**Report of Independent Accountants
on the Limited Review**

To the Board of Directors and Stockholders

Vale S.A.

- 1 We have carried out a limited review of the interim condensed financial information individual and consolidated of Vale S.A. and its subsidiaries, for the period of nine-months ended September 30, 2010, comprising the condensed balance sheet in September 30, 2010 and the condensed statements of operations, changes in stockholders' equity, comprehensive income, cash flows, value added and notes, related to the period ended September 30, 2010 and 2009, prepared under the responsibility of the Company's management.
- 2 Our review was carried out in accordance with specific standards established by the Institute of Independent Auditors of Brazil (Instituto de Auditorias Independentes do Brasil - IBRACON, and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Company with regard to the main criteria adopted for the preparation of the quarterly information and (b) a review of the relevant information and of the subsequent events which have, or could have, significant effects on the financial position and operations of the Company and its subsidiaries.
- 3 Based on our limited review, we are not aware of any significant adjustments which should be made to the interim condensed financial information referred to above for it to be in accordance with the Technical Pronouncement CPC 21 - Interim Financial Reporting, applicable to the preparation of interim financial information.
- 4 As mentioned in Note 3, the Brazilian Securities Commission (Comissão de Valores Mobiliários - CVM) approved several Technical Pronouncements, Interpretations and Orientations issued by the Comit  de Pronunciamentos T cnicos - CPC, valid for 2010, that has changed the accounting practices adopted in Brazil. These changes were adopted and disclosed by the Company in the preparation of the interim condensed financial information for the period of nine-months ended

(*) Classified as current assets held for sale.

2- Summary of the Condensed Financial Statements and of the Principal Accounting Principles

The condensed quarterly financial statements were prepared under CPC 21 Interim Financial Reporting and based on the Brazilian Corporate Law (new wording by Law 11.638), Law 11.941, the standards, guidelines and interpretations issued by the Accounting Standards Committee CPC and by the Securities and Exchange Commission of Brazil CVM .

On January 1, 2010, the Company adopted from retrospectively to January 1, 2009, for comparison purposes all the Accounting Standards issued by CPC and approved by CVM. So, financial results previously disclosed have being revised as if the accounting principles had been applied in all prior periods. Except as described in note 3, the quarterly financial statements followed the principles, methods and uniform criteria in relation to those adopted in the last fiscal year ended in December 31, 2009 and therefore should be read together with these.

In preparing the financial statements, we are required to use estimates to account for certain assets, liabilities revenues and expenses. The condensed financial statements therefore include various estimates concerning the selection of useful lives of property, plant and equipment, impairment, provisions necessary for contingent liabilities and other similar evaluations. The actual amounts for the quarter periods are not necessarily indicative of the actual results expected for the full fiscal year ending December 31, 2010.

Table of Contents

The monetary rights and obligations denominated in foreign currencies are translated at the prevailing exchange rates at the time the balance sheet date, of which US\$ 1,00 equal to R\$ 1,6942 on September 30, 2010 (US\$ 1,00 equal to R\$ 1,7412 on December 31, 2009), for monetary items. For non monetary items valued at cost, Vale uses the exchange rate at the day of the transaction or average exchange rate of the month and for non monetary items measured at fair value, Vale uses the exchange rate at the day of the transaction. Monetary rights and obligations in Brazilian currency are financially updated using contractual indexes.

Vale evaluated subsequent events until October 27, 2010, report of the condensed financial statements.

3- Adoption of new principles and accounting estimates

During 2009, The Company adopted the Standards issued by Accounting Standards Committee CPC that became mandatory for adoption for the reporting statements ending on December 31, 2010 and for the parent Company since the first quarter of 2010. The Company made the necessary adjustments in the financial statements for the quarters ended September 30, 2009 and December 31, 2009, as follows:

CPC 15 Business Combinations which aims to improve the relevance, reliability and comparability of information that an entity provides in its financial statements about a business combination and its effect on the assets acquired and liabilities assumed. During the initial adoption process we did not identify any significant adjustment.

CPC 16 Inventories the objective of this Standard is to determine the measurement of inventories purchased for resale, the ones held for consumption or industrial use or in services rendered, work in-process and finished goods ready for sale. During the initial adoption process we did not identify any significant adjustment.

CPC 18 Investment in subsidiaries and affiliates the objective of this Standard is to specify how the investments in affiliates should be accounted in the consolidated financial statements and in the financial statements of the Parent Company. During the initial adoption process we did not identify any significant adjustment.

CPC 19 Investment in Controlled Joint Venture the objective of this Standard is to specify how to account for interests in jointly controlled ventures (joint ventures) and the distribution of assets, liabilities, revenues and expenses of these enterprises in the financial statements of the investees. During the initial adoption process we did not identify any significant adjustment.

CPC 20 Borrowing Costs the objective of this Standard is the capitalization of the borrowing costs that are directly attributable to the acquisition, construction or production of assets, taking part of the cost of such assets. During the initial adoption process we did not identify any significant adjustment.

CPC 21 Interim Financial Statements the objective of this Standard is to establish the minimum disclosure of an interim financial statement and the principles for recognition and measurement of complete and condensed interim financial statements. The Company has adopted this standard in January 1, 2010, according to note 2.

CPC 22 Segment Information the objective of this Standard is to provide the disclosure that will enable users of the financial statements to assess the nature and financial effects of business activities in which the Company is involved and the economic environments in which it operates. The Company discloses in their annual statements the segment information and on March 31, 2010, the Company started disclosing comparative information, having no material change in relation to accounting records.

CPC 23 Accounting Policies Changes in Estimates and Error Correction, the objective of this standard is to define criteria for selecting and changing accounting policies, together with the accounting treatment and disclosure of change in accounting policies, changes in accounting estimates and correction of error, as well as to improve the relevance and reliability of financial statements of the entity, and to enable comparability over time with the financial statements of other entities. The Company discloses in its financial statements at the end of each fiscal year, all accounting policies adopted by it, and any change or new address, follow all the decisions and guidelines for adoption. Therefore, in line with CPC 21 and CPC 23, the Company is disclosing all policies that have being changed with the adoption of CPCs.

CPC 24 Subsequent Events the objective of this Statement is to determine when the entity must adjust its financial statements with respect to the subsequent events to the accounting period which refers these statements, the information that the entity must disclose about the date on which the authorization is granted to issue the financial statements and the subsequent events following the accounting period related to these statements, and establish that the entity should not prepare its financial statements based on the continuity assumption if events after the accounting period related to the statements indicate that the continuity assumption is not appropriate. The Company has adopted this approach in their statements.

Table of Contents

CPC 25 Provisions, Contingent Liabilities and Contingent Assets the goal is to establish criteria to be applied for recognition and measurement basis to correct measurement of provisions, liabilities and contingent assets and that sufficient information is disclosed in the notes to allow users to understand their nature, timeliness and value. The Company adopts this standard in their financial statements.

CPC 26 Presentation of Financial Statements the goal is to define the basis for presentation of the financial statements to ensure comparability both with the financial statements for prior periods with the same entity as the financial statements of other entities. In this scenario, this standard establishes general requirements for the submission of financial statements, establishes guidelines for their structure and minimum requirements of content. The Company will adopt this standard for the complete annual financial statements in December 31, 2010.

CPC 27 Properties, Plant and Equipment the goal is to establish the accounting treatment for fixed assets, so that users of financial statements can differentiate information about the entity's investment in its fixed assets, and its variances. The main points to consider in accounting for fixed assets are the recognition of assets, the determination of their carrying amount, their depreciation (useful life) and assessing the need for recognition of impairment for losses to be recognized. The Company and its subsidiaries have been practicing the guidance in this standard.

CPC 29 Biological Assets and Agricultural Product the goal is to establish the accounting treatment, and their disclosures relating to biological assets and agricultural products. The Company has in its financial records these assets, and during the initial adoption process we did not identify any significant adjustment.

CPC 30 Revenue the objective of this Standard is to establish criteria for the accounting treatment of revenue from certain types of transactions and events. It must be recognized when it is probable that future economic benefits will flow to the entity and these benefits can be reliably measured. The Company adopts this standard in their financial statements.

CPC 31 Non-Current Assets Held for Sale and Discontinued Operations the objective of this Standard is to establish the accounting of non-current assets held for sale with the presentation and disclosure of discontinued operations. In particular, the Standard requires that assets which meet the criteria for classification as held for sale are measured at lower of book value or the fair value less cost to sell. The depreciation or amortization of the assets ceases and the assets are presented separately in the balance sheet and the results of discontinued operations are presented separately in the income statement. The Company adopted this guidance.

CPC 32 Income Taxes the objective of this Technical Standard is to prescribe the accounting treatment for taxes on income. The term tax on profit and includes all taxes and foreign national contributions are based on taxable profits. The term tax on profit also includes income taxes, such as withholding, which are due by the entity itself, through a subsidiary, affiliate or joint venture in which it participates. The effects relating to changes of due to the standard are the table of adjustment for adoption of new practices and accounting estimates.

CPC 33 Employee Benefits the objective of this Standard is to address the accounting and disclosure for employee benefits. This requires the entity to recognize a liability when the employee renders service in exchange for benefits to be paid in the future, and an expense when the entity uses the economic benefit from the service received by the employee. The Company has in its financial statements, accounting records relating to events related to employee benefits, including events related to post-employment benefits and other post-employment benefits. The effects relating to changes of the standard are presented in the table of adjustments for adoption of new practices and accounting estimates.

CPC 36 Consolidated Financial Statements the objective of this Standard is to increase the relevance, reliability and comparability of information that the parent Company provides in its financial statements, and the entities that are under control. It specifies the circumstances in which the entity should consolidate the financial statements of another entity (a subsidiary), the treatment in changes in ownership, in loss of controlling interest and the information that must be evidenced to enable users of financial statements to assess the nature of the relationship between the entity and its subsidiaries. The effects relating to changes of

this standard are presented in the table of adjustments for adoption of new practices and accounting estimates.

CPC 37 Initial adoption of International Accounting Standards the objective of this Standard, basically applied to the consolidated financial statements, is to ensure that the first consolidated financial statements of an entity in accordance with International Accounting Standards issued by the IASB International Accounting Standards Board (IFRSs - International Financial Reporting Standards) and the disclosures accounting for the interim periods covered by such financial statements contain high quality information and have the same net income and stockholders equity, except in exceptional situations. The Company is adopting this standard in January 1, 2010, and comparing to January 1, 2009. The statements (note for the first adoption, with the appropriate reconciliations) will be released on December 31, 2010, compared to 2009.

Table of Contents

CPC 38 Financial Instruments: Recognition and Measurement, CPC 39 Financial Instruments: Presentation and CPC 40 Financial Instruments: Disclosure. The goal of the CPC 38 is to establish principles for recognizing and measuring financial assets, financial liabilities and some contracts of buy and sell non-financial items. The goal of the CPC 39 is to establish principles for presenting financial instruments as liabilities or equity and for offsetting financial assets and liabilities. Applying the classification of financial instruments, from the perspective of the issuer, into financial assets, financial liabilities and equity instruments, the classification of their interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities should be offset. The goal of the CPC 40 is to require the entity to disclose in its financial statements what allows users to evaluate the significance of the financial instrument for the financial position and performance of the entity and the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and the end of the accounting period, and how the entity manages those risks. The Company already adopted the concepts and requirements in accordance with this standard. During the initial adoption process, the relevant effects were identified, and described in the table of adjustments for adoption of new practices and accounting estimates.

CPC 41 Earning per Share the objective of this standard is to establish principles for measurement and disclosure of earnings per share, in order to improve performance comparisons between different companies in the same period, as well as for the same Company at different periods. Even though earnings per share information has been limited because of different accounting principles used to determine the results of the period, a consistent denominator improve the presentation of the financial reports. The standard focuses on the denominator of the earning per share calculation. The standard should be applied to the consolidated and individual financial statements of the Company in which common shares or potential common shares are publicly traded (national and foreign stock exchange or informal trade market, including local and regional market), or Companies that had been registered or that are in process of registering in the CVM or other official regulator, with the purpose of distribute common shares or potential common shares in the formal market. Normally, earning per share is calculated in a common shares context and so is deliberate by deducing the earnings attributable to the preferred shares owners from the results of the period. However certain preferred shares are equivalent to common shares in the Brazilian scenario (even in others countries), the standard establish that everything related to calculation and disclosure of the basic and diluted earning per common share is applicable to the calculation and disclosure of the basic and diluted earning per preferred share, by class, independent of your categorization as capital or debt, if the shares are being traded or in process to be traded at formal markets. The Company adopted this guidance.

In addition to these standards, we also adopt the respective interpretations, instructions and guidelines applicable as follows:

CVM 485 instruction (alter the CVM 457 instruction) provides for the preparation and disclosure of consolidate financial statements, according to the international accounting standards issued by the International Accounting Standards Board IASB. The consolidated financial statements to the public companies should be prepared in accordance with the international pronouncements and standards issued by the Account Standard Committee (Comite de Pronunciamentos Contabeis CPC) and Securities and Exchange Commission (Comissao de Valores Mobiliarios CVM). The public Companies should disclosure into the explanatory notes to the consolidated financial statements an explicit note and without reserves that the financial statements are in accordance with the international accounting standards issue by IASB and also in accordance with the accounting principles adopted in Brazil. The Company adopted this guidance.

ICPC 01 Grant Contracts the objective of this interpretation is to guide the grantee about the accounting for public services concession to private entities. This interpretation is applicable to concession if the grantor has the control over which services the grantee has to provide regarding infrastructure, to whom must provide the services, its price or whatever relevant residual interest existing up to concession deadline. Also is applicable to the existing or acquired infrastructure by the grantee from third parties. The Company begun to recognize those assets into intangible assets, not recording, in this moment, any financial asset for understanding that there is no unconditional evidence of receiving from the Grantor for those assets.

ICPC 13 Participation Rights from Decommissioning, Restoration and Environmental Rehabilitation Funds the purpose of the decommissioning fund is to segregate assets for defray any or all costs of assets decommissioning. The contributions to the fund can be voluntaries or required by law or regulation. The funds can present established structure by a single or multiple payers to pay its individual or joint obligations. The payer should record a liability for your obligation to pay decommissioning expenses and must record your fund interest separately, except if the payer is not responsible for paying the decommissioning expenses even if the fund fails to pay. If the payer does not has the control, joint control or any significant influence over the fund, should recognize the rights to receive reimbursement from the fund as reimbursement and to measure at the lower between the obligation and the portion of the payer recognized the fair value of net assets of the fund attributable to payers. The changes in book value of the rights to receive reimbursement, except the fund contributions, should be recorded in the results for the period that changes occurred. The Company does not have this kind of fund, and its assets are accounted under other accounting pronouncements.

Table of Contents

For the periods covered by the first financial statements in accordance with the new principles, the Company has evaluated the new rules and as a result of the adoption of the standards relevant to their initial balances has made adjustments in the intermediate and comparative statements as follows:

Employee benefits (CPC 33) the Company made early records in employee benefit plans immediately recognized an increase in liabilities with the offset in deferred income tax assets and in equity. In these adjustments also are included gains and losses relating to previous accounting policy, which would fall within the limits of the corridor practices adopted by the Company for recognition of actuarial gains and losses from employees benefit plans in the previous principles, which continued to being adopted for new principles.

Provision for assets retirement obligation (CPC 25) the entries made for the initial adoption of this statement; refer to the differences between the historical interest rates on long-term used in previous and use in new items for the calculation of the discounted present value of obligations for asset retirement.

Financial instruments (CPC 38) the entries made for the initial adoption of this standard are related to the additional remuneration of mandatorily convertible securities, debt remuneration, and additional dividends.

Leasing the Company recognized as fixed assets with an offset in loans and financing, the amount due to leasing contracts previously classified as operational leasing.

Deferred income tax the adjustments in this account refer basically a transfer of the shares recorded as current assets to non-current liabilities, according to CPC 26. The amount comprises with a tax loss of the parent Company of R\$397,109 September 30, 2010 against R\$799,243 December 31, 2009, and expects to realize it even in 2010.

Minority interest this line is now called Non-controlling shareholders participation and was assigned to Equity in accordance with CPC 26 and CPC 36. The participation of non-controlling shareholders, recorded in Equity requires that the movement of items of those shareholders occur in a similar way as those submitted to the controlling shareholders.

Redeemable non-controlling shareholders the participation of non-controlling shareholders that is redeemable upon the occurrence of certain events beyond the control of the Company was classified as shares of redeemable non-controlling shareholders in non-current liabilities.

4- Principles and Consolidation Practices

The quarterly condensed consolidated financial statements reflect the balances of assets, liabilities and shareholders equity at September 30, 2010 and December 31, 2009 and the operations for the quarters ended September 30, 2010 and 2009 of the parent Company and its direct and indirect subsidiaries and shared control. Overseas operations are translated into the reporting currency of financial statements in Brazil and are accounted for under equity, full or proportional consolidation of financial statements.

Vale participation in hydroelectric projects in Brazil is done through consortium contracts under which the Company participates in assets and liabilities of enterprises in proportion to the share holding of the power generated. The Company has no joint liability for any obligation. Since there is no legal entity for the project, there are no stand alone, income tax, net income and equity. Brazilian law clearly states that no separate entity as a result of the consortium contract. Thus, Vale recognizes the proportionate share of costs and undivided interests in assets related to hydroelectric projects.

5- Acquisitions and Disposals**a) Fertilizers Business**

In line with the strategy of the Company to become a leading global player in the fertilizer business, on May 27, 2010, Vale acquired 58.6% of the equity capital of Vale Fertilizantes S.A. (formely Fosfértil) and the Brazilian fertilizer assets of Bunge Participações e Investimentos S.A. (BPI) for a total of R\$ 8,692,537 in cash. An additional payment was done in July 2010 in the amount of R\$ 102,845 as an add to purchase price of Vale Fosfatados.

Information about the purchase price allocation presented below based on the fair values of identified assets acquired and liabilities assumed is preliminary. Such allocation, currently being performed internally by the Company, will be finalized during future periods, and accordingly, the preliminary purchase price allocation information set forth below is subject to revision, which may be material.

| | |
|--|------------------|
| Purchase price | 8,692,537 |
| Noncontrolling interest (*) | 3,316,930 |
| Book value of assets acquired and liabilities assumed, net | (4,395,902) |
| Adjustment to fair value of property, plant and equipment | (9,307,406) |
| Adjustment to fair value of inventories | (180,761) |
| Deferred taxes on the above adjustments | 3,225,977 |
| Goodwill | 1,351,375 |

(*) Noncontrolling interests consideration is calculated based on the option contract and market prices for the remaining noncontrolling interest.

As part of this acquisition, on September 29, 2010, the Company exercised an option contract to acquire additional 20.27% stake in Fosfertil, for US\$1.0 billion (equivalent in September 30, 2010 to R\$ 1,753 million). Also, Vale launched a mandatory offer to acquire the 0.19% of the common shares held by the noncontrolling shareholders.

If the acquisition of these assets had been completed on January 1, 2010, our net income would increase by R\$ 80.159 and our net revenues would increase by R\$ 829.010.

The goodwill balance arises primarily due to the synergies between the acquired assets and the potash operations in Taquari-Vassouras, Caranalita, Rio Colorado and Neuquém and phosphates in Bayóvar I and II, in Peru, and Evate, in Mozambique. The future development of our projects combined with the acquisition of the portfolio of fertilizer assets will allow Vale to be one of the top players in the world fertilizer business.

Table of Contents**b) Other transactions**

In September 2010, Vale required 51% state in Sociedade de Desenvolvimento do Corredor Norte S.A. (SDCN) for US\$20 million (equivalent to R\$34 million in September 30, 2010). The SDCN has the concession to create a logistic infrastructure necessary for production flow resulting from the second phase of our Moatize Project.

As part of the Company efforts to meet the future production targets, the Company acquired 51% interest on iron ore concession rights in Simandou South (Zogota), Guinea and iron ore exploration permits in Simandou North. From this amount, R\$ 900,750 is payable immediately and the remaining US\$ 2 billion (equivalent to R\$ 3,388 million in September 30, 2010) upon achievement of specific milestones. This joint venture is also committed to renovate 660 km of the Trans-Guinea railway for passenger transportation and light commercial use.

In July, 2010, Vale concluded the sale of minority stakes in the Bayóvar project in Peru through the newly-formed company MVM Resources International B.V. (MVM). The Company sold 35% of the total capital of MVM to Mosaic for R\$ 682,181 and 25% to Mitsui for R\$ 487,272. Vale retains control of the Bayóvar project, holding 40% stake of the total capital of the newly-formed company. The capital amount invested as at June 30, 2010 was approximately US\$550,000 (equivalent to R\$ 931,810 million in September 30, 2010). The gain on this transaction will be accounted for in equity in accordance with the accounting rules related to the gains/losses when control is retained.

In June, 2010, Vale acquired an additional 24.5% stake in the Belvedere coal project (Belvedere) for R\$ 167,946 from AMCI Investments Pty Ltd (AMCI). As an outcome of this transaction, the Company increased its participation in Belvedere from 51.0% to 75.5%.

In May, 2010, Vale entered into agreement with Oman Oil Company S.A.O.C. (OOC), a company wholly-owned by the Government of the Sultanate of Oman, to sell 30% of Vale Oman Pelletizing Company LLC (VOPC), for US\$ 125 million (equivalent to R\$ 212 million in September 30, 2010). The transaction remains subject to the terms set forth in the definite share purchase agreement to be signed after the fulfillment of precedent conditions.

Vale has entered into negotiations and agreements to sell Kaolin, aluminum and alumina assets. For further details see note 10.

(*) Classified as held for sale in September, 2010 (see note 10).

10- Assets and liabilities held for sale

Aluminium

In connection with our strategy of active portfolio asset management, Vale entered entered in May 2010 into an agreement with Norsk Hydro ASA (Hydro), to sell all our stakes in Albras Alumínio Brasileiro S.A. (Albras), Alunorte Alumina do Norte do Brasil S.A. (Alunorte) and Companhia de Alumina do Pará (CAP), 60% of the Paragominas bauxite mine and all our other Brazilian bauxite mineral rights (Aluminum Business).

For the Vale s interest in Albras, Alunorte and Cap, the Company will receive US\$ 405 million in cash, and net debts assumption in the amount of US\$ 700 million for the Hydro, and 22% of Hydro s share capital. By Vale s interest in

Paragominas of 60% and for the mining rights, the Company will receive the amount of US\$ 600 million. The company will sell 40% of Paragominas in two tranches of US\$ 200 million in cash.

Table of Contents

The company has assessed that the expected fair value of the transaction is higher than the net asset carrying value and accordingly has maintained the original amounts. Also, because of the significant influence the company will hold on Hydro, aluminum was not considered a discontinued operation.

Kaolin

As part of our portfolio management, we have entered into negotiations with the intention to sell our net assets of linked to kaolin activities. In August 2010, we sold part of our Kaolin's assets and measured these remaining assets at fair value less costs to sell and the total loss in operation is being recognized in discontinued operations, net of tax.

As of September 30, 2010, detailed amounts of these assets and liabilities classified as held for sale are as follows:

| | Consolidated |
|---|---------------------|
| Assets held for sale | |
| Property, plant and equipment | 8,091,363 |
| Advances to suppliers – energy | 841,590 |
| Inventories | 706,064 |
| Recoverable taxes | 1,023,853 |
| Other assets | 810,907 |
| Total | 11,473,777 |
| | |
| Liabilities associated with assets held for sale | |
| Non-controlling interests | 3,207,153 |
| Long-term debt | 1,222,962 |
| Suppliers | 211,484 |
| Other | 500,279 |
| Total | 5,141,878 |

11- Income Tax and Social Contribution

Income taxes in Brazil comprise federal income tax and social contribution. The statutory composite enacted tax rate applicable in the periods presented is 34%. In other countries where we have operations, we are subject to various tax rates, depending of consolidation.

The amount reported as income tax and social contribution result in the consolidated financial statements is reconciled to the statutory rates, as follows:

(*) Includes Eurobonds. For this operation we have entered into derivative transactions at a cost of 4,71%% per year in US dollars.

(**) Includes non-convertible debentures and other Brazilian Real denominated debt that bear interest at the Brazilian Interbank Certificate of Deposit (CDI) and Brazilian Government Long-term Interest Rates (TJLP) plus a spread. For these operations we have entered into derivative transactions to mitigate our

exposure to the floating rate debt denominated in Brazilian Real, totaling R\$ 11,707,566 of which R\$ 10.720.542 has original interest rate above 7.1% per year. The average cost after taking into account the derivative transactions is 4.43% per year in dollars.

The average cost of all derivative transactions is 4.47% per year in US dollars.

In September 2010, Vale signed an agreement with the Export Import Bank of China and the Bank of China Limited to financing construction of 12 ships, with 400,000 dwt capacities, in the amount of US\$ 1.229 billion. The term for payment is 13 years and Vale will receive the proceeds during the next 3 years, in accordance with the ship s construction schedule.

In September 2010, Vale issued US\$1 billion (equivalent to R\$ 1,694,200) notes due 2020 and US\$ 750 (equivalent to R\$ 1,271,650) notes due 2039. The 2020 notes were sold at a price of 99.030% of the principal amount and will bear a coupon of 4.625% per year, payable semi-annually. The 2039 notes that were sold at a price of 110.872% of the principal amount will be consolidated with and form a single series with Vale Overseas s US\$ 1 billion 6.875% Guaranteed Notes due 2039 issued on November 10, 2009.

In June 2010 we entered into a bilateral pre-export finance agreement in the amount of US\$500 million and final tenor of 10 years.

In March, 2010, we issued EUR750 million (equivalent to R\$ 1,805,700) of 8-year euronotes at a price of 99,564% of the principal amount. These notes will mature in March 2018 and will bear a coupon of 4,375% per year, payable annually.

In January 2010, we redeemed all outstanding export receivables securitization 10-year notes issued in September 2000 at an interest rate of 8.926% per year and the notes issued in July 2003 at an interest rate of 4.43% per year. The outstanding principal amounts of those September 2010 notes were R\$ 48 million and for the July 2013 notes were R\$ 213 million, totaling R\$ 261 million of debt redeemed.

Guarantee

On September 30, 2010, R\$316,660 (December 31, 2009 R\$1,310,316) of the total aggregate outstanding debt were secured by receivables. The remain outstanding debt in the amount of R\$ 42,483,200 (December 31, 2009 R\$ 40,132,717) were unsecured.

Our principal covenants require us to maintain certain ratios, such as debt to EBITDA and interest coverage. We have not identified any events of noncompliance as of September 30, 2010.

Credit Lines

Additionally, Vale has revolving credit lines available under which amounts can be drawn down and repaid at the option of the borrower. On September 30, 2010, the total amount available under revolving credit lines was US\$1,600 million (equivalent to R\$ 2,710,720), of which US\$850 million (equivalent to R\$ 1,440,070) was granted to Vale International and the balance to Vale Inco. As of September 30, 2010, neither Vale International nor Vale Inco had drawn any amounts under these facilities, but US\$111,368 (equivalent to R\$ 188,680) of letters of credit were issued and remained outstanding pursuant Vale Inco s facility.

On October 4, 2010, we entered into agreement with Export Development Canada (EDC), for the financing our capital expenditure program. Pursuant to the agreement, EDC will provide a facility in an amount up to US\$1 billion (equivalent to R\$ 1,694,200 at September 2010). US\$500 will be available for investments in Canada and the remaining US\$500 will be related to existing and future Canadian purchases of goods and services.

In May 2008, Vale entered into framework agreements with the Japan Bank for International Cooperation in the amount of US\$3 billion (equivalent to R\$ 5,082,600 at September 2010) and Nippon Export and Investment Insurance in the amount of US\$2 billion (equivalent to R\$ 3,388,400 at September 2010) for the financing of mining, logistics and power generation projects. In November, 2009, Vale signed a US\$300 million (equivalent to R\$ 525,150) export facility agreement, through its subsidiary PT International Nickel Indonesia Tbk (PTI), with Japanese financial institutions using credit insurance provided by Nippon Export and Investment Insurance NEXI, to finance the construction of the Karebbe hydroelectric power plant on the Larona river, island of Sulawesi, Indonesia. Through September 30, 2010, PT International had drawn down US\$150 million (equivalent to R\$ 261,180) on this facility.

Table of Contents

In 2008, we established a credit line for R\$7.3 billion, with Banco Nacional de Desenvolvimento Econômico e Social BNDES (the Brazilian National Development Bank) to support our investment program. Up to September 30, 2010, Vale had drawn the amount of R\$ 1,869,930 under this facility.

15- Provisions and Commitments

Vale and its subsidiaries are parties to labor, civil, tax and other suits underway and which are being contested both administratively and in court, which, when applicable, are backed by judicial deposits. Provisions for losses are estimated and recorded by Management based on the opinion of the Legal Department and its external legal counsels. In addition to the provisions recorded, there are other contingent liabilities, split between taxes, labor and civil claims, estimated as possible losses in the amount of R\$ 9,098,011 in the Consolidated (R\$ 3,821,057 in the parent Company).

Provisions of Contingencies

Provisions, considered by Management and its legal counsel are sufficient to cover probable losses from, are detailed as follows:

| | Consolidated | | Parent Company | |
|---|-------------------------------|------------------------------|-------------------------------|------------------------------|
| | September 30, 2010 | December 31, 2009 | September 30, 2010 | December 31, 2009 |
| | (unaudited) | | (unaudited) | |
| Tax contingencies | 1,682,877 | 1,932,701 | 627,477 | 1,171,861 |
| Civil contingencies | 904,163 | 934,609 | 657,842 | 539,429 |
| Labor contingencies | 1,117,022 | 1,273,181 | 898,358 | 993,335 |
| Environmental contingencies | 56,834 | 61,126 | 29,011 | 25,935 |
| Total accrued liabilities | 3,760,896 | 4,201,617 | 2,212,688 | 2,730,560 |
| | September 30, 2010 | December 31, 2009 | September 30, 2010 | December 31, 2009 |
| | (unaudited) | | (unaudited) | |
| Balance at the beginning of the period | 4,201,617 | 4,053,294 | 2,730,560 | 2,592,278 |
| Provisions, net of reversals | (417,527) | 535,621 | (327,701) | 191,536 |
| Settlements | (227,005) | (377,380) | (226,324) | (237,103) |
| Monetary variance | 203,811 | (9,918) | 36,153 | 183,849 |
| Balance at the end of period | 3,760,896 | 4,201,617 | 2,212,688 | 2,730,560 |

I) Tax Contingencies:

Main tax causes refer substantially to discussions about the calculation basis of the Financial Compensation by Exploration of Mineral Resources (CFEM) and on denials of applications for compensation claims in the settlement of federal taxes. Others refer to collections of Additional Compensation Labor Ports (AITP) and questions about the location for Tax Services (ISS) incidence.

In 2009, accrued values related to discussion of compensation for losses and negative basis of social contribution above 30% were wrote down, due to withdrawal of the action and therefore ended the process with release of funds deposited in escrow in favor of the Union.

II) Civil Contingencies:

The civil lawsuits are mainly related to claims made against the Company by contractors in connection with losses allegedly incurred by them as a result of several economic plans, accidents and return of land.

III) Labor Contingencies:

Labor and social security contingencies it refers mainly to claims for (a) payment of time spent traveling from their residences to the work-place, (b) additional health and safety related payments, and (c) disputes about the amount of indemnities paid upon dismissal and one-third extra holiday pay.

In addition to those provisions, there are judicial deposits that in September 30, 2010 totaled R\$ 2,930,331 (R\$ 3,108,522 at December 31, 2009) in Consolidated and R\$ 2,065,269 (R\$ 2,433,036 at December 31, 2009) in the parent Company.

Table of Contents**Other commitments**

In connection with a tax-advantaged lease financing arrangement sponsored by the French Government, Vale provided certain guarantees on December 30, 2004 on behalf of Vale New Caledonia S.A.S. (VNC) pursuant to which was guaranteed payments due from VNC of up to a maximum amount of US\$100 (Maximum Amount) in connection with an indemnity. This guarantee was provided to BNP Paribas for the benefit of the tax investors of GniFi, the special purpose vehicle which owns a portion of the assets in our nickel cobalt processing plant in New Caledonia (Girardin Assets). The Company also provided an additional guarantee covering the payments due from VNC of (a) amounts exceeding the Maximum Amount in connection with the indemnity and (b) certain other amounts payable by VNC under a lease agreement covering the Girardin Assets. This guarantee was provided to BNP Paribas for the benefit of GniFi.

Another commitment incorporated in the tax-advantaged lease financing arrangement was that the Girardin Assets would be substantially complete by December 31, 2009. In light of the delay in the start up of VNC processing facilities the December 31, 2009 substantially complete date was not met. Management proposed an extension to the substantially complete date from December 31, 2009 to December 31, 2010. Both the French government authorities and the tax investors have agreed to this extension. The French tax authorities issued their signed extension on March 12, 2010. Accordingly the benefits of the financing structure are fully expected to be maintained and Vale anticipates that there will be no recapture of the tax advantages provided under this financing structure.

In 2009, two new bank guarantees totaling US\$59 (43) as at September 30, 2010 were established by Vale on behalf of VNC in favor of the South Province of New Caledonia in order to guarantee the performance of VNC with respect to certain environmental obligations in relation to the metallurgical plant and the Kwe West residue storage facility.

Sumic Nickel Netherlands B.V. (Sumic), a 21% stockholder of VNC, has a put option to sell to us 25%, 50%, or 100% of the shares they own of VNC. The put option can be exercised if the defined cost of the initial nickel-cobalt development project, as measured by funding provided to VNC, in natural currencies and converted to U.S. dollars at specified rates of exchange, in the form of Girardin funding, shareholder loans and equity contributions by shareholders to VNC, exceeded US\$4.2 billion and an agreement cannot be reached on how to proceed with the project. On February 15, 2010, Vale has formally amended the agreement with Sumic to increase the threshold to approximately US\$4.6 billion at specified rates of exchange. On May 27, 2010 the threshold was reached and we are currently discussing with Sumic an extension of the put option date into the first half of 2011.

Vale provided a guarantee covering certain termination payments due from VNC to the supplier under an electricity supply agreement (ESA) entered into in October 2004 for the VNC project. The amount of the termination payments guaranteed depends upon a number of factors, including whether any termination of the ESA is a result of a default by VNC and the date on which an early termination of the ESA were to occur. During the first quarter of 2010 the supply of electricity under the ESA to the project began, and the guaranteed amount now decreases over the life of the ESA from its maximum amount. As at September 30, 2010 the guarantee was US\$176 million (131 million).

In February 2009, Vale and its subsidiary, Vale Newfoundland and Labrador Limited (VNL), entered into a fourth amendment to the Voisey's Bay Development agreement with the Government of Newfoundland and Labrador, Canada, that permitted VNL to ship up to 55,000 metric tonnes of nickel concentrate from the Voisey's Bay area mines. As part of the agreement, VNL agreed to provide the Government of Newfoundland and Labrador financial assurance in the form of letters of credit each in the amount of US\$16 million (CAD\$16 million) for each shipment of nickel concentrate shipped out of the province from January 1, 2009 to August 31, 2009. The amount of this financial assurance was US\$110 million (CAD\$112 million) based on seven shipments of nickel concentrate and as of June 30, 2010, US\$11 million (CAD\$11 million) remains outstanding.

As at September 30, 2010, there was an additional US\$111 million in letters of credit issued and outstanding pursuant to Vale's syndicate revolving credit facility, as well as an additional US\$41 million of letters of

credit and US\$48 million in bank guarantees that were issued and outstanding. These are associated with environmental reclamation and other operating associated items such as insurance, electricity commitments and import and export duties.

In September and April 2010 we paid remuneration on these debentures of R\$8.330 and R\$8.658, respectively. During 2010, we paid a total of R\$16.988.

(*) Includes R\$ 79,999 related to the purchase of Vale Fertilizantes S.A. and Vale Fosfatados S.A.

17- Pension Conts

Previously disclosed in our financial statements closing on 2009, hoping to contribute in fiscal year 2010 for pension and other benefits from the R\$ 521,526 in consolidated and R\$ 209,851 in the Parent Company. Until September 30, 2010 such contributions totaled R\$ 323,508 in consolidated and R\$ 174,477 in the Parent Company. Do not expect significant changes in our preliminary estimate.

18- Long-term Incentive Compensation Plan

Under the terms of the long-term incentive compensation plan, the participants, restricted to certain executives, may elect to allocate part of their annual bonus to the plan. The allocation is applied to purchase preferred shares of Vale, through a predefined financial institution, at market conditions and with no benefit provided by Vale.

The shares purchased by each executive are unrestricted and may, at the participant's discretion, be sold at any time. However, the shares must be held for a three-year period and the executive must be continually employed by Vale during that period. The participant then becomes entitled to receive from Vale a cash payment equivalent to the total amount of shares held, based on the market rates. The total shares linked to the plan at September 30, 2010 and December 31, 2009, is 2,896,038 and 1,809,117, respectively.

Additionally, as a long-term incentive certain eligible executives have the opportunity to receive at the end of the triennial cycle a certain number of shares at market rates, based on an evaluation of their career and performance factors measured as an indicator of total return to stockholders.

We account for the compensation cost provided to our executives under this long-term incentive compensation plan, following the requirements Comitê de Pronunciamentos Contábeis CPC 10 Pagamentos Baseados em ações. Liabilities are measured at each reporting date at fair value, based on market rates. Compensation costs incurred are recognized, over the defined three-year vesting period. At September 30, 2010 and December 31, 2009, we recognized a liability of R\$ 159,465 and R\$ 124,517, respectively, through the Statement of Income.

Table of Contents**19 Stockholders equity****Capital**

Each holder of common and preferred class A stock is entitled to one vote for each share on all matters brought before stockholders meetings, except for the election of the Board of Directors, which is restricted to the holders of common stock. The Brazilian Government holds twelve preferred special shares which confer permanent veto rights over certain matters.

Both common and preferred stockholders are entitled to receive a mandatory minimum dividend of 25% of annual adjusted net income under Brazilian GAAP, once declared at the annual stockholders meeting. In the case of preferred stockholders, this dividend cannot be less than 6% of the preferred capital as stated in the statutory accounting records or, if greater, 3% of the Brazilian GAAP equity value per share.

In October, 2010, the Board of Directors approved the following proposals: (i) payment of the second tranche of the minimum dividend of US\$ 1.250 billion (equivalent to R\$ 2,118,750 in September 30, 2010), (ii) payment of an additional dividend of US\$ 500 (equivalent to R\$ 1,058,875 in September 30, 2010) . The payments will be made on October 29, 2010.

In April, 2010, the Company paid its stockholders the amount of R\$ 2,198,000 in the form of interest on stockholders equity, correspondent to R\$0,421660513 per share.

The members of the Board of Directors and the Executive Board together own 297,295 common shares and 1,145,337 preferred shares.

The Board of Directors has the power, without requiring an amendment to the bylaws, to allow the issue of new shares (authorized capital) including through the capitalization of profits and reserves up to the authorized limit of 3,600,000,000 common shares and 7,200,000,000 preferred shares without par value.

Funds linked to Future Mandatory Conversion into Shares

The outstanding issued mandatory convertible notes on September 30, 2010 is as follows:

| Headings | Date | | Amount (thousands of reais) | | |
|-------------------------------|-----------|------------|-----------------------------|----------------|------------|
| | Emission | Expiration | Gross | Net of charges | Coupon |
| Tranches VALE and VALE P-2012 | July/2009 | June/2012 | 1,858 | 1,523 | 6,75% a.a. |

The notes pay a coupon quarterly and are entitled to an additional remuneration equivalent to the cash distribution paid to ADS holders. These notes were classified as a capital instrument, mainly due to the fact that neither the Company nor the holders have the option to settle the operation, whether fully or partially, with cash, and the conversion is mandatory; consequently, they were recognized as a specific component of shareholders equity, net of financial charges.

The funds linked to future mandatory conversion, net of charges are equivalent to the maximum of common shares and preferred shares, as follows. All the shares are currently held in treasury.

| Headings | Maximum amount of shares | | Amount (thousands of reais) | |
|-------------------------------|--------------------------|------------|-----------------------------|-----------|
| | Common | Preferred | Common | Preferred |
| Tranches VALE and VALE P-2012 | 18,415,859 | 47,284,800 | 473 | 1,050 |

In June 2010, the notes series Rio and Rio P were converted into ADS and represent an aggregate of 49,305,205 common shares and 26,130,033 preferred class A shares respectively. The conversion was made using 75,435,238 treasury stocks held by the Company. The difference between the conversion amount and the treasury stocks book value of R\$ 2,027,981 was accounted for in additional paid-in capital in the stockholders equity.

In April, 2010, we paid to holders of mandatorily convertible notes additional interest: series RIO and RIO P, R\$ 0.722861 and R\$ 0.857938 per note, respectively and series VALE-2012 and VALE.P-2012, R\$ 1.042411 and R\$ 1.205663 per note, respectively.

Treasury Stock

On September 23, 2010, The Board of Directors approved a share buy-back program. The shares are to be held in treasury for subsequent sale or cancellation, amounting up to US\$ 2 billion and involving up to 64,810,513 common shares and up to 98,367,748 preferred shares. The share buy-back program was completely executed in October, 2010.

Table of Contents

As of September 30, 2010 we had acquired 108,299,565 shares in the amount of R\$ 2,921,658, as follows.

| Classes | Quantity of shares | | | December 31, 2009 | Unit acquisition cost | | | Average quoted market price | |
|-----------|-----------------------|-------------------|---------------------|-------------------------|-----------------------|------------|-------|--------------------------------|-------------------------|
| | September 30, 2010 | Increase | Decrease | | Average | Low (*) | High | September 30, 2010 | December 31, 2009 |
| Preferred | 72,577,171 | 21,125,300 | (26,130,033) | 77,581,904 | 30.03 | 1.17 | 46.50 | 42.02 | 33.22 |
| Common | 35,722,394 | 10,029,700 | (49,305,205) | 74,997,899 | 20.77 | 1.67 | 52.96 | 47.84 | 38.23 |
| | 108,299,565 | 31,155,000 | (75,435,238) | 152,579,803 | | | | | |

(*) original value before splits of shares in the amount of R\$ 14.02 for preferred shares and R\$ 20.07 for common shares.

Table of Contents**20- Basic and diluted earnings per share**

Basic and diluted earnings per share amounts have been calculated as follows:

(I) period adjusted by new CPC s accounting pronouncements, for comparative purposes, according to note 3.

Table of Contents

22- Other expenses

The income statement line Other operating expenses totaled R\$ 2,643,524 for the nine month period ended September 30, 2010, mostly due to pre operational expenses, loss of materials and idle capacity and stoppage operations expenses which comprised R\$ 310,590, R\$ 186,991 and R\$ 844,306 respectively.

23- Derivatives Financial Instruments

a) Risk Management Policy

Vale has developed its risk management strategy in order to provide an integrated approach of the risks the Company is exposed to. To do that, we evaluate not only the impact of market risk factors in the business results (market risk), but also the risk arising from third party obligations with Vale (credit risk) and those risks inherent in Vale's operational processes (operational risk).

The enterprise wide risk Management approach, that encompasses all kinds of risk, as well as the relations between the several market risk factors (correlations), aims to assess the impact that such events would bring considering the natural hedges presented in the company's portfolio. Therefore, when assessing the risk associated with Vale's business, one can observe the positive effect due to the mix of products and currencies in Vale's portfolio. This diversification implies in a natural reduction of the overall risk of the company. Any risk mitigation strategy, whenever necessary, will be implemented if it contributes significantly for the reduction on the volatility on Vale's cash flows bringing the risk of the company to an acceptable level.

Vale considers that the effective management of risk is a key objective to support its growth strategy and financial flexibility. The risk reduction on Vale's future cash flow contributes to a better perception of the company's credit quality, improving its ability to access different markets and reducing the financing costs. Therefore, the board of directors has established an enterprise-wide risk Management policy and a risk Management committee.

The risk management policy determines that Vale should evaluate regularly its cash flow risks as well as risk mitigation strategies. As previously stated, whenever considered necessary, these mitigation strategies should be put in place with the objective of reducing the risks regarding the obligations assumed by the Company, both with third parties and its shareholders.

The executive board is responsible for the evaluation and approval of the risk mitigation strategies recommended by the risk Management committee. The committee is responsible for overseeing and reviewing our risk Management principles and risk Management instruments, besides reporting periodically to the executive board regarding the Management process and risk monitoring, including the main risks Vale is exposed to and their impact on Vale's cash flow.

The risk management policy and procedures, that complement the risk management governance model, require the diversification of operations and counterparties and prohibit speculative transactions with derivatives.

Besides the risk management governance model, Vale has in place a well defined corporate governance structure with well defined roles and responsibilities. The recommendation and execution of derivative transactions are implemented by different and independent areas. It is the responsibility of the risk management department to define and propose to the risk management committee market risk mitigation strategies consistent with Vale and its wholly owned subsidiaries corporate strategy. It is the responsibility of the finance department to execute the risk mitigation strategies through the use of derivatives. The independence of the areas guarantees an effective control on these operations.

The monitoring and monthly evaluations of the consolidated risk exposure allow us to evaluate the financial results and the impact on Vale's cash flow, as well as guarantee that the initial goals will be achieved. The fair value measurements of the trades are reported weekly to Management.

All derivative trades were recognized in our balance sheet at fair value and their respective gains or losses were recognized according to the current accounting standard.

Considering the nature of Vale's business and operations, the main market risk factors which the Company is exposed are:

- Interest rates;
- Foreign exchange;
- Products prices;

Input and other costs.

b) Fair value computation methodology

Well-known market participants' valuation methodologies were used to compute the fair value of the financial instruments. These instruments were evaluated computing their present values considering market curves that impact the instrument on the valuation date. The curves and prices used in the pricing for each group of instruments are detailed in the topic 'market curves'.

The pricing method considered in the case of European options is the Black & Scholes model, which is widely used among derivatives market participants for the option pricing. In this model, the derivative fair value is a function of the volatility, spot price of the underlying asset, the strike price, the risk free rate and the time to maturity. In the case of options where the financial result is a function of the average of the underlying price for a certain period of the time, called Asian options, we use the Turnbull & Wakeman model, also widely used to price this type of instrument. Besides the parameters used on the Black & Scholes model it is considered in this model the price averaging period.

Table of Contents

In the case of swaps, the long and short legs' present values are estimated discounting their cash flows using the interest rate of the currency in which they are denominated. The difference between the present values of the long leg and short leg of the swap is the fair value.

In the case of swaps linked to TJLP, the fair value calculation considers constant the TJLP rate, that is, the future cash flows in reais are forecasted considering the last TJLP published.

The pricing for the commodities future settlement contracts (buy or sell) is computed using forward curves for each commodity. Normally, these curves are collected in the exchanges where these commodities are traded, among them, London Metals Exchange (LME) and COMEX (Commodities Exchange) or market price providers. When there is no price for a specific date, we use interpolations between the available periods.

c) Value at Risk computation methodology

The Value at Risk of the positions was measured using a delta-Normal parametric approach, which considers that the future distribution of the risk factors and its correlations tends to present the same statistic properties verified in the historical data. The value at risk of Vale's derivatives current positions was estimated considering one business day time horizon and a 95% confidence level.

d) Sensitivity Analysis methodology

In the topic Sensitivity Analysis we present the table with potential gain/loss for all outstanding positions as of September 30, 2010 considering pre-defined stress scenarios defined for the main market risk factors.

e) Contracts subjected to margin calls

Vale has contracts subject to margin calls only for part of copper and nickel trades executed by its wholly-owned subsidiary Vale Canada Ltd. The total cash amount as of September 2010 was not relevant.

f) Initial Cost of Contracts

The financial derivatives negotiated by Vale and its controlled companies described in this document didn't have initial costs (initial cash flow) associated. Even the option contracts were executed through zero cost structures (zero cost collars).

g) Foreign Exchange and Interest Rate Derivative Positions

The Company's cash flow is subjected to volatility of several different currencies against the U.S. Dollar. While most of our product prices are indexed to US dollars, most of our costs, disbursements and investments are indexed to currencies other than the U.S. Dollar, mainly Brazilian Reais and Canadian dollars.

In order to reduce the company's potential cash flow volatility arising from this currency mismatch we use FX derivatives instruments. The main strategy used by Vale is to swap Debts linked to Brazilian reais into U.S. Dollars so as to attenuate the impact of BRL/USD exchange rate as most of our revenues are denominated in USD.

The swap transactions used to convert debt linked to Brazilian reais into U.S. Dollars have similar and sometimes shorter settlement dates than the final maturity of the debt instruments. Their amounts are similar to the principal and interest payments, subjected to liquidity market conditions. The swaps with shorter settlement date than the debts' final maturity are renegotiated through time so that their final maturity match or become closer to the debt final maturity. At each settlement date, the results on the swap transactions partially offset the impact of the foreign exchange rate in our obligations, contributing to stabilize the cash disbursements in U.S. Dollars for the interest and/or principal payment of our Brazilian Real denominated debt.

In the event of an appreciation (depreciation) of the Brazilian Real against the U.S. Dollar, the negative (positive) impact on Vale debt service (interest and/or principal payment) measured in U.S. Dollars will be almost totally offset by a positive (negative) effect from the swap transaction, regardless of the U.S. dollar / Brazilian Real exchange rate on the payment date.

Vale has also a cash flow exposure to interest rates risks over loans and financings. The U.S. Dollars floating rate debt in the portfolio consists mainly of loans including export pre-payments, commercial banks and multilateral organizations loans. In general, the U.S. Dollar floating rate debt is mainly subject to changes in the Libor. To mitigate the impact of the interest rate volatility on the cash flow, Vale takes advantage of natural hedges allowed by the positive correlation of metal prices and U.S. Dollar floating rates. When natural hedges are not present, Vale enters into financial instruments to obtain the same effect.

Table of Contents

As of September 30, 2010, the total amount and interests of Brazilian Real denominated debt converted through swaps into US Dollars was R\$ 11.7 billion (US\$ 6.9 billion), and the total amount and interests of Euro denominated debt converted through swaps into US Dollars was 500 million (US\$ 682 million). The average cost in dollars was 4.47% after the swaps transactions were implemented. Due to liquidity constraints, the swaps average payment term might be shorter than the debt average payment term.

The following tables show as of September 30, 2010, the derivatives positions for Vale and controlled companies with the following information: notional amount, fair value, value at risk, gains or losses in the period and the fair value breakdown by payment date for each group of instruments.

Protection program for the Real denominated debt indexed to CDI

CDI vs. USD fixed rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows from debt instruments denominated in Brazilian Reais linked to CDI to U.S. Dollars. In those swaps, Vale pays fixed rates in U.S. Dollars and receives payments linked to CDI.

CDI vs. USD floating rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows from debt instruments denominated in Brazilian Reais linked to CDI to U.S. Dollars. In those swaps, Vale pays floating rates in U.S. Dollars (Libor London Interbank Offered Rate) and receives payments linked to CDI.

Those instruments were used to convert the cash flows from debentures issued in 2006 with a nominal value of R\$ 5.5 billion, from the NCE (Credit Export Notes) issued in 2008 with nominal value of R\$ 2 billion and also from property and services acquisition financing realized in 2006 and 2007 with nominal value of R\$ 1 billion.

Type of contracts: OTC Contracts

Protected Item: Debts linked to BRL

The protected items are the Debts linked to BRL because the objective of this protection is to transform the obligations linked to BRL into obligations linked to USD so as to achieve a cash flow currency offset by matching Vale's receivables (mainly linked to USD) with Vale's payables.

Protection program for the real denominated debt indexed to TJLP

TJLP vs. USD fixed rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows of the loans with Banco Nacional de Desenvolvimento Econômico e Social (BNDES) from TJLP¹ to U.S. Dollars. In those swaps, Vale pays fixed rates in U.S. Dollars and receives payments linked to TJLP.

TJLP vs. USD floating rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows of the loans with BNDES from TJLP to U.S. Dollars. In those swaps, Vale

pays floating rates in U.S. Dollars and receives payments linked to TJLP.

| Flow | Notional (\$ million) | | Average Index Rate | Fair value | | Realized Gain/Loss | | R\$ Million Fair value by year | | | | | |

Type of contracts: OTC Contracts

Protected Item: part of Vale's costs in Australian Dollar.

The P&L shown is offset by the protected items' P&L due to USD/AUD exchange rate. Again, the final objective of this program, according to the currency hedging strategy at Vale, is to achieve a currency offset matching receivables with payables.

Protection Program for Foreign Exchange and Interest on the first nine months of 2010

On March, Vale contracted similar swap transactions in order to reduce the cash flow volatility due to the foreign exchange transaction of the bond issued in Euro. These swaps were hired and settlement on March, when Vale received R\$ 3.6 million

Between May and June, Vale entered into swap transactions to protect against the market the changes on the foreign exchange rate between U.S. dollars and Brazilian reais in order to reduce the cash flow volatility due to the foreign exchange transaction of the mandatory convertibles. In these swaps, entered Vale paid a fixed rate in U.S. dollars and received a fixed rate in Brazilian reais. On the maturity date, June 14th, Vale received R\$ 67 million.

On September, Vale contracted interest rate swap transactions in order to fix the treasury used in the pricing of Vale's 10 year bond emission, neutralizing part of the emission cost. These swaps were acquired and settlement on September, when Vale received R\$ 1.5 million.

h) Commodity Derivative Positions

The Company's cash flow is also exposed to several market risks associated to commodities price volatilities. To reduce the volatility effects, Vale contracted the following derivatives transactions:

Aluminum Strategic cash flow hedging program

In order to hedge our cash flow for 2010, Vale entered into hedging transactions where we set fixed prices for part of Vale revenues for these periods.

| Flow | Notional (ton) | | Buy/Sell | Average Strike (USD/ton) | Fair value | | Realized Gain/Loss | VaR | R\$ million Fair value by year 2010 |
|------------|----------------|----------------|----------|--------------------------|-------------|-------------|--------------------|----------|-------------------------------------|
| | 30-Sep-10 | 31-Dec-09 | | | 30-Sep-10 | 31-Dec-09 | | | |
| Put | 30,000 | 120,000 | B | 1,940 | 0.1 | 15 | 0.03 | | |

Type of contracts: OTC and LME Contracts

Protected Item: part of Vale's revenues linked to Nickel price.

The P&L is offset by the protected items' P&L due to Nickel price.

Nickel Sales Hedging Program

In order to reduce the cash flow volatility in 2010 and 2011, hedging transactions were implemented. These transactions fixed the prices of part of the sales in the period.

| Flow | Notional (ton) | | Buy/Sell | Average | Fair value | Realized | | R\$ million | | |
|---------|----------------|-----------|----------|------------------|------------|-----------|-----------|--------------------|------|------|

| Forward | 19,500 | | S | 21,869 | (43) | | 19 | (2) | (41) | |

Type of contracts: OTC Contracts

Protected Item: part of Vale's revenues linked to Nickel price.

The P&L shown is offset by the protected items' P&L due to Nickel price.

Nickel Fixed Price Program

In order to maintain the exposure to Nickel price fluctuations, we entered into derivatives to convert to floating prices all contracts with clients that required a fixed price. These trades aim to guarantee that the prices of these operations would be the same as the average prices negotiated on the LME on the date the product is delivered to the client. It normally involves buying Nickel forwards (Over-the-Counter) or futures (exchange negotiated). These operations are usually reverted before the maturity in order to match the settlement dates of the commercial contracts in which the prices are fixed. Whenever the Nickel Strategic cash flow protection program or the Nickel Sales Hedging Program are executed, the Nickel Fixed Price Program is interrupted.

| Flow | Notional (ton) | | Buy/Sell | Average | Fair value | Realized | | R\$ million | | |
|----------------|----------------|-----------|----------|------------------|------------|-----------|-----------|--------------------|------|------|
| | 30-Sep-10 | 31-Dec-09 | | Strike (USD/ton) | | Gain/Loss | VaR | Fair value by year | | |
| | 30-Sep-10 | 31-Dec-09 | | | 30-Sep-10 | 30-Sep-10 | 30-Sep-10 | 2010 | 2011 | 2012 |
| Nickel Futures | 2,292 | 3,426 | B | 16,888 | 25 | 21 | 26 | 2 | 9 | 15 |

Type of contracts: LME Contracts

Protected Item: part of Vale's revenues linked to fixed price sales of Nickel.

The P&L shown in the table above is offset by the protected items' P&L due to Nickel price.

Nickel Purchase Protection Program

In order to reduce the cash flow volatility and eliminate the mismatch between the pricing of the purchased nickel (concentrate, cathode, sinter and others) and the pricing of the final product sold to our clients, hedging transactions were implemented. The items purchased are raw materials utilized to produce refined Nickel. The trades are usually implemented by the sale of nickel future contracts on the LME or by forward over-the-counter operations.

| Flow | Notional (ton) | | Buy/Sell | Average | Fair value | Realized | | R\$ million | | |
|------|----------------|-----------|----------|------------------|------------|-----------|-----------|--------------------|------|------|

|----------------|-----|-------|---|--------|-------|-----|------|---|-------|

Type of contracts: LME Contracts

Protected Item: part of Vale's revenues linked to Nickel price.

The P&L shown in the table is offset by the protected items' P&L due to Nickel price.

Bunker Oil Purchase Protection Program

In order to reduce the impact of bunker oil price fluctuation on Vale's freight hiring and consequently reduce the company's cash flow volatility, bunker oil derivatives were implemented. These transactions are usually executed through forward purchases.

| Flow | Notional (mt) | | Buy/Sell | Average | Fair value | | Realized | | R\$ million | |
|---------|---------------|-----------|----------|-----------------|------------|-----------|-----------|-----|-------------|---------|
| | 30-Sep-10 | 31-Dec-09 | | Strike (USD/mt) | 30-Sep-10 | 31-Dec-09 | Gain/Loss | VaR | Fair value | by year |
| Forward | 345,000 | 452,000 | B | 440 | 15 | 78 | 45 | 4 | 10 | 5 |

Table of Contents

Type of contracts: OTC Contracts

Protected Item: part of Vale's costs linked to Bunker Oil price.

The P&L shown in the table above is offset by the protected items' P&L due to Bunker Oil price.

Maritime Freight Hiring Protection Program

In order to reduce the impact of maritime freight price fluctuation hired to support CIF and CFR sales and consequently reduce the company's cash flow volatility, freight derivatives (FFA - Forward Freight Agreement) were implemented. These transactions are usually executed through forward purchases.

| Flow | Notional (days) | | Buy/Sell | Average | Fair value | | Realized | | R\$ million Fair value by year 2010 |
|---------|-----------------|-----------|----------|---------------------|------------|-----------|------------------------|------------------|--|

| Forward | 1,748 | 6,125 | B | 30,634 | 4 | 50 | 29 | 8 | 4 |

Type of contracts: OTC Contracts

Protected Item: part of Vale's costs linked to Freight price.

The P&L is offset by the protected items' P&L due to Freight price.

Coal Sales Protection Program

In order to reduce the cash flow volatility for 2010, Vale entered into hedging transactions to fix the price of a portion of coal sales during the period.

| Flow | Notional (mt) | | Buy/Sell | Average | Fair value | | Realized | | R\$ million Fair value by year 2010 |
|---------|---------------|-----------|----------|--------------------|------------|-----------|------------------------|------------------|--|
| | 30-Sep-10 | 31-Dec-09 | | Strike (USD/mt) | 30-Sep-10 | 31-Dec-09 | Gain/Loss 30-Sep-10 | VaR 30-Sep-10 | |
| Forward | 120,000 | | S | 82 | (1) | | (2) | 0.3 | (1) |

Type of contracts: OTC Contracts

Protected Item: part of Vale's revenues linked to Coal price.

The P&L shown is offset by the protected items' P&L due to Coal price.

Copper Scrap Purchase Protection Program

This program was implemented in order to reduce the cash flow volatility due to the quotation period mismatch between the pricing period of copper scrap purchase and the pricing period of final products sale to the clients, as the copper scrap is combined with other raw materials or inputs to produce copper. This program is usually implemented by the sale of futures on the LME or by forwards through Over-the-Counter operations.

| Flow | Notional (lbs) | | Buy/Sell | Average | Fair value | | Realized | | R\$ million Fair value by year | |
|---------|----------------|-----------|----------|---------------------|------------|-----------|------------------------|------------------|--------------------------------------|-------|
| | 30-Sep-10 | 31-Dec-09 | | Strike (USD/lbs) | 30-Sep-10 | 31-Dec-09 | Gain/Loss 30-Sep-10 | VaR 30-Sep-10 | 2010 | 2011 |
| Forward | 515,300 | | S | 3 | (0.6) | | 0.12 | 0.1 | (0.3) | (0.3) |

Tipo de contrato: OTC Contracts

Item protegido: part of Vale's revenues linked to Copper price.

The P&L shown is offset by the protected items' P&L due to Copper price.

i) Embedded Derivative Positions

The Company's cash flow is also exposed to several market risks associated with contracts that contain embedded derivatives or derivative-like features. From Vale's perspective, it may include, but is not limited to, commercial contracts, procurement contracts, rental contracts, bonds, insurance policies and loans. The following embedded derivatives were observed in 2010:

Energy purchase

Energy purchase agreement between Albras, Vale's controlled subsidiary, and Eletronorte, in which there is a clause that defines that a premium can be charged if aluminum prices trades in the range from US\$ 1,450/t until US\$ 2,773/t. This clause is considered as an embedded derivative.

| Flow | Notional (ton) | | Buy/Sell | Average strike (USD/ton) | Fair value | | Realized Gain/Loss VaR | | R\$ million Fair value by year | | |
|--------------|----------------|-----------|----------|--------------------------|--------------|--------------|------------------------|-----------|--------------------------------|--------------|-------------|
| | 30-Sep-10 | 31-Dec-09 | | | 30-Sep-10 | 31-Dec-09 | 30-Sep-10 | 30-Sep-10 | 2010 | 2011 | 2012 |
| Call | 200,228 | 200,228 | B | 2,773 | 41 | 45 | | | | | |
| Call | 200,228 | 200,228 | S | 1,450 | (322) | (299) | | | | | |
| Total | | | | | (281) | (254) | | 12 | (110) | (138) | (33) |

Aluminum operations are held for sale since June 2010.

Table of Contents**Raw material and intermediate products purchase**

Nickel concentrate and raw materials purchase agreements in which there are provisions based on nickel and copper future prices behavior. These provisions are considered as embedded derivatives.

| Flow | Notional (ton) | | Buy/Sell | Average Strike (USD/ton) | Fair value | | Realized Gain/Loss VaR | | R\$ million Fair value by year 2010 |

j) Derivative Positions from jointly controlled companies

Below we present the fair values of the derivatives from jointly controlled companies. These instruments are managed under the risk policies of each company. However the nominal amounts and the effects of mark-to-market are recognized in financial statements to the extent of Vale's share in each one of these companies.

Protection program

In order to reduce the cash flow volatility, swap transactions was contracted to convert into Reais the cash flows from debt instruments denominated in US Dollars. In this swap, fixed rates in U.S. Dollars are received and payments linked to Reais (CDI index) are made.

| Flow | Notional (\$ million) | | Index | Average rate | Fair Value | | R\$ million VaR 30-Sep-10 |
|--------------------------------|-----------------------|-----------|-------|--------------|-------------|-------------|---------------------------|
| | 30-Sep-10 | 31-Dec-09 | | | 30-Sep-10 | 31-Dec-09 | |
| Swap fixed rate vs. CDI | | | | | | | |
| | USD | | USD | 2.57% | 186 | 210 | |
| Receivable | 106 | USD 114 | | | | | |
| Payable | \$ 206 | \$ 245 | CDI | 100.28% | (230) | (272) | |
| Net | | | | | (44) | (62) | 1 |

Type of contracts: OTC Contracts

Protected Item: Debts indexed to USD

The P&L shown is offset by the protected items P&L due to BRL/USD exchange rate.

Hedging program

Swap transactions to fix the rate of part of a USD denominated obligation linked to Libor USD were contracted. In this swap, floating rates (Libor USD) in US Dollars are received and payments linked to a fixed rate also in US Dollars are made.

R\$ million

| Flow | Notional (\$ million) | | Index | Average rate | Fair Value | | VaR |
|---|-----------------------|-----------|--------------|----------------|--------------|--------------|-------------|
| | 30-Sep-10 | 31-Dec-09 | | | 30-Sep-10 | 31-Dec-09 | 30-Sep-10 |
| Swap USD floating rate vs. fixed | | | | | | | |
| Receivable | USD 20 | USD 20 | Libor | Libor + 0,65 % | 23.3 | 30.0 | |
| Payable | | | Fixed | 3.98% | (24.1) | (30.9) | |
| Net | | | | | (0.8) | (0.9) | 0.01 |

Type of contracts: OTC Contracts

Hedged Item: Debts indexed to Libor USD

The P&L shown is offset by the hedged items P&L due to fluctuations in the Libor USD rate.

Table of Contents**k) Sensitivity Analysis on Derivatives**

The table presents potential gain/loss of all our outstanding positions on September 30, 2010 considering the following stress scenarios:

Fair Value: it is the mark to market value of the instruments on September 30, 2010;

Scenario I: unfavorable change of 25% Potential losses considering a shock of 25% in the market risk factors used for fair value calculation that **negatively** impacts the fair value of Vale's derivatives positions;

Scenario II: favorable change of 25% Potential profits considering a shock of 25% in the market curves used for fair value calculation that **positively** impacts the fair value of Vale's derivatives positions;

Scenario III: unfavorable change of 50% Potential losses considering a shock of 50% in the market curves used for fair value calculation that **negatively** impacts the fair value of Vale's derivatives positions;

Scenario IV: favorable change of 50% Potential profits considering a shock of 50% in the market curves used for fair value calculation that **positively** impacts the fair value of Vale's derivatives positions;

m) Sensitivity Analysis on Debt and Cash Investments

The Company's funding and cash investments linked to currencies different from Brazilian Reais are subjected to volatility of foreign exchange currencies, such as EUR/USD and USD/BRL.

Table of Contents*Amounts in R\$ million*

| Program | Instrument | Risk | Scenario I | Scenario II | Scenario III | Scenario IV |
|------------------|-------------------------|---------------------|-------------------|--------------------|---------------------|--------------------|
| Funding | Debt denominated in BRL | No fluctuation | | | | |
| Funding | Debt denominated in USD | USD/BRL fluctuation | (6,943) | 6,943 | (13,886) | 13,886 |
| Funding | Debt denominated in EUR | EUR/USD fluctuation | (5) | 5 | (10) | 10 |
| Cash Investments | Cash denominated in BRL | No fluctuation | | | | |
| Cash Investments | Cash denominated in USD | USD/BRL fluctuation | (2,401) | 2,401 | (4,803) | 4,803 |

n) Credit risk on financial trades and financial institutions ratings

Derivatives transactions are executed with financial institutions that we consider to have a very good credit quality. The exposure limits to financial institutions are proposed annually for the Executive Risk Committee and approved by the Executive Board. The financial institutions credit risk tracking is performed making use of a credit risk valuation methodology which considers, among other information, published ratings provided by international rating agencies. In the table below, we present the ratings in foreign currency published by Moody's e S&P agencies for the financial institutions that we had outstanding trades as of September 30, 2010.

| Parent Company | Vale's Counterparty | Moody's | S&P* |
