National Bankshares, Inc. and Subsidiaries Notes to Consolidated Financial Statements March 31, 2012 (Unaudited)

\$ in thousands, except per share data

#### Note 1: General

The consolidated financial statements of National Bankshares, Inc. ("NBI") and its wholly-owned subsidiaries, The National Bank of Blacksburg ("NBB") and National Bankshares Financial Services, Inc. ("NBFS") (collectively, the "Company"), conform to accounting principles generally accepted in the United States of America and to general practices within the banking industry. The accompanying interim period consolidated financial statements are unaudited; however, in the opinion of management, all adjustments consisting of normal recurring adjustments, which are necessary for a fair presentation of the consolidated financial statements, have been included. The results of operations for the three months ended March 31, 2012 are not necessarily indicative of results of operations for the full year or any other interim period. The interim period consolidated financial statements and financial information included in this Form 10-Q should be read in conjunction with the notes to consolidated financial statements included in the Company's 2011 Form 10-K. The Company posts all reports required to be filed under the Securities and Exchange Act of 1934 on its web site at www.nationalbankshares.com.

Subsequent events have been considered through the date when the Form 10-Q was issued.

#### Note 2: Stock-Based Compensation

The Company had a stock option plan, the 1999 Stock Option Plan, that was adopted in 1999 and that was terminated on March 9, 2009. Incentive stock options were granted annually to key employees of NBI and its subsidiaries from 1999 to 2005 and none have been granted since 2005. All of the stock options are vested.

			Weighted	
		Weighted	Average	
		Average	Remaining	Aggregate

Outstanding March 31, 2012	77,000	\$22.82	4.37	\$560
Exercisable at March 31, 2012	77,000	\$22.82	4.37	\$560

There were no stock options exercised during the three months ended March 31, 2012. There were 2,500 shares with an intrinsic value of \$35 exercised during the first quarter of 2011.

#### Note 3: Loan Portfolio

The loan portfolio, excluding loans held for sale, was comprised of the following:

	December
March 31,	31,
2012	2011

Real Estate Construction	\$48,266	\$48,528
Consumer Real Estate	147,312	149,750
Commercial Real Estate	301,911	303,192
Commercial Non Real Estate	39,998	38,849
Public Sector and IDA	15,263	15,407
Consumer Non Real Estate	31,814	32,744
Total	\$584,564	\$588,470

#### Note 4: Allowance for Loan Losses, Nonperforming Assets and Impaired Loans

The allowance for loan losses methodology incorporates individual evaluation of impaired loans and collective evaluation of groups of non-impaired loans. The Company performs ongoing analysis of the loan portfolio to determine credit quality and to identify impaired loans. Credit quality is rated based on the loan's payment history, the borrower's current financial situation and value of the underlying collateral.

Impaired loans are those loans that have been modified in a troubled debt restructure ("TDR" or "restructure") and larger, non-homogeneous loans that are in nonaccrual or exhibit payment history or financial status that indicate the probability that collection will not occur according to the loan's terms. Generally, impaired loans are risk rated "classified" or "other assets especially mentioned." Impaired loans are measured at the lower of the invested amount or the fair market value. Impaired loans with an impairment loss are designated nonaccrual. Please refer to Note 1 of the Company's 2011 Form 10-K, "Summary of Significant Accounting Policies" for additional information on evaluation of impaired loans and associated specific reserves, and policies regarding nonaccruals, past due status and charge-offs. Troubled debt restructurings impact the estimation of the appropriate level of the allowance for loan losses. If the restructuring included forgiveness of a portion of principal or accrued interest, the charge-off is included in the historical charge-off rates applied to the collective evaluation methodology. Further, restructured loans are individually evaluated for impairment, with amounts below fair value accrued in the allowance for loan losses. TDRs that experience a payment default are examined to determine whether the default indicates collateral dependency or cash flows below those that were included in the fair value measurement. TDRs, as well as all impaired loans, that are determined to be collateral dependent or for which decreased cash flows indicate a decline in fair value are charged down to fair value.

The Company evaluated characteristics in the loan portfolio and determined major segments and smaller classes within each segment for application of the allowance for loan losses methodology. These characteristics include collateral type, repayment sources, and (if applicable) the borrower's business model.

#### Change in Portfolio Segments and Classes

During the first quarter of 2012, the Company revised its basis for determining segments and classes for the allowance for loan losses. In previous periods, the loan portfolio was segmented primarily by repayment source, whereas beginning with the first quarter of 2012 disaggregation is based primarily upon collateral type for secured loans and borrower type or repayment terms for unsecured loans. This aligns the allowance categories with those used for financial statements and other notes, providing greater uniformity and comparability. Consistent with accounting guidance, prior periods have not been restated and are shown as originally published using the segments and classes in effect for the period. These changes had an insignificant effect on the calculation of the balance in the allowance for loan losses.

The segments and classes used in determining the allowance for loan losses, beginning with the first quarter of 2012 are as follows.

Real Estate Construction Commercial Non Real Estate
Construction, residential Commercial and Industrial

Construction, other

Consumer Real Estate

Equity lines

Residential closed-end first liens

Residential closed-end junior liens

Commercial Real Estate Multifamily real estate Public Sector and IDA Public sector and IDA

Consumer Non Real Estate

Credit cards Automobile

Other consumer loans

Commercial real estate, owner occupied Commercial real estate, other

Prior to the first quarter of 2012, the Company's segments and classes were as follows:

Consumer Real Estate Commercial Real Estate

Equity lines College housing
Closed-end consumer real estate Office/Retail space
Consumer construction Nursing homes

Hotels

Consumer, Non Real Estate Municipalities

Credit cards Medical professionals
Consumer, general Religious organizations
Consumer overdraft Convenience stores
Entertainment and sports

Commercial & Industrial Nonprofits
Commercial & industrial Restaurants

General contractors

Construction, Development and Land

Other commercial real estate

Residential Commercial

Risk factors are analyzed for each class to estimate collective reserves. Factors include allocations for the historical charge-off percentage and changes in national and local economic and business conditions, in the nature and volume of the portfolio, in loan officers' experience and in loan quality. Increased allocations for the risk factors applied to each class are made for special mention and classified loans. The Company allocates additional reserves for "high risk" loans, determined to be junior lien mortgages, high loan-to-value loans and interest-only loans.

A detailed analysis showing the allowance roll-forward by portfolio segment and related loan balance by segment follows:

The estimate of credit risk for non-impaired loans is obtained by applying allocations for internal and external factors. The allocations are increased for loans that exhibit greater credit quality risk.

Credit quality indicators, which the Company terms risk grades, are assigned through the Company's credit review function for larger loans and selective review of loans that fall below credit review thresholds. Loans that do not indicate heightened risk are graded as "pass." Loans that appear to have elevated credit risk because of frequent or persistent past due status, which is less than 75 days, or that show weakness in the borrower's financial condition are risk graded "special mention." Loans with frequent or persistent delinquency exceeding 75 days or that have a higher level of weakness in the borrower's financial condition are graded "classified." Classified loans have regulatory risk ratings of "substandard" and "doubtful." Allocations are increased by 50% and by 100% for loans with grades of "special mention" and "classified," respectively.

Determination of risk grades was completed for the portfolio as of March 31, 2012 and 2011 and December 31. 2011.

The following displays non-impaired loans by credit quality indicator:

#### Sales, Purchases and Reclassification of Loans

The Company finances mortgages under "best efforts" contracts with mortgage purchasers. The mortgages are designated as held for sale upon initiation. There have been no major reclassifications from portfolio loans to held for sale. Occasionally, the Company purchases or sells participations in loans. All participation loans purchased met the Company's normal underwriting standards at the time the participation was entered. Participation loans are included in the appropriate portfolio balances to which the allowance methodology is applied.

#### **Troubled Debt Restructurings**

The Company modified loans that were classified troubled debt restructurings during the three months ended March 31, 2012. The following table present restructurings by class that occurred during the period.

Note: only classes with restructured loans are presented.

Restructurings that occurred during the three months ended March 31, 2012 Pre-Modification Post-Modification Number Outstanding Outstanding **Principal** of Principal **Impairment** Contracts Balance Balance Accrued Consumer Real Estate Closed-end first liens \$ 305 324 \$47 Closed-end junior liens 1 143 147 109 Commercial Real Estate Commercial real estate, owner occupied 1 17 22 5 \$ 465 \$ 493 Total \$156

The modifications provided payment relief primarily by extending maturity dates without reducing interest rates or amounts owed. Restructured loans are designated impaired and measured for impairment. Of the consumer real estate loans summarized above, two were loans previously modified and reported as troubled debt restructurings in prior quarters. The Company granted additional modifications in the first quarter of 2012, increasing the balance by \$10 from December 31, 2011. The loans restructured in the current period are secured by real estate and the impairment measurement is based upon the fair value (reduced by selling costs) of the underlying collateral. The impairment measurement resulted in \$156 accrued to the allowance for loan losses.

The following table presents restructured loans that were modified between the dates of April 1, 2011 and March 31, 2012 and that experienced payment default during the three months ended March 31, 2012. The company defines default as one or more payments that occur more than 30 days past the due date.

	Number of	Principal	Impairment
	Contracts	Balance	Accrued
Consumer Real Estate			
Closed-end first liens	1	\$17	\$
Commercial Real Estate			
Multifamily	1	250	
Commercial Non Real Estate			
Commercial and industrial	1	58	
Consumer Non Real Estate			
Other consumer	1	67	8
Total	4	\$392	\$8

Of the restructured loans that experienced a payment delay of 30 days or more during the period, \$267 are secured by real estate. The remaining restructured loans that experienced payment default during the period are secured by collateral other than real estate. The impairment measurement is based upon the fair value of the underlying collateral and as such, was not significantly affected by the payment default. All of the above loans are in nonaccrual status.

Note 5: Securities

The amortized costs, gross unrealized gains, gross unrealized losses and fair values for securities available for sale by major security type as of March 31, 2012 are as follows:

	March 31, 2012			
		Gross	Gross	
	Amortized	Unrealized	Unrealized	Fair

	December 31, 2011				
	Less Tha	n 12 Months	12 Mon	ths or More	
	Fair	Unrealized	Fair	Unrealized	
	Value	Loss	Value	Loss	
Temporarily impaired securities:					
U.S. Government agencies and corporations	\$6,230	\$20	\$	\$	
States and political subdivisions	3,527	19	981	26	
Corporate debt securities	4,916	97			
Other			142	162	
Total temporarily impaired securities	\$14,673	\$136	\$1,123	\$188	

The Company had 96 securities with a fair value of \$88,892 which were temporarily impaired at March 31, 2012. The total unrealized loss on these securities was \$1,521. Of the temporarily impaired total, two securities with a fair value of \$389 and an unrealized loss of \$173 have been in a continuous loss position for twelve months or more. The Company has determined that these securities are temporarily impaired at March 31, 2012 for the reasons set out below.

U.S. Government agencies. The unrealized losses in this category of investments were caused by interest rate and market fluctuations. The contractual terms of the investments do not permit the issuer to settle the securities at a price less than the cost basis of each investment. Because the Company does not intend to sell any of the investments and it is not likely that the Company will be required to sell any of these investments before recovery of its amortized cost basis, which may be at maturity, the Company does not consider these investments to be other-than-temporarily impaired.

States and political subdivisions. This category's unrealized losses are primarily the result of interest rate and market fluctuations and also a certain few ratings downgrades brought about by the impact of the economic downturn on states and political subdivisions. The contractual terms of the investments do not permit the issuer to settle the securities at a price less than the cost basis of each investment. Because the Company does not intend to sell any of the investments and it is not likely that the Company will be required to sell any of the investments before recovery of its amortized cost basis, which may be at maturity, the Company does not consider these investments to be other-than-temporarily impaired.

Corporate debt securities. The Company's unrealized losses in corporate debt securities are related to interest rate and market fluctuations and to ratings downgrades for a limited number of securities. The contractual terms of the investments do not permit the issuer to settle the securities at a price less than the cost basis of each investment. Because the Company does not intend to sell any of the investments before recovery of its amortized cost basis, which may be at maturity, the Company does not consider these investments to be other-than-temporarily impaired.

Other. The Company holds an investment in an LLC and a small amount of community bank stock. The value of these investments has been negatively affected by market conditions. Because the Company does not intend to sell these investments before recovery of amortized cost basis, the Company does not consider these investments to be other-than-temporarily impaired.

As a member of the Federal Reserve and the Federal Home Loan Bank ("FHLB") of Atlanta, NBB is required to maintain certain minimum investments in the common stock of those entities. Required levels of investment are based upon NBB's capital and a percentage of qualifying assets. In addition, NBB is eligible to borrow from the FHLB with borrowings collateralized by qualifying assets, primarily residential mortgage loans and NBB's capital stock investment in the FHLB. Redemption of FHLB stock is subject to certain limitations and conditions. At its discretion, the FHLB may declare dividends on the stock. Management reviews for impairment based upon the ultimate recoverability of the cost basis of the FHLB stock, and at March 31, 2012, management did not consider there to be any impairment.

Management regularly monitors the credit quality of the investment portfolio. Changes in ratings are noted and follow-up research on the issuer is undertaken when warranted. Management intends to carefully follow any changes

in bond quality. Refer to "Securities" in this report for additional information.

Note 6: Recent Accounting Pronouncements

In April 2011, the FASB issued ASU 2011-03, "Transfers and Servicing (Topic 860) – Reconsideration of Effective Control for Repurchase Agreements." The amendments in this ASU remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee and (2) the collateral maintenance implementation guidance related to that criterion. The amendments in this ASU were effective for the first interim or annual period beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04, "Fair Value Measurement (Topic 820) – Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs." This ASU is the result of joint efforts by the FASB and International Accounting Standards Board (IASB) to develop a single, converged fair value framework on how (not when) to measure fair value and what disclosures to provide about fair value measurements. The ASU is largely consistent with existing fair value measurement principles in U.S. GAAP (Topic 820), with many of the amendments made to eliminate unnecessary wording differences between U.S. GAAP and International Financial Reporting Standards (IFRS). The amendments were effective for interim and annual periods beginning after December 15, 2011 with prospective application. The Company has included the required disclosures in its consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05, "Comprehensive Income (Topic 220) – Presentation of Comprehensive Income." The objective of this ASU is to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income by eliminating the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments require that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The single statement of comprehensive income should include the components of net income, a total for net income, the components of other comprehensive income, a total for other comprehensive income, and a total for comprehensive income. In the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present all the components of other comprehensive income, a total for other comprehensive income, and a total for comprehensive income. The amendments do not change the items that must be reported in other comprehensive income, the option for an entity to present components of other comprehensive income either net of related tax effects or before related tax effects, or the calculation or reporting of earnings per share. The amendments were effective for fiscal years and interim periods within those years beginning after December 15, 2011. The amendments did not require transition disclosures. The Company has included the required disclosures in its consolidated financial statements.

In September 2011, the FASB issued ASU 2011-08, "Intangible – Goodwill and Other (Topic 350) – Testing Goodwill for Impairment." The amendments in this ASU permit an entity to first assess qualitative factors related to goodwill to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Under the amendments in this ASU, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The amendments in this ASU were effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements. In December 2011, the FASB issued ASU 2011-11, "Balance Sheet (Topic 210) – Disclosures about Offsetting Assets and Liabilities." This ASU requires entities to disclose both gross information and net information about both instruments and transactions eligible for offset in the balance sheet and instruments and transactions subject to an agreement similar to a master netting arrangement. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The Company does not expect the adoption of ASU 2011-11 to have a material impact on its consolidated financial

In December 2011, the FASB issued ASU 2011-12, "Comprehensive Income (Topic 220) – Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05." The amendments are being made to allow the Board time to redeliberate whether to present on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for all periods presented. While the Board is considering the operational concerns about the presentation requirements for

reclassification adjustments and the needs of financial statement users for additional information about reclassification adjustments, entities should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before ASU 2011-05. All other requirements in ASU 2011-05 are not affected by ASU 2011-12, including the requirement to report comprehensive income either in a single continuous financial statement or in two separate but consecutive financial statements. Public entities should apply these requirements for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company has included the required disclosures in its consolidated financial statements.

#### Note 7: Defined Benefit Plan

## Components of Net Periodic Benefit Cost:

	Pension B	enefits
	Three Mo	nths ended
	March 31,	
	2012	2011
Service cost	\$117	\$109
Interest cost	185	176
Expected return on plan assets	(269	) (203 )
Amortization of prior service cost	(25	) (25)
Recognized net actuarial loss	127	73
Net periodic benefit cost	\$135	\$130

## 2012 Plan Year Employer Contribution

Without considering the prefunding balance, NBI's minimum required contribution to the National Bankshares, Inc. Retirement Income Plan (the "Plan") is \$733. Considering the prefunding balance, the 2012 minimum required contribution is \$0. The Company elected to contribute \$183 to the Plan in the quarter ended March 31, 2012.

#### Note 8: Fair Value Measurements

The Company records fair value adjustments to certain assets and liabilities and determines fair value disclosures utilizing a definition of fair value of assets and liabilities that states that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Additional considerations come into play in determining the fair value of financial assets in markets that are not active.

The Company uses a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. The three levels of the fair value hierarchy based on these two types of inputs are as follows:

Level Valuation is based on quoted prices in active markets for identical assets and liabilities.

1 -

Level Valuation is based on observable inputs including quoted prices in active markets for similar

2 – assets and liabilities, quoted prices for identical or similar assets and liabilities in less active markets, and model-based valuation techniques for which significant assumptions can be derived primarily from or corroborated by observable data in the market.

Level Valuation is based on model-based techniques that use one or more significant inputs or

3 – assumptions that are unobservable in the market.

The following describes the valuation techniques used by the Company to measure certain financial assets and liabilities recorded at fair value on a recurring basis in the financial statements:

#### Securities Available for Sale

Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar securities for which significant assumptions are

derived primarily from or corroborated by observable market data. Third party vendors compile prices from various sources and may determine the fair value of identical or similar securities by using pricing models that consider observable market data (Level 2). The carrying value of restricted Federal Reserve Bank and Federal Home Loan Bank stock approximates fair value based upon the redemption provisions of each entity and is therefore excluded from the following table.

The following table presents the balances of financial assets and liabilities measured at fair value on a recurring basis:

Fair Value Measurements at March 31, 2012 Using Quoted Prices in Active Significant Balance as Markets for Other Significant of Identical Observable Unobservable March 31. Assets **Inputs** Inputs 2012 (Level 1) (Level 3) Description (Level 2) \$---\$ ---U.S. Treasury \$2,128 \$2,128 U.S. Government agencies and corporations 118,564 118,564 States and political subdivisions 48,819 48,819 Mortgage-backed securities 6,582 6,582 \_\_\_ Corporate debt securities 18,438 18,438 Other securities 2,127 2,127 Total securities available for sale \$196,658 \$196,658 \$---\$ ---

Fair Value Measurements at December 31, 2011 Using

		Quoted Prices	,	
	Balance as	in Active	Significant	
	of	Markets for	Other	Significant
	December	Identical	Observable	Unobservable
	31,	Assets	Inputs	Inputs
Description	2011	(Level 1)	(Level 2)	(Level 3)
U.S. Treasury	\$2,150	\$	\$2,150	\$
U.S. Government agencies and corporations	96,003		96,003	
States and political subdivisions	49,122		49,122	
Mortgage-backed securities	7,725		7,725	
Corporate debt securities	16,077		16,077	
Other securities	2,175		2,175	
Total securities available for sale	\$173,252	\$	\$173,252	\$

Certain financial assets are measured at fair value on a nonrecurring basis in accordance with GAAP. Adjustments to the fair value of these assets usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets.

The following describes the valuation techniques used by the Company to measure certain financial assets recorded at fair value on a nonrecurring basis in the financial statements:

#### Loans Held for Sale

Loans held for sale are carried at the lower of cost or market value. These loans currently consist of one-to-four family residential loans originated for sale in the secondary market. Fair value is based on the price secondary markets are currently offering for similar loans using observable market data which is not materially different than cost due to the

short duration between origination and sale (Level 2). As such, the Company records any fair value adjustments on a nonrecurring basis. No nonrecurring fair value adjustments were recorded on loans held for sale at March 31, 2012 or December 31, 2011. Gains and losses on the sale of loans are recorded within income from mortgage banking on the Consolidated Statements of Income.

## Impaired Loans

Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that the Company will be unable to collect all the contractual interest and principal payments as scheduled in the loan agreement. Troubled debt restructurings are impaired loans. The measurement of loss associated with impaired loans may be based on either the observable market price of the loan, the present value of the expected cash flows or the fair value of the collateral. Collateral may be in the form of real estate or business assets including equipment, inventory, and accounts receivable. The vast majority of the collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser outside of the Company using observable market data (Level 2). However, if the collateral is a house or building in the process of construction, if an appraisal of the real estate property is over 12 months old or if the real estate market is considered by management to be experiencing volatility, then the fair value is considered Level 3. The value of business equipment is based upon an outside appraisal using observable market data, if the collateral is

deemed significant. If the collateral is not deemed significant, the value of business equipment is based on the net book value on the borrower's financial statements. Likewise, values for inventory and accounts receivables collateral are based on the borrower's financial statement balances or aging reports (Level 3). Estimated losses on impaired loans allocated to the allowance for loan losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan losses on the Consolidated Statements of Income. The following table summarizes the Company's impaired loans that were measured at fair value on a nonrecurring basis at March 31, 2012 and at December 31, 2011.

				Carrying Value	
Date	Description	Balance	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	Assets: Impaired loans net of				
March 31, 2012	valuation allowance	\$ 2,461	\$	\$	\$ 2,461
	Impaired loans net of				
December 31, 2011	valuation allowance	5,968			5,968

The following table summarizes the activity in Company's impaired loans that were valued using Level 3 inputs for the three months ended March 31, 2012.

	V Dec	rrying alue, eember 2011	Addi	tions	Delet due Forecl	e to	Change Balance		Ren from	paired oans moved h Level 3 (2)	Va Mar	rying alue, ch 31,
Impaired loans												
Principal balance	\$	7,091	\$	726	\$	(423)	\$	(34)	\$	(4,306)	\$	3,054
Impairment allocation		1,123		120		(322)		(87)		(241)		593
Net impaired loans	\$	5,968	\$	606	\$	(101)	\$	53	\$	(4,065)	\$	2,461

<sup>(1)</sup> The reported amounts represent changes in the balance due to principal payments by borrowers and reductions in impairment measurements as a result of current valuation procedures.

Impaired loans are measured quarterly for impairment. The Company employs the most applicable valuation method for each loan based on current information at the time of valuation. The valuation procedures for the first quarter of 2012 resulted in changes to valuation method from collateral-based to the present value of cash flows for certain loans, and resulted in reduced allocations for certain loans. The impaired loans removed from Level 3 as well as the change in balance for impairment allocation summarized above reflect the change in valuation method and allocation for these loans.

Certain loans were removed from impaired Level 3 due to foreclosure. None of the foreclosures resulted in increases to the Company's other real estate owned, as the loans were either unsecured or secured by properties that were purchased by third parties at auction.

<sup>(2)</sup> The reported amount represents loans that were valued using Level 3 inputs as of December 31, 2011 that no longer have impairment allocations under Level 3 valuation.

The following table presents information about Level 3 Fair Value Measurements for March 31, 2012:

	Valuation Technique	Unobservable Input	Range (Weighted Average)
Impaired loans	Discounted appraised value	Selling cost	5% - 25% (14%)
Impaired loans	Discounted appraised value	Discount for lack of marketability and age of appraisal	0% - 50% (9%)
Impaired loans	Present value of cash flows	Discount rate	6.0% - 7.5% (6.2%)

## Other Real Estate Owned

Certain assets such as other real estate owned (OREO) are measured at fair value less cost to sell.

The following table summarizes the Company's other real estate owned that was measured at fair value on a nonrecurring basis at March 31, 2012 and at December 31, 2011.

				Carrying Value	
			Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
Date	Description	Balance	(Level 1)	(Level 2)	(Level 3)
	Assets:		,	,	,
March 31, 2012	Other real estate owned net of valuation allowance	\$ 940	\$	\$	\$ 940
	Other real estate owned net of valuation				
December 31, 2011	allowance	1,489			1,489

The following table summarizes the activity in the Company's other real estate owned that were valued using Level 3 inputs for the three months ended March 31, 2012

	Carrying				Carrying
	Value,			Increase to	Value,
	December		Sale of	Valuation	March 31,
	31, 2011	Additions	Property	Allowance	2012
Other real estate owned	\$1,489	\$	\$(543)	\$(6)	\$940

The following table presents information about Level 3 Fair Value Measurements for March 31, 2012:

	Valuation Technique	Unobservable Input	Range (Weighted Average)
	varuation recinique	Chooservable input	(Weighted Average)
Other Real Estate Owned	Discounted appraised		
	value	Selling cost	5% - 10% (6%)
Other Real Estate Owned	Discounted appraised	Discount for lack of marketability	
	value	and age of appraisal	0% - 22.57% (8.87%)

The following methods and assumptions were used by the Company in estimating fair value disclosures for financial instruments:

Cash and Due from Banks, Interest-Bearing Deposits, and Federal Funds Sold

The carrying amounts approximate fair value.

Securities

The fair value of securities, excluding restricted stock, is determined by quoted market prices or dealer quotes. The fair value of certain state and municipal securities is not readily available through market sources other than dealer quotations, so fair value estimates are based on quoted market prices of similar instruments adjusted for differences between the quoted instruments and the instruments being valued. The carrying value of restricted securities approximates fair value based upon the redemption provisions of the applicable entities.

#### Loans Held for Sale

The fair value of loans held for sale is based on commitments on hand from investors or prevailing market prices.

#### Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial, real estate – commercial, real estate – construction, real estate – mortgage, credit card and other consumer loans. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories.

The fair value of performing loans is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan, as well as estimates for prepayments. The estimate of maturity is based on the Company's historical experience with repayments for loan classification, modified, as required, by an estimate of the effect of economic conditions on lending. Fair value for significant nonperforming loans is based on estimated cash flows which are discounted using a rate commensurate with the risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows and discount rates are determined within management's judgment, using available market information and specific borrower information.

## **Deposits**

The fair value of demand and savings deposits is the amount payable on demand. The fair value of fixed maturity term deposits and certificates of deposit is estimated using the rates currently offered for deposits with similar remaining maturities.

#### Accrued Interest

The carrying amounts of accrued interest approximate fair value.

#### Commitments to Extend Credit and Standby Letters of Credit

The only amounts recorded for commitments to extend credit, standby letters of credit and financial guarantees written are the deferred fees arising from these unrecognized financial instruments. These deferred fees are not deemed significant at March 31, 2012 and December 31, 2011, and, as such, the related fair values have not been estimated.

The estimated fair values, and related carrying amounts, of the Company's financial instruments are as follows:

			March 31, 20	12	
		Quoted

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations \$ in thousands, except per share data

The purpose of this discussion and analysis is to provide information about the financial condition and results of operations of National Bankshares, Inc. and its wholly-owned subsidiaries (the "Company"), which are not otherwise apparent from the consolidated financial statements and other information included in this report. Please refer to the financial statements and other information included in this report as well as the 2011 Annual Report on Form 10-K for an understanding of the following discussion and analysis.

#### Cautionary Statement Regarding Forward-Looking Statements

We make forward-looking statements in this Form 10-Q that are subject to significant risks and uncertainties. These forward-looking statements include statements regarding our profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy, and financial and other goals, and are based upon our management's views and assumptions as of the date of this report. The words "believes," "expects," "may," "will," "should," "proje "contemplates," "anticipates," "forecasts," "intends," or other similar words or terms are intended to identify forward-looking statements.

These forward-looking statements are based upon or are affected by factors that could cause our actual results to differ materially from historical results or from any results expressed or implied by such forward-looking statements. These factors include, but are not limited to, changes in:

- interest rates.
- general economic conditions,
- the legislative/regulatory climate,
- monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury, the Office of the Comptroller of the Currency, the Federal Reserve Board and the Federal Deposit Insurance Corporation, and the impact of any policies or programs implemented pursuant to the Emergency Economic Stabilization Act of 2008 ("EESA") the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act") and other financial reform legislation,
- unanticipated increases in the level of unemployment in the Company's trade area,
- the quality or composition of the loan and/or investment portfolios,
- demand for loan products,

- deposit flows,
- competition,
- demand for financial services in the Company's trade area,
- the real estate market in the Company's trade area,
- the Company's technology initiatives,
- loss or retirement of key executives,
- adverse changes in the securities market, and
- applicable accounting principles, policies and guidelines.

These risks and uncertainties should be considered in evaluating the forward-looking statements contained in this report. We caution readers not to place undue reliance on those statements, which speak only as of the date of this report. This discussion and analysis should be read in conjunction with the description of our "Risk Factors" in Item 1A. of our 2011 Annual Report on Form 10-K.

The recession continues to impact the national economy as well as the Company's market. Signs of economic recovery are mixed with continued high unemployment and diminished real estate values. The Company's trade area contains a diverse economy that includes large public colleges and universities, which somewhat insulated the Company's market from the dramatic declines in real estate values seen in some other areas of the country. Real estate values in the Company's market area saw moderate declines in 2009 and 2010 that appeared to stabilize in 2011. Nonperforming assets increased during 2009 and 2010 but decreased in 2011. If the economic recovery wavers or reverses, it is likely that unemployment will continue at higher-than-normal levels or rise in the Company's trade area. Because of the importance to the Company's markets of state-funded universities, cutbacks in the funding provided by the State as a result of the recession could also negatively impact employment. This could lead to an even higher rate of delinquent loans and a greater number of real estate foreclosures. Higher unemployment and the fear of layoffs causes reduced consumer demand for goods and services, which negatively impacts the Company's business and professional customers. In conclusion, a slow economic recovery could have an adverse effect on all financial institutions, including the Company.

## **Critical Accounting Policies**

#### General

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States (GAAP). The financial information contained within our statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained when earning income, recognizing an expense, recovering an asset or relieving a liability. The Company uses historical loss factors as one factor in determining the inherent loss that may be present in the loan portfolio. Actual losses could differ significantly from one previously acceptable method to another method. Although the economics of the Company's transactions would be the same, the timing of events that would impact the transactions could change.

#### Allowance for Loan Losses

The allowance for loan losses is an accrual of estimated losses that have been sustained in our loan portfolio. The allowance is reduced by charge-offs of loans and increased by the provision for loan losses and recoveries of previously charged-off loans. The determination of the allowance is based on two accounting principles, FASB Topic 450-20 (Contingencies) which requires that losses be accrued when occurrence is probable and the amount of the loss is reasonably estimable, and FASB Topic 310-10 (Receivables) which requires accrual of losses on impaired loans if the recorded investment exceeds fair value.

Probable losses are accrued through two calculations, individual evaluation of impaired loans and collective evaluation of the remainder of the portfolio. Impaired loans are larger non-homogeneous loans for which there is a probability that collection will not occur according to the loan terms, as well as loans whose terms have been modified in a troubled debt restructuring. Impaired loans with an estimated impairment loss are placed on nonaccrual status.

Estimated loss for an impaired loan is the amount of recorded investment that exceeds the loan's fair value. Fair value of an impaired loan is measured by one of three methods, the fair value (less cost to sell) of collateral, the present value of future cash flows, or observable market price. For loans that are not collateral dependent, the potential loss is accrued in the allowance. For collateral-dependent loans, the potential loss is charged-off against the allowance, instead of being accrued. Impaired loans with partial charge-offs are maintained as impaired until it becomes evident that the borrower can repay the remaining balance of the loan according to the terms.

Non-impaired loans are grouped by portfolio segment and loan class. Loans within a segment or class have similar risk characteristics. Each segment and class is evaluated for probable loss by applying quantitative and qualitative factors, including net charge-off trends, delinquency rates, concentration trends and economic trends. The Company

accrues additional estimated loss for criticized loans within each class and for loans designated high risk. High risk loans are defined as junior lien mortgages, loans with high loan-to-value ratios and loans with payments of interest-only required. Both criticized loans and high risk loans are included in the base risk analysis for each class and are allocated additional reserves.

The estimation of the accrual involves analysis of internal and external variables, methodologies, assumptions and our judgment and experience. Key judgments used in determining the allowance for loan losses include internal risk rating determinations, market and collateral values, discount rates, loss rates, and our view of current economic conditions. These judgments are inherently subjective and our actual losses could be greater or less than the estimate. Future estimates of the allowance could increase or decrease based on changes in the financial condition of individual borrowers, concentrations of various types of loans, economic conditions or the markets in which collateral may be sold. The estimate of the allowance accrual determines the amount of provision expense and directly affects our financial results.

The estimate of the allowance for March 31, 2012 considered market and portfolio conditions during the first quarter of 2012 as well as the elevated levels of delinquencies and net charge-offs in 2010 and 2011. Given the continued economic difficulties, the ultimate amount of loss could vary from that estimate. For additional discussion of the allowance, see Note 3 to the financial statements and "Asset Quality," and "Provision and Allowance for Loan Losses."

## Goodwill and Core Deposit Intangibles

Goodwill is subject to at least an annual assessment for impairment by applying a fair value based test. The Company performs impairment testing in the fourth quarter of each year. The Company's goodwill impairment analysis considers three valuation techniques appropriate to the measurement. The first technique uses the Company's market capitalization as an estimate of fair value; the second technique estimates fair value using current market pricing multiples for companies comparable to NBI; while the third technique uses current market pricing multiples for change-of-control transactions involving companies comparable to NBI. Each measure indicated that the Company's fair value exceeded its book value, validating that goodwill is not impaired.

Certain key judgments were used in the valuation measurement. Goodwill is held by the Company's bank subsidiary. The bank subsidiary is 100% owned by the Company, and no market capitalization is available. Because most of the Company's assets are comprised of the subsidiary bank's equity, the Company's market capitalization was used to estimate NBB's capitalization. Other judgments include the assumption that the companies and transactions used as comparables for the second and third technique were appropriate to the estimate of the Company's fair value, and that the comparable multiples are appropriate indicators of fair value, and compliant with accounting guidance.

Acquired intangible assets (such as core deposit intangibles) are recognized separately from goodwill if the benefit of the asset can be sold, transferred, licensed, rented, or exchanged, and amortized over its useful life. The Company amortizes intangible assets arising from branch transactions over their useful life. Core deposit intangibles are subject to a recoverability test based on undiscounted cash flows, and to the impairment recognition and measurement provisions required for other long-lived assets held and used. The impairment testing showed that the expected cash flows of the intangible assets exceeded the carrying value.

#### Overview

National Bankshares, Inc. ("NBI") is a financial holding company incorporated under the laws of Virginia. Located in southwest Virginia, NBI has two wholly-owned subsidiaries, the National Bank of Blacksburg ("NBB") and National Bankshares Financial Services, Inc. ("NBFS"). NBB, which does business as National Bank from twenty-five office locations, is a community bank. NBB is the source of nearly all of the Company's revenue. NBFS does business as National Bankshares Investment Services and National Bankshares Insurance Services. Income from NBFS is not significant at this time, nor is it expected to be so in the near future.

NBI common stock is listed on the NASDAQ Capital Market and is traded under the symbol "NKSH." National Bankshares, Inc. has been included in the Russell Investments Russell 3000 and Russell 2000 Indexes since June 29, 2009.

#### **Performance Summary**

The following table presents NBI's key performance ratios for the three months ended March 31, 2012 and the year ended December 31, 2011. The measures for March 31, 2012 are annualized, except for basic net earnings per share and fully diluted net earnings per share.

	March 31, 2012		December 31, 2011	
Return on average assets	1.67	%	1.71	%
Return on average equity	12.40	%	12.89	%
Basic net earnings per share	\$ 0.64	\$	2.54	
Fully diluted net earnings per share	\$ 0.64	\$	2.54	
Net interest margin (1)	4.36	%	4.59	%
Noninterest margin (2)	1.36	%	1.45	%

- (1) Net interest margin: Year-to-date tax-equivalent net interest income divided by year-to-date average earning assets.
- (2) Noninterest margin: Noninterest expense (excluding the provision for bad debts and income taxes) less noninterest income (excluding securities gains and losses) divided by average year-to-date assets.

The annualized return on average assets declined slightly for the three months ended March 31, 2012 as compared to the year ended December 31, 2011, due primarily to growth in average assets. The annualized return on average equity declined 49 basis points for the same period, due to growth in average equity. Average equity tends to build in the months preceding the payment of dividends which have historically been paid semi-annually.

The annualized net interest margin was a healthy 4.36% at the end of the first quarter of 2012, though down 23 basis points from the 4.59% reported for the year ended December 31, 2011. The primary factor driving the decrease in the net interest margin was the declining yield on earning assets offset by a smaller decline in the cost to fund earning assets.

The annualized noninterest margin decreased 9 basis points from 2011 primarily because of a decrease in noninterest expense. Please refer to the discussion under noninterest expense for further information.

#### Growth

NBI's key growth indicators are shown in the following table:

	N	March 31,		cember 31,	Percent	
		2012		2011	Change	
Interest bearing deposits	\$	101,301	\$	98,355	3.00	%
Securities		337,713		318,913	5.90	%
Loans, net		576,501		580,402	(0.67	)%
Deposits		931,792		919,333	1.36	%
Total assets		1,083,842		1,067,102	1.57	%

Net loans contracted slightly from December 31, 2011 to March 31, 2012, due to competitive, economic and market forces. The increase in deposits generated the increases in securities and interest-bearing deposit assets.

## **Asset Quality**

Key indicators of NBI's asset quality are presented in the following table:

	March 31,		March 31,		March 31, March 31,		]	December 31	
		2012		2011		2011			
Nonperforming loans	\$	5,328	\$	7,653	\$	5,204			
Accruing restructured loans		3,742				3,756			
Loans past due 90 days or more, and still accruing		210		1,078		481			
Other real estate owned		940		2,222		1,489			
Allowance for loan losses to loans		1.38	%	1.40	%	1.37	%		
Net charge-off ratio		0.46	%	0.15	%	0.43	%		
Ratio of nonperforming assets to loans, net of unearned									
income and deferred fees, plus other real estate owned		1.07	%	1.67	%	1.13	%		
Ratio of allowance for loan losses to nonperforming loans		151.33	%	107.74	%	155.03	%		

The Company monitors asset quality indicators in managing credit risk and in determining the allowance and provision for loan losses. The recent economic recession and slow recovery have contributed to levels of some asset quality measures that are higher than normal for the Company. Overall, the indicators remained at similar levels to those at December 31, 2011, except other real estate owned which declined substantially. When compared to March 31, 2011, the annualized net charge-off rate increased while most other asset quality indicators improved substantially. The Company's risk analysis determined an allowance for loan losses of \$8,063 at March 31, 2012, remaining at a similar level to the \$8,068 at December 31, 2011. The provision for the three months ended March 31, 2012 was \$672, a decrease of \$128 or 16% from the \$800 from the same period in 2011. The ratio of the allowance for loan losses to loans increased slightly from December 31, 2011, but was two basis points below the level at March 31, 2011. The stability in most asset quality indicators consistent with year-end 2011 levels contributed to a comparable

degree of allowance for loan losses. The Company continues to monitor risk levels within the loan portfolio. Other real estate owned declined \$549 from December 31, 2011 and \$1,282 from March 31, 2011, primarily due to the disposal of such real estate. As of March 31, 2012, total properties approximating \$627 are in various stages of foreclosure and may impact other real estate owned in future quarters. It is not possible to accurately predict the future total of other real estate owned because property sold at foreclosure may be acquired by third parties and NBB's other real estate owned properties are regularly marketed and sold.

#### Net Interest Income

The net interest income analysis for the three months ended March 31, 2012 and 2011 follows:

	N	March 31, 2012				March 31, 2011		
	Average	_	Average Yield/		Average		Average Yield/	;
	Balance	Interest	Rate		Balance	Interest	Rate	
Interest-earning assets:								
Loans, net $(1)(2)(3)$	\$585,348	\$8,957	6.15	%	\$585,162	\$9,159	6.35	%
Taxable securities	152,563	1,589	4.19	%	153,501	1,662	4.39	%
Nontaxable securities (1)(4)	159,494	2,440	6.15	%	166,799	2,592	6.30	%
Interest-bearing deposits	110,901	71	0.26	%	54,089	32	0.24	%
Total interest-earning assets	\$1,008,306	\$13,057	5.21	%	\$959,551	\$13,445	5.68	%
Interest-bearing liabilities:								
Interest-bearing demand								
deposits	\$408,262	\$1,057	1.04	%	\$368,191	\$979	1.08	%
Savings deposits	62,602	9	0.06	%	56,184	11	0.08	%
Time deposits	309,940	1,051	1.36	%	323,237	1,389	1.74	%
Total interest-bearing liabilities	\$780,804	\$2,117	1.09	%	\$747,612	\$2,379	1.29	%
Net interest income and interest								
rate spread		\$10,940	4.12	%		\$11,066	4.39	%
Net yield on average								
interest-earning assets			4.36	%			4.68	%

- (1) Interest on nontaxable loans and securities is computed on a fully taxable equivalent basis using a Federal income tax rate of 35% in the two three-month periods presented.
- (2) Included in interest income are loan fees of \$198 and \$205 for the three months ended March 31, 2012 and 2011, respectively.
  - (3) Nonaccrual loans are included in average balances for yield computations.
    - (4) Daily averages are shown at amortized cost.

The net interest margin for the three months ended March 31, 2012 decreased 32 basis points from the three months ended March 31, 2011. The decrease in net interest margin was driven by a decline in the yield on earning assets of 47 basis points offset by a decline in the cost of interest bearing liabilities of 20 basis points. Both loans and securities experienced a decline in yield. The 20 basis point decline in the yield on loans stemmed from contractual repricing terms and the renegotiation of loan interest rates in response to competition. The yield on taxable securities was 20 basis points lower for the three months ended March 31, 2012, when compared with the same period in 2011, while the yield on nontaxable securities declined 15 basis points over the same period. The market yield for securities of a comparable term has declined over the past year, causing matured and called bonds to be replaced with lower yielding investments. The decline in the cost of interest-bearing liabilities came primarily from a 38 basis point reduction in the cost of time deposits when the three-month periods ended March 31, 2012 and March 31, 2011 are compared. The Company's yield on earning assets and cost of funds are largely dependent on the interest rate environment. In the

recent past, historically low interest rates caused funding costs to decline at a faster pace than the yield on earning assets. The decline in deposit pricing has begun to slow while competitive and market forces continue to pressure the yield on earning assets. The Company's cost of funding is more sensitive to interest rate changes than is the yield on earning assets.

## Provision and Allowance for Loan Losses

The provision for loan losses for the three month period ended March 31, 2012 was \$672, compared with \$800 for the first three months of 2011. The ratio of the allowance for loan losses to total loans at the end of the first quarter of 2012 was 1.38%, which compares to 1.37% at December 31, 2011. The net charge-off ratio was 0.46% at March 31, 2012 and 0.43% at December 31, 2011. See "Asset Quality" for additional information.

#### Noninterest Income

	Three Months ended					
	March 31,	March 31,	Percent			
	2012	2011	Change			
Service charges on deposits	\$ 631	\$ 612	3.10	%		
Other service charges and fees	49	58	(15.52	)%		
Credit card fees	794	733	8.32	%		
Trust fees	326	246	32.52	%		
BOLI income	200	184	8.70	%		
Other income	99	91	8.79	%		
Realized securities gains	53	10	430.00	%		

Service charges on deposit accounts increased \$19 when the three months ended March 31, 2012 are compared with the same period in 2011. Contributing to the increase was an increase of \$32 in fees from checking account overdrafts and checks returned for insufficient funds, offset by smaller decreases in ATM fees and account service fees.

Other service charges and fees includes charges for official checks, income from the sale of checks to customers, safe deposit box rent, fees for letters of credit and the income earned from commissions on the sale of credit life, accident and health insurance. Income for the three months ended March 31, 2012 decreased \$9 from the same period in 2011, due to minor and typical fluctuations.

Credit card fees for the first three months of 2012 increased \$61, or 8.32%, when compared with the same period last year. The increase was due to a higher volume of merchant transaction fees and credit card fees. Management anticipates that this category of noninterest income may be negatively affected by provisions included in the Dodd-Frank Wall Street Reform and Consumer Protection Act. This recent legislation, which became effective on October 1, 2011 but which exempts financial institutions with less than \$10 billion in assets, directs the Federal Reserve Bank to control the level of debit card interchange fees. It is not yet known the extent to which the legislation may impact the level of credit card fees or when that impact will occur.

Income from Trust fees increased 32.52% or \$80 from the \$246 earned in the same period of 2011. Trust income varies depending on the total assets held in Trust accounts, the type of accounts under management and financial market conditions. Estate fees contributed to the increase in the first quarter.

BOLI income increased \$16 from March 31, 2011 to March 31, 2012. The increase in income stems from a purchase of \$1,900 in BOLI assets in the fourth quarter of 2011.

Other income includes net gains from the sales of fixed assets, revenue from investment and insurance sales and other smaller miscellaneous components. Other income for the three months ended March 31, 2012 increased 8.79%, when compared with the three months ended March 31, 2011. These areas fluctuate with market conditions and because of competitive factors.

Realized securities gains for the three months ended March 31, 2012 were \$53, as compared with \$10 for the same period in 2011. Net realized securities gains and losses are market driven and have resulted from calls of securities.

## Noninterest Expense

	Three Mon	Three Months ended				
	March 31,	March 31,	Percent			
	2012	2011	Change			
Salaries and employee benefits	\$ 2,956	\$ 2,904	1.79	%		
Occupancy, furniture and fixtures	397	423	(6.15	)%		
Data processing and ATM	392	444	(11.71	)%		
FDIC assessment	109	346	(68.50	)%		

Credit card processing	572	586	(2.39)	%
Intangibles amortization	271	271		
Net costs of other real estate owned	48	134	(64.18)	%
Franchise taxes	162	242	(33.06)	%
Other operating expenses	804	734	9.54	%

Total noninterest expense declined \$373 or 6.13% when the first quarter of 2012 is compared to the same period of 2011. The most significant contributing factor was the decrease in FDIC assessment expense, which fell \$237 from the first quarter of 2011. Prior to the third quarter of 2011, the FDIC assessment was based on the level of deposits. The FDIC implemented a new formula in the fourth quarter of 2011 that uses assets as the assessment base. The new formula resulted in decreased expense for the Company.

Salary and benefits expense was \$2,956 for the three months ended March 31, 2012, an increase of 1.79% from \$2,904 for the three months ended March 31, 2011. No material items effected the increase.

Occupancy, furniture and fixtures expense declined 6.15%, from \$423 for the three months ended March 31, 2011 to \$397 as of March 31, 2012. The decline is a result of general cost control measures with no significant decreases in any one factor.

Data processing and ATM expense for the three months ended March 31, 2012 decreased \$52 from the three months ended March 31, 2011. The first three months of 2011 contained higher data processing expense associated with increased costs for communications because of infrastructure upgrades.

Credit card processing expense declined by 2.39% from the total for the three months ended March 31, 2011. This expense is driven by volume and other factors such as merchant discount rates and is subject to a degree of variability. The expense for intangibles amortization is related to acquisitions. There were no acquisitions in the past year, with no change in expense between the three month periods ended March 31, 2012 and March 31, 2011.

Net costs of other real estate owned decreased \$86 or 64.18% from the three months ended March 31, 2011 to \$48 for the three months ended March 31, 2012. This expense category includes maintenance costs as well as valuation write-downs and gains and losses on the sale of properties. The expense varies with the number of properties, the maintenance required and changes in the real estate market.

Bank franchise taxes have declined 33.06%, from \$242 at March 31, 2011 to \$162 for the three months ended 2012. Bank franchise taxes are calculated based on equity. The expense for 2012 was reduced by additional deductions.

The category of other operating expenses includes noninterest expense items such as professional services, stationery and supplies, telephone costs, postage and charitable donations. Other operating expenses for the three months ended March 31, 2012 increased \$70 or 9.54% when compared with the same period in 2011. The increase is due to normal fluctuations.

Balance Sheet

Year-to-date daily averages for the major balance sheet categories are as follows:

Assets	I	March 31, 2012	De	ecember 31, 2011	Percent Change	
Interest-bearing deposits	\$	110,901	\$	64,977	70.68	%
Securities available for sale		175,232		186,296	(5.94	)%
Securities held to maturity		140,743		134,612	4.55	%
Loans, net		575,583		580,037	(0.77	)%
Total assets		1,068,848		1,031,899	3.58	%
Liabilities and stockholders' equity						
Noninterest-bearing demand deposits	\$	137,583	\$	135,880	1.25	%
Interest-bearing demand deposits		408,262		378,971	7.73	%
Savings deposits		62,602		58,273	7.43	%
Time deposits		309,940		314,920	(1.58	)%
Stockholders' equity		143,603		136,794	4.98	%

## Securities

Management regularly monitors the quality of the securities portfolio, and management closely follows the uncertainty in the economy and the volatility of financial markets. The value of individual securities will be written down if the decline in fair value is considered to be other than temporary based upon the totality of circumstances. See Note 4 Securities for additional information.

#### Loans

	N	March 31, 2012	De	ecember 31, 2011	Percent Change	
Real estate construction loans	\$	48,266	\$	48,528	(0.54	) %
Consumer real estate loans		147,312		149,750	(1.63	) %
Commercial real estate loans		301,911		303,192	(0.42	) %
Commercial non real estate loans		39,998		38,849	2.96	%
Public sector and IDA		15,263		15,407	(0.93	) %
Consumer non real estate		31,814		32,744	(2.84	) %
Loans net of unearned income	\$	584,564	\$	588,470	(0.66	) %

The Company's loans net of unearned income decreased by \$3,906 or 0.66%, from \$588,470 at December 31, 2011 to \$584,564 at March 31, 2012. Growth in commercial non real estate loans was offset by small declines in all other categories. Commercial non real estate loans increased 2.96% or \$1,149 from December 31, 2011 to March 31, 2012. The 2.84% decline in consumer non real estate loans continues a trend that has been evident over the past several years. The availability of low cost dealer auto loans and other products, such as home equity lines of credit, make traditional consumer installment loans less attractive to customers.

Real estate construction loans and commercial real estate loans at March 31, 2012 remained at similar levels as those at December 31, 2011 while consumer real estate loans declined \$2,438 or 1.63% and public sector and IDA loans declined 0.93%. The declines are due to market, economic and competitive forces and are not the result of changes in lending policies.

The Company does not now, nor has it ever, offered certain types of higher-risk loans such as subprime loans, option ARM products or loans with initial teaser rates.

#### **Deposits**

	ľ	March 31, 2012	De	ecember 31, 2011	Percent Change	
Noninterest-bearing demand deposits	\$	145,070	\$	142,163	2.04	%
Interest-bearing demand deposits		415,352		404,801	2.61	%
Saving deposits		65,322		61,298	6.56	%
Time deposits		306,048		311,071	(1.61	) %
Total deposits	\$	931,792	\$	919,333	1.36	%

Total deposits increased \$12,459, or 1.36% from \$919,333 at December 31, 2011 to \$931,792 at March 31, 2012. Increases in all deposit categories other than time deposits totaled \$17,482, or 2.87%. These increases were offset by a decline in time deposits of \$5,023, or 1.61%, when March 31, 2012 is compared with December 31, 2011. Historically low rates have caused a migration from time deposits to other types of deposits. As longer-term certificates of deposit mature, customers are unwilling to commit their funds for extended periods at low interest rates. Time deposits do not include any brokered deposits.

#### Liquidity

Liquidity measures the Company's ability to meet its financial commitments at a reasonable cost. Demands on the Company's liquidity include funding additional loan demand and accepting withdrawals of existing deposits. The

Company has diverse sources of liquidity, including customer and purchased deposits, customer repayments of loan principal and interest, sales, calls and maturities of securities, Federal Reserve discount window borrowing, short-term borrowing, and Federal Home Loan Bank ("FHLB") advances. At March 31, 2012, the bank did not have purchased deposits, discount window borrowings, short-term borrowings, or FHLB advances. To assure that short-term borrowing is readily available, the Company tests accessibility annually.

Liquidity from securities is restricted by accounting and business considerations. The securities portfolio is segregated into available-for-sale and held-to-maturity. The Company considers only securities designated available-for-sale for typical liquidity needs. Further, portions of the securities portfolio are pledged to meet state requirements for public funds deposits. Discount window borrowings also require pledged securities. Increased or decreased liquidity from public funds deposits or discount window borrowings results in increased or decreased liquidity from pledging requirements. The Company monitors public funds pledging requirements and the amount of unpledged available-for-sale securities that are accessible for liquidity needs.

Regulatory capital levels determine the Company's ability to utilize purchased deposits and the Federal Reserve discount window for liquidity needs. At March 31, 2012, the Company is considered well capitalized and does not have any restrictions on purchased deposits or the Federal Reserve discount window.

The Company monitors factors that may increase its liquidity needs. Some of these factors include deposit trends, large depositor activity, maturing deposit promotions, interest rate sensitivity, maturity and repricing timing gaps between assets and liabilities, the level of unfunded loan commitments and loan growth. At March 31, 2012, the Company's liquidity is sufficient to meet projected trends in these areas.

To monitor and estimate liquidity levels, the Company performs stress testing under varying assumptions on credit sensitive liabilities. It also tests the sources and amounts of balance sheet and external liquidity available to replace outflows. The Company's Contingency Funding Plan sets forth avenues for rectifying liquidity shortfalls. At March 31, 2012, the analysis indicated adequate liquidity under the tested scenarios.

The Company utilizes several other strategies to maintain sufficient liquidity. Loan and deposit growth are managed to keep the loan to deposit ratio within the Company's own policy range of 65% to 75%. At March 31, 2012, the loan to deposit ratio was 62.74%, slightly below the Company's internal target. The investment strategy takes into consideration the term of the investment, and securities in the available for sale portfolio are laddered to account for projected funding needs.

## Capital Resources

Total stockholders' equity at March 31, 2012 was \$144,792, an increase of \$3,493, or 2.47%, from the \$141,299 at December 31, 2011. The Tier I and Tier II risk-based capital ratios at March 31, 2012 were 20.50% and 21.71%, respectively. Capital levels remain significantly above the regulatory minimum capital requirements of 4.0% for Tier I and 8.0% for Tier II capital.

#### **Off-Balance Sheet Arrangements**

In the normal course of business, NBB extends lines of credit and letters of credit to its customers. Depending on their needs, customers may draw upon lines of credit at any time, in any amount up to a pre-approved limit. Standby letters of credit are issued for two purposes. Financial letters of credit guarantee payments to facilitate customer purchases. Performance letters of credit guarantee payment if the customer fails to complete a specific obligation. Historically, the full approved amount of letters and lines of credit has not been drawn at any one time. The Company has developed plans to meet a sudden and substantial funding demand. These plans include accessing a line of credit with a correspondent bank, borrowing from the FHLB, selling available for sale investments or loans and raising additional deposits.

The Company sells mortgages on the secondary market for which there are recourse agreements should the borrower default. Mortgages must meet strict underwriting and documentation requirements for the sale to be completed. The Company has determined that its risk in this area is not significant because of a low volume of secondary market mortgage loans and high underwriting standards. The Company estimates a potential loss reserve for recourse provisions that is not material as of March 31, 2012. To date, no recourse provisions have been invoked. If funds were needed, the Company would access the same sources as noted above for funding lines and letters of credit.

There were no material changes in off-balance sheet arrangements during the three months ended March 31, 2012.

There were no material changes in off-balance sheet arrangements during the three months ended March 31, 2012, except for normal seasonal fluctuations in the total of mortgage loan commitments.

## **Contractual Obligations**

The Company had no capital lease or purchase obligations and no long-term debt at March 31, 2012. Operating lease obligations, which are for buildings used in the Company's day-to-day operations, were not material at the end of the three months of 2012 and have not changed materially from those which were disclosed in the Company's 2011 Form 10-K.

## Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company considers interest rate risk to be a significant market risk and has systems in place to measure the exposure of net interest income to adverse movement in interest rates. Interest rate shock analyses provide management with an indication of potential economic loss due to future rate changes. There have not been any changes which would significantly alter the results disclosed as of December 31, 2011 in the Company's 2011 Form 10-K.

#### Item 4. Controls and Procedures

The Company's management evaluated, with the participation of the Company's principal executive officer and principal financial officer, the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based on that evaluation, the Company's principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective as of March 31, 2012 to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Company's principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the three months ended March 31, 2012 that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Because of the inherent limitations in all control systems, the Company believes that no system of controls, no matter how well designed and operated, can provide absolute assurance that all control issues have been detected.

# Part II Other Information

## Item 1. Legal Proceedings

There are no pending or threatened legal proceedings to which the Company or any of its subsidiaries is a party or to which the property of the Company or any of its subsidiaries is subject that, in the opinion of management, may materially impact the financial condition of the Company.

ItemRisk Factors

1A.

Please refer to the "Risk Factors" previously disclosed in Item 1A of our 2011 Annual Report on Form 10-K and the factors discussed under "Cautionary Statement Regarding Forward-Looking Statements" in Part I. Item 2 of this Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company did not repurchase stock during the first three months of 2012.

Item 3. Defaults Upon Senior Securities

There were no defaults upon senior secuirites for the three months ended March 31, 2012.

Item Mine Safety Disclosures

4.

Not applicable.

Item 5. Other Information

Subsequent Events

From March 31, 2012, the balance sheet date of this Form 10-Q, through the date of filing the Form 10-Q with the Securities and Exchange Commission, there have been no material subsequent events that 1) provide additional evidence about conditions that existed on the date of the balance sheet, or 2) provide evidence about conditions that did not exist at the date of the balance sheet, but arose after the balance sheet date.

Item 6. Exhibits

#### **CERTIFICATIONS**

- I, James G. Rakes, certify that:
- 1. I have reviewed this quarterly report on Form 10-Q of National Bankshares, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a–15(e) and 15d–15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a–15(f) and 15d–15(f)) for the registrant and have:
- (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
- (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
- (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
