Letter to Shareholders

[PHOTO OF JOHN P. CALAMOS]

Dear Fellow Shareholders:

Thank you for your investment in CALAMOS CONVERTIBLE OPPORTUNITIES AND INCOME FUND (CHI). I am very pleased to report that for the six-month period ending April 30, 2006, the Fund continued to provide you with a consistent, attractive annualized distribution of 8.87% based on the closing market price of \$20.29 at the end of the period.

FUND STRATEGY

The Fund is actively managed and seeks to provide attractive income to shareholders in a category we describe as Enhanced Fixed Income. These strategies utilize all ranges of credit quality and a variety of debt instruments to achieve the Fund's investment objective. In a low-inflation, low-interest rate environment, this strategy seeks to provide higher returns

Edgar Filing: CALAMOS CONVERTIBLE OPPORTUNITIES & INCOME FUND - Form N-CSRS

than traditional investment grade debt instruments. As the investment manager of this strategy, we see that three primary risks need to be addressed: changes in credit worthiness, equity market volatility and interest rate risk.

Changes in credit worthiness are managed by analyzing each security through a fundamental analytical process as well as through diversification in the securities held and the industry groups held. The portfolio also seeks to mitigate some of the interest rate exposure by accepting some equity-market exposure in return. This is accomplished by using a combination of both high-yield bonds and convertible bonds. Interest rate risk is managed using a variety of techniques including the use of swaps, a hedging technique that seeks to minimize the impact of short-term interest rate increases, and actively managing the average duration of the portfolio. Duration takes into consideration the cash flows from the securities as well as the time to payment of principal.

The potential advantage to the combination of these securities is that in a rising-interest-rate environment due to strong economic conditions, these securities can offset the higher interest rates. Convertible securities, for example, have an equity component that increases the value of the bond as the

Convertible Opportunities and Income Fund
Letter to Shareholders SEMIANNUAL REPORT 1

Letter to Shareholders

underlying stock increases, regardless of what the general trend of interest rates happen to be at the time.

As an investor, you must decide how much of your fixed-income asset allocation should be dedicated to an enhanced fixed-income strategy. We feel we are in a period where this strategy will prove valuable to your fixed-income asset allocation. For example, during the first calendar quarter of 2006, interest rates rose and the investment-grade market, as measured by the Lehman Brothers Aggregate Bond Index,¹ was down -0.65%, whereas the Fund's total return based on the value of the portfolio, net asset value, increased 4.49%. This Fund should be considered the portion of your fixed-income allocation that favors economic growth because the convertible securities participate in the rising equity markets, while the high-yield bonds participate as access to capital improves companies' balance sheets whereby companies' experience credit-rating upgrades and the bonds rise in value.

During the semiannual period, the Fund delivered a total of \$0.860 per share in monthly distributions to shareholders, comprised of earned income. In addition, the Fund paid short- and long-term capital gains distributions totaling \$0.3340 per share in January, reflecting the capacity for the Fund's holdings to not only generate income, but to also experience capital appreciation.

OUR HISTORY OF INNOVATION

CALAMOS INVESTMENTS has a history of producing innovative closed-end fund vehicles that offer a dynamic approach to asset allocation. For example, we were one of the first firms to introduce closed-end fund investors to the merits of combining convertible securities with other securities such as stocks and corporate bonds, aiming to provide total return with current income in a risk-managed framework.

Calamos is dedicated to superior investment performance. The Fund is an example of the way we have created new strategies based on our core expertise to help you achieve and benefit from greater portfolio diversification. This is a

recognized way to try to reduce some of the risk that comes with investing.

At CALAMOS INVESTMENTS, we regard ourselves first and foremost as risk managers. The surest way of building wealth is protecting principal. We believe that by combining convertible- and corporate fixed-income securities that provide significant income as well as exposure to the equity market's upside potential, we can offer our shareholders the potential for long-term wealth creation in a manner

Convertible Opportunities and Income Fund
2 SEMIANNUAL REPORT Letter to Shareholders

Letter to Shareholders

consistent with our focus on risk management. Talk to your financial advisor about other Calamos strategies that may fit your investment objectives.

THE CONVENIENCE OF REINVESTMENT

Take advantage of the convenience of accumulating more shares of the Fund through the dividend reinvestment plan, an efficient method for purchasing additional shares with a potential for cost savings. For example, if the Fund's shares are trading at a premium, dividends will be automatically reinvested through the plan at NAV or 95% of the market price, whichever is greater; if shares are trading at a discount, dividends will be reinvested by purchasing shares at the market price, below NAV. For additional information about the plan, please contact the Plan Agent, The Bank of New York, at 800-432-8224 or visit us on the web at www.calamos.com/chi.aspx.

STAY CONNECTED WITH CALAMOS

I welcome the opportunity to address shareholders in these reports but urge you to stay connected with Calamos via our website www.calamos.com where you will find timely portfolio details, our outlook and special reports.

THANK YOU

Thank you for the confidence you have placed in our team, investment process and the Calamos Closed-End Funds. We will do our utmost to continue to earn your trust and look forward to serving your long-term investment plan.

Sincerely,

/s/ JOHN P. CALAMOS, SR.

Convertible Opportunities and Income Fund

Investment Team Interview

WITH THE CALAMOS INVESTMENT TEAM LED BY CO-CHIEF INVESTMENT OFFICERS, JOHN P. CALAMOS, SR. AND NICK P. CALAMOS

HOW DOES THE FUND FIT IN AN INVESTOR'S OVERALL ASSET ALLOCATION?

The Fund offers investors an enhanced fixed-income strategy focused on delivering an attractive income stream with the potential for capital gains. The types of bonds that the Fund holds (high-yield corporate and convertible securities) have different characteristics than traditional bonds, providing an attractive complement to a standard fixed-income allocation. The Fund is designed to perform well in a period marked by economic expansion and rising interest rates, whereas traditional high-quality bonds tend to perform poorly in a rising interest rate environment. (Such a distinction was made especially clear during the first calendar quarter of 2006, when traditional bonds endured negative returns, while equity-sensitive high-yield and convertible bonds enjoyed gains.) It is also worth noting that since the Fund's holdings have different sensitivities than traditional bonds, the Fund can further diversify the income-focused portion of an investor's asset allocation.

FUND ASSET ALLOCATION AS OF APRIL 30, 2006

[PIE CHART]

CONVERTIBLE SECURITIES	46.3%
HIGH YIELD/CORPORATE BONDS	53.5%
SHORT-TERM INVESTMENTS	0.2%

Fund asset allocations are based on total investment (excluding security lending collateral) and may vary over time.

HOW DID THE FUND PERFORM OVER THE REPORTING PERIOD?

The Fund performed well: Its underlying portfolio (as represented by net asset value or NAV) returned 7.63% during the six-month period, and the Fund's market price returned 10.55% during the same period.

TOTAL RETURN* AS OF APRIL 30, 2006

COMMON SHARES-INCEPTION 6/26/02	6 MONTHS	1 YEAR	SINCE INCEPTION**
On Share Price	10.55%	22.29%	21.48%
On NAV	7.63	15.41	17.04

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. You can purchase or sell common shares daily. Like any other stock, market price will fluctuate with the market. Upon sale, your shares may have a market price that is above or below net asset value and may be worth more or less than your original investment. Due to ongoing market volatility, performance is subject to substantial short-term fluctuations.

Edgar Filing: CALAMOS CONVERTIBLE OPPORTUNITIES & INCOME FUND - Form N-CSRS

*Total return measures net investment income and capital gain or loss from portfolio investments, assuming reinvestment of income and capital gains distributions.

**Annualized since inception.

Convertible Opportunities and Income Fund
4 SEMIANNUAL REPORT Investment Team Interview

Investment Team Interview

INTEREST RATES CONTINUED TO MOVE HIGHER OVER THE PERIOD, WITH THE FEDERAL FUNDS RATE MOVING FROM 4.00% AT THE BEGINNING OF THE PERIOD TO 4.75% AT THE END OF APRIL 2006. HOW DID THIS RISING RATE ENVIRONMENT IMPACT THE PORTFOLIO?

Rising short-term interest rates have had little impact on the Fund's cost of leverage. Many closed-end funds leverage the portfolio by borrowing funds at very short-term rates. As short-term interest rates rise, this increases the cost of leverage and can impact the yield and total return of the portfolio. While the Fund does employ leverage, the cost of leverage was locked in for longer periods at an earlier point in the interest rate cycle, when rates were lower. As of the end of April 2006, 99% of the leverage for CHI was locked in longer-term rates and not susceptible to rising short-term interest rates. By locking in the cost of leverage longer term, the portfolio is not significantly affected by rising short-term interest rates.

Long-term interest rates also rose over the period, with the yield on the 10-year Treasury moving from 4.57% at the beginning of the period to 5.07% at the end of April 2006. Rising long-term interest rates tend to negatively affect traditional highquality fixed-income securities. As noted above, this portfolio combines high yield corporate bonds and convertible bonds that tend to be more economically sensitive and much less interest-rate sensitive. This is shown by the positive performance delivered over the period as the portfolio benefited from continued economic expansion and a rising equity market.

Furthermore, the portfolio continues to provide an attractive yield for shareholders: CHI's monthly distribution equated to a 8.87% annualized distribution rate based on the market price as of April 30, 2006.

Convertible Opportunities and Income Fund
Investment Team Interview SEMIANNUAL REPORT 5

Investment Team Interview

Edgar Filing: CALAMOS CONVERTIBLE OPPORTUNITIES & INCOME FUND - Form N-CSRS

HOW DID THE FUND BENEFIT FROM POSITIONING DURING THE REPORTING PERIOD?

On a sector basis, the Fund benefited significantly from our selection of holdings within the Financials, Information Technology, Industrials and Energy sectors. The portfolio also benefited from our focus on more equity-sensitive convertible securities, which performed well, reflecting the positive returns in their underlying equities.

SECTOR ALLOCATION

Consumer Discretionary	24.7%
Financials	15.6
Energy	12.5
Consumer Staples	10.6
Information Technology	9.4
Industrials	9.4
Materials	5.6
Utilities	5.3
Health Care	5.1
Telecommunication Services	1.8

Sector allocations are based on total investments (excluding security lending collateral and short-term investments) and may vary over time.

The portfolio has also increased the use of synthetic convertible securities, which has benefited the performance. Synthetic convertible securities are created by combining a traditional fixed-income bond with a call option. Through the use of these securities, the portfolio team can effectively manage the credit risk, interest-rate sensitivity, and equity sensitivity of the portfolio. Synthetic securities provide an additional tool for the investment team in constructing the portfolio and managing the overall risk/reward.

HOW DID THE FUND'S POSITIONING HURT PERFORMANCE OVER THE PERIOD?

While securities within each sector contributed to positive returns, issues within Materials, Health Care, Consumer Staples and Utilities lagged other sectors for the period. In addition, the investment team's focus on issues with solid credits and relatively strong balance sheets was not especially rewarded over the period, as many of the lowest-quality distressed credits performed well over the period. While avoiding distressed issues detracted from returns on a relative basis for this sixmonth period, we believe that over a full market cycle our rigorous credit research will provide clients with a portfolio with an attractive risk/reward profile.

DO YOU ANTICIPATE MAKING ANY CHANGES WITHIN THE PORTFOLIO GOING FORWARD?

The portfolio continues to be actively managed to take advantage of opportunities

Convertible Opportunities and Income Fund
6 SEMIANNUAL REPORT investment Team Interview

Investment Team Interview

in the marketplace. Through extensive fundamental analysis, we are focusing on issues that have stable growth prospects and solid balance sheets, which can

Edgar Filing: CALAMOS CONVERTIBLE OPPORTUNITIES & INCOME FUND - Form N-CSRS

benefit from the current economic backdrop. For example, during a slow-but-stable growth phase of the economy, larger companies tend to outperform, as do sectors such as Consumer Staples.

We also may continue to make use of synthetic convertible securities, as they allow the investment team the flexibility to control credit risk, interest-rate sensitivity and equity sensitivity. We continue to believe that the convertible market is attractively valued. Valuations within the convertible market had declined toward the end of 2004 and into 2005 due to selling pressure from hedge funds employing convertible arbitrage strategies. Valuations remain attractive within the convertible bond market, and the portfolio is positioned with the potential to take advantage of an improving convertible bond market. While current convertible valuations remain attractive, should valuations improve, the allocation to convertible securities would likely be reduced. We will continue to make use of our fundamental research as we look for securities with stable growth prospects, solid balance sheets and good risk/reward profiles.

WHAT IS YOUR MARKET OUTLOOK AND HOW IS THE PORTFOLIO POSITIONED TO TAKE ADVANTAGE OF THIS ENVIRONMENT?

We believe the economy is in the mid-cycle growth phase characterized by:

- Positive but slowing gross domestic product growth
- Corporate earnings that are strong, albeit slowing
- High household net worth and wage growth
- Strong corporate balance sheets that support increased capital expenditures

We believe the portfolio will continue to perform well in this environment. The equity-sensitive nature of high-yield and convertible bonds can benefit from a positive environment for equity securities. Another positive factor for equity sensitive holdings may materialize should the Fed complete this cycle of raising interest rates. In the past, this has triggered renewed excitement for stocks and the Fund -- unlike traditional fixed-income holdings -- has the potential to significantly benefit from such enthusiasm.

Convertible Opportunities and Income Fund
 32 SEMIANNUAL REPORT Statements of Changes in Net Assets

See accompanying Notes to Schedule of Investments.

Notes to Financial Statements (Unaudited)

NOTE 1 - ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

ORGANIZATION. CALAMOS Convertible Opportunities and Income Fund (the "Fund") was organized as a Delaware statutory trust on April 17, 2002 and is registered under the Investment Company Act of 1940 (the "1940 Act") as a diversified, closed-end management investment company. The Fund commenced operations on June 26, 2002.

The Fund's investment objective is to provide total return through a combination of capital appreciation and current income. Under normal circumstances, the Fund will invest at least 80% of its managed assets in a diversified portfolio of convertible and non-convertible income securities. "Managed assets" means the Fund's total assets (including any assets attributable to any leverage that may be outstanding) minus total liabilities (other than debt representing financial leverage).

PORTFOLIO VALUATION. In computing the Fund's net asset value, portfolio securities that are traded on a securities exchange in the United States, except for option securities, are valued at the last reported sale price as of the time of valuation, or lacking any current reported sale at the time of valuation, at the mean between the most recent bid and asked quotations. Each option security traded on a securities exchange in the United States is valued at the last current reported sale price as of the time of valuation if the last current reported sale price falls within the consolidated bid/ask quote for the option

security. If the last current reported sale price as of the time of valuation does not fall within the consolidated bid/ask quote for the option security, the security is valued at the mid-point of the consolidated bid/ask quote for the option security. Each security traded in the over-the-counter market and quoted on the NASDAQ National Market System, is valued at the NASDAQ Official Closing Price ("NOCP"), as determined by NASDAQ, or lacking an NOCP, the last current reported sale price as of the time of valuation by NASDAQ, or lacking any current reported sale on NASDAQ at the time of valuation, at the mean between the most recent bid and asked quotations. Each over-the-counter option that is not traded through the Options Clearing Corporation is valued by the counterparty, or if the counterparty's price is not readily available then by using the Black-Scholes method. Each other security traded over-the-counter is valued at the mean between the most recent bid and asked quotations. Short-term securities with maturities of 60 days or less are valued at amortized cost, which approximates market value.

When market quotations are not readily available or when the valuation methods mentioned above are not reflective of a fair value of the security, the security is val-

Convertible Opportunities and Income Fund
Notes to Financial Statements SEMIANNUAL REPORT 33

Notes to Financial Statements (Unaudited)

used at a fair value following procedures and/or guidelines approved by the Board of Trustees, which may include utilizing a systematic fair valuation model provided by an independent pricing system. The Fund may also use fair value pricing, if the value of a security it holds is, pursuant to Board of Trustees' guidelines, materially affected by events occurring before the Fund's pricing time but after the close of the primary market or exchange on which the security is traded. These procedures may utilize valuations furnished by pricing services approved by the Board of Trustees, which may be based on market transactions for comparable securities and various relationships between securities that are generally recognized by institutional traders, a computerized matrix system, or appraisals derived from information concerning the securities or similar securities received from recognized dealers in those securities. When fair value pricing is employed, the value of the portfolio security used to calculate the Fund's net asset value may differ from quoted or official closing prices.

Securities that are principally traded in a foreign market are valued at the last current sale price at the time of valuation or lacking any current or reported sale, at the time of valuation, at the mean between the most recent bid and asked quotations as of the close of the appropriate exchange or other designated time. Trading in securities on European and Far Eastern securities exchanges and over-the-counter markets is normally completed at various times before the close of business on each day on which the New York Stock Exchange ("NYSE") is open. Trading of these securities may not take place on every NYSE business day. In addition, trading may take place in various foreign markets on Saturdays or on other days when the NYSE is not open and on which the Fund's net asset value is not calculated. As stated above, if the market prices are not readily available or are not reflective of the fair value of the security, the security will be priced at a fair value following procedures approved by the Board of Trustees. In light of the judgment involved in fair value decisions, there can be no assurance that a fair value assigned to a particular security is accurate.

INVESTMENT TRANSACTIONS AND INVESTMENT INCOME. Short-term investment transactions are recorded on a trade date basis. Long-term investment transactions are recorded on a trade date plus one basis, except for fiscal

quarter ends, which are recorded on trade date. Net realized gains and losses from investment transactions are reported on an identified cost basis. Interest income is recognized using the accrual method and includes accretion of original issue and market discount and amortization of premium. Dividend income is recognized on the ex-dividend date, except that certain dividends from foreign securities are recorded as soon as the information becomes available.

Convertible Opportunities and Income Fund
34 SEMIANNUAL REPORT Notes to Financial Statements

Notes to Financial Statements (Unaudited)

FOREIGN CURRENCY TRANSLATION. Except for securities of foreign issuers valued by a pricing service, values of investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars using a rate quoted by any major bank or dealer in the particular currency market, as reported by a recognized quotation dissemination service.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Reported net realized foreign currency gains or losses arise from disposition of foreign currency, the difference in the foreign exchange rates between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the ex-date or accrual date and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes (due to the changes in the exchange rate) in the value of foreign currency and other assets and liabilities denominated in foreign currencies held at period end.

OPTION TRANSACTIONS. For hedging and investment purposes, the Fund may purchase or write (sell) put and call options. One of the risks associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of purchased call options is increased by premiums paid. The proceeds from securities sold through the exercise of purchased put options are decreased by the premiums paid.

When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current value of the option written. Premiums received from writing options that expire unexercised are treated by the Fund on the expiration date as realized gains from written options. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a written put option

Notes to Financial Statements (Unaudited)

is exercised, the premium reduces the cost basis of the securities purchased by the Fund. The Fund as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option.

USE OF ESTIMATES. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

INCOME TAXES. No provision has been made for U.S. income taxes because the Fund's policy is to continue to qualify as a regulated investment company under Internal Revenue Code of 1986, as amended (the "Code") and distribute to shareholders substantially all of its taxable income and net realized gains.

Dividends and distributions paid to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains is determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. To the extent these "book/tax" differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment. These differences are primarily due to differing treatments for foreign currency transactions, contingent payment debt instruments and methods of amortizing and accreting fixed income securities. Financial records are not adjusted for temporary differences.

INDEMNIFICATIONS. Under the Fund's organizational documents, its officers and trustees are indemnified against certain liabilities incurred by them by reason of having been an officer or trustee of the Fund. In addition, in the normal course of business, the Fund enters into contracts that provide general indemnifications to other parties. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

NOTE 2 - INVESTMENT ADVISOR AND TRANSACTIONS WITH AFFILIATES OR CERTAIN OTHER PARTIES

Pursuant to an investment advisory agreement with Calamos Advisors LLC ("Calamos Advisors"), the Fund pays an annual fee, payable monthly, equal to 0.80% based on the average weekly managed assets. Calamos Advisors has contractually

Convertible Opportunities and Income Fund
36 SEMIANNUAL REPORT Notes to Financial Statements

Notes to Financial Statements (Unaudited)

agreed to waive a portion of its management fee at the annual rate of 0.25% of the average weekly managed assets of the Fund for the first five full years of the Fund's operation (through June 30, 2007) and to waive a declining amount for an additional three years (0.18% of the average weekly managed assets in 2008, 0.11% in 2009, and 0.04% in 2010).

Calamos Advisors receives a fee payable monthly at the annual rate of 0.0175% on the first \$1 billion of combined assets; 0.0150% on the next \$1 billion of

Edgar Filing: CALAMOS CONVERTIBLE OPPORTUNITIES & INCOME FUND - Form N-CSRS

combined assets; and 0.0110% on combined assets above \$2 billion for financial accounting services (for purposes of this calculation "combined assets" means the total of the average daily net assets of Calamos Investment Trust and Calamos Advisors Trust and the average weekly managed assets of Calamos Convertible and High Income Fund, Calamos Convertible Opportunities and Income Fund, Calamos Strategic Total Return Fund and Calamos Global Total Return Fund). Financial accounting services include, but are not limited to, the following: managing expenses and expense payment processing; monitoring the calculation of expense accrual amounts; calculating, tracking, and reporting tax adjustments on all assets and liabilities and monitoring trustee deferred compensation plan accruals and valuations. The Fund will pay its pro rata share of the financial accounting service fee payable to Calamos Advisors based on the Fund's relative portion of combined assets.

Effective August 1, 2005, the Fund began reimbursing the advisor for a portion of compensation paid to the Fund's Chief Compliance Officer. This compensation is reported as part of "Trustees' fees and officer compensation" expenses on the Statement of Operations.

Certain officers and trustees of the Fund are also officers and directors of Calamos Financial Services LLC ("CFS") and Calamos Advisors. All officers and affiliated Trustees serve without direct compensation from the Fund, except for the Chief Compliance Officer as described above.

The Fund has adopted a deferred compensation plan (the "Plan"). Under the Plan, a trustee who is not an "interested person" (as defined in the 1940 Act) of CFS or Calamos Advisors and has elected to participate in the Plan (a "participating trustee") may defer receipt of all or a portion of his compensation from the Fund. The deferred compensation payable to the participating trustee is credited to the trustee's deferral account as of the business day such compensation would have been paid to the participating trustee. The value of the account increases with contributions to the account or with increases in the value of the measuring shares, and the value of the account decreases with withdrawals from the account or with declines

Convertible Opportunities and Income Fund

Notes to Financial Statements (Unaudited)

in the value of the measuring shares. Deferred compensation of \$46,926 is included in "Other assets" on the Statement of Assets and Liabilities at April 30, 2006. The Fund's obligation to make payments under the Plan is a general obligation of the Fund and is included in "Payable for deferred compensation to Trustees" on the Statement of Assets and Liabilities at April 30, 2006.

NOTE 3 - INVESTMENTS

Purchases and sales of investments, other than short-term obligations, for the six months ended April 30, 2006 were as follows:

Purchases	\$ 252,663,825
Proceeds from sales	240,180,392

The cost basis of investments for Federal income tax purposes at April 30, 2006 was as follows:

Edgar Filing: CALAMOS CONVERTIBLE OPPORTUNITIES & INCOME FUND - Form N-CSRS

Cost basis of investments	\$ 1,183,306,048

NOTE 6 - FORWARD FOREIGN CURRENCY CONTRACTS

The Fund may engage in portfolio hedging with respect to changes in currency exchange rates by entering into forward foreign currency contracts to purchase or sell currencies. A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Risks associated with such contracts include, among other things, movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. The net unrealized gain, if any, represents the credit risk to the Fund on a forward foreign currency contract. The contracts are valued daily at forward exchange rates, and an unrealized gain or loss is recorded. The Fund realizes a gain or loss when a position is closed or upon settlement of the contracts. There were no open forward foreign currency contracts at April 30, 2006.

Convertible Opportunities and Income Fund
Notes to Financial Statements SEMIANNUAL REPORT 39

Notes to Financial Statements (Unaudited)

NOTE 7 - SYNTHETIC CONVERTIBLE SECURITIES

The Fund may establish a "synthetic" convertible instrument by combining separate securities that possess the economic characteristics similar to a convertible security, i.e., fixed-income securities ("fixed-income component") and the right to acquire equity securities ("convertible component"). The fixed-income component is achieved by investing in non-convertible, fixed income securities such as bonds, preferred stocks and money market instruments. The convertible component is achieved by investing in warrants or options to buy common stock at a certain exercise price, or options on a stock index. In establishing a synthetic instrument, the Fund may pool a basket of fixed-income securities and a basket of warrants or options that produce the economic characteristics similar to a convertible security. Within each basket of fixed-income securities and warrants or options, different companies may issue the fixed-income and convertible components, which may be purchased separately and at different times.

The Fund may purchase synthetic convertible instruments created by other parties, typically investment banks, including convertible structured notes. Convertible structured notes are fixed-income debentures linked to equity. Convertible structured notes have the attributes of a convertible security; however, the investment bank that issued the convertible note assumes the credit risk associated with the investment, rather than the issuer of the underlying common stock into which the note is convertible. Purchasing synthetic convertible securities may offer more flexibility than purchasing a convertible security. Different companies may issue the fixed-income and convertible components, which may be purchased separately and at different times.

Edgar Filing: CALAMOS CONVERTIBLE OPPORTUNITIES & INCOME FUND - Form N-CSRS

NOTE 8 - PREFERRED SHARES

There are unlimited shares of Auction Rate Cumulative Preferred Shares ("Preferred Shares") authorized. The Preferred Shares have rights as determined by the Board of Trustees. The 15,360 shares of Preferred Shares outstanding consist of seven series, 2,040 shares of M, 2,040 shares of TU, 2,040 shares of W7, 2,400 shares of W28, 2,400 shares of TH7, 2,040 shares of TH28, and 2,400 shares of F. The Preferred Shares have a liquidation value of \$25,000 per share plus any accumulated but unpaid dividends, whether or not declared.

Dividends on the Preferred Shares are cumulative at a rate typically reset every seven or twenty-eight days based on the results of an auction. Dividend rates ranged from

Convertible Opportunities and Income Fund
40 SEMIANNUAL REPORT Notes to Financial Statements

Notes to Financial Statements (Unaudited)

3.50% to 4.82% for the six months ended April 30, 2006. Under the 1940 Act, the Fund may not declare dividends or make other distributions on shares of common stock or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding Preferred Shares would be less than 200%.

The Preferred Shares are redeemable at the Fund's option, in whole or in part, on any dividend payment date at \$25,000 per share plus any accumulated but unpaid dividends. The Preferred Shares are also subject to mandatory redemption at \$25,000 per share plus any accumulated but unpaid dividends, whether or not declared, if certain requirements relating to the composition of the assets and liabilities of the Fund as set forth in the Statement of Preferences are not satisfied.

The holders of Preferred Shares have voting rights equal to the holders of common stock (one vote per share) and will vote together with holders of shares of common stock as a single class except on matters affecting only the holders of Preferred Shares or the holders of common shares.

NOTE 9 - INTEREST RATE TRANSACTIONS

The Fund may enter into interest rate swap or cap transactions to attempt to protect itself from increasing dividend or interest expense on its leverage resulting from increasing short-term interest rates. A decline in interest rates may result in a decline in the value of the swap or cap, which may result in a decline in the Fund's net asset value. In addition, if the counterparty to an interest rate swap or cap defaults, the Fund would not be able to use the anticipated receipts under the swap or cap to offset the dividend or interest payments on the Fund's leverage. At the time an interest rate swap or cap reaches its scheduled termination, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. In addition, if the Fund is required to terminate any swap or cap early due to the Fund failing to maintain a required 200% asset coverage of the liquidation value of the outstanding Preferred Shares or the Fund loses its credit rating on its Preferred Shares, then the Fund could be required to make a termination payment, in addition to redeeming all or some of the Preferred Shares. Net unrealized gains are reported as an asset and net unrealized losses are reported as a liability on the Statement of Assets and Liabilities. The change in the value of the swaps, including periodic amounts of interest to be paid or received on swaps is reported as unrealized gains or losses in the Statement of Operations. A realized gain or loss is

Notes to Financial Statements (Unaudited)

recorded upon payment or termination of swap agreements. Details of the swap agreements outstanding as April 30, 2006 were as follows:

COUNTERPARTY	TERMINATION DATE	NOTIONAL AMOUNT (000)	FIXED RATE (FUND PAYS)	FLOATING RATE (FUND RECEIVES)	UNREALIZED APPRECIATION (DEPRECIATION)
Merrill Lynch	July 3, 2006	\$ 65,000	1.91%	1 month LIBOR	\$ 493,1
Merrill Lynch	November 28, 2006	60,000	2.82%	1 month LIBOR	816,7
Merrill Lynch	July 3, 2007	65,000	2.33%	1 month LIBOR	2,264,9

Merrill Lynch	July 3, 2008	70,000	2.69%	1 month LIBOR	3,735,7
Merrill Lynch	November 28, 2008	60,000	3.60%	1 month LIBOR	2,326,2
					\$ 11,411,0

NOTE 10 - SECURITIES LENDING

During the six months ended April 30, 2006, the Fund loaned certain of their securities to broker-dealers and banks. Any such loan must be continuously secured by collateral in cash or cash equivalents maintained on a current basis in an amount at least equal to the market value of the securities loaned by the Fund. The Fund continues to receive the equivalent of the interest or dividends paid by the issuer on the securities loaned and also receives an additional return that may be in the form of a fixed fee or a percentage of the collateral. The Fund may pay reasonable fees to persons unaffiliated with the Fund for services in arranging these loans. The Fund has the right to call the loan and obtain the securities loaned at any time on notice of not more than five business days. The Fund does not have the right to vote the securities during the existence of the loan but could call the loan in an attempt to permit voting of the securities in certain circumstances. Upon return of the securities loaned, the cash or cash equivalent collateral will be returned to the borrower. In the event of bankruptcy or other default of the borrower, the Fund could experience both delays in liquidating the loan collateral or recovering the loaned securities and losses, including (a) possible decline in the value of the collateral or in the value of the securities loaned during the period while the Fund seeks to enforce its rights thereto, (b) possible subnormal levels of income and lack of access to income during this period, and (c) the expenses of enforcing its rights. In an effort to reduce these risks, Calamos Advisors and the security lending agent will monitor the creditworthiness of the firms to which the Fund lends securities. At April 30, 2006, the Fund had securities valued at \$107,117,856 that were on loan to broker-dealers and banks and \$109,618,390 in cash or cash equivalent collateral.

44 SEMIANNUAL REPORT Financial Highlights

Financial Highlights

- * Commencement of operations.
- (a) Net of sales load of \$0.675 on initial shares issued and beginning net asset value of \$14.325.
- (b) Interest rate swap payment reclassified from net investment income (loss) to net realized and unrealized gain (loss) on investments, foreign currency and interest rate swaps.
- (c) Based on average shares method.
- (d) Amount equated to less than \$0.005 per common share.
- (e) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of the period reported. Dividends and distributions are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total return is not annualized for periods less than one year. Brokerage commissions are not reflected. NAV per share is determined by dividing the value of the Fund's portfolio securities, cash and other assets, less all liabilities, by the total number of common shares outstanding. The common share market price is the price the market is willing to pay for shares of the Fund at a given time. Common share market price is influenced by a range of factors, including supply and demand and market conditions.
- (f) Annualized for periods less than one year.
- (g) Does not reflect the effect of dividend payments to Preferred Shareholders.

- (h) Calculated by subtracting the Fund's total liabilities (not including Preferred Shares) from the Fund's total assets and dividing this by the number of Preferred Shares outstanding.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of
CALAMOS Convertible Opportunities and Income Fund

We have reviewed the accompanying statement of assets and liabilities, including the schedule of investments, of CALAMOS Convertible Opportunities and Income Fund (the "Fund") as of April 30, 2006, and the related statements of operations and changes in net assets and the financial highlights for the semi-annual period then ended. These interim financial statements and financial highlights are the responsibility of the Fund's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to such interim financial statements and financial highlights for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the statement of changes in net assets for the year ended October 31, 2005 and the financial highlights for each of the three years then ended October 31, 2005; and in our report dated December 16, 2005, we expressed an unqualified opinion on such statement of changes in net assets and financial highlights.

About Closed-End Funds

WHAT IS A CLOSED-END FUND?

A closed-end fund is a publicly traded investment company that raises its initial investment capital through the issuance of a fixed number of shares to investors in a public offering. Shares of a closed-end fund are listed on a stock exchange or traded in the over-the-counter market. Like all investment companies, a closed-end fund is professionally managed and offers investors a unique investment solution based on its investment objective approved by the fund's Board of Directors.

ADVANTAGES OF CLOSED-END FUND INVESTING

- DEFINED ASSET POOL ALLOWS EFFICIENT PORTFOLIO MANAGEMENT--Although closed-end fund shares trade actively on a securities exchange, this doesn't affect the closed-end fund manager because there are no new investors buying into or selling out of the fund's portfolio.
- MORE FLEXIBILITY IN THE TIMING AND PRICE OF TRADES--Investors can purchase and sell shares of closed-end funds throughout the trading day, just like the shares of other publicly traded securities.
- LOWER EXPENSE RATIOS--The expense ratios of closed-end funds are oftentimes less than those of mutual funds. Over time, a lower expense ratio could enhance investment performance.
- CLOSED-END STRUCTURE MAKES SENSE FOR LESS-LIQUID ASSET CLASSES--A closed-end structure makes sense for investors considering less-liquid asset classes, such as high-yield bonds or micro-cap stocks.
- ABILITY TO PUT LEVERAGE TO WORK--Closed-end funds may issue senior securities (such as preferred stock or debentures) or borrow money to "leverage" their investment positions.
- NO MINIMUM INVESTMENT REQUIREMENTS

Convertible Opportunities and Income Fund

Leverage

USING LEVERAGE TO ENHANCE TOTAL RETURN

Closed-end funds can use leverage which utilizes borrowed money to increase the return on invested capital. The Fund will invest the borrowed assets into securities, which we believe will provide a greater total return to investors than the cost of the borrowing.

HIGHLIGHTS ON LEVERAGE

- Leveraging the portfolio allows the investment team to potentially enhance the income and total returns of the Fund.
- In a rising-rate environment, the cost of leverage often increases; however, the investment team has locked in the cost of leverage for a longer term. In leveraged closed-end funds that invest in interest-rate sensitive securities (high-quality traditional fixed income), rising rates can hurt a fund in two ways: first, the cost of leverage increases; second, the value of securities drops.
- This portfolio does not have notable sensitivity to rising interest rates. Much of the cost of leverage has been locked in, and the portfolio seeks to invest in securities that should be more economically sensitive and less interest-rate sensitive.

MANAGING THE INTEREST RATE RISK OF LEVERAGE

In general, leverage can expose a closed-end fund to the risk of fluctuations in short-term interest rates. As we discussed in the Investment Team Interview, Calamos Investments has taken steps to mitigate some of this risk to our shareholders. Specifically, we hedged the Fund's preferred shares (used these shares as principal) to enter into interest rate swap agreements. In its simplest form, an interest rate swap involves two parties agreeing to exchange or "swap" one set of cash flows for another set. In essence, the agreement allows a party that desires to avoid a variable rate (Calamos) to pay a fixed rate to a party that desires variability.

THE DEALER MARKET FOR INTEREST RATE SWAPS

[FLOW CHART]

Under these agreements, the Fund pays a potentially higher rate for borrowing initially, but that rate is fixed for a period of three to five years, thereby potentially reducing the interest costs that the Fund would otherwise pay over the period based on a floating or variable rate. To learn more about the use of leverage and interest rate swaps, visit our special report titled "Using Leverage and Interest Rate Swaps in Today's Market" at www.calamos.com/closedend.aspx.

Convertible Opportunities and Income Fund
50 SEMIANNUAL REPORT Leverage

Level Rate Distribution Policy

USING A LEVEL RATE DISTRIBUTION POLICY TO PROMOTE

DEPENDABLE INCOME AND TOTAL RETURN

The goal of the level rate distribution policy is to provide investors a predictable, though not assured, level of cash flow, which can either serve as a stable income stream or, through reinvestment, contribute significantly to long-term total return.

We understand the importance that investors place on the stability of dividends and their ability to contribute to long-term total return, which is why we have instituted a level rate distribution policy for the Fund. Under the policy, monthly distributions paid may include net investment income, net realized short-term capital gains and, if necessary, return of capital. In addition, a limited number of distributions per calendar year may include net realized long-term capital gains. There is no guarantee that the Fund will realize capital gains in any given year. Distributions are subject to re-characterization for tax purposes after the end of the fiscal year. All shareholders with taxable accounts will receive written notification regarding the components and tax treatment for distributions via Form 1099-DIV. Distributions from the Fund are generally subject to Federal income taxes. For purposes of maintaining the level rate distribution policy, the Fund may realize short-term capital gains on securities that, if sold at a later date, would have resulted in long-term capital gains. Maintenance of a level rate distribution policy may increase transaction and tax costs associated with the Fund.

Automatic Dividend Reinvestment Plan

MAXIMIZING INVESTMENT WITH AN AUTOMATIC DIVIDEND REINVESTMENT PLAN

The Automatic Dividend Reinvestment Plan offers a simple, cost-efficient and convenient way to reinvest your dividends and capital gains distributions in additional shares of the Fund, allowing you to increase your investment in the Fund.

BENEFITS

- **COMPOUNDED GROWTH:** By automatically reinvesting with the Plan, you gain the potential to allow your dividends and capital gains to compound over time.
- **POTENTIAL FOR LOWER COMMISSION COSTS:** Additional shares are purchased in large blocks, with brokerage commissions shared among all plan participants. There is no cost to enroll in the Plan.
- **CONVENIENCE:** After enrollment, the Plan is automatic and includes detailed statements for participants. Participants can terminate their enrollment at any time.

For additional information about the Plan, please contact the Plan Agent, The Bank of New York, at 800-432-8224 or visit us on the web at www.calamos.com/chi.aspx. If you wish to participate in the Plan and your shares are held in your own name, simply call the Plan Agent. If your shares are not held in your name, please contact your brokerage firm, bank, or other nominee to request that they participate in the Plan on your behalf. If your brokerage firm, bank, or other nominee is unable to participate on your behalf, you may request that your shares be re-registered in your own name.

We're pleased to provide our shareholders with the additional benefit of the Fund's Dividend Reinvestment Plan and hope that it may serve your financial
