SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q**

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the quarterly period ended September 30, 2011.

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from _____ to _____.

Commission file number: 000-26966

ADVANCED ENERGY INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

Delaware

84-0846841

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

1625 Sharp Point Drive, Fort Collins, CO

80525

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: **(970) 221-4670**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 31, 2011, there were 43,660,364 shares of the registrant's Common Stock, par value \$0.001 per share, outstanding.

ADVANCED ENERGY INDUSTRIES, INC.

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 1. BASIS OF PRESENTATION

We design, manufacture, sell and support power conversion products that transform power into various usable forms. Our products enable manufacturing processes that use thin-film processing and etching for various products, such as semiconductor devices, flat panel displays, solar panels and architectural glass. We also supply thermal instrumentation products for advanced temperature control in the thin-film process for these same markets. Our solar inverter products support renewable power generation solutions for residential, commercial and utility-scale solar projects and installations. Our network of global service support centers offer repair services, conversions, upgrades and refurbishments to companies using our products. We also offer a wide variety of operations and maintenance service plans that can be tailored for individual photovoltaic (PV) sites of all sizes.

We are organized into two strategic business units (SBU) based on the products and services provided.

Thin Films Processing Power Conversion and Thermal Instrumentation (Thin Films) SBU offers our products for direct current (DC), pulsed DC mid frequency, and radio frequency (RF) power supplies, matching networks and RF instrumentation as well as thermal instrumentation products.

Solar Energy SBU offers both a transformer-based or transformerless advanced grid-tied PV inverter solution for residential, commercial and utility-scale system installations. Our PV inverters are designed to convert renewable solar power, drawn from large and small scale solar arrays, into high-quality, reliable electrical power.

In the opinion of management, the accompanying unaudited Condensed Consolidated Financial Statements contain all adjustments, consisting of normal, recurring adjustments, necessary to present fairly the financial position of Advanced Energy Industries, Inc., a Delaware corporation, and its wholly-owned subsidiaries (we , us , our , Advanced Energy , or the Company) at September 30, 2011, and the results of our operations and cash flows for the three months and nine months ended September 30, 2011 and 2010.

The Condensed Consolidated Financial Statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) have been condensed or omitted pursuant to such rules and regulations. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements and Notes thereto contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 and other financial information filed with the SEC.

ESTIMATES AND ASSUMPTIONS The preparation of our Condensed Consolidated Financial Statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. We believe that the significant estimates, assumptions and judgments when accounting for items and matters such as allowances for doubtful accounts, excess and obsolete inventories, warranty reserves, acquisitions, asset valuations, asset life, depreciation, amortization, recoverability of assets, impairments, deferred revenue, stock option and restricted stock grants, taxes, and other provisions are reasonable, based upon information available at the time they are made. Actual results may differ from these estimates under different assumptions or conditions.

REVENUE RECOGNITION Our multiple deliverable arrangements involve the delivery of product, training, and installation services to our customers and can be long-term in nature. We have determined that the deliverables under these arrangements qualify as separate units of accounting. Revenue is allocated to the separate units of accounting based on vendor specific objective evidence as we sell each element on a stand-alone basis. Revenue is recognized for each element as it is delivered. Product delivery occurs based on the shipping terms included in the agreement.

NEW ACCOUNTING PRONOUNCEMENTS From time to time, the Financial Accounting Standards Board (FASB) or other standards setting bodies issue new accounting pronouncements. Updates to the FASB Accounting Standards Codification are communicated through issuance of an Accounting Standards Update. Unless otherwise discussed, we believe that the impact of recently issued guidance, whether adopted or to be adopted in the future, is not expected to have a material impact on our Condensed Consolidated Financial Statements upon adoption.

Table of Contents**NOTE 2. BUSINESS ACQUISITION AND DISPOSITION****Acquisition**

On May 3, 2010, we acquired all of the outstanding common stock of PV Powered, Inc. (PV Powered), a privately-held Oregon corporation based in Bend, Oregon, for approximately \$90.3 million consisting of 1.0 million shares of our common stock with a market value of approximately \$14.7 million and cash payments totaling \$75.6 million, net of cash acquired.

PV Powered is a leading manufacturer of grid-tied PV inverters in the residential, commercial and utility-scale markets. PV Powered manufactures high-reliability transformer-based PV inverters utilized in residential, commercial roof top and ground mount systems for the North American market. Its inverters range in size from 30 kilowatts (kW) to two megawatts for the commercial market and 1kW to 5kW for the residential market, with market leading efficiency ratings. PV Powered is included in our Solar Energy SBU.

We recorded the acquisition of PV Powered using the acquisition method of accounting and the purchase price was allocated to the tangible assets, intangible assets, and liabilities acquired based on estimated fair values as of the date of acquisition. The excess of the purchase price (consideration transferred) over the respective fair values of identifiable assets and liabilities acquired was recorded as goodwill. The goodwill resulting from the acquisition is not tax deductible. Our purchase price allocation is final as of June 30, 2011.

The components of the fair value of the total consideration transferred for the PV Powered acquisition are as follows (in thousands):

Cash paid to owners	\$ 76,301
Cash acquired	(724)
Common stock issued - 997,966 shares	14,690
Total fair value of consideration transferred	\$ 90,267

The following table summarizes the final fair values of the assets acquired and liabilities assumed in the acquisition (in thousands):

Accounts receivable	\$ 4,777
Inventories	8,363
Other current assets	277
Deferred tax assets	4,591
Property and equipment	4,065
Deposits and other noncurrent assets	67
Accounts payable	(5,480)
Accrued liabilities	(2,744)
Deferred tax liabilities	(18,711)
Other long-term liabilities	(2,739)
	(7,534)
Other intangible assets:	
Trademarks	5,277
Technology	28,208
In process research and development	14,868
Customer relationships	2,213

Backlog	720
Total other intangible assets	51,286
Total identifiable net assets	43,752
Goodwill	46,515
Total fair value of consideration transferred	\$ 90,267

Table of Contents

A summary of the intangible assets acquired, amortization method and estimated useful lives follows (in thousands):

		Amortization		
	Amount	Method	Useful Life	
Trademarks	\$ 5,277	Accelerated	10 years	
Technology	28,208	Accelerated	7 years	
In process research and development	14,868			
Customer relationships	2,213	Accelerated	7 years	
Backlog	720	Straight-line	6 months	
	\$ 51,286			

Our amortization of in process research and development does not begin until the specific project is complete and put into production.

Disposition

On October 15, 2010, we completed the sale of our gas flow control business, which includes our Aera® mass flow control and related product lines, to Hitachi Metals, Ltd. for approximately \$43.3 million.

In connection with the closing of this asset disposition, we entered into a Master Services Agreement and a Supplemental Transition Service Agreement (Transition Services Agreement) pursuant to which we agreed to provide certain transition services until October 11, 2011. The Transition Services Agreement has been extended through March 2012.

In accordance with authoritative accounting guidance for reporting discontinued operations, the revenues and costs associated with our gas flow control business are excluded from income from continuing operations and are presented as income from discontinued operations, net of taxes, in our Condensed Consolidated Statements of Operations.

Operating results from discontinued operations are as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Sales	\$ 10,726	\$ 15,722	\$ 21,280	\$ 42,671
Cost of sales	10,288	11,488	20,948	29,206
Gross profit	438	4,234	332	13,465
Operating expenses:				
Research and development	1	922	6	1,814
Selling, general and administrative	56	480	196	2,692
Amortization of intangible assets				246
Total operating expenses	57	1,402	202	4,752
Operating income (loss) from discontinued operations	381	2,832	130	8,713
Other income (loss)	(885)		(117)	

Edgar Filing: ADVANCED ENERGY INDUSTRIES INC - Form 10-Q

Income (loss) from discontinued operations before income taxes	(504)	2,832	13	8,713
Income taxes on income from discontinued operations	75	440	378	2,792
Income (loss) from discontinued operations, net of income taxes	\$ (579)	\$ 2,392	\$ (365)	\$ 5,921

Table of Contents**NOTE 3. INCOME TAXES**

The following table sets out the tax expense and the effective tax rate for our income from continuing operations (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Income from continuing operations before income taxes	\$ 10,415	\$ 23,520	\$ 52,845	\$ 43,055
Provision for income taxes	3,244	5,964	13,396	9,192
Effective tax rate	31.1%	25.4%	25.3%	21.3%

Our tax rate is lower than the U.S. federal income tax rate primarily due to the benefit of earnings in foreign jurisdictions, which are subject to lower tax rates. We plan to repatriate approximately \$30.0 million from Japan during the fourth quarter of 2011, for which a deferred income tax expense of \$2.1 million was recorded in 2010. Other than this planned repatriation, undistributed earnings of foreign subsidiaries are considered to be permanently reinvested and accordingly, no provision for U.S. federal and state income taxes or foreign withholding taxes has been made.

Our policy is to classify accrued penalties and interest related to unrecognized tax benefits in our income tax provision. For the three months and nine months ended September 30, 2011 and 2010, the amount of interest and penalties accrued related to our unrecognized tax benefits was immaterial.

NOTE 4. EARNINGS PER SHARE

Basic earnings per share (EPS) is computed by dividing income available to common stockholders by the weighted-average number of common shares outstanding during the period. The computation of diluted EPS is similar to the computation of basic EPS except that the numerator is increased to exclude charges that would not have been incurred, and the denominator is increased to include the number of additional common shares that would have been outstanding (using the if-converted and treasury stock methods), if securities containing potentially dilutive common shares (stock options and restricted stock units) had been converted to common shares, and if such assumed conversion is dilutive.

The following is a reconciliation of our weighted-average shares outstanding used in the calculation of basic and diluted earnings per share for the three months and nine months ended September 30, 2011 and 2010, respectively, (in thousands, except per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Income from continuing operations, net of income taxes	\$ 7,171	\$ 17,556	\$ 39,449	\$ 33,863
Basic weighted-average shares outstanding	43,535	43,254	43,515	42,711
Assumed exercise of dilutive stock options and restricted stock units	284	595	541	582
Diluted weighted-average shares outstanding	43,819	43,849	44,056	43,293

Income from Continuing Operations:

Edgar Filing: ADVANCED ENERGY INDUSTRIES INC - Form 10-Q

Earnings per common share:

Basic earnings per share	\$	0.16	\$	0.41	\$	0.91	\$	0.79
Diluted earnings per share	\$	0.16	\$	0.40	\$	0.90	\$	0.78

The following stock options and restricted stock units were excluded in the computation of diluted earnings per share because they were anti-dilutive (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Stock options	5,048	3,560	4,270	3,560
Restricted stock units	423	77	4	49

Table of Contents**NOTE 5. MARKETABLE SECURITIES**

Our investments with original maturities of more than three months at time of purchase are considered marketable securities available for sale.

The composition of our marketable securities is as follows (in thousands):

	September 30, 2011		December 31, 2010	
	Cost	Fair Value	Cost	Fair Value
Commercial paper	\$ 1,349	\$ 1,349	\$	\$
Treasury bills			2,003	2,006
Certificates of deposit	6,998	6,985	3,126	3,126
Corporate bonds/notes	6,270	6,251	1,002	1,004
Agency bonds/notes	8,084	8,084	3,503	3,504
Total marketable securities	\$ 22,701	\$ 22,669	\$ 9,634	\$ 9,640

The maturities of our marketable securities available for sale as of September 30, 2011 are as follows:

	Earliest	Latest
Commercial paper	12/5/2011 to	12/16/2011
Certificates of deposit	10/14/2011 to	9/23/2013
Corporate bonds/notes	2/15/2012 to	12/17/2012
Agency bonds / notes	7/15/2012 to	11/2/2012

The value and liquidity of our marketable securities are affected by market conditions, the ability of the issuer to make principal and interest payments when due, and the functioning of the markets in which these securities are traded. Our current investments in marketable securities are expected to be liquidated during the next 18 months.

As of September 30, 2011, we do not believe any of the underlying issuers of our marketable securities are presently at risk of default.

NOTE 6. DERIVATIVE FINANCIAL INSTRUMENTS

We are impacted by changes in foreign currency exchange rates. We manage these risks through the use of derivative financial instruments, primarily forward contracts. During the three months and nine months ended September 30, 2011, we entered into foreign currency exchange forward contracts to manage the exchange rate risk associated with intercompany debt denominated in nonfunctional currencies. These derivative instruments are not designated as hedges; however, they do offset the fluctuations of our intercompany debt due to foreign exchange rate changes.

The notional amount of foreign currency exchange contracts was \$22.0 million at September 30, 2011 and the fair value of these contracts was immaterial at September 30, 2011. During the three months and nine months ended September 30, 2011, we recognized \$1.1 million and \$1.2 million of losses, respectively, on our foreign currency exchange contracts. These losses were offset by corresponding gains on the related intercompany debt and both are included as a component of other income (loss), net, in our Condensed Consolidated Statements of Operations.

We did not enter into foreign currency forward contracts during 2010.

Table of Contents**NOTE 7. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE**

The fair value hierarchy established by U.S GAAP prioritizes the inputs used to measure fair value into the following levels:

- Level 1: Quoted market prices in active markets for identical assets or liabilities at the measurement date.
- Level 2: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable and can be corroborated by observable market data.
- Level 3: Inputs reflect management's best estimates and assumptions of what market participants would use in pricing the asset or liability at the measurement date. The inputs are unobservable in the market and significant to the valuation of the instruments.

The following tables present information about our financial assets measured at fair value on a recurring basis as of September 30, 2011 and December 31, 2010, and indicate the fair value hierarchy of the valuation techniques utilized to determine such fair value (in thousands):

As of September 30, 2011:	Level 1	Level 2	Level 3	Total
Commercial paper	\$	\$ 1,349	\$	\$ 1,349
Certificates of deposit		6,985		6,985
Corporate bonds/notes	6,251			6,251
Agency bonds/notes	8,084			8,084
Total	\$ 14,335	\$ 8,334	\$	\$ 22,669

As of December 31, 2010:	Level 1	Level 2	Level 3	Total
Treasury bills	\$ 2,006	\$	\$	\$ 2,006
Certificates of deposit		3,126		3,126
Corporate bonds/notes	1,004			1,004
Agency bonds/notes	3,504			3,504
Total	\$ 6,514	\$ 3,126	\$	\$ 9,640

We did not have any Level 3 investments or financial liabilities measured at fair value on a recurring basis as of September 30, 2011 and December 31, 2010. In the first quarter of 2011, we reclassified our investments in certificates of deposits from Level 1 into Level 2 as we believe this more appropriately reflects the level of inputs available for valuing these financial instruments. There were no transfers in and out of Level 1, 2 or 3 fair value measurements during the nine months ended September 30, 2011.

NOTE 8. INVENTORIES

Our inventories are valued at the lower of cost or market and computed on a first-in, first-out (FIFO) basis. Components of inventories are as follows (in thousands):

September 30, 2011	December 31, 2010
-----------------------------------	----------------------------------

Edgar Filing: ADVANCED ENERGY INDUSTRIES INC - Form 10-Q

Parts and raw materials	\$	62,570	\$	53,755
Work in process		6,071		5,594
Finished goods		24,181		18,244
	\$	92,822	\$	77,593

Table of Contents**NOTE 9. PROPERTY AND EQUIPMENT**

Detail of our property and equipment is as follows (in thousands):

	September 30, 2011	December 31, 2010
Buildings and land	\$ 1,616	\$ 1,701
Machinery and equipment	38,820	53,885
Computer and communication equipment	24,172	23,296
Furniture and fixtures	3,004	5,717
Vehicles	463	541
Leasehold improvements	29,371	28,003
Construction in process	6,608	3,996
	104,054	117,139
Less: Accumulated depreciation	(63,217)	(82,570)
	\$ 40,837	\$ 34,569

Depreciation expense recorded in continuing operations for the three months and nine months ended September 30, 2011 and 2010 is as follows (in thousands):

	September 30,	
	2011	2010
Three months	\$ 2,799	\$ 1,444
Nine months	7,735	4,656

NOTE 10. GOODWILL

During the three months ended June 30, 2011 we finalized the PV Powered purchase price allocation. As a result, we increased our estimate of the value of PV Powered's pre-acquisition net operating losses and recorded a \$1.8 million increase to our noncurrent deferred income tax assets and reduced goodwill accordingly.

The following summarizes changes in our goodwill during the three months and nine months ended September 30, 2011 and 2010 (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Gross carrying amount, beginning of period	\$ 46,515	\$ 47,920	\$ 48,360	\$
Additions		440		48,360
Adjustments			(1,845)	
Impairments				
Gross carrying amount, end of period	\$ 46,515	\$ 48,360	\$ 46,515	\$ 48,360

Table of Contents**NOTE 11. OTHER INTANGIBLE ASSETS**

Included in our other intangible assets are assets acquired in a business combination that are used in research and development activities. These assets are considered to have indefinite lives until the completion or abandonment of the associated research and development efforts and are presented as non-amortizable intangibles in the tables below.

Our other intangible assets consisted of the following as of September 30, 2011 (in thousands, except weighted-average useful life):

	Gross		Net	Weighted-Average Useful Life in Years
	Carrying Amount	Accumulated Amortization	Carrying Amount	
Amortizable intangibles:				
Technology-based	\$ 37,922	\$ (4,891)	\$ 33,031	7
Trademarks and other	8,210	(805)	7,405	8
Total amortizable intangibles	46,132	(5,696)	40,436	
Non-amortizable intangibles	5,154		5,154	
Total other intangible assets	\$ 51,286	\$ (5,696)	\$ 45,590	

Our other intangible assets consisted of the following as of December 31, 2010 (in thousands, except weighted-average useful life):

	Gross		Net	Weighted-Average Useful Life in Years
	Carrying Amount	Accumulated Amortization	Carrying Amount	
Amortizable intangibles:				
Technology-based	\$ 31,553	\$ (2,271)	\$ 29,282	7
Trademarks and other	8,210	(594)	7,616	8
Total amortizable intangibles	39,763	(2,865)	36,898	
Non-amortizable intangibles	11,523		11,523	
Total other intangible assets	\$ 51,286	\$ (2,865)	\$ 48,421	

Amortization expense relating to other intangible assets included in our income from continuing operations for the three months and nine months ended September 30, 2011 and 2010 is as follows (in thousands):

	September 30,	
	2011	2010
Three months	\$ 989	\$ 1,177

Nine months 2,831 1,945
 Our estimated amortization expense for each of the five years 2011 through 2015 and thereafter is as follows (in thousands):

Year Ending December 31,

2011 (Remaining)	\$	1,021
2012		5,646
2013		7,541
2014		8,192
2015		7,675
Thereafter		10,361
	\$	40,436

Table of Contents**NOTE 12. RESTRUCTURING**

During the three months ended September 30, 2011, we approved and committed to several initiatives to realign our manufacturing and research and development activities. The initiatives under the plan are intended to foster growth and enhance profitability by aligning research and development activities with the location of our customer base and reducing product costs for the Solar Energy business.

We estimate that over the next 12 to 18 months we will incur between \$12.0 and \$16.0 million related to this plan, including the amounts recognized during the three months ended September 30, 2011 noted below. Of this total approximately \$3.5 to 4.0 million relates to severance costs, \$0.4 million relates to asset impairments, and \$8.0 to \$12.0 relates to costs to close facilities and relocate portions of our manufacturing.

Approximately \$9.0 to 13.0 million of the charges noted above have resulted in or will result in cash expenditures. Restructuring charges recognized during the three months ended September 30, 2011 are as follows:

Severance and related costs	\$ 2,769
Property and equipment impairments	350
Total restructuring charges	\$ 3,119

Liabilities associated with the restructuring plan and changes during the nine months ended September 30, 2011 are as follows:

	Balance at December 31, 2010	Costs incurred and charged to expense	Cost paid or otherwise settled	Effect of Change in Exchange Rates	Balance at September 30, 2011
Severance and related costs	\$	\$ 2,769	\$ (707)	\$ (11)	\$ 2,051

NOTE 13. WARRANTIES

Provisions of our sales agreements include product warranties customary to these types of agreements, ranging from 18 months to 24 months following installation for the Thin Films SBU and 5 years to 10 years following installation for the Solar Energy SBU. Customers of our Solar Energy SBU have the option to purchase extended warranties up to 20 years. Our provision for the estimated cost of warranties is recorded when revenue is recognized. Our warranty provision is based on historical experience by product, configuration and geographic region.

Accruals are established for warranty issues that are probable to result in future costs. Changes in accrued product warranties for the three months and nine months ended September 30, 2011 and 2010, including those acquired on May 3, 2010 as part of the PV Powered acquisition, were as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Balances at beginning of period	\$ 14,296	\$ 11,179	\$ 12,949	\$ 6,978
Warranty liabilities acquired				1,546
Increases to accruals related to sales during the period	2,498	3,441	7,542	8,089
Warranty expenditures	(2,073)	(2,558)	(5,770)	(4,551)
Balances at end of period	\$ 14,721	\$ 12,062	\$ 14,721	\$ 12,062

Table of Contents**NOTE 14. STOCK-BASED COMPENSATION**

We recognize stock-based compensation expense based on the fair value of awards issued. Stock-based compensation for the three months and six months ended September 30, 2011 and 2010 is as follows (in thousands):

	September 30,	
	2011	2010
Three months	\$ 3,228	\$ 2,075
Nine months	9,362	5,895

Stock Options

Stock option awards are granted with an exercise price equal to the market price of our stock at the date of grant, a four-year vesting schedule, and a term of 10 years, except as noted below.

During the third quarter of 2011, we granted non-qualified stock options to our Chief Executive Officer that will vest based on the achievement of certain stock price targets. The stock-based compensation cost and derived service periods for these stock options were estimated using the Monte Carlo simulation method utilizing a volatility of 61.6% and a risk-free rate of 2.4%. The weighted-average fair value of these awards is \$2.92 per share and the derived service periods range from approximately one and one-half years to approximately two years. As of September 30, 2011, no part of the grant had been achieved. If the targets are not met, the non-qualified stock options will expire on the third anniversary of the grant date.

A summary of our stock option activity for the nine months ended September 30, 2011 is as follows (in thousands):

	Shares
Options outstanding at December 31, 2010	5,709
Options granted	1,484
Options exercised	(198)
Options forfeited	(483)
Options expired	(260)
Options outstanding at September 30, 2011	6,252

Restricted Stock Units

A summary of our non-vested Restricted Stock Units activity for the nine months ended September 30, 2011 is as follows (in thousands):

	Shares
Balance at December 31, 2010	447
RSUs granted	512
RSUs vested	(123)
RSUs forfeited	(86)
Balance at September 30, 2011	750

NOTE 15. COMPREHENSIVE INCOME

Comprehensive income consists of net income, foreign currency translation adjustments and net unrealized holding gains (losses) on available-for-sale investments. Our comprehensive income for the three months and nine months ended September 30, 2011 and 2010 is presented below (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Net income	\$ 6,592	\$ 19,948	\$ 39,084	\$ 39,784
Unrealized holding gain (loss) on available-for-sale securities	(25)	6	(38)	13
Cumulative translation adjustment	(271)	4,074	1,497	(2,377)
Comprehensive income	\$ 6,296	\$ 24,028	\$ 40,543	\$ 37,420

Table of Contents**NOTE 16. ACCUMULATED OTHER COMPREHENSIVE INCOME**

Accumulated other comprehensive income consisted of the following (in thousands):

Unrealized holding gain (loss) on available-for-sale securities:

Balance at December 31, 2010	\$	6
Unrealized holding loss, net of realized amounts reclassified to net income		(38)
Balance at September 30, 2011		(32)

Accumulated foreign currency translation adjustments:

Balance at December 31, 2010	\$	27,068
Translation adjustments		1,497
Balance at September 30, 2011		28,565

Total accumulated other comprehensive income	\$	28,533
--	----	--------

NOTE 17. COMMITMENTS AND CONTINGENCIES

We are involved in disputes and legal actions from time to time in the ordinary course of our business.

We have firm purchase commitments and agreements with various suppliers to ensure the availability of components. The obligation at September 30, 2011 is approximately \$65.4 million. Our policy with respect to all purchase commitments is to record losses, if any, when they are probable and reasonably estimable. We believe we have an adequate provision for potential exposure related to inventory on order which may go unused.

NOTE 18. RELATED PARTY TRANSACTIONS

During the three months and nine months ended September 30, 2011 and 2010, we had the following related party transactions (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Sales related parties	\$ 1,266	\$ 4,878	\$ 3,820	\$ 7,047
Rent expense related parties	575	713	1,732	2,154

Sales Related Parties

Members of our Board of Directors hold various executive positions and serve as directors at other companies, including companies that are our customers. During the three months and nine months ended September 30, 2011 we had sales to two such companies as noted above and aggregate accounts receivable from three such customers totaled \$1.0 million at September 30, 2011. During the three months and nine months ended September 30, 2010 we had sales to two such companies as noted above and aggregate accounts receivable from three such companies totaled \$0.4 million at December 31, 2010.

Rent Expense Related Parties

We lease our executive offices and manufacturing facilities in Fort Collins, Colorado from a limited liability partnership in which Douglas Schatz, our Chairman of the Board and former Chief Executive Officer, holds an interest. The leases relating to these spaces expire during 2015 and obligate us to total annual payments of approximately \$2.4 million, which includes facilities rent and common area maintenance costs.

Table of Contents**NOTE 19. SIGNIFICANT CUSTOMER INFORMATION**

Applied Materials, Inc. is our largest customer and our only customer that accounts for 10% or more of our sales. Sales to Applied Materials as a percent of total sales for the three months and nine months ended September 30, 2011 and 2010 were as follows:

	Three Months Ended		Nine Months Ended	
	September 30, 2011	2010	September 30, 2011	2010
Applied Materials	11%	16%	13%	22%

ULVAC, Inc. accounted for 11% of gross accounts receivable as of December 31, 2010. No other customer accounted for 10% or more of our gross accounts receivable as of September 30, 2011 or December 31, 2010.

NOTE 20. SEGMENT INFORMATION

During the first quarter of fiscal 2011, we began to operate as two reportable business segments. The creation of two business units, Thin Films and Solar Energy, has improved our execution and strategic focus in two distinct markets. The re-alignment of our businesses reflects the success of our strategy to maintain leadership in thin-film markets, while also expanding into high-growth renewable markets with our inverter product portfolio. The creation of these two business units will enable greater focus on each business' unique needs and requirements, allowing each to expand and accelerate growth by better serving each of these very different industries.

Our chief operating decision maker and management personnel began reviewing our performance and making resource allocation decisions by reviewing the results of our two business segments separately. Revenue and operating profit is now reviewed by our chief operating decision maker, however, we have only divided inventory and property and equipment based on business segment. Due to the structure of our internal organization and the manner in which expenses were tracked and managed and as a result of the design of our internal systems during fiscal 2010, we were unable to recast related financial information by operating segment for fiscal 2010 and prior. As such, segment information, other than revenue, for the three months and nine months ended September 30, 2010 is not reported as it is impracticable to do so.

We are organized into the Thin Films and Solar Energy strategic business units (SBU) based on the products and services provided.

Thin Films Processing Power Conversion and Thermal Instrumentation (Thin Films) SBU offers our products for direct current (DC), pulsed DC mid frequency, and radio frequency (RF) power supplies, matching networks and RF instrumentation as well as thermal instrumentation products. Our Thin Films SBU principally serves original equipment manufacturers (OEMs) and end customers in the semiconductor, flat panel display, solar module and other capital equipment markets.

Our power conversion systems refine, modify and control the raw electrical power from a utility and convert it into power that may be customized and is predictable and repeatable. Our power conversion systems are primarily used by semiconductor, solar panel and similar thin-film manufacturers including flat panel display, data storage and architectural glass manufacturers.

Our thermal instrumentation products provide temperature measurement solutions for applications in which time-temperature cycles affect material properties, productivity and yield. These products are used in rapid thermal processing, chemical vapor deposition, and other semiconductor and solar applications requiring non-contact temperature measurement.

Our network of global service support centers offer repair services, conversions, upgrades and refurbishments to companies using our products.

Solar Energy SBU offers both a transformer-based or transformerless advanced grid-tied PV inverter solution for residential, commercial and utility-scale system installations. Our PV inverters are designed to convert renewable solar power, drawn from large and small scale solar arrays, into high-quality, reliable electrical power. Our Solar

Energy SBU focuses on residential, commercial and utility-scale solar projects and installations, selling primarily to distributors; engineering, procurement, and construction contractors; developers; and utility companies. Our Solar Energy revenue has seasonal variations. Installations of inverters are normally lowest during the first quarter as a result of typically poor weather and installation scheduling by our customers.

Table of Contents

Revenue with respect to operating segments for the three months and nine months ending September 30, 2011 and 2010 is as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Thin Films	\$ 76,764	\$ 103,616	\$ 274,194	\$ 256,736
Solar Energy	51,734	37,350	130,110	54,024
Total	\$ 128,498	\$ 140,966	\$ 404,304	\$ 310,760

Income from continuing operations before income taxes by operating segment for the three months and nine months ended September 30, 2011 is as follows (in thousands):

	Three Months Ended September 30, 2011		Nine Months Ended September 30, 2011	
	Thin Films	\$	16,015	\$
Solar Energy		1,259		4,092
Total segment operating income		17,274		64,973
Corporate expenses		(6,600)		(12,624)
Other income (loss), net		(259)		496
Income from continuing operations before income taxes	\$	10,415	\$	52,845

Segment assets consist of inventories and property and equipment, net. A summary of consolidated total assets by segment as of September 30, 2011 follows (in thousands):

Thin Films	\$ 62,437
Solar Energy	70,199
Total segment assets	132,636
Unallocated corporate property and equipment	1,023
Corporate assets	419,771
Consolidated total assets	\$ 553,430

Corporate is a non-operating business segment with the main purpose of supporting operations. Our amortization of intangibles is not allocated to business segment financial statements reviewed by our chief operating decision maker and management personnel. Unallocated corporate assets include accounts receivable, deferred income taxes and intangible assets.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Special Note on Forward-Looking Statements

The following discussion contains, in addition to historical information, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements in this report that are not historical information are forward-looking statements. For example, statements relating to our beliefs, expectations and plans are forward-looking statements, as are statements that certain actions, conditions or circumstances will continue. The inclusion of words such as anticipate, expect, estimate, can, may, continue, enables, plan, intend, or believe, as well as statements that events or circumstances occur or continue, indicate forward-looking statements. Forward-looking statements involve risks and uncertainties, which are difficult to predict and many of which are beyond our control. Therefore, actual results could differ materially and adversely from those expressed in any forward-looking statements.

For additional information regarding factors that may affect our actual financial condition, results of operations and accuracy of our forward-looking statements, see the information under the caption Risk Factors in Part II Item 1A of this Quarterly Report on Form 10-Q and, in our Annual Report on Form 10-K for the year ended December 31, 2010. We undertake no obligation to revise or update any forward-looking statements for any reason.

BUSINESS OVERVIEW

We design, manufacture, sell and support power conversion products that transform power into various usable forms. Our products enable manufacturing processes that use thin-film processing and etching for various products as well as grid-tied power conversion. We also supply thermal instrumentation products used for temperature control in the thin-film process. Our network of global service support centers provides local repair and field service capability in key regions.

Our power conversion products refine, modify and control the raw electrical power from a utility and converts it into power that is predictable, repeatable and customizable. Our power conversion products are primarily used by semiconductor, solar panel and similar thin-film manufacturers including flat panel display, data storage and architectural glass manufacturers.

Our thermal instrumentation products provide temperature measurement solutions for applications in which time-temperature cycles affect material properties, productivity and yield. These products are used in rapid thermal processing, chemical vapor deposition, and other semiconductor and solar applications requiring non-contact temperature measurement.

Our grid-tied power conversion products offer both an advanced transformer-based or transformerless grid-tied PV solutions for residential, commercial and utility-scale system installations. Our PV inverters are designed to convert renewable solar power, drawn from large and small scale solar arrays, into high-quality, reliable electrical power. These products are used for residential, commercial and utility-scale solar projects and installations, and are sold primarily to distributors; engineering, procurement, and construction contractors; developers; and utility companies. These product revenues have seasonal variations.

Installations of inverters are normally lowest during the first quarter of the year due to less favorable weather conditions and installation scheduling by our customers.

Our network of global service support centers offer repair services, conversions, upgrades and refurbishments to businesses that use our products.

On May 3, 2010, we acquired PV Powered, Inc. (PV Powered), a privately-held Oregon corporation based in Bend, Oregon. PV Powered is a leading manufacturer of grid-tied PV inverters in the residential, commercial and utility-scale markets. We now provide our customers with solutions in a wider power range and an increased number of solar array opportunities where our products can be utilized.

On October 15, 2010, we sold our gas flow control business, which includes the Aera[®] mass flow control and related product lines, to Hitachi Metals, Ltd. Accordingly, the results of operations from our gas flow control business have

been excluded from our discussions relating to continuing operations.

During the first quarter of fiscal 2011, we began to operate as two reportable business segments. The creation of two business units, Thin Films and Solar Energy, has improved our execution and strategic focus in two distinct markets.

This re-alignment of our businesses reflects the success of our strategy to maintain leadership in thin-film markets, while also expanding into high-growth renewable markets with our inverter product portfolio. The creation of these two units will enable greater focus on each business' unique needs and requirements, allowing each to expand and accelerate growth by better serving each of these very different industries.

Table of Contents

Due to the structure of our internal organization and the manner in which expenses were tracked and managed and, as a result of the design of our internal reporting systems during fiscal 2010, we were unable to recast related financial information by operating segment for fiscal 2010 and prior. As such, segment information, other than revenue, for the three months and nine months ended September 30, 2010 is not reported as it is impracticable to do so.

Our analysis presented below is organized to provide the information we believe will be instructive for understanding our historical performance and relevant trends going forward. This discussion should be read in conjunction with our Condensed Consolidated Financial Statements in Part I, Item 1 of this report, including the notes thereto.

Results of Operations*OVERALL RESULTS*

The following table sets forth, for the three months and nine months ended September 30, 2011 and 2010, certain data from our Condensed Consolidated Statements of Operations (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Sales	\$ 128,498	\$ 140,966	\$ 404,304	\$ 310,760
Gross profit	\$ 48,847	\$ 60,690	\$ 166,269	\$ 134,456
Operating expenses	38,173	38,394	113,920	93,229
Operating income	10,674	22,296	52,349	41,227
Other income (loss), net	(259)	1,224	496	1,828
Income from continuing operations before income taxes	10,415	23,520	52,845	43,055
Provision for income taxes	3,244	5,964	13,396	9,192
Income from continuing operations, net of income taxes	\$ 7,171	\$ 17,556	\$ 39,449	\$ 33,863

The following table sets forth, for the three months and nine months ended September 30, 2011 and 2010, the percentage of sales from our Condensed Consolidated Statements of Operations:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Sales	100.0%	100.0%	100.0%	100.0%
Gross profit	38.0%	43.1%	41.1%	43.3%
Operating expenses	29.7%	27.2%	28.2%	30.0%
Operating income	8.3%	15.8%	12.9%	13.3%
Other income (loss), net	(0.2%)	0.9%	0.1%	0.6%
	8.1%	16.7%	13.1%	13.9%

Edgar Filing: ADVANCED ENERGY INDUSTRIES INC - Form 10-Q

Income from continuing operations before income taxes				
Provision for income taxes	2.5%	4.2%	3.3%	3.0%
Income from continuing operations, net of income taxes	5.6%	12.5%	9.8%	10.9%

Table of Contents**SALES**

Our sales by segment for the three months and nine months ended September 30, 2011 and 2010 were as follows (in thousands):

	Three Months Ended September 30,					
	2011	% of Total Sales	2010	% of Total Sales	Increase/ (Decrease)	Percent Change
Thin Films:						
Semiconductor capital equipment market	\$ 29,584	23.0%	\$ 49,364	35.0%	\$ (19,780)	(40.1%)
Non-semiconductor capital equipment	33,755	26.3%	41,102	29.2%	(7,347)	(17.9%)
Global support	13,425	10.4%	13,150	9.3%	275	2.1%
Total Thin Films	76,764	59.7%	103,616	73.5%	(26,852)	(25.9%)
Solar Energy	51,734	40.3%	37,350	26.5%	14,384	38.5%
Total sales	\$ 128,498	100.0%	\$ 140,966	100.0%	\$ (12,468)	(8.8%)

	Nine Months Ended September 30,					
	2011	% of Total Sales	2010	% of Total Sales	Increase/ (Decrease)	Percent Change
Thin Films:						
Semiconductor capital equipment market	\$ 119,233	29.5%	\$ 134,199	43.2%	\$ (14,966)	(11.2%)
Non-semiconductor capital equipment	114,708	28.4%	87,807	28.2%	26,901	30.6%
Global support	40,253	10.0%	34,730	11.2%	5,523	15.9%
Total Thin Films	274,194	67.9%	256,736	82.6%	17,458	6.8%
Solar Energy	130,110	32.1%	54,024	17.4%	76,086	140.8%
Total sales	\$ 404,304	100.0%	\$ 310,760	100.0%	\$ 93,544	30.1%

Overall, our sales decreased \$12.5 million, or 8.8%, to \$128.5 million for the three months ended September 30, 2011 from \$141.0 million for the three months ended September 30, 2010. Sales increased \$93.5 million, or 30.1%, to \$404.3 million for the nine months ended September 30, 2011 from \$310.8 million for the nine months ended September 30, 2010.

The decrease in sales in the current quarter as compared to the same period a year ago has been largely driven by weak conditions across all of our thin film markets. The semiconductor industry, and to a lesser extent our other non-semiconductor thin film markets, has been negatively impacted by the uncertain global economic conditions. This uncertainty has tempered demand for consumer electronics, which drives capital spending throughout the markets we serve. Although our solar energy business unit experienced revenue growth in the current quarter as compared to the same period a year ago, the increase was not large enough to compensate for the decrease in thin films revenue.

Edgar Filing: ADVANCED ENERGY INDUSTRIES INC - Form 10-Q

The increase in sales for the nine months ended September 30 2011, as compared to the same period a year ago, was driven mainly by our solar energy business unit, which has experienced an increase in demand in proportion with an increase in activity in the North American solar market. Additionally, Solar Energy revenue in the period from January 1, 2010 to May 3, 2010 did not include revenue from PV Powered, which we acquired on May 3, 2010.

Thin Films

Results for Thin Films for the three months and nine months ended September 30, 2011 are as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Sales	\$ 76,764	\$ 103,616	\$ 274,194	\$ 256,736
Operating Income	16,015		60,881	

Table of Contents

Thin Films sales dipped 25.9% to \$76.8 million, or 59.7% of sales, for the three months ended September 30, 2011 versus \$103.6 million, or 73.5% of sales, for the three months ended September 30, 2010. This decline reflects the impact of the uncertain global economic conditions described above. Thin Films sales climbed 6.8% to \$274.2 million, or 67.9% of sales, for the nine months ended September 30, 2011 versus \$256.7 million, or 82.6% of sales, for the nine months ended September 30, 2010. This moderate growth reflects the impact of a strong first half of 2011, particularly in our non-semiconductor markets, and the continued momentum that was gained during the economic recovery and strong consumer spending we experienced in the second half of 2010.

In the three months ended September 30, 2011, sales in the thin-film semiconductor market decreased 40.1% to \$29.6 million, or 23.0% of sales, from \$49.4 million, or 35.0% of sales for the three months ended September 30, 2010. In the nine months ended September 30, 2011, sales in the thin-film semiconductor market decreased 11.2% to \$119.2 million, or 29.5% of sales, from \$134.2 million, or 43.2% of sales for the nine months ended September 30, 2010. As mentioned above, uncertain economic conditions have created poor consumer sentiment and thus a decline in global consumer electronics spending. This condition has a negative impact on capacity utilization and investment in capital equipment among our customers' end users. We anticipate this uncertainty to continue through the remainder of the year and, as a result our revenue in this market is expected to decline in the fourth quarter of 2011.

Sales in the thin-film non-semiconductor capital equipment markets decreased 17.9% to \$33.8 million, or 26.3% of sales, for the three months ended September 30, 2011 compared to \$41.1 million, or 29.2% of sales, for the three months ended September 30, 2010. Sales in the thin-film non-semiconductor capital equipment markets increased 30.6% to \$114.7 million, or 28.4% of sales, for the nine months ended September 30, 2011 compared to \$87.8 million, or 28.2% of sales, for the nine months ended September 30, 2010. The markets that comprise the thin-film non-semiconductor capital equipment markets include solar panel, flat panel display, data storage, architectural glass and other industrial thin-film manufacturing equipment markets. Our customers in these markets are global OEMs. The decrease in these markets for the three months ended September 30, 2011, as compared to the same period a year ago, was driven by the same overall slowdown in the global economy described above. The increase experienced in these markets for the nine months ended September 30, 2011, as compared to the same period a year ago, was also the result of a strong first half of 2011 and the momentum gained from a global economic recovery that started in the back half of 2010.

Sales to customers in the thin-film solar panel market, which is included as a component of our non-semiconductor capital equipment markets, decreased to \$12.9 million, or 10.2% of total sales, for the three months ended September 30, 2011 as compared to \$18.9 million, or 13.4% of total sales, for the three months ended September 30, 2010. This decrease is a result of a worldwide excess of panel capacity and inventory, particularly in the People's Republic of China (the PRC). This overcapacity is the result of delays in project funding due to uncertainty as to the extent and amount of worldwide governmental subsidies of large utility-scale solar projects that has made the availability of project financing very challenging. Due to this over production, panel prices have been declining for several quarters and we are experiencing a market pause as our customers' end users postpone investment in new technology and wait for the consolidation and/or reduction of panel inventory around the world and the stabilization of panel prices. This market condition will continue to exist and perhaps worsen over the next several quarters and, as a result, we expect our revenue in this market to decline in the fourth quarter of 2011.

Sales to customers in the thin-film solar panel market increased to \$49.0 million, or 12.1% of total sales, for the nine months ended September 30, 2011 as compared to \$35.6 million, or 11.5% of total sales, for the nine months ended September 30, 2010. This increase was driven by a very robust first half of 2011 during which our technology leadership in crystalline silicon (c-Si) processing equipment and strategic customer relationships helped us capitalize on growth in the PRC. Heavy capital investment in new technology by our customers' end users during the first half of 2011 resulted in the overcapacity condition we currently observe in the market. In the flat panel display market, also included as a component of our non-semiconductor capital equipment markets, we have seen a slowdown of investment as capacity additions made throughout 2010 and the first half of 2011 are now coming online. This capital expansion was driven by flat panel display manufacturers in Korea and the PRC in 2010 and in the first half of 2011 in response to market adoption of flat panels by PRC consumers, the growth in touch screens for tablet PCs and smart phones and the migration of new technology such as LED backlighting and 3D televisions around the world.

Additionally, capacity additions for active matrix organic LED technologies made by Korean OEMs last quarter are now online and the timing of investments made in further next generation technologies appears to be pushing into 2012 and beyond. As a result, we anticipate our revenue in the flat panel display market to decrease in the fourth quarter of 2011.

Our global support revenue increased slightly to \$13.4 million, or 10.4% of total sales, for the three months ended September 30, 2011, compared to \$13.2 million, representing 9.3% of sales, for the three months ended September 30, 2010. Service activity levels were stable in most of our geographic regions and end markets as changes due to tighter maintenance budgets were offset by sales of used equipment. Our global support revenue grew 15.9% to \$40.3 million, or 10.0% of total sales, for the nine months ended September 30, 2011, compared to \$34.7 million, representing 11.2% of sales, for the nine months ended September 30, 2010. The increase in our global support sales for the nine-month period was due to an increase in factory utilization by our customers throughout 2010 and into the first half of 2011, which drove demand for repairs, replacement parts and inventory restocking. Although the outlook for our service business continues to be strong, as we expand our product offerings to include maintenance contracts in the growing solar array market, we anticipate a slight decline in the near term due to the risk of end users more tightly managing maintenance budgets to deal with an anticipated drop in factory utilization.

Table of Contents*Solar Energy*

Results for our Solar Energy business segment for the three months and nine months ended September 30, 2011 are as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Sales	\$ 51,734	\$ 37,350	\$ 130,110	\$ 54,024
Operating Income	1,259		4,092	

Solar Energy sales were \$51.7 million, or 40.3% of sales, for the three months ended September 30, 2011 as compared to \$37.4 million, or 26.5% of sales, for the three months ended September 30, 2010. Solar Energy sales were \$130.1 million, or 32.1% of sales, for the nine months ended September 30, 2011 as compared to \$54.0 million, or 17.4% of sales, for the nine months ended September 30, 2010.

Sales for the current quarter were up from the second quarter of 2011 and from the comparable period a year ago due to an increase in activity in both the commercial and large utility-scale projects. However, sales still remained flat to comparable levels achieved in the fourth quarter of 2010 as we continue to experience project delays and pushouts caused by the conditions described above in our thin-film solar panel market. These delays and pushouts of business from the current quarter into future periods are a response to uncertainty around solar energy incentives and dropping prices for solar panels. Although we expect lower solar panel prices to ultimately fuel growth of solar array installations, an uncertainty as to how low prices may fall has caused a temporary delay in the procurement of equipment needed for projects. Despite these conditions, we do anticipate a moderate increase in Solar Energy sales during the fourth quarter of 2011 as an end of year push to take advantage of expiring government incentives may drive project activity forward.

This significant year-over-year growth reflects our acquisition of PV Powered, whose products continue to penetrate the U.S. market for both commercial and residential applications, as well as the continued growth of the North American solar market.

Backlog

Our overall backlog was \$95.4 million at September 30, 2011 as compared to \$102.9 million at June 30, 2011 and \$93.1 million at December 31, 2010. The decrease from the previous quarter was primarily driven by the economic uncertainty described above in all the markets we serve, which results in shorter lead time ordering and fewer long-term commitments.

GROSS PROFIT

Our gross profit was \$48.8 million, or 38.0% of sales, for the three months ended September 30, 2011, as compared to \$60.7 million, or 43.1% of sales for the three months ended September 30, 2010. Our gross profit was \$166.3 million, or 41.1% of sales, for the nine months ended September 30, 2011, as compared to \$134.5 million, or 43.3% of sales for the nine months ended September 30, 2010. The year-over-year increase in terms of absolute dollars was due to an overall boost in production and sales volume in 2011 as compared to 2010, our acquisition of PV Powered and increased leverage of factory overhead, as well as, reduced warranty costs resulting from improved quality and lower warranty claims.

The decrease in gross profit in terms of percent of sales was caused by an overall product mix shift to include a higher percentage of revenue from our Solar Energy product line, which traditionally has lower gross margins. In addition to the anticipated decline in gross margin percentage due to overall product mix, we saw a decline in our Solar Energy business gross margins as competitive pricing pressure drove down the average selling price for our inverters. In response to the global economic uncertainty and an anticipated drop in revenue, particularly in our thin film markets, management has implemented headcount reductions in our production facilities that are described below in

Restructuring Charges. Despite these efforts, we expect our gross margin to continue to decrease in absolute dollars and as a percentage of revenue for the remainder of 2011 as a result of declining revenue and a shift of our overall percentage of revenue coming from the lower gross margin Solar Energy business unit.

Table of Contents*OPERATING EXPENSES*

The following table summarizes our operating expenses as a percentage of sales for the three months and nine months ended September 30, 2011 and 2010 (in thousands):

	Three Months Ended September 30, 2011		2010		Increase/ (Decrease)	Percent Change
Research and development	\$ 17,592	13.7%	\$ 16,672	11.8%	\$ 920	5.5%
Selling, general and administrative	16,473	12.8%	20,545	14.6%	(4,072)	(19.8%)
Amortization of intangible assets	989	0.8%	1,177	0.8%	(188)	(16.0%)
Restructuring charges	3,119	2.4%			3,119	100.0%
Total operating expenses	\$ 38,173	29.7%	\$ 38,394	27.2%	\$ (221)	(0.6%)

	Nine Months Ended September 30, 2011		2010		Increase/ (Decrease)	Percent Change
Research and development	\$ 50,591	12.5%	\$ 41,329	13.3%	\$ 9,262	22.4%
Selling, general and administrative	57,379	14.2%	49,955	16.1%	7,424	14.9%
Amortization of intangible assets	2,831	0.7%	1,945	0.6%	886	45.6%
Restructuring charges	3,119	0.8%			3,119	100.0%
Total operating expenses	\$ 113,920	28.2%	\$ 93,229	30.0%	\$ 20,691	22.2%

Research and Development

The markets we serve constantly present us with opportunities to develop our products for new or emerging applications and require technological changes to achieve higher performance, lower cost and provide other attributes that will advance our customers' products. We believe that continued and timely development of new and differentiated products, as well as enhancements to existing products to support customer requirements, is critical for us to compete in the markets we serve. Accordingly, we devote significant personnel and financial resources to the development of new products and the enhancement of existing products, and we expect these investments to continue. All of our research and development costs for the three months and nine months ended September 30, 2011 and 2010 have been expensed as incurred.

Research and development expenses for the three months ended September 30, 2011 were \$17.6 million, or 13.7% of sales, as compared to \$16.7 million, or 11.8% of sales, for the three months ended September 30, 2010. Research and development expenses for the nine months ended September 30, 2011 were \$50.6 million, or 12.5% of sales, as compared to \$41.3 million, or 13.3% of sales, for the nine months ended September 30, 2010.

The increase in research and development expenses of \$0.9 million, or 5.5%, in the three months ended September 30, 2011 and \$9.3 million, or 22.4%, in the nine months ended September 30, 2011 as compared to the same period in 2010 was driven primarily by increases in personnel costs, materials and supplies and outside consulting services. We continue to focus on new product development, specifically related to the expansion of our inverter product line globally, however due to the uncertainty of the global economy and the anticipated decrease in overall revenue management has implemented headcount reductions that are described below in *Restructuring Charges*. A portion of these headcount reductions were related to research and development personnel and, as a result, we anticipate that

research and development expenses will decrease for the remainder of the year in terms of absolute dollars and as a percentage of sales.

Selling, General and Administrative

Our selling expenses support domestic and international sales and marketing activities that include personnel, trade shows, advertising, third-party sales representative commissions and other selling and marketing activities. Our general and administrative expenses support our worldwide corporate, legal, tax, financial, governance, administrative, information systems and human resource functions in addition to our general management.

Selling, general and administrative (SG&A) expenses for the three months ended September 30, 2011 were \$16.5 million, or 12.8% of sales, as compared to \$20.5 million, or 14.6% of sales, in the three months ended September 30, 2010. SG&A expenses for the nine months ended September 30, 2011 were \$57.4 million, or 14.2% of sales, as compared to \$50.0 million, or 16.1% of sales, in the nine months ended September 30, 2010.

The decrease in SG&A expenses of \$4.0 million, or 19.8%, in the three months ended September 30, 2011 was primarily driven by the reversal of previously-accrued incentive compensation resulting from an overall decline in company performance during the current year.

Table of Contents

The increase of \$7.4 million, or 14.9%, in the nine months ended September 30, 2011 as compared to the same periods in 2010 was driven primarily by increases in personnel costs, travel and outside services to meet the expectations and demands of our growing business during the first half of 2011. These market conditions have changed and management has reacted by putting more stringent cost controls in place. As a result, we anticipate that SG&A expenses will remain flat to down in the fourth quarter of 2011 in terms of absolute dollars and will remain within their current range as a percentage of sales.

Restructuring Charges

Restructuring charges were \$3.1 million in the three months and nine months ended September 30, 2011. There were no restructuring charges in the three months and nine months ended September 30, 2010. The restructuring charges incurred in 2011 are the result of realigning the manufacturing and research and development activities of the Company in order to foster growth and enhance profitability. In the three months ended September 30, 2011, we reduced the global workforce by approximately 159 people or 9.8% of the workforce and recorded an impairment for assets no longer in use. The workforce reduction is expected to result in approximately \$6.3 million in annual cost savings. Over the next 12 to 18 months, we will continue to evaluate our cost structure as we close facilities and relocate certain functions. We estimate that these initiatives will result in additional charges of approximately \$9.0 to \$13.0 million.

Amortization of Intangible Assets

Amortization of intangibles was \$1.0 million, or 0.8% of sales, for the three months ended September 30, 2011 as compared to \$1.2 million, or 0.8% of sales, in the three months ended September 30, 2010. Amortization of intangibles was \$2.8 million, or 0.7% of sales, for the nine months ended September 30, 2011 as compared to \$1.9 million, or 0.6% of sales, in the nine months ended September 30, 2010. The increase in amortization is the result of nine months of amortization of PV Powered intangible assets in the current year, as compared to five months in the same period of the prior year.

OTHER INCOME (LOSS), NET

Other income (loss), net, consists primarily of investment income and foreign currency exchange gains and losses. Other income (loss), net, was a loss of \$0.3 million for the three months ended September 30, 2011, as compared to income of \$1.2 million for the three months ended September 30, 2010. Other income (loss), net, was \$0.5 million for the nine months ended September 30, 2011, as compared to \$1.8 million for the nine months ended September 30, 2010. Although we are subject to exchange rate fluctuations due to the nature of our international operations, we attempt to mitigate the risk of large swings with the use of derivative instruments and anticipate future gains and losses to be immaterial to our financial position and results of operations.

PROVISION FOR INCOME TAXES

We recorded an income tax provision from continuing operations for the three months ended September 30, 2011 of \$3.2 million, compared to \$6.0 million for the three months ended September 30, 2010, resulting in effective tax rates of 31.1% and 25.4%, respectively. We recorded an income tax provision from continuing operations for the nine months ended September 30, 2011 of \$13.4 million, compared to \$9.2 million for the nine months ended September 30, 2010, resulting in effective tax rates of 25.3% and 21.3%, respectively. Our effective tax rate may vary from period to period due to changes in the composition of income between U.S. and foreign jurisdictions resulting from our activity. Our effective rate differs from the U.S. federal statutory rate primarily due to the benefit of earnings in foreign jurisdictions which are subject to lower tax rates.

DISCONTINUED OPERATIONS

On October 15, 2010, we completed the sale of our gas flow control business, which includes the Aera[®] mass flow control and related product lines to Hitachi Metals, Ltd., for \$43.3 million. Assets and liabilities sold include, without limitation, inventory, real property in Hachioji, Japan, equipment, certain contracts, intellectual property rights related to the gas flow control business and certain warranty liability obligations. The results of continuing operations were reduced by the revenue and costs associated with the gas flow control business and are included in the results from discontinued operations, net of income taxes, in our Condensed Consolidated Statements of Operations.

Table of Contents**Liquidity and Capital Resources**

Our ability to fund our operations, acquisitions, capital expenditures and product development efforts will depend on our ability to generate cash from operating activities which is subject to future operating performance, as well as, general economic, financial, competitive, legislative, regulatory and other conditions, some of which may be beyond our control. Our primary sources of liquidity are our available cash, marketable securities and cash generated from current operations.

CASH FLOWS

Cash flows during the nine months ended September 30, 2011 and 2010 are summarized as follows (in thousands):

	Nine Months Ended	
	2011	2010
Net cash provided by (used in) operating activities	\$ 26,652	\$ (16,602)
Net cash used in investing activities	(27,602)	(9,247)
Net cash provided by financing activities	1,081	1,268
Effect of currency translation on cash	1,208	(6,959)
Net change in cash and cash equivalents	1,339	(31,540)
Cash and cash equivalents, beginning of the year	130,914	133,106
Cash and cash equivalents, end of the period	\$ 132,253	\$ 101,566

Our cash flows from discontinued operations are not reported separately in our Condensed Consolidated Statements of Cash Flows as it would be impractical to quantify cash flows from our gas flow control business. We do not expect the absence of cash flows applicable to our discontinued operations to have a significant impact on our future liquidity and capital resources.

Net cash provided by operating activities increased by \$43.3 million to \$26.7 million for the nine month period ended September 30, 2011 compared to net cash flows used by operating activities of \$16.6 million for the same period of 2010. This increase was driven by the collection of accounts receivable on increased sales and was offset by the payment of bonuses accrued at December 31, 2010 and the payment of accounts payable during the nine months ended September 30, 2011.

Net cash used in investing activities increased by \$18.4 million to \$27.6 million for the nine month period ended September 30, 2011 compared to \$9.2 million used in the same period of 2010.

The increase in cash used for investing activities was the result of increased purchases of property and equipment to sustain our engineering and new product development efforts and to increase production capacity for solar inverters and an increase in the purchases of marketable securities. Investments in marketable securities used \$13.0 million of cash in the nine months ended September 30, 2011 as compared to providing \$33.7 million of cash in the nine months ended September 30, 2010 which we used to fund our \$36.0 million cash outlay for the acquisition of PV Powered on May 3, 2010.

Net cash provided by financing activities decreased by \$0.2 million to \$1.1 million during the nine months ended September 30, 2011 compared to \$1.3 million during the same period in 2010 as a result of a reduction in the tax benefit on the exercise of stock options.

Effect of currency translation on cash changed \$8.2 million to \$1.2 million for the nine month period ended September 30, 2011 compared to negative \$7.0 million for the nine months ended September 30, 2010. The functional currencies of our worldwide operations primarily include U.S. dollar (USD), Japanese Yen (JPY), Chinese Yuan (CNY), New Taiwan Dollar (TWD), South Korean Won (KWN), British Pound (GBP) and Euro (EUR). Our purchasing and sales activities are primarily denominated in USD, JPY, CNY and EUR. The change in these key

currency rates during the nine months ended September 30, 2011 and 2010 are as follows:

From	To	2011	2010
CNY	USD	3.4%	2.0%
EUR	USD	1.0%	(5.3%)
JPY	USD	5.8%	11.0%
KWN	USD	(4.5%)	1.8%
TWD	USD	(4.3%)	2.5%
GBP	USD	0.4%	(2.2%)

Table of Contents

As of September 30, 2011, we have \$154.9 million in cash, cash equivalents, and marketable securities of which \$45.2 million was held in banks outside the United States. We believe that our current cash levels and cash flows from future operations will be adequate to meet anticipated working capital needs, capital expenditures and contractual obligations for the next 12 months. During the fourth quarter of 2011 we plan to repatriate \$30.0 million of cash held in Japan as the remaining cash held in that country is sufficient to fund local operations. The repatriated cash will be used to fund working capital and capital investments in the United States.

Off-Balance-Sheet Arrangements

We have no off-balance-sheet arrangements or variable interest entities.

Critical Accounting Policies and Estimates

The preparation of financial statements and related disclosures in conformity with U.S. GAAP requires us to make judgments, assumptions and estimates that affect the amounts reported in the Condensed Consolidated Financial Statements and accompanying notes. Note 1 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2010 describes the significant accounting policies and methods used in the preparation of our Consolidated Financial Statements. Our critical accounting estimates, discussed in the Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2010, include estimates for allowances for doubtful accounts, determining useful lives for depreciation and amortization, the valuation of assets and liabilities acquired in business combinations, assessing the need for impairment charges for identifiable intangible assets and goodwill, establishing warranty reserves, accounting for income taxes, and assessing excess and obsolete inventories. Such accounting policies and estimates require significant judgments and assumptions to be used in the preparation of the Condensed Consolidated Financial Statements and actual results could differ materially from the amounts reported based on variability in factors affecting these estimates.

Our management discusses the development and selection of our critical accounting policies and estimates with the Audit Committee of our Board of Directors at least annually. Our management also internally discusses the adoption of new accounting policies or changes to existing policies at interim dates, as it deems necessary or appropriate.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

Our market risk exposure relates to changes in interest rates in our investment portfolio. We generally place our investments with high-credit quality issuers and, by policy, are averse to principal loss and seek to protect and preserve our invested funds by limiting default risk, market risk and reinvestment risk. As of September 30, 2011, our investments consisted primarily of commercial paper, certificates of deposit, corporate bonds, and agency bonds. As a measurement of the sensitivity of our portfolio and assuming that our investment portfolio balances were to remain constant, a hypothetical decrease of 100 basis points in interest rates would decrease annual pre-tax earnings by approximately \$0.1 million.

Foreign Currency Exchange Rate Risk

We are impacted by changes in foreign currency rates through sales and purchasing transactions when we sell products in currencies different from the currency in which the product and manufacturing costs were incurred. Our purchasing and sales activities are primarily denominated in USD, JPY, CNY and EUR. As these currencies fluctuate against each other, and against other currencies, we are exposed to foreign currency exchange rate risk on sales, purchasing transactions and labor.

Our reported results of operations and the reported value of our assets and liabilities are also impacted by changes in foreign currency exchange rates. The assets and liabilities of many of our subsidiaries outside the U.S. are translated at period end rates of exchange for each reporting period. Earnings and cash flow statements are translated at weighted-average rates of exchange. Although these translation changes have no immediate cash impact, the translation changes may impact future borrowing capacity, debt covenants and overall value of our net assets. From time to time, we enter into foreign currency exchange rate contracts to hedge against changes in foreign currency exchange rates on assets and liabilities expected to be settled at a future date. Market risk arises from the potential adverse effects on the value of derivative instruments that result from a change in foreign currency exchange rates. We minimize our market risk applicable to foreign currency exchange rate contracts by establishing and

monitoring parameters that limit the types and degree of our derivative contract instruments. We enter into derivative contract instruments for risk management purposes only. We do not enter into or issue derivatives for trading or speculative purposes.

Table of Contents

Currency exchange rates vary daily and often one currency strengthens against the USD while another currency weakens. Because of the complex interrelationship of the worldwide supply chains and distribution channels, it is difficult to quantify the impact of a particular change in exchange rates.

See the Risk Factors set forth in Part I, Item 1A of our Annual Report on Form 10-K for more information about the market risks to which we are exposed. There have been no material changes in our exposure to market risk from December 31, 2010.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures, which are designed to ensure that information required to be disclosed in reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. These disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Act is accumulated and communicated to management, including our Principal Executive Officer (Garry Rogerson, Chief Executive Officer) and Principal Financial Officer (Danny C. Herron, Executive Vice President and Chief Financial Officer), as appropriate, to allow timely decisions regarding required disclosures.

As of the end of the period covered by this report, we conducted an evaluation, with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the disclosure controls and procedures pursuant to the Exchange Act Rule 13a-15(b). Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2011. The conclusions of the Chief Executive Officer and Chief Financial Officer from this evaluation were communicated to the Audit Committee. We intend to continue to review and document our disclosure controls and procedures, including our internal controls and procedures for financial reporting, and may from time to time make changes aimed at enhancing their effectiveness and to ensure that our systems evolve with our business.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting, except as discussed below, that occurred during the fiscal quarter covered by this Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

As discussed in Note 2, *Business Acquisition and Disposition*, to our Condensed Consolidated Financial Statements, on May 3, 2010, we acquired PV Powered. We considered the results of our pre-acquisition due diligence activities, the continuation by PV Powered of their established internal control over financial reporting, and our implementation of additional internal control over financial reporting activities related to PV Powered as part of our overall evaluation of disclosure controls and procedures as of September 30, 2011. The objective of PV Powered's previously established internal control over financial reporting is consistent, in all material respects, with our objectives. During the third quarter of 2011, we completed the integration of PV Powered to our systems. We believe this integration, along with our implementation of additional internal controls over financial reporting activities related to PV Powered, aligns the controls of PV Powered with the rest of Advanced Energy. We are in the process of evaluating the effectiveness of the internal controls, as implemented, and will complete this in the fourth quarter of 2011.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are involved in disputes and legal actions from time to time in the ordinary course of our business.

There have been no material developments in legal proceedings in which we are involved during the three months and nine months ended September 30, 2011. For a description of previously reported legal proceedings refer to Part I, Item 3, *Legal Proceedings* of our Annual Report on Form 10-K for the year ended December 31, 2010.

Table of Contents

ITEM 1A. RISK FACTORS

Item 1A, Risk Factors, of our Annual Report on Form 10-K for the year ended December 31, 2010 describes some of the risks and uncertainties associated with our business. The risk factors set forth below update such disclosures. Other factors may also exist that we cannot anticipate or that we currently do not consider to be significant based on information that is currently available. These risks and uncertainties have the potential to materially affect our business, financial condition, results of operations, cash flows and future results. Such risks and uncertainties also may impact the accuracy of forward-looking statements included in this Form 10-Q and other reports we file with the Securities and Exchange Commission.

Natural disasters, health pandemics and other catastrophic events can disrupt our business.

Catastrophic events in countries in which we do business can prevent or inhibit us or our customers from conducting normal business operations, disrupt our supply chain or information technology systems, and have other adverse effects on us, our customers and our suppliers. The recent earthquake and tsunami that occurred in Japan in March 2011, and the ensuing effects on the Japanese economy and infrastructure, have adversely affected many of our Thin Films customers. Both we and they rely on raw materials and components made in Japan. If we are unable to obtain the requisite raw materials and components in Japan from other sources, our manufacturing processes may be delayed, which would adversely affect our customer relationships and operating results.

We are exposed to risks as a result of ongoing changes specific to the solar industry.

A significant portion of our business, both in Thin Films and Solar Energy, is in the emerging solar market, which, in addition to the general industry changes described in the risk factor *The industries in which we compete are subject to volatile and unpredictable cycles*, in Item 1A, Risk Factors, of our Annual Report on Form 10-K for the year ended December 31, is also characterized by ongoing changes particular to the solar industry. Our business is subject to changes in technology or demand for solar products arising from, among other things, adoption of our products by our customers, compatibility of our solar inverter technology with our customers' products or certain solar panel providers, customers' and end-users' access to affordable financial capital, the cost and performance of solar technology compared to other energy sources, the adequacy of or changes in government energy policies, including the availability and amount of government incentives for solar power, the continuation of renewable portfolio standards, volatility in pricing of solar array components, such as solar panels, increased competition in the solar inverter equipment market and the extent of investment or participation in solar by utilities or other companies that generate, transmit or distribute power to end users. The current debt crisis in Europe and the resulting economic uncertainty and instability in the region could result in limited access to capital for our customers or changes to government incentives for renewable energy which could cause the delay or cancellation of current projects in the solar industry. There is also increased market volatility as the size of utility scale solar projects is increasing to hundreds of megawatts of capacity. Such large scale solar projects require significant financial resources on our part should we be selected as the supplier for solar inverters. We are beginning to see requirements in the solar industry for performance guarantees related to solar inverters and associated liquidated damages provisions. This could result in financial exposure for our business if our solar inverters do not meet reliability or uptime requirements. Lastly, customers using our solar inverters are beginning to evaluate multi-year service agreements from us for onsite maintenance and support of our inverters and even the solar site. These agreements, however, are subject to annual renewal and may not be renewed by the customers.

If we do not successfully manage the risks resulting from these ongoing changes occurring in the solar industry, we may miss out on substantial opportunities for revenue and our business, financial condition and results of operations could be materially and adversely affected.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. REMOVED AND RESERVED

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

- 10.1 Offer Letter to Garry Rogerson dated August 1, 2011. (1)
 - 10.2 Executive Change in Control Agreement dated August 4, 2011, by and between the Company and Garry W. Rogerson. (2)
 - 31.1 Certification of the Chief Executive Officer Pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
 - 31.2 Certification of the Principal Financial Officer Pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
 - 32.1 Certification of the Chief Executive Officer Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
 - 32.2 Certification of the Principal Financial Officer Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- (1) Incorporated by reference to the Registrant's Current Report on Form 8-K (File No. 000-26966), filed August 2, 2011.
- (2) Incorporated by reference to the Registrant's Current Report on Form 8-K (File No. 000-26966), filed August 4, 2011.
