These forward-looking statements include statements about our intention to invest in properties that we believe will increase in income and value; our belief that the real estate markets in which we invest will continue to perform well; our belief that we have the liquidity and capital resources necessary to meet our known obligations and to make additional real estate acquisitions and capital improvements when appropriate to enhance long-term growth; and other statements preceded by, followed by or otherwise including words such as “believe,” “expect,” “intend,” “project,” “anticipate,” “potential,” “may,” “designed,” “estimate,” “should,” “continue” and other similar expressions. These statements indicate that we have used assumptions that are subject to a number of risks and uncertainties that could cause our actual results or performance to differ materially from those projected.

Although we believe that the expectations reflected in forward-looking statements are based on reasonable assumptions, you should not place undue reliance on our forward-looking statements because the matters they describe are subject to known and unknown risks, uncertainties and other unpredictable factors, many of which are beyond our control. Important factors that could cause our actual results to differ materially from the expectations reflected in our forward-looking statements are discussed in “Risk Factors” on page S-14 of this prospectus supplement and page 8 of the accompanying prospectus and include:

- the economic health of the markets in which we own and operate multi-family and commercial properties, in particular, the states of Minnesota and North Dakota, or other markets in which we may invest in the future;
 - the economic health of our commercial tenants;
- market rental conditions, including occupancy levels and rental rates, for multi-family residential and commercial properties;
- our ability to identify and secure additional multi-family residential and commercial properties that meet our criteria for investment;
- the level and volatility of prevailing market interest rates and the pricing of our shares of beneficial interest;
 - financing risks, such as our inability to obtain debt or equity financing on favorable terms, or at all;
 - our ability to timely complete and lease-up properties under construction;
- compliance with applicable laws, including those concerning the environment and access by persons with disabilities;
 - the availability and cost of casualty insurance for losses; and
- other factors discussed under the heading “Risk Factors” in this prospectus supplement and the accompanying prospectus, in our Annual Report on Form 10-K for the fiscal year ended April 30, 2008, in our Quarterly Report on Form 10-Q for the three months ended January 31, 2009 and other documents filed with the Securities and Exchange Commission, or SEC, and incorporated by reference into this prospectus supplement.

In light of these uncertainties, the events anticipated by our forward-looking statements might not occur and we caution you not to place undue reliance on any of our forward-looking statements. We undertake no obligation to update or revise our forward-looking statements, whether as a result of new information, future events or otherwise, and those statements speak only as of the date made. The foregoing review of factors that could cause our actual results to differ materially from those contemplated in any forward-looking statements should not be construed as exhaustive.

Our Company

We are a self-advised real estate investment trust, or REIT, that owns and operates commercial office, medical, industrial and retail properties and multi-family residential properties located primarily in the upper Midwest. The charts below show, as of January 31, 2009, the geographic distribution of our properties and their classification by type, in both cases measured on the basis of our investment in our properties (original investment plus improvements, if any).

(percentage by state, by investment amount,

Classification of Properties by Type
Real Estate Portfolio Mix

(percentage by segment, by investment
amount, net of accumulated depreciation)

As of January 31, 2009, our real estate portfolio consisted of:

- 78 multi-family residential properties, containing 9,645 apartment units and having a total real estate investment amount net of accumulated depreciation of \$426.8 million; and
 - 166 commercial properties, containing approximately 11.7 million square feet of leasable space, as follows:
 - o 66 office properties containing approximately 5.0 million square feet of leasable space and having a total real estate investment amount net of accumulated depreciation of \$500.7 million;
 - o 49 medical properties (including senior housing/assisted living facilities) containing approximately 2.3 million square feet of leasable space and having a total real estate investment amount net of accumulated depreciation of \$345.8 million;
 - o 18 industrial properties containing approximately 2.9 million square feet of leasable space and having a total real estate investment amount net of accumulated depreciation of \$94.3 million; and
 - o 33 retail properties containing approximately 1.5 million square feet of leasable space and having a total real estate investment amount net of accumulated depreciation of \$100.6 million.

Our commercial properties are typically leased to tenants under long-term lease arrangements, with no single tenant accounting for more than approximately 10.6% of our total annualized commercial rental revenues as of January 31, 2009. At January 31, 2009, the economic occupancy rates for our stabilized properties were as follows:

| Property Type | Economic Occupancy |
|--------------------------|--------------------|
| Multi-family Residential | 94.5% |
| Commercial Office | 88.6% |
| Commercial Medical | 95.5% |
| Commercial Industrial | 98.9% |
| Commercial Retail | 87.4% |

Economic occupancy represents actual rental revenues recognized for the period indicated as a percentage of scheduled rental revenues for the period. Percentage rents, tenant concessions, straightline adjustments and expense reimbursements are not considered in computing either actual revenues or scheduled revenues.

Our principal executive office is located at 3015 16th Street SW, Suite 100, Minot, North Dakota, 58702-1988, and our telephone number is (701) 837-4738.

Investment Strategy

We seek to employ a disciplined investment strategy focused on growing assets in our target geographical markets, achieving diversification by property type, adhering to targeted returns in acquiring properties, and regularly increasing funds from operations. We believe this investment strategy has enabled us to achieve our goal of regularly increasing distributions on our common shares. We have increased our distributions per common share every year since our inception 38 years ago and every quarter since 1988.

We attempt to concentrate our multi-family residential properties in communities with populations of approximately 50,000 to 500,000, and we attempt to concentrate our commercial properties in metropolitan areas with populations of approximately 100,000 to 3.0 million. We focus most of our investment activity in markets in the upper Midwest, due to our greater familiarity with these markets, our existing market presence and our belief that these markets attract less competition from other leading REITs and institutional investors.

We continually receive, evaluate and identify opportunities for the acquisition and development of commercial and multi-family residential properties, particularly in the states in which we currently own properties. These investment and development opportunities are sourced through various channels, including real estate brokers, property owners, property management firms and our own business development efforts. In evaluating commercial properties for acquisition, we consider such factors as market size, economic and market rental conditions, property type, property quality, existing occupancy and lease rates, tenant makeup and quality, lease rollover risk and current and prospective cash flow levels. In evaluating multi-family residential properties for acquisition, we consider such factors as market size and growth characteristics, demographics, apartment rental conditions and trends, market rent and occupancy levels, property quality, operating expense and maintenance considerations, property occupancy rates and current and prospective cash flow levels. Upon identifying properties that meet our investment criteria, we conduct financial analyses, perform property inspections, identify lending sources and terms and submit or negotiate acquisition proposals on terms that we expect will allow us, under reasonable assumptions, to meet our targeted investment returns. In evaluating multi-family residential and commercial development opportunities, we consider factors that include property site location, access, soil conditions and other physical characteristics of the site, market size and growth characteristics, demographics, existing property development adjacent or near the site, prospective tenants and

cash flow levels.

Typically, we seek to acquire well-maintained properties with strong tenant bases and lease or rental revenues and terms that immediately support our return on investment objectives. Due to varying market conditions over time, this investment focus can lead to a greater concentration of acquisition activity in certain property types during particular market cycles. For instance, during the 12 months ended January 31, 2009, approximately 83.7% of our property acquisitions, based on investment amount, were commercial medical properties, due to the greater availability of these properties on terms that met our return on investment objectives. As market conditions evolve, however, this trend may be reversed and we may again purchase a greater percentage of multi-family residential properties, or other commercial properties. We typically seek to develop commercial properties when we have identified or secured an anchor tenant for the property. We typically seek to develop multi-family residential properties when we have identified a community with attractive economic and market rental conditions.

S-5

We generally use available cash or short-term floating rate debt to acquire real estate. We then replace the cash or short-term floating rate debt with fixed-rate secured debt. We generally finance development projects with available cash or short-term floating rate debt and re-finance with fixed-rate secured debt. In appropriate circumstances, we also may acquire one or more properties in exchange for our common shares or for limited partnership units, or LP units, of our operating partnership, IRET Properties, which typically are redeemable for our common shares on a one-to-one basis or, at our option, cash, after the expiration of a minimum one-year holding period.

Operations

We conduct our operations from offices in Minot, North Dakota and Minneapolis, Minnesota. We also have property management offices in St. Louis, Missouri, Omaha, Nebraska and Kansas City, Kansas. In Minot, our 46-person staff is engaged in activities that include management and planning, financial analysis and accounting, marketing, property sourcing and evaluation, legal and compliance, information management and investor relations. In Minneapolis, our 18-person staff is primarily engaged in sourcing, evaluating and managing commercial properties in the Minneapolis/St. Paul metropolitan area.

The day-to-day management of our commercial properties is carried out by our own employees and by third-party property management companies. In markets where the amount of rentable square footage we own does not justify self-management, when properties acquired have effective pre-existing property management in place, or when for other reasons particular properties are in our judgment not attractive candidates for self-management, we may utilize third-party professional management companies for day-to-day management. As of January 31, 2009, we have under internal management 96 commercial properties. The remaining 70 properties are managed by third parties. The management and leasing of most of our multi-family residential properties is handled by locally-based, third-party management companies.

We believe that our administrative, property management and corporate overhead expenses as a percentage of our revenues are among the lowest of all publicly-traded REITs. We believe that this serves the interests of the holders of our common shares by moderating the impact of cyclical downturns and enhancing funds available for distribution.

Properties

The tables set forth below present summary financial information regarding our commercial and multi-family residential properties.
