Dear Shareholder

Despite a number of headwinds, risk assets generated strong returns during the 6- and 12-month periods as investors sought meaningful yields in the ongoing low-interest-rate environment. About this time one year ago, the European debt crisis returned to the headlines as unresolved policy decisions left it unclear as to how troubled peripheral countries would finance their sovereign debt, causing yields to soar. In the second quarter of 2012, political instability in Greece and severe deficit and liquidity problems in Spain raised the specter of a full-blown euro collapse. Alongside the drama in Europe, investors were discouraged by gloomy economic reports from various parts of the world. A slowdown in China, a key powerhouse for global growth, emerged as a particular concern. As the outlook for the global economy worsened, however, investors grew increasingly optimistic that the world s largest central banks would soon intervene to stimulate growth. This theme, along with the announcement of the European Central Bank s (ECB s) firm commitment to preserve the euro currency bloc, drove most asset classes higher through the summer. Policy relief came in early September, when the ECB announced its decision to support the eurozone s debt-laden countries with unlimited purchases of short term sovereign debt. Days later, the US Federal Reserve announced its own much-anticipated stimulus package.

Although financial markets world-wide were buoyed by accommodative monetary policies, risk assets weakened in the fall. Global trade began to slow as many European countries fell into recession and growth continued to decelerate in China, where a once-a-decade leadership change compounded uncertainty. In the United States, stocks slid on lackluster corporate earnings reports and market volatility rose in advance of the US Presidential election. In the post-election environment, investors grew increasingly concerned over the fiscal cliff, the automatic tax increases and spending cuts that had been scheduled to take effect at the beginning of 2013. There was widespread fear that the fiscal cliff would push the United States into recession unless politicians could agree upon alternate measures to reduce the deficit before the end of 2012. Worries that bipartisan gridlock would preclude a timely budget deal triggered higher levels of volatility in financial markets around the world in the months leading up to the last day of the year. Ultimately, the worst of the fiscal cliff was averted with a last-minute tax deal; however, decisions relating to spending cuts and the debt ceiling continued to weigh on investors minds.

Investors shook off the nerve-wracking finale to 2012 and began the New Year with a powerful equity rally. Money that had been pulled to the sidelines amid year-end tax-rate uncertainty poured back into the markets in January. Key indicators signaled modest but broad-based improvements in the world s major economies, particularly in China. Global equities soared through January while rising US Treasury yields pressured high-quality fixed income assets. However, bond markets strengthened in February when economic momentum slowed and investors toned down their risk appetite. US stocks continued to rise, but at a more moderate pace. Uncertainty about how long the Federal Reserve would maintain its easing bias drove high levels of volatility later in the month, but these fears abated as the budget sequester (automatic spending cuts scheduled to take effect March 1) began to appear imminent and was deemed likely to deter any near-term curtailment of monetary easing policies. Outside the United States, equities largely declined as political uncertainty escalated after the Italian presidential election ended in a stalemate.

On the whole, riskier asset classes outperformed lower-risk investments for the 6- and 12-month periods ended February 28, 2013. International, US small cap and emerging market equities were the leading asset classes for the 6-month period, while US stocks and high yield bonds generated the strongest returns for the 12-month period. US Treasury yields remained relatively low overall, but have inched higher in recent months, pressuring Treasuries and investment-grade bonds. Tax-exempt municipal bonds, however, continued to benefit from favorable supply-and-demand dynamics. Near-zero short term interest rates continued to keep yields on money market securities near their all-time lows.

Investors continue to face many of the same risks as in years past. But we see a world of possibilities. BlackRock was built to provide the global market insight, breadth of capabilities, unbiased investment advice and deep risk management expertise these times require. Investors everywhere are asking, *So what do I do with my money?* Visit **www.blackrock.com** for answers.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC

Despite a number of headwinds, risk assets generated strong returns during the 6- and 12-month periods as investors sought meaningful yields in the ongoing low-interest-rate environment. **Rob Kapito** President, BlackRock Advisors, LLC

Fund Summary as of February 28, 2013 **Fund Overview**

BlackRock Defined Opportunity Credit Trust

BlackRock Defined Opportunity Credit Trust s (BHL) (the Fund) primary investment objective is to provide high current income, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing substantially all of its assets in loan and debt instruments and loan-related and debt-related instruments (collectively credit securities). The Fund invests, under normal market conditions, at least 80% of its assets in any combination of the following credit securities: (i) senior secured floating rate and fixed rate loans; (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans; (ii) negatives that are rated below investment grade quality; and (iv) investment grade corporate bonds. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended February 28, 2013, the Fund returned 9.13% based on market price and 5.55% based on net asset value (NAV). For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 10.24% based on market price and 6.30% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period-end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Security selection among higher quality loan instruments (where the Fund maintained a quality bias) had a positive impact on performance. From an industry perspective, holdings within healthcare, chemicals and gaming boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed floating rate loan interests (bank loans) during the period.

Conversely, security selection in the media non-cable and automotive industries detracted from results. **Describe recent portfolio activity.**

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. Given mixed economic data and a tepid outlook for global growth, along with lingering global policy uncertainty, the Fund remained cautious of lower-rated less-liquid loans. Instead, the Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. Monetary stimulus measures from global central banks largely supported risk asset prices in 2012; however, this development did not significantly influence the way the Fund invests in the loan market. More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macro risks. With the average loan trading at or just below par recently (i.e., with little or no upside), the Fund s principal emphasis is on investing in strong companies with the ability to pay their debts despite a slow growth environment. **Describe portfolio positioning at period end**.

At period end, the Fund held 90% of its total portfolio in floating rate loan interests and 7% in corporate bonds, with the remainder in asset-backed securities. The Fund s largest industry exposures included healthcare, consumer services (housing-related) and wirelines.

Fund Summary as of February 28, 2013 **Fund Overview**

BlackRock Floating Rate Income Strategies Fund, Inc.

BlackRock Floating Rate Income Strategies Fund, Inc. s (FRA) (the Fund) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

On October 5, 2012, the Fund acquired substantially all of the assets and assumed substantially all of the liabilities of BlackRock Diversified Income Strategies Fund, Inc. and BlackRock Floating Rate Income Strategies Fund II, Inc. in exchange for newly issued shares of the Fund. **How did the Fund perform?**

For the six months ended February 28, 2013, the Fund returned 12.50% based on market price and 6.53% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 10.24% based on market price and 6.30% based on NAV. All returns reflect reinvestment of dividends. The Fund s premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Security selection among higher quality loan instruments (where the Fund maintained a quality bias) had a positive impact on performance, as did the Fund s high-conviction holdings of lower quality loan credits. From an industry perspective, holdings within paper, chemicals and gaming boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed floating rate loan interests (bank loans) during the period.

Conversely, security selection in the media non-cable, independent energy and automotive industries detracted from results.

Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. Given mixed economic data and a tepid outlook for global growth, along with lingering global policy uncertainty, the Fund remained cautious of lower-rated less-liquid loans. Instead, the Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. Monetary stimulus measures from global central banks largely supported risk asset prices in 2012; however, this development did not significantly influence the way the Fund invests in the loan market. More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macro risks. With the average loan trading at or just below par recently (i.e., with little or no upside), the Fund s principal emphasis is on investing in strong companies with the ability to pay their debts despite a slow growth environment. **Describe portfolio positioning at period end**.

At period end, the Fund held 88% of its total portfolio in floating rate loan interests and 8% in corporate bonds, with the remainder in asset-backed securities and common stocks. The Fund s largest industry exposures included healthcare, building materials and wirelines.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Fund Summary as of February 28, 2013 **Fund Overview**

BlackRock Limited Duration Income Trust

BlackRock Limited Duration Income Trust s (BLW) (the Fund) investment objective is to provide current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in three distinct asset classes:

intermediate duration, investment grade corporate bonds, mortgage-related securities, asset-backed securities and US Government and agency securities:

senior, secured floating rate loans made to corporate and other business entities; and

US dollar-denominated securities of US and non-US issuers rated below investment grade and, to a limited extent, non-US dollar denominated securities of non-US issuers rated below investment grade.

The Fund s portfolio normally has an average portfolio duration of less than five years (including the effect of anticipated leverage), although it may be longer from time to time depending on market conditions. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six-month period ended February 28, 2013, the Fund returned 9.10% based on market price and 7.17% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 4.30% based on market price and 8.66% based on NAV. All returns reflect reinvestment of dividends. The Fund s premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

> Spread sectors outperformed government-related debt for the six-month period as accommodative monetary policy in the United States and Europe along with the continued recovery of the US economy drove credit spreads tighter. The Fund s allocations to high yield bonds and floating rate loan interests (bank loans) were the largest contributors to performance, followed by its positions in non-US sovereign securities. The Fund also benefited from its exposure to structured products including commercial mortgage-backed securities (CMBS), asset-backed securities (ABS) and non-agency residential mortgage-backed securities (MBS). An allocation to investment grade credit also had a positive impact.

The Fund s duration profile (sensitivity to interest rate movements) detracted from performance as interest rates moved higher during the period.

Describe recent portfolio activity.

During the six-month period, the Fund maintained a positive view on spread sectors and increased exposure to high yield credit, floating rate loan interests and securitized products such as CMBS and ABS. Within investment grade credit, the Fund favored financials over industrials and utilities. In financials, the Fund rotated out of senior bank debt into subordinated bank debt to take advantage of the yield differential. In addition, the Fund added to positions in floating rate preferred securities to benefit from a potential rise in interest rates. Describe portfolio positioning at period end.

At period end, the Fund held 46% in corporate bonds and 34% of its total portfolio in floating rate loan interests (bank loans). The remainder of the portfolio was invested in MBS, structured products (including CMBS and ABS). US government sponsored agency securities and common stocks.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage through a credit facility or by entering into reverse repurchase agreements. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Fund s long-term investments, and therefore the Fund s shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Fund pays higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds debt securities does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds NAVs positively or negatively in addition to the impact on Fund performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Fund to incur losses. The use of leverage may limit each Fund s ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Funds are permitted to issue senior securities representing indebtedness up to 33¹/3% of their total managed assets (each Fund s net assets plus the proceeds of any outstanding borrowings). If the Funds segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Fund voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of February 28, 2013, the Funds had aggregate economic leverage from reverse repurchase agreements and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

Percent of Economic Leverage

BHL FRA BLW

27% 27% 32%

Derivative Financial Instruments

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements. Report of Independent Registered Public Accounting Firm

Schedule of Investments February 28, 2013 (Unaudited)

¹Using S&P s rating of the issuer.

²The maximum potential amount the Fund may pay should a negative event take place as defined under the terms of agreement.

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to the Fund's most recent financial statements as contained in its semi-annual report.

See Notes to Financial Statements.

Schedule of Investments (continued) BlackRock Defined Opportunity Credit Trust (BHL)

The following tables summarize the Fund s investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

| | Level 1 | Level 2 | Level 3 | Total |
|--|-------------|---------------|--------------|---------------|
| Assets: | | | | |
| Investments: | | | | |
| Long-Term | | | | |
| Investments: | | | | |
| Asset-Backed Securities | | | \$ 5,105,830 | \$ 5,105,830 |
| Common Stocks | | \$ 700,836 | φ 3,103,000 | 700,836 |
| Corporate Bonds | | 12,915,870 | | 12,915,870 |
| Floating Rate Loan | | | | |
| Interests | ¢ 4 075 000 | 163,277,715 | 13,767,786 | 177,045,501 |

| Foreign currency exchange contracts | 9 | 156,55 | 57 | 156,557 |
| Liabilities: | | 100,00 | | 100,007 |
| Credit contracts | | (68 | 32) | (682) |
| Total | | \$ 222,77 | 76 | \$ 222,776 |

¹Derivative financial instruments are swaps and foreign currency exchange contracts. Swaps and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument.

Certain of the Fund s assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of February 28, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

| | Level 1 | Level 2 | Level 3 | Total |
|--|------------|---|---------|--|
| Assets: Foreign currency at value Liabilities: | \$ 141,316 | | | \$ 141,316 |
| Bank overdraft Loans payable Total | \$ 141,316 | \$ (313,625) (48,000,000) \$ (48,313,625) | | (313,625) (48,000,000) \$ (48,172,309) |

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2013.

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

| | Asset-Backed Securities | Floating Rate Loan Interests | Total |
|--|---|---|---|

As of August 31, 2012, the Fund used observable inputs in determining the value of certain investments. As of ²February 28, 2013, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$3,112,046 transferred from Level 2 to Level 3 in the disclosure hierarchy.

³ As of August 31, 2012, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$2,977,415 transferred from Level 3 to Level 2 in the disclosure hierarchy.

⁴ Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$503,059. See Notes to Financial Statements.

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Schedule of Investments (concluded)

BlackRock Defined Opportunity Credit Trust (BHL)

The following table summarizes the valuation techniques used and unobservable inputs developed by the BlackRock Global Valuation Methodologies Committee (Global Valuation Committee) to determine the value of certain of the Fund's Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$16,811,868.

Notes to Schedule of Investments

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) When-issued security. Unsettled when-issued transactions were as follows:

| Counterparty | Value | |
|--------------------------------|-----------|----------|
| Bank of America Securities LLC | \$176,356 | \$ 3,670 |
| Citigroup Global Markets, Inc. | \$663,434 | \$13,806 |
| Deutsche Bank Securities, Inc | \$486,750 | \$97 |

- (d) Non-income producing security.
- (e) Convertible security.
- (f) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (g) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (h) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (i) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (j) Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date of the warrants, if any.
- (k) Investments in issuers considered to be an affiliate of the Fund during the six months ended February 28, 2013, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

| | Shares | | Shares | |
|-----------|------------|----------|--------------|--------|
| | Held at | | Held at | |
| | August 31, | Net | February 28, | |
| Affiliate | 2012 | Activity | 2013 | Income |

¹Using S&P s rating of the issuer.

²The maximum potential amount the Fund may pay should a negative credit event take place as defined under the ²terms of the agreement.

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for consolidated financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Consolidated Financial Statements.

Consolidated Schedule of Investments (continued)

The following tables summarize the Fund s investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

| | Level 1 | Level 2 | Level 3 | Total |
|--|---------------|-------------------------------|--|--|
| Assets: Investments: Long-Term Investments | | | | |
| Asset-Backed Securities Common Stocks Corporate Bonds | \$ 1,896,270 | \$ 2,287,861 64,338,072 | \$24,036,705 1,486,008 3,576,120 | \$ 24,036,705 5,670,139 67,914,192 |
| Floating Rate Loan Interests Other Interests Preferred Securities | 1,448,916 | 695,100,484 | 60,538,258 2,803,647 | 755,638,742 2,803,647 1,448,916 |

| Cash | \$ 1,844,191 | | \$ 1,844,191 |
| Foreign currency at | | | |
| value | 12,535 | | 12,535 |
| Cash pledged as | | | |
| collateral for swaps | 620,000 | | 620,000 |
| Liabilities: | | | |
| Loans payable | | \$ (208,000,000) | (208,000,000) |
| Total | \$ 2,476,726 | \$ (208,000,000) | \$(205,523,274) |

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2013. A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

| | Asset-Backed Securities | Common Stocks | Corporate Bonds | Floating Rate Loan Interests | Other Interests | Warrant | Total |
|-----------------------------|----------------------------|------------------|---------------------|---------------------------------|--------------------|---------|-------|
| lance, as of 2012 | \$ 7,043,642 | \$ 6,034 | \$ 2,355,204 | \$ 23,180,519 | \$ 835,765 | | \$ 3. |

| /depreciation ⁴ | 1,475,295 | (5,449,635) | (565,100) | 1,497,084 | (1,280,852) | \$9,279 | (4 |
| | 19,166,762 | 6,929,394 | 3,200,581 | 49,060,785 | 4,372,036 | 4 | 82 |
| | (3,966,110) | | (1,752,950) | (12,790,491) | (1,123,302) | | (19 |
| ance, as of | | | | | | | |
| 8, 2013 | \$24,036,705 | \$ 1,486,008 | \$ 3,576,120 | \$ 60,538,258 | \$ 2,803,647 | \$9,283 | \$ 92 |

As of August 31, 2012, the Fund used observable inputs in determining the value of certain investments. As of ²February 28, 2013, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$6,684,789 transferred from Level 2 to Level 3 in the disclosure hierarchy.

³As of August 31, 2012, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$6,481,544 transferred from Level 3 to Level 2 in the disclosure hierarchy.

⁴Included in the related net change in unrealized appreciation/depreciation in the Statement of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$(3,374,156). See Notes to Financial Statements.

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Consolidated Schedule of Investments (concluded) BlackRock Floating Rate Income Strategies Fund, Inc. (FRA)

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Fund s Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$77,534,994.

| | Value | Valuation Techniques | Unobservable Inputs ¹ | Range of Unobservable Inputs Utilized |
|------------------------------|-------------------------------------|--|--|--|
| Assets: | | | | |
| Common Stocks | \$1,486,000 | Market Comparable Companies | EBITDA Multiple | 5.25x 6.56x |
| Corporate Bonds | 2,666,040 | Market Comparable Companies | EBITDA Multiple | 5.25x |
| Floating Rate Loan Interests | 2,851,289 1,346,076 4,825,089 | Discounted Cash Flow Market Comparable Yield Analysis Cost ² | Yield Yield N/A | 9.50% 8.375% |
| Other Interests ³ | 1,731,250 | Discounted Cash Flow | Perpetuity Growth Rate Free Cash Flow Weighted Cost of Capital | 3.50% \$25.2 \$35.2 10.90% |
| Warrant | 9,283 | Market Comparable Companies | EBITDA Multiple | 5.25x |
| Total | \$14,915,027 | ' | · | |

¹A change to the unobservable input may result in a significant change to the value of the investment as follows:

| Unobservable Input | Impact to Value if Input Increases | Impact to Value if Input Decreases |
|--------------------------|---------------------------------------|---------------------------------------|
| EBITDA Multiple | Increase | Decrease |
| Free Cash Flow | Increase | Decrease |
| Perpetuity Growth Rate | Increase | Decrease |
| Weighted Cost of Capital | Decrease | Increase |
| Yield | Decrease | Increase |

²The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

companies are not identical to the investments being fair valued by the Fund.

³ For the six months ended February 28, 2013, the valuation technique for other interests changed from a market approach to an income approach. Market information previously utilized to determine fair value under the market approach no longer applied to this investment. Therefore, the income approach is considered to be a more relevant measure of fair value for this investment.

⁴ Amount is in millions.

See Notes to Financial Statements.
