Chairman's  
LETTER TO SHAREHOLDERS

Photo of: Timothy R. Schwertfeger

Timothy R. Schwertfeger  
Chairman of the Board

Every year I sign a shareholder letter that carries a date viewed by many with concern or dread. But you, and thousands like you, have learned that the tax-free income provided by your Nuveen Fund can help make April 15th a little less onerous. So, once again, I am pleased to report that over the six-month period covered by this report your Fund continued to provide you with attractive monthly tax-free income. For more details about the management strategy and performance of your Fund, please read the Portfolio Manager's Comments, the Common Share Dividend and Share Price Information, and the Performance Overview sections of this report.

I also wanted to update you on some important news about Nuveen Investments. In late 2007, the firm was acquired by a group led by Madison Dearborn Partners, LLC. While this affected the corporate structure of Nuveen Investments, it had no impact on the investment objectives, portfolio management strategies or dividend policy of your Fund.

With the recent volatility in the stock market, many have begun to wonder which way the market is headed, and whether they need to adjust their holdings of investments. No one knows what the future will bring, which is why we think a well-balanced portfolio that is structured and carefully monitored with the help of an investment professional is an important component in achieving your long term financial goals. A well-diversified portfolio may actually help to reduce your overall investment risk, and we believe that investments like your Nuveen Investments Fund can be important building blocks in a portfolio crafted to perform well through a variety of market conditions.

We also are pleased to be able to offer you a choice concerning how you receive your shareholder reports and other Fund information. As an alternative to mailed copies, you can sign up to receive future Fund reports and other Fund information by e-mail and the internet. The inside front cover of this report contains information on how you can sign up.

We are grateful that you have chosen us as a partner as you pursue your

### Portfolio Manager's COMMENTS

#### Nuveen Investments Municipal Closed-End Funds

NCA, NCP, NCO,  
NQC, NVC, NUC

Portfolio manager Scott Romans examines key investment strategies and the six-month performance of the Nuveen California Municipal Funds. Scott, who joined Nuveen in 2000, has managed these six Funds since 2003.

WHAT KEY STRATEGIES WERE USED TO MANAGE THE CALIFORNIA FUNDS DURING THE SIX-MONTH REPORTING PERIOD ENDED FEBRUARY 29, 2008?

During this period, the municipal market experienced a great deal of volatility, as factors related to the sub-prime mortgage crisis had an indirect, but important, influence on the municipal market's performance. As the market moved from rally to slump and back again, we sought to take advantage of this environment by tailoring our investment strategies appropriately. Overall, we believed the Funds were well structured going into this period. When interest rates were low, we continued to invest conservatively by purchasing defensive, high credit quality bonds that we believed would hold their value well when interest rates eventually rose. When disruptions in the financial markets triggered a backup in interest rates and the market discounted lower-quality and higher-yielding bonds, we took a more opportunistic approach to investing. That entailed selling some of the Funds' higher-rated defensive positions and buying lower-rated bonds at attractive levels relative to their credit quality or taking positions in higher-yielding bonds in order to capture the yield advantage of the increase in rates.

The Funds also found ample opportunities to sell some holdings that were purchased when yields were lower and replace them with similar, newer credits that yielded comparatively more. This process enabled us to maintain the Funds' current portfolio characteristics while strengthening their future income streams.

Over the course of the entire reporting period, we saw the municipal yield curve steepen, as municipal bond interest rates at the short end of the curve declined while longer-term rates rose. In this environment, we continued to emphasize a disciplined approach to duration management. As part of this strategy, we used inverse floating rate securities, a type of derivative financial instrument, in all six of these Funds. Inverse floaters typically provide the dual benefit of lengthening the Funds' durations to be closer to our strategic target and enhancing their income-generation capabilities, albeit while adding risk to their portfolio. Going into this period, all of the Funds also used forward interest rate swaps, another type of derivative financial instrument. The goal of this strategy was to help us manage the common share net asset value (NAV)

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

volatility of these Funds without having a negative impact on their income streams or common share dividends over the short term. During this period, we believed that the

- 1 Duration is a measure of a bond's price sensitivity as interest rates change, with longer duration bonds displaying more sensitivity to these changes than bonds with shorter durations.
- 2 An inverse floating rate security is a financial instrument designed to pay long-term tax-exempt interest at a rate that varies inversely with a short-term tax-exempt interest rate index. For the Nuveen Funds, the index typically used is the Securities Industry and Financial Markets (SIFM) Municipal Swap Index (previously referred to as the Bond Market Association Index or BMA). Inverse floaters, including those inverse floating rate securities in which the Funds invested during the reporting period, are further defined within the Notes to Financial Statements and Glossary of Terms Used in This Report sections of this shareholder report.

forward interest rate swaps had accomplished this goal, and we removed the swaps from the Funds.

### HOW DID THE FUNDS PERFORM?

Individual results for these Nuveen Funds, as well as relevant index and peer group information, are presented in the accompanying table.

For the six months ended February 29, 2008, the cumulative returns on common share NAV for all six of the Funds in this report underperformed the return on the Lehman Brothers California Tax-Exempt Bond Index. At the same time, all six of the Funds exceeded the average return on the Lipper California Municipal Debt

Funds Average.

The two most significant factors in the Funds' performance were leverage-adjusted duration and the use of derivatives. Sector and credit allocations and holdings of bonds backed by certain municipal bond insurers also influenced the Funds' returns on common share NAV.

During this six-month period, bonds in the Lehman Brothers Index with maturities of less than six years, especially those maturing in approximately three years, benefited the most from changes in the interest rate environment. As a result, these shorter maturity bonds generally outperformed credits with longer maturities. Bonds having the longest maturities (22 years and longer) posted the worst returns. In this market environment, the performance of NCA (which does not use financial leverage) benefited from the fact that its duration was shorter than the leverage-adjusted durations of the other five Funds in this report. Among the five leveraged Funds, NUC had the shortest duration, while NVC was among the longer durations in this report.

As mentioned earlier, all six Funds used forward interest rate swaps to synthetically extend their durations and move the Funds closer to our strategic duration target. Despite the fact that longer-duration instruments performed relatively poorly, the use of

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

- 3 NCA is an unleveraged Fund; the remaining five Funds in this report are leveraged.
- 4 The Lehman Brothers California Tax-Exempt Bond Index is an unleveraged, unmanaged index comprising a broad range of investment-grade California municipal bonds. Results for the Lehman index do not reflect any expenses.
- 5 The Lipper California Municipal Debt Funds Average is calculated using the returns of all closed-end funds in this category for each period as follows: six months, 24; 1 year, 24; 5 years, 24; and 10 years, 12. Fund and Lipper returns assume reinvestment of dividends.

forward interest rate swaps actually had a modest positive impact on the return performances of these Funds. This was due to the fact that the forward interest rate swaps provided exposure to taxable markets during a period when, in contrast to historical trends, the Treasury market and the municipal market moved in the opposite directions. As municipal market performance lagged the significant gains made by Treasuries, the forward interest rate swaps performed very well, benefiting the Funds in direct proportion to the amount of forward swap transactions used. For example, since NUC had the shortest duration among these five Funds, it made the greatest use of forward interest rate swaps and

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

benefited the most from their use. At the same time, the inverse floaters used by all six of these Funds had a negative impact on performance. This resulted from the fact that the inverse floaters effectively increased the Funds' exposure to longer maturity bonds during a period when shorter maturities were in favor in the market. However, the inverse floaters also benefited the Funds by helping to support their income streams.

Sectors of the market that generally contributed to the Funds' performances included resource recovery, special tax, water and sewer, and electric utilities. Pre-refunded<sup>6</sup> bonds performed exceptionally well, due primarily to their shorter effective maturities and higher credit quality. Among these six Funds, NVC and NUC had the heaviest allocations of pre-refunded bonds.

On the other hand, bonds that carried any credit risk, regardless of sector, tended to perform poorly. Revenue bonds as a whole, and specifically the industrial development and health care sectors that had ranked among the top performers in the Lehman Brothers Municipal Bond Index over the past few years, underperformed the general municipal market. Lower credit quality bonds (bonds rated BBB or below) and non-rated bonds also posted poor returns. Credits backed by the 1998 master tobacco settlement agreement generally underperformed as well, due to the overall lower credit quality of the tobacco sector as well as the ample supply of these bonds. The performance of the California Funds was also hurt by their holdings of zero coupon bonds as well as their small positions in gas prepayment contracts for certain municipalities.

Another factor that had an impact on the performance of the California Funds was their position in bonds backed by certain municipal insurers. All of these Funds had exposure to bonds insured by XL Capital Assurance (XLCA) and Financial Guaranty Insurance Company (FGIC). NCP also had a very small position in bonds insured by ACA Financial Guaranty Corporation (ACA), which was downgraded to CCC from A in December 2007. As concern increased about the balance sheets of municipal bond insurers, prices on bonds insured by these companies declined, detracting from the performance of the Funds. At the same time, all of these Funds had holdings of bonds backed by Financial Security Assurance (FSA), which held their value well. The California Funds that had heavier exposures to FSA-backed bonds relative to the general market benefited from this good performance. As a whole, the holdings of all of our Funds continued to be well diversified not only between insured and uninsured bonds, but also within the insured bond category.

- 6 Advance refundings, also known as pre-refundings or refinancings, occur when an issuer sells new bonds and uses the proceeds to fund principal and interest payments of older existing bonds. This process often results in lower borrowing costs for bond issuers.

### RECENT DEVELOPMENTS REGARDING BOND INSURANCE COMPANIES

The Portfolios of Investments reflect the ratings on certain bonds insured by AMBAC, CIFG, FGIC, MBIA and XLCA as of February 29, 2008. Subsequent to February 29, 2008, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for CIFG-insured, FGIC-insured and XLCA-insured bonds. As of February 28, 2008, one or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers. It is important to note that

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

municipal bonds historically have had a very low rate of default.

### RECENT DEVELOPMENTS IN THE AUCTION RATE PREFERRED MARKETS

Beginning in February 2008, more shares were submitted for sale in the regularly scheduled auctions for the auction preferred shares issued by these Funds than there were offers to buy. This meant that these auctions "failed to clear" and that many or all auction preferred shareholders who wanted to sell their shares in these auctions were unable to do so. This decline in liquidity in auction preferred shares did not lower the credit quality of these shares, and auctioned preferred shareholders unable to sell their shares received distributions at the "maximum rate" calculated in accordance with the pre-established terms of the auctioned preferred shares. At the time this report was prepared, the Funds' managers could not predict when future auctions might succeed in attracting sufficient buyers for the shares offered, if ever. The Funds' managers are working diligently to develop mechanisms designed to improve the liquidity of the auctioned preferred shares, or to restructure them, but at present there is no assurance that these efforts will succeed. These developments generally do not affect the management or investment policies of these Funds. However, one implication of these auction failures for common shareholders is that the Funds' cost of leverage will be higher than it otherwise would have been had the auctions continued to be successful. As a result, the Funds' future common share earnings may be lower than they otherwise would have been.

### Common Share Dividend and Share Price INFORMATION

All of the Funds in this report except NCA use financial leverage. While leverage can add volatility to a Fund's common share NAV and common share price, this strategy can also provide opportunities for additional income and total return for common shareholders. The Funds' use of this strategy continued to provide incremental income, although the extent of this benefit was reduced to a degree in some of the Funds by short-term interest rates that remained relatively high during the earlier part of this period. This, in turn, kept the Funds' borrowing costs high. The Funds' income streams were also impacted as the proceeds from older, higher-yielding bonds that matured or were called were reinvested into bonds then available in the market, which offered lower yields at times during this period. The combination of these factors resulted in one monthly common share dividend reduction in NCP, NCO, and NUC over the six-month period ended February 29, 2008. The common share dividends of NCA, NQC, and NVC remained stable throughout this reporting period.

Due to capital gains generated by normal portfolio activity, common shareholders of all six of these Funds received capital gains and/or net ordinary income distributions at the end of December 2007 as follows:

|     | Long-Term Capital Gains<br>(per share) | Short-Term Capital Gains<br>and/or Ordinary Income<br>(per share) |
|-----|--|---|
| NCA | \$0.0179                               | --  |

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

|     |          |          |
|-----|----------|----------|
| NCP | \$0.0743 | \$0.0068 |
| NCO | \$0.0744 | \$0.0142 |
| NQC | --       | \$0.0305 |
| NVC | \$0.0481 | --       |
| NUC | --       | \$0.0015 |

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's common share NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's common share NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of February 29, 2008, all of the Funds in this report had positive UNII balances, based upon our best estimate, for tax purposes. NCA, NCP and NQC had positive UNII balances for financial statement purposes, while NCO, NVC and NUC had negative UNII balances for financial statement purposes.

- 1 The percentages shown in the foregoing chart reflect the ratings on certain bonds insured by AMBAC, FGIC, MBIA and XLCA as of February 29, 2008. As explained earlier in the Portfolio Manager's Comments section of this report, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for FGIC-insured and XLCA-insured bonds. One or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers, and thereby reduce the percentage of the ratings shown in the foregoing chart.
  
- 2 Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 34.7%. When comparing this Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.
  
- 3 The Fund paid shareholders a capital gains distribution in December 2007 of \$0.0179 per share.

- 1 The percentages shown in the foregoing chart reflect the ratings on certain bonds insured by AMBAC, FGIC, MBIA and XLCA as of February 29, 2008. As explained earlier in the Portfolio Manager's Comments section of this report, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for FGIC-insured and XLCA-insured bonds. One or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers, and thereby reduce the percentage of the ratings shown in the foregoing chart.
  
- 2 Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 34.7%. When comparing this Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.
  
- 3 The Fund paid shareholders capital gains and net ordinary income distributions in December 2007 of \$0.0305 per share.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.  
  

The Portfolio of Investments reflects the ratings on certain bonds insured by AMBAC, FGIC, MBIA and XLCA as of February 29, 2008. Subsequent to February 29, 2008, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for FGIC-insured and XLCA-insured bonds. As of February 29, 2008, one or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board of Directors.
- (6) This debt has been restructured to accommodate capital

maintenance at the facility. Major highlights of the debt restructuring include the following: (1) the principal balance outstanding on and after December 1, 2007, shall accrue interest at a rate of 6.500% per annum commencing December 1, 2007; (2) the interest shall accrue but not be payable on June 1, 2008 or December 1, 2008, but shall instead be deferred and paid by the end of calendar year 2011; (3) no principal component shall be pre-payable from the Minimum Sinking Fund Account during calendar years 2008 and 2009 but such pre-payments shall recommence beginning in calendar year 2010 according to a revised schedule. Management believes that the restructuring is in the best interest of the Fund shareholders and that it is more-likely-than-not that the borrower will fulfill its obligation. Consequently the Fund continues to accrue interest on this obligation.

N/R Not rated.

(ETM) Escrowed to maturity.

(UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140.

Floating Rate Obligations - (2.4)%

Preferred Shares, at Liquidation Value - (59.8)% (7)

Net Assets Applicable to Common Shares - 100%

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.

The Portfolio of Investments reflects the ratings on certain bonds insured by AMBAC, CIFG, FGIC, MBIA and XLCA as of February 29, 2008. Subsequent to February 29, 2008, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for CIFG-insured, FGIC-insured and XLCA-insured bonds. As of February 29, 2008, one or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers.

- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) The issuer has received a formal adverse determination from the Internal Revenue Service (the "IRS") regarding the tax-exempt status of the bonds' coupon payments. The Fund will continue to treat coupon payments as tax-exempt income until such time that is formally determined that the interest on the bonds should be treated as taxable.
- (6) This debt has been restructured to accommodate capital maintenance at the facility. Major highlights of the debt restructuring include the following: (1) the principal balance outstanding on and after December 1, 2007, shall accrue interest at a rate of 6.500% per annum commencing December 1, 2007; (2) the interest shall accrue but not be

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

payable on June 1, 2008 or December 1, 2008, but shall instead be deferred and paid by the end of calendar year 2011; (3) no principal component shall be pre-payable from the Minimum Sinking Fund Account during calendar years 2008 and 2009 but such pre-payments shall recommence beginning in calendar year 2010 according to a revised schedule. Management believes that the restructuring is in the best interest of the Fund shareholders and that it is more-likely-than-not that the borrower will fulfill its obligation. Consequently the Fund continues to accrue interest on this obligation.

(7) Preferred Shares, at Liquidation Value as a percentage of total investments is (37.4)%.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

(UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140.

(2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

Certain mortgage-backed securities may be subject to periodic principal paydowns.

- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.

The Portfolio of Investments reflects the ratings on certain bonds insured by AMBAC, CIFG, FGIC, MBIA and XLCA as of February 29, 2008. Subsequent to February 29, 2008, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for CIFG-insured, FGIC-insured and XLCA-insured bonds. As of February 29, 2008, one or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers.

- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) This debt has been restructured to accommodate capital maintenance at the facility. Major highlights of the debt restructuring include the following: (1) the principal balance outstanding on and after December 1, 2007, shall accrue interest at a rate of 6.500% per annum commencing December 1, 2007; (2) the interest shall accrue but not be payable on June 1, 2008 or December 1, 2008, but shall instead be deferred and paid by the end of calendar year 2011; (3) no principal component shall be pre-payable from the Minimum Sinking Fund Account during calendar years 2008 and 2009 but such pre-payments shall recommence beginning in calendar year 2010 according to a revised schedule. Management believes that the restructuring is in the best interest of the Fund shareholders and that it is more-likely-than-not that the borrower will fulfill its obligation. Consequently the Fund continues to accrue interest on this obligation.
- (6) Preferred Shares, at Liquidation Value as a percentage of total investments is (37.5)%.

N/R Not rated.

(ETM) Escrowed to maturity.

(UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140.

See accompanying notes to financial statements.

Floating Rate Obligations - (4.9)%

Other Assets Less Liabilities - 5.8%

Preferred Shares, at Liquidation Value - (59.6)% (5)

Net Assets Applicable to Common Shares - 100%

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.

The Portfolio of Investments reflects the ratings on certain bonds insured by AMBAC, FGIC, MBIA and XLCA as of February 29, 2008. Subsequent to February 29, 2008, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for FGIC-insured and XLCA-insured bonds. As of February 29, 2008, one or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers.

- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) Preferred Shares, at Liquidation Value as a percentage of total investments is (37.5)%.

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

(UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

The Portfolio of Investments reflects the ratings on certain bonds insured by AMBAC, CIFG, FGIC, MBIA and XLCA as of February 29, 2008. Subsequent to February 29, 2008, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for CIFG-insured, FGIC-insured and XLCA-insured bonds. As of February 29, 2008, one or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers.

- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) Preferred Shares, at Liquidation Value as a percentage of total investments is (37.5)%.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

(UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140.

See accompanying notes to financial statements.

|            | =====   |  |             |

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's") rating. Ratings below BBB by Standard & Poor's or Baa by Moody's are considered to be below investment grade.

The Portfolio of Investments reflects the ratings on certain bonds insured by AMBAC, FGIC, MBIA and XLCA as of February 29, 2008. Subsequent to February 29, 2008, at least one rating agency reduced the rating for AMBAC-insured bonds to AA and at least one rating agency further reduced the ratings for FGIC-insured and XLCA-insured bonds. As of February 29, 2008, one or more rating agencies have placed each of these insurers on "negative credit watch", which may presage one or more rating reductions for such insurer or insurers in the future. If one or more insurers' ratings are reduced by these rating agencies, it would likely reduce the effective rating of many of the bonds insured by that insurer or insurers.

- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.
- (5) Preferred Shares, at Liquidation Value as a percentage of total investments is (37.2)%.

N/R Not rated.  
 (ETM) Escrowed to maturity.

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

(IF) Inverse floating rate investment.

(UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction pursuant to the provisions of SFAS No. 140.

Notes to  
FINANCIAL STATEMENTS (Unaudited)

## 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The funds covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen California Municipal Value Fund, Inc. (NCA), Nuveen California Performance Plus Municipal Fund, Inc. (NCP), Nuveen California Municipal Market Opportunity Fund, Inc. (NCO), Nuveen California Investment Quality Municipal Fund, Inc. (NQC), Nuveen California Select Quality Municipal Fund, Inc. (NVC) and Nuveen California Quality Income Municipal Fund, Inc. (NUC) (collectively, the "Funds"). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Fund seeks to provide current income exempt from both regular federal and California state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within the state of California or certain U.S. territories.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

### Investment Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors. When market price quotes are not readily available (which is usually the case for municipal securities), the pricing service may establish fair value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. Prices of forward swap contracts are also provided by an independent pricing service approved by each Fund's Board of Directors. If the pricing service is unable to supply a price for a municipal bond or forward swap contract, each Fund may use market quotes provided by major broker/dealers in such investments. If it is determined that the market price for an investment or derivative instrument is unavailable or inappropriate, the Board of Directors of the Funds, or its designee, may establish fair value in accordance with procedures established in good faith by the Board of Directors. Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates market value.

### Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At February 29, 2008, there were no such outstanding purchase commitments in any of the Funds.

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and California state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

59

Notes to  
FINANCIAL STATEMENTS (continued) (Unaudited)

Effective February 29, 2008, the Funds adopted Financial Accounting Standards Board (FASB) Interpretation No. 48 "Accounting for Uncertainty in Income Taxes" (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the affirmative evaluation of tax positions taken or expected to be taken in the course of preparing the Funds' tax returns to determine whether it is "more-likely-than-not" (i.e., greater than 50-percent likelihood) of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold may result in a tax benefit or expense in the current year.

Implementation of FIN 48 required management of the Funds to analyze all open tax years, as defined by the statute of limitations, for all major jurisdictions, which includes federal and certain states. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). The Funds have no examinations in progress.

For all open tax years and all major taxing jurisdictions through the end of the reporting period, management of the Funds has reviewed all tax positions taken or expected to be taken in the preparation of the Funds' tax returns and concluded the adoption of FIN 48 resulted in no impact to the Funds' net assets or results of operations as of and during the six months ended February 29, 2008.

The Funds are also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

### Preferred Shares

California Value (NCA) is not authorized to issue Preferred shares. The Funds below have issued and outstanding Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. Each Fund's Preferred shares are issued in more than one Series. The dividend rate paid by the Funds on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

### Inverse Floating Rate Securities

Each Fund may invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater"). A Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a "recourse trust" or "credit recovery swap") with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates, as well as any shortfalls in interest cash flows. The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust. An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as an "Inverse floating rate investment". An investment in a self-deposited inverse floater, recourse trust or credit recovery swap is accounted for as a financing transaction in accordance with Statement of Financial Accounting Standards (SFAS) No. 140 "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities". In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as an "Underlying bond of an inverse floating rate trust", with the Fund accounting for the short-term floating rate certificates issued by the trust as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in Investment Income the entire earnings of the underlying bond and accounts for the related interest paid to the holders of the short-term floating rate certificates as "Interest expense on floating rate obligations" in the Statement of Operations.

During the six months ended February 29, 2008, each Fund invested in externally deposited inverse floaters and/or self-deposited inverse floaters.

The average floating rate obligations outstanding and average annual interest rate and fees related to self-deposited inverse floaters during the six months ended February 29, 2008, were as follows:

### Forward Swap Transactions

Each Fund is authorized to invest in forward interest rate swap transactions. Each Fund's use of forward interest rate swap transactions is intended to help the Fund manage its overall interest rate sensitivity, either shorter or longer, generally to more closely align the Fund's interest rate sensitivity with that of the broader municipal market. Forward interest rate swap transactions involve each Fund's agreement with a counterparty to pay, in the future, a fixed or variable rate payment in exchange for the counterparty paying the Fund a

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

variable or fixed rate payment, the accruals for which would begin at a specified date in the future (the "effective date"). The amount of the payment obligation is based on the notional amount of the forward swap contract and the termination date of the swap (which is akin to a bond's maturity). The value of the Fund's swap commitment would increase or decrease based primarily on the extent to which long-term interest rates for bonds having a maturity of the swap's termination date increases or decreases. The Funds may terminate a swap contract prior to the effective date, at which point a realized gain or loss is recognized. When a forward swap is terminated, it ordinarily does not involve the delivery of securities or other underlying assets or principal, but rather is settled in cash on a net basis. Each Fund intends, but is not obligated, to terminate its forward swaps before the effective date. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the credit risk associated with a counterparty failing to honor its commitment to pay any realized gain to the Fund upon termination. To reduce such credit risk, all counterparties are required to pledge collateral daily (based on the daily valuation of each swap) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when any of the Funds have an unrealized loss on a swap contract, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the swap valuations fluctuate, either up or down, by at least the predetermined threshold amount.

### Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. Such securities are included in the Portfolios of Investments with a 0.000% coupon rate in their description. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

### Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which the Fund overdraws its account at the custodian bank.

### Indemnifications

Under the Funds' organizational documents, their Officers and Directors are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

### 4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses, timing differences in

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

recognizing taxable market discount, timing differences in recognizing certain gains and losses on investment transactions and the treatment of investments in inverse floating rate transactions subject to SFAS No. 140. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts on the Statement of Assets and Liabilities presented in the annual report, based on their federal tax basis treatment; temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

At February 29, 2008, the cost of investments was as follows:

California Quality Income (NUC) elected to defer net realized losses from investments incurred from November 1, 2006, through August 31, 2007, the Funds' last tax year-end, ("post-October losses") in accordance with federal income tax regulations. Post-October losses of \$36,885 were treated as having arisen on the first day of the current taxable year.

### 5. MANAGEMENT FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Each Fund's management fee is separated into two components - a complex-level component, based on the aggregate amount of all fund assets managed by Nuveen Asset Management (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., ("Nuveen"), and a specific fund-level component, based only on the amount of assets within each individual Fund, and for California Value (NCA) a gross interest income component. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

California Value (NCA) pays an annual fund-level fee, payable monthly, of .15% of the average daily net assets of the Fund, as well as 4.125% of the gross interest income (excluding interest on bonds underlying a "self-deposited inverse floater" trust that is attributed to the Fund over and above the net interest earned on the inverse floater itself) of the Fund.

The annual fund-level fee, payable monthly, for each Fund (excluding California Value (NCA)) is based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

| AVERAGE DAILY NET ASSETS<br>(INCLUDING NET ASSETS<br>ATTRIBUTABLE TO PREFERRED SHARES) | FUND-LEVEL FEE RATE |
|--|---------------------|
| For the first \$125 million  | .4500%              |
| For the next \$125 million   | .4375               |
| For the next \$250 million   | .4250               |
| For the next \$500 million   | .4125               |
| For the next \$1 billion   | .4000               |
| For the next \$3 billion   | .3875               |
| For net assets over \$5 billion  | .3750               |

The annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund assets managed as stated in the table below. As of February 29, 2008, the complex level fee rate was .1869%.

Effective August 20, 2007, the complex-level fee schedule is as follows:

| COMPLEX-LEVEL ASSET BREAKPOINT LEVEL (1) | EFFECTIVE RATE AT BREAKPOINT LEVEL |
|--|------------------------------------|
| \$55 billion                             | .2000%                             |
| \$56 billion                             | .1996                              |
| \$57 billion                             | .1989                              |

| \$125 billion                            | .1599                              |
| \$200 billion                            | .1505                              |
| \$250 billion                            | .1469                              |
| \$300 billion                            | .1445                              |

(1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets ("Managed Assets" means the average daily net assets of each fund including assets attributable to preferred stock issued by or borrowings by the Nuveen funds) of Nuveen-sponsored funds in the U.S.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Directors who are affiliated with the Adviser or to its Officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Directors has adopted a deferred compensation plan for independent Directors that enables Directors to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

### Agreement and Plan of Merger

On June 20, 2007, Nuveen Investments announced that it had entered into a definitive Agreement and Plan of Merger ("Merger Agreement") with Windy City Investments, Inc. ("Windy City"), a corporation formed by investors led by Madison Dearborn Partners, LLC ("Madison Dearborn"), pursuant to which Windy City would acquire Nuveen Investments. Madison Dearborn is a private equity

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

investment firm based in Chicago, Illinois. The merger was consummated on November 13, 2007.

65

Notes to  
FINANCIAL STATEMENTS (continued) (Unaudited)

The consummation of the merger was deemed to be an "assignment" (as that term is defined in the Investment Company Act of 1940) of the investment management agreement between each Fund and the Adviser, and resulted in the automatic termination of each Fund's agreement. The Board of Directors of each Fund considered and approved a new investment management agreement with the Adviser on the same terms as the previous agreements. Each new ongoing agreement was approved by the shareholders of each Fund and took effect on November 13, 2007.

The investors led by Madison Dearborn include an affiliate of Merrill Lynch. As a result, Merrill Lynch is an indirect "affiliated person" (as that term is defined in the Investment Company Act of 1940) of each Fund. Certain conflicts of interest may arise as a result of such indirect affiliation. For example, the Funds are generally prohibited from entering into principal transactions with Merrill Lynch and its affiliates. The Adviser does not believe that any such prohibitions or limitations as a result of Merrill Lynch's affiliation will significantly impact the ability of the Funds to pursue their investment objectives and policies.

### 6. NEW ACCOUNTING PRONOUNCEMENTS

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements." This standard establishes a single authoritative definition of fair value, sets out a framework for measuring fair value and requires additional disclosures about fair value measurements. SFAS No. 157 applies to fair value measurements already required or permitted by existing standards. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The changes to current generally accepted accounting principles from the application of this standard relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurements. As of February 29, 2008, management does not believe the adoption of SFAS No. 157 will impact the financial statement amounts; however, additional disclosures may be required about the inputs used to develop the measurements and the effect of certain of the measurements included within the Statement of Operations for the period.

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 161

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities." This standard is intended to enhance financial statement disclosures for derivative instruments and hedging activities and enable investors to understand: a) how and why a fund uses derivative instruments, b) how derivative instruments and related hedge items are accounted for, and c) how derivative instruments and related hedge items

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

affect a fund's financial position, results of operations and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. As of February 29, 2008, management does not believe the adoption of SFAS No. 161 will impact the financial statement amounts; however, additional footnote disclosures may be required about the use of derivative instruments and hedging items.

### 7. SUBSEQUENT EVENTS

#### Auction Rate Preferred Markets

Beginning in February 2008, more shares for sale were submitted in the regularly scheduled auctions for the Preferred shares issued by the Funds (excluding California Value (NCA)) than there were offers to buy. This meant that these auctions "failed to clear," and that many Preferred shareholders who wanted to sell their shares in these auctions were unable to do so. Preferred shareholders unable to sell their shares received distributions at the "maximum rate" calculated in accordance with the pre-established terms of the Preferred shares.

66

These developments generally do not affect the management or investment policies of the Funds. However, one implication of these auction failures for Common shareholders is that the Funds' cost of leverage will be higher than it otherwise would have been had the auctions continued to be successful. As a result, the Funds' future Common share earnings may be lower than they otherwise would have been.

#### Distributions to Common Shareholders

The Funds declared Common share dividend distributions from their tax-exempt net investment income which were paid on April 1, 2008, to shareholders of record on March 15, 2008, as follows:

Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

N/A Fund is not authorized to issue Preferred shares.

\* Total Return on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period takes place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

\*\* After custodian fee credit, where applicable.

\*\*\* Annualized.

+ The amounts shown are based on Common share equivalents.

++ Ratios do not reflect the effect of dividend payments to Preferred shareholders; income ratios reflect income earned on assets attributable to Preferred shares.

(a) Interest expense arises from the application of SFAS No. 140 to certain inverse floating rate transactions entered into by the Fund as more fully described in Footnote 1 - Inverse Floating Rate Securities.

(b) For the six months ended February 29, 2008.

several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

\*\*\* Annualized.

\*\*\*\* Distributions from Capital Gains to Preferred Shareholders rounds to less than \$.01 per share.

+ The amounts shown are based on Common share equivalents.

++ Ratios do not reflect the effect of dividend payments to Preferred shareholders; income ratios reflect income earned on assets attributable to Preferred shares.

(a) Interest expense arises from the application of SFAS No. 140 to certain inverse floating rate transactions entered into by the Fund as more fully described in Footnote 1 - Inverse Floating Rate Securities.

\* Total Return on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period takes place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

Reinvest Automatically  
EASILY and CONVENIENTLY

NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional Fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open

market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

### FLEXIBLE

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

### NOTES

NOTES

Glossary of  
TERMS USED in this REPORT

- o AUCTION RATE BOND: An auction rate bond is a security whose interest payments are adjusted periodically through an auction process, which process typically also serves as a means for buying and selling the bond. Auctions that fail to attract enough buyers for all the shares offered for sale are deemed to have "failed", with current holders receiving a formula-based interest rate until the next scheduled auction.
- o AVERAGE ANNUAL TOTAL RETURN: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.
- o AVERAGE EFFECTIVE MATURITY: The average of the number of years to maturity of the bonds in a Fund's portfolio, computed by weighting each bond's time to maturity (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions unless an escrow account has been established to redeem the bond before maturity. The market value weighting for an investment in an inverse floating rate security is the value of the portfolio's residual interest in the inverse floating rate trust, and does not include the value of the floating rate securities issued by the trust.
- o INVERSE FLOATERS: Inverse floating rate securities are created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. This trust, in turn, (a) issues floating rate certificates typically paying short-term tax-exempt interest rates to third parties in amounts equal to some fraction of the deposited bond's par amount or market value, and (b) issues an inverse floating rate certificate (sometimes referred to as an "inverse floater") to an investor (such as a Fund) interested in gaining investment exposure to a long-term municipal bond. The income received by the holder of the inverse floater varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the holder of the inverse floater bears substantially all of the underlying bond's downside investment risk. The holder of the inverse floater typically also benefits disproportionately from any potential appreciation of the underlying bond's value. Hence, an inverse floater essentially represents an investment in the underlying bond on a leveraged basis.
- o LEVERAGE-ADJUSTED DURATION: Duration is a measure of the expected period over which a bond's principal and interest will be paid, and consequently is a measure of the sensitivity of a bond's or bond Fund's value to changes when market interest rates change. Generally, the longer a bond's or Fund's

## Edgar Filing: NUVEEN CALIFORNIA MUNICIPAL VALUE FUND INC - Form N-CSRS

duration, the more the price of the bond or Fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is longer than the duration of the Fund's portfolio of bonds.

- o MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.
- o NET ASSET VALUE (NAV): A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any Preferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.
- o TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
- o ZERO COUPON BOND: A zero coupon bond does not pay a regular interest coupon to its holders during the life of the bond. Tax-exempt income to the holder of the bond comes from accretion of the difference between the original purchase price of the bond at issuance and the par value of the bond at maturity and is effectively paid at maturity. The market prices of zero coupon bonds generally are more volatile than the market prices of bonds that pay interest periodically.
