FORWARD LOOKING STATEMENTS

When used in this Quarterly Report on Form 10-QSB, the words may , will , should , expect , believe , anticipate , continue , estimate , project , intend and similar expressions are intended to identify forward-looking statements with the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act regarding events, conditions and financial trends that may affect Milestone Scientific Inc. s (Milestone) s future plans of operations, business strategy, results of operations and financial condition. Milestone wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established in the Private Securities Litigation Reform Act of 1995. Prospective investors are cautioned that any forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties and that actual results may differ materially from those included within the forward-looking statements as a result of various factors. Such forward-looking statements should, therefore, be considered in light of various important factors, including those set forth herein and others set forth from time to time in Milestone s reports and registration statements filed with the Securities and Exchange Commission (the Commission). Milestone disclaims any intent or obligation to update such forward-looking statements.

**MILESTONE SCIENTIFIC INC.
NOTES TO CONDENSED FINANCIAL STATEMENTS
(Unaudited)**

Note 1 Summary of accounting policies

The unaudited financial statements of Milestone Scientific Inc. (Milestone) have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information.

Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

These unaudited financial statements should be read in conjunction with the financial statements and notes thereto for the year ended December 31, 2006 included in Milestone s Annual Report on Form 10-KSB. The accounting policies used in preparing these unaudited financial statements are the same as those described in the December 31, 2006 financial statements.

In the opinion of Milestone, the accompanying unaudited financial statements contain all adjustments (consisting of normal recurring entries) necessary to fairly present Milestone s financial position as of March 31, 2007 and the results of its operations for the three months ended March 31, 2007 and 2006.

The results reported for the three months ended March 31, 2007 are not necessarily indicative of the results of operations which may be expected for a full year.

The Company has incurred recurring operating losses and negative operating cash flows since its inception. At March 31, 2007, the Company had cash and cash equivalents and working capital of \$451,000 and \$2,402,000, respectively. The Company is actively pursuing generation of positive cash flows from operating activities through increases in revenues and reductions in operating expenses. The Company believes that its current resources will be sufficient to fund its planned operations at the current level for at least through March 31, 2008.

Note 2 Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions in determining the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. The most significant estimates relate to the allowance for doubtful accounts, inventory valuation, cash flow assumptions regarding evaluations for impairment of long-lived assets and valuation allowances on deferred tax assets. Actual results could differ from those estimates.

Note 3 Royalty receivable

Royalty receivable represents the royalty due from United Systems Inc, the licensee of Milestone s proprietary consumer dental whitening product, which is sold under Milestone s distributor s trademark of *Ionic White* .

Note 4 Inventories

Inventories principally consist of finished goods and component parts stated at the lower of cost (first-in, first-out method) or market.

Note 5 Advances to contract manufacturer

Advances to contract manufacturer represent deposits to the Company s contract manufacturer to fund future inventory purchases.

Table of Contents

Note 6 Basic and diluted net loss per common share

Milestone presents basic earnings (loss) per common share and, if applicable, diluted earnings per common share pursuant to the provisions of Statement of Financial Accounting Standards No. 128, Earnings per Share (SFAS 128).

Basic earnings (loss) per common shares is calculated by dividing net income or loss applicable to common stock by the weighted average number of common shares outstanding and to be issued during each period. The calculation of diluted earnings per common share is similar to that of basic earnings per common share, except that the denominator is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares, such as those issuable upon the exercise of stock options, warrants, and the conversion of notes payable and preferred stock were issued during the period.

Since Milestone had net losses for the three months ended March 31, 2007 and 2006, the assumed effects of the exercise of outstanding stock options and warrants and the conversion of preferred stock into common stock were not included in the calculation as their effect would have been anti-dilutive. Such outstanding options, warrants and preferred stock totaled 3,644,920 and 3,605,085 at March 31, 2007 and 2006, respectively.

Note 7 Significant Customer

Milestone had one customer who accounted for approximately 49% of its net sales for the three months ended March 31, 2007 and 25.3% of its net sales for the prior year period. At March 31, 2007, receivables from two customers accounted for approximately 70% and 16% respectively of Milestone s total accounts receivable.

Note 8 Stock Option Plans

Milestone adopted SFAS No. 123R, *Share-Based Payment*, an Amendment of FASB Statement No. 123 , under the modified-prospective transition method on January 1, 2006. SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statements over the service period, as an operating expense, based on the grant-date fair values. Pro-forma disclosure is no longer an alternative. As a result of adopting SFAS 123R, the Company recognizes as compensation expense in its financial statements the unvested portion of existing options granted prior to the effective date and the cost of stock options granted to employees after the effective date based on the fair value of the stock options at grant date. Prior to the adoption of SFAS No. 123R, the Company accounted for its stock option plans using the intrinsic value method of accounting prescribed by APB Opinion No. 25.

Employees: As of March 31, 2007, there were 137,667 outstanding options granted under the Milestone 1997 Stock Option Plan and 235,000 outstanding options granted under the Milestone 2004 Stock Option Plan. As a result of adopting Statement of Financial Accounting Standards No.123 (revised 2004), *Share-Based Payment* , the Company recognized \$20,762 in share-based compensation expense and a corresponding increase in net loss for the three months ended March 31, 2007. This share-based compensation expense had minimal impact on the Company s basic and diluted earnings per share.

The fair value of each option granted was estimated on the date of the grant using the Black-Scholes option pricing model.

Expected volatilities are based on historical volatility of the company s common stock. The company uses historical data to estimate option exercise and employee termination within the valuation model. The expected term of the option granted is estimated based on historical

Table of Contents

behavior of employees and represents the period of time that options granted are expected to be outstanding. A summary of option activity under the plan as of March 31, 2007, and changes during the three months then ended is presented below:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding, January 1, 2007	427,834	1.83	3.3	
Granted				
Exercised	(10,000)			
Forfeited or expired	(45,167)	0.00	0.0	
Outstanding, March 31, 2007	372,667	1.83	3.29	516,652
Exercisable, March 31, 2007	250,889	2.04	3.06	300,918

As of March 31, 2007, there was \$59,546 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the plan. That cost is expected to be recognized over a weighted average period of two and a half years.

Non-Employees: As of March 31, 2007, there were 347,666 outstanding options granted under the Milestone 1997 Stock Option Plan and 291,667 outstanding options granted under the Milestone 2004 Stock Option Plan. The Company recognized \$227,938 in share-based compensation expense in net loss for the three months ended March 31, 2007. This share-based compensation expense had minimal impact on the Company's basic and diluted earnings per share.

The weighted average grant date fair value of options to nonemployees during the period ended March 31, 2007 was \$2.46.

The fair value of each option granted is estimated on the date of the grant using the Black-Scholes option pricing model with the following assumptions used for the grants in the three months ended March 31, 2007: dividend yield of 0%; expected volatility of 90.%; risk free interest rate of 4.52%; and expected lives of 2.5 years.

Expected volatilities are based on historical volatility of the company's common stock. The company uses historical data to estimate option exercise and nonemployee termination within the valuation model. The expected term of the option granted is estimated based on historical behavior of nonemployees and represents the period of time that options granted are expected to be outstanding. A summary of option activity under the plan as of March 31, 2007, and changes during the three months then ended is presented below:

	Number of Options	Weighted average exercise price of options	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding, January 1, 2007	522,466	\$ 3.51	0	
Granted	125,000	1.75		
Exercised	0			
Forfeited or expired	(8,333)	4.92	0	

Edgar Filing: MILESTONE SCIENTIFIC INC/NJ - Form 10QSB

Outstanding, March 31, 2007	639,133	3.15	3.17
Exercisable, March 31, 2007	352,577	3.47	3.17
	10		

Table of Contents

As of March 31, 2007, there was \$140,134 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the plan. That cost is expected to be recognized over a weighted average period of two years.

Note 9 Agreements to Issue Common Stock and Stock Options

Under an agreement, the Company's marketing associate for a consumer tooth whitening product agreed to purchase at \$3.00 per share 500,000 shares of Milestone common stock in quarterly installments of 125,000 shares within 10 days after the end of each of the four fiscal quarters commencing July 1, 2005. Milestone is not required to sell these shares unless the associate has purchased at least 625,000 starter kits in the first quarter, at least 1,250,000 starter kits in the first two quarters and at least 1,875,000 starter kits in the first three quarters. Further, at Milestone's option, all shares previously purchased must be returned to Milestone and all monies paid to Milestone returned to the associate if it has not purchased an aggregate of at least 3,000,000 starter kits for the twelve-month period ending June 30, 2006.

This agreement has been repeatedly extended for the associate's commitment to purchase common stock. As of March 31, 2007, no shares have been sold under this agreement, as the associate did not purchase the minimum amount of starter kits.

Note 10- Recent Accounting pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting for uncertainties in income taxes recognized in a company's financial statements in accordance with Statement 109 and prescribes a recognition threshold and measurement attributable for financial disclosure of tax positions taken or expected to be taken on a tax return. Additionally, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. We adopted the provisions of FIN 48 as of January 1, 2007. The adoption of FIN 48 did not impact our financial position, results of operations or cash flows for the three months ended March 31, 2007.

In February 2007, the Financial Accounting Standards Board issued FASB No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115, which permits companies to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option). FASB 159 is effective for us on January 1, 2008. We are currently evaluating the possible impact of adopting FASB No. 159 on our consolidated financial statements.

In September 2006, the Financial Accounting Standards Board issued FASB 157, Fair Value Measurements. FASB 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. FASB 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company does not expect adoption of FASB No. 157 to have material effect on its results of operations or financial position.

ITEM 2. Management's Discussion and Analysis or Plan of Operation.**OVERVIEW**

The following discussion of our financial condition and results of operations should be read in conjunction with the financial statements and the notes to those statements included elsewhere in this Form 10-QSB. This discussion may contain forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, such as those set forth in our Form 10-KSB for the year ended December 31, 2006.

During the first quarter of 2007, the Company made considerable progress in advancing its refined business strategy primarily focused on the development, commercialization and global marketing and distribution of innovative painless injection products based on its patented core technology, *CompuFlo*. Particular emphasis has been concentrated on bringing our patented and novel *Single Tooth Anesthesia (STA)* delivery system to market, which incorporates the pressure force feedback elements of the *CompuFlo* technology, allowing dental practitioners to accurately administer injections into the periodontal ligament space, thus effectively anesthetizing a single tooth.

Table of Contents

In 2007, Milestone finalized an Exclusive Distribution and Supply Agreement with Henry Schein, Inc., one of the world's largest medical and dental distribution companies, to become the exclusive distributor of the *STA* and *CompuDent* systems (and related ancillary products) in both North America and Canada. We also granted Henry Schein first right of refusal on distribution rights of the same products in the international marketplace, excluding Poland, Norway, Sweden, Denmark and South Africa, where we have already identified alternative sales and distribution partners.

In February 2007, the *STA* was formally unveiled to market at the 142nd Chicago Dental Society Midwinter Meeting, one of the largest dental trade events held each year in the U.S. In late March, we began fulfilling purchase orders from Henry Schein for the *STA*, with revenue recognition occurring upon shipment. This resulted in a material improvement in our domestic sales during the first quarter of this year, due to the impact of \$632,309 in sales of *STA* systems and \$20,545 in sales of *STA* disposable handpieces.

The initial controlled soft introduction of our *STA* delivery system in the U.S. and Canada was designed to develop grass-roots support in the field prior to our full scale launch of the *STA* system scheduled to occur in the fourth quarter of this year or during the first quarter of 2008. The initial shipments of the *STA* delivery system to Henry Schein's customers should help to generate opportunities to promote much more rapid market adoption of the product by dental professionals. Further, early adopters of the *STA* System should prove to be valuable sources of insight and information regarding the powerful functionality and user benefits of the system, helping us to build a meaningful library of product testimonials and a solid base of professional references that will support and promote Henry Schein's sales and marketing efforts over time.

Despite a reduced focus on supporting formal sales and marketing initiatives associated with our legacy dental injection system, *CompuDent*, domestic sales of the legacy product modestly improved in the first quarter of 2007, increasing to \$287,227 compared to \$221,794 in the first quarter of 2006. Moreover, domestic sales of our disposable handpieces used in conjunction with *CompuDent* increased to \$911,971 from \$741,654 on a comparable first quarter over first quarter basis for 2007 and 2006, respectively.

International sales, overall, were down in the first quarter of this year due largely to our foreign distributors' anticipation of the commercial availability of our *STA* system, which circumvented pro-active marketing of the *CompuDent* system primarily in the European markets. We are currently advancing through the regulatory process of obtaining a CE Mark for the *STA* system, which will permit sales and marketing of the system in European Union (EU) countries. Once received, we will support a formal international market launch of the product at that time, which we anticipate will occur later this year. Although *CompuDent* system sales decreased, international sales of disposable handpieces to current users of the *CompuDent* system grew 22%, rising to \$291,961 in the first three months of this year from \$239,146 in the comparable period in the previous year.

Milestone will continue to reinforce and support its growing international sales and distribution channels. By doing so, we hope to materially expand our global market penetration of the professional medical and dental industries and drive broad brand awareness and appreciation for both our legacy and newly commercialized painless injection solutions.

In the first quarter of 2007, we signed a Collaboration Agreement with Carticept Medical, Inc., an Atlanta-based company developing and commercializing advanced medical device technology for the minimally-invasive treatment of cartilage damage and osteoarthritis. Milestone and Carticept have agreed to collaborate, at Carticept's cost, on the development of a specialized Injection System for the treatment of arthritic joints. The Injection System will use our patented *CompuFlo* technology to painlessly inject Carticept's proprietary products into the intra-articular joint space. Once Carticept is satisfied that the prototype meets predetermined performance benchmarks, then Carticept and Milestone

Table of Contents

will develop a professional version of the System suitable for commercialization and distribution to the professional medical markets.

The Cartcept agreement represented a significant step forward in our efforts to pursue strategic partnerships and revenue sharing collaborations with established industry leaders who share our interest in leveraging *CompuFlo* to develop new, cutting edge solutions capable of addressing many of the more than 700 market applications identified in the independent research study we commissioned in 2006. As we progress through 2007, we will continue to work towards identifying other strategic opportunities for joint development projects using *CompuFlo* as the impetus for new product development.

Selling, general and administrative expenses for the first quarter increased, reflecting spending associated with the soft domestic market launch of the *STA*, which included expenses associated to advertising, trade show and sales training and support. The rise in selling, general and administrative expenses was also attributable to a non-cash charge of \$248,700 associated with the accounting for share based compensation expense. The total increase was offset by our continued attention on strict cost containment in our general operating activities. Related research and development expenses for *STA* and *CompuFlo* totaled \$178,566 for the first quarter period of 2007. While this total represented 10% of the total operating expenses, the continued investment in these development and commercialization programs is crucial for our Company's future success.

The following table shows a breakdown of our product sales (net), domestically and internationally, by product category, and the percentage of product sales (net) by each product category:

	Three Months Ended March 31,			
	2007		2006	
DOMESTIC				
<i>CompuDent</i>	\$ 287,227	15.1%	\$ 221,794	21.4%

Summary of Significant Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United

States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to accounts receivable, inventories, stock-based compensation, and contingencies. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates under different assumptions or conditions.

Results of Operations

The results of operations for the three months ended March 31, 2007 reflect a stable growth of our user base, well controlled expenditures necessary to expand our market, and significant investment in

new product development. The net loss for the three months ended March 31, 2007 represents a 22% improvement from the same period in 2006.

The following table sets forth, for the periods presented, statement of operations data as a percentage of revenues. The trends suggested by this table may not be indicative of future operating results.

	Three Months Ended March 31			
	2007		2006	
Products sales, net	\$ 2,262,027	98%	\$ 1,560,919	92%

Three Months ended March 31, 2007 compared to three months ended March 31, 2006

Total revenues for the three months ended March 31, 2007 and 2006 were \$2,309,963 (product sales of \$2,262,027 and royalty income of \$47,936) and \$1,697,756, respectively. The \$701,108 or 44.9% increase in net product sales is primarily related to STA unit and handpiece sales of \$652,854 which did not exist in this same period last year. STA unit and handpiece sales are entirely domestic thru the first quarter. Domestic revenue from *CompuDent* units increased \$65,433 or 29.5%, while international revenue declined \$180,828 or 78% from year earlier levels. Disposable handpiece sales increased \$170,317 or 23.0% domestically while international sales increased \$52,815 or 22.1% reflecting the continuing increase in the expanding base of *CompuDent* units in service. The amount of \$47,936 or 2% of total revenue is royalty income from granting United Systems Inc. a license to manufacture, market, and sublicense the *Ionic White* to the consumer market. Royalty income (net of royalty expenses) declined \$78,232 or 65.0% reflecting retail competition in this increasingly highly competitive market.

Cost of products sold for the three months ended March 31, 2007 and 2006 were \$831,210 and \$751,162, respectively. The \$80,048 or 10.6% increase is primarily attributable to the additional cost of goods sold for the higher revenues previously discussed. Royalty expense related to the royalty income from the sales of the *Ionic White* tooth whitening system was \$5,752 for the three months ended March 31, 2007, a decrease from last year of \$10,669 or 65.% as a result of lower royalties due to the market conditions described above. For the three months ended March 31, 2007, Milestone generated a gross profit of \$1,473,001 or 64% as compared to a gross profit of \$930,173 or 55% for the same period in 2006. Excluding the net royalty income (net of royalty expense) of \$42,184 which has a gross profit of 88%, gross profit of products sales was \$1,430,817 or 63% in 2006, representing a 21% increase in gross

profit over the same period in 2006.

Table of Contents

Selling, general and administrative expenses for the three months ended March 31, 2007 and 2006 were \$1,836,888 and \$1,479,714, respectively. The \$157,174 or 10.6% increase is attributable primarily to a non-cash charge of \$248,700 associated with the accounting for share based compensation expense, as well as costs associated to the soft domestic market launch of the STA delivery system, including costs related to advertising, trade show participation and sales training and support.

Research and development expenses for the three months ended March 31, 2007 and 2006 were \$178,566 and \$163,442, respectively. These costs are primarily associated with the development of Milestone's Single Tooth Anesthetic (STA) delivery system and continuing efforts on the *CompuFlo* technology.

Loss from operations for the three months ended March 31, 2007 and 2006 was \$542,453 and \$712,983, respectively. The \$170,530 or 24% decrease in loss from operations is the primarily the result of increased revenue at higher gross profit %s.

Interest income of \$7,336 was earned in the three months ended March 31, 2007 compared to \$27,404 earned for the same period in 2006. The decrease of \$20,068 or 73% in interest income is the result of a decreased average cash balance.

For the reasons explained above, net loss for the three months ended March 31, 2007 was \$535,117 as compared to a net loss of \$685,579 for the same period in 2006. The \$150,462 or 22.0% decrease in net loss is primarily a result of the increased total revenue and the increased gross profit % partially offset by the increased operating expenses.

Cash flow results

As of March 31, 2007, Milestone had cash and cash equivalents of \$451,202 and working capital of \$2,401,521.

For the three months ended March 31, 2007, Milestone's net cash used in operating activities was \$693,600. This was attributable primarily to a net loss of \$535,117 adjusted for noncash items of \$64,002 (of which \$24,853 was depreciation expense; \$5,712 was amortization of patents; \$283,501 was stock and options issued for compensation, consulting, and vendor services; \$5,688 was bad debt expense); a \$1,073,202 increase in accounts receivable; a \$12,171 decrease in royalty receivable; a \$98,926 decrease in inventories; a \$19,064 increase in advances to contract manufacturer; a \$25,485 increase in prepaid expenses; a \$947 decrease in other assets; a \$482,973 increase in accounts payable and accrued expenses; and, a \$44,497 increase in deferred compensation.

Management believes that existing financial resources coupled with expected cash flow from operations are sufficient to meet Milestone's capital needs for at least the next 12 months. However, if Milestone determines that it is in its best interests to increase funding for the development of various proposed medical products from its own resources, rather than relying on the advancement of development funds by existing or potential development partners, if development partners willing to fund certain development activities cannot be found or if cash flow from operations is less than now expected, Milestone may need to raise additional capital. No assurances can be given that additional capital, if required, can be raised on terms and conditions satisfactory to Milestone. If additional capital is required and it cannot be raised, then Milestone could be forced to curtail medical product development activities, cut marketing expenses for existing dental products or adopt other cost saving measures, any of which might negatively affect long-term growth prospects.

Liquidity and Capital Resources

Table of Contents

Milestone incurred net losses of approximately \$535,000 and \$686,000 and negative cash flows from operating activities of approximately \$694,000 and \$445,000 during the three months ended March 31, 2007 and 2006, respectively.

ITEM 3. CONTROLS AND PROCEDURES

- a) *Evaluation of Disclosure Controls and Procedures.* Milestone's management, with the participation of the Chief Executive Officer and the Chief Financial Officer, carried out an evaluation of the effectiveness of Milestone's disclosure controls and procedures (as defined in the Securities Exchange Act, Rule 13a-15(e) and 15d-15(e). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that Milestone's disclosure controls and procedures were effective, as of the date of their evaluation, for purposes of recording, processing, summarizing and timely reporting material information required to be disclosed in reports filed by Milestone under the Securities Exchange Act of 1934.

- b) *Changes in Internal Control over Financial Reporting.* There were no changes in our internal controls over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, Milestone's internal control over fiscal reporting.
