Form 10-K

February 29, 2016

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D. C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2015

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission File Number 1-6364

SOUTH JERSEY INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

New Jersey (State of incorporation)

22-1901645 (IRS employer identification no.)

1 South Jersey Plaza, Folsom, New Jersey 08037

(609) 561-9000

(Address of principal executive offices, including zip code)

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common Stock - \$1.25 par value per share

New York Stock Exchange

(Title of each class)

(Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act:

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Act: Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of voting stock held by non-affiliates of the registrant as of June 30, 2015 was \$1,687,786,543. As of February 15, 2016, there were 71,130,732 shares of the registrant's common stock outstanding.

Documents Incorporated by Reference:

In Part III of Form 10-K: Portions of the registrant's definitive proxy statement filed for the registrant's 2016 annual meeting of shareholders are incorporated by reference into Part III of this Form 10-K.

Forward Looking Statements

Certain statements contained in this Annual Report on Form 10-K may qualify as “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact included in this Report should be considered forward-looking statements made in good faith by South Jersey Industries (SJI or the Company) and are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. When used in this Report, or any other of the Company's documents or oral presentations, words such as “anticipate,” “believe,” “expect,” “estimate,” “forecast,” “goal,” “intend,” “objective,” “plan,” “project,” “seek,” “strategy” and similar expressions are intended to identify forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the statements. These risks and uncertainties include, but are not limited to the risks set forth under “Risk Factors” in Part I, Item 1A of this Report and elsewhere throughout this Report. These cautionary statements should not be construed by you to be exhaustive and they are made only as of the date of this Report. While the Company believes these forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. Further, SJI undertakes no obligation to update or revise any of its forward-looking statements whether as a result of new information, future events or otherwise.

Available Information

The Company's Internet address is www.sjindustries.com. We make available free of charge on or through our website SJI's Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (SEC). The SEC maintains an Internet site that contains these reports at <http://www.sec.gov>. Also, copies of SJI's annual report will be made available, free of charge, upon written request. The content on any web site referred to in this filing is not incorporated by reference into this Report unless expressly noted otherwise.

Units of Measurement

For Natural Gas:

| | |
|---------|-------------------------------------|
| 1 Bcf | = One billion cubic feet |
| 1dt | = One decatherm |
| 1 MMdts | = One million decatherms |
| dts/d | = Decatherms per day |
| MDWQ | = Maximum daily withdrawal quantity |

For Electric:

| | |
|---------|------------------------------|
| 1 MMMWh | = One million megawatt hours |
| 1 MWh | = One megawatt hour |

South Jersey Industries, Inc.
Part I

PART I

Item 1. Business

Description of Business

The registrant, South Jersey Industries, Inc. (SJI or the Company), a New Jersey corporation, was formed in 1969 for the purpose of owning and holding all of the outstanding common stock of South Jersey Gas Company, a public utility, and acquiring and developing non-utility lines of business.

SJI currently provides a variety of energy-related products and services, primarily through the following subsidiaries:

• South Jersey Gas Company (SJG) is a regulated natural gas utility. SJG distributes natural gas in the seven southernmost counties of New Jersey.

• South Jersey Energy Company (SJE) acquires and markets natural gas and electricity to retail end users and provides total energy management services to commercial and industrial customers.

• South Jersey Resources Group, LLC (SJRG) markets natural gas storage, commodity and transportation assets along with fuel management services on a wholesale basis in the mid-Atlantic, Appalachian and southern states.

• South Jersey Exploration, LLC (SJEX) owns oil, gas and mineral rights in the Marcellus Shale region of Pennsylvania.

• Marina Energy LLC (Marina) develops and operates on-site energy-related projects, a natural gas fueled combined heating, cooling and power facility, landfill gas-fired electric production facilities and solar-generation sites.

• South Jersey Energy Service Plus, LLC (SJESP) services residential and small commercial HVAC systems, installs small commercial HVAC systems, provides plumbing services and services appliances under warranty via a subcontractor arrangement as well as on a time and materials basis.

• SJI Midstream, LLC (Midstream) was formed in 2014 to invest in infrastructure and other midstream projects, including a current project to build a 100-mile natural gas pipeline in Pennsylvania and New Jersey.

Additional Information on the nature of our business can be found in “Management's Discussion and Analysis of Financial Condition and Results of Operations,” under Item 7 of this Report.

Financial Information About Reportable Segments

Information regarding Reportable Segments is incorporated by reference to Note 8 of the consolidated financial statements included under Item 8 of this Report.

South Jersey Industries, Inc.
Part I

Sources and Availability of Raw Materials

South Jersey Gas Company

Transportation and Storage Agreements

SJG has direct connections to the interstate pipeline systems of both Transcontinental Gas Pipe Line Company, LLC (Transco) and Columbia Gas Transmission, LLC (Columbia). During 2015, SJG purchased and had delivered approximately 44.8 million decatherms (MMdts) of natural gas for distribution to both on-system and off-system customers and for injections into storage. Of this total, 28.1 MMdts were transported on the Transco pipeline system while 16.7 MMdts were transported on the Columbia pipeline system. Moreover, during 2015 third-party suppliers delivered 30.4 MMdts to SJG's system on behalf of end use customers behind SJG's city gate stations. SJG also secures other long-term services from Dominion Transmission, Inc. (Dominion), a pipeline upstream of the Transco and Columbia systems. Services provided by Dominion are utilized to deliver gas into either the Transco or Columbia systems for ultimate delivery to SJG. Services provided by all of the above-mentioned pipelines are subject to the jurisdiction of the Federal Energy Regulatory Commission (FERC). Unless otherwise indicated, our intentions are to renew or extend these service agreements before they expire.

Transcontinental Gas Pipeline (Transco):

Transco is SJG's largest supplier of long-term gas transmission services which includes both year-round and seasonal firm transportation (FT) service arrangements. When combined, these FT services enable SJG to purchase gas from third parties and have delivered to its city gate stations by Transco a total of 297,958 dts per day (dts/d). Of this total, 133,917 dts/d is long-haul FT (where gas can be transported from the production areas of the Southwest to the market areas of the Northeast) while 164,041 dts/d is market area FT. The terms of SJG's year-round agreements extend for various periods through 2025. SJG's seasonal agreements are currently operating under their respective evergreen provisions.

Of the 297,958 dts/d of Transco services mentioned above, SJG has released a total of 49,041 dts/d of its market area FT service. These releases were made in association with SJG's Conservation Incentive Program (CIP) discussed further under Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition, SJG released a total of 50,000 dts/d of its long-haul FT as part of Asset Management Agreements (AMA). The AMA-related releases are discussed below under "Gas Supplies". In addition, SJG released a total of 30,000 dts/d of its long-haul FT as an Off-System Sale capacity release.

SJG currently has six long-term gas storage service agreements with Transco that, when combined, are capable of storing approximately 5.0 MMdts. Through these agreements, SJG can inject gas into market and production area storages during periods of low demand and extract gas at a Maximum Daily Withdrawal Quantity (MDWQ) of up to 107,407 dts during periods of high demand. The longest term of these storage service agreements extends through March 31, 2023.

Dominion:

SJG subscribes to a firm storage service from Dominion, under its Rate Schedule GSS. This storage has an MDWQ of 10,000 dts during the period between November 16 and March 31 of each winter season, with an associated total storage capacity of 423,000 dts. Gas withdrawn from Dominion GSS storage is delivered through both the Dominion and Transco (Leidy Line) pipeline systems for delivery to SJG service territory. The primary term of this agreement extends through March 31, 2019.

South Jersey Industries, Inc.
Part I

Columbia:

SJG subscribes to four firm transportation agreements with Columbia which provide for an aggregate of 104,022 dts/d with the term of 9,000 dts/d of this capacity extending through October 31, 2017 while the term of 45,022 dts/d of this deliverability extends through October 31, 2019. The remaining 50,000 dts/d continues through October 31, 2030. SJG released 8,671 dts/d of this amount to SJRG in conjunction with its Conservation Incentive Program (CIP) thereby reducing the combined availability of firm transportation on the Columbia system to 95,351 dts/d. In addition, SJG released a total of 20,000 dts/d of this capacity to a gas marketer as part of an AMA leaving a net of 75,351 dts/d available to SJG. This AMA-related release is further discussed below under "Gas Supplies."

SJG also subscribes to a firm storage service with Columbia under its Rate Schedule FSS along with an associated firm transportation service under Rate Schedule SST, each of which extends through October 31, 2019. SJG has a total FSS MDWQ of 52,891 dts and a related 3,473,022 dts of storage capacity. SJG released to SJRG 19,029 dts/d of its FSS MDWQ along with 1,249,485 dts of its FSS storage capacity. Additionally, SJG released to SJRG 19,029 dts/d of its Columbia SST transportation service. Both releases made by SJG were in connection with its CIP and extend through September 30, 2016.

Gas Supplies

During 2015, SJG entered into an AMA with a gas marketer which extends through March 31, 2016. Under this agreement SJG released to the marketer its firm transportation rights equal to 30,000 dts/d of transportation capacity on Transco. The marketer manages this capacity and provides SJG with up to 30,000 dts/d of firm deliverability each day through March 31, 2016. The marketer's intent was to optimize the capacity released to them under this AMA and pay SJG a monthly asset management fee.

Also during 2015, SJG entered into two additional AMA's with two separate gas marketers which both extend through October 31, 2016. Under these agreements, SJG has released to each of the marketers firm transportation rights equal to 10,000 dts/d of transportation capacity on Transco. The marketers manage their respective capacity and provide SJG with up to 10,000 dts/d each of firm deliverability everyday through October 31, 2016. The marketers will seek to optimize the capacity released to them under these AMA's and pay SJG a one-time asset management fee.

Also during 2015, SJG entered into two further AMA's with two separate gas marketers which both also extend through October 31, 2016. Under these agreements, SJG has released to each of the marketers firm transportation rights equal to 10,000 dts/d of transportation capacity on Columbia. The marketers manage their respective capacity and provide SJG with up to 10,000 dts/d each of firm deliverability everyday through March 31, 2016. The marketers will seek to optimize the capacity released to it under these AMA's and pay SJG a one-time asset management fee.

In 2011, SJG entered into a long-term gas purchase agreement with a gas producer, the primary term of which extends through October 31, 2019. The maximum daily quantities (MDQ) available for purchase under this agreement initially start at 6,250 dts/d and ratchet up to an MDQ of 25,000 dts/d. Gas purchased from this producer will be sourced in the Appalachian supply areas and delivered into the Columbia pipeline system for delivery to SJG.

As part of its gas purchasing strategy, SJG uses financial contracts to hedge against forward price risk. These contracts are recoverable through SJG's Basic Gas Supply Service Clause (BGSS), subject to the New Jersey Board of Public Utilities (BPU) approval.

Supplemental Gas Supplies

During 2015, SJG purchased Liquefied Natural Gas (LNG) from two separate third party LNG suppliers. This LNG was purchased as a supply source to replenish SJG's LNG inventory at its storage facility, located in McKee City, NJ. SJG purchased LNG from one supplier during the 2014-15 winter season, and from a second supplier during the 2015 summer season and the 2015-16 winter season.

South Jersey Industries, Inc.
Part I

SJG operates peaking facilities which can store and vaporize LNG for injection into its distribution system. SJG's LNG facility has a storage capacity equivalent to 434,300 dts of natural gas and has an installed capacity to vaporize up to 118,250 dts of LNG per day for injection into its distribution system.

Peak-Day Supply

SJG plans for a winter season peak-day demand on the basis of an average daily temperature of 2 degrees Fahrenheit (F). Gas demand on such a design day for the 2015-2016 winter season is estimated to be 503,873 dts (excluding industrial customers). SJG projects that it has adequate supplies and interstate pipeline entitlements to meet its design requirements. SJG experienced its highest peak-day demand for calendar year 2015 of 507,219 dts (including industrial customers) on February 15, while experiencing an average temperature of 10.1 degrees F that day.

Natural Gas Prices

SJG's average cost of natural gas purchased and delivered in 2015, 2014 and 2013, including demand charges, was \$4.71 per dt, \$6.56 per dt and \$4.81 per dt, respectively.

South Jersey Energy Company

Transportation and Storage Agreements - Natural Gas

Access to gas suppliers and cost of gas are significant to the operations of SJE. No material part of the business of SJE is dependent upon a single customer or a few customers. SJE purchases delivered gas only, primarily from SJRG. Consequently, SJE maintains no transportation or storage agreements.

Electric Supply

Due to the liquidity in the market, SJE primarily purchases delivered electric in the day-ahead and real-time markets through regional transmission organizations.

South Jersey Resources Group

Transportation and Storage Agreements

National Fuel Gas Supply Corporation:

SJRG has multiple storage service agreements with National Fuel Gas Supply Corporation (National Fuel). Two contracts totaling 2,581,420 dts of capacity have evergreen provisions that extend year to year. One additional contract covering 224,576 dts of storage capacity extends through March 31, 2018, while a final contract covering 150,040 dts of capacity expires March 31, 2023.

SJRG holds long-term firm transportation agreements with National Fuel associated with the above-mentioned agreements. Under these agreements, National Fuel will provide SJRG with a maximum daily injection transportation quantity of 16,947 dts/d with primary receipt points from Tennessee Gas Pipeline for delivery into storage, and 25,661 dts/d of maximum daily withdrawal transportation quantity, with a primary receipt point of storage and a primary delivery point of the Transcontinental Gas Pipeline.

Transcontinental Gas Pipeline (Transco):

SJRG has a storage agreement with Transco for storage service at Transco's WSS facility which expires in October 2017. Under this contract, up to 24,479 dts/d may be injected and up to 46,380 dts/d may be withdrawn. Total storage capacity under the agreement is 4,406,135 dts.

SJRG holds a firm transportation agreement with Transco which expires March 31, 2043. Under this agreement, Transco will provide SJRG with 10,000 dts/d of deliveries to New York and receipts at Leidy, PA.

5

South Jersey Industries, Inc.
Part I

Dominion Gas Transmission:

SJRG has a firm transportation agreement with Dominion which expires October 31, 2022. Under this agreement, Dominion will provide SJRG with 5,000 dts/d of deliveries to Leidy, PA and receipts at Lebanon, Ohio.

Columbia Gas Transmission:

SJRG holds a firm transportation agreement with Columbia. Under this evergreen agreement, Columbia provides receipts at Leach, Kentucky and deliveries of 14,714 dts/d to New Jersey. In addition, SJRG has 10,000 dts/d of Columbia capacity from New York to Maryland expiring October 31, 2018. SJRG also holds capacity ranging from 40,000/dth/d to 60,000 dth/d of receipts from Marcellus to Southern New Jersey expiring October 31, 2030.

SJRG holds a storage agreement with Columbia for service under Columbia's FSS rate schedule. Under this evergreen agreement, Columbia will provide SJRG with storage capacity of 1,249,515 dts. Under this agreement, 19,029 dts/d may be withdrawn from storage and 9,996 dts/d may be injected.

SJRG holds firm transportation related to the above mentioned storage agreement which provides for receipts at storage and deliveries to New Jersey of 19,029 dts/d. Under this evergreen contract, these services with Columbia were released to SJRG by SJG.

Columbia Gulf Transmission:

SJRG holds a firm transportation agreement with Columbia Gulf which expires October 31, 2019. Under this agreement, Columbia Gulf provides receipts in Louisiana with deliveries at Leach, Kentucky in the amount of 15,000 dts/d.

Tennessee Gas Transmission:

SJRG holds multiple firm transportation agreements with the Tennessee Gas Pipeline that have various deliveries and receipts in Pennsylvania and Louisiana. The contract volumes range from 10,000 to 65,200 per contract and expire between October 31, 2016 and October 31, 2019.

Egan Storage:

SJRG holds a storage agreement with Egan Storage for service under Tetco's FSS rate schedule. Under this agreement, which expires March 31, 2016, Tetco provides SJRG with storage capacity of 500,000 dts.

Pine Prairie:

SJRG holds a storage agreement with Pine Prairie for service under Tetco's FSS rate schedule. Under this agreement, which expires March 31, 2016, Tetco provides SJRG with storage capacity of 500,000 dts.

Gas Supplies

SJRG has entered into several long-term natural gas supply agreements to purchase a minimum of 626,500 dts/d and up to 796,250 dts/d, depending upon production levels, for terms ranging from three to ten years at index-based prices.

South Jersey Industries, Inc.
Part I

Patents and Franchises

South Jersey Gas Company

SJG holds nonexclusive franchises granted by municipalities in the seven-county area of southern New Jersey that it serves. No other natural gas public utility presently serves the territory covered by SJG's franchises. Otherwise, patents, trademarks, licenses, franchises and concessions are not material to the business of SJG.

Seasonal Aspects

South Jersey Gas Company

SJG experiences seasonal fluctuations in sales when selling natural gas for heating purposes. SJG meets this seasonal fluctuation in demand from its firm customers by buying and storing gas during the summer months, and by drawing from storage and purchasing supplemental supplies during the heating season. As a result of this seasonality, SJG's revenues and net income are significantly higher during the first and fourth quarters than during the second and third quarters of the year.

Non-Utility Companies

Among SJI's non-utility activities, wholesale and retail gas marketing have seasonal patterns similar to SJG's. Activities such as energy services and energy project development do not follow seasonal patterns. Other activities, such as retail electric marketing and appliance service, can have seasonal earnings patterns that are different from the utility. While growth in the earnings contributions from nonutility operations has improved SJI's second and third quarter net income levels, the first and fourth quarters remain the periods where most of SJI's revenue and net income is produced.

Working Capital Practices

Reference is made to "Liquidity and Capital Resources" included in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of this Report.

Customers

No material part of the Company's business is dependent upon a single customer or a few customers, the loss of which would be expected to have a material adverse effect on SJI's performance on a consolidated basis.

Backlog

Backlog is not material to an understanding of SJI's business or that of any of its subsidiaries.

Government Contracts

No material portion of the business of SJI or any of its subsidiaries is subject to renegotiation of profits or termination of contracts or subcontracts at the election of any government.

Competition

Information on competition for SJI and its subsidiaries can be found in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of this Report.

7

South Jersey Industries, Inc.
Part I

Research

During the last three fiscal years, neither SJI nor any of its subsidiaries engaged in research activities to any material extent.

Environmental Matters

Information on environmental matters for SJI and its subsidiaries can be found in Note 15 of the consolidated financial statements included under Item 8 of this Report.

Employees

SJI and its subsidiaries had a total of approximately 720 employees as of December 31, 2015. Of that total, approximately 320 employees are unionized. The Company has collective bargaining agreements with two unions that represent these employees: the International Brotherhood of Electrical Workers (IBEW) Local 1293 and the International Association of Machinists and Aerospace Workers (IAM) Local 76. SJG and SJESP employees represented by the IBEW operate under collective bargaining agreements that run through February 2017. The remaining unionized employees are represented by the IAM and operate under collective bargaining agreements that run through August 2017.

Financial Information About Foreign and Domestic Operations and Export Sales

SJI has no foreign operations and export sales have not been a significant part of SJI's business.

Item 1A. Risk Factors

SJI and its subsidiaries operate in an environment that involves risks, many of which are beyond our control. SJI has identified the following risk factors that could cause SJI's operating results and financial condition to be materially adversely affected. In addition, new risks may emerge at any time, and SJI cannot predict those risks or the extent to which they may affect SJI's businesses or financial performance.

SJI is a holding company and its assets consist primarily of investments in subsidiaries. Should SJI's subsidiaries be unable to pay dividends or make other payments to SJI for financial, regulatory, legal or other reasons, SJI's ability to pay dividends on its common stock could be limited. SJI's stock price could be adversely affected as a result. SJI's business activities are concentrated in southern New Jersey. Changes in the economies of southern New Jersey and surrounding regions could negatively impact the growth opportunities available to SJI and the financial condition of the customers and prospects of SJI.

Changes in the regulatory environment or unfavorable rate regulation at its utility may have an unfavorable impact on SJI's financial performance or condition. SJI's utility business is regulated by the New Jersey Board of Public Utilities (BPU) which has authority over many of the activities of the utility business including, but not limited to, the rates it charges to its customers, the amount and type of securities it can issue, the nature of investments it can make, the nature and quality of services it provides, safety standards and other matters. The extent to which the actions of regulatory commissions restrict or delay SJG's ability to earn a reasonable rate of return on invested capital and/or fully recover operating costs may adversely affect its results of operations, financial condition and cash flows. SJI may not be able to respond effectively to competition, which may negatively impact SJI's financial performance or condition. Regulatory initiatives may provide or enhance opportunities for competitors that could reduce utility income obtained from existing or prospective customers. Also, competitors in all of SJI's business lines may be able to provide superior or less costly products or services based upon currently available or newly developed technologies.

Warm weather, high commodity costs, or customer conservation initiatives could result in reduced demand for some of SJI's energy products and services. SJI's utility currently has a conservation incentive program clause that protects its revenues and gross margin against usage that is lower than a set level. Should this clause be terminated without replacement, lower customer energy utilization levels would likely reduce SJI's net income. Further, during periods of warmer temperatures, demand and volatility in the natural gas market could decrease, which would negatively impact the Company's financial results.

South Jersey Industries, Inc.
Part I

High natural gas prices could cause more of SJI's receivables to be uncollectible. Higher levels of uncollectibles from either residential or commercial customers would negatively impact SJI's income and could result in higher working capital requirements.

SJI's net income could decrease if it is required to incur additional costs to comply with new governmental safety, health or environmental legislation. SJI is subject to extensive and changing federal and state laws and regulations that impact many aspects of its business; including the storage, transportation and distribution of natural gas, as well as the remediation of environmental contamination at former manufactured gas plant facilities.

Climate change legislation could impact SJI's financial performance and condition. Climate change is receiving ever increasing attention from both scientists and legislators. The debate is ongoing as to the extent to which our climate is changing, the potential causes of this change and its future impacts. Some attribute global warming to increased levels of greenhouse gases, which has led to significant legislative and regulatory efforts to limit greenhouse gas emissions. The outcome of federal and state actions to address global climate change could result in a variety of regulatory programs, including additional charges to fund energy efficiency activities or other regulatory actions. These actions could affect the demand for natural gas and electricity, result in increased costs to our business and impact the prices we charge our customers. Because natural gas is a fossil fuel with low carbon content, it is possible that future carbon constraints could create additional demands for natural gas, both for production of electricity and direct use in homes and businesses. Any adoption by federal or state governments mandating a substantial reduction in greenhouse gas emissions could have far-reaching and significant impacts on the energy industry. We cannot predict the potential impact of such laws or regulations on our future consolidated financial condition, results of operations or cash flows.

SJI's wholesale commodity marketing and retail electric businesses are exposed to the risk that counterparties that owe money or energy to SJI will not be able to meet their obligations for operational or financial reasons. SJI could be forced to buy or sell commodity at a loss as a result of such failure. Such a failure, if large enough, could also impact SJI's liquidity.

Increasing interest rates would negatively impact the net income of SJI. Several of SJI's subsidiaries are capital intensive, resulting in the incurrence of significant amounts of debt financing. Some of the long-term debt of SJI and its subsidiaries is issued at fixed rates or has utilized interest rate swaps to mitigate changes in variable rates. However, long-term debt of SJI at variable rates, along with all variable rate short-term borrowings, are exposed to the impact of rising interest rates.

The inability to obtain capital, particularly short-term capital from commercial banks, could negatively impact the daily operations and financial performance of SJI. SJI uses short-term borrowings under committed credit facilities provided by commercial banks to supplement cash provided by operations, to support working capital needs, and to finance capital expenditures, as incurred. SJI also relies upon short-term borrowings issued under a commercial paper program supported by a committed bank credit facility to support working capital needs, and to finance capital expenditures, as incurred. If the customary sources of short-term capital were no longer available due to market conditions, SJI and its subsidiaries may not be able to meet their working capital and capital expenditure requirements and borrowing costs could increase.

A downgrade in either SJI's or SJI's credit ratings could negatively affect our ability to access adequate and cost-effective capital. Our ability to obtain adequate and cost-effective capital depends to a significant degree on our credit ratings, which are greatly influenced by our financial condition and results of operations. If the rating agencies downgrade either SJI's or SJI's credit ratings, particularly below investment grade, our borrowing costs would increase. In addition, we would likely be required to pay higher interest rates in future financings and potential funding sources would likely decrease. To the extent that a decline in SJI's credit rating has a negative effect on SJI, SJI could be required to provide additional support to certain counterparties.

Hedging activities of the Company designed to protect against commodity price or interest rate risk may cause fluctuations in reported financial results and SJI's stock price could be adversely affected as a result. Although SJI enters into various contracts to hedge the value of energy assets, liabilities, firm commitments or forecasted transactions, the timing of the recognition of gains or losses on these economic hedges in accordance with accounting

principles generally accepted in the United States of America does not always match up with the gains or losses on the items being hedged. The difference in accounting can result in volatility in reported results, even though the expected profit margin is essentially unchanged from the dates the transactions were consummated.

The inability to obtain natural gas or electricity from suppliers would negatively impact the financial performance of SJI. Several of SJI's subsidiaries have businesses based upon the ability to deliver natural gas or electricity to customers. Disruption in the production or transportation to SJI from its suppliers could prevent SJI from completing sales to its customers.

South Jersey Industries, Inc.
Part I

Transporting and storing natural gas involves numerous risks that may result in accidents and other operating risks and costs. SJI's gas distribution activities involve a variety of inherent hazards and operating risks, such as leaks, accidents, mechanical problems, natural disasters or terrorist activities which could cause substantial financial losses. In addition, these risks could result in loss of human life, significant damage to property, environmental pollution and impairment of operations, which in turn could lead to substantial losses. In accordance with customary industry practice, SJI maintains insurance against some, but not all, of these risks and losses. The occurrence of any of these events, even if fully covered by insurance, could adversely affect SJI's financial position, results of operations and cash flows.

Adverse results in legal proceedings could be detrimental to the financial condition of SJI. The outcomes of legal proceedings can be unpredictable and can result in adverse judgments.

Renewable energy projects at Marina receive significant benefit from tax and regulatory incentives. A significant portion of the expected return on investment of these renewable energy projects is dependent upon federal investment tax credits (ITCs) and the future market for renewable energy credits (RECs). The benefits from ITCs are typically available when the project is placed in service while the benefits from RECs are produced during the entire life of the project. As a result, earnings from existing projects would be adversely affected without a liquid REC market. In addition, the return on investment from new projects may not be as attractive if ITCs are not available and/or a liquid REC market ceases to exist. Therefore, these projects are exposed to the risk that favorable tax and regulatory incentives expire or are adversely modified.

Constraints in available pipeline capacity, particularly in the Marcellus Shale producing region, may negatively impact SJI's financial performance. Natural gas production and/or pipeline transportation disruptions in the Marcellus region, where SJI has natural gas receipt requirements, may cause temporary take-away constraints resulting in higher transportation costs and the sale of shale gas at a loss.

Failures in the security of our computer systems through cyberattacks, hackers or other sources, could have a material adverse impact on our business and results of operations. SJI uses computer systems and services that involve the storage of confidential information on our employees, customers and vendors. In addition, certain computer systems monitor and control our generation and distribution processes. Experienced hackers may be able to develop and deploy viruses that exploit the security of our computer systems and thus obtain confidential information and/or disrupt significant business processes. Unauthorized access to confidential information or disruptions to significant business processes could damage our reputation and negatively impact our results of operations and financial condition.

- The risk of terrorism may adversely affect the economy as well as SJI's business. An act of terror could result in disruptions of natural gas supplies and cause instability in the financial and capital markets. This could adversely impact SJI's ability to deliver products or raise capital and could adversely impact its results of operations.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The principal property of SJI consists of SJG's gas transmission and distribution systems that include mains, service connections and meters. The transmission facilities carry the gas from the connections with Transco and Columbia to SJG's distribution systems for delivery to customers. As of December 31, 2015, there were approximately 122.7 miles of mains in the transmission systems and 6,503 miles of mains in the distribution systems.

SJG owns approximately 154 acres of land in Folsom, New Jersey which is the site of SJI's corporate headquarters. Approximately 140 acres of this property is deed restricted. SJG also has office and service buildings at six other locations in its territory. There is a liquefied natural gas storage and vaporization facility at one of these locations.

As of December 31, 2015, SJG's utility plant had a gross book value of \$2.2 billion and a net book value, after accumulated depreciation, of \$1.8 billion. In 2015, \$207.8 million was spent on additions to utility plant and there were retirements of property having an aggregate gross book cost of \$17.8 million.

Virtually all of SJG's transmission pipeline, distribution mains and service connections are under streets or highways or on the property of others. The transmission and distribution systems are maintained under franchises or permits or rights-of-way, many of which are perpetual. SJG's properties (other than property specifically excluded) are subject to a lien of mortgage under which its first mortgage bonds are outstanding. We believe these properties are generally well maintained and in good operating condition.

Nonutility property and equipment with a net book value of \$677.3 million consists primarily of Marina's energy projects.

Energy and Minerals Inc. (EMI) owns 235 acres of land in Vineland, New Jersey.

South Jersey Fuel, Inc., an inactive subsidiary, owns land in Deptford Township and owns real estate in Upper Township, New Jersey.

R&T Castellini, Inc., an inactive subsidiary, owns land and buildings in Vineland, New Jersey.

Item 3. Legal Proceedings

The Company is subject to claims arising in the ordinary course of business and other legal proceedings. The Company has been named in, among other actions, certain gas supply and capacity management contract disputes and certain product liability claims related to our former sand mining subsidiary. We accrue liabilities related to these claims when we can reasonably estimate the amount or range of amounts of probable settlement costs or other charges for these claims. The Company has accrued approximately \$3.2 million and \$2.9 million related to all claims in the aggregate as of December 31, 2015 and 2014, respectively. Management does not believe that it is reasonably possible that there will be a material change in the Company's estimated liability in the near term and does not currently anticipate the disposition of any known claims that would have a material effect on the Company's financial position, results of operations or cash flows.

Item 4. Mine Safety Disclosures

Not applicable.

Item 4A. Executive Officers of the Registrant

Set forth below are the names, ages and positions of our executive officers along with their business experience during the past five years. All executive officers of SJI are elected annually and serve at the discretion of the Board of Directors. All information is as of the date of the filing of this Report.

These quotations are based on the list of composite transactions of the New York Stock Exchange. Our stock is traded on the New York Stock Exchange under the symbol SJI. We have declared and expect to continue to declare regular quarterly cash dividends. As of December 31, 2015, the latest available date, our records indicate there were 6,745 shareholders of record.

Stock Performance Graph

The performance graph below illustrates a five-year comparison of cumulative total returns based on an initial investment of \$100 in South Jersey Industries, Inc. common stock, as compared with the S&P 500 Stock Index and the S&P Utility Index for the five-year period through 2015.

This performance chart assumes:

- \$100 invested on December 31, 2010 in South Jersey Industries, Inc. common stock, in the S&P 500 Stock Index and in the S&P Utility Index; and
- All dividends are reinvested.

- (1) Represents discontinued business segments: sand mining and distribution operations sold in 1996 and fuel oil operations with related environmental liabilities in 1986 (See Note 3 to Consolidated Financial Statements).
- (2) Calculated as Income from Continuing Operations before Income Taxes and Interest Expense divided by Total Fixed Charges, which consists of Interest Expense and Capitalized Interest.
- (3) All share and per share amounts were adjusted for all periods presented for the 2-for-1 stock split, effected in the form of a stock dividend, effective on May 8, 2015. See Note 1 to the consolidated financial statements.
- (4) Calculated based on Income from Continuing Operations.
This section includes the non-generally accepted accounting principles (“non-GAAP”) financial measures of Economic Earnings and Economic Earnings per share. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 7 of this Report for a discussion regarding the use of non-GAAP financial measures.
- (5) Resulting from the termination of the contract at LVE Energy Partners, LLC to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada.
- (6)
- (7)

Resulting from a reserve for uncollectible accounts recorded by an Energenic subsidiary that owns and operates a central energy center and energy distribution system for a hotel, casino and entertainment complex in Atlantic City, New Jersey (see Note 7 to the consolidated financial statements). In 2014, this charge was excluded from Economic Earnings as the total economic impact of the proceedings had not been realized. During the second quarter of 2015, the Company, through its investment in Energenic, reduced the carrying value of the investment in this project. As such, this charge is now being included in Economic Earnings in 2015.

- (8) Represents additional depreciation expense within Economic Earnings on a solar generating facility. During 2012 an impairment charge was recorded within Income from Continuing Operations on a solar generating facility which reduced its depreciable basis and recurring depreciation expense. This impairment charge was excluded from Economic Earnings and, therefore, the related reduction in depreciation expense is being added back.

South Jersey Industries, Inc.
Part II

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW - South Jersey Industries, Inc. (SJI or the Company) is an energy services holding company that provides a variety of products and services through the following wholly-owned subsidiaries:

South Jersey Gas Company (SJG)

SJG, a New Jersey corporation, is an operating public utility company engaged in the purchase, transmission and sale of natural gas for residential, commercial and industrial use. SJG also sells natural gas and pipeline transportation capacity (off-system sales) on a wholesale basis to various customers on the interstate pipeline system and transports natural gas purchased directly from producers or suppliers to their customers. SJG contributed approximately 63.3% of SJI's net income on a consolidated basis in 2015.

SJG's service territory covers approximately 2,500 square miles in the southern part of New Jersey. It includes 117 municipalities throughout Atlantic, Cape May, Cumberland and Salem Counties and portions of Burlington, Camden and Gloucester Counties, with an estimated permanent population of 1.2 million. SJG benefits from its proximity to Philadelphia, PA and Wilmington, DE on the western side of its service territory and the popular shore communities on the eastern side. Continuing expansion of SJG's infrastructure throughout its seven-county region has fueled annual customer growth and creates opportunities for future extension into areas not yet served by natural gas.

SJG believes there is an ongoing transition of southern New Jersey's oceanfront communities from seasonal resorts to year round economies. In mainland communities, building expansions in the medical, education and retail sectors contributed to SJG's growth. At present, SJG serves approximately 71% of households within its territory with natural gas. SJG also serves southern New Jersey's diversified industrial base that includes processors of petroleum and agricultural products; chemical, glass and consumer goods manufacturers; and high technology industrial parks.

As of December 31, 2015, SJG served 373,100 residential, commercial and industrial customers in southern New Jersey, compared with 366,854 customers at December 31, 2014. No material part of SJG's business is dependent upon a single customer or a few customers. Gas sales, transportation and capacity release for 2015 amounted to 136.8 MMdts (million dekatherms), of which 58.5 MMdts were firm sales and transportation, 1.3 MMdts were interruptible sales and transportation and 77.0 MMdts were off-system sales and capacity release. The breakdown of firm sales and transportation includes 45.0% residential, 21.8% commercial, 20.7% industrial, and 12.5% cogeneration and electric generation. As of December 31, 2015, SJG served 348,093 residential customers, 24,565 commercial customers and 442 industrial customers. This includes 2015 net additions of 5,938 residential customers and 312 commercial customers.

SJG makes wholesale gas sales to gas marketers for resale and ultimate delivery to end users. These "off-system" sales are made possible through the issuance of the Federal Energy Regulatory Commission (FERC) Orders No. 547 and 636. Order No. 547 issued a blanket certificate of public convenience and necessity authorizing all parties, which are not interstate pipelines, to make FERC jurisdictional gas sales for resale at negotiated rates, while Order No. 636 allowed SJG to deliver gas at delivery points on the interstate pipeline system other than its own city gate stations and release excess pipeline capacity to third parties. During 2015, off-system sales amounted to 14.6 MMdts and capacity release amounted to 62.3 MMdts.

Supplies of natural gas available to SJG that are in excess of the quantity required by those customers who use gas as their sole source of fuel (firm customers) make possible the sale and transportation of gas on an interruptible basis to commercial and industrial customers whose equipment is capable of using natural gas or other fuels, such as fuel oil

and propane. The term “interruptible” is used in the sense that deliveries of natural gas may be terminated by SJG at any time if this action is necessary to meet the needs of higher priority customers as described in SJG's tariffs. In 2015, usage by interruptible customers, excluding off-system customers, amounted to 1.3 MMdts, or approximately 1.0% of the total throughput.

South Jersey Industries, Inc.
Part II

South Jersey Energy Solutions, LLC

SJI groups its nonutility operations into two categories: Energy Group and Energy Services. Energy Group includes wholesale energy, retail gas and other, and retail electric operations. Energy Services includes on-site energy production and appliance service operations. SJI established South Jersey Energy Solutions, LLC (SJES) as a direct subsidiary for the purpose of serving as a holding company for all of SJI's non-utility businesses. The following businesses are wholly-owned subsidiaries of SJES:

South Jersey Energy Company (SJE)

SJE provides services for the acquisition and transportation of natural gas and electricity for retail end users and markets total energy management services. SJE markets natural gas and electricity to commercial and industrial customers. SJE will become active in the residential market for electricity beginning in March 2016 as a result of several municipal aggregation bids won in the second half of 2015. Most customers served by SJE are located within New Jersey, northwestern Pennsylvania and New England. In 2015, SJE incurred a net loss that reduced SJI's net income by less than 1.0% on a consolidated basis.

South Jersey Resources Group, LLC (SJRG)

SJRG markets natural gas storage, commodity and transportation assets along with fuel management services on a wholesale basis. Customers include energy marketers, electric and gas utilities, power plants and natural gas producers. SJRG's marketing activities occur mainly in the mid-Atlantic, Appalachian and southern regions of the country.

SJRG also conducts price risk management activities by entering into a variety of physical and financial transactions including forward contracts, swap agreements, option contracts and futures contracts. In 2015, SJRG contributed approximately 20.2% of SJI's net income on a consolidated basis.

South Jersey Exploration, LLC (SJEX)

SJEX owns oil, gas and mineral rights in the Marcellus Shale region of Pennsylvania. SJEX is a wholly-owned subsidiary of SJES and is also considered part of SJI's wholesale energy operations. In 2015, SJEX contributed approximately 1.4% of SJI's net income on a consolidated basis.

Marina Energy LLC (Marina)

Marina develops and operates on-site energy-related projects. Marina's largest wholly-owned operating project provides cooling, heating and emergency power to the Borgata Hotel Casino & Spa in Atlantic City, NJ. Marina also owns numerous solar generation projects.

Marina's other projects include a 50% equity interest in Energenic-US, LLC (Energenic). Energenic develops, owns and operates on-site energy projects such as thermal facilities, combined heat and power facilities, landfill gas-fired electric production facilities and solar projects. On December 31, 2015, Energenic, Marina and its joint venture partner entered into two Equity Distribution and Purchase Agreements, pursuant to which Marina became the sole owner of eight of the Energenic projects and its joint venture partner became the sole owner of seven other Energenic projects. The project entities that are now wholly owned by Marina are ACB Energy Partners, LLC (ACB), AC Landfill Energy, LLC (ACLE), BC Landfill Energy, LLC (BCLE), SC Landfill Energy, LLC (SCLE), SX Landfill Energy, LLC (SXLE), MCS Energy Partners, LLC (MCS), NBS Energy Partners, LLC (NBS) & SBS Energy

Partners, LLC (SBS).

ACB owns and operates a natural gas fueled combined heating, cooling and power facility located in Atlantic City, New Jersey.

ACLE, BCLE, SCLE and SXLE own and operate landfill gas-fired electric production facilities in Atlantic, Burlington, Salem and Sussex Counties located in New Jersey.

MCS, NBS and SBS own and operate solar-generation sites located in New Jersey.

In 2015, Marina contributed approximately 14.7% of SJI's net income on a consolidated basis.

South Jersey Industries, Inc.
Part II

South Jersey Energy Service Plus, LLC (SJESP)

SJESP services residential and small commercial HVAC systems, installs small commercial HVAC systems, provides plumbing services and services appliances under warranty via a subcontractor arrangement as well as on a time and materials basis. SJESP serves southern New Jersey where it is one of the largest local HVAC service company's with nearly 25 experienced technicians. SJESP receives a commission on all new and renewed service contracts and is paid a fee to service those warranty contracts. In 2015, SJESP contributed less than 1.0% of SJI's net income on a consolidated basis.

Other

SJI Midstream, LLC owns a 20% equity investment in PennEast Pipeline Company, LLC, through which SJI, along with other investors, expect to construct an approximately 100-mile natural gas pipeline that will extend from Northeastern Pennsylvania into New Jersey, estimated to be completed in 2017.

Energy & Minerals, Inc. (EMI) principally manages liabilities associated with its discontinued operations of nonutility subsidiaries.

Primary Factors Affecting SJI's Business

SJI's stated long-term goals are to: 1) Grow Economic Earnings to \$150 million by 2020; 2) Improve the quality of earnings; 3) Strengthen the balance sheet; and 4) Maintain a low-to-moderate risk profile. Management established those goals in conjunction with SJI's Board of Directors based upon a number of different internal and external factors that characterize and influence SJI's current and expected future activities.

The following is a summary of the primary factors we expect to have the greatest impact on SJI's performance and ability to achieve the long-term goals going forward:

Business Model - In developing SJI's current business model, our focus has been on our core utility and natural extensions of that business. That focus enables us to concentrate on business activities that match our core competencies. Going forward we expect to pursue business opportunities that fit this model.

Customer Growth - Southern New Jersey, our primary area of operations, has not been immune to the issues impacting the new housing market nationally. Residential new construction, especially higher density, multi-family units, continues to improve slowly. Net customers for SJG grew 1.7% for 2015 as SJG continues its focus on customer conversions. In 2015, the 5,802 consumers converting their homes and businesses from other heating fuels, such as electric, propane or oil, represented approximately 66% of the total new customer acquisitions for the year. In comparison, conversions over the past five years averaged 5,195 annually. Customers in our service territory typically base their decisions to convert on comparisons of fuel costs, environmental considerations and efficiencies. As such, SJG began a comprehensive partnership with the State's Office of Clean Energy to educate consumers on energy efficiency and to promote the rebates and incentives available to natural gas users.

Regulatory Environment - SJG is primarily regulated by the New Jersey Board of Public Utilities (BPU). The BPU sets the rates that SJG charges its rate-regulated customers for services provided and establishes the terms of service under which SJG operates. SJG expects the BPU to continue to set rates and establish terms of service that will enable SJG to obtain a fair and reasonable return on capital invested. The BPU approved a Conservation Incentive Program (CIP) effective October 1, 2006, discussed in greater detail under "Results of Operations", that protects SJG's net income from severe fluctuations in gas used by residential, commercial and small industrial customers. In addition, in

February 2013, the BPU issued an Order approving the Accelerated Infrastructure Replacement Program (AIRP), a \$141.2 million program to replace cast iron and unprotected bare steel mains and services over a four-year period, with annual investments of approximately \$35.3 million. SJG earns a return on AIRP investments until they are included in rate base in future base rate proceedings. The BPU also issued an Order in August 2014 approving the Storm Hardening and Reliability Program (SHARP), a \$103.5 million program to replace low-pressure distribution mains and services with high-pressure mains and services on the barrier islands over a three-year period, with annual investments of approximately \$34.5 million. SJG earns a return on SHARP investments until they are included in rate base through annual rate adjustments.

South Jersey Industries, Inc.
Part II

Weather Conditions and Customer Usage Patterns - Usage patterns can be affected by a number of factors, such as wind, precipitation, temperature extremes and customer conservation. SJG's earnings are largely protected from fluctuations in temperatures by the CIP. The CIP has a stabilizing effect on utility earnings as SJG adjusts revenues when actual usage per customer experienced during an annual period varies from an established baseline usage per customer. Our nonutility retail marketing business is directly affected by weather conditions, as it does not have regulatory mechanisms that address weather volatility. The impact of different weather conditions on the earnings of our nonutility businesses is dependent on a range of different factors. Consequently, weather may impact the earnings of SJI's various subsidiaries in different, or even opposite, ways. Further, the profitability of individual subsidiaries may vary from year-to-year despite experiencing substantially similar weather conditions.

Changes in Natural Gas, Electricity and Solar Renewable Energy Credit (SREC) Prices - The utility's gas costs are passed on directly to customers without any profit margin added by SJG. The price the utility charges its periodic customers is set annually, with a regulatory mechanism in place to make limited adjustments to that price during the course of a year. In the event that gas cost increases would justify customer price increases greater than those permitted under the regulatory mechanism, SJG can petition the BPU for an incremental rate increase. High prices can make it more difficult for SJG's customers to pay their bills and may result in elevated levels of bad-debt expense. Among our nonutility activities, the business most likely to be impacted by changes in natural gas prices is our wholesale gas marketing business. Wholesale gas marketing typically benefits from volatility in gas prices during different points in time. The actual price of the commodity does not typically have an impact on the performance of this business line. Our ability to add and retain customers at our retail marketing business is affected by the relationship between the price that the utility charges customers for gas or electric and the cost available in the market at specific points in time. However, retail marketing accounts for a very small portion of SJI's overall activities. Marina Energy's SREC portfolio typically benefits from increases in individual SREC spot markets for any current or future energy year. Positive spot market movement affords Marina a potential opportunity to sell open production and improve upon or solidify future SREC revenue streams for particular SREC products.

Fuel Supply Management - SJRG has acquired pipeline transportation capacity that allows SJRG to match end users, many of which are merchant generators, with producers looking to find a long-term solution for their supply. We currently have eight fuel supply management transactions under contract and expect to continue expanding this business.

Midstream Investments - Design, engineering and environmental assessments continue moving forward on a natural gas pipeline in Pennsylvania and New Jersey. In September 2015, Midstream, along with other partners in the project, submitted an application to FERC for a permit to proceed with construction. The requested Certificate of Public Convenience and Necessity would authorize PennEast, of which Midstream has a 20% equity interest, to construct, install, own, operate and maintain this pipeline. We expect to make additional investments in similar midstream projects.

Changes in Interest Rates - SJI has operated in a relatively low interest rate environment over the past several years. Rising interest rates would raise the expense associated with existing variable-rate debt and all issuances of new debt. We have sought to mitigate the impact of a potential rising rate environment by directly issuing fixed-rate debt, or by entering into derivative transactions to hedge against rising interest rates.

Labor and Benefit Costs - Labor and benefit costs have a significant impact on SJI's profitability. Benefit costs, especially those related to pension and health care, have risen in recent years. We seek to manage these costs by revising health care plans offered to existing employees, capping postretirement health care benefits, and changing health care and pension packages offered to new hires. We expect savings from these changes to gradually increase as new hires replace retiring employees. Our workforce totaled approximately 720 employees at the end of 2015, of

which approximately 320 are unionized.

Balance Sheet Strength - Our goal is to maintain a strong balance sheet. Our average equity-to-capitalization ratio was approximately 42% as calculated for the four quarters of 2015 as compared with 44% in 2014. A strong balance sheet assists us in maintaining the financial flexibility necessary to take advantage of growth opportunities and to address volatile economic and commodity markets while maintaining a low-to-moderate risk platform.

CRITICAL ACCOUNTING POLICIES - ESTIMATES AND ASSUMPTIONS - As described in the notes to our consolidated financial statements, management must make estimates and assumptions that affect the amounts reported in the consolidated financial statements and related disclosures. Actual results could differ from those estimates. Five types of transactions presented in our consolidated financial statements require a significant amount of judgment and estimation. These relate to regulatory accounting, derivatives, environmental remediation costs, pension and other postretirement benefit costs, and revenue recognition.

South Jersey Industries, Inc.
Part II

Regulatory Accounting - SJI's largest subsidiary, SJG, maintains its accounts according to the Uniform System of Accounts as prescribed by the BPU. As a result of the ratemaking process, SJG is required to follow Financial Accounting Standards Board (FASB) ASC Topic 980 - "Regulated Operations." SJG is required under Topic 980 to recognize the impact of regulatory decisions on its financial statements. SJG is required under its Basic Gas Supply Service (BGSS) clause to forecast its natural gas costs and customer consumption in setting its rates. Subject to BPU approval, SJG is able to recover or return the difference between gas cost recoveries and the actual costs of gas through a BGSS charge to customers. SJG records any over/under recoveries as a regulatory asset or liability on the consolidated balance sheets and reflects them in the BGSS charge to customers in subsequent years. SJG also enters into derivatives that are used to hedge natural gas purchases. The offset to the resulting derivative assets or liabilities is recorded as a regulatory asset or liability on the consolidated balance sheets. See additional detailed discussions on Rates and Regulatory Actions in Note 10 to the consolidated financial statements.

Derivatives - SJI recognizes assets or liabilities for contracts that qualify as derivatives that are entered into by its subsidiaries when such contracts are executed. We record contracts at their fair value in accordance with FASB ASC Topic 815 - "Derivatives and Hedging." We record changes in the fair value of the effective portion of derivatives qualifying as cash flow hedges, net of tax, in Accumulated Other Comprehensive Loss and recognize such changes in the income statement when the hedged item affects earnings. Changes in the fair value of derivatives not designated as hedges are recorded in earnings in the current period. Currently we do not have any energy-related derivative instruments designated as cash flow hedges. Hedge accounting has been discontinued for the remaining interest rate derivatives. As a result, unrealized gains and losses on these derivatives, that were previously recorded in Accumulated Other Comprehensive Loss on the consolidated balance sheets, are being recorded into earnings over the remaining life of the derivative. These derivatives will mature in 2026.

Certain derivatives that result in the physical delivery of the commodity may meet the criteria to be accounted for as normal purchases and normal sales, if so designated, in which case the contract is not marked-to-market, but rather is accounted for when the commodity is delivered. Due to the application of regulatory accounting principles generally accepted in the United States of America (GAAP), derivatives related to SJG's gas purchases that are marked-to-market are recorded through the BGSS. SJG periodically enters into financial derivatives to hedge against forward price risk. These derivatives are recorded at fair value with an offset to regulatory assets and liabilities through SJG's BGSS, subject to BPU approval (See Notes 10 and 11 to the consolidated financial statements). We adjust the fair value of the contracts each reporting period for changes in the market.

As discussed in Notes 16 and 17 of the consolidated financial statements, energy-related derivative instruments are traded in both exchange-based and non-exchange-based markets. Exchange-based contracts are valued using unadjusted quoted market sources in active markets and are categorized in Level 1 in the fair value hierarchy established by FASB ASC Topic 820 - "Fair Value Measurements and Disclosures." Certain non-exchange-based contracts are valued using indicative non-binding price quotations available through brokers or from over-the-counter, on-line exchanges and are categorized in Level 2. These price quotations reflect the average of the bid-ask mid-point prices and are obtained from sources that management believes provide the most liquid market. Management reviews and corroborates the price quotations with at least one additional source to ensure the prices are observable market information, which includes consideration of actual transaction volumes, market delivery points, bid-ask spreads and contract duration. Derivative instruments that are used to limit our exposure to changes in interest rates on variable-rate, long-term debt are valued using quoted prices on commonly quoted intervals, which are interpolated for periods different than the quoted intervals, as inputs to a market valuation model. Market inputs can generally be verified and model selection does not involve significant management judgment, as a result, these instruments are categorized in Level 2 in the fair value hierarchy. For non-exchange-based derivatives that trade in less liquid markets with limited pricing information, model inputs generally would include both observable and unobservable inputs. In instances where observable data is unavailable, management considers the assumptions that market participants would

use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility and contract duration. Such instruments are categorized in Level 3 in the fair value hierarchy as the model inputs generally are not observable. Counterparty credit risk and the credit risk of SJI, are incorporated and considered in the valuation of all derivative instruments as appropriate. The effect of counterparty credit risk and the credit risk of SJI on the derivative valuations is not significant.

Significant Unobservable Inputs - Management uses the discounted cash flow model to value Level 3 physical and financial forwards, which calculates fair values based on forward market prices, original transaction prices, volumes, risk-free rate of return and credit spreads. Inputs to the valuation model are reviewed and revised as needed, based on historical information, updated market data, market liquidity and relationships, and changes in third party pricing sources. The validity of the fair values and changes in these values from period to period are examined and qualified against historical expectations by the risk management function. If any discrepancies are identified during this process, the fair values or the market pricing information is evaluated further and adjusted, if necessary.

South Jersey Industries, Inc.
Part II

Level 3 valuation methods for natural gas derivative contracts include utilizing another location in close proximity adjusted for certain pipeline charges to derive a basis value. The significant unobservable inputs used in the fair value measurement of certain natural gas contracts consist of forward prices developed based on industry-standard methodologies. Significant increases (decreases) in these forward prices for purchases of natural gas would result in a directionally similar impact to the fair value measurement and for sales of natural gas would result in a directionally opposite impact to the fair value measurement. Level 3 valuation methods for electric represent the value of the contract marked to the forward wholesale curve, as provided by daily exchange quotes for delivered electricity. The significant unobservable inputs used in the fair value measurement of electric contracts consist of fixed contracted electrical load profiles; therefore, no change in unobservable inputs would occur. Unobservable inputs are updated daily using industry-standard techniques. Management reviews and corroborates the price quotations to ensure the prices are observable which includes consideration of actual transaction volumes, market delivery points, bid-ask spreads and contract duration.

Environmental Remediation Costs -We estimate a range of future costs based on projected investigation and work plans using existing technologies. In preparing consolidated financial statements, SJI records liabilities for future costs using the lower end of the range because a single reliable estimation point is not feasible due to the amount of uncertainty involved in the nature of projected remediation efforts and the long period over which remediation efforts will continue. We update estimates each year to take into account past efforts, changes in work plans, remediation technologies, government regulations and site specific requirements (See Note 15 to the consolidated financial statements).

Pension and Other Postretirement Benefit Costs - The costs of providing pension and other postretirement employee benefits are impacted by actual plan experience as well as assumptions of future experience. Employee demographics, plan contributions, investment performance, and assumptions concerning mortality, return on plan assets, discount rates and health care cost trends all have a significant impact on determining our projected benefit obligations. We evaluate these assumptions annually and adjust them accordingly. These adjustments could result in significant changes to the net periodic benefit costs of providing such benefits and the related liabilities recognized by SJI.

During 2013, discount rates increased and equity markets continued to outperform management's expectations. As a result, the Company experienced a \$5.3 million decrease in the cost of providing such benefits in 2014.

A subsequent decrease in discount rates in 2014, coupled with lower than expected returns on plan assets and the impact of new mortality tables released by the Society of Actuaries in late 2014, resulted in a \$7.6 million increase in the cost of providing such benefits in 2015. Management took measures to mitigate this increase by contributing an aggregate of \$26.0 million to its pension and postretirement healthcare plans in January 2015. These contributions provided for a \$1.9 million incremental earnings credit partially offsetting the expense, resulting in a net increase in retirement benefit costs of \$5.7 million in 2015.

During 2015, a combination of factors resulted in lowering the Company's expected cost of providing pension and other postretirement healthcare costs in 2016. These include increasing discount rates and updated mortality tables released by the Society of Actuaries again in late 2015. Further, the Company changed the structure of its postretirement healthcare plan for retirees to provide them with a fixed contribution to a healthcare reimbursement account and allowing them to obtain coverage from healthcare exchanges, rather than utilizing the company-provided healthcare plan. These positive factors are partially offset by lower than expected returns on plan assets due to poor performance in the equity markets in 2015. As a result of these factors, the Company is estimating a \$1.1 million net decrease in the cost of providing these benefits in 2016.

Additional information regarding investment returns and assumptions can be found in Pension and Other Postretirement Benefits in Note 12 to the consolidated financial statements.

Revenue Recognition - Gas and electricity revenues are recognized in the period the commodity is delivered to customers. SJG, SJRG and SJE bill customers monthly. A majority of SJG and SJE customers have their meters read on a cycle basis throughout the month. For SJG and SJE retail customers that are not billed at the end of each month, we record an estimate to recognize unbilled revenues for gas/electricity delivered from the date of the last meter reading to the end of the month. SJG's and SJE's unbilled revenue for natural gas is estimated each month based on monthly deliveries into the system; unaccounted for natural gas based on historical results; customer-specific use factors, when available; actual temperatures during the period; and applicable customer rates. SJE's unbilled revenue for retail electricity is based on customer-specific use factors and applicable customer rates. We bill SJG customers at rates approved by the BPU. SJE and SJRG customers are billed at rates negotiated between the parties.

SJRG presents revenues and expenses related to its energy trading activities on a net basis in Operating Revenues - Nonutility in the statements of consolidated income consistent with GAAP. This net presentation has no effect on operating income or net income.

South Jersey Industries, Inc.
Part II

We recognize revenues related to SJESP's appliance service contracts on a monthly basis as work is completed or commissions are earned. Revenues related to services provided on a time and materials basis are recognized on a monthly basis as the services are provided.

Marina recognizes revenue on a monthly basis as services are provided and for on-site energy production that is delivered to its customers.

The BPU allows SJG to recover gas costs in rates through the BGSS price structure. SJG defers over/under recoveries of gas costs and includes them in subsequent adjustments to the BGSS rate. These adjustments result in over/under recoveries of gas costs being included in rates during future periods. As a result of these deferrals, utility revenue recognition does not directly translate to profitability. While SJG realizes profits on gas sales during the month of providing the utility service, significant shifts in revenue recognition may result from the various recovery clauses approved by the BPU. This revenue recognition process does not shift earnings between periods, as these clauses only provide for cost recovery on a dollar-for-dollar basis (See Notes 10 and 11 to the consolidated financial statements).

SJG filed a petition in March 2013 to extend the Conservation Incentive Program (CIP) program and, in May 2014, the BPU approved the continuation of the CIP, with certain modifications. Each CIP year begins October 1 and ends September 30 of the subsequent year. On a monthly basis during a CIP year, SJG records adjustments to earnings based on weather and customer usage factors, as incurred. Subsequent to each year, SJG makes filings with the BPU to review and approve amounts recorded under the CIP. BPU-approved cash inflows or outflows generally will not begin until the next CIP year and have no impact on earnings at that time.

NEW ACCOUNTING PRONOUNCEMENTS - See detailed discussions concerning New Accounting Pronouncements and their impact on SJI in Note 1 to the consolidated financial statements.

RATES AND REGULATION - As a public utility, SJG is subject to regulation by the BPU. Additionally, the Natural Gas Policy Act, which was enacted in November 1978, contains provisions for Federal regulation of certain aspects of SJG's business. SJG is affected by Federal regulation with respect to transportation and pricing policies applicable to pipeline capacity from Transcontinental Gas Pipe Line Company, LLC (SJG's major supplier), Columbia Gas Transmission, LLC and Dominion Transmission, Inc., since such services are provided under rates and terms established under the jurisdiction of the FERC. SJG's retail sales are made under rate schedules within a tariff filed with, and subject to the jurisdiction of, the BPU. These rate schedules provide primarily for either block rates or demand/commodity rate structures. SJG's primary rate mechanisms include base rates, the Basic Gas Supply Service Clause (BGSS), Accelerated Infrastructure Programs, Energy Efficiency Tracker (EET) and the Conservation Incentive Program (CIP).

The CIP is a BPU-approved program that is designed to eliminate the link between SJG profits and the quantity of natural gas SJG sells, and to foster conservation efforts. With the CIP, SJG's profits are tied to the number of customers served and how efficiently SJG serves them, thus allowing SJG to focus on encouraging conservation and energy efficiency among its customers without negatively impacting net income. The CIP tracking mechanism adjusts earnings based on weather, and also adjusts SJG's earnings when actual usage per customer experienced during an annual period varies from an established baseline usage per customer.

Utility earnings are recognized during current periods based upon the application of the CIP. The cash impact of variations in customer usage will result in cash being collected from, or returned to, customers during the subsequent CIP year, which runs from October 1 to September 30.

South Jersey Industries, Inc.
Part II

The effects of the CIP on SJG's net income for the last three years and the associated weather comparisons were as follows (\$'s in millions):

| | 2015 | 2014 | 2013 |
|-------------------------------------|-------------|-------------|--------------|
| Net Income Impact: | | | |
| CIP - Weather Related | \$0.9 | \$(4.7) | \$(0.3) |
| CIP - Usage Related | (1.9) | 2.0 | 3.4 |
| Total Net Income Impact | \$(1.0) | \$(2.7) | \$3.1 |
| Weather Compared to 20-Year Average | 3.1% warmer | 7.5% colder | 0.6% colder |
| Weather Compared to Prior Year | 9.6% warmer | 4.6% colder | 20.6% colder |

As part of the CIP, SJG is required to implement additional conservation programs, including customized customer communication and outreach efforts, targeted upgrade furnace efficiency packages, financing offers, and an outreach program to speak to local and state institutional constituents. SJG is also required to reduce gas supply and storage assets and their associated fees. Note that changes in fees associated with supply and storage assets have no effect on SJG's net income as these costs are passed through directly to customers on a dollar-for-dollar basis.

Earnings accrued and payments received under the CIP are limited to a level that will not cause SJG's return on equity to exceed 9.75% (excluding earnings from off-system gas sales and certain other tariff clauses) and CIP recoveries are limited by the annualized savings attained from reducing gas supply and storage assets.

See additional detailed discussions on Rates and Regulatory Actions in Note 10 to the consolidated financial statements.

ENVIRONMENTAL REMEDIATION - See detailed discussion concerning Environmental Remediation in Note 15 to the consolidated financial statements.

COMPETITION - SJG's franchises are non-exclusive. Currently, no other utility provides retail gas distribution services within SJG's territory. SJG does not expect any other utilities to do so in the foreseeable future because of the extensive investment required for utility plant and related costs. SJG competes with oil, propane and electricity suppliers for residential, commercial and industrial users, with alternative fuel source providers (wind, solar and fuel cells) based upon price, convenience and environmental factors, and with other marketers/brokers in the selling of wholesale natural gas services. The market for natural gas commodity sales is subject to competition due to deregulation. SJG's competitive position was enhanced while maintaining margins by using an unbundled tariff. This tariff allows full cost-of-service recovery when transporting gas for SJG's customers. Under this tariff, SJG profits from transporting, rather than selling, the commodity. SJG's residential, commercial and industrial customers can choose their supplier, while SJG recovers the cost of service through transportation service (See Customer Choice Legislation below).

SJRG competes in the wholesale natural gas market against a wide array of competitors on a cost competitive, term of service, and reliability basis. SJRG has been a reliable energy provider in this arena for 20 years.

Marina competes with other companies that develop and operate similar types of on-site energy production. Marina also faces competition from customers' preferences for alternative technologies for energy production, as well as those customers that address their energy needs internally.

SJE competes with utilities and other third-party marketers to sell the unregulated natural gas and electricity commodity to customers. Marketers compete largely on price, which is driven by the commodity market. While the utilities are typically indifferent as to where customers get their gas or electricity, the price they set for the commodity they sell creates competition for SJE. Based on its market share, SJE is one of the largest marketers of natural gas in southern New Jersey as of December 31, 2015. In addition, similar to SJG, SJE faces competition from other energy products.

SJESP competes primarily with smaller, local contractors in southern New Jersey that service residential and commercial HVAC systems and provide major appliance repair and plumbing services. These contractors typically only serve their local communities and do not serve the entire southern part of New Jersey.

South Jersey Industries, Inc.
Part II

CUSTOMER CHOICE LEGISLATION - All residential natural gas customers in New Jersey can choose their natural gas commodity supplier under the terms of the "Electric Discount and Energy Competition Act of 1999." This bill created the framework and necessary time schedules for the restructuring of the state's electric and natural gas utilities. The Act established unbundling, where redesigned utility rate structures allow natural gas and electric consumers to choose their energy supplier. It also established time frames for instituting competitive services for customer account functions and for determining whether basic gas supply services should become competitive. Customers purchasing natural gas from a provider other than the local utility (the "marketer") are charged for the gas costs by the marketer and charged for the transportation costs by the utility. The total number of customers in SJG's service territory purchasing natural gas from a marketer averaged 36,191, 41,837 and 46,872 during 2015, 2014 and 2013, respectively.

RESULTS OF OPERATIONS:

SJI operates in several different reportable operating segments. These segments are as follows:

Gas utility operations (SJG) consist primarily of natural gas distribution to residential, commercial and industrial customers.

Wholesale energy operations include the activities of SJRG and SJEX.

SJE is involved in both retail gas and retail electric activities.

Retail gas and other operations include natural gas acquisition and transportation service business lines.

Retail electric operations consist of electricity acquisition and transportation to commercial and industrial customers.

On-site energy production consists of Marina's thermal energy facility and other energy-related projects. Also included in this segment are the activities of ACB, ACLE, BCLE, SCLE, SXLE, MCS, NBS and SBS. These entities became wholly-owned subsidiaries of Marina on December 31, 2015 (see Note 3 to the consolidated financial statements).

Appliance service operations includes SJESP's servicing of appliances under warranty via a subcontractor arrangement as well as on a time and materials basis.

The activities of Midstream are a part of the Corporate & Services segment.

SJI groups its nonutility operations into two categories: Energy Group and Energy Services. Energy Group includes wholesale energy, retail gas and other, and retail electric operations. Energy Services includes on-site energy production and appliance service operations.

SJI's net income for 2015 increased \$8.1 million, or 8.3%, to \$105.1 million compared to 2014 primarily as a result of the following:

The net income contribution from SJRG increased \$15.6 million to net income of \$21.2 million due primarily to an approximately \$11.1 million increase resulting from the change in unrealized gains and losses on derivatives used by the wholesale energy operations to mitigate natural gas commodity price risk as discussed under "Operating Revenues - Energy Group" below, along with an approximately \$4.5 million increase related to higher storage hedge gains and higher daily trading margins, partially offset by lower storage volumes sold compared to the prior year as described in "Gross Margin - Energy Group" below.

The net income contribution from Marina decreased \$6.6 million to \$15.5 million due primarily to the impact of a reduction in the carrying amount of an investment, along with an accrual of the cost to settle a legal claim, at one of Energenic's operating subsidiaries, of which Marina has a 50% equity interest (see Note 7 to the consolidated financial statements). Partially offsetting this decrease is the impact of the investment tax credits available on renewable energy facilities compared to the prior year.

The net income contribution from SJE decreased \$1.6 million to a net loss of \$0.7 million due primarily to the change in unrealized gains and losses on forward financial contracts used to mitigate price risk on retail gas as discussed under "Operating Revenues – Nonutility" below.

SJI's net income for 2014 increased \$15.5 million, or 18.9%, to \$97.0 million compared to 2013 primarily as a result of the following:

The net income contribution from SJRG increased \$28.0 million to net income of \$5.6 million due primarily to an approximately \$16.6 million increase related to higher daily trading margins and higher storage volumes sold as described in "Gross Margin - Energy Group" below, along with an \$11.4 million increase resulting from the change in unrealized gains and losses on derivatives used by the wholesale energy operations to mitigate natural gas commodity price risk, as discussed under "Operating Revenues - Energy Group" below.

South Jersey Industries, Inc.
Part II

The net income contribution from SJG increased \$4.2 million to \$66.5 million due primarily to increases in the accelerated infrastructure programs and customer growth over the prior year.

The net income contribution from Marina decreased \$16.9 million to \$22.0 million due primarily to a reserve for uncollectible accounts established at one of Energenic's operating subsidiaries, of which Marina has a 50% equity interest (see Note 15 to the consolidated financial statements), along with the impact of the investment tax credits available on renewable energy facilities as compared to the prior year.

A significant portion of the volatility in operating results is due to the impact of the accounting methods associated with SJI's derivative activities. The Company uses derivatives to limit its exposure to market risk on transactions to buy, sell, transport and store natural gas and to buy and sell retail electricity. The Company also uses derivatives to limit its exposure to increasing interest rates on variable-rate debt.

The types of transactions that cause the most significant volatility in operating results are as follows:

The wholesale energy operations at SJRG purchases and holds natural gas in storage and maintains capacity on interstate pipelines to earn profit margins in the future. The wholesale energy operations utilize derivatives to mitigate commodity price risk in order to substantially lock-in the profit margin that will ultimately be realized. However, both gas stored in inventory and pipeline capacity are not considered derivatives and are not subject to fair value accounting. Conversely, the derivatives used to reduce the risk associated with a change in the value of inventory and pipeline capacity are accounted for at fair value, with changes in fair value recorded in operating results in the period of change. As a result, earnings are subject to volatility as the market price of derivatives change, even when the underlying hedged value of inventory and pipeline capacity are unchanged. Additionally, volatility in earnings is created when realized gains and losses on derivatives used to mitigate commodity price risk on expected future purchases of gas injected into storage are recognized in earnings when the derivatives settle, but the cost of the related gas in storage is not recognized in earnings until the period of withdrawal. This volatility can be significant from period to period. Over time, gains or losses on the sale of gas in storage, as well as use of capacity, will be offset by losses or gains on the derivatives, resulting in the realization of the profit margin expected when the transactions were initiated.

The retail electric operations at SJE use forward contracts to mitigate commodity price risk on fixed price electric contracts with customers. In accordance with GAAP, the forward contracts are recorded at fair value, with changes in fair value recorded in earnings in the period of change. Several related customer contracts are not considered derivatives and, therefore, are not recorded in earnings until the electricity is delivered. As a result, earnings are subject to volatility as the market price of the forward contracts change, even when the underlying hedged value of the customer contract is unchanged. Over time, gains or losses on the sale of the fixed price electric under contract will be offset by losses or gains on the forward contracts, resulting in the realization of the profit margin expected when the transactions were initiated.

As a result, management also uses the non-generally accepted accounting principles ("non-GAAP") financial measures of Economic Earnings and Economic Earnings per share when evaluating the results of operations for its nonutility operations. These non-GAAP financial measures should not be considered as an alternative to GAAP measures, such as net income, operating income, earnings per share from continuing operations or any other GAAP measure of liquidity or financial performance.

We define Economic Earnings as: Income from continuing operations, (a) less the change in unrealized gains and plus the change in unrealized losses, as applicable and in each case after tax, on all derivative transactions, and (b) less

realized gains and plus realized losses, as applicable and in each case after tax, on all commodity derivative transactions attributed to expected purchases of gas in storage to match the recognition of these gains and losses with the recognition of the related cost of the gas in storage in the period of withdrawal, and (c) less the impact of transactions or contractual arrangements where the true economic impact will be realized in a future period. With respect to the third part of the definition of Economic Earnings:

For the years ended December 31, 2015, 2014 and 2013, Economic Earnings includes additional depreciation expense on a solar generating facility. During 2012, an impairment charge was recorded within Income from Continuing Operations on a solar generating facility which reduced its depreciable basis and recurring depreciation expense. This impairment charge was excluded from Economic Earnings and, therefore, the related reduction in depreciation expense is being added back.

South Jersey Industries, Inc.
Part II

For the year ended December 31, 2015, Economic Earnings includes net losses of \$1.5 million (net of tax) from affiliated companies that were excluded from Economic Earnings for the year ended December 31, 2014. These adjustments are the result of a reserve for uncollectible accounts recorded by an Energenic subsidiary that owns and operates a central energy center and energy distribution system for a hotel, casino and entertainment complex in Atlantic City, New Jersey (see Note 7 to the consolidated financial statements). In 2014, this charge was excluded from Economic Earnings as the total economic impact of the proceedings had not been realized. During the second quarter of 2015, the Company, through its investment in Energenic, reduced the carrying value of the investment in this project. As such, this charge is now being included in Economic Earnings for the year ended December 31, 2015.

For the year ended December 31, 2013, Economic Earnings excludes a \$0.8 million loss (net of tax) from affiliated companies, not part of ongoing operations. This adjustment is the result of the termination of the contract at LVE Energy Partners, LLC ("LVE") and is being excluded because all of the assets of LVE have been sold and LVE is no longer considered part of the ongoing operations of the Company. LVE was dissolved prior to December 31, 2013; as such, there was no gain/loss from affiliated companies not part of ongoing operations for the years ended December 31, 2015 or 2014.

Economic Earnings is a significant performance metric used by our management to indicate the amount and timing of income from continuing operations that we expect to earn after taking into account the impact of derivative instruments on the related transactions and transactions or contractual arrangements where the true economic impact will be realized in a future period. Specifically, we believe that this financial measure indicates to investors the profitability of the entire derivative-related transaction and not just the portion that is subject to mark-to-market valuation under GAAP. Considering only the change in market value on the derivative side of the transaction can produce a false sense as to the ultimate profitability of the total transaction as no change in value is reflected for the non-derivative portion of the transaction.

Economic Earnings for 2015 decreased \$5.0 million, or 4.8%, to \$99.0 million compared to 2014 primarily as a result of the following:

The income contribution from Marina decreased \$10.0 million to \$14.0 million due primarily to the impact of a reduction in the carrying amount of an investment, along with an accrual of the cost to settle a legal claim, at one of Energenic's operating subsidiaries, of which Marina has a 50% equity interest (see Note 7 to the consolidated financial statements). Partially offsetting this decrease is the impact of the investment tax credits available on renewable energy facilities compared to the prior year.

The income contribution from SJRG increased \$4.5 million to \$13.6 million due primarily to higher storage hedge gains and higher daily trading margins, partially offset with lower storage volumes sold compared to the prior year as described in "Gross Margin - Energy Group" below.

Economic Earnings for 2014 increased \$6.9 million, or 7.1%, to \$104.0 million compared to 2013 primarily as a result of the following:

The income contribution from SJRG increased \$16.6 million to \$9.0 million due primarily to higher daily trading margins and higher storage volumes sold as described in "Gross Margin - Energy Group" below.

The income contribution from SJG increased \$4.2 million to \$66.5 million due primarily to increases in the accelerated infrastructure programs and customer growth over the prior year.

The income contribution from Marina decreased \$14.4 million to \$24.0 million due primarily to a reserve for uncollectible accounts established at one of Energenic's operating subsidiaries, of which Marina has a 50% equity interest (see Note 15 to the consolidated financial statements), along with the impact of the investment tax credits available on renewable energy facilities as compared to the prior year.

South Jersey Industries, Inc.
Part II

The following table presents a reconciliation of our income from continuing operations and earnings per share from continuing operations to Economic Earnings and Economic Earnings per share (in thousands, except per share data):

| | 2015 | 2014 | 2013 |
|--|-----------|-----------|----------|
| Income from Continuing Operations | \$105,610 | \$97,628 | \$82,389 |
| Minus/Plus: | | | |
| Unrealized Mark-to-Market (Gains)/Losses on Derivatives | (5,066 |)4,500 | 14,058 |
| Realized Losses/(Gains) on Inventory Injection Hedges | 54 | 427 | (4 |
| Net Loss from Affiliated Companies, Not Part of Ongoing Operations (A) | — | — | 751 |
| Net Loss from Affiliated Companies (B) | (1,524 |)1,524 | — |
| Other (C) | (100 |) (100 |) (100 |
| Economic Earnings | \$98,974 | \$103,979 | \$97,094 |
| Earnings per Share from Continuing Operations (D) | \$1.53 | \$1.47 | \$1.29 |
| Minus/Plus: | | | |
| Unrealized Mark-to-Market (Gains)/Losses on Derivatives | (0.07 |)0.07 | 0.21 |
| Realized Losses on Inventory Injection Hedges | — | — | — |

South Jersey Industries, Inc.

Part II

(A) Resulting from the termination of the contract at LVE Energy Partners, LLC to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada.

(B) Resulting from a reserve for uncollectible accounts recorded by an Energenic subsidiary that owns and operates a central energy center and energy distribution system for a hotel, casino and entertainment complex in Atlantic City, New Jersey (see Note 7 to the consolidated financial statements). In 2014, this charge was excluded from Economic Earnings as the total economic impact of the proceedings had not been realized. During the second quarter of 2015, the Company, through its investment in Energenic, reduced the carrying value of the investment in this project. As such, this charge is now being included in Economic Earnings in 2015.

(C) Represents additional depreciation expense within Economic Earnings on a solar generating facility. During 2012, an impairment charge was recorded within Income from Continuing Operations on a solar generating facility which reduced its depreciable basis and recurring depreciation expense. This impairment charge was excluded from Economic Earnings and therefore the related reduction in depreciation expense is being added back.

(D) All per share amounts were adjusted for the 2-for-1 stock split, effected in the form of a stock dividend, effective on May 8, 2015. See Note 1 to the consolidated financial statements.

(E) For 2015 and 2014, determined using a combined average statutory tax rate of 40%. For 2013, determined using a combined statutory tax rate of 41%.

* Represents expenses for which there is a corresponding credit in operating revenues. Therefore, such recoveries have no impact on our financial results.

** Utility Margin is further defined under the caption "Margin-Gas Utility Operations" below.

*** Each day, each degree of average daily temperature below 65 degrees Fahrenheit is counted as one heating degree-day. Annual degree-days is the sum of the daily totals.

Throughput - Gas Utility Operations - Total gas throughput decreased 1.5 million decatherms (MMdts), or 1.0%, from 2014 to 2015 due to lower throughput in the firm markets. Residential firm sales and transportation throughput decreased by 1.4 MMdts as a result of weather that was 9.6% warmer than prior year, however, the largest decline in firm throughput was experienced in cogeneration transportation, as reflected under "Firm Transportation - Cogeneration and electric generation" in the Throughput table above. Supply disruptions at a cogeneration facility in our territory during 2014 created opportunity for SJG. That customer was being supplied directly by an interstate pipeline. However, with the disruption, SJG had transported a significant volume of commodity to this cogeneration facility to meet its needs in 2014. That disruption has since been remedied, resulting in lower firm transportation throughput in 2015. Partially offsetting these decreases was a 5.2 MMdts increase in Off-System Sales (OSS) throughput from 2014 to 2015. This was primarily due to warmer than normal weather, which created less demand in

the Company's service territory and more supply available for OSS.

South Jersey Industries, Inc.
Part II

Total gas throughput increased 26.5 MMdts, or 23.8%, from 2013 to 2014 primarily due to higher capacity release. Capacity release increased 22.1 MMdts as a result of the expiration of an Asset Management Agreement (AMA) that was in effect during 2013. Volumes released under AMA's are not included in the throughput table above. The capacity previously committed under the expired AMA was available to be released during 2014. While capacity release can create significant volatility in throughput, it has little impact on revenue and margin generated from such activity. Firm throughput increased 4.8 MMdts, or 7.9%, during 2014 as a result of weather that was 4.6% colder than the previous year and the addition of 4,598 customers during 2014, representing 1.3% customer growth. In addition, supply disruptions at a cogeneration facility in SJG's territory during 2014 created opportunity for SJG. That customer was being supplied directly by an interstate pipeline. However, with the disruption, SJG has been transporting a significant volume of commodity to this cogeneration facility to meet its needs. Partially offsetting these increases was a 0.5 MMdts reduction in electric generation firm sales to a regional electric generation customer. This resulted from lower weather-driven demand for electric generation during the 2014 summer season as weather was not as hot as in the previous summer.

Operating Revenues - Gas Utility Operations 2015 vs. 2014 - Revenues increased \$28.0 million, or 5.6%, during 2015 compared with 2014 after eliminating intercompany transactions due to higher firm revenue. Total firm revenue increased \$31.1 million, or 7.1%, in 2015 as a result of the settlement of SJG's base rate case and a 22.1% increase in SJG's periodic BGSS rate, both effective October 1, 2014, as discussed in Note 10 and 11 to the consolidated financial statements. SJG subsequently decreased its periodic BGSS rate by 18.6% effective October 1, 2015; however, the impact of the higher rate in effect for the majority of the year increased revenue by approximately \$25.4 million in 2015, compared with 2014. While changes in gas costs and BGSS recoveries/refunds fluctuate from period to period, SJG does not profit from the sale of the commodity. Therefore, corresponding fluctuations in Operating Revenue or Cost of Sales have no impact on SJG profitability, as further discussed below under the caption "Margin - Gas Utility Operations". In addition, the settlement of SJG's base rate case added \$15.5 million of incremental revenue to 2015, compared with 2014. The addition of 6,246 additional customers in 2015 also contributed to higher firm revenue; however, the impact of 9.6% warmer weather more than offset the impact of customer growth during the year. While warmer weather decreased firm sales volume and revenue, the revenue decrease has little impact on SJG profitability under the operation of the Conservation Incentive Program (CIP), as discussed under the caption "Margin - Gas Utility Operations."

Operating Revenues - Gas Utility Operations 2014 vs. 2013 - Revenues increased \$55.8 million, or 12.6%, during 2014 compared with 2013 after eliminating intercompany transactions due to higher firm sales and Off-System Sales (OSS). Total firm revenue increased \$45.2 million, or 11.4%, in 2014 as a result of 4.6% colder weather and 4,598 additional customers compared with 2013, as previously discussed under "Throughput-Gas Utility Operations." While colder weather increased firm sales revenue, the revenue increase has little impact on SJG profitability under the operation of the CIP, as discussed below under the captions "Conservation Incentive Program (CIP)" and "Margin-Gas Utility Operations." As further discussed under "Margin-Gas Utility Operations", the roll in of certain capital investments into base rates effective October 1, 2013, increased revenue by approximately \$10.4 million during 2014. Effective October 1, 2014, SJG also had a base rate increase and a 22.1% increase in its periodic BGSS rate, as discussed in Notes 10 and 11 to the consolidated financial statements. The impact of these rate increases on revenue was \$7.1 million and \$4.9 million, respectively. Higher OSS unit prices resulted in a \$11.3 million, or 27.3%, increase in OSS revenues during 2014, compared with 2013. Colder weather led to greater demand during the first quarter of 2014, allowing SJG to increase revenue from such sales. However, the impact of changes in OSS activity does not have a material impact on the earnings of SJG, as SJG is required to return 85% of the profits of such activity to its ratepayers. Earnings from OSS can be seen in the "Margin" table above.

Operating Revenues - Energy Group 2015 vs. 2014 - Combined revenues for Energy Group, net of intercompany transactions, increased \$37.8 million, or 11.7%, to \$360.1 million in 2015 compared with 2014.

Revenues from retail gas operations at SJE, net of intercompany transactions, decreased \$39.9 million, or 31.5%, in 2015 compared with 2014. Excluding the change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$3.2 million, revenues decreased \$36.7 million, or 28.7%, in 2015 compared with 2014.

South Jersey Industries, Inc.
Part II

A summary of SJE's retail gas revenue is as follows (in millions):

| | 2015 | 2014 | Change |
|---|--------|---------|-----------|
| SJE Retail Gas Revenue | \$86.9 | \$126.8 | \$(39.9) |
| Add: Unrealized Losses (Subtract: Unrealized Gains) | 4.0 | 0.8 | 3.2 |
| SJE Retail Gas Revenue, Excluding Unrealized Losses | \$90.9 | \$127.6 | \$(36.7) |

The decrease in revenues was mainly due to a 39.7% decrease in the average monthly New York Mercantile Exchange (NYMEX) settle price, along with a 7.8% decrease in sales volumes compared with 2014. Sales volumes totaled 24,572,554 and 26,664,062 dekatherms for the years ended December 31, 2015 and 2014, respectively.

Revenues from retail electric operations at SJE, net of intercompany transactions, increased \$25.7 million, or 21.6%, in 2015 compared with 2014. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(0.8) million, revenues increased \$24.9 million, or 20.8%, in 2015 compared with 2014.

A summary of SJE's retail electric revenue is as follows (in millions):

| | 2015 | 2014 | Change |
|--|---------|---------|--------|
| SJE Retail Electric Revenue | \$144.7 | \$119.0 | \$25.7 |
| Add: Unrealized Losses (Subtract: Unrealized Gains) | 0.1 | 0.9 | (0.8) |
| SJE Retail Electric Revenue, Excluding Unrealized Losses (Gains) | \$144.8 | \$119.9 | \$24.9 |

The increase in revenues from retail electric operations at SJE, as defined above, was mainly due to a 21.8% increase in sales volumes. Partially offsetting the comparative period change was a 7.4% decrease in the average monthly sales price, which was driven by a lower average Locational Marginal Price (LMP) per megawatt hour. SJE uses forward financial contracts to mitigate commodity price risk on fixed price electric contracts. In accordance with GAAP, the forward financial contracts are recorded at fair value, with changes in fair value recorded in earnings in the period of change. The related customer contracts are not considered derivatives and, therefore, are not recorded in earnings until the electricity is delivered. As a result, earnings are subject to volatility as the market price of the forward financial contracts change, even when the underlying hedged value of the customer contract is unchanged. Over time, gains or losses on the sale of the fixed price electric under contract will be offset by losses or gains on the forward financial contracts, resulting in the realization of the profit margin expected when the transactions were initiated. The retail electric operations at SJE serve both fixed and market-priced customers.

Revenues from wholesale energy operations at SJRG, net of intercompany transactions, increased \$52.2 million in 2015 compared with 2014. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(17.5) million and adjusting for the change in realized gains and losses on all hedges attributed to inventory injection transactions of \$(0.6) million to align them with the related cost of inventory in the period of withdrawal, revenues from the wholesale energy operations at SJRG increased \$34.1 million in 2015 compared with 2014.

South Jersey Industries, Inc.
Part II

A summary of revenues from wholesale energy operations at SJRG is as follows (in millions):

| | 2015 | 2014 | Change |
|---|---------|--------|---------|
| SJRG Revenue | \$129.1 | \$76.9 | \$52.2 |
| Add: Unrealized Losses (Subtract: Unrealized Gains) | (12.6 |)4.9 | (17.5) |
| Add: Realized Losses (Subtract: Realized Gains) on Inventory Injection Hedges | 0.1 | 0.7 | (0.6) |
| SJRG Revenue, Excluding Unrealized Losses (Gains) and Realized Losses (Gains) on Inventory Injection Hedges | \$116.6 | \$82.5 | \$34.1 |

The increase in revenues from the wholesale energy operations of SJRG as defined above was due mainly to revenues earned on a gas supply contract with an electric generation facility that began operations in the second half of 2014, along with higher storage hedge gains. Partially offsetting these increases was a 17.5% decrease in storage volumes sold. As discussed in Note 1 to the consolidated financial statements, revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues - Nonutility on the statements of consolidated income.

Operating Revenues - Energy Services - Combined revenues for Energy Services, net of intercompany transactions, increased \$6.7 million, or 10.5%, to \$70.7 million in 2015 compared with 2014.

Revenues from on-site energy production at Marina, net of intercompany transactions, increased \$6.1 million, or 11.3%, to \$59.5 million in 2015 compared with 2014 due to several new renewable energy projects that began operations during 2015, along with higher prices on solar renewable energy credits (SRECs) compared to the previous year.

Revenues from appliance service operations at SJESP, net of intercompany transactions, did not change significantly in 2015 compared with 2014.

Operating Revenues - Energy Group 2014 vs. 2013 - Combined revenues for Energy Group, net of intercompany transactions, increased \$90.9 million, or 39.3%, to \$322.3 million in 2014 compared with 2013.

Revenues from retail gas operations at SJE, net of intercompany transactions, increased \$19.5 million, or 18.1%, in 2014 compared with 2013. Excluding the change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$0.7 million, revenues increased \$20.2 million, or 18.8%, in 2014 compared with 2013. The increase in revenues was mainly due to a 20.9% increase in the average monthly New York Mercantile Exchange (NYMEX) settle price, along with a 6.8% increase in sales volumes compared with 2013. Sales volumes totaled 26,664,062 and 24,960,661 dekatherms for the year ended December 31, 2014 and 2013, respectively.

A summary of SJE's retail gas revenue is as follows (in millions):

| | 2014 | 2013 | Change |
|---|---------|---------|--------|
| SJE Retail Gas Revenue | \$126.8 | \$107.3 | \$19.5 |
| Add: Unrealized Losses (Subtract: Unrealized Gains) | 0.8 | 0.1 | 0.7 |

| | | | |
|---|---------|---------|--------|
| SJE Retail Gas Revenue, Excluding Unrealized Losses | \$127.6 | \$107.4 | \$20.2 |
|---|---------|---------|--------|

We continue to focus our marketing efforts on the pursuit of non-heat-sensitive commercial customers in an effort to mitigate price volatility and weather risk.

Revenues from retail electric operations at SJE, net of intercompany transactions, decreased \$4.7 million, or 3.8%, to \$119.0 million in 2014 compared with 2013. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$0.2 million, revenues decreased \$4.5 million, or 3.6%, in 2014 compared with 2013.

South Jersey Industries, Inc.
Part II

A summary of SJE's retail electric revenue is as follows (in millions):

| | 2014 | 2013 | Change |
|--|---------|---------|----------|
| SJE Retail Electric Revenue | \$119.0 | \$123.7 | \$(4.7) |
| Add: Unrealized Losses (Subtract: Unrealized Gains) | 0.9 | 0.7 | 0.2 |
| SJE Retail Electric Revenue, Excluding Unrealized Losses (Gains) | \$119.9 | \$124.4 | \$(4.5) |

The decrease in revenues from retail electric operations at SJE as defined above was mainly due to a 9.8% decrease in sales volumes. SJE uses forward financial contracts to mitigate commodity price risk on fixed price electric contracts. In accordance with GAAP, the forward financial contracts are recorded at fair value, with changes in fair value recorded in earnings in the period of change. The related customer contracts are not considered derivatives and, therefore, are not recorded in earnings until the electricity is delivered. As a result, earnings are subject to volatility as the market price of the forward financial contracts change, even when the underlying hedged value of the customer contract is unchanged. Over time, gains or losses on the sale of the fixed price electric under contract will be offset by losses or gains on the forward financial contracts, resulting in the realization of the profit margin expected when the transactions were initiated. The retail electric operations at SJE serve both fixed and market-priced customers.

Revenues from wholesale energy operations at SJRG, net of intercompany transactions, increased \$76.2 million in 2014 compared with 2013. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(20.2) million and adjusting for the change in realized gains and losses on all hedges attributed to inventory injection transactions of \$0.7 million to align them with the related cost of inventory in the period of withdrawal, revenues from the wholesale energy operations at SJRG increased \$56.7 million in 2014 compared with 2013.

A summary of revenues from wholesale energy operations at SJRG is as follows (in millions):

| | 2014 | 2013 | Change |
|---|--------|--------|---------|
| SJRG Revenue | \$76.9 | \$0.7 | \$76.2 |
| Add: Unrealized Losses (Subtract: Unrealized Gains) | 4.9 | 25.1 | (20.2) |
| Add: Realized Losses (Subtract: Realized Gains) on Inventory Injection Hedges | 0.7 | — | 0.7 |
| SJRG Revenue, Excluding Unrealized Losses (Gains) and Realized Losses (Gains) on Inventory Injection Hedges | \$82.5 | \$25.8 | \$56.7 |

The increase in revenues from the wholesale energy operations of SJRG as defined above was due mainly to higher margins on daily energy trading activities along with a 44.0% increase in storage volumes sold. As discussed in Note 1 to the consolidated financial statements, revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues - Nonutility on the statements of consolidated income.

Operating Revenues - Energy Services - Combined revenues for Energy Services, net of intercompany transactions, increased \$8.9 million, or 16.1%, to \$64.0 million in 2014 compared with 2013.

Revenues from on-site energy production at Marina, net of intercompany transactions, increased \$12.1 million, or 29.2%, to \$53.4 million in 2014 compared with 2013 due to several new renewable energy projects that began operations during 2014, along with higher hot water production and electricity sales at the wholly-owned thermal facility due to colder temperatures during the first quarter of 2014 as compared to the prior year.

Revenues from appliance service operations at SJESP, net of intercompany transactions, decreased \$3.2 million, or 23.4%, to \$10.5 million in 2014 compared with 2013 primarily due to lower installation jobs compared to the prior year.

Table of Contents

Margin - Gas Utility Operations - SJG's margin is defined as natural gas revenues less natural gas costs; volumetric and revenue based energy taxes; and regulatory rider expenses. We believe that margin provides a more meaningful basis for evaluating utility operations than revenues since natural gas costs, energy taxes and regulatory rider expenses are passed through to customers, and therefore, have no effect on margin. Natural gas costs are charged to operating expenses on the basis of therm sales at the prices approved by the BPU through the BGSS tariff.

Total Margin in 2015 increased \$21.5 million, or 9.3%, from 2014 primarily due to the settlement of the base rate case effective October 1, 2014 and customer additions. The base rate case settlement contributed approximately \$15.5 million in additional margin in 2015. Net customer additions of 6,246 over the twelve-month period ended December 31, 2015, representing 1.7% growth over the prior year, contributed approximately \$3.7 million in additional margin.

Total margin in 2014 increased \$19.7 million, or 9.2%, from 2013 primarily due to the settlement of the base rate case effective October 1, 2014, CIRT investments that rolled into base rates effective October 1, 2013 and customer additions. The base rate case settlement contributed approximately \$7.1 million in additional margin during the fourth quarter of 2014. The CIRT investments rolling into base rates effective October 1, 2013 contributed approximately \$10.4 million in incremental margin through September 2014. In addition, SJG added 4,598 net customers over the twelve-month period ended December 31, 2014.

The CIP tracking mechanism adjusts earnings when actual usage per customer experienced during the period varies from an established baseline usage per customer. As reflected in the margin table and the CIP table above, the CIP mechanism reduced margin by \$1.8 million, or \$1.0 million after taxes, during 2015, primarily due to customer usage variations.

The CIP mechanism reduced margin by \$4.5 million, or \$2.7 million after taxes, during 2014, primarily due to weather that was colder than normal.

Gross Margin - Nonutility - Gross margin for the nonutility businesses is defined as revenue less all costs that are directly related to the production, selling and delivery of the Company's products and services. These costs primarily include natural gas and electric commodity costs as well as certain payroll and related benefits. On the statements of consolidated income, revenue is reflected in Operating Revenues - Nonutility and the costs are reflected in Cost of Sales - Nonutility. As discussed in Note 1 to the consolidated financial statements, revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues - Nonutility on the statements of consolidated income.

Gross Margin — Energy Group — For 2015, combined gross margins for Energy Group, net of intercompany transactions, increased \$25.2 million to \$57.2 million compared with 2014. This increase is primarily due to the following:

- Gross Margin from SJE's retail gas and other operations decreased \$4.3 million to \$2.4 million in 2015 compared with 2014. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts due to price volatility of \$3.2 million as discussed above, gross margin decreased \$1.1 million in 2015 compared with 2014. This decrease was primarily due to decreases in sales volumes as discussed in "Operating Revenues-Energy Group" above. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts as discussed above, gross margin as a percentage of Operating Revenues did not change significantly in 2015 compared with 2014.
- Gross margin from SJE's retail electric operations increased \$1.6 million to \$6.2 million in 2015 compared with 2014. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts due to price volatility of \$(0.8) million as discussed above, gross margin increased \$0.8 million in 2015 compared with 2014, which does not represent a significant change. Excluding the impact of the unrealized gains/losses discussed

above, gross margin as a percentage of Operating Revenues did not change significantly in 2015 compared with 2014.

Gross margin from the wholesale energy operations of SJRG increased \$28.0 million to \$48.7 million in 2015 compared with 2014. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(17.5) million and adjusting for the change in realized gains and losses on all hedges attributed to inventory injection transactions of \$(0.6) million to align them with the related cost of inventory in the period of withdrawal as discussed above, gross margin for SJRG increased \$9.9 million. The increase in gross margin was mainly due to higher storage hedge gains and higher margins on daily energy trading activities, partially offset with a decrease in storage volumes sold.

South Jersey Industries, Inc.
Part II

The wholesale energy operations at SJRG expect to continue to add incremental margin from marketing and related opportunities in the Marcellus region, capitalizing on its established presence in the area. Future margins could fluctuate significantly due to the volatile nature of wholesale gas prices. As of December 31, 2015, the wholesale energy operations had 9.6 Bcf of storage and 442,340 dts/day of transportation under contract.

Gross Margin — Energy Services — For 2015, combined gross margins for Energy Services, net of intercompany transactions, increased \$6.7 million to \$54.0 million compared with 2014. This increase is primarily due to the following:

- Gross Margin from on-site energy production at Marina increased \$6.8 million to \$49.4 million in 2015 compared with 2014. Gross margin as a percentage of Operating Revenues increased 3.3 percentage points in 2015 compared with 2014. This was due mainly to the impact of several new, higher margin renewable energy projects added during 2015, along with higher prices on solar renewable energy credits (SRECs) compared to the previous year.

- Gross margin from the appliance service operations at SJESP did not change significantly in 2015 compared with 2014.

Gross Margin — Energy Group — For 2014, combined gross margins for Energy Group, net of intercompany transactions, increased \$51.1 million to \$29.8 million compared with 2013. This increase is primarily due to the following:

- Gross Margin from SJE's retail gas and other operations increased \$0.9 million in 2014 compared with 2013. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts due to price volatility of \$0.7 million as discussed above, gross margin increased \$1.6 million in 2014 compared with 2013. This increase was primarily due to increases in sales volumes as discussed in "Operating Revenues-Energy Group" above. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts as discussed above, gross margin as a percentage of Operating Revenues did not change significantly in 2014 compared with 2013.

- Gross margin from SJE's retail electric operations decreased \$0.1 million in 2014 compared with 2013. Excluding the impact of the net change in unrealized gains/losses recorded on forward financial contracts due to price volatility of \$0.2 million as discussed above, gross margin increased \$0.1 million in 2014 compared with 2013, which does not represent a significant change. Excluding the impact of the unrealized gains/losses discussed above, gross margin as a percentage of Operating Revenues did not change significantly in 2014 compared with 2013.

Gross margin from the wholesale energy operations of SJRG increased \$48.9 million in 2014 compared with 2013. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$(20.2) million and adjusting for the change in realized gains and losses on all hedges attributed to inventory injection transactions of \$0.7 million to align them with the related cost of inventory in the period of withdrawal as discussed above, gross margin for SJRG increased \$29.4 million. The increase in gross margin was mainly due to higher margins on daily energy trading activities along with an increase in storage volumes sold as discussed in "Operating Revenues-Energy Group" above.

SJRG expects the wholesale energy operations to continue to add incremental margin from marketing and related opportunities in the Marcellus region, capitalizing on its established presence in the area. Future margins could fluctuate significantly due to the volatile nature of wholesale gas prices. As of December 31, 2014, the wholesale energy operations had 9.1 Bcf of storage and 518,378 dts/day of transportation under contract.

South Jersey Industries, Inc.
Part II

Gross Margin — Energy Services — For 2014, combined gross margins for Energy Services, net of intercompany transactions, increased \$13.5 million to \$49.6 million compared with 2013. This increase is primarily due to the following:

Gross Margin from on-site energy production at Marina increased \$15.6 million in 2014 compared with 2013. Gross margin as a percentage of Operating Revenues increased 14.3 percentage points in 2014 compared with 2013. This was due mainly to the impact of several new, higher margin solar projects added during 2014. Also contributing to the increase is higher hot water production and electricity sales at the wholly-owned thermal facility due to colder temperatures during the first quarter of 2014 as compared to the prior year.

Gross margin from the appliance service operations at SJESP decreased \$2.1 million in 2014 compared with 2013. Gross margin as a percentage of Operating Revenues decreased 5.1 percentage points in 2014 compared with 2013. These decreases are mainly due to lower installation jobs compared to the prior year.

Operations Expense - A summary of net changes in operations expense follows (in thousands):

| | 2015 vs. 2014 | 2014 vs. 2013 |
|-------------------------------------|---------------|---------------|
| Gas Utility Operations | \$5,408 | \$16,623 |
| Nonutility: | | |
| Energy Group: | | |
| Wholesale Energy Operations | 1,908 | 1,870 |
| Retail Gas and Other Operations | (454) |)776 |
| Retail Electric Operations | (105) |)325 |
| Subtotal Energy Group | 1,349 | 2,971 |
| Energy Services: | | |
| On-Site Energy Production | 2,422 | 1,083 |
| Appliance Service Operations | (290) |)530 |
| Subtotal Energy Services | 2,132 | 1,613 |
| Total Nonutility | 3,481 | 4,584 |
| Intercompany Eliminations and Other | (477) |)(1,152) |
| Total Operations Expense | \$8,412 | \$20,055 |

Gas utility operations expense increased \$5.4 million in 2015 compared with 2014. The increase primarily resulted from increases in expenses related to uncollectible customer accounts receivable during 2015 at SJG, as a result of an increase in the aging of receivables following a very cold 2014-2015 winter season. Accounts receivable was higher as of December 31, 2015 due to higher customer billing rates in effect for the majority of 2015 vs. 2014, in addition to customer growth in 2015. Gas utility operations expense increased \$16.6 million in 2014 compared with the prior year. This was primarily the result of increases in spending under the New Jersey Clean Energy Program and Energy Efficiency Programs. Such costs are recovered on a dollar-for-dollar basis; therefore, SJG experienced an offsetting increase in revenues during 2014. SJG also had increases in expenses associated with uncollectible customer accounts receivable in 2014, which was a result of an increase in the aging of receivables.

Nonutility operations expense increased \$3.5 million and \$4.6 million in 2015 and 2014, respectively, compared to prior years, primarily due to additional personnel, governance and compliance costs incurred to support continued growth.

Other Operating Expenses - A summary of changes in other consolidated operating expenses (in thousands):

| | 2015 vs. 2014 | 2014 vs. 2013 |
|------------------------|------------------|------------------|
| Maintenance | \$2,726 | \$321 |
| Depreciation | \$9,447 | \$13,367 |
| Energy and Other Taxes | \$306 | \$(4,096) |

38

South Jersey Industries, Inc.
Part II

Maintenance - Maintenance expense increased \$2.7 million during 2015 compared with 2014 primarily due to the BPU-approved amortization and recovery of previously deferred maintenance costs, primarily those associated with a federally-mandated pipeline integrity management program. These amortizations are being recovered through an offsetting amount in revenues. Also contributing to the increase in maintenance expense was increased field activity related to the maintenance of services, along with an increase in Remediation Adjustment Clause (RAC) expense amortization as a result of increased spending on environmental remediation in recent years. Maintenance expense increased \$0.3 million during 2014 compared with 2013 primarily due to the amortization of previously deferred costs that were approved for recovery in SJG's September 2014 rate case settlement. See Notes 10 and 11 to the consolidated financial statements.

Depreciation Expense - Depreciation increased \$9.4 million and \$13.4 million during 2015 and 2014, respectively, compared to the prior years due mainly to the increased investment in property, plant and equipment by the gas utility operations of SJG and on-site energy production at Marina.

Energy and Other Taxes - The change in energy and other taxes in 2015 compared with 2014 was not significant. Energy and Other Taxes decreased \$4.1 million in 2014 compared with 2013 primarily due to the elimination of the gas utility operations' primary energy tax, the Transitional Energy Facilities Assessment, effective January 1, 2014. See Note 1 to the consolidated financial statements.

Other Income and Expense - Other income and expense decreased \$2.3 million in 2015 compared with 2014 primarily due to a realized gain at the gas utility operations at SJG on the sale of available-for-sale securities, along with the settlement of outstanding litigation at SJEX, both of which occurred in 2014 and did not recur in 2015. Other income and expense increased \$0.8 million in 2014 compared with 2013 primarily due to a realized gain at the gas utility operations at SJG on the sale of available-for-sale securities, along with the settlement of outstanding litigation at SJEX. These were partially offset by a decrease in interest income on notes receivable from affiliates.

Interest Charges - Interest charges increased \$2.1 million in 2015 compared with 2014 primarily due to higher amounts of long-term debt outstanding at SJI and SJG, along with lower capitalization of interest costs on construction at the gas utility operations of SJG during 2015. This was a result of the roll-in of capital investments under SJG's Accelerated Infrastructure Replacement Program (AIRP) into base rates effective October 1, 2014 and a lower allowance for debt funds used during construction as a result of placing two major technology systems in service during the fourth quarter of 2014. AIRP investments are approved by the BPU to accrue interest on construction until such time they are rolled into base rates. Interest charges increased \$10.7 million in 2014 compared with 2013 primarily due to higher amounts of long-term debt outstanding at SJI and SJG, along with lower capitalization of interest costs on construction at the gas utility operations of SJG during 2014. Capital investments under SJG's CIRT were permitted by the BPU to accrue interest on construction, which reduces interest expense, until such time they were rolled into base rates. With the roll in of the CIRT investment effective October 1, 2013, the resulting reduction of interest expense from this major program ceased, leading to higher interest expense in 2014 compared with 2013. Also contributing to the increase were unrealized gains recognized during 2013 that did not recur in 2014 on interest rate contracts related to derivatives not designated as hedging instruments, which are recorded in Interest Charges on the statements of consolidated income. See Note 16 to the consolidated financial statements.

Income Taxes - Income tax expense decreased \$3.1 million in 2015 compared with 2014 due to a lower effective tax rate as a result of an increase in the investment tax credits available on renewable energy facilities at Marina in 2015 compared with 2014, partially offset by higher income before income taxes. Income taxes changed from a \$19.0 million benefit in 2013 to a \$4.4 million expense in 2014. These changes were primarily due to higher income before

income taxes, along with a higher effective tax rate due to a decrease in the investment tax credits available on renewable energy facilities at Marina in 2014 compared with 2013. Investment tax credits from renewable energy facilities at Marina of \$38.3 million, \$30.2 million and \$37.7 million were recognized for the years ended December 31, 2015, 2014 and 2013, respectively.

South Jersey Industries, Inc.
Part II

Equity in (Loss) Earnings of Affiliated Companies - Equity in loss of affiliated companies increased \$20.0 million to a loss of \$27.8 million in 2015 compared with 2014 due primarily to the 2015 reduction in the carrying amount of an investment, along with an accrual of the costs of a legal settlement, in the Energenic subsidiaries that operate the central energy center for a hotel, casino and entertainment complex in Atlantic City, New Jersey (see Note 7 to the consolidated financial statements). These were partially offset by a reserve for uncollectible accounts established at one of Energenic's operating subsidiaries during the third quarter of 2014 that did not recur in 2015. Equity in (loss) earnings of affiliated companies decreased \$9.4 million to a loss of \$7.8 million in 2014 compared to 2013, primarily due to a reduction in throughput, an increase in legal fees and the recording of a reserve for uncollectible accounts at the Energenic subsidiaries that operate the central energy center for a hotel, casino and entertainment complex in Atlantic City, New Jersey. The hotel, casino and entertainment complex ceased operations in September 2014 (see Note 7 to the consolidated financial statements).

Discontinued Operations - The losses are primarily comprised of environmental remediation and product liability litigation associated with previously disposed of businesses.

LIQUIDITY AND CAPITAL RESOURCES:

Liquidity needs are driven by factors that include natural gas commodity prices; the impact of weather on customer bills; lags in fully collecting gas costs from customers under the BGSS charge and other regulatory clauses; working capital needs of our energy trading and marketing activities; the timing of construction and remediation expenditures and related permanent financings; the timing of equity contributions to unconsolidated affiliates; mandated tax payment dates; both discretionary and required repayments of long-term debt; and the amounts and timing of dividend payments.

Cash Flows from Operating Activities - Liquidity needs are first met with net cash provided by operating activities. Net cash provided by operating activities totaled \$186.8 million, \$161.3 million and \$159.5 million in 2015, 2014 and 2013, respectively. Net cash provided by operating activities varies from year-to-year primarily due to the impact of weather on customer demand and related gas purchases, customer usage factors related to conservation efforts and the price of the natural gas commodity, inventory utilization and gas cost recoveries.

Net cash flow from operating activities increased in 2015 as compared to 2014 primarily as a result of collections of previously deferred gas costs at the utility. Collection of those gas costs had been deferred under the BGSS clause in 2014 as a result of the extremely cold weather experienced during the 2014 winter. This benefit was partially offset by a \$15.0 million pension contribution made by SJI as a result of a decline in the discount rate and new mortality tables released at the end of 2014, both of which negatively impacted the funding status of the pension plans. No such contribution was made in 2014. The Company strives to keep its pension plans fully funded. When factors such as lesser than expected asset performance and/or declining discount rates negatively impact the funding status of the plans, the Company increases its contributions to supplant that funding shortfall.

Net cash flow from operating activities increased in 2014 as compared to 2013 as SJI did not make a pension contribution during 2014 as compared to a contribution of \$12.7 million in 2013. This was due to an increase in the discount rate used to calculate future liability and greater than expected asset performance significantly improving the funding status of the Company's pension plans as discussed in Note 12 to the consolidated financial statements. The Company strives to keep its pension plans fully funded. When factors such as lesser than expected asset performance and/or declining discount rates negatively impact the funding status of the plans, the Company increases its contributions to supplant that funding shortfall. This is partially offset by higher working capital requirements, primarily as a result of higher gas costs due to the extremely cold weather during the first quarter of 2014. At SJG, a portion of these higher gas costs was deferred and will be collected in future periods under SJG's BGSS.

Cash Flows from Investing Activities - SJI has a continuing need for cash resources and capital, primarily to invest in new and replacement facilities and equipment. Net cash outflows from investing activities, which are primarily construction projects, for 2015, 2014 and 2013 amounted to \$370.7 million, \$375.0 million and \$245.8 million, respectively. We estimate the net cash outflows for investing activities for 2016, 2017 and 2018 to be approximately \$323.1 million, \$519.0 million and \$245.6 million, respectively. The high level of investing activities for 2016, 2017 and 2018 is due to a combination of the accelerated infrastructure investment programs and a major pipeline project to support an electric generation facility, both at SJG. Also contributing to the high level of investing activities are SJI Midstream investments in 2016 through 2018 and limited solar projects at Marina in 2016. The Company expects to use short-term borrowings under lines of credit from commercial banks and the commercial paper program to finance these investing activities as incurred. From time to time, the Company may refinance the short-term debt with long-term debt.

South Jersey Industries, Inc.
Part II

In support of its risk management activities, the Company is required to maintain margin accounts with selected counterparties as collateral for its forward contracts, swap agreements, options contracts and futures contracts. These margin accounts are included in Restricted Investments or Margin Account Liability, depending upon the value of the related contracts (the change in the Margin Account Liability is reflected in cash flows from Operating Activities) on the consolidated balance sheets. The required amount of restricted investments changes on a daily basis due to fluctuations in the market value of the related outstanding contracts and is difficult to predict. Margin posted by the Company decreased by \$20.1 million during 2015, increased by \$22.3 million during 2014 and increased by \$25.2 million during 2013.

During 2015, the Company made net investments in unconsolidated affiliates of \$18.0 million. During 2014, the Company provided net advances to unconsolidated affiliates of \$2.4 million. During 2013, the Company made investments in, and provided net advances to, unconsolidated affiliates of \$9.6 million, which does not include the cash proceeds related to the sale of LVE as discussed below.

In March 2013, substantially all of the assets of Marina's joint venture, LVE Energy Partners, LLC (LVE), an entity in which Marina had a 50% equity interest, were sold. In 2013, the Company received (a) \$57.9 million of repayments of advances to LVE; and (b) a \$7.9 million note receivable from a third party. As of December 31, 2013, LVE was dissolved and the Company incurred a \$0.8 million charge to write-off the remaining interest in 2013.

In June 2015, SJG advanced \$10.0 million to a not-for-profit organization formed to spur economic development in Atlantic City, New Jersey. The note bears interest at 1.0% for an initial term of six months, with the borrower's option to extend the term for two additional terms of three months each. In December 2015, the borrower exercised its first option to extend the term of the note for an additional three months. SJG holds a first lien security interest on land in Atlantic City as collateral against this note.

Cash Flows from Financing Activities - Short-term borrowings from the commercial paper program and lines of credit from commercial banks are used to supplement cash flows from operations, to support working capital needs and to finance capital expenditures as incurred. From time to time, short-term debt incurred to finance capital expenditures may be refinanced with long-term debt.

Credit facilities and available liquidity as of December 31, 2015 were as follows (in thousands):

| Company | Total Facility | Usage | Available Liquidity | Expiration Date |
|--|----------------|-----------|---------------------|-----------------|
| SJG: | | | | |
| Commercial Paper Program/Revolving Credit Facility | \$200,000 | \$136,600 | (A) \$63,400 | May 2018 |
| Uncommitted Bank Lines | 10,000 | — | 10,000 | August 2016 |
| Total SJG | 210,000 | 136,600 | 73,400 | |
| SJI: | | | | |
| Revolving Credit Facility | 400,000 | 305,400 | (B) 94,600 | February 2018 |
| Total SJI | 400,000 | 305,400 | 94,600 | |
| Total | \$610,000 | \$442,000 | \$168,000 | |

- (A) Includes letters of credit outstanding in the amount of \$2.2 million.
- (B) Includes letters of credit outstanding in the amount of \$8.1 million.

South Jersey Industries, Inc.

Part II

The SJG facilities are restricted as to use and availability specifically to SJG; however, if necessary the SJI facilities can also be used to support SJG's liquidity needs. All committed facilities contain one financial covenant limiting the ratio of indebtedness to total capitalization (as defined in the respective credit agreements), measured on a quarterly basis. SJI and SJG were in compliance with these covenants as of December 31, 2015. Borrowings under these credit facilities are at market rates. The weighted average interest rate on these borrowings, which changes daily, was 1.13%, 0.83% and 1.04% at December 31, 2015, 2014 and 2013, respectively. Average borrowings outstanding under these credit facilities, not including letters of credit, during the years ended December 31, 2015 and 2014 were \$335.0 million and \$267.0 million, respectively. The maximum amounts outstanding under these credit facilities, not including letters of credit, during the years ended December 31, 2015 and 2014 were \$471.1 million and \$390.7 million, respectively. Based upon the existing credit facilities and a regular dialogue with our banks, we believe there will continue to be sufficient credit available to meet our business' future liquidity needs.

SJG has a commercial paper program under which SJG may issue short-term, unsecured promissory notes to qualified investors up to a maximum aggregate amount outstanding at any time of \$200.0 million. The notes have fixed maturities which vary by note, but may not exceed 270 days from the date of issue. Proceeds from the notes are used for general corporate purposes. SJG uses the commercial paper program in tandem with the \$200.0 million revolving credit facility and does not expect the principal amount of borrowings outstanding under the commercial paper program and the credit facility at any time to exceed an aggregate of \$200.0 million.

SJI supplements its operating cash flow, commercial paper program and credit lines with both debt and equity capital. Over the years, SJG has used long-term debt, primarily in the form of First Mortgage Bonds and Medium Term Notes (MTN's), secured by the same pool of utility assets, to finance its long-term borrowing needs. These needs are primarily capital expenditures for property, plant and equipment.

In June 2015, SJI redeemed at maturity \$64.0 million aggregate principal amount of 2.39% Senior Notes.

In August 2015, SJG retired \$10.0 million aggregate principal amount of 5.387% MTN's at maturity.

In September 2015, SJG issued \$80.0 million of long-term debt under a \$200.0 million aggregate syndicated bank term facility. The total outstanding amount under this facility as of December 31, 2015 was \$139.0 million.

Also in September 2015, SJG redeemed early \$0.1 million of the \$25.0 million aggregate principal amount variable rate demand bonds that were issued in September 2008. SJG had previously spent all but \$0.1 million of the debt proceeds and was permitted under the debt agreement to utilize those remaining funds to redeem the debt early.

In October 2015, SJI entered into an unsecured, variable-rate term loan of \$50.0 million, which matures in October 2020. This agreement replaced existing facilities that expired in October 2015. The variable rate at December 31, 2015 was 1.28%.

In December 2015, SJG paid \$0.9 million of the principal amount of 3.63% MTN's due December 2025.

In December 2015, SJG filed a petition with the New Jersey Board of Public Utilities to issue up to \$400.0 million of long-term debt securities in various forms including MTN's and unsecured debt, with maturities of more than 12 months, over the next three years. This petition is pending approval.

In January 2014, SJG issued \$30.0 million aggregate principal amount of 4.23% MTN's due January 2030.

In June 2014, SJG entered into a \$200.0 million multiple-draw term facility offered by a syndicate of banks which expires in June 2017. SJG can draw under this facility through June 2016 and this facility bears interest at a floating rate based on LIBOR plus a spread determined by SJG's credit ratings. As of December 31, 2014, SJG had borrowed an aggregate \$59.0 million under this facility and the proceeds were used to pay down short-term debt.

In June 2014, SJI entered into a Note Purchase Agreement that provided for SJI to issue an aggregate of \$240.0 million of medium term notes, all of which were issued as follows: (a) in June 2014, SJI issued \$60.0 million aggregate principal amount of 3.05% Senior Notes due June 2019, and \$40.0 million aggregate principal amount of Floating Rate Senior Notes due June 2019; (b) in August 2014, SJI issued \$30.0 million aggregate principal amount of 3.05% Senior Notes due August 2019; and (c) in September 2014, SJI issued \$50.0 million aggregate principal amount of 3.05% Senior Notes due September 2019, and \$60.0 million aggregate principal amount of Floating Rate Senior Notes due September 2019. At December 31, 2014, the floating rate was 1.57%.

South Jersey Industries, Inc.
Part II

In July 2014, SJG retired \$11.0 million aggregate principal amount of 4.52% MTN's at maturity. In September 2014, SJG retired \$10.0 million aggregate principal amount of 5.115% MTN's at maturity.

SJG renewed its \$10.0 million line of credit during the third quarter of 2014.

No other long-term debt was issued during the years ended December 31, 2015 or 2014.

SJI raises equity capital through its Dividend Reinvestment Plan (DRP). Shares of common stock offered by the DRP have been issued directly by SJI from its authorized but unissued shares of common stock. SJI raised \$63.2 million and \$80.7 million of equity capital through the DRP in 2015 and 2014, respectively.

SJI's capital structure was as follows:

| | As of December 31, | | |
|-----------------|--------------------|---------|---|
| | 2015 | 2014 | |
| Equity | 41.5 | % 42.6 | % |
| Long-Term Debt | 41.3 | % 46.2 | % |
| Short-Term Debt | 17.2 | % 11.2 | % |
| Total | 100.0 | % 100.0 | % |

For 2015, 2014 and 2013, SJI paid quarterly dividends to its common shareholders. SJI has paid dividends on its common stock for 64 consecutive years and has increased that dividend each year for the last sixteen years. The Company currently looks to grow that dividend consistent with earnings growth while targeting a payout ratio of between 50% and 60% of Economic Earnings. In setting the dividend rate, the Board of Directors of SJI considers future earnings expectations, payout ratio, and dividend yield relative to those at peer companies, as well as returns available on other income-oriented investments. However, there can be no assurance that the Company will be able to continue to increase the dividend, meet the targeted payout ratio or pay a dividend at all in the future.

COMMITMENTS AND CONTINGENCIES:

ENVIRONMENTAL REMEDIATION - Costs for remediation projects, net of insurance reimbursements, for 2015, 2014 and 2013 amounted to net cash outflows of \$22.1 million, \$8.3 million and \$0.4 million, respectively. Total cash outflows for remediation projects are expected to be approximately \$50.6 million, \$24.4 million and \$16.9 million for 2016, 2017 and 2018, respectively. As discussed in Notes 10 and 15 to the consolidated financial statements, certain environmental costs are subject to recovery from ratepayers.

STANDBY LETTERS OF CREDIT — As of December 31, 2015, SJI provided \$8.1 million of standby letters of credit through its revolving credit facility to enable SJE to market retail electricity and for various construction and operating activities. SJG provided a \$2.2 million letter of credit under its revolving credit facility to support the remediation of environmental conditions at certain locations in SJG's service territory. The Company has also provided \$87.5 million of additional letters of credit under separate facilities outside of the revolving credit facilities to support variable-rate demand bonds issued through the New Jersey Economic Development Authority (NJEDA) to finance the expansion of SJG's natural gas distribution system and to finance Marina's initial thermal plant project.

CONTRACTUAL OBLIGATIONS - SJG and SJRG have certain commitments for both pipeline capacity and gas supply for which they pay fees regardless of usage. Those commitments as of December 31, 2015, average \$82.2 million annually and total \$533.2 million over the contracts' lives. Approximately 51% of the financial commitments

under these contracts expire during the next five years. These contracts are included in the Company's contractual obligations below. We expect to renew each of these contracts under renewal provisions as provided in each contract. SJG recovers all prudently incurred fees through rates via the BGSS clause.

Table of Contents

In addition, in the normal course of business, SJG and SJRG have entered into long-term contracts for natural gas supplies. SJRG has committed to purchase a minimum of 626,500 dts/d and up to 796,250 dts/d of natural gas, from various suppliers, for terms ranging from three to ten years at index-based prices. SJG has committed to purchase a minimum of 6,250 dts/d and up to 25,000 dts/d of natural gas, from one supplier, for a term of eight years at index-based prices. The obligations for these purchases have not been included in the Company's contractual obligations discussed below because the actual volumes and prices are not fixed.

The following table summarizes our contractual cash obligations and their applicable payment due dates as of December 31, 2015 (in thousands):

| Contractual Cash Obligations | Total | Up to 1 Year | Years 2 & 3 | Years 4 & 5 | More than 5 Years |
|---------------------------------------|-------------|-----------------|----------------|----------------|----------------------|
| Long-Term Debt | \$1,035,848 | \$29,454 | \$213,225 | \$335,574 | \$457,595 |
| Interest on Long-Term Debt | 274,892 | 34,928 | 63,199 | 46,556 | 130,209 |
| Construction Obligations | 58,613 | 58,613 | — | — | — |
| Operating Leases | 2,148 | 841 | 1,108 | 199 | — |
| Capital Leases | 15,067 | 1,282 | 2,564 | 2,564 | 8,657 |
| Commodity Supply Purchase Obligations | 1,167,927 | 586,514 | 299,413 | 90,998 | 191,002 |
| Environmental Remediation Costs | 126,623 | 50,559 | 41,293 | 8,652 | 26,119 |
| New Jersey Clean Energy Program | 12,410 | 12,410 | — | — | — |
| Other Purchase Obligations | 1,070 | 1,070 | — | — | — |
| Total Contractual Cash Obligations | \$2,694,598 | \$775,671 | \$620,802 | \$484,543 | \$813,582 |

Interest on long-term debt in the table above includes the related interest obligations through maturity as well as the impact of all interest rate swap agreements. Expected asset retirement obligations and the liability for unrecognized tax benefits are not included in the table above as the total obligation cannot be calculated due to the subjective nature of these costs and timing of anticipated payments. SJI made contributions to its employee pension plans totaling \$15.0 million in January 2015. No contribution was made in 2014. Future pension contributions cannot be determined at this time. SJG's regulatory obligation to contribute \$3.6 million annually to its postretirement benefit plans' trusts, as discussed in Note 12 to the consolidated financial statements, is also not included as its duration is indefinite.

Off-Balance Sheet Arrangements - An off-balance sheet arrangement is any contractual arrangement involving an unconsolidated entity under which the Company has either made guarantees or has certain other interests or obligations.

As part of the acquisition of Energenic projects (see Note 3 to the consolidated financial statements), the Company is relieved of any guarantees from prior periods related to the projects in which it no longer has an ownership interest.

As of December 31, 2015, SJI had issued \$5.2 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

During 2011, subsidiaries of Energenic, in which Marina has a 50% equity interest, entered into 20-year contracts to build, own and operate a central energy center and energy distribution system for a new hotel, casino and entertainment complex in Atlantic City, New Jersey. The complex commenced operations in April 2012, and as a result, Energenic subsidiaries began providing full energy services to the complex.

In June 2014, the parent company of the hotel, casino and entertainment complex filed petitions in U. S. Bankruptcy Court to facilitate a sale of substantially all of its assets. The complex ceased normal business operations in September 2014. Energenic subsidiaries continued to provide limited energy services to the complex during the shutdown period under a temporary agreement with the trustee. The hotel, casino and entertainment complex was sold in April 2015. As of December 31, 2015, the Energenic subsidiaries were providing limited services to the complex under a short-term agreement with the new owner. However, the Energenic subsidiaries had not been able to secure a permanent or long-term energy services agreement with the new owner.

South Jersey Industries, Inc.
Part II

As a result, management of the Company and Energenic have evaluated the carrying value of the investment in this project and a related note receivable. Based on the inability of the Energenic subsidiaries to secure a permanent or long-term energy services agreement, the Company recorded a \$7.7 million (net of tax) non-cash charge to earnings during the second quarter of 2015 due to the reduction in the carrying value of the investment in this project recorded by Energenic. This charge is included in Equity in Loss of Affiliated Companies for the year ended December 31, 2015 on the statements of consolidated income.

The central energy center and energy distribution system owned by the Energenic subsidiaries was financed in part by the issuance of bonds during 2011. These bonds were collateralized primarily by certain assets of the central energy center and revenue from the energy services agreement with the hotel, casino and entertainment complex. During 2015, due to the cessation of normal business operations of the complex and the inability of the Energenic subsidiaries to meet its obligations under the bonds, the trustee for the bondholders filed suit to foreclose on certain assets of the central energy center. In November 2015 during settlement discussions, the bondholders alleged among other things, that they were entitled to recover from Energenic itself, any amounts owed under the bonds that were not covered by the collateral, including principal, interest and attorney's fees. The bondholders' assertion was based on inconsistent language in the bond documents. As a result, as of December 31, 2015, management of Energenic has accrued for the cost to settle this claim (See Note 19). The Company's share of this pre-tax charge of \$7.5 million is included in Equity in Loss of Affiliated Companies for the year ended December 31, 2015 on the statements of consolidated income. Management of Energenic is currently in active settlement discussions and believes that this amount is recoverable from its insurance carrier and external legal advisors.

As of December 31, 2015, the Company, through its investment in Energenic, had a remaining net asset of approximately \$1.7 million included in Investment in Affiliates on the consolidated balance sheets related to cogeneration assets for this project. In addition, the Company had approximately \$13.7 million included in Notes Receivable - Affiliate on the consolidated balance sheets, due from Energenic, which is secured by those cogeneration assets. This note is subject to a reimbursement agreement that secures reimbursement for the Company, from its joint venture partner, of a proportionate share of any amounts that are not repaid.

Management will continue to monitor the situation surrounding the complex and will evaluate the carrying value of the investment and the note receivable as future events occur.

PENDING LITIGATION - The Company is subject to claims arising in the ordinary course of business and other legal proceedings. The Company has been named in, among other actions, certain gas supply and capacity management contract disputes and certain product liability claims related to our former sand mining subsidiary. We accrue liabilities related to these claims when we can reasonably estimate the amount or range of amounts of probable settlement costs or other charges for these claims. The Company has accrued approximately \$3.2 million and \$2.9 million related to all claims in the aggregate as of December 31, 2015 and 2014, respectively. Management does not believe that it is reasonably possible that there will be a material change in the Company's estimated liability in the near term and does not currently anticipate the disposition of any known claims that would have a material effect on the Company's financial position, results of operations or cash flows.

MARKET RISKS:

Commodity Market Risks - Certain regulated and nonregulated SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for third parties. These subsidiaries are subject to market risk due to price fluctuations. To hedge against this risk, we enter into a variety of physical and financial transactions including forward contracts, swaps, futures and options agreements. To manage these transactions, SJI has a well-defined risk management policy

approved by our Board of Directors that includes volumetric and monetary limits. Management reviews reports detailing activity daily. Generally, the derivative activities described above are entered into for risk management purposes.

As part of its gas purchasing strategy, SJG uses financial contracts to hedge against forward price risk. These contracts are recoverable through SJG's BGSS, subject to BPU approval.

South Jersey Industries, Inc.
Part II

The retail gas operations of SJE transact commodities on a physical basis and typically does not enter into financial derivative positions directly. SJRG manages risk in the natural gas markets for SJE as well as for its own portfolio by entering into the types of transactions noted above. The retail electric operations of SJE use forward physical and financial contracts to mitigate commodity price risk on fixed price electric contracts. It is management's policy, to the extent practical, within predetermined risk management policy guidelines, to have limited unmatched positions on a deal or portfolio basis while conducting these activities. As a result of holding open positions to a minimal level, the economic impact of changes in value of a particular transaction is substantially offset by an opposite change in the related hedge transaction.

SJI has entered into certain contracts to buy, sell, and transport natural gas and to buy and sell retail electricity. SJI recorded the net pre-tax gain (loss) on these contracts of \$8.4 million, \$(6.6) million and \$(25.8) million in earnings during 2015, 2014 and 2013, respectively, which are included with realized gains and losses in Operating Revenues - Nonutility.

The fair value and maturity of these energy-trading contracts determined under the mark-to-market method as of December 31, 2015 is as follows (in thousands):

Assets

| Source of Fair Value | Maturity < 1 Year | Maturity 1 - 3 Years | Maturity Beyond 3 Years | Total |
|--|----------------------|-------------------------|-------------------------------|----------|
| Prices actively quoted | \$15,247 | \$759 | \$— | \$16,006 |
| Prices provided by other external sources | 21,985 | 2,717 | 28 | 24,730 |
| Prices based on internal models or other valuation methods | 45,861 | 12,696 | 38 | 58,595 |
| Total | \$83,093 | \$16,172 | \$66 | \$99,331 |

Liabilities

| Source of Fair Value | Maturity < 1 Year | Maturity 1 - 3 Years | Maturity Beyond 3 Years | Total |
|--|----------------------|-------------------------|-------------------------------|-----------|
| Prices actively quoted | \$35,636 | \$6,534 | \$— | \$42,170 |
| Prices provided by other external sources | 9,323 | 1,685 | — | 11,008 |
| Prices based on internal models or other valuation methods | 45,755 | 13,139 | 333 | 59,227 |
| Total | \$90,714 | \$21,358 | \$333 | \$112,405 |

•NYMEX (New York Mercantile Exchange) is the primary national commodities exchange on which natural gas is traded. Volumes of our NYMEX contracts included in the table above under "Prices actively quoted" are 32.6 million dekatherms (dts) with a weighted average settlement price of \$3.06 per dt.

•Basis represents the differential to the NYMEX natural gas futures contract for delivering gas to a specific location. Volumes of our basis contracts, along with volumes of our discounted index related purchase and sales contracts,

included in the table above under "Prices provided by other external sources" and "Prices based on internal models or other valuation methods" are 179.0 million dts with a weighted average settlement price of \$(0.95) per dt.

- Fixed Price Gas Daily represents the price of a NYMEX natural gas futures contract adjusted for the difference in price for delivering the gas at another location. Volumes of our Fixed Price Gas Daily contracts included in the table above under "Prices provided by other external sources" are 20.6 million dts with a weighted average settlement price of \$2.24 per dt.

- Volumes of electric included in the table above under "Prices based on internal models or other valuation methods" are 0.3 million MWh with a weighted average settlement price of \$43.29 per MWh.

South Jersey Industries, Inc.
Part II

A reconciliation of SJI's estimated net fair value of energy-related derivatives follows (in thousands):

| | |
|--|-------------|
| Net Derivatives - Energy Related Liabilities, January 1, 2015 | \$(30,397) |
| Contracts Settled During 2015, Net | 24,379 |
| Other Changes in Fair Value from Continuing and New Contracts, Net | (7,056) |
| Net Derivatives - Energy Related Liabilities, December 31, 2015 | \$(13,074) |

Interest Rate Risk - Our exposure to interest-rate risk relates to short-term and long-term variable-rate borrowings. Variable-rate debt outstanding, including short-term and long-term debt, at December 31, 2015 was \$759.7 million and averaged \$594.3 million during 2015. A hypothetical 100 basis point (1%) increase in interest rates on our average variable-rate debt outstanding would result in a \$3.6 million increase in our annual interest expense, net of tax. The 100 basis point increase was chosen for illustrative purposes, as it provides a simple basis for calculating the impact of interest rate changes under a variety of interest rate scenarios. Over the past five years, the change in basis points (b.p.) of our average monthly interest rates from the beginning to end of each year was as follows: 2015 - 14 b.p. increase; 2014 - 1 b.p. decrease; 2013 - 16 b.p. decrease; 2012 - 9 b.p. decrease; and 2011 - 33 b.p. increase. At December 31, 2015, our average interest rate on variable-rate debt was 1.25%.

We typically issue long-term debt either at fixed rates or use interest rate derivatives to limit our exposure to changes in interest rates on variable-rate, long-term debt. As of December 31, 2015, the interest costs on \$686.4 million of our long-term debt was either at a fixed rate or hedged via an interest rate derivative.

As of December 31, 2015, SJI's active interest rate swaps were as follows:

| Notional Amount | Fixed Interest Rate | Start Date | Maturity | Type of Debt | Obligor |
|-----------------|---------------------|------------|-----------|--------------|---------|
| \$14,500,000 | 3.905% | 3/17/2006 | 1/15/2026 | Tax-exempt | Marina |
| \$500,000 | 3.905% | 3/17/2006 | 1/15/2026 | Tax-exempt | Marina |
| \$330,000 | 3.905% | 3/17/2006 | 1/15/2026 | Tax-exempt | Marina |
| \$7,100,000 | 4.895% | 2/1/2006 | 2/1/2016 | Taxable | Marina |
| \$12,500,000 | 3.430% | 12/1/2006 | 2/1/2036 | Tax-exempt | SJG |
| \$12,500,000 | 3.430% | 12/1/2006 | 2/1/2036 | Tax-exempt | SJG |

Credit Risk - As of December 31, 2015, approximately \$11.7 million, or 11.8%, of the current and noncurrent Derivatives – Energy Related Assets are transacted with one counterparty. This counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assigned to SJI in the event of a default by the counterparty.

As of December 31, 2015, SJRG had \$72.0 million of Accounts Receivable under sales contracts. Of that total, 73.2% were with regulated utilities or companies rated investment-grade or guaranteed by an investment-grade-rated parent or were with companies where we have a collateral arrangement or insurance coverage. The remainder of the Accounts Receivable were within approved credit limits.

Item 7A. Quantitative and Qualitative Disclosures about Market Risks

Information required by this item can be found in the section entitled “Market Risks” on page 45 of this Report.

South Jersey Industries, Inc.
Part II

Notes to Consolidated Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

GENERAL - South Jersey Industries, Inc. (SJI or the Company) currently provides a variety of energy-related products and services primarily through the following wholly-owned subsidiaries:

South Jersey Gas Company (SJG) is a regulated natural gas utility. SJG distributes natural gas in the seven southernmost counties of New Jersey.

South Jersey Energy Company (SJE) acquires and markets natural gas and electricity to retail end users and provides total energy management services to commercial and industrial customers.

South Jersey Resources Group, LLC (SJRG) markets natural gas storage, commodity and transportation assets along with fuel management services on a wholesale basis in the mid-Atlantic, Appalachian and southern states.

South Jersey Exploration, LLC (SJEX) owns oil, gas and mineral rights in the Marcellus Shale region of Pennsylvania.

Marina Energy, LLC (Marina) develops and operates on-site energy-related projects. The following entities are wholly-owned subsidiaries of Marina as of December 31, 2015 (see Note 3):

ACB Energy Partners, LLC (ACB) owns and operates a natural gas fueled combined heating, cooling and power facility located in Atlantic City, New Jersey.

AC Landfill Energy, LLC (ACLE), BC Landfill Energy, LLC (BCLE), SC Landfill Energy, LLC (SCLE) and SX Landfill Energy, LLC (SXLE) own and operate landfill gas-fired electric production facilities in Atlantic, Burlington, Salem and Sussex Counties located in New Jersey.

MCS Energy Partners, LLC (MCS), NBS Energy Partners, LLC (NBS) and SBS Energy Partners, LLC (SBS) own and operate solar-generation sites located in New Jersey.

South Jersey Energy Service Plus, LLC (SJESP) services residential and small commercial HVAC systems, installs small commercial HVAC systems, provides plumbing services and services appliances under warranty via a subcontractor arrangement as well as on a time and materials basis.

SJI Midstream, LLC was formed in 2014 to invest in infrastructure and other midstream projects, including a current project to build a 100-mile natural gas pipeline in Pennsylvania and New Jersey.

BASIS OF PRESENTATION - The consolidated financial statements include the accounts of SJI, its wholly-owned subsidiaries and subsidiaries in which SJI has a controlling interest. SJI eliminates all significant intercompany accounts and transactions. In management's opinion, the consolidated financial statements reflect all normal and recurring adjustments needed to fairly present SJI's financial position, operating results and cash flows at the dates and for the periods presented.

Certain reclassifications have been made to the prior period's regulatory liabilities disclosure to conform to the current period presentation. The societal benefit costs payable previously included in "Other Regulatory Liabilities" were reclassified to the line item "Societal Benefit Costs Payable" in the regulatory liabilities table disclosed in Note 11.

Certain reclassifications have been made to the prior period's deferred tax asset/liability disclosure to conform to the current period presentation. The breakout of current and noncurrent assets/liabilities previously disclosed in Note 4 was reclassified to separate deferred tax assets and deferred tax liabilities as disclosed in Note 4.

On February 26, 2015, the Board of Directors approved an amendment to SJI's Certificate of Incorporation to increase the authorized number of shares of common stock from 60,000,000 shares to 120,000,000 shares. The principal purpose of the increase was to permit a two-for-one split of all the issued shares of SJI's common stock, effected pursuant to a stock dividend of one share of common stock for each outstanding share of common stock, payable May 8, 2015 to shareholders of record at the close of business on April 17, 2015. All references to number of shares and per share information in the consolidated financial statements and related notes have been adjusted for all periods presented to reflect this stock split.

South Jersey Industries, Inc.
Part II

EQUITY INVESTMENTS - Marketable equity securities that are purchased as long-term investments are classified as Available-for-Sale Securities and carried at their fair value on the consolidated balance sheets. Any unrealized gains or losses are included in Accumulated Other Comprehensive Loss. SJI, through wholly owned subsidiaries, holds significant variable interests in several companies but is not the primary beneficiary. Consequently, these investments are accounted for under the equity method. In the event that losses and/or distributions from these equity method investments exceed the carrying value, and the Company is obligated to provide additional financial support, the excess will be recorded as either a current or non-current liability on the consolidated balance sheets. We include the operations of these affiliated companies on a pre-tax basis in the statements of consolidated income under Equity in (Loss) Earnings of Affiliated Companies (See Note 3). An impairment loss is recorded when there is clear evidence that a decline in value is other than temporary. In 2015, the Company recorded a \$7.7 million (net of tax) non-cash charge to earnings due to the reduction in the carrying value of an investment in a project entered into by Energenic (See Note 7). No impairment losses were recorded on Investments during 2014 or 2013.

ESTIMATES AND ASSUMPTIONS - We prepare our consolidated financial statements to conform with accounting principles generally accepted in the United States of America (GAAP). Management makes estimates and assumptions that affect the amounts reported in the consolidated financial statements and related disclosures. Therefore, actual results could differ from those estimates. Significant estimates include amounts related to regulatory accounting, energy derivatives, environmental remediation costs, pension and other postretirement benefit costs, and revenue recognition.

REGULATION - SJG is subject to the rules and regulations of the New Jersey Board of Public Utilities (BPU). See Note 10 for a detailed discussion of SJG's rate structure and regulatory actions. SJG maintains its accounts according to the BPU's prescribed Uniform System of Accounts. SJG follows the accounting for regulated enterprises prescribed by Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 980 - "Regulated Operations." In general, Topic 980 allows for the deferral of certain costs (regulatory assets) and creation of certain obligations (regulatory liabilities) when it is probable that such items will be recovered from or refunded to customers in future periods. See Note 11 for a detailed discussion of regulatory assets and liabilities.

OPERATING REVENUES - Gas and electric revenues are recognized in the period the commodity is delivered to customers. For SJG and SJE retail customers that are not billed at the end of the month, we record an estimate to recognize unbilled revenues for gas and electricity delivered from the date of the last meter reading to the end of the month. SJRG's gas revenues are recognized in the period the commodity is delivered. Realized and unrealized gains and losses on energy-related derivative instruments are also recognized in operating revenues for SJRG. See further discussion under Derivative Instruments. SJRG presents revenues and expenses related to its energy trading activities on a net basis in operating revenues. This net presentation has no effect on operating income or net income. We recognize revenues related to SJESP appliance service contracts on a monthly basis as work is completed or commissions are earned. Revenue related to services provided on a time and materials basis is recognized on a monthly basis as the services are provided. Marina recognizes revenue on a monthly basis as services are provided, as lease income is earned, and for on-site energy production that is delivered to its customers.

REVENUE AND THROUGHPUT-BASED TAXES — SJG collects certain revenue-based energy taxes from its customers. Such taxes include New Jersey State Sales Tax and Public Utilities Assessment (PUA). State sales tax is recorded as a liability when billed to customers and is not included in revenue or operating expenses. The PUA is included in both utility revenue and cost of sales and totaled \$1.2 million, \$1.1 million, and \$1.2 million in 2015, 2014 and 2013, respectively. In prior years, SJG had collected a throughput-based energy tax from customers in the form of a Transitional Energy Facility Assessment (TEFA). The TEFA was included in both revenues and cost of sales and totaled \$4.0 million in 2013. The TEFA was eliminated effective January 1, 2014.

ACCOUNTS RECEIVABLE AND PROVISION FOR UNCOLLECTIBLE ACCOUNTS - Accounts receivable are carried at the amount owed by customers. A provision for uncollectible accounts is established based on our collection experience and an assessment of the collectibility of specific accounts.

PROPERTY, PLANT AND EQUIPMENT - For regulatory purposes, utility plant is stated at original cost, which may be different than SJG's cost if the assets were acquired from another regulated entity. Nonutility plant is stated at cost. The cost of adding, replacing and renewing property is charged to the appropriate plant account.

ASSET RETIREMENT OBLIGATIONS - The amounts included under Asset Retirement Obligations (ARO) are primarily related to the legal obligations the Company has to cut and cap gas distribution pipelines when taking those pipelines out of service in future years. These liabilities are generally recognized upon the acquisition or construction of the asset. The related asset retirement cost is capitalized concurrently by increasing the carrying amount of the related asset by the same amount as the liability. Changes in the liability are recorded for the passage of time (accretion) or for revisions to cash flows originally estimated to settle the ARO.

South Jersey Industries, Inc.
Part II

ARO activity was as follows (in thousands):

| | 2015 | 2014 |
|---------------------------------------|----------|----------|
| AROs as of January 1, | \$42,502 | \$41,687 |
| Accretion | 1,675 | 1,612 |
| Additions | 802 | 664 |
| Settlements | (1,110) | (1,461) |
| Revisions in Estimated Cash Flows (A) | 14,074 | — |
| ARO's as of December 31, | \$57,943 | \$42,502 |

(A) The revision in estimated cash flows reflects an increase in the contractual cost to settle ARO. A corresponding increase was made to Regulatory Assets, thus having no impact on earnings.

DEPRECIATION - We depreciate utility plant on a straight-line basis over the estimated remaining lives of the various property classes. These estimates are periodically reviewed and adjusted as required after BPU approval. The composite annual rate for all depreciable utility property was approximately 2.2% in 2015, 2.2% in 2014, and 2.3% in 2013. The actual composite rate may differ from the approved rate as the asset mix changes over time. Except for retirements outside of the normal course of business, accumulated depreciation is charged with the cost of depreciable utility property retired, less salvage. Nonutility property depreciation is computed on a straight-line basis over the estimated useful lives of the property, ranging up to 50 years. Gain or loss on the disposition of nonutility property is recognized in operating income. Effective October 1, 2014, SJG's composite depreciation rate was reduced from 2.4% to 2.1%. See Note 10.

CAPITALIZED INTEREST - SJG capitalizes interest on construction at the rate of return on the rate base utilized by the BPU to set rates in SJG's last base rate proceeding. For SJG's accelerated infrastructure programs, SJG capitalizes interest on construction at a rate prescribed by the programs (see Note 10). Marina, SJRG and SJE capitalize interest on capital projects in progress based on the actual cost of borrowed funds. SJG's amounts are included in Utility Plant and Marina's amounts are included in Nonutility Property and Equipment on the consolidated balance sheets. Interest Charges are presented net of capitalized interest on the statements of consolidated income. The amount of interest capitalized by SJI for the years ended December 31, 2015, 2014 and 2013 was \$4.9 million, \$4.6 million and \$8.7 million, respectively.

IMPAIRMENT OF LONG-LIVED ASSETS - We review the carrying amount of long-lived assets for possible impairment whenever events or changes in circumstances indicate that such amounts may not be recoverable. For the years ended December 31, 2015, 2014 and 2013, no significant impairments were identified.

DERIVATIVE INSTRUMENTS - SJI accounts for derivative instruments in accordance with FASB ASC Topic 815 - "Derivatives and Hedging." We record all derivatives, whether designated in hedging relationships or not, on the consolidated balance sheets at fair value unless the derivative contracts qualify for the normal purchase and sale exemption. In general, if the derivative is designated as a fair value hedge, we recognize the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk in earnings. We currently have no fair value hedges. If the derivative is designated as a cash flow hedge, we record the effective portion of the hedge in Accumulated Other Comprehensive Loss and recognize it in the income statement when the hedged item affects earnings. We recognize ineffective portions of the cash flow hedges immediately in earnings. We currently have no cash flow hedges. We formally document all relationships between hedging instruments and hedged items, as well as our risk management objectives, strategies for undertaking various hedge transactions and our methods for assessing and testing correlation and hedge ineffectiveness. All hedging instruments are linked to the hedged asset, liability,

firm commitment or forecasted transaction. Due to the application of regulatory accounting principles under FASB ASC Topic 980, gains and losses on derivatives related to SJG's gas purchases are recorded through the Basic Gas Supply Service (BGSS) clause.

South Jersey Industries, Inc.
Part II

Initially and on an ongoing basis, we assess whether derivatives designated as hedges are highly effective in offsetting changes in cash flows or fair values of the hedged items. We discontinue hedge accounting prospectively if we decide to discontinue the hedging relationship; determine that the anticipated transaction is no longer likely to occur; or determine that a derivative is no longer highly effective as a hedge. In the event that hedge accounting is discontinued, we will continue to carry the derivative on the balance sheet at its current fair value and recognize subsequent changes in fair value in current period earnings. Unrealized gains and losses on the discontinued hedges that were previously included in Accumulated Other Comprehensive Loss will be reclassified into earnings when the forecasted transaction occurs, or when it is probable that it will not occur. Hedge accounting has been discontinued for all remaining derivatives that were designated as hedging instruments.

GAS EXPLORATION AND DEVELOPMENT - The Company capitalizes all costs associated with gas property acquisition, exploration and development activities under the full cost method of accounting. Capitalized costs include costs related to unproved properties, which are not amortized until proved reserves are found or it is determined that the unproved properties are impaired. All costs related to unproved properties are reviewed quarterly to determine if impairment has occurred. No impairment charges were recorded during the years ended December 31, 2015, 2014 and 2013. As of both December 31, 2015 and 2014, \$8.9 million related to interests in proved and unproved properties in Pennsylvania, net of amortization, is included with Nonutility Property and Equipment and Other Noncurrent Assets on the consolidated balance sheets.

TREASURY STOCK – SJI uses the par value method of accounting for treasury stock. As of December 31, 2015 and 2014, SJI held 236,571 and 263,578 shares of treasury stock, respectively. These shares are related to deferred compensation arrangements where the amounts earned are held in the stock of SJI.

INCOME TAXES - Deferred income taxes are provided for all significant temporary differences between the book and taxable bases of assets and liabilities in accordance with FASB ASC Topic 740 - "Income Taxes" (See Note 4). A valuation allowance is established when it is determined that it is more likely than not that a deferred tax asset will not be realized. Investment tax credits related to renewable energy facilities of Marina are recognized on the flow through method.

CASH AND CASH EQUIVALENTS - For purposes of reporting cash flows, highly liquid investments with original maturities of three months or less are considered cash equivalents.

IDENTIFIABLE INTANGIBLE ASSETS - Identifiable intangible assets were acquired as part of the acquisition of Energenic projects as discussed in Note 3. The primary identifiable intangible assets of the Company are customer relationships. The Company determines the useful lives of identifiable intangible assets after considering the specific facts and circumstances related to each intangible asset. Considerations may include the contractual term of any agreement related to the asset, the historical performance of the asset, the Company's long-term strategy for using the asset, any laws or other local regulations which could impact the useful life of the asset, and other economic factors, including competition and specific market conditions. Intangible assets that are deemed to have definite lives (finite-lived intangible assets) are amortized, primarily on a straight-line basis, over their useful lives, generally ranging from 2 to 20 years. SJI recorded the cost of identifiable intangible assets of \$21.6 million into Noncurrent Assets on the consolidated balance sheets as of December 31, 2015. No amortization has been taken on these assets during 2015. The Company did not have any identifiable intangible assets as of December 31, 2014.

GOODWILL - Goodwill was acquired as part of the acquisition of Energenic projects as discussed in Note 3. Goodwill represents the excess of the consideration paid over the fair value of identifiable net assets acquired. Goodwill is not amortized, but instead is subject to impairment testing on an annual basis, and between annual tests whenever events or changes in circumstances indicate that the fair value of a reporting unit may be below its carrying

amount. The Company recorded \$8.9 million of goodwill in Noncurrent Assets on the consolidated balance sheets as of December 31, 2015. No goodwill was recorded on the consolidated balance sheets as of December 31, 2014.

NEW ACCOUNTING PRONOUNCEMENTS - Other than as described below, no new accounting pronouncement issued or effective during 2015 or 2014 had, or is expected to have, a material impact on the consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), This ASU supersedes the revenue recognition requirements in FASB ASC 605, Revenue Recognition, and in most industry-specific topics. The new guidance identifies how and when entities should recognize revenue. The new rules establish a core principle requiring the recognition of revenue to depict the transfer of promised goods or services to customers in an amount reflecting the consideration to which the entity expects to be entitled in exchange for such goods or services. The new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

South Jersey Industries, Inc.
Part II

In August 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements - Going Concern (Subtopic 205-40); Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. The new guidance requires management of a company to evaluate whether there is substantial doubt about the company's ability to continue as a going concern. This ASU is effective for the annual reporting period ending after December 15, 2016, and for interim and annual reporting periods thereafter, with early adoption permitted. The Company does not expect this standard to have an impact on its consolidated financial statements upon adoption.

In February 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810) - Amendments to the Consolidation Analysis, which changes the analysis to be performed in determining whether certain types of legal entities should be consolidated. Specifically, the standard amends the evaluation of whether (a) fees paid to a decision maker or a service provider represent a variable interest, (b) a limited partnership or similar entity has the characteristics of a Variable Interest Entity ("VIE") and (c) a reporting entity is the primary beneficiary of a VIE. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015, with early adoption permitted. The Company does not expect this standard to have a significant impact on its consolidated financial statements upon adoption.

In April 2015, the FASB issued ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. This ASU requires debt issuance costs to be presented in the balance sheet as a direct deduction from the associated debt liability. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. The adoption of this guidance will not have an impact on the Company's financial statement results; however, balance sheet presentations will be modified to conform to this guidance.

Also in April 2015, the FASB issued ASU 2015-05, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40). This ASU provides guidance to customers (a) in determining whether a cloud computing arrangement includes a software license, and (b) on how the arrangement should be accounted for, depending on whether or not it includes a software license. The amended guidance is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. The Company does not expect this standard to have a significant impact on its consolidated financial statements upon adoption.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory. This ASU states that inventory for which cost is determined using a method other than last-in, first-out (LIFO) or the retail method should be subsequently measured at the lower of cost or net realizable value (NRV), rather than at the lower of cost or market. The standard is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2016. Management is currently determining the impact that adoption of this guidance will have on the Company's financial statement results.

In August 2015, the FASB issued ASU 2015-13, Derivatives and Hedging (Topic 815): Application of the Normal Purchases and Normal Sales Scope Exception to Certain Electricity Contracts within Nodal Energy Markets. This ASU clarifies that for a contract involving the purchase or sale of electricity on a forward basis, companies have the option to elect the normal purchases and normal sales scope exception. Since such contracts meet the physical delivery criterion when the delivery location is within a nodal energy market (i.e., an interconnected electricity grid operated by an independent system operator with established price points at each node or hub location), the ASU notes that it does not constitute net settlement and, consequently, does not cause such a contract to fail to meet the physical delivery criterion. The standard is effective immediately and should be applied prospectively to qualifying contracts existing on August 10, 2015, the date the ASU was issued. The adoption of this standard did not have an impact on the Company's financial statement results.

In August 2015, the FASB issued ASU 2015-15, Interest - Imputation of Interest (Subtopic 835-30): Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements. This ASU states that, given the absence of authoritative guidance for debt issuance costs related to line-of-credit arrangements within ASU 2015-03 (defined above), the SEC staff would not object to an entity deferring and presenting such costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of credit arrangement. The adoption of this standard did not have an impact on the Company's financial statement results.

In November 2015, the FASB issued ASU 2015-17, Balance Sheet Classification of Deferred Taxes, which simplifies the presentation of deferred taxes by requiring that deferred tax assets and liabilities be presented as noncurrent on the balance sheet. ASU 2015-17 is effective for annual reporting periods, and interim periods therein, beginning after December 15, 2016. Early adoption is permitted for financial statements that have not been previously issued. ASU 2015-17 may be applied either prospectively to all deferred tax liabilities and assets or retrospectively to all periods presented. The Company adopted this guidance, prospectively, as of December 31, 2015.

South Jersey Industries, Inc.
Part II

2. STOCK-BASED COMPENSATION PLAN:

On April 30, 2015, the shareholders of SJI approved the adoption of the Company's 2015 Omnibus Equity Compensation Plan (Plan), replacing the Amended and Restated 1997 Stock-Based Compensation Plan that had terminated on January 26, 2015. Under the Plan, shares may be issued to SJI's officers (Officers), non-employee directors (Directors) and other key employees. No options were granted or outstanding during the years ended December 31, 2015, 2014 and 2013. No stock appreciation rights have been issued under the plans. During the years ended December 31, 2015, 2014 and 2013, SJI granted 158,929, 136,526 and 112,928 restricted shares, respectively, to Officers and other key employees under the plans. Performance-based restricted shares vest over a three-year period and are subject to SJI achieving certain market and earnings-based performance targets as compared to a peer group average, which can cause the actual amount of shares that ultimately vest to range from between 0% to 200% of the original share units granted.

In 2015, SJI also granted time-based shares of restricted stock, one-third of which vests annually over a three-year period and is limited to 100% payout. Vesting of time-based grants is contingent upon SJI achieving a return on equity (ROE) of at least 7% during the initial year of the grant and meeting the service requirement. Provided that the 7% ROE requirement is met in the initial year, payout is solely contingent upon the service requirement being met in years two and three of the grant. In 2015, Officers and other key employees were granted 47,678 shares of time-based restricted stock, which are included in the shares noted above.

Grants containing market-based performance targets use SJI's total shareholder return (TSR) relative to a peer group to measure performance. As TSR-based grants are contingent upon market and service conditions, SJI is required to measure and recognize stock-based compensation expense based on the fair value at the date of grant on a straight-line basis over the requisite three-year service period of each award. In addition, SJI identifies specific forfeitures of share-based awards and compensation expense is adjusted accordingly over the requisite service period. Compensation expense is not adjusted based on the actual achievement of performance goals. The fair value of TSR-based restricted stock awards on the date of grant is estimated using a Monte Carlo simulation model.

Through 2014, grants containing earnings-based targets were based on SJI's earnings per share (EPS) growth rate relative to a peer group to measure performance. Beginning in 2015, earning-based performance targets include predefined EPS and ROE goals to measure performance. As EPS-based and ROE-based grants are contingent upon performance and service conditions, SJI is required to measure and recognize stock-based compensation expense based on the fair value at the date of grant over the requisite three-year period of each award. The fair value is measured as the market price at the date of grant. The initial accruals of compensation expense are based on the estimated number of shares expected to vest, assuming the requisite service is rendered and probable outcome of the performance condition is achieved. That estimate is revised if subsequent information indicates that the actual number of shares is likely to differ from previous estimates. Compensation expense is ultimately adjusted based on the actual achievement of service and performance targets.

SJI granted 26,338, 23,220 and 24,570 restricted shares to Directors in 2015, 2014 and 2013, respectively. Shares issued to Directors vest over twelve months and contain no performance conditions. As a result, 100% of the shares granted generally vest.

The following table summarizes the nonvested restricted stock awards outstanding at December 31, 2015, and the assumptions used to estimate the fair value of the awards:

Grants

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

| | | Shares Outstanding | Fair Value Per Share | Expected Volatility | Risk-Free Interest Rate | |
|----------------------------|-----------------------|-----------------------|-------------------------|------------------------|----------------------------|---|
| Officers & Key Employees - | 2014 - TSR | 51,349 | \$21.31 | 20.0 | % 0.80 | % |
| | 2014 - EPS | 51,349 | \$27.22 | N/A | N/A | |
| | 2015 - TSR | 34,574 | \$26.31 | 16.0 | % 1.10 | % |
| | 2015 - EPS, ROE, Time | 88,919 | \$29.47 | N/A | N/A | |
| Directors - | 2015 | 26,338 | \$29.21 | N/A | N/A | |

61

South Jersey Industries, Inc.
Part II

Expected volatility is based on the actual volatility of SJI's share price over the preceding three-year period as of the valuation date. The risk-free interest rate is based on the zero-coupon U.S. Treasury Bond, with a term equal to the three-year term of the Officers' and other key employees' restricted shares. As notional dividend equivalents are credited to the holders during the three-year service period, no reduction to the fair value of the award is required. As the Directors' restricted stock awards contain no performance conditions and dividends are paid or credited to the holder during the requisite service period, the fair value of these awards are equal to the market value of the shares on the date of grant.

The following table summarizes the total stock-based compensation cost for the years ended December 31 (in thousands):

| | | | |
|--------------------------|----------|----------|----------|
| | 2015 | 2014 | 2013 |
| Officers & Key Employees | \$ 1,128 | \$ 1,260 | \$ 2,236 |
| Directors | 769 | 633 | 765 |
| Total Cost | 1,897 | 1,893 | 3,001 |
| Capitalized | (216 |) (147 |) (237 |
| Net Expense | \$ 1,681 | \$ 1,746 | \$ 2,764 |

The table above reflects the reversal of approximately \$1.2 million and \$1.1 million of previously recorded costs in 2015 and 2014, respectively. These reversals are associated with EPS-based grants for which performance goals were not met.

As of December 31, 2015, there was \$2.9 million of total unrecognized compensation cost related to nonvested share-based compensation awards granted under the restricted stock plans. That cost is expected to be recognized over a weighted average period of 1.8 years.

The following table summarizes information regarding restricted stock award activity during 2015, excluding accrued dividend equivalents:

| | Officers & Other Key Employees | Directors | Weighted Average Fair Value |
|---|--------------------------------------|-----------|-----------------------------------|
| Nonvested Shares Outstanding, January 1, 2015 | 223,876 | 23,220 | \$24.40 |
| Granted | 158,929 | 26,338 | \$28.67 |
| Vested* | (91,244 |) (23,220 |) \$24.57 |
| Cancelled/Forfeited** | (65,370 |) — | \$26.56 |
| Nonvested Shares Outstanding, December 31, 2015 | 226,191 | 26,338 | \$26.89 |

*Based on performance information available at the filing of this Report, management does not expect to award shares associated with the 2013 grants to officers and other key employees in 2016.

** Represents shares forfeited as a result of retirements prior to the satisfaction of service conditions.

Performance targets during the three-year vesting periods were not attained for the 2011 or 2012 Officer and other key employee grants that vested at December 31, 2013 and 2014, respectively. As a result, no shares were awarded in 2014 or 2015. During the year ended December 31, 2013, SJI awarded 66,077 shares to its Officers and other key employees at a market value of \$3.3 million. Also, during the years ended December 31, 2015, 2014 and 2013, SJI granted 26,338, 23,220 and 24,570 shares to its Directors at a market value of \$0.8 million, \$0.6 million and \$0.6

million, respectively. The Company has a policy of issuing new shares to satisfy its obligations under the plans; therefore, there are no cash payment requirements resulting from the normal operation of this plan. However, a change in control could result in such shares becoming nonforfeitable or immediately payable in cash. At the discretion of the Officers, Directors and other key employees, the receipt of vested shares can be deferred until future periods. These deferred shares are included in Treasury Stock on the consolidated balance sheets.

South Jersey Industries, Inc.
Part II

3. AFFILIATIONS AND DISCONTINUED OPERATIONS:

AFFILIATIONS — The following affiliated entities are accounted for under the equity method:

Energenic – US, LLC (Energenic) - Marina and a joint venture partner formed Energenic, in which Marina has a 50% equity interest. Energenic develops and operates on-site, self-contained, energy-related projects.

On December 31, 2015, Energenic, Marina and its joint venture partner entered into two Equity Distribution and Purchase Agreements (the "Transaction"), pursuant to which Marina became the sole owner of eight of the Energenic projects ("Marina Projects") and its joint venture partner became the sole owner of seven other Energenic projects ("Partner Projects"). The Transaction has been accounted for as a distribution of member interests by Energenic to its owners and a business combination through the exchange of member interests in various projects between Marina and its joint venture partner. In connection with the distribution, Energenic revalued the projects to fair value, resulting in a net gain of \$2.7 million, 50% of which the Company has recognized in Equity in Loss (Earnings) of Affiliated Companies. In connection with the exchange, the joint venture partner also provided a \$19.5 million note payable to Marina. The note and other existing obligations of the joint venture partner to Marina (including the note receivable discussed below under LVE Energy Partners and amounts previously included in Notes Receivable - Affiliate) are included in Notes Receivable on the consolidated balance sheets, with approximately \$1.8 million being included as a current asset as it is due within one year. This note is collateralized by security interests in various energy project assets owned by the joint venture partner as well as personal guarantees from its principals.

As part of the transaction, each party is relieved of any guarantees related to the Projects in which it no longer has an ownership interest.

The projects that are now wholly-owned by Marina are ACB, ACLE, BCLE, SCLE, SXLE, MCS, NBS & SBS. Through December 31, 2015, Marina's investment in Energenic has been accounted for under the equity method of accounting. As such, Marina's share of the equity value of the projects has been included within Investment in Affiliates on the consolidated balance sheets and Marina's share of the loss or earnings from the projects has been included within Equity in (Loss) Earnings of Affiliated Companies on the statements of consolidated income. As of December 31, 2015, the assets and liabilities of the projects that are now wholly-owned by Marina are consolidated into the consolidated balance sheets. The respective results from operations and cash flows of the projects that are now wholly-owned by Marina will be consolidated into the statements of consolidated income and cash flows beginning in 2016. This transaction represents a non-cash investing and financing activity. The results of the acquired projects will be included in the On-Site Energy Production segment.

South Jersey Industries, Inc.
Part II

The following table summarizes the preliminary purchase price allocation and reflects 100% of the fair values of the assets acquired and the liabilities assumed by the Company in connection with the Transaction. The Company is still awaiting final valuation reports supporting the allocation of the purchase price to certain identifiable intangibles. Total consideration for the step acquisition of the remaining interest in the Marina Projects was \$46.1 million, which represents the fair value of the Company's interest in the Partner Projects exchanged (\$31.5 million) as well as the existing value of the Marina Projects immediately prior to the exchange (\$14.6 million) (in thousands):

| | | |
|--|----------|---|
| Current assets (excluding inventory) | \$7,804 | |
| Inventory | 3,154 | |
| Note Receivable Received | 19,504 | |
| Fixed Assets | 40,854 | |
| Intangible Assets: | | |
| Identifiable Intangibles | 21,553 | |
| Goodwill | 8,880 | |
| Non-Current Assets | 1,873 | |
| Current Liabilities | (8,196) |) |
| Note Payable - Affiliate | (16,986) |) |
| Long-Term Debt, including current portion | (21,457) |) |
| Capital Lease Payable | (10,357) |) |
| Other Non-Current Liabilities | (572) |) |
| Fair Value of Consolidated Assets and Liabilities of Acquired Projects | \$46,054 | |

The pro forma impact of this transaction on the operations of the Company is not significant.

Potato Creek, LLC (Potato Creek) - SJI and a joint venture partner formed Potato Creek, in which SJI has a 30% equity interest. Potato Creek owns and manages the oil, gas and mineral rights of certain real estate in Pennsylvania.

PennEast Pipeline Company, LLC (PennEast) - Midstream has a 20% investment in PennEast, which is planning to construct an approximately 100-mile natural gas pipeline that will extend from Northeastern Pennsylvania into New Jersey, with a target completion of late 2017.

LVE Energy Partners, LLC (LVE) - In March 2013, substantially all of the assets of this joint venture, in which Marina had a 50% equity interest, were sold. In 2013, the Company received (a) \$57.9 million of repayments of advances to LVE; and (b) a \$7.9 million note receivable from a third party, which is recorded in the consolidated balance sheets as of December 31, 2014. As of December 31, 2013, LVE was dissolved and the Company incurred a \$0.8 million charge to write-off the remaining interest in 2013.

During 2015, the Company made net investments in unconsolidated affiliates of \$18.0 million. During 2014, the Company provided net advances to unconsolidated affiliates of \$2.4 million. During 2013, the Company made investments in, and provided net advances to, unconsolidated affiliates of \$9.6 million, which does not include the cash proceeds related to the sale of LVE as discussed above. As of December 31, 2015 and 2014, the outstanding balance of Notes Receivable – Affiliate was \$16.4 million and \$51.5 million, respectively. As of December 31, 2015, approximately \$13.7 million of these notes are secured by property, plant and equipment of the affiliates, accrue interest at 7.5% and are to be repaid through 2025, and the remaining \$2.7 million of these notes are unsecured and accrue interest at variable rates.

SJI holds significant variable interests in these entities but is not the primary beneficiary. Consequently, these entities are accounted for under the equity method because SJI does not have both a) the power to direct the activities of the entity that most significantly impact the entity's economic performance and b) the obligation to absorb losses of the entity that could potentially be significant to the entity or the right to receive benefits from the entity that could potentially be significant to the entity. As of December 31, 2015, the Company had a net asset of approximately \$17.0 million included in Investment in Affiliates on the consolidated balance sheets related to equity method investees, in addition to Notes Receivable – Affiliate as discussed above. SJI's maximum exposure to loss from these entities as of December 31, 2015 is limited to its combined equity contributions and the Notes Receivable-Affiliate in the amount of \$33.4 million.

South Jersey Industries, Inc.
Part II

The following tables present summarized financial information of the total balances for all Affiliates (of which, on average, SJI has only a 50% equity interest) accounted for under the equity method (in thousands):

| | 2015 | 2014 |
|------------------------|-----------|-----------|
| Current assets | \$21,914 | \$46,683 |
| Noncurrent assets | \$117,091 | \$478,240 |
| Current liabilities | \$47,797 | \$75,260 |
| Noncurrent liabilities | \$112,438 | \$315,801 |

As of December 31, 2015, the assets and liabilities of the projects that are now wholly owned by Marina as discussed above are consolidated into the consolidated balance sheets. As such, they are not included in the above table.

| | 2015 | 2014 | 2013 |
|--|-------------|-------------|-----------|
| Revenues | \$163,479 | \$207,031 | \$178,026 |
| Cost of sales | \$86,452 | \$107,042 | \$91,228 |
| (Loss) Income from continuing operations | \$(56,962) | \$(11,666) | \$6,229 |
| Net (Loss) Income | \$(56,962) | \$(11,666) | \$6,229 |

The respective results from operations of the projects that are now wholly owned by Marina as discussed above were not consolidated into the statements of consolidated income during 2015. As such, they are included in the above table.

DISCONTINUED OPERATIONS - Discontinued Operations consist of the environmental remediation activities related to the properties of South Jersey Fuel, Inc. (SJF) and the product liability litigation and environmental remediation activities related to the prior business of The Morie Company, Inc. (Morie). SJF is a subsidiary of Energy & Minerals, Inc. (EMI), an SJI subsidiary, which previously operated a fuel oil business. Morie is the former sand mining and processing subsidiary of EMI. EMI sold the common stock of Morie in 1996.

SJI conducts tests annually to estimate the environmental remediation costs for these properties.

Summarized operating results of the discontinued operations for the years ended December 31, were (in thousands, except per share amounts):

| | 2015 | 2014 | 2013 |
|---|-----------|-----------|-----------|
| Loss before Income Taxes: | | | |
| Sand Mining | \$(422) | \$(620) | \$(406) |
| Fuel Oil | (338) | (274) | (816) |
| Income Tax Benefits | 257 | 312 | 426 |
| Loss from Discontinued Operations — Net | \$(503) | \$(582) | \$(796) |
| Earnings Per Common Share from Discontinued Operations — Net: | | | |
| Basic and Diluted | \$(0.01) | \$(0.01) | \$(0.01) |

South Jersey Industries, Inc.
Part II

4. INCOME TAXES:

SJI files a consolidated federal income tax return. State income tax returns are filed on a separate company basis in states where SJI has operations and/or a requirement to file. Total income taxes applicable to operations differ from the tax that would have resulted by applying the statutory Federal income tax rate to pre-tax income for the following reasons (in thousands):

| | 2015 | 2014 | 2013 |
|--|----------|------------|------------|
| Tax at Statutory Rate | \$37,440 | \$35,727 | \$22,181 |
| Increase (Decrease) Resulting from: | | | |
| State Income Taxes | 3,985 | 1,960 | 971 |
| ESOP Dividend | (1,298) |) (1,232) |) (1,176) |
| Amortization of Investment Tax Credits - Utility | (149) |) (211) |) (258) |
| AFUDC | (1,109) |) (1,481) |) (916) |
| Investment and Other Tax Credits | (37,503) |) (30,661) |) (38,179) |
| Other - Net | (6) |) 347 |) (1,637) |
| Income Taxes: | | | |
| Continuing Operations | 1,360 | 4,449 | (19,014) |
| Discontinued Operations | (257) |) (312) |) (426) |
| Total Income Tax Expense (Benefit) | \$1,103 | \$4,137 | \$(19,440) |

The provision for Income Taxes is comprised of the following (in thousands):

| | 2015 | 2014 | 2013 |
|------------------------------------|---------|----------|------------|
| Current: | | | |
| Federal | \$— |) \$(62) |) \$(273) |
| State | (2,352) |) 3,052 |) 3,066 |
| Total Current | (2,352) |) 2,990 |) 2,793 |
| Deferred: | | | |
| Federal | (4,622) |) 1,707 |) (19,978) |
| State | 8,483 |) (37) |) (1,571) |
| Total Deferred | 3,861 |) 1,670 |) (21,549) |
| Investment Tax Credit - Utility | (149) |) (211) |) (258) |
| Income Taxes: | | | |
| Continuing Operations | 1,360 | 4,449 | (19,014) |
| Discontinued Operations | (257) |) (312) |) (426) |
| Total Income Tax Expense (Benefit) | \$1,103 | \$4,137 | \$(19,440) |

Investment Tax Credits attributable to SJG are deferred and amortized at the annual rate of 3.0%, which approximates the life of related assets.

South Jersey Industries, Inc.
Part II

The net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting and income tax purposes resulted in the following net deferred tax assets and liabilities at December 31 (in thousands):

| | 2015 | 2014 |
|---|-----------|------------|
| Deferred Tax Assets: | | |
| Net Operating Loss Carryforward | \$195,358 | \$157,174 |
| Investment and Other Tax Credits | 200,491 | 154,805 |
| Derivatives / Unrealized Gain | 5,652 | 12,554 |
| Conservation Incentive Program | — | 2,027 |
| Deferred State Tax | 24,833 | 21,548 |
| Investment Tax Credit Basis Gross-Up | — | 77 |
| Pension & Other Post Retirement Benefits | 29,998 | 34,892 |
| Deferred Revenues | 4,924 | 11,647 |
| Provision for Uncollectibles | 4,200 | 6,296 |
| Other | 6,448 | 6,734 |
| Total Deferred Tax Asset | \$471,904 | \$407,754 |
| Deferred Tax Liabilities: | | |
| Book versus Tax Basis of Property | \$675,521 | \$558,960 |
| Deferred Gas Costs - Net | 3,998 | 22,959 |
| Environmental Remediation | 19,207 | 12,147 |
| Deferred Regulatory Costs | 566 | 6,333 |
| Budget Billing - Customer Accounts | 830 | 1,138 |
| Deferred Pension & Other Post Retirement Benefits | 42,216 | 39,891 |
| Conservation Incentive Program | 1,132 | — |
| Equity In Loss Of Affiliated Companies | 9,111 | 39,230 |
| Other | 15,268 | 13,868 |
| Total Deferred Tax Liability | \$767,849 | \$694,526 |
| Deferred Tax Liability - Net | \$295,945 | \$286,772 |
| Current Deferred Tax Asset | \$— | \$(57,748) |
| Noncurrent Deferred Tax Liability | 295,945 | 344,520 |
| Deferred Tax Liability - Net | \$295,945 | \$286,772 |

As of December 31, 2015, SJI has the following federal and state net operating loss carryforwards (in thousands):

| Expire in: | Net Operating Loss Carryforwards | |
|------------|----------------------------------|-----------|
| | Federal | State |
| 2031 | \$163,880 | \$45,866 |
| 2032 | 43,724 | 19,356 |
| 2033 | 68,696 | 34,940 |
| 2034 | 117,325 | 28,622 |
| 2035 | 133,782 | 21,685 |
| | \$527,407 | \$150,469 |

South Jersey Industries, Inc.
Part II

As of December 31, 2015, SJI has the following investment tax credit carryforwards (in thousands):

| Expire in: | Investment Tax Credit Carryforward |
|------------|------------------------------------|
| 2030 | \$11,628 |
| 2031 | 26,613 |
| 2032 | 32,071 |
| 2033 | 46,179 |
| 2034 | 38,727 |
| 2035 | 42,548 |
| | \$197,766 |

SJI has \$1.2 million of federal alternative minimum tax credits which have no expiration date. SJI also has research and development credits of \$1.4 million that will expire between 2031 and 2034. A valuation allowance is recorded when it is more likely than not that any of SJI's deferred tax assets will not be realized. SJI believes that it will generate sufficient future taxable income to realize the income tax benefits related to SJI's net deferred tax assets.

The total unrecognized tax benefits as of December 31, 2015, 2014, and 2013 were \$0.6 million, \$0.6 million, and \$0.5 million, respectively, which excludes \$0.7 million, \$0.7 million, and \$0.6 million of accrued interest and penalties, respectively.

A reconciliation of the beginning and ending amount of unrecognized tax benefits for the years ended December 31, is as follows (in thousands):

| | 2015 | 2014 | 2013 |
|--|-------|-------|-------|
| Balance at January 1, | \$552 | \$547 | \$503 |
| Increase as a result of tax positions taken in prior years | 7 | 5 | 44 |
| Decrease due to a lapse in the statute of limitations | — | — | — |
| Settlements | — | — | — |
| Balance at December 31, | \$559 | \$552 | \$547 |

The amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate is not significant. The Company's policy is to record interest and penalties related to unrecognized tax benefits as interest expense and other expense, respectively. These amounts were not significant in 2015, 2014 or 2013. There have been no significant changes to the unrecognized tax benefits during 2015, 2014 or 2013 and the Company does not anticipate any significant changes in the total unrecognized tax benefits within the next 12 months.

The unrecognized tax benefits are primarily related to an uncertainty of state income tax issues relating to the Company's nexus in certain states. Federal income tax returns from 2012 forward and state income tax returns from 2008 forward are open and subject to examination.

5. PREFERRED STOCK:

REDEEMABLE CUMULATIVE PREFERRED STOCK - SJI has 2,500,000 authorized shares of Preference Stock, no par value, which has not been issued.

Table of Contents

6. COMMON STOCK:

The following shares were issued and outstanding at December 31 (See Note 1):

| | 2015 | 2014 | 2013 |
|-------------------------------|------------|------------|------------|
| Beginning of Year | 68,334,860 | 65,430,084 | 63,306,524 |
| New Issues During Year: | | | |
| Dividend Reinvestment Plan | 2,604,424 | 2,881,556 | 1,966,834 |
| Stock-Based Compensation Plan | 26,338 | 23,220 | 156,726 |
| End of Year | 70,965,622 | 68,334,860 | 65,430,084 |

The par value (\$1.25 per share) of stock issued was recorded in Common Stock and the net excess over par value at December 31, 2015 of approximately \$61.1 million was recorded in Premium on Common Stock.

EARNINGS PER COMMON SHARE (EPS) — Basic EPS is based on the weighted-average number of common shares outstanding. The incremental shares required for inclusion in the denominator for the diluted EPS calculation were 195,139; 150,062, and 115,520 shares for the years ended December 31, 2015, 2014 and 2013, respectively. These shares relate to SJI's restricted stock as discussed in Note 2.

DIVIDENDS PER SHARE - Dividends per share were \$1.02, \$0.96 and \$0.90 for the years ended December 31, 2015, 2014 and 2013, respectively.

DIVIDEND REINVESTMENT PLAN (DRP) —The Company offers a DRP which allows participating shareholders to purchase shares of SJI common stock by automatic reinvestment of dividends or optional purchases. Shares of common stock offered by the DRP have been issued directly by SJI from its authorized but unissued shares of common stock. The Company raised \$63.2 million and \$80.7 million of equity capital through the DRP during the years ended December 31, 2015 and 2014, respectively.

7. FINANCIAL INSTRUMENTS:

RESTRICTED INVESTMENTS —Marina is required to maintain escrow accounts related to ongoing capital projects as well as unused loan proceeds pending approval of construction expenditures. As of December 31, 2015 and 2014, the escrowed proceeds, including interest earned, totaled \$3.4 million and \$1.7 million, respectively.

The Company maintains margin accounts with selected counterparties to support its risk management activities. The balances required to be held in these margin accounts increase as the net value of the outstanding energy-related contracts with the respective counterparties decrease. As of December 31, 2015 and 2014, the balances in these accounts totaled \$43.7 million and \$63.7 million, respectively.

In accordance with a Loan & Security Agreement which ACB has with a third party (see Note 14 - Long-Term Debt), ACB is required to maintain control accounts which include a debt service reserve. As of December 31, 2015, the balance in these accounts totaled \$1.7 million.

The carrying amounts of the Restricted Investments approximate their fair values at December 31, 2015 and 2014, which would be included in Level 1 of the fair value hierarchy (See Note 17).

INVESTMENT IN AFFILIATES - During 2011, subsidiaries of Energenic, in which Marina has a 50% equity interest, entered into 20-year contracts to build, own and operate a central energy center and energy distribution system for a new hotel, casino and entertainment complex in Atlantic City, New Jersey. The complex commenced

operations in April 2012, and as a result, Energenic subsidiaries began providing full energy services to the complex.

In June 2014, the parent company of the hotel, casino and entertainment complex filed petitions in U. S. Bankruptcy Court to facilitate a sale of substantially all of its assets. The complex ceased normal business operations in September 2014. Energenic subsidiaries continued to provide limited energy services to the complex during the shutdown period under a temporary agreement with the trustee. The hotel, casino and entertainment complex was sold in April 2015. As of December 31, 2015, the Energenic subsidiaries were providing limited services to the complex under a short-term agreement with the new owner. However, the Energenic subsidiaries had not been able to secure a permanent or long-term energy services agreement with the new owner.

South Jersey Industries, Inc.
Part II

As a result, management of the Company and Energenic have evaluated the carrying value of the investment in this project and a related note receivable. Based on the inability of the Energenic subsidiaries to secure a permanent or long-term energy services agreement, the Company recorded a \$7.7 million (net of tax) non-cash charge to earnings during the second quarter of 2015 due to the reduction in the carrying value of the investment in this project recorded by Energenic. This charge is included in Equity in Loss of Affiliated Companies for the year ended December 31, 2015 on the statements of consolidated income. Estimating the fair value of an investment is highly judgmental and involves the use of significant estimates and assumptions. Actual results may differ significantly from those used to develop this estimate.

The central energy center and energy distribution system owned by the Energenic subsidiaries was financed in part by the issuance of bonds during 2011. These bonds were collateralized primarily by certain assets of the central energy center and revenue from the energy services agreement with the hotel, casino and entertainment complex. During 2015, due to the cessation of normal business operations of the complex and the inability of the Energenic subsidiaries to meet its obligations under the bonds, the trustee for the bondholders filed suit to foreclose on certain assets of the central energy center. In November 2015 during settlement discussions, the bondholders alleged among other things, that they were entitled to recover from Energenic itself, any amounts owed under the bonds that were not covered by the collateral, including principal, interest and attorney's fees. The bondholders' assertion was based on inconsistent language in the bond documents. As a result, as of December 31, 2015, management of Energenic has accrued for the cost to settle this claim (See Note 19). The Company's share of this pre-tax charge of \$7.5 million is included in Equity in Loss of Affiliated Companies for the year ended December 31, 2015 on the statements of consolidated income. Management of Energenic is currently in active settlement discussions and believes that this amount is recoverable from its insurance carrier and external legal advisors.

As of December 31, 2015, the Company, through its investment in Energenic, had a remaining net asset of approximately \$1.7 million included in Investment in Affiliates on the consolidated balance sheets related to cogeneration assets for this project. In addition, the Company had approximately \$13.7 million included in Notes Receivable - Affiliate on the consolidated balance sheets, due from Energenic, which is secured by those cogeneration assets. This note is subject to a reimbursement agreement that secures reimbursement for the Company, from its joint venture partner, of a proportionate share of any amounts that are not repaid.

Management will continue to monitor the situation surrounding the complex and will evaluate the carrying value of the investment and the note receivable as future events occur.

NOTE RECEIVABLE - In June 2015, SJG advanced \$10.0 million to a not-for-profit organization formed to spur economic development in Atlantic City, New Jersey, of which \$0.1 million has been repaid. The note bears interest at 1.0% for an initial term of six months, with the borrower's option to extend the term for two additional terms of three months each. In December 2015, the borrower exercised its first option to extend the term of the note for an additional three months. SJG holds a first lien security interest on land in Atlantic City as collateral against this note. The carrying amount of this receivable approximates its fair value at December 31, 2015, which would be included in Level 2 of the fair value hierarchy (See Note 17).

LONG-TERM RECEIVABLES — SJG provides financing to customers for the purpose of attracting conversions to natural gas heating systems from competing fuel sources. The terms of these loans call for customers to make monthly payments over a period of five to ten years with no interest. The carrying amounts of such loans were \$12.9 million and \$15.0 million as of December 31, 2015 and 2014, respectively. The current portion of these receivables is reflected in Accounts Receivable and the non-current portion is reflected in Contract Receivables on the consolidated balance sheets. The carrying amounts noted above are net of unamortized discounts resulting from imputed interest in

the amount of \$1.3 million as of both December 31, 2015 and 2014. The annual amortization to interest is not material to the Company's consolidated financial statements. The carrying amounts of these receivables approximate their fair value at December 31, 2015 and 2014, which would be included in Level 2 of the fair value hierarchy (See Note 17).

CREDIT RISK - As of December 31, 2015, approximately \$11.7 million or 11.8% of current and noncurrent Derivatives–Energy Related Assets are transacted with one counterparty. This counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assigned to SJI in the event of default by the counterparty.

South Jersey Industries, Inc.
Part II

FINANCE OBLIGATION - During 2010, ACB Energy Partners LLC (ACB), which at the time was a wholly-owned subsidiary of Energenic, of which Marina has a 50% equity interest, completed construction of a combined heat and power generating facility to serve, under an energy services agreement, a thermal plant owned by Marina. Construction period financing was provided by Marina. As substantially all of the costs of constructing the facility were funded by the financing provided by Marina, Marina was considered the owner of the facility for accounting purposes during the construction period. When an entity is considered the accounting owner during the construction period, a sale of the asset effectively occurs when construction of the asset is completed. However, due to its continuing involvement in the facility through its equity interest in Energenic, Marina continued to be considered the owner of the facility for accounting purposes under ASC Topic 360 Property, Plant and Equipment. As a result, as of December 31, 2014, the transaction was accounted for as a financing arrangement under ASC Topic 840 Leases and, therefore, the Company included costs to construct the facility within Nonutility Property, Plant and Equipment on the consolidated balance sheets of \$23.7 million as of December 31, 2014. In addition, the Company included repayments from ACB to Marina on the construction loan within the Finance Obligation on the consolidated balance sheets. Marina does not have a fixed payment obligation to ACB; as a result, the Finance Obligation is classified as a noncurrent liability on the consolidated balance sheets as of December 31, 2014. The costs to construct the facility and the repayments of the construction loan were amortized over the term of the energy services agreement. The impact on the statements of consolidated income was not significant. As a result, the Company recorded \$19.7 million, net of amortization, within Finance Obligation on the consolidated balance sheets at December 31, 2014. On December 31, 2015, ACB became a wholly-owned subsidiary of Marina. As a result of this transaction, the facility is no longer accounted for as a financing arrangement and is instead reflected at fair value (see Note 3). As such, the Finance Obligation is no longer recorded on the consolidated balance sheet as of December 31, 2015.

FINANCIAL INSTRUMENTS NOT CARRIED AT FAIR VALUE - The fair value of a financial instrument is the market price to sell an asset or transfer a liability at the measurement date. The carrying amounts of SJI's financial instruments approximate their fair values at December 31, 2015 and 2014, except as noted below.

For Long-Term Debt, in estimating the fair value, we use the present value of remaining cash flows at the balance sheet date. We based the estimates on interest rates available to SJI at the end of each period for debt with similar terms and maturities (Level 2 in the fair value hierarchy, see Note 17 - Fair Value of Financial Assets and Financial Liabilities). The estimated fair values of SJI's long-term debt, including current maturities, as of December 31, 2015 and 2014, were \$1,079.0 million and \$1,058.5 million, respectively. The carrying amounts of SJI's long-term debt, including current maturities, as of December 31, 2015 and 2014, was \$1,035.8 million and \$1,009.4 million, respectively.

OTHER FINANCIAL INSTRUMENTS - The carrying amounts of SJI's other financial instruments approximate their fair values at December 31, 2015 and 2014.

8. SEGMENTS OF BUSINESS:

SJI operates in several different reportable operating segments which reflect the financial information regularly evaluated by the chief operating decision maker. These segments are as follows:

- Gas utility operations (SJG) consist primarily of natural gas distribution to residential, commercial and industrial customers.

- Wholesale energy operations include the activities of SJRG and SJEX.

- SJE is involved in both retail gas and retail electric activities.

- Retail gas and other operations include natural gas acquisition and transportation service business lines.

- Retail electric operations consist of electricity acquisition and transportation to commercial and industrial customers.

On-Site energy production consists of Marina's thermal energy facility and other energy-related projects. Also included in this segment are the activities of ACB, ACLE, BCLE, SCLE, SXLE, MCS, NBS and SBS. These entities became wholly-owned subsidiaries of Marina on December 31, 2015 (see Note 3). As such their activities are included only in the Identifiable Assets table below.

• Appliance service operations includes SJESP's servicing of appliances under warranty via a subcontractor arrangement as well as on a time and materials basis.

• The activities of Midstream are a part of the Corporate & Services segment.

South Jersey Industries, Inc.
Part II

SJI groups its nonutility operations into two categories: Energy Group and Energy Services. Energy Group includes wholesale energy, retail gas and other, and retail electric operations. Energy Services includes on-site energy production and appliance service operations. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Intersegment sales and transfers are treated as if the sales or transfers were to third parties at current market prices.

Information about SJI's operations in different reportable operating segments is presented below (in thousands):

| | 2015 | 2014 | 2013 |
|---------------------------------|-----------|------------|------------|
| Operating Revenues: | | | |
| Gas Utility Operations | \$534,290 | \$501,875 | \$446,480 |
| Energy Group: | | | |
| Wholesale Energy Operations | 129,098 | 77,048 | 831 |
| Retail Gas and Other Operations | 87,198 | 127,001 | 107,748 |
| Retail Electric Operations | 150,049 | 123,773 | 128,932 |
| Subtotal Energy Group | 366,345 | 327,822 | 237,511 |
| Energy Services: | | | |
| On-Site Energy Production | 63,665 | 56,129 | 43,551 |
| Appliance Service Operations | 11,186 | 10,518 | 13,723 |
| Subtotal Energy Services | 74,851 | 66,647 | 57,274 |
| Corporate & Services | 31,156 | 30,174 | 31,286 |

9. LEASES:

Marina is considered to be the lessor of certain thermal energy generating property and equipment under an operating lease which expires in May 2027. As of December 31, 2015 and 2014 the carrying costs of this property and equipment under operating lease was \$78.2 million and \$79.9 million, respectively, (net of accumulated depreciation of \$28.5 million and \$25.4 million, respectively) and is included in Nonutility Property and Equipment in the consolidated balance sheets.

Minimum future rentals to be received on this operating lease of property and equipment as of December 31, 2015 for each of the next five years and in the aggregate are (in thousands):

| | |
|------------------------------|---------|
| Year ended December 31, | |
| 2016 | \$5,396 |
| 2017 | 5,396 |
| 2018 | 5,396 |
| 2019 | 5,396 |
| 2020 | 5,396 |
| Thereafter | 34,626 |
| Total minimum future rentals | 61,606 |

Minimum future rentals do not include additional amounts to be received based on actual use of the leased property.

BCLE is considered to be the lessee of certain electric generating units and related facilities and equipment under a capital lease which expires in October 2027. The interest rate related to the obligation is 6.8%, and the related facilities and equipment are amortized over the useful life ranging from 7-39 years. As of December 31, 2015, the carrying costs of this property and equipment under capital lease is \$4.1 million and is included in Nonutility Property and Equipment in the consolidated balance sheets. Since BCLE became a wholly-owned subsidiary of Marina on December 31, 2015 (see Note 3), there were no carrying costs on the consolidated balance sheets as of December 31, 2014, and no depreciation has been taken on this lease by Marina as of December 31, 2015.

Minimum future rentals to be paid on this capital lease of property and equipment as of December 31, 2015 for each of the next five years and in the aggregate are (in thousands):

| | |
|--|----------|
| Year ended December 31, | |
| 2016 | \$1,282 |
| 2017 | 1,282 |
| 2018 | 1,282 |
| 2019 | 1,282 |
| 2020 | 1,282 |
| Thereafter | 8,657 |
| Total minimum future rentals | 15,067 |
| Less: Interest portion | (4,710) |
| Present value of future minimum lease payments | \$10,357 |

South Jersey Industries, Inc.
Part II

10. RATES AND REGULATORY ACTIONS:

BASE RATES - SJG is subject to the rules and regulations of the BPU. In September 2010, the BPU granted SJG a base rate increase of \$42.1 million, which was predicated, in part, upon an 8.21% rate of return on rate base that included a 10.3% return on common equity. The \$42.1 million includes \$16.6 million of revenue previously recovered through the Conservation Incentive Program (CIP) and \$6.8 million of revenues previously recovered through the Capital Investment Recovery Tracker (CIRT), resulting in incremental revenue of \$18.7 million. SJG was permitted to recover regulatory assets contained in its petition and defer certain federally mandated pipeline integrity management program costs for recovery in its next base rate case. In addition, annual depreciation expense was reduced by \$1.2 million as a result of the amortization of excess cost of removal recoveries. The BPU also authorized a Phase II of the base rate proceeding to review the costs of CIRT projects not rolled into rate base in the September 2010 settlement. A proceeding took place in 2013 to roll into base rates the remaining \$22.5 million of CIRT I project costs that were not included in the 2010 rate increase, as well as CIRT II and III investments totaling \$95.0 million that were made subsequent to the 2010 base rate case. These costs were rolled into rate base and reflected in base rates effective October 2013.

In September 2014, the BPU granted SJG a base rate increase of \$20.0 million, which was predicated, in part, upon a 7.10% rate of return on rate base that included a 9.75% return on common equity. The \$20.0 million includes approximately \$7.5 million of revenue associated with previously approved Accelerated Infrastructure Replacement Program (AIRP) investments that were rolled into base rates. SJG was also permitted to recover certain regulatory assets and to reduce its composite depreciate rate from 2.4% to 2.1%. These changes became effective on October 1, 2014.

RATE MECHANISMS - SJG's tariff, a schedule detailing the terms, conditions and rate information applicable to its various types of natural gas service, as approved by the BPU, has several primary rate mechanisms as discussed in detail below:

Basic Gas Supply Service (BGSS) Clause - The BGSS price structure allows SJG to recover all prudently incurred gas costs. BGSS charges to customers can be either monthly or periodic (annual). Monthly BGSS charges are applicable to large use customers and are referred to as monthly because the rate changes on a monthly basis pursuant to a BPU-approved formula based on commodity market prices. Periodic BGSS charges are applicable to lower usage customers, which include all of SJG's residential customers, and are evaluated at least annually by the BPU. However, to some extent, more frequent rate changes to the periodic BGSS are allowed. SJG collects gas costs from customers on a forecasted basis and defers periodic over/under recoveries to the following BGSS year, which runs from October 1 through September 30. If SJG is in a net cumulative undercollected position, gas costs deferrals are reflected on the balance sheet as a regulatory asset. If SJG is in a net cumulative overcollected position, amounts due back to customers are reflected on the balance sheet as a regulatory liability. SJG pays interest on net overcollected BGSS balances at the rate of return on rate base utilized by the BPU to set rates in the last base rate proceeding.

Regulatory actions regarding the BGSS were as follows:

- January 2013 - SJG credited the accounts of its periodic BGSS customers with refunds totaling \$9.4 million due to gas costs that were lower than projections.
- May 2013 - SJG filed its annual BGSS filing with the BPU requesting a \$0.6 million reduction in gas cost recoveries.
- September 2013 - The BPU issued an Order approving, on a provisional basis, SJG's request for a \$0.6 million reduction in gas cost recoveries.
- January 2014 - SJG credited the accounts of its periodic BGSS customer with refunds totaling \$11.2 million due to gas costs that were lower than projected.

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

• May 2014 - SJG filed its annual BGSS filing with the BPU requesting a \$27.0 million, or a 9.3% increase in gas cost recoveries.

• September 2014 - The BPU issued an Order approving, on a provisional basis, SJG's request for a \$27.0 million increase in gas cost recoveries.

• June 2015 - SJG filed its annual BGSS filing with the BPU, requesting a \$28.4 million decrease in gas cost recoveries.

• September 2015 - The BPU issued an Order approving, on a provisional basis, SJG's request for a \$28.4 million decrease in gas cost recoveries.

South Jersey Industries, Inc.
Part II

Conservation Incentive Program (CIP) - The primary purpose of the CIP is to promote conservation efforts, without negatively impacting financial stability, and to base SJG's profit margin on the number of customers rather than the amount of natural gas distributed to customers. In October 2006, the BPU approved SJG's CIP as a three-year pilot program. In January 2010, the BPU approved an extension of this program through September 2013, with an automatic one year extension through September 2014 if a request for an extension was filed by March 2013. A petition was filed in March 2013 to extend the CIP program and in May 2014 the BPU approved the continuation of the CIP. Each CIP year begins October 1 and ends September 30 of the subsequent year. On a monthly basis during the CIP year, SJG records adjustments to earnings based on weather and customer usage factors, as incurred. Subsequent to each year, SJG makes filings with the BPU to review and approve amounts recorded under the CIP. BPU approved cash inflows or outflows generally will not begin until the next CIP year.

Regulatory actions regarding the CIP were as follows:

• March 2013 - SJG filed a joint petition with another utility requesting modification to, and the continuation of, the CIP program effective October 1, 2013.

• May 2013 - SJG made its annual CIP filing with the BPU requesting a reduction in revenue of \$17.8 million, which includes a \$2.3 million reduction in non-weather related recovery and a \$15.5 million reduction in weather related recovery.

• September 2013 - The BPU issued an Order approving, on a provisional basis, the 2013-2014 CIP rates filed in May 2013, effective October 1, 2013.

• May 2014 - SJG made its annual CIP filing with the BPU requesting a revenue reduction of \$21.8 million, which includes a \$4.2 million increase in non-weather related revenues and a \$26.0 million reduction in weather related revenues.

• September 2014 - The BPU issued an Order approving, on a provisional basis, the 2014-2015 CIP rates filed in May 2014, effective October 1 2014.

• June 2015 - SJG filed its annual CIP filing with the BPU, requesting a decrease in revenues of \$11.3 million, which includes a \$8.8 million decrease in non-weather related revenues and a \$2.5 million decrease in weather related revenues.

• September 2015 - The BPU issued an Order approving, on a provisional basis, the 2015-2016 CIP rates filed in June 2015, effective October 1, 2015.

Capital Investment Recovery Tracker (CIRT) - The purpose of the CIRT was to accelerate capital expenditures in an effort to stimulate the economy. The petition requested that SJG be allowed to earn a return of, and a return on, its investment. On a monthly basis during the CIRT year, SJG recorded adjustments to earnings based on actual CIRT program expenditures, as incurred. In September 2013, the BPU approved the base rate roll in of the CIRT I, II and III program investments effective October 1, 2013, resulting in a \$15.5 million increase in annual revenue. This approval also concluded Phase II of the 2010 base rate case. All CIRT program investments have been rolled into rate base and the CIRT program is now concluded.

Accelerated Infrastructure Replacement Program (AIRP) - In July 2012, SJG filed a petition to implement a five-year, \$250.0 million AIRP. In February 2013, the BPU issued an Order approving a \$141.2 million program to replace cast iron and unprotected bare steel mains and services over a four-year period, with annual investments of approximately \$35.3 million. Pursuant to the Order, AIRP investments are to be reviewed and included in rate base in future base rate proceedings.

Regulatory actions regarding AIRP were as follows:

•

September 2014 - The BPU approved SJG's base rate case, which included a \$7.5 million increase in revenues associated with the roll in of \$69.9 million of AIRP investments into base rates.

Storm Hardening and Reliability Program (SHARP) - In September 2013, SJG filed with the BPU an asset hardening program pursuant to which SJG will invest approximately \$280.0 million over seven years to replace low pressure distribution mains and services with high pressure mains and services in coastal areas that are susceptible to flooding during major storm events.

Regulatory actions regarding SHARP were as follows:

August 2014 - The BPU approved the SHARP, authorizing SJG to invest \$103.5 million over three years for system hardening on barrier islands. SJG will earn on a return on these investments as they are made and will reflect the investments in base rates through annual rate adjustments.

April 2015 - SJG filed a petition seeking a base rate adjustment to increase annual revenues by approximately \$4.0 million to reflect approximately \$36.6 million of SHARP investments made from July 2014 through June 2015.

South Jersey Industries, Inc.
Part II

September 2015 - The BPU approved SJG's request to increase annual revenues from base rates by \$4.0 million, effective October 1, 2015.

Energy Efficiency Tracker (EET) - In January 2009, SJG filed a petition with the BPU requesting approval of an Energy Efficiency Program (EEP I) for residential, commercial and industrial customers. The BPU approved this petition in July 2009. Under this program, SJG was permitted to invest \$17.0 million over two years in energy efficiency measures to be installed in customer homes and businesses. SJG also recovered incremental operating and maintenance expenses and earn a return of, and return on, program investments.

Regulatory actions regarding the EET/EEP were as follows:

May 2012 - SJG filed a petition requesting the approval of a new Energy Efficiency Program ("EEP II") and to continue the existing EET to recover all costs associated with the EEP II through a \$3.1 million increase in annual revenues. These programs provide customers with increased incentives to reduce their natural gas consumption. In June 2013, the BPU approved the EEP II program in the form of an extension of the existing EEP program, permitting SJG to invest \$24.0 million in energy efficiency programs through June 2015. The BPU also approved in June 2013 an extension of the EET with a \$2.1 million revenue increase effective July 2013.

June 2012 - SJG filed a petition requesting a continuation of the original EEP to bridge the gap between the expiration of the EEP I program on April 30, 2012, and the implementation of the proposed new EEP II program. This petition was approved by the BPU in August 2012. Also in June 2012, SJG filed its 2012 - 2013 annual EET rate adjustment petition requesting a \$5.8 million increase in annual revenues to recover the costs associated with its EEP I program. The BPU approved this petition in September 2014.

May 2013 - SJG filed its annual petition requesting an increase of \$2.2 million for current EET programs. The BPU approved this petition in September 2014.

May 2014 - SJG filed its annual EET rate adjustment petition requesting an \$1.4 million increase in revenues to recover the costs of, and the allowed return on, prior investments associated with energy efficiency programs. The petition is currently pending.

September 2014 - The BPU approved a revenue increase of \$2.2 million associated with the 2012-2013 annual EET rate adjustment filing, with rates effective October 1, 2014.

January 2015 - SJG filed a petition with the BPU seeking to continue offering energy efficiency programs through June 2018 with a proposed budget of \$56.0 million and with the same rate recovery mechanism that exists for its current energy efficiency programs (EEPs).

June 2015, SJG filed its annual EET rate adjustment petition, requesting a \$7.6 million decrease in revenues to continue recovering the costs of, and the allowed return on, prior investments associated with EEPs. This petition is currently pending.

August 2015, the BPU approved a two year extension of the Company's EEPs through August 31, 2017, with a program budget of \$36.3 million. The BPU's approval permitted SJG to adjust its EET rate, effective September 1, 2015, to increase annual revenues by \$2.6 million, to recover projected costs and the allowed return on the first year of its investments in the EEP extension.

Societal Benefits Clause (SBC) - The SBC allows SJG to recover costs related to several BPU-mandated programs. Within the SBC are a Remediation Adjustment Clause (RAC), a New Jersey Clean Energy Program (NJCEP) and a Universal Service Fund (USF) program.

Regulatory actions regarding the SBC, with the exception of USF which requires separate regulatory filings, were as follows:

•

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

July 2013 - SJG made its annual 2013-2014 SBC filing requesting a \$6.4 million decrease in SBC revenues. The BPU approved this filing in September 2014.

July 2014 - SJG made its annual 2014-2015 SBC filing requesting a \$25.7 million decrease in SBC revenues. The BPU approved this filing in May 2015.

- July 2015 - SJG made its annual 2015-2016 SBC filing, requesting a \$5.0 million decrease in SBC revenues. This petition is currently pending.

South Jersey Industries, Inc.
Part II

Remediation Adjustment Clause (RAC) - The RAC recovers environmental remediation costs of 12 former gas manufacturing plants (See Note 15). The BPU allows SJG to recover such costs over seven-year amortization periods. The net between the amounts actually spent and amounts recovered from customers is recorded as a regulatory asset, Environmental Remediation Cost Expended - Net. RAC activity affects revenue and cash flows but does not directly affect earnings because of the cost recovery over seven-year amortization periods. As of December 31, 2015 and 2014, SJG reflected the unamortized remediation costs of \$42.0 million and \$29.5 million, respectively, on the consolidated balance sheets under Regulatory Assets (See Note 11). Since implementing the RAC in 1992, SJG has recovered \$110.5 million through rates.

Clean Energy Program Clause (CLEP) - A component of the SBC, the CLEP recovers costs associated with state mandated New Jersey Clean Energy Programs (NJCEP) and, as it relates to SJG, its energy efficiency and renewable energy programs. In June 2013, the BPU approved a NJCEP funding level of \$345.0 million through June 2014, of which SJG was responsible for \$14.5 million. In June 2014, the BPU approved a NJCEP funding level of \$345.0 million through June 2015, of which SJG was responsible for \$14.5 million. In June 2015, the BPU approved a NJCEP funding level of \$345.0 million through June 2016, of which SJG was responsible for \$14.6 million.

NJCEP adjustments affect revenue and cash flows but do not directly affect earnings as related costs are deferred and recovered through rates on an on-going basis.

Universal Service Fund (USF) - The USF is a statewide program through which funds for the USF and Lifeline Credit and Tenants Assistance Programs are collected from customers of all New Jersey electric and gas utilities. USF adjustments affect cash flows but do not directly affect revenue or earnings as related costs are deferred and recovered through rates on an on-going basis.

Separate regulatory actions regarding the USF were as follows:

June 2013 - SJG made its annual USF filing, along with the State's other electric and gas utilities, proposing to decrease the statewide gas revenues by \$29.4 million. This proposal was designed to decrease SJG's annual USF revenue by \$3.7 million.

September 2013 - The BPU approved the statewide USF budget of \$54.4 million for all the State's gas utilities. SJG's portion of the total is approximately \$5.8 million, which decreased rates effective October 1, 2013, resulting in a \$3.4 million decrease to SJG's USF recoveries.

June 2014 - SJG made its annual USF filing, along with the State's other electric and gas utilities, proposing to increase the statewide gas revenues by \$19.9 million. This proposal was designed to increase SJG's annual USF revenue by \$2.6 million.

September 2014 - The BPU approved the statewide budget of \$71.8 million for all the State's gas utilities. SJG's portion of the total is approximately \$7.9 million, which increased rates effective October 1, 2014, resulting in a \$2.6 million increase to its USF recoveries.

June 2015 - SJG made its annual USF filing, along with the State's other electric and gas utilities, proposing to decrease the statewide gas revenues by \$46.4 million. This proposal was designed to decrease SJG's annual USF revenue by \$3.4 million.

September 2015 - The BPU approved the statewide budget of \$46.4 million for all the State's gas utilities. SJG's portion of the total is approximately \$5.2 million, which decreased rates effective October 1, 2015, resulting in a \$3.4 million decrease to its USF recoveries.

Other Regulatory Matters -

Unbundling - In 2000, the BPU approved full unbundling of SJG's system. This allows all natural gas consumers to select their natural gas commodity supplier. As of December 31, 2015, 35,400 of SJG's customers were purchasing their gas commodity from someone other than SJG. Customers choosing to purchase natural gas from providers other than the utility are charged for the cost of gas by the marketer. The resulting decrease in utility revenues is offset by a corresponding decrease in gas costs. While customer choice can reduce utility revenues, it does not negatively affect SJG's net income or financial condition. The BPU continues to allow for full recovery of prudently incurred natural gas costs through the BGSS. Unbundling did not change the fact that SJG still recovers cost of service, including certain deferred costs, through base rates.

South Jersey Industries, Inc.
Part II

Pipeline Integrity Costs - SJG is permitted to defer and recover incremental costs incurred as a result of Pipeline Integrity Management regulations that became effective January 14, 2004, which are aimed at enhancing public safety and reliability. The regulations require that utilities use a comprehensive analysis to assess, evaluate, repair and validate the integrity of certain transmission lines in the event of a leak or failure. As part of SJG's 2014 base rate case, it was permitted to recover previously deferred pipeline integrity costs incurred from October 2010 through June 2014. In addition, SJG is authorized to defer future program costs, including related carrying costs, for recovery in the next base rate proceeding, subject to review by the BPU. As of December 31, 2015 and 2014, deferred pipeline integrity costs totaled \$2.7 million and \$3.4 million, respectively, and are included in other regulatory assets (See Note 11).

Superstorm Sandy - In June 2013, SJG filed a petition requesting deferral of \$0.7 million of incremental operating and maintenance expenses incurred due to Superstorm Sandy. The BPU approved the recovery of these expenses through base rates in SJG's 2014 base rate case.

Filings and petitions described above are still pending unless otherwise indicated.

11. REGULATORY ASSETS & REGULATORY LIABILITIES:

The discussion under Note 10, Rates and Regulatory Actions, is integral to the following explanations of specific regulatory assets and liabilities.

Regulatory Assets consisted of the following items (in thousands):

| | December 31, 2015 | December 31, 2014 |
|---|----------------------|----------------------|
| Environmental Remediation Costs: | | |
| Expended - Net | \$42,032 | \$29,540 |
| Liability for Future Expenditures | 123,194 | 124,308 |
| Deferred Asset Retirement Obligation Costs | 42,430 | 31,584 |
| Deferred Pension and Other Postretirement Benefit Costs | 79,779 | 99,040 |
| Deferred Gas Costs - Net | 2,701 | 32,202 |
| Conservation Incentive Program Receivable | 2,624 | — |
| Societal Benefit Costs Receivable | — | 385 |
| Deferred Interest Rate Contracts | 7,631 | 7,325 |
| Energy Efficiency Tracker | 496 | 11,247 |
| Pipeline Supplier Service Charges | 3,776 | 5,441 |
| Pipeline Integrity Cost | 4,596 | 3,431 |
| AFUDC - Equity Related Deferrals | 11,423 | 10,781 |
| Other Regulatory Assets | 2,752 | 1,876 |
| Total Regulatory Assets | \$323,434 | \$357,160 |

Except where noted below, all regulatory assets are or will be recovered through utility rate charges, as detailed in the following discussion. SJG is currently permitted to recover interest on Environmental Remediation Costs, Societal Benefit Costs Receivable, Energy Efficiency Tracker and Pipeline Integrity Costs, while the other assets are being recovered without a return on investment.

South Jersey Industries, Inc.
Part II

Environmental Remediation Costs - SJG has two regulatory assets associated with environmental costs related to the cleanup of 12 sites where SJG or its predecessors previously operated gas manufacturing plants. The first asset, Environmental Remediation Cost: Expended - Net, represents what was actually spent to clean up the sites, less recoveries through the RAC and insurance carriers. These costs meet the deferral requirements of GAAP as the BPU allows SJG to recover such expenditures through the RAC. The other asset, Environmental Remediation Cost: Liability for Future Expenditures, relates to estimated future expenditures required to complete the remediation of these sites. SJG recorded this estimated amount as a regulatory asset with the corresponding current and noncurrent liabilities reflected on the consolidated balance sheets under the captions Current Liabilities and Deferred Credits and Other Noncurrent Liabilities. The BPU allows SJG to recover the deferred costs over seven-year periods after they are spent.

Deferred Asset Retirement Obligation (ARO) Costs - This regulatory asset resulted from the recording of ARO and additional utility plant, primarily related to a legal obligation SJG has for certain safety requirements upon the retirement of its gas distribution and transmission system. SJG recovers asset retirement costs through rates charged to customers. All related accumulated accretion and depreciation amounts for these ARO represent timing differences in the recognition of retirement costs that SJG is currently recovering in rates and, as such, SJG is deferring such differences as regulatory assets.

Deferred Pension and Other Postretirement Benefit Costs - The BPU authorized SJG to recover costs related to postretirement benefits under the accrual method of accounting consistent with GAAP. Upon the adoption of FASB ASC Topic 715 "Compensation - Retirement Benefits" in 2006, SJG's regulatory asset was increased by \$37.1 million representing the recognition of the underfunded positions of SJG's pension and other postretirement benefit plans. Subsequent adjustments to this balance occur annually to reflect changes in the funded positions of these benefit plans caused by changes in actual plan experience as well as assumptions of future experience (See Note 12).

Deferred Gas Costs - Net - Over/under collections of gas costs are monitored through SJG's BGSS mechanism. Net undercollected gas costs are classified as a regulatory asset and net overcollected gas costs are classified as a regulatory liability (See Note 10). Derivative contracts used to hedge natural gas purchases are also included in the BGSS, subject to BPU approval (See Note 16).

Conservation Incentive Program Receivable - The impact of the CIP is recorded as an adjustment to earnings as incurred, while cash recovery under the CIP generally occurs during the subsequent CIP year (see Note 10).

Societal Benefit Costs Receivable - This regulatory asset primarily represents cumulative costs less recoveries under the USF and CLEP programs (see Note 10).

Deferred Interest Rate Contracts - These amounts represent the market value of interest rate derivatives as discussed further in Note 16.

Energy Efficiency Tracker - This regulatory asset represents cumulative investments less recoveries under the Energy Efficiency Program.

Pipeline Supplier Service Charges - This regulatory asset represents costs necessary to maintain adequate supply and system pressures, which are being recovered on a monthly basis through the BGSS over the term of the underlying supplier contracts (See Note 10).

Pipeline Integrity Cost - As part of SJG's September 2014 base rate increase, SJG was permitted to recover previously deferred pipeline integrity costs incurred through September 2014. In addition, SJG is authorized to defer future

program costs, including related carrying costs, for recovery in SJG's next base rate proceeding, subject to review by the BPU (See Note 10).

AFUDC Equity Related Deferrals - This regulatory asset represents the future revenue to recover the future income taxes related to the deferred tax liability for the equity component of AFUDC. Included in the balance is \$2.3 million which is being recovered over a period of three years as approved by the BPU in SJG's 2014 rate case settlement. The remaining balance is being amortized over the life of the associated utility plant.

Other Regulatory Assets - Some of the assets included in Other Regulatory Assets are currently being recovered from ratepayers as approved by the BPU. Management believes the remaining deferred costs are probable of recovery from ratepayers through future utility rates.

South Jersey Industries, Inc.
Part II

Regulatory Liabilities consisted of the following items (in thousands):

| | December 31, 2015 | December 31, 2014 |
|--|----------------------|----------------------|
| Excess Plant Removal Costs | \$32,644 | \$35,940 |
| Societal Benefit Costs Payable | 10,197 | 1,025 |
| Conservation Incentive Program - Payable | — | 4,700 |
| Other Regulatory Liabilities | — | 234 |
| Total Regulatory Liabilities | \$42,841 | \$41,899 |

Excess Plant Removal Costs - Represents amounts accrued in excess of actual utility plant removal costs incurred to date. As part of SJG's September 2014 base rate increase, SJG is required to amortize approximately \$1.1 million of this balance to depreciation expense each year.

Societal Benefit Costs Payable - This regulatory liability primarily represents cumulative costs less recoveries under the USF and CLEP programs. See previous discussion under "Societal Benefit Costs Receivable" above.

Conservation Incentive Program - Payable - See previous discussion under "Conservation Incentive Program - Receivable" above.

Other Regulatory Liabilities - All other regulatory liabilities are subject to being returned to ratepayers in future rate proceedings.

12. PENSION AND OTHER POSTRETIREMENT BENEFITS:

SJI has several defined benefit pension plans and other postretirement benefit plans. Approximately 43.0% of the Company's current, full-time, regular employees will be entitled to annuity payments upon retirement. Participation in the Company's qualified defined benefit pension plans was closed to new employees beginning in 2003; however, employees who are not eligible for these pension plans are eligible to receive an enhanced version of SJI's defined contribution plan. Certain SJI officers also participate in a non-funded supplemental executive retirement plan (SERP), a non-qualified defined benefit pension plan. The other postretirement benefit plans provide health care and life insurance benefits to some retirees.

Net periodic benefit cost related to the employee and officer pension and other postretirement benefit plans consisted of the following components (in thousands):

| | Pension Benefits | | |
|--------------------------------|------------------|-----------|-----------|
| | 2015 | 2014 | 2013 |
| Service Cost | \$5,337 | \$4,510 | \$5,421 |
| Interest Cost | 11,168 | 10,735 | 9,439 |
| Expected Return on Plan Assets | (14,789 |) (13,491 |) (11,914 |
| Amortizations: | | | |
| Prior Service Cost | 212 | 175 | 251 |
| Actuarial Loss | 10,608 | 5,716 | 9,006 |
| Net Periodic Benefit Cost | 12,536 | 7,645 | 12,203 |
| Capitalized Benefit Costs | (4,805 |) (3,047 |) (5,002 |
| Deferred Benefit Costs | (1,007 |) — | — |

| | | | |
|------------------------------------|---------|---------|---------|
| Total Net Periodic Benefit Expense | \$6,724 | \$4,598 | \$7,201 |
|------------------------------------|---------|---------|---------|

South Jersey Industries, Inc.
Part II

| | Other Postretirement Benefits | | |
|------------------------------------|-------------------------------|----------|----------|
| | 2015 | 2014 | 2013 |
| Service Cost | \$1,116 | \$891 | \$1,139 |
| Interest Cost | 2,973 | 2,852 | 2,730 |
| Expected Return on Plan Assets | (2,993 |) (2,603 |) (2,378 |
| Amortizations: | | | |
| Prior Service Cost (Credits) | 608 | 152 | (283 |
| Actuarial Loss | 1,342 | 974 | 1,738 |
| Net Periodic Benefit Cost | 3,046 | 2,266 | 2,946 |
| Capitalized Benefit Costs | (1,043 |) (722 |) (1,172 |
| Deferred Benefit Costs | (256 |) — | — |
| Total Net Periodic Benefit Expense | \$1,747 | \$1,544 | \$1,774 |

Capitalized benefit costs reflected in the table above relate to SJG's construction program. Deferred benefit costs relate to the deferral of incremental expenses associated with the adoption of new mortality tables (RP-2014 base table with MP-2014 generational projection scale) in 2015. Deferred benefit costs are expected to be recovered through rates as part of SJG's next base rate case.

Companies with publicly traded equity securities that sponsor a postretirement benefit plan are required to fully recognize, as an asset or liability, the overfunded or underfunded status of its benefit plans and recognize changes in the funded status in the year in which the changes occur. Changes in funded status are generally reported in Other Comprehensive Loss; however, since SJG recovers all prudently incurred pension and postretirement benefit costs from its ratepayers, a significant portion of the charges resulting from the recording of additional liabilities under this requirement are reported as regulatory assets (See Note 11).

Details of the activity within the Regulatory Asset and Accumulated Other Comprehensive Loss associated with Pension and Other Postretirement Benefits are as follows (in thousands):

South Jersey Industries, Inc.
Part II

| | Regulatory Assets | | Accumulated Other Comprehensive Loss (pre-tax) | |
|--|-------------------|-------------------------------|--|-------------------------------|
| | Pension Benefits | Other Postretirement Benefits | Pension Benefits | Other Postretirement Benefits |
| Balance at January 1, 2014 | \$42,632 | \$16,652 | \$27,574 | \$3,710 |
| Amounts Arising during the Period: | | | | |
| Net Actuarial Loss | 31,075 | 7,826 | 14,698 | 2,269 |
| Prior Service Cost | 486 | 4,146 | 14 | 981 |

South Jersey Industries, Inc.
Part II

The projected benefit obligation (PBO) and accumulated benefit obligation (ABO) of SJI's qualified employee pension plans were \$207.7 million and \$191.9 million, respectively, as of December 31, 2015; and \$219.7 million and \$201.0 million, respectively, as of December 31, 2014. The ABO of these plans exceeded the value of the plan assets as of December 31, 2015 and 2014. The value of these assets were \$184.8 million and \$180.5 million as of December 31, 2015 and 2014, respectively, and can be seen in the table above. The PBO and ABO for SJI's non-funded SERP were \$46.5 million and \$45.0 million, respectively, as of December 31, 2015; and \$45.7 million and \$44.5 million, respectively, as of December 31, 2014. The SERP obligation is reflected in the tables above and has no assets.

The weighted-average assumptions used to determine benefit obligations at December 31 were:

| | Pension Benefits | | Other Postretirement Benefits | | |
|-------------------------------|------------------|--------|-------------------------------|--------|---|
| | 2015 | 2014 | 2015 | 2014 | |
| Discount Rate | 4.83 | % 4.25 | % 4.73 | % 4.20 | % |
| Rate of Compensation Increase | 3.50 | % 3.50 | % 3.50 | % 3.50 | % |

The weighted-average assumptions used to determine net periodic benefit cost for years ended December 31 were:

| | Pension Benefits | | | Other Postretirement Benefits | | | |
|--|------------------|--------|--------|-------------------------------|--------|--------|---|
| | 2015 | 2014 | 2013 | 2015 | 2014 | 2013 | |
| Discount Rate | 4.25 | % 5.09 | % 4.26 | % 4.20 | % 4.91 | % 4.14 | % |
| Expected Long-Term Return on Plan Assets | 7.75 | % 7.75 | % 7.50 | % 6.25 | % 6.25 | % 6.60 | % |
| Rate of Compensation Increase | 3.50 | % 3.50 | % 3.25 | % 3.50 | % 3.50 | % 3.25 | % |

In 2014, the Society of Actuaries (SOA) released new mortality tables (RP-2014 base table with MP-2014 generational projection scale), which indicated that the average life expectancy of both active and retired plan participants had increased. Obligations as of December 31, 2014, disclosed herein reflect the use of those new tables. In 2015, the SOA released an update to the RP-2014 tables (MP-2015 base tables), slightly reducing the average life expectancy previously released. The obligations as of December 31, 2015, disclosed herein, reflect the use of the updated 2015 tables. While the adoption of the new tables impacts liabilities significantly as of December 31 of the year of adoption, the impact on expense did not occur until the subsequent year.

The discount rates used to determine the benefit obligations at December 31, 2015 and 2014, which are used to determine the net periodic benefit cost for the subsequent year, were based on a portfolio model of high-quality investments with maturities that match the expected benefit payments under our pension and other postretirement benefit plans.

The expected long-term return on plan assets ("return") has been determined by applying long-term capital market projections provided by our pension plan Trustee to the asset allocation guidelines, as defined in the Company's investment policy, to arrive at a weighted average return. For certain other equity securities held by an investment manager outside of the control of the Trustee, the return has been determined based on historic performance in combination with long-term expectations. The return for the other postretirement benefits plan is determined in the same manner as discussed above; however, the expected return is reduced based on the taxable nature of the underlying trusts.

The assumed health care cost trend rates at December 31 were:

| | 2015 | 2014 | |
|---|------|------|---|
| Medical Care and Drug Cost Trend Rate Assumed for Next Year | N/A | 7.00 | % |
| Dental Care Cost Trend Rate Assumed for Next Year | N/A | 4.75 | % |
| Rate to which Cost Trend Rates are Assumed to Decline (the Ultimate Trend Rate) | N/A | 4.75 | % |
| Year that the Rate Reaches the Ultimate Trend Rate | N/A | 2023 | |

South Jersey Industries, Inc.
Part II

The retiree medical plan changed effective January 1, 2016. Retirees are provided a fixed contribution to a health reimbursement account, allowing them to obtain coverage from health-care exchanges, rather than utilizing the Company provided health-care plan. Since the health-care benefits are now a fixed dollar amount under the new plan and will not increase in the future, the plan no longer has health care trend assumptions as of December 31, 2015. As a result, assumed health care cost trend rates no longer have a significant effect on the amounts reported for SJI's postretirement health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects (in thousands):

| | 1-Percentage- Point Increase | 1-Percentage- Point Decrease |
|--|---------------------------------|------------------------------------|
| Effect on the Total of Service and Interest Cost | \$ 199 | \$(160) |

PLAN ASSETS - The Company's overall investment strategy for pension plan assets is to achieve a diversification by asset class, style of manager, and sector and industry limits to achieve investment results that match the actuarially assumed rate of return, while preserving the inflation adjusted value of the plans. The Company has implemented this diversification strategy primarily with commingled common/collective trust funds. The target allocations for pension plan assets are 28-48 percent U.S. equity securities, 13-25 percent international equity securities, 32-42 percent fixed income investments, and 0-14 percent to all other types of investments. Equity securities include investments in commingled common/collective trust funds as well as large-cap and mid-cap companies. Fixed income securities include commingled common/collective trust funds, group annuity contracts for pension payments, and hedge funds. Other types of investments include investments in private equity funds and real estate funds that follow several different strategies.

The strategy recognizes that risk and volatility are present to some degree with all types of investments. We seek to avoid high levels of risk at the total fund level through diversification by asset class, style of manager, and sector and industry limits. Specifically prohibited investments include, but are not limited to, venture capital, margin trading, commodities and securities of companies with less than \$250.0 million capitalization (except in the small-cap portion of the fund where capitalization levels as low as \$50.0 million are permissible). These restrictions are only applicable to individual investment managers with separately managed portfolios and do not apply to mutual funds or commingled trusts.

SJI evaluated its pension and other postretirement benefit plans' asset portfolios for the existence of significant concentrations of credit risk as of December 31, 2015. Types of concentrations that were evaluated include, but are not limited to, investment concentrations in a single entity, type of industry, foreign country, and individual fund. As of December 31, 2015, there were no significant concentrations (defined as greater than 10 percent of plan assets) of risk in SJI's pension and other postretirement benefit plan assets.

GAAP establishes a hierarchy that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques. This hierarchy groups assets into three distinct levels, as fully described in Note 17, which will serve as the basis for presentation throughout the remainder of this Note.

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

(a)

This category represents common/collective trust fund investments through a commingled employee benefit trust (excluding real estate). These commingled funds are not traded publicly; however, the majority of the underlying assets held in these funds are stocks and bonds that are traded on active markets and prices for these assets are readily observable.

South Jersey Industries, Inc.
Part II

Also included in these funds are interest rate swaps, asset-backed securities, mortgage-backed securities and other investments with observable market values. Holdings in these commingled funds are classified as Level 2 investments.

(b) This category represents short-term investment funds held for the purpose of funding disbursement payment arrangements. Underlying assets are valued based on quoted prices in active markets, or where quoted prices are not available, based on models using observable market information. Since not all values can be obtained from quoted prices in active markets, these funds are classified as Level 2 investments.

(c) This category of equity investments represents a managed portfolio of common stock investments in five sectors: telecommunications, electric utilities, gas utilities, water and energy. These common stocks are actively traded on exchanges and price quotes for these shares are readily available. These common stocks are classified as Level 1 investments.

(d) This category represents SJI's Group Annuity contracts with a nationally recognized life insurance company. The contracts are the assets of the plan, while the underlying assets of the contracts are owned by the contract holder. Valuation is based on a formula and calculation specified within the contract. Since the valuation is based on the reporting entity's own assumptions, these contracts are classified as Level 3 investments.

(e) This category represents a collection of underlying funds which are all domiciled outside of the United States. All of the underlying fund managers are based in the U.S.; however, they do not necessarily trade only in U.S. markets. The fair value of these funds is determined by the underlying fund's general partner or manager. These funds are classified as Level 3 investments.

(f) This category represents a limited partnership/commingled trust which includes several investments in U.S. leveraged buyout, venture capital, and special situation funds. Fund valuations are reported on a 90 to 120 day lag and, therefore, the value reported herein represents the market value as of June 30 or September 30, 2015 and 2014, respectively, with cash flow changes through December applied. The fund's investments are stated at fair value, which is generally based on the valuations provided by the general partners or managers of such investments. Fund investments are illiquid and resale is restricted. These funds are classified as Level 3 investments.

(g) This category represents real estate common/collective trust fund investments through a commingled employee benefit trust. These commingled funds are part of a direct investment in a pool of real estate properties. These funds are valued by investment managers on a periodic basis using pricing models that use independent appraisals from sources with professional qualifications. Since these valuation inputs are not highly observable, the real estate funds are classified as Level 3 investments.

As with the pension plan assets, the Company's overall investment strategy for post-retirement benefit plan assets is to achieve a diversification by asset class, style of manager, and sector and industry limits to achieve investment results that match the actuarially assumed rate of return, while preserving the inflation adjusted value of the plans. The Company has implemented this diversification strategy with a mix of common/collective trust funds, mutual funds and Company-owned life insurance policies. The target allocations for post-retirement benefit plan assets are 30-43 percent U.S. equity securities, 20-30 percent international equity securities, and 32-42 percent fixed income investments and 0-7 percent to all other types of investments. Equity securities include investments in large-cap, mid-cap and small-cap companies within mutual funds or common/collective trust funds. Fixed income securities within the common/collective trust fund include primarily investment grade, U.S. Government and mortgage-backed financial instruments. The insurance policies are backed by a series of commingled trust investments held by the insurance carrier.

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

South Jersey Industries, Inc.
Part II

The fair values of SJI's other postretirement benefit plan assets at December 31, 2015 and 2014 by asset category are as follows (in thousands):

| Asset Category | Total | Level 1 | Level 2 | Level 3 |
|---|-----------------|----------------|-----------------|------------|
| As of December 31, 2015: | | | | |
| Cash | \$26 | \$26 | \$— | \$— |

(a) This category represents common/collective trust fund investments through a commingled employee benefit trust (excluding real estate). These commingled funds are not traded publicly; however, the majority of the underlying assets held in these funds are stocks and bonds that are traded on active markets and prices for these assets are readily observable. Also included in these funds are interest rate swaps, asset-backed securities, mortgage-backed securities and other investments with observable market values. Holdings in these commingled funds are classified as Level 2 investments.

(b) This category represents mutual fund investments. The mutual funds are actively traded on exchanges and price quotes for the shares are readily available. These mutual funds are classified as Level 1 investments.

(c) This category represents Company-owned life insurance policies with a nationally known life insurance company. The value of these policies is backed by a series of common/collective trust funds held by the insurance carrier similar to category (a) above. Holdings in these insurance policies are classified as Level 2 investments.

South Jersey Industries, Inc.
Part II

FUTURE BENEFIT PAYMENTS - The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid during the following years (in thousands):

| | Pension Benefits | Other Postretirement Benefits |
|-------------|------------------|-------------------------------|
| 2016 | \$11,409 | \$4,458 |
| 2017 | \$11,846 | \$4,427 |
| 2018 | \$12,376 | \$4,363 |
| 2019 | \$13,374 | \$4,406 |
| 2020 | \$13,954 | \$4,519 |
| 2021 - 2024 | \$82,139 | \$21,933 |

CONTRIBUTIONS - SJI contributed \$15.0 million and \$12.7 million to the pension plans in 2015 and 2013, respectively, with no pension contribution made in 2014. Payments related to the unfunded SERP plan in 2015, 2014, and 2013 were \$2.0 million, \$1.5 million and \$1.3 million, respectively. SERP payments are expected to approximate \$2.3 million in 2016. SJG also has a regulatory obligation to contribute approximately \$3.6 million annually to its other postretirement benefit plans' trusts, less costs incurred directly by SJG.

DEFINED CONTRIBUTION PLAN - SJI offers an Employees' Retirement Savings Plan (Savings Plan) to eligible employees. For employees eligible for participation in SJI's defined benefit pension plan, SJI matches 50% of participants' contributions up to 6% of base compensation. For employees who are not eligible for participation in SJI's defined benefit pension plans, SJI matches 50% of participants' contributions up to 8% of base compensation. Employees not eligible for the pension plans also receive a year-end contribution of \$1,500, if 10 or fewer years of service, or \$2,000, if more than 10 years of service. The amount expensed and contributed for the matching provision of the Savings Plan approximated \$2.1 million, \$2.0 million and \$1.7 million for the years ended December 31, 2015, 2014 and 2013, respectively.

13. LINES OF CREDIT:

Credit facilities and available liquidity as of December 31, 2015 were as follows (in thousands):

| Company | Total Facility | Usage | Available Liquidity | Expiration Date |
|--|----------------|-----------|---------------------|-----------------|
| SJG: | | | | |
| Commercial Paper Program/Revolving Credit Facility | \$200,000 | \$136,600 | (A) \$63,400 | May 2018 |
| Uncommitted Bank Lines | 10,000 | — | 10,000 | August 2016 |
| Total SJG | 210,000 | 136,600 | 73,400 | |
| SJI: | | | | |
| Revolving Credit Facility | 400,000 | 305,400 | (B) 94,600 | February 2018 |
| Total SJI | 400,000 | 305,400 | 94,600 | |
| Total | \$610,000 | \$442,000 | \$168,000 | |

- (A) Includes letters of credit outstanding in the amount of \$2.2 million.
- (B) Includes letters of credit outstanding in the amount of \$8.1 million.

| 4.83 | % SCLE | 1,738 | — |
| 4.83 | % SXLE | 3,433 | — |
| Total Long-Term Debt Outstanding | | \$1,035,848 | \$1,009,400 |
| Less Current Maturities | | (29,454) | (149,909) |
| Total Long-Term Debt | | \$1,006,394 | \$859,491 |

(A) Long-term debt maturities and sinking funds requirements for the succeeding five years are as follows (in thousands): 2016, \$29,454; 2017, \$172,558; 2018,\$40,667; 2019,\$260,783; and 2020, \$74,476.

(B) The First Mortgage dated October 1, 1947, as supplemented, securing the First Mortgage Bonds constitutes a direct first mortgage lien on substantially all utility plant.

(C) In August 2015, SJG retired \$10.0 million aggregate principal amount of 5.387% Medium Term Notes (MTN's) at maturity.

(D) In December 2015, SJG paid \$0.9 million toward the principal amount of 3.63% MTN's due December 2025.

(E) In September 2015, SJG paid \$0.1 million toward the principal amount of variable rate demand bonds due February 2036. These variable rate demand bonds bear interest at a floating rate that resets weekly. The interest rate as of December 31, 2015 was 0.03%. Liquidity support on these bonds is provided under a separate letter of credit facility that expires in August 2018. These bonds contain no financial covenants.

(F) In June 2014, SJG entered into a \$200.0 million multiple-draw term facility offered by a syndicate of banks which expires in June 2017. SJG can draw under this facility through June 2016 and this facility bears interest at a floating rate based on LIBOR plus a spread determined by SJG's credit ratings. As of December 31, 2015, SJG had borrowed an aggregate \$139.0 million under this facility at an average interest rate of 1.17% and the proceeds were used to pay down short-term debt.

(G)

Marina has issued \$61.4 million of unsecured variable-rate revenue bonds through the New Jersey Economic Development Authority (NJEDA). The variable rates at December 31, 2015 for the Series A 2001, Series B 2001, and Series A 2006 bonds were 0.04%, 0.47% and 0.04% respectively. The interest rate on all but \$39.0 million of the bonds has been effectively fixed via interest rate swaps at 4.22% until January 2026. These bonds contain no financial covenants. Liquidity support on these bonds is provided under a letter of credit facility from a commercial bank that expires in March, 2016. The Company has plans to renew this letter of credit facility upon expiration.

(H) In June 2015, SJI redeemed at maturity \$64.0 million aggregate principal amount of 2.39% Senior Notes.

South Jersey Industries, Inc.
Part II

(I) In June 2014, SJI entered into a Note Purchase Agreement that provided for SJI to issue an aggregate of \$240.0 million of medium term notes, all of which were issued as follows: (a) in June 2014, SJI issued \$60.0 million aggregate principal amount of 3.05% Senior Notes due June 2019, and \$40.0 million aggregate principal amount of Floating Rate Senior Notes due June 2019; (b) in August 2014, SJI issued \$30.0 million aggregate principal amount of 3.05% Senior Notes due August 2019; and (c) in September 2014, SJI issued \$50.0 million aggregate principal amount of 3.05% Senior Notes due September 2019, and \$60.0 million aggregate principal amount of Floating Rate Senior Notes due September 2019. At December 31, 2015, the floating rate was 1.93%.

(J) In October 2015, SJI entered into an unsecured, variable-rate term loan of \$50.0 million, which matures in October 2020. This agreement replaced existing facilities that expired in October 2015. The variable rate at December 31, 2015 was 1.28%.

(K) ACB has a Loan and Security Agreement ("LSA") with a third party to borrow up to \$16.0 million. Under the LSA, ACB pays principal and interest (at a fixed rate of 7.60%) in equal quarterly installments that began in February 2011 and run through February 2021. As of December 31, 2014, ACB was a wholly-owned subsidiary of Energenic, of which Marina has a 50% equity interest. In December 2015, ACB became a wholly-owned subsidiary of Marina (see Note 3); as such, the remaining outstanding debt of \$12.7 million is included on the consolidated balance sheets as of December 31, 2015. The remaining debt was paid in January 2016 (see Note 19).

(L) ACLE, SCLE and SXLE (the "Other Energy Projects") have long-term debt agreements with a third party to borrow up to \$10.0 million. Under the debt agreement, the Other Energy Projects pay principal and interest (at a fixed rate of 4.83%) in equal installments that began December 2013 and run through December 2020. As of December 31, 2014, the Other Energy Projects were wholly-owned subsidiaries of Energenic, of which Marina had a 50% equity interest. SJI had agreements to guarantee 50% of the outstanding debt, which was \$4.7 million as of December 31, 2014, and the Company had recorded \$0.3 million for the fair value of the guarantees on the consolidated balance sheets as of December 31, 2014. In December 2015, the Other Energy Projects became wholly-owned subsidiaries of Marina (see Note 3); as such, the remaining outstanding debt of \$8.7 million is included on the consolidated balance sheets as of December 31, 2015.

In December 2015, SJG filed a petition with the New Jersey Board of Public Utilities to issue up to \$400.0 million of long term debt securities in various forms including MTN's and unsecured debt, with maturities of more than 12 months, over the next three years. This petition is pending approval.

15. COMMITMENTS AND CONTINGENCIES:

GAS SUPPLY CONTRACTS - In the normal course of business, SJG and SJRG have entered into long-term contracts for natural gas supplies, firm transportation and gas storage service. The transportation and storage service agreements with interstate pipeline suppliers were made under FERC approved tariffs. SJRG's cumulative obligation for demand charges and reservation fees paid to suppliers for these services is approximately \$0.5 million per month. SJG's cumulative obligation for demand charges and reservation fees paid to suppliers for these services averages approximately \$6.3 million per month and is recovered on a current basis through the BGSS. SJRG has also committed to purchase a minimum of 626,500 dts/d and up to 796,250 dts/d of natural gas, from various suppliers, for terms ranging from three to ten years at index based prices.

PENDING LITIGATION - The Company is subject to claims arising in the ordinary course of business and other legal proceedings. The Company has been named in, among other actions, certain gas supply and capacity management contract disputes and certain product liability claims related to our former sand mining subsidiary. We

accrue liabilities related to these claims when we can reasonably estimate the amount or range of amounts of probable settlement costs or other charges for these claims. The Company has accrued approximately \$3.2 million and \$2.9 million related to all claims in the aggregate as of December 31, 2015 and 2014, respectively. Management does not believe that it is reasonably possible that there will be a material change in the Company's estimated liability in the near term and does not currently anticipate the disposition of any known claims that would have a material effect on the Company's financial position, results of operations or cash flows.

COLLECTIVE BARGAINING AGREEMENTS — Unionized personnel represent approximately 45.0% of our workforce at December 31, 2015. The Company has collective bargaining agreements with two unions that represent these employees: the International Brotherhood of Electrical Workers (IBEW) Local 1293 and the International Association of Machinists and Aerospace Workers (IAM) Local 76. SJG and SJESP employees represented by the IBEW operate under collective bargaining agreements that run through February 2017. The remaining unionized employees are represented by the IAM and operate under collective bargaining agreements that run through August 2017.

South Jersey Industries, Inc.
Part II

GUARANTEES - As of December 31, 2015, SJI, the parent company, has issued guarantees to third parties on behalf of its consolidated subsidiaries. These guarantees were issued to guarantee payment to third parties with whom SJI's consolidated subsidiaries have commodity supply contracts and for Marina's construction and operating activities. As of December 31, 2015, these guarantees support future firm commitments of SJI's consolidated subsidiaries and \$79.3 million of the Accounts Payable already recorded on SJI's consolidated balance sheet.

As part of the acquisition of Energenic projects (see Note 3), the Company is relieved of any guarantees from prior periods related to the projects in which it no longer has an ownership interest.

As of December 31, 2015, SJI had issued \$5.2 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

STANDBY LETTERS OF CREDIT — As of December 31, 2015, SJI provided \$8.1 million of standby letters of credit through its revolving credit facility to enable SJE to market retail electricity and for various construction and operating activities. SJG provided a \$2.2 million letter of credit under its revolving credit facility to support the remediation of environmental conditions at certain locations in SJG's service territory. The Company has also provided \$87.5 million of additional letters of credit under separate facilities outside of the revolving credit facilities to support variable-rate demand bonds issued through the New Jersey Economic Development Authority (NJEDA) to finance the expansion of SJG's natural gas distribution system and to finance Marina's initial thermal plant project.

ENVIRONMENTAL REMEDIATION COSTS — SJI incurred and recorded costs for environmental cleanup of 12 sites where SJG or its predecessors operated gas manufacturing plants. SJG stopped manufacturing gas in the 1950s. SJI and some of its nonutility subsidiaries also recorded costs for environmental cleanup of sites where SJF previously operated a fuel oil business and Morie maintained equipment, fueling stations and storage.

SJI successfully entered into settlements with all of its historic comprehensive general liability carriers regarding the environmental remediation expenditures at the SJG sites. Also, SJG had purchased a Cleanup Cost Cap Insurance Policy limiting the amount of remediation expenditures that SJG was required to make at 11 of its sites. This policy provided coverage up to \$50.0 million, which was exhausted in 2012.

Since the early 1980s, SJI accrued environmental remediation costs of \$377.2 million, of which \$250.6 million was spent as of December 31, 2015.

The following table details the amounts expended and accrued for SJI's environmental remediation during the last two years (in thousands):

| | 2015 | 2014 |
|-------------------|------------|------------|
| Beginning of Year | \$ 128,172 | \$ 123,429 |
| Accruals | 19,489 | 18,533 |
| Expenditures | (21,038) | (13,790) |
| End of Year | \$ 126,623 | \$ 128,172 |

The balances are segregated between current and noncurrent on the consolidated balance sheets under the captions Current Liabilities and Deferred Credits and Other Noncurrent Liabilities.

Management estimates that undiscounted future costs to clean up SJG's sites will range from \$123.2 million to \$204.7 million. Six of SJG's sites comprise the majority of these estimates, the sum of the six sites range from a low of \$110.5 million to a high of \$190.5 million. SJG recorded the lower end of this range as a liability because a single reliable

estimation point is not feasible due to the amount of uncertainty involved in the nature of projected remediation efforts and the long period over which remediation efforts will continue. Recorded amounts include estimated costs based on projected investigation and remediation work plans using existing technologies. Actual costs could differ from the estimates due to the long-term nature of the projects, changing technology, government regulations and site-specific requirements. Significant risks surrounding these estimates include unforeseen market price increases for remedial services, property owner acceptance of remedy selection, regulatory approval of selected remedy and remedial investigative findings.

South Jersey Industries, Inc.
Part II

The remediation efforts at SJG's six most significant sites include the following:

Site 1 - Several interim remedial actions have been completed at the site. Steps remaining to remediate the balance of the site include selection of the remedial action, confirmation of regulatory compliance of the selected remedy, implementation of the approved remedy and issuance of a Response Action Outcome.

Site 2 - Various remedial investigation activities have been completed at this site and a final site remedy has been proposed to the regulatory authority. Steps remaining to remediate the site include confirmation of regulatory compliance of the selected remedy, implementation of the approved remedy and issuance of a Response Action Outcome.

Site 3 - Various remedial investigation activities have been completed at this site and a final site remedy is being developed for proposal to the regulatory authority. Steps remaining to remediate the site include selection of a final remedy, confirmation of regulatory compliance of the selected remedy, implementation of the approved remedy and issuance of a Response Action Outcome.

Site 4 - Remedial investigation activities are complete at this site and a final remedy has been proposed to and approved by the regulatory authority. Steps remaining to remediate the site include installation of a sub-surface containment unit, post remediation groundwater monitoring, and issuance of a Response Action Outcome.

Site 5 - Remedial investigation activities are complete at this site and a final remedy has been proposed to and approved by the regulatory authority. Steps remaining to remediate the site include in-situ remediation of impacted soil, post remediation groundwater monitoring, and issuance of a Response Action Outcome.

Site 6 - Remedial investigation activities have been completed at this site and a final site remedy is being developed for proposal to the regulatory authority. Steps remaining to remediate the site include selection of a final remedy, confirmation of regulatory compliance of the selected remedy, implementation of the approved remedy and issuance of a Response Action Outcome.

With Morie's sale in 1996, EMI assumed responsibility for environmental liabilities currently estimated between \$2.8 million and \$4.2 million. The information available on these sites is sufficient only to establish a range of probable liability and no point within the range is more likely than any other. Therefore, EMI has accrued the lower end of the range. Changes in the accrual are included in the statements of consolidated income under Loss from Discontinued Operations.

SJI and SJF estimate their potential exposure for the future remediation of six sites where fuel oil operations existed years ago to range from \$0.6 million to \$1.3 million. The lower end of this range has been recorded under Current Liabilities and Deferred Credits and Other Noncurrent Liabilities as of December 31, 2015.

16. DERIVATIVE INSTRUMENTS:

Certain SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for third parties. These subsidiaries are subject to market risk on expected future purchases and sales due to commodity price fluctuations. The Company uses a variety of derivative instruments to limit this exposure to market risk in accordance with strict corporate guidelines. These derivative instruments include forward contracts, swap agreements, options contracts and futures contracts. As of December 31, 2015, the Company had outstanding derivative contracts intended to limit the exposure to market risk on 82.1 MMDts of expected future purchases of natural gas, 70.1 MMDts of expected future sales of natural gas, 3.2 MMMWh of expected future purchases of electricity and 3.0 MMMWh of expected future sales of

electricity. In addition to these derivative contracts, the Company has basis and index related purchase and sales contracts totaling 179.0 MMdts. These contracts, which have not been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives — Energy Related Assets or Derivatives — Energy Related Liabilities on the consolidated balance sheets. The net unrealized pre-tax gains and losses for these energy-related commodity contracts are included with realized gains and losses in Operating Revenues – Nonutility.

As part of its gas purchasing strategy, SJG uses financial contracts through SJRG to limit exposure to forward price risk. The costs or benefits of these short-term contracts are recoverable through SJG's BGSS clause, subject to BPU approval.

The retail gas operations of SJE transact commodities on a physical basis and typically does not directly enter into positions that financially settle. SJRG performs this risk management function for SJE and enters into the types of financial transactions noted above. The retail electric operations of SJE use forward physical and financial contracts to mitigate commodity price risk on fixed price electric contracts.

South Jersey Industries, Inc.
Part II

Management takes an active role in the risk management process and has developed policies and procedures that require specific administrative and business functions to assist in identifying, assessing and controlling various risks. Management reviews any open positions in accordance with strict policies to limit exposure to market risk.

The Company has also entered into interest rate derivatives to hedge exposure to increasing interest rates and the impact of those rates on cash flows of variable-rate debt. These interest rate derivatives, some of which have been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives - Other on the consolidated balance sheets. Hedge accounting has been discontinued for these derivatives. As a result, unrealized gains and losses on these derivatives, that were previously recorded in Accumulated Other Comprehensive Loss (AOCL) on the consolidated balance sheets, are being recorded into earnings over the remaining life of the derivative. These derivatives are expected to mature in 2026.

As of December 31, 2015, SJI's active interest rate swaps were as follows:

| Notional Amount | Fixed Interest Rate | Start Date | Maturity | Type of Debt | Obligor |
|-----------------|---------------------|------------|-----------|--------------|---------|
| \$ 14,500,000 | 3.905% | 3/17/2006 | 1/15/2026 | Tax-exempt | Marina |
| \$ 500,000 | 3.905% | 3/17/2006 | 1/15/2026 | Tax-exempt | Marina |
| \$ 330,000 | 3.905% | 3/17/2006 | 1/15/2026 | Tax-exempt | Marina |
| \$ 7,100,000 | 4.895% | 2/1/2006 | 2/1/2016 | (A) Taxable | Marina |
| \$ 12,500,000 | 3.430% | 12/1/2006 | 2/1/2036 | Tax-exempt | SJG |
| \$ 12,500,000 | 3.430% | 12/1/2006 | 2/1/2036 | Tax-exempt | SJG |

(A) The Company currently does not have any plans to renew this interest rate swap.

The unrealized gains and losses on interest rate derivatives that are not designated as cash flow hedges are included in Interest Charges. However, for selected interest rate derivatives at SJG, management believes that, subject to BPU approval, the market value upon termination can be recovered in rates and, therefore, these unrealized losses have been included in Other Regulatory Assets in the consolidated balance sheets.

The fair values of all derivative instruments, as reflected in the consolidated balance sheets as of December 31, are as follows (in thousands):

| Derivatives not designated as hedging instruments under GAAP | 2015 | | 2014 | |
|--|----------|-------------|----------|-------------|
| | Assets | Liabilities | Assets | Liabilities |
| Energy-related commodity contracts: | | | | |
| Derivatives – Energy Related – Current | 83,093 | 90,708 | \$85,368 | \$ 109,744 |
| Derivatives – Energy Related – Non-Current | 16,238 | 21,697 | 13,905 | 19,926 |
| Interest rate contracts: | | | | |
| Derivatives - Other | — | 10,943 | — | 10,732 |
| Total derivatives not designated as hedging instruments under GAAP | 99,331 | 123,348 | 99,273 | 140,402 |
| Total Derivatives | \$99,331 | \$123,348 | \$99,273 | \$140,402 |

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-K

South Jersey Industries, Inc.
Part II

The Company enters into derivative contracts with counterparties, some of which are subject to master netting arrangements, which allow net settlements under certain conditions. The Company presents derivatives at gross fair values on the consolidated balance sheets. As of December 31, 2015 and 2014, information related to these offsetting arrangements were as follows (in thousands):

As of December 31, 2015

| Description | Gross amounts of recognized assets/liabilities | Gross amount offset in the balance sheet | Net amounts of assets/liabilities in balance sheet | Gross amounts not offset in the balance sheet | | Net amount |
|--|--|--|--|---|------------------------|-------------|
| | | | | Financial Instruments | Cash Collateral Posted | |
| Derivatives - Energy Related Assets | 99,331 | — | \$ 99,331 | (35,491) | (A) — | \$63,840 |
| Derivatives - Energy Related Liabilities | (112,405) | — | \$ (112,405) | 35,491 | (B) 23,045 | \$(53,869) |
| Derivatives - Other | (10,943) | — | \$ (10,943) | — | — | \$(10,943) |

As of December 31, 2014

| Description | Gross amounts of recognized assets/liabilities | Gross amount offset in the balance sheet | Net amounts of assets/liabilities in balance sheet | Gross amounts not offset in the balance sheet | | Net amount |
|--|--|--|--|---|------------------------|-------------|
| | | | | Financial Instruments | Cash Collateral Posted | |
| Derivatives - Energy Related Assets | 99,273 | — | \$ 99,273 | (39,747) | (A) — | \$59,526 |
| Derivatives - Energy Related Liabilities | (129,670) | — | \$ (129,670) | 39,747 | (B) 53,897 | \$(36,026) |
| Derivatives - Other | (10,732) | — | \$ (10,732) | — | — | \$(10,732) |

(A) The balances at December 31, 2015 and 2014 were related to derivative liabilities which can be net settled against derivative assets.

(B) The balances at December 31, 2015 and 2014 were related to derivative assets which can be net settled against derivative liabilities.

The effect of derivative instruments on the statements of consolidated income and comprehensive income for the year ended December 31 is as follows (in thousands):

| Derivatives in Cash Flow Hedging Relationships | 2015 | 2014 | 2013 |
|--|----------|----------|----------|
| Interest Rate Contracts: | | | |
| Losses recognized in AOCL on effective portion | \$— | \$— | \$— |
| Losses reclassified from AOCL into income (a) | \$(551) | \$(419) | \$(448) |
| Losses recognized in income on ineffective portion (a) | — | — | — |

(a) Included in Interest Charges

South Jersey Industries, Inc.

Part II

| Derivatives Not Designated as Hedging Instruments under GAAP | 2015 | 2014 | 2013 |
|--|---------|----------|---------------|
| Gains (losses) on energy-related commodity contracts (a) | \$8,401 | \$(6,592 |) \$(25,823) |
| Gains (losses) on interest rate contracts (b) | 96 | (467 |) 2,760 |
| Total | \$8,497 | \$(7,059 |) |
