ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Description of Business. As used herein, “Acacia” and the “Company” refer to Acacia Research Corporation and/or its wholly and majority-owned and controlled operating subsidiaries, and/or where applicable, its management. All patent investment, prosecution, licensing and enforcement activities are conducted solely by certain of Acacia’s wholly and majority-owned and controlled operating subsidiaries.

Acacia’s operating subsidiaries invest in, license and enforce patented technologies. Acacia’s operating subsidiaries partner with inventors and patent owners, applying their legal and technology expertise to patent assets to unlock the financial value in their patented inventions. Acacia is an intermediary in the patent marketplace, bridging the gap between invention and application, facilitating efficiency and delivering monetary rewards to patent owners.

Acacia’s operating subsidiaries generate revenues and related cash flows from the granting of intellectual property rights for the use of patented technologies that its operating subsidiaries control or own. Acacia’s operating subsidiaries assist patent owners with the prosecution and development of their patent portfolios, the protection of their patented inventions from unauthorized use, the generation of licensing revenue from users of their patented technologies and, where necessary, with the enforcement against unauthorized users of their patented technologies through the filing of patent infringement litigation.

Acacia’s operating subsidiaries are principals in the licensing and enforcement effort, obtaining control of the rights in the patent portfolio, or control of the patent portfolio outright. Acacia’s operating subsidiaries own or control the rights to multiple patent portfolios, which include U.S. patents and certain foreign counterparts, covering technologies used in a wide variety of industries.

Basis of Presentation. The accompanying consolidated financial statements include the accounts of Acacia and its wholly and majority-owned and controlled subsidiaries. Material intercompany transactions and balances have been eliminated in consolidation. Noncontrolling interests in Acacia’s majority-owned and controlled operating subsidiaries (“noncontrolling interests”) are separately presented as a component of stockholders’ equity in the consolidated statements of financial position for the applicable periods presented. Consolidated net loss is adjusted to include the net (income) loss attributed to noncontrolling interests in the consolidated statements of operations. Refer to the accompanying consolidated financial statements for total noncontrolling interests, net (income) loss attributable to noncontrolling interests and contributions from and distributions to noncontrolling interests, for the applicable periods presented.

A wholly owned subsidiary of Acacia is the general partner of the Acacia Intellectual Property Fund, L.P. (the “Acacia IP Fund”), which was formed in August 2010. The Acacia IP Fund is included in the Company’s consolidated financial statements for the periods presented because Acacia’s wholly owned subsidiary, which is the majority owner and general partner, has the ability to control the operations and activities of the Acacia IP Fund.

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnotes required by accounting principles generally accepted in the United States of America in annual financial statements have been omitted or condensed in accordance with quarterly reporting requirements of the Securities and Exchange Commission (“SEC”). These interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2015, as reported by Acacia in its

Annual Report on Form 10-K filed with the SEC. The year end consolidated balance sheet data was derived from audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America.

The condensed consolidated interim financial statements of Acacia include all adjustments of a normal recurring nature which, in the opinion of management, are necessary for a fair statement of Acacia's consolidated financial position as of June 30, 2016, and results of its operations and its cash flows for the interim periods presented. The consolidated results of operations for the three and six months ended June 30, 2016 are not necessarily indicative of the results to be expected for the entire fiscal year.

ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue Recognition. Revenue is recognized when (i) persuasive evidence of an arrangement exists, (ii) all obligations have been substantially performed pursuant to the terms of the arrangement, (iii) amounts are fixed or determinable, and (iv) the collectibility of amounts is reasonably assured.

In general, revenue arrangements provide for the payment of contractually determined fees in consideration for the grant of certain intellectual property rights for patented technologies owned or controlled by Acacia's operating subsidiaries. These rights typically include some combination of the following: (i) the grant of a non-exclusive, retroactive and future license to manufacture and/or sell products covered by patented technologies owned or controlled by Acacia's operating subsidiaries, (ii) a covenant-not-to-sue, (iii) the release of the licensee from certain claims, and (iv) the dismissal of any pending litigation. The intellectual property rights granted may be perpetual in nature, extending until the expiration of the related patents, or can be granted for a defined, relatively short period of time, with the licensee possessing the right to renew the agreement at the end of each contractual term for an additional minimum upfront payment. Pursuant to the terms of these agreements, Acacia's operating subsidiaries have no further obligation with respect to the grant of the non-exclusive retroactive and future licenses, covenants-not-to-sue, releases, and other deliverables, including no express or implied obligation on Acacia's operating subsidiaries' part to maintain or upgrade the technology, or provide future support or services. Generally, the agreements provide for the grant of the licenses, covenants-not-to-sue, releases, and other significant deliverables upon execution of the agreement, or upon receipt of the minimum upfront payment for term agreement renewals. As such, the earnings process is complete and revenue is recognized upon the execution of the agreement, when collectibility is reasonably assured, or upon receipt of the minimum upfront fee for term agreement renewals, and when all other revenue recognition criteria have been met.

For the periods presented herein, the majority of the revenue agreements executed by the Company provided for the payment of one-time, paid-up license fees in consideration for the grant of certain intellectual property rights for patented technology rights owned by Acacia's operating subsidiaries. These rights were primarily granted on a perpetual basis, extending until the expiration of the underlying patents.

Cost of Revenues. Cost of revenues include the costs and expenses incurred in connection with Acacia's patent licensing and enforcement activities, including inventor royalties paid to original patent owners, contingent legal fees paid to external patent counsel, other patent-related legal expenses paid to external patent counsel, licensing and enforcement related research, consulting and other expenses paid to third-parties and the amortization of patent-related investment costs. These costs are included under the caption "Cost of revenues" in the accompanying consolidated statements of operations.

Inventor Royalties and Contingent Legal Expenses. Inventor royalties are expensed in the consolidated statements of operations in the period that the related revenues are recognized. In certain instances, pursuant to the terms of the underlying inventor agreements, upfront advances paid to patent owners by Acacia's operating subsidiaries are recoverable from future net revenues. Patent costs that are recoverable from future net revenues are amortized over the estimated economic useful life of the related patents, or as the prepaid royalties are earned by the inventor, as appropriate, and the related expense is included in amortization expense in the consolidated statements of operations. Any unamortized upfront advances recovered from net revenues are expensed in the period recovered, and included in amortization expense in the consolidated statements of operations.

Contingent legal fees are expensed in the consolidated statements of operations in the period that the related revenues are recognized. In instances where there are no recoveries from potential infringers, no contingent legal fees are paid;

however, Acacia's operating subsidiaries may be liable for certain out of pocket legal costs incurred pursuant to the underlying legal services agreement.

Use of Estimates. The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Acacia believes that, of the significant accounting policies described herein, the accounting policies associated with revenue recognition, stock-based compensation expense, impairment of marketable securities and patent-related intangible assets, the determination of the economic useful life of amortizable intangible assets, income taxes and valuation allowances against net deferred tax assets and the application of the acquisition method of accounting for business combinations, require its most difficult, subjective or complex judgments.

ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Concentrations. One licensee individually accounted for 85% of revenues recognized during the three months ended June 30, 2016, and one licensee accounted for 53% of revenues recognized during the six months ended June 30, 2016. One licensee individually accounted for 74% of revenues recognized during the three months ended June 30, 2015 and two licensees accounted for 40% and 27% of revenues recognized during the six months ended June 30, 2015. For the three and six months ended June 30, 2016, 85% and 63%, respectively, of revenues were attributable to licensees domiciled in foreign jurisdictions, based on the jurisdiction of the entity obligated to satisfy payment obligations pursuant to the applicable revenue arrangement. For the three and six months ended June 30, 2015, 18% and 38%, respectively, of revenues were attributable to licensees domiciled in foreign jurisdictions. The Company does not have any material foreign operations.

Three licensees individually represented approximately 69%, 17% and 10% of accounts receivable at June 30, 2016. Two licensees individually represented approximately 72% and 21% of accounts receivable at December 31, 2015.

Stock-Based Compensation. The compensation cost for stock-based awards is measured at the grant date, based on the fair value of the award, and is recognized as an expense, on a straight-line basis, over the employee's requisite service period (the vesting period of the equity award) which is two to four years. The fair value of each option award is estimated on the date of grant using a Black-Scholes option valuation model. The fair value of restricted stock and restricted stock unit awards is determined by the product of the number of shares or units granted and the grant date market price of the underlying common stock. Stock-based compensation expense is recorded only for those awards expected to vest using an estimated forfeiture rate.

Fair Value Measurements. U.S. GAAP defines fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date, and also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The three-level hierarchy of valuation techniques established to measure fair value is defined as follows:

Level 1 - Observable Inputs: Quoted prices in active markets for identical investments;

Level 2 - Pricing Models with Significant Observable Inputs: Other significant observable inputs, including quoted prices for similar investments, interest rates, credit risk, etc.; and

Level 3 - Unobservable Inputs: Significant unobservable inputs, including the entity's own assumptions in determining the fair value of investments.

Whenever possible, the Company is required to use observable market inputs (Level 1 - quoted market prices) when measuring fair value.

Patents. Patents include the cost of patents or patent rights (hereinafter, collectively "patents") acquired from third-parties or obtained in connection with business combinations. Capitalized patent costs are amortized utilizing the straight-line method over their remaining economic useful lives, ranging from one to eight years. Certain patent application and prosecution costs incurred to secure additional patent claims, that based on management's estimates are deemed to be recoverable, are capitalized and amortized over the remaining estimated economic useful life of the related patent portfolio.

Impairment of Long-lived Assets. Acacia reviews long-lived assets and intangible assets for potential impairment annually (quarterly for patents) and when events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. In the event the expected undiscounted future cash flows resulting from the use of the asset is less than the carrying amount of the asset, an impairment loss is recorded equal to the excess of the asset's carrying value over its fair value. If an asset is determined to be impaired, the loss is measured based on quoted market prices

in active markets, if available. If quoted market prices are not available or not indicative of current fair value, the estimate of fair value is based on various valuation techniques, including a discounted value of estimated future cash flows.

Fair value is generally estimated using the “Income Approach,” focusing on the estimated future net income-producing capability of the patent portfolios over the estimated remaining economic useful life. Estimates of future after-tax cash flows are converted to present value through “discounting,” including an estimated rate of return that accounts for both the time value of money and investment risk factors. Estimated cash inflows are typically based on estimates of reasonable royalty rates for the applicable technology, applied to estimated market data. Estimated cash outflows are based on existing contractual obligations, such as contingent legal fee and inventor royalty obligations, applied to estimated license fee revenues, in addition to other estimates of out-of-pocket expenses associated with a specific patent portfolio’s licensing and enforcement program. The analysis also contemplates consideration of current information about the patent portfolio including, status and stage of litigation, periodic results of the litigation process, strength of the patent portfolio, technology coverage and other pertinent information that could impact future net cash flows.

ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Income Taxes. Income taxes are accounted for using an asset and liability approach that requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in Acacia's consolidated financial statements or consolidated income tax returns. A valuation allowance is established to reduce deferred tax assets if all, or some portion, of such assets will more than likely not be realized, or if it is determined that there is uncertainty regarding future realizability of such assets.

The provision for income taxes for interim periods is determined using an estimate of Acacia's annual effective tax rate, adjusted for discrete items, if any, that are taken into account in the relevant period. Each quarter, Acacia updates the estimate of the annual effective tax rate, and if the estimated tax rate changes, a cumulative adjustment is recorded.

The Company's effective tax rates were 17% and 14% for the three and six months ended June 30, 2016, respectively, and 13% and 2% for the three and six months ended June 30, 2015. The effective rates for the periods presented primarily reflect the impact of foreign withholding taxes related to certain revenue agreements executed with third party licensees domiciled in foreign jurisdictions, and valuation allowances recorded for foreign withholding tax credits and net operating loss related tax assets generated during the periods.

3. LOSS PER SHARE

The Company computes net income (loss) attributable to common stockholders using the two-class method required for capital structures that include participating securities. Under the two-class method, securities that participate in non-forfeitable dividends, such as the Company's outstanding unvested restricted stock, are considered "participating securities."

In applying the two-class method, (i) basic net income (loss) per share is computed by dividing net income (loss) (less any dividends paid on participating securities) by the weighted average number of shares of common stock and participating securities outstanding for the period and (ii) diluted earnings per share may include the additional effect of other securities, if dilutive, in which case the dilutive effect of such securities is calculated by applying the two-class method and the treasury stock method to the assumed exercise or vesting of potentially dilutive common shares. The method yielding the more dilutive result is ultimately reported for the applicable period. Potentially dilutive common stock equivalents primarily consist of employee stock options, and restricted stock units for calculations utilizing the two-class method, and also include unvested restricted stock, when utilizing the treasury method.

The following table presents the weighted-average number of common shares outstanding used in the calculation of basic and diluted loss per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Numerator (in thousands):				
Basic and Diluted				
Net loss	\$(40,573)	\$(3,686)	\$(50,538)	\$(16,816)

---	---------	--------	-----------	--------

ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. PATENTS

Acacia's only identifiable intangible assets at June 30, 2016 and December 31, 2015 are patents and patent rights. Patent-related accumulated amortization totaled \$343,179,000 and \$281,495,000 as of June 30, 2016 and December 31, 2015, respectively.

Acacia's patents have remaining estimated economic useful lives ranging from one to eight years. The weighted-average remaining estimated economic useful life of Acacia's patents is approximately five years. The following table presents the scheduled annual aggregate amortization expense as of June 30, 2016 (in thousands): For the years ending December 31,

Remainder of 2016	\$ 12,464
2017	23,312
2018	22,111
2019	19,412
2020	6,787
Thereafter	16,872
	\$ 100,958

For the six months ended June 30, 2016 and 2015, Acacia paid patent related investment costs, including up-front patent portfolio advances and previously accrued milestone payments related to patent related investments made in prior periods, totaling \$1,000,000 and \$18,667,000, respectively. The underlying patents have estimated economic useful lives of approximately four to nine years.

Acacia recorded impairment of patent-related intangible asset charges of \$40,165,000 for the six months ended June 30, 2016, primarily comprised of the write-off of the remaining carrying value of our Adaptix portfolio. The impairment charges were realized in the period due to a reduction in expected estimated future net cash flows and certain patent portfolios that management determined it would no longer allocate future resources to in connection with the licensing and enforcement of such portfolios, due primarily to the overall determination that future resources would be allocated to other licensing and enforcement programs. The impairment charges consisted of the excess of the asset's carrying value over its estimated fair value.

5. COMMITMENTS AND CONTINGENCIES

Bank Guarantee

In March 2015, an operating subsidiary of Acacia entered into a standby letter of credit and guarantee arrangement ("Guarantee") with a bank for purposes of enforcing a court ruling in a German patent court granting an injunction against the defendants in the related patent infringement case. An injunction is an equitable remedy in the form of a court order that compels the defendant(s) to cease marketing, offering for sale or importing applicable infringing products into applicable jurisdiction(s). Under German law, in order to enforce the injunction granted by the court, a Guarantee is required to be furnished by the operating subsidiary, the plaintiff in the case, for potential payment to the defendants of any applicable claims which may be incurred by the defendants as a result of the enforcement of the injunction, only in the event that the aforementioned court ruling is subsequently successfully appealed by the defendants or otherwise amended. The Guarantee is required to be issued unlimited with respect to time, until appropriately extinguished in accordance with German law. The Guarantee will be extinguished when a relevant extinguishment order by the court having jurisdiction takes effect, typically occurring when the related infringement case has been settled or a final non-appealable decision has been issued by the court.

The Guarantee is secured by a cash deposit at the contracting bank, which is classified as restricted cash in the accompanying balance sheets, totaling \$14,036,000 and \$10,725,000 as of June 30, 2016 and December 31, 2015, respectively. Changes in the balance are primarily a result of additional court rulings granting injunctions with respect to additional defendants, and foreign currency exchange rate fluctuations and the related impact on the underlying collateral, which is denominated in U.S. dollars. The Guarantee expires on April 10, 2017, however, it is automatically extended without amendment for a period of one (1) year from the present or any future expiration date, unless at least 30 days prior to any

ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

expiration date, the Guarantee is extinguished in accordance with German law. The Guarantee facility fee is 1.15% per year, and the related expense is included in the consolidated statement of operations.

Patent Enforcement

Certain of Acacia's operating subsidiaries are often required to engage in litigation to enforce their patents and patent rights. In connection with any of Acacia's operating subsidiaries' patent enforcement actions, it is possible that a defendant may request and/or a court may rule that an operating subsidiary has violated statutory authority, regulatory authority, federal rules, local court rules, or governing standards relating to the substantive or procedural aspects of such enforcement actions. In such event, a court may issue monetary sanctions against Acacia or its operating subsidiaries or award attorney's fees and/or expenses to a defendant(s), which could be material.

Second quarter 2016 other operating income was \$1,242,000 as compared to \$0 in the comparable prior year quarter. In the second quarter of 2016 we reversed an estimated accrual for attorney's fees due to settlement of the matter, resulting in no payment due by either party. For the six months ended June 30, 2016 and 2015, other operating expenses were \$500,000 and \$426,000, respectively. Other operating expenses includes expense accruals for court ordered attorney's fees and settlement and contingency accruals for other matters.

Other

Acacia is subject to claims, counterclaims and legal actions that arise in the ordinary course of business. Management believes that the ultimate liability with respect to these claims and legal actions, if any, will not have a material effect on Acacia's consolidated financial position, results of operations or cash flows.

6. STOCKHOLDERS' EQUITY

Cash Dividends. The Company paid quarterly cash dividends totaling \$12,749,000 during the six months ended June 30, 2015 in the amount of \$0.125 per share. On February 25, 2016, Acacia announced that its Board of Directors terminated the company's dividend policy effective February 23, 2016. The Board of Directors terminated the dividend policy due to a number of factors, including the Company's financial performance and its available cash resources, the Company's cash requirements and alternative uses of capital that the Board of Directors concluded would represent an opportunity to generate a greater return on investment for the Company and its stockholders.

Tax Benefits Preservation Plan. On March 15, 2016, Acacia's Board of Directors announced that it unanimously approved the adoption of a Tax Benefits Preservation Plan (the "Plan"). The purpose of the Plan is to protect the Company's ability to utilize potential tax assets, such as net operating loss carryforwards ("NOLs") and tax credits to offset potential future taxable income.

The Plan is designed to reduce the likelihood that the Company will experience an ownership change by discouraging any (i) person or group from acquiring beneficial ownership of 4.9% or more of the Company's outstanding common stock and (ii) any existing shareholders who, as of the time of the first public announcement of the adoption of the Plan, beneficially own more than 4.9% of the Company's then-outstanding shares of the Company's common stock from acquiring additional shares of the Company's common stock (subject to certain exceptions). There is no guarantee, however, that the Plan will prevent the Company from experiencing an ownership change.

In connection with the adoption of the Plan, Acacia's Board of Directors authorized and declared a dividend distribution of one right, under the plan, for each outstanding share of the Company's common stock to shareholders of record at the close of business on March 16, 2016.

7. RECENT ACCOUNTING PRONOUNCEMENTS

Recent Accounting Pronouncements - Recently Adopted.

In June 2014, the Financial Accounting Standards Board (the “FASB”) issued a new accounting standard which requires that a performance target that affects vesting and could be achieved after the requisite service period shall be treated as

10

ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

a performance condition. Adoption of this standard is required for annual periods beginning after December 15, 2015. Early adoption is permitted. The adoption of this standard effective January 2016 did not have a material impact on the Company's consolidated financial statements and related disclosures.

Recent Accounting Pronouncements - Not Yet Adopted.

In March 2016, the FASB issued a new standard that changes the accounting for certain aspects of share-based payments to employees. The new guidance requires all income tax effects of awards to be recognized in the income statement when the awards vest or are settled. It also allows an employer to repurchase more of an employee's shares than it can today for tax withholding purposes without triggering liability accounting and to make a policy election for forfeitures as they occur. The guidance is effective for public business entities for fiscal years beginning after December 15, 2016, and interim periods within those years. Early adoption is permitted. Management is currently assessing the impact that adopting this new accounting guidance will have on its financial statements and footnote disclosures.

In June 2016, the FASB issued guidance on the measurement and recognition of credit losses on most financial assets. For trade receivables, loans, and held-to-maturity debt securities, the current probable loss recognition methodology is being replaced by an expected credit loss model. For available-for-sale debt securities, the recognition model on credit losses is generally unchanged, except the losses will be presented as an adjustable allowance. The guidance will be applied retrospectively with the cumulative effect recognized as of the date of adoption. The guidance will become effective at the beginning of our first quarter of fiscal 2021 but can be adopted as early as the beginning of our first quarter of fiscal 2020. Management is currently assessing the impact that adopting this new accounting guidance will have on its financial statements and footnote disclosures.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Regarding Forward Looking Statements

You should read the following discussion and analysis in conjunction with the consolidated financial statements and related notes thereto contained in Part I, Item 1 of this Quarterly Report on Form 10-Q. The information contained in this Quarterly Report on Form 10-Q is not a complete description of our business or the risks associated with an investment in our common stock. We urge you to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the Securities and Exchange Commission, or the SEC, including our Annual Report on Form 10-K for the year ended December 31, 2015, filed with the SEC on March 15, 2016.

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and which concern matters that involve risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. Reference is made in particular to the description of our plans and objectives for future operations, assumptions underlying such plans and objectives, and other forward-looking statements set forth under "Management's Discussion and Analysis of Financial Condition and Results of Operations" and other sections of this Quarterly Report on Form 10-Q. Such statements may be identified by the use of forward-looking terminology such as "may," "will," "should," "could," "expect," "plan," "believe," "estimate," "anticipate," "intend," "predict," "potential," "continue" or similar terms, variations of such terms or the negative of such terms, although not all forward-looking statements contain these terms. Such statements are based on management's current expectations and are subject to a number of factors and uncertainties, which could cause actual results to differ materially from those described in the forward-looking statements. Such statements address future events and conditions concerning intellectual property acquisition and development, licensing and enforcement activities, other related business activities, capital expenditures, earnings, litigation, regulatory matters, markets for our services, liquidity and capital resources and accounting matters. Actual results in each case could differ materially from those anticipated in such statements by reason of factors such as our ability to invest in new technologies and patents, future global economic conditions, changes in demand for our services, legislative, regulatory and competitive developments in markets in which we and our subsidiaries operate, results of litigation and other circumstances affecting anticipated revenues and costs. We expressly disclaim any intent, obligation or undertaking to update or revise any forward-looking statements contained herein to conform such statements to actual results or to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. Readers are urged to carefully review and consider the various disclosures made by us, which attempt to advise interested parties of the risks, uncertainties, and other factors that affect our business, including without limitation the disclosures made under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Financial Statements" in this Quarterly Report on Form 10-Q and the audited consolidated financial statements and notes thereto and disclosures made under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations," "Risk Factors" and "Financial Statements and Supplementary Data" included in our Annual Report on Form 10-K for the year ended December 31, 2015.

General

As used in this Quarterly Report on Form 10-Q, "we," "us" "our" and "Company" refer to Acacia Research Corporation, a Delaware corporation, and/or its wholly and majority-owned and controlled operating subsidiaries, and/or where applicable, its management. All intellectual property acquisition, development, licensing and enforcement activities are conducted solely by certain of Acacia Research Corporation's wholly and majority-owned and controlled operating subsidiaries.

Our operating subsidiaries invest in, license and enforce patented technologies. Our operating subsidiaries partner with inventors and patent owners, applying our legal and technology expertise to patent assets to unlock the financial value in their patented inventions. We are an intermediary in the patent marketplace, bridging the gap between invention and application, facilitating efficiency and delivering monetary rewards to patent owners.

Our operating subsidiaries generate revenues and related cash flows from the granting of intellectual property rights for the use of patented technologies that our operating subsidiaries control or own. Our operating subsidiaries assist patent owners with the prosecution and development of their patent portfolios, the protection of their patented inventions from unauthorized use, the generation of licensing revenue from users of their patented technologies and, where necessary, with the enforcement against unauthorized users of their patented technologies through the filing of patent infringement litigation.

We are a leader in patent licensing and enforcement and our operating subsidiaries have established a proven track record of licensing success with more than 1,500 license agreements executed to date, across 187 patent portfolio licensing and enforcement programs. Currently, on a consolidated basis, our operating subsidiaries own or control the rights to multiple patent portfolios, which include U.S. patents and certain foreign counterparts, covering technologies used in a wide variety of industries. To date, we have generated gross licensing revenue of approximately \$1.3 billion, and have returned more than \$705 million to our patent partners.

Executive Summary

We continued our business of empowering patent owners and rewarding invention by providing a path to patent monetization for the people and entities who have contributed valuable patented inventions to an industry, but who require a professional, experienced independent third-party licensing partner to obtain financial benefit for those inventions. Our operating activities have been principally focused on the continued investment in and development of our patent licensing and enforcement business, including the continued pursuit of our ongoing patent licensing and enforcement programs. In addition, our operating subsidiaries may from time to time evaluate other business opportunities which compliment, or supplement our primary licensing and enforcement business.

For the three months ended June 30, 2016, we reported revenues of \$41.4 million from seven new revenue agreements covering 13 different licensing programs. Cash, restricted cash and investments totaled \$186.1 million as of June 30, 2016, as compared to \$145.9 million as of December 31, 2015.

Operating activities during the periods presented included the following:

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2016	
	2016	2015	2016	2015
Revenues (in thousands)	\$41,351	\$40,336	\$66,072	\$74,546
New agreements executed	7	20	19	43
Licensing and enforcement programs generating revenues	13	18	21	25

Trailing twelve-month revenues during the periods presented were as follows (in thousands, except percentage change values):

As of Date:	Trailing Twelve -Month Revenues	% Change
June 30, 2016	\$ 116,563	1 %
March 31, 2016	\$ 115,548	(8)%
December 31, 2015	\$ 125,037	5 %
September 30, 2015	\$ 118,570	(17)%
June 30, 2015	\$ 142,768	— %

Our revenues historically have fluctuated quarterly, and can vary significantly, based on a number of factors including the following:

- the dollar amount of agreements executed each period, which can be driven by the nature and characteristics of the technology or technologies being licensed and the magnitude of infringement associated with a specific licensee;

the specific terms and conditions of agreements executed each period including the nature and characteristics of rights granted, and the periods of infringement or term of use contemplated by the respective payments;
fluctuations in the total number of agreements executed each period;
the number of, timing, results and uncertainties associated with patent licensing negotiations, mediations, patent infringement actions, trial dates and other enforcement proceedings relating to our patent licensing and enforcement programs;
the relative maturity of licensing programs during the applicable periods;

other external factors, including the periodic status or results of ongoing negotiations, the status or results of ongoing litigations and appeals, actual or perceived shifts in the regulatory environment, impact of unrelated patent related judicial proceedings and other macroeconomic factors; and

- historically, based on the merits and strength of our operating subsidiary's patent infringement claims and other factors, many prospective licensees have elected to settle significant patent infringement cases and pay reasonable license fees for the use of our patented technology, as those patent infringement cases approached a court determined trial date.

Management does not attempt to manage for smooth sequential periodic growth in revenues period to period, and therefore, periodic results can be uneven. In some cases, licensing revenues not generated in a current period are not necessarily foregone, but depending on whether negotiations, litigation or both continue into subsequent periods, and depending on a number of other factors, such potential revenues may be pushed into subsequent fiscal periods.

Revenues for the six months ended June 30, 2016 included fees from the following technology licensing and enforcement programs:

- | | |
|---|--|
| 4G Wireless technology | •Knee Replacement technology |
| Audio Communications Fraud Detection technology | •Lighting Ballast technology |

*Percentage change in excess of 300%

Overview - Three months ended June 30, 2016 compared with the three months ended June 30, 2015

Revenues remained relatively flat, increasing \$1.0 million, or 3%, to \$41.4 million for the three months ended June 30, 2016, as compared to \$40.3 million in the comparable prior year quarter.

Loss before income taxes was \$35.0 million for the three months ended June 30, 2016, as compared to income before income taxes of \$896,000 for the three months ended June 30, 2015. The change was due primarily to a \$40.2 million patent impairment charge, partially offset by a net decrease in operating expenses, including the following:

Cost of Revenues and Other Operating Expenses:

Inventor royalties and contingent legal fees, on a combined basis, increased \$3.6 million, or 54%, compared to the 3% increase in related revenues for the same periods, due primarily due to higher average contingent legal fee rates for the portfolios generating revenues in the second quarter of 2016, as compared to the portfolios generating revenues in the second quarter of 2015.

Litigation and licensing expenses-patents decreased \$1.7 million, or 19%, to \$7.3 million, due primarily to a net decrease in litigation support costs associated with upcoming trials and a decrease in patent prosecution and litigation expenses associated with ongoing licensing and enforcement programs.

Amortization expense decreased \$2.5 million, or 19%, to \$10.8 million, due to a decrease in scheduled amortization on existing patent portfolios resulting from various patent portfolio impairment charges previously recorded in the fourth quarter of 2015.

General and administrative expenses decreased \$2.1 million, or 21%, to \$7.5 million, due primarily to a net decrease in non-cash stock compensation and personnel costs in connection with head count reduction activities in 2015 and 2016.

Impairment of patent-related intangible asset charges totaled \$40.2 million, reflecting the impact of reductions in expected estimated future net cash flows for certain patent portfolios and certain patent portfolios that management determined it would no longer allocate resources to in future periods.

Other operating income was \$1.2 million as compared to \$0 in the comparable prior year quarter. Other operating income includes a reversal of an estimated accrual for attorney's fees due to settlement of the matter, resulting in no payment due by either party.

Overview - Six months ended June 30, 2016 compared with the six months ended June 30, 2015

Revenues decreased \$8.5 million, or 11% to \$66.1 million, as compared to \$74.5 million in the comparable prior year period, due primarily to a decrease in the total number of agreements executed, partially offset by an increase in average revenue per agreement.

Loss before income taxes increased 258%, to \$44.7 million, as compared to \$12.5 million in the comparable prior year period, due to the 11% decrease in revenues and \$40.2 million of patent impairment charges described above, partially offset by a net decrease in operating expenses, as follows:

Cost of Revenues and Other Operating Expenses:

Inventor royalties and contingent legal fees, on a combined basis, decreased \$4.8 million, or 23%, as compared to the 11% decrease in related revenues for the same periods, due primarily to higher average levels of cost recovery related preferred returns on revenues, resulting in a decrease in inventor royalty expense during the six months ended June 30, 2016, partially offset by an increase in contingent legal fee rates for the portfolios generating revenues during the six months ended June 30, 2016.

Litigation and licensing expenses-patents decreased \$2.6 million, or 15%, to \$15.0 million, due primarily to a net decrease in litigation support costs associated with upcoming trials and a decrease in patent prosecution and litigation expenses associated with ongoing licensing and enforcement programs.

Amortization of patents decreased \$4.7 million, or 18%, to \$21.5 million, due primarily to a decrease in scheduled amortization on existing patent portfolios resulting from various patent portfolio impairment charges previously recorded in the fourth quarter of 2015.

Marketing, general and administrative expenses decreased \$4.6 million, or 23%, to \$15.5 million, due primarily to a net decrease in non-cash stock compensation charges and a decrease in variable performance-based compensation costs.

The effective tax rates for the six months ended June 30, 2016 and 2015 were 14% and 2%, respectively. Tax expense for the periods presented primarily reflects the impact of foreign withholding taxes related to revenue agreements executed with third party licensees domiciled in foreign jurisdictions, and valuation allowances recorded for foreign withholding tax credits and net operating loss related tax assets generated during the periods.

Investments in Patent Portfolios

Certain of our operating subsidiaries continue to identify and explore opportunities to partner with patent owners with quality patent assets, across a range of technology areas that have been, or are anticipated to be, adopted by third-parties in connection with the manufacture or sale of products and services.

Neither we nor our operating subsidiaries invent new technologies or products; rather, we depend upon the identification and investment in new patents and inventions through our new or existing relationships with patent owners. If our operating subsidiaries are unable to maintain those relationships and to continue to grow new

relationships, then they may not be able to identify new technology-based opportunities for sustainable revenue and growth. In this regard, our current or future relationships may not provide the volume or quality of technologies necessary to sustain our business. In some cases, universities and other technology sources may compete against us as they seek to develop and commercialize technologies. Universities may receive financing for basic research in exchange for the exclusive right to commercialize resulting inventions. These and other strategies may reduce the number of technology sources and potential clients to whom we can market our services. If we are unable to maintain current relationships and sources of technology or to secure new relationships and sources of technology, such inability may have a material adverse effect on our operating results, financial condition and business overall.

For example, in fiscal year 2015, we obtained control of three new patent portfolios, compared to six new patent portfolios and 25 new patent portfolios in fiscal years 2014 and 2013, respectively. We did not acquire any new patent

portfolios in the first six months of 2016. The decrease in patent portfolio intake, in part, reflects a strategic decision in 2013 to shift the focus of our operating business to increasingly serve a smaller number of customers each having higher quality patent portfolios. High quality patent portfolios are typically associated with higher numbers of varied defensible claims, higher revenue potential, originating from high-pedigreed patent owners and/or possessing a relatively large number of prospective licensees. As a result, our gross number of patent portfolio acquisitions has trended downward. The decrease may also be reflective, in part, of industry trends impacting our ability to acquire patent portfolios. For example, legislative and legal changes have increased the complexity of patent enforcement and may be affecting the market availability of suitable patent portfolios for acquisition. Despite recent efforts to broaden our patent portfolio intake, if these industry trends continue, our future patent portfolio intake could be negatively impacted, resulting in a decrease in future revenue generating opportunities.

Patent Licensing and Enforcement

Patent Litigation Trial Dates and Related Trials. As of the date of this report, our operating subsidiaries have six pending patent infringement cases with a scheduled trial date in the next six months. Patent infringement trials are components of our overall patent licensing process and are one of many factors that contribute to possible future revenue generating opportunities for us. Scheduled trial dates, as promulgated by the respective court, merely provide an indication of when, in future periods, the trials may occur according to the court's scheduling calendar at a specific point in time. A court may change previously scheduled trial dates. In fact, courts often reschedule trial dates for various reasons that are unrelated to the underlying patent assets and typically for reasons that are beyond our control. While scheduled trial dates provide an indication of the timing of possible future revenue generating opportunities for us, the trials themselves and the immediately preceding periods represent the possible future revenue generating opportunities. These future opportunities can result in varying outcomes. In fact, it is difficult to predict the outcome of patent enforcement litigation at the trial level since outcomes can be unfavorable. It is often difficult for juries and trial judges to understand complex patented technologies, and as a result, this may lead to a higher rate of unfavorable outcomes. Moreover, in the event of a favorable outcome, there is a higher rate of successful appeals in patent enforcement litigation than more standard business litigation. Such appeals are expensive and time consuming, resulting in increased costs and a potential for delayed or foregone revenue opportunities in the event of modification or reversal of favorable outcomes. Although we diligently pursue enforcement litigation, we cannot predict with significant reliability the decisions made by juries and trial courts.

Litigation and Licensing Expense. We expect patent-related legal expenses to continue to fluctuate from period to period based on the factors summarized herein, in connection with future trial dates, international enforcement, strategic patent portfolio prosecution and our current and future patent portfolio investment, prosecution, licensing and enforcement activities. The pursuit of enforcement actions in connection with our licensing and enforcement programs can involve certain risks and uncertainties, including the following:

Increases in patent-related legal expenses associated with patent infringement litigation, including, but not limited to, increases in costs billed by outside legal counsel for discovery, depositions, economic analyses, damages assessments, expert witnesses and other consultants, re-exam and inter partes review costs, case-related audio/video presentations and other litigation support and administrative costs could increase our operating costs and decrease our profit generating opportunities;

Our patented technologies and enforcement actions are complex and, as a result, we may be required to appeal adverse decisions by trial courts in order to successfully enforce our patents. Moreover, such appeals may not be successful;

New legislation, regulations or rules related to enforcement actions, including any fee or cost shifting provisions, could significantly increase our operating costs and decrease our profit generating opportunities. Increased focus on

the growing number of patent-related lawsuits may result in legislative changes which increase our costs and related risks of asserting patent enforcement actions. For instance, the United States House of Representatives passed a bill that would require non-practicing entities that bring patent infringement lawsuits to pay legal costs of the defendants, if the lawsuits are unsuccessful and certain standards are not met;

Courts may rule that our subsidiaries have violated certain statutory, regulatory, federal, local or governing rules or standards by pursuing such enforcement actions, which may expose us and our operating subsidiaries to material liabilities, which could harm our operating results and our financial position; and

• The complexity of negotiations and potential magnitude of exposure for potential infringers associated with higher quality patent portfolios may lead to increased intervals of time between the filing of litigation and

potential revenue events (i.e. markman dates, trial dates), which may lead to increased legal expenses, consistent with the higher revenue potential of such portfolios.

Critical Accounting Estimates

Our unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Preparation of these consolidated statements requires management to make judgments and estimates. Some accounting policies have a significant impact on amounts reported in these consolidated financial statements. A summary of significant accounting policies and a description of accounting policies that are considered critical may be found in the audited consolidated financial statements and notes thereto and under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" included in our Annual Report on Form 10-K for the year ended December 31, 2015. Refer to Note 2 to the consolidated financial statements included in this report.

Consolidated Results of Operations

Comparison of the Results of Operations for the Three and Six Months Ended June 30, 2016 and 2015

Revenues and Pretax Net Loss

	Three Months Ended June 30, 2016		2015		Change		Six Months Ended June 30, 2016		2015		Change	
					\$	%					\$	%
Revenues (in thousands, except percentage change values)	\$41,351	\$40,336	\$1,015	3%	\$66,072	\$74,546	\$(8,474)	(11)%

	Three Months Ended June 30, 2016 vs. 2015	Six Months Ended June 30, 2016 vs. 2015
Change in number of agreements executed	\$(26,218)	\$(41,607)
Change in average revenue per agreement executed	27,233	33,133
Total change in revenues	\$1,015	\$(8,474)

One licensee individually accounted for 85% of revenues recognized during the three months ended June 30, 2016, and one licensee accounted for 53% of revenues recognized during the six months ended June 30, 2016. One licensee individually accounted for 74% of revenues recognized during the three months ended June 30, 2015 and two licensees accounted for 40% and 27% of revenues recognized during the six months ended June 30, 2015.

For the periods presented herein, the majority of the revenue agreements executed provided for the payment of one-time, paid-up license fees in consideration for the grant of certain intellectual property rights for patented

technology rights owned by our operating subsidiaries. These rights were primarily granted on a perpetual basis, extending until the expiration of the underlying patents.

Inventor Royalties and Contingent Legal Fees Expense. Inventor royalties and contingent legal fee expenses fluctuate period to period, based on the amount of revenues recognized each period, the terms and conditions of agreements executed each period and the mix of specific patent portfolios with varying economic terms and obligations generating revenues each period. A summary of the main drivers of the change in inventor royalties expense and contingent legal fees expense for the comparable periods presented, using the prior year period as the base period, is as follows (in thousands, except percentage values):

Three Months Ended June 30, 2016 vs. 2015		Six Months Ended June 30, 2016 vs. 2015	
	%		%

Inventor Royalties:

Litigation and licensing expenses - patents	\$7,324	\$9,012	\$(1,688)	(19)%	\$15,047	\$17,687	\$(2,640)	(15)%
Amortization of patents	\$10,759	\$13,228	\$(2,469)	(19)%	\$21,519	\$26,266	\$(4,747)	(18)%

Litigation and Licensing Expenses - Patents. Litigation and licensing expenses-patents include patent-related prosecution and enforcement costs incurred by outside patent attorneys engaged on an hourly basis and the out-of-pocket expenses incurred by law firms engaged on a contingent fee basis. Litigation and licensing expenses-patents also includes licensing and enforcement related third-party patent research, development, consulting, and other costs incurred in connection with the licensing and enforcement of patent portfolios.

Litigation and licensing expenses-patents decreased for the three and six month periods presented due to a net decrease in litigation support costs associated with upcoming trials and a decrease in patent prosecution and litigation expenses associated with ongoing licensing and enforcement programs. We expect patent-related legal expenses to continue to fluctuate period to period as we incur increased costs related to upcoming scheduled and/or anticipated trial dates, international enforcement activities and strategic patent portfolio prosecution activities over the next several fiscal quarters, as we continue to focus on our investments in these areas.

Amortization of Patents. The change in amortization expense for the comparable periods presented was due to a decrease in scheduled amortization on existing patent portfolios resulting from various patent portfolio impairment charges previously recorded in the fourth quarter of 2015.

Three Months				Six Months			
Ended		Change		Ended		Change

--	----------	----	-----------	------	----------	----	-----------	------

Patent Impairment Charges

Patent portfolio impairment charges totaled \$40.2 million for the three and six months ended June 30, 2016, primarily comprised of the write-off of the remaining carrying value of our Adaptix portfolio. The impairment charges for the periods presented reflect the impact of reductions in expected estimated future net cash flows for certain patent portfolios and certain patent portfolios that management determined it would no longer allocate resources to in future periods. The impairment charges consisted of the excess of the asset's carrying value over its estimated fair value as of the applicable measurement date.

Operating Expenses (in thousands, except percentage change values)

	Three Months				Six Months			
	Ended		Change		Ended		Change	
	June 30,				June 30,			
	2016	2015	\$	%	2016	2015	\$	%

Non-recurring employee severance costs	186	(9)%		679	(14)%	
Total change in general and administrative expenses	\$(2,052)	100%		\$(4,633)	100%	

Other

Second quarter 2016 other operating income was \$1.2 million as compared to \$0 in the comparable prior year quarter. In the second quarter of 2016 we reversed an estimated accrual for attorney's fees due to settlement of the matter, resulting in no payment due by either party. For the six months ended June 30, 2016 and 2015, other operating expenses were \$500,000 and \$426,000, respectively. Other operating expenses includes expense accruals for court ordered attorney's fees and settlement and contingency accruals for other matters.

Income Taxes

	Three Months		Six Months	
	Ended		Ended	
	June 30,		June 30,	
	2016	2015	2016	2015
Provision for income taxes (in thousands)	\$(5,927)	\$(119)	\$(6,119)	\$(289)
Effective tax rate	17%	(13)%	14%	2%

Tax expense for the periods presented primarily reflects the impact of foreign withholding taxes related to certain revenue agreements executed with third party licensees domiciled in foreign jurisdictions, state taxes and valuation

allowances recorded for foreign withholding tax credits and net operating loss related tax assets generated during the periods.

Liquidity and Capital Resources

General

Our primary sources of liquidity are cash and cash equivalents on hand generated from our operating activities. Our management believes that our cash and cash equivalent balances and anticipated cash flows from operations will be sufficient to meet our cash requirements through at least August 2017 and for the foreseeable future. We may, however, encounter unforeseen difficulties that may deplete our capital resources more rapidly than anticipated, including those set forth under the caption “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2015. Any efforts to seek additional funding could be made through issuances of equity or debt, or other external financing. However, additional funding may not be available on favorable terms, or at all. The capital and credit markets have experienced extreme volatility and disruption since late 2007, and the volatility and impact of the disruption has continued into 2016. At times during this period, the volatility and disruption has reached unprecedented levels. In several cases, the markets have exerted downward pressure on stock prices and credit capacity for certain issuers, and the commercial paper markets may not be a reliable source of short-term financing for us. If we fail to obtain additional financing when needed, we may not be able to execute our business plans and our business, conducted by our operating subsidiaries, may suffer.

Certain of our operating subsidiaries are often required to engage in litigation to enforce their patents and patent rights. In connection with any of our operating subsidiaries’ patent enforcement actions, it is possible that a defendant may request and/or a court may rule that an operating subsidiary has violated statutory authority, regulatory authority, federal rules, local court rules, or governing standards relating to the substantive or procedural aspects of such enforcement actions. In such event, a court may issue monetary sanctions against us or our operating subsidiaries or award attorney’s fees and/or expenses to a defendant(s), which could be material.

Cash, Cash Equivalents and Investments

Our consolidated cash and cash equivalents on hand, excluding restricted cash balances, totaled \$172.0 million at June 30, 2016, compared to \$135.2 million at December 31, 2015. The net change in cash and cash equivalents for the periods presented was comprised of the following (in thousands):

	Six Months Ended	
	June 30,	
	2016	2015

Net cash provided by (used in):

Operating activities	\$37,793	\$(6,445)
Investing activities	(33,219)	2,874
Financing activities	(25)	(11,811)

Cash Flows from Operating Activities. Cash receipts from licensees for the six months ended June 30, 2016 increased 68% to \$96.0 million, as compared to \$57.2 million in the comparable 2015 period due to the net impact of the timing of cash receipts from licensees. Cash outflows from operations for the six months ended June 30, 2016 increased 4% to \$54.9 million, as compared to \$52.9 million in the comparable 2015 period, primarily due to the net impact of the timing of related payments of inventor royalties and contingent legal fees and the timing of payments to other third-parties in the ordinary course, for the same periods. Refer to “Working Capital” below for additional information.

Restricted Cash. In March 2015, an operating subsidiary of ours entered into a Guarantee with a bank in connection with enforcing a ruling in a German patent court granting an injunction against the defendants in the related patent infringement case. The Guarantee is secured by a cash deposit (classified as restricted cash in the accompanying

balances sheets) at the contracting bank, totaling \$14.0 million and \$10.7 million, at June 30, 2016 and December 31, 2015, respectively. See below for additional information.

Cash Flows from Investing Activities. Cash flows from investing activities and related changes were comprised of the following for the periods presented (in thousands):

	Six Months Ended June 30,	
	2016	2015
Available-for-sale investments, net	\$(32,215)	\$21,549
Investments in patents/ patent rights	(1,000)	(18,667)
Purchases of property and equipment	(4)	(8)
Net cash provided by investing activities	\$(33,219)	\$2,874

Cash Flows from Financing Activities. Cash flows from financing activities and related changes included the following for the periods presented (in thousands):

	Six Months Ended June 30,	
	2016	2015
Dividends paid to stockholders	\$—	\$(12,749)
Repurchased restricted common stock	(25)	—
Proceeds from exercises of stock options	—	938
Net cash used in financing activities	\$(25)	\$(11,811)

We paid quarterly cash dividends totaling \$12.7 million during the six months ended June 30, 2015 in the amount of \$0.125 per share. On February 25, 2016, Acacia announced that its Board of Directors terminated the company's dividend policy effective February 23, 2016.

Working Capital

Working capital (including restricted cash) at June 30, 2016 increased to \$165.6 million, compared to \$150.7 million at December 31, 2015. Consolidated accounts receivable from licensees decreased to \$4.3 million at June 30, 2016, compared to \$33.5 million at December 31, 2015. Consolidated royalties and contingent legal fees payable increased to \$17.9 million at June 30, 2016, compared to \$14.9 million at December 31, 2015.

The majority of accounts receivable from licensees at June 30, 2016 were collected or scheduled to be collected in the third quarter of 2016, in accordance with the terms of the related underlying agreements. The majority of royalties and contingent legal fees payable are scheduled to be paid in the third or fourth quarter of 2016, subsequent to receipt by us of the related fee payments from licensees, in accordance with the underlying contractual arrangements.

Standby Letter of Credit and Guarantee Arrangement

In March 2015, an operating subsidiary of ours entered into a standby letter of credit and guarantee arrangement ("Guarantee") with a bank for purposes of enforcing a court ruling in a German patent court granting an injunction against the defendants in the related patent infringement case. An injunction is an equitable remedy in the form of a court order that compels the defendant(s) to cease marketing, offering for sale or importing applicable infringing products into applicable jurisdiction(s). Under German law, in order to enforce the injunction granted by the court, a Guarantee is required to be furnished by our operating subsidiary, the plaintiff in the case, for potential payment to the defendants of any applicable claims which may be incurred by the defendants as a result of the enforcement of the injunction, only in the event that the aforementioned court ruling is subsequently successfully appealed by the defendants or otherwise amended. The Guarantee is required to be issued unlimited with respect to time, until

appropriately extinguished in accordance with German law. The Guarantee will be extinguished when a relevant extinguishment order by the court having jurisdiction takes effect, typically occurring when the related infringement case has been settled or a final non-appealable decision has been issued by the court.

The Guarantee is secured by a cash deposit at the contracting bank totaling \$14.0 million and \$10.7 million, as of June 30, 2016 and December 31, 2015, respectively. Changes in the balance are primarily due to additional defendants that were added to the patent infringement case in the second quarter of 2016. Additional changes are a result of foreign currency exchange rate fluctuations and the related impact on the underlying collateral, which is denominated in U.S. dollars. The Guarantee expires on April 10, 2017, however, it is automatically extended without amendment for a period of one (1) year

from the present or any future expiration date, unless at least 30 days prior to any expiration date, the Guarantee is extinguished in accordance with German law. The Guarantee facility fee is 1.15% per year, and the related expense is included in the statement of operations.

Off-Balance Sheet Arrangements

Except as set forth below, we have not entered into off-balance sheet financing arrangements, other than operating leases. We have no significant commitments for capital expenditures in 2016. We have no long-term debt. The following table lists our known contractual obligations and future cash commitments as of June 30, 2016 (in thousands):

	Payments Due by Period (In thousands)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Contractual Obligations					
Operating leases, net of guaranteed sublease income	\$4,566	\$ 548	\$2,569	\$1,449	\$ —

Uncertain Tax Positions. At June 30, 2016, we had total unrecognized tax benefits of approximately \$2.1 million, including a recorded noncurrent liability of \$85,000 related to unrecognized tax benefits primarily associated with state taxes. No interest and penalties have been recorded for the unrecognized tax benefits as of June 30, 2016. Recognition of the tax benefits would not have a material impact on our effective tax rate. We do not expect that the liability for unrecognized tax benefits will change significantly within the next 12 months. There was no activity related to the gross unrecognized tax benefits for the periods presented.

Recent Accounting Pronouncements

Refer to Note 7 to the consolidated financial statements included in this report.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The primary objective of our investment activities is to preserve principal while concurrently maximizing the income we receive from our investments without significantly increasing risk. Some of the securities that we invest in may be subject to interest rate risk and/or market risk. This means that a change in prevailing interest rates, with respect to interest rate risk, or a change in the value of the United States equity markets, with respect to market risk, may cause the principal amount or market value of the investments to fluctuate. For example, if we hold a security that was issued with a fixed interest rate at the then-prevailing rate and the prevailing interest rate later rises, the current value of the principal amount of our investment may decline. To minimize these risks in the future, we intend to maintain our portfolio of cash equivalents and short-term investments in a variety of securities, including commercial paper, money market funds, high-grade corporate bonds, government and non-government debt securities and certificates of deposit.

During the periods presented, our short-term investments were comprised of AAA-rated money market funds that invest in first-tier only securities, which primarily include domestic commercial paper, securities issued or guaranteed by the U.S. government or its agencies, U.S. bank obligations, and fully collateralized repurchase agreements (included in cash and cash equivalents in the accompanying consolidated balance sheets) and direct investments in

highly liquid, AAA-rated, U.S. government securities.

In general, money market funds are not subject to market risk because the interest paid on such funds fluctuates with the prevailing interest rate. Accordingly, a 100 basis point increase in interest rates or a 10% decline in the value of the United States equity markets would not be expected to have a material impact on the value of such money market funds. Investments in U.S. government fixed income securities are subject to interest rate risk and will decline in value if interest rates increase. However, due to the relatively short duration of our investment portfolio, an immediate 10% change in interest rates would have no material impact on our financial condition, results of operations or cash flows. Declines in interest rates over time will, however, reduce our interest income.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures.

Our management, with the participation and under the supervision of our chief executive officer and chief financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of the end of the period covered by this quarterly report. Based on that evaluation, our chief executive officer and our chief financial officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report to ensure that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control Over Financial Reporting.

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter (the quarter ended June 30, 2016) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls.

Our management, including our chief executive officer and chief financial officer, does not expect that our disclosure controls or our internal control over financial reporting will prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, have been detected. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of the effectiveness of controls to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II--OTHER INFORMATION

Item 1A. RISK FACTORS

The risk factors set forth below contain changes to the description of the applicable risk factors previously disclosed in Item 1A. to our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 filed with the SEC on March 15, 2016.

Failure to effectively manage our operational changes could strain our managerial, operational and financial resources and could adversely affect our business and operating results.

Our recent operational changes have placed, and are expected to continue to place, a strain on our managerial, operational and financial resources and systems. Operational changes primarily relate to the resignation of Matthew Vella, our former Chief Executive Officer and President in December 2015, the appointment of Marvin Key, Chief Executive Officer of Acacia Research Group LLC, to Chief Executive Officer of Acacia Research Corporation in December 2015, and 2015 and 2016 reductions in employee headcount across our licensing, business development and engineering functions. Further, as our operating subsidiary companies' businesses grow or change, we will be required to continue to manage multiple relationships. Any further growth or change by us or our subsidiary companies, or an increase in the number of our strategic relationships, may place additional strain on our managerial, operational and financial resources and systems. Although we may not grow as we expect, if we fail to manage our growth or other operational changes effectively or to develop, expand or otherwise modify our managerial, operational and financial resources and systems, our business and financial results will be materially harmed.
