MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

This review should be read in conjunction with MidSouth Bancorp Inc.'s ("MidSouth") consolidated financial statements and accompanying notes contained herein, as well as with MidSouth's 2001 annual consolidated financial statements, the notes thereto and the related Management's Discussion and Analysis.

MidSouth's net income totaled \$818,131 for the first quarter of 2002 compared to \$795,177 for the first quarter of 2001. Basic earnings per share were \$.28 for the quarter ending March 31, 2002 compared to \$.31 for the quarter ending March 31, 2001. Diluted earnings per share were \$.28 for the first quarter of 2002 and \$.27 for the first quarter of 2001.

Earnings were comparable for the two quarters ending March 31, 2002 and 2001 primarily due to falling interest rates that held net interest income to a 3% increase of \$121,304, while non-interest income increased 27% or \$319,393 and expenses increased 10% or \$374,132. MidSouth maintained its net interest margin despite the dramatic decline in interest rates over the past twelve months. Non-interest income increased primarily due to increased service charges on demand deposit accounts. Non-interest expense increases were recorded primarily in salaries and employee benefits, printing and office supplies, and professional fees. The increase in professional fees includes consulting fees associated with a process and workflow review of MidSouth's retail, lending and technology areas.

Total consolidated assets increased \$18.8 million or 6%, from \$341.8 million at March 31, 2001 to \$360.6 million at March 31, 2002. Deposits grew \$15.6 million or 5%, from \$309.3 million at March 31, 2001 to \$324.9 million at March 31, 2002.

Loans, net of Allowance for Loan Losses ("ALL"), increased \$14.5 million or 7%, from \$200.1 million in the first quarter of 2001 to \$214.6 million in the first quarter of 2002. Provisions for loan and lease losses increased slightly to \$358,000 in March 2002 compared to \$323,100 in March 2001.

Nonperforming loans as a percentage of total loans increased from .18% in March of 2001 to .45% in March of

Edgar Filing: MIDSOUTH BANCORP INC - Form 10QSB

2002. The increase resulted primarily from the placement of two large commercial credits on nonaccrual during the first quarter of 2002. Specific allocations have been made in the ALL for possible losses on these loans. The ALL represented 247% of nonperforming assets as of March 31, 2002 compared to 272% as of March 31, 2001. Loans past due ninety days and over decreased in quarterly comparison, from \$865,667 at March 31, 2001 to \$760,518 at March 31, 2002.

MidSouth's leverage ratio was 8.29% at March 31, 2002 compared to 8.09% at March 31, 2001. Return on average equity for the first quarter of 2002 was 14.27% compared to 15.98% for the first quarter of 2001.

1

Earnings Analysis

Net Interest Income

Average earning assets increased 7%, or \$20.8 million from \$305.2 million for the three months ended March 31, 2001 to \$326.0 million for the three months ended March 31, 2002. The mix of average earning assets shifted slightly, as loans represented 67% of average earning assets in the first quarter of 2001 compared to 65% in the first quarter of 2002. Average loans increased \$9.6 million, from \$203.6 million in the first quarter of 2001 to \$213.2 million in the first quarter of 2001. The average yield on loans decreased 181 basis points in quarterly comparison, from 10.52% to 8.71% at March 31, 2002. The decrease in loan yields resulted primarily from decreases in the prime lending ("prime") rate during 2001. New York prime fell 475 basis points during 2001. The impact of declining rates far exceeded the impact of volume increases in the loan portfolio, resulting in a \$697,037 decrease in interest income on loans.

Average investments increased \$17.3 million, from \$82.6 million at March 31, 2001 to \$99.9 million at March 31, 2002. The average taxable-equivalent yield on investments decreased 125 basis points, from 6.78% in the first quarter of 2001 to 5.53% in the first quarter of 2002, again due to falling interest rates. Additionally, federal funds sold volume decreased \$6.0 million and yields decreased 410 basis points, from 5.68% to 1.58%. Declining yields partially offset by a volume increase in investments resulted in decreased interest income on securities and federal funds sold of \$261,208 in quarterly comparison.

A 201 basis point decrease in the average rate paid on interest-bearing deposits, partially offset by an average volume increase of \$8.0 million, contributed to a \$1,079,549

Edgar Filing: MIDSOUTH BANCORP INC - Form 10QSB

decrease in interest expense for the quarter ended March 31, 2002 compared to the quarter ended March 31, 2001. The average rate paid on interest-bearing deposits decreased from 4.71% at March 31, 2001 to 2.70% at March 31, 2002. The percentage of average noninterest-bearing deposits to average total deposits increased slightly from 23% to 25% in quarterly comparison. The impact of these changes in the yields and volume of interest-bearing liabilities lowered interest expense to a greater degree than the decrease in interest income, resulting in increased net interest income of \$121,304 in quarterly comparison. The net taxable-equivalent yield on average earning assets decreased 16 basis points, from 5.37% for the quarter ended March 31, 2001 to 5.21% for the quarter ended March 31, 2002.

Non-interest Income

MidSouth's primary source of non-interest income, service charges on deposit accounts, increased \$282,351 or 36% for the three months ended March 31, 2002 as compared to the same period in 2001. The increase resulted primarily from an increase in insufficient funds fees. Other non-interest income increased \$49,835 in quarterly comparison, primarily due to increased third-party mortgage processing fees and lease income from an investment advisory firm.

Non-interest Expense

Non-interest expense increased \$374,132 or 10% for the three months ended March 31, 2002 compared to the three months ended March 31, 2001. Increases were recorded primarily in the categories of salaries and employee benefits, printing and office supplies and professional fees.

Salaries and employee benefits increased primarily due to the addition of risk management and loan support personnel, including a compliance officer, two internal audit officers and a collateral documentation officer. The number of full-time equivalent ("FTE") employees increased by 12 from 198 in March 2001 to 210 in March 2002. In addition, group health insurance and other benefits costs increased \$44,413 in quarterly comparison.

Printing and office supplies increased \$44,836 in the three-month period ended March 31, 2002 compared to the same period in 2001. The increase included additional check printing expenses that resulted from a change in vendor billing practices and from Bank-paid check orders associated with MidSouth's Business Value Checking program.

Professional fees increased \$44,847 primarily due to consulting fees associated with a process and workflow review of MidSouth's retail, lending and technology areas.

Balance Sheet Analysis

MidSouth ended the first quarter of 2002 with consolidated assets of \$360.6 million, a decrease of \$3.2 million from the \$363.8 million reported for December 31, 2001. Deposits decreased over the three months ended March 31, 2002 by \$5.7 million, from \$330.6 million at December 31, 2001 to \$324.9 million. The decline in deposits resulted primarily from fluctuations in commercial deposit account balances.

Net loans increased \$2.9 million from \$211.7 million at December 31, 2001 to \$214.6 at March 31, 2002. Loan demand in MidSouth's market remained slow for the first quarter of 2002. Consequently, excess cash flows were used to purchase additional securities. Purchases of \$15.9 million in agency and municipal securities were added to the investment portfolio in the first quarter of 2002. Unrealized gains in the securities available-for-sale portfolio, net of unrealized losses and tax effect, were \$200,150 at March 31, 2002, compared to a net unrealized gain of \$469,962 at December 31, 2001. These amounts result from interest rate fluctuations and do not represent permanent adjustments of value. Moreover, classification of securities as available-for-sale does not necessarily indicate that the securities will be sold prior to maturity.

Capital

MidSouth's leverage ratio was 8.29% at March 31, 2002 compared to 8.02% at December 31, 2001. Tier 1 capital to risk-weighted assets was 12.26% and total capital to risk-weighted assets was 13.39% at the end of the first quarter of 2002. At year-end 2001, Tier 1 capital to risk-weighted assets was 12.06% and total capital to risk-weighted assets was 13.21%.

Nonperforming assets as a % of total loans, other real estate owned and other assets Repossessed	0.50%	0.55%	0.41%
ALL as a % of nonperforming assets	<u>247.41%</u>	<u>201.77%</u>	<u>272.46%</u>

Nonperforming assets were \$1,093,432 as of March 31, 2002, a decrease of \$34,657 from the \$1,128,089 reported for December 31, 2001 and an increase of \$373,172 from the \$720,260 reported for March 31, 2001. The decrease from year-end 2001 resulted primarily from the sale of other real estate owned. The increase from March 2001 resulted primarily from the placement of two large commercial credits on nonaccrual. Specific allocations have been made in the ALL for possible losses on these

loans. Loans past due 90 days or more increased from \$865,667 in March 2001 to \$999,538 in December 2001 and decreased to \$760,518 as of March 31, 2002. Of the \$760,518 in loans past due 90 days or more at March 31, 2002, \$175,136 were past due loans reported by the Finance Company.

Specific reserves have been established in the ALL to cover potential losses on nonperforming assets. The ALL is analyzed quarterly and additional reserves, if needed, are allocated at that time. Management believes the \$2,705,295 in the allowance as of March 31, 2002 is sufficient to cover potential losses in nonperforming assets and in the loan portfolio. Loans classified for regulatory purposes but not included in Table 1 do not represent material credits about which management has serious doubts as to the ability of the borrower to comply with loan repayment terms.
