Securities Act

MATERIAL CHANGE REPORT

ITEM 1: Reporting Issuer

Methanex Corporation (Methanex)
1800 Waterfront Centre
200 Burrard Street
Vancouver, British Columbia V6C 3M1

ITEM 2: Date of Material Change

November 21, 2003

ITEM 3: Press Release

The press releases announcing this material change were issued on November 21, 2003 in Canada and the United States.

ITEM 4: Summary of Material Change

On November 21, 2003, Methanex Corporation (the Company) announced that it will write down the carrying value of its methanol production assets in New Zealand and Alberta, resulting in a non-cash before and after-tax charge of approximately US\$130 million in the fourth quarter of 2003.

The Company also announced that it has commenced a solicitation of consents to a proposed amendment to the indenture (the Indenture) relating to the Company's 7.75% notes due August 15, 2005.

ITEM 5: Full Description of Material Change

On November 21, 2003, the Company announced that it will write down the carrying value of its methanol production assets in New Zealand and Alberta. The non-cash before and after-tax charge of approximately US\$130 million will be taken in the fourth quarter of 2003. Prior to the write-down, annual depreciation for these assets totalled approximately US\$30 million.

The write-down of these assets reflects the changed economics for natural gas in both New Zealand and North America. In February 2003, following a re-determination process, the Company lost substantially all of its remaining contractual natural gas entitlements from the Maui field offshore New Zealand. Since then, the Company has performed a comprehensive review of options and pursued multiple avenues but has not been able to secure sufficient quantities of natural gas feedstock at an economical price. The Company's Medicine Hat facility

has been idled since 2001 and the write-down of the plant reflects the Company's view on long-term North American natural gas prices and its reduced reliance on North American production as it continues to implement its low-cost strategy of expanding methanol capacity in regions with low feedstock costs.

Despite the write-downs, the Company continues to work to secure enough gas to produce 0.5 to 1.0 million tonnes of methanol in New Zealand during 2004. Prospects beyond 2004 are uncertain. The Company continues to view the Medicine Hat facility as providing valuable swing capacity to supplement its low-cost methanol production hubs in Chile and Trinidad.

The Company also announced on November 21, 2003 that it has commenced a solicitation of consents to a proposed amendment to the Indenture governing the Company's 7.75% notes due August 15, 2005. The Indenture currently provides that the Company may not make certain shareholder distributions, other than dividends of up to US\$30 million in any 12 month period, if the Company's Consolidated Net Worth, which approximates shareholders' equity, is less than US\$850 million. The proposed amendment to the Indenture would allow Methanex to add back to Consolidated Net Worth up to US\$200 million of non-cash write-downs.

ITEM 6: Reliance on section 85(2) of the Act

This report is not being filed on a confidential basis in reliance on section 85(2) of the Act.

ITEM 7: Omitted Information

None.

ITEM 8: Senior Officer
