Emerson GAAP Underlying Orders – 3 Month Summary
(Percent change. Trailing 3-month average versus prior year.)

	October '11	November '11	December '11
Process Management	+10 to +15	+5 to +10	+15
Industrial Automation	0 to +5	0 to +5	0 to +5
Network Power	0	-10 to -5	-10 to -5
Climate Technologies	-5 to 0	-10 to -5	-10 to -5
Tools and Storage	+10 to +15	+5 to +10	+5 to +10
Total	+5	0	0 to +5

December 2011 Order Comments:

Emerson's trailing three-month orders grew modestly, as strength in Process Management and Tools and Storage continued despite an uncertain global economic environment. Partially offsetting this strength, Network Power and Climate Technologies remained under pressure with end market weakness. Order trends slowed slightly compared to last month, excluding currency. Expectations for underlying sales growth in 2012 remain at 5 to 7 percent.

Global oil and gas investment continued to drive robust order trends in Process Management despite greater than 20 percent growth reported in the prior year. Strong backlog and continuing project activity supports a favorable outlook for 2012.

Industrial Automation end markets remained stable, with slight improvement in order trends supported by strong growth in the ultrasonic welding, fluid automation, and electrical distribution businesses. Reduced government subsidies globally continued to negatively affect the wind and solar energy businesses.

Order trends in Network Power were weak, with mixed results across the segment. The North America energy systems and European businesses declined the most, affected by delayed infrastructure investment by U.S. telecommunications service providers and European economic weakness. Thailand supply chain disruptions continued to affect the embedded computing and power business, which in total showed signs of stabilizing. Asia and Latin America experienced strong growth.

Climate Technologies orders remained consistent with the prior month trends, as OEM inventory liquidation and global residential and commercial construction weakness weighed on demand. Challenging conditions in the North America, Asia and Europe air conditioning markets were partially offset by modest growth in the global refrigeration business. Recovery from channel inventory corrections in North America and China should begin by mid-2012.

Solid order growth in Tools and Storage was primarily driven by the professional tools, food waste disposers, and commercial storage businesses, as improvement in U.S. commercial construction continued.

Upcoming Investor Events:
