**Notes to Consolidated Financial Statements****BOWATER INCORPORATED**  
**Notes to Consolidated Financial Statements    Unaudited****1. Summary of Significant Accounting Policies**

## Basis of Presentation

The accompanying consolidated financial statements include the accounts of Bowater Incorporated and subsidiaries ( Bowater ). The consolidated balance sheet as of March 31, 2005 and the related statements of operations, capital accounts and cash flows for the periods ended March 31, 2005 and 2004 are unaudited. In our opinion, all adjustments (consisting of normal recurring adjustments) necessary for fair presentation of the interim financial statements have been made. The results of the interim period ended March 31, 2005, are not necessarily indicative of the results to be expected for the full year. These financial statements should be read in conjunction with the consolidated financial statements, critical accounting policies, significant accounting policies and the notes to the consolidated financial statements included in our most recent Annual Report on Form 10-K. Certain prior-year amounts in the financial statements and the notes have been reclassified to conform to the 2005 presentation. The reclassifications had no effect on total shareholders' equity or net loss.

**2. Stock Based Compensation**

Bowater accounts for stock-based compensation utilizing the intrinsic value method in accordance with Accounting Principles Board ( APB ) Opinion No. 25, Accounting for Stock Issued to Employees. Under APB No. 25, compensation expense for employee stock options is generally not recognized if the exercise price of the option equals or exceeds the fair value of the underlying stock on the date of grant.

The following table represents the pro forma effect on net loss and loss per share if we had applied the fair value-based method and recognition provisions of SFAS No. 123 Accounting for Stock-Based Compensation. The estimated fair value of the option is amortized to expense over the vesting period of the option award, in accordance with the provisions of SFAS No. 123.

	<b>Three Months Ended March 31,</b>	
	<b>2005</b>	<b>2004</b>
<i>(Unaudited, in millions, except per-share amounts)</i>

Diluted, pro forma	(0.01)	(0.60)

**BOWATER INCORPORATED**  
**Notes to Consolidated Financial Statements    Unaudited**

The fair value of each option granted in the three months ended March 31, 2005 and 2004, was estimated on the date of grant using the Black-Scholes option-pricing model with the weighted average assumptions below.

	<b>Three Months Ended</b>	
	<b>March 31,</b>	
	<b>2005</b>	<b>2004</b>
Assumptions:		
Dividend yield	2.2%	1.8%
Expected volatility	29.0%	30.6%
Risk-free interest rate	4.0%	3.4%
Expected option lives in years	7.2	6.5
Weighted average fair value of each option	<b>\$ 11.19</b>	<b>\$ 13.64</b>

In January 2005 and 2004, respectively, Bowater granted 740,750 and 862,000 options pursuant to its 2002 stock option plan at an exercise price of \$37 and \$45 per share, respectively. The options generally become exercisable over a period of two years and expire 10 years from date of grant.

### 3. Inventories

	<b>March</b>	<b>December</b>
	<b>31,</b>	<b>31,</b>
	<b>2005</b>	<b>2004</b>
<i>(Unaudited, in millions)</i>		
At lower of cost or market:		
Raw materials	\$ 93.6	\$ 87.9
Work in process	26.0	23.1
Finished goods	131.7	112.7
Mill stores and other supplies	113.0	114.9
	<b>364.3</b>	338.6
Excess of current cost over LIFO inventory value	<b>(10.8)</b>	(10.7)
	<b>\$ 353.5</b>	<b>\$ 327.9</b>

### 4. Other (Income) Expense

Other, net in the Consolidated Statement of Operations includes the following:

<i>(Unaudited, in millions)</i>	Three Months Ended March	
	2005	2004
Foreign exchange (gain) loss	\$ (1.5)	\$ 0.4
Income from joint venture	(0.7)	(0.1)

**BOWATER INCORPORATED**  
**Notes to Consolidated Financial Statements    Unaudited**

**5. Accumulated Other Comprehensive Loss**

The components of Accumulated other comprehensive loss in the Consolidated Balance Sheet are as follows:

<i>(Unaudited, in millions)</i>	<b>March 31, 2005</b>	December 31, 2004
Pension plan additional minimum liabilities (1)	\$ (112.8)	\$ (113.1)
Foreign currency translation (2)	7.6	8.2
Unrealized gain on hedging transactions (3)	50.5	76.3
	<b>\$ (54.7)</b>	<b>\$ (28.6)</b>

(1) Net of deferred tax benefit of \$65.4 million and \$65.5 million, respectively.

(2) No tax effect is recorded for foreign currency translation since the foreign net assets translated are deemed permanently invested.

(3) Net of deferred tax expense of \$30.9 million and \$46.7 million, respectively.

**6. Income (Loss) Per Share**

Basic and diluted income (loss) per share are based on net income (loss) and do not include any impact from Other comprehensive loss.

<i>(Unaudited, in millions, except per-share amounts)</i>	<b>Three Months Ended March 31,</b>	
	<b>2005</b>	2004
<b>Basic computation:</b>		
Basic income (loss) available to common shareholders	\$ 0.9	\$ (32.5)
Basic weighted average shares outstanding	57.3	57.1
Basic income (loss) per common share	\$ 0.02	\$ (0.57)
<b>Diluted computation:</b>		
Diluted income (loss) available to common shareholders	\$ 0.9	\$ (32.5)
Basic weighted average shares outstanding	57.3	57.1

Effect of dilutive securities:		
Options	<b>0.1</b>	
Diluted weighted average shares outstanding	<b>57.4</b>	57.1
Diluted income (loss) per common share	<b>\$ 0.02</b>	\$ (0.57)

The dilutive effect of options outstanding is calculated using the treasury stock method. Options for approximately 4.2 million and 4.8 million shares outstanding at March 31, 2005, and 2004, respectively, were excluded in the calculation of diluted earnings per share as the impact would have been antidilutive.

**BOWATER INCORPORATED**  
**Notes to Consolidated Financial Statements    Unaudited**

**7. Pension and Postretirement Expense**

The components of net periodic benefit costs relating to Bowater's pension and other postretirement plans are as follows for the three months ended March 31, 2005 and 2004:

<i>(Unaudited, in millions)</i>	Pension Plans		Other Postretirement Plans	
	2005	2004	2005	2004
Components of net periodic benefit cost:				
Service cost	\$ 9.2	\$ 9.5	\$ 1.1	\$ 1.2
Interest cost	28.7	27.3	4.4	4.5
Expected return on plan assets	(28.3)	(27.1)		
Amortization of prior service cost	0.5	0.5	(1.3)	(1.5)
Recognized net actuarial loss	4.0	3.2	2.1	2.6
 Net periodic benefit cost	 \$ 14.1	 \$ 13.4	 \$ 6.3	 \$ 6.8

**8. Commitments and Contingencies**

Bowater is involved in various legal proceedings relating to contracts, commercial disputes, taxes, environmental issues, employment and workers' compensation claims and other matters. We periodically review the status of these proceedings with both inside and outside counsel. We believe that the ultimate disposition of these matters will not have a material adverse effect on our financial condition, but it could have a material adverse effect on the results of operations in a given quarter or the year.

There have been no material developments to the legal proceedings described in our annual report on Form 10-K filed on March 16, 2005.

**9. Financial Instruments**

Bowater utilizes certain derivative instruments to enhance its ability to manage risk relating to cash flow exposure. Derivative instruments are entered into for periods consistent with related underlying cash flow exposures and do not constitute positions independent of those positions. We do not enter into contracts for speculative purposes; however, we do, from time to time enter into commodity and certain forward contracts that are not accounted for as accounting hedges. On the date in which the derivative contract is entered we designate the derivative as a cash flow hedge.

We pay a significant portion of the operating expenses of our Canadian mill sites in Canadian dollars. To reduce our exposure to United States and Canadian dollar exchange rate fluctuations, we enter into and designate Canadian dollar forward contracts to hedge certain of our forecasted Canadian dollar cash outflows at the Canadian mill operations.

**BOWATER INCORPORATED**  
**Notes to Consolidated Financial Statements    Unaudited**

The components of the cash flow hedges included in Accumulated other comprehensive loss for the three months ended March 31, 2005 and 2004 are as follows:

<i>(Unaudited, in millions)</i>	Three Months Ended March 31,	
	<b>2005</b>	2004
Gains reclassified to earnings on matured cash flow hedges	\$ (34.6)	\$ (31.9)
Unrealized gain (loss) for change in value on unmatured cash flow hedges	(7.0)	2.4
	<b>(41.6)</b>	<b>(29.5)</b>
Income tax benefit	<b>15.8</b>	11.2
Net decrease in Accumulated other comprehensive loss	<b>\$ (25.8)</b>	<b>\$ (18.3)</b>

We formally document all relationships between hedging instruments and hedged items, as well as our risk-management objectives and strategies for undertaking various hedge transactions. We link all hedges that are designated as cash flow hedges to forecasted transactions. The maximum time period we have hedged transactions is two years. We also assess, both at the inception of the hedge and on an on-going basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge, we discontinue hedge accounting prospectively.

Information regarding our Canadian dollar contracts notional amount, carrying value, fair market value, and range of exchange rates of the contracts is summarized in the table below. The notional amount of these contracts represents the amount of foreign currencies to be purchased or sold at maturity and does not represent our exposure on these contracts.

<b>March 31, 2005</b>	Notional Amount of Derivatives	Carrying Amount	Net Asset Fair Market Value	Range Of U.S.\$/CDN\$ Exchange Rates
<i>(Unaudited, in millions of U.S. dollars)</i>				
Foreign Currency Exchange Agreements				
Buy Currency:				
Canadian dollar				
Due in 2005	\$ 378.0	\$ 59.7	\$ 59.7	.7489-.6451
Due in 2006	183.0	21.7	21.7	.7609-.7124
	<b>\$ 561.0</b>	<b>\$ 81.4</b>	<b>\$ 81.4</b>	

In order to reduce our exposure to exchange rate fluctuations on our Canadian dollar denominated long-term debt, we periodically enter into Canadian dollar forward contracts. These economic hedge contracts are marked to market through earnings. The contracts are settled quarterly and gains or losses are included in Other, net in our Consolidated Statement of Operations. The Canadian dollar forward contracts in effect during the first quarter matured on March 30, 2005, and we did not enter into any new Canadian dollar forward contracts. We recognized a gain of \$0.9 million for the quarter ended March 31, 2005, as a result of these contracts.

The counterparties to our derivative financial instruments are substantial and creditworthy multi-national financial institutions and no one financial institution has more than 21% of our derivative financial instruments. Therefore, the risk of counterparty nonperformance is considered to be remote.

**BOWATER INCORPORATED**  
**Notes to Consolidated Financial Statements - Unaudited**

**10. Off-Balance Sheet Debt Guarantees**

Bowater has off-balance sheet debt guarantees of approximately \$36.1 million at March 31, 2005, with \$27.0 million related to Ponderay Newsprint Company and \$9.1 million related to Timber Note Holdings LLC, one of our QSPEs.

Bowater has a 40% interest in Ponderay Newsprint Company, an unconsolidated partnership. Ponderay has a credit facility which is comprised of a term loan and a revolving credit facility. The term loan balance at March 31, 2005 was \$67.5 million and is guaranteed by the partners of Ponderay. Bowater guarantees 40% or \$27.0 million of this term loan. The revolving credit facility has commitments from the lender for \$25 million. This revolving credit facility is not guaranteed by the partners. At March 31, 2005 there is a \$10 million letter of credit reducing this commitment. There are no other drawings on this facility. Ponderay's outstanding balance on the term loan is reduced annually by its excess cash flows as defined in the credit facility and, although the final balance is due at maturity on April 12, 2006, we believe that Ponderay intends to renew this facility. The term loan cannot be increased once paid down, therefore, Bowater's guarantee is reduced as the outstanding balance is reduced. Bowater would be required to perform on the guarantee if Ponderay were to default on its credit facility and Ponderay's assets, which collateralize the debt, were insufficient to pay off the credit facility. Ponderay was in compliance with all its debt covenants as of March 31, 2005. Ponderay's total assets and liabilities at March 31, 2005 were approximately \$162 million and \$86 million (which includes the above mentioned debt), respectively.

In connection with Bowater's 1999 land sale and note monetization, we guarantee 25% of the outstanding investor notes principal balance of Timber Note Holdings LLC, one of our QSPEs. Bowater currently guarantees approximately \$9.1 million of the investor notes principal balance. This guarantee is proportionately reduced by annual principal repayments on the investor notes (annual minimum repayments of \$2.0 million) through 2008. The remaining investor notes principal amount is to be repaid in 2009. Timber Note Holdings LLC has assets of approximately \$42 million and obligations of approximately \$37 million, which include the investor notes. Bowater would be required to perform on the guarantee if the QSPE were to default on the investor notes or if there were a default on the notes receivable.

**11. Segment Information**

Below is a description of the types of products and services from which each reportable segment derives its revenues:

Effective January 1, 2005, Bowater is organized into four divisions: the Newsprint Division, the Coated and Specialty Papers Division, the Canadian Forest Products Division, and the Pulp Division. The fifth division that existed in 2004, the Forest Products Division, was merged into the Newsprint and Canadian Forest Products Divisions and the Thunder Bay mill was moved from the Newsprint Division to the Coated and Specialty Papers Division. Except for the Pulp Division, each division is responsible for the sales and marketing of distinct product lines and the operation of certain manufacturing sites. The Pulp Division is primarily a marketing and distribution division whose administrative expenses are included in Corporate & Other Eliminations. Therefore, the other three divisions are our reportable segments. Prior year results have been restated to facilitate comparisons to the 2005 presentation.

newsprint division

The Newsprint Division operates six manufacturing sites (including Ponderay Newsprint Company, an unconsolidated partnership) in the United States, Canada and South Korea. The principal product at these manufacturing sites is newsprint, but several of the sites also produce market pulp and uncoated specialty papers. This division has primary responsibility for the domestic and international marketing and sales of newsprint. The division also manages 1.0 million acres of owned or leased timberland in the United States and the Canadian province of Nova Scotia on which we have cutting rights. Effective January 1, 2005, the Thunder Bay mill became part of the Coated and Specialty Papers Division.

**BOWATER INCORPORATED**  
**Notes to Consolidated Financial Statements - Unaudited**

coated and specialty papers division

The Coated and Specialty Papers Division operates a manufacturing site that produces coated and uncoated specialty papers and market pulp and two Nuway coating facilities, all three located in the United States. This division also operates a manufacturing site in Canada which produces newsprint, specialty papers and market pulp. Effective January 1, 2005, the Thunder Bay mill became part of the Coated and Specialty Papers Division. This division has primary responsibility for the marketing and sales of the full spectrum of coated and uncoated specialty papers manufactured by Bowater. The division also manages 8.4 million acres of Crown-owned land in the Canadian province of Ontario on which we have cutting rights.

canadian forest products division

The Canadian Forest Products Division operates four paper manufacturing sites in Canada. The division manages 0.4 million acres of owned or leased timberland and approximately 21.2 million acres of Crown-owned land in the Canadian provinces of Quebec and New Brunswick on which we have cutting rights. The division also operates twelve sawmills, supplies wood to four paper mills and seven sawmills, and is responsible for the marketing and sales of its timber and lumber production. Effective January 1, 2005, the sawmill operations of the Forest Products Division were merged into the Canadian Forest Products Division.

pulp division

The Pulp Division markets and distributes market pulp produced by other divisions. Financial results for the production and sale of market pulp are included in the Newsprint Division or the Coated and Specialty Papers Division, depending upon which site manufactures the product. The Pulp Division's selling and administrative expenses are included in Corporate and Other Eliminations. Accordingly, no separate results are reported for this division.

**Factors management used to identify our segments:**

Bowater's reportable segments are business units responsible for the marketing and sales of different products. They are managed separately because of the different products they are responsible for manufacturing and distributing.

The line entitled Segment income (loss) in the following tables is equal to Operating income (loss) as presented in our Consolidated Statement of Operations. In addition, none of the income or loss items following Operating income (loss) in our Consolidated Statement of Operations are allocated to our segments, since they are reviewed separately by Bowater's management.

The following tables summarize information about segment profit and loss for the three month periods ended March 31, 2005 and 2004 and segment assets as of March 31, 2005 and 2004:

	Coated	Canadian	Net Gain on Fixed	Corporate/

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Organization**

Effective January 1, 2005, Bowater is organized into four divisions: the Newsprint Division, the Coated and Specialty Papers Division, the Canadian Forest Products Division, and the Pulp Division. The fifth division that existed in 2004, the Forest Products Division, was merged into the Newsprint and Canadian Forest Products Divisions and the Thunder Bay mill was moved from the Newsprint Division to the Coated and Specialty Papers Division. Except for the Pulp Division, each division is responsible for the sales and marketing of distinct product lines and the operation of certain manufacturing sites. The Pulp Division is primarily a marketing and distribution division whose administrative expenses are included in Corporate & Other Eliminations. Therefore, the other three divisions are our reportable segments. Prior year results have been restated to facilitate comparisons to the 2005 presentation.

**Newsprint Division**

The Newsprint Division operates six manufacturing sites (including Ponderay Newsprint Company, an unconsolidated partnership) in the United States, Canada and South Korea. The principal product at these manufacturing sites is newsprint, but several of the sites also produce market pulp and uncoated specialty papers. This division has primary responsibility for the domestic and international marketing and sales of newsprint. The division also manages 1.0 million acres of owned or leased timberland in the United States and the Canadian province of Nova Scotia on which we have cutting rights. Effective January 1, 2005, the Thunder Bay mill became part of the Coated and Specialty Papers Division.

**Coated and Specialty Papers Division**

The Coated and Specialty Papers Division operates a manufacturing site that produces coated and uncoated specialty papers and market pulp and two Nuway coating facilities, all three located in the United States. This division also operates a manufacturing site in Canada which produces newsprint, specialty papers and market pulp. Effective January 1, 2005, the Thunder Bay mill became part of the Coated and Specialty Papers Division. This division has primary responsibility for the marketing and sales of the full spectrum of coated and uncoated specialty papers manufactured by Bowater. The division also manages 8.4 million acres of Crown-owned land in the Canadian province of Ontario on which we have cutting rights.

**Canadian Forest Products Division**

The Canadian Forest Products Division operates four paper manufacturing sites in Canada. The division manages 0.4 million acres of owned or leased timberland and approximately 21.2 million acres of Crown-owned land in the Canadian provinces of Quebec and New Brunswick on which we have cutting rights. The division also operates twelve sawmills, supplies wood to four paper mills and seven sawmills, and is responsible for the marketing and sales of its timber and lumber production. Effective January 1, 2005, the sawmill operations of the Forest Products Division were merged into the Canadian Forest Products Division.

**Pulp Division**

The Pulp Division markets and distributes market pulp produced by other divisions. Financial results for the production and sale of market pulp are included in the Newsprint Division or the Coated and Specialty Papers Division, depending upon which site manufactures the product. The Pulp Division's selling and administrative expenses are included in Corporate and Other Eliminations. Accordingly, no separate results are reported for this

division.

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Cautionary Statements Regarding Forward-Looking Information and Use of Third Party Data**

Statements that are not reported financial results or other historical information are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, for example, statements about our business outlook, assessment of market conditions, strategies, future plans, future sales, prices for our major products, inventory levels, capital spending and tax and exchange rates. These forward-looking statements are not guarantees of future performance. These statements are based on management's expectations that involve a number of business risks and uncertainties, any of which could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. In addition to specific factors described in connection with any particular forward-looking statement, factors that could cause actual results to differ materially include, but are not limited to, those described under the caption "Cautionary Statements Regarding Forward-Looking Information and Use of Third Party Data" in Bowater's annual report on Form 10-K for the year ended December 31, 2004, and from time to time, in Bowater's other filings with the Securities and Exchange Commission. In addition, other risks could adversely affect us, as it is not possible for us to predict or assess all risks. We disclaim any obligation to publicly update or revise any forward-looking statements even if our situation changes in the future.

Information about industry or general economic conditions contained in this report are derived from third party sources (e.g. trade publications) that Bowater believes are widely accepted and accurate; however, Bowater has not independently verified this information and cannot provide assurances of its accuracy.

**Accounting Policies and Estimates**

The following discussion and analysis provides information that we believe is useful in understanding our operating results, cash flows and financial condition on our unaudited Consolidated Financial Statements included in this quarterly report. Our significant accounting policies are described in Note 1 to the Consolidated Financial Statements in Bowater's annual report on Form 10-K for the year ended December 31, 2004. Bowater's critical accounting policies and estimates are described under the caption "Critical Accounting Policies and Estimates" in Item 7 of Bowater's annual report on Form 10-K for the year ended December 31, 2004.

The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates, assumptions and judgments and rely on projections of future results of operations and cash flows. We base our estimates and assumptions on historical data and other assumptions that we believe are reasonable under the circumstances. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities in our financial statements. In addition, they affect the reported amounts of revenues and expenses during the reporting period.

Our judgments are based on our assessment as to the effect certain estimates, assumptions of future trends or events may have on the financial condition and results of operations reported in our Consolidated Financial Statements. It is important that the reader of our financial statements understand that actual results could differ materially from these estimates, assumptions, projections and judgments.

**Overview of Financial Performance**

Our net income for the first three months of 2005 was \$0.9 million, as compared to a net loss of \$32.5 million for the same period in 2004. Our cash flow from operating activities was lower than our capital spending and dividends, resulting in slightly higher debt levels. As a result, our total debt to capitalization ratio, calculated in accordance with

our credit facilities, increased slightly to 59.8%.

During the first quarter of 2005, prices increased for all of our products, increasing our sales by \$91.7 million as compared to the first quarter of 2004. Shipments also increased in lumber and coated and specialty papers. Our sales in the first quarter of 2005 were 12% higher than in the first quarter of 2004. However, our costs were also higher primarily due to the stronger Canadian dollar and higher recycled fiber, energy and labor costs. Our unit

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

manufacturing costs were up 6% in newsprint, 12% in market pulp and 8% in lumber. Consolidated Results of Operations on page 18 provides specifics regarding manufacturing cost changes during the first quarter of 2005.

We improved our product mix significantly during the first quarter of 2005. Shipments of higher value added coated and specialty papers increased by 10% as compared to the same period of 2004.

Newsprint demand in North America declined 7% in the first quarter of 2005 compared to the same period last year as a cyclical advertising recovery continued to be offset by conservation measures taken by publishers, reduced North American newspaper circulation and substitution between uncoated mechanical grades. Global demand for newsprint in the first quarter of 2005 was healthy. Coated mechanical demand in North America was essentially flat compared to the same period of 2004. Uncoated mechanical demand increased by 11.5% and supercalendered high gloss specialty paper demand increased by 7.5%. Global market pulp demand continues to be healthy. Overall, pulp and paper markets were stronger during the first quarter of 2005.

In the first quarter of 2005 we spent approximately \$25 million on capital projects. We expect to spend approximately \$170 million in 2005, compared to projected depreciation expense of \$330 million. We believe that this level of spending is adequate to effectively maintain our manufacturing facilities. This level of capital expenditures excludes capital requirements for the conversion opportunities discussed below. We intend to direct any excess cash flows to reduce debt.

**Outlook**

Markets and prices for our products have improved. However, North American newsprint demand may continue to decline over the next few years and we expect our newsprint capacity to decline as we continue to shift production to coated and specialty grades. In particular, we have attractive opportunities for further investment to enhance our product mix by converting newsprint capacity to coated and uncoated specialty papers capacity at our Calhoun and Thunder Bay mills. We are currently reviewing marketing and engineering plans for these strategic initiatives. The timing of these initiatives will take into account our financial flexibility and debt reduction goals. Later this year, we expect to be in a position to announce whether or not we will proceed with these projects.

We believe our operations are positioned to deliver quality products and that capital reinvestment in the business can be held to acceptable levels. We expect to generate positive cash flows in the remainder of 2005, reducing debt and enhancing our financial flexibility. However, if pricing or demand fall significantly below our projections, our ability to generate sufficient cash flows may be adversely impacted and we may be required to seek additional external sources of capital. We believe our access to our credit facilities and the capital markets will be sufficient to provide for our requirements.

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Consolidated Results of Operations**

<i>(In millions)</i>	<b>Three Months Ended</b>		
	<b>March 31,</b>		
	<b>2005</b>	2004	Change
Sales	<b>\$ 837.0</b>	\$ 745.3	\$ 91.7
Operating income (loss)	<b>36.8</b>	(23.3)	60.1

Significant items that increased (decreased) operating income:

Net gain on fixed assets and land sales	\$ 11.9
Product pricing	102.1
Distribution costs	(5.9)
Manufacturing costs	(46.1)
Selling and administrative expenses	(1.9)
	<b>\$ 60.1</b>

**Three months ended March 31, 2005 versus March 31, 2004**

**Sales** increased in the first quarter of 2005 as compared to the first quarter of 2004 due primarily to higher transaction prices for all products and due to increased shipments of coated and specialty papers and lumber as further discussed in the *Product Line Information* section.

**Operating income** increased in the first quarter of 2005 as compared to the first quarter of 2004. The above table analyzes the major items that increased operating income. A brief explanation of these major items follows:

**Net gain on fixed assets and land sales** relates primarily to land sales and the disposition or write-off of fixed assets. The increase is due to higher land sales in the first quarter of 2005 compared to the first quarter of 2004.

**Product pricing** for all of our major product groups was higher in the first quarter of 2005 as compared to the first quarter of 2004. Please refer to the discussion of *Product Line Information* for a more detailed analysis of product pricing and shipments.

**Distribution costs** were higher in the first quarter of 2005 as compared to the first quarter of 2004 as a result of increased shipments to export markets and increased fuel costs.

**Manufacturing costs** were higher in the first quarter of 2005 as compared to the first quarter of 2004 resulting from higher recycled fiber (\$3.4 million) and wood costs (\$7.3 million), increased chemical costs (\$4.6 million), higher energy costs (\$2.8 million), higher labor and repair materials costs (\$8.0 million), and a stronger Canadian dollar (\$21.4 million). These cost increases were partially offset by improved volumes (\$5.2 million) and lower depreciation expense (\$3.3 million).

**Division/Segments and Product Line Information**

Bowater is organized by Division. Bowater also provides product line disclosures for informational purposes to our analysts and investors. The Divisions have operational responsibility over their group of operating assets. The Divisions also have sales responsibilities that overlap several of the Company's operating Divisions/Segments. The matrix below depicts the various products that are manufactured by each of the Company's operating Divisions/Segments and corresponding sales dollars for the three months ended March 31, 2005 and depicts the Division that is responsible for the sale of the product line for the entire company.

(In millions)

**Product Line Information**

Presented below is a discussion of each significant product line followed by a discussion of the results of each of the reported divisions.

In general, our products are globally-traded commodities. Pricing and the level of shipments of these products will continue to be influenced by the balance between supply and demand as affected by global economic conditions, changes in consumption and capacity, the level of customer and producer inventories and fluctuations in exchange rates.

**Newsprint Product Line**

**Three Months Ended March**  
**31,**  
**2005**                      2004

Edgar Filing: BOWATER INC - Form 10-Q

Inventory at end of period (thousands of metric tons)		<b>107.0</b>		75.6

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Three months ended March 31, 2005, versus March 31, 2004**

Our average newsprint transaction price for all markets was 10.7% higher in the first quarter of 2005 compared to the first quarter of 2004. The increase reflects the realization of price increases in the North American and International markets. Newsprint shipments decreased by 6% in the first quarter of 2005 primarily due to increases in specialty production. The market downtime is primarily attributable to an idled paper machine at our Thunder Bay mill (since late June 2003). We plan to take approximately 40,000 metric tons of market and maintenance downtime in the second quarter of 2005. We expect this market downtime to continue until market conditions improve. We will continue to match production to orders. Inventories increased during the first quarter of 2005 to support our expanding export markets.

We have announced a \$35 per metric ton price increase for the domestic market effective June 1, 2005. Market conditions will determine whether we realize this increase.

**Newsprint Third Party Data:** In the first quarter of 2005, total U.S. demand and consumption of newsprint decreased 7.3% and 4.6%, respectively as compared to the same period last year. North American net exports of newsprint decreased 0.5% from first quarter 2004 levels. Total inventories (North American mills and users) at March 31, 2005 were 1.4 million metric tons, approximately 13,000 metric tons, or 0.9%, lower than the end of the first quarter 2004. At March 31, 2005 the days of supply at the U.S. daily newspapers was 43 days, unchanged from March 2004. Excluding idled capacity, the North American operating rate was 97% for the first quarter of 2005. Newspaper advertising linage declined 2.3% in March 2005 compared to March 2004 and declined 1.0% on a year-to-date basis.

**Coated and Specialty Papers Product Line**

	<b>Three Months Ended March</b>	
	<b>31,</b>	
	<b>2005</b>	<b>2004</b>
Sales (in millions)	\$ 251.5	\$ 195.9
Average prices (per short ton)	\$ 675	\$ 580
Shipments (thousands of short tons)	372.8	337.8
Downtime (thousands of short tons)	22.5	31.6
Inventory at end of period (thousands of short tons)	51.0	60.9

**Three months ended March 31, 2005, versus March 31, 2004**

Our average transaction price for coated paper was 18.1% higher in the first quarter of 2005 compared to the first quarter of 2004 due to the realization of price increases in 2004 and March 2005, as well as the addition of ultra-light weight coated grades to our mix. Our coated mechanical papers shipments increased 7.9% in the first quarter of 2005 as compared to the first quarter of 2004 due to strong market demand. Our average transaction price for specialty papers was 14.3% higher in the first quarter of 2005 compared to the first quarter of 2004 due to the realization of price increases in 2004. Our shipments of specialty papers increased 13.2% in the first quarter of 2005 compared to the first quarter of 2004 due to book market customers down-grading from traditional freesheet grades to mechanical

specialties and retailer circular customers upgrading from newsprint to specialties. Market downtime in the first quarter of 2005 was at our Nuway facilities.

Effective April 1, 2005, Bowater announced price increases of \$60 and \$40 per short ton for selected supercalendered and uncoated mechanical products, respectively. Effective March 1, 2005, Bowater announced price increases of \$60 per short ton across all coated grades.

***Coated and Specialty Papers Third Party Data:*** U.S. magazine advertising pages increased 1.2% in the first quarter of 2005 compared to the first quarter of 2004 and catalog mailings (indicated by standard mail pieces) increased

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

8.2% in the fourth quarter of 2004 compared to the same period in 2003. North American demand for coated mechanical papers was flat in the first three months of 2005 compared to the first three months of 2004. North American demand for supercalendered high gloss papers and other uncoated mechanical papers was up 7.5% and up 12.0%, respectively, in the first three months of 2005 compared to the first three months of 2004.

**Market Pulp**

	<b>Three Months Ended March</b>	
	<b>31,</b>	
	<b>2005</b>	<b>2004</b>
Sales (in millions)	\$ 140.3	\$ 137.2
Average prices (per metric ton)	\$ 543	\$ 485
Shipments (thousands of metric tons)	258.4	282.5
Downtime (thousands of metric tons)	10.3	5.0
Inventory at end of period (thousands of metric tons)	54.6	50.3

**Three months ended March 31, 2005, versus March 31, 2004**

Our average transaction price for market pulp was 12% higher in the first quarter of 2005 compared to the first quarter of 2004. The increase reflects the realization of price increases brought about by improved world supply and demand over the last three quarters of 2004 and first quarter of 2005. Temporary and permanent supply reductions in North America coupled with improved demand from paper makers combined to help improve market conditions. Shipments were lower during the first quarter of 2005 as a result of maintenance downtime and increased fiber consumption by several of our paper mills. Our Catawba, SC facility was down in the first quarter of 2005 for a scheduled maintenance, removing approximately 5,000 metric tons from production. Our market pulp inventories ended the first quarter of 2005 at 16 days supply. Generally, our inventories are below the industry average because our mills are geographically closer to the markets they serve. In the third quarter of 2005, our Coosa Pines facility will be down for scheduled maintenance, removing approximately 20,000 metric tons of production. As a result, we will increase our market pulp inventory prior to the shut. We believe our inventory levels are appropriate.

A \$20 per metric ton price increase for both Northern and Southern Hardwood grades was announced to our North American customer base effective April 1, 2005.

**Market Pulp Third Party Data:** World demand for market pulp decreased in the first quarter of 2005 compared to the same period last year. World shipments were down 1.4% in the first quarter of 2005 compared to the same period in 2004. World producers shipped at 94% of capacity. World producer inventories have increased to 34 days supply, which is 2 days more than the corresponding period in 2004.

**Lumber**

Downtime (million board feet)	<b>48.3</b>	67.1
Inventory at end of period (million board feet)	<b>71.3</b>	68.1

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Three months ended March 31, 2005, versus March 31, 2004**

Lumber prices increased in the first quarter of 2005 as compared to the first quarter of 2004 as a result of market volatility and continued high demand which was fueled by record housing starts. Our lumber shipments increased 5.5% in the first quarter of 2005 due primarily to the increased output at our Maniwaki sawmill following completion of the modernization project in December 2003.

The Province of Québec has mandated that annual harvests of softwood timber on Crown-owned land must be reduced 20% below 2004 levels. The 20% reduction must be achieved, on average, for the three year period beginning April 1, 2005 and ending March 31, 2008. We do not expect that these requirements will have any material impact on our results of operations or financial condition in 2005. We are assessing the impact of these reductions for future years.

The U.S. Department of Commerce (DOC) imposed antidumping duties (ADD) of 8.43% on all of Bowater's Canadian softwood lumber imports and countervailing duties (CVD) of 18.79% on softwood lumber imported from all provinces except New Brunswick and Nova Scotia. The duties became effective for lumber shipments beginning May 22, 2002. Bowater accrued lumber duties based upon the DOC's preliminarily imposed effective dates of August 16, 2001, for countervailing duties and November 6, 2001, for antidumping duties. During the second quarter of 2002, Bowater reversed approximately \$7.3 million for previously recorded lumber duties for periods prior to the effective date of May 22, 2002. Since May 22, 2002 Bowater has been posting cash deposits to cover the duties. On December 20, 2004 the CVD rate was adjusted to 17.18% and the ADD rate was adjusted to 4.03% for the period of May 22, 2002 to April 30, 2003 pursuant to a review by the DOC. Bowater began to accrue on this new published rate and will continue to accrue and pay duties based on rates established by the DOC until new rates are published. The CVD rate was amended to 16.37% on February 24, 2005 and the ADD rate was amended to 3.78% on January 24, 2005. Lumber duties are included as a component of distribution costs on our consolidated statement of operations.

The Canadian government has appealed the duties to the World Trade Organization (WTO) and under the terms of the North American Free Trade Agreement (NAFTA) and requested that the duties be refunded. The final amount of CVD and ADD that may be assessed on Canadian softwood lumber imports into the U.S. will depend upon negotiations among the governments involved in the dispute or upon determinations made by the NAFTA, WTO or other adjudicatory panels to which the duties may be appealed. Until the dispute about the duties is resolved, we will continue to pay the duties as required by the DOC. To date, we have paid CV and AD duties of approximately \$77.3 million. Should these duty rates be eliminated or decreased, a portion or all of the \$77.3 million could be reversed into operating income in future periods.

**Third party data:** The U.S. housing starts increased 8.0% in the first quarter of 2005 as compared to the same period last year.

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Divisional Performance****Newsprint Division**

<i>(In millions)</i>	<b>Three Months Ended</b>		
	<b>March 31,</b>		
	<b>2005</b>	2004	Change
Sales	<b>\$ 309.3</b>	\$ 283.7	\$ 25.6
Segment income (loss)	<b>10.5</b>	(3.9)	14.4

Significant items that increased (decreased) segment income (loss):

Product pricing	\$ 30.3
Distribution costs	(2.3)
Manufacturing costs	(13.2)
Selling and administrative expenses	(0.4)
	<b>\$ 14.4</b>

**Three months ended March 31, 2005, versus March 31, 2004**

Sales increased in the first quarter of 2005 as compared to the first quarter of 2004 primarily as a result of higher product pricing for newsprint (\$21.0 million), market pulp (\$5.3 million) and specialty papers (\$3.1 million), and higher shipments of specialty papers (\$10.0 million) and market pulp (\$1.6 million). These product price and shipment increases were offset by lower shipments of newsprint (\$15.2 million). See the previous discussion of product line results.

Segment income increased in the first quarter of 2005 primarily as a result of higher product pricing and shipments noted above. These product pricing improvements were partially offset by higher manufacturing costs. Manufacturing costs were higher as a result of higher prices for recycled fiber, energy, labor, and chemicals (\$11.6 million) and a stronger Canadian dollar (\$2.6 million), partially offset by improved wood costs (\$1.0 million).

			 \$ 13.0

**Three months ended March 31, 2005, versus March 31, 2004**

Sales increased in the first quarter of 2005 as compared to the first quarter of 2004 primarily as a result of increased product pricing in coated and specialty papers (\$24.0 million), newsprint (\$3.3 million) and market pulp (\$9.7 million), partially offset by lower shipments of pulp (\$11.4 million). See the previous discussion of product line results.

Segment income increased in the first quarter of 2005 as compared to the first quarter of 2004 primarily as a result of higher product pricing as discussed above, offset in part by higher manufacturing costs including higher costs (\$11.1 million) for wood, fuel, chemicals, electricity and labor costs, a stronger Canadian dollar (\$8.2 million) and repair materials associated with the first quarter maintenance outage at our Catawba facility. These increased manufacturing costs were offset by lower depreciation expense (\$3.5 million).

Significant items that increased (decreased) segment income (loss):

Product pricing	\$ 34.8
Distribution costs	(2.4)
Manufacturing costs	(8.5)
Selling and administrative expenses	(1.0)
	\$ 22.9

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Three months ended March 31, 2005, versus March 31, 2004**

Sales increased in the first quarter of 2005 as compared to the first quarter of 2004 as a result of higher product pricing for newsprint (\$10.0 million), coated and specialty papers (\$8.6 million), lumber (\$15.4 million), and timber (\$0.7 million) and higher shipments. See the previous discussion of product line results.

Segment income increased in the first quarter of 2005 as compared to the first quarter of 2004 primarily as a result of higher product pricing as discussed above. These improvements were offset by higher manufacturing costs and higher distribution costs. The higher manufacturing costs were due to a stronger Canadian dollar (\$13.4 million) and higher wood costs (\$5.7 million), partially offset by improved volumes (\$5.9 million), lower power (\$0.5 million), lower fuel (\$1.6 million), lower repair materials (\$1.0 million) and lower labor costs (\$0.8 million).

**Net Gain on Fixed Assets and Land Sales and Corporate & Other Eliminations**

Net gain (loss) on fixed assets and land sales and corporate and other eliminations are included in order to reconcile division sales and segment income (loss) to our total sales and operating income (loss) on our Consolidated Statement of Operations.

<i>(In millions)</i>	<b>Three Months Ended</b>		
	<b>March 31,</b>		
	<b>2005</b>	2004	Change
Net gain (loss) on fixed assets and land sales	<b>\$ 11.0</b>	\$ (0.9)	\$ 11.9
Corporate & other eliminations:			
Sales	<b>(14.1)</b>	(0.9)	(13.2)
Segment income	<b>11.9</b>	14.0	(2.1)

**Net gain on fixed assets and land sales:** During the three months ended March 31, 2005, Bowater recorded a net pre-tax gain of \$11.0 million related primarily to the sale of approximately 3,700 acres of land and gains or losses on fixed assets. During the three months ended March 31, 2004, Bowater recorded a net pre-tax loss of \$0.9 million related to land sales and gains or losses on fixed assets. The increase is primarily due to higher land sales in 2005 compared to 2004.

**Corporate & other eliminations:** The elimination of intersegment sales increased \$13.2 million in the first quarter of 2005 versus the same period in 2004. Corporate income decreased \$2.1 million in the first quarter of 2005 over the same period in 2004 due primarily to decreased gains on foreign currency hedges.

**Interest and Other Income and Expenses**

Interest expense increased \$2.0 million from \$48.2 million for the first quarter of 2004 to \$50.2 million for the first quarter of 2005. This increase in both periods is primarily attributable to higher average debt balances and higher interest rates.

Other income increased \$3.0 million from \$1.2 million during the first quarter of 2004 to \$4.2 million during the first quarter of 2005 primarily as a result of an increases in foreign currency exchange gains (\$1.9 million), income from joint ventures (\$0.6 million) and other miscellaneous income (\$0.5 million) during the period. Bowater recorded a foreign exchange gain of \$1.5 million during the first quarter of 2005 compared to a loss of \$0.4 million for the same period of 2004. The majority of our exchange gain/loss amounts are attributable to the revaluation of unhedged foreign denominated assets and liabilities into United States dollars. For a further discussion of the effect of fluctuations in the Canadian U.S. Dollar exchange rates, see Canadian U.S. Dollar Exchange Rate Fluctuation Effect on Earnings.

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Income Taxes**

Bowater's effective tax rate for the first quarter of 2005 was 96.3% versus 48.8% for the first quarter of 2004. Our effective tax rate varies frequently and substantially from the weighted-average effect of both domestic and foreign statutory tax rates primarily as a result of special tax treatment on foreign currency gains and losses. We have a number of foreign subsidiaries whose unconsolidated foreign currency gains and losses are taxed locally. On consolidation, a portion of such gains and losses are eliminated but we are still impacted by the foreign taxes on such items. The rate for the first quarter of 2005 was impacted by certain foreign currency exchange gains on which Bowater provides no tax expense. The rates in both 2005 and 2004 were also influenced by permanent tax differences that are not dependent on pre-tax income (loss).

Due to the variability and volatility of foreign exchange rates we are unable to estimate the impact of future changes in exchange rates on our effective tax rate.

**Liquidity and Capital Resources**

The primary components of our cash flows are as follows:

<i>(In millions)</i>	<b>Three Months Ended March 31,</b>	
	<b>2005</b>	<b>2004</b>
<b>Increase in cash and cash equivalents</b>	<b>\$ 17.6</b>	<b>\$ 16.2</b>
<b>Cash from (used for) operations</b>	<b>19.9</b>	<b>(21.0)</b>

<b>Cash from financing activities</b>	<b>10.4</b>	<b>54.5</b>

Short-term financing, net	<b>23.0</b>	(80.5)
Long-term financing, net	<b>(3.1)</b>	143.6
Dividends	<b>(11.4)</b>	(11.5)

**Cash From Operations**

Cash generated from operations increased \$40.9 million from the first quarter of 2004 to the first quarter of 2005, due primarily to lower cash losses from operations. The lower cash losses in the first quarter of 2005 were

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

primarily the result of higher product pricing and increased production volumes, partially offset by higher manufacturing costs and lower shipments. See discussion of manufacturing costs, distribution costs and product pricing in the Product Line Information and Divisional Performance sections of our Management's Discussion and Analysis.

Working capital in the first quarter of 2005 was negatively impacted by an increase in accounts receivable primarily from higher pricing and timing of collection of our receivables and higher inventory levels to support export markets. These working capital changes were partially offset by an increase in accounts payable and accrued liabilities primarily due to the timing of payments and income tax refunds received. Working capital in 2004 was negatively impacted by an increase in accounts receivable primarily from higher pricing and timing of collection of our receivables, higher inventory levels in our specialty paper and lumber product lines, and reductions in our income taxes payable. These working capital changes were partially offset by an increase in accounts payable and accrued liabilities primarily due to the timing of payments.

**Cash Used for Investing Activities**

Cash used for investing activities totaled \$12.7 million and \$17.3 million for the first three months of 2005 and 2004, respectively. The decrease in cash used for investing activities during the first three months of 2005 is due primarily to increased proceeds from land sales, offset partially by increased capital expenditures. For 2005, capital expenditures primarily have been, and will continue to be, for compliance and maintenance requirements. We expect capital expenditures to be approximately \$170 million in 2005. This level of capital expenditures excludes capital requirements for the conversion opportunities discussed in the Outlook section on page 17 of this report.

**Cash From Financing Activities**

Cash generated from financing activities totaled \$10.4 million and \$54.5 million for the first three months of 2005 and 2004, respectively. Bowater paid cash dividends of \$11.4 million and increased its net short term borrowings by \$23.0 million in the first three months of 2005.

Cash generated from financing activities in the first three months of 2004 includes the sale of \$250.0 million of registered notes that are due March 15, 2010. We received net proceeds from the notes of \$246.2 million which were used to pay amounts outstanding under the short-term bank debt credit facilities (\$146.2 million) and the three-year term loan (\$100.0 million). Bowater paid cash dividends of \$11.5 million in the first three months of 2004.

We intend to continue the payment of a quarterly dividend in 2005 at a quarterly dividend rate of \$0.20 per share. This dividend equates to a use of cash of approximately \$46 million annually.

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Credit Arrangements:**

As of March 31, 2005, Bowater had available borrowings on our short-term bank debt credit facilities as follows:

Short-Term Bank Debt	Commitment	Amount	Commitment	Termination	Weighted
	Outstanding	Outstanding	Available <sup>(1)</sup>	Date	Average
	<i>(in millions except for dates and interest rates)</i>				Interest
					Rate
Revolving credit facility <sup>(2)</sup>	\$ 435.0	\$	\$ 342.7	04/07	%
364-day Accounts Receivable Securitization Arrangement <sup>(3)</sup>	200.0	96.0	79.0	12/05	2.81%
	\$ 635.0	\$ 96.0	\$ 421.7		

(1) The commitment available under the Revolving credit facility is subject to covenant restrictions described on pages 28-29 of this Form 10-Q and is reduced by outstanding letters of credit of \$92.3 million.

(2) Borrowings under the revolving credit facility incur interest based, at our option, on specified market interest rates plus a margin tied to the credit rating of our long-term debt.

(3) The amount that can be borrowed at any time under our 364-day accounts receivables securitization arrangement depends on the amount and nature of the accounts receivable. The interest rate is based on commercial paper issued by the lenders plus a margin.

At the end of the quarter, we had ample room under the various financial covenant tests in our revolving credit facility. However, in April, to be conservative, we adjusted the financial covenant tests in our revolving credit facility. These various covenants, as amended, including requirements to maintain a minimum consolidated net worth (generally defined as common shareholders' equity, excluding hedging gains in place as of December 31, 2003, plus any outstanding preferred stock plus minimum pension liability amounts) of \$1.4 billion, a maximum 65.0% ratio of total debt to total capital (defined as total debt less revaluation of debt assumed through acquisitions, plus net worth including minority interest, plus minimum pension liability amounts), and to maintain an annual minimum EBITDA (generally defined as net income, excluding extraordinary, non-recurring or non-cash items, plus income taxes plus depreciation plus net interest expense) of \$250.0 million measured quarterly beginning March 31, 2005, through December 31, 2005 and \$400.0 million at the end of each quarter thereafter. If we generate net income, the minimum net worth requirement increases by half of our consolidated net income for each fiscal quarter, excluding gains from cash flow hedges in place as of December 31, 2003. At March 31, 2005, our consolidated net worth was approximately \$1,585.4 million, and, calculated in accordance with our credit facility's guidelines, our ratio of total debt to total capital was 59.8% and our trailing-twelve-months EBITDA was \$435.4 million.

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following tables reconcile EBITDA and debt as a percentage of total capitalization, as calculated according to our credit facility's guidelines, to our financial statements. We use these measures, and believe they are useful because of their relevance to our credit facility. The following table reconciles EBITDA as calculated according to our credit facility's guidelines to the line on our Consolidated Statement of Operations entitled "Net income (loss)":

<i>(Unaudited, in millions)</i>	Quarters Ended				Rolling
	6/30/2004	9/30/2004	12/31/2004	3/31/2005	4 Qtrs
Net income (loss)	\$ (1.3)	\$ (18.1)	\$ (35.2)	\$ 0.9	\$ (53.7)
Provision for income tax expense (benefit)	(22.9)	12.0	(10.1)	(7.8)	(28.8)
Depreciation, amortization and cost of timber harvested	84.9	83.0	81.1	81.8	330.8
Interest expense, net of capitalized interest	49.9	48.4	48.8	50.2	197.3
Interest income	(1.1)	(1.1)	(1.0)	(1.1)	(4.3)
<b>EBITDA</b>	<b>\$ 109.5</b>	<b>\$ 124.2</b>	<b>\$ 83.6</b>	<b>\$ 124.0</b>	<b>\$ 441.3</b>
Adjustments:					
Severance			8.7		8.7
Minority interest in net income (loss) of subsidiaries	(1.0)	0.8	(3.3)	(1.2)	(4.7)
Foreign exchange (gain) loss	(1.7)	1.2	(2.9)	(1.5)	(4.9)
Income from joint venture	(1.4)	(1.7)	(1.2)	(0.7)	(5.0)
	(4.1)	0.3	1.3	(3.4)	(5.9)
<b>EBITDA, as calculated according to our credit facility's guidelines</b>	<b>\$ 105.4</b>	<b>\$ 124.5</b>	<b>\$ 84.9</b>	<b>\$ 120.6</b>	<b>\$ 435.4</b>

A reconciliation of the GAAP items to the calculation of total debt as a percentage of total capitalization, in accordance with our credit facility, is as follows:

(in millions, except ratios)	March 31, 2005
Total debt	\$ 2,531.7
Less: Revaluation of debt	(74.6)
<b>Total debt, per credit facilities</b>	<b>\$ 2,457.1</b>

Capitalization:	
Total shareholders' equity	\$ 1,472.6
Total debt	2,531.7
Minority interest	67.1
Less: Revaluation of debt	(74.6)
Plus: Additional minimum pension liability	112.8
 Total capitalization, per credit facilities	 \$ 4,109.6
 Total debt as a percentage of total capitalization in accordance with credit facilities	 59.8%
 Total debt as a percentage of total capitalization, in accordance with GAAP	 62.2%

We believe we are in compliance with all of our covenants and other requirements set forth in our credit facilities.

We believe that cash generated from operations and access to our credit facilities will be sufficient to provide for our anticipated requirements for working capital, contractual obligations and capital expenditures for the next 12 months. In addition, we periodically review timberland holdings and sell timberlands.

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

In April 2005, Moody's and S&P affirmed Bowater's credit ratings of Ba3 with a negative outlook and BB with a stable outlook, respectively. There is no way to predict with certainty any future rating actions by these two agencies. The interest rates associated with the bank lines of credit described above are based on Bowater's highest credit rating. Any reduction in the highest rating will increase our cost of borrowing. In addition to higher interest rates, although further downgrades would have no material impact on availability under our present debt and credit agreements, it could impact our access to and cost of capital and financial flexibility in the future.

**Employees**

As of March 31, 2005, Bowater employed 8,000 people, of whom 5,600 were represented by bargaining units. Labor agreements covering approximately 2,200 employees at five of our six Canadian paper mills expired on April 30, 2004. These employees are represented predominantly by the Communications, Energy and Paper Union (CEP). The CEP negotiated with Abitibi Consolidated Inc. as the target company for the region and they reached a five-year collective bargaining agreement, which was ratified on July 16, 2004. Traditionally, agreements reached with the target company have been the basis for other agreements in the region. The Company has completed negotiations at the local mill level and has begun negotiations on the main economic issues at the group level. The union recently announced that a strike vote has been taken. The results of the strike vote have not yet been announced. Strike votes are not uncommon and do not necessarily reflect that a strike will occur. At the Company's request, the negotiations adjourned the week of April 18, 2005 to allow both sides to review current positions and progress achieved thus far. We expect negotiations to resume later this quarter.

During the first quarter of 2005, labor agreements covering approximately 150 employees at 3 of our sawmills expired. In April 2005, a labor agreement covering approximately 200 employees at our Donnacona facility expired. The wage portion of the labor agreement covering approximately 150 employees at our Mokpo, Korea facility expires in July 2005.

While we consider relations with our employees to be good and we do not expect a work stoppage to occur prior to the finalization of new labor agreements, we can provide no assurance regarding these outcomes or the timing of these negotiations or their effect on our operations.

**Canadian-U.S. Dollar Exchange Rate Fluctuation Effect on Earnings**

Nearly half of our manufacturing costs and certain financial liabilities are denominated in Canadian dollars. Sales are denominated in the currency of the country in which they occur. Accordingly, changes in the Canadian-U.S. dollar exchange rate may significantly impact our revenues and costs. The magnitude and direction of this impact primarily depends on our production and sales volume, the proportion of our production and sales that occur in Canada, the proportion of our tax and other financial liabilities denominated in Canadian dollars, our hedging levels, and the magnitude, direction and duration of changes in the Canadian-U.S. dollar exchange rate. Increases in the value of the Canadian dollar versus the U.S. dollar reduce our earnings, which are reported in U.S. dollar terms.

We attempt to partially limit our exposure to Canadian-U.S. dollar exchange rate fluctuations through hedging transactions. At March 31, 2005 we had \$561 million of Canadian dollar contracts outstanding, however, we are not currently entering into new hedging agreements. Under the exchange rates, hedging levels and operating conditions that existed during the three months ended March 31, 2005, for every one-cent change in the Canadian-U.S. dollar exchange rate, our operating income, net of hedging, for the three months ended March 31, 2005 would have been impacted by approximately \$1.6 million, or approximately \$7.0 million for the full year 2005. For a description of our

hedging activities, see Note 9 to the Notes to Consolidated Financial Statements included in this quarterly report.

**Canadian Dollar Hedging Program**

At March 31, 2005, we had approximately \$81.4 million of unrealized gains recorded on our Canadian dollar hedging program compared to approximately \$123.0 million of unrealized gains at December 31, 2004. These

**BOWATER INCORPORATED AND SUBSIDIARIES**  
**Management's Discussion and Analysis of Financial Condition and Results of Operations**

unrealized gains are classified in "Other current assets" or "Other assets" in our Consolidated Balance Sheet depending on the maturity date of the hedging contract.

**Recent Accounting Pronouncements**

In December 2004, the FASB issued SFAS 123(R), "Share-Based Payment", which requires the measurement of all employee share-based payments to employees, including grants of employee stock options, using a fair-value-based method and the recording of such expense in our consolidated statements of income. In April 2005, the S.E.C. announced a delay in the effective date of SFAS 123R. Therefore, the accounting provisions of SFAS 123R are effective for annual reporting periods beginning after June 15, 2005. The pro forma disclosures previously permitted under SFAS 123 no longer will be an alternative to financial statement recognition. We are required to adopt SFAS 123R in the first quarter of 2006 and are currently evaluating the effect that the adoption of FASB 123R will have on our financial position and results of operation.

In December 2004, the FASB issued FASB Staff Position No. FAS 109-1 ("FAS 109-1"), "Application of FASB Statement No. 109, Accounting for Income Taxes, to the Tax Deduction on Qualified Production Activities provided by the American Jobs Creation Act of 2004." The American Jobs Creation Act (AJCA) introduces a special 9% tax deduction (when fully phased in) on qualified production activities. FAS 109-1 clarifies that this tax deduction should be accounted for as a special tax deduction in accordance with Statement 109. Bowater's evaluation of the AJCA with respect to the additional deduction is still in process and it expects to complete the evaluation process by the end of the third quarter of 2005. The range of reasonably possible amounts of the additional deduction that are still being considered as a result of this provision cannot be reasonably determined as yet.

In December 2004, the FASB issued FASB Staff Position No. FAS 109-2 ("FAS 109-2"), "Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision within the American Jobs Creations Act of 2004." The AJCA introduces a limited time 85% dividends received deduction on the repatriation of certain foreign earnings to a U.S. taxpayer (repatriation provision), provided certain criteria are met. FAS109-2 provides accounting and disclosure guidance for the repatriation provision. Although FAS 109-2 is effective immediately, we do not expect to be able to complete our evaluation of the repatriation provision until after Congress or the Treasury Department provides additional clarifying language on key elements of the provision. In January 2005, the Treasury Department began to issue the first of a series of clarifying guidance documents related to this provision. We expect to complete our evaluation of the effects of the repatriation provision in the third quarter of 2005.

In November 2004, the FASB issued SFAS 151, "Inventory Costs, an amendment of ARB No. 43, Chapter 4," which clarifies the types of costs that should be expensed rather than capitalized as inventory. This statement also clarifies the circumstances under which fixed overhead costs associated with operating facilities involved in inventory processing should be capitalized. The provisions of SFAS No. 151 are effective for fiscal years beginning after June 15, 2005 and we will adopt this standard in 2006. We have not yet evaluated the effect that the adoption of SFAS 151 will have on our financial position or results of operations.

## **BOWATER INCORPORATED AND SUBSIDIARIES**

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

#### **Foreign Exchange Risk**

We have updated the disclosure concerning our Canadian dollar forward contracts, which is included in Note 9 to the Notes to Consolidated Financial Statements included in this quarterly report. For information about the effect of Canadian-U.S. dollar exchange rate fluctuations on our manufacturing costs and Canadian dollar denominated liabilities, see the section entitled Canadian-U.S. Dollar Exchange Rate Fluctuation Effect on Earnings.

#### **Interest Rate Risk**

We are exposed to interest rate risk on our fixed-rate long-term debt and our short-term variable rate bank and long-term debt. Our objective is to manage the impact of interest rate changes on earnings and cash flows and on the market value of our borrowings. We maintain a mix of fixed rate and variable rate borrowings. At March 31, 2005, we had \$2,152.2 million of fixed rate long-term debt and \$379.5 million of short and long-term variable rate debt. The fixed rate long-term debt is exposed to fluctuations in fair value resulting from changes in market interest rates, but not earnings or cash flows. Our variable rate debt approximates fair value as it bears interest rates that approximate market, but changes in interest rates do affect future earnings and cash flows. Based on our short and long-term variable rate debt at March 31, 2005, of \$379.5 million, a 100 basis point increase in interest rates would increase our quarterly interest expense by approximately \$1.0 million.

#### **Commodity Price Risk**

We purchase significant amounts of energy, chemicals, wood fiber and recovered paper to supply our manufacturing facilities. These raw materials are market-priced commodities and, as such, are subject to fluctuations in market prices. Increases in the prices of these commodities will tend to reduce our reported earnings and decreases will tend to increase our reported earnings. From time to time, we may enter into contracts aimed at securing a stable source of supply for commodities such as timber, wood fiber, energy, chemicals and recovered paper. These contracts typically require us to pay the market price at the time of purchase. Thus under these contracts we generally remain subject to market fluctuations in commodity prices.

### **Item 4. Controls and Procedures.**

#### **(a) Evaluation of Disclosure Controls and Procedures:**

We have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2005. Based on that evaluation, the Chairman, President and Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures are effective in recording, processing, summarizing, and timely reporting information required to be disclosed in our reports to the Securities and Exchange Commission.

#### **(b) Changes in Internal Control over Financial Reporting:**

In connection with the evaluation of internal control over financial reporting, there were no changes during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control

over financial reporting.

**BOWATER INCORPORATED AND SUBSIDIARIES**

**PART II**

**OTHER INFORMATION**

**Item 1. Legal Proceedings.**

- a.* Bowater is involved in various legal proceedings relating to contracts, commercial disputes, taxes, environmental issues, employment and workers compensation claims and other matters. We periodically review the status of these proceedings with both inside and outside counsel. We believe that the ultimate disposition of these matters will not have a material adverse effect on our financial condition, but it could have a material adverse effect on the results of operations in a given quarter or the year.
- b.* There have been no material developments to the legal proceedings described in our annual report on Form 10-K filed on March 16, 2005.

**Item 6. Exhibits**

(a) Exhibits (numbered in accordance with Item 601 of Regulation S-K):

Exhibit No.	Description
10.1	Outside Directors Stock-Based Deferred Fee Plan, effective as of May 11, 2005.
10.2	Fourth Amendment dated as of March 23, 2005 to the Bowater Incorporated Retirement Plan for Outside Directors as Amended and Restated February 26, 1999
10.3	Amendment No. 1 dated as of April 4, 2005, between Bowater Incorporated and Bowater Canadian Forest Products Inc. (as Borrowers) and JPMorgan Chase Bank, The Bank of Nova Scotia and certain lenders.
12.1	Statement regarding Computation of Ratio of Earnings to Fixed Charges.
31.1	Certification of CEO Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of CFO Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of CEO Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of CFO Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) Reports on Form 8-K:

On March 24, 2005, the Company furnished a report on Form 8-K announcing its adoption of an Outside Directors Stock-Based Deferred Fee Plan, under Item 1.

On January 27, 2005, the Company furnished a report on Form 8-K announcing its earnings for the fourth quarter of 2004 and for the year ended December 31, 2004, under items 2 and 9.

On January 18, 2005, the Company furnished a report on Form 8-K announcing the date for release of fourth quarter and full-year 2004 financial results, under items 2 and 9.
