UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

x Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2012
or
o Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from____________to______________
Commission file number: 0-15536

CODORUS VALLEY BANCORP, INC.

(Exact name of registrant as specified in its charter)

Pennsylvania	**23-2428543**
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

105 Leader Heights Road, P.O. Box 2887, York, Pennsylvania 17405
(Address of principal executive offices) (Zip code)

717-747-1519
(Registrant s telephone number, including area code)

Not Applicable
(Former name, former address and former fiscal year, if changed since the last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes x No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer o
Non-accelerated filer o	Smaller reporting company x

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x

APPLICABLE ONLY TO CORPORATE ISSUERS

Indicate the number of shares outstanding of each of the issuer s classes of common stock, as of the latest practicable date. On November 1, 2012, 4,461,106 shares of common stock, par value $2.50, were outstanding, which includes the effect of the 5 percent common stock dividend declared October 9, 2012.

Notes to Consolidated Financial Statements (Unaudited)

Note 1 Basis of Presentation

The accompanying consolidated balance sheet at December 31, 2011 has been derived from audited financial statements, and the unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information, the instructions to Form 10-Q, and FASB Accounting Standards Codification (ASC) 270. Accordingly, the interim financial statements do not include all of the financial information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, the interim consolidated financial statements include all adjustments necessary to present fairly the financial condition and results of operations for the reported periods, and all such adjustments are of a normal and recurring nature.

These consolidated statements should be read in conjunction with the notes to the audited consolidated financial statements contained in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2011.

The consolidated financial statements include the accounts of Codorus Valley Bancorp, Inc. and its wholly owned bank subsidiary, PeoplesBank, A Codorus Valley Company (PeoplesBank), and its wholly owned nonbank subsidiary, SYC Realty Company, Inc. (collectively referred to as Codorus Valley or the Corporation). PeoplesBank has four wholly-owned subsidiaries, Codorus Valley Financial Advisors, Inc., SYC Settlement Services, Inc. and two subsidiaries whose purpose is to temporarily hold foreclosed properties pending eventual liquidation. All significant intercompany account balances and transactions have been eliminated in consolidation. The combined results of operations of the nonbank subsidiaries are not material to the consolidated financial statements.

The results of operations for the three and nine month periods ended September 30, 2012 are not necessarily indicative of the results to be expected for the full year.

In accordance with FASB ASC 855, the Corporation evaluated the events and transactions that occurred after the balance sheet date of September 30, 2012, and through the date these consolidated financial statements were issued, for items of potential recognition or disclosure.

Note 2 Significant Accounting Policies

Loans

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at their outstanding unpaid principal balances less amounts charged off, net of an allowance for loan losses and any deferred fees or costs. Interest income is accrued on the unpaid principal balance of loans. Generally, loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) over the contractual life of the loan. The loan portfolio is segmented into commercial and consumer loans. Commercial loans consist of the following industry classes: builder & developer, commercial real estate investor, residential real estate investor, hotel/motel, wholesale & retail, agriculture, manufacturing and all other. Consumer loans consist of the following classes: residential mortgage, home equity and all other.

For all classes of loans receivable, the accrual of interest is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is either adequately guaranteed or well secured. Generally, when a loan is placed on nonaccrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against the allowance for loan losses. Interest received on nonaccrual loans is reported as interest income or applied against principal, according to the Corporation s judgment as to the collectability of principal. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time, generally six months, and the ultimate collectability of the total contractual principal and interest is no longer in doubt. The past due status of all classes of loans receivable is determined based on contractual due dates for loan payments.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses represents the Corporation s estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. The allowance for loan losses is increased by the provision for loan losses, and decreased by charge-offs, net of recoveries. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance. All, or part, of the principal balance of loans are charged off to the allowance as soon as it is determined that the repayment of all, or part, of the principal balance is highly unlikely.

The allowance for loan losses is maintained at a level considered adequate to provide for losses that can be reasonably anticipated. The Corporation performs a quarterly evaluation of the adequacy of the allowance. The allowance is based on the Corporation s past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower s ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available.

The allowance consists of specific, general, and unallocated components. The specific component relates to commercial loans that are classified as impaired, generally substandard and nonaccrual loans. For commercial loans that are classified as impaired, an allowance is established when the collateral value (or discounted cash flows or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers pools of loans by loan class including commercial loans not considered impaired, as well as smaller balance homogeneous loans, such as residential real estate, home equity and other consumer loans. These pools of loans are evaluated for loss exposure based upon historical loss rates for each of these classes of loans, adjusted for qualitative (environmental) risk factors. Historical loss rates are based on a two year rolling average of net charge-offs. Qualitative risk factors that supplement historical losses in the evaluation of loan pools include:

- Changes in national and local economies and business conditions
- Changes in the value of collateral for collateral dependent loans
- Changes in the level of concentrations of credit
- Changes in the volume and severity of classified and past due loans
- Changes in the nature and volume of the portfolio
- Changes in collection, charge-off, and recovery procedures
- Changes in underwriting standards and loan terms
- Changes in the quality of the loan review system
- Changes in the experience/ability of lending management and key lending staff
- Regulatory and legal regulations that could affect the level of credit losses
- Other pertinent environmental factors

Each factor is assigned a value to reflect improving, stable or declining conditions based on the Corporation s best judgment using relevant information available at the time of the evaluation. An unallocated component is maintained to cover uncertainties that could affect the Corporation s estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the loan portfolio.

Table of Contents

As disclosed in Note 5-Loans, the Corporation engages in commercial and consumer lending. Loans are made within the Corporation s primary market area and surrounding areas, and include the purchase of whole loan or participation interests in loans from other financial institutions. Commercial related loans, which pose the greatest risk of loss to the Corporation, whether originated or purchased, are generally secured by real estate. Within the broad commercial loan segment, the builder & developer and commercial real estate investor loan classes generally present a higher level of risk than other commercial loan classifications. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effect of general economic conditions on income producing properties, unstable real estate prices and the dependency upon successful construction and sale or operation of the real estate project. Within the consumer loan segment, junior (i.e., second) liens present a slightly higher risk to the Corporation because economic and housing market conditions can adversely affect the underlying value of the collateral and the ability of some borrowers to service their debt.

A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered in determining impairment include payment status and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. The Corporation determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower s prior payment record and the amount of the shortfall in relation to the principal and interest owed. Loans that are deemed impaired are evaluated for impairment loss based on the net realizable value of the collateral, as applicable. Loans that are not collateral dependent will rely on the present value of expected future cash flows discounted at the loan s effective interest rate to determine impairment loss. Large groups of smaller balance homogeneous loans such as residential mortgage loans, home equity loans and other consumer loans are collectively evaluated for impairment, unless they are considered to be a troubled debt restructuring.

An allowance for loan losses is established for an impaired commercial loan if its carrying value exceeds its estimated fair value. For commercial loans secured by real estate, estimated fair values are determined primarily through third-party appraisals of the underlying collateral. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the most recent appraisal and the condition of the property. Appraisals are generally discounted to provide for selling costs and other factors to determine an estimate of the net realizable value of the property. For commercial loans secured by non-real estate collateral, such as accounts receivable, inventory and equipment, estimated fair values are determined based on the borrower s financial statements, inventory reports, accounts receivable aging or equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets. In instances when specific consumer related loans become impaired, they may be partially or fully charged off, which obviates the need for a specific allowance.

Loans whose terms are modified are classified as troubled debt restructurings if the Corporation grants borrowers experiencing financial difficulties concessions that it would not otherwise consider. Concessions granted under a troubled debt restructuring may involve a reduction in interest rate to a below market rate or an extension of a loan s stated maturity date. Loans classified as troubled debt restructurings are designated as impaired. Non-accrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for a reasonable period of time, generally six consecutive months after modification and future payments are reasonably assured.

Federal regulatory agencies, as an integral part of their examination process, periodically review the Corporation s allowance for loan losses and may require the Corporation to recognize additions to the allowance based on their judgments about information available to them at the time of their examination, which may not be currently available to the Corporation. Based on a comprehensive analysis of the loan portfolio, the Corporation believes that the level of the allowance for loan losses at September 30, 2012 is adequate.

Table of Contents

Foreclosed Real Estate

Foreclosed real estate, included in other assets, is comprised of property acquired through a foreclosure proceeding or property that is acquired through acceptance of a deed-in-lieu of foreclosure. Foreclosed real estate is initially recorded at fair value minus estimated costs to sell at the date of foreclosure, establishing a new cost basis. Any difference between the carrying value and the new cost basis is charged against the allowance for loan losses. Appraisals are generally used to determine fair value. After foreclosure, management reviews valuations at least quarterly and adjusts the asset to the lower of cost or fair value minus estimated costs to sell through a valuation allowance. Costs related to the improvement of foreclosed real estate are generally capitalized until the real estate reaches a saleable condition subject to fair value limitations. Revenue and expense from operations and changes in the valuation allowance are included in expense. When a foreclosed real estate asset is ultimately sold, any gain or loss on the sale is included in the income statement as a component of noninterest expense. At September 30, 2012, foreclosed real estate, net of allowance, was $4,084,000, compared to $16,243,000 for December 31, 2011. The $12,159,000 or 75 percent decrease was due primarily to the sale of real estate and secondarily to an increase in the allowance for real estate losses for selected properties.

Per Common Share Computations

All per share computations include the effect of the 5 percent common stock dividend declared October 9, 2012, payable on December 11, 2012, to shareholders of record as of October 23, 2012. The computation of net income per common share is provided in the table below.

	Three months ended September 30,		Nine months ended September 30,	
(in thousands, except per share data)	**2012**	**2011**	**2012**	**2011**
Net income available to common shareholders	$ 1,809	$ 4	$ 6,619	$ 2,896
Weighted average shares outstanding (basic)	4,449	4,375	4,432	4,359
Effect of dilutive stock options	73	41	57	48
Weighted average shares outstanding (diluted)	4,522	4,416	4,489	4,407
Basic earnings per common share	$ 0.41	$ 0.00	$ 1.49	$ 0.66
Diluted earnings per common share	$ 0.40	$ 0.00	$ 1.47	$ 0.66
Anti-dilutive stock options and common stock warrants	77	92	83	92

Comprehensive Income

Accounting principles generally accepted in the United States of America require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the shareholders equity section of the balance sheet, such items, along with net income, are components of comprehensive income.
