First Trust/Fiduciary Asset Management Covered Call Fund  
September 30, 2004 (Unaudited)

### 1. VALUATION AND INVESTMENT PRACTICES

#### PORTFOLIO VALUATION:

The Fund will determine the net asset value of its Common Shares daily, as of 4:15 p.m. Eastern Time, every day on which the New York Stock Exchange is open. Net asset value is computed by dividing the value of all assets of the Fund (including accrued interest and dividends), less all liabilities (including accrued expenses, the value of call options written (sold) and dividends declared but unpaid), by the total number of Common Shares outstanding.

The Fund's investments are valued at market value or, in the absence of market value with respect to any portfolio securities, at fair value as determined by, or under the direction of the Fund's Board of Trustees. Portfolio securities listed on any exchange other than the NASDAQ National Market ("NASDAQ") are valued at the last sale price on the business day of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the most recent bid and asked prices on such day. Securities trading on the NASDAQ are valued at the NASDAQ Official Closing Price as determined by NASDAQ. Portfolio securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined at the close of the exchange representing the principal market for such securities. Portfolio securities traded in the over-the-counter market, but excluding securities trading on the NASDAQ, are valued at the closing bid prices. Fixed income securities with a remaining maturity of 60 days or more will be valued by the Fund using a pricing service. When price quotes are not available, fair market value is based on prices of comparable securities. Short-term investments that mature in 60 days or less are valued at amortized cost.

The Fund values exchange-traded options and other derivative contracts at the

## Edgar Filing: First Trust/Fiduciary Asset Management Covered Call Fund - Form N-Q

closing price on the exchange on which it is principally traded, or if not traded, or no closing price is available, at the mean between the last bid and asked price.

### OPTION CONTRACTS:

Covered Call Options. When the Fund purchases equity securities, it will simultaneously write (sell) covered call options on substantially all of such equity securities. The number of call options the Fund can write (sell) is limited by the amount of equity securities the Fund holds in its portfolio. The Fund will not write (sell) "naked" or uncovered call options. By writing (selling) call options, the Fund seeks to generate additional income, in the form of premiums received for writing (selling) the options, and provide a partial hedge against a market decline in the underlying equity security. Call options are marked-to-market daily and their value will be affected by changes in the value and dividend rates of the underlying equity securities, an increase in interest rates, changes in the actual or perceived volatility of the securities markets and the underlying equity securities and the remaining time to the options' expiration. The value of call options may also be adversely affected if the market for the options becomes less liquid or smaller.

### SECURITIES TRANSACTIONS:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis.

11

### First Trust/Fiduciary Asset Management Covered Call Fund September 30, 2004 (Continued) (Unaudited)

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled a month or more after the trade date; interest income is not accrued until settlement date. The Fund instructs the custodian to segregate assets of the Fund with a current value at least equal to the amount of its when-issued purchase commitments.

### 2. UNREALIZED APPRECIATION/(DEPRECIATION)

On September 30, 2004, net unrealized appreciation for Federal tax purposes was \$9,535,006 consisting of \$12,895,292 aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost and \$3,360,286 aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value.
