PART I

Item 1. Business

The Registrant was established in 1775, incorporated in 1909, reincorporated in 1968 in the State of New York, and reincorporated again in 1998 in Delaware. (The Registrant and its subsidiaries are hereinafter collectively referred to as the Company, We or Our unless otherwise noted.)

During the past five years the Company has focused its business on the managing, repurposing and distribution of a client's information to any audience, through any medium, in any language, anywhere in the world. The Company now offers its customers an integrated way to design and manage their information flows to take advantage of the latest technologies for creating, storing, moving, presenting, and utilizing information in any combination of paper and electronic forms. It manages documents on a client's site or at its own facilities. It provides business services and solutions for transactional financial, corporate reporting and mutual fund printing, as well as providing digital database management and printing, document management outsourcing, globalization, translation and integrated Internet applications, among others.

The Company currently operates the following business segments:

Financial Printing Consisting of transactional financial, corporate reporting, mutual fund, commercial and digital printing.

Outsourcing Consisting of document management solutions primarily for the legal and financial communities.

Globalization Consisting of translation, localization and content reengineering of software and technology products.

Internet Consulting and Development Consisting of integrated Internet applications primarily for the financial services sector.

Segment revenues, operating results, identifiable assets and capital spending attributable to the Company's operations for the calendar years 2000, 1999 and 1998, are shown in Note 15 of the Notes to Consolidated Financial Statements.

Financial Printing

Transactional financial printing includes registration statements, prospectuses, debt agreements, special proxy statements, offering circulars, tender offer materials and other documents related to corporate financings, acquisitions and mergers. Corporate reporting includes interim reports, regular proxy materials prepared by corporations for distribution to stockholders, Securities and Exchange Commission reports on Form 10-K and other forms, and stock exchange listing applications. Mutual fund printing includes regulatory and shareholder communications such as annual or interim reports, prospectuses, information statements, and marketing-related materials.

The Company receives its clients' information in a myriad of formats and repurposes it for distribution typically in print, digital or Internet formats. One of the Company's newer print solution offerings, digital printing, assists

customers by providing their individual clients with high-speed, customized periodic statements or other on-demand printing. Such customers include mutual funds, stock brokers, investment banks, retail banks and other financial institutions that manage multi-option client portfolios as well as healthcare providers, insurance companies and others that manage 401(k) and other retirement plans, and employers that offer multiple benefit options to their employees.

The Company provides some commercial printing which consists of annual reports, sales and marketing literature, point of purchase materials, market letters, newsletters and other custom-printed matter.

The Company also provides language translation of written documents, including highly confidential legal and financial documents.

Table of Contents

The Company's international financial printing business provides virtually identical services as those delivered by its domestic operations. International print capabilities are delivered either by the Company or through a number of strategic alliances.

Outsourcing

By combining a 1998 acquisition, Donnelly Enterprise Solutions Incorporated (DESI), with its own unit, the Company offers outsourcing of document management principally to the financial services and legal communities. Outsourcing includes the on-site management of document-building and reproduction operations at customers facilities, off-site backup of those same services, specialized applications of graphics and presentation technologies, desktop publishing, systems management, scanning and coding services and digital file and case management systems. This segment is commonly referred to as Bowne Business Solutions (BBS).

Globalization

The Company's globalization services principally focus on the worldwide technology industry providing linguistic and technical adaptation of software, hardware, multimedia products and websites, linguistic/usability testing and verification of end-customer ready products, design, development and systems integration expertise for multi-language web sites and the re-engineering software for use in countries other than the country of original development. This segment is commonly referred to as Bowne Global Solutions (BGS).

Internet Consulting and Development

The domestic market for the services offered by this segment has been impacted by the collapse of many dot.com businesses, the slowing spending on Internet projects by established companies and an overall lengthening of the sales cycle of Internet consulting. In recognition of this slowdown, management has restructured this segment, decreased its resources, addressed the remaining carrying value of the business and repositioned its remaining business.

This segment, commonly referred to as Immersant, has been re-focused on opportunities in the market for global web development. Working in partnership with the globalization segment, Immersant has targeted customers who maintain a multi-cultural Internet presence.

This business manages the customer's Internet lifecycle that includes: e-business strategy consulting, web content management, creation, design, development and maintenance, useability research and analysis, personalization, and other services. This business provides services principally to the financial services, insurance and digital entertainment

and e-learning markets.

For each of the last three fiscal years, the Company's financial printing business segment has accounted for the largest share of consolidated total net sales, as shown below:

Table of Contents

We have facilities to serve customers throughout the United States, Canada, Europe, Latin America, South America and Asia.

Although substantial investment in equipment and facilities is required, the Company's business is principally service-oriented. In all our activities, speed, accuracy, and the need to preserve the confidentiality of the customers information is paramount.

The Company maintains conference rooms and telecommunications capabilities at many of its financial printing offices for use by customers while jobs are in progress. On-site conveniences are also provided to customers which promote speed and ease of editorial changes and otherwise facilitate the completion of jobs. For many of its outsourcing customers, the Company maintains facilities and stations staff at the customers' own premises. The Company's globalization activities are conducted in a number of countries around the world. The Company's Internet consulting activities are conducted in three primary locations. In addition, the Company uses an extensive electronic communications network which facilitates data handling and makes collaboration practicable among customers at different sites.

Competition

The Company believes that it offers a unique array of information empowerment solutions to its clients. However, competition of the various individual services described above is intense, not only the speed and accuracy with which the Company can meet customer needs, but also the price of the services, quality of the product and supporting services are factors in this competition. The Company's customers include a wide variety of business corporations, law firms, investment banks, insurance companies, bond dealers, mutual funds and other financial institutions, as well as the leading software companies.

In transactional financial, corporate reporting and mutual fund printing, the Company competes directly with a number of other financial printers having the same degree of specialization. Some of those financial printers operate at multiple locations and some are subsidiaries or divisions of companies having greater financial resources than those of the Company. Although there is no published information available to determine its exact share of the total financial printing market, the Company believes it is the largest in terms of sales volume in this field. In addition to its customer base, the Company has experienced competition for sales, customer service and production personnel in financial printing.

In commercial printing, the Company competes with general commercial printers, which are far more numerous than those in the financial printing market. The digital printing unit faces diverse competition from a variety of industries including other printers, transfer agents, banks and Internet consultants.

The field of document management outsourcing also has a great deal of competition, with some participants having been established in this field much longer than the Company. Furthermore, the costs of entry into this market are much lower than those associated with the Company's other business activities.

Finally, with respect to its globalization and Internet service offerings, the Company has a large number of competitors. Some of them have offered their services to the same potential customers for a longer time, but none of them has acquired a dominant market position. Considerable consolidation is occurring presently in these business areas, and some of the organizations making acquisitions in these fields have resources comparable to or greater than those of the Company.

Cyclical, Seasonal and Other Factors Affecting the Company's Business

The Company's transactional financial printing service is affected by conditions in the world's capital markets. Sales and net income depend upon the volume of public financings, particularly equity offerings which are influenced by corporate funding needs, stock market fluctuations, prevailing interest rates, and general economic and political conditions. The corporate reporting revenue is seasonal as the greatest number of proxy statements and regulatory reports are required to be printed during the Company's first fiscal quarter ending March 31 and the early part of the

Company's second quarter ending June 30. Because of these cyclical and seasonal factors, coupled with the general need to complete certain printing jobs quickly after delivery of copy by the customers, the Company must maintain physical plant and customer service staff

Table of Contents

sufficient to meet maximum work loads. However, mutual fund printing, commercial printing and digital printing are not considered to be as cyclical or seasonal.

In the first quarter of the year, the globalization segment revenues are seasonally low due to the relatively high volume of consumer products that ship in the fourth quarter of any given year.

While the globalization segment and the previously discussed services of the financial printing segment are seasonal or cyclical, the Company's other business segments—outsourcing and Internet consulting—are less cyclical or seasonal.

Research and Development

The Company maintains a research and development capability to evaluate, on an ongoing basis, advances in computer software, hardware and peripherals, computer networking, telecommunications systems and Internet-related technologies as they relate to the Company's business and to develop and install enhancements to the Company's proprietary systems. Like its principal competitors, the Company utilizes a computerized typesetting and telecommunications system in the process of preparing documents. In order to serve the customers of its globalization and Internet services, the Company continually tests new programs and often works directly with its customers in the design and development of new software and other technological products.

Patents and Other Rights

The Company has no significant patents, licenses, franchises, concessions or similar rights other than certain trademarks. Except for a proprietary computer typesetting and telecommunication system, the Company does not have significant specialized machinery, facilities or contracts which are unavailable to other firms providing the same or similar services to customers. The Company has many trademarks and service marks worldwide, most of which are registered or pending registration. The most significant of these is the trademark and trade name Bowne. The Company owns the service marks Empowering Information and Empowering Your Information and trademarks BowneLink, FundSmith and Immersant.

Sales and Marketing

The Company employs approximately 360 sales people. In addition to soliciting business from existing and prospective customers, the sales people act as a liaison between the customer and those in charge of service operations. They also provide advice and assistance to customers. The Company regularly advertises in financial newspapers and trade publications and conducts sales promotion by mail and by presentations at seminars and trade shows.

Customers and Backlog of Orders

The Company has no significant long-term contracts with its customers. During the fiscal year ended December 31, 2000, no customer accounted for 10% or more of the Company's sales. However, one customer,

Microsoft, is significant to the globalization segment. The Company has no backlog, within the common meaning of that term, which is normal throughout the service offerings in which the Company is focused. However, within its financial printing segment, the Company maintains a backlog of customers preparing for initial public offerings (IPOs). This IPO backlog is highly dependent on the capital markets.

Employees

At December 31, 2000, the Company had approximately 8,500 employees. Relations with the Company's employees are considered to be good. Less than three percent of the Company's employees are members of various unions. The Company provides pension, profit-sharing, certain insurance and other benefits to most non-union employees.

4

Table of Contents

Suppliers

The Company purchases various materials and services from a number of suppliers, of which the most important items are paper, computer hardware, copiers, software and peripherals, communication equipment and services, and electrical energy. The Company purchases paper from paper mills and from paper merchants. The Company has experienced no difficulty to date in obtaining an adequate supply of these materials and services. Alternate sources of supply are presently available. However, a severe paper or multi-market energy shortage could have an adverse effect upon many of the Company's operations.

Foreign Sales

The Company conducts foreign operations in Canada, Europe, Latin America, South America and Asia. In addition, the Company has affiliations with certain firms providing similar services abroad. Sales derived from foreign countries other than Canada were approximately 15% of the Company's total sales in 2000, 13% in 1999 and 11% in 1998. During 2000, 1999 and 1998 sales derived from foreign countries other than Canada totaled \$162, \$131 and \$96 million, respectively. The financial printing segment had \$109, \$87 and \$52 million in these years, respectively. The globalization segment had sales of \$52 million in 2000, and \$44 million each in 1999 and 1998. Canadian sales were approximately 6% of the Company's total sales in 2000, 7% in 1999, and 8% in 1998. During 2000, 1999, and 1998 sales derived from Canada totaled \$71, \$70, and \$70 million, respectively.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations
(In thousands, except per share information and where noted)

Cautionary Statement Concerning Forward Looking Statements

The Company desires to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995 (the "1995 Act"). The 1995 Act provides a "safe harbor" for forward-looking statements to encourage companies to provide information without fear of litigation so long as those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those projected.

Set forth below is a summary of factors the Company believes important and that could cause actual results to differ from the Company's expectations. The Company is publishing these factors pursuant to the 1995 Act. These factors should not be construed as exhaustive or as an admission regarding the adequacy of disclosure made by the Company prior to the effective date of the 1995 Act. Readers should understand that many factors govern whether any forward-looking statements can or will be achieved. Any one of those results could cause actual results to differ materially from those projected. The words "believe," "expect," "anticipate," "intend," "aim," "will" and similar words identify forward looking statements. The Company cautions readers that the following important factors, among others, could affect the Company's actual results and could cause the Company's actual results to differ materially from those expressed either orally or in writing in any forward-looking statements made by or on behalf of the Company:

Loss or retirement of key executives, employees or technical personnel.

The effect of changes within the Company's organization or in the compensation and benefit plans and the ability of the Company to attract and retain experienced and qualified management and sales personnel.

Natural events and acts of God such as earthquakes, fires or floods.

The ability of the Company to integrate the operations of acquisitions into its operations.

General economic or capital market conditions affecting the demand for transactional financial printing.

Liquidity and Capital Resources

The Company's financial position continues to reflect strong liquidity. On December 31, 2000, the Company had a working capital ratio of 1.74 to 1 and working capital of \$133,542. On December 31, 1999, the Company had a working capital ratio of 1.60 to 1 and working capital of \$115,749. The increase in working capital was primarily the result of cash generated from operations.

It is expected that the cash generated from operations, working capital and the Company's borrowing capacity will be sufficient to finance future acquisitions and capital expenditures, provide for the payment of dividends, provide for the stock repurchase program, and meet the debt service requirements. The Company experiences certain seasonal factors with respect to its borrowing needs; the heaviest period for borrowing is normally the second quarter. The Company's existing borrowing capacity provides for this seasonal increase.

At December 31, 2000, capital commitments primarily consisted of the remaining balance to be expended on the Company's expansion of their New Jersey production facilities of approximately \$3 million. It is expected that cash generated from operations, working capital and the Company's borrowing capacity will be sufficient to finance these capital commitments, as well as our 2001 capital expenditures program. Over the last several years, the Company has had capital expenditures ranging from \$40 million to \$50 million; 2001 capital expenditures are also anticipated to be within that scope.

Table of Contents

Cash Flows

The Company had net cash provided by operating activities of \$56,652, \$96,770, and \$101,916 for the years ended December 31, 2000, 1999 and 1998, respectively. The decrease in 2000 reflects the impact of a lower net income of approximately \$21 million, an increase in prepaid expenses and other current assets during 2000 as opposed to a decrease during 1999 (accounting for a change of approximately \$22 million), and a decrease in accounts payable during 2000 as opposed to an increase in that category during 1999 (accounting for a change of approximately \$21 million). The increase in prepaid expenses and other current assets results from a net overpayment of estimated income taxes and equipment deposits awaiting reimbursement under the master lease agreement at December 31, 2000. The lower level of accounts payable results from the decreased sales in the fourth quarter of 2000 when compared to 1999. These are offset by a decrease in accounts receivable (net) during 2000 as opposed to an increase during 1999 (accounting for a change of approximately \$27 million). The decrease in accounts receivable at December 31, 2000 from 1999 reflects lower sales volume in the fourth quarter of 2000. The decrease in 1999 from 1998 reflects the impact of a higher level of accounts receivable at year-end 1999 resulting from increased sales levels, partially offset by a decrease in prepaid expenses and an increase in accounts payable and accrued employee compensation.

Net cash used in investing activities was \$44,809, \$56,213, and \$166,390 for the years ended December 31, 2000, 1999 and 1998, respectively. The decrease in 2000 was primarily a result of decreased capital expenditures, as well as the proceeds recognized from the sale of a subsidiary (see Note 2). The decrease in 1999 was primarily as a result of 1998 acquisitions (in excess of 1999 by approximately \$115,000).

Net cash (used in) provided by financing activities was \$(11,999), \$(33,900), and \$47,629 for the years ended December 31, 2000, 1999 and 1998, respectively. The change in 2000 is a result of higher net borrowings resulting from a lower level of cash provided by operations, partially offset by decreased cash used in investing activities. The change in 1999 was a result of the higher net repayments of debt in 1999, and the fact that higher proceeds from borrowings in 1998 were necessary to finance the Company's acquisitions.

During the year ended December 31, 2000, the Company used approximately \$43 million dollars to repurchase shares of its common stock, in accordance with the Board of Directors authorization of the Company's stock repurchase program. These funds were provided through net borrowings during 2000.

Foreign Exchange

The Company derives a portion of its revenues from various foreign sources. The Company has not experienced significant gains or losses as a result of fluctuations in the exchange rates of the related foreign currencies, primarily denominated in euros, pound sterling and Canadian dollars. To date, the Company has not used foreign currency hedging instruments to reduce its exposure to foreign exchange fluctuations. The Company has a net translation loss of \$4,311 in its accumulated comprehensive income section of the Stockholder's Equity statement for the year 2000. This loss is primarily attributed to the fluctuation in value between the US dollar and the euro, pound sterling and Canadian dollar.

Prospective Accounting Pronouncements

Statement of Financial Accounting Standards No. 133 (SFAS 133), Accounting for Derivative Instruments and Hedging Activities, was issued in June 1998. SFAS 133 standardized the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, by requiring recognition of those instruments as assets and liabilities and to measure them at fair value. SFAS 133 was subsequently amended by Statement of Financial Accounting Standards No. 137 (SFAS 137), Accounting for Derivative Instruments and Hedging Activities

Deferral of the Effective Date of Financial Accounting Standards Board (FASB) Statement 133, and will now be effective for fiscal years beginning after June 15, 2000. SFAS 133 will therefore be effective for the Company in the year 2001. The adoption of this pronouncement is not expected to have a material effect on the Company's consolidated financial statements.

Table of Contents

In June, 2000, the FASB issued Statement of Financial Accounting Standards No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities*, which amends SFAS 133 and is to be adopted concurrently with SFAS 133. The new statement addresses a limited number of issues causing implementation difficulties for a large number of entities getting ready to apply SFAS 133. The adoption of this pronouncement is not expected to have a material effect on the Company's consolidated financial statements.

Impact of the Euro Conversion

On January 1, 1999, certain member countries of the European Union established fixed conversion rates between their existing sovereign currencies (legacy currencies) and a single currency called the euro. The legacy currencies are scheduled to remain legal tender as denominations of the euro during the transition period from January 1, 1999 to January 1, 2002. Beginning January 1, 2002, euro-denominated bills and coins will be introduced, and by July 1, 2002, legacy currencies will no longer be legal tender.

The Company has implemented a global financial software solution as part of its overall strategy to standardize and improve its financial reporting systems globally. This system has the capability of being able to report, pay, and receive currencies using the euro as its functional currency. The costs associated with the euro conversion are anticipated to be minimal since this functionality is part of the existing system. Thus, the cost of conversion should not have a material effect on the Company.

Results of Operations

Historically, the Company has primarily provided financial printing and other related services. Revenues related to transactional financial printing services are affected by the cyclical nature of the capital markets. Over the past few years the Company has expanded its service offerings.

The Company decided to focus its business on empowering information to become a global market leader in this field by combining superior customer service with appropriate new technologies to manage, repurpose and distribute a client's information to any audience, through any medium, in any language, anywhere in the world. The Company is investing in building its resources outside the United States to enable it to provide worldwide information empowerment solutions to its global clients. While the Company is expanding and integrating these services inside and outside the United States, the newer information solution operations are anticipated to operate at a loss. We expect to continue to invest outside the United States as the Company builds the information solution offerings.

Management evaluates the performance of its operating segments separately to monitor the different factors affecting financial results. In addition to measures of operating performance determined in accordance with generally accepted accounting principles, management also uses EBITDA and EBITA to evaluate performance. EBITDA is defined as earnings before interest, income taxes, depreciation and amortization expense. EBITA is defined as earnings before interest, income taxes and amortization expense. Other income and expense and one-time charges are components of EBITDA and EBITA that are generally not used by management to monitor the operating results of a segment. EBITDA and EBITA are measured because management believes that such information is useful in

evaluating the results of certain segments relative to other entities which operate within these industries and to its affiliated segments. EBITDA and EBITA are alternatives to and not a replacement measure of operating performance as determined in accordance with generally accepted accounting principles.

Consistent with its focus on expanding various service offerings to clients and empowering information, the Company made a number of acquisitions in 1998 in the outsourcing, globalization and Internet consulting and development business segments. These acquisitions, along with the resources allocated to integrate these services, had an impact on the results of operations during 2000 and 1999. Revenues (as a percentage of the total Company's revenues) relating to the financial printing segment represent 76% in 2000, compared to 77% and 82% in 1999 and 1998, respectively.

Table of Contents

Year ended December 31, 2000 compared to Year ended December 31, 1999

Financial Printing

Sales increased \$60,626, or 8% for the year ended December 31, 2000. The largest class of service in this segment, transactional financial, grew 4% or \$15,982 to \$441,330 in 2000 sales. During the first six months of the year, this service experienced revenue growth of 22% over the same period in the prior year. Most of the growth is attributed to the robust domestic capital markets during the first four months of the year. Conversely, during the second half of the year this service offering decreased 9% compared to the same period in the prior year. We believe this is consistent with the overall contraction in the market. The international capital markets sustained growth over the entire year and is the primary reason that our international (overseas) revenues, which grew at a 25% rate, grew at a faster rate than our overall revenue growth rate for the segment. We believe that our share of the international transactional financial printing market has grown.

The domestic capital market has experienced a significant reduction in the number of transactions being successfully completed. In particular, the market for initial public offerings has severely constricted. While we continue to maintain our share of this market, the reduced activity has impacted our revenues particularly in the last six months of 2000. While the market may not necessarily return to its previous level, we don't believe this decline is permanent; however it is expected to continue into 2001. The resources that the Company commits to the transactional financial market are significant and management continues to balance our resources with these market conditions. During the fourth quarter, the Company responded to the lower levels of activity in the capital markets by reducing its staffing and other operating expenses. A restructuring charge of \$2,106 was incurred to implement this program.

Mutual fund services and digital printing sales increased by \$27,508 over the prior year as these groups grew 19% over 1999 for a 2000 total of \$173,484. These services continue to be the fastest growing service offerings in the financial printing segment. These services are important because they provide a more stable volume of work than transactional financial and we expect these services to be less cyclical. Most of the work performed for clients in these markets is driven by long term partnerships and supported by contract. While the market for mutual fund printing is relatively stable and mature, the market for our digital services is growing significantly. In the mutual fund market, we continue to build our share of the business while in the digital market, the Company is participating in a growing market.

Commercial printing revenues increased by \$19,529 or 31% over the prior year as a result of the Company's efforts to maintain pressroom utilization.

Gross margin contributed by this segment increased by \$10,614 while the margin percentage slid two percentage points to 43%. The margins in the transactional financial service were negatively impacted by inconsistent resource utilization due to the volatility of the capital markets. In particular, our utilization declined as the domestic capital markets experienced a significant slowdown during the second half of the year. In addition, the faster growing services of mutual fund and digital printing contributed at a lower marginal rate. The gross margin percentage of mutual fund services remained consistent while digital printing gross margin percentage improved as a result of higher utilization of its productive capacity.

Selling and administrative expenses increased \$11,876, or 5%, to \$242,988; however, as a percent of sales, these expenses decreased by approximately one percentage point to 29%. The increase was primarily due to costs directly related to increased sales, such as selling expenses (including commissions) and certain variable administrative expenses. Administrative expenses that are not tied to sales volume decreased as a result of our cost containment programs implemented throughout the second half of the year.

EBITDA before the restructuring charge of \$2,106 decreased \$1,262 to \$120,450 as a result of the foregoing.

Outsourcing

Sales increased \$31,793, or 20% for the year ended December 31, 2000. A number of significant new clients were contracted with during 2000. We continue to increase our share of our target market, the

Table of Contents

professional services industry, including law firms, investment banks and consulting firms. Within existing customers, we benefited from increased volumes in unit-driven services.

Gross margin from this segment increased \$3,583 while the margin percentage decreased by approximately two percentage points to 19%. The decrease in margin percentage is attributed in part to contract renewals at lower margin levels due to competitive pricing pressure during the latter part of 1999.

Selling and administrative expenses increased \$2,229 or 9%, but as a percent of sales actually decreased one percentage point, from 16% of sales in 1999 to 15% of sales in 2000. Administrative expenses grew during 2000 as we focused on developing our product offerings in higher value services such as desktop publishing, litigation support and information technology services. This investment is expensed as incurred but is expected to result in overall higher margins as the Company successfully markets these services to both new and existing customers.

EBITDA increased \$1,354 to \$8,969 as a result of the foregoing.

Globalization

Sales increased by \$10,043, or 17% from 1999. Our globalization segment provides two primary services, software localization and web site content management. Our revenue growth in this market was consistent throughout the year except in the first quarter due to two factors: this is typically a seasonally slow quarter, and a large project was delayed by a customer. The content management service focuses on customers who require an ongoing localization of new content for their web-site. The globalization market appears to be growing significantly, and the Company is successfully winning a share of this growth.

Gross margin increased 35% or \$5,248 to \$20,251, while the margin percentage increased by three percentage points from 1999 to 29%. This was achieved by the streamlining of certain processes, improving our resource utilization and focusing on our more profitable services and customer contracts.

Selling and administrative expenses increased \$2,343; however, as a percent of sales, these expenses decreased by approximately one percentage point to 32%.

As a result of the foregoing, the EBITDA loss for the segment decreased \$2,904 to a loss of \$1,508.

Internet Consulting and Development

Sales increased by \$3,907, or 31% from 1999. In the first nine months of the year, this segment experienced revenue growth of \$3,799 or 39%. The rapid growth of demand for Internet consulting slowed during the third quarter as customers became more deliberate with their spending and the sales cycle lengthened. This slowdown continued throughout the fourth quarter of 2000.

Gross margin was \$2,227, an increase of \$1,028 from the prior year, while gross margin percentage increased by approximately four percentage points from 10% in the prior year to 14% in 2000.

Selling and administrative expenses increased by \$8,712 to \$23,841. The increase in expense is related to our investment in production management systems, integration and repositioning costs related to our restructuring of this unit, and costs related to the increase in sales.

The EBITDA loss before restructuring and impairment charges of \$17,094 increased by \$7,684 to \$21,614 in 2000 primarily as a result of the increase in selling and administrative expenses.

In response to decreased activity in this market, management determined that a reduction in its staffing and related office closings were required. In addition, the carrying value of its intangible assets was deemed impaired. As outlined below, the Company incurred an impairment charge related to its goodwill.

Other, including Restructuring and Impairment Charges

In the fourth quarter of 2000, the Company recorded \$19,200 in pre-tax restructuring and goodwill impairment charges in connection with the Company's plans to align its cost structure with customer demand,

Table of Contents

as well as combining the operations of the content business unit of the globalization segment with those of the Internet consulting and development segment. The charges included an impairment charge of \$13,660 to goodwill and other intangibles of the Internet consulting and development segment recorded in connection with certain of the Company's acquisitions, based on an evaluation of the recoverability of carrying amounts. During this quarter, conditions were identified by the Company which necessitated this impairment assessment for these assets. Among these conditions, the significant deterioration of the market value of our publicly traded competitors is noted. The estimated fair value of these assets was evaluated using the market value method. The remaining carrying value of the intangible assets of the Internet segment is approximately \$10 million. Management will continue to evaluate and monitor this carrying value as this business is repositioned with the globalization segment, as previously discussed.

The restructuring charges totaled \$5,540 with the Internet segment recognizing \$3,434 and the financial printing segment recognizing \$2,106. The restructuring included a reduction in workforce of approximately 100 employees in the Internet consulting and development business and approximately 200 in the financial print group. The restructuring also included the closing of two of Immersant's offices, including write-downs of property and equipment. These reductions in fixed and variable costs are expected to lead to cost savings in excess of \$20 million in 2001.

Summary

As a result of the foregoing, overall sales increased by 10% to \$1,113,536, an increase of \$102,746. Most of the increase was related to the financial printing and outsourcing segments. The increase in sales contributed to a \$20,473 growth in gross margin. However, the gross margin percentage decreased by two percentage points to 38%, primarily as a result of our lower margins in the financial print and outsourcing segments.

Selling and administrative expenses increased \$25,161 to \$316,298. The increase was due to costs related to increased sales. As a percentage of total sales, these expenses were reduced by one percentage point to 28%.

Depreciation and amortization expense increased \$2,802, or approximately 5%, principally resulting from the expansion of facilities, the acquisition of equipment and additional investments in technology.

There were \$19,200 in restructuring and impairment charges in 2000, as previously explained.

Operating income was \$31,818 for 2000, compared with \$58,508 in 1999, a decrease of \$26,690 primarily related to the restructuring and impairment charges.

Interest expense increased by \$972, a 15% increase, resulting primarily from higher interest rates in the current year.

Other expense (net) was \$1,531, as compared to other income (net) of \$1,010 in the prior year primarily due to an accrual in connection with a matter in litigation.

The effective overall income tax rate increased from 48% to 70% because the Company incurred a non-deductible goodwill impairment charge and the other permanent differences remained constant while growing as a percentage of the decreased pre-tax income from 1999 to 2000.

As a result of the foregoing, net income was \$7,008 compared to \$27,813 for the same period last year, a decrease of \$20,805.

Year ended December 31, 1999 compared to Year ended December 31, 1998

Financial Printing

Sales increased \$84,718, or 12% for the year ended December 31, 1999. The largest class of service in this segment, transactional financial, grew 21% or \$73,095 to \$425,348 in 1999 sales. Mutual fund services and digital printing sales increased by \$32,180 over the prior year as these groups grew 28% over 1998 for a 1999 total of \$145,976. Corporate reporting revenues grew at a slower rate than the segment as a whole, and commercial printing revenues decreased.

Table of Contents

Gross margin contributed by this segment increased by \$23,309 while the margin percentage slid two percentage points to 45%. The margins in the transactional financial service remained constant while the faster growing services of mutual fund and digital contributed at a lower marginal rate. The gross margin of mutual fund services grew in proportion to its growth in sales. Digital printing gross margin was negatively impacted by increases in costs as its productive capacity was expanded to meet growing customer demand.

Selling and administrative expenses increased \$38,772, or 20%, to \$231,112. The increase was primarily due to costs directly related to increased sales, such as selling expenses including commissions and certain administrative expenses. Administrative expenses also increased as a result of our Year 2000 program, marketing campaign, training, research and development and staffing increases.

The digital printing unit experienced an increase in selling and administrative expenses due to its growth in sales and the expenses related to the establishment of its production facility. Prior to October 1999, the Company relied on vendors to complete the production of documents.

EBITDA decreased \$15,463 to \$121,712 as a result of the foregoing.

Outsourcing

Sales increased \$78,209, or 95%. This was primarily the result of having the full year impact of the DESI acquisition in 1999. The DESI acquisition was completed on July 1, 1998. Sales increased 22% in the second half of 1999 compared with the second half of 1998.

Gross margin from this segment increased \$16,822 while the margin percentage increased by one percentage point to 21%. The increase in gross margin is attributed to the increase in sales.

Selling and administrative expenses increased \$2,689 or 12%, but as a percent of sales actually decreased 12 percentage points, from 28% of sales in 1998 to 16% of sales in 1999. This is a result of the better leveraging of certain selling and administrative expenses by integrating the DESI acquisition with the Company's own outsourcing business.

This segment achieved positive EBITDA of \$7,615 in 1999, an increase of \$14,133 over the prior year's EBITDA loss.

Globalization

Sales increased by \$3,300, or 6% from 1998. Management focused on improving gross margin during 1999; therefore the increase in revenue was smaller than prior periods.

Gross margin increased 33% or \$3,738 to \$15,003, while the margin percentage increased by over five percentage points from 1998 to 26%. This was achieved by the streamlining of certain processes and focusing on our more profitable services.

Selling and administrative expenses decreased \$2,968 and decreased seven percentage points as a percent of sales. This is mainly due to staffing reductions.

As a result of the foregoing, the EBITDA loss for the segment decreased \$6,706 to a loss of \$4,412.

Internet Consulting and Development

Sales decreased by \$1,994, or 14% from 1998. Sales volume was affected as attention was taken away from sales and marketing and directed toward integration efforts and strengthening the senior management team.

Gross margin was \$1,199, a decrease of \$1,359 from the prior year, while gross margin percentage decreased by almost nine percentage points from 19% in the prior year to 10% in 1999.

Selling and administrative expenses increased by \$1,011, or seven percentage points over the prior year. The increase in expense is related to investment in network integration, training and fixed overhead costs.

Table of Contents

Recruiting costs were also significant in comparison to the prior year as a result of staff turnover and putting senior management in place.

The EBITDA loss increased by \$2,371 to \$13,930 in 1999 primarily as a result of the decrease in gross margin and the increase in selling and administrative expenses.

Summary

As a result of the foregoing, overall sales increased by 19% to \$1,010,790, an overall increase of \$163,224. Most of the increase was related to the financial printing and outsourcing segments. The overall increase in sales contributed to a \$42,510 growth in gross margin. However, the gross margin percentage on an overall basis went down by two percentage points to 40%, since a greater percentage of overall sales was related to lower margin products as explained above.

Selling and administrative expenses increased \$39,505 to \$291,137. The increase was due to costs related to increased sales and other increases explained above. As a percentage of total sales, these expenses were reduced by one percentage point to 29%.

Depreciation expense increased 20% to \$41,104, principally resulting from the expansion of facilities, depreciation related to the new businesses (primarily DESI), and the acquisition of equipment, including computer systems.

Amortization increased 51% to \$11,373, principally resulting from having the DESI acquisition included in results for the full year of 1999 and the full year impact of the shorter amortization period for the Globalization segment.

There was no purchased in-process research and development or other one-time charges in 1999 as compared to \$9,025 in 1998. The 1998 results included \$7,200 for purchased in-process research and development (primarily related to the DESI acquisition), and \$1,825 relating to the write-off of goodwill and certain assets related to Linguistix, Inc.

Operating income was \$58,508 for fiscal 1999, which was flat when compared to \$57,029 for fiscal 1998.

Interest expense increased by \$790, a 14% increase, primarily from borrowings under the revolving credit agreement to finance certain prior year acquisitions.

Other income decreased by \$1,868 due to decreased interest income and lower gains on the sales of marketable securities and other assets.

The effective overall income tax rate decreased from 50% to 48% because the Company did not have any research and development charges in 1999. The effective income tax rate on pre-tax income before charges for purchased in-process research and development and amortization of intangibles was 39% in each year.

As a result of the foregoing, net income was \$27,813 compared to \$27,127 for the same period last year, an increase of \$686.

Item 7A: Market Risk Exposure

The Company's market risk is principally associated with trends in the domestic and international capital markets, particularly in the financial print segment and to a limited degree, in the outsourcing segment. This includes trends in the initial public offerings market, an important component of the financial printing segment. The Company also has market risk tied to interest rate fluctuations related to its debt obligations and fluctuations in foreign currency.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders

Bowne & Co., Inc.:

We have audited the accompanying consolidated balance sheets of Bowne & Co., Inc. and subsidiaries as of December 31, 2000, and 1999 and the related consolidated statements of income, stockholders' equity, and cash flows for each of the years in the three year period ended December 31, 2000. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Bowne & Co., Inc. and subsidiaries as of December 31, 2000 and 1999, and the results of their operations and their cash flows for each of the years in the three year period ended December 31, 2000 in conformity with accounting principles generally accepted in the United States of America.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES

(In thousands, except per share information and where noted)

Note 1 Summary of Accounting Policies

A summary of the Company's significant accounting policies followed in the preparation of the accompanying financial statements is set forth below:

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All of the significant intercompany accounts and transactions are eliminated in consolidation.

Revenue Recognition

For substantially all services, revenues are recognized when products or services are delivered to customers or completed. Revenues for the Internet segment are recognized as services are rendered or as our fees are collected when there is uncertainty as to the customers' ability to pay.

Inventories

Inventories are valued at the lower of cost or market. Cost is determined by using purchase cost (first-in, first-out method) for materials and standard costs for labor, which approximate actual costs, for work-in-process.

Property, Plant and Equipment

Property, plant and equipment are carried at cost. Maintenance and repairs are expensed as incurred. Depreciation for financial statement purposes is provided on the straight-line method. The following table summarizes the

components of property, plant and equipment:

	December 31,	
	2000	1999
Land and buildings	\$78,767	\$77,256
Machinery and plant equipment		
85,494 85,751		
Computer equipment and software		
133,923 115,204		
Furniture, fixtures and vehicles		
41,426 40,236		
Leasehold improvements		
55,264 47,603		
<hr/>		
394,874 366,050		
Less accumulated depreciation		
(222,936) (192,757)		
<hr/>		
Net		
\$171,938 \$173,293		
<hr/>		
<hr/>		

Estimated lives used in the calculation of depreciation for financial statement purposes are:

Buildings	10-40 years
Machinery and plant equipment	3-12 1/2 years
Computer equipment and software	1-5 years
Furniture and fixtures	3-12 1/2 years
Vehicles	3-5 years
Leasehold improvements	Shorter of useful life or term of lease

The Company follows American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) No. 98-1, Accounting for the Costs of Computer Software Developed or Obtained for

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

Internal Use. SOP No. 98-1 requires certain costs in connection with developing or obtaining internally used software to be capitalized that previously would have been expensed as incurred. Capitalized software totaled approximately \$13 million in both 2000 and 1999 and \$8 million in 1998 related to software development costs pertaining to improvements in the financial printing business typesetting, pricing, and billing systems, as well as the development of a workflow system for its localization business and the installation of a financial reporting system.

Intangible Assets

Intangible assets acquired in business combinations accounted for by the purchase method of accounting are capitalized and amortized over their expected useful life as a noncash charge against future results of operations.

The Company amortizes goodwill using the straight-line method over forty years for its printing acquisitions, thirty years for its outsourcing acquisitions, and twenty-five years for its globalization acquisitions. Through the end of 2000, fifteen years was used by the Company for its Internet solutions acquisitions; however, in connection with the Company's assessment of this business and goodwill, the amortization period was revised to five years. This revised period will be applied prospectively, and will result in an increase in goodwill amortization expense of approximately \$300 after giving effect to the goodwill impairment charge. Noncompete agreements are amortized over the life of the agreement, which is three to five years. The realizability of goodwill and other intangibles is evaluated periodically to determine the recoverability of carrying amounts. During the fourth quarter of 2000, the Company determined that goodwill at its Internet solutions segment was impaired and provided for an impairment charge of \$13,660 (see Note 16). The evaluation, based on various analyses including cash flow and profitability projections, addresses the impact on the existing Company business. The evaluation necessarily involves significant management judgment.

Stock-Based Compensation

The Company adopted SFAS No. 123, Accounting for Stock-Based Compensation, which permits entities to continue to apply the provisions of APB Opinion No. 25 and provide pro forma net income and pro forma earnings per share disclosures for employee stock option grants made in 1995 and future years as if the fair-value-based method, as defined in SFAS No. 123, had been applied. The Company has elected to continue to apply provisions of APB Opinion No. 25 and provide the pro forma disclosure required by SFAS No. 123. See Note 8.

Income Taxes

The Company uses the liability method to account for income taxes. Under the liability method, deferred income taxes reflect tax carryforwards and the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial statement and income tax purposes, as determined under enacted tax laws and rates.

United States income tax has not been provided on the unremitted earnings of the Company's foreign operations since the Company intends to continue to reinvest its undistributed foreign earnings to expand its foreign operations. In addition, applicable foreign taxes have been provided and credits for foreign income taxes will be available to significantly reduce any U.S. tax liability if foreign earnings are remitted. At December 31, 2000, the cumulative amount of undistributed foreign earnings was approximately \$68 million.

Net Income Per Share

The Company applies FASB Statement 128 Earnings per Share. Net income is calculated for *basic* earnings per share based on the average number of shares outstanding and for *diluted* earnings per share as

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

adjusted for the assumed conversion of all potentially dilutive securities. All earnings per share amounts for all periods have been presented, and where appropriate, restated to conform to the Statement 128 requirements.

The following table sets forth the basic and diluted average share amounts, adjusted for the August, 1998 2-for-1 stock split:

	Year Ended December 31,		
	2000	1999	1998
Average shares outstanding - basic shares	34,577,126	36,837,063	36,655,821

<hr/>			
<hr/>			
<hr/>			
Average shares outstanding - diluted shares			
35,348,382 37,641,838 37,624,729			
<hr/>			
<hr/>			
<hr/>			

Foreign Currency Translation

Financial statements of international subsidiaries are translated into U.S. dollars using the exchange rate at each balance sheet date for assets and liabilities and a weighted-average exchange rate for each period of revenues, expenses, gains and losses. Where the local currency is the functional currency, translation adjustments are recorded as a separate component of stockholders' equity and comprehensive income. Where the U.S. dollar is the functional currency, translation adjustments are recorded in income.

Fair Value of Financial Instruments

The Company defines the fair value of a financial instrument as the amount at which the instrument could be exchanged in a current transaction between willing parties. The carrying value of cash and cash equivalents, accounts receivable and accounts payable approximates the fair value because of the short maturity of those instruments. The carrying amounts of notes payable (see Note 10) approximates the fair value since these debt instruments have variable interest rates similar to those that are currently available to the Company.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results can differ from those estimates.

Comprehensive Income

The Company applies FASB Statement No. 130, Reporting Comprehensive Income. This statement establishes standards for the reporting and display of comprehensive income, requiring its components to be reported in a financial statement that is displayed with the same prominence as other financial statements.

Segment Information

The Company applies FASB Statement No. 131, Disclosures about Segments of an Enterprise and Related Information, which requires the Company to report information about its operating segments according to the management approach for determining reportable segments. This approach is based on the way management organizes segments within a company for making operating decisions and assessing performance. FAS No. 131 also establishes standards for supplemental disclosure about products and services, geographical areas and major customers. Segment results have been reported for the years presented and are described in Note 15.

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

Recent Accounting Pronouncements

Statement of Financial Accounting Standards No. 133 (SFAS 133), Accounting for Derivative Instruments and Hedging Activities, was issued in June 1998. SFAS 133 standardized the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, by requiring recognition of those instruments as assets and liabilities and to measure them at fair value. SFAS 133 was subsequently amended by Statement of Financial Accounting Standards No. 137 (SFAS 137), Accounting for Derivative Instruments and Hedging Activities Deferral of the Effective Date of FASB Statement 133 , and will now be effective for fiscal years beginning after June 15, 2000. SFAS 133 will therefore be effective for the Company in the year 2001. The adoption of this pronouncement is not expected to have a material effect on the Company's consolidated financial statements.

In June 2000, the FASB issued Statement of Financial Accounting Standards No. 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities , which amends SFAS 133 and is to be adopted concurrently with SFAS 133. The new statement addresses a limited number of issues causing implementation difficulties for a

large number of entities getting ready to apply SFAS 133. The adoption of this pronouncement is not expected to have a material effect on the Company's consolidated financial statements.

In December, 1999, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) 101, Revenue Recognition in Financial Statements, which provides guidance related to revenue recognition based on interpretations and practices followed by the SEC. SAB 101, as amended by SAB101A and SAB101B, was effective for the Company's fourth quarter of 2000. It requires companies to report any changes in revenue recognition as a cumulative change in accounting principles at the time of implementation in accordance with Accounting Principles Board Opinion 20, Accounting Changes. The Company has adopted SAB101 effective for the fourth quarter of 2000 and it has not had a material impact on the Company's consolidated financial position or results of operations, nor did it result in the Company reporting a change in accounting principles from its application.

On March 31, 2000 the FASB issued interpretation No. 44, Accounting for Certain Transactions involving Stock Compensation an interpretation of APB Opinion No. 25 (FIN 44). FIN 44 generally applies prospectively to new awards, exchanges of awards in a business combination, modifications to outstanding awards, and changes in grantee status that occur on or after July 1, 2000, except for the provision related to repricings and the definition of an employee which apply to awards issued after December 15, 1998. To the extent that events covered by FIN 44 occur after the applicable date but prior to July 1, 2000, the effects of applying FIN 44 shall be recognized on a prospective basis. Accordingly, no adjustments were to be made upon initial application of Fin 44 to financial statements for periods prior to July 1, 2000. Effective July 1, 2000, the Company adopted FIN 44 and it has not had a material impact on the Company's consolidated financial position or results of operations.

Note 2 Acquisitions

The Company made certain acquisitions, as follows:

During the first quarter of 1998, the Company acquired 80% of Quadravision Communications Limited and 100% of Sitewerks, Inc. (Internet segment). The total purchase price of these two companies, including related acquisition costs, approximated \$13,300, of which goodwill and other intangible assets were approximately \$11,400. In addition, the Company and the selling shareholders entered into noncompete agreements totaling \$6,000. During the second quarter of 1999, the Company recorded approximately \$3,000 as goodwill in connection with the purchase of the remaining 20% of Quadravision.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

During the second and third quarters of 1998, the Company acquired several globalization companies. The total purchase price of these companies, including related acquisition costs, approximated \$4,546, of which goodwill and other intangible assets were approximately \$3,200.

Also during the second quarter of 1998, the Company acquired 86.5% of Mountain Lake Software Corporation and the assets of Open Sesame, formerly a division of Charles River Analytics, Inc., now part of the Company's Internet segment. The total purchase price for these two companies, including related acquisition costs, approximated \$12,900. Goodwill and other intangible assets, including noncompete agreements were approximately \$12,800. The noncompete agreements are paid in equal annual installments over a period of three to five years. The remaining

13.5% of Mountain Lake Software Corporation was acquired during 2000 for \$1,269.

In July 1998, the Company acquired all of the outstanding shares of Donnelley Enterprise Solutions Incorporated (DESI), pursuant to a tender offer price of \$21 per share, aggregating to \$105 million. This acquisition added to the Company's outsourcing segment. Goodwill and other intangible assets were approximately \$95 million. DESI provides a comprehensive array of business outsourcing services, including document services, desktop publishing, and imaging services. The cost of this, and some of the other acquisitions, was financed through borrowings under the Company's revolving credit agreement. DESI's operations included the LANSystems division, which the Company sold in August 1998.

The following unaudited pro forma summary presents the consolidated results of operations of the Company as if the acquisition of DESI and the sale of LANSystems had occurred at the beginning of 1998 and does not purport to be indicative of what would have occurred had the acquisition been made as of that date:

	Year Ended December 31, 1998
	<hr/>
Total net sales	\$893,660
Net income	
\$18,324	
Net income per common share Basic	
\$.50	
	Diluted
\$.49	

During 1999, the Company acquired KAPA International, a Korean based company, for approximately \$1,200 to enhance the Company's global solutions services.

During 2000, the Company acquired Record Technologies, Inc. (RTI), a document imaging, database and consulting company that provides litigation imaging for leading law firms. It was acquired for approximately \$2.5 million and became part of the outsourcing segment. Goodwill was recorded in an amount approximately equal to the purchase price.

All of the acquisitions were accounted for using the purchase method of accounting and the results from these operations were included in the statements of income and cash flows after the date of acquisition. The Company recorded \$7,200 in 1998 of purchased in-process research and development as an operating expense. These amounts were recorded in connection with the DESI and Quadravision 1998 acquisitions.

Some of the Company's acquisitions provide for additional purchase payouts based on achieving certain earnings levels, which amounts will be included as goodwill in the period earned.

Note 3 Sale of a Subsidiary

During the first quarter of 2000, the Company sold the net assets of one of its divisions in the Internet segment for approximately \$5 million. The proceeds approximated the net book value of the assets, comprised primarily of goodwill and other intangible assets.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****BOWNE & CO., INC. AND SUBSIDIARIES (Continued)****Note 4 Cash and Cash Equivalents**

Cash equivalents of \$168 and \$4,483 at December 31, 2000 and 1999, respectively, are carried at cost, which approximates market, and include certificates of deposit and money market accounts, substantially all of which have maturities of three months or less when purchased.

Note 5 Marketable Securities

The Company classifies its investments in marketable equity securities as available-for-sale. Available-for-sale securities are carried at fair value, with the unrealized gains and losses, net of tax, reported as a separate component of stockholders' equity. The fair value of marketable securities exceeded cost by \$707 and \$6,563, at December 31, 2000 and 1999, respectively. Most of this reduction in unrealized gain came as a result of the Company's investment in EDGAR On-Line, whose market value at December 31, 2000 was lower than at December 31, 1999.

Note 6 Inventories

Inventories consist of the following:

	December 31,	
	2000	1999
Raw materials	\$8,966	\$8,065
Work-in-process		
23,594 21,726		
<hr/>		
\$32,560 \$29,791		
<hr/>		
<hr/>		

Note 7 Employee Benefit Plans*Pension Plans*

The Company sponsors a defined benefit pension plan which covers most of its United States employees not covered by union agreements. Benefits are based upon salary and years of service under the projected unit benefit method. The Company's policy is to fund each year's pension expense to the maximum allowable level. The Company also has an unfunded supplemental retirement program for certain management employees. Employees covered by union agreements are included in separate multi-employer pension plans to which the Company makes contributions. Plan benefit and net asset data for these multi-employer pension plans are not available. Also, certain non-union Canadian employees are covered by defined contribution retirement plans.

Pension costs, including the Supplementary Employee Retirement Plan, are summarized as follows:

	Year Ended December 31,		
	2000	1999	1998

<hr/>		

At December 31, 2000 and 1999, the projected net liability under the unfunded supplemental retirement program amounted to \$8,968 and \$7,401, respectively, which amounts are included in current and long-term liabilities for employee compensation and benefits. The plan contains covenants which prohibit retired participants from engaging in competition with the Company.

The discount rate used to calculate the projected benefit obligations was 7.75% for the years ended December 31, 2000 and 1999. The rate used to project future salary increases was 4.5% for the years ended December 31, 2000 and 1999. The expected long-term rate of return on plan assets was 9.5% for the years ended December 31, 2000 and 1999. The assets of the funded plan consist primarily of equity and fixed income securities.

Defined Contribution Plans

The Company and its domestic financial printing subsidiaries are participating in a qualified profit sharing plan covering most employees of those subsidiaries who are not covered by union agreements. Amounts charged to income for the Profit Sharing Plan were \$6,511, \$9,154, and \$9,596 for the years ended December 31, 2000, 1999 and 1998, respectively.

The remaining domestic subsidiaries participate in a qualified 401(k) Plan that is available to substantially all their non-union employees. Amounts charged to income for the 401(k) Plan were \$556, \$1,159, and \$559 for the years ended December 31, 2000, 1999 and 1998, respectively.

Under the Employees' Stock Purchase Plan, the Company and participating subsidiaries match 50% of amounts contributed (after-tax) by employees up to twelve hundred dollars per employee per year. All contributions are invested in the common stock of the Company. The plan acquired 464,800, 290,342, and 145,115 shares in the years ended December 31, 2000, 1999, and 1998 respectively, of the Company's common stock on the open market. At December 31, 2000 and 1999, the Stock Purchase Plan held 1,764,154 shares and 1,449,541 shares of the Company's common stock, respectively. Charges to income amounted to \$1,388, \$1,736 and \$1,433 for the years ended December 31, 2000, 1999, and 1998, respectively. The shares

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

held by the plan are considered outstanding in computing the Company's basic earnings per share, and dividends paid to the plan are charged to retained earnings.

Health Plan

The Company maintains a voluntary employee benefit health and welfare plan (Plan) covering substantially all of its employees. Until mid-1999, the Company used a VEBA (Voluntary Employees' Beneficiary Association) trust to fund its medical and related costs. During 1998, the Company reviewed the trust's funded status and determined that it had over-estimated plan funding requirements by approximately \$4 million (after-tax). The Company recognized such amount as income in the fourth quarter of 1998. The trust was liquidated during 1999. The Company now funds the

disbursements as incurred. At December 31, 2000 and 1999, accrued expense for Plan participants incurred but not reported claims was \$5,020 and \$3,675, respectively.

Note 8 Stock Option Plans

The Company has five stock option plans: a 1981 Plan, a 1992 Plan, a 1997 Plan, a 1999 Plan, and a 2000 Plan.

The 1981 Plan, which provided for the granting of options to purchase 2,800,000 shares (post-split) of the Company's common stock, expired December 15, 1991 except as to options then outstanding. The Company's 1992 and 1997 Stock Option Plans both provide for the granting of options to purchase 1,700,000 shares (each plan post-split) to officers and key employees at a price not less than the fair market value on the date each option is granted. The Company's 1999 Incentive Compensation Plan provides for the granting of options to purchase 3,450,000 shares to officers, key employees, non-employee directors, and others who provide substantial services to the Company, also at a price not less than the fair market value on the date each option is granted. Of these 3,450,000 shares reserved under the 1999 Plan, 300,000 may be issued as awards other than options and stock appreciation rights (SARs). The Company's 2000 Incentive Compensation Plan provides for the granting of options to purchase 3,000,000 shares to officers, key employees, non-employee directors, and others who provide substantial services to the Company, also at a price not less than the fair market value on the date each option is granted. Of these 3,000,000 shares reserved under the 2000 Plan, 300,000 may be issued as awards other than options and SARs.

All plans except the 2000 Plan permit grants of either Incentive Stock Options or Nonqualified Options. Options become exercisable as determined at the date of grant by a committee of the Board of Directors. Options expire ten years after the date of grant unless an earlier expiration date is set at the time of grant. The 1997 Plan permits the issuance of SARs, limited stock appreciation rights (LSARs) and awards that are valued in whole or in part on the fair value of the shares. SARs, LSARs and awards may be paid in shares, cash or combinations thereof. The 1999 Plan allows for those awards previously mentioned under the 1997 Plan, as well as restricted stock, deferred stock, stock granted as a bonus, dividend equivalent, performance award or annual incentive award. The 2000 Plan permits the issuance of Nonqualified Options, SARs, LSARs, restricted stock, deferred stock, stock granted as a bonus, dividend equivalent, other stock-based award or performance award. The Committee designated by the Board governs most of the parameters of the 1999 and 2000 Plans including exercise dates, expiration dates, and other awards.

In accordance with APB Opinion No. 25 and related interpretations, no compensation cost has been recognized for the Company's stock option plans. Had compensation cost been based upon the fair value at the

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

grant dates for all awards granted, the impact on net income and earnings per share during the years ended December 31, 2000, 1999 and 1998, would have been reduced on a pro forma basis as follows:

	Year Ended December 31,		
	2000	1999	1998
Net Income:			
As Reported			
\$7,008	\$27,813	\$27,127	
Pro Forma			
\$5,193	\$25,420	\$24,989	
Pro Forma Per Share:			
Basic			
\$.15	\$.69	\$.68	
Diluted			
\$.15	\$.68	\$.66	

In accordance with SFAS No. 123, the pro forma information excludes options granted prior to December 31, 1994. The grants issued during the year ended October 31, 1995 were issued on December 14, 1994. Since the compensation expense associated with the grants would have been recognized generally over a four year vesting period, the initial impact of applying Statement No. 123 on pro forma net income is not representative of the potential impact on pro forma net income in future years, when the pro forma effect would be fully reflected.

These pro forma amounts may not be representative of future disclosures since the estimated fair value of stock options is amortized to expense over the vesting period, and additional options may be granted in future years. The

fair value for these options was estimated at the date of grant using the Black-Scholes model with the following weighted-average assumptions:

	<u>2000 Grants</u>	<u>1999 Grants</u>	<u>1998 Grants</u>
Expected dividend yield	2.4%	1.8%	1.4%
Expected stock price volatility			
48.9% 51.5% 37.1%			
Risk-free interest rate			
5.3% 6.0% 4.7%			
Expected life of options			
5 years 5 years 5 years			
Weighted average fair value			
\$3.70 \$5.56 \$5.62			

Subsidiaries Option Plans

During 1999, the Company adopted the 1999 Stock Option Plans for Bowne Internet Solutions (BIS Plan) and BGS Companies, Inc. (BGS Plan), each of which is a wholly-owned subsidiary of the Company. The Plans provide for the granting of nonqualified stock options, incentive stock options and restricted stock units of the underlying subsidiary's stock to employees of the Company and its affiliates and advisors. Both Plans authorized the granting of three million options, which are to be granted at not less than the fair market value as of the date of grant and are for periods not to exceed ten years. During 2000, the Company adopted the 2000 Stock Option Plan for Bowne Internet Solutions. This Plan provides for the granting of incentive stock options and restricted stock units of Bowne Internet Solutions' stock to employees of the Company and its affiliates and advisors. This Plan authorized the granting of 2.6 million options, which are to be granted at not less than the fair market value as of the date of grant and are for periods not to exceed ten years.

The BGS Plan granted 1,684,400 stock options at an average exercise price of \$2.54 during 1999. No additional grants were made during 2000 from this Plan, and the options outstanding at December 31, 2000 under this Plan are 1,421,100. The 1999 BIS Plan granted 1,408,300 stock options at an average exercise price of \$2.67 during 1999. The 2000 BIS Plan granted 2,332,500 stock options at an average price of \$3.00 during 2000. The options outstanding under these two Plans at December 31, 2000 are 2,789,775. The options

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

generally vest over a four-year period; however, no options will become exercisable prior to the earlier of an initial public offering of the respective subsidiary, or January 26, 2002. Under certain circumstances, certain vested shares become eligible to be put back to the Company and the Company will have the right to buy such shares from the holders at an amount no greater than the then fair market value. No compensation expense has been recognized in either 2000 or 1999.

Deferred Stock Awards

In October 1996, the Company initiated a program for certain key executives, and in 1997 for directors, that provided for the conversion of a portion of their cash bonuses or directors' fees into deferred stock units. These units are convertible into the Company's common stock on a one-for-one basis, generally at the time of retirement or earlier under certain specific circumstances, and are included as shares outstanding in computing the Company's diluted earnings per share. The Company currently satisfies these liabilities with the issuance of stock, however, the Company may elect to satisfy these obligations in cash. At December 31, 2000 and 1999, there were 647,348 and 426,527 units outstanding, respectively.

Note 9 Income Taxes

The provision for income taxes is summarized as follows:

	Year Ended December 31,		
	2000	1999	1998
Current:			
U.S. federal			
\$9,704	\$18,285	\$23,090

\$16,025 \$25,423 \$27,288

Income taxes paid during the years ended December 31, 2000, 1999 and 1998 were \$24,148, \$14,032 and \$44,926, respectively.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

The provision for income taxes differed from the U.S. federal statutory rate for the following reasons:

	Year Ended December 31,		
	2000	1999	1998
Statutory tax rate	35.0%	35.0%	35.0%
Increase in tax resulting from:			
State and local taxes			
2.3 1.6 2.6			
Foreign taxes			
2.1 2.1 0.3			
Nondeductible items:			
Purchased in process research and development			
4.8			
Goodwill and other intangibles			
10.1 4.5 2.8			
Asset impairment charge			
13.7			
Other nondeductible items			
6.4 4.6 4.6			
Effective income tax rate			
69.6% 47.8% 50.1%			

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities and projected future taxable income in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods which the deferred tax assets are deductible, management believes it is more likely than not the Company will realize the benefits of these deductible differences. Significant components of the Company's deferred tax assets and liabilities at December 31, 2000 and 1999 are as follows:

	<u>2000</u>	<u>1999</u>
Noncurrent deferred tax assets (liabilities):		
Deferred compensation and benefits	\$15,207	\$13,800
Depreciation	(8,510)	(7,600)
Deferred taxes on intangibles, other than goodwill	(5,200)	(5,200)
Other	5,864	4,320
Valuation allowance	(900)	(900)
	<hr/>	<hr/>
	<hr/>	<hr/>
Total net noncurrent asset	\$6,461	\$4,420
	<hr/>	<hr/>
	<hr/>	<hr/>

The Company has, as of December 31, 2000, approximately \$110 million of state and local net operating losses estimated to expire in years 2006 through 2020, and approximately \$14 million of foreign net operating losses, some of which do not expire, and none of which are estimated to expire before 2003.

Note 10 Debt

In July 1997, the Company entered into an unsecured five-year revolving credit agreement (expiring in July 2002) for \$200,000 with a consortium of banks. The maximum available credit under the agreement was increased to \$300,000 in November 1998. Under the credit agreement, interest is charged at London Interbank Offered Rate

	Year Ended December 31,

Note 13 Commitments and contingencies*Lease commitments*

The Company and its subsidiaries occupy premises and utilize equipment under leases which are classified as operating leases and expire at various dates to 2020. Many of the leases provide for payment of certain expenses and contain renewal and purchase options.

One operating lease is for equipment funded through a master agreement administered by a commercial bank. At the expiration of the lease (April 2003), the Company has the right to purchase the equipment for a guaranteed residual value. As of December 31, 2000, the rental payments were based on the cost of the equipment plus LIBOR plus 35 basis points. The equipment under this lease as of December 31, 2000 has an aggregate residual value of approximately \$8.3 million, all of which is included below in the future minimum lease payment amounts. Equipment with an aggregate residual value of approximately \$8.7 million was added to this lease in January, 2001, and is also included below in the future minimum lease payment amounts.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****BOWNE & CO., INC. AND SUBSIDIARIES (Continued)**

As of January 2001, the Company has borrowed the maximum under the agreement, leasing equipment with an aggregate initial cost of approximately \$22 million. Beginning in January 2001, rental payments are based upon a rate of LIBOR plus 150 basis points.

Rent expense relating to premises and equipment amounted to \$42,181, \$33,129, and \$22,893 for the years ended December 31, 2000, 1999 and 1998, respectively. The minimum annual rental commitments under noncancelable leases as of December 31, 2000, are summarized as follows:

2001	\$37,636
2002	34,182
2003	43,731
2004	18,302
2005	7,826
2006-2020	51,030
<hr/>	
Total	\$192,707
<hr/>	

Contingencies

The Company is involved in certain litigation as part of its ordinary course of business and believes that the various asserted claims and litigation would not materially affect its financial position, operating results or cash flows.

Note 14 Stockholders Equity

The Company adopted a Stockholder Rights Plan that granted a Right to each Stockholder of record on February 10, 1997 and all shares issued thereafter to purchase 1/1000th of a share of the Preferred Stock for each share of common stock owned when certain events occur. When the Company reincorporated in Delaware in 1998, a new Rights Agreement dated June 19, 1998 was adopted in place of the earlier plan. This plan is triggered when certain events that involve the acquisition, tender offer or exchange of 20% or more of the Common Stock by a person or group of persons, without the approval of the Company's Board of Directors, occur. Prior to the event, the Rights will be linked to the underlying shares of the Common stock and may not be transferred by themselves.

In 1998, the Board of Directors approved a 2-for-1 stock split to Shareholders of record as of the close of business on August 14, 1998. The shares were distributed on August 26, 1998. Share and per share amounts for prior periods have been adjusted to reflect the stock split.

In January, 2000 the Board of Directors authorized the expenditure of up to \$40 million to repurchase shares of the Company's common stock, representing approximately 10% of the total shares outstanding at that time. Subject to applicable securities law, such purchases occur at times and in amounts that the Company deems appropriate. The shares will be available for general corporate purposes including acquisitions, the employee stock purchase plan and stock option plans. In August, 2000 the Board of Directors authorized an extension of the Company's stock repurchase program to acquire up to an additional \$20 million of outstanding common stock. During 2000, the Company purchased approximately 4 million shares, at an average price of \$10.63.

Note 15 Segment Information

The Company focus remains on Empowering Your Information, a term used to define the management, repurposing and distribution of a client's information. The Company manages and repurposes information for distribution by digital, Internet or paper media. It manages documents on the clients' site or at its own facilities.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

The Company's operations are classified into four reportable business segments: financial printing, outsourcing, globalization, and Internet consulting and development. The services of each segment are marketed throughout the world. The major services provided by each segment are as follows:

Financial Printing transactional financial, corporate reporting, mutual fund, commercial and digital printing.

Outsourcing document management solutions primarily for the legal and financial communities.

Globalization translation, localization and content reengineering of software and technology products.

Internet Consulting and Development integrated Internet applications primarily for the financial services sector.

Information as to the operations of each business segment is set forth below. Performance is evaluated based on several factors, of which the primary financial measure is business segment earnings before interest, income taxes, depreciation and amortization of intangible assets (EBITDA). The Company also uses earnings before interest, income taxes and amortization expenses (EBITA), as a measure of performance; therefore, this information is also presented. The Company manages income taxes on a global basis. Segment performance is evaluated exclusive of the disposal of business units, purchased in-process research and development and other charges, and other income. The accounting policies of the business segments are the same as those described in the summary of significant accounting policies.

Note 16 Restructuring and Asset Impairment Charges

In the fourth quarter of 2000, the Company recorded \$19,200 in pre-tax restructuring and asset impairment charges in connection with the Company's plans to align its cost structure with customer demand, as well as combining the operations of the content business unit of the globalization segment with those of the Internet consulting and development segment. The charges included a restructuring charge of \$5,540 and an impairment charge of \$13,660 related to the goodwill of the Internet consulting and development segment. The impairment charge was based on an evaluation of the recoverability of carrying amounts. The restructuring included a reduction in workforce of approximately 100 employees in the Internet consulting and development business, and approximately 200 in the financial print group. The restructuring also included the closing of two of Immersant's offices, including write-downs of property and equipment.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

BOWNE & CO., INC. AND SUBSIDIARIES (Continued)

Pre-tax restructuring charges include a write-down of property and equipment of \$2,007. The remaining \$3,533 in expense is summarized below:

	<u>2000 Expense</u>	<u>Paid in 2000</u>	<u>December 31, 2000 Balance</u>
Severance and personnel-related costs	\$2,608	\$597	\$2,011
Occupancy costs			
770 8 762			
Other			
155 35 120			
<hr/>			
<hr/>			
<hr/>			
\$3,533 \$640 \$2,893			

Severance and personnel-related costs include severance and other benefits paid to terminated employees. The amounts include employees who received notice or had otherwise been identified prior to December 31, 2000. Occupancy costs represent facility exit costs associated with the closing of the Immersant offices. The remaining liability of \$2,893 is expected to be paid prior to June 30, 2001.
