INVESTMENT OBJECTIVES & STRATEGY

The Chartwell Dividend and Income Fund's [the "Fund"] primary investment objective is to seek high current income. Capital appreciation is a secondary objective. The Fund will seek to achieve its objectives by investing, under normal circumstances, at least 50% of its total assets in income generating equity securities, including dividend paying common stocks, convertible securities, preferred stocks and other equity-related securities. In addition, the Fund may invest the balance of its total assets in non-convertible debt securities, consisting primarily of corporate bonds. The Fund attempts to minimize individual security risk by diversifying the portfolio with approximately 150 securities, which is subject to change. The Chartwell Dividend and Income Fund is a closed-end mutual fund which trades on the New York Stock Exchange under the symbol CWF.

HIGH-YIELD CORPORATE BONDS

High-yield bonds are non-investment grade corporate debt obligations rated "Ba1" or lower by Moody's Investors Service, Inc. or "BB+" or lower by Standard and Poor's Ratings Group; they typically have a higher risk level than investment-grade bonds. These securities have historically compensated investors with higher levels of income for that risk. Prices usually are less sensitive to interest rate fluctuations than higher rated bonds because of the high income levels. However, the prices of these bonds are more sensitive to changes in the economy.

CONVERTIBLE SECURITIES

The Fund can invest in both convertible preferred stock and convertible bonds. Both pay fixed rates of income, but because they can be converted into common stock, they are indirectly tied to the common stock's performance. As a result, convertible securities generally offer higher income than common stocks and an opportunity for price appreciation when the value of the underlying security rises. The Fund buys convertibles when the underlying common stock offers strong growth potential as well.

COMMON STOCK

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

The Fund invests in the common stocks of utility companies, Real Estate Investment Trusts (REITs) and other industrial and financial companies as well as other equity securities. Both utilities and REITs tend to offer a premium dividend yield with steady growth that can lead to capital appreciation. Industrial and financial stocks are primarily purchased for capital appreciation based on the fundamental value of the underlying company.

LETTER TO SHAREHOLDERS

DEAR SHAREHOLDERS,

We are proud to present the semi-annual report for the Chartwell Dividend and Income Fund ("CWF" or the "Fund") for the six months ended May 31, 2001. The Fund returned 29.38% with reinvestment of dividends, combined, with 22.14% capital appreciation. The net asset value ("NAV") return was 14.24%. The Fund ended the period at a premium to NAV of 5% versus beginning the period at a discount of 7%. The distribution rate at May 31, 2001 remained at \$0.1033 per share, paid monthly. The Fund traded at a range of \$12.15 to \$9.3125 during the period.

KEY EVENTS OVER THE PAST SIX MONTHS

Perhaps the most prominent event in the market was the Federal Reserve Board's decision to lower the Discount Rate to its current 3.75% level. By aggressively lowering interest rates the "Fed" has created more liquidity (cash) for consumers and businesses to spend and invest. However, this has not yielded a strong overall market, as determined by the S&P 500 index, which was down 3.9% for the past six months. The culprits that continue to weigh upon the returns of the broad market are the telecommunications and technology sectors. Many of the blue chips of the "Internet Era" such as Cisco Systems, Inc., Juniper Networks, Inc. and Internet Capital Group, Inc. have plummeted from their absolute highs. However, other sectors of the market have increased in popularity, such as energy, utilities, financials and basic materials. Fortunately, we have been heavily positioned in financials, utilities and energy stocks, which yielded a higher return over the past six month to shareholders.

ECONOMIC PERSPECTIVE

Many cyclical stocks increased in value primarily as a result of an anticipated upturn in the economy, and therefore their earnings prospects over the near future. Soon before the Federal Reserve Board lowered interest rates these companies bottomed, and have been performing well since. However, thus far the expectation for better earnings results has been disappointed, as the U.S. and global economic environment continues to operate in a slump.

Earnings for these largely cyclical companies are affected by a number of macroeconomic factors, which include borrowing costs, general economic activity, energy and other input costs and finally foreign exchange rates. With the exception of borrowing costs, each other factor has been negative and getting worse over the past half year. First, recent real GDP statistics indicate the economy has only grown at a 2-3% rate. This is a sharp slowdown from the 5-6% growth rates in 1999 and 2000. Demand for basic materials and capital goods that go into packaging, automobiles, housing and other goods have in turn fallen

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

substantially. In addition, input costs in the form of oil and natural gas prices have been in a strong upturn for the past year. These commodities are used for energy, in transportation, and as raw materials for the production of various

3

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

chemicals, metals and papers. The combination of weak demand and high supply prices created a margin squeeze across most industries -- meaning that profit expectations have been forced down. Add to this, finally, a strong and strengthening U.S. Dollar versus the Japanese Yen and Euro and you have an extremely difficult operating environment for domestic companies. The dollar has appreciated 10.7% and 11% versus the Yen and Euro over the past year, respectively. This makes exports less attractive and imports more competitive with domestic products.

Now the good news! First, while demand is still quite weak, the pro-active stance of the Fed in lowering interest rates and providing liquidity to the economy should ensure an eventual improvement in the broader economy. Second, energy prices seem to have stabilized. West Texas Intermediate Crude (oil) prices have stabilized at around \$27 under the watchful eye of OPEC. It is anticipated that oil prices are more likely to come down than go up over the next year as drilling yields more supply and higher prices leads to more conservation. Natural gas has actually decreased in price substantially from its peaks last July above \$10/mcf (million cubic feet). Currently, standard Henry Hub natural gas spot prices are hovering around \$3-\$3.50/mcf. In addition, futures indicate the expectation for \$3.25-\$3.75/mcf natural gas at the end of the year. Like oil, higher prices have led to increased spending on finding and retrieving natural gas, whether from land based sources, the Gulf of Mexico or from converted natural gas liquids shipped from South America. A basic law of economics is that high prices and profits lead to more supply and a stabilization of prices toward a 'normal' level. We believe this is exactly what is occurring right now. The real question is not if we will see greater energy supplies, but when. As supplies come on price will decline. Falling energy prices will have multiple beneficial effects. First, a major direct costs for many companies will fall, most likely meaning wider profits margins and higher earnings. Second, the broader economy should improve as consumers and businesses have more money to spend on the things they want or need.

We also expect the dollar to weaken relative to other currencies, although the catalyst for this change is questionable. The value of the dollar relative to other currencies is influenced by a variety of factors. These include relative inflation rates, real economic growth, relative interest rates, and the attractiveness of investable assets. If the U.S. is lowering its interest rate versus other countries, then the dollar is expected to weaken. Why? Because financial traders can get a better return on their investments in Europe because interest rates are higher or more stable. The U.S. has been more aggressive in lowering interest rates than our neighbors, thus this could be a catalyst for a weakening dollar. One explanation for the strength of the dollar is that investors expect the European community to lower interest rates in the near future as a result of a slowing economy. The dollar has been the safest investment in the world for some time, which is also driving up its level as investors all over the world choose to buy dollars. While all this is still true, we believe it is unlikely that the dollar will

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

continue to strengthen at its current rate and will likely weaken at some point. This will yield a better foreign market for domestic goods overseas and reduce the pressure of low price imports in the domestic market.

In addition to earning income from dividends and interest payments on our investments, the Fund is actively engaged in generating incremental income from a buy-write program. A buy-write program involves writing a call option on a stock that is held in the Fund. We are paid a premium that can be used to compensate our income needs. The buyer of the call then has the right to purchase our stock at a pre-determined price and date. The benefit of this program for the Fund is that it can generate significant income on lower yielding stocks and stabilize returns. However, we must sacrifice some upside potential in exchange. The program is especially useful in down markets, and we use it aggressively when we feel securities are fully priced.

The Fund made strong steps toward growing our capital base over the past six months. The management will continue to work toward the twin objectives of the Fund to generate current income and secondarily add capital appreciation. We wish to thank our long term investors and welcome new investors to the Fund. We look forward to the events of the next six months and will continue to position the portfolio in a conservative, income generating manner.

Sincerely,

/s/ Bernard P. Schaffer

FIXED INCOME RESULTS

[FIXED INCOME PIE CHART]

[HIGH YIELD INDEX LINE CHART]

HIGH YIELD RECAP

Participants in today's corporate high yield market are navigating through strong crosscurrents. High yield mutual funds have experienced healthy inflows year to date, the new issue market has re-opened for many issuers, and the Federal Reserve has aggressively cut their targeted interest rates. Conversely, defaults rates have risen, recoveries on defaulted positions have fallen and economic growth has slowed materially in many sectors. Recent high yield performance, however, has been solid. The Merrill Lynch High Yield Cash Pay Index returned 9.40% for the six months ended May 31, 2001. High yield mutual funds, which experienced record outflows in 2000, have benefited from \$7.5 billion of inflows so far this year (see graph). This influx of liquidity has helped reinvigorated the new issue market, with year to date new issuance exceeding new issuance for all of 2000. Spreads-over-treasuries have tightened over the last six months, but remain at historically wide levels (see graph).

HIGH YIELD ANNUAL DEFAULT RATES VS. ANNUAL RETURNS  
(\*default rate for twelve months ended 5/31/01, source: CS First Boston)

[HI YIELD RATES VS. ANNUAL RETURNS BAR CHART]

The default rate for the twelve months ended May 31, 2001 was 7.6%, sharply higher than the historical average (graph). Amidst rising default rates, higher quality credits continued to outperform lower-quality credits. Service, container, supermarket and automotive issues outperformed, while telecommunication, steel and textile issues underperformed (see graph). On May 31, 2001 the yield on the Merrill Lynch High Yield Cash Pay Index stood at 12.32%.

GROWTH OF THE HIGH YIELD MARKET  
(\*through 6/21/01, source: CS First Boston)

[GROWTH OF HIGH YIELD MARKET MOUNTAIN CHART]

## CWF PERFORMANCE

The high yield portion of the portfolio returned 6.32% for six months ended May 31, 2001, underperforming the index. We attribute our underperformance relative to the index to three main factors. First, investments in issues such as 360networks Inc., Orius Capital Corp., Ziff Davis Media Inc. and Evenflo Company, Inc. performed poorly. However, our investment philosophy, which focuses on cash flow generation and improving credit profiles, uncovered winning investments in Asia Global Crossing Ltd., Building One Services Corporation, Jostens, Inc. and Allied Waste North American Industries Inc. Second, with our primary emphasis on income, we typically overweight single B-rated issues, which underperformed higher quality issues as the market sought relative safety. Lastly, we tend to avoid buying 'fallen angels', or formerly investment grade bonds that have been downgraded to high yield status, due to their negative credit momentum and lack of bond covenants. Examples of recent fallen angels include Crown Cork & Seal Company, Inc., J.C. Penney, Inc. and Owens Corning. Fallen angels have grown to represent ten percent of the high yield index, due to several high profile downgrades. Recently fallen angels were among the best performers in the index. Although we are disappointed by our underperformance, we remain committed to our investment philosophy and believe that rigorous credit research remains the foundation for achieving our long-term investment objectives of superior returns and low volatility.

8

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

## OUTLOOK

The outlook for the high yield market is encouraging. We believe that the economy has stabilized, and that most companies have adjusted their business plans to compete cost effectively in an environment of slower economic growth. In addition, we believe that defaults rates are near their peak and should start to trend lower over the coming year. At recent spread levels, we believe that long-term investors are well compensated for the inherent risks associated with high yield bonds.

In the current slower-growth economic environment we favor the cable, gaming and utility sectors. Additionally, we believe there may be attractive investment opportunities in the automotive and general industrial sectors. We have opportunistically looked to reduce exposure in the telecommunications and

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

technology sectors. As always, intensive bottom-up research will guide our investment decision making. Finally, we continually look to improve the credit quality of the portfolio.

REAL ESTATE INVESTMENT TRUST (REIT) RESULTS

[REIT FIXED INCOME PIE CHART]

[REIT RETURNS BAR CHART]

The REIT sector performed well over the past six months. High current income and reasonable valuations provided the basis for investors to increase their exposure to this sector. Fundamentally, there has been limited new building, a slowdown in hotels and in some high-end office space, especially in New York City and San Francisco. We have lowered our weighting in REITs toward the end of the past six months based on our concern that valuations have reached relatively high levels based on net asset value. We are maintaining our exposure to the sector based on its income generation, but we are less confident that the sector will provide capital appreciation from here.

Our best real estate related stocks were Healthcare Realty Trust, Inc., Hospitality Properties Trust and Host Marriott Corporation. Our worst stocks were Boston Properties, Inc., Reckson Associates Realty Corporation and LTC Properties, Inc.

MAY 31, 2001

UTILITY RESULTS

[UTILITY RESULTS PIE CHART]

[UTILITY RETURNS BAR CHART]

Utilities experienced a lackluster period as gas prices fell and political pressure from California debacle has hurt stocks, especially those with exposure to western markets. We think they are currently very attractive because we feel political pressure will ease and rational market will return. This probably means less broad success of sector, but the best companies will do well. Those companies most adept at trading between different geographic regions and using multiple fuels to supply customers with electricity will likely be best.

Our best stocks were Constellation Energy Group, Inc., The Southern Company and Reliant Resources, Inc. Our underperforming utilities were The Montana Power Company, FPL Group, Inc. and SEMCO Energy, Inc.

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

## EQUITY RETURNS

[REITS PIE CHART]

[EQUITY RETURNS BAR CHART]

The equity portion of the Fund performed quite well over the past six months, returning 11.19%. This compares to the S&P 500 return of -3.9% and the Russell 1000 Value return of 5.93%.

Among our best sectors were basic materials, capital goods and energy. The past six months was marked by a sharp upward move in economically sensitive stocks. This was the result of a low initial valuation level and the active stance of the Fed in lowering interest rates. The market has anticipated a marked improvement in economic activity, which will benefit the earnings prospects of cyclical companies. On a stock specific level, Kinder Morgan Energy Partners L.P., USEC Inc., Activision Inc. and Bank of America Corporation were all exceptional performers.

Among our worst sectors were telecommunication, technology and healthcare. While many tech and telecom stocks experienced a rebound during the beginning of the year, the aggregate performance of the sectors were nonetheless negative as a result of extremely poor current earnings and uncertain near term prospects. Our worst stocks were Flextronics Inc., The Limited Inc., SBC Communications Inc., Schering-Plough Corporation and Bristol-Myers Squibb Company.

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

## UTILIZATION OF LEVERAGE

The Chartwell Dividend and Income Fund has utilized leverage through the issuance of commercial paper. As of May 31, 2001, the Fund had \$60 million in leverage outstanding in the form of commercial paper rated A1/P1 by Moody's Investors Service, Inc./Standard & Poor's Ratings Group. These ratings should enhance the marketability and reduce the interest costs associated with the issuance of the commercial paper. However, it must be noted that the utilization of leverage involves the risk of lower portfolio returns if the cost of leverage is higher than the resulting yields on assets or if the Fund experiences capital losses in excess of the yield spread, if any. Therefore, the addition of leverage also increases the potential volatility of the Fund. The Fund has the ability to leverage to a maximum of 33% of the Fund's gross assets.

The Fund utilizes leveraging to seek to enhance the yield and net asset value of its Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Fund issues Commercial Paper, which is issued at a discount equivalent to short-term interest rates, and invests the proceeds in long-term securities. The interest earned on these investments is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's common stock capitalization of \$100 million and the issuance of commercial paper for an additional \$50 million, creating a total value of \$150 million available for investment in long-term securities. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays a discount on the \$50 million of commercial paper based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the discount paid to Commercial Paper holders is significantly lower than the income earned on the Fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pick-up on the Common Stock will be reduced or eliminated completely. At the same time, the market value on the Fund's Common Stock (that is, its price as listed on the New York Stock Exchange), may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the Fund's Commercial Paper does not fluctuate. In

13

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

addition to the decline in net asset value, the market value of the Fund's Common Stock may also decline.

DIVIDENDS & DISTRIBUTIONS

The Fund currently intends to distribute a monthly fixed amount to shareholders in the amount of \$0.1033 per share. The Fund's final distribution for each calendar year will exceed that amount, however, to the extent necessary for the Fund to have distributed all of its net investment company taxable income and net capital gains recognized during the year, if any. If, for any calendar year, the total distributions exceed net investment company taxable income and net capital gain, the excess, distributed from the Fund's assets, will generally be treated as a tax-free return of capital and will result in a reduction in the shareholder's basis. The Board of Directors reserves the right to change the aforementioned dividend policy from time-to-time.

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

Chartwell Dividend and Income Fund, Inc. (the "Fund") was incorporated under the laws of the State of Maryland on April 6, 1998 and is registered under the

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

Investment Company Act of 1940 (the "Act"), as amended, as a closed-end, diversified management investment company. The Fund had no operations until June 17, 1998 when it sold 6,667 shares of common stock for \$100,005 to Chartwell Investment Partners, L.P. (the "Manager"). Investment operations commenced on June 29, 1998. The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective.

### NOTE 1. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

**PORTFOLIO VALUATION:** Portfolio securities listed or traded on a national securities exchange, except for debt securities, are valued at the last sale price as of the close of regular trading on the New York Stock Exchange. Securities not traded on a particular day, over-the-counter securities and government and agency securities are valued at the mean value between bid and asked prices. Long-term debt securities are valued on the basis of valuations provided by a pricing service when such prices are believed to reflect the fair value of such securities. All securities and assets for which quotations are not readily available are valued at fair value as determined in good faith and pursuant to a method approved by the Board of Directors. Short-term investments having a maturity of less than 60 days are valued at amortized cost.

**CASH AND CASH EQUIVALENTS:** Idle cash is swept into a money market fund at PNC Bank, N.A., the fund's custodian, and is classified as a cash equivalent. Amounts so invested are generally available on the same business day.

**WRITTEN OPTIONS:** When the Fund writes a covered call option, an amount equal to the premium received by the portfolio is included in the Fund's statement of assets and liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written.

When a covered written call expires on its stipulated expiration date, or if the portfolio enters into a closing purchase transaction, the Fund will realize a gain (or loss if the cost of the closing purchase transaction exceeds the premium received when the call option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option will be extinguished. When a covered written call option is exercised, the Fund will realize a gain or loss from the sale of the underlying security and the proceeds of the sale are increased by the premium originally received. The Fund as writer of

30

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

an option may have no control over whether the underlying securities may be sold (call) and as a result bears the market risk of an unfavorable change in the price of the securities underlying the written option.

**FEDERAL INCOME TAXES:** It is the Fund's intention to meet the requirements under Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

shareholders. Therefore, no provision for Federal income tax or excise tax is required.

**DIVIDENDS AND DISTRIBUTIONS:** The Fund will declare and pay dividends to shareholders monthly from net investment income and short-term gains. Long-term capital gains, if any, in excess of loss carryforwards are distributed to shareholders annually. Dividends and distributions to shareholders are recorded on the ex-dividend date.

Dividends from net investment income and capital gain distributions are determined in accordance with U.S. Federal income tax regulations, which may differ from generally accepted accounting principles. The Fund's fixed dividend policy may result in a tax return of capital.

**BORROWINGS:** The Fund issues short-term commercial paper at a discount from par. The discount is amortized over the life of the commercial paper using the straight line method.

**SECURITY TRANSACTIONS AND INVESTMENT INCOME:** Security transactions are recorded on the trade date. Realized gains and losses on sales of securities are calculated on the identified cost basis.

Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. The Fund accretes original issue discount on securities using the effective interest method.

In November 2000, the American Institute of Certified Public Accountants issued new accounting guidelines for investment companies which will require the Fund to amortize discounts and premiums on fixed income securities effective for the fiscal year ending November 30, 2002. This accounting change will not affect the Fund's net asset value, total return, or distributions to shareholders but may result in certain amounts being reclassified from realized and unrealized gain to interest income for financial statement purposes. Management of the Fund believes this change will have no material effect on the financial statements.

**USE OF ESTIMATES:** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts in the financial statements. Actual results could differ from those estimates.

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

### NOTE 2. INVESTMENT MANAGEMENT, ADMINISTRATION AGREEMENTS AND OTHER TRANSACTIONS WITH AFFILIATES

The Fund has entered into an investment management agreement with the Manager. The Manager manages the Fund's portfolio and makes investment decisions. For these services, the Fund pays the Manager a monthly fee at an annual rate of 0.95% of the Fund's Managed Assets. "Managed Assets" means the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, which liabilities exclude debt related to leverage, short-term debt and the aggregate liquidation preference of any outstanding preferred stock.

The Fund has entered into an administration agreement with Princeton

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

Administrators, L.P. (the "Administrator"). Under such agreement, the Administrator performs or arranges for the performance of certain administrative services necessary for the operation of the Fund. For these services, the Fund pays the Administrator a monthly fee at an annual rate of 0.15% of the Fund's average weekly Managed Assets, subject to a monthly minimum fee of \$12,500.

Certain officers and/or directors of the Fund are officers and/or directors of the Manager. The Fund pays each director who is not an "affiliated person" as defined in the Act a fee of \$4,000 per year plus \$250 for each meeting attended.

For the six months ended May 31, 2001, the Fund incurred fees, of which \$25,628 has been expensed, to Drinker Biddle & Reath LLP, counsel for the Fund. A partner of the firm is an officer of the Fund.

### NOTE 3. PURCHASE AND SALES OF INVESTMENTS

For the six months ended May 31, 2001, purchases and sales of investments, excluding short-term investments, totaled \$179,394,593 and \$167,311,871, respectively.

At May 31, 2001, the cost and unrealized appreciation/depreciation of investments for federal income tax purposes was as follows:

Cost of investments.....		\$230,666,324
		=====
Gross unrealized appreciation.....		\$ 16,230,850
Gross unrealized depreciation.....		(18,751,986)
		-----
Net unrealized depreciation.....		\$ (2,521,136)
		=====

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

### NOTE 4. COMMERCIAL PAPER

As of May 31, 2001, \$60,000,000 of commercial paper was outstanding with an amortized cost of \$59,852,866. The average discount rate of commercial paper outstanding at May 31, 2001 was 5.895%. The average daily balance of commercial paper outstanding for the six months ended May 31, 2001 was \$59,615,118 at a weighted average discount rate of 4.99%. The maximum amount of commercial paper outstanding at any time during the six months ended was \$60,000,000. In conjunction with the issuance of the commercial paper, the Fund entered into a line of credit arrangement with a bank for \$30,000,000. Interest on borrowing is based on market rates in effect at the time of borrowing. The commitment fee is computed at the rate of 0.15% per annum on the unused balance. During the six months ended May 31, 2001, there were no borrowings under this arrangement.

### NOTE 5. CAPITAL STOCK

There are 100,000,000 shares of \$0.01 par value common stock authorized. Of the 15,628,866 shares of common stock outstanding at May 31, 2001, the Manager owned 8,961 shares.

For the six months ended May 31, 2001 and the year ended November 30, 2000 the Fund issued 91,795 and -0- shares respectively, in connection with the Fund's dividend reinvestment plan.

### NOTE 6. MARKET AND CREDIT RISKS

The Fund may invest in high-yielding fixed-income securities, which carry ratings of BB or lower by S&P and/or Bal or lower by Moody's. Investments in these higher-yielding securities may be accompanied by a greater degree of credit risk than higher rated securities. Additionally, lower-rated securities may be more susceptible to adverse economic and competitive industry conditions than investment-grade securities. The Fund may invest up to 15% of its total assets in illiquid securities and other securities which may not be readily marketable. In addition, the Fund may purchase securities sold in reliance of Rule 144A of the Securities Act of 1933. The relative illiquidity of some of the Fund's portfolio

33

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

securities may adversely affect the ability of the Fund to dispose of such securities in a timely manner and at a fair price at times when it might be necessary or advantageous for the Fund to liquidate portfolio securities.

### NOTE 7. SUBSEQUENT EVENT

The Board of Directors of the Fund declared the following dividends:

DECLARATION DATE	EX-DATE	RECORD DATE	PAYABLE DATE	DIVIDEND RATE
-----	-----	-----	-----	-----
June 1, 2001	June 15, 2001	June 19, 2001	June 29, 2001	\$0.1033
July 2, 2001	July 18, 2001	July 20, 2001	July 31, 2001	\$0.1033

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

### NOTE 8. CAPITAL LOSS CARRYFORWARDS

The following summarizes the capital loss carryforwards as of November 30, 2000. This capital loss carryforward is available to offset future gains.

EXPIRING IN FISCAL YEAR	AMOUNT
2007	\$8,880,255
2008	\$9,509,213

Under the current tax law, capital and currency losses realized after October 31, 2000 are deferred and treated as occurring on the first day of the following fiscal year. For fiscal year ended November 30, 2000, the Fund elected to defer capital losses occurring between November 1, 2000 and November 30, 2000 in the amount of \$6,355,782.

### AUTOMATIC DIVIDEND REINVESTMENT PLAN (UNAUDITED)

Pursuant to the Fund's Automatic Dividend Reinvestment Plan (the "Plan"), unless a shareholder otherwise elects, all dividend and capital gains distributions will be automatically reinvested in additional shares of common stock of the Fund by PNC Bank, N.A., as agent for shareholders in administering the Plan (the "Plan Agent"). Shareholders who elect not to participate in the Plan will receive all dividends and distributions in cash, paid by check mailed directly to the shareholder of record (or, if the shares are held in street or other nominee name, then to such nominee) by PNC Bank, N.A., as dividend paying agent. Such participants may elect not to participate in the Plan and to receive all distributions of dividends and capital gains in cash by sending written instructions to PNC Bank, N.A., as dividend paying agent, at the address set forth below.

Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by written notice if received by the Plan Agent not less than ten days prior to any dividend record date. Otherwise such termination will be effective with respect to any subsequently declared dividend or distribution.

Whenever the Fund declares a distribution, an ordinary income dividend or a capital gain dividend (collectively referred to as "dividends") payable either in

34

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

shares or in cash, non-participants in the Plan will receive cash, and participants in the Plan will receive the equivalent in shares of common stock. The shares will be acquired by the Plan Agent for the participant's account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized shares of common stock from the Fund or (ii) by purchase of outstanding shares of common stock on the open market on the NYSE or elsewhere. If on the payment date of the dividend, the net asset value per

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

share of the common stock is equal to or less than the market price per share plus estimated brokerage commissions (such condition being referred to herein as "market premium"), the Plan Agent will invest the dividend amount in newly issued shares on behalf of the participant. The number of newly issued shares of common stock to be credited to the participant's account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (such condition being referred to herein as "market discount"), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases.

In the event of a market discount on the dividend payment date, the Plan Agent will have until the last business day before the next date on which the shares trade on the "ex-dividend" basis or in no event more than 30 days after the dividend payment date to invest the dividend amount in shares acquired in open-market purchases. If, before the Plan Agent has completed its open-market purchases, the market price of a share of common stock exceeds the net asset value per share, the average per share purchase price paid by the Plan Agent may exceed the net asset value of the Fund's shares, resulting in the acquisition of fewer shares than if the dividend had been paid in newly issued shares on the dividend payment date. The Plan provides that if the Plan Agent is unable to invest the full dividend amount in open-market purchases during the purchase period or if the market discount shifts to market premium during the purchase period, the Plan Agent will cease making open-market purchases and will invest the uninvested portion of the dividend amount in newly issued shares at the close of business on the last purchase date.

The Plan Agent maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held pursuant to the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan

35

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

on the basis of the number of shares certified from time to time by the record shareholders as representing the total amount registered in the record shareholder's name and held for the account of beneficial owners who are to participate in the Plan.

There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gain distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with reinvestment of dividends.

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends.

Shareholders participating in the Plan may receive benefits not available to shareholders not participating in the Plan. If the market price plus commissions of the Fund's shares is above the net asset value, participants in the Plan will receive shares of the Fund at less than they could otherwise purchase them and will have shares with a cash value greater than the value of any cash distribution they would have received on their shares. If the market price plus commissions is below the net asset value, participants will receive distributions in shares with a net asset value greater than the value of any cash distribution they would have received on their shares. However, there may be insufficient shares available in the market to make distributions in shares at prices below the net asset value. Also, since the Fund does not redeem its shares, the price on resale may be more or less than the net asset value.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence concerning the Plan should be directed to the Plan Agent at PNC Bank, N.A., c/o PFPC Inc., 400 Bellevue Parkway, Wilmington, Delaware 19809, Attn: Closed-End Department.

36

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2001

### ADDITIONAL INFORMATION (UNAUDITED)

During the period, there have been no material changes in the Fund's investment objective or fundamental policies that have not been approved by the shareholders. There have been no changes in the Fund's charter or By-Laws that would delay or prevent a change in control of the Fund which have not been approved by the shareholders. There have been no changes in the principal risk factors associated with investment in the Fund. There have been no changes in the persons who are primarily responsible for the day-to-day management of the Fund's portfolio.

### EFFECTS OF LEVERAGE

Leverage of \$60 million in commercial paper was initially sold by the Fund on July 28, 1999. Through May 31, 2001, interest paid on the commercial paper ranged from 4.85% to 6.75%. As of May 31, 2001, the Fund had \$30 million outstanding at 5.12% per annum maturing on June 4, 2001, and \$30 million at 4.85% per annum maturing on July 5, 2001. All interest rates include fees due to the broker-dealer. The Fund must experience an annual return of 1.25% to cover interest payments on the commercial paper.

The following table explains the potential effects of leverage on the equity returns of common shareholders:

-----

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

Assumed return on portfolio (net of expenses)	- 10.00%	- 5.00%	0.00%	5.00%	10.00%
Corresponding return to common stockholder	- 15.00%	- 8.33%	- 1.67%	5.00%	11.67%

Assumes \$180 million assets attributable to common shareholders; \$60 million aggregate leverage with an average interest rate of 5.00%. All figures appearing above are hypothetical returns generated to assist investors in understanding the effects of leverage. Actual returns may be greater or less than those appearing in the table.
