Sidebar text: WE THINK THAT MUNICIPAL BOND INVESTMENTS LIKE YOUR NUVEEN FUND CAN BE IMPORTANT BUILDING BLOCKS IN A WELL-BALANCED PORTFOLIO.

Dear
SHAREHOLDER

I am very pleased to report that for the fiscal year ended May 31, 2004, your Nuveen Fund continued to provide you with attractive monthly tax-free income.

While tax-free income is always welcome, we know that many shareholders are beginning to wonder whether interest rates will rise significantly, and whether that possibility should cause them to adjust that portion of their investment portfolios allocated to tax-free municipal bonds. We believe this is a question you should consider carefully with the help of a trusted financial advisor. In many cases, it may be more appropriate to focus on long-term goals and objectives rather than shorter-term market movements, and this is where a professional advisor may be able to help keep you focused on the larger objectives of your investment program.

As you read through this report, please review the inside front cover and consider receiving future Fund reports and other Fund information by e-mail and the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

(NPG, NZX, NKG, NNC, NRB, NNO, NII)

Portfolio Managers'
COMMENTS

Portfolio managers Dan Solender and Cathryn Steeves review the market environment, key investment strategies and performance of these Nuveen Funds. Dan, who has 12 years of investment experience, including 8 years with Nuveen, assumed portfolio management responsibility for the Georgia (NPG, NZX, and NKG) and North Carolina (NNC, NRB, NNO, NII) Funds in November 2003. In February 2004, he turned over responsibility for the North Carolina Funds to Cathryn, who has been with Nuveen since 1996.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE 12-MONTH

REPORTING PERIOD ENDED MAY 31, 2004?

During this reporting period, the U.S. economy demonstrated growing evidence of improvement in such key areas as employment, capital spending and industrial production. Indeed, during the third quarter of last year, the U.S. gross domestic product grew at an annualized rate of 8.2%, more than double the second quarter's performance and the fastest annualized quarterly growth rate in nearly 20 years. Although this rapid pace was not considered sustainable, the economy continued to turn in steady performance for the rest of the 12-month reporting period, expanding by an annualized 4.1% in the fourth quarter of 2003 and an annualized 3.9% in the first three months of 2004.

Inflation also showed some signs of acceleration, driven mainly by higher energy and transportation costs, with the Consumer Price Index rising at a 5.1% rate (annualized) during the first five months of 2004. The combination of economic momentum and growing inflation concerns served as a catalyst for heightened volatility in the fixed-income markets. Although short-term interest rates remained at or near historical lows throughout this 12-month period, the long-term bond markets, including the municipal market, were increasingly driven by expectations that the Federal Reserve would move to increase interest rates and by speculation over the timing and extent of those increases. As one example, the yield on the Bond Buyer 25 Revenue Bond Index, a widely followed municipal bond index, rose from 4.83% at the beginning of the period to 5.50% by the middle of August 2003. The index yield then fell steadily over the next seven months to reach 4.73% by the middle of March 2004, before rising to 5.36% by the end of the reporting period.

In general, municipal supply nationwide remained strong over the 12-month reporting period, with \$384.8 billion in new bonds coming to market. This represented an increase of 2% over the preceding 12-month period. However, the pace of issuance slowed toward the end, with \$147.8 billion in new municipal supply during the first five months of 2004, down 6% from January-May 2003. In May 2004 alone, volume decreased 9% from one year earlier.

HOW ABOUT ECONOMIC AND MARKET CONDITIONS IN GEORGIA AND NORTH CAROLINA?

Despite the persistent decline in textile, paper and nondurable goods manufacturing in Georgia, the state's economy has begun to generate positive employment numbers, with improvements in the services sector, construction, and leisure and hospitality industries. Atlanta has reemerged as the primary growth driver for the state, while the expansion of Savannah's port facilities has triggered new investment there. As of May 2004, unemployment in Georgia was 3.9%, down from 4.8% a year earlier and well below the national average of 5.6%. During the 12-month reporting period ended May 2004, Georgia issued \$6.5 billion in new municipal bonds, an increase of 20% over the previous 12-month period. As of May 2004, Georgia's general obligation debt continued to be rated Aaa/AAA, with a stable outlook, by Moody's and Standard & Poor's, respectively.

2

North Carolina's economy began to emerge from recession in late 2003. The state's services sector continued to be a major growth driver, while healthcare, tourism and financial services also added jobs. North Carolina remained an important high-tech research center, which should continue to attract investment over the long term. Furniture, apparel and textile manufacturing--which have been hurt by increasing imports and the shift to overseas production--remained the primary drag on the state's economy and accounted for the loss of 100,000 jobs since 2000. As of May 2004, unemployment in North Carolina had declined to 5.3% from 6.5% in May 2003. During the recession, the state continued to rely on

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR/A

nonrecurring sources to fund expenditures, depleting its rainy day fund. Now in the early stages of recovery, North Carolina has been slowly restoring balance to its fiscal operations. State issuance of new municipal bonds for the 12 months ended May 2004 totaled \$7.0 billion, down 6% from the previous 12 months. As of May 31, 2004, the state maintained its Aa1/AAA ratings, with stable outlooks, from Moody's and Standard & Poor's, respectively.

IN THIS ENVIRONMENT, WHAT KEY STRATEGIES WERE USED TO MANAGE THE FUNDS DURING THE 12 MONTHS ENDED MAY 31, 2004?

As the market continued to anticipate rising interest rates, our major focus during this reporting period remained on trying to mitigate some of the interest rate risk inherent in each Fund's portfolio. Interest rate risk is the risk that the value of a Fund's portfolio will decline if market interest rates rise (since bond prices move in the opposite direction of interest rates). Since longer-term bonds often carry more interest rate risk than intermediate-term or short-term bonds, we concentrated on finding attractive securities with defensive structures in the long-intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years). In many cases, bonds in this part of the curve offered yields similar to those of longer-term bonds with less inherent interest rate risk and greater total return potential.

Finding attractive issues became harder as the period progressed and the pace of new issuance declined. We focused largely on buying AAA rated bonds because there was virtually no supply of lower-rated investment-grade securities. Also, the relatively low supply of BBB rated bonds in Georgia led to increases in their prices, which often made them less attractive.

In the North Carolina Funds, our overall goal was to reduce the Funds' exposure to bonds with longer maturities and lower coupons, which we believed would likely underperform the market in a rising interest rate environment. Among the issues we sold from NNC were insured Raleigh Durham Airport bonds maturing in 2031. From NRB we sold some University of North Carolina bonds maturing in 2028. Some of the proceeds from these sales were reinvested in North Carolina general obligation bonds and in Davidson County COPs.

For additional information, see the individual Performance Overview for your Fund in this report.

For the 12 months ended May 31, 2004, the total returns on net asset value (NAV) for all of the Funds in this report underperformed the return on the unleveraged Lehman Brothers Municipal Bond Index. NPG and NNC outperformed the Lipper Other States category average, and NRB performed roughly in line with this measure. NZX, NKG, NNO and NII underperformed the Lipper average.

- 1 The Lehman Brothers Municipal Bond Index is an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The Lipper Other States Municipal Debt Funds category average is calculated using the returns of all closed-end exchange-traded funds in this category for each period as follows: 1 year, (44 funds); 5 years, (19 funds); and 10 years, (17 funds). Fund and Lipper returns assume reinvestment of dividends.

One of the primary factors affecting the 12-month performances of each of these Funds' compared with that of the unleveraged Lehman index was the Funds' use of leverage. Leveraging can provide opportunities for additional income and total return for common shareholders, but it is a strategy that adds volatility to the Funds' NAVs and share prices, especially when interest rates move significantly. While each of these Funds was able to generate additional income over this period through its use of leverage, rising interest rates caused larger declines in each Fund's NAV than would have been the case had the Fund not used leverage. This had a direct and negative effect on total returns over this period. NKG and NII also had a relatively long leverage-adjusted durations (see the inside back cover for a definition). As bond yields rose and prices fell, especially late in the period, bonds and funds with longer durations generally tended to underperform.

Other holdings that generally had a negative impact on the Funds' performances during this period of rising yields included lower coupon bonds, with relatively long maturities, which tend to perform poorly in a down market, and insured bonds, which underperformed the market as a whole during this 12-month period. NKG, NZX, NNO and NII had larger holdings in these types of bonds.

On the positive side, the Funds' performances were helped by their positions of lower-rated bonds, which outperformed other credit quality sectors as the economy improved and investors' demand for lower rated bonds increased. NPG, for example, benefited from having approximately 3% of its portfolio in bonds rated BB+ issued by Effingham County for Georgia-Pacific, which contributed 65 basis points to the Fund's total return.

The Funds' holdings in the housing sector, especially multifamily housing, also generally made positive contributions to their total returns. Among these seven

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR/A

Funds, NPG had the heaviest weighting of multifamily housing bonds, at 15% of its portfolio. In addition, the returns of NPG, NZX, NKG and NII were helped over this period by their holdings of bonds backed by revenues from the 1998 master tobacco settlement agreement.

All of the North Carolina Funds also saw good performance from their holdings in the industrial development resource sector, which ranked first in terms of returns among the Lehman municipal revenue sectors during this period. These holdings in NRB included bonds issued by Columbus County for International Paper Company. NNO held bonds issued by North Carolina Municipal Power Agency/Catawba, and NII owned bonds issued by Martin County for Weyerhaeuser Company.

HOW ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates remaining at historically low levels during this reporting period, the leveraged structures of these seven Funds continued to support their dividend-paying capabilities. The extent of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. During periods of low short-term rates, the Funds generally pay relatively lower dividends to their MuniPreferred shareholders, which can leave more earnings to support common share dividends. During this reporting period, this strategy enabled us to implement two dividend increases in NNO and one increase in NPG, NZX, NNC and NRB, maintain the dividend levels of NKG and NII.

All of these Funds seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of May 31, 2004, NPG, NZX, NNC, NRB and NNO had positive UNII balances, while NKG and NII had negative UNII balances.

4

NPG, NNC and NRB were trading at premiums to their net asset values as of May 31, 2004. The other four Funds were trading at discounts. As of the end of the fiscal year, all seven Funds were trading at smaller premiums or greater discounts than their average premium or discount over the course of the 12-month period.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AS OF MAY 31, 2004?

Given the current geopolitical and economic climate, we continued to believe that maintaining strong credit quality was an important requirement. As of the end of May 2004, all seven of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 93% in NKG to 92% in NII, 85% in NRB, 84% in NNO, 83% in NPG and NZX, and 77% in NNC.

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR/A

Nuveen North Carolina Dividend Advantage Municipal Fund 3 (NII). Common shares of Georgia Premium Income (NPG), Georgia Dividend Advantage (NZX), Georgia Dividend Advantage 2 (NKG), North Carolina Dividend Advantage (NRB), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) are traded on the American Stock Exchange while Common shares of North Carolina Premium Income (NNC) is traded on the New York Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Georgia Dividend Advantage 2 (NKG) and North Carolina Dividend Advantage 3 (NII), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC, also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At May 31, 2004, North Carolina Premium Income (NNC), North Carolina Dividend Advantage 2 (NNO) and North Carolina Dividend Advantage 3 (NII) had outstanding delayed delivery purchase commitments of \$513,535, \$1,027,070 and \$513,535, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR/A

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended May 31, 2004, have been designated Exempt Interest Dividends.

40

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding for each Fund is as follows:

	GEORGIA PREMIUM INCOME (NPG)	GEORGIA DIVIDEND ADVANTAGE (NZX)	GEORGIA DIVIDEND ADVANTAGE 2 (NKG)	NORTH CAROLINA PREMIUM INCOME (NNC)	NORTH CAROLINA DIVIDEND ADVANTAGE (NRB)	NORTH CAROLINA DIVIDEND ADVANTAGE 2 (NNO)	ADVANTAGE 3 (NII)

Effective November 15, 2002, North Carolina Dividend Advantage 3 (NII) issued 1,120 Series W, \$25,000 stated value Preferred shares.

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended May 31, 2004.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all Common share offering costs (other than the sales load) that exceed \$.03 per Common share for Georgia Dividend Advantage 2 (NKG) and North Carolina Dividend Advantage 3 (NII). Georgia Dividend Advantage 2's (NKG) and North Carolina Dividend Advantage 3's (NII) share of Common share offering costs (\$136,200 and \$117,375, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by Georgia Dividend Advantage 2 (NKG) and North Carolina Dividend Advantage 3 (NII) in connection with their offering of Preferred shares (\$792,285 and \$691,675, respectively) were recorded as a reduction to paid-in surplus.

Indemnifications

Under the Funds' organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Under Georgia Dividend Advantage's (NZX), Georgia Dividend Advantage 2's (NKG), North Carolina Dividend Advantage's (NRB), North Carolina Dividend Advantage 2's (NNO) and North Carolina Dividend Advantage 3's (NII) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent Trustees that enables Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised Funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised Funds.

As approved by the Board of Trustees, a complex-wide fee schedule for all Funds managed by the Adviser and its affiliates will go into effect on August 1, 2004. The implementation of this complex-wide fee schedule is expected to result in a marginal immediate decrease in the rate at which management fees are to be paid by the Funds. As assets in the Nuveen Fund complex, grow, the management fee rates to be paid by the Funds will decrease further. Under no circumstances will the complex-wide fee schedule result in an increase in the rate at which management fees would be paid by the Funds if the complex-wide fee schedule were not implemented.

For the first ten years of Georgia Dividend Advantage's (NZX) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily net assets (including net assets attributable to Preferred shares), for fees and expenses in the amounts and for the time periods set forth below:

Build Your Wealth
AUTOMATICALLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR/A

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the fiscal year ended May 31, 2004. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

The registrant has posted such code of ethics on its website at www.nuveen.com/etf.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

During the reporting period, the registrant's board of directors determined that the registrant had at least one "audit committee financial expert" (as defined in Item 3 of Form N-CSR) serving on its Audit Committee. The registrant's audit committee financial expert for the reporting period was William E. Bennett, who was "independent" for purposes of Item 3 of Form N-CSR.

Although Mr. Bennett served as the audit committee financial expert for part of reporting period, he unexpectedly resigned from the Board effective April 30, 2004. Since that time, the Audit Committee determined that Jack B. On July 26, 2004, the full Board voted to so designate Mr. Evans.

Mr. Bennett was formerly Executive Vice President and Chief Credit Officer of First Chicago Corporation and its principal subsidiary, The First National Bank of Chicago. As part of his role as Chief Credit Officer, Mr. Bennett set policy as to accrual of assets/loans; designated performing/non-performing assets; set the level of reserves against the credit portfolio; and determined the carrying value of credit related assets and exposure. Among other things, Mr. Bennett was also responsible for the oversight of the internal analysis function including setting ground rules for the review and preparation of financial analysis and financial statements for use in making credit and risk decisions for financial analysis and financial statements for use in making credit and risk decisions for clients. Mr. Bennett has significant experience reviewing, analyzing and evaluating financial statements of domestic and international companies in a variety of industries with complex accounting issues.

NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 FORM N-CSR DISCLOSURE RE: AUDIT FEES

The following table shows the amount of fees that Ernst & Young LLP, the Fund's auditor, billed to the Fund during the Fund's last two full fiscal years. The table also shows the percentage of fees subject to the pre-approval exception. The pre-approval exception for services provided to the Adviser and any Affiliated Fund Service Provider (other than audit, review or attest services) waives the pre-approval requirement if: (A) the aggregate amount of all such services provided constitutes no more than 5% of the total amount of revenues paid to Ernst & Young LLP by the Fund, the Adviser and Affiliated Fund Service Providers during the fiscal year in which the services are provided that would have to be pre-approved by the Audit Committee; (B) the Fund did not recognize the services as non-audit services at the time of the engagement; and (C) the services are promptly brought to the Audit Committee's attention, and the Committee (or its delegate) approves the services before the Fund's audit is completed.
