Table of Contents

CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Independent Bank Corp. (the "Company") is a state chartered, federally registered bank holding company, incorporated in 1985. The Company is the sole stockholder of Rockland Trust Company ("Rockland Trust" or the "Bank"), a Massachusetts trust company chartered in 1907.

All material intercompany balances and transactions have been eliminated in consolidation. Certain previously reported amounts may have been reclassified to conform to the current year's presentation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements, primarily consisting of normal recurring adjustments, have been included. Operating results for the quarter ended September 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016 or any other interim period. For further information, refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, filed with the Securities and Exchange Commission.

NOTE 2 - RECENT ACCOUNTING STANDARDS UPDATES

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 606 "Revenue from Contracts with Customers" Update No. 2014-09. Update No. 2014-09 was issued in May 2014 to address the previous revenue recognition requirements in GAAP that differ from those in International Financial Reporting Standards (IFRS). Accordingly, the FASB and the International Accounting Standards Board (IASB) initiated a joint project to clarify the principles for recognizing revenue and to develop a common revenue standard for U.S. GAAP and IFRS. The largely converged revenue recognition standards will supersede virtually all revenue recognition guidance in GAAP and IFRS. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Since the issuance of Update 2014-09, the FASB has finalized various amendments to the standard as summarized below:

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-12

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-10

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-08.

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2015-14.

Through Updates 2016-12, 2016-10 and 2016-08, the FASB amended its new revenue guidance on licenses of intellectual property, identification of performance obligations, collectability, noncash consideration and the presentation of sales and other similar taxes. The FASB also clarified the definition of a completed contract at transition and added a practical expedient to ease transition for contracts that were modified prior to adoption. The FASB also amended the new revenue recognition guidance on determining whether an entity is a principal or an agent in an arrangement which affects whether revenue should be reported gross or net.

Following the issuance of Update 2015-14, Update 2014-09, as amended, is effective for the Company for annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. A full or modified retrospective transition method is required. The Company's revenue is comprised of net interest income on financial assets and liabilities, which is explicitly excluded from the scope of the new guidance, and noninterest income. The Company plans to adopt the revenue recognition guidance in the first quarter of 2018 and is currently evaluating the potential impact on noninterest income

on the Company's consolidated financial position, other presentation and disclosure issues, as well as evaluating its selection of transition method.

FASB ASC Topic 230 "Statement of Cash Flows" Update No. 2016-15. Update No. 2016-15 was issued in August 2016 to reduce diversity of practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments in this update provide guidance on the following eight specific cash flow issues; (1) debt prepayment or debt extinguishment costs, (2) settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing, (3) contingent consideration payments made after

Table of Contents

a business combination, (4) proceeds from the settlement of insurance claims, (5) proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies, (6) distributions received from equity method investees, (7) beneficial interests in securitization transactions, and (8) separately identifiable cash flows and application of the Predominance Principle. The amendments in this topic will provide guidance for these eight issues, thereby reducing the current and potential future diversity in practice. The amendments in this update are effective for annual periods and interim periods within those annual periods beginning after December 31, 2017. Earlier adoption is permitted, including interim reporting periods within that reporting period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. An entity that elects early adoption must adopt all of the amendments in the same period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 326 "Financial Instruments - Credit Losses" Update No. 2016-13. Update No. 2016-13 was issued in June 2016 to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. To achieve this objective, the amendments in this update replace the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The amendments affect entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off-balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The amendments in this update are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years, with earlier adoption permitted as of fiscal years beginning after December 15, 2018, including interim periods with those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 605 "Revenue Recognition" and Topic 815 "Derivatives and Hedging" Update No. 2016-11. Update No. 2016-11 was issued in May 2016 and is a rescission of SEC guidance because of ASU Updates 2014-09 and 2014-16 pursuant to staff announcements at the March 3, 2016 Emerging Issues Task Force meeting. The amendments in this update are effective upon adoption of Topic 606 "Revenue from Contracts with Customers." The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 718 "Compensation - Stock Compensation" Update No. 2016-09. Update No. 2016-09 was issued in March 2016 and affects all entities that issue share-based awards to their employees. This update was issued as part of the FASB's simplification initiative. The areas for simplification in this update involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 323 "Investments -Equity Method and Joint Ventures" Update No. 2016-07. Update No. 2016-07 was issued in March 2016 and eliminates the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes

qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required. The amendments in this update require that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 815 "Derivative and Hedging - Contingent Put and Call Options in Debt Instruments" Update No. 2016-6. Update No. 2016-6 was issued in March 2016 to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. An entity performing the assessment under the amendments in this update is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. An entity has an option to apply

Table of Contents

the amendments in this update on either a prospective basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 815 "Derivative and Hedging - Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships" Update No. 2016-05. Update No. 2016-05 was issued in March 2016 and applies to all reporting entities for which there is a change in the counterparty to a derivative instrument that has been designated as a hedging instrument under Topic 815. The amendments in this update clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria (including those in paragraphs 815-20-35-14 through 35-18) continue to be met. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. An entity has an option to apply the amendments in this update on either a prospective basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 842 "Leases" Update No. 2016-02. Update No. 2016-02 was issued in February 2016 and affects any entity that enters into a lease (as that term is defined in this update), with some specified scope exemptions. The core principle of this update is that a lessee should recognize in the statement of financial position a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. The recognition, measurement, and presentation of expenses and cash flows arising from a lease have not significantly changed from previous GAAP. In addition, the accounting applied by a lessor is largely unchanged from that applied under previous GAAP. For public companies, the amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 825-10 "Financial Instruments - Overall Recognition and Measurement of Financial Assets and Financial Liabilities" Update No. 2016-01. Update No. 2016-01 was issued in January 2016 to amend the guidance in U.S. GAAP on the classification and measurement of financial instruments. Although the update retains many current requirements, it significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities measured at fair value. The update also amends certain disclosure requirements associated with the fair value of financial instruments and various other aspects of recognition, measurement, presentation and disclosure of financial instruments. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted for only certain guidance. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Subtopic 835-30 "Interest - Imputation of Interest" Update No. 2015-03. Update No. 2015-03 was issued in April 2015 to simplify presentation of debt issuance costs. The amendments in this update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuances costs are not affected by the amendments in this update. The amendments in this update were adopted by the Company effective January 1, 2016, with applicable prior period presentation updated as well. The adoption of this standard did not have a material impact on the Company's consolidated financial position.

Table of Contents

## NOTE 3 - SECURITIES

## Trading Securities

The Company had trading securities of \$809,000 and \$356,000 as of September 30, 2016 and December 31, 2015, respectively. These securities are held in a rabbi trust and will be used for future payments associated with the Company's non-qualified 401(k) Restoration Plan and Non-Qualified Deferred Compensation Plan.

## Available for Sale and Held to Maturity Securities

The following table presents a summary of the amortized cost and gross unrealized holding gains and losses recorded in other comprehensive income and fair value of securities available for sale and securities held to maturity for the periods below:

|  | September 30, 2016     |                              |                               |               | December 31, 2015 |                              |                               |               |

When securities are sold, the adjusted cost of the specific security sold is used to compute the gain or loss on the sale.

The actual maturities of certain securities may differ from the contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. A schedule of the contractual maturities of securities available for sale and securities held to maturity as of September 30, 2016 is presented below:

Table of Contents

|                                  | Available for Sale     |            | Held to Maturity |            |

| Total                            | \$376,520              | \$387,008  | \$430,763        | \$441,834  |

Inclusive in the table above is \$11.9 million of callable securities in the Company's investment portfolio at September 30, 2016.

The carrying value of securities pledged to secure public funds, trust deposits, repurchase agreements and for other purposes, as required or permitted by law, was \$451.7 million and \$444.8 million at September 30, 2016 and December 31, 2015, respectively.

At September 30, 2016 and December 31, 2015, the Company had no investments in obligations of individual states, counties, or municipalities which exceeded 10% of stockholders' equity.

**Other-Than-Temporary Impairment ("OTTI")**

The Company continually reviews investment securities for the existence of OTTI, taking into consideration current market conditions, the extent and nature of changes in fair value, issuer rating changes and trends, the credit worthiness of the obligor of the security, volatility of earnings, current analysts' evaluations, the Company's intent to sell the security, or whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery, as well as other qualitative factors. The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment.

The following tables show the gross unrealized losses and fair value of the Company's investments in an unrealized loss position, which the Company has not deemed to be OTTI, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position:

|   | September 30, 2016     |                     |            |                     |             |          |                   |

For the purpose of estimating the allowance for loan losses, management segregates the loan portfolio into the portfolio segments detailed in the above tables. Each of these loan categories possesses unique risk characteristics that are considered when determining the appropriate level of allowance for each segment. Some of the risk characteristics unique to each loan category include:

**Commercial Portfolio**

**Commercial and Industrial:** Loans in this category consist of revolving and term loan obligations extended to business and corporate enterprises for the purpose of financing working capital and/or capital investment. Collateral generally consists of pledges of business assets including, but not limited to: accounts receivable, inventory, plant and equipment, or real estate, if applicable. Repayment sources consist of primarily, operating cash flow, and secondarily,

liquidation of assets.

Commercial Real Estate: Loans in this category consist of mortgage loans to finance investment in real property such as multi-family residential, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific

19

---

## Table of Contents

use properties. Loans are typically written with amortizing payment structures. Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources consist of primarily, cash flow from operating leases and rents, and secondarily, liquidation of assets.

**Commercial Construction:** Loans in this category consist of short-term construction loans, revolving and nonrevolving credit lines and construction/permanent loans to finance the acquisition, development and construction or rehabilitation of real property. Project types include residential 1-4 family, condominium and multi-family homes, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific use properties.

Loans may be written with nonamortizing or hybrid payment structures depending upon the type of project.

Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources vary depending upon the type of project and may consist of sale or lease of units, operating cash flows or liquidation of other assets.

**Small Business:** Loans in this category consist of revolving, term loan and mortgage obligations extended to sole proprietors and small businesses for purposes of financing working capital and/or capital investment. Collateral generally consists of pledges of business assets including, but not limited to, accounts receivable, inventory, plant and equipment, or real estate if applicable. Repayment sources consist primarily of operating cash flows, and secondarily, liquidation of assets.

For the commercial portfolio it is the Company's policy to obtain personal guarantees for payment from individuals holding material ownership interests of the borrowing entities.

### Consumer Portfolio

**Residential Real Estate:** Residential mortgage loans held in the Company's portfolio are made to borrowers who demonstrate the ability to make scheduled payments with full consideration to underwriting factors such as current and expected income, employment status, current assets, other financial resources, credit history and the value of the collateral. Collateral consists of mortgage liens on 1-4 family residential properties. The Company does not originate or purchase sub-prime loans.

**Home Equity:** Home equity loans and lines are made to qualified individuals and are primarily secured by senior or junior mortgage liens on owner-occupied 1-4 family homes, condominiums or vacation homes. The home equity loan has a fixed rate and is billed in equal payments comprised of principal and interest. The home equity line of credit has a variable rate and is billed in interest-only payments during the draw period. At the end of the draw period, the home equity line of credit is billed as a percentage of the principal balance plus all accrued interest. Additionally, the Company has the option of renewing the line of credit for additional draw periods. Borrower qualifications include favorable credit history combined with supportive income requirements and combined loan to value ratios within established policy guidelines.

**Other Consumer:** Other consumer loan products include personal lines of credit and amortizing loans made to qualified individuals for various purposes such as education, debt consolidation, personal expenses or overdraft protection. Borrower qualifications include favorable credit history combined with supportive income and collateral requirements within established policy guidelines. These loans may be secured or unsecured.

### Credit Quality

The Company continually monitors the asset quality of the loan portfolio using all available information. Based on this information, loans demonstrating certain payment issues or other weaknesses may be categorized as delinquent, impaired, nonperforming and/or put on nonaccrual status. Additionally, in the course of resolving such loans, the Company may choose to restructure the contractual terms of certain loans to match the borrower's ability to repay the loan based on their current financial condition. If a restructured loan meets certain criteria, it may be categorized as a troubled debt restructuring ("TDR").

The Company reviews numerous credit quality indicators when assessing the risk in its loan portfolio. For the commercial portfolio, the Company utilizes a 10-point commercial risk-rating system, which assigns a risk-grade to each borrower based on a number of quantitative and qualitative factors associated with a commercial loan transaction. Factors considered include industry and market conditions, position within the industry, earnings trends, operating cash flow, asset/liability values, debt capacity, guarantor strength, management and controls, financial

reporting, collateral, and other considerations. The risk-ratings categories are defined as follows:

1- 6 Rating — Pass: Risk-rating grades “1” through “6” comprise those loans ranging from ‘Substantially Risk Free’ which indicates borrowers are of unquestioned credit standing and the pinnacle of credit quality, well established companies with a very strong financial condition, and loans fully secured by cash collateral, through ‘Acceptable Risk’, which indicates borrowers may exhibit declining earnings, strained cash flow, increasing or above average leverage and/or weakening market fundamentals that indicate below average asset quality, margins and market share. Collateral coverage is protective.

Table of Contents

7 Rating — Potential Weakness: Borrowers exhibit potential credit weaknesses or downward trends deserving management's close attention. If not checked or corrected, these trends will weaken the Company's asset and position. While potentially weak, currently these borrowers are marginally acceptable; no loss of principal or interest is envisioned.

8 Rating — Definite Weakness Loss Unlikely: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt. Loan may be inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. Normal repayment from the borrower is in jeopardy, although no loss of principal is envisioned. However, there is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. Collateral coverage may be inadequate to cover the principal obligation.

9 Rating — Partial Loss Probable: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt with the added provision that the weaknesses make collection of the debt in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Serious problems exist to the point where partial loss of principal is likely.

10 Rating — Definite Loss: Borrowers deemed incapable of repayment. Loans to such borrowers are considered uncollectible and of such little value that continuation as active assets of the Company is not warranted.

The credit quality of the commercial loan portfolio is actively monitored and any changes in credit quality are reflected in risk-rating changes. Risk-ratings are assigned or reviewed for all new loans, when advancing significant additions to existing relationships (over \$50,000), at least quarterly for all actively managed loans, and any time a significant event occurs, including at renewal of the loan.

The Company utilizes a comprehensive strategy for monitoring commercial credit quality. Borrowers are required to provide updated financial information at least annually which is carefully evaluated for any changes in credit quality. Larger loan relationships are subject to a full annual credit review by an experienced credit analysis group. Additionally, the Company retains an independent loan review firm to evaluate the credit quality of the commercial loan portfolio. The independent loan review process achieves significant penetration into the commercial loan portfolio and reports the results of these reviews to the Audit Committee of the Board of Directors on a quarterly basis.

The following table details the amount of outstanding principal balances relative to each of the risk-rating categories for the Company's commercial portfolio:

| Category                        | Risk Rating | September 30, 2016        |                        |                         |                | Total       |
|---------------------------------|-------------|---------------------------|------------------------|-------------------------|----------------|-------------|
|                                 |             | Commercial and Industrial | Commercial Real Estate | Commercial Construction | Small Business |             |
|                                 |             | (Dollars in thousands)    |                        |                         |                |             |
| Pass                            | 1 - 6       | \$746,616                 | \$2,648,658            | \$ 370,149              | \$ 112,442     | \$3,877,865 |

Table of Contents

For the Company's consumer portfolio, the quality of the loan is best indicated by the repayment performance of an individual borrower. However, the Company does supplement performance data with current Fair Isaac Corporation ("FICO") scores and Loan to Value ("LTV") estimates. Current FICO data is purchased and appended to all consumer loans on a quarterly basis. In addition, automated valuation services and broker opinions of value are used to supplement original value data for the residential and home equity portfolios, periodically. The following table shows the weighted average FICO scores and the weighted average combined LTV ratios as of the periods indicated below:

|                           | September 30, 2016 |   | December 31, 2015 |   |
|---------------------------|--------------------|---|-------------------|---|
| Residential portfolio     |                    |   |                   |   |
| FICO score (re-scored)(1) | 743                |   | 742               |   |
| LTV (re-valued)(2)        | 62.7               | % | 61.4              | % |
| Home equity portfolio     |                    |   |                   |   |
| FICO score (re-scored)(1) | 767                |   | 765               |   |
| LTV (re-valued)(2)        | 56.2               | % | 55.8              | % |

(1) The average FICO scores for September 30, 2016 are based upon rescues available from August 31, 2016 and origination score data for loans booked between September 1, 2016 and September 30, 2016. The average FICO scores for December 31, 2015 are based upon rescues available from November 30, 2015 and origination score data for loans booked between December 1, 2015 and December 31, 2015.

(2) The combined LTV ratios for September 30, 2016 are based upon updated automated valuations as of March 31, 2015 and origination value data for loans booked between April 1, 2015 and September 30, 2016. The combined LTV ratios for December 31, 2015 are based upon updated automated valuations as of March 31, 2015 and actual score data for loans booked from April 1, 2015 through December 31, 2015. For home equity loans and lines in a subordinate lien position, the LTV data represents a combined LTV, taking into account the senior lien data for loans and lines.

**Asset Quality**

The Company's philosophy toward managing its loan portfolios is predicated upon careful monitoring, which stresses early detection and response to delinquent and default situations. Delinquent loans are managed by a team of seasoned collection specialists and the Company seeks to make arrangements to resolve any delinquent or default situation over the shortest possible time frame. As a general rule, loans more than 90 days past due with respect to principal or interest are classified as nonaccrual loans. The Company also may use discretion regarding other loans over 90 days delinquent if the loan is well secured and/or in process of collection. Set forth is information regarding the Company's nonperforming loans at the period shown:

Table of Contents

The following table shows information regarding nonaccrual loans at the dates indicated:

|                           | September 30,<br>2016  | December 31,<br>2015 |
|---------------------------|------------------------|----------------------|
|                           | (Dollars in thousands) |                      |
| Commercial and industrial | \$3,065                | \$ 3,699             |
| Commercial real estate    | 7,399                  | 7,856                |
| Commercial construction   | —                      | 304                  |
| Small business            | 288                    | 239                  |
| Residential real estate   | 7,684                  | 8,795                |
| Home equity               | 6,311                  | 6,742                |
| Other consumer            | 44                     | 55                   |
| Total nonaccrual loans(1) | \$24,791               | \$ 27,690            |

(1) Included in these amounts were \$5.9 million and \$5.2 million of nonaccruing TDRs at September 30, 2016 and December 31, 2015, respectively.

The following table shows information regarding foreclosed residential real estate property at the dates indicated:

|   | September 30,<br>2016  | December 31,<br>2015 |
|---|------------------------|----------------------|
|   | (Dollars in thousands) |                      |
| Foreclosed residential real estate property held by the creditor  | \$1,384                | \$ 1,430             |
| Recorded investment in mortgage loans collateralized by residential real estate property that are in the process of foreclosure | \$1,557                | \$ 1,059             |

The following table shows the age analysis of past due financing receivables as of the dates indicated:

(1) Other consumer portfolio is inclusive of deposit account overdrafts recorded as loan balances.

**Troubled Debt Restructurings**

In the course of resolving nonperforming loans, the Bank may choose to restructure the contractual terms of certain loans. The Bank attempts to work out an alternative payment schedule with the borrower in order to avoid foreclosure actions. Any loans that are modified are reviewed by the Bank to identify if a TDR has occurred, which is when, for economic or legal reasons related to a borrower's financial difficulties, the Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status and the restructuring of the loan may include the transfer of assets from the borrower to satisfy the debt, a modification of loan terms, or a combination of the two.

The following table shows the Company's total TDRs and other pertinent information as of the dates indicated:

|  | September 30, 2016 | December 31, 2015 |
|--|--------------------|-------------------|
| TDRs on accrual status   | \$ 27,644          | \$ 32,849         |
| TDRs on nonaccrual   | 5,910              | 5,225             |
| Total TDRs   | \$ 33,554          | \$ 38,074         |
| Amount of specific reserves included in the allowance for loan losses associated with TDRs | \$ 1,515           | \$ 1,628          |
| Additional commitments to lend to a borrower who has been a party to a TDR                 | \$ 1,097           | \$ 972            |

The Company's policy is to have any restructured loan which is on nonaccrual status prior to being modified remain on nonaccrual status for six months subsequent to being modified before management considers its return to accrual status. If the restructured loan is on accrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status. Additionally, loans classified as TDRs are adjusted to reflect the changes in value of the recorded investment in the loan, if any, resulting from the granting of a concession. For all residential loan modifications, the borrower must perform during a 90 day trial period before the modification is finalized. The following table shows the modifications which occurred during the periods indicated and the change in the recorded investment subsequent to the modifications occurring:

All TDR loans are considered impaired and therefore are subject to a specific review for impairment. The impairment analysis appropriately discounts the present value of the anticipated cash flows by the loan's contractual rate of interest in effect prior to the loan's modification. The amount of impairment, if any, is recorded as a specific loss allocation to each individual loan in the allowance for loan losses. Commercial loans (commercial and industrial, commercial construction, commercial real estate and small business loans), residential loans, and home equity loans that have been classified as TDRs and which subsequently default are reviewed to determine if the loan should be deemed collateral dependent. In such an instance, any shortfall between the value of the collateral and the carrying value of the loan is determined by measuring the recorded investment in the loan against the fair value of the collateral less costs to sell. The Company charges off the amount of any confirmed loan loss in the period when the loans, or portion of loans, are deemed uncollectible. Smaller balance consumer TDR loans are reviewed for performance to determine when a charge-off is appropriate.

**Impaired Loans**

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Table of Contents

The tables below set forth information regarding the Company's impaired loans by loan portfolio at the dates indicated:

## Purchased Credit Impaired Loans

Certain loans acquired by the Company may have shown evidence of deterioration of credit quality since origination and it was therefore deemed unlikely that the Company would be able to collect all contractually required payments. As such, these loans were deemed to be PCI loans and the carrying value and prospective income recognition are predicated upon future cash flows expected to be collected. The following table displays certain information pertaining to PCI loans at the dates indicated:

|                     | September 30,<br>2016 | September 30,<br>2015 |
|---------------------|-----------------------|-----------------------|
| Outstanding balance | \$21,481              | \$ 23,199             |
| Carrying amount     | \$ 19,274             | \$ 20,595             |

The following table summarizes activity in the accretable yield for the PCI loan portfolio:

|  | Three Months<br>Ended<br>September 30<br>2016 |         | Nine Months<br>Ended<br>September 30<br>2015 |          |
|--|---|---------|--|----------|
|  | 2016  | 2015    | 2016   | 2015     |
|  | (Dollars in thousands)                        |         |  |          |
| Beginning balance  | \$2,625                                       | \$2,527 | \$2,827                                      | \$2,974  |
| Acquisition  | —   | —       | —  | 319      |
| Accretion  | (359 )  | (592 )  | (1,188 )                                     | (2,138 ) |
| Other change in expected cash flows (1)  | 213   | 278     | 744  | 978      |
| Reclassification from nonaccretable difference for loans which have paid off (2) | —   | 218     | 96   | 298      |
| Ending balance   | \$2,479                                       | \$2,431 | \$2,479                                      | \$2,431  |

(1) Represents changes in cash flows expected to be collected and resulting in increased interest income as a prospective yield adjustment over the remaining life of the loan(s).

(2) Results in increased interest income during the period in which the loan paid off at amount greater than originally expected.

## NOTE 6 - STOCK BASED COMPENSATION

## Time Vested Restricted Stock Awards

During the nine months ended September 30, 2016, the Company made the following awards of restricted stock:

| Date      | Shares | Granted Plan                         | Grant Date<br>Fair Value<br>Per Share | Vesting Period                       |
|-----------|--------|--------------------------------------|---------------------------------------|--------------------------------------|
| 2/11/2016 | 51,475 | 2005 Employee Stock Plan             | \$ 41.96                              | Ratably over 5 years from grant date |
| 3/1/2016  | 600    | 2005 Employee Stock Plan             | \$ 44.37                              | Ratably over 5 years from grant date |
| 5/24/2016 | 8,700  | 2010 NonEmployee Director Stock Plan | \$ 48.34                              | Cliff vest 5 years from grant date   |
| 9/19/2016 | 800    | 2005 Employee Stock Plan             | \$ 52.92                              | Ratably over 5 years from grant date |

The fair value of the restricted stock awards is based upon the average of the high and low price at which the Company's common stock traded on the date of grant. The holders of restricted stock awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights.

## Performance-Based Restricted Stock Awards

On February 11, 2016, the Company granted 20,450 performance-based restricted stock awards to certain executive level employees. These performance-based restricted stock awards were issued from the 2005 Employee Stock Plan and were determined to have a grant date fair value per share of \$41.96. The number of shares to be vested will be contingent upon the Company's attainment of certain performance measures outlined in the award agreement and will be measured as of the end of the three year performance period (January 1, 2016 - December 31, 2018). These awards will be accounted for as equity awards due to the nature of these awards and the fact that these shares will not be settled in cash.

The fair value of the performance-based restricted stock awards, assuming achievement at target, is based upon the average of the high and low price at which the Company's common stock traded on the date of grant. The holders of these awards are not entitled to receive dividends or vote until the shares are vested.

## Stock Options

The Company has made the following awards of nonqualified options to purchase shares of common stock during the nine months ended September 30, 2016:

| Date of grant                            | Nine Months Ended<br>September 30, 2016 |           |  |
|--|---|-----------|--|
|  | 7/14/2016                               | 8/20/2016 |  |
| Plan                                     | 2010                                    | 2010      |  |
| Options granted                          | 5,000                                   | 5,000     |  |
| Vesting period (beginning on grant date) | 18 months                               | 22 months |  |
| Expiration date                          | 7/14/2026                               | 8/20/2026 |  |
| Expected volatility                      | 32.28 %                                 | 32.44 %   |  |
| Expected life (years)                    | 5.5                                     | 5.5       |  |
| Expected dividend yield                  | 2.37 %                                  | 2.28 %    |  |
| Risk free interest rate                  | 1.14 %                                  | 1.29 %    |  |
| Fair value per option                    | \$11.46                                 | \$ 10.59  |  |

## NOTE 7 - REPURCHASE AGREEMENTS

The Company can raise additional liquidity by entering into repurchase agreements at its discretion. In a security repurchase agreement transaction, the Company will generally sell a security, agreeing to repurchase either the same or substantially identical security on a specified later date, at a greater price than the original sales price. The difference between the sale price and purchase price is the cost of the proceeds, which is recorded as interest expense. The securities underlying the agreements are delivered to counterparties as security for the repurchase obligations.

Since the securities are treated as collateral and the agreement does not

31

---

Table of Contents

qualify for a full transfer of effective control, the transactions does not meet the criteria to be classified as a sale, and is therefore considered a secured borrowing transaction for accounting purposes. Payments on such borrowings are interest only until the scheduled repurchase date. In a repurchase agreement the Company is subject to the risk that the purchaser may default at maturity and not return the securities underlying the agreements. In order to minimize this potential risk, the Company either deals with established firms when entering into these transactions or with customers whose agreements stipulate that the securities underlying the agreement are not delivered to the customer and instead are held in segregated safekeeping accounts by the Company's safekeeping agents. The tables below set forth information regarding the Company's repurchase agreements allocated by source of collateral at the dates indicated:

September 30, 2016

Certain counterparties monitor collateral, and may request additional collateral to be posted from time to time. For further information regarding the Company's repurchase agreements see Note 9 - Balance Sheet Offsetting.

**NOTE 8 - DERIVATIVE AND HEDGING ACTIVITIES**

The Company's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company's known or expected cash receipts and its known or expected cash payments principally to manage the Company's interest rate risk. Additionally, the Company enters into interest rate derivatives and foreign exchange contracts to accommodate the business requirements of its customers ("customer related positions"). The Company minimizes the market and liquidity risks of customer related positions by entering into similar offsetting positions with broker-dealers. Derivative instruments are carried at fair value in the Company's financial statements. The accounting for changes in the fair value of a derivative instrument is dependent upon whether or not it qualifies as a hedge for accounting purposes, and further, by the type of hedging relationship.

The Company does not enter into proprietary trading positions for any derivatives.

Interest Rate Positions

The Company currently utilizes interest rate swap agreements as hedging instruments against interest rate risk associated with the Company's borrowings. An interest rate swap is an agreement whereby one party agrees to pay a floating rate of interest on a notional principal amount in exchange for receiving a fixed rate of interest on the same notional amount, for a predetermined period of time, from a second party. The amounts relating to the notional principal amount are not actually exchanged. The maximum length of time over which the Company is currently hedging its exposure to the variability in future cash flows for forecasted transactions related to the payment of variable interest on existing financial instruments is five years.

Table of Contents

The following table reflects the Company's derivative positions for the periods indicated below for interest rate swaps which qualify as cash flow hedges for accounting purposes:

September 30, 2016

| Notional Amount        | Trade Date | Effective Date | Maturity Date | Receive (Variable) Index | Current Rate Received | Pay Fixed Swap Rate | Fair Value  |

| (Dollars in thousands) |            |                |               |                          |                       |                     |             |
| \$25,000               | 16-Feb-06  | 28-Dec-06      | 28-Dec-16     | 3 Month LIBOR            | 0.51 %                | 5.04 %              | \$ (1,054 ) |
| 25,000                 | 16-Feb-06  | 28-Dec-06      | 28-Dec-16     | 3 Month LIBOR            | 0.51 %                | 5.04 %              | (1,055 )    |
| 25,000                 | 9-Dec-08   | 10-Dec-08      | 10-Dec-18     | 3 Month LIBOR            | 0.49 %                | 2.94 %              | (1,164 )    |
| \$75,000               |            |                |               |                          |                       |                     | \$ (3,273 ) |

(1) In April 2016, the Company entered into two forward starting swaps with notional amounts of \$25.0 million each, with the intention of hedging \$50.0 million of existing junior subordinated debentures, as the current hedges on this borrowing expire in December 2016.

For derivative instruments that are designated and qualify as cash flow hedging instruments, the effective portion of the gains or losses is reported as a component of other comprehensive income ("OCI"), and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The Company expects approximately \$914,000 (pre-tax) to be reclassified to interest expense from OCI related to the Company's cash flow hedges in the next twelve months. This reclassification is due to anticipated payments that will be made and/or received on the swaps based upon the forward curve as of September 30, 2016.

The Company recognized \$61,000 and \$183,000 of net amortization income that was an offset to interest expense related to previously terminated swaps for the three and nine month periods ended September 30, 2016 and 2015, respectively.

The Company had no fair value hedges as of September 30, 2016 or December 31, 2015.

#### Customer Related Positions

Loan level derivatives, primarily interest rate swaps, offered to commercial borrowers through the Company's loan level derivative program do not qualify as hedges for accounting purposes. The Company believes that its exposure to commercial customer derivatives is limited because these contracts are simultaneously matched at inception with an offsetting dealer transaction. The commercial customer derivative program allows the Company to retain variable-rate commercial loans while allowing the customer to synthetically fix the loan rate by entering into a variable-to-fixed interest rate swap.

Foreign exchange contracts offered to commercial borrowers through the Company's derivative program do not qualify as hedges for accounting purposes. The Company acts as a seller and buyer of foreign exchange contracts to accommodate its customers. To mitigate the market and liquidity risk associated with these derivatives, the Company enters into similar offsetting positions.

Table of Contents

The following table reflects the Company's customer related derivative positions for the periods indicated below for those derivatives not designated as hedging:

|  | Number of Positions (1) | Notional Amount Maturing |                   |                   |                   | Thereafter | Total     | Fair Value |
|--|-------------------------|--------------------------|-------------------|-------------------|-------------------|------------|-----------|------------|
|  |                         | Less than 1 year         | Less than 2 years | Less than 3 years | Less than 4 years |            |           |            |

(1) The Company may enter into one dealer swap agreement which offsets multiple commercial borrower swap agreements.

Mortgage Derivatives

Prior to closing and funding certain 1- 4 family residential mortgage loans, an interest rate lock commitment is generally extended to the borrower. During the period from commitment date to closing date, the Company is subject to the risk that market rates of interest may change. If market rates rise, investors generally will pay less to purchase such loans resulting in a reduction in the gain on sale of the loans or, possibly, a loss. In an effort to mitigate such risk, forward delivery sales commitments are executed, under which the Company agrees to deliver whole mortgage loans to various investors. These forward commitments carry a market price that has a strong inverse relationship to that of mortgage prices. Certain assumptions, including pull through rates and rate lock periods, are used in managing the existing and future hedges. The effectiveness of the economic hedges rely on the accuracy of these assumptions.

The change in fair value on the interest rate lock commitments and forward delivery sale commitments are recorded in current period earnings as a component of mortgage banking income. In addition, the Company has elected the fair value option to carry loans held for sale at fair value. The change in fair value of loans held for sale is recorded in current period earnings as a component of mortgage banking income in accordance with the Company's fair value election. The change in fair value associated with loans held for sale was an increase of \$47,000 and a decrease of \$181,000 for the three month periods ended September 30, 2016 and 2015, respectively, and increases of \$60,000 and \$3,000 for the nine month periods ended September 30, 2016 and 2015, respectively. These amounts were offset in earnings by the change in the fair value of mortgage derivatives. The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the balance sheet at the periods indicated:

| Total   | \$61         | \$213        | \$444        | \$72         |

By using derivatives, the Company is exposed to credit risk to the extent that counterparties to the derivative contracts do not perform as required. Should a counterparty fail to perform under the terms of a derivative contract, the Company's credit exposure on interest rate swaps is limited to the net positive fair value and accrued interest of all swaps with each counterparty. The Company seeks to minimize counterparty credit risk through credit approvals, limits, monitoring procedures, and obtaining collateral, where appropriate. Institutional counterparties must have an investment grade credit rating and be approved by the Company's Board of Directors. As such, management believes the risk of incurring credit losses on derivative contracts with those counterparties is remote and losses, if any, would

be immaterial. The Company had \$10,000 exposure at September 30, 2016 and \$2,000 in exposure relating to institutional counterparties at December 31, 2015. The Company's exposure relating to customer

Table of Contents

counterparties was approximately \$42.1 million and \$23.2 million at September 30, 2016 and December 31, 2015, respectively. Credit exposure may be reduced by the amount of collateral pledged by the counterparty.

**NOTE 9 - BALANCE SHEET OFFSETTING**

The Company does not offset fair value amounts recognized for derivative instruments or repurchase agreements. The Company does net the amount recognized for the right to reclaim cash collateral against the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement. Collateral legally required to be maintained at dealer banks by the Company is monitored and adjusted as necessary. At September 30, 2016, it was determined that no additional collateral would have to be posted to immediately settle these instruments.

The following tables present the Company's asset and liability derivative positions and the potential effect of netting arrangements on its financial position, as of the periods indicated:

(1) Reflects offsetting derivative positions with the same counterparty.

The Company has agreements with certain of its derivative counterparties that contain a provision where if the Company fails to maintain its status as a well capitalized institution, then the Company could be required to terminate any outstanding derivatives with the counterparty. All liability position interest rate swap and customer loan level swap counterparties have credit-risk contingent features as of the dates indicated in the table above. In addition, derivative instruments that contain credit-risk related contingent features that are in a net liability position require the Company to assign collateral as noted in the table above.

**NOTE 10 - FAIR VALUE MEASUREMENTS**

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. If there has been a significant decrease in the volume and level of activity for the asset or liability, regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. The Company uses prices and inputs that are current as of the measurement date. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from one level to another.

The Fair Value Measurements and Disclosures Topic of the FASB ASC defines fair value and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under the Fair Value Measurements and Disclosures Topic of the FASB ASC are described below:

Level 1 – Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 – Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

## Table of Contents

To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

### Valuation Techniques

There have been no changes in the valuation techniques used during the current period.

### Securities:

#### Trading Securities

These equity securities are valued based on market quoted prices. These securities are categorized in Level 1 as they are actively traded and no valuation adjustments have been applied.

#### U.S. Government Agency Securities

Fair value is estimated using either multi-dimensional spread tables or benchmarks. The inputs used include benchmark yields, reported trades, and broker/dealer quotes. These securities are classified as Level 2.

#### Agency Mortgage-Backed Securities

Fair value is estimated using either a matrix or benchmarks. The inputs used include benchmark yields, reported trades, broker/dealer quotes, and issuer spreads. These securities are categorized as Level 2.

#### Agency Collateralized Mortgage Obligations and Small Business Administration Pooled Securities

The valuation model for these securities is volatility-driven and ratings based, and uses multi-dimensional spread tables. The inputs used include benchmark yields, reported trades, new issue data, broker dealer quotes, and collateral performance. If there is at least one significant model assumption or input that is not observable, these securities are categorized as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

#### State, County, and Municipal Securities

The fair value is estimated using a valuation matrix with inputs including bond interest rate tables, recent transaction, and yield relationships. These securities are categorized as Level 2.

#### Single and Pooled Issuer Trust Preferred Securities

The fair value of trust preferred securities, including pooled and single issuer preferred securities, is estimated using external pricing models, discounted cash flow methodologies or similar techniques. The inputs used in these valuations include benchmark yields, reported trades, new issue data, broker dealer quotes, and collateral performance. If there is at least one significant model assumption or input that is not observable, these securities are classified as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

### Equity Securities

These equity securities are valued based on market quoted prices. These securities are classified as Level 1 as they are actively traded and no valuation adjustments have been applied.

### Loans Held for Sale

The Company has elected the fair value option to account for originated closed loans intended for sale. The fair value is measured on an individual loan basis using quoted market prices and when not available, comparable market value or discounted cash flow analysis may be utilized. These assets are typically classified as Level 2.

### Derivative Instruments

#### Derivatives

The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. The Company incorporates credit valuation adjustments to appropriately reflect nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings. Additionally, in conjunction with fair value measurement guidance, the Company has made an accounting policy election to measure the credit risk of its derivative financial

Table of Contents

instruments that are subject to master netting agreements on a net basis by counterparty portfolio. Although the Company has determined that the majority of the inputs used to value its interest rate derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by the Company and its counterparties. However, as of September 30, 2016 and December 31, 2015, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified as Level 2.

**Mortgage Derivatives**

The fair value of mortgage derivatives is determined based on current market prices for similar assets in the secondary market and, therefore, classified as Level 2 within the fair value hierarchy.

**Impaired Loans**

Collateral dependent loans that are deemed to be impaired are valued based upon the lower of cost or fair value of the underlying collateral less costs to sell. The inputs used in the appraisals of the collateral are not always observable, and therefore the loans may be classified as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

**Other Real Estate Owned and Other Foreclosed Assets**

The fair values are generally estimated based upon recent appraisal values of the property less costs to sell the property, as Other Real Estate Owned ("OREO") and Other Foreclosed Assets are valued at the lower of cost or fair value of the property, less estimated costs to sell. Certain inputs used in appraisals are not always observable, and therefore OREO and Other Foreclosed Assets may be classified as Level 3 within the fair value hierarchy.

**Goodwill and Other Intangible Assets**

Goodwill and other intangible assets are subject to impairment testing. The Company conducts an annual impairment test of goodwill in the third quarter of each year, or more frequently if necessary, and other intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. To estimate the fair value of goodwill and, if necessary, other intangible assets, the Company utilizes both a comparable analysis of relevant price multiples in recent market transactions and discounted cash flow analysis. Both valuation models require a significant degree of management judgment. In the event the fair value as determined by the valuation model is less than the carrying value, the intangibles may be impaired. If the impairment testing resulted in impairment, the Company would classify the impaired goodwill and other intangible assets subjected to nonrecurring fair value adjustments as Level 3.

Table of Contents

Assets and liabilities measured at fair value at the periods indicated were as follows:

|   | Balance   | Fair Value Measurements at Reporting Date Using Quoted Prices in |   |   |

| Ending balance                           | \$1,538  | \$1,586  |

It is the Company's policy to recognize the transfers between levels of the fair value hierarchy as of the end of the reporting period. There were no transfers between the levels of the fair value hierarchy for any assets or liabilities measured at fair value on a recurring basis during the nine month periods ended September 30, 2016 or 2015.

The following table sets forth certain unobservable inputs regarding the Company's investment in securities that are classified as Level 3 for the periods indicated:

| Valuation Technique                           | September                            |            | Unobservable<br>Inputs | September        |            | September  |            |
|---|--------------------------------------|------------|------------------------|------------------|------------|------------|------------|

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs which are not identifiable. Appraisals may be adjusted by management for qualitative factors such as economic factors and estimated liquidation expenses. The range of these possible adjustments may vary.

For the fair value measurements in the table above, which are classified as Level 3 within the fair value hierarchy, the Company's Treasury and Finance groups determine the valuation policies and procedures. For the pricing of the securities, the Company uses third-party pricing information, without adjustment. Depending on the type of the security, management employs various techniques to analyze the pricing it receives from third parties, such as analyzing changes in market yields and in certain instances reviewing the underlying collateral of the security. Management reviews changes in fair value from period to period and performs testing to ensure that prices received from the third parties are consistent with their expectation of the market. For the securities whose market is deemed to be inactive and which are categorized as Level 3, the fair value models are calibrated and significant inputs are back

tested on a quarterly basis, to the extent possible. This testing is done by the third party service provider, who performs this testing by comparing anticipated inputs to actual results. Significant changes in fair value from period to period are closely scrutinized to ensure fair value models are not flawed. The driver(s) of the respective change in fair value and the method for forecasting the driver(s) is closely considered by management.

Table of Contents

The significant unobservable inputs used in the fair value measurement of the Company's pooled trust preferred securities are cumulative prepayment rates, cumulative default rates, loss given default rates and cure given default rates. Significant increases (decreases) in deferrals or defaults, in isolation, would result in a significantly lower (higher) fair value measurement. Alternatively, significant increases (decreases) in cure rates, in isolation, would result in a significantly higher (lower) fair value measurement.

Additionally, the Company has certain assets which are marked to fair value on a nonrecurring basis which are categorized within Level 3. These assets include collateral dependent impaired loans and OREO. The determination of the fair value amount is derived from the use of independent third party appraisals and evaluations, prepared by firms from a predetermined list of qualified and approved appraisers or evaluators. Upon receipt of an appraisal or evaluation, the Company's Commercial Real Estate Appraisal Department will review the report for compliance with regulatory and Company standards, as well as reasonableness and acceptance of the value conclusions. Any issues or concerns regarding compliance or value conclusions will be addressed with the engaged firm and the report may be adjusted or revised. If a disagreement cannot be resolved, the Commercial Real Estate Appraisal Department will either address the key issues and modify the report for acceptance or reject the report and re-order a new report. Ultimately, the Company's Commercial Real Estate Appraisal Department will confirm the collateral value as part of its review process.

The estimated fair values and related carrying amounts for assets and liabilities for which fair value is only disclosed are shown below as of the periods indicated:

|   | Carrying Value | Fair Value | Fair Value Measurements at Reporting Date Using                |   |   |

The fair values presented are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments and/or discounted cash flow analyses.

(a) Fair value is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or cash flows.

(b) Fair value was determined by discounting anticipated future cash payments using rates currently available for instruments with similar remaining maturities.

(c) Fair value was determined based upon market prices of securities with similar terms and maturities.

This summary excludes financial assets and liabilities for which the carrying value approximates fair value. For financial assets, these include cash and due from banks, federal funds sold, short-term investments, FHLB stock, and cash surrender value of life insurance policies. For financial liabilities, these include demand, savings, money market deposits, and federal funds purchased. These instruments would all be considered to be classified as Level 1 within the fair value hierarchy. Also excluded from the summary are financial instruments measured at fair value on a recurring and nonrecurring basis, as previously described.

The Company considers its financial instruments' current use to be the highest and best use of the instruments.

| Net change in other comprehensive income for defined benefit postretirement plans (2)                                  | 186                                      | (76 )                       | 110                    | 546                                     | (237 )                      | 309                    |
| Total other comprehensive income   | \$2,374                                  | \$ (921 )                   | \$ 1,453               | \$ 2,492                                | \$ (1,043 )                 | \$ 1,449               |

(1) Includes the amortization of the remaining balance of a realized but unrecognized gain, net of tax, from the termination of interest rate swaps in June 2009. The original gain of \$1.4 million, net of tax, is being recognized in earnings through December 2018, the original maturity date of the swap. The balance of this gain has amortized to \$317,000 and \$463,000 at September 30, 2016 and 2015, respectively.

(2) The amortization of prior service costs is included in the computation of net periodic pension cost as disclosed in the Employee Benefit Plans footnote in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, filed with the Securities and Exchange Commission.

Information on the Company's accumulated other comprehensive income (loss), net of tax, is comprised of the following components as of the periods indicated:

|   | Unrealized<br>Gain<br>on<br>Securities<br>(Dollars in thousands) | Unrealized<br>Loss on<br>Cash Flow<br>Hedge<br>(Dollars in thousands) | Deferred<br>Gain on<br>Hedge<br>Transactions | Defined<br>Benefit<br>Postretirement<br>Plans | Accumulated<br>Other<br>Comprehensive<br>Income (Loss) |

NOTE 12 - COMMITMENTS AND CONTINGENCIES

Financial Instruments with Off-Balance Sheet Risk

In the normal course of business, the Company enters into various transactions to meet the financing needs of its customers, which, in accordance with GAAP, are not included in its consolidated balance sheets. These transactions include commitments

46

---

Table of Contents

to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. The Company minimizes its exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures.

The Company enters into contractual commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of these commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding.

Standby letters of credit are written conditional commitments issued to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Company would be required to fund the commitment. The maximum potential amount of future payments the Company could be required to make is represented by the contractual amount of the commitment. If the commitment were funded, the Company would be entitled to seek recovery from the customer. The Company's policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

The fees collected in connection with the issuance of standby letters of credit are representative of the fair value of its obligation undertaken in issuing the guarantee. In accordance with applicable accounting standards related to guarantees, fees collected in connection with the issuance of standby letters of credit are deferred. The fees are then recognized in income proportionately over the life of the standby letter of credit agreement. The deferred standby letter of credit fees represent the fair value of the Company's potential obligations under the standby letter of credit guarantees.

The following table summarizes the above financial instruments at the dates indicated:

|  | September 30, 2016     | December 31, 2015 |
|--|------------------------|-------------------|
|  | (Dollars in thousands) |                   |
| Commitments to extend credit           | \$2,189,953            | \$2,091,170       |
| Standby letters of credit              | 17,798                 | 17,962            |
| Deferred standby letter of credit fees | 112                    | 72                |

**Lease Commitments**

The Company leases office space, space for ATM locations, and certain branch locations under noncancelable operating leases.

Rent expense incurred under operating leases was approximately \$2.1 million for both the three months ended September 30, 2016 and 2015, respectively, and \$6.4 million and \$6.1 million for the nine months ending, September 30, 2016 and 2015, respectively. Renewal options ranging from 1-10 years exist for several of these leases.

There has been no significant change in the future minimum lease payments payable by the Company since December 31, 2015. See the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015 for information regarding our leases and other commitments.

**Other Contingencies**

At September 30, 2016, Rockland Trust was involved in pending lawsuits that arose in the ordinary course of business. Management has reviewed these pending lawsuits with legal counsel and has taken into consideration the view of counsel as to their outcome. In the opinion of management, the final disposition of pending lawsuits is not expected to have a material adverse effect on the Company's financial position or results of operations.

The Bank is required to maintain certain reserve requirements of vault cash and/or deposits with the Federal Reserve Bank of Boston. There was no reserve requirement at September 30, 2016 and \$21.7 million at December 31, 2015.

**NOTE 13 - LOW INCOME HOUSING PROJECT INVESTMENTS**

The Company has invested in low income housing projects that generate Low Income Housing Tax Credits ("LIHTC") which provide the Company with tax credits and operating loss tax benefits over a period of approximately 15 years. None of the original investment is expected to be repaid. The investment in LIHTC projects is being accounted for using the proportional amortization method, under which the Company amortizes the initial cost of the investment in

proportion to the amount of the tax credits and other tax benefits received and recognizes the net investment benefit in the income statement as a component of income tax expense (benefit).

The following table presents the Company's investments in low income housing projects as of the dates indicated:

NOTE 14 - SUBSEQUENT EVENT

On October 20, 2016, the Company announced the signing of a definitive agreement under which the Company will acquire Island Bancorp, Inc. ("Island Bancorp") and Rockland Trust Company will acquire The Edgartown National Bank.

Under the merger agreement each share of Island Bancorp stock will be exchanged for either 9.525 shares of the Company's common stock or \$500 in cash, subject to customary pro-ration procedures which will result in an aggregate stock/cash consideration mix of 80% stock/20% cash. The transaction is intended to qualify as a tax-free reorganization for federal income tax purposes and to provide a tax-free exchange for Island Bancorp shareholders to the extent they receive Independent common stock as consideration.

Independent anticipates issuing approximately 369,311 shares of its common stock in the merger. Based upon the Company's \$53.25 per share closing price on October 19, 2016 the transaction is valued at approximately \$24.5 million.

The boards of directors of each company have unanimously approved the transaction. The transaction is subject to certain conditions, including the receipt of required regulatory approvals, approval by Island Bancorp shareholders, and other standard conditions. The Company shareholders do not need to approve the merger. Island Bancorp directors who currently own, in the aggregate, about 33% of Island Bancorp's outstanding shares have signed voting agreements pursuant to which they have agreed to vote their shares in favor of the merger.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements, notes and tables included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015, filed with the Securities and Exchange Commission.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q, both in the Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are not historical facts and include expressions about management's confidence and strategies and management's expectations about new and existing programs and products, acquisitions, relationships, opportunities, taxation, technology, market conditions and economic expectations. These statements may be identified by forward-looking terminology such as "should," "expect," "believe," "view," "opportunity," "allow," "continues," "reflects," "typically," "usually," "anticipate," or similar statements or variations of such terms. Such forward-looking statements involve certain risks and uncertainties and our actual results may differ materially from such forward-looking statements. Factors that may cause actual results to differ materially from those contemplated by such forward-looking statements, in addition to those risk factors listed under the "Risk Factors" section of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015, include, but are not limited to:

- a weakening in the United States economy in general and the regional and local economies within the New England region and the Company's market area;
- adverse changes in the local real estate market;
- adverse changes in asset quality including an unanticipated credit deterioration in our loan portfolio;
- acquisitions may not produce results at levels or within time frames originally anticipated and may result in unforeseen integration issues or impairment of goodwill and/or other intangibles;
- changes in trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System;
- higher than expected tax expense, resulting from failure to comply with general tax laws, changes in tax laws, or failure to comply with requirements of the federal New Markets Tax Credit program;
- unexpected changes in market interest rates for interest earning assets and/or interest bearing liabilities;

- unexpected increased competition in the Company's market area;
- unanticipated loan delinquencies, loss of collateral, decreased service revenues, and other potential negative effects on our business caused by severe weather or other external events;
- a deterioration in the conditions of the securities markets;
- a deterioration of the credit rating for U.S. long-term sovereign debt;
- our inability to adapt to changes in information technology;
- electronic fraudulent activity within the financial services industry, especially in the commercial banking sector;
- adverse changes in consumer spending and savings habits;

Table of Contents

failure to consummate or delay in consummating the acquisition of Island Bancorp, which is subject to certain standard conditions, including approval of the transaction by Island Bancorp shareholders and receipt of required regulatory approvals;

the inability to realize expected revenue synergies from merger transactions in the amounts or in the timeframe anticipated;

inability to retain customers and employees, including those of previous mergers;

the effect of laws and regulations regarding the financial services industry including, but not limited to, the Dodd-Frank Wall Street Reform and Consumer Protection Act;

changes in laws and regulations (including laws and regulations concerning taxes, banking, securities and insurance) generally applicable to the Company's business;

changes in accounting policies, practices and standards, as may be adopted by the regulatory agencies as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board, and other accounting standard setters;

cyber security attacks or intrusions that could adversely impact our businesses; and

other unexpected material adverse changes in our operations or earnings.

Except as required by law, the Company disclaims any intent or obligation to update publicly any such forward-looking statements, whether in response to new information, future events or otherwise. Any public statements or disclosures by the Company following this Quarterly Report on Form 10-Q which modify or impact any of the forward-looking statements contained in this Quarterly Report on Form 10-Q will be deemed to modify or supersede such statements in this Quarterly Report on Form 10-Q.

## Selected Quarterly Financial Data

The selected consolidated financial and other data of the Company set forth below does not purport to be complete and should be read in conjunction with, and is qualified in its entirety by, the more detailed information, including the Consolidated Financial Statements and related notes, appearing elsewhere in this Quarterly Report on Form 10-Q.

|                                      | Three Months Ended                            |                  |                   |                      |                       |
