Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in NAV or market price (as applicable) with all distributions reinvested. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. Endnotes and Additional Disclosures

1. Performance results reflect the effects of leverage.
2. Market yields are calculated by dividing the last regular distribution per share (annualized) by the market price. Taxable-equivalent performance is based on the highest combined federal and state income tax rates (41.86% for CA, 38.45% for MA, 37.83% for MI, 40.83% for NJ, 40.83% for NY, 38.85% for OH, 37.00% for PA). Lower tax rates would result in lower tax-equivalent performance. Actual tax rate will vary depending on your income, exemptions and deductions. Rates do not include local taxes. The distribution declared on May 31, 2011 reflects a reduction of the monthly distribution for the Michigan, New Jersey and Ohio Funds. Distributions may be comprised of tax-exempt income, ordinary income, net realized capital gains and return of capital.
3. RIB leverage represents the amount of Floating Rate Notes outstanding as a percentage of Fund net assets applicable to common shares plus APS and Floating Rate Notes. See Floating Rate Notes Issued in Conjunction with Securities Held in the Notes to the financial statements for more information about RIB financing. APS leverage represents the liquidation value of the Fund's APS outstanding as a percentage of Fund net assets applicable to common shares plus APS and Floating Rate Notes. Use of leverage creates an opportunity for income, but creates risks including greater price volatility. The cost of leverage rises and falls with changes in short-term interest rates. The Fund is required to maintain prescribed asset coverage for its APS, which could be reduced if Fund asset values decline. Floating Rate Notes in both calculations reflect the effect of RIBs purchased in secondary market transactions, if applicable.
4. The Barclays Capital Long (22+) Municipal Bond Index is an unmanaged index of municipal bonds traded in the U.S. with maturities of 22 years or more. Unless otherwise stated, indices do not reflect any applicable sales charges, commissions, leverage, taxes or other expenses of investing. Lipper Average reflects the average annual total return of funds in the same Lipper classification as the Fund. It is not possible to invest directly in an index or Lipper classification.
5. Ratings are based on Moody, S&P or Fitch, as applicable. Credit ratings are based largely on the rating agency's investment analysis at the time of rating and the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition. The rating assigned to a security by a rating agency does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. If securities are rated differently by the rating agencies, the higher rating is shown.

Fund profile subject to change due to active management.

The Trust invests primarily in debt securities issued by New Jersey municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2011, 31.9% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 2.1% to 10.9% of total

investments.

The Trust invests primarily in debt securities issued by Ohio municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2011, 39.9% of total investments are backed by bond insurance of

various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.4% to 17.3% of total investments.

- (1) Security (or a portion thereof) has been pledged to cover margin requirements on open financial futures contracts.
- (2) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At May 31, 2011, the aggregate value of these securities is \$490,005 or 1.3% of the Trust's net assets applicable to common shares.

- (3) Security is subject to a shortfall agreement which may require the Trust to pay amounts to a counterparty in the event of a significant decline in the market value of the security held by the trust that issued the residual interest bond. In case of a shortfall, the maximum potential amount of payments the Trust could ultimately be required to make under the agreement is \$1,455,000. However, such shortfall payment would be reduced by the proceeds from the sale of the security held by the trust that issued the residual interest bond.
- (4) Security has been issued as a leveraged residual interest bond. The stated interest rate represents the rate in effect at May 31, 2011.

The Trust invests primarily in debt securities issued by Pennsylvania municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2011, 36.2% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 3.0% to 12.2% of total investments.

(1) Security (or a portion thereof) has been pledged to cover margin requirements on open financial futures contracts.

- (2) Security represents the municipal bond held by a trust that issues residual interest bonds (see Note 1H).
- (3) Security is in default and making only partial interest payments.
