-

Item 1

Except where otherwise indicated, all financial information reflected in this document is expressed in Canadian dollars and determined on the basis of United States generally accepted accounting principles (U.S. GAAP). All share and per share data presented herein reflect the impact of the November 2013 stock split.

Revenues by commodity group presented herein reflect the impact of the 2014 reclassification of Other revenues. In order to better represent rail freight and related revenues within the commodity groups and to maintain non-rail services that support CN's rail business within Other revenues, certain other revenues were reclassified to the commodity groups within rail freight revenues. Revenues earned from trucking intermodal goods were reclassified from Other revenues to the Intermodal commodity group and services that relate to the movement of rail freight were reclassified from Other revenues to the related commodity groups. The 2011, 2012, and 2013 figures have been reclassified in order to be consistent with the 2014 presentation. This change had no impact on the Company's previously reported results of operations as total revenues remains unchanged.

The reader is advised to read all information provided in this document in conjunction with the Company's audited annual and unaudited interim Consolidated Financial Statements and Notes thereto as well as Management's Discussion and Analysis filed on SEDAR and EDGAR and posted on the Company's website (www.cn.ca).

This document contains forward-looking statements. The Company cautions that, by their nature, forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and assumptions.

CANADIAN NATIONAL RAILWAY COMPANY
RECONCILIATION OF NON-GAAP MEASURES 2010 – 2013

Management believes that Adjusted net income and Adjusted diluted earnings per share are useful measures of performance that can facilitate period-to-period comparisons, as they exclude items that do not necessarily arise as part of the normal day-to-day operations of the Company and could distort the analysis of trends in business performance. The exclusion of such items in the adjusted measures do not, however, imply that such items are necessarily non-recurring.

These non-GAAP measures do not have any standardized meaning prescribed by GAAP and therefore, may not be comparable to similar measures presented by other companies. A reconciliation of the differences between these non-GAAP measures and their comparable financial measures calculated in accordance with U.S. GAAP are provided herein.

Management believes that Free cash flow is a useful measure of performance as it demonstrates the Company's ability to generate cash for debt obligations and for discretionary uses such as payment of dividends and strategic opportunities. The Company defines its free cash flow measure as the difference between net cash provided by operating activities and net cash used in investing activities; adjusted for changes in restricted cash and cash equivalents and the impact of major acquisitions, if any. Free cash flow numbers for prior years have been restated for purposes of comparability.
