CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained herein constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to future financial or business performance, strategies or expectations. Forward-looking statements which are based on various assumptions (some of which are beyond the Company's control) may be identified by reference to a future period or periods, or by the use of forward-looking terminology, such as "believe," "expect," "anticipate," "intend," "estimate," "sustain," "seek," "position," "target," "mission," "assume," "achievable," "potential," "comfortable," "current," "strategy," "goal," "objective," "plan," "aspiration," "outlook," "outcome," "continue," "remain," "opportunity," "maintain," "strive," "trend," and variations of such words and similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "may," or similar terms or variations on those terms, or the negative of those terms.

Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance. In addition to factors previously disclosed in Anthracite Capital, Inc.'s (the "Company") Securities and Exchange Commission ("SEC") reports and those identified elsewhere in this report, the following factors, among others, could cause actual results to differ materially from forward-looking statements or historical performance: (1) the introduction, withdrawal, success and timing of business initiatives and strategies; (2) changes in political, economic or industry conditions, the interest rate environment or financial and capital markets, which could result in changes in the value of the Company's assets; (3) the performance and operations of the Company's manager, BlackRock Financial Management, Inc. (the "Manager"); (4) the impact of increased competition; (5) the impact of capital improvement projects; (6) the impact of future acquisitions; (7) the unfavorable resolution of legal proceedings; (8) the extent and timing of any share repurchases; (9) the impact, extent and timing of technological changes and the adequacy of intellectual property protection; (10) the impact of legislative and regulatory actions and reforms and regulatory, supervisory or enforcement actions of government agencies relating to the Company, the Manager or PNC Bank, National Association; (11) terrorist activities and international hostilities, which may adversely affect the general economy, financial and capital markets, the real estate industry and the Company and the Manager; and (12) the ability of the Manager to attract and retain highly talented professionals. Forward-looking statements speak only as of the date they are made. The Company does not undertake, and specifically disclaims any obligation, to publicly release the result of any revisions which may be made to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

The Company's Annual Report on Form 10-K for the year ended December 31, 2002 and the Company's subsequent reports filed with the SEC, accessible on the SEC's website at <http://www.sec.gov> and on the Company's website at <http://www.anthracitecapital.com>, discuss these factors in more detail and identify additional factors that can affect forward-looking statements.

Anthracite Capital, Inc. and Subsidiaries
 Notes to Consolidated Financial Statements (Unaudited)
 (In thousands, except per shares and share data)

Note 1 ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Anthracite Capital, Inc. (the "Company"), a Maryland corporation, is a real estate finance company that generates income based on the spread between the interest income on its mortgage loans and securities investments and the interest expense from borrowings used to finance its investments. The Company seeks to earn high returns on a risk-adjusted basis to support a consistent quarterly dividend. The Company has elected to be taxed as a Real Estate Investment Trust ("REIT") under the Internal Revenue Code of 1986 and, therefore, its income is largely exempt from corporate taxation. The Company commenced operations on March 24, 1998.

The Company's business focuses on (i) investing in below investment grade CMBS where the Company has the right to control the foreclosure/workout process on the underlying loans, (ii) originating high yield commercial real estate loans, and (iii) acquiring investment grade real estate related securities as a liquidity diversification.

The accompanying unaudited consolidated financial statements have been prepared in conformity with the instructions to Form 10-Q and Article 10, Rule 10-01 of Regulation S-X for interim financial statements. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America ("GAAP") for complete financial statements. These consolidated financial statements should be read in conjunction with the annual consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for 2002 filed with the Securities and Exchange Commission.

In the opinion of the Company's management, the accompanying consolidated financial statements contain all adjustments, consisting of normal and recurring accruals (except for the cumulative transition adjustment for SFAS 142 in the first quarter of 2002 - see Note 2 of the consolidated financial statements), necessary for a fair presentation of the results for the interim periods. Operating results for interim periods are not necessarily indicative of the results that may be expected for the entire year.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the statements of financial condition and operations for the periods

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

covered. Actual results could differ from those estimates and assumptions. Significant estimates in the consolidated financial statements include the valuation of certain of the Company's mortgage-backed securities and certain other investments.

Note 2 ACCOUNTING CHANGE - BUSINESS COMBINATIONS

In July 2001, the Financial Accounting Standards Board ("FASB") issued Statements of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations," and No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142"). These standards changed the accounting for business combinations by,

8

among other things, prohibiting the prospective use of pooling-of-interests accounting and requiring companies to stop amortizing goodwill and certain intangible assets with an indefinite useful life. Instead, goodwill and intangible assets deemed to have an indefinite useful life will be subject to an annual review for impairment. The new standards generally were effective for the Company in the first quarter of 2002. Upon adoption of SFAS 142 in the first quarter of 2002, the Company recorded a one-time, non-cash adjustment of approximately \$6,327 to write off the unamortized balance of its negative goodwill. Such charge is non-operational in nature and is reflected as a cumulative transition adjustment in the accompanying consolidated statement of operations.

In January of 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities". This Interpretation clarifies the application of existing accounting pronouncements to certain entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The provisions of the Interpretation will be immediately effective for all variable interests in variable interest entities created after January 31, 2003, and the Company will need to apply its provisions to any existing variable interests in variable interest entities by no later than the third quarter of 2003. The Company believes that it does not hold any investments in entities that will be deemed variable interest entities; however, until the Company completes its evaluation it cannot make any definitive conclusion what effect if any that the implementation of this Interpretation will have on the Company's consolidated financial statements.

In April 2003, the FASB issued SFAS No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities" ("SFAS 149"). SFAS 149 amends and clarifies the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities." SFAS 149 is generally effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. The Company's adoption of SFAS 149 on July 1, 2003, as required, had no impact on the Company's consolidated financial statements.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity." SFAS No. 150 addresses the standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity and requires the issuer to classify a financial instrument that is within its scope as a liability (or asset in some circumstances). SFAS No. 150 became effective for all instruments issued after May 1, 2003 and is required to be

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

applied to all financial instruments as of the beginning of the first interim or annual reporting period beginning after June 15, 2003. The adoption of this statement did not have a material impact on the Company's financial statements.

9

Note 3 NET INCOME PER SHARE

Net income per share is computed in accordance with SFAS No. 128, "Earnings Per Share." Basic income per share is calculated by dividing net (loss) income to common stockholders by the weighted average number of common shares outstanding during the period. Diluted income per share is calculated using the weighted average number of common shares outstanding during the period plus the additional dilutive effect of common stock equivalents. The dilutive effect of outstanding stock options is calculated using the treasury stock method, and the dilutive effect of preferred stock is calculated using the "if converted" method.

Note 4 SECURITIES AVAILABLE FOR SALE

The Company's securities available for sale are carried at estimated fair value. The amortized cost and estimated fair value of securities available for sale as of June 30, 2003 are summarized as follows:

Security Description	Amortized Cost	Gross Unrealized Gain

CMBS:		
CMBS IOs	\$ 38,251	\$ 2,546
Investment grade CMBS	173,189	7,867
Non-investment grade rated subordinated securities	714,724	23,228
Non-rated subordinated securities	19,227	3,659
Credit tenant lease	8,973	342
Investment grade REIT debt	207,104	21,711
	-----	-----
Total CMBS	1,161,468	59,353
	-----	-----
Single-family residential mortgage-backed securities:		
Agency adjustable rate securities	36,303	410
Agency fixed rate securities	797,499	3,293
Residential CMOs	8,082	183
Hybrid Arms	10,770	84
	-----	-----
Total RMBS	852,654	3,970
	-----	-----
Total securities available for sale	\$ 2,014,122	\$ 63,323
	=====	=====

As of June 30, 2003, an aggregate of \$1,821,471 in estimated fair value of the Company's securities available for sale was pledged to secure its collateralized borrowings.

As of June 30, 2003, the anticipated weighted average yield to maturity based upon the amortized cost of the subordinated CMBS ("Reported Yield") was 9.6% per annum. The anticipated Reported Yield of the Company's investment grade

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

securities available for sale was 4.7%. The Company's Reported Yields on its subordinated CMBS and investment grade securities available for sale are based upon a number of assumptions that are subject to certain business and economic uncertainties and contingencies. Examples of these include, among other things, the rate and timing of principal payments (including prepayments, repurchases, defaults, and liquidations), the pass-through or coupon rate, and interest rate fluctuations. Additional factors that may affect the Company's anticipated yields to maturity on its subordinated CMBS include interest payment shortfalls due to delinquencies on the underlying mortgage loans, and the timing and magnitude of credit losses on the mortgage loans underlying the subordinated CMBS that are a result of the general condition of the real estate market (including competition for tenants and their related credit quality) and changes in market rental rates. As these uncertainties and contingencies are difficult to predict and are subject to future events which may alter these assumptions, no assurance can be given that the anticipated yields to maturity, discussed above and elsewhere, will be achieved.

11

The Company performed an analysis of its current underlying loan loss expectations and credit performance of its 1998 vintage CMBS in which it maintains the right to control the foreclosure/workout process on the underlying loans ("Controlling Class CMBS"). The Company increased expected underlying loan loss expectations on four securities from three 1998 vintage CMBS transactions. As a result of the increase in loss expectations, the Company recorded an impairment charge of \$27,014 during the second quarter of 2003, to reduce the amortized cost of these securities to their fair value, as required by Emerging Issue Task Force standard 99-20, "Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets" ("EITF 99-20"). Three of the four impaired securities are not rated and the fourth security is rated CCC by Fitch Ratings. Securities which are not rated are highly sensitive to changes in the timing of losses recognized on the underlying loans. Even though actual losses recognized on the underlying loans to date are still significantly less than original estimates, the Company believes that losses in 2003 will continue to rise due to weak conditions in many commercial real estate markets. The Company believes it was appropriate to increase the total amount of expected losses of these transactions.

The \$27,014 impairment charge is comprised of \$19,217 (\$0.40 per share) related to the non-rated and CCC rated classes of CMAC 98-C2, \$5,573 (\$0.12 per share) related to LBCMT 98-C1, and \$2,224 (\$0.05 per share) related to GMAC 98-C1.

12

The Company monitors credit performance on a monthly basis and debt service coverage ratios on a quarterly basis. Using these and other statistics, the Company maintains watch lists for loans that are delinquent thirty days or more and for loans that are not delinquent but have issues that the Company believes require close monitoring.

The following table sets forth certain information relating to the aggregate principal balance and payment status of delinquent mortgage loans underlying the subordinated CMBS held by the Company as of June 30, 2003:

	Principal	Number of Loans
Past due 30 days to 60 days	\$ 14,712	4
Past due 60 days to 90 days	11,978	3
Past due 90 days or more	139,340	17
Real estate owned ("REO")	20,903	5
Total delinquent	186,933	29
Total principal balance	\$10,117,191*	2,007

*net of defeased loans

To the extent that the Company's expectation of realized losses on individual loans supporting the CMBS or resolutions differ significantly from the Company's original loss estimates, it may be

13

necessary to reduce the projected Reported Yield on the applicable CMBS investment to better reflect such investment's expected earnings net of expected losses, and write the investment down to its fair value. While realized losses on individual loans may be higher or lower than original estimates, the Company believes its revised loss estimates and Reported Yields are appropriate on all investments.

Note 5 SECURITIES HELD FOR TRADING

Securities held for trading reflect investments that the Company may make for short periods of time. The Company may acquire long or short positions in U.S. Treasury or agency securities, forward commitments to purchase such securities, financial futures contracts and other fixed income or fixed income derivative securities.

The Company's securities held for trading are carried at estimated fair value. At June 30, 2003, the Company's securities held for trading consisted of FNMA Hybrid ARM Mortgage Pools with an estimated fair value of \$34,901, and a forward commitment with an estimated fair value of (\$14,571). The FNMA Mortgage Pools, and the underlying mortgages, bear interest at fixed rates for specified periods, generally three to seven years, after which the rates are periodically reset to market.

For the three months ended June 30, 2003, losses on securities held for trading in the consolidated statements of operations of \$4,716 are largely attributable to a reduction in the Company's exposure to RMBS. The Company's longstanding policy has been to maintain limits on the exposure of the Company's equity to changes in long-term rates as well as the exposure of earnings to changes in short-term funding rates. The Company continues to reduce its reliance on RMBS as its need for a liquidity reserve continues to diminish.

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Note 6 COMMON STOCK

On March 6, 2003, the Company declared dividends to its common stockholders of \$0.35 per share, which were paid on April 30, 2003 to stockholders of record on March 31, 2003. For U.S. Federal income tax purposes, the dividends are expected to be ordinary income to the Company's stockholders.

On May 20, 2003, the Company declared dividends to its common stockholders of \$0.35 per share, which were paid on July 31, 2003 to stockholders of record on June 30, 2003. For U.S. Federal income tax purposes, the dividends are expected to be ordinary income to the Company's stockholders.

For the three and six months ended June 30, 2003, respectively, the Company issued 353,065 and 686,393 shares of common stock of the Company, par value \$0.001 per share (the "Common Stock") under its Dividend Reinvestment and Stock Purchase Plan. Net proceeds to the Company were approximately \$4,179 and \$7,697, respectively. For the three and six months ended June 30, 2002, respectively, the Company issued 302,655 and 821,968 shares of Common Stock under its Dividend Reinvestment and Stock Purchase Plan. Net proceeds to the Company were approximately \$3,459 and \$9,120, respectively.

14

In March 2002, the remaining 10,000 shares of the Company's 10.5% Series A Senior Cumulative Redeemable Preferred Stock ("Series A Preferred Stock") were converted to 34,427 shares of Common Stock at a price of \$7.26 per share in accordance with the terms of the Series A Preferred Stock.

Note 7 PREFERRED STOCK

On May 29, 2003, the Company authorized and issued 2,300,000 shares of 9.375% Series C Cumulative Redeemable Preferred Stock ("Series C Preferred Stock"), \$0.001 par value per share, including 300,000 shares of Series C Preferred Stock issued pursuant to an option granted to the underwriters to cover over-allotments. The Series C Preferred Stock is perpetual, carries a 9.375% coupon, and has a preference in liquidation of \$57,500. The aggregate net proceeds to the Company (after deducting underwriting fees and expenses) were approximately \$55,513.

On May 29, 2003, the Company redeemed 155,000 shares of the Company's 10% Series B Cumulative Convertible Redeemable Preferred Stock, par value \$0.001 per share (the "Series B Preferred Stock"), at its par value of \$25 per share.

Note 8 TRANSACTIONS WITH AFFILIATES

The Company has a Management Agreement with BlackRock Financial Management, Inc. (the "Manager"), a majority owned indirect subsidiary of The PNC Financial Services Group, Inc. ("PNC Bank") and the employer of certain directors and officers of the Company, under which the Manager manages the Company's day-to-day operations, subject to the direction and oversight of the Company's Board of Directors. On March 25, 2002, the Management Agreement was extended for one year through March 27, 2003, with the approval of the unaffiliated directors, on terms similar to the prior agreement with the following changes: (i) the incentive fee calculation would be based on earnings determined in accordance with GAAP instead of funds from operations, (ii) the removal of the four-year period to value the Management Agreement in the event of termination and (iii) subsequent renewal periods of the Management Agreement would be for one year instead of two years. The Board was

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

advised by Houlihan Lokey Howard & Zukin Financial Advisors, Inc., a national investment banking and financial advisory firm, in the renewal process.

On March 6, 2003, the unaffiliated directors approved an extension of the Management Agreement from its expiration of March 27, 2003 for one year through March 31, 2004. The terms of the renewed agreement are similar to the prior agreement except for the incentive fee calculation which would provide for a rolling four-quarter high watermark rather than a quarterly calculation. In determining the rolling four-quarter high watermark, the Company would calculate the incentive fee, as defined, based upon the current and prior three quarters' net income. The Manager would be paid an incentive fee in the current quarter if the Yearly Incentive Fee ("Yearly Incentive Fee") is greater than what was paid to the Manager in the prior three quarters cumulatively. The Company commenced the phase-in of the rolling four-quarter high watermark during the second quarter of 2003. Calculation of the incentive fee will be based on GAAP and adjusted to exclude special one-

15

time events pursuant to changes in GAAP accounting pronouncements after discussion between the Manager and the unaffiliated directors. The incentive fee threshold did not change. The high watermark will be based on the existing incentive fee hurdle, which provides for the Manager to be paid 25% of the amount of earnings (calculated in accordance with GAAP) per share that exceeds the product of the adjusted issue price of the Company's common stock per share (\$11.38 as of June 30, 2003) and the greater of 9.5% or 350 basis points over the ten-year Treasury note, which equates to an annual net income threshold of \$1.08 per share.

The Company pays the Manager an annual base management fee equal to a percentage of the average invested assets of the Company as defined in the Management Agreement. The base management fee is equal to 1% per annum of the average invested assets rated less than BB- or not rated, 0.75% of average invested assets rated BB- to BB+, and 0.20% of average invested assets rated above BB+. In order to coincide with the increased size of the Company, effective July 1, 2001, the Manager reduced the base management fee from 0.35% of average invested assets rated above BB+.

The Company incurred \$2,649 and \$5,226 in base management fees in accordance with the terms of the Management Agreement for the three and six months ended June 30, 2003, respectively, and \$2,278 and \$4,497 in base management fees for the three and six months ended June 30, 2002, respectively. In accordance with the provisions of the Management Agreement, the Company recorded reimbursements to the Manager of \$12 and \$18 for certain expenses incurred on behalf of the Company during the three and six months ended June 30, 2003, respectively, and \$6 and \$11 for the three and six months ended June 30, 2002, respectively.

Pursuant to the March 25, 2002 one-year Management Agreement extension, the incentive fee paid to the Manager was based on 25% of earnings (calculated in accordance with GAAP) of the Company. For purposes of calculating the incentive fee during 2002, the cumulative transition adjustment of \$6,327 resulting from the Company's adoption of SFAS 142 was excluded from earnings in its entirety and included using an amortization period of three years. The Company incurred \$3,188 in incentive fees for the six months ended June 30, 2002. There was no incentive fee due to the Manager for the three or six months ended June 30, 2003 and the three months ended June 30, 2002.

On March 17, 1999, the Company's Board of Directors approved an administration agreement with the Manager and the termination of a previous agreement with an unaffiliated third party. Under the terms of the administration agreement, the

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Manager provides financial reporting, audit coordination and accounting oversight services to the Company. The Company pays the Manager a monthly administrative fee at an annual rate of 0.06% of the first \$125 million of average net assets, 0.04% of the next \$125 million of average net assets and 0.03% of average net assets in excess of \$250 million subject to a minimum annual fee of \$120. For the three and six months ended June 30, 2003, the administration fee was \$43 and \$86, respectively. For the three and six months ended June 30, 2002, the administration fee was \$43 and \$86, respectively.

On July 20, 2001, the Company entered into a \$50 million commitment to acquire shares in Carbon Capital, Inc. ("Carbon"), a private commercial real estate income opportunity fund managed by the Manager. The period during which the Company may be required to purchase shares under the commitment expires in July 2004. On June 30, 2003, the Company owned 18.8% of the outstanding shares in Carbon. The Company's remaining commitment at June 30, 2003 and December 31,

16

2002 was \$32,436 and \$35,116, respectively. On February 6, 2003, the Company funded a capital call notice in the amount of \$2,680, which was used by Carbon to acquire a mezzanine loan secured by ownership interests in an entity that owns a mixed-use development.

On May 15, 2000, the Company completed the acquisition of CORE Cap, Inc. The merger was a stock for stock acquisition where the Company issued 4,180,552 shares of its Common Stock and 2,261,000 shares of its Series B Preferred Stock. At the time of the CORE Cap acquisition, the Manager agreed to pay GMAC (CORE Cap, Inc.'s external advisor) \$12,500 over a ten-year period (the "Installment Payment") to purchase the right to manage the assets under the existing management contract (the "GMAC Contract"). The GMAC Contract had to be terminated in order to allow for the Company to complete the merger, as the Company's Management Agreement with the Manager did not provide for multiple managers. As a result, the Manager offered to buy-out the GMAC Contract as the Manager estimated it would receive incremental fees above and beyond the Installment Payment, and thus was willing to pay for, and separately negotiate, the termination of the GMAC Contract. Accordingly, the value of the Installment Payment was not considered in the Company's allocation of its purchase price to the net assets acquired in the acquisition of CORE Cap, Inc. The Company agreed that should the Management Agreement with its Manager be terminated, not renewed or not extended for any reason other than for cause, the Company would pay to the Manager an amount equal to the Installment Payment less the sum of all payments made by the Manager to GMAC. As of June 30, 2003, the Installment Payment would be \$8,000 payable over seven years. The Company does not accrue for this contingent liability.

Note 9 BORROWINGS

Certain information with respect to the Company's collateralized borrowings at June 30, 2003 is summarized as follows:

	Lines of Credit and Term Loans	Reverse Repurchase Agreements	Collateralized Debt Obligations
Outstanding borrowings	\$35,824	\$993,152	\$684,778

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Weighted average borrowing rate	3.63%	1.10%	6.60%
Weighted average remaining maturity	552 days	18 days	3,217 days
Estimated fair value of assets pledged	\$127,859	\$1,062,852	\$774,257

As of June 30, 2003, the Company's collateralized borrowings had the following remaining maturities:

	Lines of Credit and Term Loans	Reverse Repurchase Agreements	Collateralized Debt Obligations
Within 30 days	\$ -	\$993,152	\$ -
31 to 59 days	-	-	-
Over 60 days	35,824	-	684,778
	=====	=====	=====
	\$35,824	\$993,152	\$684,778
	=====	=====	=====

17

Under the lines of credit and the reverse repurchase agreements, the respective lender retains the right to mark the underlying collateral to estimated market value. A reduction in the value of its pledged assets will require the Company to provide additional collateral or fund margin calls. From time to time, the Company expects that it will be required to provide such additional collateral or fund margin calls.

Note 10 DERIVATIVE INSTRUMENTS

SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended, establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts and for hedging activities. All derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, the effective portions of change in the fair value of the derivative are recorded in other comprehensive income ("OCI") and are recognized in the income statement when the hedged item affects earnings. Ineffective portions of changes in the fair value of cash flow hedges are recognized in earnings.

The Company uses interest rate swaps to manage exposure to variable cash flows on portions of its borrowings under reverse repurchase agreements and as trading derivatives intended to offset changes in fair value related to securities held as trading assets. On the date in which the derivative

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

contract is entered, the Company designates the derivative as either a cash flow hedge or a trading derivative.

As of June 30, 2003, the Company had interest rate swaps with notional amounts aggregating \$1,152,927 that were designated as cash flow hedges of borrowings under reverse repurchase agreements. Their aggregate fair value was a \$65,225 liability included in other liabilities on the consolidated statements of financial condition. For the six months ended June 30, 2003, the net change in the fair value of the interest rate swaps was a decrease of \$22,557, of which \$241 was deemed ineffective and is included as an increase of interest expense and \$22,316 was recorded as a reduction of OCI. As of June 30, 2003, the \$1,152,927 notional of swaps which were designated as cash flow hedges had a weighted average remaining term of 5.84 years.

During the three months ended June 30, 2003, the Company terminated one of its interest rate swaps with a notional amount of \$200,000 that was designated as a cash flow hedge of borrowings under reverse repurchase agreements. The Company will reclassify from OCI as an increase to interest expense the \$1,593 loss in value incurred, over 1.9 years, which was the remaining term of the swap at the time it was closed out. For the three months ended June 30, 2003, \$52 was reclassified as an increase to interest expense and \$212 will be reclassified as an increase to interest expense each quarter for the next 12 months.

As of June 30, 2003, the Company had two interest rate swaps with notional amounts aggregating \$171,545 designated as trading derivatives. These swaps exchange semi-annual interest payments from CDO collateral for monthly interest payments. Their aggregate fair value was approximately zero on the consolidated statements of financial condition. For the six months ended June 30, 2003, the change in fair

18

value for these trading derivatives was a decrease of \$540 and is included as an addition to loss on securities held for trading in the consolidated statements of operations. As of June 30, 2003, the \$171,545 notional of swaps which were designated as trading derivatives had a weighted average remaining term of 9.11 years.

Occasionally, counterparties will require the Company or the Company will require counterparties to provide collateral for the interest rate swap agreements in the form of margin deposits. Net deposits are recorded as a component of either other assets or other liabilities. Should the counterparty fail to return deposits paid, the Company would be at risk for the fair market value of that agreement. At June 30, 2003 and 2002, the balance of such net margin deposits owed to counterparties as collateral under these agreements totaled \$39,130 and \$1,610, respectively. The Company does not anticipate non-performance by any Counterparty.

The contracts identified in the remaining portion of this note have been entered into to limit the Company's mark to market exposure to long-term interest rates.

At June 30, 2003, the Company had outstanding short positions of 123 ten-year U.S. Treasury Note future contracts expiring in July 2003, which represented \$12,300 in face amount of U.S. Treasury Notes. The estimated fair value of these contracts was approximately \$(14,571) included in other assets at June 30, 2003, and the change in fair value related to these contracts is included as a component of loss on securities held for trading in the consolidated statements of operations.

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Note 11 SUBSEQUENT EVENTS

After the close of the three months ended June 30, 2003, the Company acquired \$62,111 of par of a 2003 vintage controlling-class CMBS transaction. \$20,000 of these securities will be used to complete the use of the ramp-up financing facility as part of the December 2002 CDO. Loss expectations from the underlying loans are estimated at 2.35%. The loss-adjusted yield on the securities rated B- and lower in aggregate is 11.36%. The non-rated and B-rated tranches of this transaction were purchased to yield an initial cash-on-cash return of 21.17% and 18.86%, respectively, and loss-adjusted yields of 9.00% and 14.42%, respectively. The coupon for these two securities is 5.11%.

On June 30, 2003, the Company's loan on a Los Angeles office building matured. Upon transfer of the asset securing the Los Angeles loan and pursuant to the loan documents, the Company was entitled to a supplemental exit fee that was to be paid upon repayment of the loan. The loan was repaid in full; however, the borrower has refused to pay the supplemental exit fee. The Company filed suit on July 15, 2003 against the co-borrowers, MP-555 West Fifth Mezzanine, LLC and MP-808 South Olive Mezzanine, LLC, which are both affiliates of Maguire Properties, Inc (NYSE: MPG). The suit also names the Guarantor, Robert F. Maguire, III.

19

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

All dollar figures are expressed in thousands, except share or per share amounts.

I. General

The Company's primary long-term objective is to distribute consistent dividends supported by earnings. Over the long term, the Company's earnings are primarily maintained by consistent credit performance on its commercial real estate investments, stability of the capital structure and reinvestment rates. Historically, the Company has not changed its dividend policy to follow quarterly earnings. The Company continues to believe that a dividend policy based on long-term earnings projections creates added shareholder value. Commercial real estate credit performance has been good. The recent impairment charge is expected to increase the likelihood that credit performance will remain consistent with or better than expectations. The capital structure of the Company improved during the quarter with the issuance of \$57,500 of Series C Preferred Stock. Recent sharp increases in interest rates create greater opportunity to deploy new capital at higher absolute yields. See "Item 3-Quantitative and Qualitative Disclosures about Market Risk" for a discussion of interest rates and their effect on earnings and book value.

In the second half of 2003, the Company expects to continue redeploying capital raised from the Series C Preferred Stock combined with additional equity capital raised from the Company's Dividend Reinvestment and Stock Purchase Plan. Issuing stock at a premium and investing in the new higher rate environment can lead to the accretion of both earnings and book value per share as well as to greater diversification of credit exposure.

The Company continues to maintain a positive, though controlled, exposure to both long- and short-term rates through its active hedging strategies. The

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Company also will continue to seek out the best long-term matched financing solutions to lock in attractive spreads on the Company's commercial real estate securities portfolio, which will likely be by way of another CDO transaction as the market continues to offer opportunities to issue cost-effective debt.

For the quarter ended June 30, 2003, the Company recorded a net loss of \$0.26 per share. For the quarter ended June 30, 2002, the Company recorded net income of \$0.25 per share.

The second quarter net loss includes a charge of \$0.56 per share which resulted from an increase in expected underlying loan losses on certain 1998 vintage CMBS assets. The increase in loss expectations triggered an impairment charge according to the Company's accounting policies and as required by the accounting standard EITF 99-20. Actual underlying loan losses recognized to date are still below original expectations, but the Company believes additional loss expectations are warranted. The increase in expected losses on these 1998 vintage CMBS assets will decrease the Company's income by approximately \$0.07 per share annually. The current value of the affected securities has been reflected in the March 31, 2003 and prior quarters' book values because these assets are held as "available for sale" and marked to market in "accumulated other comprehensive loss" on the balance sheet. Therefore, the majority of the impairment charge taken has been represented in the Company's book value based on historical market value changes.

20

Although the actual performance of the majority of the Company's credit sensitive portfolios remains consistent with or better than original expectations, the Company determined it is necessary and prudent in the current commercial real estate environment to increase underlying loan loss expectations and reduce the income attributable to certain transactions. In future periods, strong underlying loan collateral performance on these or other transactions may enable the Company to decrease loan loss expectations and increase interest income. The increase in investment in newer vintage CMBS and the reduction in RMBS exposure over the past quarter supports the Company's goal of stable earnings and dividends. While low interest rates in the second quarter provided a challenging environment for reinvestment, the Company was able to lower its cost of capital by issuing fixed rate redeemable preferred stock. The recent increase in long-term interest rates and credit spreads should provide more compelling investment opportunities to enable the Company to enhance the Company's earnings and support the dividend.

The Company's investment activities encompass three distinct lines of investments:

- 1) Commercial Real Estate Securities
- 2) Commercial Real Estate Loans
- 3) Residential Mortgage Backed Securities

The Company believes that these three investment activities represent an integrated strategy where each line of investment supports the others and creates value over and above operating each investment line in isolation. The commercial real estate securities portfolio represents broad exposure to commercial real estate lending and provides diversification and high yields that are adjusted for anticipated losses over a long period of time (typically, a ten year weighted average life). These securities can be financed through the issuance of secured debt that matches the life of the investment. Commercial real estate loans provide attractive risk adjusted returns over shorter periods of time (typically, a three to five year weighted

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

average life) through investments in loans secured by specific property types in specific regions. The RMBS portfolio is a highly liquid portfolio that supports the liquidity needs of the Company while typically earning attractive returns after hedging costs relative to other liquid investments. The RMBS sector can sometimes be very volatile, so the Company's allocation to this sector has been reduced to maintain stable earnings. The Company believes the risks of these portfolios are not always highly correlated and thus can serve to provide stable earnings over long periods of time.

The following table illustrates the change in the mix of the Company's three investment activities:

	Carrying Value as of			
	June 30, 2003		December 31, 2002	
	Amount	%	Amount	%
Commercial real estate securities	\$1,147,398	54.7%	\$894,345	36.1%
Commercial real estate loans(1)	63,400	3.0	73,929	3.0
Residential mortgage backed securities	888,878	42.3	1,506,450	60.9
Total	\$2,099,676	100.0%	\$2,474,724	100.0%

(1) Includes real estate joint ventures

21

Commercial Real Estate Securities Portfolio Activity

The Company continues to increase its investments in commercial real estate debt securities. Commercial real estate debt securities include CMBS and investment grade REIT debt. During the six months ended June 30, 2003, the Company increased total assets in this sector by 28% from \$894,345 to \$1,147,398.

The CMBS added during the six months ended June 30, 2003 includes \$47,804 par of 2003 vintage CMBS rated BB- through a non-rated tranche where the Company has the right to direct foreclosure on \$1,006,389 of underlying loans. The loss adjusted yield of the Controlling Class (CMBS rated BB- and lower) CMBS acquired during the six months ended June 30, 2003 is estimated to be 11.23%. In computing the loss adjusted yields, the Company assumed 2.30% of the principal of the underlying loans would result in losses over a weighted average of 8.6 years. The yield of these CMBS assuming there would not be any losses is 16.44%. This is the eighth Controlling Class trust the Company acquired since its inception, and it closed on March 14, 2003.

Included in the Company's December 10, 2002 collateralized debt obligation ("CDO II") was a ramp facility to fund the purchase of \$50,000 of par of below investment grade CMBS by September 30, 2003. The increase in commercial real estate securities for the six months ended June 30, 2003 includes \$30,000 of par of CMBS that was purchased with proceeds from the ramp facility. At June 30, 2003, the balance of the ramp facility permits another \$20,000 of par to

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

be contributed to CDO II; in August 2003, this ramp was fully utilized when the Company acquired \$62,111 of par of a 2003 vintage controlling class CMBS transaction. The total par of the underlying loans in this transaction is \$1,183,080; the underlying loan loss expectation is estimated at 2.35% and the loss-adjusted yield on the securities rated B- and lower in aggregate is 11.36%. The non-rated and B- rated tranches of this transaction were purchased to yield an initial cash-on-cash return of 21.17% and 18.86%, respectively, and loss-adjusted yields of 9.00% and 14.42%, respectively.

The following table details the par, fair market value, adjusted purchase price and loss adjusted yield of the Company's commercial real estate securities included in the two CDOs as of June 30, 2003:

	Par	Fair Market Value	Dollar Price	Adjusted Purchase Price	Do P
Investment grade CMBS	\$47,730	\$54,416	114.01	\$46,714	
Investment grade REIT debt	171,545	196,056	114.29	174,345	1
CMBS rated BB+ to B	610,264	492,486	80.70	497,581	
Whole Loans	8,980	9,315	103.73	8,973	
Total	\$838,519	\$752,273	89.71	\$727,613	

22

The following table details the par, fair market value, adjusted purchase price and loss adjusted yield of the Company's commercial real estate securities outside of the two CDOs as of June 30, 2003:

	Par	Fair Market Value	Dollar Price	Adjusted Purchase Price	D
Investment grade CMBS	\$ 118,377	\$121,846	102.93	\$123,239	
Investment grade REIT debt	30,000	32,237	107.46	32,759	
CMBS rated BB+ to B	162,736	119,319	73.32	134,176	
Sub-Total	311,113	273,402	87.88	290,174	
CMBS rated B- or lower	285,948	77,856	27.23	102,193	
CMBS IOs	894,396	40,479	4.53	38,252	
Whole Loans	4,000	3,388	84.69	3,236	
Total	\$1,495,457	\$395,125	26.42	\$433,855	

Below Investment Grade CMBS and Underlying Loan Performance

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

The Company divides its below investment grade CMBS investment activity into two portfolios: the eight Controlling Class CMBS and other below investment grade CMBS. The distinction between the two is in the Controlling Class rights. Controlling Class rights allow the Company to control the workout and/or disposition of defaults that occur in the underlying loans. The Controlling Class CMBS owned by the Company represents control over a loan portfolio of \$10,117,191 par. These loans are owned in the form of securities. This form of ownership does not alter the fact that the Company has full credit risk of the loan portfolio. The Company's risk process treats all of these loans as if owned directly. Credit loss expectations are made after careful underwriting of all loans in the pool. The Company's loss expectations on the entire underlying loan balance at June 30, 2003 is 2.21%; therefore, the Company expects that \$223,854 of the \$10,117,191 of underlying loans will not be recovered. Because the Company's loss expectations are conservative and therefore much greater than industry experience, the Company believes there is a greater likelihood of stable earnings.

The Company's other below investment grade CMBS have no rights to control the workout and/or disposition of underlying loan defaults, however they are not the first to absorb losses from defaulted loans in the underlying pools.

Impairment

The Company performed an analysis of its current underlying loan loss expectations and credit performance of all five of its 1998 vintage Controlling Class CMBS. The Company increased expected underlying loan loss expectations on four securities from three 1998 vintage CMBS transactions. As a result of the increase in loss expectations, the Company is incurring an impairment charge of \$27,014, as required by EITF 99-20. Three of the four impaired securities are not rated and the fourth security is rated CCC by Fitch Ratings. Securities which are not rated are highly sensitive to changes in the timing

23

of losses recognized on the underlying loans. Even though losses recognized on the underlying loans to date are still significantly less than original estimates, the Company believes that losses in 2003 will continue to rise due to weak conditions in many commercial real estate markets. The Company believes it was appropriate to increase the total amount of expected losses of these transactions. The Company's increased loss expectations do not affect the market value of the securities.

Loss expectations of the underlying loans for the 1998 vintage transactions prior to June 30, 2003 were \$127,080, or 1.71% of collateral outstanding, net of defeased loans. A defeased loan is a loan that has not paid off, but is fully collateralized by U.S. Treasury obligations. The Company's loss expectations for its 1998 vintage transactions now total \$158,292, or 2.13% of collateral outstanding, net of defeased loans. These loss expectation levels are consistent with the current loss estimates for transactions underwritten by the Company after 1998. As of June 30, 2003, the Company's loss expectations by vintage year are described in the following table. The Company did not acquire Controlling Class CMBS in 2000 and 2002.

	Loss Expectation	Underlying Loan Balance *	% of Collateral
	-----	-----	-----
1998	\$158,292	\$7,418,035	2.13%

*net of defeased loans

The CMAC 98-C2 CMBS transaction credit performance has lagged all other transactions in the Company's CMBS portfolio and is the only 1998 vintage transaction owned by the Company which has delinquencies above that of the Lehman Brothers Conduit Guide covering 1998 vintage transactions. During the second quarter of 2003, the outstanding principal balance of the CMAC 98-C2 Class M security was reduced by \$6,996 to \$36,406 by the servicer of the CMBS trust. Eleven underlying loans with an original principal of \$24,342 have been resolved with a weighted average loss severity of 34.6%; five loans resulted in no loss. The Company has active loss mitigation strategies with respect to the loan seller including pursuing an indemnification, initiating a put back of an asset, and initiating litigation against the loan seller regarding misrepresentations made in connection with one of the loans.

Over the remainder of 2003, the Company expects an additional seven underlying loan resolutions for CMAC 98-C2. These seven loans have an original principal balance of \$62,768. Fitch Ratings has placed the B and B- rated classes of CMAC 98-C2 on negative watch due to the pending loan resolutions. The delinquency experience of the underlying loans in CMAC 98-C2 is 3.67% and is the highest of the three transactions and significantly above delinquencies for comparable 1998 transactions as reported in the Lehman Brothers Conduit Guide. The June 30, 2003 impairment charge related to the non-rated and CCC rated classes of this transaction is \$19,217, or \$0.40 per share. As of June 30, 2003, the adjusted purchase price of the CCC rated class is \$2,001; the non-rated security does not have an adjusted purchase price.

The Company owns 65% of the non-rated Class M security from the LBCMT 98-C1 CMBS transaction. During the second quarter of 2003, the outstanding principal balance for this security was reduced by \$9,284 to \$7,991 by the servicer of the CMBS trust. Two loans with an original par of \$29,779 were

24

resolved and resulted in a 32.1% loss severity. The June 30, 2003 impairment charge related to this security is \$5,573, or \$0.12 per share. As of June 30, 2003, the adjusted purchase price for this security is \$572.

The Company also owns 65% of the non-rated Class N security of the GMAC 1998-C1 CMBS transaction. During the second quarter 2003, the principal balance for this security was reduced by \$904 to \$8,396 by the servicer of the CMBS trust. One loan was resolved at a loss of \$887, which represented a 17.1% loss severity. The June 30, 2003 impairment charge related to this security is \$2,224, or \$0.05 per share. As of June 30, 2003, the adjusted purchase price for this security is \$149.

Prior to the impairment charge, the weighted average loss-adjusted yield on the Company's Controlling Class CMBS was 10.25%. After the impairment charge, the weighted average loss-adjusted yield is 10.14%.

The Company monitors credit performance on a monthly basis and debt service coverage ratios on a quarterly basis. Using these and other statistics, the Company maintains watch lists for loans that are delinquent thirty days or more and for loans that are not delinquent but have issues that the Company feels require close monitoring.

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

The Company considers delinquency and loss information from the Lehman Brothers Conduit Guide to be the most relevant measure of credit performance and market conditions applicable to its Controlling Class CMBS holdings. The year of issuance, or vintage year, is important, as older loan pools will tend to have more delinquencies than newly underwritten loans and different vintages will have different credit performance based on the real estate credit cycle.

The table below shows the Lehman Brothers June 2003 Conduit Guide delinquency statistics by vintage year.

	Delinquency as a % of Underlying Loans	Losses Recognized as % of Underlying Loans
1998	2.22%	0.42%
1999	1.91%	0.15%
2001	0.77%	0.03%
2003	0.02%	0.00%

Morgan Stanley also tracks CMBS loan delinquencies for specific CMBS transactions with more than \$200,000 of collateral and that have been seasoned for at least one year. This seasoning criterion will generally adjust for the lower delinquencies that occur in newly originated collateral. As of June 30, 2003, the Morgan Stanley index indicated that delinquencies on 219 securitizations was 2.19%, and as of March 31, 2003, this same index indicated that delinquencies on 210 securitizations was 2.12%. See Item 3 - "Quantitative and Qualitative Disclosures About Market Risks" for a detailed discussion of how delinquencies and loan losses affect the Company.

The table below shows current delinquency and underlying loan losses recognized on the Company's Controlling Class CMBS, and the impact of increased underlying loan loss expectations as a percentage of underlying loans.

25

	June 30, 2003 Underlying Loan Delinquency	Revised Underlying Loan Loss Expectations***	Actual Losses Recognized as of Loss Expectations
CMAC 98-C2	3.67%	2.63%	26.46%

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

- *As a % of cutoff balance
- **As of July 31, 2003 there are no delinquencies in 2003 underlying loans as one delinquent loan became current.
- ***Net of defeased loans

As shown, the Company's delinquency experience and loss experience are both lower than the Lehman Brothers Conduit Guide information for all vintage years with the exception of one transaction.

At June 30, 2003, the total par of the Company's other below investment grade CMBS was \$268,569; the total credit protection, or subordination level, of this portfolio is 5.96%. The total par of the Company's Controlling Class CMBS at June 30, 2003 was \$761,622 and the total par of the loans (net of defeased loans) underlying these securities was \$10,117,191. The non-rated security is the first to absorb underlying loan losses until its par is completely written off.

26

The Company's investment in its Controlling Class CMBS by credit rating category at June 30, 2003 is as follows:

	Par	Fair Market Value	Dollar Price	Adjusted Purchase Price	Dollar Price	Subordination Level
BB+	\$80,286	\$70,960	88.38	\$68,792	85.68	7.59%

<hr/>						
Total	\$690,052	\$369,365	53.53	\$438,262	63.51	

As additional Controlling Class CMBS are added, the Company has been increasing the loss assumptions to take into account slower economic activity. Additionally, the Company plans to perform a detailed re-underwriting for a significant amount of the collateral from its 1998 vintage CMBS over the next 15 months. Upon completion, the Company may determine that its Reported Yields and book values need to be adjusted. The result of assuming greater losses, if that were the conclusion, would be an other than temporary writedown of CMBS to their market value which would include the realization of the amounts currently carried as unrealized losses on the Company's consolidated statements of financial condition. The result of assuming lower losses, if that were the conclusion, would be to increase the yield on the security, which would increase income. The Company feels this approach provides the appropriate discipline to maintain steady earnings over the long-term from this portfolio.

See Item 3 -"Quantitative and Qualitative Disclosures About Market Risk" for a discussion of how differences between estimated and actual losses could affect Company earnings.

27

Of the 29 delinquent loans shown on the chart in Note 4 of the consolidated financial statements, one was delinquent due to technical reasons, five were REO and being marketed for sale and the remaining 23 loans were in some form of workout negotiations. Aggregate realized losses of \$702 were realized in the second quarter of 2003. This brings cumulative net losses realized to \$25,149, which is 10.9% of total estimated losses. These losses include special servicer and other workout expenses. This experience to date is in line with the Company's loss expectations. Realized losses are expected to increase on the underlying loans as the portfolio ages. Special servicer expenses are also expected to increase as portfolios mature and U.S. economic activity remains weak.

During the second quarter of 2003, the underlying loans were paid down by \$23,323. Pay down proceeds are distributed to the highest rated CMBS class first and reduce the percent of total underlying collateral represented by each rating category.

The Company manages its credit risk through disciplined underwriting, diversification, active monitoring of loan performance and exercise of its right to control the workout process as early as possible. The Company maintains diversification of credit exposures through its underwriting process and can shift its focus in future investments by adjusting the mix of loans in subsequent acquisitions. The comparative profiles of the loans underlying the Company's CMBS by property type as of June 30, 2003 and December 31, 2002 is as follows:

	6/30/03 Exposure		12/31/02 Exposure	
Property Type	Loan Balance	% of Total	Loan Balance	% of Total

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Multifamily	\$3,538,106	34.0%	\$3,302,387	34.4%
Retail	2,999,191	28.8	2,704,952	28.1
Office	2,134,521	20.5	1,809,519	18.8
Lodging	791,500	7.6	834,854	8.7
Industrial	587,920	5.6	589,044	6.1
Healthcare	342,382	3.3	346,298	3.6
Parking	25,817	0.2	29,743	0.3
Total	\$10,419,437	100%	\$9,616,797	100%

As of June 30, 2003, the fair market value of the Company's holdings of subordinated CMBS is \$44,289 lower than the adjusted cost for these securities. This difference relates primarily to 1998 vintage CMBS transactions. This decline in the value of the investment portfolio represents market valuation changes since 1998 and is not due to actual credit experience or credit expectations. The adjusted purchase price of the Company's Controlling Class CMBS portfolio as of June 30, 2003 represents approximately 63% of its par amount. The market value of the Company's Controlling Class CMBS portfolio as of June 30, 2003 represents approximately 55% of its par amount. As the portfolio matures, the Company expects to recoup the unrealized losses, provided that the actual credit losses experienced for each class of security in a transaction are not greater than the credit losses assumed in the purchase analysis of those individual securities.

As the portfolio matures and expected losses occur, subordination levels of the lower rated classes of a CMBS investment will be reduced. This may cause the lower rated classes to be downgraded, which

28

would negatively affect their market value and therefore the Company's net asset value even though the expected cash flows might not change. Reduced market value will negatively affect the Company's ability to finance any such securities that are not financed through a CDO or similar matched funding vehicle. In some cases, securities held by the Company may be upgraded to reflect seasoning of the underlying loans and thus would increase the market value of the securities.

The Company's income for its CMBS securities is computed based upon a yield which assumes credit losses. The yield to compute the Company's taxable income does not assume the occurrence of credit losses, as a loss can only be deducted for tax purposes when it has occurred. As a result, for the years ended December 31, 1998 through the six months ended June 30, 2003, the Company's income accrued on its CMBS assets was approximately \$23,619 lower than the taxable income accrued on the CMBS assets.

Commercial Real Estate Loan Activity

The Company's commercial real estate loan portfolio generally emphasizes larger transactions located in metropolitan markets, as compared to the typical loan in the CMBS portfolio. There are no delinquencies in the Company's commercial real estate loan portfolio, which is relatively small and heterogeneous. The Company has determined it is not necessary to establish a loan loss reserve for this portfolio.

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

The following table summarizes the Company's commercial real estate loan portfolio by property type as of June 30, 2003 and December 31, 2002:

Property Type	June 30, 2003			December 31, 2002	
	Par Outstanding		Weighted Average Coupon	Par Outstanding	
	Amount	%	%	Amount	%
Office	\$50,487	73.9%	8.7%	\$69,431	91.4%
Hotel	15,000	21.9	6.6	-	-
Multifamily	2,867	4.2	3.9	3,013	4.0
Retail	-	-	-	3,500	4.6
Total	\$68,354	100.0%	8.1%	\$75,944	100.0%

Residential Mortgage Backed Securities

During the second quarter of 2003, the Company reduced its investments in RMBS as the need to maintain liquid assets continued to decline. Total investment in RMBS was reduced by over 40% from December 31, 2002 and March 31, 2003 levels. The Company's remaining investments in RMBS at June 30, 2003 is \$888,878. By reducing the Company's investments in RMBS, net income will be reduced; however, less reliance on RMBS is expected to provide greater stability of the Company's net income over the long term. The RMBS markets have been extremely volatile on a mark-to-market basis as prepayments reached record levels through June 2003, and as interest rates increased sharply in June and July 2003. While the Company intends to limit its investment in RMBS, its ability to do so may be

29

hampered in the near term by the Company's requirement to maintain 55% of its assets as qualified real estate in order to qualify for exclusion from regulation as an investment company under the Investment Company Act of 1940.

At the beginning of the second quarter, the Company changed its strategy of hedging RMBS from U.S. Treasury futures to utilizing interest rate swaps which, while more expensive to use, have tended to demonstrate a more consistent relationship with RMBS. This change resulted in an increase in the Company's swap notional by \$606,000, and caused a reduction in net income of \$0.04 per share for the quarter. A breakdown of the RMBS portfolio income performance for the three and six months ended June 30, 2003 is as follows:

For the three months ended June 30, 2003	For the six June 30,
---	-------------------------

* Includes hedging expense

Recent Events

On June 30, 2003, the Company's loan on a Los Angeles office building matured. Upon transfer of the asset securing the Los Angeles loan and pursuant to the loan documents, the Company was entitled to a supplemental exit fee that was to be paid upon repayment of the loan. The loan was repaid in full; however, the borrower has refused to pay the supplemental exit fee. The Company filed suit on July 15, 2003 against the co-borrowers, MP-555 West Fifth Mezzanine, LLC and MP-808 South Olive Mezzanine, LLC, which are both affiliates of Maguire Properties, Inc. (NYSE: MPG). The suit also names the Guarantor, Robert F. Maguire, III.

During the month of July 2003, the RMBS index turned in its worst performance ever according to the fixed income research department at Lehman Brothers. This caused RMBS investors to continuously increase hedges in the swap market. Swap spreads reacted by widening out from 34.25 basis points at June 30, 2003 to 58 basis points at July 31, 2003. The Company believes this caused the significant drop in stock prices for the mortgage REIT sector that started late July and continued into August. The Company was able to navigate the unfavorable RMBS market as the Company had sufficient liquidity to avoid selling at distressed levels. Switching to swaps as a hedge before the market turmoil started in late July enabled the Company to maintain a much greater degree of stability in the RMBS portfolio.

Long-term interest rates rose dramatically in July and early August of 2003 with the yield on the ten-year Treasury rising by over 80 basis points from June 30, 2003. Since the Company typically maintains a positive sensitivity of book value to changes in long term rates, any increase in interest rates will tend to

30

lower the Company's book value absent offsetting factors. (See "Item 3-Quantitative and Qualitative Disclosures about Market Risk"). For assets such as RMBS financed with repurchase agreements, an increase in yields can result in a decline in value forcing a sale of assets to maintain liquidity. The sale of income producing assets would result in a decline in net interest income. The Company was not required to sell assets to maintain liquidity in the second or third quarter.

II. Results of Operations

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Net loss for the three months ended June 30, 2003 was \$(11,003) or \$(0.26) per share (\$0.26 diluted per share). Net income for the three months ended June 30, 2002 was \$12,741 or \$0.25 per share (\$0.25 diluted per share). The decrease in income from 2002 to 2003 is primarily due to a \$27,014 impairment charge on the Company's below investment grade CMBS securities.

Interest Income: The following tables set forth information regarding the total amount of income from certain of the Company's interest-earning assets.

	For the Three Months Ended June 30, 2003	2002
	Interest Income	Interest Income
CMBS	\$17,823	\$14,470
Other securities	12,213	12,468

32

	For the Six Months Ended June 30,	
	2003	2002
	Interest Expense	Interest Expense
Reverse repurchase agreements	\$11,065	\$16,009
Lines of credit and term loan	370	1,547
CDO liabilities	13,625	1,376
	=====	=====
Total	\$25,060	\$18,932
	=====	=====

The foregoing interest expense amounts for the three and six months ended June 30, 2003 do not include \$(21) and \$241, respectively, of interest expense related to hedge ineffectiveness and \$9,091 and \$16,141, respectively, of interest expense related to swaps; and for the three and six months ended June 30, 2002 do not include \$963 and (\$212), respectively, of interest expense related to hedge ineffectiveness and \$4,421 and \$8,394, respectively, of interest expense related to swaps. See Note 10 in the consolidated financial statements, Derivative Instruments, for a further description of the Company's hedge ineffectiveness.

Net Interest Margin and Net Interest Spread from the Portfolio: The Company considers its portfolio to consist of its securities available-for-sale, mortgage loan pools, commercial mortgage loans and cash and cash equivalents because these assets relate to its core strategy of acquiring and originating high yield loans and securities backed by commercial real estate, while at the same time maintaining a portfolio of investment grade securities to enhance the Company's liquidity.

Net interest margin from the portfolio is annualized net interest income from the portfolio divided by the average market value of interest-earning assets in the portfolio. Net interest income from the portfolio is total interest income from the portfolio less interest expense relating to collateralized

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

borrowings. Net interest spread from the portfolio equals the yield on average assets for the period less the average cost of funds for the period. The yield on average assets is interest income from the portfolio divided by average amortized cost of interest earning assets in the portfolio. The average cost of funds is interest expense from the portfolio divided by average outstanding collateralized borrowings.

The following chart summarizes the interest income, interest expense, net interest margin and net interest spread for the Company's portfolio. The interest income and interest expense amounts exclude income and expense related to real estate joint ventures, equity investment and hedge ineffectiveness.

	For the Three Months Ended June 30, 2003	2002
Interest income	\$41,470	\$38,276
Interest expense	\$21,751	\$14,498
Net interest margin	3.05%	4.67%
Net interest spread	2.66%	4.12%

Other Expenses: Expenses other than interest expense consist primarily of management fees and general and administrative expenses. Management fees paid to the Manager of \$2,649 and \$5,226 for the three and six months ended June 30, 2003, respectively, and were solely base management fees. Management fees paid to the Manager of \$2,278 for the three months ended June 30, 2002 were

33

solely base management fees and fees paid to the Manager of \$7,685 for the six months ended June 30, 2002 were comprised of base management fees of \$4,496 and incentive fees of \$3,189. Other expenses/income-net of \$591 and \$1,173 for the three and six months ended June 30, 2003, respectively, and \$497 and \$1,073 for the three and six months ended June 30, 2002, respectively, were comprised of accounting agent fees, custodial agent fees, directors' fees, fees for professional services, insurance premiums and due diligence costs.

Other Net Gain (Loss): During the six months ended June 30, 2003 and 2002, the Company sold a portion of its securities available-for-sale for total proceeds of \$977,843 and \$678,724, respectively, resulting in a realized gain of \$3,435 and \$75 for the six months ended June 30, 2003 and 2002, respectively. The losses on securities held for trading were \$(4,716) and \$(11,914) for the three months ended June 30, 2003 and 2002, respectively, and \$(15,119) and \$(7,900) for the six months ended June 30, 2003 and 2002, respectively. The foreign currency gains (losses) of \$18 for the three months ended June 30, 2002 and \$(229) for the six months ended June 30, 2002 relate to the Company's net investment in a commercial mortgage loan denominated in pounds sterling and associated hedging, which was subsequently paid off in December 2002.

Dividends Declared: On May 20, 2003, the Company declared dividends to its stockholders of \$.35 per share, which was paid on July 31, 2003 to stockholders of record on June 30, 2003.

34

Changes in Financial Condition

Securities Available for Sale: The Company's securities available for sale, which are carried at estimated fair value, included the following at June 30,

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

2003 and December 31, 2002:

Security Description	June 30, 2003 Estimated Fair Value	Percentage	December 31, Estimate Fair Value

Non-rated subordinated securities	19,367	0.9	2
Credit tenant lease	9,315	0.5	
Investment grade REIT debt	228,292	11.4	18
Total CMBS	1,147,398	57.3	89
Single-family residential mortgage-backed securities:			
Agency adjustable rate securities	36,555	1.8	4
Agency fixed rate securities	798,304	39.9	
Residential CMOs	8,264	0.4	1
Hybrid arms	10,854	0.6	1
Total RMBS	853,977	42.7	7
Total securities available for sale	\$2,001,375	100.0%	\$97

The increase in the CMBS and investment grade REIT debt is attributable to the attractive opportunities available to the Company to match fund these assets in its two CDOs.

Borrowings: As of June 30, 2003, the Company's debt consisted of collateralized debt obligations, line-of-credit borrowings, and reverse repurchase agreements, collateralized by a pledge of most of the Company's securities available for sale, securities held for trading, and its commercial mortgage loans. The Company's financial flexibility is affected by its ability to renew or replace on a continuous basis its maturing short-term borrowings. As of June 30, 2003, the Company has obtained financing in amounts and at interest rates consistent with the Company's short-term financing objectives.

Under the lines of credit and reverse repurchase agreements, the lender retains the right to mark the underlying collateral to market value. A reduction in the value of its pledged assets would require the Company to provide additional collateral or fund margin calls. From time to time, the Company expects that it will be required to provide such additional collateral or fund margin calls.

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

The following table sets forth information regarding the Company's collateralized borrowings:

	For the Six Months End June 30, 2003	
	June 30, 2003 Balance	Maximum Balance
Collateralized debt obligations	\$684,778	\$684,902
Reverse repurchase agreements	993,152	1,858,434
Line of credit and term loan borrowings	35,824	36,761

Hedging Instruments: From time to time, the Company may reduce its exposure to market interest rates by entering into various financial instruments that adjust portfolio duration. These financial instruments are intended to mitigate the effect of changes in interest rates on the value of certain assets in the Company's portfolio. At June 30, 2003, the Company had outstanding short positions of 123 ten-year U.S. Treasury Note future contracts. At December 31, 2002, the Company had outstanding short positions of 3,166 five-year and 1,126 ten-year U.S. Treasury Note future contracts.

Interest rate swap agreements as of June 30, 2003 and December 31, 2002 consisted of the following:

	June 30, 2003			
	Notional Value	Estimated Fair Value	Unamortized Cost	Weighted Average Remaining T
Interest rate swaps	\$695,000	\$(19,721)	\$0	3.76 year
Interest rate swaps - CDO	629,472	(45,504)	0	9.68 year
Total	\$1,324,472	\$(65,225)	\$0	6.57 year

	December 31, 2002			
	Notional Value	Estimated Fair Value	Unamortized Cost	Weighted Average Remaining

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Interest rate swaps	\$489,000	\$(11,948)	\$0	1.79 year
Interest rate swaps - CDO	653,832	(33,654)	0	9.60 year

Total	\$1,142,832	\$(45,602)	\$0	6.31 year
	=====			

As of June 30, 2003, the Company had designated \$1,152,927 notional of the interest rate swap agreements as cash flow hedges. As of December 31, 2002, the Company had designated \$771,287 notional of the interest rate swap agreements as cash flow hedges.

36

Capital Resources and Liquidity

Liquidity is a measurement of the Company's ability to meet potential cash requirements, including ongoing commitments to repay borrowings, fund investments, loan acquisition and lending activities and for other general business purposes. The primary sources of funds for liquidity consist of collateralized borrowings, principal and interest payments on and maturities of securities available for sale, securities held for trading and commercial mortgage loans, and proceeds from the maturity or sales thereof.

To the extent that the Company may become unable to maintain its borrowings at their current level due to changes in the financing markets for the Company's assets, the Company may be required to sell assets in order to achieve lower borrowing levels. In this event, the Company's level of net income would decline. The Company's principal strategies for mitigating this risk are to maintain portfolio leverage at levels it believes are sustainable and to diversify the sources and types of available borrowing and capital. The Company has utilized committed bank facilities and preferred stock offerings, and will consider resecuritization or other achievable term funding of existing assets.

On May 29, 2003, the Company authorized and issued 2,300,000 shares of Series C Preferred Stock, including 300,000 shares of Series C Preferred Stock issued pursuant to an option granted to the underwriters to cover over-allotments. The Series C Preferred Stock is perpetual, carries a 9.375% coupon, and has a preference in liquidation of \$57,500. The aggregate net proceeds to the Company (after deducting underwriting fees and expenses) were approximately \$55,513.

On May 29, 2003, the Company redeemed 155,000 shares of the Company's 10% Series B Cumulative Convertible Redeemable Preferred Stock, par value \$0.001 per share ("Series B Preferred Stock"), at its par value of \$25 per share.

In March 2002, the holders of the Company's Series A Preferred Stock converted its remaining 10,000 shares of the Series A Preferred Stock into 34,427 shares of Common Stock at a price of \$7.26 per share pursuant to the terms of such preferred stock, which is \$0.09 per share lower than the original conversion price due to the effects of anti-dilution provisions in the Series A Preferred Stock.

For the three and six months ended June 30, 2003, the Company issued 353,065 and 686,393 shares, respectively, of Common Stock under its Dividend Reinvestment and Stock Purchase Plan. Net proceeds to the Company were approximately \$4,179 and \$7,697, respectively.

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

As of June 30, 2003, \$149,176 of the Company's \$185,000 committed credit facility with Deutsche Bank, AG was available for future borrowings. As of June 30, 2003, there were no outstanding borrowings under the Company's \$75,000 committed credit facility with Greenwich Capital, Inc.

The Company's operating activities provided cash flows of \$739,768 and \$77,603 during the six months ended June 30, 2003 and 2002, respectively, primarily through net income (loss) and sales of trading securities in excess of purchases.

The Company's investing activities (used) provided cash flows totaling \$(326,367) and \$461,031 during the six months ended June 30, 2003 and 2002, respectively, primarily to purchase securities available for sale offset by significant sales of securities.

37

The Company's financing activities used \$(423,840) and \$(562,140) during the six months ended June 30, 2003 and 2002, respectively, primarily from reductions of the level of short-term borrowings and net of the Series C Preferred Stock offering in 2003.

Although the Company's portfolio of securities available for sale was acquired at a net discount to the face amount of such securities, the Company has received to date, and expects to continue to have, sufficient cash flows from its portfolio to fund dividends to stockholders.

The Company is subject to various covenants in its lines of credit, including maintaining a minimum GAAP net worth of \$305,000, a debt-to-equity ratio not to exceed 5.5 to 1, a minimum cash requirement based upon certain debt to equity ratios, a minimum debt service coverage ratio of 1.5, and a minimum liquidity reserve of \$10,000. As a result of the June 30, 2003 impairment charge the Company did not maintain the minimum debt service coverage ratio for the quarter of 1.5; the lender Deutsche Bank, AG agreed to waive this requirement. As of June 30, 2003, the Company was in compliance with all other covenants.

The Company's ability to execute its business strategy depends to a significant degree on its ability to obtain additional capital. Factors that could affect the Company's access to the capital markets, or the costs of such capital, include changes in interest rates, general economic conditions and perception in the capital markets of the Company's business, covenants under the Company's current and future credit facilities, results of operations, leverage, financial conditions and business prospects. Current conditions in the capital markets for REITs such as the Company have made permanent financing transactions difficult and more expensive than at the time of the Company's initial public offering. Consequently, there can be no assurance that the Company will be able to effectively fund future growth. Except as discussed herein, management is not aware of any other trends, events, commitments or uncertainties that may have a significant effect on liquidity.

Contingent Liability

On May 15, 2000, the Company completed the acquisition of CORE Cap, Inc. The merger was a stock for stock acquisition where the Company issued 4,180,552 shares of its Common Stock and 2,261,000 shares of its Series B Preferred Stock. At the time of the CORE Cap acquisition, the Manager agreed to pay GMAC (CORE Cap, Inc.'s external advisor) \$12,500 over a ten-year period (the "Installment Payment") to purchase the right to manage the assets under the

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

existing management contract (the "GMAC Contract"). The GMAC Contract had to be terminated in order to allow for the Company to complete the merger, as the Company's Management Agreement with the Manager did not provide for multiple managers. As a result, the Manager offered to buy-out the GMAC Contract as the Manager estimated it would receive incremental fees above and beyond the Installment Payment, and thus was willing to pay for, and separately negotiate, the termination of the GMAC Contract. Accordingly, the value of the Installment Payment was not considered in the Company's allocation of its purchase price to the net assets acquired in the acquisition of CORE Cap, Inc. The Company agreed that should the Management Agreement with its Manager be terminated, not renewed or not extended for any reason other than for cause, the Company would pay to the Manager an amount equal to the Installment Payment less the sum of all payments made by the Manager to

38

GMAC. As of June 30, 2003, the Installment Payment would be \$8,000 payable over seven years. The Company does not accrue for this contingent liability.

Transactions with Affiliates

The Company has a Management Agreement with the Manager, a majority owned indirect subsidiary of PNC Bank and the employer of certain directors and officers of the Company, under which the Manager manages the Company's day-to-day operations, subject to the direction and oversight of the Company's Board of Directors. On March 25, 2002, the Management Agreement was extended for one year through March 27, 2003, with the approval of the unaffiliated directors, on terms similar to the prior agreement with the following changes: (i) the incentive fee calculation would be based on earnings determined in accordance with GAAP instead of funds from operations, (ii) the removal of the four-year period to value the Management Agreement in the event of termination and (iii) subsequent renewal periods of the Management Agreement would be for one year instead of two years. The Board was advised by Houlihan Lokey Howard & Zukin Financial Advisors, Inc., a national investment banking and financial advisory firm, in the renewal process.

On March 6, 2003, the unaffiliated directors approved an extension of the Management Agreement from its expiration of March 27, 2003 for one year through March 31, 2004. The terms of the renewed agreement are similar to the prior agreement except for the incentive fee calculation which would provide for a rolling four-quarter high watermark rather than a quarterly calculation. In determining the rolling four-quarter high watermark, the Company would calculate the incentive fee as defined, based upon the current and prior three quarters' net income. The Manager would be paid an incentive fee in the current quarter if the Yearly Incentive Fee is greater than what was paid to the Manager in the prior three quarters cumulatively. The Company commenced the phase-in of the rolling four-quarter high watermark commencing during the second quarter of 2003. Calculation of the incentive fee will be based on GAAP and adjusted to exclude special one-time events pursuant to changes in GAAP accounting pronouncements after discussion between the Manager and the unaffiliated directors. The incentive fee threshold did not change. The high watermark will be based on the existing incentive fee hurdle, which provides for the Manager to be paid 25% of the amount of earnings (calculated in accordance with GAAP) per share that exceeds the product of the adjusted issue price of the Company's common stock per share (\$11.38 as of June 30, 2003) and the greater of 9.5% or 350 basis points over the ten-year Treasury note, which equates to an annual net income threshold of \$1.08 per share.

The Company pays the Manager an annual base management fee equal to a percentage of the average invested assets of the Company as defined in the

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

Management Agreement. The base management fee is equal to 1% per annum of the average invested assets rated less than BB- or not rated, 0.75% of average invested assets rated BB- to BB+, and 0.20% of average invested assets rated above BB+.

The Company incurred \$2,649 and \$5,226 in base management fees in accordance with the terms of the Management Agreement for the three and six months ended June 30, 2003, respectively, and \$2,278 and \$4,497 in base management fees for the three and six months ended June 30, 2002, respectively. In accordance with the provisions of the Management Agreement, the Company recorded reimbursements to the Manager of \$12 and \$18 for certain expenses incurred on behalf of the Company during the three and six months ended June 30, 2003, respectively, and \$6 and \$11 for the three and six months ended June 30, 2002, respectively.

39

Pursuant to the March 25, 2002 one-year Management Agreement extension, the incentive fee paid to the Manager was based on 25% of earnings (calculated in accordance with GAAP) of the Company. For purposes of calculating the incentive fee during 2002, the cumulative transition adjustment of \$6,327 resulting from the Company's adoption of SFAS 142 was excluded from earnings in its entirety and included using an amortization period of three years. The Company incurred \$3,188 in incentive fees for the six months ended June 30, 2002. There was no incentive fee due to the Manager for the three or six months ended June 30, 2003 and the three months ended June 30, 2002.

On March 17, 1999, the Company's Board of Directors approved an administration agreement with the Manager and the termination of a previous agreement with an unaffiliated third party. Under the terms of the administration agreement, the Manager provides financial reporting, audit coordination and accounting oversight services to the Company. The Company pays the Manager a monthly administrative fee at an annual rate of 0.06% of the first \$125 million of average net assets, 0.04% of the next \$125 million of average net assets and 0.03% of average net assets in excess of \$250 million subject to a minimum annual fee of \$120. For the three and six months ended June 30, 2003, the administration fee was \$43 and \$86, respectively. For the three and six months ended June 30, 2002, the administration fee was \$43 and \$86, respectively.

On July 20, 2001, the Company entered into a \$50 million commitment to acquire shares in Carbon Capital, Inc. ("Carbon"), a private commercial real estate income opportunity fund managed by the Manager. The period during which the Company may be required to purchase shares under the commitment expires in July 2004. On June 30, 2003, the Company owned 18.8% of the outstanding shares in Carbon. The Company's remaining commitment at June 30, 2003 and December 31, 2002 was \$32,436 and \$35,116, respectively. On February 6, 2003, the Company funded a capital call notice in the amount of \$2,680, which was used by Carbon to acquire a mezzanine loan secured by ownership interests in an entity that owns a mixed-use development.

REIT Status:

The Company has elected to be taxed as a REIT and therefore must comply with the provisions of the Internal Revenue Code of 1986 with respect thereto. Accordingly, the Company generally will not be subject to Federal income tax to the extent of its distributions to stockholders and as long as certain asset, income and stock ownership tests are met. The Company may, however, be subject to tax at corporate rates or at excise tax rates on net income or capital gains not distributed.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk: Market risk is the exposure to loss resulting from changes in interest rates, credit curve spreads, foreign currency exchange rates, commodity prices and equity prices. The primary market risks to which the Company is exposed are interest rate risk and credit curve risk. Interest rate risk is highly sensitive to many factors, including governmental, monetary and tax policies, domestic and international economic and political considerations and other factors beyond the control of the Company. Credit curve risk is highly sensitive to dynamics of the markets for commercial mortgage securities and other loans and securities held by the Company. Excessive supply of these assets combined with reduced demand will cause the market to require a higher yield. This demand for higher yield will cause the market to use a higher spread over the U.S. Treasury securities yield curve, or other benchmark interest rates, to value these assets. Changes in the general level of the U.S. Treasury yield curve can have significant effects on the market value of the Company's portfolio.

The majority of the Company's assets are fixed rate securities valued based on a market credit spread to U.S. Treasuries. As U.S. Treasury securities are priced to a higher yield and/or the spread to U.S. Treasuries used to price the Company's assets is increased, the market value of the Company's portfolio may decline. Conversely, as U.S. Treasury securities are priced to a lower yield and/or the spread to U.S. Treasuries used to price the Company's assets is decreased, the market value of the Company's portfolio may increase. Changes in the market value of the Company's portfolio may affect the Company's net income or cash flow directly through their impact on unrealized gains or losses on securities held for trading or indirectly through their impact on the Company's ability to borrow. Changes in the level of the U.S. Treasury yield curve can also affect, among other things, the prepayment assumptions used to value certain of the Company's securities and the Company's ability to realize gains from the sale of such assets. In addition, changes in the general level of the LIBOR money market rates can affect the Company's net interest income. The majority of the Company's liabilities are floating rate based on a market spread to U.S. LIBOR. As the level of LIBOR increases or decreases, the Company's interest expense will move in the same direction.

The Company may utilize a variety of financial instruments, including interest rate swaps, caps, floors and other interest rate exchange contracts, in order to limit the effects of fluctuations in interest rates on its operations. The use of these types of derivatives to hedge interest-earning assets and/or interest-bearing liabilities carries certain risks, including the risk that losses on a hedge position will reduce the funds available for payments to holders of securities and that such losses may exceed the amount invested in such instruments. A hedge may not perform its intended purpose of offsetting losses or increased costs. Moreover, with respect to certain of the instruments used as hedges, the Company is exposed to the risk that the counterparties with which the Company trades may cease making markets and quoting prices in such instruments, which may render the Company unable to enter into an offsetting transaction with respect to an open position. If the Company anticipates that the income from any such hedging transaction will not be qualifying income for REIT income test purposes, the Company may conduct part or all of its hedging activities through a to-be-formed corporate subsidiary that is fully subject to federal corporate income taxation. The profitability of the Company may be adversely affected during any period as a result of changing interest rates.

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

The following tables quantify the potential changes in the Company's net portfolio value and net interest income under various interest rates and credit-spread scenarios. The Company views the probability of

41

interest rate changes in terms of standard deviation units. Based on historical data, there is a 68% and 95% statistical probability that rates remained in a range of one and two standard deviation units, respectively. This statistical computation provides a historical context for analyzing changes in interest rates. Net portfolio value is defined as the value of interest-earning assets net of the value of interest-bearing liabilities. It is evaluated using an assumption that interest rates, as defined by the U.S. Treasury yield curve, increase or decrease and the assumption that the yield curves of the rate shocks will be parallel to each other.

Net interest income is defined as interest income earned from interest-earning assets net of the interest expense incurred by the interest-bearing liabilities. It is evaluated using the assumptions that interest rates, as defined by the U.S. LIBOR curve, increase or decrease and the assumption that the yield curves of the LIBOR rate shocks will be parallel to each other. Market value in this scenario is calculated using the assumption that the U.S. Treasury yield curve remains constant.

All changes in income and value are measured as percentage changes from the respective values calculated in the scenario labeled as "Base Case." The base interest rate scenario assumes interest rates as of June 30, 2003. Actual results could differ significantly from these estimates.

Projected Percentage Change In Portfolio Net Market Value Given U.S. Treasury Yield Curve Movements

Change in Treasury Yield Curve, +/- Basis Points	Projected Change in Portfolio Net Market Value
-200	4.8%
-100	4.1%
-50	2.5%
Base Case	0
+50	(3.3)%
+100	(7.5)%
+200	(18.5)%

Projected Percentage Change In Portfolio Net Market Value Given Credit Spread Movements

Change in Credit Spreads, +/- Basis Points	Projected Change in Portfolio Net Market Value
-200	9.2%
-100	6.3%
-50	3.6%
Base Case	0
+50	(4.4)%
+100	(9.8)%
+200	(22.9)%

Projected Percentage Change In Portfolio Net Interest Income
Given LIBOR Movements

Change in LIBOR, +/- Basis Points	Projected Change in Portfolio Net Interest Income	Projected Change in Portfolio Net Interest Income per Share
-100	4.2%	\$0.07
-50	2.1%	\$0.03
Base Case	0	0
+50	(2.1)%	\$(0.03)
+100	(4.2)%	\$(0.07)
+200	(8.5)%	\$(0.14)

The Company's exposure to changes in short-term interest rates would result in a \$0.035 change in net income for every 50 basis point change in LIBOR. The aggregate sensitivity to short-term rates has not changed year over year. However, as detailed above, a significant portion of the Company's illiquid credit sensitive CMBS was match funded in 2002 with no short-term rate risk. As of June 30, 2003, the majority of the Company's short-term rate exposure was concentrated in the highly liquid RMBS portfolio which can be adjusted quickly to react to changes in short-term rates.

Credit Risk: The Company's portfolios of commercial real estate assets are subject to a high degree of credit risk. Credit risk is the exposure to loss from loan defaults. Default rates are subject to a wide variety of factors, including, but not limited to, property performance, property management, supply/demand factors, construction trends, consumer behavior, regional economics, interest rates, the strength of the American economy and other factors beyond the control of the Company.

All loans are subject to a certain probability of default. The Company underwrites its CMBS investments assuming the underlying loans will suffer a certain dollar amount of defaults and these defaults will lead to some level of realized losses. Loss adjusted yields are computed based on these assumptions and applied to each class of security supported by the cash flow on the underlying loans. The most significant variables affecting loss adjusted yields include, but are not limited to, the number of defaults, the severity of loss that occurs subsequent to a default and the timing of the actual loss. The different rating levels of CMBS will react differently to changes in these assumptions. The lowest rated securities (B- or lower) are generally more sensitive to changes in timing of actual losses. The higher rated securities (B or higher) are more sensitive to the severity of losses.

The Company generally assumes that all of the principal of a non-rated security and a significant portion, if not all, of CCC and a portion of B-rated securities will not be recoverable over time. The loss adjusted yields of these classes reflect that assumption; therefore, the timing of when the total loss of principal occurs is the key assumption. The interest coupon generated by a security will cease when there is a total loss of its principal regardless of whether that principal is paid. Therefore, timing is of paramount importance because the longer the principal balance remains outstanding, the more interest coupon the holder receives to support a greater economic return. Alternatively, if principal is lost faster than originally assumed, there is less opportunity to receive interest coupon; therefore, a lower or possibly negative return may result. Additional losses occurring due to greater severity will not have a significant effect as all principal is already assumed to be non-recoverable.

If actual principal losses on the underlying loans exceed assumptions, the higher rated securities will be affected more significantly as a loss of principal may not have been assumed. The Company generally assumes that most, if not all, principal will be recovered by classes rated B or higher.

The Company manages credit risk through the underwriting process, establishing loss assumptions and careful monitoring of loan performance. Before acquiring a Controlling Class security that represents a proposed pool of loans, the Company will perform a rigorous analysis of the quality of all of the loans proposed. As a result of this analysis, loans with unacceptable risk profiles will be removed from the proposed pool. Information from this review is then used to establish loss assumptions. The Company will assume that a certain portion of the loans will default and calculate an expected or loss adjusted yield based on that assumption. After the securities have been acquired, the Company monitors the performance of the loans, as well as external factors that may affect their value.

Factors that indicate a higher loss severity or acceleration of the timing of an expected loss will cause a reduction in the expected yield and therefore reduce the earnings of the Company. Furthermore, the Company may be required to write down a portion of the adjusted purchase price of the affected assets through its income statement.

For purposes of illustration, a doubling of the losses in the Company's Controlling Class CMBS, without a significant acceleration of those losses would reduce GAAP income going forward by approximately \$0.21 per share of Common Stock per year and cause a significant write down at the time the loss assumption is changed. The amount of the write down depends on several factors, including which securities are most affected at the time of the write down, but is estimated to be in the range of \$0.60 to \$0.80 per share based on a doubling of expected losses. A significant acceleration of the timing of these losses would cause the Company's net income to decrease. The total adjusted purchase price of Controlling Class CMBS at June 30, 2003 was \$9.93 per share. The amount of adjusted purchase price that is not match funded in a CDO is \$4.26 per share. The Company's exposure to a write down is mitigated by the fact that most of these assets are financed on a non-recourse basis in the Company's CDOs, where a significant portion of the risk of loss is transferred to the CDO bondholders.

Asset and Liability Management: Asset and liability management is concerned with the timing and magnitude of the repricing and/or maturing of assets and liabilities. It is the Company's objective to attempt to control risks associated with interest rate movements. In general, management's strategy is to match the term of the Company's liabilities as closely as possible with the expected holding period of the Company's assets. This is less important for those assets in the Company's portfolio considered liquid as there is a very stable market for the financing of these securities.

Other methods for evaluating interest rate risk, such as interest rate sensitivity "gap" (defined as the difference between interest-earning assets and interest-bearing liabilities maturing or repricing within a given time period), are used but are considered of lesser significance in the daily management of the Company's portfolio. Management considers this relationship when reviewing the Company's hedging strategies. Because different types of assets and liabilities with the same or similar maturities react differently to changes in overall market rates or conditions, changes in interest rates may affect the Company's net interest income positively or negatively even if the Company were to be perfectly matched in each maturity category.

44

The Company currently has positions in forward currency exchange contracts to hedge currency exposure in connection with its commercial mortgage loan denominated in pounds sterling. The purpose of the Company's foreign currency hedging activities is to protect the Company from the risk that the eventual U.S. dollar net cash inflows from the commercial mortgage loan will be adversely affected by changes in exchange rates. The Company's current strategy is to roll these contracts from time to time to hedge the expected cash flows from the loan. Fluctuations in foreign exchange rates are not expected to have a material impact on the Company's net portfolio value or net interest income.

45

ITEM 4. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

(b) Internal Control Over Financial Reporting. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

46

Part II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

At June 30, 2003, there were no pending legal proceedings to which the Company was a party or to which any of its property was subject.

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

On June 24, 2003, the Company issued 7,700 shares of its Common Stock for an aggregate amount of \$65,162 to a former director of a company that was acquired by the Company pursuant to the exercise of stock options held by such former director. These shares were issued in a private placement pursuant to Section 4(2) of the Securities Act of 1933, as amended.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Company held an Annual Meeting of Stockholders on May 20, 2003, pursuant to a Notice of Annual Meeting of Stockholders and Proxy Statement dated April

Edgar Filing: ANTHRACITE CAPITAL INC - Form 10-Q

25, 2003, a copy of which has been filed previously with the Securities and Exchange Commission, at which the Company's stockholders approved the election of two directors for a term of three years and the ratification for the appointment of Deloitte & Touche LLP as the auditors of the financial statements for fiscal year 2003.

Proposal 1: To elect two directors for a three-year term.

Results:

	In Favor -----	Withheld -----
Laurence D. Fink	37,736,260	6,351,748
Kendrick R. Wilson, III	43,778,689	309,319

Proposal 2: To ratify and approve the appointment of Deloitte & Touche LLP as the Company's Independent Auditors for the year ending December 31, 2003.

Results:

For ---	Against -----	Abstain -----
43,840,322	188,008	59,678

There were no broker non-votes with respect to the two proposals. The continuing directors of the Company are Hugh R. Frater, Donald G. Drapkin, Carl F. Geuther, Jeffrey C. Keil and Leon Kendall. David M. Applegate resigned from the Company's Board of Directors on May 20, 2003.
