3.6 years	\$1.7

The following table provides information about nonvested stock options and restricted stock granted under the Employee Option Plan and Directors' Plan for the year ended December 31, 2012:

	Nonvested Stock Options	Weighted Average Grant Date Fair Value	Restricted Stock Shares	Weighted Average Grant Date Fair Value
Nonvested as of December 31, 2011	1,088,116	\$1.86	809,887	\$8.90
Granted	470,528	2.22	402,114	10.40
Vested	(497,467)	1.77	(231,789)	6.08
Forfeited	(37,009)	1.81	(8,759)	9.20
Nonvested as of December 31, 2012	1,024,168	\$2.07	971,453	\$10.20

As of December 31, 2012, there was \$3.9 million of total unrecognized compensation cost related to nonvested stock options and restricted stock that will be recognized as compensation expense over a weighted average period of two years. As of December 31, 2012, the Employee Option Plan had 11.8 million shares reserved for future grants through 2013 and the Directors' Plan had 469,000 shares reserved for future grants through 2021.

The following table presents information about options exercised:

	2012	2011	2010
	(dollars in thousands)		
Number of options exercised	141,305	261,272	162,151
Total intrinsic value of options exercised	\$402	\$763	\$600
Cash received from options exercised	\$987	\$1,855	\$962
Tax deduction realized from options exercised	\$322	\$652	\$466

Upon exercise, the Corporation issues shares from its authorized, but unissued, common stock to satisfy the options. The fair value of option awards under the Employee Option Plan was estimated on the date of grant using the Black-Scholes valuation methodology, which is dependent upon certain assumptions, as summarized in the following table:

	2012	2011	2010	
Risk-free interest rate	1.68	% 2.35	% 2.23	%
Volatility of Corporation's stock	26.60	% 22.80	% 20.40	%
Expected dividend yield	2.54	% 2.41	% 2.49	%
Expected life of options	7 Years	6 Years	6 Years	

The expected life of the options was estimated based on historical employee behavior and represents the period of time that options granted are expected to be outstanding. Volatility of the Corporation's stock was based on historical volatility for the period commensurate with the expected life of the options. The risk-free interest rate is the zero-coupon U.S. Treasury rate commensurate with the expected life of the options on the date of the grant. Based on the assumptions above, the Corporation calculated an estimated fair value per option of \$2.22, \$2.10 and \$1.57 for options granted in 2012, 2011 and 2010, respectively. The Corporation granted 470,528 options in 2012, 616,686 options in 2011 and 577,992 options in 2010.

Under the ESPP, eligible employees can purchase stock of the Corporation at 85% of the fair market value of the stock on the date of purchase. The ESPP is considered to be a compensatory plan and, as such, compensation expense is recognized for the 15% discount on shares purchased.

The following table summarizes activity under the ESPP:

	2012	2011	2010
ESPP shares purchased	165,456	164,610	184,092
Average purchase price per share (85% of market value)	\$8.35	\$8.39	\$7.93
Compensation expense recognized (in thousands)	\$244	\$244	\$258

NOTE P – LEASES

Certain branch offices and equipment are leased under agreements that expire at varying dates through 2035. Most leases contain renewal provisions at the Corporation's option. Total rental expense was approximately \$19.4 million in 2012, \$18.6 million in 2011 and \$18.2 million in 2010.

Future minimum payments as of December 31, 2012 under non-cancelable operating leases with initial terms exceeding one year are as follows (in thousands):

Year	
2013	\$ 15,727
2014	13,980
2015	13,061
2016	11,694
2017	10,478
Thereafter	61,104
	\$ 126,044

NOTE Q – COMMITMENTS AND CONTINGENCIES

Commitments

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since a portion of the commitments is expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Corporation evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment and income producing commercial properties. The Corporation records a reserve for unfunded commitments, included in other liabilities on the consolidated balance sheets, which represents management's estimate of losses inherent in these commitments. See Note D, "Loans and Allowance for Credit Losses," for additional information.

Standby letters of credit are conditional commitments issued to guarantee the financial or performance obligation of a customer to a third-party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Corporation underwrites these obligations using the same criteria as its commercial lending underwriting. The Corporation's maximum exposure to loss for standby letters of credit is equal to the contractual (or notional) amount of the instruments.

The following table presents the Corporation's commitments to extend credit and letters of credit:

	2012	2011
	(in thousands)	
Commercial mortgage and construction	\$ 335,830	\$ 275,308
Home equity	964,145	1,019,470
Commercial and other	2,711,766	2,508,754
Total commitments to extend credit	\$ 4,011,741	\$ 3,803,532
Standby letters of credit	\$ 425,095	\$ 444,019
Commercial letters of credit	26,191	31,557
Total letters of credit	\$ 451,286	\$ 475,576

Residential Lending

Residential mortgages are originated and sold by the Corporation through Fulton Mortgage Company, which operates as a division of each of the Corporation's subsidiary banks. Residential mortgage loans sold are primarily conforming, prime loans sold to government sponsored agencies such as the Federal National Mortgage Association (Fannie Mae). The Corporation provides customary representations and warranties to investors that specify, among other things, that the loans have been underwritten to the standards established by the investor. The Corporation may be required to repurchase a loan or reimburse the investor for a credit loss incurred on a loan if it is determined that the representations and warranties have not been met. This generally results from an underwriting or documentation

deficiency. As of December 31, 2012 and 2011, total outstanding repurchase requests totaled approximately \$4.5 million and \$2.7 million, respectively.

From 2000 to 2011, the Corporation sold loans to the FHLB under its Mortgage Partnership Finance Program (MPF Program). No loans were sold under this program in 2012. The Corporation provided a "credit enhancement" for residential mortgage loans sold under the MPF Program whereby it would assume credit losses in excess of a defined "First Loss Account" (FLA) balance, up to specified amounts. The FLA is funded by the FHLB based on a percentage of the outstanding principal balance of loans sold. As of December 31, 2012, the unpaid principal balance of loans sold under the MPF Program was approximately \$229 million. During 2012, credit losses under the MPF Program were projected to exceed the FLA and, as a result, the Corporation recorded \$3.0 million in reserves for expected credit losses related to loans sold under the MPF Program. Reserves are calculated based on delinquency status and estimated loss rates established through the Corporation's existing allowance for loan loss methodology.

As of December 31, 2012 and 2011, the reserve for losses on residential mortgage loans sold was \$6.0 million and \$1.6 million, respectively, including both reserves for credit losses under the MPF Program and reserves for representation and warranty exposures. Total charges associated with previously sold loans, included within operating risk loss on the consolidated statements of income, were \$4.9 million in 2012, compared to credits of \$1.1 million in 2011. Management believes that the reserves recorded as of December 31, 2012 are adequate. However, declines in collateral values, the identification of additional loans to be repurchased, or a deterioration in the credit quality of loans sold under the MPF Program could necessitate additional reserves in the future.

Other Contingencies

The Corporation and its subsidiaries are involved in various legal proceedings in the ordinary course of business. The Corporation periodically evaluates the possible impact of pending litigation based on, among other factors, the advice of counsel, available insurance coverage and recorded liabilities and reserves for probable legal liabilities and costs.

As of the date of this report, the Corporation believes that any liabilities, individually or in the aggregate, which may result from the final outcomes of pending proceedings are not expected to have a material adverse effect on the financial position, the operating results and/or the liquidity of the Corporation. However, litigation is often unpredictable, and the actual results of litigation cannot be determined with certainty.

NOTE R – FAIR VALUE MEASUREMENTS

As required by FASB ASC Topic 820, all assets and liabilities required to be measured at fair value both on a recurring and non-recurring basis have been categorized based on the method of their fair value determination. Following is a summary of the Corporation's assets and liabilities measured at fair value on a recurring basis and reported on the consolidated balance sheets at December 31:

	2012			
	Level 1 (in thousands)	Level 2	Level 3	Total
Mortgage loans held for sale	\$—	\$67,899	\$—	\$67,899
Available for sale investment securities:				
Equity securities	50,873	—	—	50,873
U.S. Government securities	—	325	—	325
U.S. Government sponsored agency securities	—	2,397	—	2,397
State and municipal securities	—	315,519	—	315,519
Corporate debt securities	—	102,555	10,287	112,842
Collateralized mortgage obligations	—	1,211,119	—	1,211,119
Mortgage-backed securities	—	879,621	—	879,621
Auction rate securities	—	—	149,339	149,339
Total available for sale investment securities	50,873	2,511,536	159,626	2,722,035
Other assets	15,259	14,710	—	29,969
Total assets	\$66,132	\$2,594,145	\$159,626	\$2,819,903
Other liabilities	\$15,524	\$8,161	\$—	\$23,685
	2011			
	Level 1 (in thousands)	Level 2	Level 3	Total
Mortgage loans held for sale	\$—	\$47,009	\$—	\$47,009
Available for sale investment securities:				
Equity securities	34,586	—	—	34,586
U.S. Government securities	—	334	—	334
U.S. Government sponsored agency securities	—	4,073	—	4,073
State and municipal securities	—	322,018	—	322,018
Corporate debt securities	—	114,017	9,289	123,306
Collateralized mortgage obligations	—	1,001,209	—	1,001,209
Mortgage-backed securities	—	880,097	—	880,097
Auction rate securities	—	—	225,211	225,211
Total available for sale investment securities	34,586	2,321,748	234,500	2,590,834
Other assets	13,130	3,901	—	17,031
Total assets	\$47,716	\$2,372,658	\$234,500	\$2,654,874
Other liabilities	\$13,130	\$2,734	\$—	\$15,864

The valuation techniques used to measure fair value for the items in the table above are as follows:

Mortgage loans held for sale – This category consists of mortgage loans held for sale that the Corporation has elected to measure at fair value. Fair values as of December 31, 2012 and December 31, 2011 were measured as the price that secondary market investors were offering for loans with similar characteristics. See Note A, "Summary of Significant Accounting Policies" for details related to the Corporation's election to measure assets and liabilities at fair value.

Available for sale investment securities – Included within this asset category are both equity and debt securities. Level 2 available for sale debt securities are valued by a third-party pricing service commonly used in the banking industry.

The pricing service uses evaluated pricing models that vary based on asset class and incorporate available market information including quoted prices of investments securities with similar characteristics. Because many fixed income securities do not trade on a daily basis, evaluated pricing models use available information, as applicable, through processes such as benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing. Standard market inputs include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research publications. For certain security types, additional inputs may be used, or some of the standard market inputs may not be applicable.

Management tests the values provided by the pricing service by obtaining securities prices from an alternative third party source and comparing the results. This test is done for approximately 80% of the securities valued by the pricing service. Generally, differences by security in excess of 5% are researched to reconcile the difference.

Equity securities – Equity securities consist of stocks of financial institutions (\$44.2 million at December 31, 2012 and \$27.9 million at December 31, 2011) and other equity investments (\$6.7 million at December 31, 2012 and 2011).

These Level 1 investments are measured at fair value based on quoted prices for identical securities in active markets. Restricted equity securities issued by the FHLB and Federal Reserve Bank (\$71.7 million at December 31, 2012 and \$82.5 million at December 31, 2011) have been excluded from the preceding tables.

U.S. Government securities/U.S. Government sponsored agency securities/State and municipal securities/Collateralized mortgage obligations/Mortgage-backed securities – These debt securities are classified as Level 2 investments. Fair values are determined by a third-party pricing service, as detailed above.

Corporate debt securities – This category consists of subordinated debt issued by financial institutions (\$51.7 million at December 31, 2012 and \$41.3 million at December 31, 2011), single-issuer trust preferred securities issued by financial institutions (\$51.7 million at December 31, 2012 and \$74.4 million at December 31, 2011), pooled trust preferred securities issued by financial institutions (\$6.9 million at December 31, 2012 and \$5.1 million at December 31, 2011) and other corporate debt issued by non-financial institutions (\$2.5 million at December 31, 2012 and 2011).

Classified as Level 2 investments are the subordinated debt, other corporate debt issued by non-financial institutions and \$48.3 million and \$70.2 million of single-issuer trust preferred securities held at December 31, 2012 and December 31, 2011, respectively. These corporate debt securities are measured at fair value by a third-party pricing service, as detailed above.

Classified as Level 3 investments are the Corporation's investments in pooled trust preferred securities and certain single-issuer trust preferred securities (\$3.4 million at December 31, 2012 and \$4.2 million at December 31, 2011). The fair values of these securities were determined based on quotes provided by third-party brokers who determined fair values based predominantly on internal valuation models which were not indicative prices or binding offers. The Corporation's third-party pricing service cannot derive fair values for these securities primarily due to inactive markets for similar investments. Level 3 values are tested by management primarily through trend analysis, by comparing current values to those reported at the end of the preceding calendar quarter, and determining if they are reasonable based on price and spread movements for this asset class.

Auction rate securities – Due to their illiquidity, ARCs are classified as Level 3 investments and are valued through the use of an expected cash flows model prepared by a third-party valuation expert. The assumptions used in preparing the expected cash flows model include estimates for coupon rates, time to maturity and market rates of return. The most significant unobservable input to the expected cash flows model is an assumed return to market liquidity sometime within the next five years. If the assumed return to market liquidity was lengthened beyond the next five years, this would result in a decrease in the fair value of these ARCs. Expected cash flows models performed prior to June 2012 assumed a return to market liquidity sometime within the next three years. Based on this historical experience, the Corporation elected to increase the expected term as of June 30, 2012. The three year expected term was based on the Corporation's assumption that market liquidity would resume, in some form, within a relatively short period of time. Although there has been a material reduction in the Corporation's outstanding ARCs, a more protracted period of sporadic trust refinancing and periodic tenders of bonds is expected. The Corporation believes that the trusts underlying the ARCs will self-liquidate as student loans are paid down.

Other assets – Included within this asset category are the following:

Level 1 assets, consisting of mutual funds that are held in trust for employee deferred compensation plans (\$14.1 million at December 31, 2012 and \$13.1 million at December 31, 2011) and the fair value of foreign currency exchange contracts (\$1.2 million at December 31, 2012 and \$2.2 million at December 31, 2011).

The mutual funds and foreign exchange prices used to measure these items at fair value are based on quoted prices for identical instruments in active markets.

Level 2 assets, representing the fair value of mortgage banking derivatives in the form of interest rate locks and forward commitments with secondary market investors (\$7.6 million at December 31, 2012 and \$3.9 million at December 31, 2011) and the fair value of interest rate swaps with customers (\$7.1 million at December 31, 2012 and \$2.7 million at December 31, 2011).

The fair values of the Corporation's interest rate locks, forward commitments and interest rate swaps represent the amounts that would be required to settle the derivative financial instruments at the balance sheet date.

See Note J, "Derivative Financial Instruments," for additional information.

Other liabilities – Included within this category are the following:

Level 1 employee deferred compensation liabilities which represent amounts due to employees under deferred compensation plans (\$14.1 million at December 31, 2012 and \$13.1 million at December 31, 2011) and the fair value of foreign currency exchange contracts (\$1.4 million at December 31, 2012 and \$2.6 million at December 31, 2011).

The fair values of these liabilities are based on the fair values of the related assets, which are described under the heading, "Other assets" above.

Level 2 liabilities, representing the fair value of mortgage banking derivatives in the form of interest rate locks and forward commitments with secondary market investors (\$1.1 million at December 31, 2012 and \$2.7 million at December 31, 2011) and the fair value of interest rate swaps with counterparties (\$7.1 million at December 31, 2012 and \$2.7 million at December 31, 2011). The fair values of these liabilities are based on the fair values of the related assets, which are described under the heading, "Other liabilities" above.

The following tables present the changes in the Corporation's available for sale investment securities measured at fair value on a recurring basis using unobservable inputs (Level 3) for the years ended December 31:

	2012		
	Pooled Trust Preferred Securities	Single-issuer Trust Preferred Securities	Auction Rate Securities (ARCs)
	(in thousands)		
Balance, December 31, 2011	\$5,109	\$4,180	\$225,211
Realized adjustments to fair value (1)	(19) 19	(434)
Unrealized adjustments to fair value (2)	2,466	359	(8,612)
Sales	—	(956) —
Settlements - calls	(673) (250) (69,068)
(Premium amortization) discount accretion (3)	44	8	2,242
Balance, December 31, 2012	\$6,927	\$3,360	\$149,339

	2011		
	Pooled Trust Preferred Securities	Single-issuer Trust Preferred Securities	Auction Rate Securities (ARCs)
	(in thousands)		
Balance, December 31, 2010	\$4,528	\$8,583	\$260,679
Transfer from Level 3 to Level 2 (4)	—	(800) —
Realized adjustments to fair value (1)	(1,406) —	(292
Unrealized adjustments to fair value (2)	2,465	28	(4,383
Sales (5)	—	—	—
Settlements - maturities	—	(1,650) —
Settlements - calls	(476) (1,980) (34,844
(Premium amortization) discount accretion (3)	(2) (1) 4,051
Balance, December 31, 2011	\$5,109	\$4,180	\$225,211

For pooled trust preferred securities and ARCs, realized adjustments to fair value represent credit related (1) other-than-temporary impairment charges that were recorded as a reduction to investment securities gains on the consolidated statements of income.

Pooled trust preferred securities, single-issuer trust preferred securities and ARCs are classified as available for sale investment securities; as such, the unrealized adjustment to fair value was recorded as an unrealized holding (2) gain (loss) and included as a component of available for sale investment securities on the consolidated balance sheet.

(3) Included as a component of net interest income on the consolidated statements of income.

During the year ended December 31, 2011, one single-issuer trust preferred security with a fair value of \$800,000 as of December 31, 2011 was reclassified as a Level 2 asset. As of December 31, 2011, the fair value of this security was measured by a third-party pricing service using both quoted prices for similar assets and model-based (4) valuation techniques that derived fair value based on market-corroborated data, such as instruments with similar prepayment speeds and default interest rates. As of December 31, 2010, the fair value of this security was determined based on quotes provided by third-party brokers who determined its fair value based predominantly on an internal valuation model.

During the year ended December 31, 2011, the Corporation sold one pooled trust preferred security with a par (5) value of \$6.4 million and a book value of zero for no gain or loss. This security had a book value of zero as a result of prior year other-than-temporary impairment charges.

Certain financial assets are not measured at fair value on an ongoing basis but are subject to fair value measurement in certain circumstances, such as upon their acquisition or when there is evidence of impairment. The following tables present the Corporation's financial assets measured at fair value on a nonrecurring basis and reported on the Corporation's consolidated balance sheets at December 31:

	2012			
	Level 1	Level 2	Level 3	Total
	(in thousands)			
Net loans	\$—	\$—	\$191,165	\$191,165
Other financial assets	—	—	62,203	62,203
Total assets	\$—	\$—	\$253,368	\$253,368

	2011			
	Level 1	Level 2	Level 3	Total
	(in thousands)			

Edgar Filing: FULTON FINANCIAL CORP - Form 10-K

Net loans	—	—	216,812	216,812
Other financial assets	—	—	63,919	63,919
Total assets	\$—	\$—	\$280,731	\$280,731

The valuation techniques used to measure fair value for the items in the table above are as follows:

Net loans – This category consists of loans that were evaluated for impairment under FASB ASC Section 310-10-35 and have been classified as Level 3 assets. The amount shown is the balance of impaired loans, net of the related allowance for loan losses. See Note D, "Loans and Allowance for Credit Losses," for additional details.

Other assets – This category includes OREO (\$26.1 million at December 31, 2012 and \$30.8 million at December 31, 2011) and MSRs net of the MSR valuation allowance (\$36.1 million at December 31, 2012 and \$33.1 million at December 31, 2011), both classified as Level 3 assets.

Fair values for OREO were based on estimated selling prices less estimated selling costs for similar assets in active markets.

MSRs are initially recorded at fair value upon the sale of residential mortgage loans to secondary market investors. MSRs are amortized as a reduction to servicing income over the estimated lives of the underlying loans. MSRs are stratified and evaluated for impairment by comparing each stratum's carrying amount to its estimated fair value. Fair values are determined at the end of each quarter through a discounted cash flows valuation. Significant inputs to the valuations include expected net servicing income, the discount rate and the expected life of the underlying loans. Expected life is based on the contractual terms of the loans, as adjusted for prepayment projections for mortgage-backed securities with rates and terms comparable to the loans underlying the MSRs. The annual constant prepayment rates used in the December 31, 2012 discounted cash flows valuation ranged from 10.7% to 16.6%, and were based on the weighted average remaining term of the loans in each stratum.

As required by FASB ASC Section 825-10-50, the following table details the book values and the estimated fair values of the Corporation's financial instruments as of December 31, 2012 and 2011. In addition, a general description of the methods and assumptions used to estimate such fair values is also provided.

Fair values of financial instruments are significantly affected by assumptions used, principally the timing of future cash flows and discount rates. Because assumptions are inherently subjective in nature, the estimated fair values cannot be substantiated by comparison to independent market quotes and, in many cases, the estimated fair values could not necessarily be realized in an immediate sale or settlement of the instrument. The aggregate fair value amounts presented do not necessarily represent management's estimate of the underlying value of the Corporation.

	2012		2011	
	Book Value	Estimated Fair Value	Book Value	Estimated Fair Value
(in thousands)				
FINANCIAL ASSETS				
Cash and due from banks	\$256,300	\$256,300	\$292,598	\$292,598
Interest-bearing deposits with other banks	173,257	173,257	175,336	175,336

Loans, net of unearned income (1)	12,144,604	12,127,309	11,968,970	11,992,586
Accrued interest receivable	45,786	45,786	51,098	51,098
Other financial assets (1)	198,504	198,504	315,952	315,952
FINANCIAL LIABILITIES				
Demand and savings deposits	\$9,089,753	\$9,089,753	\$8,511,789	\$8,511,789
Time deposits	3,383,338	3,413,060	4,013,950	4,056,247
Short-term borrowings	868,399	868,399	597,033	597,033
Accrued interest payable	19,330	19,330	25,686	25,686
Other financial liabilities (1)	65,024	65,024	69,816	69,816
FHLB advances and long-term debt	894,253	853,547	1,040,149	982,010

(1) Description of fair value determinations for these financial instruments, or certain financial instruments within these categories, measured at fair value on the Corporation's consolidated balance sheets, are disclosed above. For short-term financial instruments defined as those with remaining maturities of 90 days or less, excluding those recorded at fair value on the Corporation's consolidated balance sheets, the book value was considered to be a reasonable estimate of fair value.

The following instruments are predominantly short-term:

Assets	Liabilities
Cash and due from banks	Demand and savings deposits
Interest bearing deposits	Short-term borrowings
Accrued interest receivable	Accrued interest payable

The estimated fair values of securities held to maturity as of December 31, 2012 and December 31, 2011 were generally based on valuations performed by a third-party pricing service commonly used in the banking industry. Management tests the values provided by the pricing service by obtaining securities prices from an alternative third party source and comparing the results. The estimated fair value of these securities would be categorized as Level 2 assets under FASB Topic 820.

Estimated fair values for loans and time deposits were estimated by discounting future cash flows using the current rates at which similar loans would be made to borrowers for the same remaining maturities. Fair values estimated in this manner do not fully incorporate an exit price approach to fair value, as defined in FASB ASC Topic 820.

The fair value of FHLB advances and long-term debt was estimated by discounting the remaining contractual cash flows using a rate at which the Corporation could issue debt with a similar remaining maturity as of the balance sheet date. The fair values of these borrowings would be categorized as Level 2 assets under FASB Topic 820.

The fair value of commitments to extend credit and standby letters of credit are estimated to equal their carrying values.

Management Report on Internal Control Over Financial Reporting

The management of Fulton Financial Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. Fulton Financial Corporation's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012, using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control – Integrated Framework. Based on this assessment, management concluded that, as of December 31, 2012, the company's internal control over financial reporting is effective based on those criteria.

Chief Financial Officer

Report of Independent Registered Public Accounting Firm
The Board of Directors and Stockholders
Fulton Financial Corporation:

We have audited the accompanying consolidated balance sheets of Fulton Financial Corporation and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2012. We also have audited Fulton Financial Corporation's internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Fulton Financial Corporation's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report On Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Fulton Financial Corporation and subsidiaries as of December 31, 2012 and 2011, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Fulton Financial Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure
Not applicable.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

The Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2012, the Corporation's disclosure controls and procedures are effective. Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

The "Management Report on Internal Control over Financial Reporting" and the "Report of Independent Registered Public Accounting Firm" may be found in Item 8, "Financial Statements and Supplementary Data" of this document.

Changes in Internal Controls

There was no change in the Corporation's "internal control over financial reporting" (as such term is defined in Rule 13a-15(f) under the Exchange Act) that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Item 9B. Other Information

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Incorporated by reference herein is the information appearing under the headings "Information about Nominees, Directors and Independence Standards," "Related Person Transactions," "Section 16(a) Beneficial Ownership Reporting Compliance," "Code of Conduct," "Procedure for Shareholder Nominations," and "Other Board Committees" within the Corporation's 2013 Proxy Statement. The information concerning executive officers required by this Item is provided under the caption "Executive Officers" within Item 1, Part I, "Business" in this Annual Report. The Corporation has adopted a code of ethics (Code of Conduct) that applies to all directors, officers and employees, including the Chief Executive Officer, the Chief Financial Officer and the Corporate Controller. A copy of the Code of Conduct may be obtained free of charge by writing to the Corporate Secretary at Fulton Financial Corporation, P.O. Box 4887, Lancaster, Pennsylvania 17604-4887, and is also available via the internet at www.fult.com.

Item 11. Executive Compensation

Incorporated by reference herein is the information appearing under the headings "Information Concerning Compensation" and "Human Resources Committee Interlocks and Insider Participation" within the Corporation's 2013 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Incorporated by reference herein is the information appearing under the heading "Security Ownership of Directors, Nominees, Management and Certain Beneficial Owners" within the Corporation's 2013 Proxy Statement, and information appearing under the heading "Securities Authorized for Issuance under Equity Compensation Plans" within Item 5, "Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities" in this Annual Report.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Incorporated by reference herein is the information appearing under the headings "Related Person Transactions" and "Information about Nominees, Directors and Independence Standards" within the Corporation's 2013 Proxy Statement, and the information appearing in "Note D - Loans and Allowance for Credit Losses," of the Notes to Consolidated Financial Statements in Item 8, "Financial Statements and Supplementary Data" in this Annual Report.

Item 14. Principal Accounting Fees and Services

Incorporated by reference herein is the information appearing under the heading "Relationship With Independent Public Accountants" within the Corporation's 2013 Proxy Statement.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this report:

1. Financial Statements — The following consolidated financial statements of Fulton Financial Corporation and subsidiaries are incorporated herein by reference in response to Item 8 above:
 - (i) Consolidated Balance Sheets - December 31, 2012 and 2011.
 - (ii) Consolidated Statements of Income - Years ended December 31, 2012, 2011 and 2010.
 - (iii) Consolidated Statements of Comprehensive Income - Years ended December 31, 2012, 2011 and 2010.
 - (iii) Consolidated Statements of Shareholders' Equity - Years ended December 31, 2012, 2011 and 2010.
 - (iv) Consolidated Statements of Cash Flows - Years ended December 31, 2012, 2011 and 2010.
