SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

Form 10-K

FOR ANNUAL AND TRANSITION REPORTS PURSUANT TO

SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

(Mark One)

☒ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934.**

For the fiscal year ended December 31, 2002

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934.**

For the transition period from to

Commission file number: 000-21319

Lightbridge, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

**67 South Bedford Street
Burlington, Massachusetts**

(Address of Principal Executive Offices)

04-3065140

(I.R.S. Employer Identification No.)

01803

(Zip Code)

(781) 359-4000

(Registrant's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

common stock, \$.01 par value per share

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Edgar Filing: LIGHTBRIDGE INC - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2). Yes ☐ No ☒

The aggregate market value of the voting stock held by nonaffiliates of the registrant as of June 28, 2002 was \$233,198,605, based on a total of 27,597,468 shares held by nonaffiliates and on a closing price of \$8.45 as reported on The Nasdaq Stock Market (National Market System).

The number of shares of common stock outstanding as of March 20, 2003 was 27,136,365.

DOCUMENTS INCORPORATED BY REFERENCE

The registrant intends to file a definitive proxy statement pursuant to Regulation 14A with regard to its 2003 annual meeting of stockholders or special meeting in lieu thereof within 120 days of the end of the fiscal year ended December 31, 2002. Certain portions of such proxy statement are incorporated by reference in Part III of this Form 10-K.

THIS ANNUAL REPORT ON FORM 10-K CONTAINS FORWARD-LOOKING STATEMENTS WITHIN THE MEANING OF SECTION 27A OF THE SECURITIES ACT OF 1933 AND SECTION 21E OF THE SECURITIES EXCHANGE ACT OF 1934. ANY STATEMENTS CONTAINED HEREIN THAT ARE NOT STATEMENTS OF HISTORICAL FACT MAY BE DEEMED TO BE FORWARD-LOOKING STATEMENTS. WITHOUT LIMITING THE FOREGOING, THE WORDS BELIEVES, ANTICIPATES, PLANS, EXPECTS AND SIMILAR EXPRESSIONS ARE INTENDED TO IDENTIFY FORWARD-LOOKING STATEMENTS. THE FORWARD-LOOKING STATEMENTS INVOLVE KNOWN AND UNKNOWN RISKS, UNCERTAINTIES AND OTHER FACTORS, INCLUDING THE FACTORS SET FORTH BELOW IN ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS RISK FACTORS, THAT MAY CAUSE THE ACTUAL RESULTS, PERFORMANCE AND ACHIEVEMENTS OF LIGHTBRIDGE, INC. TO DIFFER MATERIALLY FROM THOSE INDICATED BY THE FORWARD-LOOKING STATEMENTS. LIGHTBRIDGE UNDERTAKES NO OBLIGATIONS TO UPDATE ANY FORWARD-LOOKING STATEMENTS IT MAKES.

Table of Contents

PART I

Item 1. *Business*

Lightbridge, Inc. ("Lightbridge" or the "Company") develops, markets and supports a suite of products and services for communications providers that supports the customer lifecycle, including customer qualification and acquisition, risk management, prepaid billing, mobile data management and authentication services. Lightbridge's software-based solutions are delivered primarily on an outsourced or service bureau basis. These outsourced or service bureau solutions together with the Company's TeleServices offerings comprise the Company's transaction business. Lightbridge's transaction-based solutions provide multiple, remote, systems access for workflow management, along with centrally managed client-specified business policies, and links to client and third-party systems. Lightbridge also derives revenues from software licensing, consulting and maintenance services, and hardware sales. While its solutions historically have been delivered primarily to wireless carriers, Lightbridge also provides solutions to wireline carriers and non-carrier clients.

Lightbridge offers online, real-time transaction processing and call center services to aid communications clients in qualifying and activating applicants for service, as well as software-based point-of-sale support services for a variety of distribution channels, including dealers and agents, mass market retail stores, and Internet commerce. Lightbridge also offers services designed to authenticate users engaged in mobile and online transactions. Lightbridge develops and implements interfaces that integrate its systems with client and third-party systems, such as those for billing, point-of-sale, activation and order fulfillment. Lightbridge also maintains and has access to databases used to pre-screen applicants and online users for fraud and provides software used to monitor subscriber call activity for fraud. In addition, Lightbridge has a global telecommunications consulting practice that provides clients with solution development and deployment services, and business advisory consulting. Lightbridge also offers to wireless telecommunications carriers its PrePay billing system that is designed to integrate with the upcoming Wireless Intelligent Network standards and offer the capability for subscribers to replenish their prepaid accounts.

On February 22, 2002, a wholly owned subsidiary of Lightbridge acquired all of the assets and certain of the liabilities of Altawave Inc. ("Altawave") in exchange for the payment of \$4.0 million in cash, plus up to an additional \$6.0 million payment contingent on the achievement of certain revenue goals. No contingent payments were required to be made in 2002 in connection with the Altawave acquisition. The technology acquired from Altawave includes solutions that offer wireless carriers a service platform for the development and management of data content and applications.

In June 2002, the Company announced that it was reducing its workforce by seven percent and consolidating its Waltham, Massachusetts call center operations into its Lynn, Massachusetts and Broomfield, Colorado facilities by the end of 2002.

In March 2003, the Company announced that it would be streamlining its existing Broomfield, Colorado call center operations into its Lynn, Massachusetts facility and a smaller facility in Broomfield, Colorado by the end of May 2003. The Company plans to record a restructuring charge of approximately \$100,000 for workforce reductions in the first quarter of 2003 and approximately \$900,000 for facilities reductions and capital equipment write-offs in the second quarter of 2003.

Lightbridge was incorporated in Delaware in June 1989 under the name Credit Technologies, Inc. and in November 1994 changed its name to Lightbridge, Inc. Lightbridge sells and markets its products and services throughout the world both directly and through its wholly owned subsidiaries. Unless the context requires otherwise, references in this Annual Report on Form 10-K to "Lightbridge," "the Company," "we," "us" and similar terms refer to Lightbridge, Inc. and its subsidiaries.

Table of Contents

ALIAS, ALTALINKS, FRAUDBUSTER, FRAUD CENTURION, FRAUD SENTINEL, LIGHTBRIDGE, the Lightbridge logo, PHONEPRINT and PROFILE are registered trademarks of Lightbridge, and @RISK, ALTAWAVE, CAS, CORSAIR, CUSTOMER ACQUISITION SYSTEM, INSIGHT, LIGHTBRIDGE CITADEL, LIGHTBRIDGE MOBILE DATA MANAGER, LIGHTBRIDGE ONGUARD, PHONEFUEL, POPS, PREPAY, RETAIL MANAGEMENT SYSTEM, RMS and LIGHTBRIDGE TELESERVICES are trademarks of Lightbridge. All other trademarks or trade names appearing in this Annual Report on Form 10-K are the property of their respective owners.

Business Segment Data

Based upon the way management and the Board of Directors monitor operations, the Company operates in four distinct segments, including the transaction business, the software license business, the consulting and service business, and the hardware business. Within these four segments, performance is measured based on revenues and gross profit realized from each segment. Information about revenues, cost of revenues, and gross profit of each segment is shown separately on the statement of operations included in the Company's consolidated financial statements and discussed below in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Information about costs and expenses other than costs of revenues is not reported by segment. There are no transactions between segments.

In addition, information concerning the four segments in which Lightbridge operates is set forth on page F-12 and F-13 of Notes to Consolidated Financial Statements.

Table of Contents

Products and Services

Lightbridge's suite of software and network-based solutions helps communications providers and online businesses deploy integrated, customized solutions in support of their operational business processes. Lightbridge offers its products and services in six broad solutions groups:

Solutions Groups

Functions

<i>Customer Qualification and Acquisition</i>	<p>Online, real-time transaction processing services and call center services to help carriers qualify applicants and activate service.</p> <p>Transaction processing services include applicant qualification and service activation, as well as proprietary databases and processing modules that evaluate existing subscribers and detect potential subscription fraud.</p> <p>Transaction processing interfaces include interfaces that support the processing of data at a variety of distribution channels, including retail stores, voice recognition systems, call centers and Internet applications.</p> <p>TeleServices include qualification and activation, analyst reviews, telemarketing to existing and new subscribers, back-up and disaster recovery for acquisition and activation services, and customer care.</p>
<i>Authentication Services</i>	<p>Services that provide the pre-screening and authentication of identity data for users engaged in mobile and online transactions.</p>
<i>Risk Management</i>	<p>A suite of services that make online, real-time inquiries into proprietary databases, industry databases and processing modules to pre-screen applicants for potential fraud. This solution group also includes software products that monitor subscriber call activity and changes in subscriber account information to identify incidents indicative of fraud.</p>
<i>Consulting Services</i>	<p>Solution Development and Deployment Services include requirements planning, systems integration, custom software development, project management, and training services.</p> <p>Business Advisory Consulting encompasses management consulting services designed to leverage best practices in telecommunications, online commerce and allied industries.</p>
<i>Prepaid Billing</i>	<p>A software billing solution that allows carriers to support the sale of prepaid wireless services to subscribers who prefer to pay in advance of service or who do not qualify for credit and might otherwise be required to pay high deposits to acquire wireless service. Subscribers managed on the Lightbridge prepaid billing system can deposit additional funds to their service account by using their wireless phone to transfer funds from a prepaid phone card or by depositing or transferring cash at a replenishment center or website designated by the carrier.</p>
<i>Mobile Data Management</i>	<p>A scalable, integrated services platform for the development and management of data content and applications.</p>

Table of Contents

Customer Qualification and Acquisition

*Lightbridge® Customer Acquisition System*SM (*CAS*TM) offers online, real-time transaction processing services for applicant credit qualification and service activation.

Introduced in 1989 and enhanced over time, CAS enables a carrier to close a sale at the time the customer is ready to purchase by qualifying applicants, screening for subscriber fraud and activating service quickly. Although CAS typically requires no human intervention beyond the initial data entry, it can include analyst intervention in carrier-specified situations. When intervention is required, CAS routes the exception data to a queue in order to manage workflow.

CAS accepts applicant information online from retail stores and a variety of other carrier distribution points. Once CAS receives the application, it can qualify the applicant for service using both Lightbridge proprietary databases and external sources, such as credit bureaus. CAS validates the applicant's identification and determines creditworthiness based on client-specified business policies. If CAS identifies an issue, it electronically routes the application to a Lightbridge or carrier analyst for review and action. When the analyst makes a decision, CAS notifies the point-of-sale agent. If the applicant wants to activate service at that time, CAS verifies the information necessary to establish the billing account and activate service and then transmits it to the carrier's billing and activation systems. Throughout the process, CAS routes the application and information to system components and individuals in a secure, controlled environment.

CAS includes the following fully integrated modules:

*InSight*TM is a database containing information about a carrier's current accounts, previous accounts, previous applicants and preapproved applicants. InSight can decrease a carrier's costs for evaluating a prospective subscriber by using carrier-controlled data points such as subscriber payment histories rather than third-party data points, such as credit bureau reports, or manual review processes.

CAS interfaces deliver data from the point of sale directly to CAS for decisioning. If manual intervention is required, data is presented to the appropriate person. Once the decision is made, CAS communicates it to the point-of-sale agent.

*Lightbridge® POPS*TM a browser-based point-of-sale application typically used in carrier-owned or dealer store locations. POPS runs over the Internet or an intranet and features a graphical user interface (GUI) that allows even inexperienced sales staff to qualify applicants quickly and activate service via a dial-up or network connection to CAS.

*Lightbridge® Retail Management System*TM (*RMS*SM) a point-of-sale application that helps telecommunications retailers manage the sale of telecommunications products more efficiently. RMS handles credit screening, transaction and payment processing, service activation, cash drawer management, inventory and purchasing management and management reporting.

Lightbridge® Speech Interface a point-of-sale application used in carriers' agents' stores or kiosks. Speech Interface converts voice information to text to allow even inexperienced sales staff to qualify applicants quickly via a connection to CAS.

Credit Workstation a character-based workstation that allows a carrier's credit analyst to enter information or to evaluate applications that require manual review.

Browser Interface allows a carrier's credit analyst to enter information or to evaluate applications that require manual review via a Lightbridge developed GUI.

Activation Workstation allows the user to review, correct and reprocess activation requests returned from the billing system because of an error.

Fulfillment Workstation allows the user to fulfill orders for wireless handsets and accessories at a remote or third-party fulfillment center.

Table of Contents

CAS service modules are priced on a per transaction, per qualification or per activation basis, or, in the case of application modules, on a licensed basis. Fees for CAS services or applications may vary with the term of the contract, the volume of transactions, the other products and services selected and integrated with CAS services, the configurations selected, number of locations licensed or degree of customization required.

Lightbridge® TeleServices™

Lightbridge TeleServices encompasses a range of call center solutions for the subscriber acquisition and activation process. TeleServices offerings include call center solutions for credit decisions and activations, analyst reviews, telemarketing to existing subscribers, back-up and disaster recovery for acquisition and activation services, and customer care. TeleServices solutions can be provided using CAS or a carrier's own customer acquisition system. Lightbridge's clients can integrate TeleServices solutions into their existing sales and distribution strategies to support special projects without the overhead of building and maintaining call centers.

TeleServices solutions are priced on a per transaction or per minute basis and may vary with the term of the contract, the volume of transactions, the number of minutes and the other products and services selected and integrated with the solutions.

Authentication Services

Authentication services offer carriers and online merchants the ability to pre-screen and authenticate the identity data of users engaged in mobile and online transactions. Lightbridge offers the following authentication services on an Application Service Provider (ASP) model:

Lightbridge® Citadel™: A service that allows clients to authenticate the identities of users involved in mobile and online transactions.

Lightbridge® OnGuard™: A service that allows clients to pre-screen users involved in mobile and online transactions for potential fraud.

Authentication services are priced on a per transaction basis and may vary with the term of the contract, the volume of transactions and the other products and services selected.

Risk Management

Lightbridge's risk management solutions are offered in two support models: an ASP or hosted model and a licensed software model.

ASP Solutions. The ASP or hosted model supports real-time, online access to the Company's proprietary databases, client proprietary databases and third-party databases in support of pre-activation applicant screening. These services are generally managed at Lightbridge facilities as outsourced offerings and include the following:

AirWaves: A risk management score provided under agreement with RiskWise, L.L.C., that is designed to identify the most profitable customers, even among consumers whose financial history is non-existent or too thin for traditional risk assessment tools.

Fraud Sentinel®: A suite of subscription fraud management tools, offered separately or in combination. Fraud Sentinel includes the following components:

ProFile®, a proprietary, inter-carrier database of accounts receivable write-offs and service shut-offs, identifies applicants whose previous accounts were shut off or written off by a participating carrier and provides ongoing screening of existing subscribers.

Fraud Detect, a multifaceted fraud detection tool provided under agreement with Trans Union L.L.C., analyzes data such as an applicant's Social Security number, date of birth, address, telephone number and driver's license information and identifies any discrepancies.

Table of Contents

Fraud Detect Model, a fraud scoring tool developed jointly by Lightbridge and Trans Union L.L.C., is a neural-net scoring model that quantifies the probability that a subscriber will be written off.

Fraud ID-Tect, a multifaceted verification tool provided under agreement with Trans Union L.L.C., verifies the subscriber data, identifies possible data entry errors, and alerts carriers to potential subscription fraud.

@RiskTM, a database of suspect fraud information, identifies subscribers whose information matches suspect fraud information gathered from previous fraud investigations.

InstantID, a multifaceted verification tool provided under agreement with RiskWise, L.L.C., highlights verified information and possible data entry errors, and alerts carriers to conditions that are often associated with identity theft.

FraudPoint, a fraud detection tool provided under agreement with RiskWise, L.L.C., validates the data from the subscriber agreement to prevent subscription fraud and identify data entry errors.

FraudDefender, a fraud scoring tool provided under agreement with RiskWise, L.L.C., rank-orders fraud risk based on a score and helps manage review rates.

ASP solutions are priced on a per inquiry basis and may vary with the term of the contract and the volume of transactions. Additional fees may also be charged for consulting, implementation and support requirements of clients.

Licensed Software Solutions. The licensed software model supports ongoing post-activation monitoring of subscriber call and account activity. These services may be managed at Lightbridge or at the client's operation.

Fraud Centurion®, a suite of post-activation fraud management components offered separately and in combination. Fraud Centurion components are designed to detect the fraudulent activity of active, existing subscribers on a carrier's network. Fraud Centurion includes the following components:

FraudBuster®, a fraud management profiler, identifies most commonly known types of fraud, such as cloning, subscription, tumbling and cellular theft. FraudBuster collects subscriber account information and analyzes call usage data from telecommunication switches and other data sources to identify fraudulent activity.

Alias®, the industry's first subscription fraud profiler, detects suspect account activity. Alias, when used with @Risk in a prescreening mode, represents the industry's only integrated front-end to back-end solution for combating subscription fraud.

Lightbridge® Predictive Intelligence uses high-performance algorithms, automatic feature selection and automatic model building to improve speed and accuracy in identifying fraudulent activity.

Software solutions are priced on a licensed or hosted basis. Additional fees may also be charged for subscriber growth, annual maintenance, customization, consulting services, implementation, training and other support requirements requested by the client. Fees may vary with the term of the contract and the number of licenses.

Consulting Services

Lightbridge Consulting Services (LCS), a global telecommunications practice, delivers full-service consulting for customer acquisition and retention, authentication, prepaid billing and risk management. It leverages Lightbridge's market expertise and focus in telecommunications to help clients bring new services to market quickly, acquire low-risk subscribers and build customer loyalty. Clients can use LCS to supplement their resources with both domain expertise and project-based resources. The worldwide practice can support Lightbridge clients in the Asia Pacific region, Africa, Europe, Latin America and North America.

Table of Contents

LCS capitalizes on Lightbridge's established expertise with multiple carriers, across multiple geographic regions to provide clients with two distinct types of service:

Solution Development and Deployment Services includes systems installation, integration, custom software development, project management and training services.

Business Advisory Consulting includes management consulting services in customer acquisition, distribution and retention, and risk management.

Consulting Services are priced on a time and materials or, in some cases, on a fixed fee basis.

Prepaid Billing

Lightbridge® PrePay™ allows carriers to sell services to customers who prefer to pay with cash or who do not qualify for credit and would otherwise pay high deposits. PrePay's Wireless Intelligent Network (WIN) standards and architecture allow carriers to use existing switches without costly adjunct switches and voice trunk resources. The PrePay software architecture is designed to scale as the number of PrePay subscribers on a system grows. Because prepaid calls are controlled by the carrier's existing switch, there is no impact on call setup times. Calls by prepaid subscribers are rated in real time, and an integrated, interactive, voice-response system automatically informs the subscriber when account funds are low. If a subscriber depletes prepaid funds during a call, PrePay automatically terminates the call and suspends service until the subscriber deposits additional funds. The subscriber can deposit additional funds over the air by using a prepaid phone card or by depositing or transferring cash at a replenishment center or website designated by the carrier.

PhoneFuel™, a customer care extension to PrePay, allows PrePay clients' subscribers to add to their PrePay balances directly from their bank accounts or credit cards. PhoneFuel supports Internet connections for PrePay subscribers, enabling these subscribers to pay for services and products using their prepaid account balance.

Prepaid billing applications are priced on a licensed basis. Additional fees may also be charged for subscriber growth, annual maintenance, customization, consulting services, implementation, training and other support requirements requested by the client. Fees may vary with the term of the contract and the number of licenses.

Mobile Data Management

Lightbridge® Mobile Data Manager™ allows carriers to provision and manage customized, segmented data services offered to subscribers and allows enterprise clients to manage data accesses. It allows:

Carriers to provision, administer and monitor subscribers, the data they access and the services to which they subscribe.

Enterprises to offer secure data access.

Subscribers to benefit from personalized mobile data services by means of a user interface.

Mobile Data Manager is priced on a licensed basis. Additional fees may also be charged for subscriber growth, annual maintenance, customization, consulting services, implementation, training and other support requirements requested by the client. Fees may vary with the term of the contract and the number of licenses.

PhonePrint®

PhonePrint offers wireless telecommunications carriers a cloning-fraud prevention system by using proprietary radio frequency signal analysis to identify attempted fraudulent calls and prevent cloners from gaining access to a carrier's analog network. The Company no longer markets this product but it does provide replacement units for hardware systems. The Company does not expect PhonePrint revenues to be significant in 2003 or thereafter.

Table of Contents**Clients**

Lightbridge historically has provided its products and services to wireless carriers in the United States. In 1998, Lightbridge began to market its products and services to a broader range of telecommunications carriers operating around the world. In November of 2001, Lightbridge announced its mobile business strategy to meet the needs of non-carrier as well as carrier clients in the emerging mobile business market, and announced an agreement with VeriSign, Inc. (VeriSign) to authenticate the identity of consumers engaged in mobile and on-line transactions.

Revenues attributable to Lightbridge's 10 largest clients accounted for approximately 90%, 79% and 75% of Lightbridge's total revenues in the years ended December 31, 2002, 2001 and 2000, respectively. The following Lightbridge clients accounted for more than 10% of total revenues in the years indicated:

	Years Ended Dec. 31,		
	2002	2001	2000
Sprint Spectrum L.P.	30%	22%	19%
AT&T Wireless Services, Inc.	21	20	16
Ericsson AB	15	16	24
Nextel Finance Company	11	7	4
	<hr/>	<hr/>	<hr/>
Total	77%	65%	63%
	<hr/>	<hr/>	<hr/>

The Company's PrePay billing system is sold primarily through a distribution agreement with Ericsson AB (Ericsson). Ericsson accounted for substantially all of the revenues derived from the PrePay system in the years presented. The loss of one or more of these major clients, a decrease in orders by one or more of them or a change in the combination of products and services they obtain from the Company, would adversely affect Lightbridge's revenues, margins and net income.

Lightbridge has agreements with many of its clients that provide for the purchase of various combinations of products and services over periods of one to five years. Although some of these agreements contain annual minimum payment requirements, such minimum payments are typically substantially less than the amount of revenue Lightbridge has historically received from a particular client and therefore provide only limited assurance of future sales. Lightbridge's client agreements also often permit changes in the combination of products and services purchased by the client during the term of the agreement. Such changes can affect the revenues, margins and net income that Lightbridge achieves from quarter to quarter in its transaction business.

Lightbridge has agreements with AT&T Wireless, Inc. (AT&T), Sprint Spectrum L.P. (Sprint) and Nextel Finance Company (Nextel) for the provision of credit decision services. The agreements with AT&T and Sprint were renewed in 2001 and extended in each case through December 31, 2003. The agreement with Nextel extends through January 15, 2004. Lightbridge's distribution agreement with Ericsson was amended in 2002 and continues in effect until either party gives the other 180 days notice of cancellation.

Because Lightbridge derives almost all of its revenues from telecommunications carriers, the demand for Lightbridge's products and services is dependent, in major part, on the overall market demand for the products and services provided by telecommunications carriers. In particular, Lightbridge's transaction business is dependent on the rate of new subscriber growth and the rate at which subscribers switch from one carrier to another, known as the churn rate. Accordingly, if the growth rate of the telecommunications industry continues to slow and the churn rate does not increase, sales of Lightbridge's products and services could continue to decline.

Sales and Marketing

Lightbridge's sales strategy is to establish, maintain and foster long-term relationships with its clients, and to establish third-party sales alliances. Lightbridge's sales and client services activities are led by relationship teams, many of which include a senior management team sponsor. Lightbridge employs a team approach to selling in order to develop a consultative relationship with existing and prospective clients. In addition to

Table of Contents

relationship teams, Lightbridge's sales approach includes direct sales staff with expertise in particular solutions and sales through channel partners and alliances, particularly internationally.

Lightbridge's software solutions typically require significant investment by the carrier with delays frequently associated with capital expenditures, and involve multilevel testing, integration, implementation and support requirements. Product managers, as well as other technical, operational and consulting personnel, are frequently involved in the business development and sales process. The teams conduct needs assessments and, working with the client, develop a customized solution to meet the client's particular needs.

The sales cycle for Lightbridge's software products and services is typically nine to twenty-four months, although the period may be substantially longer in some cases, and is subject to a number of risks over which the Company has little control, including the carrier's budgetary and capital spending constraints and internal decision-making processes, and general market and economic conditions.

PrePay is sold primarily pursuant to a nonexclusive distribution agreement with Ericsson and also through a direct sales force.

Service and technical support for Lightbridge products are provided through both direct field service and support personnel and distributors. A high level of continuing service and support is critical to the objective of developing long-term relationships with clients. Technical assistance is also provided as part of the standard support and service package that clients typically purchase for the length of their respective agreements. On-site installations and various training courses for distributors and clients are also offered.

Engineering, Research and Development

Lightbridge believes that its future success will depend in part on its ability to continue to enhance its existing product and service offerings and to develop new products and services to allow clients to respond to changing market requirements. Lightbridge's research and development activities consist of both long-term efforts to develop and enhance products and services and short-term projects to make modifications to respond to immediate client needs. In addition to internal research and development efforts, Lightbridge intends to continue its strategy of gaining access to new technology through strategic relationships and acquisitions where appropriate. Lightbridge spent approximately \$29.3 million, \$32.3 million and \$29.3 million on engineering, research and development in the years ended December 31, 2002, 2001 and 2000, respectively.

Competition

The market for products and services to wireless and other communications providers is highly competitive and subject to rapid change. The market is fragmented, and a number of companies currently offer one or more products or services competitive with those offered by Lightbridge. In addition, many telecommunications carriers are providing, or can provide internally, products and services competitive with those Lightbridge offers. Trends in the telecommunications industry, including greater consolidation and technological or other developments that make it simpler or more cost-effective for telecommunications carriers to provide certain services themselves, could affect demand for Lightbridge's products or services and could make it more difficult for Lightbridge to offer a cost-effective alternative to a telecommunications carrier's own capabilities. In addition, Lightbridge anticipates continued growth in the mobile and online business services industry and, consequently, the entrance of new competitors in the future.

Lightbridge believes that the principal competitive factors in the communications provider industry include the ability to identify and respond to carrier, non-carrier and subscriber needs, timeliness, quality and breadth of product and service offerings, price and technical expertise. Lightbridge believes that its ability to compete also depends in part on a number of factors outside its control, including the ability to hire and retain employees, the development by others of products and services that are competitive with Lightbridge's products and services, the price at which others offer comparable products and services and the extent of its competitors' responsiveness to carrier, non-carrier and subscriber needs.

Table of Contents

Government Regulation

The Federal Communications Commission (FCC), under the terms of the Communications Act of 1934, regulates interstate communications and use of the radio spectrum. Although Lightbridge is not required to and does not hold any licenses or other authorizations issued by the FCC, the domestic telecommunications carriers that constitute Lightbridge's clients are regulated at both the federal and state levels. Federal and state regulation may decrease the growth of the telecommunications industry, affect the development of the wireless markets, limit the number of potential clients for Lightbridge's services, impede Lightbridge's ability to offer competitive services to the telecommunications market, or otherwise have a material adverse effect on Lightbridge's business, financial condition, results of operations and cash flows. Changing laws and regulations have caused, and are likely to continue to cause, significant changes in the industry, including the entrance of new competitors, consolidation of industry participants, the introduction of bundled wireless and wireline services and the introduction of local number portability (LNP) in late 2003. Those changes could in turn subject Lightbridge to increased pricing pressures, decrease the demand for Lightbridge's products and services, increase Lightbridge's cost of doing business or otherwise have a material adverse effect on Lightbridge's business, financial condition, results of operations and cash flows. The telecommunications industry outside the United States is also subject to government regulation, which could have similar effects on Lightbridge's ability to increase or maintain its penetration of international markets.

In addition, privacy legislation including the Gramm-Leach-Bliley Act (GLBA) and regulations thereunder affect the nature and extent of the products or services the Company is able to provide to clients as well as the Company's ability to collect, monitor and disseminate information subject to privacy protection. Consumer legislation such as the Fair Credit Reporting Act (FCRA) and Equal Credit Opportunity Act (ECOA) and state laws also affect the nature and extent of the products or services the Company is able to provide to clients.

Proprietary Rights

Lightbridge's success is dependent upon proprietary technology. Lightbridge has traditionally relied on a combination of copyrights, patents, the law of trademarks, trade secrets and employee and third-party non-disclosure agreements to establish and protect its rights in its software products and proprietary technology. Lightbridge protects the source code versions of its products as trade secrets and as unpublished copyrighted works, and has internal policies and systems designed to limit access to and require the confidential treatment of its trade secrets. Lightbridge provides its software either on an outsourcing basis or under license agreements that grant clients the right to use, but contain various provisions intended to protect Lightbridge's ownership of and the confidentiality of the underlying copyrights and technology. Lightbridge requires its employees and other parties with access to its confidential information to execute agreements prohibiting unauthorized use or disclosure of Lightbridge's technology. In addition, all of Lightbridge's employees are required as a condition of employment to enter into confidentiality agreements with Lightbridge.

Lightbridge currently has several issued U.S. and foreign patents and applications pending in the U.S. Patent and Trademark Office and with certain foreign regulatory bodies. There can be no assurance that any pending patent applications will result in the issuance of any patents, or that Lightbridge's current patents or any future patents will provide meaningful protection to Lightbridge.

There can be no assurance that the steps taken by Lightbridge to protect its proprietary rights will be adequate to prevent misappropriation of its technology or independent development by others of similar technology. It may be possible for unauthorized parties to copy certain portions of Lightbridge's products or reverse engineer or obtain and use information that Lightbridge regards as proprietary. Existing copyright and trade secret laws and patents issued to Lightbridge offer only limited protection. In addition, the laws of some foreign countries do not protect Lightbridge's proprietary rights to the same extent as do the laws of the United States.

Lightbridge's competitive position may be affected by limitations on its ability to protect its proprietary information. However, Lightbridge believes that patent, trademark, copyright, trade secret and other legal protections are less significant to Lightbridge's success than other factors, such as the knowledge, ability and

Table of Contents

experience of Lightbridge's personnel, new product and service development, frequent product enhancements, customer service and ongoing product support.

Certain technologies used in Lightbridge's products and services are licensed from third parties. Lightbridge generally pays license fees on these technologies and believes that if the license for any such third-party technology were terminated, it would be able to develop such technology internally or license equivalent technology from another vendor, although no assurance can be given that such development or licensing could be effected without significant delay or expense.

Although Lightbridge believes that its products and technology do not infringe on any existing proprietary rights of others, there can be no assurance that third parties will not assert such claims against Lightbridge in the future or that such future claims will not be successful. Lightbridge could incur substantial costs and diversion of management resources with respect to the defense of any claims relating to proprietary rights, which could have a material adverse effect on Lightbridge's business, financial condition, results of operations and cash flows. Furthermore, parties making such claims could secure a judgment awarding substantial damages, as well as injunctive or other equitable relief, which could effectively block Lightbridge's ability to make, use, sell, distribute or market its products and services in the United States or abroad. Such a judgment could have a material adverse effect on Lightbridge. In the event a claim relating to proprietary technology or information is asserted against Lightbridge, Lightbridge may seek licenses to such intellectual property. There can be no assurance, however, that such a license could be obtained on commercially reasonable terms, if at all, or that the terms of any offered licenses will be acceptable to Lightbridge. The failure to obtain the necessary licenses or other rights could preclude the sale, manufacture or distribution of Lightbridge's products and, therefore, could have a material adverse effect on Lightbridge.

Employees

As of January 31, 2003, Lightbridge had a total of 738 employees, of which 618 were full-time and 120 were part-time or seasonal. The number of personnel employed by Lightbridge varies seasonally. None of Lightbridge's employees is represented by a labor union, and Lightbridge believes that its employee relations are good.

The future success of Lightbridge will depend in large part upon its continued ability to attract and retain highly skilled and qualified personnel. Competition for such personnel can be strong, particularly for sales and marketing personnel, software developers and service consultants.

Additional Available Information

Lightbridge's principal Internet address is www.lightbridge.com. The Company's web site provides a hyperlink to a third-party web site through which Lightbridge's annual, quarterly and current reports, and amendments to those reports, are available free of charge. Lightbridge believes these reports are made available as soon as reasonably practicable after it electronically files them with, or furnishes them to, the Securities and Exchange Commission (SEC). The Company does not maintain or provide any information directly to the third-party web site, and does not check its accuracy. Copies of the Company's SEC reports can also be obtained from the SEC's web site at www.sec.gov.

Item 2. Properties

Lightbridge leases approximately 90,000 square feet in a single building in Burlington, Massachusetts for its principal administrative, sales, consulting, marketing and product development facility. This lease expires in 2005. The Company leases approximately 10,000, 21,000 and 30,000 square feet for product development facilities in Fremont and Irvine, California and Broomfield, Colorado, respectively. The Company also leases 29,000 and 16,000 square feet for call centers in Lynn, Massachusetts and Broomfield, Colorado. The Company's Waltham, Massachusetts call center was closed in October 2002 and is under lease until September 30, 2003. In March 2003, the Company announced its plans to close its then existing Broomfield, Colorado call center which is under lease until December 31, 2004. The Company also leases approximately

Table of Contents

4,000 square feet in Waltham for one of its two data centers. The terms of the leases generally run from one to six years. From time to time, Lightbridge enters into short-term leases to provide space for international sales offices. Lightbridge believes that its present facilities are adequate for its current needs and that suitable additional space will be available as needed.

Item 3. Legal Proceedings

Lightbridge is not a defendant in any material litigation.

Item 4. Submission of Matters to a Vote of Security Holders

No matter was submitted to a vote of security holders during the quarter ended December 31, 2002.

PART II**Item 5. Market for Registrant's Common Equity and Related Stockholder Matters**

Shares of the Company's common stock, \$.01 par value per share, are quoted on The Nasdaq Stock Market under the symbol LTBG. The following table sets forth, for the calendar quarters indicated, the high and low sales prices per share of the common stock on the National Market System, as reported in published financial sources:

	<u>High</u>	<u>Low</u>
2002		
First Quarter	\$ 12.81	\$ 9.75
Second Quarter	\$ 13.09	\$ 8.45
Third Quarter	\$ 8.82	\$ 6.29
Fourth Quarter	\$ 7.69	\$ 5.25
2001		
First Quarter	\$ 16.56	\$ 9.06
Second Quarter	\$ 19.40	\$ 8.50
Third Quarter	\$ 15.09	\$ 8.92
Fourth Quarter	\$ 13.95	\$ 8.61

As of March 20, 2003, there were 231 holders of record of common stock (which number does not include the number of stockholders whose shares are held of record by a broker or clearing agency but does include each such brokerage house or clearing agency as one record holder).

The Company has never declared or paid any cash dividends on its common stock. The Company currently anticipates that it will retain future earnings, if any, to fund the development and growth of its business and therefore does not expect to pay any cash dividends in the foreseeable future.

Table of Contents**Item 6. Selected Financial Data**

The following selected financial data have been derived from the Company's audited historical financial statements, certain of which are included elsewhere in this Annual Report on Form 10-K.

	Years Ended Dec. 31,

- (1) Consists principally of interest income. Includes a gain of \$415 on the sale of an investment and a loss of \$2,176 on the sale of assets, both in the year ended December 31, 1999.

Table of Contents

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations* **Critical Accounting Policies and Estimates**

Lightbridge's discussion and analysis of its financial condition and results of operations are based upon Lightbridge's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of this Annual Report on Form 10-K requires Lightbridge to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of its financial statements, and the reported amounts of revenue and expenses during the reporting period. Lightbridge bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily derived from other sources. There can be no assurance that actual amounts will not differ from those estimates.

Lightbridge has identified the policies below as critical to its business operations and the understanding of its results of operations.

Revenue recognition. Lightbridge's revenue recognition policy is significant because revenue is a key component affecting its operations. In addition, revenue recognition determines the timing of certain expenses, such as commissions and bonuses. Lightbridge follows specific and detailed guidelines in measuring revenue; however, certain judgments relating to the elements required for revenue recognition affect the application of its revenue policy. Revenue results are difficult to predict, and any shortfall in revenue, change in judgments concerning recognition of revenue, change in mix, amount of international sales or delay recognizing revenue could cause operating results to vary significantly from quarter to quarter.

Allowance for doubtful accounts. Lightbridge must also make estimates of the uncollectability of its accounts receivable. An increase in the allowance for doubtful accounts is recorded when the prospect of collecting a specific account receivable becomes doubtful. Lightbridge analyzes accounts receivable and historical bad debts, customer creditworthiness, current domestic and international economic trends and changes in its customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. If the financial condition of its customers were to deteriorate, resulting in an impairment of their ability to make payments, or if Lightbridge's estimates of uncollectability prove to be inaccurate, additional allowances would be required.

Income taxes. Lightbridge's income tax policy records the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and the amounts reported in the accompanying consolidated balance sheets, as well as operating loss and tax credit carryforwards. Lightbridge follows specific and detailed guidelines regarding the recoverability of any tax assets recorded on the balance sheet and provides any necessary valuation allowances as required. If Lightbridge were to determine that it was unable to realize all or part of its net deferred tax asset in the future, an adjustment to the deferred tax asset would be charged to income in the period that such determination was made.

Overview

Lightbridge develops, markets and supports a suite of products and services for communications providers that supports the customer lifecycle including customer acquisition and qualification, risk management, prepaid billing, mobile data management and authentication services.

A majority of the Company's revenues historically have been derived from clients located in the United States. The Company's revenues are derived from transactions, software licensing, consulting and services, and hardware. Transaction revenues account for a majority of the Company's revenues and were 66%, 59% and 51% of total revenues in 2002, 2001 and 2000, respectively. Software licensing and consulting and services revenues were an aggregate of 32%, 37% and 40% of total revenues in 2002, 2001 and 2000, respectively. Hardware revenues were 2%, 4% and 9% of total revenues in 2002, 2001 and 2000, respectively. During the three-year period from 2000 through 2002, Lightbridge's total revenues decreased by 28.5% to \$133.4 million from \$186.6 million in 2000. This revenue decrease was driven primarily by decreases in volume of customer

Table of Contents

qualification and activation transactions processed for wireless carrier clients in 2002 from 2001 and decreases in the licensing of the Company's software products over the three year period. There can be no assurance that the Company's products or services will achieve or maintain market acceptance or that the mix of the Company's revenues will remain constant.

Lightbridge's transaction services revenues are derived primarily from the processing of applications for qualification of subscribers for telecommunications services and the activation of service for those subscribers. Over time, the Company has expanded its offerings from credit evaluation services to include screening for subscriber fraud, evaluating carriers' existing accounts, interfacing with carrier and third-party systems and providing call center services. The Company also offers transaction services to pre-screen and authenticate the identity of users engaged in mobile and online transactions. Transaction services are provided pursuant to contracts with carriers and others, which specify the services to be utilized and the markets to be served. The Company's clients are charged for these services on a per transaction basis. Pricing varies depending primarily on the volume and type of transactions, the number and type of other products and services selected for integration with the services and the term of the contract under which services are provided. The volume of processed transactions varies depending on seasonal and retail trends, the success of the carriers and others utilizing the Company's services in attracting subscribers and the markets served by the Company's clients. Transaction services revenues are recognized in the period in which the services are performed.

The Company's software licensing revenues consist of revenues attributable to the licensing of the Company's CAS Application Modules, Risk Management, Prepaid Billing and Mobile Data Management software. Lightbridge's CAS modules are designed to assist customers in interfacing with the Company's transaction processing systems as well as to perform other point-of-sale and channel functionality. The Company's Risk Management products are designed to assist carriers in monitoring subscriber accounts to identify activity that may indicate fraud. The Company's Prepaid Billing system allows carriers to market and manage prepaid wireless services to customers. The Company's Mobile Data Management solutions provide wireless carriers a platform for the development and management of data content and applications. The Company's software products are licensed as packaged software products and each product generally requires incidental customization or integration with other products and systems to varying degrees. Software licensing revenues are recognized when persuasive evidence of an arrangement exists, delivery of the product has been made, and a fixed fee and collectibility have been determined.

The Company's consulting and services revenues historically have been derived principally from providing solution development and deployment services and business advisory consulting in the areas of customer acquisition and retention, authentication, prepay billing and risk management. Revenues from consulting services are generally recognized as the services are performed. Revenues from software maintenance contracts are recognized ratably over the term of the maintenance agreement and are reported as consulting and service revenues.

The Company's hardware revenues historically have been derived in connection with sales of its PrePay and PhonePrint products. Revenue from hardware is recognized upon shipment, unless testing, integration or other services are required, in which case it is recognized upon commissioning and acceptance of the product. Revenue from hardware sold in conjunction with software is deferred until the software revenue is recognized. The Company does not expect hardware revenues to be a significant component of revenue in the future.

PhonePrint is a cloning fraud prevention system that operates on analog networks. As a result of the limited demand for the PhonePrint system and the Company's decision to no longer actively sell or market the system, no significant revenues are expected from the product in the future.

In both 2001 and 2002, the rate of subscriber growth in the wireless telecommunications industry declined and capital spending in the industry also experienced a slowdown and decline. The Company believes, based in part on reports of wireless telecommunications industry analysts, that the rate of subscriber growth will continue to slow in upcoming years and that the rate of subscriber churn will remain fairly constant. Lightbridge also expects that the capital spending slowdown and decline in the telecommunications industry will continue in 2003, and may extend into 2004. In order to add to its business, the Company seeks to expand its reach into the mobile data and mobile and online business markets. The Company is also aware of

Table of Contents

the current plans of the FCC to require carriers to implement LNP some time late in 2003. The Company is not able to determine the impact, if any, of these plans on its revenues.

On February 7, 2001 Lightbridge completed its merger with Corsair. In connection with the merger, Lightbridge issued an aggregate of approximately 10,270,000 shares of its common stock to Corsair stockholders. In addition, the Company assumed the obligation to issue, upon exercise of outstanding Corsair options, approximately 1,587,094 shares of common stock. In connection with the merger, the Company recorded a charge in the quarter ended March 31, 2001 of approximately \$6.0 million, representing the cost of professional services and fees of approximately \$5.7 million and costs associated with the termination of four employees of approximately \$0.3 million. The merger with Corsair was accounted for as a pooling-of-interests and the financial statements were restated to include the accounts of Corsair with those of Lightbridge for all periods presented.

In November of 2001, the Company announced that it was streamlining operations by closing its Palo Alto, California facility and consolidating research and development activities in its Irvine, California and Broomfield, Colorado locations. All other Palo Alto operations, including finance, support services and sales and marketing, were merged with functions in Irvine or Burlington, Massachusetts.

On February 22, 2002, a wholly owned subsidiary of Lightbridge acquired all of the assets and certain of the liabilities of Altawave in exchange for the payment of \$4.0 million in cash, plus up to an additional \$6.0 million contingent on the achievement of certain revenue goals. No contingent payments were required to be made in 2002 in connection with the Altawave acquisition. The technology acquired from Altawave includes solutions that offer wireless carriers a service platform for the development and management of data content and applications. The results of Altawave have been included with those of Lightbridge from its date of acquisition.

In June of 2002, the Company announced it was reducing its workforce by seven percent and consolidating its Waltham, Massachusetts call center operations into its Lynn, Massachusetts and Broomfield, Colorado facilities by the end of the 2002.

In March of 2003, the Company announced that it was streamlining its existing Broomfield, Colorado call center operations into its Lynn, Massachusetts facility and a smaller facility in Broomfield, Colorado by the end of May 2003. The Company plans to record a restructuring charge of approximately \$100,000 for workforce reductions in the first quarter of 2003 and approximately \$900,000 for facilities reductions and capital equipment write-offs in the second quarter of 2003.

Customer Concentration

During fiscal 2002, four of the Company's clients each accounted for more than 10% of the Company's total revenues. During fiscal 2001 and 2000, three of the Company's clients each accounted for more than 10% of the Company's total revenues. Revenues from these clients are as follows:

	Years Ended Dec. 31,		
	2002	2001	2000
Sprint	30%	22%	19%
AT&T	21	20	16
Ericsson	15	16	24
Nextel	11	7	4
	<hr/>	<hr/>	<hr/>
Total	77%	65%	63%
	<hr/>	<hr/>	<hr/>

Lightbridge expects that most of its revenues will continue to come from a relatively small number of clients for the foreseeable future, although the companies that comprise its largest clients in any given quarter may vary. Consequently, the Company's revenues, margins and net income may fluctuate significantly from quarter to quarter based on the actions of a single significant client. A client may take actions that significantly affect the Company for reasons that the Company cannot necessarily anticipate or control, such as reasons

Table of Contents

related to the client's financial condition, changes in the client's business strategy or operations, the introduction of alternative competing products or services or as the result of the perceived quality or cost-effectiveness of the Company's products or services. The Company's services agreements with Sprint and AT&T expire on December 31, 2003. The Company's services agreement with Nextel expires on January 15, 2004. It is possible that Sprint, AT&T and/or Nextel could elect not to renew their Agreements, to reduce the volume of products and services they purchase from the Company or to request significant changes to the pricing or other terms in any renewal agreement. In addition, the PrePay billing system is sold primarily through a distribution agreement with Ericsson and represents substantially all of the Company's revenue derived from the PrePay billing system. That agreement may be terminated by either party on 180 days notice to the other.

A loss of one or more of these major clients, a decrease in orders by one or more of these clients or a change in the combination of products and services they obtain from the Company would adversely affect Lightbridge's revenues, margins and net income.

Table of Contents**Results of Operations**

The following table sets forth, for the periods indicated, certain financial data as a percentage of total revenues:

	Years Ended December 31,		
	2002	2001	2000

Table of Contents***Year Ended December 31, 2002 Compared with Year Ended December 31, 2001***

Revenues. Revenues and certain revenue comparisons for the years ended December 31, 2002 and 2001 were as follows:

Revenues	Year Ended Dec. 31, 2002	% of Total Revenue	Year Ended Dec. 31, 2001	% of Total Revenue	\$ Difference	% Difference
(Dollars in thousands)						
Transaction	\$ 88,376	66.2%	\$ 104,019	58.9%	\$ (15,643)	(15.0)%
Software licensing	10,212	7.7	24,802	14.0	(14,590)	(58.8)
Consulting and services	32,491	24.3	41,484	23.5	(8,993)	(21.7)
Hardware	2,359	1.8	6,311	3.6	(3,952)	(62.6)
Total	\$ 133,438	100.0%	\$ 176,616	100.0%	\$ (43,178)	(24.4)%

The decrease in transaction revenues of \$15.6 million was due to slower subscriber growth experienced by the Company's clients, resulting in a reduction in transaction volume, and to clients selecting fewer transaction products and services. The Company's transaction revenues also declined as a result of reduced call volume and a change in the mix of services provided by Lightbridge's TeleServices call centers. During the quarter ended June 30, 2002, the Company provided approximately \$2.0 million of transaction services to WorldCom, Inc. (WorldCom), and did not record any related revenue due to doubts about collectibility stemming from WorldCom's financial difficulties. The Company did not provide any services to or record any revenue from WorldCom during the third or fourth quarter of 2002. At December 31, 2002, WorldCom owed the Company approximately \$2 million, all of which had been reserved.

The Company's transaction revenues will continue to reflect in large part the industry's rate of growth of new subscribers as well as the rate of switching among carriers by subscribers (subscriber churn). Lightbridge believes, based in part on reports of wireless telecommunication industry analysts, that the rate of subscriber growth will continue to slow in upcoming years and that the rate of subscriber churn will continue to remain fairly constant. Lightbridge also believes that it may experience decreases in the demand for its TeleServices business and changes in the combination of services acquired by clients that could negatively affect transaction revenues in 2003.

The decrease in software licensing revenues of \$14.6 million was due to the continued capital spending slowdown in the telecommunications industry. Lower capital spending by carriers affected the sales of all Lightbridge software products. The Company expects that the capital spending slowdown and decline in the telecommunications industry will continue in 2003 and may extend into 2004.

The decrease in consulting and services revenues of \$9.0 million for the year ended December 31, 2002 was principally due to a decline in maintenance and services revenues related to PhonePrint, a legacy product. In addition, the decrease was also affected by a decline in software sales and the related integration, deployment, optimization and maintenance services provided in conjunction with software sales.

The decrease in hardware revenues of \$4.0 million was due to a decrease in the Company's PrePay hardware sales, primarily because the version of PrePay software available since the second quarter of 2001 enables carriers to use locally sourced Interactive Voice Response Units (IVRs). In addition, hardware sales declined because a number of carriers continued to delay or cancel purchase decisions. The Company does not expect hardware revenues to be a significant component of revenue in 2003.

Cost of Revenues. Cost of revenues consists primarily of personnel costs, costs of acquiring and maintaining systems and networks used in processing qualification and activation transactions (including depreciation and amortization of systems and networks) and amortization of capitalized software and acquired technology. In the future, cost of revenues may vary as a percentage of total revenues as a result of a number of factors, including changes in the volume of transactions processed, changes in the mix of transaction revenues between revenues from automated transaction processing and revenues from processing transactions.

Table of Contents

through the Company's TeleServices Group and changes in the mix of total revenues among transaction revenues, software licensing and maintenance revenues and consulting services revenues.

Cost of revenues and certain cost of revenues comparisons for the years ended December 31, 2002 and 2001 were as follows:

Cost of Revenues	Year Ended Dec. 31, 2002	% of Total Revenue	Year Ended Dec. 31, 2001	% of Total Revenue	\$ Difference	% Difference
(Dollars in thousands)						
Transaction	\$49,194	36.9%	\$55,591	31.5%	\$ (6,397)	(11.5)%
Software licensing	1,247	0.9	2,485	1.4	(1,238)	(49.8)
Consulting and services	13,663	10.2	18,275	10.4	(4,612)	(25.2)
Hardware	1,839	1.4	4,460	2.5	(2,621)	(58.8)
Total	\$65,943	49.4%	\$80,811	45.8%	\$ (14,868)	(18.4)%

Transaction cost of revenues decreased in 2002 from the prior year principally due to lower transaction revenues as a result of a lower volume of transactions processed through Lightbridge's TeleServices call centers and a decrease in costs attributable to the Company's staff reductions. Transaction cost of revenues was also affected by a shift in the mix of services provided to clients during the year ended December 31, 2002. Transaction cost of revenues increased as a percentage of total transaction revenues to 55.7% in 2002 from 53.4% in 2001. The increase in cost of transaction revenues as a percentage of transaction revenues was due to a change in the mix of services provided in the year ended December 31, 2002, as well as the level of fixed costs within the Company's infrastructure, which resulted in lower gross profit margins as revenues declined. Certain of these fixed costs have been eliminated or reduced as a result of the Company's restructurings in 2001 and 2002. Lightbridge believes that changes in the mix of services provided to clients will continue to affect transaction cost of revenues in 2003.

Software licensing cost of revenue decreased in 2002 from the prior year due to the decline in software revenues. Software licensing cost of revenue increased as a percentage of total software licensing revenues increased to 12.2% in 2002 from 10.0% in 2001 due to lower software sales.

Consulting and services cost of revenues decreased in 2002 from the prior year. Consulting and services cost of revenues also decreased as a percentage of total consulting services revenues to 42.1% in 2002 from 44.1% in 2001. The decrease in consulting and services cost of revenues was attributable to a decrease in consulting projects and revenue as well as a reduction in headcount associated with the June 2002 restructuring.

Hardware cost of revenues decreased in 2002 from the prior year due to a decline in hardware revenues. Hardware cost of revenues as a percentage of total hardware revenue increased to 78.0% in 2002 from 70.7% in 2001 due to a decrease in hardware revenues.

The Company expects that fluctuations in gross profit may occur primarily because of a change in the mix of revenue generated from the Company's four revenue components, particularly revenues from software licensing and consulting and services.

Table of Contents

Operating Expenses. Operating expenses and certain operating expense comparisons for the years ended December 31, 2002 and 2001 were as follows:

	Year Ended Dec. 31, 2002	% of Total Revenue	Year Ended Dec. 31, 2001	% of Total Revenue	\$ Difference	% Difference
(Dollars in thousands)						
Development	\$29,269	21.9%	\$32,259	18.2%	\$ (2,990)	(9.3)%
Sales and marketing	13,270	10.0	20,460	11.6	(7,190)	(35.1)
General and administrative	18,170	13.6	19,517	11.0	(1,347)	(6.9)
Merger related costs			5,999	3.4	(5,999)	(100.0)
Purchased in-process R&D	1,618	1.2			1,618	100.0
Restructuring costs	3,616	2.7	4,000	2.3	(384)	(9.6)
Total	\$65,943	49.4%	\$82,235	46.5%	\$ (16,292)	(19.8)%

Development. Development expenses include software development costs consisting primarily of personnel and outside technical services costs related to developing new products and services, enhancing existing products and services, and implementing and maintaining new and existing products and services. The decrease in development expenses for the year ended December 31, 2002 was due to cost savings associated with the closing of the Company's Palo Alto, California facility as well as the reduction in headcount associated with the June 2002 restructuring. These cost savings were partially offset by the addition of engineering personnel necessary to support Lightbridge's product and services development plans. Development expenses as a percentage of total revenues increased in 2002 from the prior year as a result of lower total revenues. The Company expects to continue to incur significant development expenses in 2003 and may experience an increase in such expenses for that period in connection with the further development of its existing products and services and development of new products and services.

Sales and Marketing. Sales and marketing expenses consist primarily of salaries, commissions and travel expenses of direct sales and marketing personnel, as well as costs associated with advertising, trade shows and conferences. The decrease for the year ended December 31, 2002, was primarily due to headcount reductions from closing the Palo Alto, California facility and the June 2002 restructuring, coupled with a decrease in costs associated with lower revenue levels, such as commissions on sales.

General and Administrative. General and administrative expenses consist principally of salaries of executive, finance, human resources and administrative personnel and fees for certain outside professional services. The decrease in general and administrative costs for the year ended December 31, 2002 was primarily due to a decrease in headcount associated with the closing of the Palo Alto facility, the June 2002 restructuring and the Company's efforts to limit spending, partially offset by a write-off of a secured promissory note received by the Company in connection with a loan to an unrelated party in 1999. The Company wrote off the note receivable in 2002 because it believed that the note was uncollectible due to the adverse financial and operating condition of the maker and economic conditions. The increase in general and administrative expenses as a percentage of total revenues was due to lower revenues. The Company may experience an increase in general and administrative expenses in 2003 due to increased regulatory compliance requirements associated with operating as a public company and consumer credit and privacy regulations.

In-Process Research and Development (IPR&D) In connection with the Altawave acquisition, the Company recorded a \$1.6 million charge during the first quarter of 2002 for several IPR&D projects. The technology acquired from Altawave includes solutions that offer wireless carriers and enterprises a service platform for the development and management of data content and applications. The complexity of the technology lies in its comprehensive, secure and scalable characteristics. The research projects in process at the date of acquisition related to the development of the Mobile Data Manager (MDM) suite of products

Table of Contents

consisting of MDM Server, MDM Administration, MDM Altalinks, MDM Provisioner, and the Consumer Group Applications (CGA). Development on the technology was started in 2000.

The value of the projects was determined by an independent appraiser using the income approach. The discounted cash flow method was utilized to estimate the present value of the expected income that could be generated through revenues from the projects over their estimated useful lives through 2009. The percentage of completion for the projects was determined based on the amount of research and development expenses incurred through the date of acquisition as a percentage of estimated total research and development expenses to bring the projects to technological feasibility. At the acquisition date, the Company estimated that the MDM suite and CGA were approximately 70% and 32% complete, respectively, with fair values of approximately \$1.0 million and \$0.6 million, respectively. The discount rate used for the fair value calculation was 37% for the MDM suite and 40% for CGA. At the date of acquisition, development of the technology involved risks to the Company including the remaining development effort required to achieve technological feasibility and uncertainty with respect to the market for the technology.

Lightbridge completed the development of the MDM suite in the quarter ended September 30, 2002, having spent approximately \$150,000 on the project after the acquisition. Total cost to complete the CGA project after acquisition is estimated to be approximately \$300,000, of which approximately \$125,000 had been spent through December 31, 2002. CGA is expected to be completed by July 2003. If the development of the technology is not completed on schedule, the potential consequences to the Company may be increased development costs and increased competition from other companies that have competitive products in the market.

Other Income, Net. Other income, net consists predominantly of interest income and decreased by 42.4% to \$2.4 million in the year ended December 31, 2002 from \$4.2 million in the prior year. This decrease was primarily due to a decline in interest rates.

Equity in Loss of Partnership Investment. The Company has committed to invest up to \$5.0 million in a limited partnership that invests in businesses within the wireless industry. To date, the Company has invested \$953,000. The Company uses the equity method of accounting for this limited partnership investment. For the year ended December 31, 2002, the Company's proportionate share of the loss of the limited partnership was \$464,000.

Provision for Income Taxes. Lightbridge's effective tax rate was (2.9)% and 21.6% (excluding merger-related expenses) for the years ended December 31, 2002 and 2001, respectively. The 2002 tax provision was based upon the annual effective tax rate of 34.0%, offset by a reduction in the Company's valuation allowance provided against certain acquired net loss carryforwards and an \$802,000 benefit from research and development tax credits. The Company has approximately \$10.4 million in loss carryforwards, principally the result of various acquisitions, against which a valuation reserve of approximately \$10.3 million has been provided. Net deferred tax assets were approximately \$6.7 million at December 31, 2002. If circumstances change so that recoverability of these assets appears unlikely, additional valuation allowances may be required. The Company recorded a net benefit from income taxes in 2002 due primarily to lower levels of profitability and the impact of a reduction in valuation allowances and credits.

Net Income. Net income for 2002 was \$3.6 million or 2.7% of revenues, and diluted earnings per share was \$0.13 compared to net income in 2001 of \$14.0 million or 7.9% of revenues and diluted earnings per share of \$0.48. The 2002 decrease in net income from 2001 was primarily due to reduced revenue levels, partially offset by a reduction in operating expenses.

Table of Contents***Year Ended December 31, 2001 Compared with Year Ended December 31, 2000***

Revenues. Revenues and certain revenue comparisons for the years ended December 31, 2001 and 2000 were as follows:

Revenues	Year Ended Dec. 31, 2001	% of Total Revenue	Year Ended Dec. 31, 2000	% of Total Revenue	\$ Difference	% Difference
(Dollars in thousands)						
Transaction	\$ 104,019	58.9%	\$ 94,719	50.7%	\$ 9,300	9.8%
Software licensing	24,802	14.0	35,258	18.9	(10,456)	(29.7)
Consulting and services	41,484	23.5	39,544	21.2	1,940	4.9
Hardware	6,311	3.6	17,123	9.2	(10,812)	(63.1)
Total	\$ 176,616	100.0%	\$ 186,644	100.0%	\$ (10,028)	(5.4)%

The increase in transaction revenues for the year ended December 31, 2001 was primarily due to the increased volume of qualification and activation transactions processed for carrier clients and an increase in special program efforts through Lightbridge's TeleServices Call Center. Lightbridge believes that its transaction revenues also benefited from client promotional activities generally attributable to the current competitive market for wireless services.

The decrease in software licensing revenues for the year ended December 31, 2001 was due to a capital spending slowdown and decline in the telecommunications industry which extended to Lightbridge's traditional analytical software products in risk management and retail management as well as the Company's PrePay software product.

The increase in consulting and services revenues for the year ended December 31, 2001 was principally due to increased demand for consulting services, primarily custom software development and systems integration. In addition, the Company's maintenance revenues increased because of an increase in the installed subscriber base.

The decrease in hardware revenues was due to lower sales of PhonePrint. In addition, the Company's PrePay hardware sales also decreased because the version of PrePay software available since the second quarter of 2001 enables carriers to use locally sourced IVRs. Finally, hardware sales declined because a number of carriers delayed or cancelled purchase decisions.

Cost of Revenues. Cost of revenues and certain cost of revenue comparisons for the years ended December 31, 2001 and 2000 were as follows:

Cost of Revenues	Year Ended Dec. 31, 2001	% of Total Revenue	Year Ended Dec. 31, 2000	% of Total Revenue	\$ Difference	% Difference
(Dollars in thousands)						
Transaction	\$ 55,591	31.5%	\$ 49,397	26.4%	\$ 6,194	12.5%
Software licensing	2,485	1.4	1,836	1.0	649	35.3
Consulting and services	18,275	10.4	18,028	9.7	247	1.4
Hardware	4,460	2.5	12,471	6.7	(8,011)	(64.2)
Total	\$ 80,811	45.8%	\$ 81,732	43.8%	\$ (921)	(1.1)%

Transaction cost of revenues increased in dollars, and as a percentage of total transaction revenues to 53.4% for the year ended December 31, 2001 from 52.2% for the year ended December 31, 2000. The increase in transaction cost of revenues for the year ended December 31, 2001 resulted principally from increases in transaction volume and costs attributable to expansion of the Company's staff and

systems capacity particularly for Lightbridge's TeleServices Call Centers. Transaction cost of revenues was also affected by a shift in the mix of services provided to clients during the year ended December 31, 2001.

Table of Contents

Provision for Income Taxes. Lightbridge's estimated effective tax rate was 21.6% (excluding merger-related expenses) and 24.6% for the years ended December 31, 2001 and 2000, respectively. The 2001 tax provision was based upon the estimated annual effective tax rate of 35.0%, offset by a \$4.5 million tax benefit principally related to acquired net operating loss carryforwards of Corsair, which are expected to be realized, and the deductible portion of merger costs incurred in connection with the acquisition of Corsair.

Net Income. Net income for 2001 was \$14.0 million or 7.9% of revenues, and diluted earnings per share was \$0.48 compared to net income in 2000 of \$30.5 million or 16.3% of revenues and diluted earnings per share of \$1.04. The 2001 decrease in net income from 2000 was primarily due to reduced revenue levels, merger related costs, restructuring costs and, to a lesser extent, higher operating expenses.

Liquidity and Capital Resources

As of December 31, 2002, Lightbridge had cash and cash equivalents and short-term investments of \$133.5 million. Lightbridge's working capital increased to \$136.5 million at December 31, 2002 from \$127.1 million at December 31, 2001. The Company believes that its current cash balances will be sufficient to finance the Company's operations and capital expenditures for the next twelve months. Thereafter, the adequacy of the Company's cash balances will depend on a number of factors that are not readily foreseeable such as the impact of general market conditions on the Company's operations, cash requirements associated with acquisitions and investments, and the sustained profitability of the Company's operations.

For the year ended December 31, 2002, the Company generated cash flows from operating activities of \$30.0 million and used \$41.1 million and \$5.8 million in investing and financing activities, respectively.

The Company's capital expenditures for the years ended December 31, 2002 and 2001 were \$4.4 million and \$12.0 million, respectively. The capital expenditures during these periods consisted of purchases of fixed assets, principally for the Company's services delivery infrastructure and computer equipment for development activities. The Company leases its facilities and certain equipment under non-cancelable operating lease agreements that expire at various dates through January 2008.

For the year ended December 31, 2002, the Company used \$8.5 million for the repurchase of the Company's common stock under its stock repurchase program.

In August 2001, the Company elected to forego annual renewal of a \$15.0 million unsecured working capital line of credit with a bank because the Company believed it had sufficient cash and short term investments to meet its then-current operating needs. At the date of expiration, there were no borrowings outstanding under the working capital line of credit. At December 31, 2002, the Company had an outstanding letter of credit in the amount of \$1.0 million expiring in May 2003. On January 14, 2003, this letter of credit was replaced with a \$1.0 million letter of credit, which expires in May 2004.

The Company's primary contractual obligations and commercial commitments are under its operating leases and a letter of credit. The Company's future minimum payments due under operating leases and the amount of the Company's commitment per period under an annually renewable letter of credit required as security under the lease for its headquarters which extends through 2005 are as follows:

	<u>Total</u>	<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>After 2006</u>
	(Dollars in thousands)					
Operating leases	\$ 13,687	\$ 5,236	\$ 3,693	\$ 2,581	\$ 1,021	\$ 1,156
Letter of credit	\$ 1,000	\$ 1,000	\$ 1,000			

The Company has no off-balance sheet entities and is not a party to any material transactions involving related persons or entities (other than employment, separation and other compensation agreements with certain executives).

The Company has committed to invest up to \$5.0 million in a limited partnership formed to invest in businesses in the wireless industry. To date, the Company has invested a total of \$953,000.

Table of Contents**Merger Costs**

In connection with the merger with Corsair, Lightbridge recorded a charge, in the quarter ended March 31, 2001, of approximately \$6.0 million, which has been paid in full, representing the cost of professional services and fees of approximately \$5.7 million and costs associated with the termination of four employees of approximately \$0.3 million.

Restructurings

In November 2001, the Company announced that it was closing its Palo Alto, California facility and consolidating research and development activities in its Irvine, California and Broomfield, Colorado locations. All other Palo Alto operations including finance, support services, and sales and marketing were merged with functions in Irvine or Burlington, Massachusetts. The Company recorded a restructuring charge of approximately \$4.0 million, consisting of \$2.9 million for workforce reductions and \$1.1 million for facilities and related costs, associated with the closure of its Palo Alto location. The restructuring plan resulted in the termination of 102 personnel as follows: 24 in product and service delivery, 38 in development, 25 in sales and marketing and 15 in general and administrative. The costs for consolidation of facilities were predominantly comprised of real estate lease commitments for unutilized office space. The Company did not adjust the Palo Alto restructuring reserve and all related restructuring costs were paid as of December 31, 2002.

In June 2002, the Company announced that it was reducing its workforce by seven percent and consolidating its Waltham, Massachusetts call center operations into its Lynn, Massachusetts and Broomfield, Colorado facilities by the end of 2002. The Company recorded a restructuring charge of approximately \$3.6 million, consisting of \$1.6 million for workforce reductions, \$1.3 million for facilities reductions including lease obligations, utilities and security costs on unused space and \$0.7 million for capital equipment write-offs, associated with these measures. The restructuring plan resulted in the termination of 65 personnel as follows: 25 in product and service delivery, 22 in development, 11 in sales and marketing and seven in general and administrative. The capital equipment write-offs and a majority of severance costs related to this restructuring were incurred by the end of 2002, and the Company anticipates that all other costs relating to this restructuring, consisting principally of lease obligations on unused space, will be paid by the end of 2003.

The following summarizes the changes to the November 2001 restructuring reserves during the year ended December 31, 2002:

	Balance at December 31, 2001	Accrued	Utilized	Balance at December 31, 2002
		(Dollars in thousands)		
Employee severance and termination benefits	\$ 2,143	\$	\$ 2,143	\$
Facility closing and related costs	997		997	
	<u>3,140</u>	<u>\$</u>	<u>\$ 3,140</u>	<u>\$</u>

The following summarizes the changes to the June 2002 restructuring reserves during the year ended December 31, 2002:

	Balance at December 31, 2001	Accrued	Utilized	Balance at December 31, 2002
		(Dollars in thousands)		
Employee severance and termination benefits	\$	\$ 1,580	\$ 1,237	\$ 343
Facility closing and related costs		1,312	320	992
Capital equipment write-offs		724	724	
	<u>\$</u>	<u>\$ 3,616</u>	<u>\$ 2,281</u>	<u>\$ 1,335</u>

Edgar Filing: LIGHTBRIDGE INC - Form 10-K

In March 2003, the Company announced that it would be streamlining its existing Broomfield, Colorado call center operations into its Lynn, Massachusetts facility and a smaller facility in Broomfield, Colorado by

Table of Contents

the end of May 2003. The Company plans to record a restructuring charge of approximately \$100,000 for workforce reductions in the first quarter of 2003 and approximately \$900,000 for facilities reductions and capital equipment write-offs in the second quarter of 2003.

Inflation

Although certain of the Company's expenses increase with general inflation in the economy, inflation has not had a material impact on the Company's financial results to date.

Risk Factors**If One or More of Our Major Clients Stops Using Our Products or Services or Changes the Combination of Products and Services It Uses, Our Operating Results Would Suffer Significantly.**

Our revenues are concentrated among a few major clients. Our 10 largest clients accounted for approximately 90%, 79% and 75% of our total revenues in 2002, 2001 and 2000, respectively. The following clients accounted for more than 10% of our total revenues in the years indicated:

	Years Ended Dec. 31,		
	2002	2001	2000
Sprint	30%	22%	19%
AT&T	21	20	16
Ericsson	15	16	24
Nextel	11	7	4
	<hr/>	<hr/>	<hr/>
Total	77%	65%	63%
	<hr/>	<hr/>	<hr/>

We expect that most of our revenues will continue to come from a relatively small number of clients for the foreseeable future, although the companies that comprise our largest clients in any given quarter may vary. Consequently, our revenues, margins and net income may fluctuate significantly from quarter to quarter based on the actions of a single significant client. A client may take actions that significantly affect us for reasons that we cannot necessarily anticipate or control, such as reasons related to the client's financial condition, changes in the client's business strategy or operations, the introduction of alternative competing products or services, or as the result of the perceived quality or cost-effectiveness of our products or services. Our services agreements with Sprint and AT&T expire on December 31, 2003. Our services agreement with Nextel expires on January 15, 2004. It is possible that Sprint, AT&T and/or Nextel could elect not to renew their agreements, to reduce the volume of products and services they purchase from us or to request significant changes to the pricing or other terms in any renewal agreement. In addition, the PrePay billing system is sold primarily through a distribution agreement with Ericsson and represents substantially all of our revenue derived from the PrePay billing system in the years indicated. That agreement may be terminated by either party on 180 days notice to the other. The loss of any one or more of our major clients or a change in the particular type, quantity or combination of products or services purchased by any one or more of our major clients would cause sales to fall below expectations and materially reduce our revenues, margins and net income. Our business would also be harmed if we are unable to collect, or experience delays in collecting, payments from any of our major clients.

Our Revenues Are Uncertain Because Our Clients May Reduce the Amounts of or Change the Combination of Our Products or Services They Purchase.

Most of our client contracts extend for terms of between one and five years. During the terms of these contracts, our clients typically may elect to purchase any of several different combinations of products and services. The revenue that we receive for processing a transaction for a client may vary significantly depending on the particular products and services used to process the transaction. In particular, transactions handled through our TeleServices Group generally result in significantly higher revenue to us than transactions that are

Table of Contents

submitted and processed electronically. Therefore, our revenues from a particular client may decline if the client changes the combination of products and services it purchases from us.

To the extent our client contracts contain minimum purchase or payment requirements, these minimums are typically at levels significantly below actual or historical purchase or payment levels. Therefore, our current clients may not continue to utilize our products or services at levels similar to previous years or at all, and may not generate significant revenues in future periods. If any of our major clients terminates or significantly reduces or changes the combination of products or services it purchases from us for any reason, our business would be seriously damaged.

Our Revenues Are Concentrated in the Wireless Telecommunications Industry, Which Is Experiencing Declining Growth Rates, Consolidation and Increasing Pressure to Control Costs.

We currently derive almost all of our revenues from companies in the wireless telecommunications industry, and we expect that wireless telecommunications companies will continue to account for a substantial majority of our revenues for the foreseeable future. In recent years, the growth rate of the domestic wireless industry has slowed. In addition, consolidation has affected the number of carriers to whom our products and services can be marketed and sold, and competition among wireless carriers has continued to increase, resulting in heightened efforts by carriers to control costs. Many of our carrier clients have sought, or may in the future seek, pricing concessions when they renew their service agreements with us, which could affect our revenues and profitability. In addition, several of our carrier clients have sought bankruptcy protection in the past year, and we believe it is likely that additional clients may file for bankruptcy protection if current industry conditions continue. Bankruptcy filings by our clients may prevent us from collecting some or all of the amounts owing to us at the time of filing, may require us to return some or all of any payments received by us within 90 days prior to a bankruptcy filing and may also result in the termination of our service agreements. As a result of the foregoing conditions, our success depends on a number of factors:

our ability to maintain our profit margins on sales of products and services to companies in the wireless telecommunications industry;

the financial condition of our clients and their continuing ability to pay us for services and products;

our ability to develop and market new or enhanced products and services to new and existing clients or for new markets;

continued growth of the domestic wireless telecommunications markets;

the number of carriers seeking to implement prepaid billing services;

our ability to increase sales of our products and services internationally; and

our ability to increase sales of our products and services to other new types of clients or in new markets.

The Success of Our Growth Strategy Is Dependent on Our Ability to Expand into New Markets.

In order to achieve growth in our business, we are seeking to expand our reach into new markets, including the online transaction market and the wireless data market. As a result, our success depends on a number of factors, including, without limitation:

growth in the online transaction and mobile data management markets;

our ability to provide products and services to address the needs of those markets; and

competition in those markets.

If We Do Not Continue to Enhance Our Existing Products and Services, and Develop or Acquire New Ones, We Will Not Be Able to Compete Effectively in Our Industry.

The communications industry has been changing rapidly as a result of increasing competition, technological advances, regulatory changes and evolving industry practices and standards, and we expect these changes

Table of Contents

will continue. Carriers in the telecommunications market have also been changing quickly, as the result of consolidation among existing carriers and financial difficulties experienced by some carriers. In addition, the business practices and technical requirements of our clients are subject to changes that may require modifications to our products and services. In order to remain competitive and successfully address the evolving needs of our clients, we must commit a significant portion of our resources to:

identify and anticipate emerging technological and market trends affecting our core wireless business as well as the online market;

enhance our current products and services in order to increase their cost-effectiveness to clients that are seeking to control costs and to meet regulatory requirements;

develop or acquire new products and services that meet emerging client needs, such as services to allow companies to authenticate the identity of consumers engaged in online and mobile transactions and products and services for the online and mobile data management markets;

modify our products and services in response to changing business practices and technical requirements of our clients, as well as to new regulatory requirements, such as LNP;

integrate our current and future products; and

create and maintain interfaces to changing client and third party systems.

We must achieve these goals in a timely and cost-effective manner and successfully market our new and enhanced products and services to clients. In the past, we have experienced errors or delays in developing new products and in modifying or enhancing existing products. If we are unable to expand or appropriately enhance or modify our products and services quickly and efficiently, our business and operating results could be adversely affected.

Our Clients and We Must Comply with Complex and Changing Consumer Credit and Privacy Laws.

Government regulation influences our current and prospective clients' activities, as well as their expectations and needs in relation to our products and services. For example, our clients include telecommunications companies that, to the extent that they extend consumer credit, may be subject to federal and state regulations. In making credit evaluations of consumers, performing fraud screening or user authentication, our clients are subject to requirements of federal law, including the FCRA, the ECOA and the GLBA and regulations thereunder, as well as state laws which impose a variety of additional requirements. Privacy legislation may also affect the nature and extent of the products or services that we can provide to clients as well as our ability to collect, monitor and disseminate information subject to privacy protection. Although most of our products and services, other than our ProFile service, are not directly subject to these requirements, we must take these extensive and evolving requirements into account in order to meet our clients' needs. In some cases, these regulations require our customers to notify consumers of credit decisions made in connection with their applications for telecommunications services, and we have contracted with some of our clients, including Sprint, AT&T, Western Wireless Corporation and Dobson Communications, Inc., to provide such notices on their behalf. Our software has in the past contained, and could in the future contain, undetected errors affecting compliance by our clients with one or more of these legal requirements. Failure to properly implement these requirements in our products and services in a timely, cost-effective and accurate manner could result in liability, either directly or as indemnitor of our clients, damage to our reputation and relationships with clients and a loss of business.

Our Business May be Harmed by Errors in Our Software.

The software that we develop and license to clients, and that we also use in providing our transaction processing and call center services, is extremely complex and contains hundreds of thousands of lines of computer code. Large, complex software systems such as ours are susceptible to errors. The difficulty of preventing and detecting errors in our software is compounded by the fact that we maintain multiple versions of our systems to meet the differing requirements of our major clients, and must implement frequent

Table of Contents

modifications to these systems in response to these clients' evolving business policies and technical requirements. Our software design, development and testing processes are not always adequate to detect errors in our software prior to its release or commercial use. As a result, we have from time to time discovered, and may likely in the future discover, errors in software that we have put into commercial use for our clients, including some of our largest clients. Because of the complexity of our systems and the large volume of transactions they process on a daily basis, we sometimes have not detected software errors until after they have affected a significant number of transactions. Software errors can have the effect of causing clients that utilize our products and services to fail to comply with their intended credit or business policies, or to fail to comply with legal requirements, such as those under the GLBA, FCRA or ECOA. Such errors, particularly if they affect a major client, can harm our business in several ways, including the following:

we may suffer a loss of revenue if, due to software errors, we are temporarily unable to provide products or services to our clients;

we may not be paid for the products or services provided to a client that contain errors, or we may be liable for losses or damages sustained by a client or its subscribers as a result of such errors;

we may incur additional unexpected expenses to correct errors in our software, or to fund product development projects that we may undertake to minimize the occurrences of such errors in the future;

we may damage our relationships with clients or suffer a loss of reputation within our industry;

we may become subject to litigation or regulatory scrutiny; and

our clients may terminate or fail to renew their agreements with us or reduce the products and services they purchase from us.

Our errors and omissions insurance may not be adequate to compensate us for losses that may occur due to software errors. It is also possible that such insurance might cease to be available to us on commercially reasonable terms or at all.

Our Initiatives to Improve Our Software Design and Development Processes May Not Be Successful.

The development of our core products has, in some cases, extended over a period of more than ten years. This incremental development process has resulted in a system which is extremely complex. Systems of the size and complexity of ours are inherently difficult to modify and maintain. Beginning in 2001, we began the process of rebuilding portions of our core products in Java, replacing the proprietary three-tiered software architecture historically employed in our products with a new architecture using a middleware layer and a standard database across all products. We expect that this architecture, which relies on component-based development and reusable frameworks, will accelerate our product development process and make it easier to maintain our software systems. We are also evaluating changes in our product development, testing and control processes to improve the accuracy and timeliness of modifications that we make to our software, including the frequent modifications that we must make in response to changes in the business policies and technical requirements of our clients. We believe that our initiatives to implement a new product architecture and to improve our product development, test and control processes will be important to our future competitive position and success. If we are not successful in carrying out these initiatives on a timely basis or in a manner that is acceptable to our clients, our business and future prospects could be harmed.

Our Success Is Dependent in Part on PrePay, Which May Not Achieve Market Acceptance.

In 2001 and 2002, PrePay, our prepaid metered billing solution, did not produce the revenues that we anticipated. We continue to anticipate that PrePay will account for a significant amount of our revenues in 2003. As a result, our future operating results will depend to a significant extent on the demand for and market acceptance of PrePay. To date, only a small number of wireless carriers, almost all of them outside the U.S., have deployed PrePay, and the rate of adoption of the PrePay system will need to increase significantly in order to achieve our revenue targets.

Table of Contents

Currently our PrePay solution has only been commercially deployed on networks which use Ericsson switching equipment. We introduced a separate version of our PrePay product in 2001, making PrePay compatible with other infrastructure equipment, and, in 2002, that version of our PrePay product was certified for compatibility with Nortel Networks, Inc. and Lucent Technologies, Inc. infrastructure equipment. However, PrePay has not yet gained market acceptance. Furthermore, although PrePay supports CDMA and TDMA air interfaces, it is not expected to support the GSM interface until some time in the second quarter of 2003.

Our PrePay product has been sold predominately by Ericsson. Ericsson, from time to time, may evaluate and seek to distribute or acquire alternative vendors' prepaid product offerings. Any change in the terms of our distribution arrangements with Ericsson or Ericsson's desire to discontinue our relationship would drastically affect sales of PrePay. Although our own sales force also sells PrePay, it has not yet generated significant PrePay sales and PrePay may never gain market acceptance. We cannot ensure that sales of the PrePay system will increase or that PrePay will gain market acceptance. If PrePay does not gain market acceptance our future operating results would be adversely affected.

If We Are Unable to Acquire Complementary Businesses, Our Future Growth Will Be Limited.

A key element of our growth strategy is to acquire businesses, technologies or products that expand and complement our business. We believe acquisitions are necessary for us to continue to grow at a desirable rate, and we will continue to evaluate possible acquisition opportunities in the future. Even if we are able to identify suitable companies or businesses to buy, we may not be able to purchase any of these companies at favorable prices, or at all, because of any number of reasons. If we are unable to make acquisitions, we may not be able to meet or exceed our historical levels of growth and earnings.

We Have Made and May Continue to Make Acquisitions, Which Involve Risks.

We acquired Coral Systems, Inc. in November of 1997, Corsair in February of 2001 and the assets of Altawave in February of 2002. Although we have no current arrangements to make additional acquisitions in the future, we may do so if we identify companies, technologies or assets that appear to complement our business. Acquisitions involve risks that could cause the actual results of any acquisitions we may make to differ from our expectations. For example:

In future acquisitions, we may issue equity securities that could be dilutive to our shareholders or we may use our cash which may have an adverse effect on our liquidity. In those acquisitions, we also may incur additional debt and amortization expense related to intangible assets. This additional debt, amortization expense and potential impairment of any purchased goodwill may materially and adversely affect our business and operating results. We may also be required to make continuing investments in acquired products or technologies to bring them to market, which may negatively affect our cash flows and net income. In addition, we may assume certain contingent liabilities that may be difficult to estimate.

We may be unable to integrate acquired businesses successfully and to realize anticipated economic, operational and other benefits in a timely manner. Integration of an acquired business is especially difficult when we acquire a business in a market in which we have limited or no expertise or a business with a corporate culture different from ours. If we are unable to successfully integrate acquired businesses, we may incur substantial costs and delays or other operational, technical or financial problems.

Acquisitions may divert management's attention from our existing business and may damage our relationships with our key clients and employees.

We May Not Be Able to Successfully Manage Operational Changes.

Over the last several years, our operations have experienced rapid growth in some areas and significant restructurings and cutbacks in others. These changes have created significant demands on our executive,

Table of Contents

operational, development and financial personnel and other resources. If we achieve future growth in our business, or if we are forced to make additional restructurings, we may further strain our management, financial and other resources. Our future operating results will depend on the ability of our officers and key employees to manage changing business conditions and to continue to improve our operational and financial controls and reporting systems. We cannot ensure that we will be able to successfully manage the future changes in our business.

Our Future Revenues May Be Uncertain Because of Reliance on Third Parties for Marketing and Distribution.

PrePay is currently marketed primarily through a distribution agreement with Ericsson, and sold commercially only by Ericsson. We have also entered into a business alliance with VeriSign to assist us in penetrating the online transaction market. We intend to continue to market and distribute our products through existing and other relationships. We also intend to enter into additional distributor and sales and marketing agreements for the sale of these and other products both in and outside of the United States. There are no minimum purchase obligations applicable to any existing distributor or other sales and marketing partners and we do not expect to have any guarantees of continuing orders. Failure by our existing and future distributors or other sales and marketing partners to generate significant revenues or our failure to establish additional distribution or sales and marketing alliances could have a material adverse effect on our business, operating results and financial condition.

In addition, distributors and other sales and marketing partners may become our competitors with respect to the products they distribute either by developing a competitive product themselves or by distributing a competitive offering. For example, Ericsson may evaluate and seek to distribute or acquire alternative vendors' prepaid products that compete with PrePay, and VeriSign may elect to market or acquire alternative fraud and identity verification products. Competition from existing and future distributors or other sales and marketing partners could significantly harm sales of our products.

Our Quarterly Operating Results May Fluctuate.

Our operating results are difficult to predict and may fluctuate significantly from quarter to quarter. If our operating results fall below the expectations of investors or public market analysts, the price of our common stock could fall dramatically. Our common stock price could also fall dramatically if investors or public market analysts reduce their estimates of our future quarterly operating results, whether as a result of information we disclose, or based on industry, market or economic trends, or other factors.

Our revenues are difficult to forecast for a number of reasons:

Seasonal and retail trends affect our transaction services revenues, which historically have represented the majority of our total revenues, and may affect demand for our other products and services. As a result, our revenues can fluctuate. For example, our revenues generally have been highest in the fourth quarter of each calendar year, particularly in the holiday shopping season between Thanksgiving and Christmas. In addition, marketing initiatives undertaken by our clients or their competitors may significantly affect the number of transactions we process.

The sales process for our products and services is lengthy, sometimes exceeding twenty-four months. The length of the sales process makes our revenues difficult to predict. The delay of one or more large orders, particularly orders for software, which typically result in a substantial amount of non-recurring revenue, could cause our quarterly revenues to fall substantially below expectations.

We ship our software products within a short period after receipt of an order, and we usually do not have a material backlog of unfilled orders of software products. Consequently, our revenues from software licenses in any quarter depend substantially on the orders booked and shipped in that quarter. As a result, a delay in the consummation of a license agreement may cause our revenues to fall below expectations for that quarter.

Table of Contents

Our consulting services revenues can fluctuate based on the timing of product sales and of projects we perform for our clients. Many of our consulting engagements are of a limited duration, so it can be difficult for us to forecast consulting services revenues or staffing requirements accurately more than a few months in advance.

We are in the process of developing a number of new products and services. If we do not complete our development efforts on schedule, or if we are not able to market our new products and services successfully, our revenues could fall substantially below expectations.

Our contracts typically do not require our clients to purchase our products or services at their actual or historical levels, and frequently permit clients to make changes in the bundle of our products and services that they utilize, which changes can significantly affect our revenues and expenses in a given quarter.

In recent years, we have implemented several restructurings that have resulted in significant non-recurring accounting charges. It is possible that we will effect further restructurings in the future, which could result in additional non-recurring charges.

Adverse industry, market or economic conditions such as consolidation in the wireless industry, carrier bankruptcies, the decline in subscriber growth rates and price competition among carriers may negatively impact our clients' decisions to acquire our products and services.

Most of our expenses, particularly employee compensation, are relatively fixed. As a result, even relatively small variations in the timing of our revenues may cause significant variations in our quarterly operating results and may result in quarterly losses.

As a result of these factors, we believe that quarter-to-quarter comparisons of our results of operations are not necessarily meaningful. You should not rely on our quarterly results of operations to predict our future performance.

Our Foreign Sales and Operations Subject Us to Risks and Concerns Which Could Negatively Affect Our Business Overall.

We expect our international revenues will continue to represent a significant portion of our total revenues. We also intend to further expand our sales efforts internationally. In addition to the risks generally associated with sales and operations in the U.S., sales to clients outside the U.S. and operations in foreign countries present us with many additional risks, including the following:

the imposition of financial and operational controls and regulatory restrictions by foreign governments;

the need to comply with a wide variety of complex U.S. and foreign import and export laws and treaties;

political and economic instability which may lead to reduced demand for our products and services;

changes in tariffs, taxes and other barriers that may reduce our ability to sell our solutions or may reduce the profitability of those solutions;

longer payment cycles and increased difficulties in collecting accounts receivable;

fluctuations in interest and currency exchange rates, which may reduce our earnings if we denominate arrangements with international clients in the currency of the country in which our products or services are provided, or with respect to arrangements with international clients that are U.S. dollar-denominated, which may make our systems less price-competitive;

changes in technology standards, such as interfaces between products, that are developed by European or other foreign groups and may require additional development efforts on our part or change the buying behavior of some of our clients;

reduced protection for intellectual property rights in some countries;

Table of Contents

difficulties in managing a global network of distributors or representatives and in staffing and managing foreign subsidiary operations;

costs and risks of localizing systems in foreign countries;

additional complications and expenses related to supporting products internationally; and

the possibility that our purchase agreements may be governed by foreign laws that differ significantly from U.S. laws, which may limit our ability to enforce our rights under these agreements.

We Face Significant Competition for a Limited Supply of Qualified Software Engineers and Consultants.

Our business depends on the services of skilled software engineers who can develop, maintain and enhance our products and consultants who can undertake complex client projects. In general, only highly qualified, highly educated personnel have the training and skills necessary to perform these tasks successfully. In order to maintain the competitiveness of our products and to meet client requirements, we need to attract, motivate and retain a significant number of software engineers and consultants. Qualified personnel such as these are in short supply and we face significant competition for these employees, from not only our competitors but also clients and other enterprises. Other employers may offer software engineers and consultants significantly greater compensation and benefits or more attractive career paths than we are able to offer. Any failure on our part to hire, train and retain a sufficient number of qualified personnel would seriously damage our business.

Our Future Success Depends on the Continued Services of Key Executive Officers.

Our future success will depend to a significant degree on the skills, experience and efforts of our executive officers, particularly Pamela D.A. Reeve, Chief Executive Officer. We do not have any employment contracts requiring Ms. Reeve or any of our other executive officers to continue their employment for any period of time, and we do not maintain key-person life insurance on any of our executive officers other than Ms. Reeve. If we lose the services of one or more of these persons, we may be unable to successfully manage our current business or implement our planned business objectives and our future operations may be adversely affected.

We Face Competition from a Broad and Increasing Range of Vendors.

The market for products and services offered to communications providers is highly competitive and subject to rapid change. The market is fragmented, and a number of companies currently offer one or more products or services competitive with ours. We anticipate continued growth and the formation of new alliances in the authentication services industry, which will result in the entrance of new competitors in the future. We face potential competition from several primary sources:

software vendors that provide one or more customer acquisition, customer relationship management and retention or risk management solutions, including ECtel Ltd., TSI Telecommunications Services Inc. (TSI), Fair, Isaac & Co. Inc., Magnum Software Systems, Inc., American Management Systems, Incorporated and SLP Infoware;

telecommunications equipment vendors that market software-based solutions to complement their hardware offerings, such as Hewlett-Packard Company, Ericsson and Northern Telecom Limited;

service providers that offer customer acquisition, customer relationship management and retention, risk management or authentication services in connection with other services, including Choicepoint Inc., Visa U.S.A., Experian Information Solutions, Inc., Equifax, Inc., RiskWise, L.L.C., Trans Union, L.L.C., Schlumberger Sema plc and Amdocs Ltd;

information technology departments within larger carriers that have the ability to provide products and services that are competitive with those we offer;

information technology vendors that offer wireless and internet software applications such as Oracle Corporation, Microsoft Corporation and International Business Machine Corporation;

Table of Contents

consulting firms or systems integrators that may offer competitive services or the ability to develop customized solutions for customer acquisition and qualification, customer relationship management and retention or risk management, such as American Management Systems, Incorporated, Accenture Ltd., BearingPoint, Inc., PeopleSoft, Inc., Siebel Systems, Inc. and Cap Gemini Ernst & Young;

software vendors of prepaid wireless billing products, including Boston Communications Group, Inc., Brite Voice Systems, Inc., Comverse Technology, Inc., Glenayre Technologies, Inc., VeriSign Telecommunications Services, Telemac Cellular Corporation, Fair, Isaac & Co. Inc., ORGA Kartensysteme GmbH, Schlumberger Sema plc, Logica plc, Alcatel USA, Priority Call Management, Lucent Technologies, Inc., Hewlett-Packard Company (Tandem Division), Northern Telecom Limited, Telcordia Technologies, Inc. and Sixbell;

a number of alternative technologies, including profilers, personal identification numbers and authentication, provided by companies such as Verizon Communications, Inc., Authentix Network Inc. and Fair, Isaac & Co., Inc.; and

vendors that provide products and services in the wireless data market, such as Bridgewater Systems Corporation, OracleMobile, a division of Oracle Corporation, 4thPass, Inc., TSI, Seven Networks, Inc. and Openwave Systems Inc.

Because competition can easily penetrate one or more of our markets, we anticipate additional competition from other established and new companies. In addition, competition may intensify as competitors establish cooperative relationships among themselves or alliances with large software companies.

Many of our current and potential competitors have significantly greater financial, marketing, technical and other competitive resources than we do. As a result, these competitors may be able to adapt more quickly to new or emerging technologies and changes in client requirements, or may be able to devote greater resources to the promotion and sale of their products and services. In addition, in order to meet client requirements, we must often work cooperatively with companies that are, in other circumstances, competitors. The need for us to work cooperatively with such companies may limit our ability to compete aggressively with those companies in other circumstances.

A Failure of, Error in or Damage to Our Computer and Telecommunications Systems Would Impair Our Ability to Conduct Transactions and Support Services and Harm Our Business Operations.

We provide transaction services and support services using complex computer and telecommunications systems. Our business could be significantly harmed if these systems fail or suffer damage from fire, natural disaster, terrorism, power loss, telecommunications failure or similar events. Most of our computer and telecommunications equipment is located at our sites in Burlington and Waltham, Massachusetts, and, as a result, may be vulnerable to a natural disaster. In addition, the growth of our client base, a significant increase in transaction volume or an expansion of our facilities may strain the capacity of our computers and telecommunications systems and lead to degradations in performance or system failure. Many of our agreements with carriers contain level of service commitments, which we might be unable to fulfill in the event of a natural disaster, an actual or threatened terrorist attack or a major system failure. Errors in our computer and telecommunications systems may adversely impact our ability to provide the products and services contracted for by our clients. Our property and business interruption insurance and errors and omissions insurance might not be adequate to compensate us for any losses that may occur in the event of a natural disaster, terrorist attack or system failure or error. It is also possible that such insurance might cease to be available to us on commercially reasonable terms, or at all.

In addition to our own systems, we rely on certain equipment, software, systems and services from third parties that are also subject to risks, including risks of system or processing failure or inadequacy.

Table of Contents

Our Reliance on Suppliers and Vendors Could Adversely Affect Our Ability to Provide Our Services and Products to Our Clients on a Timely and Cost-Efficient Basis.

We rely to a substantial extent on third parties such as RiskWise L.L.C. to provide some of our equipment, software, data, systems and services. In some circumstances, we rely on a single supplier or limited group of suppliers. Our reliance on outside vendors subjects us to risks, including a potential inability to obtain an adequate supply of required components and reduced control over quality, pricing and timing of delivery of components. For example, in order to provide our credit verification service, we need access to third-party credit information databases provided to us by outside vendors. Similarly, delivery of our activation services often requires the availability and performance of billing systems which are also supplied by outside vendors. If for any reason we were unable to access these databases or billing systems, our ability to process credit verification transactions could be impaired.

In addition, our business is materially dependent on services provided by various local and long distance telecommunications providers. A significant increase in the cost of telecommunications services that we cannot recover through an increase in the price of our services, or any significant interruption in telecommunications services, could seriously harm our business.

From time to time, we must also rely upon third parties to develop and introduce components and products to enable us, in turn, to develop new products and product enhancements on a timely and cost-effective basis. In particular, we must rely on the development efforts of third-party wireless infrastructure providers in order to allow our PrePay product to integrate with both existing and future generations of the infrastructure equipment. We may not be able to obtain access, in a timely manner, to third-party products and development services necessary to enable us to develop and introduce new and enhanced products. We may not be able to obtain third-party products and development services on commercially reasonable terms and we may not be able to replace third-party products in the event such products become unavailable, obsolete or incompatible with future versions of our products.

Our Success Depends in Part on Our Ability to Obtain Patents for, or Otherwise Protect, Our Proprietary Technologies.

We rely on a combination of copyright, patent, trademark and trade secret laws, license and confidentiality agreements, and software security measures to protect our proprietary rights. Much of our know-how and other proprietary technology is not covered by patent or similar protection, and in many cases cannot be so protected. If we cannot obtain patent or other protection for our proprietary software and other proprietary intellectual property rights, other companies could more easily enter our markets and compete successfully against us.

We have a limited number of patents in the U.S. and abroad, and have pending applications for additional patents, but we cannot be certain that:

any additional patents will be issued on those applications;

any of our patents now or hereafter acquired will protect our business or technology against competitors that develop similar technology or products or provide us with a competitive advantage; or

others will not claim rights in our patents or our proprietary technologies.

Patents issued and patent applications filed relating to products used in the wireless telecommunications industry are numerous and it may be the case that current and potential competitors and other third parties have filed or will file applications for, or have received or will receive, patents or obtain additional proprietary rights relating to products used or proposed to be used by us. We may not be aware of all patents or patent applications that may materially affect our ability to make, use or sell any current or future products. Patent applications filed in foreign countries are often first published six months or more after filing.

The laws of some countries in which our products are licensed do not protect our products and intellectual property rights to the same extent as U.S. laws. We generally enter into non-disclosure agreements with our employees and clients and restrict access to, and distribution of, our proprietary information. Nevertheless, we

Table of Contents

may be unable to deter misappropriation of our proprietary information or detect unauthorized use of and take appropriate steps to enforce our intellectual property rights. Our competitors also may independently develop technologies that are substantially equivalent or superior to our technology.

We May Become a Party to Intellectual Property Infringement Claims, Which Could Harm Our Business.

From time to time, we may be forced to respond to or prosecute intellectual property infringement claims to protect our rights or defend a client's rights. These claims, regardless of merit, may consume valuable management time, result in costly litigation or cause product shipment delays, all of which could seriously harm our business and operating results. Furthermore, parties making such claims may be able to obtain injunctive or other equitable relief that could effectively block our ability to make, use, sell or otherwise practice our intellectual property, whether or not patented or described in pending patent applications, or to further develop or commercialize our products in the U.S. and abroad and could result in the award of substantial damages against us. We may be required to enter into royalty or licensing agreements with third parties claiming infringement by us of their intellectual property in order to settle these claims. These royalty or licensing agreements, if available, may not have terms that are acceptable to us. In addition, if we are forced to enter into a license agreement with terms that are unfavorable to us, our operating results would be materially harmed.

The Telecommunications Industry Is Subject to Government Regulation and Legal Uncertainties That Could Harm Our Business.

Our telecommunications carrier clients are regulated at both the federal and state levels, and our international clients are subject to regulation by their own countries. Current or future government regulation including, without limitation, the introduction of LNP in late 2003, could harm our business in several ways, for example by:

- further decreasing the rate of growth of the wireless industry or other segments of the telecommunications market;
- affecting the development of emerging telecommunications markets;
- limiting the number of potential clients for our products and services or reducing demand for our products or services;
- introducing new requirements that would force us to modify our products or services; or
- increasing competition in the industry, which could subject us to increased pricing pressures.

Our Business Could Require Additional Financing.

It is possible that we will not maintain profitability on either a quarterly or an annual basis in the future or that we will need to raise funds through public or private financings. Further expansion of our business, including the acquisition of additional computer and network equipment, the development or acquisition of new or enhanced products and services and the international expansion of our business will require us to make significant capital expenditures. If our available cash resources prove to be insufficient, because of unanticipated expenses, revenue shortfalls or otherwise, we may need to seek additional financing or curtail our expansion activities. If we obtain equity financing or finance an acquisition with equity securities, our existing stockholders may experience dilution in their investments. It is possible that, if we need additional financing, we will not be able to obtain it on acceptable terms, or at all.

Our Anti-Takeover Provisions May Discourage Potential Acquisitions or Changes of Control.

Some provisions of our certificate of incorporation and Delaware law could be used by our incumbent management to make it more difficult for a third party to acquire control of us, even if the change in control

Table of Contents

might be beneficial to our stockholders. This could discourage potential takeover attempts and could adversely affect the market price of our common stock.

In particular, we may issue preferred stock in the future without stockholder approval, upon terms determined by our board of directors. The rights of holders of our common stock would be subject to, and may be adversely affected by, the rights of holders of any preferred stock issued in the future. The issuance of preferred stock, while providing desirable flexibility in connection with possible acquisitions and other corporate purposes, could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from acquiring, a majority of our outstanding stock. We also have adopted a stockholder rights plan that may deter or delay attempts to acquire us or to accumulate shares of common stock. Except for the stockholder rights plan, we have no present plans to designate or issue any shares of preferred stock.

In addition, the members of our Board of Directors serve staggered three-year terms, with approximately one-third of the members elected each year. This structure makes it more difficult for stockholders to change the composition of a majority of our Board.

Recent Accounting Pronouncements

In July 2001, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 141 (SFAS 141), Business Combinations. SFAS 141 requires the purchase method of accounting for business combinations initiated after June 30, 2001 and eliminates the pooling-of-interests method. The adoption of SFAS 141 did not have a significant impact on the Company's financial statements.

Also in July 2001, the FASB issued SFAS No. 142 (SFAS 142), Goodwill and Other Intangible Assets, which became effective January 1, 2002. SFAS 142 requires, among other things, the discontinuance of goodwill amortization and that goodwill be tested for impairment at least annually. The adoption of SFAS 142 did not have a significant impact on the Company's financial statements.

The FASB has also issued SFAS No. 144 (SFAS 144), Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of, which was effective January 1, 2002. SFAS 144 provides guidance on measuring and recording impairments of assets, other than goodwill, and provides clarifications on measurement of cash flow information and other variables to be used to measure impairment. The adoption of SFAS 144 did not have a significant impact on the Company's financial statements.

In June 2002, the FASB issued SFAS No. 146 (SFAS 146), Accounting for Costs Associated with Exit or Disposal Activities. SFAS 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. SFAS 146 nullifies EITF No. 94-3 Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity, which required a liability be recognized at the commitment date to an exit plan. The Company is required to adopt the provisions of SFAS 146 effective for exit or disposal activities initiated after December 31, 2002. All restructuring activities prior to December 31, 2002, including those described in Note 8 to the Company's Consolidated Financial Statements, are accounted for under EITF No. 94-3.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The market risk exposure inherent in the Company's financial instruments and consolidated financial position represents the potential losses arising from adverse changes in interest rates. The Company is exposed to such interest rate risk primarily in its significant investment in cash and cash equivalents. Cash and cash equivalents include short-term, highly liquid instruments which consist primarily of money market accounts, purchased with remaining maturities of three months or less. The Company's short term investments also include debt securities maturing in one year or less and are classified as available for sale. These investments are carried at fair value. The Company does not execute transactions in or hold derivative financial instruments for trading or hedging purposes.

Table of Contents

The amortized cost of available-for-sale debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. Realized gains and losses, and declines in value judged to be other than temporary on available-for-sale debt securities, if any, are included in interest income, net. The cost of securities sold is based on the specific identification method. Interest and dividends on securities are included in interest income, net.

Market risk for cash and cash equivalents is estimated as the potential change in the fair value of the assets or obligations resulting from a hypothetical ten percent adverse change in interest rates, which would not have been significant to the Company's financial position or results of operations during 2002.

The Company is not subject to any material market risk associated with foreign currency exchange rates.

Item 8. *Financial Statements and Supplementary Data*

The financial statements of the Company are listed in the index included in Item 15(a)(1) of this Annual Report on Form 10-K.

Item 9. *Changes In and Disagreements With Accountants on Accounting and Financial Disclosure*

The information called for by this Item is not applicable.

PART III

Item 10. *Directors and Executive Officers of the Registrant*

Information required by this item will be contained in the Company's Proxy Statement for the 2003 annual meeting of stockholders or special meeting in lieu thereof to be filed with the Securities and Exchange Commission on or before April 30, 2003 and is incorporated by reference herein.

Item 11. *Executive Compensation*

Information required by this item will be contained in the Company's Proxy Statement for the 2003 annual meeting of stockholders or special meeting in lieu thereof to be filed with the Securities and Exchange Commission on or before April 30, 2003 and is incorporated by reference herein. Such incorporation by reference shall not be deemed to specifically incorporate by reference the information referred to in Item 402(a)(8) of Regulation S-K.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

Information required by this item will be contained in the Company's Proxy Statement for the 2003 annual meeting of stockholders or special meeting in lieu thereof to be filed with the Securities and Exchange Commission on or before April 30, 2003 and is incorporated by reference herein.

Item 13. *Certain Relationships and Related Transactions*

Information required by this item will be contained in the Company's Proxy Statement for the 2003 annual meeting of stockholders or special meeting in lieu thereof to be filed with the Securities and Exchange Commission on or before April 30, 2003 and is incorporated by reference herein.

Item 14. *Controls and Procedures*

Within 90 days before filing this report, the Company evaluated the effectiveness of the design and operation of its disclosure controls and procedures. The Company's disclosure controls and procedures are the controls and other procedures that it designed to provide that it records, processes, summarizes and reports in a timely manner the information it must disclose in reports that it files with or submits to the Securities and

Edgar Filing: LIGHTBRIDGE INC - Form 10-K

Exchange Commission. The Company's Chief Executive Officer and its Chief Financial Officer supervised

Table of Contents

and participated in this evaluation. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as of the date of their evaluation, the Company's disclosure controls and procedures are effective to provide a reasonable level of assurance of reaching the Company's disclosure control objectives.

Since the date of the evaluation described above, there have not been any significant changes in the Company's internal controls or in other factors that could significantly affect those controls.

CERTIFICATIONS

I, Pamela D.A. Reeve, Chief Executive Officer of Lightbridge, Inc., certify that:

1. I have reviewed this annual report on Form 10-K of Lightbridge, Inc.;
2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;
3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) Designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - b) Evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation Date"); and
 - c) Presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this annual report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and

Stockholders of Lightbridge, Inc.:

We have audited the consolidated balance sheets of Lightbridge, Inc. and subsidiaries as of December 31, 2002 and 2001, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements based on our audits. The consolidated financial statements give retroactive effect to the merger of Lightbridge, Inc. and Corsair Communications, Inc., which has been accounted for as a pooling of interests as described in Note 1 to the consolidated financial statements. We did not audit the statements of operations, stockholders' equity, and cash flows of Corsair Communications, Inc. for the year ended December 31, 2000, which statements reflect total revenues of \$65,090,000 for the year ended December 31, 2000. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Corsair Communications, Inc. for 2000, is based solely on the report of such other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Lightbridge, Inc. and subsidiaries at December 31, 2002 and 2001, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2002 in conformity with accounting principles generally accepted in the United States of America.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors
Corsair Communications, Inc.:

We have audited the consolidated statements of operations, stockholders' equity and cash flows of Corsair Communications, Inc. and subsidiaries (not separately presented herein) for the year ended December 31, 2000. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 1 to the consolidated financial statements all of the outstanding common stock of Corsair Communications, Inc. was acquired on February 7, 2001 by Lightbridge, Inc., a publicly traded company.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the results of operations and cash flows of Corsair Communications, Inc. and subsidiaries for the year ended December 31, 2000 in conformity with accounting principles generally accepted in the United States of America.

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands except share data)****1. Business and Recent Acquisitions**

Business Lightbridge, Inc. (Lightbridge or the Company) was incorporated in June 1989 under the laws of the state of Delaware. The Company develops, markets and supports a suite of products and services for communications providers that supports the customer lifecycle, including customer qualification and acquisition, risk management, prepaid billing, mobile data management and authentication services.

Merger with Corsair Communications, Inc. On February 7, 2001, Lightbridge completed its merger with Corsair Communications, Inc. (Corsair). The merger was accounted for as a pooling-of-interests, and the accompanying consolidated financial statements have been restated to include the accounts of Corsair for all periods presented. In connection with the merger, Lightbridge recorded a charge, in the quarter ended March 31, 2001, of approximately \$6.0 million, which has been paid in full, representing the cost of professional services and fees of approximately \$5.7 million and costs associated with the termination of four employees of approximately \$0.3 million. At closing, Lightbridge issued an aggregate of approximately 10,270,000 shares of its common stock to Corsair stockholders.

Information regarding the separate revenue and net income of Lightbridge and Corsair prior to consummation of the merger is as follows, for the year ended December 31, 2000:

Revenues:	
Lightbridge	\$ 121,554
Corsair	65,090
	<hr/>
Total	\$ 186,644
	<hr/>
Net income:	
Lightbridge	\$ 13,689
Corsair	16,823
	<hr/>
Total	\$ 30,512
	<hr/>

Asset Purchase On February 22, 2002, a wholly owned subsidiary of Lightbridge acquired all of the assets and certain of the liabilities of Altawave Inc. (Altawave) in exchange for the payment of \$4.0 million in cash, plus up to an additional \$6.0 million payment contingent on the achievement of certain revenue goals. The technology acquired from Altawave includes solutions that offer wireless carriers a service platform for the development and management of data content and applications. The results of Altawave have been included in these consolidated financial statements from the date of acquisition.

The allocation of the Altawave purchase price was based upon an independent appraisal of the estimated fair value of the assets acquired and the liabilities assumed. The initial purchase price of \$4.0 million, plus the capitalized value of acquisition costs and assumed liabilities totaling \$0.9 million, was allocated as follows:

	Estimated Fair Values
	<hr/>
	(\$ in millions)
Acquired technology	\$ 1.3
Fixed assets	0.3
Goodwill	1.7
In-process research and development	1.6

Edgar Filing: LIGHTBRIDGE INC - Form 10-K

Table of Contents

LIGHTBRIDGE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Any additional contingent consideration that may be paid in connection with the Altawave acquisition will be recorded as goodwill when the underlying conditions are met and payment becomes probable. No contingent payments were required to be made in 2002 in connection with the Altawave acquisition. Contingent payments, if any, are based on the achievement of specified revenue goals over a two-year period. The results of operations of Altawave are not significant to the Company, and, accordingly, pro forma disclosure of the results of operations, as if Altawave had been acquired at the beginning of 2001, has not been provided.

In connection with the Altawave acquisition, the Company recorded a \$1.6 million charge during the first quarter of 2002 for several in-process research and development (IP&D) projects. The technology acquired from Altawave includes solutions that offer wireless carriers and enterprises a service platform for the development and management of data content and applications. The complexity of the technology lies in its comprehensive, secure and scalable characteristics. The research projects in process at the date of acquisition related to the development of the Mobile Data Manager (MDM) suite of products consisting of MDM Server, MDM Administration, MDM Altalinks, MDM Provisioner and the Consumer Group Applications (CGA). Development on the technology was started in 2000.

The value of the projects was determined by an independent appraiser using the income approach. The discounted cash flow method was utilized to estimate the present value of the expected income that could be generated through revenues from the projects over their estimated useful lives through 2009. The percentage of completion for the projects was determined based on the amount of research and development expenses incurred through the date of acquisition as a percentage of total estimated research and development expenses to bring the projects to technological feasibility. At the acquisition date, the Company estimated that the MDM suite and CGA were approximately 70% and 32% complete, respectively, with fair values of approximately \$1.0 million and \$0.6 million, respectively. The discount rate used for the fair value calculation was 37% for the MDM suite and 40% for CGA. At the date of acquisition, development of the technology involved risks to the Company including the remaining development effort required to achieve technological feasibility and uncertainty with respect to the market for the technology.

Lightbridge completed the development of the MDM suite in the quarter ended September 30, 2002, having spent approximately \$150 on the project after the acquisition. Total cost to complete the CGA project, after acquisition is estimated to be approximately \$300 of which approximately \$125 had been spent through December 31, 2002. CGA is expected to be completed by July 2003. If the development of the technology is not completed on schedule, the potential consequences to the Company may be increased development costs and increased competition from other companies that have competitive products in the market.

2. Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation These consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. Investments in entities over which the Company has significant influence, such as the Company's investment in the limited partnership described below, are accounted for using the equity method.

Significant Estimates The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at each reporting date and the amount of revenue and expense reported each period. These estimates include provisions for bad debts, certain accrued liabilities, recognition of revenue and expenses, and recoverability of deferred tax assets. Actual results could differ from these estimates.

Table of Contents

LIGHTBRIDGE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash and Cash Equivalents Cash and cash equivalents include short-term, highly liquid instruments, which consist primarily of money market accounts, purchased with remaining maturities of three months or less.

Short-Term Investments Short-term investments consist of corporate debt securities maturing in one year or less and are classified as available-for-sale. These investments are carried at amortized cost, which approximates fair value.

The carrying value of available-for-sale debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. Realized gains and losses, and declines in value judged to be other than temporary on available-for-sale debt securities, if any, are included in interest income, net. The cost of securities sold is based on the specific identification method. Interest and dividends on securities are included in interest income, net.

Inventories Inventories are stated at the lower of first-in, first-out cost, or market.

Property and Equipment Property and equipment is recorded at cost. Depreciation is provided using the straight-line method over the estimated useful lives of three to seven years. Leasehold improvements are amortized over the term of the lease or the lives of the assets, whichever is shorter.

Revenue Recognition and Concentration of Credit Risk The Company generates revenue from the processing of qualification and activation transactions; granting of software licenses; services (including maintenance, installation and training); development and consulting contracts; and hardware sold in conjunction with certain software licenses. Revenues from processing of qualification and activation transactions for communications providers are recognized in the period when services are performed. The Company's software license agreements have typically provided for an initial license fee and annual maintenance based on a defined number of subscribers, as well as additional license and maintenance fees for net subscriber additions in certain circumstances.

Revenue from software license sales is recognized when persuasive evidence of an arrangement exists, delivery of the product has been made, and a fixed fee and collectibility have been determined. To the extent that obligations exist for other services, the Company allocates revenue between the license and the services based upon their relative fair value or by utilizing the residual method. Revenue from customer maintenance support agreements is deferred and recognized ratably over the term of the agreements. Revenue from consulting and training services is recognized as those services are rendered. Revenue from hardware sales is recognized upon shipment, unless testing, integration or implementation services are required, in which case hardware revenue is recognized upon commissioning and acceptance of the product. Revenue from hardware sold in conjunction with software licenses is deferred until the related license revenue is recognized.

Substantially all of the Company's customers are providers of wireless telecommunications services and are generally granted credit without collateral. Lightbridge specifically analyzes accounts receivable and analyzes historical bad debts, customer creditworthiness, current domestic and international economic trends, and changes in its customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. The Company's revenues vary throughout the year, with the period of highest revenue generally occurring during the period October 1 through December 31. The allowance for doubtful accounts at December 31, 2002, 2001, and 2000 was approximately \$2,955, \$2,965 and \$2,525, respectively. The Company recorded bad debt expense of \$200, \$630 and \$287 and had write-offs, net of recoveries associated with accounts receivable of \$210, \$190 and \$1,077 for the years ended December 31, 2002, 2001 and 2000, respectively. During the quarter ended June 30, 2002, the Company provided approximately \$2.0 million of transaction services to WorldCom, Inc. ("WorldCom"), and did not record any related revenue due to doubts about collectibility stemming from WorldCom's financial difficulties. The Company did not provide any services to or record any revenue from WorldCom during the third or fourth quarter of 2002. At December 31, 2002, WorldCom owed the Company approximately \$2.0 million, all of which had been reserved.

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Customers exceeding 10% of the Company's revenues during the years ended December 31 are as follows:

	Years Ended Dec. 31,		
	2002	2001	2000
Sprint Spectrum L.P.	30%	22%	19%
AT&T Wireless Services, Inc.	21	20	16
Ericsson AB	15	16	24
Nextel Finance Company	11	7	4
Total	77%	65%	63%

Export Sales The Company had export sales to the following regions for the years ended December 31:

	2002	2001	2000
Latin America	\$ 10,436	\$ 20,615	\$ 32,175
Mexico	9,299	14,394	16,921
Africa	803		
Canada	748	1,129	1,607
Asia	273	2,872	2,233
Russia	169	783	1,337
Europe	157	388	314
Total	\$ 21,885	\$ 40,181	\$ 54,587

Goodwill and Acquired Intangible Assets In connection with the acquisition of Altawave, the Company recorded goodwill of \$1.7 million. The Company is required to test such goodwill for impairment on at least an annual basis. The Company has adopted January 1st as the date of the annual impairment test and, therefore, performed the annual impairment test on January 1, 2003. A comparison of the fair value of the reporting unit to its carrying amount, including goodwill, did not indicate impairment was present. The Company will assess the impairment of goodwill on an annual basis or sooner if other indicators of impairment arise.

Acquired intangible assets primarily represent the existing technology related to the acquisition of Altawave in 2002 and the existing technology and workforce related to the acquisition of Coral Systems, Inc. in 1997, and are included with other assets in the accompanying balance sheet. These assets are being amortized on a straight-line basis over their estimated useful lives, ranging from five months to five years. Acquired intangible assets consisted of the following at December 31:

	2002	2001
Altawave:		
Acquired intangible asset	\$ 1,330	\$
Accumulated amortization	(200)	
Net	\$ 1,130	\$

Edgar Filing: LIGHTBRIDGE INC - Form 10-K

Coral Systems, Inc.:		
Acquired intangible asset	\$ 6,901	\$ 6,901
Accumulated amortization	(6,901)	(6,359)
Net	\$	\$ 542

F-10

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Income Taxes The Company records deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the financial reporting and tax bases of existing assets and liabilities. Deferred income tax assets are principally the result of net operating loss carryforwards, income tax credits and differences in depreciation and amortization and accrued expenses and reserves for financial purposes and income tax purposes, and are recognized to the extent realization of such benefits is more likely than not. Lightbridge periodically assesses the recoverability of any tax assets recorded on the balance sheet and provides any necessary valuation allowances as required. (See Note 11)

Warranty Reserve The Company no longer markets its PhonePrint system but it does occasionally provide replacement units or spare parts for systems still under maintenance. As a result of the limited demand for the PhonePrint system and the Company's decision to no longer actively sell or market this system, no significant revenues are expected from this product in the future. The Company has a warranty reserve to cover the costs of PhonePrint replacement units or spare parts. As the number of carriers still operating the PhonePrint system has declined substantially, the Company reduced its PhonePrint warranty reserve by \$526 in 2002. The balance in the warranty reserve at December 31, 2002 is \$250.

Development Costs Development costs, which consist of research and development of new products and services, are expensed as incurred, except for software development costs. Software development costs are capitalized after establishment of technological feasibility which the Company defines as the point that a working model of the software application has achieved all design specifications and is available for beta testing. No costs have qualified for capitalization to date.

Supplemental Cash Flow Information

	Years Ended December 31,		
	2002	2001	2000
The Company had the following noncash transactions:			
Application of note to exercise warrants	\$	\$	\$ 691
Supplemental Items:			
Cash paid for interest	\$	\$	\$ 174
Cash paid for income taxes	\$3,925	\$4,752	\$10,892

Impairment of Long-Lived Assets The Company periodically, or when an impairment event occurs, assesses the recoverability of its long-lived assets by comparing the undiscounted cash flows expected to be generated by those assets to their carrying value. If the sum of the undiscounted cash flows is less than the carrying value of the assets, an impairment charge is recognized.

Stock-Based Compensation The Company applies the intrinsic value based method of accounting for stock options granted to employees. The Company accounts for stock options and awards to non-employees using the fair value method.

Under the intrinsic value method, compensation associated with stock awards to employees is determined as the difference, if any, between the current fair value of the underlying common stock on the date compensation is measured and the price an employee must pay to exercise the award. The measurement date for employee awards is generally the date of grant. Under the fair value method, compensation associated with stock awards to non-employees is determined based on the estimated fair value of the award itself, measured using either current market data or an established option pricing model. The measurement date for non-employee awards is generally the date performance of services is complete.

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Had the Company used the fair value method to measure compensation expense associated with grants of stock options to employees, reported net income and basic and diluted earnings per share would have been as follows:

	2002	2001	2000
Net income as reported	\$ 3,630	\$ 13,955	\$ 30,512
Stock based compensation recorded in income			
Stock based compensation measured using the fair value method	2,350	6,918	5,101
Net income pro forma	\$ 1,280	\$ 7,037	\$ 25,411
Basic earnings per share pro forma	\$ 0.05	\$ 0.25	\$ 0.93
Diluted earnings per share pro forma	\$ 0.05	\$ 0.24	\$ 0.86

The fair value of options on their grant date was measured using the Black-Scholes Option Pricing Model. Key assumptions used to apply this pricing model are as follows:

	Years Ended December 31,		
	2002	2001	2000
Risk-free interest rate	2.9% - 4.7%	3.9% - 4.9	% 5.2% - 6.7%
Expected life of options grants	1 - 5 years	1 - 5 years	1 - 5 years
Expected volatility of underlying stock	90%	96%	98%
Expected dividend payment rate, as a percentage of the stock price on the date of grant			

It should be noted that the option-pricing model used was designed to value readily tradable stock options with relatively short lives. The options granted to employees are not tradable and have contractual lives of up to ten years.

Comprehensive Income The Company currently has no items of comprehensive income other than net income.

Disclosures About Segments of an Enterprise and Related Information Based upon the way management and the Board of Directors monitor the operations, the Company operates in four distinct segments including the transaction business, the software license business, the consulting and service business, and the hardware business. Within these four segments, performance is measured based on gross profit realized from each segment. Information about revenues, cost of revenues and gross profit of each segment is shown separately on the statement of operations. Information about costs and expenses, other than costs of revenues, is not reported by segment. Amortization expense of acquired intangible assets recorded in software licensing cost of revenues for the years ended December 31, 2002, 2001 and 2000 was approximately \$542, \$651 and \$651, respectively. There are no transactions between segments.

Total assets for each reportable segment as of December 31, 2002 and 2001 were as follows:

2002	2001

Table of Contents

LIGHTBRIDGE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Corporate assets primarily represent cash, cash equivalents and investments totalling \$133.5 million and \$118.6 million as of December 31, 2002 and 2001, respectively.

Recent Accounting Pronouncements In July 2001, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 141 (SFAS 141), Business Combinations. SFAS 141 requires the purchase method of accounting for business combinations initiated after June 30, 2001 and eliminates the pooling-of-interests method. The adoption of SFAS 141 did not have a significant impact on the Company's financial statements.

Also in July 2001, the FASB issued SFAS No. 142 (SFAS 142), Goodwill and Other Intangible Assets, which became effective January 1, 2002. SFAS 142 requires, among other things, the discontinuance of goodwill amortization and that goodwill be tested for impairment at least annually. The adoption of SFAS 142 did not have a significant impact on the Company's financial statements.

The FASB has also issued SFAS No. 144 (SFAS 144), Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of, which was effective January 1, 2002. SFAS 144 provides guidance on measuring and recording impairments of assets, other than goodwill, and provides clarifications on measurement of cash flow information and other variables to be used to measure impairment. The adoption of SFAS 144 did not have a significant impact on the Company's financial statements.

In June 2002, the FASB issued SFAS No. 146 (SFAS 146), Accounting for Costs Associated with Exit or Disposal Activities. SFAS 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. SFAS 146 nullifies EITF No. 94-3 Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity, which required a liability be recognized at the commitment date to an exit plan. The Company is required to adopt the provisions of SFAS 146 effective for exit or disposal activities initiated after December 31, 2002. All restructuring activities prior to December 31, 2002, including those described in Note 8, are accounted for under EITF No. 94-3.

3. Inventory

The Company had no inventory at December 31, 2002. Inventories at December 31, 2001 totaled \$263 and consisted of raw materials of \$194 and finished goods of \$69.

4. Investment

The Company has committed to invest up to \$5.0 million in a limited partnership that invests in businesses within the wireless industry. Through December 31, 2002, the Company had invested a total of \$953. The Company uses the equity method of accounting for this limited partnership investment. For the year ended December 31, 2002, the Company's proportionate share of the loss of the limited partnership was \$464. The net carrying value of the investment at December 31, 2002 was \$489 and is included in other assets in the accompanying consolidated balance sheet. The unaudited amounts for limited partnership assets and partnership equity at December 31, 2002 were \$602 and \$567, respectively.

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. Property and Equipment**

Property and equipment consisted of the following at December 31:

	2002	2001
	<hr/>	<hr/>
Furniture and fixtures	\$ 3,688	\$ 4,461
Leasehold improvements	10,114	12,095
Computer equipment	41,698	47,603
Computer software	13,029	13,687
	<hr/>	<hr/>
	68,529	77,846
Less accumulated depreciation and amortization	(52,346)	(51,247)
	<hr/>	<hr/>
Property and equipment, net	\$ 16,183	\$ 26,599
	<hr/>	<hr/>

6. Line of Credit

In August 2001, the Company elected to forego annual renewal of a \$15.0 million unsecured working capital line of credit with a bank because the Company believed it had sufficient cash and short term investments to meet its then-current operating needs. At the date of expiration there were no borrowings outstanding under the working capital line of credit. At December 31, 2002 the Company had an outstanding letter of credit in the amount of \$1.0 million expiring in May 2003. On January 14, 2003, this letter of credit was replaced with a \$1.0 million letter of credit, which expires in May 2004.

7. Note Receivable

On February 3, 1999, the Company sold substantially all of the assets relating to a product line to a third party. In connection with the sale, the Company received from the buyer a secured promissory note receivable of \$2,200. The note, as amended, is included in other assets, bears interest at the rate of 8% per annum payable in monthly installments, with monthly principal payments due from January 2003 through December 2004 at which time a final balloon payment is also due.

8. Restructuring Costs

In November 2001, the Company announced that it was closing its Palo Alto, California facility and consolidating research and development activities in its Irvine, California and Broomfield, Colorado locations. All other Palo Alto operations, including finance, support services and sales and marketing, were merged with functions in Irvine or Burlington, Massachusetts. The Company recorded a restructuring charge of approximately \$4.0 million consisting of \$2.9 million for workforce reductions and \$1.1 million for facilities and related costs associated with the closure of its Palo Alto location. The restructuring plan resulted in the termination of 102 personnel as follows: 24 in product and service delivery, 38 in development, 25 in sales and marketing, and 15 in general and administrative. The costs for consolidation of facilities were predominantly comprised of real estate lease commitments for unutilized office space. All restructuring costs were paid as of December 31, 2002 and no adjustments to amounts previously recorded were required.

In June 2002, the Company announced that it was reducing its workforce by seven percent and consolidating its Waltham, Massachusetts call center operations into its Lynn, Massachusetts and Broomfield, Colorado facilities by the end of 2002. The Company recorded a restructuring charge of approximately \$3.6 million, consisting of \$1.6 million for workforce reductions, \$1.3 million for facilities reductions including lease obligations, utilities and security costs on unused space and \$0.7 million for capital equipment write-offs associated with these measures. The restructuring plan resulted in the termination of 65 personnel as follows: 25 in product and service delivery, 22 in development, 11 in sales and marketing and seven in general and

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

administrative. The capital equipment write-offs and the majority of severance costs related to this restructuring were incurred by the end of 2002, and the Company anticipates that all other costs relating to this restructuring, consisting principally of lease obligations on unused space, will be paid by the end of 2003.

The following summarizes the changes to the November 2001 restructuring reserves during the year ended December 31, 2002:

	Balance at December 31, 2001	Accrued	Utilized	Balance at December 31, 2002
Employee severance and termination benefits	\$ 2,143	\$	\$ 2,143	\$
Facility closing and related costs	997		997	
	<u>3,140</u>	<u>\$</u>	<u>\$ 3,140</u>	<u>\$</u>

The following summarizes the changes to the June 2002 restructuring reserves during the year ended December 31, 2002:

	Balance at December 31, 2001	Accrued	Utilized	Balance at December 31, 2002
Employee severance and termination benefits	\$	\$ 1,580	\$ 1,237	\$ 343
Facility closing and related costs		1,312	320	992
Capital equipment write-offs		724	724	
	<u>\$</u>	<u>\$ 3,616</u>	<u>\$ 2,281</u>	<u>\$ 1,335</u>

9. Commitments and Contingencies

Leases The Company has noncancelable operating lease agreements for office space and certain equipment. These lease agreements expire at various dates through 2008 and certain of them contain provisions for extension on substantially the same terms as are currently in effect.

Future minimum payments under operating leases consisted of the following at December 31, 2002:

	Operating Leases
2003	\$ 5,236
2004	3,693
2005	2,581
2006	1,021
Thereafter	1,156
	<u>\$ 13,687</u>
Total minimum lease payments	<u>\$ 13,687</u>

Edgar Filing: LIGHTBRIDGE INC - Form 10-K

Rent expense for operating leases was approximately \$6,052, \$5,979 and \$4,677 for the years ended December 31, 2002, 2001 and 2000, respectively.

Warranties and Indemnities The Company provides certain warranties and related indemnities in its client contracts. These warranties may include warranties that the transactions processed on a client's behalf have been processed in accordance with the contract, that products delivered or services rendered meet designated specifications or service levels, and that certain applicable laws and regulations are complied with in the performance of services for or provision of products to a client. The Company maintains errors and

omissions insurance that may provide coverage for certain warranty and indemnity claims. However, such insurance might cease to be available to the Company on commercially reasonable terms or at all.

10. Common Stock Option Plans, Warrants, Stockholder Rights Plan

Stock Option Plans

1990 Incentive and Nonqualified Stock Option Plan Under the Company's 1990 Incentive and Nonqualified Stock Option Plan, the Company could grant either incentive or nonqualified stock options to officers, directors, employees or consultants for the purchase of up to 2,400,000 shares of common stock. Options were granted with an exercise price equal to the common stock's market value at the date of grant, as determined by the Board of Directors of the Company (the Board), and expire ten years later. No further grants will be made under the 1990 Incentive and Nonqualified Stock Option Plan.

1996 Employee Stock Plans On June 14, 1996, the Board authorized and the stockholders approved the adoption of the 1996 Incentive and Nonqualified Stock Option Plan and the 1996 Employee Stock Purchase Plan for the issuance of options or sale of shares to employees. Both plans became effective immediately after the closing of the Company's initial public offering:

1996 Incentive and Nonqualified Stock Option Plan The 1996 Incentive and Nonqualified Stock Option Plan provides for the issuance of options to purchase up to 4,350,000 shares of the Company's common stock. Options may be either qualified incentive stock options or nonqualified stock options at the discretion of the Board. Exercise prices must be greater than or equal to the fair market value on the date of grant, in the case of incentive stock options and nonqualified options. At December 31, 2002, 1,191,674 shares were available for grant under the 1996 Incentive and Nonqualified Stock Option Plan.

1996 Employee Stock Purchase Plan The 1996 Employee Stock Purchase Plan provides for the sale of up to 600,000 shares of the Company's common stock to employees. Employees are allowed to purchase shares at a discount from the lower of fair value at the beginning or end of the purchase periods through payroll deductions. At December 31, 2002, 362,952 shares were available for purchase and reserved for issuance under the 1996 Stock Purchase Plan.

1997 Stock Incentive Plan and Restricted Stock Purchase Plan The 1997 Stock Incentive Plan and Restricted Stock Purchase Plan provided for the issuance of up to 8,516,667 options to acquire shares of common stock. Lightbridge assumed the obligation to issue shares under this former Corsair plan following the merger described in Note 1. The Company does not plan to make any further grants under the 1997 Stock Incentive Plan and Restricted Stock Purchase Plan.

1998 Non-Statutory Stock Option Plan The 1998 Non-Statutory Stock Option Plan provides for the issuance of options to purchase up to 1,000,000 shares of the Company's common stock. Options are granted with an exercise price no less than the common stock's market value at the date of the grant, as determined by the Board. At December 31, 2002, 499,490 shares were available for grant under the 1998 Non-Statutory Stock Option Plan.

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents activity under all stock option plans:

	Number of Options	Weighted- Average Exercise Price	Weighted- Average Fair Value of Options Granted
	(000 s)		
Outstanding at January 1, 2000	3,477	\$ 7.75	
Granted	1,630	20.24	\$ 11.53

3,906			2,278			

Stock Repurchases On October 4, 2001, Lightbridge announced that its board of directors authorized the repurchase of up to 2 million shares of the Company's common stock at an aggregate price of up to \$20 million. The shares may be purchased from time to time on or after October 8, 2001, depending on market conditions. The board placed a two-year time limit on the repurchase authorization. As of December 31, 2002, the Company had purchased approximately 1.2 million shares at a total cost of approximately \$8.8 million since the inception of its repurchase program.

Common Stock Warrants At December 31, 2002, pursuant to the acquisition of Coral, there were 9,682 warrants outstanding that can be converted to purchase Lightbridge common stock at exercise prices ranging from \$3.44 to \$34.35.

Stockholder Rights Plan In November 1997, the Board of Directors of Lightbridge declared a dividend of one right (each a "Right" and collectively the "Rights") for each outstanding share of common stock. The Rights were issued to the holders of record of common stock outstanding on November 14, 1997, and will be issued with respect to common stock issued thereafter until the Distribution Date (as defined below) and, in certain circumstances, with respect to shares of common stock issued after the Distribution Date. Each Right, when it becomes exercisable, will entitle the registered holder to purchase from Lightbridge one one-hundredth (1/100th) of a share of Series A participating cumulative preferred stock, par value \$0.01 per share, of Lightbridge at a price of \$75.00. The Rights will be issued upon the earlier of the date which Lightbridge learns that a person or group acquired, or obtained the right to acquire, beneficial ownership of fifteen percent or more of the outstanding shares of common stock or such date designated by the Board following the commencement of, or first public disclosure of an intent to commence, a tender or exchange offer for outstanding shares of the Company's common stock that could result in the offeror becoming the beneficial owner of fifteen percent or more of the outstanding shares of the Company's common stock (the earlier of such dates being called the Distribution Date).

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****11. Income Taxes**

The income tax provision for the years ended December 31 consisted of the following:

	2002	2001	2000
	<hr/>	<hr/>	<hr/>
Current:			
Federal	\$(2,105)	\$ 3,683	\$ 6,462
State	98	1,995	3,713
Deferred:			
Federal	1,697	(1,920)	(2,563)
State	35	(270)	45
Tax benefit of stock options	172	360	2,317
	<hr/>	<hr/>	<hr/>
Income tax provision	\$ (103)	\$ 3,848	\$ 9,974
	<hr/>	<hr/>	<hr/>

The tax effects of temporary differences that give rise to deferred tax assets at December 31 were as follows:

	2002	2001
	<hr/>	<hr/>
Current Items:		
Assets:		
Allowance for doubtful accounts	\$ 1,182	\$ 1,186
Accrued expenses	1,327	1,480
Restructuring reserve	503	776
	<hr/>	<hr/>
Net current deferred tax assets	\$ 3,012	\$ 3,442
	<hr/>	<hr/>
Long-Term Items:		
Assets:		
Depreciation and amortization	\$ 1,218	\$ 1,365
Acquisition costs	942	1,234
Intangible assets	1,461	1,042
Acquired loss carryforwards	10,383	12,277
Valuation allowance	(10,291)	(10,903)
	<hr/>	<hr/>
Net long-term deferred tax assets	\$ 3,713	\$ 5,015
	<hr/>	<hr/>

The net change in the valuation allowance for the years ended December 31, 2002, 2001 and 2000 was a decrease of approximately \$(612), \$(3,000) and \$(6,183), respectively. At December 31, 2002, the Company had \$26,000 of federal and state (excluding California) net operating loss carryforwards which expire, if unused, in years 2009 through 2012. At December 31, 2002, the Company had \$10,000 of California net operating loss carryforwards which expire, if unused, in 2004.

Table of Contents**LIGHTBRIDGE, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following is a reconciliation of income taxes at the federal statutory rate to the Company's effective tax rate for the years ended December 31:

	2002	2001	2000
Statutory federal income tax rate	34%	35%	35%
State taxes, net of federal benefit	2	6	6
Change in valuation allowance	(14)	(17)	(15)
Non-deductible portion of Corsair transaction costs		3	
Research & development credits	(23)	(5)	
Other, net	(2)		(1)
Effective tax rate	(3)%	22%	25%

12. Employee Profit Sharing Plan

The Company has a 401(k) Employee Profit Sharing Plan. All employees of the Company are eligible to participate, subject to employment eligibility requirements. The Company's 401(k) expense was approximately \$1,246, \$650 and \$903 for the years ended December 31, 2002, 2001 and 2000, respectively.

13. Earnings Per Share (EPS)

Basic EPS is computed by dividing income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock.

A reconciliation of the shares used to compute basic income per share to those used for diluted income per share is as follows for the years ended December 31:

	2002	2001	2000
	(In thousands)		
Shares for basic computation	28,030	27,987	27,362
Options and warrants (treasury stock method)	403	804	2,015
Shares for diluted computation	28,433	28,791	29,377

Stock options for which the exercise price exceeds the average market price over the period have an anti-dilutive effect on EPS and, accordingly, are excluded from the diluted computation. Had such shares been included, shares for the diluted computation would have increased by approximately 2,620,000, 2,591,000 and 999,000 for the years ended December 31, 2002, 2001 and 2000, respectively.
